University of Oregon MEDICAL SCHOOL

3181 S.W. Sam Jackson Park Road Portland, Oregon 97201

Education with a Purpose

Medical care and the education of future physicians, nurses and health workers of all kinds in the United States are undergoing rapid change and expansion. Strikingly new surgical techniques and therapeutic advances are being employed by the profession in the care of the sick; fresh ideas in the approach to the teaching of physicians, nurses and those in the allied health professions are being employed; new medical facilities are being built and others are in the design stages.

This is being done to meet the challenge brought about by the enormous expansion of medical knowledge in the past few decades and the demands placed on doctors and educators alike to cope with the emerging needs in Oregon and the nation to provide adequate health care to all citizens.

The basic purpose of the University of Oregon Medical School is to teach qualified young men and women the art and science of medicine, nursing and allied health sciences and to offer graduate work in the sciences basic to medicine and nursing. Its clinical facilities, in addition to serving as teaching laboratories, provide the community with needed medical services. Investigations into the causes and treatment of disease are a natural adjunct to the teaching programs and today the University of Oregon Medical School conducts a vast and important program of medical research.

The institution provides instructional and training programs in a number of health science areas. The basic charge is to offer a curriculum leading to the degree Doctor of Medicine. The institution also has responsibility for providing curricula leading to the Bachelor of Science degree in Nursing, the Master's degree in Nursing Education, and the Master's degree in Nursing, Bachelor's and Master's degrees in Medical Technology, and programs leading to Master's and Doctoral degrees in the sciences basic to medicine—oftentimes conferred jointly with the Doctor of Medicine degree. Additionally, the institution offers course work in the allied health education programs leading to degrees or certification. Extensive training programs are conducted for interns, residents and fellows, and the Medical School sponsors ongoing programs of continuing health education for physicians, nurses, and those in the allied health sciences in Oregon and in the Northwest states.

The opportunities for improving medical knowledge and applying it to human welfare in the years to come will continue to mount. Today—and tomorrow—the average resident in Oregon and in the United States can look forward confidently to a level of health and a life span beyond the highest expectations of his parents and grandparents.

OREGON STATE SYSTEM OF HIGHER EDUCATION

An Overview

The Oregon State System of Higher Education, organized in 1932, provides educational opportunities to young people and adults throughout the State of Oregon. Member institutions are elements of an articulated system, parts of an integrated whole.

Opportunities for general education are distributed as widely as possible throughout the state, while specialized professional and technical programs are centered at specific institutions.

The institutions of the State System of Higher Education are Oregon State University at Corvallis, the University of Oregon at Eugene, Portland State University at Portland, Oregon College of Education at Monmouth, Southern Oregon College at Ashland, Eastern Oregon College at La Grande, and Oregon Technical Institute at Klamath Falls. The University of Oregon Medical School and the University of Oregon Dental School are located in Portland. The Division of Continuing Education represents all the institutions in making college level courses and special programs available to all citizens. The Division has offices in Salem and Roseburg as well as on most OSSHE campuses.

An interinstitutional booklet, "Your Education," lists fields of study at all State System institutions, and gives other important information for prospective students. For a free copy, write "Your Education," State Board of Higher Education, P.O. Box 3175, Eugene, Oregon 97403.

State Board of Higher Education

Board members are appointed to four-year terms by the Governor of Oregon with confirmation by the State Senate.

GENERAL INFORMATION FOR STUDENTS

GENERAL INFORMATION

The University of Oregon Medical School is located in Portland (population 383,000), the largest city in the state of Oregon. Situated on the Willamette River near its junction with the Columbia River, Portland is a city of diverse business and industrial activities and, although 85 miles from the Pacific Ocean, an important seaport. The city is well known for its beautiful homes, parks, and boulevards and for its mild climate. The foothills of the Cascade Mountains rise on the outskirts of Portland; Mt. Hood, one of the major peaks in the range, towers on the southeastern horizon.

History

Medical education in the Pacific Northwest had its beginning in 1867 when courses and lectures were offered to medical students by the medical department of Willamette University in Salem. After ten years of operation it was decided that the medical department should move to Portland, where the metropolitan advantages of greater population and more hospitals would aid in providing a more complete teaching program.

During this period a group of Portland physicians petitioned the Board of Regents of the University of Oregon to grant a charter for a medical school to be located in Portland. In 1887 the charter was granted and the University of Oregon Medical School became a reality—in a two-room building in northwest Portland.

In 1895 the Willamette University medical department returned to Salem. Because of the limited facilities in that city and the lack of funds to continue operation, it merged with the University of Oregon Medical School in 1913. Under terms of the merger, the students of Willamette medical department were transferred to the University of Oregon Medical School and received diplomas indicating the consolidation. At the same time the alumni groups also merged.

In 1919 the Medical School moved to its present campus, on a 101-acre tract in Sam Jackson Park overlooking the city of Portland—away from the congested area but within one-and-one-half miles of the business district. The original tract included 20 acres donated in 1917 by the Oregon-Washington Railroad and Navigation Company and 88 acres given by the late Mrs. C. S. Jackson and the late Philip Jackson in memory of C. S. Jackson, publisher of the *Oregon Journal*. In 1958, the Oregon State Board of Higher Education accepted the gift of an additional 27 acres from the Journal Publishing Company.

Because the location provided an ideal setting for medical center buildings and affiliated units, the University of Oregon Medical School in 1920 conveyed to Multnomah County nine acres of the campus for the construction of a general charity hospital; in 1926 a 25-acre tract was deeded to the United States government as the site of the U.S. Veterans Hospital.

From 1919 to the present, great advances have been made in the development of the Medical School. The depth and scope of its various programs have continued to expand until today the School has a beautiful campus, fine hospitals, clinics and an excellent faculty.

Physical Facilities

The physical facilities of the University of Oregon Medical School are valued at approximately \$64,600,000 and are keeping pace with the School's expanding programs of education, research and public service.

- The First Medical Science Unit (1919), of what is now called *Mackenzie Hall*, a three-story structure, was financed through an appropriation of \$110,000 by the 1917 State Legislature and by cash donations amounting to \$25,000 from Portland citizens. The second unit (1922), was financed through an appropriation of \$113,000 by the 1921 State Legislature, matched by an equal appropriation from the General Education Board of New York. It is five stories high, similar in construction to the first unit, but has twice its capacity. An additional \$50,000 was appropriated by the General Education Board for equipment. A three-story laboratory wing was added in 1939.
- The Outpatient Clinic (1931, 1968), open to patients throughout the state of Oregon who are without funds to provide for their medical care or who are referred by their physician for consultation and treatment, affords teaching facilities for the clinical branches of the Medical School. Approximately 163,000 patient visits are recorded annually. Funds for the construction of the original building were provided through a gift of \$400,000 from the General Education Board of New York.
 The Outpatient Clinic had its origin in the Portland Free Dispensary founded in 1907 by the People's Institute, a private philanthropic institution. The dispensary affiliated with the Medical School in 1909 and moved to the campus in 1931. A \$2.5 million, seven-story addition to the Clinic was completed in 1968.
- Multnomah Hospital (1923, 1950, 1969), constructed through funds supplied by Multnomah County, has a capacity of 334 beds with facilities for general medical, surgical, and obstetrical patients. The Multnomah Hospital group includes the Heating Plant (1923) and the Emma Jones Hall (1927). Under terms of a contractual arrangement between the commissioners of Multnomah County and the Oregon State Board of Higher Education, the Medical School has access to the hospital for teaching purposes, and the professional staff of the hospital is appointed by the Medical School. This arrangement provides a most successful affiliation for teaching, research and care of the sick. A six-story addition to Multnomah Hospital was opened in the spring of 1969. This \$3.4 million project added 64 patient care beds, a 20-bed psychiatric crisis unit and seven new operating rooms to the facilities.
- The University State Tuberculosis Hospital (1939) has a 79-bed capacity and a large outpatient unit, the Julius L. Meier Memorial Clinic. The hospital has medical and surgical facilities for teaching medical students, interns, residents, and nurses. Funds for the hospital were provided through a state appropriation of \$110,000, a Public Works Administration grant of \$130,900 and a gift from Mrs. Grace R. Meier, Mrs. Jack Meier, Mrs. Joseph Ehrmann, Jr., and Mrs. Frederick Ganz, in memory of Julius L. Meier.
- The Library and Auditorium (1939, 1967), was erected through a gift of \$100,000 from Dr. John E. Weeks, a gift of \$100,000 from the Rockefeller Foundation, and a grant of \$163,500 from the Public Works Administration. The Auditorium, with a seating capacity of 600, affords facilities for lectures and scientific meetings.
 - Renovation and expansion of Library facilities was completed in 1967 at a cost of \$305,000. As a result, one large and six small study rooms were added as were typing, work and duplicating rooms and additional stack tiers.
 - Gaines Hall (1930), formerly the Portland Medical Hospital, was purchased in 1943 to provide needed housing facilities for students in the School of Nursing. This residence was converted to a general medical services building in 1965.
- The Laboratory and Administration Building (1949) was financed through a state appropriation of \$663,000. The building houses facilities for basic science departments, together with administrative offices for the Medical School.

GENERAL INFORMATION

The Physical Plant Shop and Warehouse (1953), provides shop facilities and a central warehouse for the Physical Plant Department and houses the central services unit—printing, personnel and medical graphics. The building was financed by a state appropriation of \$71,000. A \$48,000 addition to the structure was added in 1958 and a second addition to the building, costing \$200,000, was completed in June 1960.

The Crippled Children's Division Building (1954) has modern office space and clinical facilities for the statewide crippled children's service administered by the Medical School. It was financed through a \$280,000 appropriation approved by the 1953 Legislature.

The Child Development and Rehabilitation Center (1970) provides facilities for primary diagnostic treatment and rehabilitation services for mentally retarded children under the age of 21 and for the demonstration to and teaching of students of all medical, dental and allied health disciplines. The \$3,720,000 Center was financed by a State appropriation of \$981,000 and a \$2,736,000 construction grant from the U.S. Public Health Service.

The University of Oregon Medical School Hospital (1955, 1972), a 377-bed teaching and research hospital, was completed in the fall of 1955 at a cost of approximately \$6,300,000. Funds for the construction of the hospital were provided principally from state appropriations, supplemented by several gifts and grants. The hospital contains 241 beds for general, medical, and surgical patients, 26 beds for psychiatric care, and 110 beds for pediatrics (Doernbecher Memorial Hospital for Children).

The original Doernbecher Memorial Hospital for Children was built in 1926. It was financed through a gift of \$200,000 by Mrs. E. W. Morse and Edward Doernbecher, in memory of their father, the late F. S. Doernbecher, and by other gifts totaling \$120,000. The original hospital building was remodeled in 1957 at a cost of \$336,779 for clinical laboratory facilities, departmental offices, clinic facilities, and student teaching laboratories.

The Medical School Hospital Addition, completed in 1972, is a nine-story wing attached to the east side of the original structure. It houses expanded food service and laundry facilities. New and modernized surgical and expanded radiology (therapy) facilities are also provided in the new area along with an additional 112 patient beds. The addition, costing \$6,463,000, was financed from state appropriations and matching funds provided by the National Institutes of Health.

The Basic Science Classroom and Laboratory building (1972) is a seven-story structure financed from state appropriations and matching funds from the National Institutes of Health. The \$5,643,000 structure provides new student classrooms and laboratories and quarters for the biochemistry, microbiology and pathology departments.

The Student Activities Building (1960), built at a cost of \$358,000, is a two-story structure providing recreational facilities for all student groups on the campus.

The Medical Research Laboratories Building (1962), built at a cost of \$2,611,955, was financed through a state appropriation and matching funds from the National Institutes of Health, U.S. Public Health Service. The entire nine-story building is used for medical research. Animal care and housing facilities are contained in the building.

The Women's Residence Hall (1964), a modern, \$855,000 structure, houses 170 women students from the Medical, Nursing, and Dental Schools.

The Parking Structure (1967), is a four-story, \$837,000, reinforced concrete building providing for metered public parking as well as employee and faculty parking. The structure holds approximately 416 automobiles on the four levels and is part of an overall expansion program to provide parking facilities in proximity to the core area of the campus.

The Medical School Farm, on 180 acres southwest of Portland, was purchased in 1961 to house and breed animals for teaching and investigative programs. The farm is ideally suited to the raising and breeding of animals in their natural environments.

Although not a part of the physical facilities of the University of Oregon Medical School proper, the U.S. Veterans Administration Hospital, located adjacent to the campus, serves as one of the teaching units of the Medical School. Established in 1928, this government-owned facility has 518 beds. The teaching program includes clinical experience for medical students as well as advanced residency programs. Coordinating the residency program is the responsibility of the Dean's Committee for the Portland Veterans Administration Hospital.

Construction of two additional buildings on the Medical School campus was completed in 1962: new headquarters for the Portland Center for Hearing and Speech, adjacent to the Crippled Children's Division Building, and a fire station, erected by the city of Portland on a site near the Veterans Hospital.

Accreditation

The University of Oregon Medical School is one of 113 accredited schools of medicine in the United States. It is approved by the American Medical Association and by the Association of American Medical Colleges. (The most recent visit of the accrediting team occurred in 1969.) Its residency programs have been approved by the Council on Medical Education and Hospitals of the American Medical Association and by the respective American boards (see page 81). In addition, special programs are approved by the American Dietetic Association, the Council of Medical Education and Hospitals of the American Medical Association, the American Registry of Radiologic Technologists, the American Society of Clinical Pathologists, the National League for Nursing, the American Orthoptic Council and the American College of Radiology.

Administration

Although the Medical School, chartered by the Board of Regents of the University of Oregon in 1887, has administrative and faculty autonomy, the academic position of the School as an integral part of the University of Oregon is established in its charter and is recognized under the organizational plan of the Oregon State System of Higher Education. A legislative act more than thirty years ago combined all of Oregon's state-operated institutions of higher education into the Oregon State System of Higher Education, which is administered by a nine-member lay board appointed by the Governor. The Chancellor is the chief executive officer.

Instruction

Medicine is such a broad and extensive field that it is difficult for the faculty of the Medical School to teach the students in four years all that is required for the prac-

GENERAL INFORMATION

tice of medicine. The objective of a medical education is to enable the student to acquire the requisite amount of basic factual material, a desire to continue his education as long as he remains active or interested in medicine, the ability to evaluate objectively current trends and new advances in medicine, and the attitudes and ideals that are implied in accepting medicine as a "way of life" rather than merely a way of earning a living. The student must understand that high ethical standards are required in both his personal and professional conduct. The overall education of a physician should not only make him proficient in the science and art of medicine, but should also fit him to assume effectively the civic and social responsibilities associated with his position in the community.

The student is not expected to learn all the skills of any specialty in medical school, but should acquire the fundamentals which will enable him, with further training, to enter any field of general or specialty practice, research, or teaching.

The University of Oregon Medical School provides a curriculum leading to the degree of Doctor of Medicine. This program begins with an introduction to the normal structure and function of the human body, and continues with a study of the effects of disease and the methods of diagnosis of disease. The clinical portion of the program is taken in the wards of the School's hospitals and in the Outpatient Clinic, where students learn under careful supervision and guidance how to apply their scientific knowledge to the care of patients and the prevention of disease.

The Medical School also offers two special programs of study for outstanding students. One leads to both the medical degree and the Master of Science degree and is five years in length. The other offers the M.D. and Ph.D. and is of seven years duration.

These programs, offered through the basic science departments of the Medical School—anatomy, biochemistry, microbiology, pathology, pharmacology, physiology, and medical psychology—are open to a few selected students each year. Students entering the program pursue a combined course of medical and graduate studies and spend summers and parts of the regular academic years in graduate study. These programs afford an unparalleled opportunity for review and consolidation of basic science concepts at a time when the student has had sufficient clinical training to enable him better to appreciate the importance of the basic sciences in relation to clinical medicine. It provides research experience and advanced basic science training desirable for students expecting to enter medical research and teaching as a career and a superior scientific background for clinical medicine.

Five-year and seven-year medical students assist with teaching in medical laboratory courses during the school year, and with research. In recognition of the value of such students to the departments concerned, and of the necessity of postponing the acquisition of the M.D. degree, such "student assistantships" are accompanied by remunerations.

The Medical School also offers regular programs of graduate work leading to the Master of Science and Doctor of Philosophy degrees, in the basic sciences (see Graduate Studies Catalog), and conducts training programs for residents and interns in the School's Hospitals and Clinics.

The University of Oregon School of Nursing provides an important instructional program on the Medical School campus. Courses in medical technology and radiologic technology, nuclear medicine technology, orthoptics, radiation therapy technology and a one-year internship in dietetics also are offered. Each year the Medical School conducts an extensive postgraduate program for physicians in the states of the Pacific Northwest, British Columbia, and Alaska (see also page 79).

Research

Although the primary purpose of the University of Oregon Medical School is teaching medical students the science and art of medicine, another and equally important function is investigation into the causes and treatment of disease.

In the worldwide struggle to improve the health and happiness of mankind, millions of research dollars are expended annually in the nation's medical schools. Oregon is no exception. Investigations underway at the Medical School are supported by gifts and grants amounting to more than \$5,000,000 annually. These funds are made available by private individuals and industry, by foundations and societies, and by the State and Federal governments.

Currently, more than 300 research projects are being conducted at the School in virtually every area of the bio-medical sciences. Contributions made by University of Oregon Medical School investigators to medical knowledge have been numerous and have received worldwide recognition.

. Library

The Medical School Library's responsibility is to provide its clientele with literature in the fields of medicine and allied sciences for the purpose of study, reference and research. It exists to perform professional medical library service for an institution concerned with medical education, research and patient care. The extent of coverage depends on the strength of the teaching departments and the demands made upon the Library by those who use it. Research coverage is available in most areas to carry on extensive investigative work at the doctoral level to fill the needs of physicians, medical educators, medical research workers, medical students, graduate students in the basic sciences, nursing faculty, student nurses, graduate nurses.

Instruction is given in the use of the indexes and in the location of material. Medical library service is offered to physicians in Oregon and the Pacific Northwest, through cooperation with the Pacific Northwest Regional Health Sciences Library at the University of Washington in Seattle. Medical books and periodicals may be borrowed from the Library. Reference service is provided. Bibliographic services include the preparation of demand searches for MEDLARS (Medical Literature Analysis and Retrieval System) searching at the National Library of Medicine for all members of the health manpower community.

The Library, containing 130,000 volumes of books, bound and unbound periodicals, and subscribing to 2,500 current periodicals, is the only public general medical library in Oregon for research and use by the health sciences community, both basic and clinical. Contributing to the Library are the Oregon Medical Association, the Oregon State Board of Medical Examiners, the Portland Academy of Medicine, and for the past six years, the Federal government, through the Medical Library Assistance Act of 1965.

. Alumni Association

- Founded in 1913 the Alumni Association of the University of Oregon Medical School also includes graduates of the Willamette University department of medicine. The association is devoted to the interests of students and graduates and to the encouragement of scientific and professional progress among members of the

GENERAL INFORMATION

medical profession generally. Its membership numbers more than 2,700. In the spring of each year, the Alumni Association sponsors a three-day scientific meeting with about 400 registrations.

Alumni Association officers for 1972-73 are:

Albert A. Oyama, M.D., '53, Portland	President
Ernest T. Livingstone, M.D., '51, Portland	Vice President
Dudley M. Bright, M.D., '62, Salem	Vice President
Lucille M. Kellmer Champion, M.D., '46, N. Little Rock, Arkan	nsasVice President
James Y. Liu, M.D., '69, Fresno, California	Vice President
Leo J. McMahon, M.D., '63, Lander, Wyoming	Vice President
Richard A. Lalli, M.D., '56, Portland	Treasurer
John D. O'Hollaren, M.D., '47, Portland	Secretary
Joseph J. Adams	Executive Secretary

Student Organizations

Student American Medical Association. Medical students have an opportunity to join the Student American Medical Association (SAMA), a national medical student organization. The purpose of SAMA is to represent medical student interests on a national scale. Membership is voluntary and on an individual basis. Locally, SAMA, in addition to planning student activities, sponsors scientific moon-hour programs and a file of summer employment for medical students. It also makes available to students life and hospital insurance programs. Annual dues include a subscription to the SAMA publication, the New Physician.

Alpha Omega Alpha. Alpha of Oregon chapter of Alpha Omega Alpha, medical honor society for men and women, was installed at the University of Oregon Medical School in 1923. It is the aim of members to promote its ideals, to foster the scientific and philosophical features of the medical profession, to look beyond the self to the welfare of the profession and of the public, to cultivate social mindedness as well as an individualistic attitude toward responsibilities, to show respect for colleagues and especially for elders and teachers, to foster research, and in all ways to ennoble the profession of medicine and advance it in public opinion. Selection of AOA is made by the active members each spring from the junior and senior classes on the basis of scholarship achievement and character.

There is one medical fraternity for men at the University of Oregon Medical School—Phi Beta Pi.

Women students are members of the Oregon section of the American Medical Women's Association.

Alumni of these groups take an active interest in their affairs, and the association of alumni, faculty, and student members constitutes an important benefit of membership.

Christian Medical Society. CMS, a non-denominational Christian fellowship, provides students and graduates the opportunity to relate or investigate the relationship of Jesus Christ to their personal lives and their profession through weekly Bible discussion groups, special guest speakers, social gatherings, and literature communications.

