Catalog

The 2025-26 University of Oregon Catalog contains information about academic programs offered by the university from fall 2025 through summer 2026. Whether you're an enrolled student or you're considering attending the UO, this site will provide the information you need as you consider your academic goals.

Reader's Guide to the Catalog

About the UO Catalog

This publication, the 2025-26 University of Oregon Catalog, is a statement of university rules, regulations, and calendars that goes into effect at the opening of fall term 2025. Changes to the university curriculum that were made through winter term 2025 are reflected in the academic sections of the catalog. **Bachelor's Degree Requirements** have been updated to reflect curriculum changes that were made through spring term 2025.

A student who is admitted and enrolls at the university during any academic year may graduate under the general requirement provisions of the catalog in effect that year, provided the catalog has not expired. A student may choose to graduate under the general requirements of a subsequent catalog, provided he or she completes all of those requirements. Major requirements are determined by the academic departments and programs; requirements are subject to change for students who are not continuously enrolled. See Catalog Expiration and Requirements Policies (p. 9) section for more information.

Organization

The University of Oregon's largest academic units are its colleges and professional schools. Each consists of smaller units called departments or programs. The academic year is divided into three terms (fall, winter, spring) and one summer session.

Where to Find It

This catalog has four sections. The first section contains information about admission, registration, academic policies, undergraduate degree requirements, tuition and fees, financial aid and scholarships, employment, and academic and career planning. The second section outlines the majors, minors, and specializations defining the degrees and certificates that may be earned at the University of Oregon, as well as the array of core-education courses available that make up the foundational requirements of those degrees. The third (or curriculum) section describes all the university's academic programs in detail: faculty members, degree and nondegree programs, and course listings. This section includes the College of Arts and Sciences, the honors college, professional schools and colleges, the Division of Graduate Studies and graduate studies information, and ends with a review of undergraduate studies and supplemental academic programs. The final section contains information on academic resources and student services, physical education and recreation, and the academic calendar.

Definitions

The academic terms defined in the following list are used throughout this catalog.

Area-satisfying course. A course that counts toward partial fulfillment of bachelor's degree requirements in one of the three core-education areas: arts and letters, social science, science.

Capstone. A culminating academic project that demonstrates a student's mastery of their field of study.

Certificate. A formal document that recognizes academic achievement in a specific discipline—only as an adjunct to an undergraduate degree program and either as an adjunct to or separate from a graduate degree program, and only for students in an admitted status. Stand-alone noncredit certificates are offered through Continuing and Professional Education to all students.

Colloquium. An academic meeting or assembly for discussion, sometimes led by a different lecturer speaking on a different topic at each meeting; a seminar with consultation, report, and exchange.

Competency. A specific skill in a specific area.

Concentration. A subarea of specialized study within an undergraduate or graduate major or undergraduate minor.

Corequisite. A course or other educational requirement that must be completed simultaneously with another course.

Course. A subject, or an instructional subdivision of a subject, offered through part of a term or a whole term. Each course is assigned a course level. Courses numbered 100–499 are undergraduate courses; 100–299 are lower division, and 300–499 are upper division. Courses numbered 500 and above are graduate or professional.

1 credit. Represents approximately three hours of the student's time each week for one term in a lower-division undergraduate course. This frequently means a minimum of one hour in the lecture hall or laboratory in addition to two hours spent in outside preparation. The number of lecture, recitation, laboratory, or other periods required each week for a course is listed in each term's class schedule.

Cultural Literacy course. A course that counts toward partial fulfillment of bachelor's degree requirements in one of two categories: Global Perspectives; and US: Difference, Inequality, Agency.

Curriculum. An organized program of study arranged to provide integrated cultural or professional education.

Discipline. A branch of learning or field of study (e.g., mathematics, history, psychology).

Dissertation or Thesis. A written document resulting from study or research and submitted as a major requirement for a degree.

Electives. Courses that students may choose to take, as contrasted with courses that are required for an academic program.

Endorsement. An affirmation of teaching competency by the Teacher Standards and Practices Commission.

Experimental course. A course under development that has not received formal acceptance to the curriculum. Subject matter, instructional materials, and activities are evaluated for effectiveness and long-term value to the discipline. *Experimental courses may not be used to clear core-education requirements.*

Field studies. A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Generic courses. Courses numbered 100, 300, 196, 198, 199, 299, 399–410, 503–510, 601–610, and 704–710, for which credit is variable and which may be repeated for credit. Instructor's permission is often required for registration.

Grade point average (GPA). The GPA is determined by dividing the total points for all grades by total credits.

Grading option. Unless specified otherwise, nonmajors may take courses either graded (A+ through F) or pass/no pass (P/N). The online class schedule identifies courses for which majors are limited to a particular grading option.

Graduate specialization. A subdivision of a graduate major or an interdisciplinary track in which a strong graduate-level curriculum is available. For more details, visit the website (<https://gradschool.uoregon.edu/policies-procedures/graduate-specialization/>).

Interdisciplinary or multidisciplinary. A course of study from two or more academic disciplines.

Internship. Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Lab project. An experience in a lab setting in which a group of students focus on skills development rather than content master.

License. See Endorsement.

Major. A primary undergraduate or graduate field of specialized study.

Minor. A secondary undergraduate field of specialized study.

Multilisted course. A single course that is listed under more than one subject code; course numbers end with the letter M.

Option. A subarea of specialized study within an undergraduate or graduate major or undergraduate minor.

Preparatory programs. Undergraduate courses of study taken in preparation for professional or graduate degrees.

Prerequisite. A course or other educational requirement that must be completed prior to registering for another course or before proceeding to more advanced study. Prerequisite courses must be passed with C- or better or P for undergraduate courses; B- or better or P for graduate courses; and D or better or P for law courses. Courses may have a higher minimum grade for completing the prerequisite course.

Practicum. A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Reading and conference. A particular selection of material read by a student and discussed in conference with a faculty member.

Regression. Occurs when a student takes a course that is at a lower level than a course the student has previously passed. Academic departments have the authority to designate a course as regressive.

Repeatable for credit. Only courses designated "repeatable" may be repeated for credit. Except for generic, studio, or performance courses, the circumstances under which a course may be repeated for credit are restricted.

Research. Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Residence credit. Academic work completed while the student is formally admitted and officially registered at the University of Oregon; this includes courses taken in UO study abroad programs.

Semester. One-half the academic year (sixteen weeks), applicable only to the UO School of Law.

1 semester credit. One semester credit equals one and one-half quarter (or term) credits.

Seminar. A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Sequence. Two or three closely related courses that must be taken in specified order.

Series. Two or more closely related courses that may be taken in any order.

Special problems. Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Special studies. A colloquium or experimental course, often taken concurrently with another course as a satellite seminar.

Specialization. A graduate-level subdivision of a major or an interdisciplinary track in which a strong graduate-level curriculum is available.

Subject code. An abbreviation used with a course number to indicate an academic subject area. See the list of subject codes in this section of the catalog.

Supervised college teaching. A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Supervised tutoring. A student, under faculty supervision, accepts responsibility for tutoring other students within the discipline.

Temporary multilisted course. Courses numbered 200M, 400M, 500M, and 600M, which may be offered once without formal approval.

Term. Approximately one-third of the academic year (eleven weeks), either fall, winter, or spring.

Terminal project. A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Waive. To set aside without credit certain requirements for a degree or major.

Workshop. An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Courses

Abbreviations

The following abbreviations are used in course descriptions:

- **Coreq:** corequisite
- **H:** honors content of significant difficulty
- **M:** multilisted courses
- **Z:** common course numbering - course information is exactly the same at all Oregon public colleges and universities
- **Prereq:** prerequisite

Sample Course Listings

The following examples are from Biology (BI):

BI 150. *[BI lower-division course number]* **Ocean Planet.** *[course title]*
4 credits. *[course credits]* This course is designed to give students an appreciation for the global ocean, the diversity of marine life, methods and techniques for studying the sea, and their own opportunities to contribute to sustainable and healthy marine ecosystems. Credits will be deducted for regression if BI 357 is taken first. Students cannot receive credit for both BI 150 and EARTH 307. *[course description]*

Equivalent to: EARTH 307 *[equivalent course]*

Additional Information:

Science Area *[core education designation]*

BI 309. *[BI upper-division course number]* **Tropical Diseases in Africa.**
[course title] **4 credits.** *[course credits]* Biological and medical aspects of major infectious and parasitic diseases in Africa, including HIV/AIDS and malaria; socioeconomic issues in public health; case studies. Lectures, discussions. *[course description]*

Requisites: Prereq: BI 212 or BI 282H. *[course prerequisite]*

Additional Information:

Cultural Literacy: Global Perspectives *[core education designation]*

BI 523. *[BI graduate course number]* **Human Molecular Genetics.**
[course title] **4 credits.** *[course credits]* Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X-chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. *[course description]*

BI 607. *[BI graduate-only course number]* **Seminar: [Topic].** *[course title]* **1–3 credits.** *[course credit range]* Topics may include neurobiology, developmental biology, ecology colloquium, genetics, molecular biology, and neuroscience. Repeatable. *[course description]*

Repeatable 99 times *[course repeat limits]*

Subject Codes

Course Numbering System

Course numbers reflect the nature of instruction, level of work, and scope of content.

1–99

Remedial, terminal, semiprofessional, or noncredit courses that do not apply to degree requirements.

100-199

Lower-division courses. Intended as introductory for freshmen and sophomores; do not require any prior knowledge or special preparation.

200-299

Lower-division courses. Intended as introductory for freshmen and sophomores but may require some prior knowledge or special preparation, usually in high school or at 100 college level.

300-399

Upper-division (junior- and senior-level) courses. More specific in topic; provide greater depth of knowledge and academic rigor, and prior university preparation; accessible for non-majors.

400-499

Upper-division (junior- and senior-level) courses. More specific in topic; provide greater depth of knowledge and academic rigor, and prior university preparation; intended for majors or majors in related disciplines.

500–599

Courses that offer graduate-level work in classes that include undergraduate students. Always paired with a 400-level course; students taking graduate level 5xx are expected to complete a substantive and measurable difference in the type and amount of work required for credit.

600–699

Courses for graduate students only.

700–799

Except in the School of Music and Dance, professional or technical courses that apply toward professional degrees but not toward advanced academic degrees such as the MA, MS, or PhD. Both 600 and 700 numbers in the School of Music and Dance indicate graduate courses only.

Temporary Multilisted and Area-Satisfying Courses

100

Temporary lower-division area-satisfying course

200M

Temporary lower-division multilisted course

298

Temporary lower-division area-satisfying course

300

Temporary upper-division area-satisfying course

400M

Temporary upper-division multilisted course

500M

Temporary graduate-level multilisted course

600M

Temporary graduate-level multilisted course

Generic Courses

Certain numbers are reserved for generic courses that may be repeated for credit under the same number. Except in the School of Law, courses numbered 503, 601, and 603 are offered pass/no pass only.

Credit is assigned according to the work load in a particular course. Credit ranges indicate minimum and maximum credits available in a single course for a single term, and departments determine their own credit ranges.

196 Practicum: [Topic] or Field Studies: [Topic]

198 Workshop: [Topic] or Laboratory Projects: [Topic]

199 Special Studies: [Topic]

299 Special Studies: [Topic]

399 Special Studies: [Topic]

401 Research: [Topic]

402 Supervised College Teaching

403 Thesis

404 Internship: [Topic]

405 Reading and Conference: [Topic] or Special Problems: [Topic]

406 Practicum: [Topic] or Field Studies: [Topic]

407/507 Seminar: [Topic] or Colloquium: [Topic]

408/508 Workshop: [Topic] or Laboratory Projects: [Topic]

409 Terminal Project or Capstone

410/510 Experimental Course: [Topic]

503 Thesis

601 Research: [Topic]

603 Dissertation

604, 704 Internship: [Topic]

605, 705 Reading and Conference: [Topic] or Special Problems: [Topic]

606, 706 Practicum: [Topic] or Field Studies: [Topic]

607, 707 Seminar: [Topic] or Colloquium: [Topic]

608, 708 Workshop: [Topic] or Laboratory Projects: [Topic]

609, 709 Terminal Project or Capstone

610, 710 Experimental Course: [Topic]

Catalog Expiration and Requirements Policies

The *University of Oregon Catalog* lists requirements for active degrees offered by the university.

Each catalog goes into effect at the beginning of fall term the academic year of issue. It expires at the end of summer session the seventh academic year after publication.

Advisors and other university employees are available to help, but students have final responsibility for satisfying degree requirements for graduation.

Undergraduate Students

To receive an undergraduate degree, a student must have satisfied, at the time of graduation, all requirements for the degree listed in one of the following:

1. the unexpired catalog in effect when the student was first admitted and enrolled at the University of Oregon, **or**
2. any subsequent catalog that has not yet expired

To fulfill major or minor program requirements, a student must complete the requirements in effect

1. when the student first declared the major or minor, **or**
2. when the student changed to a different major or minor

Exceptions to major or minor requirements may be made by the department or program offering the major or minor.

Graduate Students

To receive a graduate degree, a continuously enrolled student must have completed, at the time of graduation, all requirements described in the department and **Division of Graduate Studies** sections of the catalog in effect when the student was first admitted and enrolled at the University of Oregon. A student who has not maintained continuous enrollment is subject to the requirements described in the department and **Division of Graduate Studies** sections of the catalog in effect the first term the student was readmitted by the Division of Graduate Studies and reenrolled at the University of Oregon.

Requests for exceptions to graduate degree requirements must be submitted in writing to the Division of Graduate Studies prior to graduation.

While every effort is made to ensure the accuracy of the information in this catalog, the University of Oregon has the right to make changes at any time without prior notice. This catalog is not a contract between the University of Oregon and current or prospective students.

About the University of Oregon

Mission Statement

Serving the state, the nation, and the world since 1876.

The University of Oregon is a comprehensive public research university committed to exceptional teaching, discovery, and service. The university is a community of scholars, helping members of its community to question critically, think logically, reason effectively, communicate clearly, act creatively, and live ethically.

Purpose

The university community strives for excellence in teaching, research, artistic expression, and the generation, dissemination, preservation, and application of knowledge, devoted to fostering the next generation of leaders and informed participants in the global community. Through these pursuits, the social, cultural, physical, and economic well-being of the students, the state, the nation, and the world are enhanced.

Vision

The university community aspires to create a preeminent and innovative public research university encompassing the humanities and arts, the natural and social sciences, and the professions, seeking to enrich the human condition through collaboration, teaching, mentoring, scholarship, creative inquiry, scientific discovery, outreach, and public service.

Values

The university community values

- the passions, aspirations, individuality, and success of the students and the members of its faculty and staff who work and learn here
- academic freedom, creative expression, and intellectual discourse
- diversity, and seeks to foster equity and inclusion in a welcoming, safe, and respectful community
- the unique geography, history, and culture of Oregon that shapes its identity and spirit
- a shared charge to steward resources sustainably and responsibly

Inspiration and Discovery

Generations of leaders and citizens have studied at the University of Oregon since it opened in 1876. Today's students, like the more than 250,000 alumni before them, have access to the most current knowledge in lectures, laboratories, and seminars conducted by active researchers. By sharing their research through teaching, faculty members are better able to articulate their findings and to integrate their specialized studies with broader areas of knowledge.

University of Oregon students select courses from departments and programs in the College of Arts and Sciences and from six professional schools and colleges and the Robert Donald Clark Honors College. Some 2,142 faculty members, 52 librarians, and 1,428 graduate and research assistants serve as mentors, colleagues, and friends to the 24,462 undergraduate and graduate students enrolled at the university.

Over half (52%) of all students are from Oregon, 45 percent are from other states and 3 percent are from other countries. The mix of

backgrounds gives students a chance to know people they might not meet otherwise—a real asset in a world where national and international relations influence everyday life.

Teaching, research, and a spirit of sharing are characteristics of the campus community. Faculty members and students engage in research programs that bring to the university approximately \$177 million in competitive research awards. The university's science departments receive national attention for their work in such areas as computer science, genetics, materials, optics, and neuroscience. Ten current faculty members belong to the prestigious American Academy of Arts and Sciences, as well as six emeritus faculty. Six current faculty members have been elected to the National Academy of Sciences, as well as six emeritus faculty. One current faculty member has been elected to the National Academy of Medicine, as well as one emeritus faculty. One current faculty member received a National Medal of Science, as well as one emeritus faculty.

Connection to Community

The sharing of knowledge and the love of learning do not stop at the campus borders. Public service is important to the university.

Members of the UO faculty share their experience and knowledge in community activities that include service in local and state governments. They also serve as consultants for businesses, industries, school districts, and government agencies. Students work as interns in a variety of educational programs in the community and volunteer for service activities.

University programs that serve the public include Academic Extension, which offers for-credit and noncredit activities throughout the state. Planning and technical assistance from the Community Service Center helps Oregon communities solve local problems and improve the quality of life in rural Oregon. For more than four decades, the Oregon Bach Festival has offered an annual program of concerts and master classes to music lovers in the Pacific Northwest. The UO's classical music radio station, KWAX-FM, is an affiliate of the Public Radio International Classical 24. KWAX programs are rebroadcast on translators in several coastal and central Oregon communities and cybercasts entertain listeners around the world. A second radio station, KWVA-FM, serves the Eugene-Springfield metropolitan area and has a live internet stream, playing a varied mix of music in addition to talk shows and live college sports broadcasts. KWVA is a voice for UO students as well as a place for them to gain broadcast, production, and operation experience.

The university's presence is evident at its off-campus facilities—Pine Mountain Observatory in central Oregon near Bend—and its academic programs in Portland and at the coastal Oregon Institute of Marine Biology in Charleston. Access is enabled through several online and hybrid programs.

The university is one of the largest and most stable employers in the state, directly employing 10,783 people. Overall, University of Oregon activity affects more than \$989 million in household earnings and 25,917 jobs in the state.

The Campus Experience

The university's 295-acre campus is an arboretum of more than 4,000 trees of approximately 500 species, located in the lush Willamette Valley, between the Pacific Ocean and the Cascade Mountains. Campus buildings date from 1876, when the UO's first building opened, to the present, with the recent opening of the Lyllye Reynolds-Parker Black

Cultural Center; Willie and Donald Tykeson Hall, the university's hub for academic and career advising, and home to the College of Arts and Sciences, University Career Center, and Division of Equity and Inclusion; and the Phil and Penny Knight Campus for Accelerating Scientific Impact.

The Museum of Natural and Cultural History is located at East 15th Avenue and Columbia Street. Across campus, the Jordan Schnitzer Museum of Art, a member of the American Alliance of Museums, is noted for its collections of Asian and Northwest art.

The UO Libraries, a member of the Association of Research Libraries, is an important research facility for scholars throughout the Northwest. The free Oregon Card Program allows Oregon residents who are sixteen or older to borrow from the libraries' three-million-volume collection.

Campus athletic facilities include the 54,000-seat Autzen Stadium, the Marcus Mariota Sports Performance Center, the Casanova Athletic Center, the Moshofsky Center, Papé Field, Jane Sanders Stadium, PK Park, Hayward Field, Matthew Knight Arena, and the Student Tennis Center.

Student-guided tours of the university are available Monday through Saturday. Tours may be arranged by calling 541-346-1274. Campus maps and pamphlets describing university programs, answers to questions about services and office locations, and general information about the university are available at the information desk in the main lobby of the Ford Alumni Center.

The university's website has daily news updates and information about programs and events: www.uoregon.edu (<http://www.uoregon.edu>).

Equal Opportunity

The university is committed to equal access to programs, course offerings, facilities, admission, and employment for all of its employees, students, and campus community members. It is the policy of the university to maintain an environment free from harassment and discrimination against any person.

The Office of Investigations and Civil Rights Compliance, formerly the Office of Affirmative Action and Equal Opportunity and the Office of the Title IX Coordinator, offers the UO community a place to discuss and report issues, concerns, and conflicts regarding discriminatory or harassing behavior. The office also helps identify how such concerns and conflicts may best be addressed and resolved. The office supports the university's compliance with federal and state laws regarding discrimination and harassment, affirmative action, and equal employment opportunity.

The office works with students, members of the faculty and staff, and campus community members by:

- Promoting a learning and working environment free from discrimination and harassment.
- Receiving concerns and complaints from any member of the UO community (i.e. students, faculty and staff members, visitors, and program participants) regarding issues of potential discrimination and discriminatory harassment at the university.
- Investigating reports and complaints of discrimination and harassment. As investigators, the office does not act as advocates, but serve in a neutral and impartial capacity.
- Addressing and resolving concerns and complaints of discrimination and harassment through referral and collaboration with stakeholders and partners across campus.

- Explaining and clarifying university policies and procedures as well as federal and state laws and regulations regarding discrimination, harassment, retaliation, and equal opportunity.

Direct related inquiries to the Office of Investigations and Civil Rights Compliance, 677 E. 12th Ave., Suite 452, 5221 University of Oregon, Eugene, Oregon 97403-5221; telephone 541-346-3123.

University of Oregon Board of Trustees

The University of Oregon is an independent public body governed by the Board of Trustees of the University of Oregon. The trustees have broad authority to supervise and manage the university and may exercise all of the powers, rights, duties, and privileges expressly granted by law or that are incident to the board's powers, rights, duties, and privileges. Except for the university president, who is an ex officio, nonvoting member, the trustees are appointed by the governor and confirmed by the Oregon Senate.

The names of the members follow. The expiration date for each term is June 30 of the year shown.

- Steve Holwerda, MBA '91, board chair, 2027
- Marcia Aaron, BA '86, board vice chair, 2029

- Cy Abbott, graduate student, MS '22, 2026
- Tim Boyle, BS '71, 2029
- Renée Evans Jackman, BA '97, 2029
- Elisa deCastro Hornecker, BA '82, 2027
- Renée James, MBA '86, 2029
- David Mitrov#an Morgan, student, 2026
- Lillian Moses, BArch '09, non-faculty staff member, 2026
- Connie Seeley, BS '92, 2027
- Andy Storment, BS '84, 2027
- Amy Tykeson, BS '78, MBA '97, 2027
- Jenny Ulum, MA '83, 2026
- Dennis Worden, BA '06, 2029
- Karl Scholz, President, Ex-Officio

Accreditation

The University of Oregon was elected to membership in the Association of American Universities in 1969. The university is accredited by the Northwest Commission on Colleges and Universities. Individual programs in the university's professional schools and colleges are accredited by the following organizations:

- Accrediting Council on Education in Journalism and Mass Communications
- Association for Advancing Quality in Educator Preparation
- Association to Advance Collegiate Schools of Business
- American Alliance of Museums
- American Bar Association
- American Chemical Society
- American Psychological Association
- Commission on Accreditation for Marriage and Family Therapy Education
- Commission on English Language Program Accreditation
- Council for Interior Design Accreditation
- Council on Academic Accreditation in Audiology and Speech-Language Pathology
- Landscape Architecture Accreditation Board
- National Architectural Accrediting Board
- National Association of Schools of Art and Design
- National Association of Schools of Music
- National Association of School Psychologists
- Nonprofit Academic Centers Council
- Network of Schools of Public Policy, Affairs, and Administration
- Planning Accreditation Board
- Psychological Clinical Science Accreditation

From Admission to Graduation

This section of the catalog holds basic information for prospective students on how to apply to the University of Oregon, choose a major, register for courses, and apply for scholarships, grants, and financial aid, in addition to outlining and explaining their rights and responsibilities.

Admissions

<http://admissions.uoregon.edu>

Erin Hays, Director, Office of Admissions

201 Oregon Hall
541-346-3201
Fax: 541-346-5815

Admission requirements apply to all students seeking to enroll at the University of Oregon.

Application Deadlines for Fall Term

Student Classification	Enrollment Deadline
Freshman, early action	November 1
Freshman, standard	January 15
University scholarship	January 15
International freshman	January 15
Transfer, priority	March 15
Undergraduate reenrollment	Friday, 2 weeks before registration opens
Transfer, standard	June 1
International transfer	June 1
Postbaccalaureate undergraduate or graduate	Thirty days before the start of the term
Graduate	Set by individual departments

Departmental Application Deadlines

The following majors require a separate consideration. Students applying to these majors will receive a separate decision about their acceptance into the major: architecture, art, interior architecture, product design, or music. Be aware of the special admission requirements and application deadlines, and contact that department directly for more information.

Music majors audition for placement and take a musicianship examination scheduled on several dates throughout the spring. Art majors need to declare their major by completing the declaration form available both online (<https://artdesign.uoregon.edu/art/apply/>) and at the art office located at 254 Lawrence Hall.

Application Deadlines for Winter–Summer Terms

Student Classification	Enrollment Deadline
	Winter Enrollment
Freshman	October 15
Transfers	November 15
	Spring Enrollment

All classifications	February 1
	Summer Enrollment
Freshman	March 1
Transfer	April 15

Freshman Admission

For applicants who are in high school and will graduate prior to enrolling at the University of Oregon or students who have already graduated from high school and will not attempt any college-level coursework after graduation.

Standard Admission Process

Through the standard admission process, applications are evaluated based on the following criteria:

- Strength of academic course work
- Grades earned
- Grade trends, especially in junior and senior year of high school
- Senior-year course load
- Writing skill, personal characteristics, and special circumstances as shared in the various written and narrative sections of the application
- Extracurricular activities, including community service and employment
- Special talents
- Standardized test scores from the ACT or SAT are optional for admission. However, these scores can be used as one option for meeting requirements such as English proficiency, or alternative requirements for applicants from nonaccredited schools.

Application Procedure

Freshman applicants must submit the following to the Office of Admissions:

- Completed application for admission, including essays and activities and a nonrefundable application fee, by the standard application deadline. Students can use either the UO's own application or the Common Application, and need to submit only one version of an application. Details are available online (<https://admissions.uoregon.edu/freshmen/>).
- An official high school transcript is not required at the time of applying in most cases. Instead, students self-report their complete high school record, and official transcripts will be required at the end of the process unless requested sooner by Admissions.
- Test scores from the SAT or ACT are optional for admission. However, official test scores can be considered if submitted officially through the testing agency, or appearing on an official high school transcript. These scores play no specific role in the admission decision, but are sometimes one of a multiple alternatives applicants might use to address a particular situation.

Standard Admission Requirements

Graduation from a Regionally Accredited High School

Applicants who graduate from a nonaccredited high school, were homeschooled, or earned a general equivalency diploma (GED) must meet the alternative admission requirements explained

in more detail online (<http://admissions.uoregon.edu/freshmen/alternativeadmission/>).

Completion of Required Course Work

Applicants must satisfactorily complete the following high school course work. To meet minimum admission requirements, applicants must complete 15 units in the core areas listed below with a grade of C– or better in each course. Until further notice, during the pandemic, passing or credit-only results will be acceptable if the applicant's school has not provided grades for these courses. These requirements may be in progress at the time of application, provided they are complete by the time the student enrolls at Oregon.

- **English—four years.** All four years should be in preparatory composition and literature, with emphasis on and frequent practice in writing expository prose
- **Mathematics—three years.** Must include first-year algebra and two additional years of college-preparatory mathematics. An advanced mathematics course is highly recommended in the senior year. Algebra and geometry taken prior to ninth grade are acceptable. Regardless of the pattern of mathematics courses or the number of years of mathematics taken, the mathematics course work must include Algebra II (or equivalent) or higher
- **Science—three years.** Must include a year each in two fields of college-preparatory science such as biology, chemistry, physics, or earth and physical science. One year of laboratory science is recommended
- **Social studies—three years.** May include areas such as global studies, history, or social studies electives
- **Second-language proficiency.** Demonstrate with one of the following:
 - Two years of the same second language in high school
 - Two college terms of the same second language
 - Proficiency test (e.g., SAT Subject Test or BYU Foreign Language Assessment)
 - Other options for meeting the second-language requirement, including American Sign Language

Exceptions to this requirement are only considered for students graduating from high schools that do not offer two years of any second language.

College work may be used to complete courses missed in high school. A one-term transferable college course of at least 3 credits (quarter system) is equal to one year of high school work. Applicants are strongly encouraged to contact the UO Office of Admissions to verify that the courses completed will satisfy course pattern deficiencies.

An examination in a second language is strongly recommended to qualify a student for admission by meeting the second-language proficiency requirements. Students who do not take an SAT Subject Test have several other options to prove language proficiency through another approved process.

The UO offers tentative admission based on self-reported record and planned senior schedule. Final admission is granted only after the Office of Admissions has received official transcripts verifying successful completion of all admission requirements and graduation. If an applicant's final record shows a substantial change, or if the applicant does not complete a course that was in progress at the time of application or

admission or completes it with a low grade, the offer of admission may be withdrawn by the university.

Submission of Scores from Standardized Tests

The University of Oregon accepts scores for the SAT or ACT when reported on official high school transcripts or submitted to the Office of Admissions directly from the testing service. Test scores for applicants planning to participate in intercollegiate athletics must be received directly from the testing service.

When taking the test, applicants should list the University of Oregon as a score recipient. The school code number to use for the SAT is 4846; the code for the ACT is 3498.

Consideration of Narratives and Essays

Freshman applicants are required to submit an essay that serves as a personal statement to show not only writing ability but also insights into the applicant's personal characteristics. Students are also offered a chance to write optional essays for various purposes.

Consideration of Activities, Work, and Accomplishments

Most applicants are required to share a set number of examples of their activities outside the classroom. Students choose a variety of ways to be involved in activities—lead, volunteer, intern, hold jobs, and achieve special recognition. No type of activity will be valued more highly than another, so students should consider anything they have done as a possibility to share and discuss. However, applicants are limited to a finite number of items, because the selection process does not reward sheer volume of activity. Instead, the university seeks to use this information to better understand who the applicants are, and to learn more about their most meaningful interests and accomplishments.

Explanation of Special Circumstances (optional)

Applicants whose high school or college performance was affected by any serious illness, diagnosed disability, personal difficulties, or family circumstances should provide a statement to summarize their situation. Dates should be included when applicable. Applicants with D or F grades, especially those grades that make them fall short of course requirements, are strongly encouraged to address the reasons for these grades in this section.

Alternative Admission

The requirements for standard admission confer no guarantees of admission, and applicants who meet them may or may not be admitted due to the selective, holistic process that takes many academic and personal factors into consideration. Also, students who do not meet these requirements will still be considered for admission. Students who fall short of the standard requirements in any way should never let that deter them from applying; they are strongly encouraged to contact the UO Office of Admissions for further guidance and additional requirements. Students from homeschool settings and those who attend nonaccredited schools may be required to submit additional information and materials. Students who fall short of core subject requirements or those with low grades (especially those who fall below a 3.00 GPA) are encouraged to explain the reasons for their situation in the application.

Premajor Status

Departments or programs with premajor admission requirements include the Lundquist College of Business, certain majors in the College of Design, the College of Education, and the Department of International

Studies. These units typically only permit newly admitted students to be considered premajors for their majors. A premajor student is eligible to take advantage of the department's advising services and, in most cases, complete lower-division course work required for the major. Each department screens enrolled premajor students who have completed some university study and decides if they may advance to major status.

Transfer Admission

For applicants who will have attempted any college-level coursework after graduating from high school and will have completed 35 or fewer quarter credits (or 23 or fewer semester credits) by the time of expected enrollment at Oregon, admission will be based on both freshman and transfer admission requirements.

For applicants who have completed 36 or more quarter credits (or 24 or more semester credits) by the time of expected enrollment at Oregon, admission will be based only on the transfer admission requirements.

Course Requirements

A grade of C– or better is required in the following:

- College-level composition and writing
- College-level mathematics
- Second language: two years in high school or two terms in college

Applicants who will not have completed these courses should still consider applying, and they are encouraged to submit a letter of explanation or include an explanation in the special circumstances statement.

