NASA DECLARES CARBON DIOXIDE IS GREENING THE EARTH... REVEALS HOW GREEN NEW DEATH IS A DEATH CULT THAT WOULD COLLAPSE GLOBAL ECOLOGY

Some regions experiencing over a 50% increase in plant life

Mike Adams | [NaturalNews.com](https://www.naturalnews.com) - APRIL 26, 2019 55 Comments

In direct contradiction to the scare stories about carbon dioxide being relentlessly pushed by the [climate change alarmists](#), a scientific study published in *Nature Climate Change* and highlighted by NASA reveals that rising carbon dioxide levels are having a tremendously positive impact on the re-greening of planet Earth over the last three decades, with some regions experiencing over a 50% increase in plant life.

The study, entitled, “[Greening of the Earth and its drivers](#),” used satellite data to track and map the expansion of green plant growth across the globe from 1982 – 2015. Published in 2016, this study found that rising atmospheric carbon dioxide causes “fertilization” of plant life, resulting in a remarkable acceleration of increased “greening” across every Earth continent. As the study abstract explains:

In truth, rising levels of carbon dioxide will cause the following beneficial effects on Earth:

- Reforestation due to Earth moving toward a warmer, wetter, more greenhouse-like environment
- Acceleration of food production among food crops
- An increase in the biodiversity of rainforests
- Increased rainfall across Earth's continents
- The transformation of deserts into usable plains for grazing and agriculture
- The acceleration of the greening of the planet, which is already far greener than it was 50 years ago

There are virtually no Democrats who recognize that carbon dioxide is the “miracle molecule” for plant life. “Green New Deal” proponents like [Alexandria Ocasio-Cortez](#) — who is scientifically and economically illiterate — think that carbon dioxide must be eliminated in order to save the planet. In fact, she warns that Earth only has 12 years to go before all life ceases to exist unless humans stop burning fossil fuels.

Not surprisingly, she has it all wrong: It's the burning of fossil fuels that's releasing beneficial CO₂ into the atmosphere, causing the global greening that NASA has already confirmed (see above). If humans stop burning fossil fuels, the result would decrease atmospheric CO₂, resulting in **plants starving to death** from lack of CO₂.

This would, of course, lead to the mass global die-off of trees, grasslands, food crops and rainforests. The “Green New Deal,” in other words, would actually result in the mass killing of plant life across the entire planet. If the world were to follow the demands of Ocasio-Cortez, the world's ecosystems would collapse, resulting in mass death of plants, animals and humans.

Photosynthesis

When you get hungry, you might decide to raid the cookie jar or ask your mom to make you a sandwich. You do this because humans and animals get energy from the foods they eat.

Plants use light energy from the sun to produce the food they need to survive. This process is called photosynthesis.

INGREDIENTS

Light energy
Rays from the sun

Water
Gathered by plant's roots in the soil

Carbon dioxide
From the air

Chlorophyll
Present in cells of green plants

1 SUNLIGHT

Light shining down from the sun is absorbed by the plant's cells. These tiny cells are what make up the plant and its leaves.

Sunlight

4 END RESULT

The oxygen which is left from the transformation is released back into the air. The sugar created by

THE GREEN NEW DEAL IS A “DEATH CULT”

It turns out that climate change alarmists, by vilifying CO₂, are demanding actions that would make the planet *less* green by killing plants everywhere. Instead of a warm, wet planet with abundant rainfall and rainforests, Democrat seem to want a **cold, dead world that's devoid of plant life.**

As any competent scientist would openly admit, the elimination of CO₂ from the atmosphere would collapse the global ecosystem, leading to the complete wipe out of nearly all plants, animals and humans. Those who are calling for the elimination of CO₂ are, as I have previously warned, actually advocating the *terraforming of planet Earth* into a post-human, post-life status that would collapse human civilization and annihilate nearly all food webs around the world.

As reported by Natural News, [AOC's “Green New Deal” seeks to eliminate the very molecule that turns planets green: Carbon dioxide, the molecule of life.](#)

Green leaves use energy from sunlight through photosynthesis to chemically combine carbon dioxide drawn in from the air with water and nutrients tapped from the ground to produce sugars, which are the main source of food, fiber and fuel for life on Earth. Studies have shown that increased concentrations of carbon dioxide increase photosynthesis, spurring plant growth.