MA). During the school year wives of medical students meet for social activities and welfare projects. A program of interest to all members is planned for each of the business meetings. Small groups, "social clubs," also meet frequently. Membership in the auxiliary is about 150.

Interns and Residents Auxiliary of Portland. Wives of interns and residents in Portland hospitals meet each month for a program, social activities, and the planning of service projects. Meeting place is rotated among the Portland hospitals.

- Social Activities and Athletics

General invitations are extended to all students to attend special lectures and meetings at the Medical School. Notices of these events are posted on student bulletin boards. Dances and fraternity get-togethers are planned each year by student organizations. An annual luncheon for freshmen is given by the Alumni Association and a reception for graduates at commencement ceremonies is given by the Faculty Wives' Club. And, of course, all students have access to Portland's metropolitan cultural advantages.

Because of enrollment limitations each year and the highly specialized and concentrated nature of medical subjects, the Medical School is unable to sponsor athletics officially. However, basketball, tennis and squash teams represent the Medical School, and students may participate in an active intramural sports program.

The Student Activities Building, providing recreational and athletic facilities for the use of all students on the campus, was opened in the summer of 1960.

Housing

While no facilities for housing male students are provided by the Medical School, many apartments and boarding houses are located close to the campus. An upto-date list of rental housing is maintained in the Public Affairs Office in the Administration Building.

Women students under the age of 21 years who provide written parental permission, may reside in housing of their choice. However, students are encouraged to consider the pleasant surroundings and proximity to classrooms and laboratories, hospitals and clinics, which is afforded by living in the Women's Residence Hall. This attractive modern residence for women students is provided primarily for those women enrolled in the Medical School's medical technology and radiologic technology programs, students enrolled in the School of Nursing and for those in the dental hygiene program at the Dental School.

Health Service

The Health Service of the UOMS is available to meet the needs of students and house staff. Outpatient evaluation and treatment can be obtained at the Health Service daily. A student insurance program provides coverage for hospital and emergency services.

 Nurses and physicians, including a psychiatrist, are available during the school day. When the Health Service is closed a physician is on call and can be reached

GENERAL INFORMATION

through the campus operator. The Multnomah Hospital emergency room can also be used for emergencies.

Students registered for nine or more hours graduate credit or 12 or more hours credit in Medical School pay a Health Service fee and are eligible for all services of the Health Service. Students' spouses may establish eligibility for the Health Service (including insurance coverage) upon payment of a quarterly Health Service fee. Hospital insurance can also be obtained for students' children. House staff members and families are eligible for Health Service care. Detailed information is provided in the Health Service pamphlet.

Fees and Expenses*

Fees and deposits paid by students at the University of Oregon Medical School are as follows:

Regular Fees

Medical Students, Oregon residents, per term:		
Tuition		\$247.00
Health Service	•	33.00
Incidental Fee		11.00
Building Fee	•••••	10.00
Total	•	\$301.00
Medical Students, nonresidents, per term:	New Students Fall 1972	Returning Students Fall 1972
Tuition	\$600.00	\$436.00
Health Service	33.00	33.00
Incidental Fee	11.00	11.00
Building Fee	10.00	10.00
Total	\$654.00	\$490.00
Medical students (11 credit hours or less):		
Fee per credit hour, Oregon residents, per te plus building fee of \$5.00 to \$9.00, depending taken)	ng on number of	hours
Fee per credit hour, returning nonresidents, \$73.00, plus building fee of \$5.00 to \$9.00, of hours taken)	depending on nu	ımber
Fee per credit hour, new nonresidents, per ter plus building fee of \$5.00 to \$9.00, dependin taken)	g on number of	hours
Graduate students (candidates for M.S., Ph.D.), per term	\$264,00
Graduate students enrolled for 8 term hours of hour (minimum, \$46.50, plus building fee of sing on number of hours taken)	\$5.00 to \$9.00, de	pend-
Graduate students employed as research assista:	nts or fellows, pe	r term\$ 54.00

^{*} The State Board of Higher Education reserves the right to make changes in the rates quoted without notice.

Deposits

¹ Deposit to reserve place in entering class (applied on tuition)	\$75.00
² Breakage deposit, per year—first and second years	\$15.00
² Breakage deposit, per year—graduate students	\$ 5,00

Special Fees	
Registration and laboratory fee for special students, registered for 11 term hours of work or less—\$20.50 per term hour (minimum \$41.00 per term)	
Auditor's fee for lectures, per term hour	
Transcript fee	
Evaluation fee \$10.00 The evaluation fee is charged for the evaluation of transcripts submitted with the application for admission; not refundable.	
Late-registration fee. First day	
Graduate qualifying examination fee\$1.00 to \$15.00	
Change of program fee, per course\$ 1.00	

Microscopes

Medical students are expected to provide themselves with microscopes. Microscopes are available for students who wish to rent them for a fee of \$30.00 a year.

Estimate of Yearly Expenses

The following table represents only estimates based on current fees and results of student surveys:

Tuition and fees, full-time resident students	\$ 903.00
Tuition and fees, full-time returning nonresident students	1,470.00
Tuition and fees, full-time new nonresident students	1,962.00
Breakage deposit	15.00
Microscope fee	30.00
Books and supplies	135.00
Board and room	1,300.00
Personal expenses	200.00

Fee Refunds

Students who withdraw from the Medical School and who have complied with the regulations governing withdrawals are entitled to certain refunds of fees paid,

See page 30.

² The cost of any damage done by a student to Medical School property is deducted from the deposit; in case the identity of the one responsible cannot be established, a pro-rata charge is made against the entire class of which he is a member.

GENERAL INFORMATION

depending on time time of withdrawal. The refund schedule has been established by the Oregon State Board of Higher Education and is on file in the Business Office of the Medical School. Refunds are subject to the following regulations:

- Any claim for refund must be made in writing before the close of the term in which the claim originated.
- (2) Refunds in all cases are calculated from the date of application for refund and not from the date when the student ceased attending classes, except in unusual cases when formal withdrawal has been delayed through causes largely beyond the control of the student.

Regulations Governing Nonresident Fees

Under the regulations of the Oregon State Board of Higher Education, a minor student whose parent or guardian is a bona fide resident of Oregon qualifies for enrollment under the resident fee. An emancipated student whose domicile is independent of his parent or guardian qualifies for enrollment under the resident fee if he presents convincing evidence that he established his domicile in Oregon six months prior to his first registration in any institution of higher learning in the State of Oregon.

All other students are required to pay the nonresident fee, with the following exceptions: (1) a student who holds a degree from an accredited college or university (however, a nonresident student with a bachelor's degree enrolled in a curriculum at the University of Oregon Medical or Dental School leading to the degree of Doctor of Medicine or Doctor of Dental Medicine is required to pay the nonresident fee); (2) a student attending a summer session.

A student who has been classified as a nonresident may be considered for reclassification as a resident:

- (1) In the case of a minor, if his parent or guardian has moved to Oregon and has established a bona fide residence in the state, or
- (2) In the case of an emancipated student whose domicile is independent of that of his parent or guardian, if the student presents convincing evidence that he has established his domicile in Oregon and that he has resided in the state for an entire year immediately prior to the term for which reclassification is sought, and that he has no intention of moving out of the state after completion of his school work.

A student whose official record shows a domicile outside of Oregon is prima facie a nonresident and the burden is upon the student to prove that he is a resident of Oregon. If his scholastic record shows attendance at a school outside of Oregon, he may be required to furnish proof of Oregon domicile.

If any applicant has questions concerning the rules governing the administration of these policies, he should consult the Registrar's Office.

Part-Time Employment

The academic responsibilities in medical school are such that it is usually impossible for a student to undertake outside employment during the school year without causing academic work to suffer. This is particularly true in the first and second years. Under special circumstances students may find employment in various departments of the University of Oregon Medical School and hospitals during their second, third, and fourth years and during summer vacations.

Veterans' Information

The student must present a Certificate of Eligibility to the Registrar effective prior to the opening day of the course in order to take advantage of veterans' benefits. Questions concerning benefits should be directed to the Portland Regional Office of the Veterans Administration.

Fellowships, Scholarships, Grants-in-Aid Awards

The Medical School has available a limited number of scholarships and fellowship funds for deserving medical students. Application for scholarships should be filed in the Registrar's Office by March 1 of each year. Scholarships are awarded by the Dean upon the recommendation of the Committee on Scholarships of the faculty of the Medical School.

Noble Wiley Jones Pathology Research Fellowship. This fellowship, established in 1919, consisting of the interest on \$5,000 held in trust, is the gift of Dr. Noble Wiley Jones of Portland. It is awarded annually to a medical student or resident on the basis of scholastic ability, training in pathology, and interest in research in this field.

Frank Ralston Research Student Assistantship. This assistantship was established in 1946 through a gift of \$5,000 from Dr. Frank Ralston. Since that time additional gifts have increased the principal of the fund to approximately \$13,000. The funds are devoted to research in glaucoma under the direction of the chairman of the Department of Ophthalmology.

Kenneth A. J. Mackenzie Memorial Scholarship. Five \$200 scholarships are awarded annually for the study of medicine, in accordance with the following plan: one \$200 scholarship is awarded each year to the outstanding premedical student at the University of Oregon in the last year of his premedical studies; if the student enters the University of Oregon Medical School and continues to maintain a high scholarship record the scholarship is renewable for each of his four years of medical training; if the student does not maintain a high scholastic record at the Medical School, his scholarship is transferred to the outstanding member of his Medical School class who has taken his premedical work at the University of Oregon. The scholarships are a memorial to Dr. Kenneth A. J. Mackenzie, former dean of the Medical School; they are endowed through a bequest from the late Mrs. Mildred Anna Williams.

Pohl Memorial Scholarships. These scholarships were endowed in 1936 by a gift of \$5,000 from the late Dr. Esther Pohl Lovejoy, in memory of her husband Dr. Emil Pohl, and her son, Frederick Clayson Pohl. The original gift was supplemented by additional annual donations from Dr. Lovejoy, which increased the endowment to above \$37,000. Awards are made to students of promise in the field of medicine. Two-thirds of the scholarships are given to men students, one-third to women students.

James P. Griffin Scholarship. Three \$500 scholarships are awarded each year from a fund established in 1959 through a bequest from Mrs. James P. Griffin in memory of her husband. Awards are made to worthy and promising medical students on the basis of need and scholastic attainment.

George H. Strowbridge Memorial Scholarship. This scholarship consists of the income from a bequest of \$5,000 from Mary S. Muellhaupt in memory of Dr. George H. Strowbridge, a graduate of the University of Oregon Medical School in the Class of 1897. Award is made to a student of the second-, third-, or fourth-year class on the basis of scholastic attainment and need.

GENERAL INFORMATION

Alumni Scholars. The Alumni Association of the University of Oregon Medical School makes awards annually to provide scholarships in the amount of \$500 for selected medical students who have demonstrated superior academic performance. Recipients are designated "Alumni Scholars."

Pfizer Laboratories Medical Scholarship. This \$1,000 scholarship, established in 1962, is awarded to a deserving student on the basis of scholastic record and financial need.

Jackson Foundation Scholarship. An award of \$1,000 is made to a medical student who graduated from an Oregon secondary school, who has the ability to do high quality work in the Medical School, and who is in need of financial assistance. The scholarship was established in 1962.

Emily F. Edson Scholarship. Scholarships are awarded to both medical and nursing students, on the basis of scholastic achievement and need, from a fund established through a bequest under the will of the late Emily F. Edson, administered through The Oregon Bank. The initial bequest, in 1962, was approximately \$54,000.

Henry Waldo Coe Prize. This prize, established in 1929, is awarded to a second-third-, or fourth-year student in the Medical School who presents an essay on a medical subject exhibiting superiority and originality in composition. The prize consists of the interest on a gift of \$1,000 from the late Dr. Henry Waldo Coe.

Walter J. Rosenfeld Scholarship Fund. This is a perpetual fund established under the will of Walter J. Rosenfeld of Portland. The income from the fund is used annually for two scholarships for selected medical students.

Harold F. Wendel Memorial Fund. The income from an endowment fund established in memory of the late Harold F. Wendel by his wife, Elise F. Wendel, is presented annually to the outstanding resident or fellow in cardiology.

Louis Gerlinger, Jr. and Beatrice Lee Gerlinger Scholarships Fund. The income from a gift established in memory of the late Louis Gerlinger, Jr. by Beatrice Lee Gerlinger, is a perpetual fund used for scholarships to a deserving second, third-, or fourth-year medical student dedicated to service to humanity. Over \$2,000 is available.

American Professional Practice Association's Raymond M. McKeown Scholarship Fund. An award of not more than \$1,000 per applicant is to be made to first-year medical students on basis of need for assistance. Funds are made available by the American Professional Practice Association in recognition of Raymond M. McKeown, M.D., Coos Bay physician and graduate of the UOMS.

John H. Stevenson Scholarship Fund. The income from a trust fund established under the will of the late Louise B. Stevenson in memory of her husband John H. Stevenson is used to provide scholarships for medical students.

Dr. & Mrs. Joseph Fife Scholarship Fund. Established in honor and memory of Dr. Joseph Fife and his wife, Georgia Reed Fife by his nephew, Mr. William Fife, a scholarship fund is provided for an outstanding medical student from Douglas County. It is to be awarded on the basis of scholastic achievement and financial need.

Health Professions Scholarship Fund. This Federal scholarship program was authorized by the Health Professions Educational Assistance Amendments Act passed by Congress in 1965. The Act specifies that these scholarships are available only to students who, without the amount of the scholarship award, could not pursue the required course of study during the year for which the award is made.

For the academic year 1972-73 scholarships will be available at the University of Oregon Medical School for students in the first-, second-, and third-year classes.

The Roche Laboratories provide an annual award to an outstanding member of the senior class. The award consists of a watch and an engraved scroll. The Upjohn Company makes an annual monetary award to an outstanding senior student; Lange Medical Publications awards books to two outstanding students in each class; The Merck Manual Award, a copy of The Merck Manual is made each year to two outstanding students; and The C. V. Mosby Company awards books to five outstanding students yearly.

The Vernon M. White Fund for Medical Diagnosis was established by Mrs. White in memory of her husband, Vernon M. White. This award is to be presented to the senior medical student showing the greatest talent in the field of medical diagnosis.

The Clarence Benson, M.D., Memorial Scholarship Fund. The family, friends and colleagues of the late Clarence Benson, M.D., of Sacramento, California, who completed his residency in obstetrics and gynecology at the University of Oregon Medical School, established this fund in 1971 for scholarship assistance to deserving medical students. It is administered by the University of Oregon Medical School Advancement Fund and provides assistance of not more than \$1200 per student to the extent funds are available.

Charles H. Hoyt Scholarship Fund. This fund was established in 1971 through a bequest under the will of the late Charles H. Hoyt. Funds are to be utilized for grants-in-aid to deserving medical students to assist them in obtaining a medical education. The amount of the bequest was approximately \$23,500.

Loan Funds

The Medical School has loan funds available for students. In general, loans fall into two classifications—emergency and long-term loans. Long-term loans are generally limited to \$750 a year or to a maximum of \$1,500 to any one student. Emergency funds are available for small, short-term loans. Interest rates vary with the fund and application should be made to the Medical School Student Financial Aid Officer.

Ben Selling Loan Fund. This fund, a bequest from the late Ben Selling, is administered by the Trust Department of the First National Bank of Oregon.

- W. K. Kellogg Loan Fund. In May 1942, the W. K. Kellogg Foundation established a \$10,000 loan fund at the University of Oregon Medical School for the financial assistance of medical students. Preference is given to first-, and second-year students who have demonstrated scholastic ability, character, and need. The usual loan is \$250. Loans are administered through the Office of the Dean.
 - F. E. Jacobs Memorial Loan Fund. This loan fund was established in 1950 through gifts from relatives and friends of the late Dr. F. E. Jacobs, a 1929 graduate of the University of Oregon Medical School. Loans are made to senior medical students. The fund at present totals approximately \$1,000.
 - **Dr. Francis Ortschild Memorial Fund.** This loan fund, approximately \$65,000, was established in 1960 through a bequest under the will of Viola Ortschild of Portland. It is to be used for loans to needy and worthy medical students.

GENERAL INFORMATION

Joan Balise Memorial Loan Fund. This fund was established in 1960 in memory of the late Joan Balise by her husband, to provide emergency loans to medical students. The fund at present totals approximately \$1,150.

So Chee Sue Loan Fund. This fund was established in 1959 by Dr. Julius F. Sue in memory of his father, So Chee Sue, as a perpetual loan fund for senior medical students. The fund now amounts to approximately \$1,050.

M. B. Taylor Loan Fund. A bequest of \$10,000 from the late Millard B. Taylor is used for student loan funds in essentially the same manner as other loan funds at the Medical School. This fund was established in 1967.

Rita Simmons Graduate Loan Fund. This fund of approximately \$425 was established in 1967. It is available to medical and graduate students for loans not to exceed \$150 per year.

Ralph Vernon Moore Loan Fund. This fund, a trust from the late Ralph Vernon Moore, is administered by the Trust Department of the U. S. National Bank. Loans of \$500 are made available to worthy and needy medical students in their junior or senior years.

Kim Wolfer Memorial Loan Fund. This fund was established by Mr. and Mrs. Martin Wolfer in memory of their son, Kim Wolfer, as a perpetual fund for medical students with a loan of \$700 per student. Administered by the UOMS Advancement Fund, it is to be used for loans to needy and worthy medical students, and is restricted to seniors through 1973-74.

Emilie Jo Pastega Simpson Memorial Loan Fund. This fund was established by Mr. and Mrs. Mario Pastega in memory of their daughter, Emilie Jo Pastega Simpson, as a perpetual loan fund for medical students and nursing students, administered by the UOMS Advancement Fund. The maximum loan available is \$500 per student. Loans are restricted to residents of Oregon.

Health Professions Student Loan Program. Under the provisions of the Health Professions Educational Assistance Act of 1963, funds have been provided by the Federal government for loans to medical students. The maximum loan available is \$2,500 per year.

Oregon Guaranteed Student Loan Fund (Oregon Residents Only). An arrangement between the University of Oregon Medical School, the student's Oregon bank, and the Oregon State Scholarship Commission provides assistance up to \$1,000 per year for undergraduate students and \$1,500 a year for graduate students up to a total of \$7,500.

American Medical Association Loan Fund. The American Medical Association has established a loan fund which provides substantial loans to medical students, interns, and residents, with provision for repayment over a period of several years. Information regarding the fund is available in the Medical School Student Financial Aid Office.

Louis Gerlinger, Jr. and Beatrice Lee Gerlinger Scholarship Loan Fund. The income from a gift established in memory of the late Louis Gerlinger, Jr. by Beatrice Lee Gerlinger, is a perpetual fund used for loans to a deserving second-, third-, or fourth-year medical student dedicated to service to humanity. Over \$2,000 is available. No interest is charged on these loans.

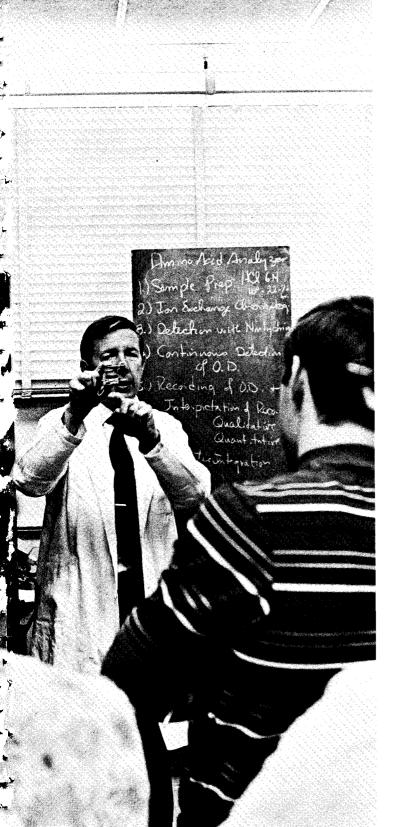

Dr. Ronald P. Neilson and Dr. Duncan R. Neilson Memorial Fund. This fund was established in memory of Dr. Ronald P. Neilson and Dr. Duncan R. Neilson, who were graduates of the University of Oregon Medical School and long-time

members of the clinical faculty. The fund of approximately \$4,000 is used for loans to deserving medical students.

John C. F. Merrifield Memorial Loan Fund. Gifts from the family and friends of the late John C. F. Merrifield established this loan fund in 1972. Students enrolled in the Medical School are eligible for loans not to exceed \$750 per year, and the funds are administered by the University of Oregon Medical School Advancement Fund.

Sam Jackson Art Society Medical Center Student Loan Fund. This fund, established in 1972 by those interested in art at the Medical School (known as the Sam Jackson Crafty Art and Buffalo Grass Society), provides loans to students enrolled in the Medical School, the School of Nursing, or in other programs leading to a degree or certificate offered by the University of Oregon Medical School. Loans are limited to a maximum of \$500 per student per year and to the extent that funds are available. The fund is administered by the University of Oregon Medical School Advancement Fund.