Required GPA

In college-transferable courses, the following cumulative GPAs are required for admission consideration:

- 2.25 for Oregon residents
- 2.50 for applicants without Oregon residency
- 2.00 for applicants, regardless of residency, who earn an associate of arts Oregon transfer (AAOT) degree from an Oregon community college, an associate of science Oregon transfer (ASOT) degree in business, or an Oregon Transfer Module (OTM) from any public two-year or four-year institution in Oregon

The University of Oregon may recalculate grades for purposes of establishing an admissions GPA. This means that an applicant's admission GPA is not identical to the one presented by the previous institution. These recalculations will be made in regard to transferability of credit, repeat policies, or limits on certain types of credit.

Second-Language Proficiency

Applicants who graduated from high school or earned a general equivalency diploma (GED) in spring 1997 or later must document second-language proficiency by submitting an official transcript or score report verifying one of the following:

- Two years of the same language at an accredited high school
- Two terms of the same language at a regionally accredited college
- Proficiency test (e.g., SAT Subject Test or Brigham Young University Foreign Language Achievement Test)

Options for meeting the second language requirement, including American Sign Language, are available on the Office of Admissions

(<http://admissions.uoregon.edu/apply/secondlanguage.htm>) website. Applicants admitted with an exception to this requirement are required to complete two college terms of the same language before graduating from the University of Oregon, regardless of the major or degree pursued.

Additional Considerations

Even if an applicant meets the minimum requirements stated above, factors of concern, especially a drop in GPA from recent course work, may still be considered before a decision on admission is made. In addition, when considering applicants who do not meet minimum admission requirements, the Office of Admissions considers additional factors such as whether the applicant holds an associate of arts Oregon transfer degree from an Oregon community college or associate of arts degree from select community colleges in other states; which of the applicant's completed courses fulfill university graduation requirements; the applicant's grade point average (GPA); and the applicant's grade trend throughout his or her academic history. Academic potential and special talents are also considered.

Application Procedure

Transfer applicants must submit the following to the Office of Admissions:

1. A completed application for admission and a nonrefundable application fee
2. An official transcript from each college and university attended. It is a firm requirement that applicants submit transcripts from any previous institution where credit was attempted, regardless of the grades or amount of credit earned, and regardless of how or whether the applicant intends to apply these credits toward UO requirements. Applicants who omit record of previous work attempted will be denied admission, and admitted students for whom this omission is discovered can have their offer of admission revoked, even if it is after they have begun enrollment at Oregon
3. A high school transcript is not always required, but is often needed—not only for admission but for federal aid eligibility. Students should provide the high school transcript at the time of application whenever possible

Transfer students may submit their applications up to six months before they plan to enroll at the university, but may be asked to provide updated transcripts before final decisions are reached. Applications and official transcripts should be received by the university by the deadlines listed above to allow time for a complete evaluation of the transferred credits.

Transfer of Credit

The amount of credit transferred depends on the nature of the applicant's college work, which is evaluated according to the academic requirements of the University of Oregon. Only college-level academic course work from regionally accredited two- and four-year colleges or universities will be considered for transfer. Up to 124 credits from regionally accredited community or junior colleges, of which only 90 credits may be transferred from an international junior college, may be applied to the bachelor's degree.

See **Bachelor's Degree Requirements** for requirements that apply to new undergraduates.

Premajor Status

Departments or programs with premajor admission requirements are the Lundquist College of Business, certain majors in the College of Design, the College of Education, and the Department of International Studies.

These units only permit newly admitted students to be considered premajors for their majors. A premajor student is eligible to take advantage of the department's advising services and, in most cases, complete lower-division course work required for the major. Each department screens enrolled premajor students who have completed some university study and decides if they may advance to major status.

Dual Enrollment Program

The University of Oregon has dual-enrollment agreement with Lane Community College. The program provides students with the academic advantages of simultaneous enrollment at two institutions. More information and the web form can be found on the UO Office of the Registrar web page (<https://registrar.uoregon.edu/registration/register-classes/dual-enrollment-program/>). A student must be fully admitted to the University of Oregon to opt into the program.

International Admission

Applicants who are not United States citizens or permanent residents are considered for admission to the university as international students.

International applicants, whether freshman or transfer, may apply for admission fall, winter, and spring terms and summer session. All deadlines are the same as for US students in these categories. Applications received after the deadlines are considered on a space-available basis. See the admission requirements for individual countries (<http://admissions.uoregon.edu/international/apply/requirements/>).

A GPA of 2.50 is required for undergraduates who want to transfer from another university or college.

English Proficiency. Students whose native language is not English must supply results of a standardized language-proficiency test. The University of Oregon currently accepts the TOEFL, IELTS, or Duolingo English Test (DET) examinations for establishing proficiency, as well as the SAT or ACT. To be considered for full admission without an English placement test upon arriving, applicants must score an 88 on the TOEFL iBT, 6.5 in the IELTS, or a 100 on the DET. An applicant with at least a 61 TOEFL or 6.0 IELTS can be considered for full admission and will take an English language placement test after arriving at the university. Placement test results determine whether students are required to take language support courses in the Academic English for International Students (AEIS) program. Students placed in AEIS courses also concurrently enroll in regular university credit courses.

Conditional admission. International applicants who do not meet the proficiency requirements above may be offered conditional admission if their academic record is otherwise strong for admission. Through the conditional admission program, the student can take courses through the Intensive English Program (IEP), then proceed to regular university credit courses once IEP requirements are satisfied.

More information about the American English Institute and AEIS and IEP courses may be found on the institute's website (<http://aei.uoregon.edu>).

Application Procedure

International applicants for freshman or transfer admission must submit the following to the Office of Admissions:

1. A completed international application for admission and a nonrefundable application fee

2. Official transcripts of all schoolwork taken beyond the eighth year of school (i.e., the equivalent of the American secondary school grades 9–12 and for any college or university work). An official transcript is an original or a certified copy in a sealed envelope. (In most cases, international freshman applicants will instead self-report their high school transcript at the time of application; they will still be required to provide an official final transcript at the end of the process.)
3. An official test score report from one of the English proficiency tests described above
4. Proof of sufficient funds to pay one year's tuition and living expenses while at the University of Oregon, consisting of a bank statement or certificate of balance prepared within the last six months, or a scholarship letter. This proof is a requirement of the US government

Postbaccalaureate Admission

Students who have earned a bachelor's degree and want to earn a second undergraduate degree or to take additional work without entering a formal degree or certification program may be admitted with postbaccalaureate undergraduate status. These students pay appropriate undergraduate fees. Applications and information are available from the Office of Admissions.

Graduate Admission

Students planning to pursue graduate study at the university must be admitted to the Division of Graduate Studies and the departments in which they plan to study. General admission requirements for the Division of Graduate Studies are described in that section of this catalog. Each school and department in the university determines its specific requirements and application deadlines for graduate admission. For this reason, inquiries concerning graduate admission should be sent directly to the department or school of interest.

Notice to Nonresidents of the State of Oregon

Definitions

The following words and phrases mean:

(1) *"Domicile" is a person's true, fixed, and permanent home and place of habitation. It is the place where a person intends to remain and to which the person expects to return when the person leaves without intending to establish a new domicile elsewhere. In order to establish a domicile in Oregon, a person must maintain a predominant physical presence in Oregon for 12 consecutive months after moving to the state.*

(2) *A "financially independent person" is a person who, at the time of application for residency status:*

(a) declares himself or herself to be financially independent;

(b) has not been claimed as a dependent during the immediately preceding tax year, and will not be claimed as a dependent during the current tax year, on the federal or state income tax returns of any other person; and

(c) has not received in the immediately preceding calendar year, and will not receive during the current calendar year, one-half or more of his or her support, in cash or in kind, from another person or persons, except for support received from his or her spouse.

A "financially dependent person" is a person who, at the time of application for residency status:

- (a) has been claimed as a dependent on the federal and state income tax returns of another person during the immediately preceding tax year; or
- (b) is eligible to be claimed as a dependent for tax purposes and can provide evidence that one-half or more of the individual's financial support was provided by another person or persons.

Determination of Residence

(1) For purposes of admission and instruction fee assessment, the University of Oregon shall classify a student as an Oregon resident or nonresident. In determining resident or nonresident classification, the primary issue is a person's intent in coming to Oregon. Intent is inferred from a person's conduct and history as they relate to the requirements of these residency rules. If a person is in Oregon primarily for the purpose of obtaining an education, that person will be considered a nonresident. It is possible for an individual to qualify as a resident of Oregon for purposes of voting or obtaining an Oregon driver's license and not meet the residency requirements established by these rules.

(2) An Oregon resident is a financially independent person who, prior to the term for which Oregon resident classification is requested, has both:

- (a) established and maintained a domicile in Oregon for 12 consecutive months; and
- (b) during that period, has been primarily engaged in activities other than those of being a college student.

(3) A student may be considered primarily engaged in educational activities regardless of the number of hours for which the student is enrolled. However, a student who is enrolled for more than 8 hours in any semester or quarter during the 12-month period referred to in section (2) of this rule shall be presumed to be in Oregon for primarily educational purposes. Such period of enrollment shall not be counted toward the establishment of a bona fide domicile of 12 consecutive months in this state unless the student proves, in fact, establishment of a bona fide domicile in this state primarily for purposes other than educational.

(4) An Oregon resident is also a financially dependent person who is claimed as a dependent by another person who has both:

- (a) established and maintained an Oregon domicile for 12 consecutive months; and
- (b) during that period, has been primarily engaged in activities other than those of being a college student.

(5) A financially dependent person who is claimed as a dependent by another person who has not established and maintained an Oregon domicile shall be presumed to be a non-resident. This presumption may be overcome by evidence of the student's long-standing presence in Oregon and demonstration of other factors.

(6) The criteria for determining Oregon resident classification shall also be used to determine whether a person who has moved from Oregon has established a non-Oregon residence.

(7) If institution records show that the residence of a student or the person upon whom the student is dependent is outside of Oregon, the student shall continue to be classified as a nonresident until entitlement to resident classification is shown. The burden of showing that the

residence classification should be changed is on the student requesting the change.

(8) Notwithstanding section (4) of this rule, a student who is financially dependent on a non-Oregon resident may nonetheless be considered an Oregon resident if the student resides in Oregon for at least 12 consecutive months with a parent or legal guardian who has both:

- (a) established and maintained an Oregon domicile for 12 consecutive months; and
- (b) during that period, has been primarily engaged in activities other than those of being a college student.

Residency Consideration Factors

(1) The following factors, although not necessarily conclusive or exclusive, have probative value in support of a claim for Oregon resident classification:

- (a) Reside in Oregon for 12 consecutive months prior to the beginning of the term for which resident classification is sought and during that period be primarily engaged in activities other than those of a college student;
- (b) Reliance upon Oregon resources for financial support;
- (c) Domicile in Oregon of persons legally responsible for the student;
- (d) Acceptance of an offer of permanent employment in Oregon; and
- (e) Ownership by the person of his or her living quarters in Oregon.

(2) The following factors, standing alone, do not constitute sufficient evidence to effect classification as an Oregon resident:

- (a) Voting or registration to vote;
- (b) Employment in any position normally filled by a student;
- (c) The lease of living quarters;
- (d) Admission to a licensed practicing profession in Oregon;
- (e) Automobile registration;
- (f) Public records, for example, birth and marriage records, Oregon driver's license;
- (g) Continuous presence in Oregon during periods when not enrolled in school;
- (h) Ownership of property in Oregon or the payment of Oregon income or other Oregon taxes; or
- (i) Domicile in Oregon of the student's spouse.

(3) Reliance upon non-Oregon resources for financial support is an inference of residency in another state.

Evidence of Financial Dependency

(1) In determining whether a student is financially dependent, a student must provide:

- (a) Evidence of established domicile of the person claiming the student as a dependent; and
- (b) The identification of the student as a dependent on the federal and state income tax returns of the person claiming the student as a

dependent. Additional documentation to substantiate dependency during the current calendar year may be required at a later time if deemed necessary by the institution.

(2) A student who provides evidence that he or she is a financially dependent person under these rules shall not be required to establish a 12-month domicile prior to classification of resident status, provided such a student may not be classified as a resident while receiving financial assistance from another state or state agency for educational purposes.

Residence Classification of Armed Forces Personnel

(1) For purposes of this rule, members of the armed forces means officers and enlisted personnel of:

(a) The Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;

(b) Reserve components of the Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;

(c) The National Guard of the United States and the Oregon National Guard.

(2) Active members of the armed forces and their spouses and dependent children shall be considered residents for purposes of the instructional fee if the members:

(a) Reside in this state while assigned to duty at any base, station, shore establishment, or other facility in this state;

(b) Reside in this state while serving as members of the crew of a ship that has an Oregon port of shore establishment as its home port or permanent station; or

(c) Reside in another state or a foreign country and file Oregon state income taxes no later than 12 months before leaving active duty.

(3) An Oregon resident entering the armed forces retains Oregon residence classification until it is voluntarily relinquished.

(4) An Oregon resident who has been in the armed forces and assigned on duty outside of Oregon, including a person who establishes residency under section (2)(c) of this rule, must, within a reasonable time, demonstrate an intent to retain classification as an Oregon resident. Such intent may be shown by returning to Oregon within six months after completing service in the armed forces.

(5) A person who continues to reside in Oregon after separation from the armed forces may count the time spent in the state while in the armed forces to support a claim for classification as an Oregon resident.

(6) The dependent child and spouse of a person who is a resident under section (2) of this rule shall be considered an Oregon resident. "Dependent child" includes any child of a member of the armed forces who:

(a) Is under 18 years of age and not married, otherwise emancipated or self-supporting; or

(b) Is under 23 years of age, unmarried, enrolled in a full-time course of study in an institution of higher learning, and dependent on the member for over one-half of his/her support.

Residence Classification of Members of Oregon Tribes

(1) Students who are enrolled members of federally recognized tribes of Oregon or who are enrolled members of a Native American tribe which had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon shall be assessed resident tuition regardless of their state of residence.

(2) For purposes of this rule, the federally recognized tribes of Oregon are:

(a) Burns Paiute Tribe;

(b) Confederated Tribes of Coos, Lower Umpqua and Siuslaw;

(c) Confederated Tribes of Grand Ronde Community of Oregon;

(d) Confederated Tribes of Siletz Indians of Oregon;

(e) Confederated Tribes of the Umatilla Indian Reservation;

(f) Confederated Tribes of the Warm Springs Indian Reservation;

(g) Coquille Indian Tribe;

(h) Cow Creek Band of Umpqua Indians;

(i) Klamath Tribes.

(3) For purposes of this rule, the Native American tribes which had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon are:

(a) CALIFORNIA:

(A) Benton Paiute Tribe;

(B) Big Bend Rancheria;

(C) Big Lagoon Rancheria;

(D) Blue Lake Rancheria;

(E) Bridgeport Indian Colony;

(F) Cedarville Rancheria;

(G) Fort Bidwell Indian Tribe;

(H) Hoopa Valley Tribe;

(I) Karuk Tribe of California;

(J) Likely Rancheria;

(K) Lookout Rancheria;

(L) Lytton Rancheria;

(M) Melochundum Band of Tolowa Indians;

(N) Montgomery Creek Rancheria;

(O) Pit River Tribe;

(P) Quartz Valley Indian Community;

- (Q) Redding Rancheria;
 (R) Roaring Creek Rancheria;
 (S) Smith River Rancheria;
 (T) Susanville Rancheria;
 (U) Tolowa-Tututni Tribe;
 (V) Winnemucca Colony;
 (W) XL Ranch;
 (X) Yurok Tribe.
- (b) IDAHO:
- (A) Nez Perce Tribe of Idaho;
 (B) Shoshone-Bannock Tribes.
- (c) NEVADA:
- (A) Duck Valley Shoshone-Paiute Tribes;
 (B) Fallon Paiute-Shoshone Tribe;
 (C) Fort McDermitt Paiute-Shoshone Tribe;
 (D) Lovelock Paiute Tribe;
 (E) Pyramid Lake Paiute Tribe;
 (F) Reno-Sparks Indian Colony;
 (G) Summit Lake Paiute Tribe;
 (H) Walker River Paiute Tribe;
 (I) Winnemucca Indian Colony;
 (J) Yerington Paiute Tribe.
- (d) OKLAHOMA: Modoc Tribe of Oklahoma.
- (e) WASHINGTON:
- (A) Chehalis Community Council;
 (B) Colville Confederated Tribes;
 (C) Quinault Indian Nation;
 (D) Shoalwater Bay Tribe;
 (E) Yakama Indian Nation.

(4) A student seeking to be assessed resident tuition under the provisions of this rule shall submit, following procedures prescribed by the OUS institution where the student seeks to enroll, a photocopy of tribal enrollment that documents tribal membership.

Residence Classification of Non-Citizens

A person who is not a citizen of the United States may be considered an Oregon resident if the person qualifies as a resident and is one of the following:

- (1) A lawful permanent resident. The date of receipt of an application for lawful permanent residency shall be the earliest date upon which the 12-month residency requirements may begin to accrue.
- (2) An immigrant granted refugee or political asylum in the United States, or entering through a special parole program (such as the Haitian Family Reunification Parole Program, the Cuban Family Reunification Parole Program, the Central American Minor Refugee/Parole Program, the Filipino World War II Veterans Parole Program). The date of receipt of an application for political asylum, refugee status, or qualifying special parole program shall be the earliest date upon which the 12-month residency requirements under Section B may begin to accrue.
- (3) A person holding one of the following non-immigrant visa classifications: A, E, G, H-1B, H-1C, the spouse or child of a person holding an H-1B or H-1C visa, I, K, L, NATO, O, R, S, T, TN, U, or V. The date of the issuance of a visa for one of these classifications shall be the earliest date upon which the 12-month residency requirements may begin to accrue. A person possessing a non-immigrant or temporary visa that is not identified under this rule shall not be considered an Oregon resident.
- (4) A person who is a citizen of an American territory or a sovereign nation that does not require a nonimmigrant visa to travel to the US.
- (5) An immigrant granted a federal status leading to the establishment of permanent residency or citizenship in the United States. Documentation of a status that is not explicitly included in this compact will be at the discretion of the Interinstitutional Residency Committee.

Changes in Residence Classification

- (1) If an Oregon resident student enrolls in an institution outside of Oregon and later seeks to re-enroll in a University that applies these residency standards, the residence classification of that student shall be re-examined and determined on the same basis as for any other person.
- (2) A student who becomes eligible for resident tuition during a term of enrollment at a University will not qualify for resident tuition until the beginning of the next term.
- (3) Once established, classification as a resident continues so long as the student remains in continuous academic year enrollment in the classifying institution.
- (4) A person who seeks classification as a resident under these rules shall complete and submit a notarized Residence Information Affidavit. The affidavit and all required supportive documents and materials must be submitted by the last day to register for the term in which resident status is sought.
- (5) No other institution is bound by any determination of residency except by duly authorized officials under procedures prescribed by these rules including timely submittal of the notarized affidavit.

Review of Residence Classification Decisions

An interinstitutional residency committee (IRC) is established consisting of the officers who determine student residence classification at each university that applies this residency procedure. The chair of the committee shall rotate among the universities with no chair serving more than two consecutive years. A majority of the members of the committee shall constitute a quorum. A majority of a quorum may make recommendations.

Residence cases of unusual complexity, especially where there may be conflict of rules, may be referred to by the originating classification officer to the IRC for its recommendation.

Any person who is aggrieved by the originating classification officer's classification decision may, within 10 days of the date of mailing or other service of the classification decision, request that the IRC review the classification and make recommendations to the registrar or designee of the originating university. The appeal must be in writing and shall be filed with the originating university. An aggrieved person may supply written statements to the IRC for consideration in reviewing the case and may also make oral presentation to the IRC on a date to be scheduled by the IRC. The IRC shall make a recommendation to the registrar or designee of the originating university. That registrar or designee shall then issue a decision. The decision of the registrar or designee shall be final unless appealed.

A person dissatisfied with the decision of the registrar or designee may, within 10 days of the date of the mailing or other service of the decision, appeal the decision to the president or designee of the originating university. An appeal shall be in writing only. The decision of the president or designee shall be final.

A person granted a meritorious hardship exception to residency under the Oregon Administrative Rules regarding residency prior to July 1, 1990, shall not lose the exception solely because of the repeal of the exception authorization.

Registration and Academic Policies

registrar@uoregon.edu

Student Records Policy

In compliance with the Family Educational Rights and Privacy Act, the University of Oregon has formulated the Student Records Policy to outline the proper handling and release of student educational records. The following is a summary of that policy.

The university maintains only student records relevant to the educational or related purposes of the university. Students enrolled in the university generally have the right to inspect educational records maintained by the university that directly affect them. Those records are not released to anyone other than the student without the signed, written consent of the student, with the following exceptions:

1. University personnel who have legitimate interests
2. Officials at another school where the student seeks to enroll or is already enrolled
3. At the direction of a court
4. In situations of health or safety emergency
5. The disclosure is information designated as directory information

Upon request, the university releases directory information about the student, but the student may request, in writing, that such information not

be released. Contact the Office of the Registrar for details about making a request for nonrelease.

The full text of the Student Records Policy is available from the Office of the Registrar and on the registrar's website.

Academic Year

The university divides the academic year into three terms of approximately 11 weeks each (except for the School of Law, which uses a semester calendar).

The summer session supplements the work of the fall, winter, and spring terms; announcements are issued for that session.

Students may enter the university at the beginning of any term, with the exception of architecture students, who should see Application Deadlines under **Admissions**. The university's new-student orientation, IntroDUCkTion, is held in July and August for freshman and transfer students who enter fall term. All new students are required to complete IntroDUCkTion; students who do not attend IntroDUCkTion are oriented and register for classes during the Week of Welcome. See the **Academic Calendar** for other important dates during the current academic year.

Students are held responsible for familiarity with university requirements governing such matters as registration, add/drop deadlines, academic standards, student activities, student conduct, and organizations. Academic regulations are listed on the registrar's website.

Grading Systems

The university has two grading systems. When regulations permit, a student may elect to be evaluated for a course with a letter grade or pass/no pass (P/N). Letter-graded work is designated A, B, C, D, or F. Pass/no pass work is designated P or N. An asterisk after the P or N indicates that the course is offered P/N only. See Bachelor's Degree Requirements for regulations on graded credits.

Each department, school, or special program establishes regulations on pass/no pass courses for its majors. Before exercising the P/N option, students should confer with advisors.

Students must choose their grading option at the time of registration and are permitted to change it only within the period allowed.

Students who register and never attend or participate in a course and students who attend and participate in part of the course but do not complete the course requirements will receive a grade of F or N, based on the grading option in registration.

Graded

Student work is graded as follows: A, excellent; B, good; C, satisfactory; D, inferior; F, unsatisfactory (no credit awarded). Instructors may affix + or – to the grades A, B, C, and D.

Pass/No Pass

Courses that are offered pass/no pass only are assigned P* or N* grades. Courses offered for letter grades or pass/no pass use P or N grades without an asterisk.

Student work may be graded as follows: P (pass), satisfactory performance (C– or better for undergraduate course work, B– or better for graduate course work), or N (no pass), unsatisfactory performance, no credit awarded (D+ or worse for undergraduate course work, C+ or worse for graduate course work). The class schedule designates courses that are offered only pass/no pass. Passing credits are also awarded for advanced placement and College-Level Examination Program work and for work taken at another collegiate institution when that institution has already recorded a pass/no pass mark or if the registrar's staff cannot equate the quality of the work to the UO grading system.

Marks

AU (Audit)

Student-initiated mark. Audit enrollments are recorded on the student's academic record, but no credit is earned by audit. Audited classes do not satisfy degree requirements, nor do they count toward the Division of Graduate Studies continuous enrollment requirement.

I (Incomplete)

A mark of "I" represents an agreement between an instructor and a student to extend the deadline for coursework completion. Incompletes shall be granted when the instructor determines that the student meets all the following criteria. The student:

- has been making satisfactory progress on coursework as determined by the criteria in the syllabus;
- has been active in the course;
- is unable to complete a portion of the course requirements due to extenuating circumstances beyond their control that occurred after the last day to drop a class (end of week 7 of fall/winter/spring terms; variable dates for summer courses);
- is able to independently complete the remaining requirements without attending additional classes beyond the term or receiving additional instruction; and
- requests an Incomplete by the published deadline

If additional class attendance or instruction is required to complete course requirements, the instructor shall not issue an Incomplete.

Lack of engagement, poor performance, or a desire to repeat the course are unacceptable reasons for issuance of the "I" mark.

Instructors shall provide to the student access to course materials necessary to complete the missing work.

Incomplete grades can only be granted by instructors and instructors are under no obligation to grant students an incomplete grade if in their judgement the criteria stated above are not met.

An Incomplete shall not be recorded by the instructor unless a contract between the instructor and student has been completed and filed appropriately.

Effective fall 2022 - General Process for Incompletes

- Incompletes are initiated by the student
- Student contacts instructor and requests Incomplete by 5pm on the last day of finals week (fall, winter, and spring terms)

- If the instructor agrees that the student meets the criteria, the instructor and the student complete a contract outlining how the Incomplete can be resolved, the deadline for resolving the incomplete, and the default grade should the student not complete the agreed upon work. The default grade is the grade the student would receive according to the syllabus grade guidelines with no credit for the missing work
- This form is filed with the department
- The missing work indicated on the form must be completed by the earlier of:
 - grading deadline of the term the student applied to graduate, or
 - deadline stated on the Incomplete Request Form (can be extended at the discretion of the instructor), or
 - the day grades are due one academic year later

For students with Incomplete contracts, the instructor will record the "grade" in DuckWeb that indicates an Incomplete has been agreed to. Currently, that is an "I". The instructor will also record, in DuckWeb and/or the contract form, the grade the student would have received in the course if they received no credit for the missing work. This becomes the default grade that replaces the Incomplete mark should the student not complete the work outlined in the contract by the appropriate deadline (either the grading deadline of the term the student applied to graduate or the day grades are due one academic year later).

If the student completes the work defined in the contract by the agreed upon date, the instructor calculates and updates the grade via the grade change process.

This policy applies to all undergraduate and graduate courses.

The Incomplete mark will roll to the default grade even if an incomplete contract is in place if the student has applied to graduate. Degree application status is not directory information.

A mark of I, with a default or later change to F, will not convert to N as part of First Term Forgiveness.

W (Withdrawal)

Student-initiated mark. Students may withdraw from a course through web registration. See the online class schedule for deadlines.

X (No Grade Reported)

Registrar-initiated mark. The instructor did not report a grade for the student.

Y (No Basis for Grade)

Instructor-initiated mark used prior to fall 2017. There is no basis for evaluating the student's performance.

Effective fall 2017, the Y mark is no longer used. Instructors issue a grade of F or N, as indicated by the grading option, to students who register and never attend or participate in the course, and to students who attend and participate in part of the course but do not complete all course requirements.

First-term Grade Forgiveness

Effective fall 2020, the grading option for first-term students who receive an F in a course will automatically be converted from graded to pass/no pass. First-term students who receive a D will have until the end of the following term (defined as 11:59 pm PT Friday of the 10th week for Fall, Winter, Spring and 11:59 pm PT Friday of the 11th week of the final 12-

week summer session) to request that their grading option be converted from graded to pass/no pass. Students are required to meet with an advisor designated by the Office of Academic Advising before submitting a request to have D grades change to N and are encouraged to connect with a Financial Aid counselor.

Eligible students whose F is converted to N may, at their discretion, opt out of the policy and request that the Office of the Registrar convert the grade back to F by the end of the following term. Academic standing will be based on the F grade.

This policy applies to:

- All matriculated first-term admitted undergraduate students pursuing their first bachelor degree, including transfer students.
- All undergraduate classes taken by those students that allow the Pass/No Pass grading option. Classes where the student's grade is associated with a conduct case where the student was found responsible will not be eligible to change to an N under this policy.

For students who receive a D, academic standing will initially be calculated using the letter grade but will be recalculated using the P/N grade if the student requests the grading option change before the end of the following term.

For students who receive an F, academic standing will be calculated using the P/N grading option.

Students who receive an F will have the change to Pass/No Pass made by the Office of the Registrar before calculation of academic standing for the term. Any other changes to grading mode made under this policy will result in a recalculation of academic standing for the term if the Office of the Registrar receives the request from the student prior to the end of the following term. That recalculation will be based on grades recorded for the student at the time the change takes place irrespective of whether any other grade changes were related to this policy.

F grades that are recorded after the grading deadline will not automatically convert to an N; students who wish to request such a change will need to submit a petition for a late grade option change.

A mark of I, with a default or later change to F, will not convert to N as part of First Term Forgiveness.

A student's record (grades, grade option, academic standing) will not be altered under this policy after the end of the following term. A student whose grade changes for other reasons (petitions to change grade option, instructor change, etc.) will not have their academic standing recalculated.

Students whose grade is updated as a result of this policy will be required to meet with an advisor designated by the Office of Academic Advising before the end of the following term. It is strongly recommended that if students are receiving veteran's benefits, they also meet with a veteran's certifying official in the Office of the Registrar.

Grade Point Average

For terms prior to fall 2016, grades for courses taken at the University of Oregon appear on both the official and unofficial transcript and are included in the term and cumulative GPA calculation.

Effective fall 2016 through summer 2019, for undergraduate courses not designated as repeatable for credit, only the second grade earned of a repeated course is calculated into the cumulative GPA.

Effective fall 2019, all graded attempts of courses taken at the University of Oregon are calculated into the term and cumulative GPAs.

Grades for undergraduate courses taken at the University of Oregon appear on both the official and unofficial transcript. However, credit for nonrepeatable courses is given only once.

Grades recorded as a result of sanctions and/or academic misconduct are included in the cumulative GPA and will not be excluded in any event of repetition. Conduct grades may not be petitioned.

Four points are assigned for each credit of A, three points for each credit of B, two points for each credit of C, one point for each credit of D, and zero points for each credit of F. The plus sign increases the points assigned the letter grade by 0.3 per credit, and the minus sign decreases the points assigned the letter grade by 0.3 per credit. The grade point average is calculated by dividing total points by total credits of A, B, C, D, and F. Marks of AU, I, W, X, Y, and the grades of P and N are disregarded in the computation of the grade point average. The grade point average is truncated at two digits after the decimal point.

Academic Standing

When there is evidence of lack of satisfactory progress toward meeting graduation requirements, the Scholastic Review Committee may place students on academic probation or disqualify them from attendance at the university. For information and assistance, students should inquire at the Office of Academic Advising, 101 Oregon Hall.

After grades are processed at the end of each term, term and cumulative UO GPAs are calculated for each undergraduate student, admitted or nonadmitted. A student's academic standing is based on attempted and earned hours and on the term and cumulative UO GPAs.

If a grade change affects the student's term and cumulative UO GPAs and academic standing, the student should ask the instructor to submit the grade change through DuckWeb immediately. Retroactive changes to a term's academic standing are made only to remove probation from the term record and only if grade changes are submitted by the last day to register and add classes for the following term. If grade changes that affect GPAs and academic standing are submitted later than this, the student's probation standing for the previous term is not amended.

Academic Warning

Students receive an academic warning when the UO term GPA is between 0.00 and 1.99, inclusive, even if the UO cumulative GPA is 2.00 or higher. This notation is not recorded on the student's official academic transcript, but does appear on the unofficial transcript. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification.

Academic warning is given as a courtesy to advise students of potential academic difficulty. Academic probation does not depend on the student receiving prior notice of academic warning.

Academic Probation

Academic probation is earned and the notation "Academic Probation" is recorded on the student's academic transcript whenever the following conditions exist:

1. When the UO cumulative GPA is lower than 2.00. Students who have earned 44 or fewer credits are allowed two terms of probation before they are subject to disqualification. Students with more than 44 credits are only allowed one term of probation before they are subject to disqualification. Students on academic probation whose UO cumulative GPA is lower than 2.00 and whose UO term GPA is 2.00 or higher remain on academic probation
2. When students have received academic warning for two consecutive terms and their subsequent UO term GPAs are between 0.00 and 1.99, inclusive, even if the UO cumulative GPA is above a 2.00. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification

Students on academic probation are limited to a study load of no more than 15 credits. Incoming students may be admitted on academic probation and are notified when such action has been taken; these students may be subject to disqualification after a single term of probation.

