Steels are like a family

... each with its own personality, its own special talents

MUCH OF YOUR KITCHENWARE is made of steel. So are the hundreds of thousands of miles of railroad rails that criss-cross the nation. And so is practically all of your automobile.

THEY'RE ALL STEEL, but that's where the similarity ends. In your kitchen, it's shining, rust-resistant stainless steel. In rails, it's carbon steel—strong and tough to endure years of hard service. And there are more than 160 different kinds of automobile steels.

What makes the difference among steels? The most important influence is alloying metals—chromium, manganese, tungsten, vanadium, and others.

ADDING ALLOYING METALS to molten steel changes the composition of the steel and gives it special characteristics. It's chromium, for example, that makes steel stainless. Tungsten, on the other hand, makes steel so

hard that it is used in machine tools to shape 'softer' steel into things to serve you.

FROM MINES throughout the world, the people of Union Carbide gather ores and refine them into more than 50 different alloying metals that are vital to making more and better steel.

STUDENTS AND STUDENT ADVISERS: Learn more about career opportunities with Union Carbide in *ALLOYS, CARBONS, CHEMICALS, GASES, and PLASTICS*. Write for "Products and Processes" booklet.

To and From

Occasionally we are asked, "What does the Alumni Office or the Alumni Association do for me?" Of course we mention OLD OREGON and *Old Oregon Sports*; we talk about addresses of lost friends, class reunions and notices of University activities. We speak of Alumni-Faculty tours and we frequently are rewarded with a blank look that has "Alumni-Faculty What?" written all over it.

Even though such tours have been conducted for several years there are still those who are uninformed. Seattle for instance. A Faculty-Alumni tour was taken to Seattle on February 11th. One of our alumni confided that he had come to the meeting only because of a sense of responsibility to the University and that he didn't want us to have an empty meeting room. Now that the program was over he was virtually speechless—and, I might add, very grateful and apologetic. He had no idea that we took such a program to our alumni and from the meeting had developed a new respect for our fine university.

What is it? Well it's a very informal, relaxed presentation of what is happening on the campus and in the classroom today. The faculty members give a sample of their classroom lecture just as if they were in a classroom on the campus. Building plans of the campus, student activities, pictures of all campus buildings and just small talk about Oregon are the different items of discussion and review of the meeting. It's something like a refresher course in what Oregon is and what it is doing.

Getting back to Seattle for the moment, our faculty group included Dr. James H. Gilbert, professor emeritus of Economics, who talked about "Builders of the University"—a very revealing summary of the fifty-seven years that Dr. Gilbert has spent on the campus. His own enthusiasm adds much to his already witty and humorous anecdotes. Dr. John McCloskey of the English Department reviewed several books written by Stephen Crane. Not a dull tirade of literary style but a very revealing insight into the techniques of the author and his development of each character of the novels. Chances are that several persons at the meeting have read one of Crane's books since that meeting. I have. Dr. Bernd Craseman of the Physics Department made the study of physics a personal matter as he emphasized the relation of physics to the individual. Not a technical confusing summation but a very interesting talk. Of course we heard from Dr. Wilson, President of the University, who told about the work leading to the discovery and purchase of the Fifteenth century manuscript which is the subject of the cover of this issue.

This is but a sample of the type of program that we bring to you as a result of your interest in the Alumni Association.

COVER

Seldom does a benefactor step forward to provide the University with a reward for its intellectual effort as readily as did Walter A. Woodard. Mr. Woodard purchased, then gave to the University, the 15th century French manuscript which had been "lost" in a book store in England until two Oregon graduate students identified the papers as being an original epic poem of great value and significance. This is one page in this new University treasure. We apologize for the black and white picture which cannot possibly convey the detail nor the beauty of the author's work.

Letters...

My Dear Mr. Frost:

Permit me to compliment you upon the excellent article in tribute to our beloved friend, the late Governor Paul L. Patterson; and particularly upon the artistry that was manifest in assembling the cover.

Sincerely yours,
Harold J. Warner
Chief Justice
Supreme Court

Dear Mr. Frost:

May I congratulate you upon the January-February, 1956 issue of OLD OREGON? The write-up of my dear friend and classmate Paul Patterson was beautifully done, and those of us who knew Paul will undoubtedly applaud you for it. We shall feel keenly the loss of this grand friend and classmate. I am sure that if John MacGregor, Owen Callaway and some of the other members of the class of 1923 could gather round to reminisce about our days at Oregon when Paul, along with the rest of us, was an undergraduate there, we would have many an interesting and amusing tale to tell of those days. Certainly one story which will go down in the history of our Class of 1934 was the time in the Spring Quarter of our junior year—when we were electing our Class officers for our fourth and last year. Paul had a candidate, I believe it was George King. Paul wanted him to be president of our famous class, and he used all of his forensic ability to impress us with the qualifications of George. His oratory mounted to a cataclysmic pitch, however, when in impassioned tones he said, "My fellow classmates, if we do not elect my candidate, George King, as president of our senior class, this class will be like a ship without an udder!"

That, to me, is one of the high spots of our senior year, and we have laughed about it many times since. I pass it on to you for what it is worth.

Sincerely yours,
Del Oberteuffer
Professor of Physical Education
Ohio State University

Special acknowledgement is made of the fine work by Mr. Bernard Freemesser of the University Photo Bureau for his outstanding pictures of Robert Frost. Harvard University officials have recognized his informal shots as the finest picture study made by Mr. Frost in many years.

To and From

(Continued from page 2)

Funds for support of this traveling troupe are derived from the annual dues which you pay. If you have not attended one of these meetings don't miss the next one. It is also a fine time to meet a lot of persons in your own community who are alumni of Oregon and to have a very relaxed evening. Everyone enjoys knowing that they are a part of anything successful and nothing is more convincing of the success of the University and the Alumni Association than to attend such a gathering. Watch for the announcement of the meeting scheduled for your area.

Cairo, Egypt
March 6, 1956

Dear Sir:

You win! After receiving the notice that my 1956 dues should be sent I thought at first that I would send it but have you not send OLD OREGON here but rather to my home address; after making that resolution I let the matter slide. When I received the December issue of OLD OREGON here, how you got the address I don't know, I completely succumbed and decided I had better send the check in so that you won't stop the magazine, which I look forward to reading from one issue to the next.

So, enclosed is a check for \$4.00 and if you can keep up with me in sending out the magazine I will greatly appreciate it. My address at the present time is that shown above but will be completely erratic until the end of the summer. I leave here shortly after the 1st of June and after a tour through Lebanon, Syria, Jordan and Turkey, up through Southern Europe, I will spend the summer somewhere in Austria. February, April issues will probably reach me here and perhaps June and August in Austria when I send the address. That is as far as I can plan ahead at the present time.

If you wonder what I am doing here I came to do research into medieval Yemenite history and now I am Acting Librarian for the School of Oriental Studies in the University. If I will get to work properly I will soon have an article appearing on Yemenite history (in Arabic) in a book to be published here in Cairo.

Tell the editorial staff of OLD OREGON that at least one recipient enjoys and appreciates their work and personally considers it superior to many of the others.