Multnomah County Medical Auxiliary Health Careers Loan Fund. This fund was established in 1972 by the Multnomah County Medical Auxiliary to provide loan funds of not more than \$500 per student per year to upperclassmen who are enrolled in the University of Oregon Medical School or students in certified programs in health-related fields. The fund is administered by the University of Oregon Medical School Advancement Fund.

ADMISSIONS AND SCHOLASTIC

REGULATIONS

ADMISSIONS AND SCHOLASTIC REGULATIONS

Admission Requirements

High School Preparation. The applicant must have satisfactorily completed a four-year course in an accredited high school or its equivalent.

Because there is no single course of study which best prepares a person for medicine, the student planning to enter medical school should obtain a good general education and emphasize in college those fields in which he has the greatest personal interest, whether they be in the sciences or in the liberal arts. A student whose major undergraduate interest lies outside the biological or physical sciences should have adequate scientific preparation in the fundamentals of chemistry, physics, and biology. Certainly, a student with a primary interest in one of the sciences should be encouraged to pursue such studies as a major course in his undergraduate career. It is not desirable, however, to take courses in college, which will be duplicated in medical school (human anatomy, biochemistry, human physiology, medical bacteriology, etc.). A student is better prepared if he takes other basic science courses or work in fields such as mathematics and the social and behavioral sciences. As we learn more of man and his reactions, it becomes obvious that social, economic, and other environmental factors have much to do with his physical and mental health.

Admission to the Medical School is on a competitive basis and concerns two types, of qualifications: (1) evidence of good character and a high motivation for medicine, (2) sufficient ability and preparation to undertake satisfactorily the study of medicine, as judged by his premedical scholastic record and scores on the Medical College Admission Test.

Applicants for admission are required to complete not less than three years of full-time work in an accredited college or university, i.e., 138 term hours (92 semester hours) exclusive of military science, before entering the Medical School.

The following subjects are prescribed as the minimum acceptable for admission:

Chemistry—a minimum of two years of college chemistry totaling 24 quarter hours or more, including 10 to 16 quarter hours of general chemistry and eight to 12 quarter hours of organic chemistry. These requirements will usually be met by courses designed for science majors. Laboratory experience should include quantitative techniques and methods. Courses in analytical chemistry, instrumental analysis, or physical chemistry are recommended for students considering special medical programs with emphasis in the basic sciences.

Biology—a minimum of nine quarter hours of general biology (or zoology) in—cluding basic genetics. Advanced courses in cellular physiology or embryology are strongly recommended. A core program may possibly complete all biology requirements in one sequence.

Physics—a minimum of 12 quarter hours to include the division of mechanics, heat and sound, light and electricity with laboratory work.

College mathematics—a minimum of 12 quarter hours. (Calculus is strongly recommended.)

General psychology—a minimum of six quarter hours.

Grades of "pass" or "satisfactory" are not acceptable for courses prescribed as requirements for admission. Questions concerning grades of pass or satisfactory should be clarified with the Director of Admissions.

Foreign language is not required for admission to the Medical School, but some

knowledge of a major modern foreign language (German, French, Russian, Spanish) is highly recommended as part of the cultural training of the physician. Students anticipating research in the medical sciences should have a basic knowledge of German, French, or Russian. The premedical student should keep in mind that some medical schools require credit in foreign language for admission.

Medical College Admission Test

Applicants for admission are expected to have taken the Medical College Admission Test, given by the Association of American Medical Colleges at the various institutions offering premedical curricula. Applicants should take the test during the calendar year immediately preceding the year of their admission to the Medical School. The test is given twice each year, in the early fall and mid-spring. Information as to the exact time and place of the test and registration deadlines can be bobtained from college premedical advisors.

Bachelor's Degree

A student entering the University of Oregon Medical School without a Bachelor of Arts or Bachelor of Science degree must complete the work required for one of these degrees in the institution at which he received his premedical preparation, or the University of Oregon at Eugene, before entering the third year in the Medical * School.*

The University of Oregon, Oregon State University, Portland State University, and most of the colleges and universities of the Pacific Northwest recognize credit earned by a student during his first year at the Medical School as credit earned in residence toward the bachelor's degree.

Application Procedure

Since the Medical School is now participating in the American Medical College Application Service (AMCAS), applications for admission are obtained from that organization in Washington, D.C. An application request card may be secured by writing to the Director of Admissions.

Applications are accepted between July 1 and November 15. A place in the firstyear class is not granted to an applicant more than one year before the beginning of instruction for that class.

The University of Oregon Medical School gives primary consideration to well qualified applicants who are residents of Oregon. Preference is also given to well qualified residents of neighboring western states which do not have medical schools and which are members of the Western Interstate Commission on Higher Education (WICHE). Superior applicants from other regions are also given consideration.

Applicants who are residents of Alaska, Idaho, Montana, or Wyoming, should request certification for medical training under WICHE from their state certifying officer or agency at the time application is made for admission to the University of Oregon Medical School. Preferential consideration for admission is given WICHE-certified applicants over non-certified WICHE applicants; the WICHE-supported applicant pays the Oregon resident tuition fee.

^{*}Students expecting to receive the bachelor's degree from the University of Oregon should include 9 hours of English composition, 9 hours of lower division English literature in a one-year sequence course, 12 hours of lower division mathematics, 5 terms of physical education and 1 term of health education in their premedical programs. See the University of Oregon Catalog for specific courses that meet the literature and mathematics requirements.

ADMISSIONS AND SCHOLASTIC REGULATIONS

Processing of Applications

Evaluation of Credentials

The Committee on Admissions examines each applicant's credentials and bases its preliminary decision on the objective evaluation of the following factors: preprofessional training, evidence of scholarship, Medical College Admission Test scores, personal evaluation of the student by premedical instructors, and evidence of good moral character.

Personal Interview

After examination of credentials, residents of Oregon generally are requested to appear for a personal interview with the Committee on Admissions. A personal interview is not requested of non-residents whose credentials indicate that they cannot meet the competition for admission, or who would be subjected to excessive travel expense. The committee schedules interviews in Portland, Eugene, and Corvallis.

Physical Examination

Just as the Medical School's Committee on Admissions may refuse admission to a student on the basis of academic record, it also may reject an applicant on the grounds of lack of physical or mental stability. Applicants who appear well qualified on the basis of the initial screening by the Committee are required to submit reports of complete examinations by their own physicians, which are reviewed by the health service physician before registration.

Notification of Acceptance or Rejection

All candidates are given written notification of acceptance or rejection as soon as possible after the Committee on Admissions has reached its final decision; notification is generally given by April 15. Sometimes, however, decisions on applications are delayed until grades in the more advanced science and mathematics courses, such as organic chemistry, quantitative analysis, physics, genetics, embryology, cell physiology and mathematics, are made available to the Admissions Committee. Acknowledgment of notification of acceptance should be made promptly in writing by the successful applicant.

Acceptance of Appointment

When an applicant is offered admission to the Medical School and wishes to accept this admission, a deposit of \$75 must be paid not later than two weeks following notice of acceptance in order to reserve a place in the entering class. If the student should release his place in the class, the deposit is refundable until March 1.

Special Students

Graduates from other medical schools may be admitted as special students but may not be candidates for the degree of Doctor of Medicine at the University of Oregon Medical School.

A person who has failed a course as a medical student in another medical school may not repeat the course as a special student at the University of Oregon Medical

School unless the course is given at some time other than during the regular academic year.

Undergraduates may not be admitted to courses in the Medical School as special students.

Special students are charged fees according to the credit hours of work taken.

Graduate Studies

Acceptance by a student of admission to graduate status is regarded as a declaration of intent to complete a program of graduate study prior to application for enrollment in other Medical School educational programs.

→Advanced Standing

A student may be considered for admission with advanced standing provided his official credentials are accompanied by a statement from the registrar of the institution from which he is transferring to the effect that the applicant's scholarship in medical school work ranks him in the upper fifty per cent of his class. An honorable dismissal and premedical preparation meeting the regular requirements for admission are also required. Only transfer to the third-year class is feasible and available placements are very limited.

Scholastic Regulations

Grading System and Grades

The UOMS uses both the A, B, C, D, E, F and the Pass/Fail grading systems, depending on the nature of the course involved. Generally, courses in which an examination is given or in which the student has a clinical assignment involving patients will be graded by the A-F system and courses in which the student's competence is not readily subject to examination or review will be graded Pass/Fail.

At the end of each school year, students will be officially notified about each course they have taken and whether they have passed or failed. The only exception to this will be when a student's letter grade is D, E, F or incomplete, and in this case, the student will be notified at the end of the term in which they have taken the course. Students may learn exact grades earned in courses graded by the A-F system and the quarter of the class in which they rank scholastically upon personal request at the Registrar's Office.

If at any time during the school year the student feels his work is not satisfactory, he should consult his instructor. Should special problems arise that threaten to interfere with study, the student should consult a faculty member for advice before his scholarship is seriously affected.

'Promotion

In order to be promoted unconditionally from the first to the second year and from the second to the third year in Medical School, the student must receive a passing regrade in all subjects and a weighted grade-point average as established by the Executive Faculty. At the completion of the second year all students must achieve a passing score in the Part I examination of the National Board of Medical Examiners in order to be promoted to the third year. Failure to pass the exami-

ADMISSIONS AND SCHOLASTIC REGULATIONS

nation necessitates re-evaluation of the student by the departments in which he received a test score of below 70. For promotion from the third to the fourth year, students must satisfactorily complete all subjects. The status of students failing to meet these requirements is determined by the promotion boards.

The Preclinical Promotion Board, which considers only students in the first and second year of medicine, consists of all faculty members giving instruction during, the first and second years. The Clinical Promotion Board is concerned with the performance of third- and fourth-year students; this board is composed of representatives from all the clinical departments. The boards meet after the end of each term to consider incomplete work, conditions, and failures.

Specific problems are referred to the Review Board for subsequent action. The Review Board, composed of chairmen of departments, considers primarily requests from students arising from actions taken by the Preclinical and Clinical Promotion Boards.

Elective Courses

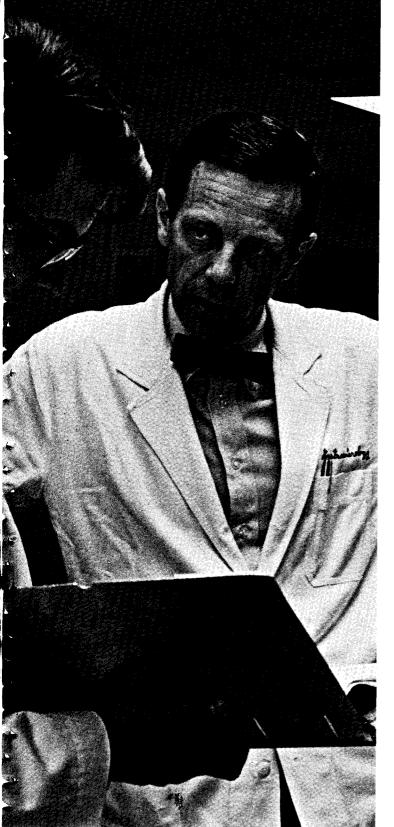

Elective courses are offered in both clinical and basic science departments. Registration for elective courses must be arranged at the Registrar's Office. A list of electives that students may take during the elective periods of the curriculum is published annually and can be obtained from the Registrar.

Class Attendance

Satisfactory achievement of the educational goals and objectives of each course normally will require regular class attendance. Such a requirement applies in particular to those courses in which the direct care of patients is expected, where the learning of a skill is necessary, or some other demonstration of responsibility is expected. In these courses, attendance is required unless excused. The faculty in charge of each course will define and communicate to their students the attendance requirement in relation to the objectives of the course.

Dismissal

The faculty has the right to sever, at any time, the connection with the Medical School of any student who it considers to be unfit for a career in medicine. The usual procedure for dropping a student comes from a recommendation by one of the Promotion Boards which are composed of the members of the faculty. Ordinarily, a student may be on probation status for two terms before a Promotion Board may recommend his dismissal. However, for adequate cause, a student may be dropped without previous warning.

3 CURRICULUM IN MEDICINE

CURRICULUM IN MEDICINE

The curriculum in medicine requires a total of seven years' work beyond high school. The first three years must be satisfactorily completed before admission to the Medical School in Portland. Since facilities for instruction provide for the acceptance of only a limited number of applicants, completion of premedical studies does not guarantee admission to the Medical School.

The four years spent in the Medical School in Portland are devoted to subjects of the regular four-year curriculum in medicine required by law.

The prescribed and recommended subjects for the three premedical years are described under *Admissions and Scholastic Regulations*. In the first, second, third, and fourth years at the Medical School there are 4,991 class hours of required work. Descriptions of courses are to be found under the several departmental headings.

Requirements for the Degree of Doctor of Medicine

A candidate for the degree of Doctor of Medicine must complete satisfactorily the curriculum and all other requirements prescribed by the faculty of the Medical

School. Members of the senior class are required to pass the Part II examination of the National Board of Medical Examiners which is given in April. Any student failing to pass this examination will be referred to the Review Board of the Medical School for re-evaluation of his status. All candidates for degrees are required to be present at the Commencement exercises to receive their diplomas in person unless permission to be absent is obtained from the Dean's office. The Doctor of Medicine degree is conferred by the University of Oregon upon the recommendation of the faculty of the Medical School.

Licensure

Licensure to practice medicine in any state is conditioned upon the requirements of a state board of medical examiners. Licensure to practice medicine in the State of Oregon is dependent upon the candidate's having an M.D. degree, completing an approved straight or rotating internship, possessing an Oregon Basic Science Certificate and passing the licensing examinations. For candidates who are already licensed to practice in another state, the licensing examination may be waived by reciprocity with that state, if such a reciprocal agreement is in force, or the candidate may base his application upon certification of the National Board of Medical Examiners. In some instances, the Oregon Basic Science Certificate may be obtained by reciprocity with another state or based upon Part I of the examination given by the National Board of Medical Examiners.

Further information about licensure requirements may be obtained from the Oregon State Board of Medical Examiners, 611 Failing Building, Portland 97204. The Board suggests that such inquiry be made no later than the second quarter of the internship year.

Students are urged to take the Oregon basic science examination at the end of their sophomore year. This examination is given by the Basic Science Examining Committee of the Oregon State Board of Higher Education and is required for licensure in Oregon. Information concerning this examination may be obtained by writing to the Basic Science Examining Committee, Oregon State Board of Higher Education, Eugene 97403.

- Course Numbering System

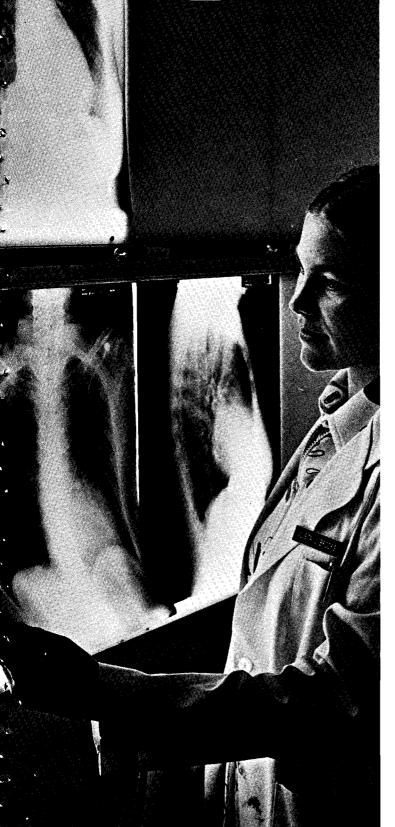

Medical School courses are numbered in accordance with the uniform coursenumbering system of the Oregon State System of Higher Education. This numberring system as it applies to the Medical School courses is as follows:

- 400–499 Upper-division courses primarily for first-year students in medicine but to which graduate students may be admitted on approval of the graduate advisor and department chairman concerned.
- 500-599 Courses primarily for graduate credit towards an advanced academic degree (M.S. or Ph.D.) but which may be elected by medical students for credit towards the M.D. degree with permission of the department chairman concerned.
- 600-699 Courses primarily for the medical curriculum but which can also be applied toward an advanced academic degree (M.S. or Ph.D.) with the permission of the graduate advisor and the Graduate Council. Required courses for second, third, and fourth years of the medical curriculum are designated by numbers 610-619, 620-629, and 630-649, respectively. Numbers 601, 605, 607, 609, and 650-699 are used for elective courses.

CURRICULUM IN MEDICINE

Certain numbers are reserved for courses that may be taken through successive terms under the same course number, credit being granted according to the amount of acceptable work done. These course numbers are as follows:

501 and 601 Research.
503 Thesis.
505 and 605 Reading and Conference.
507 and 607 Seminar.
609 Clinical Experience.

Basic Sciences

CONJOINT COURSES— BASIC MEDICAL SCIENCE

Required Courses

First Year

Con 410. Cell Organization and Function. 5 hours, fall and winter.

An integrated course emphasizing aspects of cellular structure, organization, metabolism, and function essential to an understanding of human biology in health and disease. General and special features of cell structure; biochemical and structural properties of membranes; biological transport processes; bioenergetics; mitochondrial metabolism; functions of intracellular membranous organelles; cytoplasmic metabolism of carbohydrates, lipids, amino adds, purines, pyrimidines; nuclear functions—DNA replication and transcription protein synthesis, meiosis and mitosis; the life cycle of the cell. Lectures, laboratory and conferences, 99 hours.

Con 411. Medical Genetics. 2 hours winter.

Chromosomal basis of inheritance, chromosome structure and function, autosomal, X-linked and polygenic inheritance, population genetics, control of gene expression, mutation, genetic polymorphism, inborn errors of metabolism. Lectures, laboratory and conferences. 32 hours.

Con 412. Developmental Biology. 2 hours winter.

An introduction to current concepts of the processes involved in growth and development. The functional and chemical aspects of these processes are presented within the framework of morphologic development with emphasis on the mammalian organism whenever feasible. Lectures, quizzes and laboratory correlated and continuous with laboratory sessions in Cell Organization and Function and Medical Genetics. 40 hours.

Con 414. Immunology. 2 hours spring.

The major goal of this course is to introduce the medical student to the required semantics and terminology of immunological theory and to teach him an immunological approach to current and future medical problems. The student will learn how to investigate immunological events as they apply to human disease syndromes. Lectures, laboratory sessions and teaching seminars, 35 hours.

Second Year

Con 610. Systems Pathophysiology. 42 hours.

A multidisciplinary course designed to correlate basic science with disease processes in man, and to introduce the student to clinical medicine. The material is presented in organ and system blocks; within each block, a series of selected case presentations serves to introduce and to focus attention on specific disease entities. Associated lectures, laboratory exercises, demonstrations, and conferences are designed to integrate and to correlate clinical manifestations of disease with the physiological, biochemical, pathological, pharmacological and microbiological information that is pertinent to the system under study. Faculty members from basic science and clinical departments cooperate in presenting this course. 986 hours.

Elective Courses

- Con 501. Research. Any term, hours to be arranged.
- Con 505. Reading and Conference. Any term, hours to be arranged.
- Con 507. Seminar. Any term, hours to be arranged.
- Con 511, 512, 513. Cell Biology. 5 hours each term.

An integrated course presenting fundamental concepts, processes, and methods in the following areas of cell biology: macromolecules, cell structure, transport, biochemical functions, genetics, immunology, development and differentiation, organ physiology, inflammation, neoplasia, and conditioning and learning. 4 lectures and 1 laboratory period. Conjoint course presented by the faculty of the basic medical science departments.

DEPARTMENT OF ANATOMY

B. Vaughn Critchlow, Chairman of Department

Professor Emeritus: Pearson

Professors: Bacon, Critchlow, Jump (Dental School), Stotler

Associate Professors: Connell, Davis, Quinton-Cox (Dental School), Tunturi

Assistant Professors: Iorio, Richards Research Assistants: DeLorme, Sauter

Required Courses

First Year

An 410. Anatomy. 20 hours, fall, winter and spring.

Gross Anatomy: Regional dissection of the human body. Each pair of students dissects the lateral half of the human body. The student is furnished with a loan collection of disarticulated bones for the study of osteology. Lectures and demonstrations will include surface, developmental and radiological anatomy. 144 hours fall term, 144 hours winter term.

Applied Anatomy: A series of lectures will be devoted to the clinical significance of anatomy. These lectures will be given by the clinical staff and will be programmed to correlate with gross anatomy. 12 hours fall term, 12 hours winter term.

Histology and Organology: Lectures, demonstrations and laboratory work concerned with the microscopic anatomy of the tissues and organs. Student loan sets of microscopic preparations and microscopes will be available for student use. 24 hours fall term, 24 hours winter term.

Neurology and Organs of Special Senses: Study of the structure and functions of the organs of special senses and of the central nervous system. This is accomplished by gross dissections and stained sections of the human brain, spinal cord, and organs of special senses. Pathological conditions illustrating lesions of the nervous system are demonstrated. 48 hours, spring term.

Lectures, demonstrations, laboratories, quizzes. 408 hours.

Elective Courses

An 416. Microscopic Technique. 2 hours spring.

The theory and practice of preparing animal tissue and histological study. Limited to 4 students, registration only after consultation with instructor. Laboratory, 6 hours a week: 72 hours.

An 501. Research. Any term, hours to be arranged.

An 505. Reading and Conference. Any term, hours to be arranged.

An 507. Seminar. Any term, hours to be arranged.

Journal Club.

History of Medicine.