Academic Disqualification

Academic disqualification is earned and the notation "Disqualification" is recorded on the student's academic transcript whenever the following conditions exist:

1. Students on academic probation for having a UO cumulative GPA lower than 2.00 who earn a UO term GPA lower than 2.00 in their next term
2. Students on academic probation for having a term GPA below 2.00 after two consecutive terms on academic warning and who earn less than a 2.00 term GPA for the fourth consecutive term. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification

Students may apply for reinstatement after disqualification by contacting the Office of Academic Advising. Petitions are reviewed to determine the probability that a student can satisfactorily complete the requirements of a degree program. The student may enroll during the academic year only if the Scholastic Review Committee allows the student to continue on probationary status. Students may enroll for summer classes without being reinstated. Students who have been disqualified must petition for reinstatement to graduate.

Exceptions to Academic Regulations

1. Two standing university committees review requests in writing for exceptions to university rules, regulations, deadlines, policies, and requirements: the Academic Requirements Committee and the Scholastic Review Committee. For information about how to submit a petition to the Academic Requirements Committee, inquire at the Office of the Registrar, 234 Oregon Hall; call 541-346-2935. For information about how to submit a petition to the Scholastic Review

Committee, inquire at the Office of Academic Advising, 101 Oregon Hall; call 541-346-3211

2. For information about removal from academic probation and academic reinstatement options, inquire at the Office of Academic Advising

Registering for Classes

Class Schedule

The class schedule is published online two weeks prior to priority registration each term. The schedule lists courses offered for the term. Dates, deadlines, procedures, and information about tuition and fees can be found on the registrar's website.

Registration

A registration period takes place before the start of classes each term; the dates are published in advance. Students are not officially registered and are not entitled to attend classes until they have completed the prescribed registration procedures. Students must minimally be registered for "audit" to sit in on classes.

Once registered, students are academically and financially responsible for their course enrollments until they officially withdraw. Withdrawal after the term begins results in some financial liability. Appropriate withdrawal procedures are explained on the registrar's website.

New Student Registration

Entering undergraduate students should plan to attend IntroDUCKtion, offered during the summer. After being notified of admission to the University of Oregon for fall term, new students receive information about this program. Space is limited, so sign up early. IntroDUCKtion is a requirement for all new students. Students admitted in terms other than fall term will attend an orientation session specific to the term for which they are admitted. Additional information is available on the Student Orientation (<https://orientation.uoregon.edu/introducttion/>) website.

Reenrollment

Admitted undergraduate students who plan to register any time during an academic year after an absence of four or more terms, not including summer session, must notify the Office of the Registrar by filing a reenrollment form, available on the registrar's website.

Reenrollment procedures for graduate students are described in the **Division of Graduate Studies** section of this catalog.

Summer Session

- Non-degree seeking (CEP) students planning to register for summer session should file the registration eligibility form, provided on our website (<https://registrar.uoregon.edu/non-degree-seeking/>). Non-degree seeking students who were enrolled within the prior year do not need to submit this form.
- Admitted undergraduate or graduate students may register without making any special request, subject to the normal reenrollment policies for their student level.
- Disqualified undergraduate students must file a reenrollment form if they have not enrolled during the preceding academic year.

Transcripts

Students are required to send official transcripts to the Office of the Registrar for any academic work taken at other institutions while completing their baccalaureate degree program. A student's official

UO academic record must be kept complete at all times. Exceptions are made only for special and provisional students who are formally admitted under individual arrangements, and for summer transient and community education students who are not formally admitted. Failure to file required records can result in the cancellation of admission or registration; disciplinary action may be initiated and sanctions may be imposed by the university.

Nonrepeatable Courses

Undergraduate students may not (without prior approval by the Academic Requirements Committee) register for nonrepeatable courses in which they are currently enrolled or for which they have already earned a Pass or C or better at the UO or from a transferring institution. Students may register for a nonrepeatable course for which they have already earned a No Pass or C– or less at the UO or from a transferring institution without prior approval, but not more than three times in total. All attempts are counted toward this limit. Credits for nonrepeatable courses are awarded only one time. All graded attempts of repeated courses taken at the UO are calculated into the term and cumulative GPAs. Additional information is available on the registrar's website.

Prerequisite

Some courses require that students have completed previous coursework in order to proceed to the next course. Prerequisite courses must be passed with C– or better or P for undergraduate courses; B– or better or P for graduate courses; and D or better or P for law courses. Courses may have a higher minimum grade for completing the prerequisite course.

Regression

Regression occurs when a student takes a course that is at a lower level than a course the student has previously passed. General Limitation number 11 states *Student may not receive credit for courses that are designated by the department as regressive prerequisites for courses in which they are currently enrolled or have already received credit.*

Academic departments have the authority to designate courses as regressive. Information about the specific order in which courses must be taken and about course regression can be found on this website: <https://registrar.uoregon.edu/regression> (<https://registrar.uoregon.edu/regression/>). **Students do not earn credit for regressive courses.**

Alternate Ways to Earn Credit

The university has established programs through which students may earn credit toward graduation and, at the same time, decrease the cost and time required for standard undergraduate study. Brief descriptions of these programs appear below. Additional information is available from the Office of the Registrar.

Advanced Placement

Students who receive satisfactory grades in advanced placement examinations administered by the College Board may, on admission to the university, be granted credit toward a bachelor's degree in comparable university courses. Information about credit awarded and scores required is available from the registrar's website.

College-Level Examination Program

For some courses, departments have authorized the use of subject examinations prepared by the College-Level Examination Program (CLEP). Examinations are available, for example, in calculus, chemistry, economics, French, German, literature, Spanish, and sociology. Once

a student is admitted to the university, it accepts as transfer credit the successful completion of CLEP subject examinations by students. More information is available online on the registrar's website (<http://registrar.uoregon.edu/current-students/alternative-ways-to-earn-credit/>) and at testing.uoregon.edu (<http://testing.uoregon.edu>).

Community Education Program

Individuals who want to enroll for 8 credits or fewer per term in university courses without formally applying for admission may do so through the Community Education Program. Part-time students of all ages choose from a variety of courses. More information is available at the Academic Extension office located at the Baker Downtown Center, 975 High St., Suite 110, 541-346-5614.

Credit by Examination

Credit by examination allows formally admitted undergraduate students to challenge undergraduate university courses by successful completion of the exam. Course registration is not needed. Students seeking to receive credit by examination must be registered for the term in which the exam is given. Credit by examination may be earned only in courses whose content is identified by the title in the University of Oregon catalog. Students should first contact their department or advisor to determine the eligibility for credit by examination. Students must obtain faculty and department approvals before the exam can be scheduled. If eligible, the department approval form and instructor results form are available on the Office of the Registrar's website. Students are billed an examination fee of \$25 per credit hour..

Successful credit by examination is shown as transfer credit on the UO transcript and may be recorded as a pass (P) or graded (A, B, C, D), consistent with the options listed in the class schedule. Credit by examination may not be counted toward the satisfaction of the graduation residency requirement or for fulfillment of the requirement to complete 45 credits graded A, B, C, D at the University of Oregon. However, credit by examination may be counted toward the requirement to complete 168 credits graded A, B, C, D, P* from all institutions attended.

The following are not available for credit by examination:

- Courses numbered 0–99; Field Studies (196); Workshop, Laboratory Projects, or Colloquium (198); Special Studies (199); courses numbered 200 or 399–410
- First-year second-language courses
- 100-level mathematics courses and MATH 211, MATH 212, MATH 213
- English composition courses (WR 121Z, WR 122Z, WR 123)
- An elementary language course taught in the student's native language
- A course for which a CLEP examination is available
- A course that substantially duplicates credit already earned
- A course that is more elementary in nature than credit already earned
- A course in which the student is already enrolled for credit
- A course for which the student has received a grade of A, B, C, D, P, P*, I, X, or Y
- A course for which the student has already taken and failed an examination for credit

Contact the Office of the Registrar for more information.

International Baccalaureate

Students who receive satisfactory grades in International Baccalaureate examinations may, on admission to the university, be granted credit in comparable university courses toward a bachelor's degree. Credit can be earned, for example, in art, biology, business, chemistry, Chinese, computer science, economics, English, French, German, history, geography, Japanese, Chinese, mathematics, music, physics, psychology, social and cultural anthropology, Spanish, Swedish, and theater arts. A complete list of university credit earned by International Baccalaureate examinations is available from the registrar's website.

Military Credit

The university generally grants credit for military education experiences as recommended by the American Council on Education's *Guide to the Evaluation of Educational Experiences in the Armed Services*, and in accordance with University of Oregon policies regarding transfer credits. Students may request evaluation of credits earned through the Community College of the Air Force, Defense Language Institute, or military education. Students must submit official copies of college transcripts or a Certificate of Completion from the Defense Language Institute. An official copy of the student's DD Form 214, DD Form 295, or a Joint Services Transcript (JST) is required for military credit.

Bachelor's Degree Requirements

To earn a University of Oregon bachelor's degree, students must satisfy the following requirements.

University Requirements

Credits

The bachelor of arts, bachelor of science, bachelor of education, bachelor of fine arts, bachelor of landscape architecture, bachelor of music, and bachelor of music in music education degrees require a total of 180 credits with passing grades. The bachelor of interior architecture requires a total of 225 credits, and the bachelor of architecture requires a total of 231 credits.

Concurrent Degrees

Concurrent degrees are awarded under the following conditions:

1. The second degree may be offered by the same school or college
2. The student completes the departmental requirements for each major
3. The student completes the core education requirements (formerly the general-education requirements) for each degree
4. The student completes a minimum of 36 credits at the UO beyond those required for the degree that has the highest credit requirement
5. The student applies for the first degree on DuckWeb and submits a request to the Office of the Registrar for the second degree

Students are able to receive concurrent degrees from the same college or school when one of the majors is restricted to one degree.

Academic Major

All bachelor's degrees must be awarded with a major. Minimum requirements are 36 credits in the major, including 24 in upper-division work. Specific requirements are listed under individual departments.

A student may be awarded a bachelor's degree with more than one major by completing the general university degree requirements for the designated majors and degree and all requirements in each major as specified by the major departments, schools, or colleges.

Declaring a Major (First-Time, Full-Time Freshman Students)

1. Undergraduates who matriculated into the UO as first-time, full-time freshmen, should declare a major by the end of the fourth week of their sixth term of enrollment (typically spring term of the second year at Oregon)
2. Students who have not declared a major by the end of the fourth week of the sixth term of enrollment will need to see an advisor and receive a personal identification number (PIN) before they can register for the next term's classes. Advisors can either assist students in choosing a major or grant an exception and help students develop a plan to declare a major

Declaring a Major (Transfer Students)

1. Transfer students should declare a major by the end of the fourth week of the third term of enrollment at Oregon
2. Transfer students who have not declared a major by the end of the fourth week of the third term of enrollment at the UO will need to see an advisor and receive a PIN before they can register for the next term's classes. Advisors can either assist students in choosing a major or grant an exception and help students develop a plan to declare a major

Academic Minor

Unless specified by a particular department, a minor is not required for a bachelor's degree. Students choosing to complete a minor must earn a minimum of 24 credits, including 12 in upper-division work. Minor requirements, including residency, are listed under department headings. A minor may be awarded only at the time a bachelor's degree is conferred.

Upper-Division Work

A minimum of 62 credits in upper-division courses (300 level or higher) are required.

Residency

After completing 120 of the 180 required credits, 165 of the 225 required credits, or 171 of the 231 required credits, each student must complete at least 45 credits of UO courses in residence at the university.

Total Credits of A, B, C, D, P*

Students must earn 168 transfer or University of Oregon credits with grades of A, B, C, D, or P*. Credits earned in courses offered only pass/no pass use the P* designation.

UO Credits of A, B, C, D

A minimum of 45 credits graded A, B, C, or D must be earned at the University of Oregon. Courses required in the major and designated in the class schedule as pass/no pass (P/N) only may be counted toward the 45-credit requirement only if the 168-credit requirement has been satisfied.

Satisfactory Work

Graduation from the university requires a minimum UO cumulative grade point average of 2.00.

Written English

Two courses (Composition I (WR 121Z) and either Composition II (WR 122Z) or College Composition III (WR 123) or equivalents) passed with grades of C– or better or P are required for all undergraduate degrees. For placement, prerequisites, or exemption, see policies in the English section of this catalog.

Requirements for Bachelor of Arts and Bachelor of Science

Students must choose to graduate with a specific degree and major (for example, bachelor of arts with a major in chemistry or bachelor of science with a major in chemistry). See majors and degrees listed in the Undergraduate Programs (p. 41) section of this catalog.

Bachelor of Arts Requirements

The bachelor of arts (BA) degree requires proficiency in a second language. The second-language requirement may be met in one of the following ways:

- 1. Completion of at least the third term, second year of a second-language course taught in the language, with a grade of C– or better or P
- 2. Satisfactory completion of an examination administered by the appropriate language department, showing language proficiency equivalent to that attained at the end of two years of college study
- 3. For students whose native language is not English: provide a final official high school transcript to the Office of the Registrar as evidence of formal training in the native language and completion of Composition I (WR 121Z) and either Composition II (WR 122Z) or College Composition III (WR 123) with grades of C– or better or P. Students who graduate from a US high school are not eligible to receive the BA Language waiver.
- 4. Students may fulfill the UO second-language requirement by taking the all three courses in the year-long sequence in Old English (ENG 428, ENG 429, ENG 430) and by achieving a B- or higher in ENG 430. The sequence must be taken in order, since ENG 428 is a prerequisite for ENG 429, which is a prerequisite for ENG 430.

Bachelor of Science Requirements

The bachelor of science (BS) degree requires proficiency in mathematics or computer science or a combination of the two. The requirement may be satisfied in one of the following ways, depending on the student's experience in mathematics. Courses must be completed with grades of C– or better or P.

- 1. Students with a limited background in mathematics can complete the requirement with any of the combinations of three courses listed below. Inquire with your advisor for other possible combinations.

Code	Title	Credits
Option 1		
Select three of the following:		12
MATH 105Z	Math in Society	
MATH 106	University Mathematics II	
MATH 107	University Mathematics III	

MATH 111Z	Precalculus I: Functions
STAT 243Z	Elementary Statistics I
CS 111	Introduction to Web Programming
CS 122	Introduction to Programming and Problem Solving

Option 2*		
MATH 211	Fundamentals of Elementary Mathematics I	4
MATH 212	Fundamentals of Elementary Mathematics II	4
MATH 213	Fundamentals of Elementary Mathematics III	4

*Recommended for Educational Foundations majors only

- 2. Students who placed above the Precalculus I: Functions (MATH 111Z) level on the mathematics placement test may complete MATH 112Z or MATH 241 and one of the following:

Code	Title	Credits
MATH 105Z	Math in Society	4
MATH 106	University Mathematics II	4
MATH 107	University Mathematics III	4
STAT 243Z	Elementary Statistics I	4
CS 111	Introduction to Web Programming	4
CS 122	Introduction to Programming and Problem Solving	4

*A student can satisfy this requirement by taking both MATH 112Z and MATH 241.

- 3. Students who have Precalculus I: Functions (MATH 111Z) skills and an additional prerequisite course or appropriate skills may complete the requirement with one course chosen from the following:

Code	Title	Credits
MATH 242	Calculus for Business and Social Science II	4
MATH 246	Calculus for the Biological Sciences I	4
MATH 251Z	Differential Calculus	4
CS 210	Computer Science I	4

Areas of Inquiry Requirements

To promote educational breadth, bachelor's degree candidates are required to complete work in each of three areas representing comprehensive fields of knowledge: arts and letters, social science, and science. Approved area-satisfying courses must be at least 3 credits each.

The current list of area-satisfying courses are listed in the Core Education Courses (p. 45) section of this catalog.

Areas of Inquiry Requirements for Specific Degrees

- 1. **Bachelor of Arts or Science.** Students must complete a minimum of 4 approved area-satisfying courses of at least 3 credits in each of three Areas of Inquiry: arts and letters, social science, and science. Each area must include coursework in at least two different subject codes. No more than three courses with the same subject code may be used to fulfill the requirement. *MUS and MUJ are considered as*

one subject code; *MATH* and *STAT* are considered as one subject code.

2. **Bachelor of Architecture, Education, Fine Arts, Interior Architecture, Landscape Architecture, Music, or Music in Music Education.** Students must complete a minimum 3 area-satisfying courses of at least 3 credits each in each of three Areas of Inquiry: arts and letters, social science, and science. Each area must include coursework in at least two different subject codes. No more than three courses with the same subject code may be used to fulfill the requirement. *MUS* and *MUJ* are considered as one subject code; *MATH* and *STAT* are considered as one subject code.

Cultural Literacy Requirements

United States: Difference, Inequality and Agency

These courses develop students' analytical and reflective capacities to help them understand and ethically engage with the ongoing (cultural, economic, political, social, etc.) power imbalances that have shaped and continue to shape the United States. In addition to considering the scholarship, cultural production, perspectives, and voices from members of historically marginalized communities, students in DIA courses:

- Inquire into intersecting aspects of identity such as race, gender, gender identity, sexuality, socioeconomic status, indigeneity, national origin, religion, or ability;
- Analyze uses of power to marginalize on the basis of identity, as well as the assertions of agency, resistance, and resilience by marginalized groups; and
- Examine historical and contemporary structures, forms of knowledge, cultural practices, or ideologies that perpetuate or change the distribution of power in society.

and undertake one or more of the following:

- Reflect on one's own multiple social identifications and on how they are formed and located in relation to power.
- Practice respectful listening and ethical dialogue around deeply felt or controversial issues.

Global Perspectives

These courses foster a student's encounter with and critical reflection upon cultures, identities, and ways of being in global contexts beyond the United States. Students will consider substantial scholarship, cultural production, perspectives, and voices from members of communities under study, as sources permit. Global Perspectives courses, students will do one or more of the following:

- Engage texts, literature, art, testimonies, practices, or other cultural products that reflect systems of meaning or beliefs beyond the U.S. context;
- Analyze power relations involving different nations, peoples, and identity groups or world regions;
- Examine hierarchy, marginality, or discrimination based on race, ethnicity, gender, gender identity, religion, sexuality, nationality, or ability (or some combination of these).

and undertake one or more of the following:

- Discuss possibly unfamiliar topics using critical vocabulary and concepts.

- Practice respectful listening and civil dialogue around controversial issues.

Study-abroad programs that are ten weeks or longer automatically satisfy this requirement. Programs between five and nine weeks in duration may qualify if specific criteria are met. Contact Global Education Oregon (<http://geo.uoregon.edu/>) for further information.

Bachelor's degree candidates must complete one course in each of the two categories listed above; a minimum of 6 credits in approved courses must be earned.

The current list of courses that satisfy these requirements are listed in the Core Education Courses (p. 45) section of this catalog.

General Limitations

1. A total maximum of 124 credits may be transferred from domestic, regionally accredited junior or community colleges and from international junior or technical colleges. Of the total maximum of 124 credits, only 90 credits may be transferred from an international junior or technical college.
2. A maximum of 48 credits in law, medicine, pharmacy, chiropractic medicine, dentistry, technology, or any combination may be used toward fulfilling total credit hours for the BA or BS degree.
3. A maximum of 24 credits may be used toward fulfilling total credits in the following areas with not more than 12 credits in any one area:
 - a. Lower-division professional-technical courses;
 - b. Physical education activity, military science activity (e.g., MIL 131 and 331), and dance activity (DANC) courses, except for dance activity courses for majors in dance;
 - c. Performance in music (in subject MUP), except for majors in music;
 - d. Applied and/or experiential courses, academic support skills courses, nonacademic field experience courses, or career and professional development courses.
4. For music majors, a maximum of 24 credits in music performance (in subject code MUP), may count toward requirements for the BA or BS degree.
5. For dance majors, a maximum of 36 credits of DANC may count toward requirements for the BA or BS degree.
6. University of Oregon academic records are sealed thirty days after the official conferral date of a degree. After this date, changes to majors and minors, addition of departmental honors, removal of incompletes, grade changes, or other changes to an academic record cannot be made.
7. When the University awards credits for Advanced Placement Program (AP), International Baccalaureate Program (IB), Cambridge Examination Program, the College-Level Examination Program (CLEP), and credit by examination (course challenge), these credits are counted toward the satisfaction of bachelor's degree requirements--except residency and the 45 UO credits graded A,B,C,D. When the university grants credit for AP, IB, Cambridge, and CLEP examinations, pass (P*) credit is granted.
8. For limitations related to repeated courses please refer to *UO Policy on Repeatable and Non-repeatable Undergraduate Courses*.
9. Students may not receive credit for any course assessed as having substantially similar content as a course for which they have already received credit.
10. Students may not receive credit for courses beneath their assessed competency level. Competency level can be assessed by various

means such as placement scores, faculty/departmental assessment, etc.

11. Student may not receive credit for courses that are designated by the department as regressive prerequisites for courses in which they are currently enrolled or have already received credit.
12. Students must have degree-seeking status in order to earn an undergraduate major, minor or certificate; undergraduate majors, minors and certificates must be completed at the time the degree is awarded.

Second Bachelor's Degree

A student who has been awarded a bachelor's degree from an accredited institution may earn an additional bachelor's degree at the University of Oregon. The student must satisfactorily complete all departmental, school, or college requirements for the second degree. Of these requirements, the following must be completed after the prior degree has been awarded:

1. The student must complete an additional 36 credits at the university as a formally admitted student if the prior bachelor's degree was awarded by the University of Oregon, or an additional 45 credits at the university if the prior bachelor's degree was awarded by another institution
2. A minimum cumulative UO GPA of 2.00 in courses taken for the second bachelor's degree is required for the second bachelor's degree
3. A minimum of 18 credits must be graded A, B, C, D if the prior bachelor's degree was earned at the University of Oregon, or 23 credits if at another institution
4. At least 27 credits from coursework within the major must be completed after the conferral of the most recent bachelor's degree
5. The bachelor of arts degree requires proficiency in a second language. Students whose native language is not English may satisfy this requirement by providing a final official high school transcript to the Office of the Registrar as evidence of formal training in the native language and satisfactorily completing Composition I (WR 121Z) and either Composition II (WR 122Z) or College Composition III (WR 123). The bachelor of science degree requires proficiency in mathematics and/or computer science

Bachelor's Degree with Honors

Information about Latin honors and academic honors is listed in the **Academic Honors** section of this catalog. Fellowship and scholarship information is in the **Student Financial Aid and Scholarships (p. 30)** and departmental sections of this catalog.

Oregon Transfer Module

The Oregon Transfer Module (OTM) provides a one-year curriculum for students who plan to transfer to a state of Oregon community college or another Oregon public university. The module allows students to complete one year of general-education foundation coursework that is academically sound and readily transferable within Oregon. Although the OTM is not a certificate or degree, it documents that students have met a subset of common general-education requirements at all Oregon two- and four-year public institutions of higher education.

Any student holding an Oregon Transfer Module that conforms to the guidelines will have met the requirements for the Transfer Module at any Oregon community college or Oregon public university. Upon

transfer, the receiving institution may specify additional coursework that is required for a major, degree requirement, or to make up the difference between the Transfer Module and the institution's total general-education requirements.

Application for an Undergraduate Degree

Undergraduates who plan to receive a bachelor's degree from the University of Oregon must submit an application through DuckWeb, the university's online information system, by the fourth Sunday of the anticipated term of graduation.

The Office of the Registrar encourages students to apply to graduate the term preceding their graduation term. This allows students to plan or change their final term's course schedule to ensure completion of all requirements.

Students who have been academically disqualified must petition for reinstatement to the Scholastic Review Committee to graduate. Students who are out of status due to suspension or expulsion cannot be awarded a degree until they are officially back in status with the university.

All grade changes, removals of incompletes, UO study abroad course work, and transfer work necessary for completion of degree requirements must be on file in the Office of the Registrar by the Friday following the end of the term of graduation. Academic records are sealed thirty days after the conferral of a degree; no changes to the record will be made following that date.

Students who do not apply to graduate will not receive retroactive degrees even if degree requirements were completed at an earlier date.

Applications for graduate degrees are available from the Division of Graduate Studies.

Academic Honors

Departmental Honors

Many departments at the University of Oregon offer a bachelor's degree with honors in the academic major. Students may graduate with honors in the following majors:

College of Arts and Sciences

Anthropology; Asian Studies; Biochemistry; Biology; Chemistry; Chinese; Cinema Studies; Classics; Comparative Literature; Computer Science; Earth Sciences; Economics; English; Environmental Science; Environmental Studies; Ethnic Studies; French; General Social Science; Geography; German; Global Studies; History; Humanities; Human Physiology; Italian; Japanese; Judaic Studies; Linguistics; Marine Biology; Mathematics; Medieval Studies; Multidisciplinary Science; Neuroscience; Philosophy; Physics; Political Science; Psychology; Religious Studies; Romance Languages; Russian, East European, and Eurasian Studies; Sociology; Spanish; Spatial Data Science and Technology; Theater Arts; Women's, Gender, and Sexuality Studies.

Charles H. Lundquist College of Business

Accounting; Business Administration.

College of Design

Art History; Planning, Public Policy and Management.

School of Journalism and Communication

Journalism; Journalism: Advertising; Journalism: Media studies;
Journalism: Public Relations.

Specific requirements of departmental honors programs are listed in the departmental sections in this catalog.

Honors Lists

Dean's List

The Dean's List is announced after each fall, winter, and spring term. To qualify, a student must be an admitted undergraduate, complete at least 12 credits taken for a letter grade during the term, and have a term GPA of 3.75 or better. Credits deducted do not count toward the minimum number of credits. Grade changes recorded through the second week of the subsequent term resulting in a change to the term GPA may affect the Dean's List notation (removal or addition).

Latin Honors

Graduating seniors who have earned at least 90 credits in residence at the University of Oregon and have successfully completed all other university degree requirements are eligible for graduation with Latin honors. The GPA levels for each distinction is calculated at the beginning of each academic year and is determined by running the average to the first decimal point for all GPAs over the previous five-years. Post-baccalaureate students are not eligible for Latin honors. The Office of the Registrar computes Latin honors during degree conferral.

Tuition and Fees

Kelly Wolf, Associate Vice President Business Affairs and Controller

Thompson's University Center
541-346-3170

Tuition

Tuition and fees for admitted students are based on residency, student classification (undergraduate, graduate, etc.), major, the number of credits enrolled, and the first term enrolled, with exceptions for students enrolled in joint baccalaureate/graduate programs where tuition is assessed by course level rather than student level.

As of summer 2020, the University of Oregon transitioned from a standard undergraduate tuition and fee structure to a Guaranteed Tuition Program under which students will know the cost of their education for up to 5 years. Both tuition and mandatory enrollment fees (other than the Incidental Fee) will be included in the guaranteed structure. The Guaranteed Tuition Program (<https://financialaid.uoregon.edu/oregon-guarantee/>) is mandatory.

Tuition and fee information can be found on the Tuition website (<https://tuition.uoregon.edu/tuition-and-fees/>).

In the schedule, tuition is specified for one term only. There are three terms in the academic year: fall, winter, and spring (except for the School of Law, which operates on a two-semester system). Summer session operates on a separate tuition schedule that includes course self-support fees.

The University of Oregon reserves the right to make changes in the tuition schedule.

Mandatory Enrollment Fees

Building, Health Service, Recreation Center, Student Union, Technology, and Incidental

Students enrolled at the Eugene campus are required to pay all mandatory fees. Students enrolled at the Portland or Charleston campuses, or at an off-campus site, do not pay Recreation Center or EMU fees, and they pay 50% of the Incidental Fee. Students in Portland are required to pay Portland State University's Health Service Fee and students at the Charleston campus pay UO's Health Services Fee. Students at an off-campus site do not pay the Health Services Fee. For the purpose of assessing fees, student enrolled in only online courses pay the Off-Campus set of fees.

Information on Mandatory Enrollment and Course Fees are explained on the Tuition website (<https://tuition.uoregon.edu/tuition-fees/fees/>).

Matriculation Fee

This is a one-time fee required by all admitted students and appears on your bill at the beginning of your first term at the UO.

Course Fees

Certain courses have additional fees which may include lab fees, field trip fees, and material fees. Refer to the Schedule of Classes (<http://classes.uoregon.edu/>) for individual course related fees.

Tuition Billing

Tuition may be paid in monthly installments. Unpaid balances are assessed a \$6 billing fee and are charged 9 percent annual interest. The university uses an electronic billing process to bill student for charges incurred; payments are due on the first of each month.

Special Tuition Rates

Non-degree/Community Education Program

Tuition for non-degree seeking students is determined by residency, course level, and the number of credits enrolled. Non-degree seeking undergraduate students are assessed tuition and administrative mandatory fees at the most recent tuition cohort rate.

Senior Citizens Auditing a Course

Oregon senior citizens who are neither seeking academic credit nor working toward a degree may attend classes as senior auditors if space is available on the first day of classes and if the department approves, at no cost. Charges may apply for special course materials. Senior citizens who want to audit a self-support course must pay self-support tuition and fees for the course. Incidental fee services are not provided. Registration is handled through the Office of the Registrar, second floor, Oregon Hall.

Employees and Dependents

Staff tuition provisions are included in the employee benefit program to encourage and assist eligible employees with educational pursuits. Eligible employees may transfer this benefit to a qualified family member each term. For more information see the Human Resources website (<https://hr.uoregon.edu/staff-tuition-benefit/>).

Special Fees

Special fees, fines, penalties, service charges, and other additional charges for specific courses, services, or supplies not covered in the

tuition fee are set forth on the website (<https://brp.uoregon.edu/content/fee-guidelines/>).

Type of Fee	Fee Amount	Information
Credit by Examination	\$25 per credit	Assessed for taking an examination to challenge undergraduate university courses.
Exceptions to Procedures	\$1–\$50	Approved exceptions to registration deadlines are subject to this fee.
Late Registration	\$100	A \$100 fee is charged for registration after the eighth day of class.
Testing	\$3–\$50	
Transcripts	\$15, other costs may apply	Instructions and delivery options are available at https://registrar.uoregon.edu/transcripts (https://registrar.uoregon.edu/transcripts/). The university reserves the right to withhold transcripts of students who have unpaid financial obligations to the institution. Debtors contesting their accounts should contact the collections department for counseling and instructions for a written appeal. The collections department is located in the Office of Business Affairs in the Thompson University Center. The mailing address is Collections Department, Office of Business Affairs, PO Box 3237, University of Oregon, Eugene, Oregon 97403-0237; call 541-346-3215

Tuition and Fee Refunds

In the event of complete withdrawal from the university or a reduction in course load, refunds may be granted to students in accordance with the refund schedule (<https://registrar.uoregon.edu/calendars/refund-schedules/>).

1. Refunds are calculated from the date the student officially withdraws from the university, not from the date the student ceased attending classes, except in unusual cases when formal withdrawal has been delayed through causes largely beyond the student's control
2. No refunds are made for any amount less than \$1.00 unless a written request is made
3. In case of complete withdrawal, students who received financial aid are responsible for repayment of that aid in accordance with the university's financial aid repayment policy and schedule. See the class schedule for details

For complete withdrawal see instructions on the Office of the Registrar website (<https://registrar.uoregon.edu/current-students/duckweb/complete-withdrawal/>). For questions concerning complete withdrawal please contact the Office of Academic Advising (<https://advising.uoregon.edu/>).