Sincerely yours,
Charles L. Geddes ('51)

New Teaching Hospital on Mar

By Joe Adams

The new teaching hospital on Marquam Hill in Portland is the state's most modern educational facility. This fourteen-story structure brings the value of the Medical School buildings and equipment to over \$20,000,000.

PUBLIC officials, legislators, educators, professional men and women, and people from all walks of life converged on the campus of the University of Oregon Medical School, Portland, March 3 to hear remarks by Governor Elmo Smith and to see for themselves Oregon's nearest and most modern educational facility. The official dedication of this new campus addition was made by Dr. R. E. Kleinsorge, president of the Oregon State Board of Higher Education.

Dr. Kleinsorge dedicated the building with these words: "We are gathered here to dedicate this magnificent hospital, built by the people of Oregon for the benefit of all citizens. Therefore, let us dedicate it to those who, through the decades, have served

their profession so well, have brought honor and prestige to their state, and have set such a splendid example of devotion to duty—the staff of the medical school, past, present and future.

Welcoming visitors to the hospital, Dr. John R. Richards, Chancellor of the Oregon State System of Higher Education asked, "Vision, if you will,—that here are merely the means to do a better job of training future doctors, nurses, medical technologists, and to offer post-graduate work to those who are already in the professions. The building is not the goal; it is the wherewithal to attain the goal of better instruction, fuller research and broader services to the people of the state..."

This 14-story structure which has been

under construction on the Medical School's campus since the spring of 1953 has been designed for just one purpose: to further man's age old battle against disease and death.

It is a teaching and research facility which will provide resident physicians, interns, medical and nursing students, and doctors throughout the Northwest with the latest information on the ways to treat disease, and it will equip them with the new knowledge constantly being found through medical research. In addition to its patient beds, which include 118 for pediatrics, 128 for general medical and surgical patients and 31 for psychiatric care, the building houses spacious classes, with the latest in audio-visual and instructional aids, and

quam Hill

numerous research laboratories with their bubbling test tubes and colored gases.

Those visiting the hospital during the public open house March 3-4 had an opportunity to observe these new facilities for patient care which illustrate the changing pattern of medicine:—rooms that have lead-lined walls and floors where patients may be treated with radio-active isotopes;—rooms for asthma studies where every particle of dust and allergens will be filtered out;—and more rooms for skin-temperature studies where heat can be controlled to a fraction of a degree.

Intercommunication systems between each bed and the nurse's station saves countless steps and much valuable time on the part of both patients and nurses; piped-in oxygen to each room and ward; a pneumatic tube system where charts may be whisked in seconds from the Medical Records department to the hospital admitting department and on to the nurse's station at each level; and dumbwaiters on each floor for linens and food service.

Psychological factors as well as physical conveniences also have been taken into account in the hospital's planning. The rooms and corridors have been planned with an eye toward color: soft pastels in contrast to the usual aseptic white and cream. Cheerful drapes may be found at the lovely windows affording a vast hilltop panorama of the City of Roses and beyond to Mt. Hood and the Cascades. Picture-type windows between the corridors and rooms in the Doernbecher Memorial Hospital for Children unit will allow doctors and nurses to closely observe the activities of these sick little patients.

Other features to be found in the hospital include: a 31-bed psychiatric ward; a one-story laundry wing to serve the needs of the entire University of Oregon Medical School campus; a contagious disease unit; administrative and faculty offices; living quarters for resident physicians and interns; and occupational and physical therapy departments.

A marvel of architectural design and construction, the new hospital will be integrated with existing campus buildings by a connecting unit between the Medical School Hospital and the Outpatient Clinic.

As a teaching and research hospital, the building has little of the elegant frills associated with modern construction. Yet its simplicity of design and functional utility will serve well the needs of its students of today and tomorrow. It has the ultimate in equipment and teaching facilities. And

similarly, patients will have complete comfort as well as the last word in treatment.

With this newest addition to its facilities, the University of Oregon Medical School has a campus, grounds, buildings and equipment valued at more than 20 million dollars. But its early beginnings were indeed modest as compared to this modern institution of today.

It all started in a small building in downtown Portland back in 1887, when the school was founded and admitted its first student. Then, in 1913, the Medical Department of Willamette University, which had been in operation since 1865, was merged with the University of Oregon Medical School. Under the terms of the agreement, medical students from Willamette were transferred to the University of Oregon Medical School and upon graduation received diplomas indicative of consolidation. The alumni bodies of the two groups were also merged.

In 1919, when the facilities of the Medical School no longer were adequate to accommodate the expanded program, a new medical science building was erected in Sam Jackson Park overlooking the City of Portland. This was the beginning of the present campus. The site comprises 108 acres at the present time and although it is in a secluded spot, it is but a mile and a half from the business center of Portland.

It is made up of a tract of 20 acres donated in 1914 by the Oregon-Washington Railroad and Navigation Company and 88 acres donated by Mrs. C. S. Jackson and Phillip Jackson in memory of C. S. Jackson, publisher of the *Oregon Journal*.

Among the buildings on the Medical School campus are the Medical Science Building; Doernbecher Memorial Hospital for Children; the Outpatient Clinic; Multnomah Hospital; Administration Building; two nurses residences; the University State Tuberculosis Hospital; a Crippled Children's Division administrative and office building; and a physical plant shop and warehouse.

A new building for the Dental School of the University of Oregon is located adjacent to the Medical School hospital. Construction began in 1954 and the 2.2 million dollar structure will be finished in April of this year. In the meantime, the Dental School continues to occupy its present quarters on Portland's East Side.

These physical attributes of the University of Oregon Medical School campus—its buildings—are devoted to three objectives: teaching, research, and patient care. As in the 81 other medical schools across the nation, the fundamental purpose of this institution is to teach students the science

(Continued on page 17)

Dr. Charles N. Holman, Administrator of the new hospital, points out advantages of a central nursing station to visitors. From left to right are: Mrs. Elmo Smith, Mrs. Fred Shideler, wife of the governor's administrative assistant; unidentified legislator, Governor Elmo Smith, Dr. R. E. Kleinsorge, president of the Oregon State Board of Higher Education, Frank Shull, former County Commissioner, Chancellor John R. Richards, of the Oregon State System of Higher Education; Dr. Howard P. Lewis, professor and head of the Department of Medicine at the medical school; Mrs. R. E. Kleinsorge; Dr. Holman and the Chancellor's daughter.

Hotel Executive Civic Leader Top-notch Golfer Mr. Oregon

Ed Crowley '28 maintains a tremendous schedule from either his Town House or his Balboa Bay Club office. He is never too busy to greet an Oregon visitor.

Not many hotel men or Oregon men are as well known as Edward J. Crowley '28, genial manager of the Sheraton-Town House in Los Angeles. Add to this a national reputation in golf and a list of civic activities which would make a "First Citizen" blush and you have a real "Mr. Oregon."

Ed began his career in the hotel industry as Assistant Manager of the Hollywood Roosevelt and Miramar Hotels in 1932 and later held the position of Director of Publicity and Promotion of the Arrowhead Springs Hotel in Hollywood. From 1941 to 1947 Ed was Assistant Manager—Hilton Hotels Corporation Los Angeles and in 1947 he was appointed General Manager of the Town House and has held that position to the present time.