An 512. Analytical Embryology. 4 hours spring.

Lectures and assigned readings on cytology and physiology of gametes, gamete transport, fertilization, cleavage and cell division, and on cell tissue and organ interaction in embryonic systems. The laboratory work is designed to introduce the advanced student to both classical and new techniques for the investigation of embryonic processes. Prerequisite: An 410, BCh 410, or equivalent. Lectures, 2 hours a week; laboratory, 6 hours a week: 96 hours.

An 513. Analytical Histology. 4 hours spring.

Lectures on the theory of fixation and staining, survey of physical and chemical techniques employed in modern histology. Practical experience with some of these techniques provided by laboratory exercises. Lectures and quizzes, 2 hours a week; laboratory, 6 hours a week: 96 hours. Prerequisites: An 416, BCh 410, or the equivalent. Limited to 10 students.

An 514. Special Dissections. Term and hours to be arranged.

Human anatomical material dissected and certain parts of the body studied more thoroughly. Conferences and quizzes arranged with the instructor. Registration limited by available material. Prerequisite: An 410.

- An 515. Advanced Neuroanatomy and Computer Techniques. Any term, hours to be arranged.

 Set theory, probability theory and information theory are presented as the basis for the study of the behavior of neural networks in the auditory system and other parts of the brain. Six weeks.
- An 516. Computers in Medicine. Any term, hours to be arranged.

After a brief description of the computer the course will analyze those requirements that a scientist or physician needs in order to make the computer part of his integral tools. An introduction to multivariate statistics, set and probability theory will be presented. Three to six hours a week, six weeks.

An 517. Embryology. 4 hours spring.

Lectures on the reproductive cycle, fertilization, normal and abnormal human development, correlated with detailed laboratory study of pig, mouse, and human embryos and fetuses. Primarily for graduate students. Lectures, 2 hours a week; laboratory, 6 hours a week: 96 hours. Limited to 10 students.

An 518. Mammalian and Human Cytogenetics, 3 hours winter.

Methods of chromosomal study; chromosomal structure; chromosomal function in meiosis and mitosis; genetic activity and inactivity; use of chromosomes in the study of genetics; gene mapping, sex determination; spontaneous and induced chromosome aberrations; chromosomal evolution. Student recitations will be required relating to special topics such as the X-chromosome, somatic cell genetics, chromosomal variation, and cytogenetic studies in leukemia.

An 601. Research. Any term, hours to be arranged.

An 605. Reading and Conference. Any term, hours to be arranged.

Special Regional Dissection. 2 hours. Detailed review of selected regions of the body. 4-8 hours per week for six weeks. Summer, fall and spring terms.

An 607. Seminar. Any term, hours to be arranged.

Noise and Its Effect on the Human Being: Acoustical characteristics of noise; mechanism of the ear and auditory system; destructive effect of noise on ear and tissue; effects of noise on human communication and speech; effects of noise on behavior. Legal aspects of noise, hearing conservation programs, Walsh-Healy Act. Three hours a week for six weeks. Fall term.

DEPARTMENT OF BIOCHEMISTRY

Richard T. Jones, Chairman of Department

Professors Emeriti: Todd. West

Professors: Fellman*, Horton, R. Jones, Kittinger (Primate Center), Litt, Mason, Portman (Primate Center), Rigas, Van Bruggen

Associate Professors: Beatty (Primate Center), Bentley, Black, Hoskins (Primate Center), Kabat, G. Seaman

Assistant Professors: Bocek (Primate Center), Howard (Primate Center)

Instructors: Fujita, Jolley

Affiliates: Claycomb (Biochemistry, Dental School), Daves (Oregon Graduate Center), Gabler (Dentistry, Dental School)

Research Associates: J. Boyett, Brimhall, Duerst, A. Hanson, Head, Ichikawa, Iyanagi, MacMahill, Pinto, Rokosova

Research Assistants: Cawthon, Evans, K. Johnson, Joyce, Lytle, Roth, Siegner, Van Bueren, Wagner

Required Courses

First Year

BCh 410. Basic Biochemistry. 3 hours fall.

Physical chemistry pertaining to biochemistry, particularly acid-base, buffers and equi-

^{*} Leave of absence July 1, 1972 to June 30, 1973.

librium reactions. Chemistry of macromolecules and their subunits including proteins, carbohydrates, nucleic acids and lipids. Introduction to enzymology. This course is the beginning of a series of courses in which biochemical topics will be taught on an integrated basis with other basic medical science subjects. Lectures, laboratory, and seminars, 66 hours.

Second Year

T

Con 610. Systems Pathophysiology. (See page 38.)

Elective Courses

- BCh 501. Research. Any term, hours to be arranged.
- BCh 505. Reading and Conference. Any term, hours to be arranged.
- BCh 507. Seminar. Any term, hours to be arranged.
- BCh 508, 509. General Biochemistry. 8 hours fall and winter terms.

General biochemistry for graduate students majoring or minoring in biochemistry. This course will consist of selected lectures from BCh 410 (Basic Biochemistry), Con 410 (Cell Organization and Function), Con 411 (Genetics) and Con 412 (Developmental Biology) supplemented with discussion and laboratory. Fall and winter: Lectures, 5 hours a week; discussion, 2 hours a week; laboratory, 6 hours a week.

- BCh 510. Introduction to Biochemical Research. 1 hour, term to be arranged.
 - Lectures, reading and discussion on methods of research, limitations, and ethics for students beginning graduate research.
- BCh 511. Nucleic Acids and Protein Synthesis. 2 hours, term to be arranged.

The biochemistry and biosynthesis of nucleic acids and proteins, and selected topics in the biochemistry of heredity, growth, aging and differentiation.

BCh 512. Bioenergetics. 2 hours, term to be arranged.

Principles of biological energy transduction. Respiratory biochemistry, biological oxidation-reduction and oxidative phosphorylation.

BCh 513. Advanced Intermediary Metabolism. 2 hours, term to be arranged.

Advanced aspects of the metabolism of lipids, sterols, carbohydrates, amino acids, and proteins; interrelationships of metabolism and mechanisms of control.

BCh 514. Enzymology. Hours and term to be arranged.

The physical and chemical properties of enzymes and the reactions they catalyze. The credit is either two or three hours depending upon the course content and instructor.

BCh 515. Biophysical Chemistry. 4 hours spring.

An overview of biophysical chemistry. Intermolecular interactions in liquid and liquidcrystalline phases. The thermodynamics of biological systems, Physics and chemistry of interfacial phenomena. Biophysical characterization of macromolecules. Physical behavior of cells as biocolloids including biorheology and cellular contact phenomena.

- BCh 516. Biochemical and Biophysical Technique. Hours and terms to be arranged.
 - Selected laboratory exercises concerned with the preparation and characterization of substances of biochemical importance. Biophysical study of macrocolecules and surface phenomena. Instrumentation theory and practice, including optical methods of analysis, electrokinetic techniques, and isotopic methods.
- BCh 517. Topics in Advanced Biophysical Chemistry. Hours and term to be arranged.

Current concepts and theoretical foundations in selected topics of biophysical chemistry, Prerequisite; BCh 515.

- BCh 518. Biochemical Properties of Proteins. 2 hours, term to be arranged.
 - Structure and function of proteins including levels of protein structural organization, methods for characterization and current concepts of protein evolution.
- BCh 519. Biochemical Mechanisms of Disease. 2 hours, term to be arranged.

Biochemical mechanisms underlying selected human diseases.

BCh 520. Structure and Function of Biological Membranes. 2 hours, term to be arranged.

The composition of biological membranes and the functional aspects of their composition; models of membrane structure; membrane function and mechanism of membrane transport.

BCh 521. Biophysical Properties of Proteins. 2 hours, term to be arranged.

Physical properties of proteins in solutions and crystals including methods for characterization of biophysical properties.

BCh 601. Research. Any term, hours to be arranged.

BCh 605. Reading and Conference. Any term, hours to be arranged.

BCh 607. Seminar. Any term, hours to be arranged.

DIVISION OF EXPERIMENTAL BIOLOGY

William Montagna, Head of Division

Professor: Montagna (Primate Center)

Associate Professors: Bell (Primate Center), Brenner (Primate Center), Fah-

renbach (Primate Center)

Research Associates: Nakagawa, Rokosova Research Assistants: A. Hanson, Van Bueren

Elective Courses

EB 501. Research. Any term, hours to be arranged.

EB 505. Reading and Conference. Any term, hours to be arranged.

EB 507. Seminar. Any term, hours to be arranged.

EB 510. Biological Ultrastructure. 2 hours, term to be arranged.

 Λ detailed presentation of the fine structure of cells, their organelles and inclusions with emphasis on the correlation of ultrastructural specialization and function. Lectures, 2 hours a week: 24 hours.

EB 511. Comparative Neuroendocrinology. 2 hours, term to be arranged.

 Λ course in comparative endocrinology with emphasis on neuroendocrine control systems in both vertebrates and invertebrates. The various lines of physiological, biochemical and morphological evidence including electron microscopy which supports the neurohemal theory will be presented in detail. Metamorphosis in insects, ovulation in mammals, lactation in mammals and adrenocortical secretion in vertebrates will be covered.

EB 512. Connective Tissue. 2 hours, term to be arranged.

This course will cover the structure, function and metabolism of connective tissues in general. Their major constituents: collagen, elastin, and mucopolysaccharides, will be covered in detail. The structure of these constituents will be discussed at various levels of organization with emphasis placed upon their molecular architecture, cellular origin, biosynthetic mechanisms. Specialized areas, such as bone formation and mineralization, and wound healing will be analyzed also.

EB 601. Research. Any term, hours to be arranged.

EB 605. Reading and Conference. Any term, hours to be arranged.

EB 607. Seminar. Any term, hours to be arranged.

DIVISION OF MEDICAL GENETICS

Robert D. Koler. Head of Division

Professors: Koler, Litt, Rigas

Associate Professors: Bigley, Black, N. Buist, Hecht, Lovrien, Prescott (Dental School)

Assistant Professors: J. Macfarlane, Templeton

Research Associates: Ditewig, Kennaway, Rowe, Stankova, Vanbellinghen

Research Assistants: Burkitt, Gruen, Hazard, Head, McCaw, McDonald, Milbeck, Nicholas, Stocklen, Wyandt

Required Courses

First Year

Elective Courses

MGen 501. Research. Any term, hours to be arranged.

MGen 505. Reading and Conference. Any term, hours to be arranged.

MGen 507. Seminar. Any term, hours to be arranged.

MGen 510. Population Genetics I. 3 hours fall.

Mathematical treatment of population genetics theory and applications; Hardy Weinberg equilibrium and gene frequency estimation, segregation analysis, association, recombination and linkage, applications to the study of human disease. Lectures, 3 hours a week.

MGen 511. Population Genetics Laboratory I. Any term, hours to be arranged.

Fundamentals of the collection of genetic data including pedigree taking and processing, computer assisted analysis of genetic data. Hours to be arranged.

MGen 512. Population Genetics II. 3 hours fall.

Advanced concepts of population dynamics; inbreeding, selection, mutation, population structure, evolution and population simulation. Lectures, 3 hours a week.

MGen 513. Population Genetics Laboratory II. Any term, hours to be arranged.

Advanced experimental design, computer applications to genetics, independent research. Hours to be arranged.

MGen 601. Research. Any term, hours to be arranged.

MGen 605. Reading and Conference. Any term, hours to be arranged.

MGen 607. Seminar. Any term, hours to be arranged.

MGen 609. Clinical Experience. Any term, hours to be arranged.

DEPARTMENT OF MEDICAL PSYCHOLOGY

Joseph D. Matarazzo, Chairman of Department

Professors: Boyd, J. Brown, Fitzgerald, Garner, Lindemann, Lu (Dental School), J. Matarazzo, R. Matarazzo, Phoenix (Primate Center), Vernon, Wiens

Associate Professors: Hanf, Henderson, G. Miller, O'Brien, Phillips, Rawlinson, Terdal

Assistant Professors: Eaton (Primate Center), R. Jackson, Meikle

Instructor: Manaugh

Lecturers: Abrams, Bernstein, Lazere, Strange

Residents: DuHamel, Eyberg, Harper

Required Courses

First Year

Þ

A.

t

MPs 410. Medical Psychology. 2 hours fall.

Basic psychological and behavioral principles derived from laboratory research and their applications in clinical practice and research in medicine. Examined within the latter context are pre- and postnatal influences, early development, intellectual processes, learning and conditioning, anxiety and other motivational states, and influences associated with man as as social organism. Lectures, demonstrations, and laboratory. 49 hours.

Third Year

Con 620. Child Health. (See page 38).

Elective Courses

MPs 501. Research. Any term, hours to be arranged.

MPs 505. Reading and Conference. Any term, hours to be arranged.

MPs 507. Seminar. Any term, hours to be arranged.

Neurophysiology of Learning Sensory Processes Psychopharmacology Contemporary Issues in Motivation Hormones and Behavior Neurological Basis of Reproduction Comparative Psychology Sensory Development Human Learning Conditioning Cognitive Processes Punishment Learning and Motivation
Developmental Psychology
Verbal Behavior
Social Psychology
Social Process Applications
Individual Behavior Modification
Abnormal Psychology
Alcohol and Behavior
Quantitative Methods
Laboratory Methods
Computer Methods

MPs 511. Statistics. 3 hours, term to be arranged.

Statistical methods for scientific research: including scales of measurement; tests of significance; correlation and regression; analysis of variance and design of experiments; distribution-free techniques; Type I error, Type II error and Power.

MPs 512. Research Design. 3 hours, term to be arranged.

Basic concepts of the linear model (including linear regression) and its application to the design and analysis of experiments. Topics covered include essentials of matrix algebra; bivariate and multivariate linear regression analysis; introduction to experimental design using repeated and non-repeated measures; the non-parametric model, introduction to univariate scaling theory. Prerequisite: MPs 511 or equivalent.

MPs 513. Advanced Statistics. 3 hours, term to be arranged.

Analysis of the foundations of measurement, quantitative methods, correlation and regression theory, factor analysis, basis of psychophysical methods, set theory, and special topics.

MPs 514. Sensation and Perception. 3 hours, term to be arranged.

Review of the basic psychophysical and neurological mechanisms of audition, somatic senses, vision, olfaction, and gustation, followed by a survey of the major experimental and theoretical works in perception.

MPs 515. Learning and Conditioning. 3 hours fall.

A critical examination of cyidence relating to basic learning phenomena in both classical and instrumental conditioning.

MPs 516. Motivation. 3 hours spring.

A detailed treatment of problems relating to the definition and measurement of motivation, primary and secondary antecedents of drive, associative and nonassociative theories and motivational aspects of conflict, frustration, and incentives.

MPs 517. History of Psychology. 3 hours fall,

Examined are developments in the history of psychology necessary for an understanding of some of the main currents in contemporary psychology. Prominent ideas from structuralism, functionalism, associationism, early behaviorism, gestalt psychology, psychoanalysis, and neobehaviorism are analyzed and their relevance to modern ideas critically evaluated.

MPs 518. Physiological Psychology. 3 hours spring.

Survey of the basic literature in the field, with emphasis on the role of the central nervous system in behavior; fundamentals of neuroanatomy and neurophysiology basic to physiological psychology.

MPs 519. Theories of Personality. 3 hours spring.

Critical review of the major theories of personality, including current behavioral approaches, and empirical evidence supporting these theories.

MPs 520. Individual Differences. 3 hours winter.

Introduction to individual differences in humans, their distribution in the general population, and methods of measuring such differences in intelligence, personality, aptitudes, interests, and other traits; characteristics of good tests, and their uses and limitations.

MPs 521. Theories of Learning. 3 hours winter.

Analysis and comparison of the major theories of learning covering their logical and systematic properties as well as their empirical foundations.

MPs 601. Research. Any term, hours to be arranged.

MPs 605. Reading and Conference. Any term, hours to be arranged.

MPs 607. Seminar. Any term, hours to be arranged.

MPs 609. Clinical Experience. Any term, hours to be arranged.

MPs 650. Psychological Assessment in Medical Practice. Any term, hours to be arranged.

Introduction to intellectual and personality assessment in medical practice. Theoretical foundations and uses and limitations of specific assessment procedures. Psychological tests and objective behavioral observation procedures that can be used by the physician in his office practice with implications for management.

DEPARTMENT OF MICROBIOLOGY

Lyle Veazie, Acting Chairman of Department

Professors: Frisch*, E. Meyer, Oginsky

Associate Professors: W. Iglewski, Joys, Malley (Primate Center), Rittenberg†

Assistant Professors: Burger (Veterans Hospital), B. Iglewski

Assistant Clinical Professor: Frothingham

Instructor: Gerhardt

Affiliates: Creamer (Microbiology, Dental School), Parker (Oral Biology and Microbiology, Dental School)

Required Courses

Second Year

Mb 610. Introduction to Medical Microbiology. 4 hours.

An introduction to medical microbiology involving a discussion of the basic properties of microorganisms and their relation to the infective processes. Lecture, laboratory and case presentation: 92 hours.

Con 610. Systems Pathophysiology. (See page 38.)

Elective Courses

Mb 501. Research. Any term, hours to be arranged.

Mb 505. Reading and Conference. Any term, hours to be arranged.

Mb 507. Seminar. I hour any term.

Mb 508. Advanced Virology. 4 hours, term to be arranged.

Biochemical and biophysical nature of viruses, mechanisms of viral infection, enumeration and statistical interpretation of the infectious unit, virus, antibody reactions, biochemical consequences of infection, viral genetics, and interference phenomena. Lectures and laboratories. Open to a limited number of students with consent of instructor.

Mb 509. Bacterial Physiology. 4 hours, term to be arranged.

Cystochemistry and ultrastructure, patterns of growth, metabolic pathways of degradation and synthesis, energy mechanisms, genetic controls and their regulation, physiological mechanisms for environmental adaptation. Lectures and laboratories, Open to a limited number of students with consent of instructor.

Mb 510. Microbial Genetics. 4 hours, term to be arranged.

The molecular basis of heredity. The genetic control of biochemical activities in bacteria. Systems of recombination in bacteria, bacteriophage, actinomycetes, and fungi. The theory and practice of genetic mapping and fine structure analysis. Population genetics as applied to micro-organisms. Lecture and laboratories.

Mb 511. Pathogenesis. Term and hours to be arranged.

Study of selected areas of medical microbiology with emphasis on pathogenesis of infectious agents. Control of production and mode of action of virulent products: exotoxins, endotoxins, viral and Rickettsial toxins, hemolysins, leucocidins, nucleases, coagulases, kinases, etc. Inhibition of host cell macromolecular synthesis following virus infection and its relationship to cytopathic effect and viral virulence; inhibition of DNA, RNA and protein

^{*} Leave of absence July 17, 1972 to July 1, 1974.

[†] Leave of absence June 1, 1972 to January 1, 1973.

synthesis; induction to new tRNAs, activation of lysosomol enzymes; nonimmune host factors involved in infection; the macrophage and its products, lyosomes and non-globulin serum components.

Mb 512. Immunochemistry. 4 hours, term to be arranged.

Chemical and physical nature of antigen, antibody, antigen-antibody eomplexes; physical and kinetic measurements of antigen-antibody interaction; current methods of antibody isolation, immunochemical techniques; quantitative precipitation, gel-diffusion, immunoclectrophoresis, ultracentrifugation, equilibrium dialysis, and column chromatography. Lectures and laboratories. Open to a limited number of students with consent of instructor. Prerequisites: elementary physical chemistry and biochemistry.

Mb 513. Advanced Microbiology and Immunology. Term and hours to be arranged.

Study of selected areas of microbiology with emphasis on contemporary concepts of the basic nature of microbial and host systems and their interactions. Open to a limited number of students with consent of instructor. Prerequisite: Mb 610.

Mb 601. Research. Any term, hours to be arranged.

Mb 605. Reading and Conference. Any term, hours to be arranged.

Mb 607. Seminar. Any term, hours to be arranged.

DEPARTMENT OF PATHOLOGY

Richard D. Moore, Chairman of Department

Professors: Buchan (Neuropathology), Dawson (Surgical Pathology, Cytology), R. D. Moore, Niles, Siegel, Sneeden

Clinical Professor: Jacobson

Associate Professors: Brooks, Linder, McNulty (Primate Center), Palotay (Primate Center)

Assistant Professor: Brady

Instructor: Lewman Lecturer: Cordell

Affiliates: Auld (Veterans Hospital), Chester (Veterans Hospital), Cochran, Gourley, Meek, Nohlgren, Orendurff (Veterans Hospital), Oyama, G. Starr, Weimar (Ophthalmology), Wescott (Dentistry, Dental School)

Residents: Chawla, McFadden, Schmidt

DIVISION OF NEUROPATHOLOGY

George C. Buchan, Head of Division

Professor: Buchan

Affiliate: **Huntington** (Good Samaritan Hospital)

Required Courses

First Year

Pth 410. General Pathology. 3 hours spring.

This course is designed to introduce the student to the principles and concepts of disease. Broadly characterized, it is the study of the effects of injury on cells and tissue and their subsequent reaction. The topics considered will include: cellular injury, abnormal division and differentiation, disturbances in cellular metabolism, disturbances in circulation, inflammation and neoplasia. This will prepare the student for the detailed study of the functional and structural abnormalities to be covered in the Systems Pathophysiology course during the second year. The subject material will be presented in conferences, lectures and demonstrations with reinforcement and illustration by selected laboratory experiments. 66 hours.