The university has an appeal process for students or parents contending that individual circumstances warrant exceptions to published policy if circumstances of withdrawal or course-load reduction are beyond the student's control. Petitions for exception to the refund policy may be obtained from the Office of the Registrar (<https://registrar.uoregon.edu/forms/>) or from the Office of Academic Advising (<https://advising.uoregon.edu/questions-about-petitions/>).

Veterans Education Benefits

Veterans Access, Choice, and Accountability Act of 2014

Veterans Health Care and Benefits Improvement Act of 2016

Department of Veterans Affairs Expiring Authorities Act of 2018

Isakson and Roe Veterans Health Care and Benefits Improvement Act of 2020

Colonel John M. McHugh Tuition Fairness for Survivors Act of 2021

The following individuals shall be charged the in-state rate for tuition and fees purposes:

- A veteran using educational assistance under either Chapter 30 (Montgomery GI Bill®—Active Duty Program) or Chapter 33 (Post-9/11 GI Bill®), of Title 38, United States Code, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using transferred post-9/11 GI Bill® benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship [38 U.S.C. § 3311(b)(9)] who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using educational assistance under Chapter 31, Veteran Readiness and Employment, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using educational assistance under Chapter 35, Dependents Educational Assistance, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the University of Oregon.

GI Bill® is a registered trademark of the US Department of Veterans Affairs. More information about education benefits offered by the department is available at the official US government website (<https://www.benefits.va.gov/gibill/>).

Student Financial Aid and Scholarships

<http://financialaid.uoregon.edu>

260 Oregon Hall
1278 University of Oregon
Eugene, OR 97403-3221
541-346-3221
Fax: 541-346-1175
financialaid@uoregon.edu

Financial aid in the form of scholarships, grants, loans, and employment is available to eligible students who need assistance to attend school. The Office of Student Financial Aid and Scholarships provides counseling and information services to students and parents and administers a comprehensive program of financial assistance. Office hours are 8:00am–5:00 pm, Monday, Tuesday, Thursday, and Friday, and 9:00 a.m.–5:00 pm on Wednesday. Drop-in counselors are available Monday through Friday, 9:00 am–11:45am and 1pm–3:45pm. Phone hours are also Monday through Friday, 9:00 am–11:45am and 1pm–3:45pm.

Federal and state regulations are subject to change and may affect current policies, procedures, and programs.

Estimated Student Expenses

The following information is provided to help students estimate the total cost of attending the University of Oregon.

Budgets established for financial aid purposes are based on average expenses. Some students have higher costs in a few categories. For example, students in various academic departments may have additional expenses for equipment, supplies, and field trips in addition to books. Students living alone in an apartment or in university housing may spend more than the budgeted amount for meals and housing, based on personal choice.

Residence hall room and board rates for 2025-26 range from \$10,797 to \$27,564. Cooperative housing costs are generally less than the minimum residence hall rate. Sorority and fraternity costs are typically higher.

Although the university does not require proof of health insurance for domestic students, the provisions of the Affordable Care Act may apply. International students are required to purchase health insurance. For more information about health services and coverage, please visit the University Health Services website. (<https://health.uoregon.edu/>)

Personal expenses are governed by individual preference but may include such items as transportation, health care, apparel, and entertainment.

The figures in the following table are the 2025-26 tuition and fees for an incoming undergraduate student enrolled in 15 credits and a graduate student enrolled in 9 credits. Due to Guaranteed Tuition (<https://financialaid.uoregon.edu/oregon-guarantee/>), rates and charges may vary by each individual student's cohort year. UO charges by the credit hour. To view tuition and fees by residency and credit hour, please see the **Tuition and Fees** section of this catalog.

Tuition and Fees

Student Classification	One Term or Semester	Three Terms or Semesters
Undergraduate resident	\$5,585	\$16,755
Undergraduate nonresident	\$15,359	\$46,077
Graduate tuition varies by program. A base tuition would be as follows:		
Graduate resident	\$6,692	\$20,076
Graduate nonresident	\$11,462	\$34,386
Law resident (semester)	\$24,991	\$49,982

Law nonresident (semester)	\$31,119	\$62,237

The Office of Student Financial Aid and Scholarships used the expenses in the following tables to estimate a student's educational costs for the 2025-26 academic year.

Housing and Food

	One Term	Three Terms
Student commuter living with parents	\$1,333	\$3,999
Undergraduate student living off campus	\$4,365	\$13,095
Undergraduate student living on campus	\$5,800	\$17,400
Graduates	\$5,414	\$16,242
Law (semester)	\$8,121	\$16,242

A dependent child-care allowance may be added to the budget for each child less than 12 years of age who is living with a student and for whom the student is paying child-care expenses.

Books, Supplies and Equipment

	One Term	Three Terms
Graduates and undergraduates	\$465	\$1,395
Law (semester)	\$698	\$1,396

Transportation

	One Term	Three Terms
Resident undergraduate or graduate	\$152	\$456
Nonresident undergraduate or graduate	\$486	\$1,458
Law resident (semester)	\$228	\$456
Law nonresident (semester)	\$729	\$1,458

Miscellaneous Personal Expenses

	One Term	Three Terms
Undergraduates	\$867	\$2,601
Graduates	\$867	\$2,601
Law (semester)	\$1,300	\$2,600

Applying for Financial Aid

Undergraduate, graduate, and law students use the following procedure to apply for financial aid:

1. Complete the Free Application for Federal Student Aid (FAFSA) online. The official website is <https://studentaid.gov/h/apply-for-aid/fafsa> (<https://studentaid.gov/h/apply-for-aid/fafsa/>)

2. List the University of Oregon (using code number 003223) on the FAFSA application as a school to receive the application information
3. Apply for admission to the University of Oregon

Deadlines

To be given priority consideration for the Federal Supplemental Educational Opportunity Grant, Federal Work-Study Program, and tuition waivers for all or part of any given academic year, a valid FAFSA must be received by the federal processor on or before March 1 prior to the academic year for which the student is applying. To meet this deadline, submit the FAFSA no later than February 15. The FAFSA is typically available on October 1 prior to the academic year for which the student is applying. Filling out the FAFSA electronically is the recommended method for submission.

Eligibility

Financial aid eligibility for any student is determined by the difference between the estimated cost of education at the University of Oregon and the student aid index (SAI) (as determined by the FAFSA) from the student's family, the student and parents if the student is a dependent, or the student and spouse if the student is married. Students (and their families if appropriate) are expected to bear the primary responsibility for meeting educational costs. When a student's SAI is less than the cost of education, the university attempts to meet the difference with need-based financial aid first, then attempts to fill the remaining difference with non-need based loans.

Assessing Financial Aid Eligibility

The university uses a method prescribed by law to determine a SAI from the student and family toward the cost of the student's education. The SAI, derived from using the federal formula, is based on income and asset information as well as certain variables such as family size. This system ensures that students receive consistent and equitable treatment. Financial aid counselors review unique circumstances on a case-by-case basis, at the request of the student.

Satisfactory Academic Progress

To be eligible for financial aid, students must make satisfactory academic progress toward their degrees, maintain a minimum cumulative grade point average (GPA) and acceptable pace of completion, and graduate within the maximum time frame. Progress is reviewed annually at the end of spring term.

The minimum cumulative GPA needed to meet satisfactory academic progress is 2.00 for an undergraduate and 3.00 for a graduate student (except for law students seeking a JD or LLM degree, who require a 2.00 GPA). For more information on how your cumulative UO GPA is calculated, including how incompletes, withdrawals, or repetitions may affect your GPA, please visit the [GPA calculator \(https://registrar.uoregon.edu/current-students/grading-system/#calculating-a-grade-point-average\)](https://registrar.uoregon.edu/current-students/grading-system/#calculating-a-grade-point-average). If a student's cumulative GPA drops below the required minimum at the time of the evaluation, eligibility for financial aid will be suspended unless the student appeals and is approved for reinstatement. Students may also reestablish eligibility for the subsequent term after raising their GPA to the minimum requirement.

Pace of completion toward a degree is a further requirement, determined by dividing the number of credits attempted by the number of credits earned. Students are expected to earn credit for at least 67 percent of the credits attempted on an aggregate basis. Credit is earned for grades

A, B, C, D, and P. Credit is not earned for grades of F, W, I, Y, N, and X. A [pace calculator \(https://financialaid.uoregon.edu/pace_calculator/\)](https://financialaid.uoregon.edu/pace_calculator/) is located online.

Students must also complete their degrees within a maximum time frame. A student must graduate before accumulating 150 percent of the attempted credits required for completing his or her major. Most majors at the University of Oregon require 180 credits; 270 would be 150 percent of that. If a student is unable to fulfill the requirements for his or her degree before reaching this maximum time frame or the financial aid office determines that it is mathematically impossible to graduate within the maximum time frame, financial aid will be suspended.

Visit the Office of Student Financial Aid and Scholarship [website \(http://financialaid.uoregon.edu/satisfactory_academic_progress/\)](http://financialaid.uoregon.edu/satisfactory_academic_progress/) for information on the appeals process.

Completely withdrawing from (or not passing any) courses during a student's first term at the University of Oregon, or during any two consecutive terms, constitutes failure to meet satisfactory academic progress standards regardless of GPA, pace, or time frame.

For additional information, visit the Office of Student Financial Aid and Scholarship [website \(http://financialaid.uoregon.edu/satisfactory_academic_progress/\)](http://financialaid.uoregon.edu/satisfactory_academic_progress/).

Financial Aid Packages

Students will receive notification of their offer after their financial aid eligibility has been established. The Office of Student Financial Aid and Scholarships attempts to offer financial aid to students up to their estimated cost of education, which could include scholarship and grant money, work-study, and loan eligibility.

A student may not receive assistance from any financial aid (Title IV) program if:

1. The student is in default on any educational (Title IV) loan
2. The student has borrowed in excess of federal (Title IV) loan limits
3. The student owes a refund on federal or state grants or a Federal Perkins Loan due to an overpayment

A parent may not borrow from the Federal Direct Parent Loan for Undergraduate Students (Parent PLUS) if the parent or student is in default on any educational loan or owes a refund on an educational grant as described above.

There may be other conditions when a student would be ineligible for financial aid—for example, when a student is not maintaining satisfactory academic progress or when not enrolled in an eligible program.

Undergraduates

Federal Pell Grants, Oregon Opportunity Grants, and university scholarships are considered to be part of the student's financial aid package, even though the Office of Student Financial Aid and Scholarships may not determine eligibility for these programs.

The office determines the student's eligibility for and the amount of assistance from the Federal Supplemental Educational Opportunity Grant and the Federal Work-Study Program.

Financial aid offers are made in accordance with federal and state regulations, as well as university policies. Some offers are tentative if

selected for verification and may be revised after verification has been completed.

Graduate and Law Students

The Office of Student Financial Aid and Scholarships determines eligibility and the amount of assistance that may be received from the Federal Work-Study Program, Federal Direct Unsubsidized Loan, and Federal Direct Graduate PLUS Loan. Offers are made in accordance with federal regulations and university policies.

Refunds and Repayment

Students who withdraw from school may be required to repay all, or a portion of, their financial aid. According to a formula prescribed by federal and state regulations, any refundable amount used to pay tuition and fees or for university housing is returned to the appropriate financial aid sources. Students may also be required to pay the unearned portion of assistance that was directly disbursed to them.

Additional information concerning the institution's refund policy may be found on the website for the Office of the Registrar. (<https://registrar.uoregon.edu/calendars/refund-schedules/>)

Additional information concerning return of financial aid (http://financialaid.uoregon.edu/return_of_financial_aid/) and participation requirements (<http://financialaid.uoregon.edu/participation/>) may be found on the website for the Office of Student Financial Aid and Scholarships.

Notification of Financial Aid

Typically beginning in March, financial aid offers are mailed to first-year students who have supplied the necessary information to the Office of Student Financial Aid and Scholarships and the Office of Admissions. Financial aid offers are then mailed on a continuing basis to those entering students who supply the necessary information to the offices after the March 1 priority deadline. Students are also able to view their financial aid offer in DuckWeb (student portal) when available.

When aid is accepted, the student (and spouse if married) and the student's parents (if applicable) may be asked to provide documents, such as federal income tax returns (IRS Form 1040), to verify the information on the application.

Students should read the financial aid offer and instructions carefully.

An explanation of revision and appeal policies and procedures may be found on the financial aid website. A financial aid package may be revised when a student's eligibility changes. The student receives a revised notification and, if necessary, is advised of any repayment of aid. The federal regulations covering financial aid programs, the explanation of the federal method of determining student and family contributions, and the university policies and procedures for offering financial aid are available in the Office of Student Financial Aid and Scholarships. Students are welcome to review them during office hours or on the financial aid website.

Financial Aid Programs

To be eligible for certain financial aid programs that depend on federal or state funding, the student must be a citizen of the United States or in the United States for other than a temporary purpose and with the intention of becoming a permanent resident. Students who are citizens of the Freely Associated States (the Republic of the Marshall Islands, the Federated

States of Micronesia, or the Republic of Palau) may be eligible for certain types of federal (Title IV) aid.

Financial aid is typically disbursed to students near the beginning of a term based on their enrollment at that time. However, financial aid is actually earned over the course of a term. Therefore, if a student completes a term at a different enrollment status than he or she began the term, some or all of the student's financial aid may need to be returned.

Federal Pell Grant

This program provides grants (funds that do not require repayment, provided you meet the terms of the award) to eligible undergraduates who do not have a bachelor's degree.

To be eligible for a Federal Pell Grant, a student must be admitted to the university in a program leading to a degree and enrolled in good standing. The amount of Federal Pell Grant funds a student may receive over their lifetime is limited to the equivalent of six years of Pell Grant funding.

The grant is reduced proportionately if the student is enrolled less than full time (12 credits a term).

The Free Application for Federal Student Aid (FAFSA) determines eligibility based on the student's and parents' income and assets, or the student's and spouse's, if applicable. The university disburses the money.

Federal Supplemental Educational Opportunity Grant (FSEOG)

Federal supplemental grants, which do not need to be repaid, provided you meet the terms of the award, are for undergraduates with exceptional need. To be eligible, a student must be admitted to the university in a program leading to a degree and enrolled in good standing. The amount a student receives is determined by university policy and fund availability.

Funds are granted to the university by the federal government to award to eligible students.

Iraq and Afghanistan Service Grants

The Iraq and Afghanistan Service Grant is a federal grant that, although it does not need to be repaid, provided you meet the terms of the award, has special eligibility criteria. This grant is for undergraduates who

- are not eligible for the Federal Pell Grant on the basis of their SAI but meet the remaining Federal Pell Grant eligibility requirements
- have a parent or guardian who was a member of the US armed forces and died as a result of military service performed in Iraq or Afghanistan after the events of September 11, 2001
- were under 24 years old or enrolled in college at least part-time at the time of their parent's or guardian's death

Children of Fallen Heroes Scholarship

The Children of Fallen Heroes Scholarship is a federal grant that, although it does not need to be repaid, provided you meet the terms of the award, has special eligibility criteria. This grant is for undergraduates who

- are not eligible for a maximum Federal Pell Grant on the basis of their student aid index but meet the remaining Federal Pell Grant eligibility requirements

- have a parent or guardian who died in the line of duty while serving as a public safety officer
- were under 24 years old or enrolled in college at least part-time at the time of their parent's or guardian's death

Oregon Opportunity Grant

Oregon Opportunity Grants are awarded to eligible undergraduate Oregon residents who complete the FAFSA or the Oregon Student Aid Application (ORSAA).

A grant may be renewed for a total of 12 terms if the student applies each year, demonstrates financial need, is enrolled at least half time (6 credits a term) in a program leading to a degree, and has not completed a bachelor's degree. In addition, the State of Oregon Office of Student Access and Completion (OSAC) may require that a student receive the Oregon Opportunity Grant during the fall term or winter term in order to have any eligibility for the remainder of the year.

OSAC determines eligibility and notifies the university. The funds are provided by the state and disbursed by the university.

University of Oregon Tuition Waiver (Grant)

The UO Tuition Waiver may remit (reduce) a portion of a full-time Oregon resident's tuition charges, for undergraduates who demonstrate financial need and complete their FAFSA application by the published priority deadline. Funding is limited and the amount a student receives is determined by university policy and fund availability.

Teacher Education Assistance for College and Higher Education Grant (TEACH)

The TEACH program provides up to \$4,000 a year to students enrolled in an eligible education program and who agree to teach in a high-need field at a low-income school for at least four years within eight years of completing the program for which the grant was awarded. If these requirements are not met, the grant converts to a loan, interest is assessed retroactively, and the loan must be repaid.

Federal Work-Study Program

The Federal Work-Study Program allows students with financial need the opportunity to pursue a part-time job. Work-study students must be in good academic standing in an eligible program leading to a degree or certificate.

The amount of work-study a student may earn is determined by university policy and fund availability. Students earn an hourly wage based on the type of work, their skills, and their experience. Students may work a maximum of 25 hours a week while school is in session. Monthly timesheets are completed with the employer and pay is generated at the end of each month.

Students earn work-study funds by working on-campus or off-campus at approved governmental or non-profit agencies that perform services in the public interest. Information on available job opportunities and assistance locating a position can be found at the University Career Center website (<https://career.uoregon.edu/>).

William D. Ford Federal Direct Student Loan Program

Federal Direct Subsidized Loan

Students must demonstrate need to qualify for a Federal Direct Subsidized Loan. The university determines the amount the student may borrow within federal limits: \$3,500 for the first academic year of undergraduate study (up to 44 credits); \$4,500 for the second academic year (45–89 credits); and \$5,500 an academic year for the remaining years of undergraduate study. Not all students are eligible for the maximums. The Federal Direct Subsidized Loan is for undergraduate students with financial need. The US Department of Education pays the interest on (subsidizes) a Direct Subsidized Loan while the student is enrolled, during a student's grace period, and during a period of deferment.

Student borrowers must be enrolled at least half-time, in good academic standing and have been accepted for admission to an eligible program leading to a degree or certificate. Once repayment begins, borrowers are charged a fixed interest rate. The fixed interest rate is set every July 1. For loans first disbursed on or after July 1, 2024 and before July 1, 2025, the interest rate is fixed at 6.53%. For loans first disbursed on or after July 1, 2025 and before July 1, 2026, the interest rate is fixed at 6.39%. There is an origination fee of 1.057% for loans first disbursed on or after October 1, 2020 and before October 1, 2025.

Federal Direct Unsubsidized Loan

Direct Unsubsidized Loans are available to students who do not qualify, in whole or in part, for the Direct Subsidized Loan. The university determines the amount the student may borrow within federal limits: \$5,500 for the first academic year of undergraduate study (up to 44 credits); \$6,500 for the second academic year (45–89 credits); and \$7,500 per year for the remaining years of undergraduate study. The amount of Direct Subsidized Loan eligibility is subtracted from the Direct Unsubsidized Loan maximum amounts listed. Not all students are eligible for the maximums.

Direct Unsubsidized Loans are available to undergraduate and graduate students. There is no requirement to demonstrate financial need. However, the amount of the loan and other financial assistance may not exceed the calculated cost of attendance. The student is responsible for paying the interest on a Direct Unsubsidized Loan during all periods. If the student chooses not to pay the interest while in school and during grace periods and deferment or forbearance periods, the interest will accrue (accumulate) and be capitalized (that is, interest will be added to the principal amount of the loan).

A student's financial need and dependency status determines the amount of the loan offered. Independent students, as defined by answers on the FAFSA, may borrow up to an additional \$4,000 in their freshman and sophomore years and up to an additional \$5,000 in their junior and senior years.

For undergraduate unsubsidized loans first disbursed on or after July 1, 2024 and before July 1, 2025, the interest rate is fixed at 6.53%. For loans first disbursed on or after July 1, 2025 and before July 1, 2026, the interest rate is fixed at 6.39%. There is an origination fee of 1.057% for loans first disbursed on or after October 1, 2020 and before October 1, 2025. Interest that accrues during in-school, grace, and authorized deferment periods will be added to the principal when repayment begins. The interest rate for the Direct Unsubsidized Loan is a fixed rate set every July 1.

Graduate and law students may borrow up to \$20,500 a year depending on their financial need. For graduate and law students with loans first disbursed on or after July 1, 2024 and before July 1, 2025, the interest rate is fixed at 8.08%. For loans first disbursed on or after July 1, 2025 and before July 1, 2026, the interest rate is fixed at 7.94%. There is an origination fee of 1.057% for loans first disbursed on or after October 1, 2020 and before October 1, 2025.

Additional Federal Direct Unsubsidized Loan

Dependent undergraduate students whose parents are denied access to the Federal Direct Parent Loan for Undergraduate Students (Parent PLUS) program may be eligible for additional Direct Unsubsidized Loan funds. Students with fewer than 90 credits may borrow a maximum of \$4,000 per award year in additional funds above the maximum Federal Direct Loan limits. Students who have earned 90 credits or more may borrow a maximum of an additional \$5,000 per award year. Not all applicants qualify for the maximums. The Federal Direct Unsubsidized Loan may be used to replace expected family contribution, but the total borrowing for combined Direct Subsidized Loans and Direct Unsubsidized Loans cannot exceed the cost of attendance.

Generally, the cumulative amount a student can borrow from all Federal Direct Loans is as follows:

- \$31,000 (only \$23,000 may be subsidized) as a dependent undergraduate
- \$57,500 as an independent undergraduate (only \$23,000 of this amount may be subsidized)
- \$138,500 as a graduate or professional student

Federal Direct Parent PLUS

This program provides loans to parents of dependent undergraduate students. Parents may borrow up to an annual amount that is equal to the cost of attendance minus any other financial assistance the student receives during the periods of enrollment. The borrower may use the amount of the Federal Direct PLUS Loan to replace the expected family contribution for the loan period.

The Federal Direct PLUS Loan is limited to parents who do not have an adverse credit history or who have obtained an endorser who does not have an adverse credit history or in default on federal loans. A direct loan servicer, contracted by the federal government, performs the required credit check. The interest on the Federal Direct PLUS is a fixed rate set every July 1. For loans first disbursed on or after July 1, 2024 and before July 1, 2025, the interest rate is fixed at 9.08%. For loans first disbursed on or after July 1, 2025 and before July 1, 2026, the interest rate is fixed at 8.94%. There is an origination fee of 4.228% for loans first disbursed on or after October 1, 2020 and before October 1, 2025.

Parents interested in participating in the Federal Direct PLUS Loan program may apply for the loan by visiting the Federal Student Aid (<https://studentaid.gov/plus-app/parent/landing/>).

Federal PLUS Loan for Graduate and Professional Students (Graduate PLUS Loan)

This program is offered to qualified students with or without financial need, but the student must have financial aid eligibility. Like other Direct Loans for students, the US Department of Education is the direct lender of the Graduate PLUS Loan. Typically, repayment must begin within 60 days after the Graduate PLUS Loan is fully disbursed. However, students who meet the requirements may obtain an in-school deferment from

the US Department of Education. There is no grace period for this loan. Interest begins to accrue at the time the first disbursement is made at a fixed rate set every July 1. For loans first disbursed on or after July 1, 2024 and before July 1, 2025, the interest rate is fixed at 9.08%. For loans first disbursed on or after July 1, 2025 and before July 1, 2026, the interest rate is fixed at 8.94%. There is an origination fee of 4.228% for loans first disbursed on or after October 1, 2020 and before October 1, 2025.

Direct Loan Repayment

Payment of all Direct Loans are handled through an assigned direct loan servicer. To locate the appropriate direct loan servicer, the student may sign in to Federal Student Aid (<https://studentaid.gov/>). .

Repayment of Federal Direct Loans (subsidized and unsubsidized) begins six months after termination of at least half-time enrollment. Repayment of Federal PLUS loans typically begins within 60 days of the last disbursement of the loan. A deferment may be requested after loan approval. Borrowers have the right to prepay their loans without penalty. Furthermore, they may choose from the following repayment plans:

- A standard repayment plan with a fixed payment amount (at least \$50 a month) over a fixed period of time, not to exceed 10 years
- A graduated repayment schedule in which payments are lower at first and then increase, usually every two years, over a period of as much as 10 years
- An extended repayment plan with a fixed or graduated annual repayment of at least \$50 a month over a period of up to 25 years, depending on the total amount owed
- The Pay As You Earn (PAYE) plan is designed for students who borrow after October 1, 2017 with a prior loan disbursement on or after October 1, 2011. Payments are calculated based on upon income and family size up to 10% of discretionary income, but never more than you would pay under the 10-year Standard Repayment Plan.
- An income-based repayment plan designed to make repaying federal loans easier for students who intend to pursue jobs with lower salaries such as careers in public service. Monthly payments are capped at a percentage of the borrower's discretionary income, which is based on family size and income rather than total amount borrowed. Payments change as the borrower's income changes and are made over a period of up to 25 years. Borrowers must update income and family size each year. Parent PLUS Loans are not eligible for this plan
- An income-contingent repayment plan with varying annual repayment amounts based on the total amount owed and the annual income of the borrower (and that of the borrower's spouse, if a joint return is filed) paid over a period not to exceed 25 years. Parent PLUS Loans may be eligible for this plan, if part of a Direct Consolidation Loan. Borrowers must update income and family size each year

If the borrower does not select one of these repayment plans, the Department of Education assigns the standard repayment plan. Visit the [website \(https://studentaid.gov/manage-loans/repayment/plans/\)](https://studentaid.gov/manage-loans/repayment/plans/) for details on all repayment plans.

The borrower's repayment liability is discharged if the borrower becomes permanently and totally disabled or dies or if the student for whom a

parent has borrowed dies. Federal Direct Student Loans are generally not dischargeable in bankruptcy.

Deferring Repayment

Repayment of a Federal Direct Student Loan that is not in default may be temporarily deferred for: (<https://studentaid.gov/manage-loans/lower-payments/get-temporary-relief/deferment/>)

- enrolled at least half-time in an eligible program at an eligible school
- experiencing economic hardship
- in a graduate fellowship program
- performing a qualifying military service
- a post-active duty service member
- a Parent PLUS Loan borrower enrolled in school
- enrolled in an approved rehabilitation training program
- unemployment (up to three years)
- undergoing cancer treatment

During periods of approved deferment, a Federal Direct Subsidized Loan borrower does not need to make payments of principal, and the interest is paid by the federal government. For the Federal Direct Unsubsidized or PLUS borrower, principal repayment may be deferred, but interest continues to accrue and is capitalized or paid by the borrower during that time.

Forbearance

A direct loan borrower or endorser may receive forbearance (<https://studentaid.gov/manage-loans/lower-payments/get-temporary-relief/forbearance/>) from the federal government if the borrower or endorser is willing but unable to make scheduled loan payments. Forbearance is the temporary cessation of payments, an extension of time for making payments, or the temporary acceptance of smaller payments than previously scheduled. Forbearance may be granted for up to 12 months for reasons such as:

- experiencing financial difficulties, such as medical expenses or change in income
- serving in AmeriCorps
- performing service that would qualify for partial loan forgiveness through the Department of Defense
- working in a medical or dental internship or residency program
- having student loan payments that are high in relation to your income
- Teacher Loan Forgiveness

During forbearance, interest will continue to accrue on the principal balance. If you do not pay the interest as it accrues, the unpaid interest will be capitalized, added to the principal balance of the loan.

Deferments and forbearance are handled by the assigned direct loan servicer. To locate the appropriate direct loan servicer, sign in to Federal Student Aid (<https://studentaid.gov/>).

Public Service Loan Forgiveness

The Public Service Loan Forgiveness Program (PSLF) forgives the remaining balance on your direct loans after you have made 120 qualifying monthly payments under a qualifying repayment plan while working full-time for a qualified employer. More information about the PSLF program may be found on the Federal Student Aid (<https://studentaid.gov/manage-loans/forgiveness-cancellation/public-service/>).

Federal Direct Consolidation Loan

Loan consolidation is a way of lowering monthly payments by combining several federal loans into one loan at the time of repayment. Borrowers may consolidate any amount of eligible loans including those borrowed under the Federal Family Education Loan program, the Federal Perkins Loan program, and the Direct Loan Program. The interest rate is fixed at the time of consolidation based on the weighted average of the loans being consolidated. Repayment of Consolidation loans may extend to 30 years depending on the repayment plan selected and the amount borrowed. The result of a longer repayment term, however, is an increase in the total cost of the loan. More information about Direct Loan Consolidation can be found on the Federal Student Aid (<https://studentaid.gov/app/launchConsolidation.action/>).

Entrance and Exit Counseling

First-time Direct Subsidized, Unsubsidized, and Graduate PLUS Loan borrowers must complete entrance counseling before a loan disbursement can be made.

Shortly before graduating from or terminating enrollment at the University of Oregon, borrowers must also complete exit loan counseling.

Both entrance and exit counseling sessions are completed at Federal Student Aid (<https://studentaid.gov/>).

Alternative Loans

Privately funded loans are not based on need and no federal formula is applied to determine eligibility. However, the amount borrowed cannot exceed the cost of attendance minus other financial assistance. Interest rates and repayment terms vary, but may be less favorable than those provided through the federal direct lending program. Private loans may be used to supplement the federal programs when the cost of attendance minus federal aid still leaves unmet need. Information is available in the Office of Student Financial Aid and Scholarships or on its website under Alternative Student Loans. (http://financialaid.uoregon.edu/alternative_loans/)

Debt Management and Default Reduction

The University of Oregon is committed to helping students achieve sound financial planning and debt management. Information about loans, repayment options, and debt management strategies are available in the Office of Student Financial Aid and Scholarships, on its website (<https://financialaid.uoregon.edu/>), and additional resources are available through the UO Financial Wellness Center (<https://financialwellness.uoregon.edu/>).

Scholarships

Scholarships Awarded by a Department or School

Undergraduate and graduate students who have selected a major field of study should consult the appropriate school or department about possible scholarships and application procedures and requirements.

Many departments offer assistantships and fellowships—which include an instructional fee waiver, a monthly salary, and health insurance benefits—to outstanding graduate students.

National ROTC Scholarships

The Army Reserve Officers Training Corps (ROTC) Scholarship Program sponsors two-, three-, and four-year scholarship options based on the time remaining to complete a degree. These scholarships include full tuition and fees or the option for room and board in place of tuition and fees. It also provides an additional book allowance of \$1,200 per year, and a monthly living allowance of \$420 per month. The University of Oregon also provides an additional subsidy for a portion of the housing cost to qualifying students. For more information, contact the Department of Military Science at 541-346-3102 or email mcmahond@uoregon.edu. High school seniors may also apply online (<https://www.goarmy.com/rotc.html/>) for a four-year Army ROTC National Scholarship or contact their school's career counselor.

National and Community Service Trust Act

This legislation created Americorps, which gives citizens the opportunity to perform community service in the United States and, for that service, receive an education award. This award can be used to pay for postsecondary education or to repay qualified student loans. Information about Americorps is available online.

Scholarships Awarded through the Office of Student Financial Aid and Scholarships

Stamps Scholarship

The Stamps Scholarship is awarded competitively to outstanding incoming domestic first-year students. Oregon resident Stamps Scholars receive UO resident tuition and fees with room and board for four years of undergraduate study. Out-of-state recipients receive nonresident tuition and fees. Approximately 20 students per year are awarded this merit-based scholarship by the University of Oregon in partnership with the Stamps Scholars Program. Recipients also benefit from as much as \$12,000 in enrichment funds to be used over four years to help them pursue study abroad, unpaid internships, or other experiences. In addition, students who receive a Stamps Scholarship are automatically granted admission to the University of Oregon's Robert Donald Clark Honors College.

Eligibility Requirements

To apply and compete for this scholarship for the 2025-26 school year, a student must:

- be an incoming domestic first-year student
- have a minimum 3.85 cumulative high school grade point average on a 4.00 scale
- exemplify leadership, perseverance, scholarship, service, and innovation

Interested students may apply online. Students must apply for admission by November 1 and submit their Stamps application by November 12.