Incidentally, Uncle Sam had Ed on his blotter from 1942 to 1945 when he was a Chief in the Coast Guard.

We mentioned that civic affairs occupy much of his time. He was chairman of the Hotel Division of the National Conference of Christians and Jews from 1950 to 1954, chairman of the Hotel and Commerce Division of the Heart Fund Foundation since 1950 and has been Director of the Wilshire Chamber of Commerce, Director of the American Hotel Association, Southern California Hotel Association and California Hotel Association.

As you know, Ed was in the Class of 1928 and a member of Phi Gamma Delta. But also he was an Alpha Kappa Psi, Captain of the golf team and a varsity track letterman in 1927 and 1928. As an alumnus Ed has

been president of the Los Angeles Alumni Association and makes his Sheraton-Town House the headquarters for Oregon Alumni meetings (Latest was March 21). Regular Monday night gatherings are held at the Town House during football season to review films of the preceding week's Oregon football game.

Ed returns to the campus frequently and in 1949 brought Phil Harris to serve as emcee for an Oregon football rally for the Cotton Bowl team. In 1952 he returned with Joe E. Brown for another rally and in 1953 was the speaker for his class at their twenty-fifth reunion.

"Mr. Oregon," is a member of the Wilshire Country Club and is active in many golf events in Southern California. He was host to the Ryder Cup Golf team at the

Former Employer Conrad Hilton, and Ernest Henderson, president of Sheraton Corporation of America, are frequent visitors at the Town House.

No one needs an introduction to Ed's two cronies Dean Martin and Jerry Lewis who were snapped at the Town House pool.

Dr. Cary Middlecoff, Lindsay Crosby and Bing frequently join Ed on the course for a friendly round of golf.

Town House in 1955 prior to their leaving for Palm Springs and the International Matches. This year he was Co-Chairman with Dennis O'Keefe and Leo Durocher of the Los Angeles Open Pro-Celebrity tournament. Each year he pairs with Dr. Cary Middlecoff in the National Bing Crosby Pro-Amateur Tournament played at Pebble Beach. In 1953 they won the event and were runners-up in 1955 and tied for fourth in 1956.

Ed acquired his love for golf at the Eugene Country Club and made his first hole-in-one in 1927 while playing this course. He participates in the Swinergoo Tournament at Oklahoma and the Hillsdilly at Denver. Each year he spends two weeks with Bing Crosby at Bing's Hayden Lake, Idaho home where they fish and play golf.

In addition to his hotel duties in Los Angeles Ed is affiliated with Clint Murchison, the fabulous Texan, having been appointed President of the Balboa Bay Club and Director of the Del Mar Turf Club, both enterprises controlled by Murchison. Maybe you saw Ed's picture in *Sports Illustrated* some time back. He had bagged his first big game while hunting on Murchison's ranch in Mexico and has the picture to prove it.

Whenever you are in Los Angeles stop in for a stay with Ed at the Town House and tell them that "OLD OREGON" sent you.

Out of New England . . . a

From his Vermont farm, Robert Frost, dean of American poets, made his first trip into the Pacific Northwest for a three-day visit to the University of Oregon.

“Poetry’s always had a pretty hard time. Even Homer—the greatest of them all—was a beggar. You don’t go into it for popularity. If that’s what you want, you’d better write a novel.”

“Saying a poem in the morning is like having a drink for breakfast.”

“Philosophy is a sort of cleanser, having to do with the great God question. Not a feminine thing. That sounds anti-feminist doesn’t it? It’s not. I figure out that women have wisdom. Too much to be philosophers. You know the sort of wisdom that brings out ‘Everyone has to eat his peck of dirt.’”

“In New England when we drop a slice of bread, butter side down, we pick it up and eat it, saying ‘Everyone must eat his peck of dirt.’”

“Some sentences of poetry come out of much living, many days, much pleasure and pain.”

“My one wish as a teacher was to be able to lecture only about ten times a year. Never have to go to a class unless I had something special to report. If it’s not special to me, it’s not special to my students. It’s kind of a progressive education idea like no tears for the writer, no tears for the reader!”

“No one of my poems is more symbolic than the other. They’re all symbolic. I don’t know where the poems come from. They just sweep over me all of a sudden.”

“If you wait long enough you find things are back the way they used to be when you were young.”

“Anything that is true of men—take love or hate, sorrow or pain—is the same as it ever was.”

“My favorite tools are a scythe . . . a hoe . . . an axe . . . and

Poet

“a tennis racquet”

Some students were no doubt surprised when told that Robert Frost, whose poetry for several generations has found a treasured place in anthologies and textbooks along with Whittier, Longfellow, Browning and Kipling, would visit the University of Oregon. Perhaps they had assumed that he had long since departed with those poetic giants of the past.

But it was Robert Frost in the flesh who arrived on the Eugene campus in early April as a Failing Distinguished Lecturer. For three days the venerable San Francisco-born poet, who now calls Ripton, Vermont his home, strolled the campus, toured a Springfield sawmill, spoke to students at an informal coffee hour, submitted to a press conference, and gave a public lecture.

The latter filled the Erb Memorial Union ballroom to full seating capacity, with a fringe of scores of standees. For an hour and twenty minutes including a ten minute encore, the attentive crowd sat, and the standees stood, while the octogenarian poet recited some of the works that brought him four Pulitzer prizes and world acclaim, interspersed by thoughts on Douglas firs, women as philosophers (why there aren't any), the plight of poets, and other things that occurred to him as he talked.

Those who met and heard Robert Frost found him spry of limb for his 82 years, and possessing a glib tongue to match his

poetic pen. Backed by a rare philosophical wisdom, his mind brought forth simple, yet meaningful, reflections on the goings-on of the world around him—about nature, about education, and about people. This was his free verse, as he put it, which is “like playing tennis with the net down.”

Frost admitted that he never listed his occupation as that of a poet on his income tax returns, using teacher, farmer, or retired instead. (He quipped that one of his poet contemporaries put “Resigned — to everything.”) “I look upon ‘poet’ as a praise word,” he added, “which you don’t say about yourself.”

Frost said his favorite tools are a scythe, a hoe, an axe and a tennis racquet. He still works a quarter-acre vegetable garden on his Vermont farm, but admitted that his friends had recently encouraged a tapering off on the tennis court.

For Robert Frost, this was his first visit to the Pacific Northwest. Outwardly he appeared impressed with what he saw—the trees, the green mountains, and the rocky Oregon coast where he spent a night before entraining for his return to the East. Whether or not his impressions will serve to inspire a poem, a question he was asked frequently, remains to be seen. As Frost explained it, “I’ll wait to see if anything stays with me. I never stick to anything; I wait for things to stick to me.”

Walter A. Woodard Presents A Treasure

14th Century Manuscript given to

The University

In the interest of

Research, Scholarship

Achievement

By David Daugherty

Mr. Walter A. Woodard smilingly examines the book designated as Philipps MS 26092 which he has given to the university.