Second Year

Con 610. Systems Pathophysiology. (See page 38.)

Elective Courses

- Pth 501. Research. Any term, hours to be arranged.
- Pth 505. Reading and Conference. Any term, hours to be arranged.
- Pth 507. Seminar. Any term, hours to be arranged.
- Pth 516. Advanced Systemic Pathology. Any term, hours to be arranged.

Study of the detached pathology of one system.

Pth 517. Advanced Pathological Histology, Any term, hours to be arranged.

Systematic study of microscopic sections of autopsy tissues. Open to students who have had at least one term's work in pathology.

Pth 518. Special Pathology of Heart and Circulation. Hours to be arranged.

Systematic and inclusive study of the pathologic states affecting the circulatory system, illustrated by sections and gross materials.

Pth 519. Introduction to Electron Microscopy. 2 hours fall.

An introductory course including illustrated lectures and demonstrations dealing with the electron microscope, its technical operations, and broad applications in biological studies and research. Offered alternate years.

Pth 520. Principles and Techniques of Tissue Culture. 2 hours fall.

Lectures, demonstrations, and conferences dealing with techniques of cell and tissue culture; designed to provide a background of general information on cultured cells and instruction in application of the method to problems in current areas of research in cell biology. Offered alternate years.

Pth 521. Biology of Cancer. 1 hour spring.

Lectures and discussions of the natural history of cancer, geographic and ethnologic aspects, tumor genetics, and etiologic concepts and mechanisms of carcinogenesis.

Pth 522. Viral Oncology. 2 hours, term to be arranged.

Systematic study of viruses in relation to cancer in animals and man. Biological aspects of tumor induction by viruses, intracellular and extracellular factors in neoplasia; biochemical and biophysical properties of tumor viruses.

Pth 523. Biochemical Pathology. 2 hours, term to be arranged.

This course deals with the biochemical abnormalities characteristic of selected examples of both genetic and nongenetic diseases. Particular emphasis is placed on the role of nucleic acids in the processes involved. A short series of introductory lectures reviews nucleic acid biochemistry and metabolism, and is followed by a group of lectures dealing with our current knowledge of biochemical abnormalities related to chromosomal diseases, blood proteins, urinary products, storage diseases, viral infections, neoplasia, irradiation, and aging.

Pth 524. Special Research Problem in Experimental and Comparative Pathology. Terms and hours to be arranged.

The purpose of this course is to acquaint new graduate students with the research work of various departmental members. The student is assigned a limited research problem, working in the research laboratories of the staff members concerned.

* Tth 525. Modern Trends in Pathologic Biology. 2 hours spring.

Recent progress in the study of inflammation and degeneration, neoplasia, differentiation, and nucleic acid chemistry in disease states.

Pth 526. Radiation Biology. 2 hours, term to be arranged.

Lectures and demonstrations dealing with the nature of ionizing radiation, interactions with organic matter, methods of measurement, and biological effects. The major aim of the course is to emphasize mechanisms of radiation effects on molecules, cells, and organisms.

Pth 601. Research. Any term, hours to be arranged.

Ith 605. Reading and Conference. Any term, hours to be arranged.

Pth 607. Seminar. Any term, hours to be arranged.

"Pth 651. Anatomic Pathology. Any term, hours to be arranged.

Participation by the student in the autopsy and surgical pathology services and in related departmental conferences. Stress is placed on the correlation of the clinical and pathologic findings.

DEPARTMENT OF PHARMACOLOGY

William K. Riker, Chairman of Department

Professor Emeritus: David

Professors: Gabourel, McCawley, Riker Associate Professors: Fox, Tanz, Wendel Visiting Associate Professor: Minker

Assistant Professors: Brummett, Downes, Olsen

Required Courses

Second Year

Phc 610. Pharmacology. 3 hours.

The course is designed to provide a firm understanding of the scientific principles of drug action and usage. It is an essential prelude to the applied, systems-oriented therapeutics to be taught in the subsequent Pathophysiology course. Major topics to be covered include: dose and time-effect relationships, selective toxicity, absorption, distribution, metabolism and elimination of drugs, pharmacogenetics, drug-drug interactions, and the clinical evaluation of drug efficacy and safety. In all the preceding topics major emphasis is placed on prototype, clinically useful drugs. Lectures, small group conferences, selected laboratory experiments and demonstrations: 48 hours.

Con 610. Systems Pathophysiology. (See page 38.)

Elective Courses

Phc 501. Research. Term and hours to be arranged.

Students who are properly qualified and who can devote an adequate amount of time to the work are encouraged to pursue original investigations.

Phc 505. Reading and Conference. Term and hours to be arranged.

General Principles of Pharmacology. Drug Metabolism, Molecular Pharmacology.

Neuropharmacology. Clinical Pharmacology.

Advanced Cardiovascular Pharmacology.

Pharmacogenetics.

Phc 507. Seminar. 2 hours.

Phc 514. Factors Modifying Drug Action. 2 hours, term to be arranged.

Lectures on drug metabolism, distribution and excretion, drug protein interaction, pharmacogenetics, and drug allergy and idiosyncrasy. Prerequisite: Consent of instructor.

Phc 515. Pharmacological Control of Biological Information Transfer. 2 hours, term to be arranged.

Lectures on the basic mechanisms for nucleic acid and protein biosynthesis, mechanisms of repression and derepression, and the effect of hormones and other drugs on these systems. Applications to chemotherapy will also be discussed. Prerequisite: Consent of instructor.

Phc 516. Receptor Theory and Conformational Analysis. 2 hours, term to be arranged.

Lectures on modern receptor theory, kinetics of drug receptor interactions, drug antagonism, allosteric receptor concept, and conformational analysis of receptor sites. Prerequisite: Consent of instructor.

Phc 601. Research. Term and hours to be arranged.

Phc 605. Reading and Conference. Term and hours to be arranged.

Phc 607. Seminar. Term and hours to be arranged.

DEPARTMENT OF PHYSIOLOGY

John M. Brookhart, Chairman of Department

Professors: Brookhart, Rampone, B. Ross

Associate Professors: Faber, Resko (Primate Center), R. Swanson, Trainer

Assistant Professors: Keyes, Petersen, P. Reynolds (Dental School)

Research Associates: Blackmore, Talbott

Clinical Research Associates: Bristow, A. Buist, M. Edwards, Greer, Metcalfe,

Neill, Porter

Research Assistants: Gault, Green, L. Long, Middleton

Postdoctoral Fellow: Thornburg

Required Courses

First Year

Phy 410. Human Physiology. 7 hours, winter and spring.

Lectures, laboratory exercises and conferences devoted to mammalian physiology, with special application to the human. Consideration is given to the basic elements of effector control; basic information essential to the understanding of the functions of the respiratory, cardiovascular, and renal systems; discussion of gastrointestinal, liver and endocrine functions. Lectures and laboratory, 150 hours.

Second Year

Con 610. Systems Pathophysiology. (See page 38.)

Elective Courses

Phy 501. Research. Any term, hours to be arranged.

Prcrequisites: To be determined by instructor.

Phy 505. Reading and Conference. Any term, hours to be arranged.

Prerequisites: To be determined by instructor.

Phy 507. Seminar. Any term, hours to be arranged.

Prerequisites: To be determined by instructor.

Phy 515, 516. Physiological Instrumentation and Techniques. 4 hours, terms to be arranged. Lectures and laboratory work covering basic principles of measurements, transducers, physiological signals, signal processing and display, and applications to specific problems of physiological measurement. Basic lectures and laboratory work in electronics are included. Lectures and conferences, 2 hours a week; laboratory, 6 hours a week: 96 hours.

Phy 517. Advanced Cardiovascular Physiology. 4 hours, term to be arranged.

Emphasis of this course is on the physics of the cardiovascular system. Techniques of measurement and current views of cardiac performance, aortic and local blood flows, hydrostatic pressures, and the micro-circulation. Regulatory mechanisms. Conference, 2 hours a week; laboratory, 6 hours a week: 96 hours. Prerequisites: To be determined by instructor.

Phy 518. Biological Transport Processes. 4 hours, term to be arranged.

Topics include: Fick's law of diffusion; membrane effects (diffusion of ions through an electrical field, molecular sieving, carrier-mediated diffusion, active transport, osmosis through "leaky" membranes); irreversible thermodynamic treatment of diffusion processes. Pertinent examples from the literature on artificial membranes, frog skin, muscle capillaries, and the renal tubule. Reading from monographs and original literature. Conference, 3 hours a week; laboratory, 6-hour periods on alternate weeks: 72 hours. Prerequisites: To be determined by instructor.

Phy 519. Advanced Neurophysiology. 4 hours, term to be arranged.

A study of principles of investigation, observation and inference and an extensive review of depth of the integrative functions of the central nervous system. Conference, 2 hours a week; laboratory, 6 hours a week; 96 hours. Prerequisites: To be determined by instructor.

Phy 520. Digestion and Absorption. 3 hours.

Intestinal absorption processes with emphasis on nutrient materials. Modern methods and techniques of investigation, dynamics of intestinal transport, the specialized functions of the gastrointestinal system in the assimilation of dietary nutrients.

Phy 521. Respiratory Gas Transport. 3 hours, term to be arranged.

Dynamics of transport of respiratory gases, with emphasis on graphical analysis of pulmonary and circulatory phases of transport. Ventilation-perfusion relationships, unsteady

state, gas stores of the body, and exchange and equilibrium of inert gases. Conference, 2 hours a week; laboratory, 3 hours a week: 60 hours. Prerequisites: To be determined by instructor.

Phy 522. Fetal and Neonatal Physiology. 3 hours, spring term.

Special physiology of the *in utero* state and of the transition to an independent existence. Placental gas exchange; acid-base homeostasis; fetal and neonatal circulation, anoxia tolerance, thermal homeostasis, and renal functions. Conference, 2 hours a week; laboratory, 3 hours a week: 60 hours. Prerequisites: To be determined by instructor.

Clinical Sciences

CONJOINT COURSES—CLINICAL SCIENCE

Required Courses

First Year

Con 413. Introduction to Patient Evaluation. 3 hours spring.

A beginning course designed to introduce the student, in the setting of lectures, conferences and patient studies, to work with patients in the interview situation, and become familiar with the methods used in interviewing. The form, purpose and use of the medical history are reviewed along with considerations of the methods by which medical problems are solved. The pathophysiology and physical diagnosis of the eyes, ears, nose and throat is studied by means of lectures, practice sessions, and conferences. The differences in approach to the examination and consideration of disease in infants and children completes the course. 66 hours.

Second Year

Con 611. Patient Evaluation. 5 hours.

Lectures, demonstrations, practice sessions and ward rounds dealing with the principles of history taking physical examination, and the pathophysiological basis for physical signs. 126 hours.

Third Year

Con 620. Child Health. 18 hours.

An interdisciplinary course providing opportunity for the student to learn the fundamental concepts of child health as they relate to acute and chronic disease processes and the inter-relationships of the child, his family, school and community.

This course will be offered as a conjoint educational exercise by Pediatrics, Child Psychiatry, Medical Psychology, Public Health and Preventive Medicine and the Crippled Children's Division. Students will be provided with opportunities to examine a wide spectrum of patients and to interview their families and to participate as integral members of the medical care teams at Doernbecher Hospital and the Crippled Children's Division. They will pursue a continuity of care study which will necessitate involvement with the family, the community and social and medical agencies. Students will have experience in the newborn nurseries and the neonatal intensive care unit and will also have experience with normal children in a nursery school setting and with emotionally disturbed children.

Guidance will be provided by the staff during ward and field experiences and individual and group discussions will be provided as a regular part of the work. 12 weeks. Lectures 60 hours; ward work, clinic, conferences, seminars, hospital rounds and demonstrations. 432 hours.

Con 621. Neurosciences. 9 hours.

An interdisciplinary course to prepare the student to examine and detect disorders of the eye, ear and central nervous system. The student will be exposed to case material and instruction adequate to familiarize him with the pathogenesis of major diseases in these areas and to enable him to recognize early malfunctions in the systems. The course will be taught by the neurology, neurosurgery, ophthalmology, and otolaryngology sections in an integrated manner. 216 hours.

Elective Courses

Con 601. Research. Any term, hours to be arranged.

Con 605. Reading and Conference. Any term, hours to be arranged.

Con 607. Seminar. Any term, hours to be arranged.

Con 609. Clinical Experience. Any term, hours to be arranged.

Con 650. Primary Physician. Any term, hours to be arranged.

The student will be exposed to a model of family practice utilizing existing clinic and hospital facilities.

DEPARTMENT OF ANESTHESIOLOGY

Norman A. Bergman, Chairman of Department

Professors: Bergman, Haugen

Associate Professors: Klein, Loehning, B. Thompson, Waltemath

Associate Clinical Professor: Gowing

Assistant Professor: Darsie (Veterans Hospital)

Senior Instructors: Erbguth, H. Jones (Veterans Hospital)

Instructor: Saga

Clinical Instructors: Branford, Copperman, D. Dobson, Hagmeier, Harber, Lamoreaux, Palmer, Peters, Schaff, C. Wagner

Residents: Bathurst, Eberle, Honma, Hoppins, Hummer, Kenney, Kice, M. Kim, Osterlind, Powell, Ruble, Shields, Sikes, Yoshioka

Elective Courses

Anes 601. Research. Any term, hours to be arranged.

Anes 605. Reading and Conference. Any term, hours to be arranged.

Anes 607. Seminar. Any term, hours to be arranged.

Anes 609. Clinical Experience. Any term, hours to be arranged.

DEPARTMENT OF CLINICAL PATHOLOGY

Tyra T. Hutchens, Chairman of Department

Professors: C. Allen (Nuclear Medicine), Bramhall, T. Hutchens

Clinical Professors: Oyama, R. Thompson

Associate Professors: Berroth, Haines, M. Hamilton, Marquardt, Rashad

Associate Clinical Professors: Baer, H. Harris, Lium

Assistant Professors: Aitchison, Baptist (Medical Technology), J. D. Boyett (Nuclear Medicine) (Veterans Hospital), K. Kim, Koontz, Sheth, J. Swanson

Assistant Clinical Professors: Brady, D. Johnson, Landreth

Instructors: Chadwick (Medical Technology), Parker (Medical Technology), M. Thomas (Medical Technology), J. Wilkinson (Medical Technology)

Clinical Instructors: D. Brown, M. Campbell (Medical Technology), A. Hamilton

Residents: Chamberlain (Ph.D., Toxicology), Chawla, Fristoe, Kan, Mc-Fadden, Pornpatkul, F. Roberts

Elective Courses

- CP 501. Research. Any term, hours to be arranged.
- CP 505. Reading and Conference. Any term, hours to be arranged.
- CP 507. Seminar. Any term, hours to be arranged.
- CP 520. Advanced Nuclear Medicine Techniques. Any term, hours to be arranged. Conferences and demonstrations concerned with theory, methodology, and clinical interpretation of special nuclear medicine procedures.
- CP 521. Advanced Nuclear Medicine Laboratory. Any term, hours to be arranged.

 Laboratory experience with special nuclear medicine techniques and instrumentation.
- CP 522. Nuclear Medicine Laboratory. Any term, hours to be arranged. Laboratory experience with instruments used in nuclear medicine.
- CP 601. Research. Any term, hours to be arranged.
- CP 605. Reading and Conference. Any term, hours to be arranged.
- CP 607. Seminar. Any term, hours to be arranged.
- CP 609. Clinical Experience. Any term, hours to be arranged.

DEPARTMENT OF DERMATOLOGY

Walter C. Lobitz, Jr., Chairman of Department

Professors: Hu (Primate Center), Lobitz, Montagna (Primate Center)

Clinical Professors: F. Kingery, Ray, T. Saunders, Walker

Associate Professors: Bell (Primate Center), Giacometti (Primate Center), Parakkal (Primate Center), Wuepper

Associate Clinical Professors: Crowe, Dahl, Massar, Rollins, Ryan, Shaw, Watkins

Assistant Professors: Hanifin, Pasztor (Primate Center), Storrs

Assistant Clinical Professors: Caron, Currie, Larsen, B. Miller, Moyer, Romaine, Russell

Instructors: Hidehiko (Primate Center), Turner

Clinical Instructors: L. Allen, W. Anderson, Brokken, Contorer, DeLateur, D. Frisch, Hemphill, Lachman, Larner, D. Martin, R. Sullivan, Wright

Research Assistants: Beeman, M. Campbell, J. Johnson, Strangfeld

Fellows: Knutson (Primate Center), Turner, Winkler

Residents: Bishop, Blaugrund, Dimond, Druker, Graff, Knapp, C. Martin, Mickelwait, Rasmussen, D. Russell, Swinyer, D. Wood

Elective Courses

Derm 601. Research. Any term, hours to be arranged.

Derm 605. Reading and Conference. Any term, hours to be arranged.

Derm 607. Seminar. Any term, hours to be arranged.

Derm 609. Clinical Experience. Any term, hours to be arranged.

DIVISION OF FAMILY PRACTICE

Laurel Case, Head of Division

Associate Professor: Case

Assistant Professor: Gilberts

Assistant Clinical Professor: W. Fisher

Instructor: Sanders

Clinical Instructors: Abbott, Ambroson, Atkinson, Bartlett, R. Bernard, Bianchini, Boe, Boyd, Boye, Buonocore, J. Byers, M. Byers, C. Chapman, Cockburn, Crist, Daniels, Daugherty, DeWitt, Findlay, Ford, Gorman, Gustafson, Harpole, Henderson, Huston, A. Hutchinson, Irvine, John, R. Johnson, Kochevar, Lawton, Lindsay, McIntyre, G. Miller, R. E. Moore, Nealy, O'Shea, Pennington, Pyrch, Remy, Reynolds, G. Roberts, W. Roberts, R. Robinson, W. Ross, Sammons, Schroff, L. Scott, Skirving, V. Summers, W. Thompson, Urman, Van Veen, Vore, Voy, Wade, C. Weare, J. Weare, Weeks, White, Wiebe, Willeford, Winslow, P. Wolfe, Zupan

DEPARTMENT OF MEDICINE

J. David Bristow, Chairman of Department

- Professors Emeriti: D. Baird, Brill, H. Haney, Holcomb, N. Jones, Lewis, Margason, Sheldon
- Professors: M. Baird, J. Benson, Bristow, Carter, Edwards, Greer, Griswold, Grover, Holman, Kassebaum, Kendall, Koler, Labby, Linman, Mass (Veterans Hospital), Malinow (Primate Center), Metcalfe, J. Morris (Veterans Hospital), Pirofsky, Rahimtoola, Ritzmann (Veterans Hospital), A. Seaman, Speros, Stevens, Swank, Trainer, Walsh (Veterans Hospital)
- Clinical Professors: Burgner, Dow, Kammer, Long, Michel, Perlman, E. Rosenbaum, Schwartz, Selling, Stephens, Tuhy, Underwood, Walker
- Associate Professors Emeriti: Coffen, A. Davis, M. Moore, Swett
- Associate Professors: R. Bailey, Bigley, J. D. Boyett (Veterans Hospital), Haas (Veterans Hospital), Haynie (Veterans Hospital), Hecht, Isom (Pediatrics), Kloster*, M. Krippaehne, W. Assistant Clinical Professor: Rinehart

Senior Clinical Instructor: Kretschmar

Clinical Instructors: Ladd, Sloop, Strom

Internal Medicine—Required Courses

Second Year

Con 611. Patient Evaluation. (See page 50.)

Third Year

Med 620. Third-Year Medicine. 18 hours.

Third-year medicine introduces the student to the study of the broad field of internal medicine by means of hospital clerkship work and conference sessions. Hospital clerkship provides opportunity for the intensive study of patients with medical diseases, and active participation, under supervision, in ward rounds, and all other exercises and procedures

connected with medical ward activity. Particular emphasis is given to the development of skill in history taking, physical examination, and differential diagnosis. Night or weekend duty on a rotational basis may be required. The conference sessions deal with basic concepts relating to a broad range of medical disorders, and discussions of reading in the field of internal medicine.

The student attends Medical Staff Conferences, staff rounds and a Medicine mortality conference. Conferences 7½ hours a week for twelve weeks. Clerkships 28½ hours a week for twelve weeks. 432 hours.

Internal Medicine—Elective Courses

- Med 501. Research. Any term, hours to be arranged.
- Med 505. Reading and Conference. Any term, hours to be arranged.
- Mcd 507. Seminar. Any term, hours to be arranged.
- Mcd 601. Research. Any term, hours to be arranged.

Students may elect to conduct research in the various divisions of medicine by arrangement with the head of the division.

- Med 605. Reading and Conference. Any term, hours to be arranged.
- Med 607. Seminar in Medicine. Any term, hours to be arranged.
- Med 609. Clinical Experience. Any term, hours to be arranged.
- Med 681, 682. Premarital and Marital Counseling in Medical Practice and the Medical Problems of Sexuality. 1 hour, winter and spring.

Lectures and discussions on the psychophysiological background of human sexuality and the medical and ethical problems encountered in this area of medical practice. 1 hour a week: 24 hours.

Med 691. Electrocardiography. 1 hour, winter term.