Scholarship applications will be evaluated along with the Self Reported Academic Record included in the applicant's UO Undergraduate Admissions Application.

The University of Oregon interviews as many as 72 semifinalists in on-campus interviews; finalists will also be interviewed by the Stamps Scholars Program. The Stamps Scholars Program will make the final selection of the recipients, who are notified by March 15.

Scholarship Renewal

Stamps Scholarships are available for up to 12 terms, renewed annually, provided recipients meet the following requirements:

- Enroll in and complete a minimum of 12 UO credits per term
- Maintain a 3.25 UO grade point average

See the [financial aid website \(http://financialaid.uoregon.edu/stamps_scholarship/\)](http://financialaid.uoregon.edu/stamps_scholarship/) for applications and filing deadlines.

Presidential Scholarship

In 1983, the university established the Presidential Scholarship Program to recognize and reward outstanding Oregon high school graduates. Presidential Scholarships awarded in 2025-26 will be \$9,000 a year for four years (12 terms).

For the 2025-26 year, incoming resident first-year students must submit the Presidential Scholarship application on our website by January 31 in addition to applying for admission by January 15.

Selection is based on academic achievement and leadership. To retain the scholarships for four years, recipients are expected to maintain a 3.25 grade point average at the university.

Diversity Excellence Scholarship

The University of Oregon Diversity Excellence Scholarship recognizes undergraduate students who enhance the educational experience of all students by sharing diverse cultural experiences. These tuition-remission scholarships are an integral part of the university's effort to meet the educational-diversity needs of its students, and they complement other programs in the UO diversity plan.

Diversity Excellence Scholarships awarded in 2025-26 will be \$7,500. Scholarships are renewable for up to 12 terms for entering first-year students, and are prorated for transfer and continuing students. Recipients must meet specific scholarship renewal requirements to retain their scholarships.

Scholarship Criteria. To be considered for this scholarship for the 2025-26 school year, an applicant must be a currently enrolled UO student with at least a 3.00 GPA, or apply for admission and meet standard UO admission requirements and have a 3.00 high school GPA. Scholarship recipients are selected competitively by the UO Diversity Excellence Scholarship Selection Committee, based on the following:

- Past academic performance
- Participation in campus or community activities
- An individual's ability to contribute to diversity
- Preference given to students with financial need as defined by federal and state guidelines

- Preference given to first generation of the family to attend college
- Preference given to Oregon residents

Application. The application is electronic and the submission deadline for the 2025-26 Diversity Excellence Scholarship is January 31 for incoming first-year students and February 28 for continuing UO students. The application deadline for transfer students is April 1. Applications are available within the UO Scholarship Dashboard on the Office of Student Financial Aid and Scholarships website.

General University Scholarships

This group of university scholarships is not attached to a particular department or school. Detailed information is available on the financial aid website. All of these scholarships require academic achievement (merit). Some of them require financial need. Scholarships administered by this office are governed by the University Scholarship Committee, whose members are drawn from the faculty, the staff, and the student body. This committee reviews and formulates policies and evaluates applicants' academic qualifications.

A single application form is used for all the scholarships in this group. The application portal is available on the financial aid website for returning students. Applicants must provide copies of academic transcripts from schools they have attended.

For the 2025-26 year, prospective students entering from high school need only to apply for admission by the January 15 deadline to be considered for scholarships in this group. For students transferring from another college, the deadline to apply for admission is March 15 and the deadline to submit a scholarship application and supporting documents is April 1. Incoming graduate, law, and continuing UO students must apply by March 1.

When awarding financial assistance, the university does not discriminate on the basis of race, sex, religion, disability, age, national origin, veteran or marital status, or sexual orientation.

National Merit Scholarships

The University of Oregon participates with the National Merit Scholarship Corporation to award merit-based scholarships to incoming first-year students. Interested high school students should consult with their counselors and arrange to take the Preliminary Scholastic Assessment Test (PSAT) in their junior year. This test is usually offered during October.

UO Excellence Scholarship

The UO Excellence Scholarship for incoming first-year students in 2025-26 is awarded only to out-of-state scholars, with a \$80,000 payout over four years.

Out-of-state first-year students with exceptional admissions applications and stellar academic records will automatically be considered for the UO Excellence Scholarship. A limited number of these most prestigious awards are available.

Award Information. Out-of-state students receive \$20,000 per year for four years. The UO Excellence Scholarship may be combined with other scholarships, including the Diversity Excellence and General University Scholarships. The UO Excellence Scholarships may not be combined with the Summit Scholarship or the Apex Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically considered for the UO Excellence Scholarship. No separate application is required.

Scholarship Renewal. UO Excellence Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Summit Scholarship

The Summit Scholarship for incoming first-year students in 2025-26 is awarded to Oregon resident scholars with a \$20,000 payout over four years, and to out-of-state scholars with a \$50,000 payout over four years.

Scholarship Criteria for 2025-26

- minimum 3.90 high school GPA on a 4.00 scale

Students who fail to meet the above criteria may qualify instead for the Apex Scholarship.

Award Information. Oregon residents receive \$5,000 per year for four years. Out-of-state students receive \$12,500 per year for four years. The Summit Scholarship may be combined with other scholarships, including the Presidential, Diversity Excellence, and General University Scholarships. Summit Scholarships may not be combined with the UO Excellence Scholarship or the Apex Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically awarded the Summit Scholarship. No separate application is required. Application materials must be received by the February 15 document deadline.

Students whose high school GPA improves sufficiently to make them eligible for the Summit Scholarship by the February 15 document deadline should update their Self Reported Academic Record via the Admissions Portal. They will be notified of changes by April 1. New scholarship awards will not be made based on materials received after February 15.

Scholarship Renewal. Summit Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Apex Scholarship

The Apex Scholarship for incoming first-year students in 2025-26 is awarded to Oregon resident scholars with a \$8,000 payout over four years, and to out-of-state scholars with \$40,000 over four years.

Scholarship Criteria for 2025-26

- minimum 3.70 high school GPA on a 4.00 scale

Students whose GPA and test scores are higher than the above criteria may instead qualify for the Summit Scholarship.

Award Information. Oregon residents receive \$2,000 per year for four years. Out-of-state students receive \$10,000 per year for four years. The Apex Scholarship may be combined with other scholarships, including the Presidential, Diversity Excellence, and General University Scholarships. Apex Scholarships may not be combined with the UO Excellence Scholarship or the Summit Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically awarded the Apex Scholarship. No separate application is required. Application materials, must be received by the February 15 document deadline.

Students whose high school GPA improves sufficiently to make them eligible for the Summit Scholarship by the February 15 document deadline should update their Self Reported Academic Record via the Admissions Portal.. They will be notified of changes by April 1. New scholarship awards will not be made based materials received after February 15.

Scholarship Renewal. Apex Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Pathway Oregon

PathwayOregon is the University's promise of full tuition and fees for Oregon residents who are academically qualified and eligible for the Federal Pell Grant. Eligible students will have their tuition and fees covered by a combination of federal, state, and university grants and scholarships for up to four years. Students also receive the academic and personal support that enable them to succeed and graduate from the UO within 12 terms.

To be automatically eligible for PathwayOregon, students must:

- be Oregon residents, have graduated from an Oregon high school in the last two years, and be admitted to the UO as first-time freshmen
- complete a UO admissions application by January 15
- establish Federal Pell Grant eligibility by filing the Free Application for Federal Student Aid (FAFSA) by the March 1 deadline (include the UO code **003223** as a college choice)
- earn a minimum 3.40 high school GPA

Students who earn less than a 3.40 high school GPA but meet all other program eligibility criteria will be considered for the program on a space and funding-available basis.

Renewal Criteria

- Remain eligible for a Federal Pell Grant
- File the FAFSA by March 1
- Enroll for and maintain full-time attendance
- Make satisfactory academic progress

Academic and Career Planning

Academic Advising

101 Oregon Hall
541-346-3211

Advising

Office of Academic Advising (<http://advising.uoregon.edu>)

The University of Oregon offers undergraduate students a choice of more than 2,000 courses. Out of these courses individualized programs emerge, reflecting each student's special interests, goals, and aspirations. Translating these goals and interests into courses, majors,

and minors requires careful planning with an academic advisor. University of Oregon advisors collaborate with students to help them achieve their personal goals, academic potential, and professional success.

Advisors provide students with a declared major a framework in which planning and decision-making may be efficiently completed. Exploring students should work with advisors early and often to explore interests.

Students are strongly urged to consult advisors regularly each term.

Students are also encouraged to speak with faculty members regularly.

Faculty can provide insight, guidance and mentorship within their areas of discipline and research.

The Office of Academic Advising supports new students in their transition to the university, as well as any student seeking guidance to achieve academic success. The office works closely with students in academic distress who may need particular assistance around navigating campus resources.

General Principles in Program Planning

1. To earn a degree in four years (12 terms), students should average 15 credits a term. In planning a term's studies, students should anticipate that each credit requires at least three hours a week for class meetings or homework
2. Each term's schedule should be planned to include the university bachelor's degree requirements and requirements for the major. Major requirements are listed in this catalog under the academic department headings. Students who have not selected a major should spend some time exploring possible majors
3. Students should read the course descriptions in this catalog and the notes in the class schedule to learn course pre- or corequisites
4. Many university major disciplines and courses require competence in mathematics. Mathematics should be started in the first year
5. A second language, whether required or elective, should also be started in the first year if possible. Students planning to study abroad on an international exchange program during the sophomore or junior year should achieve competence in a language early
6. Each student should prepare a four-year model program of courses and discuss the program with an advisor
7. New students might want to explore some special curricular programs such as Freshman Interest Groups and Academic Residential Communities, and should be investigated prior to or during orientation
8. Sound planning is necessary to design a program that combines courses demanding extensive reading, daily exercises, laboratory work, and lengthy papers
9. Planning might also include the use of university resources for improving skills in reading, computation, note-taking, test-taking, and writing.

Academic Majors, Minors, and Careers

University of Oregon undergraduate students must complete at least one academic major to graduate. A minor is another way to focus studies toward career and interest areas. Inquiries about minors should be directed to specific departments.

Willie and Donald Tykeson Hall (<https://advising.uoregon.edu/tykeson/>)

Willie and Donald Tykeson Hall, the college and careers building, offers students an integrated academic and career service model within the Tykeson College and Career Advising (TCCA) office. TCCA serves students pursuing, or interested in, a degree within the College of Arts

and Sciences. Tykeson advisors help students plan their academic course of study to align with academic and career goals, as well as each student's values, skills, and interests

Career Planning

University Career Center (<https://career.uoregon.edu/>)

Willie and Donald Tykeson Hall

The University Career Center, a unit of the Division of Student Life, exists to support the career readiness, preparation, and professional development of UO students. Students have an opportunity to learn about career options and paths, develop strategies to find and prepare for part-time jobs, internships, and full-time career opportunities, and meet potential employers. See also University Career Center in the Academic Resources and Student Services (p. 693) section of this catalog.

Undergraduate Programs

University of Oregon undergraduate students must complete an academic major to graduate; they may also complete additional majors, minors, or both.

Minimum requirements are 36 credits in the major, including 24 in upper-division work. Specific requirements are listed under individual departments. Concentrations within majors are additional ways of focusing academic interests, but they do not appear on academic transcripts.

Students choosing to complete a minor must earn a minimum of 24 credits, including 12 in upper-division work. Minor requirements are listed under individual departments. A minor will be awarded only at the time a bachelor's degree is conferred.

Students choosing to complete an undergraduate certificate must earn a minimum of 36 credits, including 24 upper-division with 12 minimum at the 400-level. A certificate will be awarded only at the time a bachelor's degree is conferred.

Graduate Programs

The University of Oregon offers graduate level study in a wide range of subjects. There are no minors in graduate degree and certificate programs, but students may pursue a graduate certificate or specialization alongside their degree program. Graduate Microcredentials are only available as standalone programs for non-degree students. For information about law degrees, see the School of Law section of this catalog.

Community Podcasting (p. 582)
Video Production (p. 582)

Core Education Courses

Area of Inquiry and **Cultural Literacy** courses count toward partial fulfillment of bachelor's degree requirements under the groups and categories listed in each section.

Some transfer courses are evaluated to count towards Core Education requirements even if they are not direct equivalents to a University of Oregon course. More information is available on the Office of the Registrar's website (<https://registrar.uoregon.edu/transfer-students/transfer-smart-codes/>).

Arts and Letters

Arts & Letters (A&L) courses will create meaningful opportunities for students to engage actively in the modes of inquiry that define a discipline. Courses will be broad in scope and demonstrably liberal in nature (that is, courses that promote open inquiry from a variety of perspectives). Though some courses may focus on specialized subjects or approaches, there will be a substantial course content locating that subject in the broader context of the major issues of the discipline. Qualifying courses will not focus on teaching basic skills but will require the application or engagement of those skills through analysis and interpretation.

Social Science

Social Science (SSC) courses will be liberal in nature rather than being professionally oriented or limited to the performance of professional skills. They will cover a representative cross-section of key issues, perspectives, and modes of analysis employed by scholars working on the subject matter addressed by the course. The subject matter of the course will be relatively broad, e.g., involving more than one issue, place, or time.

Science

Science (SC) area-satisfying courses will introduce students to the foundations of one or more scientific disciplines, or should provide an introduction to fundamental methods (such as mathematics) that are widely used in scientific disciplines. Courses will introduce students to the process of scientific reasoning.

United States: Difference, Inequality, and Agency

These courses fulfill the *United States: Difference, Inequality, and Agency* category of the Cultural Literacy Core Education requirement, a requirement informed by UO student activism. It is meant to develop students' analytical and reflective capacities to help them understand and ethically engage with the ongoing (cultural, economic, political, social, etc.) power imbalances that have shaped and continue to shape the United States. In addition to considering the scholarship, cultural

production, perspectives, and voices from members of historically marginalized communities, students in DIA courses:

1. **Inquire** into intersecting aspects of identity such as race, gender, gender identity, sexuality, socioeconomic status, indigeneity, national origin, religion, or ability;
2. **Analyze** uses of power to marginalize on the basis of identity, as well as the assertions of agency, resistance, and resilience by marginalized groups; and
3. **Examine** historical and contemporary structures, forms of knowledge, cultural practices, or ideologies that perpetuate or change the distribution of power in society.

and undertake one or more of the following:

- **Reflect** on one's own multiple social identifications and on how they are formed and located in relation to power.
- **Practice respectful listening and ethical dialogue** around deeply felt or controversial issues.

Global Perspectives

These courses fulfill the *Global Perspectives* category of the Cultural Literacy Core Education requirement. A Global Perspectives course aims to foster student encounter with and critical reflection upon cultures, identities, and ways of being in global contexts beyond the United States.

Students will consider substantial scholarship, cultural production, perspectives, and voices from members of communities under study, as sources permit. In Global Perspectives courses, students will do one or more of the following:

1. **Engage** texts, literature, art testimonies, practices, or other cultural products that reflect systems of meaning or beliefs beyond the U.S. context;
2. **Analyze** power relations involving different nations, peoples, and identity groups or world regions;
3. **Examine** hierarchy, marginality, or discrimination based on race, ethnicity, gender, gender identity, religion, sexuality, nationality, or ability (or some combination of these).

and undertake one or more of the following:

- **Discuss** possibly unfamiliar topics using critical vocabulary and concepts.
- **Practice respectful listening and civil dialogue** around controversial issues.

College of Arts and Sciences

<http://cas.uoregon.edu>

Christopher J. Poulsen, Dean

401 Tykeson Hall
541-346-3902

The College of Arts and Sciences (<https://cas.uoregon.edu/>) is the academic and intellectual hub of the University of Oregon, providing a core liberal arts curriculum to the vast majority of UO undergraduates—including those who will go on to earn a degree in one of the professional schools such as journalism or business.

The University of Oregon was founded in 1876 on a liberal arts curriculum, which has evolved over time to meet the needs of contemporary students. The fundamental academic mission of the College of Arts and Sciences is to foster a solid and broad general education, which includes the cultivation of quantitative, analytical, and communication skills; an understanding of social and intellectual history; an appreciation of literary and artistic expression; and habits of creative and critical thinking.

Building on its foundational undergraduate curriculum, the college offers more than 50 major degree programs in the humanities, social sciences, and natural sciences. Moreover, the College of Arts and Sciences is the heart of the university's research enterprise. The college has over 800 faculty members, including teaching specialists and research scholars who are engaged in active research programs and make original contributions to their respective fields of knowledge. Because of this, students have the opportunity to learn from leading researchers while receiving a liberal arts education that prepares them to be successful global citizens in the 21st century.

Students in the College of Arts and Sciences can take advantage of integrated academic and career advising to help them set their path forward, through a full set of services located in Willie and Donald Tykeson Hall.

Liberal Education

Social, political, and economic change is accelerating at a phenomenal pace, and career paths are evolving in response to these changes. When surveyed, employers say they place high value on critical thinking and problem solving; oral and written communication; teamwork and collaboration; adaptability to new and emerging technologies; leadership skills to guide, motivate, prioritize, and delegate work; and global and intercultural fluency. These are the very skills and knowledge that students gain from a liberal arts education.

No matter what their specific career paths, all UO students benefit from an educational foundation that emphasizes how values, history, and context combine with creative thought and informed inquiry to determine the best way forward, in both professional and civic life. A liberal arts education provides an essential framework for a lifetime of learning, work and growth in a world where many professions are undergoing profound, sweeping transformations.

Humanities

The departments and programs of the Humanities Division (<https://humanities.uoregon.edu/>) are committed to the study of human meaning as it is expressed in diverse languages, explained in diverse literatures, and reflected upon from diverse philosophical and religious perspectives. Students seek to understand the values and purposes that make practices and systems worthwhile. In an increasingly interconnected world, the ability to critically consider how individuals and communities make sense of their world is an essential skill.

Cinema Studies

<http://cinema.uoregon.edu>

Michael G. Aronson, Department Head

331 McKenzie Hall
541-346-5104
asu5@uoregon.edu

The UO's Department of Cinema Studies offers a one-of-a-kind opportunity to explore every facet of the world of moving images. Students become skilled producers of images as well as responsible consumers and thoughtful critics. While traditional film schools teach students how to make movies, UO cinema students approach film, television and new media from a variety of disciplinary angles and perspectives. Our interdisciplinary department teaches the creative and technical aspects of storytelling as well as the broader historical, philosophical, and geopolitical contexts of this industrial art form. Students take a diverse array of courses in history, theory, criticism, and aesthetics as well as in digital production.

Faculty

Peter Alilunas, associate professor (cinema studies). BA, 2006, Oregon; MA, 2008, Texas, Austin; PhD, 2013, Michigan. (2014)

Michael G. Aronson, professor (cinema studies). BA, 1994, Pennsylvania; MA, 1997, PhD, 2002, Pittsburgh. (2003)

Michael Bray, instructor (digital arts, cinema). BA, 1997, Illinois, Urbana-Champaign; MFA, 2008, Oregon. (2008)

Jon Crawford, assistant professor (film/TV production, queer cinema, documentary studies). MFA, 2011, University of California, Los Angeles. (2025)

Nissryne Dib, assistant professor (production, international film, documentary studies). MFA, 2020, University of California, Los Angeles. (2025)

Nicholas Forster, assistant professor (African-American cinema, media studies, golden age of television, African-American theater). PhD, 2019, Yale University. (2024)

Sangita Gopal, associate professor (cinema studies). BA, 1990, Calcutta; MA, 1995, PhD, 2000, Rochester. (2004)

Erin Hanna, associate professor (cinema studies). BA, 2004, MA 2007 York (Toronto); PhD, 2014, Michigan. (2014)

Masami Kawai, associate professor (cinema studies). BA, 2003, Hampshire College; MFA, 2013, California, Los Angeles. (2014)

Dong Hoon Kim, associate professor (cinema studies). BA, 1998, Yonsei; MA, 2002, PhD, 2008, Southern California. (2011)

Kevin May, instructor (cinema studies); multimedia assistant. BA, 2006, MEd, 2010, Oregon (2016)

Allison McGuffie, assistant teaching professor (African studies, digital humanities, English, cinema studies). PhD, 2013, University of Iowa (2020)

HyeRyoung Ok, instructor (cinema studies). BA, 1996, MA, 2000, Seoul National; MA, 2002, New York; PhD, 2008, Southern California. (2011)

Priscilla Peña Ovalle, associate professor (cinema studies, ethnic studies). BS, 1998, Emerson College; MA, 2001, PhD, 2006, Southern California. (2006)

Andre Sirois, associate teaching professor (cinema studies); multimedia supervisor. BA, 2002, Central Connecticut State; MA, 2005, Maine; PhD, 2011, Oregon. (2012)

Daniel Gómez Steinhart, associate professor (cinema studies). BA, 2000, Wesleyan; MA, 2006, PhD, 2013, California, Los Angeles. (2014)

Colin Williamson, assistant professor (cinema studies). BA, 2006, UC Santa Barbara, PhD, 2013, Chicago. (2023)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Appointed Faculty

Michael Allan, comparative literature

Rachel DiNitto, East Asian Languages and Literatures

Gabriela Martinez, journalism and communication

Affiliated Faculty

Kenneth S. Calhoon, comparative literature

Daniel L. Miller, journalism and communication

Kate Mondloch, history of art and architecture

Elizabeth M. Peterson, library

Stephen Rust, English

Biswarup "Bish" Sen, journalism and communication

Rick Silva, art

Janet Wasko, journalism and communication

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify, define, and apply the vocabulary used to describe and analyze the aesthetics of media. This vocabulary anchors the analytical (ideological, historical, etc.) and artistic work of the Cinema Studies curriculum.
- Historically and contextually analyze a broad range of media from newspapers to newer media to think critically about its intersections, institutions, functions, and social impacts.
- Show a basic knowledge of cinema which includes film, television, and newer media by identifying and describing the technological, artistic, and cultural histories of media in various national contexts while building researching and writing skills.
- Create, present, and constructively critique narrative films, documentaries, or video art pieces. Students will learn the basics of pre-production, production, and post-production to gain an overview of the film and art making process. Using critical thinking skills, students will develop and refine their creative and technical choices while navigating workflow standards.
- Develop artistic skills in specific areas such as screenwriting, directing, lighting, sound recording, and editing to enhance their

creative, theoretical, and technical understanding of moving image production. Students will specialize in a craft that enhances their personal creative voice and critical thinking skills.

- Identify and analyze important structures including economic, industrial, legal, political, or regulatory forces that shape the production, distribution, or exhibition of cinema. Students use critical and creative thinking, writing, and/or research skills to develop analytical projects about cinema.
- Perform critical, formal, and cultural analyses of cinematic texts. Using theories specific to cinema studies, students may identify change and continuities in discourses of the auteur, star, genre, etc., or situate texts within intersectional contexts. Students will use critical and creative thinking, writing, and/or research skills to develop analytical projects about cinema.
- Identify and analyze international/transnational/global modes of production, circulation, and aesthetics, then contextualize them broadly or more specifically according to the nation or region. Students will use critical and creative thinking, writing, and/or research skills to develop analytical projects about cinema.
- Exhibit specialized skills in writing, critical thinking, and/or creative practice through capstone seminars, workshops, and/or professionalization courses. Students may also apply the methods of other disciplines to complement cinematic analyses.

Undergraduate Studies

The department offers bachelor of arts (BA) and bachelor of science (BS) degree programs, consisting of 58 credits divided among four categories: fundamentals, production, core courses, and electives. The major includes the option of graduating with honors.

Courses in the major must be taken for a letter grade, and students must earn a grade of mid-C or better for credit toward the major. At least 28 credits must be taken in residence at the University of Oregon.

Cinema Studies Major Requirements

Code	Title	Credits
Fundamentals Courses ¹		
CINE 260M	Media Aesthetics	4
Select three of the following:		12
CINE 265	History of the Motion Picture I	
CINE 266	History of the Motion Picture II

Electives

⁴

For a list of courses that satisfy elective requirements, review the course lists at cinema.uoregon.edu/term-course-lists. Two electives are required and may include additional fundamentals, production, and/or core courses.

Total Credits **58**

¹ Fundamentals courses (16 credits) introduce majors to three central approaches to cinema studies: historical, social-institutional, and aesthetic. These must be completed before entry into production courses.

- Students must complete Media Aesthetics (CINE 260M) and three of the following courses, History of the Motion Picture I (CINE 265), History of the Motion Picture II (CINE 266), History of the Motion Picture III (CINE 267), and Television History (CINE 268), which may be taken in any order. Completion of all fundamentals courses is required before taking any production courses.

² **Production courses (10 credits: 6 from Production A and 4 from Production B)** give majors a chance to learn the essentials of media production.

- After completing the fundamentals requirements, students may enroll in a Production A course [Narrative Production I (CINE 270).
- After successful completion of a Production A course, students are eligible to register for Production B courses [various topics in production; please see term course list (<http://cinema.uoregon.edu/term-course-lists/>) (<http://cinema.uoregon.edu/term-course-lists/>) for offerings].

³ Core courses (24 credits) strengthen students' understanding of cinema as a dynamic, multicultural, and transnational phenomenon. Please see term course list (<http://cinema.uoregon.edu/term-course-lists/>) for offerings.

- Students must complete six core courses, with at least one from each subcategory: Core A (cinema industries); Core B (theory and criticism); and Core C (national, regional, and transnational cinema).
- Two courses in the core with the CINE subject code (8 credits out of the required 24) are required.

⁴ Electives (8 credits) allow students to broaden their exposure to cinema and media studies. These courses are not focused exclusively on cinema but instead study it in relation to other modes of inquiry, including (but not limited to) Asian studies, comparative literature, ethnic studies, folklore and public culture, philosophy, journalism, literary studies, music, Romance languages, and women's, gender, and sexuality studies.

A wide variety of elective courses from a range of departments and programs are available. Additional fundamentals, production, and core courses may also count as elective courses. Elective credit for the major may also be derived from internship and/or independent study.

Honors

The department provides qualified undergraduate majors with options for participating in the honors program. Students arriving in the 2018–19 academic year or earlier may receive program honors at graduation if they have a final cumulative grade point average (GPA) of at least 3.75 in cinema studies course work. Beginning in 2019–20, incoming students must meet this GPA and, in addition, complete a scholarly or screenwriting project that originates from a cinema studies course and is then expanded in a faculty-led project development seminar. An honors college thesis also fulfills program honors requirements.

P. Lowell Bowditch, Department Head

311 Susan Campbell Hall
1267 University of Oregon
Eugene, OR 97403-1267
541-346-4306
Fax: 541-346-4118
classics@uoregon.edu

The field of Classics embraces all aspects of Greek and Roman culture from the prehistoric to the medieval period.

Through the study of classical literature, history, philosophy, art history, and archaeology, students gain an understanding of the culture and ideals of the Greco-Roman world. Students who study classics at the undergraduate and graduate level have notable success in acceptance into graduate schools and in the job market. By studying the primary languages students engage with the Greeks and Romans in a direct and scholarly manner.

Students may also study the archaeology of the ancient Mediterranean world. Through the study of classical archaeology, students acquire a broad understanding of Greek and Roman sites and material culture. Grounded in the study of Greek and Roman buildings, tools, and objects, the courses also stress the cross-cultural influences and interactions that informed how people produced, used, and valued these materials.

By studying classical literature in the original language and in English translation, as well as other areas encompassed by the classics, such as other areas encompassed by the classics, such as ancient history, philosophy, art history, mythology, and rhetoric, a student gains an understanding of the culture and ideals of the classical world and their influence on the languages and institutions of Western civilization.

Members of the classics faculty have a broad range of research and teaching specialties and foster close interdisciplinary ties with the faculty of several departments, including anthropology, art history, comparative literature, English, history, and philosophy.

Faculty

P. Lowell Bowditch, professor (Latin literature, comparative literature, literary theory). BA, 1984, California, Berkeley; MA, 1989, PhD, 1992, Brown. (1993)

Cristina Calhoon, associate teaching professor (Latin literature, women in antiquity, Romans and barbarians). Laurea, 1978, Torino; MA, 1983, PhD, 1994, California, Irvine. (1988)

David Chamberlain, instructor (Greek literature, Latin literature). BA, 1989, Oxford; MA, 1991, PhD, 1997, California, Berkeley. (1997)

Kevin D. Dicus, associate professor (classical archaeology, Latin literature) BA, 1992, MA, 2002, Arizona; PhD, 2012, Michigan, Ann Arbor. (2015)

Christopher Eckerman, professor (Greek literature, lyric poetry, social history). BA, 2000, California, Davis; MA, 2002, PhD, 2007, California, Los Angeles. (2008)

Mary K. Jaeger, professor (Latin literature, historiography, food in antiquity). BA, 1982, Gustavus Adolphus; MA, 1984, PhD, 1990, California, Berkeley. (1990)

Ximing Lu, assistant professor (Latin Literature, Roman culture, global receptions). BA 2014, Creighton University; MA, 2016, PhD, 2021, Madison, Wisconsin. (2024)

Steven Shankman, professor. See **English**

Malcolm Wilson, professor (ancient philosophy, history of science). BA, 1985, Western Ontario; MA, 1986, Toronto; PhD, 1993, California, Berkeley. (1990)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Emeritus

Jeffrey M. Hurwit, professor emeritus. See **History of Art and Architecture**

John Nicols, professor emeritus. See **History**.

Participating

Martha J. Bayless, English

Sander Goldberg, professor of practice

Kristen Seaman, history of art and architecture

Graduate Program

Major - Master's Degree

- Classics (MA) (p. 77)

Classics (BA)

The field of classics embraces Greek and Roman culture from the prehistoric to the medieval periods.

One of the undergraduate's primary aims in studying classics at the university is to learn Greek or Latin (or both) well enough to read the ancient authors in their original languages.

Students may also study the archaeology of the ancient Mediterranean world. Through the study of classical archaeology, students acquire a broad understanding of Greek and Roman sites and material culture. Grounded in the study of Greek and Roman buildings, tools, and objects, the courses also stress the cross-cultural influences and interactions that informed how people produced, used, and valued these materials.

Through the study of classical literature in the original language and in English translation, and through the study of other areas encompassed by the classics, such as ancient history, philosophy, art history, mythology and rhetoric, a student gains an understanding of the culture and ideals of the classical world and their influence on the languages and institutions of Western civilization.

Members of the classics faculty have a broad range of research and teaching specialties, including Greek poetry and prose, Roman poetry and prose, ancient philosophy and science, and classical archaeology, and foster close interdisciplinary ties with the faculty of several departments, including anthropology, art history, comparative literature, English, history, and philosophy.

Students who intend to major in classics should begin the study of one or both of the classical languages as early as possible in their undergraduate careers.

Students earning a BA in Classics at the University of Oregon will be expected to demonstrate the following learning outcomes, with proportionate emphasis given to the outcomes focused on the particular content area of the chosen concentration in Classics (Classics; Greek; Latin; Classical Civilization; and Classical Archaeology and Material Culture):

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Have acquired Ancient Greek / Latin, including competencies in reading and translating, and a socio-linguistic understanding of the language(s).
- Understand literature, art, and other artifacts from the cultures of the Greco-Roman world, and the capacity to situate them in their sociohistorical context, to identify, interpret, and discuss them, and to describe their later influence. Key aspects of these cultures include philosophy, political theory, rhetoric, theatre, art, archaeology, historiography, poetry, and religion.
- Understand ancient Greco-Roman society as a complex and changing organism shaped by a range of factors such as demography, political organization, class, gender roles, education, economy, and values; the capacity to analyze and synthesize evidence to draw valid conclusions about social phenomena.
- Understand the archaeology and material culture of Ancient Greek and Roman civilizations; the development of practical and analytical skills that allow students to critically interpret disparate bodies of material evidence, as well as to recognize and construct well-reasoned interpretations of ancient material culture. Key themes include methods and theory of archaeological excavation and survey, mortuary practices, social organization, the ancient economy, and the materiality of religious practice.
- Have mastery of transferable skills including skills in critical thinking, analysis of documentary evidence, ability to conduct independent research, and effective oral and verbal communication.