Approving smiles of Dr. David Dougherty, head of the Department of Foreign Languages; Dr. Carl Hintz, Librarian of the university library, Mr. Woodard, Mrs. Woodard and President O. Meredith Wilson indicate their pleasure in observing the book.

Intricate workmanship and detail are apparent in the view of Dr. Daugherty studying the manuscript.

Scholars wasted little time in obtaining a close look of the book and were quick to acknowledge their approval of the gift and to praise the generosity of Mr. Woodard in presenting this outstanding cultural object to the university.

SELDOM has the University received a gift of such intellectual significance as the 14th century manuscript of the Geste de Montglane. Walter A. Woodard of Cottage Grove presented the literary treasure to the University in a formal ceremony recently.

Designated as Phillipps MS 26092 because it was part of the collection of Sir Thomas Phillipps, the manuscript was located by two graduate students at Oregon in connection with preparing their master's thesis. Of twenty-four poems of the William cycle of Old French epics the Geste de Montglane had apparently been lost.

Completed in 1490, this manuscript is hand written in Old French with initials in gold and colors. It is an original work and is not a reproduction nor has it ever been fully edited and never printed. The Phillipps Collection had been purchased by William H. Robinson, Ltd., a rare book store in London. It had been inaccessible to scholars for study since 1886 and was only a small part of the 29,000 items in the Phillipps Collection and had not as yet been catalogued.

The Geste de Montglane is significant because it is of course very old original poetry

of historical importance and also because it is apparently the last of the twenty-four poems of the William cycle and was thought to be non-existent. Also it is important to the University of Oregon because the discovery was made by two persons associated with the University and indicates the caliber of the work being accomplished at Oregon.

Walter A. Woodard made it possible for the University to add this rare book to its growing library and to be able to point with pride to the cultural achievement of the University. We will be ever grateful to Mr. Woodard.

Coach Don Kirsch '43 starts his eighth season as head baseball coach. His Webfoots will be after their fourth consecutive championship.

Championships have almost become a very pleasant habit for Oregon's spring sports teams in the past few years of Northern Division competition, but it appears as though the Webfoots will have their hands full this spring repeating their successes.

Just for the record, Coach Don Kirsch's baseball team has won the Northern Division pennant for the last three years in a row and added one NCAA District 8 title for good measure. This string has run the overall Oregon total of baseball championships to 11 since the league was organized 23 seasons ago.

In track, Coach Bill Bowerman's Webfoots are after their third successive championship in both the dual and conference meet competition. Since Bowerman came here from Medford for the 1949 season the

Ducks have won 23 and lost five in dual meet competition and have won three titles in the division meet, finished second twice and third two times.

The Ducks would like also to duplicate their brilliant showing in the 1955 NCAA championships when they were fourth in the final standings by a margin of a single point and became one of the very few schools which have ever produced the mile and two-mile individual champion in the same season.

The golfers are also after another in a long string of dual meet championships under Coach Sid Milligan and can point to one of the league's best all-time records.

The competition will be rugged in all three sports where Oregon has excelled in recent years with Washington and Washington State as the prime threats in track,

Spring Sports

Coach Kirsch still smiles despite graduation losses

the Cougars and Oregon State as the chief stumbling blocks in baseball and Washington as the chief foe in golf.

Coach Kirsch lost nine of the lettermen who played a major role in the winning of three championships in a row and this list included all-coast George Shaw in the outfield and Pete Williams at third base. All-Northern Division Neal Marlett catching, Jim Johnson at second base, Norm Forbes in the outfield and other regulars who included Bob Wagner and Bernie Averill in the outfield and pitchers Bill Blodgett and Bill Gerner.

The club is being rebuilt around Capt. John Keller, a two-time all-conference shortstop, Terry Maddox, the most valuable player last year as a sophomore and an unbeaten pitcher in conference play, and two second-team all-league players, Dick Schlosstein at first base and Jerry Ross in the outfield.

Improved pitching may be the answer to many of Oregon's problems as Stan Dmochowsky, a regular in 1953 before he entered the service, comes back to join Maddox as the two veterans available for pitching assignments.

Top sophomores, however, are the real bright spots as Jack Henkel and Ron Whittaker of Eugene, Don Lane of Modesto, Calif., Don Delbon of San Francisco, and John McCall join the staff. Coach Kirsch also has some non-letterman holdovers in Jim Lehl, Ev Stiles and John Nance who may help the mound staff.

John Lundell, the basketball guard, Jim Pifher, a fine sophomore from Baker and Dale Dickey, another Eugene sophomore, will battle it out for second base while Ken Bond of Baker appears to be the leading candidate for the third base spot left open by the loss of Williams. Schlosstein and Keller will complete what appears to be a solid infield.

JERRY ROSS

DICK SCHLOSSTEIN

JOHN KELLER

TERRY MADDOX

Champions

Bill Bowerman times them low for a high mark

Ross is the leading outfielder and he steps into center field for Shaw and rookies will take over in both right and left fields. Jim Pingree, a reserve last season, will be one of the top men while Maddox can also play in right field when he is not pitching.

The top rookie outfielders include Ron Creps of Banks, Leroy Phelps, the football halfback, George Simpson, Fred Bell and Jerry Urness. All are sophomores.

The catching job is a battle between Tom Bowen, a non-letterman from Eugene and John Eskildson of Portland. The success of these two may do much to determine the drive to win the fourth penant in a row.

This is an Olympic year in track and the Ducks are likely to figure heavily in the national picture. Bill Dellinger, the Springfield senior with the great talent for distance running, and Jim Bailey, the Australian junior who teams with Dellinger to give the Ducks one of the great distance pairs in American collegiate track history, are certain to be the center of attention.

The team most certainly will not be a two-man affair as sophomore Jack Morris and Jack Brown in the sprints, veterans Gordon Dalquist, Dave Talbot and Arden Christensen in the middle distances, broad-jumpers Martin Pedigo (sixth in the NCAA as a sophomore), Denny George, Don McClure and Sam Taylor, Doug Basham in the high hurdles and Morris in the low hurdles, Ed Bingham in the javelin, Jack Moad in the shot put and Paul Tucharadt in the discus give the Webfoots ample first place potential in the coming dual meets.

Dellinger will be aiming for a spot on the U. S. Olympic Games squad and Coach Bowerman's plan early in the season is for the Springfield Flier to aim at the 5,000 meter race in the trials. This race is slightly more than three miles and to get ready for his effort Dellinger will run fewer mile and more two-mile races this season.

Bill Bowerman returned from Pakistan to find his track squad in condition to repeat its dual meet and northern division championship of the past two years.

Bailey, of course, will run for the Australian team if he is chosen and he has high hopes of being picked as a 1500-meter runner. He is the defending division and PCC 880-yard champion as well as the NCAA mile champion, but his efforts will probably be concentrated in the mile races this spring.

Morris, who ranked as one of the world's 15 best low hurdlers last year as a freshman, has run well in early meets in both the 100-yard dash and the low hurdles.