Conferences, demonstrations and laboratory exercises devoted to the techniques, physiological basis and interpretation of electrocardiography and vectorcardiography. Limited to students on the Medicine block, 2 hours a week for 12 weeks; 24 hours.

Med 692. Ward Rounds in Endocrinology. 1 hour, any term.

Examination and discussion of hospitalized patients with endocrine disease in Multnomah Hospital and Medical School Hospital. Limited to 6 students. 2 hours a week for 12 weeks: 24 hours.

Med 694. Fluid Electrolytes and Acid Base Regulation. 1 hour.

Intensive study of selected problems in fluid and electrolyte management in the Multnomah and Medical School hospitals. Students work in pairs and study assigned patients. Conferences and discussions on rounds concerning the diagnosis, treatment, and basic mechanisms of these disorders in patients. Patient study 2 hours a week at any convenient time; rounds 2 hours a week: 48 hours.

Med 696. Special Case Studies in Medicine. Any term, hours to be arranged.

Students may elect to make detailed studies and reports of selected cases in the fields of cardiovascular, pulmonary, endocrinological and metabolic diseases.

Med 697. Hematological Cell Identification. 1/2 hour any term.

Students are taught cell identification by actual study of slides under supervision. Maximum of 5 students for three weekly sessions. Given four times each term. 1 hour a week for 3 weeks; 3 hours.

Med 698. Case Conference. 1 hour any term.

Analysis of selected case material utilizing new and selected techniques in the study of pulmonary disease. 2 hours a week: 24 hours.

Neurology—Required Courses

Third Year

Con 621. Neurosciences. (See page 50.)

Elective Courses

Neu 601. Research. Any term, hours to be arranged.

Neu 605. Reading and Conference. Any term, hours to be arranged.

Neu 607. Seminar. Any term, hours to be arranged.

Neu 609. Clinical Experience. Any term, hours to be arranged.

* Neu 691. Neurology Conference. 1 hour any term.

Combined conference including neurology, neurosurgery, neuro-ophthalmology, and neuro-radiology. Limited to 10 students, 2 hours a week: 24 hours.

Neu 692. Experimental Neurology. Any term, hours to be arranged.

Research techniques in neurology, neurochemistry, and electroencephalography. Open to third- and fourth-year students.

Neu 693. Clinical Clerkship in Advanced Neurology. 1 hour any term.

Selected neurological cases studied and presented for discussion. Participation in combined neurological, neuroradiological and neurosurgical conferences. Selected studies in clinical neurology or in electroencephalography.

- DEPARTMENT OF OBSTETRICS AND GYNECOLOGY

, Ralph C. Benson, Chairman of Department

Professors Emeriti: J. G. P. Cleland, Stearns, W. Wilson

Professors: R. Benson, R. Durfee

Associate Professors: Blank, J. R. Campbell, deMaria, Hecht, Linder, Novy, Pernoll, Prescott

Assistant Professors: Benda, Klein

Senior Advisors: Ashley, R. Benson, Koler, Montagna, Olmsted, Sleeter

Required Course

Fourth Year

ObG 630. Fourth-Year Obstetrics and Gynecology. 9 hours, one section each term.

Senior students have a block time during their fourth year. During this time, small group seminars reinforce clinical teaching on ward rounds, clinies and special outpatient subspecialty clinics in high-risk pregnancy and fertility problems. Obstetrical cases in the

hospital are examined and followed; there is active participation in ward rounds and teaching conferences. Each student must observe 12 deliveries, participate in at least six deliveries, and follow the course of the mother and child during an assigned period. Students also examine and follow assigned gynecological hospital patients and participate in ward rounds and conferences. Attendance at gynecology tumor outpatient clinic and therapy conference once weekly is required. Obstetrics and Gynecology Clerkship, 33 hours a week for six weeks, in sections. Gynecology Clinic, 10 hours a week for 3 weeks. Obstetrics Clinic, 10 hours a week for 3 weeks. General Clinical Conference, 2 hours a week for 6 weeks.

Elective Courses

ObG 601. Research. Any term, hours to be arranged.

ObG 605. Reading and Conference. Any term, hours to be arranged.

ObG 607. Obstetrics Seminar. Any term, hours to be arranged.

ObG 609. Clinical Experience. Any term, hours to be arranged.

ObG 650. Fetal Neonatal Death Conference. 1/2 hour, any term.

Residents: Angell, J. Baker, T. Burton, Fairley, Farley, D. Frisbie (Child Psychiatry), Gordon, Grass, Hayes, McCulloch, Marcel, Reisman, Shames, Silver, J. Thompson, Vaughey (Child Psychiatry), Vissell

Required Courses

First Year

Psy 410. The Human Context of Medical Practice. 2 hours, fall.

The major goal of this course is to make explicit the student's awareness of basic problems of human life that are germane to medical practice. By the use of lectures, clinical demonstrations, and discussions, a student will become aware of alternative choices in many medical decisions and the impact his own attitudes and values have in making these decisions. He will also become aware of the impact upon himself of medical attitudes and values that differ from his own. He will learn to elicit clear statements of another's attitudes and values about matters of importance to the other person. The student will learn basic communicative skills such as paraphrasing, behavior description and summarizing that he can use in the day-to-day problems confronting a medical student. Finally, he will learn to function as a member of an interprofessional health team and with non-health groups that influence medical practice, Lectures, clinical demonstrations and discussions, 36 hours.

Con 413. Introduction to Patient Evaluation. (See page 50.)

Third Year

Con 620. Child Health. (See page 50.)

Fourth Year

Psy 630. Psychiatry Clinical Clerkship. 9 hours.

The clinical clerkship in psychiatry affords the opportunity to expand concepts and to obtain clinical experiences in psychiatric illness and the emotional correlates of physical disease. Systematic instruction in principles of psychopathology and treatment will be provided through lectures, seminars, case conferences, and individual supervision. Supervised clinical experience is obtained in the psychiatry outpatient clinie, psychiatry inpatient facility, emergency room, community health facilities, and in consultation with the pediatric, medical and surgical services. Special emphasis is placed on further development of the student's interviewing and interactional skills with patients, 216 hours.

Elective Courses

Psy 601. Research in Psychiatry. Any term, hours to be arranged.

Psy 605. Reading and Conference in Psychiatry. Any term, hours to be arranged.

Psy 607. Seminar in Psychiatry. Any term, hours to be arranged.

Psy 609. Clinical Experience. Any term, hours to be arranged.

DEPARTMENT OF PUBLIC HEALTH AND PREVENTIVE MEDICINE

Harold T. Osterud, Chairman of Department

Professors: Osterud, Reinschmidt

Clinical Professors: Press

Associate Clinical Professors: Batten, Fox, Greenlick, Oleinick, Osgood, Wel-

born

Assistant Professors: Chavigny, Goldblatt, P. Kim, Tilson

Assistant Clinical Professors: Dierker, Donnelly, Haskell, Meador, Stitt

Senior Instructor: Lessel

Senior Clinical Instructors: Brandon, Holmes, M. Martin, Toombs

Clinical Instructors: Bobbitt, Creighton, Witter

Affiliate: Shanbeck

Research Assistant: Crawford

DIVISION OF ENVIRONMENTAL MEDICINE

William E. Morton, Acting Head of Division

Professors: Horton, Morton Clinical Professor: Sullivan

Assistant Clinical Professors: Douglas, R. Martin, McClure, Rieke, Sittner,

Welch

Research Assistants: Eshleman, Schuff

Required Courses

First Year

PH 410. Public Health and Epidemiology. 3 hours, fall and winter.

Introduction to concepts and measurements of community health status and problems; emphasis upon human ecology, epidemiology, biostatistics, and environmental sanitation. Lectures, demonstrations and seminars. 72 hours.

Third Year

Con 620. Child Health. (See page 50.)

Elective Courses

PH 501. Resarch. Any term, hours to be arranged.

PH 505. Reading and Conference. Any term, hours to be arranged.

PH 507. Seminar. Any term, hours to be arranged.

PH 601. Research. Any term, hours to be arranged.

PH 605. Reading and Conference.

Law and Medicine: Winter term, hours to be arranged.

A course in medical law, including the basis of law, malpractice, partnerships, contracts

and forensic pathology. Three hours a week, 12 weeks.

Epidemiology: Any term, hours to be arranged. Investigation and field studies. Students choose a subject of interest in preventive medicine,

public health, delivery of medical care, etc. Six or 12 weeks.

PH 607. Seminar. Any term, hours to be arranged.

PH 609. Clinical Experience.

Clinical Field Experience: Any term, hours to be arranged.
Field experience in community medicine and public health or environmental medicine.
Emphasis on student's area of interest, Six or 12 weeks.

DEPARTMENT OF RADIOLOGIC DIAGNOSIS

· Charles T. Dotter, Chairman of Department

Professors: Bilbao, Dotter, Frische, Rösch Professor of Radiologic Technology: Drum

Associate Professor: Blank

Clinical Professors: Burton, Trout

Associate Clinical Professors: W. Erickson, A. Hunter, Loomis, R. Miller, Ovregaard, Raines, Satterwhite, Shipps, Straube, Wandel, Warnock

Assistant Professors: R. Antonovic, Kerber, Kiesel (Veterans Hospital), Stille (Veterans Hospital)

Assistant Clinical Professors: Friedman, Green, Mueller, Wishart

Clinical Instructors: Arkless, Cordova, Haber, G. Johnson, Leary, McDougall, Peck, Philips, Purnell, Roddy, Sayler, Sewell, Stoney, Turcke, Wiley, O. Williams

Research Associate: T. Hutchens Research Assistants: Kidd, Lakin

Residents: J. Anderson, R. Anderson, Barnett, M. Burry, Cain, J. Cooper, Cromwell, Fields, Freeny, Henderson, D. Holman, T. Lee, Lloyd, G. Miller, Pappas, Quilici, Reade

Cardiovascular Fellows: Barrett, Madeira

Required Course

Third Year

RadD 620. Radiographic Diagnosis. 11/2 hours. Two terms either fall, winter or spring.

Broad experience in the interpretation and reporting of X rays through weekly film reading assignments followed by small-group case presentation exercises. Lectures on diagnostic principles, radiographic technic, radiation hazard and protection. 1 hour a week for two terms: 24 hours.

Elective Courses

RadD 601. Research. Any term, hours to be arranged.

RadD 605. Reading and Conference. Any term, hours to be arranged.

RadD 607. Seminar. Any term, hours to be arranged.

RadD 609. Clinical Experience. Any term, hours to be arranged.

RadD 690. Radiographic Diagnosis. Any term, hours to be arranged.

Practical experience derived from individually assigned cases in the teaching file; correction and discussion of students' presentations at weekly seminar; observation and supervised participation in clinical radiologic procedures and related conferences. Enrollment limited,

DEPARTMENT OF RADIATION THERAPY

Clifford V. Allen, Chairman of Department

Professor: C. Allen

Associate Professor: Haines (Nuclear Medicine)

Associate Clinical Professors: Horowitz, M. Hyman, S. Hyman, J. Lee

Assistant Professors: Shaich (Radiation Physics), K. Stevens

Assistant Clinical Professor: Galluci

Clinical Instructor: Vermeere (Radiation Biology)

Residents: M. Huntington, Lienert, Penniman, Ostlund

Required Course

Second Year

Con 610. Systems Pathophysiology. (See page 38.)

Elective Courses

RadT 601. Research. Any term, hours to be arranged.

RadT 605. Reading and Conference. Any term, hours to be arranged.

RadT 607. Seminar. Any term, hours to be arranged.

RadT 609. Clinical Experience. Any term, hours to be arranged.

RadT 691. Introduction to Radiation Therapy. Hours to be arranged.

Attendance and participation in Radiation Therapy planning conferences, observing treatment and follow-up examination on assigned cases.

DEPARTMENT OF SURGERY

William W. Krippaehne, Chairman of Department

Professors: Fletcher, Henke (Veterans Hospital), W. Krippaehne, C. Peterson, Vetto (Veterans Hospital)

Clinical Professors: J. C. Adams, Baker, Boyden, McKirdie, Rosenblatt, Wise, Zeller

Associate Professors: Jacob, R. Robertson, D. Wood

Associate Clinical Professors: Awe, Bassett, D. Cleland, Dennis, Garnjobst, Gorrell, Groshong, Marcum, Shields, Steffanoff, Wayson

Assistant Professors: Eidemiller, Leung, J. Porter, Vander Veer

Assistant Clinical Professors: Andrews, Beckwith, Bieker, N. Campbell, Foster, Grout, Gustavson, Hallin, M. Howard, Hyde, Inahara, Johnsrud, Kelley, Laird, Leaverton, Lindgren, Mayer, Nadal, Parshley, Reiner, K. Robertson, Rowland, Sloop, Snedecor, Sullivan, Trommald, Uhle, N. Wilson

Senior Clinical Instructors: Battalia, Blumberg, Bollam, P. Brown, Colver, Cutler, Diack, Flanagan, Gingrich, Guffee, Harding, Jefferson, R. Johnson, C. Lee, Lindquist, Loehden, McAllister, Marshall, J. Meyer, D. Miller, Nichols, Odell, Olwine, Reed, J. Roberts, Shlim, Spaulding, C. Starr, Weed

Instructor: Brant-Zawadzki*

Clinical Instructors: Bachulis, F. Bentley, Braun, Clisby, Duncan, Edelson, Eisendorf, J. Hayes, Holmes, Kantor, Kanzler, G. Lee, McFarlane, Markee, Mathieson, Naylor, J. Owen, Patton, Perrin, Puziss, Reeves, W. Rosenbaum, Rothenberger

Clarence V. Hodges, Head of Division

Professor: Hodges

Clinical Professors: Ferguson, Gardner, Hand, Montgomery

Associate Professor: R. Lawson

Associate Clinical Professors: Emmett, Lehman, R. J. Moore, Paull

Assistant Professor: Pearse

Assistant Clinical Professors: Beardsley, Collier, Giesy, Kalez, C. Macfarlane, Rustin, Sandoz, Vandenberg

Clinical Instructors: Catlow, Crary, Gabor, Gilbaugh, Halpert, Sacco, Weeber, D. A. Young

Residents: Barry, Carey, Dechet, Emery, Fuchs, Nichols, Pitre, Rosenquist, Skeeters, D. Young, Walker

General Surgery—Required Course

Fourth Year

Sur 630. Fourth-Year Surgery. 18 hours.

The fourth-year surgical course objectives are to graduate physicians who are grounded in the principles and practice of surgery, who can evaluate surgical information and the role of the surgical consultant, can recognize eommon surgical disorders, treat surgical emergencies, diagnose and prepare patients for operation, recognize and treat postoperative problems, and perform minor surgical operations. This is accomplished through three months' participation in the emergency room, hospital wards, clinics and operating room activity in General Surgery, Orthopedics, Urology and Anesthesia. Conferences, seminars, lectures, and outside reading complement patient care activities to accomplish these broad goals.

General Surgery—Elective Courses

- Sur 601. Research. Any term, hours to be arranged.
- Sur 605. Reading and Conference. Any term, hours to be arranged.
- Sur 607. Seminar. Any term, hours to be arranged.
- Sur 609. Clinical Experience. Any term, hours to be arranged.

Cardiopulmonary Surgery—Elective Courses

- CSur 601. Research. Any term, hours to be arranged.
- CSur 605. Reading and Conference. Any term, hours to be arranged.
- CSur 607. Seminar. Any term, hours to be arranged.
- CSur 609. Clinical Experience. Any term, hours to be arranged.

Neurosurgery

Required Course

Third Year

Con 621. Neurosciences. (See page 50.)

Elective Courses

- NSur 601. Research. Any term, hours to be arranged.
 - Clinical and basic research projects in neurosurgery. Intended for students primarily interested in careers in neurology and neurological surgery.
- NSur 605. Reading and Conference. Any term, hours to be arranged.
- NSur 607. Seminar. Any term, hours to be arranged.
- NSur 609. Clinical Experience. Any term, hours to be arranged.
- NSur 650. Differential and Regional Neurosurgical Diagnosis and Therapeutics. 1/2 hour.

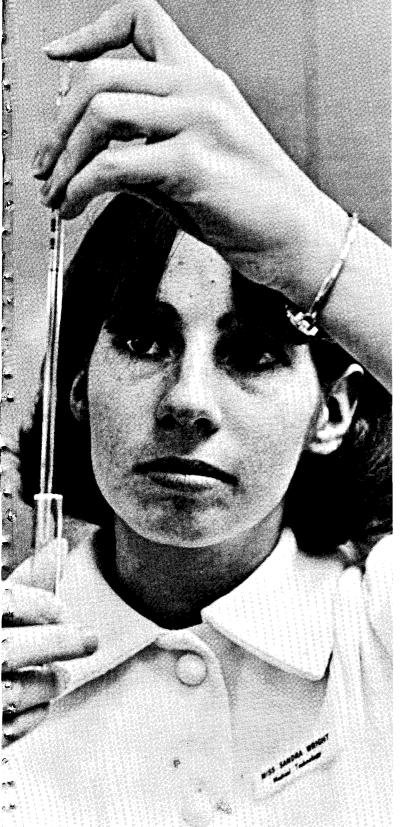

Discussions and demonstrations of the altered neurophysiologic background and anatomy encountered in patients with neurosurgical problems. Emphasis on student interest and participation in discussion of the basic concepts involved. Lectures and demonstrations, 1 hour a week: 12 hours.

Orthopedics—Elective Courses

- Orth 601. Research. Any term, hours to be arranged.
- Orth 605. Reading and Conference. Any term, hours to be arranged.
- Orth 607. Seminar. Any term, hours to be arranged.
- Orth 609. Clinical Experience. Any term, hours to be arranged.

Urology—Elective Courses

- Ur 601. Research. Any term, hours to be arranged.
 - An introduction to the clinical field of transplantation with emphasis on immunosuppressive therapy and its complications; an introduction to the experimental techniques in surgery and immunology as applied to current problems in organ transplantation.
- Ur 605. Reading and Conference. Any term, hours to be arranged.
- Ur 607. Seminar. Any term, hours to be arranged.
- Ur 609. Clinical Experience. Any term, hours to be arranged.

ALLIED HEALTH AND OTHER INSTRUCTIONAL PROGRAMS

MEDICAL TECHNOLOGY

Medical Technology

Tyra T. Hutchens, Director

Margaret E. Berroth, Assistant Director

Mary E. Baptist, Educational Coordinator

Professors: Bramhall, T. Hutchens Clinical Professor: R. Thompson

Associate Professors: Berroth, Haines, Hamilton, Marquardt, Rashad

Assistant Professors: Aitchison, Baptist, K. Kim, Koontz, Sheth, J. Swanson

Instructors: Chadwick (Clinical Microbiology), Parker (Hematology), M. Thomas (Immunohematology), J. Wilkinson (Clinical Chemistry and Urinalysis)

Clinical Instructor: M. Campbell

Assistants to the Educational Coordinator: B. Carlson, Chambers, Dudley, Engeldinger, Fraser, Goodstein, Kimmey, Korten, Matsumura, Reed, Seto, B. Wilkinson

Training in medical technology is offered in the clinical laboratories of the University of Oregon Medical School. The twelve-month program, established in 1933, is approved by the American Medical Association.

The minimum admission requirements are three years of college work (135 term hours) including: 24 term hours of biology (which must include a course in bacteriology); 24 term hours of chemistry, with lectures and laboratory, which may include qualitative analysis; one term of college mathematics. It is strongly recommended that a physics course be included in the student's college preparation. The three years of prerequisite work may be completed in any accredited college or university. Transcript evaluation by the ASCP Board of Schools of Medical Technology is not required for admission to the University of Oregon Medical School program.

Classes begin with the fall term and academic credit is granted for the work of the fall, winter, and spring terms. No credit is given for the summer term, which is necessary for certification by the ASCP Board of Registry of Medical Technologists. Before entering the medical technology program, it is mandatory that a student possess sufficient basic credits required for a degree in the Oregon State System of Higher Education, or in the institution at which he obtained his college preparation, so that upon satisfactory completion of the academic year in the medical technology program at the University of Oregon Medical School and applying credits earned, he will receive his baccalaureate degree.*

Upon satisfactory completion of the twelve continuous months' study period, a certificate is issued to the student by the University of Oregon Medical School. The student is then eligible to take the National Certifying Examination given twice a year by the ASCP Board of Registry of Medical Technologists. (Beginning December 1973, a baccalaureate degree will be required for certification examination eligibility.) Upon passing the examination, the student is qualified as a Certified Medical Technologist with the American Society of Clinical Pathologists, MT(ASCP).

^{*} Students expecting to receive the bachelor's degree from the University of Oregon should include 9 hours of English composition and 9 hours of English literature in their preparatory programs. See the University of Oregon Catalog for specific courses that meet the literature requirements.

Applications for admission may be obtained from the Director of Admissions of the Medical School. Applications are accepted between December 1 and March 1.

Fees

Textbooks and uniforms are supplied by the student.

There are a limited number of dormitory rooms for women; application may be made through the Women's Residence Director, 707 S.W. Campus Drive, Portland 97201.

Students in medical technology are required to pay fees for Fall, Winter and Spring terms. Oregon residents pay \$182 a term; non-residents \$422 a term. A health coverage fee of \$33 is assessed for the summer term. Medical technology students also pay the "special fees" listed on page 19 under the conditions indicated.