- Classical Archeology (p. 67)
- Classical Civilization (p. 68)
- Greek (p. 69)
- Greek and Latin (p. 69)
- Latin (p. 70)

Courses used to satisfy major requirements must be taken for letter grades and passed with grades of mid-C or better.

At least four upper-division courses (normally 16 credits) must be taken at the University of Oregon.

Classics (Classical Archaeology) Major Requirements

Code	Title	Credits
GRK 101–103	Basic Greek ¹	15
or LAT 101–103	Basic Latin

Honors

The honors program in classics provides an opportunity for a student to focus on an area of concentration in a written thesis. The requirements for a bachelor's degree with honors in classics are as follows:

- 1. Satisfaction of the requirements for the major
- 2. A grade point average (GPA) of 3.50 or better in courses taken to meet the requirements of both the major and the university
- 3. A senior thesis of substantial quality, approved by the thesis director and at least one member of the program committee

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Greek Concentration
- Latin Concentration
- Greek and Latin Concentration
- Classical Civilization Concentration
- Classical Archaeology Concentration

Classical Civilization Minor

The field of Classics embraces Greek and Roman culture from the prehistoric to the medieval periods. Through the study of classical archaeology, students acquire a broad understanding of Greek and Roman sites and material culture. Grounded in the study of Greek and Roman buildings, tools, and objects, the courses also stress the cross-cultural influences and interactions that informed how people produced, used, and valued these materials. Through the study of classical literature in the original language and in English translation, and through the study of other areas encompassed by the classics, such as ancient history, philosophy, art history, mythology, and rhetoric, a student gains an understanding of the culture and ideals of the classical world and their influence on the languages and institutions of Western civilization.

Classical Civilization Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Code	Title	Credits
Lower- or upper-division courses from approved list		8
Upper-division courses from approved list		16
Total Credits		24

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Greek Minor

The minor in Greek at the UO introduces students to the study of the ancient language and its literatures. After a year of introduction, students can expect to read and study closely such authors as Plato, Lysias, Euripides and Homer in the original Greek.

Greek Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Code	Title	Credits
Upper-division Greek (GRK) courses ¹		16
Upper-division elective courses (see table below)		8
Total Credits		24

¹ Four credits of first-year Greek may be applied to this total.

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Approved Elective Courses

Latin Minor

The UO Department of Classics introduces students to foundational concepts of Western culture and literature through the study of Roman history and culture. Undergraduate students can minor in Latin, giving them the opportunity to explore Roman history and culture through concentrated study on Latin language as well as related courses. Students read literature, philosophy, and history texts both in the original Latin and in translation.

Latin Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Code	Title	Credits
Upper-division Latin (LAT) courses ¹		16
Upper-division elective courses (see table below)		8
Total Credits		24

¹ Four credits of first-year Latin may be applied to this total.

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Classics (MA)

The Department of Classics currently offers the master of arts (MA) in classics with a focus on ancient languages and literatures. Students may focus their coursework on Greek, Latin, or Greek and Latin. In addition, the department offers a master of arts degree with a focus on classical archaeology and material culture.

Programs of study are arranged in consultation with two advisors, at least one of whom is a member of the Department of Classics, and comprise graduate courses selected from Anthropology (subject code ANTH), art history (ARH), Classics (CLAS), English (ENG), Latin (LAT), Greek (GRK), History (HIST), Philosophy (PHIL), and Religious Studies (REL).

Program's Admission Requirements

Please visit the program's website (<https://cas.uoregon.edu/classics/apply/graduate-admissions/>).

Students earning a MA in Classics will be expected to demonstrate the following learning outcomes with proportionate emphasis given to the outcomes focused on the particular content area of the chosen concentration in Classics (Language and Literature; Classical Archaeology and Material Culture):

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Advanced proficiency in Latin and/or Greek, including competencies in reading and translating, and a socio-linguistic understanding of the language(s).
- Advanced understanding of the archaeology and material culture of Ancient Greek and Roman civilizations; the development of practical and analytical skills that allow students to critically interpret disparate bodies of material evidence, as well as to recognize and construct well-reasoned interpretations of ancient material culture.
- Advanced understanding of literature, art, and other artifacts from the cultures of the Greco-Roman world, and the capacity to situate them in their sociohistorical context, to identify, interpret, and discuss them, and to describe their later influence.
- Proficiency in a modern European language, which is a major carrier of secondary literature and research, usually French or German.
- Ability to write research papers, requiring advanced knowledge of a range of bibliographic resources.
- Classical Archaeology and Material Culture (p. 77)
- Languages and Literatures (p. 77)

Master of Arts in Classics: Classical Archaeology and Material Culture

Code	Title	Credits
Graduate Courses		
CLAS 611	Introduction to Philological Methods	4
600-699 level courses taken in residence ¹		9
CLAS 507	Seminar: [Topic] (Topics in archaeology and material culture)	8
500-level art history course ²		4
500-level anthropology course ³		4
GRK 511	Authors: [Topic] (Two courses in Greek or Latin authors)	8

or LAT 511	Authors: [Topic]	
Additional graduate courses		8
Select one of the following: ⁴		9
GRK 503	Thesis	
LAT 503	Thesis	
CLAS 503	Thesis	
Total Credits		45

- ¹ In addition to the mandatory Classics 611, these may be chosen from Seminar: [Topic] (CLAS 607), Terminal Project (CLAS 609), Archaeology and Anthropology (ANTH 681), Professional Writing (ANTH 685), Social Theory II (ANTH 689), Graduate Studies in Art History (ARH 611), Historical Methods and Writings (HIST 612)
- ² Choose from Seminar: [Topic] (ARH 507) (when on relevant topics), Experimental Course: [Topic] (ARH 510), Ancient Mediterranean Art: [Topic] (ARH 521).
- ³ Choose from (ANTH 546), Gender and Archaeology (ANTH 548), Zooarchaeology: [Topic] (ANTH 571). Students are encouraged to take multiple classes from the anthropology department since classical archaeology, as a discipline, is now steeped in interdisciplinary work with anthropology.
- ⁴ Satisfactory completion of the thesis includes an oral defense.

Master of Arts in Classics: Languages and Literatures

Code	Title	Credits
Graduate Courses		
CLAS 507	Seminar: [Topic] (or seminar in art history, history, Greek, or Latin)	4
CLAS 507	Seminar: [Topic] (topics in archaeology and material culture)	4
CLAS 611	Introduction to Philological Methods	4
600-level courses in residence		9
Additional graduate courses		30
Option 1		
Select one of the following: ²		9
GRK 503	Thesis	
LAT 503	Thesis	
CLAS 503	Thesis	
Option 2		
Two-part comprehensive examination: translation and essay ³		
Total Credits		51

- ¹ Equivalent courses taken as an undergraduate may fulfill this requirement.
- ² The credits may be counted toward the 45-credit minimum. Satisfactory completion of the thesis includes an oral defense.
- ³ The candidate must, in consultation with his or her advisors, define a reading list for the translation part of the examination.

Additional Requirements

- Complete the general MA requirements stipulated by the Division of Graduate Studies

- Pass with a grade of mid-B or better five courses in Greek and/or Latin authors
- Pass a translation examination in one modern language, usually French or German. This requirement may be fulfilled with a standardized examination offered by the university or by the successful translation of a significant scholarly text

Additional information may be obtained from the classics department and is included with the letter of admission.

Comparative Literature

<http://complit.uoregon.edu>

Katya Hokanson, Department Head

357 Prince Lucien Campbell Hall
1415 Kincaid Street
Eugene, OR 97403-5242
541-346-3947
complit@uoregon.edu

The University of Oregon offers major programs in comparative literature leading to the bachelor of arts (BA), bachelor of sciences (BS), and doctor of philosophy (PhD) degrees. In addition, comparative literature offers a compact minor program.

Interdisciplinary at its core, comparative literary study begins with the insistence that any artifact—whether from the realm of literature, cinema, the visual arts, or graphic and digital platforms—requires active attention and probing engagement. While the national literatures designate their subjects by language or cultural area, comparative literature provides for a pluralistic approach that bridges divides between languages and cultures, not to mention media.

Closely allied with critical theory, philosophy, and media studies, comparative literature is defined by an open-ended spirit of inquiry rather than a specific methodology or a preestablished canon of materials. Students of comparative literature develop a sense of their subject matter as they discover the meaning and method of their approach.

Oregon's graduate program, established in 1962, has an international reputation. It is the home of the founding journal in the field, *Comparative Literature*, and is closely involved with the leading national organization, the American Comparative Literature Association.

The department maintains an active schedule of lecture series, seminars, and workshops. In addition, comparative literature is the home of the Nomad Mentorship Program and *Nomad*, the journal of undergraduate criticism. Library holdings, which are strong in all areas of research in literature and other media, include an outstanding collection of journals and are augmented by an extensive interlibrary resources.

Faculty

Aycan Akçemete, assistant professor (performance studies, contemporary theater in the UK and Turkey, intercultural theater, theater criticism). BA, 2007, MA, 2010, Hacettepe University; PhD, 2023, University of Texas at Austin. (2024) See also: Theater Arts

Michael Allan, associate professor (Arabic and Francophone literature, postcolonial studies, cinema). BA, 2000, Brown; PhD, 2008, California, Berkeley. (2008)

Monique Balbuena, associate professor (Jewish Studies, Sephardic Languages, Ladino, Poetry, French and Francophone Literatures, Latin American Studies). BA, 1988, MA, 1993, Federal University of Rio de Janeiro; PhD, 2003, California, Berkeley. (2004)

Steven T. Brown, professor (Japanese film, comparative film, popular culture). BA, 1987, Illinois, Urbana-Champaign; MA, 1988, PhD, 1993, Stanford. (1993)

Katherine "Katy" Brundan, associate teaching professor (18th- and 19th-century English and European literature, novel, media and popular culture). BA 1992, MA, 1996, Cambridge; PhD, 2006, Oregon (2013)

Kenneth S. Calhoon, professor (18th- and 19th-century German and European literature and thought, psychoanalysis, cinema). BA, 1979, Louisville; MA, 1981, PhD, 1984, California, Irvine. (1987)

Roy Chan, associate professor. See **East Asian Languages and Literatures**.

Katya E. Hokanson, professor (Russian literature, travel literature, cultural studies). BA, 1984, Williams; MA, 1988, PhD, 1994, Stanford. (1995)

Sangita Gopal, associate professor (cinema studies). BA, 1990, Calcutta; MA, 1995, PhD, 2000, Rochester. (2004)

Dawn Marlan, associate teaching professor (history of the novel, gender studies, cinema). BA, 1989, Bennington; MA, 1992, PhD, 2000, Chicago. (2004)

Leah Middlebrook, associate professor (16th-century Spanish and French lyric, court culture, theories of the subject). BA, 1989, Columbia; MA, 1991, PhD, 1998, California, Berkeley. (2002)

Lanie Millar, associate professor (20th- and 21st-century Caribbean and Latin American literature, Luso-African literature, global south studies). BA, 2002, Baylor; MA, 2003, Middlebury College; PhD, 2011, Texas, Austin. (2013)

Jenifer Presto, associate professor (Russian literature, poetry, modernism). AB, 1985, Smith; MA, 1988, Middlebury; MA, 1989, PhD, 1996, Wisconsin, Madison. (2003)

Tze-Yin Teo, associate professor (comparative, global, and transnational modernism; translation studies; literary theory). BA, 2009, National University of Singapore; PhD, 2015, Emory. (2015)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Stacy Alaimo, English

P. Lowell Bowditch, classics

Anita Chari, political science

Joyce Cheng, history of art and architecture

James R. Crosswhite, English

Dianne M. Dugaw, English

Cecilia Enjuto Rangel, Romance languages

Pedro García-Caro, Romance languages

Minor

- Comparative Literature (p. 82)

Graduate Program

Major - Doctoral Degree

- Comparative Literature (PhD) (p. 84)

Comparative Literature (BA/BS)

The undergraduate program offers a unique major that cuts across disciplines, teaches critical skills, and provides an intellectually challenging curriculum that trains students to analyze, critique and contribute to culture while preparing them for possible careers in the public humanities, media and multi-media, law, government, non-profit work, political activism and organization, public relations, advertising, or teaching. Students with a good background in one or more languages other than English find that the program gives them the opportunity to study literature and related cultural productions in a variety of historical and theoretical perspectives.

The program combines flexibility with a rigorous grounding in the basics of literary theory, cultural studies, and critical writing. Based on their interests, majors choose one of two tracks: language and culture or disciplines in dialogue. In the first, students develop proficiency in two linguistic traditions. In the second, students explore links between a single linguistic tradition and a nonliterary field. Both tracks are ideally suited to students considering either a double-major or a major and a minor, as students can combine their multiple interests into a single program of study.

A carefully designed core curriculum takes students through the basics of comparative literature as a discipline. Course work culminates with Capstone Seminar (COLT 415). This small seminar, capped at fifteen, offers both personalized attention and the sorts of pedagogical experiences that a small course enables, from workshop style formats to lengthier, individualized final projects. In addition, the Capstone allows students to work closely and collaboratively with other advanced students in their cohort.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Foreign-language proficiency: Majors are required to develop reading proficiency in at least one language other than English (many of our majors work in two). This requirement is fulfilled by the completion of three upper division courses in that language.
- National-Linguistic Fields: Majors are required to develop a familiarity with the literature and culture (including non-literary media and related cultural forms) in at least one national-linguistic tradition other than English (many of our majors work in two such traditions, though British or American literature is also fully acceptable as one of their two required fields). This requirement is satisfied by the completion of four upper-division courses in which materials are studied in the original language.
- Critical and Interpretive Reading: We endeavor to teach our students to read, not for merely plot or comprehension but with a heightened sensitivity to the ways in which literary works and related materials are informed by myriad linguistic ambiguities and shadings, by rhetorical and generic traditions, as well as by contexts that are themselves not "given" but are often only fully manifest in the texts they envelop.
- Theoretical Preparation: Comparative Literature has been defined historically not only by its multi-linguistic, cross-national habit but also by its emphasis on theoretical approaches—doubly important within a field in which students working in a variety of traditions cannot be expected to have a common textual base. We expect our majors to become familiar with a range of literary-theoretical orientations and to

- be able to apply them in the analysis of literary, cinematic or related works.
- Analytical Writing: Students are expected to be able to write probing analytical essays that demonstrate not only a facility with various critical registers, but which also demonstrate an ability to read carefully and closely.
 - Interdisciplinarity: Comparative analyses of literary and other works often hew closely to approaches developed in disciplines such as philosophy, linguistics, political thought, cultural history, religious studies, and more. Our students are expected to demonstrate a working awareness of the inherent interdisciplinarity of our field. This is more explicit in the “disciplines in dialogue” track of our major, but it is true also of our “literature and culture track.”
 - Diversity: Diversity is “built in” to the structure of a field that, by definition, places different cultures in dialogue. Our program endeavors to extend our students’ awareness of diversity along multi-cultural axes.

Note: The courses that satisfy the learning outcome one and two requirements may overlap. Because these courses are taken under prefixes other than COLT, for example FR, IT, GER, SPAN, RUSS, JPN, success in these courses will reflect the learning outcomes developed by the home departments.

Comparative Literature Major Requirements

The comparative literature major offers two tracks, language and culture and disciplines in dialogue. In order to complete a bachelor’s degree in comparative literature in the language and culture track, it is necessary to complete the language and culture language requirement. Students may demonstrate language proficiency in any one of the following ways: 1) The student is a native speaker of a language other than English. 2) One of the upper-division courses used to complete the Primary Linguistic Tradition was taught in the target language; that is, the course must be a full-fledged literature or cinema course, not a course whose primary focus is language acquisition. 3) Three, 300-level (or higher) language courses in the same language (not English).

In order to complete a bachelor’s degree in comparative literature in the disciplines in dialogue track, it is necessary to complete at least the third term of the second year of a second-language course taught in the language (i.e., the language requirement for the Bachelor of Arts degree). Note that this requirement applies to students who seek both the Bachelor of Arts and the Bachelor of Science degree.

All coursework required for the comparative literature major and minor must be taken for a letter grade and passed with grades of mid-C or better. Online courses do not count toward the comparative literature major.

Code	Title	Credits
Language Requirement ¹		
Core Courses		
Two COLT electives		8
COLT 301	Approaches to Comparative Literature	4
or COLT 305	Cultural Studies	
Select one of the following:		4
COLT 302	Theories of Poetry	
COLT 303	Theories of the Novel	
400-level COLT elective		4
COLT 415	Capstone Seminar	4

Focus Fields Courses	
Three upper-division courses in primary linguistic tradition ^{1,2}	12
Three upper-division courses in a secondary linguistic tradition (language and culture track) or a nonliterary discipline (disciplines in dialogue track)	12
Total Credits	48

¹ With the approval of the director of undergraduate studies, courses taken abroad may be used to fulfill this requirement.
² One of these courses may be on a non-literary topic relevant to the field such as history or philosophy.

Honors in Comparative Literature

Comparative literature students may apply to enter the honors track during spring of their junior year. Admission to the honors track is based on the recommendation of a comparative literature faculty member, instructor, or a participating faculty member; a writing sample; and the student’s transcript. Materials should be submitted by week 2 of spring term of the junior year. Completion of the honors track requires the successful completion of a bachelor of arts honors thesis. Students invited to participate in the Honors Track will develop and present a thesis prospectus in the fall term of their senior year. The thesis must be comparative in nature, and should entail work in both of the student’s focus fields. If the prospectus is approved by the director of undergraduate studies, then the student enrolls in Thesis (COLT 403) during winter of the senior year. The full draft of the thesis is due by the end of week 10 of winter term. The thesis is completed under the supervision of the thesis advisor, and must be submitted to both the advisor and a second reader by the fifth week of spring term. The thesis must then be approved by the advisor and second faculty member after a formal presentation and defense, which will be held in spring term. The thesis advisor and the second reader should be chosen from the comparative literature faculty or participating faculty. With approval of the director of undergraduate studies, a second reader who is not a participating member may be chosen from another department.

Tracks within the Major

Because there are many different ways of thinking about literature from a comparative perspective, two emphases within the major are offered. One track, language and culture, features comparative study across different linguistic traditions. This track is recommended for students who want to study abroad, attend graduate school in comparative literature, or want to gain an in-depth understanding of linguistic cultures in addition to their own. A second track, disciplines in dialogue, requires less formal language study and allows students to combine the critical study of literature with work in another field. This emphasis offers a manageable path for students considering a double major in literature and another discipline. It is also well-suited to students who want to combine literary and cinema studies with creative writing, performance, the visual arts, philosophy, history, and journalism.

Language and Culture Track

Students in this track designate two linguistic traditions, a primary linguistic tradition and a second linguistic tradition. In addition, the language chosen to fulfill the language requirement should coincide with one of these national-linguistic traditions. The linguistic traditions commonly studied for the comparative literature major are listed below. Other traditions may be chosen, but must be approved by the department.

- Arabic
- Chinese
- Classics
- English
- French
- German
- Greek
- Italian
- Japanese
- Korean
- Romance Languages
- Russian
- Scandinavian
- Spanish

Disciplines in Dialogue Track

Students in this track designate one linguistic tradition and one additional disciplinary field. Courses taken in this disciplinary field may be spread out across several subject codes, with the approval of the director of undergraduate studies. The disciplinary focus fields commonly studied for the comparative literature major are listed below. An individualized course of study may be chosen, but must be approved by the department:

- African Studies
- Anthropology
- Art
- Art History
- Asian Studies
- Black Studies
- Business
- Cinema Studies
- Computer Science
- Comics and Cartoon Studies
- Creative Writing
- Dance
- Economics
- Environmental Studies
- Folklore
- Global Studies
- History
- Indigenous, Race, and Ethnic Studies
- Journalism
- Judaic Studies
- Latin American Studies
- Linguistics
- Music
- Philosophy
- Planning, Public Policy, and Management
- Political Science
- Psychology
- Religious Studies
- Sociology
- Theater Arts
- Women and Gender Studies

Students are strongly advised to complete their language requirement in a language relevant either to their linguistic tradition or to their disciplinary field.

Languages

The study of comparative literature entails advanced interdisciplinary work. Students who pursue the languages and culture track work across

and between languages, and develop proficiencies beyond the two years required for the UO Bachelor's of Arts Degree. This proficiency can be demonstrated in a number of ways (see below). Students who pursue the disciplines in dialogue track develop the language proficiency required for the UO Bachelor of Arts Degree.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Comparative Literature Minor

Comparative Literature students have a passion for words, images, and ideas. They are drawn to stories, and they understand the power of representation. They think across disciplines and challenge existing frameworks. They are creative, critical, and committed to imagining a more just world.

The Comparative Literature minor offers an opportunity for students to pursue an interest in world literature and film without advanced language study.

Minor Requirements

The comparative literature minor offers an opportunity for students to pursue an interest in world literature and film without advanced language study.

Comparative Literature (PhD)

The graduate program in comparative literature is founded on the conviction that literary traditions are best understood when contextualized across national and cultural boundaries. To thrive professionally, every scholar in the discipline must be closely trained in a primary national literature, proficient in at least three languages, and attuned to the importance of philology, bibliography, and linguistic training. At the same time, a commitment to comparative study requires a firm grasp of translation among languages and media and the history of reading practices, as well as aesthetic and cultural theory.

Students are admitted to the graduate program with the expectation that they will work toward the PhD degree. At present the Department of Comparative Literature does not offer a terminal master's degree. Instead, students become eligible for the MA on passing their PhD qualifying exams.

Program's Admission Requirements

Please visit the program's website (<https://complit.uoregon.edu/admissions/>).

The component parts of the doctoral program in Comparative Literature constitute an apprenticeship to a profession that requires the learning outcomes listed below.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Publish as a means to establish oneself as a part of a professional community.
- Become conversant with the principal texts, discussions and problems in and across at least two fields of study (thus, "comparative").
- Be proficient in multiple languages, such that advanced research and analysis can be carried out in a chosen field or fields of study.

The key benchmarks in this apprenticeship are:

- The successful completion of coursework and/or examination in languages relevant to a doctoral student's area of research.
- The Third-Year article.
- The successful completion of a written exam.
- The successful completion of a comprehensive oral exam.
- The successful completion and defense of a doctoral dissertation.

Overview of Requirements

Within their first three years of graduate study, students must complete the language requirement, six foundation courses, at least five courses in the primary field, and at least four courses in the secondary field. In addition, students select at least three elective courses in consultation with their faculty advisors; these courses may be tangential to their

main research interests or distributed according to those interests. The foundation courses include Graduate Studies in Translation (COLT 613), Graduate Studies in Comparative Literature (COLT 614), Graduate Studies in Comparative Literature (COLT 615), Transmedial Aesthetics (COLT 616), and at least two other graduate-level COLT courses. Courses applied to the degree must be passed with a grade of B+ or better, and students must maintain a grade point average of at least 3.50 in all graduate-level courses in order to remain in good standing in the program.

After completing all course work and language requirements, students are eligible to take their written and oral PhD qualifying examinations. Following successful completion of the exams, students submit a prospectus and meet with their committees for the prospectus conversation. A satisfactory prospectus conversation is required for advancement to candidacy. The approximate time from completion of course work to advancement is one year. Typically, the dissertation is completed within two years of advancing to candidacy.

Foundation Courses

The graduate program provides a solid foundation in theoretical and historical methods integral to comparative literature and relevant to working across national literary traditions, historical periods, theoretical paradigms, and media. Through these courses, students are expected to acquire a comprehensive understanding of scholarly method, encountering not only contemporary texts and theorists but also the history of the field, including the central controversies, crucial debates, and cultural contexts that have shaped its development. The student must complete six graduate-level foundation courses; these courses are Graduate Studies in Translation (COLT 613), Graduate Studies in Comparative Literature (COLT 614), Graduate Studies in Comparative Literature (COLT 615), Transmedial Aesthetics (COLT 616), and two others selected from among the COLT graduate course offerings.

Primary Field

The majority of comparative literature graduates are hired to teach in national literature departments and not in interdisciplinary programs. For this reason it is crucial that students develop a primary research field that is based either in a single national literature (e.g., Japanese literature) or in a single linguistic-cultural tradition that crosses national boundaries (e.g., Latin American literature). Depending on the relative breadth of a student's prior training, the primary field may be further delimited according to a period (e.g., postwar Japan) or a genre (e.g., German drama) or even an artistic movement (e.g., French postmodernism).

The student must complete five graduate-level courses in the primary field; at least three of the courses should share the same department subject code.

Secondary Field

This field complements the research within the primary field, either by providing counterpoint or a needed context. There are three ways to define one's secondary field. Most commonly, it represents a second national literature (e.g., Spanish literature) or a linguistic-cultural tradition that crosses national boundaries (e.g., Latin American literature). In addition, where two or more national-linguistic traditions share a common literary history—for example, within a given region or artistic movement—the secondary field may be defined in comparative terms (e.g., the Continental Renaissance, Caribbean literature, or East Asian film). Finally, the secondary field can eschew literary categories altogether

in order to represent an alternative disciplinary focus (e.g., religious studies).

At least four graduate-level courses must be taken in the secondary field. Three of them should share the same department subject code. At the discretion of the director of graduate studies, the three courses with shared subject code may be spread out over the secondary, foundation, and elective fields.

Electives

Three of the program's required 18 graduate-level courses are electives and should be chosen in consultation with an advisor. The electives may cover a wide range of interests or may be carefully distributed among the three research fields to fill gaps or achieve greater depth. Some students may wish to devote their electives to a fourth field of research (e.g., a third national literature). Students hoping to pursue this option are urged to meet with the director of graduate studies as soon as possible.

Language Requirement

Work in at least three languages is expected at all phases of the program, from course work to the dissertation. The language requirement addresses this expectation by ensuring both linguistic proficiency and a minimum level of graduate course work in all three languages. Students are required to complete graduate-level work in their languages. The following guidelines apply: (1) at least two graduate courses must be taken in each language to meet this requirement and should ideally be taught by a specialist in the target language; (2) the seminar paper for each course should demonstrate competency dealing with the target language and should be suitable for publication in the national literature field. The seminar paper for each of the two non-English languages must be submitted to the department at the end of the course for approval. The language requirement must be satisfied by the end of the third year.

Timetable from Entrance to Examinations

Advisors

During their first two terms of study (fall and winter), students are advised by the director of graduate studies. By Monday of week two of the third term, each student formally identifies an interim advisor—a faculty member who agrees to mentor the student through the completion of the first-year conversation and the first two terms of the second year.

By Monday of week two of the spring term of the second year, the student will have chosen his or her advisor of record. This advisor, who will be competent in the student's primary research interests, will mentor the student through the second-year review and the third year of study.

First Year

First-Year Statement

By Friday of week four of spring term, first-year students, in consultation with their interim advisors, submit a two- to three-page statement of purpose. It should identify and justify the primary and secondary fields the student intends to pursue—the general fields of study that form the backbone of a scholar's research profile. It should also clarify the relationship between the students' research languages and research fields, and indicate what linguistic study is necessary to complete the proposed course of study.

First-Year Conversation

In week six or seven of spring term, the first-year student, his or her interim advisor, the director of graduate studies, and one other comparative literature faculty member meet for a conversation about

the first-year statement. They evaluate the student's progress to date, including course work and language examinations, discuss the intended fields, and offer guidance for the remaining two years leading to the qualifying examination. With their approval of the statement and the student's general plan, as well as successful completion of all first-year course work with a GPA of 3.50, the student may proceed to the second year. A brief memo written by the student that summarizes the conversation is due to the department by Wednesday of week eight.

Second Year

Second-Year Article

During the second year, as part of preparation for publication in the field, students are required to begin expanding a seminar paper into an article for submission to a journal. Workshops are held to prepare students to write an article and select an appropriate publication venue. This process is meant to provide step-by-step guidance in publishing before the student advances to candidacy.

Second-Year Review

By Monday of week two in spring term of the second year, a student will have chosen the advisor of record. In consultation with that advisor, the student must write a careful self-review of his or her progress to date. The review should revisit both the first-year statement and the report of the first-year conversation. In particular, any recommendations made by the first-year conversation committee should be assessed: how were these recommendations pursued and with what result? The designation of the three research fields should also be addressed, along with any shifts in focus that have proved necessary or desirable. The review should explain what course work remains to be completed, and, where appropriate, should outline a plan for the completion of that work. Any problems in performance or concerns about timely progress should also be addressed. The second-year review must be approved by the advisor of record and submitted by Monday of week eight of spring term. The graduate committee reviews these reports, and small revisions and clarifications may be required before they approve the document. With approval of the review and completion of all second-year course work with a GPA of 3.50, the student may proceed to the third year.

Third Year

Third-Year Article

During the first term of the third year, the student will finalize the third-year article in consultation with an advisor in preparation for submitting it for peer review. By Friday of week five of spring term of the third year, the student will submit this article to the department along with a cover letter addressed to an appropriate journal.

Completion of Course Work and Language Requirement

The program is designed so that students may complete all course work and language requirements by the end of their third year. By Friday of week nine of spring term of the third year, students submit the course work and language requirement completion form for approval by the director of graduate studies and the graduate committee.

PhD Degree Requirements

Code	Title	Credits
Foundation Courses		
Six foundation courses: the four listed below and two other graduate COLT courses.		
COLT 613	Graduate Studies in Translation	4-5
COLT 614	Graduate Studies in Comparative Literature	5

COLT 615	Graduate Studies in Comparative Literature	5
COLT 616	Transmedial Aesthetics	5

Primary Field CoursesAt least five graduate courses ¹**Secondary Field Courses**At least four graduate courses ²**Electives**At least three graduate courses ³

¹ At least three of the courses should share the same departmental subject code.

² Three courses should share the same departmental subject code. At the discretion of the director of graduate studies, the three courses with shared subject code may be spread out over the secondary, foundation, and elective fields.

³ Choose electives in consultation with an advisor.

Additional Requirements

- Successfully passing the PhD qualifying exams
- Writing dissertation prospectus
- Dissertation

Examination Committee

By the beginning of spring term of the third year, each student selects an examination committee consisting of the advisor of record and two additional faculty members. Of these three, one represents the student's primary field of research (commonly the advisor of record), another represents the secondary field, and a third member is designated the committee chair. The third member also serves as chief mentor for the student's foundation field, advising him or her on the reading list inclusions from that field. All members must sign an agreement form to participate in the exam committee, and all must approve the exam statement and reading list. By Monday of week two in spring term of the third year, students must submit their examination committee membership to the department. Students who have chosen an additional fourth field of research may choose to be tested in that field as well. The logistics of this option should be pursued with the director of graduate studies as early in the process as possible. The examination committee membership must be approved by the director of graduate studies.

Examination Statement and Reading List

In consultation with the exam committee members, each student determines his or her examination fields. These fields correspond to the primary, secondary, and foundation research fields, but are usually narrower and more specialized in scope. Students then devise a reading list covering each field. Each list should include approximately fifteen to twenty primary items (an item is an author and a work or works that represent the author's perspective as a whole). Each field list should also include a separate sublist of pertinent critical-secondary works. Exam committee members can provide assistance in choosing the works on this list.

Students must also compose a six- to eight-page statement that defines the student's core interests, defends the examination fields, clarifies the scope of the reading list, and offers some indication of the future dissertation project and career aspirations for which this reading list provides the necessary comprehensive background and preparation. After being approved by all the examiners, the exam statement and reading list are submitted to the department by the end of week nine in

spring term of the third year. Prior to final approval, the exam statement and reading list are reviewed by the graduate committee, which may have additional recommendations and queries. Occasionally, these recommendations may be substantive enough to require additions to or deletions from the list and a resubmission process. Changes to the statement and list may be made no later than four weeks prior to the first written exam and must be approved by both the director of graduate studies and the examination committee members.