Pedigo, who lost some time early in the year with a pulled leg muscle, leads one of the strongest broad jump entries the Ducks have fielded in many years. Pedigo, George, the sophomore from Eugene, McClure and Taylor, a sophomore from Ontario, are all capable of bettering 23 feet and threatening to get over 24 feet, a mark Pedigo hit last year.

Dalquist, a versatile senior from Eugene, will play an important role in the 1956 plans as he switches back and forth between the 440, and the 880-yard run.

Christensen and Talbot are both vastly improved quarter milers and also can be used in the 220-yard dash and the relay. Basham, a junior, has made vast improvement in the high hurdles and teamed with Morris in the lows give the Ducks one of their better hurdles teams of recent years.

Moad, who is coming back after a bout with polio, Bingham, a 210-foot javelin thrower as a sophomore, and Tucharadt, a basketball player turned discus thrower, help to make up for the depth weakness the Ducks feel in the field events. The same is true of Bob Reid, a veteran who sprained his ankle early in the season, and Sam Whitney, a sophomore, in the pole vault.

JIM BAILEY

Why I earnestly recommend a career in life insurance

*(Some questions answered by
a New England Life Agent)*

BILL GRISWOLD, college graduate in '48, was New England Life's 1954 *Rookie of the Year*, and had an even bigger year in '55. Read why he calls his work, "as satisfying a livelihood and vocation as could ever be desired."

What do you like best about the life insurance business?

"The fact that I'm a professional man, I'm my own boss, and there's no limit on my income. I'd had good jobs, from the laundry business to managing a theater, but none of them offered me half the opportunities I've found in life insurance."

How did you learn to sell life insurance?

"New England Life gives a new agent comprehensive training in his general agency and at the home office. In addition, he gets skillful field supervision. And he is urged

to continue his insurance education through advanced courses and special seminars."

How about earnings?

"New England Life gives each new agent a generous training allowance. With some good breaks, I earned a five figure income in my first year. I'm now in my third year. My income has steadily increased, and I take a lot of satisfaction in serving a fine clientele."

Let us tell you more about the advantages of a career with New England Life. Write Vice President L. M. Huppeler, 501 Boylston Street, Boston 17, Massachusetts.

A BETTER LIFE FOR YOU

Some of our most successful agents have technical backgrounds.*

Les Anderson guided many an alumni tour and meeting on the campus in the ten years he served as Alumni Director.

Les had a ready smile for everyone and enthusiasm to match.

Les Anderson Resigns

The University
and its alumni
will miss his
dedicated effort

At five o'clock Thursday afternoon May 31, 1956, Les Anderson '43 will close his desk at the University for the last time. He will be concluding a most vital and active ten year career as a member of the staff of the University.

It all started with his graduation in 1946 and his subsequent appointment as first alumni secretary. Later he was named alumni director and continued in that capacity until September of 1953 when he was appointed administrative assistant to Dean Victor P. Morris, who was acting president of the University at the time. President Wilson appointed Les Director of Public Services in 1954.

Les came to Oregon from Portland's Jefferson High school. He was A.S.U.O. president during the school year 1942-43 and served 31 months in the infantry. He finished his college training at Oregon after the war. During his University days Les was president of the freshman class, a member of the rally squad, a founder of Druids, the junior men's honorary, a member of Friars and president of his fraternity, Delta Upsilon.

Few persons are as widely acquainted with alumni of Oregon as Les and few have been as devoted to the betterment of the

University as he. President Wilson praised Les highly when he said, "His qualifications were so genuine and so personalized that, to fill his place we will have to alter the nature of the job.

"The University will miss him. I will miss him personally. But everyone wishes him well. Our sorrow at his leaving is qualified by the pleasure we take in his new opportunity."

Les' new position will be with Lumberman's Buying Service in Eugene so we do not lose him entirely. We will nevertheless miss his constant counsel and willingness to do that which is necessary to make his Oregon a truly fine institution.

THE CORPORATE ALUMNUS PROGRAM'S FIRST YEAR

THE Corporate Alumnus Program was begun as an experiment, to supplement—not to supplant—General Electric's overall program of assistance to students and to schools and colleges.

Principal objective was the further encouragement and support of the colleges and universities from which General Electric employees received their higher education. The Plan, briefly, was the Educational and Charitable Fund's decision to match gifts up to \$1,000 of individual G-E employees to the accredited colleges and universities from which they held degrees.

WEIGHING THE RESULTS

Following are the four original objectives, and, after each, a statement of attainment, the realization of which contributed to the decision to continue the Plan, with liberalized provisions, in 1956:

OBJECTIVE—To provide incentive for substantial and regular contributions by the employees who directly benefit by the education.

ATTAINMENT—Eligible employees, under the Plan, increased their average gifts from slightly under \$20 to \$39.18.

OBJECTIVE—To recognize the joint benefits of education to employer and employee by matching contributions up to \$1,000 during the year.

ATTAINMENT—Approximately 5,100 employees made gifts to 359 colleges in amounts totaling

\$200,000. The essentially unrestricted amount, matched by the Fund, is equivalent to the average earnings on about \$4,000,000 in endowment.

OBJECTIVE—To stimulate colleges to more active solicitation of alumni support.

ATTAINMENT—College administrators report special alumni-fund activities, stimulated by the Program and the publicity it produced, have resulted in substantial increases in alumni giving.

OBJECTIVE—To provide a pattern of corporate support which might be followed by other companies.

ATTAINMENT—At least 12 gift-matching programs have been established by other companies, all incorporating some elements of the Corporate Alumnus Program.

QUID PRO QUO

The Corporate Alumnus Program has its basis in the concept of something received for something given. Still in an evolutionary stage, it recognizes the rapid growth of corporate requirements for college-trained people and the simultaneous enlargements of the colleges' needs for funds—operating funds as well as capital. It is simply giving substance to a belief that our common progress can accelerate to meet a growing need if the beneficiaries—whether individual or company, or both—recognize a debt and do something about it in proportion to value received.

If you or your company are interested in a more complete report of the first year's results of the Corporate Alumnus Program, write for a copy to Educational Relations, General Electric Company, Schenectady, N. Y.

Progress Is Our Most Important Product

GENERAL  ELECTRIC

Spring Sports

(Continued from page 13)

The Ducks have excellent first place strength, but the lack of overall depth may hurt when the second and third place points are counted.

In golf there is a dog fight for positions on the teams as lettermen Bob Norquist, Barry Ott, Don Bick and Howard Zenger face a stiff challenge from a fine group of rookies. Art Abrahamson joins the team from Everett JC. Bob Prall of Salem is one of the finest sophomores in several years. Art Fujita of Hawaii shows that he is a strong contender, and Mike Starling and Chuck Huggins also have made serious bids for berths on the team.

Airborne Hero

First Lieutenant Paul E. Lasker '54 received a decoration for saving the life of a fellow paratrooper during a training jump at Fort Bragg, North Carolina, recently. As Lt. Lasker jumped and received the opening shock of his parachute, the other man whose chute had not deployed properly hurtled through Lt. Lasker's suspension lines. Paul made a grab for the falling man's chute and held on despite severe burns and lacerations of his hands and forearms. He held the lines until both he and his fellow paratrooper were safely on the ground even though his rate of descent was dangerously increased.

