Oregon State System of Higher Education

The Oregon State System of Higher Education was organized by the State Board of Higher Education in 1932, following a survey of Higher Education in Oregon by the U. S. Office of Education. The system comprises all of the state-supported institutions of higher education, each institution functioning as part of an integrated whole. The system's educational program is organized so as to distribute opportunities for general education as widely as possible throughout the state, and to center on the individual campuses those specialized, technical, and professional curricula which are closely related.

The institutions making up the system are: The University of Oregon at Eugene, Oregon State College at Corvallis, Oregon College of Education at Monmouth, Southern Oregon College at Ashland, Eastern Oregon College at La Grande, and Portland State College. The University of Oregon Medical and Dental Schools are located in Portland. The General Extension Division represents all of the system campus institutions through the division's headquarters office in Portland and through regional offices in Eugene, Corvallis, Ashland, Monmouth, La Grande, and Salem.

Each of the institutions provides a well-rounded program of general education in addition to at least one program of specialized education. At Oregon College of Education, Southern Oregon College, and Eastern Oregon College, students may complete major work in teacher education or general studies, or they may enroll in pre-professional programs. Portland State College offers major work in general studies, in selected liberal arts and professional fields, and pre-professional programs.

The University of Oregon and Oregon State College provide two years of unspecialized work in liberal arts and sciences. Major curricula, both liberal and professional, are grouped in accordance with the distinctive functions of these institutions in the over-all state system program.

An inter-institutional booklet, *Your Education*, outlining the curricula at these state system institutions, may be obtained by writing to: Division of Information, Board of Higher Education, P. O. Box 5175, Eugene, Ore.

Dean's Message

It is the responsibility of General Extension Division to make available to Oregonians for off-campus study the resources of all units in the State System of Higher Education.

One of the important ways in which this is accomplished is through Correspondence Study. By pursuing their studies at home, thousands of persons in our state, and many in other states, are able to carry on work toward a high school goal or toward a college degree. Many others seek only the satisfaction of life-long learning.

All in General Extension Division are interested in making available the best possible educational services to the citizens of Oregon. We believe that successful extension work moves along a two-way street. As you consider your experiences in correspondence study or other extension work, please do not hesitate to communicate to our offices any suggestions you may have for improving this service.

General Information

Why does the Oregon State System of Higher Education offer correspondence courses?

Correspondence courses are designed for those who wish to continue their education under supervision but are unable to enroll as resident students. Some desire to earn undergraduate credit toward academic degrees or to complete professional requirements; others want to complete their high-school work or meet college entrance requirements; many adults wish to study specific subjects for personal enjoyment and betterment without concern for credit. All such persons are served by correspondence courses.

Courses are prepared and graded by faculty members of institutions in the State System of Higher Education in close cooperation with General Extension Division.

What is correspondence study?

Correspondence study is an arrangement for earning college or high school credit by study at home. Under the Oregon plan, the student receives the entire course when he enrolls. Completed lessons are mailed directly to the instructor, who reads the student's work carefully and makes whatever comments he feels are necessary to help the student. *Lesson reports should be sent to the instructor one at a time as they are completed so that a student may benefit from comments and corrections in working out subsequent lessons. Instructors may refuse to accept lesson reports which indicate the student is hurrying his work unduly.* Lessons are returned from the instructor directly to the student. At the close of most courses, the student takes a proctored examination. The final grade *may* be determined largely by this examination. However, the instructor usually gives considerable weight to lesson grades unless there is too much difference between these and the final examination score. In some courses it is not necessary to send written lessons to the instructor; instead, a number of proctored examinations, usually equivalent to the number of credit hours in the course, are required.

Are there any restrictions on enrollment in correspondence study?

Any person of sufficient maturity and preparation to undertake a course may enroll *at any time*. A student wishing to earn credit must meet the requirements of the institution accepting this credit. The prerequisites listed for certain courses apply only in cases where a student intends to submit the credits he earns through correspondence study to

an institution in partial fulfillment of his degree requirements. The University of Oregon, Oregon State College, Portland State College, Southern Oregon College, and Eastern Oregon College will accept a maximum of 60 hours of credit earned by correspondence study. Oregon College of Education accepts 24.

