NOTICE OF THE FIELD MANAGERS PROPOSED DECISION

INTRODUCTION

This document addresses the issuance or renewal of your grazing permit/lease. A proposed decision is required by the Code of Federal Regulations (CFR) 4100 to be served on any affected applicant, permittee or lessee who is affected by the proposed actions, terms, conditions, or modifications relating to issuance of a grazing permit/lease.

BACKGROUND

The current grazing permit for the Newsome Allotment (# 11037) will expire on February 28, 2009 and you, the permittee, for this allotment have requested a renewal. An Interdisciplinary team completed a Land Use Plan Conformance and Determination of NEPA Adequacy (DNA) document (OR-054-08-108) for this proposed renewal. The DNA is available from the Prineville District upon request.

PROPOSED DECISION

Therefore, it is my proposed decision to issue you a grazing permit, authorization # 3605049, for livestock grazing on the below listed allotment. Your grazing permit shall be for a period of ten years (2008-2018) and will reflect the following:

Allotment Name and Number	Livestock		Grazing Period		% PL	Type Use	AUM's
	Number	Kind	Begin	End			
Newsome # 11037	2	Cattle	4/15	8/14	100	active	8

Due to computer calculation rounding, the above aums may not correspond with your actual grazing preference. Your actual grazing preference is shown below.

Total animal unit months (aums) are 8, of which 8 are Active and 0 are Suspended.

Other terms and conditions of the permit/lease would be as follows:

- ◆ The BLM is in the process of implementing the standards for rangeland health and guidelines for grazing management. This lease/permit is subject to future modification as necessary to achieve compliance with the standards and guidelines (43 CFR 4180).
- ◆ Lessees/permittees are required to submit actual use grazing records within 15 days of completion of the years grazing use.
- ◆ Salting of livestock within one-quarter mile of water is prohibited. Supplemental feeding of livestock on public lands is prohibited without prior authorization from the BLM.
- ◆ Lessees/permittees are required to maintain all range improvements for which they have maintenance responsibilities.
- ◆ Lessees/permittees are to provide reasonable access across private and leased lands to the BLM for the orderly management and protection of the public lands as allowed in 43 CFR 4130.3-2 (H).
- ◆ The Fish and Wildlife Service and the National Marine Fisheries Service are evaluating species for listing that are present within the Central Oregon Resource Area Boundary. If these species are listed as threatened and endangered, and are found on Federal Lands located within this allotment boundary, this lease is subject to future modification to achieve compliance with the listing.

RATIONALE

Based on the review of DNA # OR-054-08-108, I determined that this renewal meets the criteria for a Determination of NEPA Adequacy (DNA) and that no additional environmental analysis is required. Further more, the renewal conforms to the applicable land use plan and that the NEPA documentation fully covered the proposed action and constitutes BLM's compliance with the requirements of NEPA.

- (2) The likelihood of the appellant's success on the merits.
- (3) The likelihood of immediate and irreparable harm if the stay is not granted, and
- (4) Whether the public interest favors granting the stay.

As noted above, the petition for stay must be filed in the office of the authorized officer and served in accordance with 43 CFR 4.473.

Any person named in the decision that receives a copy of a petition for a stay and/or an appeal see 43 CFR 4.472(b) for procedures to follow if you wish to respond.