Results showed that carbon dioxide fertilization explains 70 percent of the greening effect, said co-author Ranga Myneni, a professor in the Department of Earth and Environment at Boston University.

NASA even released a YouTube video that almost exactly mirrors the message Natural News has been advocating for years. The video is entitled, “Rising CO2 levels greening Earth”:

Rising CO2 Levels Greening Earth

WHY THE GREEN NEW DEAL WOULD KILL THE GREENING OF THE EARTH

In direct contradiction to the real science on the greening benefits of carbon dioxide, Democrats routinely and mindlessly claim that carbon dioxide is a poisonous “pollutant” that will destroy the world. The anti-knowledge of lunatic Democrats demonstrates the extreme dangers of those who are scientifically illiterate yet spout “science” as their justification for demanding radical interventions in atmospheric chemistry.

We show a persistent and widespread increase of growing season integrated LAI (greening) over 25% to 50% of the global vegetated area... Factorial simulations with multiple global ecosystem models suggest that CO₂ fertilization effects explain 70% of the observed greening trend...

In other words, **the planet is getting greener**, and we have rising CO₂ levels to thank for it, since rising CO₂ accounts for about 70% of the increase in planet-wide greening, according to scientists. The more CO₂ we release into the atmosphere, the more nutrients are available for plants, and the more rapidly the Earth is re-greened.

The following compilation map shows which land masses have experienced expanded greening since 1982. As the legend explains, the light green areas represent a 25% increase in green plants, and the dark green areas represent a 50% or greater increase:

Natural News readers may note this is exactly what we've been reporting for over a decade. It's basic science, of course, since plants use [carbon dioxide](#) to thrive. Higher CO₂ means a greener Earth, since CO₂ is the single most important molecule for sustaining plant life across the globe. It is beyond astonishing that the entire climate change cult denies the basic science of botany and photosynthesis.

Read my 2017 article which covers all this: [All the biggest lies about climate change and global warming DEBUNKED in one astonishing interview.](#)

NASA CONFIRMS THE FINDINGS AND EVEN PUBLISHES A VIDEO TOUTING THE INCREASE IN GLOBAL GREENING DUE TO RISING CO2

To the shock of many climate change alarmists, even NASA scientists confirmed that carbon dioxide is “greening” the planet. As stated on the NASA.gov website in an article titled, “[Carbon Dioxide Fertilization Greening Earth, Study Finds](#)”:

From a quarter to half of Earth’s vegetated lands has shown significant greening over the last 35 years largely due to rising levels of atmospheric carbon dioxide, according to a new study published in the journal Nature Climate Change on April 25.

An international team of 32 authors from 24 institutions in eight countries led the effort, which involved using satellite data from NASA’s Moderate Resolution Imaging Spectrometer and the National Oceanic and Atmospheric Administration’s Advanced Very High Resolution Radiometer instruments to help determine the leaf area index, or amount of leaf cover, over the planet’s vegetated regions. The greening represents an increase in leaves on plants and trees equivalent in area to two times the continental United States.

NASA explains almost exactly what I’ve been explaining for the last several years: That carbon dioxide is a necessary component of photosynthesis, the biochemical process by which plants produce metabolic energy. Via NASA:

People like Alexandria Ocasio-Cortez are not the saviors of the planet, it turns out: They are the **death merchants** who threaten to destroy all life as we know it. Carbon dioxide isn't a threat to planet Earth, but people like Ocasio-Cortez surely are. If anything should be eliminated from the atmosphere, it's the hot air coming from the mouths of the climate alarmists who are spewing their death cult quackery that would devastate our planet if deployed.

If you really want to "green" the planet, stop the climate change lunatics like Ocasio-Cortez whose proposals would quite literally murder nearly all life on planet Earth.

Simply put:

More carbon dioxide = more green plants

That's why CO₂ is called a "greenhouse gas." It turns the planet into a lush, plant-filled greenhouse that's warmer, wetter and more abundant across all plant life. Why don't Democrats and Leftists want Earth to be more green?

Stay informed. Read [Climate.news](#) for frequent updates.