When the graduate committee and director of graduate studies have approved the Course Work and Language Requirements Completion Form and the exam statement and reading list, the student may proceed with the examination process.

Overview of Fourth Year

The fourth year is dedicated to completing the doctoral examinations and writing the dissertation prospectus. Typically, students prepare for the exams over the summer and early fall, sit for the written and oral exams by the end of fall term, and complete the prospectus by the middle of spring term. The prospectus conversation must be held by the beginning of week 10 of spring term in the fourth year, so that students may advance to candidacy in a timely manner at the end of spring term.

Written Examination

In this phase, students compose three essays over three 24-hour periods spread out over three weeks (weeks five, six, and seven of fall term in the fourth year). The first essay covers the primary field, with questions submitted by the examiner representing that field; the second covers the secondary field in the same manner; the third essay is comparative, addressing texts from both the primary and secondary fields, with questions submitted by all three examiners. For the primary and secondary field exams, students choose between two questions; for the comparative exam, they choose one of three questions. No exam will cover the foundation field. Instead, the examiners will explore the full gamut of the student's reading list with questions designed to ascertain the student's mastery of his or her methods as applied to the primary and secondary fields.

The three examiners all grade and comment on the comparative essay and read the field exams. The two field exams are graded separately and commented upon by the responsible examiners, except in the case of a failing grade. In this circumstance, the student's essay is graded by the other two examiners, as well. If two out of three examiners fail an essay, the student may retake the exam in that area in the following term. The exam may be retaken no more than once. If more than one of the student's essays fails, or if the student fails a retake exam, he or she does not proceed to candidacy, but may be eligible for a terminal master's degree. Grades for these exams are high pass, pass, or no pass. Students learn their exam results in week nine of fall term—that is, two weeks after completion of the final essay.

Oral Examination

The oral examination is scheduled during week 10 or 11 of fall term; it is proctored by the exam committee chair and is usually two hours in length. The committee and the student revisit the written examinations, discussing areas of strength and weakness. In addition, the examiners may explore the student's expertise more deeply by asking questions about reading list materials not covered during the written exams.

While no grade is assigned for performance on the oral exam, the committee may determine recommendations and even requirements for future study, including retaking the oral examination. Recommendations

are communicated in person to the student at the conclusion of the exam and in writing to the director of graduate studies as part of the committee chair's report on the exam. If substantive requirements or concerns have been articulated, the director of graduate studies will determine any official course of action to be taken.

For students who have failed one or more parts of the written exam, no oral examination will be held; instead, the time designated for the oral exam will be dedicated to a meeting with the student, the exam committee, and the director of graduate studies. Participants review the exam performance, discuss a possible retake exam, and/or review the advisability of a terminal master's degree.

Prospectus and Doctoral Candidacy

By Friday of week five of winter term in the fourth year, the student must designate a dissertation committee, including the dissertation chair and outside reader. The director of graduate studies must approve this committee. For details concerning faculty eligibility, students should refer to the Division of Graduate Studies' Dissertation Committee Policy at gradschool.uoregon.edu/committee-policy.

Committee members should be consulted during the process of writing the dissertation prospectus. A first draft of the prospectus should be submitted to the members of the dissertation committee by Friday of week 10 of winter term. A completed draft of the prospectus, approved by all four committee members, must be submitted by Friday of week five of spring term in the fourth year. After final approval from the director of graduate studies, the prospectus conversation is scheduled between weeks seven and nine of spring term.

A prospectus is not a first dissertation chapter; it is a snapshot of the dissertation project as envisioned by the student, prior to the completion of the bulk of his or her research. The prospectus is typically 10 to 15 pages in length. It should include a clear, concise examination of the problem to be studied, along with a compelling sense of the larger issues at stake in the project, both for the immediate topic and for the field at large. In addition, the prospectus should provide a clear vision of the project's trajectory: a narrative account of the dissertation's structure, an outline of chapters, and a justification for the particular authors and texts to be examined. A substantial research bibliography should be appended.

Prospectus Conversation

The prospectus conversation is scheduled between weeks seven and nine of spring term in the fourth year. This conversation, which includes the members of the dissertation committee, is facilitated by the committee chair and helps to develop the student's plans for the dissertation. Areas of strength and weakness in the project are discussed, and specific recommendations about structure, bibliography, and method are presented. After successful completion of this conversation, and with approval of the director of graduate studies and the graduate committee, the student advances to candidacy.

Dissertation

The dissertation, which is defended in a final oral presentation, is typically completed within two years of advancement to candidacy. Dissertations in a discipline such as comparative literature can hardly be said to follow exact specifications, but as a general principle any such project should involve at least two authors, works, and national literatures, and an explicit methodological orientation.

Creative Writing

Creative Writing Minor

Students who elect to minor in Creative Writing represent a variety of majors from across the University of Oregon campus. Architecture, Psychology, English, Biology, Journalism, Art History, Classics, Ethnic Studies, Sociology, and Public Relations are just a few of the fields of

studies of our past minors. All Creative Writing students enjoy small classes with a highly dedicated faculty.

Imagination and creative are certainly points of emphasis in our courses, but they are in equal balance with an emphasis on critical inquiry and the concise articulation of ideas in the workshop process. Our conversations may be about our art, but they are not *just* about our art. They require compassion and clarity, kindness and honesty. We believe the skills a successful Creative Writing student develops transcend any given workshop in Poetry, Fiction, or Nonfiction. The skills we foster in the Creative Writing Program will serve the aspiring English teacher, medical student, entrepreneur, and computer scientist alike.

For those students interested in pursuing the M.F.A. degree, the Creative Writing Minor signals a serious commitment to craft, and will provide students significant and refined portfolio materials for their applications.

Undergraduate Studies

The Creative Writing Program offers two formal courses of study for University of Oregon undergraduates:

Minor in Creative Writing

The creative writing minor offers courses in which students study matters of craft by reading and writing creative works, develop critical thinking and interpretive skills, hone their ability to articulate complex ideas with subtlety and clarity, and gain instruction in the mechanics of writing. Students must take courses for letter grades. Course work required for the minor must be passed with grades of B– or better.

Of the 24 required credits, a maximum of 8 credits at the 200 or 300 level may be transferred. All courses at the 400 level must be UO courses.

CRWR 435	Advanced Poetry Writing ²	
CRWR 445	Advanced Fiction Writing ²	
Total Credits		24

¹ Nontransferable. Kidd Tutorial courses are by application only.

² Repeatable for credit.

Questions regarding the minor should be addressed to the program director. Students must apply for the minor through the program's office well in advance of graduation for transcript evaluation. In order be eligible for the minor, students must complete all degree requirements and a major in another academic department.

Kidd Tutorial Program

Implemented through the generosity of the Walter P. Kidd family, this yearlong tutorial offers the chance to study writing and literary craft using literary models. The program, which requires a three-term commitment from participants, accommodates a highly flexible and individualized study of fiction, poetry, and literary nonfiction writing. Each section matches one graduate employee—a poet or fiction writer—with as many as 10 students and is overseen by the director of the Kidd Tutorial Program. Participants earn 12 credits in Kidd Workshop I (CRWR 225), Kidd Workshop II Poetry (CRWR 235), Kidd Workshop III: Poetry (CRWR 335) or Kidd Workshop I (CRWR 225), Kidd Workshop II: Fiction (CRWR 245). Kidd Workshop III: Fiction (CRWR 345). Information about application procedures is available on the program's website.

Creative Writing (MFA)

The Creative Writing Program at the University of Oregon is a two-year residency in which **Master of Fine Arts (MFA)** students concentrate in either poetry or fiction. The Program emphasizes the workshop, integrating concentrated time for writing with craft seminars and individualized reading tutorials.

You'll hear our program is not for the faint of heart. It isn't—and we're proud of that. We hope to offer our students the rigorous apprenticeship we undertook with our own teachers.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Proficiency in close reading. We expect our MFA candidates to read widely and meticulously while pursuing their studies. Our aim is for each student to encounter a variety of historical periods, aesthetic styles, and critical approaches. Any student graduating from our program should be capable of examining a single text for its many formal conventions and the style or styles with which it is conversant.
- Development of vocabularies for assessing literature, with an emphasis on craft. Our graduate students are expected to acquire the clear and sophisticated language that enables them to speak at length about a range of craft considerations for any single piece of literature. This applies to the published works they encounter in our craft seminars, but it is equally essential in the Creative Writing Workshop, when they comprehensively critique the works of their peers.
- Application of the formal elements of craft in either genre. We expect our apprentice poets and fiction writers to be able to identify, assess, and deploy many of the formal conventions they encounter in the Creative Writing workshop and craft seminar. We believe that the practice of exploring formal challenges is necessary for the MFA student in order to build on his or her own resources as an artist. We especially believe that a knowledge of such conventions is a responsibility of any writer in our MFA program.

- Familiarity with fundamental concepts, forms, modes, and traditions in literary fiction and/or poetry. At the graduate level, this outcome is particularly geared toward and measured by the MFA exam that all of our graduating students take at the end of their second year. Our expectation is that our students will demonstrate a command of the texts they have encountered while earning their degrees, along with the multitude of aesthetic concepts, compositional possibilities, and artistic concerns to which they have been exposed.

NOTE: The list of outcomes above builds on the basic expectations we also hold for our undergraduate students in the Creative Writing Program. Because our pedagogical goals are continuously fundamental in nature, both at the undergraduate and graduate level of study, we view our curriculum and the varietal redundancies below as a cumulative process, one through which our poets and fiction writers build a portfolio of knowledge whose components are interactive. This is to say we view historical periods, critical modalities, and aesthetic movements to be in constant conversation with one another.

Additionally, what distinguishes the outcomes below from their undergraduate counterparts is that we expect all our MFA candidates to wear two hats simultaneously: that of the apprentice writer and that of the apprentice teacher, given that all of the people enrolled in our program teach Creative Writing classes in their first year and Composition in their second. The following outcomes should be considered very much in this context, in that our graduate students are expected to both pursue these goals as scholars then contemplate the many ways these skills translate to their own pedagogical experience.

The entirety of our curriculum is structured with the expectation that we enable our MFA graduates to continue to grow intellectually and develop as writers and masters of the craft once they have received their degrees, long after they have left the University of Oregon.

Master of Fine Arts Degree Requirements

The candidate must complete the graduate work during six consecutive terms in residence at the university. The candidate must pass a written examination on a reading list of works of fiction or poetry.

East Asian Languages and Literatures

<http://eall.uoregon.edu>

Yugen Wang, Department Head

304 Friendly Hall
1248 University of Oregon
Eugene, OR 97403-1248
ygwang@uoregon.edu

The Department of East Asian Languages and Literatures presents a wide range of courses in several programs, from introductory courses in the languages and literatures of East Asia (Chinese, Japanese, and Korean) to advanced graduate-level study of linguistics and literature. Undergraduate degrees include a bachelor of arts (BA) degree in Chinese or Japanese and minors in Chinese, Japanese, or Korean. The department also offers master's (MA) and doctoral (PhD) degrees in East Asian languages and literatures. At all levels, students may choose to focus on either language or literature, though all degree programs require course work from both areas.

The department typically supports dozens of students in graduate-level study while 100 undergraduate BA majors graduate each year. Faculty members are strongly committed to promoting a rich immersion in Chinese, Japanese, and Korean, and undergraduates and graduate students alike are encouraged to study abroad and conduct research throughout East Asia.

Preparation

The department recommends the following preparation for study leading to an undergraduate major or minor in Chinese, Japanese, or Korean:

As much work as possible in the student's major language, focusing on oral and written communication and reading comprehension
Knowledge of the history, culture, and geography of the area in which that language is spoken
Course work in literary analysis and cultural studies
Careers

Students with an undergraduate degree in Chinese, Japanese, or Korean are well prepared for graduate-level study in the humanities, social sciences, and professions (e.g., law or business). They are also suited to a range of jobs in many different sectors, including business, education, and journalism as well as government agencies and nonprofit organizations. Recent graduates have found jobs in all of these areas.

Faculty

Roy Chan, associate professor (modern Chinese and Russian literature). BA, 2002, Washington (Seattle); PhD, 2009, California, Berkeley. (2013)

Weijun Chen, associate teaching professor (Chinese). BA, 1997, Anhui; MA, 2000, Nanjing. (2008)

Rachel DiNitto, professor (modern Japanese literature, cultural studies). BA, 1988, Pennsylvania; MA, 1996, PhD, 2000, Washington (Seattle). (2015)

Maram Epstein, professor (Ming-Qing vernacular fiction). BA, 1983, MA, 1987, PhD, 1992, Princeton. (1994)

Alisa D. Freedman, professor (modern Japanese literature and film). BA, 1991, Wesleyan; MA, 1995, PhD, 2002, Chicago. (2005)

Yukari Furikado-Koranda, associate teaching professor (Japanese). BA, 2002, Kobe College; MA, 2010, Oregon. (2010)

Denise Gigliotti, associate teaching professor (Chinese). BA, 1995, National Taiwan; MA, 1998, California, Los Angeles. (2002)

Alison Groppe, associate professor (Chinese culture). BA, 1989, Wellesley College; MA, 1995, PhD, 2006, Harvard. (2008)

Luke Habberstad, associate professor (early Chinese literature). BA, 2003, Yale; MA, 2007, PhD, 2014, California, Berkeley. (2014)

Reiko Hashimoto, associate teaching professor (Japanese). BA, 1982, Chukyo; MA, 1992, Minnesota State, Mankato; PhD, 2000, Indiana, Bloomington. (2000)

Kaori Idemaru, professor (linguistics). BA, 1990, Osaka; MA, 1992, Northern Iowa; PhD, 2005, Oregon. (2008)

Rika Ikei, associate teaching professor (Japanese). BA, 1992, Kyoto University of Foreign Studies; MA, 1998, West Chester. (2003)

Zhuo Jing-Schmidt, professor (Chinese linguistics). BA, 1992, MA, 1995, Peking; MA, 1997, California, Los Angeles; PhD, 2005, Cologne. (2010)

Boyoung Kim, instructor (Korean). B.A. with Honors, University of Iowa; M.A., Ph.D., University of California, San Diego

Jina Kim, associate professor (Korean literature). BA, 1993, University of Chicago; MA, 2002, University of Washington; MA, 2009, Cornell; PhD, 2006, University of Washington. (2018)

Nayoung Kwon, associate professor (Korean linguistics). BA, 1997, Korea; MA, 1999, Korea; MA, 2003, California (San Diego); PhD, 2008, California (San Diego). (2020)

Fengjun Mao, associate teaching professor (Chinese). BA, 2000, MA, 2003, East China Normal. (2008).

Naoko Nakadate, associate teaching professor (Japanese). BA, 1988, Tokyo University of Foreign Studies; MA, 1992, Oregon. (1993)

Yoko O'Brien, associate teaching professor (Japanese). BA, 1996, Washington State; MA, 2000, Oregon. (2007)

Thomas Glynne Walley, associate professor (early modern Japanese literature). BA, 1996, Brigham Young; MA, 2001, Washington (St. Louis); PhD, 2009, Harvard. (2012)

Yugen Wang, professor (classical Chinese poetry and poetics). BA, 1992, Anhui Normal; MA, 1995, Peking; PhD, 2005, Harvard. (2005)

Sunhee Woo, instructor (Korean). BA, 2004; M.Ed, 2012, Graduate School of Education, Hanyang University. (2021)

Jean Yuanpeng Wu, associate teaching professor (Chinese). BA, 1982, China University of Geosciences; MA, 1990, West Virginia; PhD, 1998, Michigan State. (1996)

Emeriti

Stephen W. Durrant, professor emeritus. BA, 1968, Brigham Young; PhD, 1975, Washington (Seattle). (1990)

Michael B. Fishlen, associate professor emeritus. BA, 1965, Knox College; MA, 1968, PhD, 1973, Indiana; JD, 1987, Oregon. (1970)

Angela Jung-Palandri, professor emerita. BA, 1946, Catholic University, Peking; MA, 1949, MLS, 1954, PhD, 1955, Washington (Seattle). (1962)

Stephen W. Kohl, associate professor emeritus. BA, 1967, PhD, 1974, Washington (Seattle). (1972)

Wendy Larson, professor emerita. BA, 1974, Oregon; MA, 1978, PhD, 1984, California, Berkeley. (1985)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Chinese (BA)

Achieve a high level of proficiency in Chinese language through friendly, activity-filled, intensive classes. You will learn Chinese culture, society, literature, and linguistics from historical and contemporary perspectives. Students have the option of three different tracks in the Chinese major: language, culture, or linguistics. In consultation with department advisors, you can select a track that allows you to study and master the aspects of Chinese that interest you most. Students with advanced Chinese language proficiency beyond third-year Chinese should consult with EALL's China faculty advisors to develop an individualized program. Chinese is one of several majors taught within the Department of East Asian Languages and Literatures.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Content objectives: for culture and language intensive: Identify, describe, and explain materials, terminologies, methodologies, and theories in Chinese literature, film and media. For linguistics intensive: Describe, analyze and explain language structure and

usage using terminologies, methodologies, and theories in Chinese linguistics.

- Critical thinking/Analytical skills: for culture and language intensive: Read, discuss, and evaluate texts from both historical sources and contemporary works in literature, film and media, and linguistics, employing methodologies and criteria. For linguistics focus: Discuss and evaluate descriptive grammars of Chinese, as well as studies on various levels of Chinese linguistics including, phonetics, phonology, semantics, syntax, pragmatics, sociolinguistics and the relationship between language, cognition and culture.
- Argumentation: Formulate original arguments, anticipating objections and responding in conscientious fashion.
- Communication: Communicate knowledge, ideas, and reasoning in written, oral, or other forms, in English or Chinese. Reach intermediate/advanced proficiency level in written and spoken modern Chinese. For CHN language intensive: Acquire introductory to intermediate reading skills in classical Chinese.
- Culture Intensive (p. 91)
- Language Intensive (p. 91)
- Linguistics Intensive (p. 91)

Bachelor of Arts in Chinese: Culture-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
CHN 301	Third-Year Chinese I	5

Japanese (BA)

Learn Japanese language in friendly, activity-based, intensive classes designed to achieve high-level proficiency. You will learn the basics of Japanese culture, society, literature and linguistics from historical and contemporary perspectives. Japanese is one of several majors taught within the Department of East Asian Languages and Literatures including Korean and Chinese.

Students have the option of three different tracks in the Japanese major: language, culture, or linguistics. In consultation with department advisors, you can choose a track that will allow you to study and master those aspects of Japanese that interest you most.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Content objectives (literature/film/culture): for culture and language intensive: Identify, describe, and explain materials, terminologies, methodologies, and theories in Japanese literature, film, media, or linguistics. For linguistics intensive: Identify, describe, and explain materials, terminologies, methodologies, and theories in Japanese linguistics.
- Critical thinking/Analytical skills: for culture and literature intensive: Read, discuss, and evaluate texts from both historical sources and contemporary works in literature, film and media, and linguistics, employing methodologies and criteria. For linguistics intensive: Discuss and evaluate descriptive grammars of Japanese, as well as studies on various levels of Japanese linguistics including, phonetics, phonology, semantics, syntax, pragmatics, sociolinguistics and the relationship between language, cognition and culture.
- Argumentation: Formulate original arguments, anticipating objections and responding in conscientious fashion.
- Communication: Communicate knowledge, ideas, and reasoning in written, oral, or other forms of languages, in English or Japanese. Reach intermediate/advanced proficiency level in written and spoken modern Japanese.

- Culture Intensive (p. 95)
- Language Intensive (p. 95)
- Linguistics Intensive (p. 95)

Bachelor of Arts in Japanese: Culture-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
JPN 301	Third-Year Japanese I	5
JPN 302	Third-Year Japanese II	5
JPN 303	Third-Year Japanese III	5

Chinese Minor

Learn Chinese language, culture, society, literature, and linguistics from historical and contemporary perspectives. Our classes encourage active participation and communication in a friendly and supportive environment. The Chinese minor combines language courses with culture, literature, and linguistics courses. Chinese is one of several minors taught within the Department of East Asian Languages and Literatures.

Minor in Chinese

The Chinese minor requires a minimum of six upper-division courses (24 graded credits), which must consist of at least three language courses, two courses in literature, linguistics, and/or culture, and a sixth course with a CHN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Modern Chinese language—a minimum of three courses, at third-year level or higher, chosen from the following:		
CHN 301	Third-Year Chinese I	
CHN 302	Third-Year Chinese II	
CHN 303	Third-Year Chinese III	
CHN 411		
CHN 412		
CHN 413	Modern Chinese Texts: [Topic]	
Culture, literature, film, linguistics—a minimum of two courses chosen from the following		
CHN 305	History of Chinese Literature	
CHN 306	History of Chinese Literature II, The Imperial Age	
CHN 307	History of Chinese Literature	
CHN 308	Literature of Modern Taiwan	
CHN 480	Chinese Linguistics	

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in China. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

Japanese Minor

Learn Japanese language, culture, society, literature, and linguistics from historical and contemporary perspectives. Our classes encourage active participation and communication in a friendly and supportive environment. The Japanese minor combines language courses with culture, literature, and linguistics courses. Japanese is one of several minors taught within the Department of East Asian Languages and Literatures.

Minor in Japanese

The Japanese minor requires a minimum of 6 upper-division courses (a minimum of 24 graded credits), which must consist of at least 3 language courses, 2 courses in literature, linguistics, and/or culture, and a sixth course that has any JPN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus form the Department of East Asian Languages and Literatures.

Code	Title	Credits
Japanese language—a minimum of three courses, at third-year level or higher, chosen from the following:		
JPN 301	Third-Year Japanese I

Culture, literature, film, linguistics—a minimum of two courses chosen from the following		
JPN 305	Introduction to Japanese Literature	
JPN 306	Introduction to Japanese Literature	
JPN 307	Introduction to Japanese Literature	
JPN 315	Introduction to Japanese Linguistics	

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in Japan. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

Korean Minor

Learn Korean language, culture, society, literature, and linguistics from historical and contemporary perspectives. Our classes encourage active participation and communication in a friendly and supportive environment. The Korean minor combines language courses with culture, literature,

and linguistics courses. Korean is one of several minors taught within the Department of East Asian Languages and Literatures.

Minor in Korean

The Korean minor requires a minimum of six upper-division courses (24 graded credits), which must consist of at least three language courses, two courses in literature, linguistics, and/or culture, and a sixth course with a KRN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Korean language—a minimum of three courses, at third-year level or higher, chosen from the following:		
KRN 301	Third-Year Korean I	5
KRN 302	Third-Year Korean II	5
KRN 303	Third-Year Korean III	5
Culture, literature, film, linguistics—a minimum of two courses chosen from the following:		
KRN 309	Languages and Cultural Formation in Korea	4
KRN 315	Introduction to Korean Linguistics	4
KRN 361	Korean Popular Culture and Transnationalism	4
KRN 362M	Contemporary Korean Film	4
Electives		
Upper-division KRN courses		
Upper-division EALL courses		

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in Korea. Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

East Asian Languages and Literatures (MA)

<https://eall.uoregon.edu>

The Department of East Asian Languages and Literatures offers programs of study leading to the degrees of master of arts (MA) in East Asian Languages and Literatures. Students may choose to specialize in Chinese Studies, Japanese Studies, Korean Studies, or Linguistics.

In addition to departmental requirements, graduate students must fulfill the general requirements of the Division of Graduate Studies listed in that section of this catalog.

The Chinese, Japanese, and Korean studies programs, which prepare students to work in a variety of professional and academic fields, provide intensive training in linguistic and textual analysis and an extensive exposure to literary theory, film studies, and comparative and cultural studies. The department encourages students to develop their specialization in East Asian literatures and films in broader, more comparative, and more interdisciplinary and transnational perspectives than has been the case in traditional programs. The faculty's research and teaching interests cover the major fields, genres, and chronological divisions of Chinese, Japanese and Korean literature and film. They encourage creative connections and challenges to conventional disciplinary boundaries by exploring the relationships between literature-

cinema and such areas as history, law, linguistics, politics, religion, philosophy, sociology, theater and the performing arts, and women's, gender, and sexuality studies.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Coursework: Demonstrate mastery of subject content knowledge.
- Coursework: Demonstrate effective oral and written communication skills.
- Thesis/Project/Exam: Demonstrate mastery of subject content knowledge.
- Thesis: Demonstrate effective oral and written communication skills.
- Thesis: Conduct independent research and analysis in their discipline and contribute substantive work in their field.
- Chinese Studies (p. 99)
- Japanese Studies (p. 99)
- Korean Studies (p. 100)
- Linguistics and Language Pedagogy (p. 100)

Master of Arts in East Asian Languages and Literatures, Chinese Studies: Option One

This is the usual option for students seeking the MA degree in East Asian languages and literatures with a specialization in Chinese studies. It prepares students for study at the doctoral level.

Code	Title	Credits
CHN 623		5
CHN 624		5
CHN 625		5
EALL 611	Critical Approaches	2
Five seminars on Chinese subject matter (at least three with the CHN subject code)		20
Two graduate courses in linguistics, literary theory, or another literature (advisor approved); as appropriate, these courses may count toward the five Chinese seminars		
One course in language pedagogy, Asian history, or another field relevant to student's career objectives (advisor approved); as appropriate, may count as one of the five Chinese seminars ¹		
CHN 503	Thesis ²	9
Total Credits		46

¹ Reading and Conference: [Topic] (CHN 605) may be counted toward the fourteen required courses, with advisor approval.

² Students who elect to write a thesis must register for this course.

Students must pass a comprehensive written examination at the end of study or write a master of arts thesis.

Master of Arts in East Asian Languages and Literatures, Chinese Studies: Option Two

A master's student may, in consultation with the student's advisor, apply for early entry to the PhD program. Such applications are typically made spring term but, in any event, after at least two terms at the university.

Applications must include transcripts, three recommendations, and a statement of the student's prospective course of study. Students who elect this option are awarded the master's degree upon completion of the course work for the PhD degree. Students must pass a comprehensive oral examination that covers the student's primary areas of study.

Five seminars on Chinese subject matter (at least three with the CHN subject code)		20
Two graduate courses in linguistics, literary theory, or another literature (advisor approved); as appropriate, may count toward the five Chinese seminars		
One course in language pedagogy, Asian history, or another field relevant to student's career objectives (advisor approved); as appropriate, may count as one of the five Chinese seminars ¹		
Total Credits		37

¹ Reading and Conference: [Topic] (CHN 605) may be counted toward the twelve required courses, with advisor approval.

Master of Arts in East Asian Languages and Literatures, Japanese Studies

Code	Title	Credits
EALL 611	Critical Approaches	2
One course on modern Japan (with JPN prefix)		4
One course on premodern Japan (with JPN prefix)		4
Two courses on methodology/theory (any prefix)		8
Three further Japan-related courses (with JPN prefix)		12
Two further Japan-related courses (with any prefix)		8
Thesis or examination		9
Total Credits		47

Period distribution requirement:

Student must take at least 1 JPN-prefix course on modern Japan and at least 1 JPN-prefix course on premodern Japan. For the purposes of this requirement "modern Japan" is considered to begin in 1868. To count, over 50% of a course's content must focus on the requisite period; advisor approval required.

Methodology/theory requirement:

Student must take at least 2 courses substantially focused on methodology or theory. They may be from any department (any prefix); advisor approval required.

Japan-related courses:

Students are required to take 5 Japan-related courses beyond the period distribution and methodology/theory requirements. At least 3 of these must be JPN-prefix courses. Up to 2 of them may be courses with any

prefix, provided they have at least 30% Japan-related content; advisor approval required.

Language proficiency requirement:

Nonnative speakers are required to demonstrate 4th-year-level Japanese language proficiency by either passing a course at that level or testing into the 4th-year level in a placement exam. Up to 3 4th-year-level (or beyond) language courses can be counted toward the MA requirements.

Thesis or written examination:

Typically students are required to write an MA thesis; the Graduate School requires thesis writers to take 9 credits of JPN 503 Thesis. In some circumstances, a student in consultation with the advisor may decide to take a written examination in lieu of writing a thesis; the student will then be required to take a number of JPN 605 Reading and Conference credits sufficient to bring the total number of credits earned toward the MA to 47.

Master of Arts in East Asian Languages and Literatures, Korean Studies

The MA degree in East Asian Languages and Literatures with a specialization in Korean literature, film, and culture requires successful completion of a minimum of 12 graduate-level courses (at least 4 credits each). These courses must be chosen in consultation with the student's advisor.

Code	Title	Credits
Three courses in the Korean sector		12
Four Korea-related courses, which may be taught outside the department		16
Five advisor-approved electives with the subject code EALL		20
Total Credits		48

In addition to completion of the required courses, students must pass a comprehensive examination at the end of study or write and defend a MA thesis.

Option 1: MA Comprehensive Exam

Students who choose to take a comprehensive exam must successfully pass a two-part written examination based on the following reading list:

1. Approximately 20 works of Korean literature and/or film, which should provide comprehensive coverage of major periods, writers, and genres of Korean literature and/or film. The student's advisor will provide a model reading list.
2. Approximately 10 works of general theory and criticism, based on the student's specialized area, which can be outside of the area of Korean studies.
3. Approximately 10 works of a specialized area of the student's own choosing.

The first part of the exam shall include questions pertaining to broad issues in the field of Korean literature and/or film deriving from section one of the students' reading list. The second part of the exam, to be administered a week later, shall cover more specialized questions deriving from sections two and three of the student's reading list. The student shall have 48 hours for each part to produce the final typed, double-spaced exams of approximately 10 to 12 pages each.

Option 2: MA Thesis

Students who elect to write a thesis must register for 9 credits of Thesis (KRN 503).

Two terms before graduation, the student meets with the advisor during the first week of the term to set up a two-member committee and a schedule for submitting thesis or project drafts (e.g., the first week of winter term if planning to graduate spring term).

At least six weeks before the date of the thesis or project defense, the student submits a draft to the main advisor for approval. The advisor is expected to return comments within two weeks. Then, a continuing dialogue ensues between the student and advisor until the manuscript is considered complete. If approval is not obtained at this point, there is no guarantee that the student will be able to graduate that term.

The student submits a clean copy of the thesis or project to the advisor and committee members either two weeks before defense or four weeks before the filing date for an approved thesis as published by the Graduate School.

East Asian Languages and Literatures Major - Linguistics and Language Pedagogy

This MA program offers a complete East Asian linguistics and pedagogy program, covering Chinese, Japanese, and Korean. Students may elect to specialize in Chinese, Japanese, or Korean linguistics and pedagogy.

Code	Title	Credits
EALL 611	Critical Approaches	2
Core Courses		16
Choose four from the following:		
CHN 580	Chinese Linguistics	
CHN 582	History of the Chinese Language	
EALL 542	Second-Language Acquisition	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
EALL 545	East Asian Psycholinguistics	
EALL 680	Linguistics Research and Bibliography	
Linguistics Electives		12
Choose advisor-approved 3 courses on linguistics		
Open Electives		8
Two advisor-approved courses in linguistics, literature, and languages with an EALL subject code		
Thesis/project/exam		9
9 credits of 503 (thesis option), 605 (exam option), or 609 (Terminal Project option)		
CHN 503	Thesis	
CHN 605	Reading and Conference: [Topic]	
CHN 609	Terminal Project	
JPN 503	Thesis	
JPN 605	Reading and Conference: [Topic]	
JPN 609	Terminal Project	
KRN 503	Thesis	
KRN 605	Reading and Conference: [Topic]	
KRN 609	Terminal Project	
Total Credits		47

¹ Must be taken by all graduate students during first term.

Additional Requirements

Nonnative speakers are required to complete a course (or receive credit by examination) in the language in which they specialize at the fourth-year level.

The Graduate School requires all MA students to take a total of 9 credits in 600-level courses.