No graduate credit is offered by correspondence study.

Any high-school student desiring to enroll in correspondence work while attending high school should obtain approval of his principal before making application for enrollment.

No high-school student may enroll for a course to be applied toward spring graduation *after April 1* of the year in which he intends to graduate. Courses must be completed at least *three weeks prior to the date of graduation*. There are no exceptions to this rule.

What procedure is necessary for enrolling in correspondence courses?

(1) A student wishing college credit should consult the registrar of the institution at which he wishes to use the credit or the head of the organization to which he wishes to submit the credit. This person will be able to advise the student as to the selection of the proper course or courses. A student wishing to earn high-school credit should consult the principal of the high school where he was formerly enrolled or the principal of the local high school.

(2) Fill out the application blank in the center of this catalog and mail it with a check, money order, or bank draft for the entire fee to the Office of Correspondence Study, General Extension Division, Eugene, Oregon.

How long will it take to complete a course?

This depends on the amount of time a student is able to devote to his study. The original enrollment period is one year. Students are permitted to renew their enrollment for one year by paying a renewal fee of \$2.00. Only one renewal is permitted. *Maximum time allowed on any course is two years.*

How does a student make arrangements to take a final examination?

Examinations must be taken within six weeks after the return of the last graded lesson report if the student wishes credit for his course. Students not living near a General Extension Division office or a State System campus will take their examinations under the supervision of an approved proctor. Instructions for making arrangements for an examination are included with each course. *General Extension Division reserves the right to select the proctor.*

What are the fees for correspondence courses?

Fees for each course in this catalog are listed in the line which gives course number and title. The nonresident fee is waived for service personnel. Fees for courses offered by General Extension Division correspond to fees in effect on campuses in the State System of Higher Education. A special charge will be made to the student who desires his lessons and reports handled by *air mail*. The fee per course for this service is \$2.50 in the United States and its possessions and \$5.00 for foreign countries. This special air mail fee must accompany the registration. No refunds will be made except as stated under the course refund rule.

Onionskin or other tissue-type writing paper must be used for all lessons and examinations handled by air mail.

Where may textbooks be obtained?

The student supplies his own texts and other equipment. If he wishes, he may order these from the University of Oregon Cooperative Store, Eugene, Oregon. Text prices are furnished with the course outline or on request. Please address inquiries concerning text prices to the Office of Correspondence Study, General Extension Division, Eugene, Oregon.

It is the aim of the General Extension Division to keep its correspondence courses up to date, and new textbook editions are adopted as soon as possible when new or reorganized material is introduced. For this reason, a student should obtain the texts for a course only after he has enrolled and has received confirmation of the books currently in use.

General Extension Division does not handle refunds on texts.

A student seeking a refund should contact the store from which the text was purchased.

Under what conditions are refunds made?

After a student has enrolled in a course, press of other work or unwillingness to carry on the course will not be considered adequate cause for a refund. Enrollment in a similar course as part of a resident program in an educational institution or an extension class will be regarded as sufficient reason for a request for a refund of fees, provided the course is returned with the request to General Extension Division within three months of the date of registration. When refunds are made, \$2.00 of the fee for each course will be retained to cover the cost of registration. No course fee will be refunded after a student has submitted lesson reports.

Is it permissible to transfer to another course?

A student may transfer from one course to another any time during the first six months of his enrollment, provided the original course is returned to the Office of Correspondence Study. Fee for this service is \$2.00 plus any necessary fee adjustment and \$1.00 for each assignment which has been corrected in the original course.

How is correspondence study graded?

The quality of student work is measured by a system of grades consisting of: *A, B, C, D, F, Inc.* The grade of *A* denotes exceptional accomplishment; *B*, superior; *C*, average; *D*, inferior; *F*, failure; *Inc*, incomplete.

May correspondence courses be used for teacher certification?

In general, the answer is yes. However, it is recommended in all cases that a student check with the department of education in his state. That office will indicate to a student the courses which he needs for certification and will also call his attention to any limitations concerning the manner in which those courses may be taken.

May service personnel enroll for correspondence courses through USAFI?