Lt. Lasker was cited for his alertness and courage in preventing the helpless trooper from plunging to his death. He had received his parachutist's Wings from the 82nd Airborne Infantry Regiment.

Oregana Out Soon

The 1956 *Oregana*, under the capable leadership of its Editor Sue French, and its Business Manager Don Peck, is new and different in many ways this year. For the first time in several years, copy describing each living organization is being included. This feature will greatly increase campus knowledge of the 64 different fraternities, sororities, dormitories, and co-ops that house the University students.

Other new features include tasteful variations in art work and art photography. A style containing the modern influence combined with the old fashioned has set the 1956 *Oregana* apart from its predecessors. It is a style that the campus actives and the alumni who read the book will certainly enjoy. The *Oregana* has gathered, unscrambled, and edited the story of 1956 in such a way that those who lived 1956 on the Oregon campus will be able, in the years to come, to re-live the many wonderful memories that they helped to make.

April-May 1956

New Hospital Opens in Portland

(Continued from page 5)

and art of medicine. Instructional programs are maintained for under-graduate students and graduate students in clinical and basic sciences. Enrollment of medical students is about 300 annually; only those students who have demonstrated their capacity to carry on the quality of work required by the institution are admitted. Applications are received from all sections of the United States, but preference is given to Oregon and Pacific Northwest residents.

The Nursing School is an important part of the Medical School. It is organized on a collegiate basis and work leads to the bachelor of science degree in addition to receiving certification as a registered nurse. Enrollment in the Nursing School approaches 400 students.

In addition to educating future doctors and nurses, the Medical School also offers courses in medical technology, X-ray technique, and a program for student dietitians. Of tremendous importance to doctors throughout the Northwest are the post-graduate programs offered by the University of Oregon Medical School each year. The school's faculty—supplemented by guests lecturers—presents 10 to 15 post-graduate courses annually to some 400 to 500 physicians.

Full-time and part-time faculty members at the Medical School number nearly 100, with some 400 physicians from Portland and neighboring areas contributing voluntarily a great amount of time to the School's instructional and research programs.

An equally important phase in the Medical School's programs is research. Investigations to determine the causes and prevention of disease are being conducted in practically every department of the School, and some 80 separate research proj-

Wilson Heads Crusade

Students at the University are far removed, geographically speaking, from European countries which are the subject of the Crusade for Freedom. Support of Radio Free Europe and Free Europe Press is the purpose of the Student Senate of the University in deciding to adopt a Crusade for Freedom program on the campus. President O. Meredith Wilson is Higher Education Chairman for the Crusade for Freedom in the State of Oregon.

Only eighteen colleges in the nation are undertaking a Crusade program and only four on the entire west coast. College students are considered admirably well qualified to understand the potential of the Crusade for Freedom. Our students have adopted an educational, social, publicity

One of Governor Elmo Smith's first official functions as governor was to take part in the dedication of the new teaching hospital at the Medical School.

ects are under way at the present time. The achievements of many faculty and staff members have brought national recognition to these individuals and to the University of Oregon Medical School. Most of this research is supported by gifts and grants from interested individuals, foundations and other agencies. In the year 1954-1955, \$513,996 in gifts and grants was made available to the school for research purposes.

The Medical School also contributes a great public service to the citizens of the State of Oregon by assisting in the care of those people receiving treatment in its hospitals and clinics. With the completion of the Medical School Hospital, a total of 755 beds will be available on the campus for patient care. The clinics at the Medical School record about 120,000 out-patient visits a year.

and fund raising activity into their project. Panel discussions, and visits to each living organization are means of promoting the campaign on the campus.

Proceeds from the fund raising drive will be used to support the radio monitoring activity in Europe which maintains a constant vigil on 45 communist radio stations and which also operates 29 radio transmitters for direct broadcasts to the freedom hungry European people. Publications and leaflets are dropped on the areas behind the iron curtain; one month as many as 26,000,000 were released.

The students on the campus have recognized the importance of such a program and are hopeful that alumni will join them in support of this important freedom project.

Class Reunion Weekend

June 8, 9, 10

Class Reunions are for every class every year but this year they are especially planned for the classes:

1931 **Twenty-fifth reunion**

1926 **Thirtieth reunion**

1921 **Thirty-fifth reunion**

1916 **Fortieth reunion**

1911 **Forty-fifth reunion**

1906 **Fiftieth reunion**

Half Century Club every year

Registration all day Friday and Saturday in the ERB MEMORIAL UNION. Individual class meetings Friday night and Saturday morning. General Reunion lunch Saturday in the Erb Memorial Union. Class dinners for each group Saturday night.

Watch for the announcement of your own class reunion.

Gilbert Beattie

Eighty two years of experience on this old earth have stored a vast number of memories in the mind of W. Gilbert Beattie '01. Recently he published a book, "Marsden of Alaska," which is the result of some of his memories and also of a couple of years of research.

Edward Marsden was an Alaskan Indian who rose to a position of eminence among distinguished world figures of his generation. Mr. Beattie's friendship with Marsden began when Beattie was a teacher and superintendent of the Sitka Training school. He spent fifteen years in educational work in Alaska and two years ago returned after a forty-six year absence. It was at this time that he became interested in doing some work on a book about Marsden and for the next two years traveled very extensively gathering information about Marsden. This new biography is the result of his research.

Leader Gone

Clay Baxter '34 died in Eugene March 27th following a short illness. Clay was born in Creswell, attended Eugene grade and high schools and then the University of Oregon. He was a member of Phi Gamma Delta.

Although only 44 years of age Clay had spent almost thirty years in the clothing store where he was a partner with Irv Henning. He had started as a stock boy when the store was known as DeNeffe's. He worked there through his high school and college days and returned there after the war. At that time Morrison-Henning were owners of the business and in 1948 Clay succeeded Mr. Morrison as partner with Mr. Henning. There is little doubt that Clay was acquainted with more students at Oregon than any other one person in the community. He was a friend to all and counselor to many. Few, if any, men who attended Oregon could say that they had spent four years in Eugene without purchasing at least one item of clothing under his considerate guidance.

Serving as a combat infantryman during World War II. Clay sustained severe wounds and in recent months he was subjected to the recurrence of the consequences of the injuries.

Clay was an outstanding example of the type of person who without effort or intent seems to step from the ranks of the average citizen to a position of great importance, leadership and respect in the community. He was a member of the Rotary Club, the Eugene Country Club and one of the key figures in the campaign to build a new YMCA in Eugene. Few have equaled his interest and support in Oregon athletics and other programs.

Survivors include his widow, the former Virginia Wheeler, sons, James and Clay (Buddy); a sister, Mrs. J. Don Lawson, and a nephew, Clayton, all of Eugene.

Portland Institute

Harold Cake '18 as usual left no detail unattended as he prepared for the eighth annual Portland Alumni Institute. This March 10th meeting was held at the Congress Hotel and more than eighty alumni were in attendance. Dean of Administration Dr. W. C. Jones was moderator of the day. Dean Sidney Little of the School of Architecture and Allied Arts, Dean Paul Jacobson of the School of Education, Dr. Vergil Dykstra of the Philosophy Department, Dr. Ray Hawk, Dean of Men and Mr. Jim Bailey, student athlete from Australia were the University's representatives at the Institute.