Grading System and Grades

A grading system of A to D is used at the Medical School. A is the highest and D is the lowest passing grade. Students in the Medical Technology curriculum are expected to maintain a G.P.A. of 2.00 or better during the twelve-month period. If a course is not completed within the time allotted, the work must be finished satisfactorily within one year. Failure in a course requires repetition of the course. In most courses the student will be given frequent written and practical tests, marked with percentage grades. The student may be given these percentage grades by his instructors, but final grades are issued only by the Registrar's office. Final grades are given for each term's work, but are issued only at the end of the Winter and Spring quarters.

If at any time during the school year the student feels his work is not satisfactory, he should consult his instructor. Should special problems arise that threaten to interfere with study, the student should consult a faculty member for advice before his scholarship has been seriously affected.

Dismissal

A student may be dropped upon recommendation of the faculty. The faculty has the right to sever, at any time, the connection with the Medical School of any student who is considered to be physically, morally or mentally unfit for a career in Medical Technology.

A student ordinarily may be on probation status for one term before the faculty recommends his dismissal; however, the faculty, for adequate cause, may drop a student without previous warning.

Medical Technology—Graduate Program

A graduate program leading to the Master of Science degree is offered for qualified students.

MEDICAL TECHNOLOGY

Calendar

Fall Term, 1972	
September 5 through September 9	Registration; orientation
September 6, Wednesday	
September 11, Monday	
November 23, Thursday	
November 25, Saturday	
Winter Term, 1972-73	
November 27, Monday	Registration: instruction begins
November 28, Tuesday	
December 23 through January 1, 1973.	Christmas vacation;
	laboratory instruction continues
February 17, Saturday	Winter term ends
Spring Term, 1973	
March 5, Monday	Registration: instruction begins
March 6, Tuesday	
May 19, Saturday	
August 31, Friday	
Fall Term, 1973	
September 4 through September 8	Registration: orientation
September 10, Monday	
In addition to the classroom schedule li	sted above, students are required

In addition to the classroom schedule listed above, students are required to be in attendance for laboratory instruction as required by the Department of Clinical Pathology. The entire program of classroom and laboratory instruction covers a period of one calendar year.

Curriculum in Medical Technology

 17

MT 407. Seminar. 2 hours spring.

Selected topics of laboratory medicine with emphasis on laboratory instrumentation and electronics. 2 hours a week.

MT 410, 411. Clinical Bacteriology. 4 hours fall, 3 hours winter.

The microorganisms pathogenic for man. Study of the culture, the morphological characteristics, and the means of isolation and identification of these organisms. Fall: Lectures, 4 hours a week. Winter: Lectures, 3 hours a week.

MT 412. Pathophysiology and Medical Terminology. 2 hours spring.

Lectures reviewing basic anatomy and physiology. Study of the most common disease processes in man and their correlation with laboratory findings with explanation of the correct medical terminology. Lectures, 2 hours a week.

MT 413. Urinalysis. 1 hour spring.

A study of the mechanisms of formation and identification of the normal and abnormal components of urine. Lectures, 1 hour a week.

MT 414. Nuclear Medicine. 1 hour winter.

Lectures and demonstrations concerned with the basic theory and the practical application of nuclear medicine techniques to medicine. Lectures, 2 hours a week.

- MT 415, 416. Clinical Biochemistry. 3 hours fall, 3 hours winter.

The principles of biochemistry and the applications of colorimetry; gasometric analysis, and quantitative chemistry in the determination of substances in blood and body fluids. Fall: Lectures, 3 hours a week; Winter: 3 hours a week.

MT 417, 418. Hematology. 2 hours fall, 3 hours winter.

The normal function and development of blood cells, basic pathophysiology of hematologic diseases, laboratory procedures pertaining to hematology and their correlation with various disease states. Fall: Lectures, 2 hours a week; Winter: Lectures, 3 hours a week.

MT 419. Immunohematology. 2 hours spring.

The principles of immunohematology as applied to blood banking with special emphasis upon blood groups and types, and techniques demonstrating antigen-antibody reactions; donor collection, processing and storage and hazards of transfusions; blood components; medical-legal aspects. Lectures, 2 hours a week.

MT 420. Clinical Immunology and Serology. 2 hours fall.

Basic principles of immune response. The principles of serological phenomena in the laboratory. The factors influencing precipitin, flocculation, and complement fixation tests as applied to serum diagnosis of disease. Special consideration of flocculation and complement fixation tests as they apply to the diagnosis of syphilis. Lectures, 2 hours a week.

MT 421. Clinical Parasitology. 2 hours spring.

The life cycles, modes of transmission and diagnostic features of the more common parasites of man. Lectures, 2 hours a week.

MT 422, 423, 424. Medical Laboratory Technique. 7 hours fall and winter, 8 hours spring.

Theory, demonstrations and practice of medical laboratory technique pertaining to the fields of clinical bacteriology, urinalysis, hematology, clinical biochemistry, nuclear medicine, clinical parasitology, immunohematology and clinical immunology and serology. Fall and winter, 21 hours per week; spring, 24 hours per week.

Elective Courses

- MT 501. Research. Any term, hours to be arranged.
- MT 505. Reading and Conference. Any term, hours to be arranged.
- MT 507. Seminar. Any term, hours to be arranged.
- > MT 520. Advanced Nuclear Medicine Techniques. Any term, hours to be arranged.
 - MT 521. Advanced Nuclear Medicine Laboratory. Any term, hours to be arranged.

MEDICAL TECHNOLOGY

Faculty

- John P. Aitchison, Ph.D., Assistant Professor of Clinical Pathology (1969).
 - B.A. (1957), British Columbia; Ph.D. (1969), California.
- Mary Elizabeth Baptist, B.A., Assistant Professor of Medical Technology; Educational Coordinator (1950).
 - B.A. (1944), Montana; M.T. (ASCP) (1946).
- Margaret E. Berroth, M.D., Associate Professor of Clinical Pathology; Assistant Director of Educational Programs (1966).
 - Abitur (1947), Greifswald Lyceum; M.D. (1954), Heidelberg.
- James L. Bramhall, M.B., Professor of Clinical Pathology (1962).
 - M.B., Ch.B., (1951), Victoria University of Manchester Medical School, England.
- Mary C. Campbell, B.A., Clinical Instructor in Medical Technology (1968).
 B.A. (1944), Vassar.
- Patricia A. Chadwick, B.S., Instructor in Medical Technology (1966).
 - B.S. (1950), Massachusetts; M.T.(ASCP) (1957); S., M.(ASCP) (1967).
- James E. Haines, M.D., Associate Professor of Clinical Pathology (1966).
 B.S. (1950), M.D. (1955), Stanford.
- Martha L. Hamilton, M.D., Associate Professor of Clinical Pathology (1957).
- B.S. (1945), Texas Wesleyan; M.D. (1952), Texas. Tyra T. Hutchens, M.D., Professor of Clinical Pathol-
- ogy; Chairman of Department (1953).
 B.S. (1943), M.D. (1945), Oregon.
- Kenneth S. W. Kim, Ph.D., Assistant Professor of Clinical Pathology (1972).

- B.A. (1953), Hawaii; M.S. (1960), Ph.D. (1964), University of Washington.
- John D. Koontz, B.S., Assistant Professor of Clinical Pathology (1963).
 - B.S. (1954), Oregon; M.T.(ASCP) (1952).
- Victor C. Marquardt, Jr., M.D., Associate Professor of Clinical Pathology; Assistant Director of Clinical Laboratory Services (1964).
 B.A. (1953), Wesleyan; M.D. (1957), Nebraska.
- Rose M. Parker, A.R.T., Instructor in Medical Technology (1967).

 P.T. (1959) Canada: A.R.T. (Hema.) (1964)
- R.T. (1959), Canada; A.R.T.(Hema.) (1964), Canada.
- Abdel L. Rashad, M.D., Ph.D., Associate Professor of Clinical Pathology (1969).
 M.D. (1959), Cairo, Egypt; Ph.D. (1966), University of Washington.
- Kirtikant V. Sheth, M.B.B.S., Assistant Professor of Clinical Pathology (1971).
 M.B.B.S. (1966), Bombay, India.
- J. Robert Swanson, Ph.D., Assistant Professor of Clinical Pathology (1969).
 B.S. (1961), Colorado; Ph.D. (1965), Washington
- State.

 Marian S. Thomas, B.S., Instructor in Medical Technology (1969).
 - B.S. (1964), Southern Oregon; M.T.(ASCP) (1965); S.,B.B.(ASCP) (1969).
- Richard Thompson, M.D., Clinical Professor of Clinical Pathology (1968).A.B. (1920), Oregon; M.D. (1924), Columbia.
- James A. Wilkinson, B.S., Instructor in Medical Technology (1966).
 - B.S. (1962), Oregon; M.T.(ASCP) (1963).

Assistants to Educational Coordinator

- Betty M. Carlson, B.S., Clinical Hematology Technique. B.S. (1945), Hamline; M.T.(ASCP) (1945).
- Dorothy B. Chambers, B.S., Specimen Collection Technique.
 - B.S. (1958), Marylhurst; M.T.(ASCP) (1949).
- Claudia L. Dudley, B.S., Laboratory Office Procedure. B.S. (1958), Oregon; M.T.(ASCP) (1959); S.,C. (ASCP) (1966).
- Irene R. Engeldinger, B.S., Clinical Chemistry Technique.
 - B.S. (1944), Marylhurst; M.T.(ASCP) (1948).
- Nancy P. Fraser, M.S., Immunohematology Technique.
 B.S. (1964), Weslcyan; M.S. (1969), Ohio State;
 M.T.(ASCP) (1965); S.,B.B. (ASCP) (1970).
- Steven Goodstein, B.A.
 - B.A. (1966), San Jose State; M.T. (ASCP) (1967).

- Allan R. Kimmey, B.S., Clinical Chemistry Technique. B.S. (1963), Oregon; M.T.(ASCP) (1964).
 - Christine E. Korten, B.S., Clinical Microbiology Technique.
 B.S. (1969), College of Idaho; M.T.(ASCP) (1969).
 - Wallace H. Matsumura, B.A., Clinical Serology Technique.
 - B.A. (1952), Hawaii; M.T.(ASCP) (1955).
 - Sandra L. Reed, B.A., Clinical Hematology Technique. B.A. (1961), Maine; M.T. (ASCP) (1962).
 - Harry Seto, B.S., Nuclear Medicine Technique. B.S. (1955), Oregon; M.T.(ASCP) (1956); N.M. (ASCP) (1964).
- Brenda M. Wilkinson, B.S., Toxicology Technique. B.S. (1960), Pacific; M.T. (ASCP) (1961).

Cytotechnology

Peter J. Dawson, Director

A twelve-month course in cytotechnology leading to A.S.C.P. certification as a cytotechnologist, is offered by the Medical School's department of pathology to students with a minimum of two years (60 semester or 90 quarter hours) of credit from an accredited college or university. Twelve semester or 18 quarter hours in biology must be included. Students accepted into the program, which is conducted in the cytology laboratories of the University of Oregon Medical School, begin on September 1 of each year. No tuition is charged. The program is approved by the Council on Medical Education of the American Medical Association and Board of Schools, American Society of Clinical Pathologists.

Hospital Dietetics

Ruth L. Mercer, Director

The program in hospital dietetics offered in the University of Oregon Medical School Hospitals and Clinics was approved by the American Dietetic Association in 1943. The course provides the one year's internship in a hospital necessary to complete requirements for membership in the association.

The minimum admission requirement is graduation with a B.S. degree, including the academic requirements of the American Dietetic Association.

During the twelve-month training period at the Medical School, the student pays no tuition but provides her own supplies, including uniforms. Students receive complete maintenance and an allowance of \$200 per month.

Appointments are made once a year; applications should be submitted to the Director of Dietetics, University of Oregon Medical School Hospitals and Clinics, not later than March 1.

Nuclear Medicine Technology

James E. Haines, Director

The department of clinical pathology offers a twelve-month traineeship in nuclear medicine technology. Prerequisites are a baccalaureate degree from an accredited college or university and certification by the ASCP Registry of Medical Technologists as a medical technologist, MT(ASCP). The nuclear medicine technology program starts early each September. No tuition is charged.

Trainees assist with performance of procedures in the nuclear medicine division of the department of clinical pathology and receive an appropriate stipend. In addition to nuclear medicine technology experience, trainees attend lectures and conferences in radiation physics, radiolbiology, anatomy, and nuclear medicine. They also assist with the instruction of students in the AMA-approved medical technology program during their nuclear medicine technology laboratory rotation.

Trainees completing the traineeship are eligible to take the national nuclear medicine technology examination given by the ASCP Board of Registry of

RADIOLOGIC TECHNOLOGY

Medical Technologists and which leads to certification as a nuclear medicine technologist, NM(ASCP).

Orthoptics

Kenneth C. Swan, Director

Donna Minamoto, Educational Coordinator

The department of ophthalmology offers a one-year preceptorship in orthoptics approved by the American Orthoptic Council. Prerequisites are two years' credit from an accredited college or university and completion of the basic course in orthoptics sponsored each summer by the American Orthoptic Council. Students enter the preceptorship in September. Application should be made to the department of ophthalmology by the first of March. No tuition is charged and students are assisted in applications for scholarships.

Upon completion of the program students are qualified to take a national examination given by the American Orthoptic Council leading to certification as an orthoptist.

Orthoptists assist ophthalmologists in the evaluation and management of abnormalities in vision and binocular coordination.

Radiation Therapy Technology

Clifford V. Allen, Director

The department of radiation therapy offers a one-year training program in radiation therapy technology approved by the American Medical Association in collaboration with the Subcommittee on Technologic Affairs of the American College of Radiology. The minimum admission requirement is certification as a radiologic technologist (RT) or registered nurse (RN). Applications are considered once a year and must be submitted before October 1. The program begins on October 15. No tuition is charged. Each trainee receives a stipend of \$250 per month and must furnish his own uniform and books.

The program includes clinical experience in radiation therapy technology as well as lectures in radiation physics, radiolbiology, anatomy, pathology, and radiation therapy.

Students completing the program are required to take the national examination given by the American Registry of Radiologic Technologists leading to certification as a radiation therapy technologist, RT(T).

Radiologic Technology

Charles T. Dotter, Director

Betty L. Palmer, Educational Coordinator

The Department of Radiologic Diagnosis of the University of Oregon Medical School offers a 30-month course of training for radiologic technologists in coopera-

tion with Portland Community College. The course is approved by the Council on Medical Education and Hospitals of the American Medical Association and by the American Registry of Radiologic Technologists. Graduates of the course receive an Associate Arts degree in Applied Science, and are eligible to take the examination required by the American Registry of Radiologic Technologists for certification as Registered Radiologic Technologists.

Candidates for admission must be 18 years old and high school graduates (or the equivalent). Students with college credits are given preference. Preference is also given to applicants with physics, chemistry, biology and geometry. One year of high school algebra or one term of college algebra is required. An application, school transcripts, personal references and a personal interview must be completed before the applicant will be considered for admission.

Tuition (approximately \$800 for ten terms) is payable to Portland Community College on a per-term basis. Beginning the eleventh month of training, students receive a taxable monthly stipend of \$100. The course in Radiologic Technology includes approximately 700 hours of classroom work and 3000 hours of hospital clinical training. At the Medical School, clinical instruction is under the supervision of the Chief Technologist and members of the technical staff of the Department of Radiologic Diagnosis. The physician who chairs this department, and members of his medical staff also participate.

The curriculum includes courses in anatomy and physiology, physics, medical terminology, ethics, radiographic technique, processing, chemistry, radiation protection, radiation therapy and film critique. Other subjects include those courses that complement the curriculum for the Associate Arts degree in Applied Science. Eighteen students are admitted annually in September. Applications will be received beginning December 1 through April 1. Selection will be completed by May 1, and all applications should be submitted to the Director of the Program in Radiologic Technology, Department of Radiologic Diagnosis, University of Oregon Medical School.

Scholarships and Loans

Scholarships and loans are available for students in several of the allied health programs. Consult the respective program directors for details.

Continuing Medical Education

Physicians are motivated to pursue the scholarly habit of life-long learning because of their desire to provide the best possible care for patients. There are five basic ways these goals are achieved.

- a. The daily acquisition of new knowledge by reading carefully selected textbooks and periodicals.
- b. Frequent consultation with peers.
- Active participation in community hospital medical staff programs such as medical record audits and clinical pathologic conferences.
- d. Attending educational programs sponsored by learned professional societies such as the American Academy of General Practice and the American College of Physicians.
- re. Attending short postgraduate courses produced by medical schools, voluntary health agencies and hospitals.

GRADUATE STUDIES

In order to help the physician achieve this last objective, the Medical School makes its teaching and clinical facilities available for continued postgraduate study. An extensive postgraduate program has been arranged, consisting of a series of short intensive courses, usually of three to five days' duration. These courses are devoted to special subjects and are scheduled throughout the year. Instruction is by lectures, demonstrations, conferences, discussion groups, and patient presentations.

A circuit course program is presented in Oregon, Idaho and Montana. The courses deal with heart disease, cancer, stroke, and related diseases and are financed in part by the Oregon Regional Medical Program. In addition, psychiatry circuit courses are held in 18 Oregon communities.

Enrollment is open to any physician who is licensed to practice in his state of residence.

Graduate Studies (See also Graduate Catalog)

The University of Oregon Medical School offers graduate programs in the basic medical sciences, leading to the Master of Science and Doctor of Philosophy degrees; the degrees are conferred by the University of Oregon upon recommendation of the faculty of the Medical School. A combined program leading to both medical and basic science graduate degrees is also available for selected medical students. Work leading to the Master of Science or Doctor of Philosophy degree in offered in anatomy, biochemistry, medical psychology, microbiology, pathology, pharmacology, and physiology. The master's degree is offered in medical technology also. Programs of graduate study leading to the degree of Master of Science in Nursing Education and Master of Nursing are offered by the University of Oregon School of Nursing. See page 82.

Complete details concerning study toward the degree of Master of Science and Doctor of Philosophy are incorporated into a separate bulletin entitled *Graduate Studies Programs*. This bulletin is available from the Office of the Registrar and should be consulted by persons interested in graduate study.

Combined Program Leading to the M.D. and a Graduate Degree

The Medical School offers a special five-year program of study for students wishing to work toward the Master of Science degree while completing the regular curriculum in medicine. This combined program of graduate-medical study is open only to students who plan to spend five years in residence at the Medical School. Required graduate major credit is earned in a major department of graduate study. Medical credits are granted for basic science courses in the medical curriculum. Medical students wishing to enter this program must be accepted as graduate students by the Graduate Council and the Dean.

To provide training for those medical students who wish to prepare themselves more completely for careers as physician-scientists, a program leading to the combined M.D. and Ph.D. degrees has recently been approved and activated. This course of training may require a total time span of seven years of post-baccalaureate study. It affords opportunity for advanced coursework in the fundamental sciences of mathematics, physics and chemistry, and for advanced coursework in the basic medical sciences that cannot be incorporated into the M.D.-M.S. program. Candidates for the Doctor of Philosophy degree who have already earned the Doctor of Medicine degree may apply a maximum of 45 term hours of credit (one academic year) in the basic medical sciences toward the advanced degree.

Internship and Residency Programs

The internship programs of the University of Oregon Medical School Hospitals and Clinics are approved by the Council on Medical Education and Hospitals of the American Medical Association. Appointments are made through the National Internship Matching Program. All internship programs are twelve months in length and include a rotating internship with 36 positions, a straight internship in medicine with eight positions, a straight internship in pathology, and four straight medical psychology internships. All patients in the hospitals and clinics are houses cases and are under the personal care of an intern, who is responsible to the resident and attending faculty member responsible for the service. Internship appointments are effective June 26.

One of the important functions of a medical school is the training of physicians in the medical specialties. The demand for such training has greatly increased in recent years. In response, the Medical School residency program has been expanded to provide approximately 240 appointments. Residency training follows one year of internship and consists of two to five years of study devoted entirely to one specialized field of medicine. Instruction is given both in clinical departments and in related basic science departments of the School.

All residencies have received the approval of the Council on Medical Education and Hospitals of the American Medical Association and of the respective American boards. Residencies are offered in anesthesiology, cardiopulmonary surgery, child psychiatry, clinical pathology, dermatology, family practice, internal medicine, medical psychology, neurological surgery, neurology, obstetrics and gynecology, ophthalmology, orthopedics, otolaryngology, pathology (anatomical), pediatrics, psychiatry, radiologic diagnosis, radiation therapy, general surgery, urology.

The following Portland hospitals cooperate with the Medical School in the residency programs: Emanuel Hospital, St. Vincent Hospital, Shriner's Hospital for Crippled Children, Good Samaritan Hospital, and Veterans Hospital.

Applications should be made to the chairman of the department concerned. Appointments are made six to eight months in advance of the beginning of the residency period, July 15.

School of Nursing

The University of Oregon School of Nursing, located on the campus of the University of Oregon Medical School, Portland, offers three programs: the Bachelor of Science degree, the Master of Science in Nursing Education and the Master of Nursing.

The Bachelor of Science degree is designed for two types of students: the student with no previous preparation in nursing, and the registered nurse student who is a graduate of a hospital or community college school of nursing.