Yes. The General Extension Division has a correspondence study contract with the United States Armed Forces Institute. Under the terms of this contract, the Government pays instruction costs and the student pays nominal enrollment fees plus the cost of the text or texts. Most of the courses listed in this bulletin are available under the USAFI contract. For complete information concerning fees and courses, consult your unit Education Officer or write to USAFI, Madison 3, Wisconsin.

What other colleges or universities offer correspondence study?

If you do not find the courses you desire listed in this bulletin and wish to seek further information concerning a specific subject, write to: Office of the Secretary, National University Extension Association, University of Minnesota, Minneapolis, Minnesota.

May veterans take advantage of correspondence study?

Yes. The Oregon State System of Higher Education offers courses under Public Law 550 (Korean Bill). If a veteran is qualified under this law, he should contact his local Veterans Administration immediately and apply for a Certificate of Education and Training, to be made

out to the Office of Correspondence Study, General Extension Division, and submit this to the Office of Correspondence Study, 1250 Emerald Street, Eugene, Oregon. Also, he should obtain from the institution from which he expects to receive a degree a letter certifying that the courses he wishes to take will apply toward that degree. General Extension Division cannot issue such a letter.

What is supervised correspondence study?

The Oregon State System of Higher Education has a plan of supervised study designed for the advanced student who wishes to carry an extra load. *A student who has failed a subject is not eligible to study under this program.* Under this plan a student may enroll for half-fee provided a counselor (a local high-school teacher) is assigned to work with him. However, the student must be capable of self-direction. *The application must be signed by the high-school principal and the name of the counselor listed thereon.* All supervised correspondence study courses must be completed during the current school year. For further information please write to the Office of Correspondence Study, 1250 Emerald Street, Eugene, Oregon.

Is group study for credit possible?

Yes. Students who wish to take the same correspondence course may wish to study together. This procedure is encouraged. After reading each assignment, the students will find it helpful to discuss the topics with others. However, where written assignments are required, each student is expected to submit his original answers to the written questions. Should one desire to become a member of a seminar group, contact the General Extension Division in order that all in the group may have the same instructor assigned to them.

College Correspondence Courses

The courses in this catalog are numbered in accordance with the course-numbering system of the Oregon State System of Higher Education. Lower-division (freshman and sophomore) courses are numbered from 50 through 299. Upper-division (junior and senior) courses are numbered from 300 through 499. A number below 50 indicates a noncredit course.

The number of quarter hours (q.h.) of credit and the enrollment fee are indicated after each course title. A number followed by the letter W indicates the number of written lessons required. The letter E following the number of lessons indicates a course in which a series of proctored examinations are required in lieu of submitting the assignments in writing. The number of proctored examinations will usually be equivalent to the number of credit hours in the course.

For the convenience of students using this catalog the letters U, S, P, and C appear in the left margin before course descriptions. The letter U refers to University of Oregon, S to Oregon State College, P to Portland State College, and C to the colleges of education. These indicate that the accompanying course appears in the catalog of the institution designated and is a regular offering of that institution.

High-School Courses

These courses are offered in cooperation with the office of the State Superintendent of Public Instruction and, when approved by the student's high-school principal, may be applied for credit toward graduation. General Extension Division does not grant diplomas; this is done by the local high school. Regardless of his age, the student wishing to graduate from high school through the use of correspondence study should consult his high-school principal who will advise him in the selection of courses. Credit earned through General Extension Division may be transferred to the high school at which it is to be used.

These courses also may be used by students who wish to clear college entrance deficiencies.

College credit will not be given for any of the high-school courses listed below, but college entrance credit will be granted for satisfactory completion of any of them.

A unit, when applied to high-school credit, means the equivalent of five recitations per week of not less than forty minutes each in one branch of study, for the school year of not less than thirty-six weeks.

The number of units (u.) of high-school or college entrance credit and the enrollment fee are indicated after each course title. A number followed by the letter W indicates the number of written lesson assignments.

High-school seniors who expect to use any of these courses for graduation credit must enroll before April 1 of the year in which they expect to graduate.

The supervised-study program is described on page 11.