It was a fine program and was somewhat different from previous Institutes in that

Faculty Alumni Tours will appear in the following areas on the dates listed below.

April 25 Klamath Falls

April 26 Lakeview

Make checks payable to Oregon Alumni Association

Portland Alumni gather at the Congress Hotel in Portland March 10 to attend the eighth annual Portland Alumni Institute. Harold Cake '18 was chairman of the meeting and Dean William C. Jones from the University was moderator.

Don Chapman '37 had arranged a very effective question and answer period. Following each speaker there was a three-minute period in which each of ten groups of alumni huddled to prepare one question for the previous speaker. At the conclusion of the session the questions were presented to the speakers for their response. It was a very effective means of encouraging audience participation and obtaining answers to their questions.

Bill Bradshaw '44, Bill Macy '43 and Bill Lilly '44 and Jean Hutchinson '38 were the working committee for the Institute. We hope that next year many others will attend the Institute to more adequately justify the efforts of these workers.

Dr. E. F. Madden '31 represented the University at the inauguration of the U. of Hawaii's president.

Roseburg Night

Postal authorities were the main topic of discussion at the time the Faculty Tour was in Roseburg. Announcements of the meeting date had been mailed from Eugene February 23rd but were not delivered until March 7th. This was only thirteen days after they were mailed but the real bad part was that this was also the date of the meeting. Many alumni were unable to make arrangements to be present on such short notice so we must return to Roseburg to allow many others to join with us in a very informal evening. "Dud" Walton '46 was chairman of the evening and has promised that all will be better next trip. We have a hunch that "Dud" will personally see to it that every notice is delivered or that Uncle Sam has a good explanation.

Longview Fog

Don Edwards '46 arranged for a fine meeting place and dinner in Longview February 9th but the weather man interceded and blanketed the area with such a solid fog that no self-respecting mole would have ventured out. And they didn't. We won't mention the attendance but we will mention that we intend to return next year with a faculty team that will bring a real story of Oregon to our cross river alumni in the Planned City.

Oregon Represented

Dr. Edmund F. Madden '31 represented President O. Meredith Wilson as Oregon's ambassador at the University of Hawaii recently. Dr. Madden presented Dr. Paul S. Bachman with the University of Oregon's Certificate of Congratulations on the occasion of Dr. Bachman's inauguration as President of the University of Hawaii.

Seattle Safari

Friday afternoon February 11th was Oregon Day in Seattle. The Washington Athletic Club was the scene of the gathering and about thirty-five persons were on hand to relearn some facts to which they had been exposed some years ago. Dr. James H. Gilbert, Professor Emeritus of Economics was his usual succinct self. Wittily and twinkly he revealed an intimate knowledge of the history of the University of Oregon, told from a wealth of first hand observations. It is hard to realize that one so vital and enthusiastic as Dr. Gilbert could have spent fifty-seven years on the campus. No one has a more crisp memory or a more delightful manner when talking about Oregon.

Dr. John H. McCloskey of the English Department and Dr. Bernd Craseman held their classroom sessions during the afternoon. Dr. McCloskey introduced many of us to an author whose name was perhaps new but whose books, at least "The Red Badge of Courage," are well known. We noted many "students" jotting down the titles of the books and perhaps they have done as we have and have read others of the Stephen Crane books. Dr. Craseman had everyone a little confused with his technical side of Physics until he brought it right down to our level with a very simple explanation of the everyday application of Physics.

Leo Harris, Director of Athletics, participated in the after social hour and after dinner session and then Dr. O. M. Wilson, was our featured speaker. President Wilson told of the acquisition of the 15th Century Manuscript by the University and the significance of such a gift.

Some left the meeting to watch our Ducks play the Huskies, a basketball game, but the rest of us stayed in the room for a long visit and to watch the game on TV. Forest Watson '20 was the chairman of the event and was ably assisted by Jim Benham '45 and others.

Los Angeles

Jack Michel '47 and Tom Hazzard '48 combined their efforts to arrange an alumni meeting in the Town House in Los Angeles March 21st. A social hour preceded a buffet dinner (Ed Crowley's best) and later Johnny McKay, Dr. Ramon Ruiz, Dean Sidney Little of the School of Architecture and Allied Arts and Mr. George Hopkins took the spotlight.

The Doug Farrells were on hand to extend their usual suntanned Los Angeles welcome and with many others enjoyed a very informal evening. Arthur Patch McKinlay '93 was there too, as we knew he would be. None are more faithful nor more interested in Oregon.

Everyone was interested in learning of the anticipated expansion of the campus in the coming years. Oregon is really growing.

Jack Michel '47 with Doug and Mrs. Farrell, were on hand for the Faculty-Alumni meeting at the Town House in Los Angeles.

All three Fletchers were on hand in San Diego for the Alumni meeting at the Lafayette Hotel.

With the growth come other problems such as class enrollment limitations, methods of teaching larger groups and of course the ever present problem of faculty procurement. It is impossible to cover all this subject matter in one evening but at least the most important points were reviewed.

Next year we will have another faculty team on the California circuit but in the fall we will have our usual gathering before the UCLA game.

United Air Lines

Bill Harrow '40 advises us that R. L. Mangold '40 has been named manager of cargo sales for United Airlines and will be in the company executive offices in Chicago. Robley will be responsible for directing the company's air mail, express and freight sales merchandising program. He joined

United's cargo department in 1942 in Portland. In 1945 he transferred to New York to assume the post of air cargo manager in that area. He was promoted to manager of air freight sales in 1946 and assumed his most recent position as superintendent of cargo sales in 1954.

After a Long Winter

After a long rainy winter in Eugene and a long absence from San Diego another Faculty Tour headed south during Spring Vacation. "Bud" Vandeneinde '44 chaired the alumni meetings at the Lafayette Hotel, San Diego, Tuesday, March 20th. Willis '29, Steve '32, and Ferd '33, all Fletchers, were anxious to get a real Oregon group organized. Ray Fox '20 and City Attorney J. F. DuPaul '24 are ready to help as is Jerry Crarz '26. It was a start on the renewal of a real Oregon Alumni activity.

Dean Sidney Little of the School of Architecture and Allied Arts, with the aid of a map, outlined the anticipated growth of the campus during the next ten years and it is quite amazing to say the least. Mr. George Hopkins reduced a one term course in music to twenty-five minutes and bounced us all from our seats with his performance of the modernistic composition, "Creole." Dr. Ramon Ruiz of the History Department perhaps answered some questions in the minds of many persons when he discussed his idea of the direction that the University of Oregon should take in answering the need of educating the great mass of students who are rapidly approaching college age. John McKay '50 our assistant football coach, completed the program. John was especially pleased to see Dr. Dan Garza, his former Cotton Bowl game teammate who is now a dentist in the Navy stationed in San Diego prior to his transfer to Guam.