For the student nurse with no previous preparation in nursing, the program is four academic years and one summer term. It prepares the student to become a professional nurse who gives total patient care in hospitals, public health agencies, and in the community, who assumes leadership of other nursing personnel, and who possesses the foundations for advanced study in teaching, supervision, administration and consultation.

SCHOOL OF NURSING

For the freshman year, the students enrolls in an accredited college or university for study in liberal arts and basic sciences.

For the sophomore year, the student nurse transfers to the School of Nursing, Portland, where she continues her liberal arts studies along with professional nursing courses. Students receive courses in theory and clinical experience in all basic areas of nursing—medical, surgical, obstetrics, pediatrics, psychiatric, and public health nursing. The program's educational resources on campus are: The University of Oregon Medical School Hospital including Doernbecher Memorial Hospital for Children, Multnomah Hospital, the Outpatient Clinic, the Crippled Children's Division with the university-affiliated Child Development and Rehabilitation Center, and the University State Tuberculosis Hospital. The off-campus facilities that provide additional clinical experiences are: the Visiting Nurse Association; Dammasch Hospital, Wilsonville; Portland State University; Bess Kaiser Hospital; St. Vincent Hospital and Medical Center; Multnomah and Marion County Health Departments; Physicians and Surgeons Hospital; Good Samaritan Hospital and the U.S. Veterans Administration Hospital.

Students are admitted to the School of Nursing on or about June 15th, the beginning of Summer term. They are required to take the National League for Nursing Prenursing and Guidance Examination prior to admission.

For the registered nurse student entering the baccalaureate program, assessment is made of her previous preparation in nursing. Contingent upon the student's previous educational preparation, sequence of course and program design are modified to assure that she meets the same goals of the baccalaureate program.

The student in this program may be allowed some credits in nursing for previous work. It may be in the form of transfer credits from an associate degree program. The hospital school graduate is allowed credit in nursing on the basis of results of comprehensive examinations on selected nursing courses administered at the University of Oregon School of Nursing. The comprehensive examination is required of all graduates of associate degree and hospital programs. The student who does not elect to challenge course content through equivalency examinations will take the same courses as the student without previous nursing preparation.

Courses in this program contribute to the broadening and strengthening of previous preparations and assist the student in developing increased professional competency. They do not lead to specialization but serve as a foundation for further professional education. The program provides a balance of general and professional education.

Students are admitted to the School of Nursing at the same time as students with no previous preparation for nursing. Prior to admission the students file two official transcripts of their school of nursing and college records.

The Master of Science in Nursing Education is designed for nurses who have graduated from an accredited college or university with an upper division nursing major and desire advanced professional preparation. A major in medical-surgical nursing is offered. The program is planned to prepare nurses for faculty positions. The program is four quarters in length.

The Master of Nursing program, also four quarters in length, is designed for nurses whose undergraduate preparation was obtained in an accredited university or collegiate school of nursing. The focus is on clinical nursing. The Graduate Record Examination is required before admission. The National League for Nursing has granted Reasonable Assurance of Accreditation to this program.

A catalog containing detailed information about the programs of the School of Nursing and how to apply may be obtained by writing to the Dean, University of Oregon School of Nursing, Portland 97201.

Executive Faculty

Charles N. Holman, Dean of the Medical School; Joseph J. Adams, Clifford V. Allen, Michael D. Baird, Ralph C. Benson, Norman A. Bergman, John M. Brookhart, J. David Bristow, Laurel Case, Vaughn Critchlow, David D. DeWeese, Charles T. Dotter, M. Roberts Grover, Jr., Tyra T. Hutchens, Richard T. Jones, Robert D. Koler, William W. Krippaehne, Walter C. Lobitz, Jr., Joseph D. Matarazzo, Richard D. Moore, Richard W. Olmsted, Harold T. Osterud, William K. Riker, George Saslow, Richard L. Sleeter,* Kenneth C. Swan, Lyle Veazie, William A. Zimmerman

STANDING COMMITTEES OF THE FACULTY

- Admissions and Advanced Standing—Clifford S. Melnyk (Chairman), Robert L. Bacon, George C. Buchan, Marion L. Krippaehne, Joseph D. Matarazzo, Robert J. Meechan, Dick B. Speight (ex officio)
- Animal Care—Roy L. Swank (Chairman), LeRoy F. Erickson, William S. Fletcher, Monte A. Greer, M. Ronald Parelius, Bernard Pirofsky, Alfred J. Rampone, Marvin B. Rittenberg, Allan L. Rogers, Ralph D. Tanz
- Clinical Grant Review and Investigational Drug—Herbert A. Wendel (Chairman), Robert H. Bigley, Robert E. Brummett, Robert Campbell, D. Duane Denney, John Doersler, Barbara Iglewski, Stanley W. Jacob, Russell K. Lawson
- Curriculum and Schedule—William W. Krippaehne (Chairman), John A. Benson, Jr., Paul H. Blachly, Howard W. Davis, John de Maria, M. Roberts Grover, Jr., Richard T. Jones, Joseph D. Matarazzo, Ernest A. Meyer, Richard D. Moore, Harold T. Osterud, William K. Riker, Richard L. Sleeter,* William E. Snell, John T. Van Bruggen; Students: John Lobitz, Stuart Loeb, Ronald J. Sharp
- Educational Methods—Tyra Hutchens (Chairman), Margaret E. Berroth, Paul Blachly, Hall Downes, M. Roberts Grover, Jr., Richard Herren, Gerald W. Miller, Arthur Seaman, John T. Van Bruggen
- Honors and Awards—George C. Buchan (Chairman), Peter J. Dawson, Sam L. Meyer, Richard W. Olmsted, Martin L. Pernoll
- Graduate Council—John M. Brookhart (Chairman), Reid S. Connell, Jr., Robert D. Fitzgerald, Terence Joys, Howard S. Mason, Richard D. Moore, May Rawlinson, Ralph D. Tanz
- Instructional Aids Advisory—John R. Campbell (Chairman), Emil J. Bardana, Jr., Margaret Berroth, Marcella Cate, F. John de Maria, Richard Herren, Margaret Hughes, Alan L. Morgenstern, Robert E. Swanson, Ralph E. Tuomi, John T. Van Bruggen
- Internship Advisory—Michael J. Miller (Chairman), William S. Fletcher, Robert D. Koler, Frances J. Storrs, R. Mark Vetto
- Jones Lectureship—Herbert E. Griswold (Chairman), Monte A. Greer, Frank E. Kloster
- Library—William E. Morton (Chairman), Morton Goodman, John W. Kendall, Jr., George H. Lage, George Long, Nelson R. Niles, Evelyn Schindler, Archie R. Tunturi, Joseph B. Vander Veer, Herbert M. Woodcock

- Minority—Laurel Case (Chairman), William Bennett, Bernice Cochran, M. Roberts Grover, Jr., William Jackson, Ken Niehans, Donna Schantz, Dick B. Speight
 Student members are elected yearly.
- Patent—William A. Zimmerman (Chairman), John Doerfler, George I. Johnston, Bernard Pirofsky, Benjamin B. Ross, Roy L. Swank, John T. Van Bruggen
- Planning Council—Joseph J. Adams (Chairman), Jean E. Boyle, J. David Bristow, John M. Brookhart, A. J. Clemons, Edwin Everts, Dallas G. Finnell, Kaye E. Fox, M. Roberts Grover, Jr., Barbara Hiatt, Tyra T. Hutchens, William W. Krippaehne, Harold T. Osterud, William H. Prentice, Richard L. Sleeter,* Louis G. Terkla
- Radiation Safety—Robert D. Koler (Chairman), James Haines, Demetrios A. Rigas, Kenneth R. Stevens, Jr., Harry Shaich (ex officio)
- Research—Walter C. Lobitz, Jr. (Chairman), William S. Fletcher, Wallace Iglewski, John W. Kendall, Jr., James Metcalfe, Alfred J. Rampone, Jack A. Vernon, John Doerfler (ex officio)
- Research Instrument Service—Don C. Wood (Chairman), Norman A. Bergman, M. Ronald Parelius, Demetrios A. Rigas, Benjamin B. Ross, John G. Roth
- Safety—Charles N. Holman (Chairman), A. J. Clemons, Barbara Hiatt, Margaret Hughes, Tyra T. Hutchens, George Johnston, Jim Joyce, Max Kersbergen, Bill Kribs, Michael Litt, Robert Rasmussen, Allan Rogers, Gary Rood, Richard L. Sleeter,* Ralph Tuomi, W. A. Zimmerman
- Scholarships—William A. Zimmerman (Chairman), Reid S. Connell, Jr., Clarence V. Hodges, Harold D. Paxton, Dick B. Speight
- Student Faculty—Faculty Members: Robert J. Meechan (Chairman), Robert L. Bacon, Rodney Beals, Anthony E. Gallo, M. Roberts Grover, Jr., Frank E. Kloster, Ernest A. Meyer, Kenneth A. Niehans, William K. Riker, R. Mark Vetto

 Student members are elected for one- or two-year terms.
- Student Health Advisory—Anthony E. Gallo (Chairman), Curtis Holzgang, Martin L. Pernoll, Julian S. Reinschmidt, Frances J. Storrs, Mary Pat Sullivan, Christopher P. S. Williams. Student members: Patricia Berns, Claudia Hostetler, Ray Nicola, Stephen Thomas
- Dean's Advisory Committee for the Veterans Hospital—Charles N. Holman (Chairman), Clifford V. Allen, Michael D. Baird, Norman A. Bergman, J. David Bristow, David D. DeWeese, Charles T. Dotter, Tyra T. Hutchens, Robert D. Koler, William W. Krippaehne, Walter C. Lobitz, Jr., Richard D. Moore, George Saslow, Kenneth C. Swan, Louis G. Terkla

^{*} Deceased.

Emeritus Faculty

- David W. E. Baird, M.D., LL.D., Dean Emeritus. M.D. (1926), Oregon; LL.D. (1946), University of Portland.
- Roderick E. Begg, M.D., Assosiate Professor Emeritus of Orthopedics.
 - B.S. (1924), Oregon State; M.D. (1937), Oregon.
- Harry C. Blair, M.D., Professor Emeritus of Orthopedics. M.D. (1915), Oregon.
- Isidor C. Brill, M.D., Professor Emeritus of Medicine. B.A. (1912), M.D. (1914), Columbia.
- C. Elmer Carlson, M.D., Professor Emeritus of Orthopedics. A.B. (1917), Reed; M.D. (1920), Oregon.
- John G. P. Cleland, M.D., Professor Emeritus of Obstetrics and Gynecology. M.D., C.M. (1924); M.S. (1926), McGill.
- Charles W. Coffen, M.D., Associate Professor Emeritus. B.S. (1932), Stanford; M.D. (1936), Johns Hopkins,
- William S. Conklin, M.D., Professor Emeritus of Cardiopulmonary Surgery. A.B. (1931), Dartmouth; M.D. (1934), Pennsylvania.
- Norman A. David, M.D., Professor Emeritus of Pharmacology.
 - A.B. (1925), M.D. (1931), California.
- Aubrey M. Davis, M.D., Associate Professor Emeritus of Mcdicine.
 - B.A. (1927), Stanford; M.D. (1929), Oregon.
- Henry H. Dixon, Sr., M.D., Professor Emeritus of Psy-
 - M.D. (1928), Washington University.
- Bertha B. Hallam, B.A., Professor Emeritus, Library. B.A. (1931), Oregon.
- Hance F. Haney, M.D., Ph.D., Professor Emeritus of Medicine. B.A. (1926), M.A. (1928), Ph.D. (1934), Wisconsin; M.D. (1934), Chicago.
- Blair Holcomb, M.D., Professor Emeritus of Medicine. M.D. (1919), Rush (University of Chicago).
- Arthur C. Jones, M.D., Professor Emeritus of Physical Medicine and Rehabilitation. B.A. (1921), Pacific University; M.A. (1925), M.D.
 - (1926), Oregon.
- Noble Wiley Jones, M.D., Professor Emeritus of Medicine. A.B. (1895), Stanford; M.D. (1901), Rush (University of Chicago).

- A. Gurney Kimberley, M.D., Associate Professor Emeritus of Orthopedics.
 - B.S. (1929), M.D. (1930), Oregon; D.Sc. (1937), Columbia.
- Howard P. Lewis, M.D., Professor Emeritus of Medicine.
- B.S. (1924), Oregon State; M.D. (1930), Oregon. Merl L. Margason, M.D., Professor Emeritus of Medi-
 - A.B. (1920), M.D. (1923), Oregon.
- Merle W. Moore, M.D., Associate Professor Emeritus of Medicine.
 - B.S. (1920), Oregon; M.D. (1924), Jefferson.
- Anthony A. Pearson, Ph.D., Professor Emeritus of Anat-B.S. (1928), Furman; M.A. (1930), Ph.D. (1933),
- Michigan. Caroline H. Pommarane, B.S., Associate Professor Emer-
- itus. B.S. (1928), Nebraska.
- William H. Sheldon, M.D., Ph.D., Professor Emeritus of Medicine.
 - B.A. (1919), Brown; M.A. (1923), Colorado; Ph.D. (1925), M.D. (1933), Chicago.
- Howard C. Stearns, M.D., Professor Emeritus of Obstetrics and Gynecology.
 - B.S. (1924), M.S. (1925), Oregon State; M.D. (1929), Oregon.
- William J. Swett, M.D., Associate Professor Emeritus of Medicine.
 - B.A. (1928), Reed; M.D. (1932), Oregon.
- E. Merle Taylor, M.D., Professor Emeritus of Ophthalmology. M.D. (1925), Iowa.
- Wilbert R. Todd, Ph.D., Professor Emeritus of Biochem-
 - B.S. (1928), Ph.D. (1933), Wisconsin.
- Edward S. West, Ph.D., Professor Emeritus of Biochemistry.
 - A.B. (1917), Randolph-Macon; M.S. (1920), Kansas State; Ph.D. (1923), University of Chicago.
- William M. Wilson, M.D., Professor Emcritus of Obstetrics and Gynecology.
 - B.S. (1920), Whitman; M.D. (1924), Johns Hopkins.

Faculty*

- †John E. Abbott, M.D., Clinical Instructor in Family Practice (1971).
 - B.A. (1960), B.S.Med. (1962), South Dakota; M.D. (1964), Oregon.
- †John F. Abele, M.D., Assistant Clinical Professor of Orthopedics (1946).
 - B.A. (1930), M.D. (1934), Oregon.
- †Stanley Abrams, Ph.D., Lecturer in Medical Psychology (1969).
- B.A. (1956), Wilkes; M.A. (1957), Ph.D. (1961), Temple.
- †John C. Adams, M.D., Clinical Professor of Surgery (1932).
 - B.S. (1922), University of Washington; M.D. (1926), Oregon.
- Joseph J. Adams, B.B.A., Assistant Dean; Professor (1951).
 - B.B.A. (1949), Gonzaga.
- F John P. Aitchison, Ph.D., Assistant Professor of Clinical Pathology (1969).
 - B.A. (1957), British Columbia; Ph.D. (1969), California.
 - †Bennett Alberts, M.D., Clinical Instructor in Obstetrics and Gynecology (1969).
 M.D. (1960), Nebraska.
 - †Phillip S. Alberts, M.D., Clinical Instructor in Obstetrics and Gynecology (1964).
 - B.A. (1953), M.D. (1958), Nebraska.
- Clifford V. Allen, M.D., Professor of Clinical Pathology (Radioisotopes) and Radiology (Therapy); Chairman, Department of Radiation Therapy (1955). M.D. (1933), Iowa.
 - †Lee Allen, M.D., Clinical Instructor in Dermatology (1971).
 - M.D. (1965), Tennessee.
 - †Richard Allen, M.D., Clinical Instructor in Obstetrics and Gynecology (1970).
 - B.A. (1958), Oregon; M.A. (1961), U.C.L.A.; M.D. (1965), New York Medical College.
 - †Roger D. Ambroson, M.D., Clinical Instructor in Family Praetice (1972).
 - B.A. (1952), Iowa; B.S., M.D. (1963), Minnesota.
 - Mary J. Amdall, M.S., Instructor in Psychiatry and Pediatrics (1970).
 - B.S.N. (1968), South Dakota State; M.S. (1970), Maryland.
 - †Alan W. Ames, M.D., Clinical Instructor in Medicine (1968).
 - B.A. (1956), Stanford; M.D. (1960), Yale.
 - †Patricia G. Amstadter, M.D., Clinical Instructor in Psychiatry (Child Psychiatry) (1969). B.A. (1959), Occidental; M.D. (1963), North-
 - B.A. (1959), Occidental; M.D. (1963), North western.

- Clifford Joe Anderson, M.D., Instructor in Medicine (1972).
 - B.A. (1966), Hastings; M.D. (1970), Nebraska.
- ‡Richard P. Anderson, M.D., Associate Professor of Cardiopulmonary Surgery (Veterans Hospital) (1970). B.S. (1956), M.D. (1959), University of Washington.
- †William F. Anderson, M.D., Clinical Instructor in Dermatology (1970).
 - B.A. (1956), Pacific Lutheran; M.D. (1960), University of Washington.
- †Richard P. Andrews, M.D., Assistant Clinical Professor of Surgery (1963).
 - B.S. (1949), Denison; M.D. (1953), Harvard.
- † John Antonovic, M.D., Clinical Instructor in Medicine (1971).
 M.D. (1961), Zagreb (Yugoslavia).
- Ruza Antonovic, M.D., Assistant Professor of Radiology (Diagnosis) (1972).
 - M.D. (1961), Zagreb (Yugoslavia).
- †Richard Arkless, M.D., Clinical Instructor in Radiology (Diagnosis) (1970).

 B.A. (1957), Kenyon; M.D. (1962), Pennsylvania.
- †Carl G. Ashley, M.D., Assistant Clinical Professor of Pediatrics (1936).
 - B.A. (1927), M.D. (1931), Oregon.
- †Dee D. Atkinson, M.D., Clinical Instructor in Family Practice (1972).
 - B.S. (1960), Oregon State; M.D. (1962), Oregon.
- †David Auld, M.D., Affiliate in Pathology (Veterans Hospital) (1971). B.A. (1946), Swarthmore; M.D. (1948), Maryland;
- M.S. (1956), Colorado.
 †Kurt W. Aumann, M.D., Associate Clinical Professor of Medicine (1948).
 - B.S. (1936), Washington State; M.A. (1940), M.D. (1942), Oregon.
- †William C. Awe, M.D., Associate Clinical Professor of Surgery (1966). B.S. (1955), M.D. (1958), Baylor.
- S. Gorham Babson, M.D., Professor of Pediatrics (1941). B.S. (1933), M.D. (1936), Oregon.
- †Benny Lee Bachulis, M.D., Clinical Instructor in Surgery (1968).
 B.S. (1956), M.D. (1960), Ohio.
- Robert L. Bacon, Ph.D., Professor of Anatomy (1955). B.S. (1940), Hamilton; Ph.D. (1944), Yale.
- †Daniel M. Baer, M.D., Associate Clinical Professor of Clinical Pathology (1970).
 B.A. (1953), Oberlin; M.D. (1957), New York Medical College.
- * The year in parentheses following the title of each faculty member indicates the date of original appointment to the faculty.

Summary of Enrollment 1971-1972

	Men	Women	Total
First Year	88	8	96
Second Year	90	9	99
Third Year	79	8	87
Fourth Year	91	6	97
Total Regular Students	348	31	379
Graduate Students	42	10	52
Special Students	4	2	6
Medical Technology Students		44	51
Total	401		488

Acceptance of appointment	30	Housing	17
Accreditation		Immunology and Allergy	56
'Administration	13	Infectious Disease	57
Administrative officers		Instruction	
Admission requirements28		Internships	
Advanced standing		-	
-Alumni Association		Library	13
Anatomy	39	Licensure	JJ
Anesthesiology	21		
Application procedure		Medical College Admission Test .	29
Athletics		Medical Genetics	42
Awards	21	Medical Psychology	43
Bachelor's degree	29	Medical technology	72
Basic Sciences	38	Medicine	53
Biochemistry		Microbiology	45
•		Nuclear medicine technology	77
Calendar8	, 74	Neurology	57
Campus map	1V	Neuropathology	46
Cardiology	54	Neurosurgery	67
Cardiopulmonary Surgery		Nonresident fee	20
Chest Diseases		Nursing	81
Class attendance		_	
Clinical Pathology		Obstetrics and Gynecology	55
Clinical Sciences	50	Ophthalmology	OL
Combined M.DM.S. program	90	Oregon State System of	1 = 4
Combined M.DPh.D. program	80	Higher Education	1, 0, 0
Conjoint courses—Basic	20	Orthopedics	
Medical Science		Orthoptics	/0
Conjoint courses—Clinical Science Continuing medical education	30 70	Otolaryngology	
Course numbering system	35	Pathology	46
Curriculum in medicine	33	Pediatric Surgery	68
Cytotechnology		Pediatrics	
Cytoteemology	• •	Perinatology	
Degree requirements, medicine	34	Personal interview	30
Degrees conferred 1972	128	Pharmacology Physical examination	48
Dentistry	61	Physical examination	30
Description of courses	37	Physical facilities	IC
Dermatology	52	Physical Medicine	-
Diabetes and Metabolism		and Rehabilitation	00
- Dismissal	32	Physiology	40 70