April-May 1956

Holiday's Memorable May Issue!

WASHINGTON, D. C., by Roger Angell. A tourist's delight but a puzzle to its residents. Here is a sensitive 10-page report on our young, self-conscious capital, plus a two-page map in color showing points of interest.

Doctor of Education PAA Co-Pilot

Financing of public education as viewed by community organizations was the subject of the final dissertation of John William Dunn '41 in gaining his degree of Doctor of Education. Dr. Dunn has been assistant superintendent of Palomar Junior college since 1952 and has attended the University of Southern California during that same period.

A native of Halfway, Oregon, he has been an elementary teacher and principal in Stanfield and Baker and also spent four years in the Navy. For two years he was supervisor of instruction at Oregon Technical Institute and for three years was a student advisor at Portland State.

Infantry Graduate

From now on it is 2nd Lt. Martin Cecil Hodges '55. "Cece" was recently graduated from the Infantry School's basic officers course at Fort Benning, Georgia. He will be conspicuous by his absence from the Eugene Emeralds baseball training room this season. Last year "Cece" was the team trainer and a good one. We hope that he will return to his Eugene home after his enlistment in the Army is completed.

Dr. A. L. Strand, President of Oregon State College furnished us with the picture and report of Stan Johnson '41. Stan was co-pilot of the Pan-American World Airways plane on which Dr. Strand was a passenger. They traveled together from Manila to Hong Kong. Dr. Strand indicated that he was acting as a special correspondent for all Oregon institutions—without portfolio of course.

Lesser Promoted

Saal D. Lesser '49 is now assistant director of the Commission on Community Organizations of the National Conference of Christians and Jews. Saal will be working with director Louis A. Radelet to obtain the cooperation of civic, fraternal, labor, veteran and other groups in building good will and understanding among the nation's racial and religious groups.

After receiving his B.A. in Psychology at Oregon Saal was awarded his M.A. in Human Relations Education in 1953 at New York University. He has been associated with the B'nai B'rith since 1949 and most recently was its Assistant Educational Director.

MORE THAN
\$22,000 for YOU

AT AGE 65

ONE OF THE MOST FAR-SIGHTED PLANS ever devised for the wise use of savings is offered for your earnest consideration by the SUN LIFE ASSURANCE COMPANY OF CANADA, a leading world organization in its field, with branches from coast to coast throughout North America. By means of the plan, regular amounts of savings can be applied to provide, at age 65, a lump sum of more than \$22,000 *plus accumulated dividends...*

or AN INCOME OF
\$150 Monthly

FOR LIFE according to your choice.

IF YOU DO NOT LIVE TO AGE 65, THEN AN AMOUNT OF AT LEAST \$22,000 WILL BECOME IMMEDIATELY PAYABLE TO YOUR FAMILY OR YOUR ESTATE

By the way, the plan can be easily tailored to the amount of regular savings you can afford, with corresponding adjustments in the sums payable.

Details are yours without obligation by just mailing the coupon below.

SUN LIFE ASSURANCE COMPANY OF CANADA

Box 5102, Southfield Stn., Detroit 35, Michigan or P.O. Box 2106, San Francisco 26, Calif.

"PEOPLE are the Greatest Invention Yet"

Visitor to Telephone Company exhibit says: "The man of the house came out with a new reverence for engineering. I came out with a new reverence for people."

"We went to the Telephone Company's Open House," writes Evadne Scott Beebe in the *Zion-Benton News*, "and saw the electronic brain playing tick-tack-toe."

"My husband was enthralled with the performance but I was watching the deft, well-groomed hands of the woman displaying the machine. She wore a wedding ring and I wondered about her home and family."

"After we listened to her little speech we went to a man in a brown business suit who told us how telephone bills are made out. Then a

INTERESTED VISITORS—Pat Haan, a telephone accounting clerk, explains billing machine to Mrs. Beebe and her husband. "I was so impressed with everything I saw," says Mrs. Beebe, "that I went right home and wrote a piece for our local newspaper." It's so human and friendly that we are reprinting it here.

clear-eyed young woman operated the machine for us. To be sure, it was an amazing gimmick, but not nearly so attractive as the girl who handled it so well.

"Outside we stopped by a truck with an 'earth auger' and other modern attachments. Explaining their uses was a big, jovial lineman.

"While we listened to an account of how fast the auger could dig a hole, I was looking at the man and thinking that here was the typical lineman, strong, alert, capable and kindly, a person who, in times of disaster, becomes a kind of unsung hero.

"My husband said, 'This is what I want to see,' as we went into the equipment building. Here we saw switches and relays, ringing machines, countless colored wires in patterns like quilt

blocks, and listened to technical explanations.

"That is, my husband listened. I watched the men as they talked so intelligently and wondered where they live, who cooks their meals and irons their shirts, what their problems are, and if they were ever in love."

EVADNE SCOTT BEEBE,
Zion-Benton (Ill.) News

There is, indeed, a lot of wonderful equipment in telephone service. But it takes more than 740,000 Bell System men and women to bring it into being and make it work. And because more people are making more use of their telephones, the number of employees is growing all the time.

"People," as Mrs. Beebe points out, "are the greatest invention yet" in the telephone business.

MANY OTHER EXHIBITS. In addition to Open Houses at telephone companies, there are many other occasions and places where the story of the telephone is brought to you. These include fairs, lectures, moving pictures and traveling exhibits. Everyone is welcome. Bring the children, too.

Necrology

Charles E. Wagner '01, died on January 10, 1956. He came to the University from Ashland, Oregon, and majored in Electrical Engineering. On graduation he was employed by the Portland Railway Light & Power company and remained with that company until his retirement some years ago.

Mr. Wagner joined the Oregon football squad and became one of the famous centers of that day. He also represented the University of Oregon in track activities.

James T. Landye '32, past president of the

Multnomah Bar association, past member of the board of governors of Oregon state bar, and one of the outstanding labor lawyers of the Pacific coast, died January 24, 1955. He was stricken by a severe heart attack and was rushed to a hospital, where he died.

He was one of six charter members of the National Association of Claimants' Compensation attorneys and was one of its first national presidents.

He was associated since 1953 with **Wesley A. Franklin** and **Ben Anderson** in the law firm of Anderson, Franklin & Landye in the American Bank building.

In addition to his membership in the state and county bars, he was a member of the American Bar association, of Phi Delta Phi, legal fraternity, of the Multnomah Athletic club, the Foreign Relations council, and the Unitarian church.

Mr. Landye was born in Swansea, Wales, March 11, 1910, and was brought to Canada by an older sister when he was 3 months old. He came to Portland when he was 13, attended Jefferson high school, Oregon State college, and the University of Oregon. He was admitted to the Oregon bar in 1935 and practiced in San Francisco from 1935 to 1938, when he returned to Portland.

Survivors include his widow, three children, and two sisters.

Mrs. Nancy Ogle (**Nancy Ann Hall**) '53, died on December 17, 1955, of a brain hemorrhage. She is survived by her husband **Robert Ogle** and her 5-months-old son **Robert**.

Mrs. Ogle was a member of Alpha Gamma Delta sorority.