East Asian Languages and Literatures (PhD)

<https://eall.uoregon.edu>

The Department of East Asian Languages and Literatures offers the doctor of philosophy (PhD) in East Asian Languages and Literatures. Students may choose to specialize in Chinese Studies, Japanese Studies, Korean Studies, or Linguistics.

In addition to departmental requirements, graduate students must fulfill the general requirements of the Division of Graduate Studies listed in that section of this catalog.

The Chinese, Japanese, and Korean studies programs, which prepare students to work in a variety of professional and academic fields, provide intensive training in linguistic and textual analysis and an extensive exposure to literary theory, film studies, and comparative and cultural studies. The department encourages students to develop their specialization in East Asian literatures and films in broader, more comparative, and more interdisciplinary and transnational perspectives than has been the case in traditional programs. The faculty's research and teaching interests cover the major fields, genres, and chronological divisions of Chinese, Japanese and Korean literature and film. They encourage creative connections and challenges to conventional disciplinary boundaries by exploring the relationships between literature-cinema and such areas as history, law, linguistics, politics, religion, philosophy, sociology, theater and the performing arts, and women's, gender, and sexuality studies.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge.
- Demonstrate effective oral and written communication skills.
- Conduct independent research and analysis in their discipline and contribute original and substantive work in their field.
- Demonstrate independent critical thinking and advanced knowledge in their current discipline and in related areas of their discipline.
- Demonstrate professionalization in the field of study in the form of publications, presentations, conference attendance, funded fellowships received, and other professional association activities.

- Chinese Studies (p. 101)
- Japanese Studies (p. 101)
- Korean Studies (p. 101)
- Linguistics (p. 102)

PhD in East Asian Languages and Literatures, Chinese Studies

The PhD degree in East Asian languages and literatures with a specialization in Chinese studies requires completion of a minimum of six 4-credit graduate-level courses beyond those required for the MA degree. Depending on the student's background or preparation at the time of admission to the PhD program, the number of required courses may be nine or twelve. Courses must be chosen in consultation with the student's advisor.

Code	Title	Credits
Six courses in Chinese literature, linguistics, or film		
CHN 623		5
CHN 624		5
CHN 625		5

Select one of the following:

Demonstrate the ability to use a second foreign language substantively in research or pass a translation examination in the language

Demonstrate advanced knowledge of a particular methodology or theory by taking three graduate-level courses, including one course in CHN 605 for which the student writes a paper applying the methodology to Chinese literature

Complete three courses in a secondary literature

¹ Or equivalents—unless the student has already taken these courses.

PhD in East Asian Languages and Literatures, Japanese Studies

The PhD with a specialization in Japanese studies requires students to successfully complete nine graduate courses beyond the number required for the MA degree. These courses must be chosen in consultation with the student's advisor. Appropriate courses in related fields (e.g., Japanese history, religion) may be substituted with the advisor's approval.

Code	Title	Credits
Four courses in Japanese studies		
Two courses in methodology-theory, preferably in Japanese studies ¹		
Japanese linguistics or teaching methodology course		
Two courses chosen in consultation with advisor ¹		

¹ At least one of the two must be in EALL

PhD in East Asian Languages and Literatures, Korean Studies

The PhD degree in East Asian languages and literatures with a specialization in Korean studies requires nine to twelve graduate-level courses depending on the student's background or preparation at the time of admission to the PhD program. The program will be customized in consultation with the student's advisor.

PhD in East Asian Languages and Literatures, Linguistics

The PhD with a specialization in East Asian linguistics is designed to build a high level of competence in linguistics research in Chinese, Japanese, or Korean. The program has four components:

- Course work
- Comprehensive exam
- Qualifying paper
- Dissertation

A total of nine graduate courses beyond those at the MA level is required. Courses must be chosen in consultation with a doctoral advisor.

Code	Title	Credits
Choose three or more core courses in East Asian linguistics:		
CHN 580	Chinese Linguistics	
EALL 540	Chinese, Japanese, and Korean Phonetics	
EALL 541		
EALL 680	Linguistics Research and Bibliography	
Choose three or more electives in East Asian linguistics:		
CHN 581		
CHN 582	History of the Chinese Language	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
KRN 510	Experimental Course: [Topic]	
EALL 542	Second-Language Acquisition	
CHN 603	Dissertation	
JPN 603	Dissertation	

Other electives may be taken in linguistics, language teaching specialization, or psychology in consultation with an advisor.

Students in the PhD track must successfully complete a comprehensive examination and prospectus defense (culture students) or qualifying paper (linguistics students) to advance to candidacy (all but dissertation) status. By the end of their second year in the program (at the very latest), each student should identify a committee of three faculty members who will oversee their training for the comprehensive examination. Since each person's needs and interests may be different, students are expected to work closely with their primary advisor at all stages of the process.

Comprehensive Examination

The goal of the comprehensive examination is to ensure that students have received training broad enough to qualify as a teacher beyond the narrow research focus of their dissertation. The comprehensive examination is composed of a written and an oral component.

In conjunction with their primary advisor, students choose three fields, a major field and two minor fields, each to be advised by a faculty member in that area. Cultural fields may be determined by genre, time period, or methodology; linguistic fields may be determined by theoretical orientation, language orientation, and methodology. In conjunction with their advisors, students develop a reading list of twenty to forty items for each field. For culture students, these items may include both primary and secondary texts; the composition of each reading list will be tailored to the individual student's needs. It is expected that reading lists will develop organically from graduate seminars and readings and conferences.

For each field, the student will submit a comprehensive examination paper. The papers may be developed from a term paper written for a seminar or written for the sake of the examination, as determined by the advisor. These comprehensive examination papers should demonstrate the student's broad knowledge of a field. Ideally, for the major field, this paper will be the basis for a dissertation chapter. In some instances, students may be asked to develop a syllabus rather than write a research paper.

Advisors have two weeks to read and approve each comprehensive examination paper. After the three comprehensive examination papers have been approved by the field examiner and the primary advisor, the student schedules an oral examination. The oral examination (one to two hours in duration) is an opportunity for the three examiners to engage the student in an in-depth conversation about the items on the reading lists. The goal of the oral examination is to ensure that students have enough familiarity with both the critical and primary works in the field to teach at the postsecondary level. The oral examination is not open to the public.

Both parts of the comprehensive examination should be completed by the end of the student's third year in the program. It is at the discretion of the committee to determine if students should have a second opportunity to sit for an oral examination if the first attempt is not successful. At the discretion of the committee, those students whose performance is deemed unsatisfactory may be granted a terminal MA.

Prospectus (Culture Track)

Before scheduling the prospectus defense, students need to notify the graduate secretary of the membership of their dissertation committee (three faculty members from the department and one from another department). The prospectus defense is the first meeting of the entire dissertation committee to provide feedback on the dissertation research project. The prospectus, a document of twenty to thirty pages, should introduce the research question, the methodology, and a basic outline of the dissertation; a bibliography is required. Once the advisors approve a draft of the dissertation prospectus, certifying that in their opinion the project is well-conceived and viable, the student schedules a meeting of the entire committee. A defense is an opportunity for the committee to ask questions and provide advice and direction for the research project. The prospectus defense is public.

In order to leave enough time for the dissertation research and writing, the prospectus defense should take place during the third year of study and no later than the winter term of the fourth year. Students who are unable to complete a viable prospectus by spring of their fourth year in the program will be granted a terminal MA.

Qualifying Paper (Linguistics Track)

As the equivalent of the prospectus defense for culture track students, linguistics students are expected to produce an original publishable paper, of substantial length and quality, in a subfield of linguistics. This qualifying paper should demonstrate the student's ability to carry out an empirical study and write an analytical research paper. The unmodified MA thesis cannot serve this purpose.

A committee consisting of the advisor and a second faculty member familiar with the subfield will referee the qualifying paper. The student may be asked to revise the qualifying paper before it is accepted as satisfactory work. Upon documented completion of the paper, the student needs to identify a dissertation committee (three faculty members from the department and one from another department) and notify the graduate secretary. The student then confirms the dissertation topic

and presents a prospectus constituting a short abstract detailing their research topic. This should be done within one term of completing the qualifying paper. After the prospectus has been approved, the student will advance to candidacy.

To leave enough time for the dissertation research and writing, the qualifying paper and prospectus should be completed during the third year of study and no later than the winter term of the fourth year. Students who are unable to complete a viable qualifying paper by spring of their fourth year in the program will be granted a terminal MA.

Program Goals

The comprehensive examination is distinct from the dissertation prospectus or qualifying paper. The comprehensive examination papers and oral examination involve general preparation and give the student an opportunity to show broad knowledge of a field. The prospectus defense for culture-track students is more narrowly focused on the dissertation project and demonstrates the student's ability to identify and define a research project. Similarly, the qualifying paper for linguistics students is focused on the student's main research area and demonstrates the ability to undertake a research project. The comprehensive examination and prospectus defense or qualifying paper enable students to demonstrate that they can be successful as teachers and researchers. Students will advance to ABD (all but dissertation) status after the successful completion of both the comprehensive examination and the prospectus defense or qualifying paper, in addition to the completion of all required course work.

Dissertation

A dissertation committee is formed at least one month before the prospectus is presented for review and approval. This committee advises the student on writing the dissertation and approves the completed dissertation.

Students who have taken an MA comprehensive exam in Japanese studies do not need to take a PhD comprehensive exam. However, they need to defend their dissertation prospectus within one academic term after the completion of doctoral course work.

English

<http://english.uoregon.edu>

Mark Whalan, Department Head

118 Prince Lucien Campbell Hall
1286 University of Oregon
Eugene, OR 97403-1286
541-346-3911
Fax: 541-346-1509
engl@uoregon.edu

With nearly 50 full-time faculty members, the Department of English offers students a broad foundation in traditional British, American, and Anglophone literary studies, as well as intensive course work in interdisciplinary studies, emerging media, and current critical methodologies. Its lower-division courses provide training in writing and introduce the student to literature as a humanistic discipline. Its upper-division courses emphasize the humanistic values that emerge from studying literature and allied disciplines analytically and in depth.

We teach exciting courses in argumentative writing, critical thinking, and ethical dialogue—all skills employers and professional schools desire from new graduates. Our major, minors, and graduate programs include

distinctive offerings in environmental humanities, comics and cartoon studies, medical humanities, disability studies, digital humanities, and the study of race and ethnicity.

The study of English opens doors to many careers. All fields of endeavor place high value on the ability to read intelligently and to write clearly. A major in English, with judiciously selected electives, prepares students not only to find that essential first job but also to possess the breadth of outlook and depth of perspective that become increasingly important in subsequent phases of their careers. A student preparing for graduate study in English should construct an appropriate course of undergraduate study in consultation with a faculty advisor.

Expository Writing

The English department offers required and elective courses in expository writing for all university students to help them improve their ability to write clearly and effectively. Students must fulfill the university writing requirement of two composition courses or be cleared according to established waiver and exemption policies. The requirement is Composition I (WR 121Z) and either Composition II (WR 122Z) or College Composition III (WR 123), or their approved equivalents. Students should complete the writing requirement—with course work, by exemption, or by waiver examination—early in their studies.

Exemptions

Scores of 37 or better on the new College Board SAT Reading and Writing tests waive the need to take Composition I (WR 121Z). No credit is given for this waiver. A score of 710 or better on the old SAT Critical Reading test (650 prior to 1995) or 32 or better on the ACT English test will also waive WR 121Z (without credit). A score of 3, 4, or 5 on the Advanced Placement (AP) Language and Composition Examination produces credit for WR 121Z.

Waiver Examinations

Waiver examinations for Composition I (WR 121Z) and Composition II (WR 122Z) are offered during the first week of classes, fall through spring terms, at the UO Testing Office, Knight Library, room 31; call 541-346-3230. Visit the Testing Office website (<https://testing.uoregon.edu/>) to sign up for an examination. No credit is awarded for waiver examinations, and students may not take waiver examinations for both courses in the same term. The essay exams are graded pass/no pass by three members of the Department of English composition committee. Students who do not pass may not retake the examination and should register for the appropriate writing course as soon as possible. Students who pass the exam have an "exemption by exam" notation for either Composition I (WR 121Z) or Composition II (WR 122Z) placed on their degree audit. Waiver exams are not returned to students, nor are they used as a teaching device. Additional help and special tutoring are available to students through the University Teaching and Learning Center.

Placement

Students for whom English is the native language are placed in their first writing course based on their SAT or ACT verbal scores. Students whose scores fall below 26 on the new SAT Reading and Writing tests, below 480 on the old SAT Verbal, or below 19 on the ACT are eligible for concurrent enrollment in Writing Tutorial (WR 195) with Composition I (WR 121Z).

Nonnative Speakers

Students for whom English is not the native or primary language are placed in their first writing course on the basis of a placement test. These may include Introductory Academic Writing (AEIS 110), Intermediate Academic Writing (AEIS 111), and Advanced Academic Writing (AEIS 112) (taught in the Department of Linguistics). Placement tests are administered before registration. Nonnative speakers should inquire at the American English Institute, 107 Pacific Hall, for placement test dates.

Transfer Students

Transfer students in doubt about the equivalency of courses taken elsewhere should bring transcripts and catalog descriptions to the composition office, Department of English, for evaluation.

Faculty

Stacy Alaimo, professor (Environmental Humanities, Posthumanities/New Materialism, American Studies, Cultural Studies). BA, 1985, Gustavus Adolphus College; MA, 1986, University of Wisconsin, Madison; PhD, 1994, University of Illinois (2019)

Faith Barter, assistant professor (19th-century African American literature). AB, 2001, Dartmouth College; JD, 2007, American; MA, 2012, PhD, 2016, Vanderbilt. (2018)

Martha J. Bayless, professor (medieval literature). BA, 1980, Bryn Mawr; MA, 1984, PhD, 1990, Cambridge. (1989)

Carolyn Bergquist, associate teaching professor (Renaissance literature; rhetoric and composition). BA, 1994, California State, Stanislaus; MA, 1996, PhD, 2003, Oregon. (2003)

Elizabeth A. Bohls, professor (18th-century literature), associate department head. BA, 1979, Mount Holyoke College; PhD, 1989, Stanford. (1998)

Tina Boscha, associate teaching professor (composition). BA, 1995, Calvin College; MFA, 2003, Oregon. (2003)

Lara Bovilsky, associate professor (Renaissance literature and culture; graduate professionalism). BA, 1995, Brown; MA, 1998, PhD, 2001, Duke. (2008)

Kirby Brown, associate professor (Native and ethnic American literatures). BA, 1997, Texas, Austin; MA, 2005, Texas, San Antonio. (2011)

Kristy Bryant-Berg, associate teaching professor (composition); associate director, composition. BA, 2002, Colorado, Boulder; MA, 2004, Oregon; PhD, 2009, Oregon. (2014)

Mattie Burkert, associate professor (digital humanities). BA 2009, New York, NY; MA 2011, Wisconsin, Madison; PhD, 2016, Wisconsin, Madison. (2020)

Anna Carroll, associate teaching professor (composition). BA, 2007, MA, 2010, West Florida; PhD, 2015, Oregon. (2018)

Mai-lin Cheng, associate professor (19th-century literary studies). BA, 1993, Brown; PhD, 2006, University of California, Berkeley (2008)

Ulrick Casimir, instructor (composition). BA, 1995, North Carolina State; MFA, 2000, North Carolina; MA, 2005, PhD, 2008, Oregon. (2018)

Stephanie Clark, associate professor (medieval literature). BA, 2002, Texas, Dallas; MA, 2004, PhD, 2011, Illinois, Urbana-Champaign. (2011)

Ashley Cordes, assistant professor (Indigenous Studies, Digital Media, Environmental/Place-Based Storytelling, Critical/Cultural Studies). BA, 2010, Loyola, Marymount; MA 2012, Hawaii Pacific; PhD, 2019, Oregon. (2021)

Paul W. Peppis, professor (modern British literature); director, Oregon Humanities Center. BA, 1984, Williams; MA, 1987, PhD, 1993, Chicago. (1995)

Ana Zalyubovskiy, instructor (composition). BA, 1992, MA, 1994, Minnesota State; MFA, 1996, Vermont College. (2018)

Sarah Preston, instructor (composition). BA, 2005, Las Vegas; MA, San Diego State, 2014; PhD, 2023, Oregon. (2023)

Forest Pyle, professor (romanticism, literary theory). BA, 1980, MA, 1983, PhD, 1988, Texas, Austin. (1988)

Mark Quigley, associate professor (Irish literature, 20th-century literature). BA, 1992, Stanford; MA, 1997, PhD, 2003, California, Los Angeles. (2006)

Indigo Recker, instructor (composition). BA, 2013, Concordia; MA Carnegie Mellon, 2017; PhD, 2023, Duquesne University. (2023)

Stephen Rust, associate teaching professor (composition), interim WSCR director. BS, 1999, Idaho State; MA, 2006, Oregon State; PhD, 2011, Oregon. (2015)

Benjamin D. Saunders, professor (Renaissance literature, comics studies). BA, 1991, East Anglia; MPhil, 1992, Cambridge; PhD, 2000, Duke. (2000)

Gordon M. Sayre, professor (early American literature, 18th-century literature, folklore), director of undergraduate studies. BA, 1988, Brown; PhD, 1993, State University of New York, Buffalo. (1993)

Emily Simnitt, associate teaching professor (composition). BA, 1995, Brigham Young; MA, 2005, Idaho State. (2015)

Bjorn Smars, associate teaching professor (composition), assistant department head. BA, 2012, Walla Walla University; MA, 2014, Oregon. (2014)

Bennet Smith, instructor (composition). BA, 2002, George Fox; MA, Boston, 2004; PhD, 2010, Oregon. (2022)

Helen Southworth, professor (modernism, digital humanities). BA, 1989 London; PhD, 1999, California, Los Angeles. (2001)

Thomas Tasker, associate teaching professor (academic reading and writing, curriculum development). MA, 1992, Illinois, Chicago. (2013)

Courtney Thorsson, professor (African American literature, 19th- and 20th-century American literature, food studies). BA, 2000, Virginia; MA, 2004, MPhil, 2006, PhD, 2009, Columbia. (2009)

Avinnash Tiwari, instructor (composition). BA, 2010, Pennsylvania; MA, 2013, Oregon. (2016)

Corbett Upton, associate teaching professor (Central American poetry); associate director, undergraduate studies. BA, 2001, Arizona State; MA, 2006, PhD, 2010, Oregon. (2010)

Angela Waddell, instructor (composition). BA, 1996, Cedarville University; MA, 2022, Oregon (2023)

Eleanor Wakefield, instructor (composition). BA, 2007, Gonzaga; MA, 2011, PhD, 2017, Oregon, 2017. (2018)

Mark Whalan, professor (modern and 20th-century literature); Robert D. and Eve D. Horn Chair in English and American Literature. BA, 1995, Warwick; MA, 1996, Durham; PhD, 2002, Exeter. (2011)

Elizabeth A. Wheeler, professor (post-1945 literature, cultural studies, disability studies). BA, 1982, Bowdoin; MA, 1988, City University of New York; PhD, 1996, California, Berkeley. (1996)

Jenée Wilde, instructor (composition). BA, 1994, Boise State; MFA, 2003, Goddard College; PhD, 2015, Oregon (2016)

Daniel N. Wojcik, professor (folklore, popular culture). BA, 1978, California, Santa Barbara; MA, 1986, PhD, 1992, California, Los Angeles. (1991)

Henry B. Wonham, professor (19th- and 20th-century American literature). BA, 1983, Princeton; PhD, 1991, Virginia. (1995)

Mary E. Wood, professor (19th-century American literature, gender studies). BA, 1978, Yale; MA, 1980, PhD, 1987, Stanford. (1987)

Ana Zalyubovskiy, associate teaching professor (composition). BA, 1992, MA, 1994, Minnesota State; MFA, 1996, Vermont College. (2018)

Emeriti

William Cadbury, professor emeritus. BA, 1956, Harvard; MS, 1957, PhD, 1961, Wisconsin, Madison. (1961)

Suzanne Clark, professor emerita. BA, 1961, MA, 1965, Oregon; PhD, 1980, California, Irvine. (1990)

Dianne M. Dugaw, professor emerita. BA, 1971, Portland; MA, 1976, PhD, 1982, California, Los Angeles. (1990)

James W. Earl, professor emeritus. BA, 1967, Bucknell; PhD, 1971, Cornell. (1987)

Marilyn Farwell, professor emerita. BA, 1963, MacMurray; MA, 1966, PhD, 1971, Illinois. (1971)

John T. Gage, professor emeritus. BA, 1969, MA, 1971, PhD, 1976, California, Berkeley. (1980)

Warren Ginsberg, professor emeritus, Philip H. Knight Professor. MA, 1971, State University of New York, Stony Brook; PhD, 1975, Yale. (2000)

Robert Grudin, professor emeritus. BA, 1960, Harvard; MA, 1963, PhD, 1969, California, Berkeley. (1971)

Ruth F. Jackson, senior instructor emerita. BA, 1929, MA, 1933, Oregon. (1955)

Kathleen Rowe Karlyn, professor emerita. BA, 1969, Connecticut; MLA, 1973, Johns Hopkins; PhD, 1992, Oregon. (1994)

Linda Kintz, professor emerita. BA, 1967, Texas Tech; MA, 1969, Southern Methodist; PhD, 1982, Oregon. (1988)

David Leiwei Li, Collins professor of the humanities emeritus. BA, 1982, Shanghai Foreign Languages Institute; MA, 1986, Indiana University of Pennsylvania; PhD, 1991, Texas, Austin. (1999).

William Rockett, associate professor emeritus. BA, 1961, MA, 1963, Oklahoma; PhD, 1969, Wisconsin, Madison. (1966)

William Rossi, professor emeritus. BA, 1972, MA, 1979, Missouri; PhD, 1986, Minnesota. (1989)

George Rowe, professor emeritus; editor, *Comparative Literature*. BA, 1969, Brandeis; MA, 1971, PhD, 1973, Johns Hopkins. (1985)

Steven Shankman, professor emeritus. BA, 1969, Texas, Austin; BA, 1971, MA, 1976, Cambridge; PhD, 1977, Stanford. (1984)

Sharon R. Sherman, professor emerita. PhD, 1965, Wayne State; MA, 1971, California, Los Angeles; PhD, 1978, Indiana. (1976)

Richard L. Stein, professor emeritus. BA, 1965, Amherst; AM, 1966, PhD, 1970, California, Berkeley. (1976)

Richard C. Stevenson, professor emeritus. AB, 1961, AM, 1963, PhD, 1969, Harvard. (1968)

Nathaniel Teich, professor emeritus. BS, 1960, Carnegie-Mellon; MA, 1962, Columbia; PhD, 1970, California, Riverside. (1969)

Louise Westling, professor emerita. BA, 1964, Randolph-Macon Woman's; MA, 1965, Iowa; PhD, 1974, Oregon. (1985)

George Wickes, professor emeritus. BA, 1944, Toronto; MA, 1949, Columbia; PhD, 1954, California, Berkeley. (1970)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

David A. Frank, honors college

Michael Hames-García, ethnic studies

Mat Johnson, creative writing

Sharon Luk, ethnic studies

Sarah Wald, environmental studies

Undergraduate Programs

Major - Bachelor's Degree

- English (BA) (p. 106)

Minors

- Comics and Cartoon Studies (p. 108)
- English (p. 108)
- Digital Humanities (p. 109)
- Disability Studies (p. 110)
- Writing, Public Speaking, and Critical Reasoning (p. 110)

Certificate

- Writing, Public Speaking, and Critical Reasoning (p. 113)

Graduate Programs

Major - Master's Degree

- English (MA) (p. 111)

Major - Doctoral Degree

- English (PhD) (p. 112)

Specialization

- Politics, Culture, and Identity (p. 114)

English (BA)

The Department of English expects its majors to acquire knowledge of English and American literature. In addition, it expects them to gain a sense of history and a reading knowledge of at least one second language. Majors should construct their programs in consultation with an advisor.

An English major offers skills in reading, writing, researching, organizing, responding, arguing, and most importantly, analysis – abilities we need now more than ever. The skills you learn as an English major never grow obsolete, as the ability to understand and shape language is one of the most essential parts of being human.

The Department of English expects its majors to acquire knowledge of English and American literature. In addition, it expects them to gain a sense of history and a reading knowledge of at least one second language. Majors should construct their programs in consultation with an advisor

UO English offers several ways to pursue your passion for stories. These include a major leading to a bachelor's degree and several minors that range from traditional studies in literature and rhetoric to more interdisciplinary programs in a wide range of texts, cultural artifacts, and new media, such as comics and cartoon studies.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Read literary and cultural texts with discernment and comprehension and with an understanding of their conventions.
- Draw on relevant cultural and/or historical information to situate texts within their cultural, political, and historical contexts.
- Perform critical, formal analyses of literary, cinematic, and other cultural texts.
- Write focused, analytical essays in clear, grammatical prose.
- Employ logic, creativity, and interpretive skills to produce original, persuasive arguments.
- Employ primary and/or secondary sources, with proper acknowledgment and citation, as they contribute to a critical essay's thesis.

The Department of English expects its majors to acquire knowledge of English and American literature. In addition, it expects them to gain a sense of history and a reading knowledge of at least one second

language. Majors should construct their programs in consultation with an advisor.

English Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Code	Title	Credits
Lower-Division Courses		16
ENG 205	Genre: [Topic] (Taken twice with differing topics)	
Two lower-division elective courses ¹		
Foundation Courses ²		8
ENG 303	Foundations of the English Major: Text	
ENG 304	English Major Foundations: Context	
or ENG 305	English Major Foundations: Theory	
Writing Requirement		4
Select one of the following:		
ENG 209	The Craft of the Sentence	
ENG 420	The Art of the Sentence	
WR 320	Scientific and Technical Writing	
WR 321	Business Communications	
WR 423	Advanced Composition	
Upper-Division Courses		28
Students must take at least one class in each of the categories (A-G) ³		
A: Literature course, pre-1500		
B: Literature course, 1500–1789		
C: Literature course, 1789 to the present		
D: Literary theory or rhetoric course		
E: Media, folklore, or culture course		
F: Gender, ability, queer studies, or sexuality course		
G: Empire, race, or ethnicity course		
Additional upper-division course work in literature, media, folklore, or writing ⁴		
Total Credits		56

¹ May include only one of the following: Introduction to Fiction (ENG 104Z), Introduction to Drama (ENG 105Z), Introduction to Poetry (ENG 106Z), and may include no courses with a WR subject code. ENG 209 counts for writing requirement and lower-division elective.

² Completion of at least one Genre: [Topic] (ENG 205) topics course is a prerequisite or co-requisite for enrolling in ENG 303. Completion of ENG 303 is a pre-requisite for enrolling in ENG 304 or ENG 305.

³ One course may satisfy a maximum of two upper-division area requirements at once, as indicated on the current advising supplement.

⁴ No more than 8 credits of Research: [Topic] (ENG 401), Thesis (ENG 403), Reading and Conference: [Topic] (ENG 405), or Writing and Conference: [Topic] (CRWR 405). Upper-division CRWR courses may also be used to fulfill this requirement.

Additional Requirements

- Majors must complete the university second-language requirement for the BA degree.
- Majors must complete a minimum of 40 upper-division credits.

- At least 28 upper-division credits must be taken at the University of Oregon.

Honors Program in English

The program provides qualified undergraduate majors with special options for fulfilling departmental requirements. Honors students interested in the intensive study of literature in small discussion seminars independently explore a special topic of their own choosing, under the guidance of a faculty member. Typically, students spend a major portion of the senior year writing their honors thesis.

Requirements

1. Completion of all English department requirements
2. Minimum of two terms of Seminar: [Topic] (ENG 407) (Capstone).
3. Two terms of Thesis (ENG 403), a directed program of study or creative writing under the guidance of an appropriate advisor.
4. Senior thesis—either a critical essay of thirty-five to fifty pages or a substantial piece of creative writing. The thesis must be approved by the advisor and a second reader (typically both faculty members in English) after an oral defense.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

English Minor

The Department of English offers several distinctive minors that range from traditional studies in literature and rhetoric to more interdisciplinary studies that explore a wide range of texts, cultural materials, and new media.

Our minors are ideal for students who want to think creatively, hone their critical thinking, and become versatile writers. The skills gained in our programs provide vital preparation for business and professional careers, as well as for further academic work or artistic endeavors. The experience of our graduates has proven that studies in literature, rhetoric, and culture are an excellent background for law, medicine, teaching, management, publishing, advertising and advanced technology fields.

Minor in English

The English minor requires 24 credits of approved course work selected from the documents titled *University of Oregon English Major Requirements* and *Advising Supplement*, which are updated each year. Both documents are available in the English department and on our [website \(https://english.uoregon.edu/undergraduate/explore-our-minors/english-minor/\)](https://english.uoregon.edu/undergraduate/explore-our-minors/english-minor/).

- Of the total 24 credits, a maximum of 8 credits may be lower-division.
- All upper-division courses must be taken in residence at the University of Oregon
- Course work must be taken for letter grades and passed with grades of mid-C or better.
- Courses with the prefix ENG can be used for the minor, except:
 - Only one of the three Introduction to Literature courses (ENG 104Z, ENG 105Z, ENG 106Z) and transfer equivalents may be used to satisfy minor requirements.
 - Research: [Topic] (ENG 401), Thesis (ENG 403), and Reading and Conference: [Topic] (ENG 405) may not be used to satisfy minor requirements.
- Courses with the prefixes FLR, HC and WR may be used for the minor as approved by the department.
- Multi-listed courses (CINE 110M, CINE 260M, CINE 381M) with ENG subject code may be used for the minor.

Comics and Cartoon Studies Minor

Ben Saunders and Kate Kelp-Stebbing, Program Directors

1267 University of Oregon
Eugene, OR 97403-1267
541-346-0062
ben@uoregon.edu; kkelp@uoregon.edu

Comics are one of the most powerful forms of communication ever devised. Whether students are interested in the humanities or the sciences, finance or philosophy, marketing or medicine, they can learn

from the ways that the greatest comics creators have told stories, sold characters, and conveyed messages.

Comics studies draws upon the established fields of art history, literary studies, and cultural studies, while also tapping into the professional traditions of commercial design and advertising. The program's goal is to foster creative thought by encouraging a deeper and more profound understanding of how words and images work together, how they affect us, and how they shape the world in which we live.

Minor in Comics and Cartoon Studies

This interdisciplinary minor in comics and cartoon studies presents students with an international, historical, and critical perspective on the art of comics, from editorial cartoons to comic books to graphic novels. In taking courses for this minor, students will be required to think beyond accustomed disciplinary boundaries and to analyze and experiment with the interaction of visual and linguistic systems of meaning.

To qualify for the minor, students must take 24 credits of approved courses, including one required course, Introduction to Comic Studies (ENG 280). The remaining courses may be selected from the range of comics-related courses offered through the Departments of Art, Comparative Literature, East Asian Languages and Literatures, English, Ethnic Studies, History of Art and Architecture, and Romance Languages, the Arts and Administration Program, and the School of Journalism and Communication. For details regarding these courses, students should consult the list of offerings available in the Department of English office or online at comics.uoregon.edu (<http://comics.uoregon.edu>).

No more than 12 credits may be taken in lower-division courses, and course work must be passed with grades of mid-C or better.

Digital Humanities Minor

The way we approach humanities subjects, such as English, history, philosophy, and religious studies, began to change with the advent of the internet. Over past decades, new digital tools and techniques have expanded our subjects and practices of studying these fields. The minor in digital humanities prepares students to enter this new world, equipping them with skills in digital text analysis, data visualization, mapping and geospatial studies, the creation of multimedia archives, and forms of digital storytelling. While learning how to create digital humanities projects, students will have opportunities to study global cultural expressions that emerge through new forms of digital reading, writing, and gaming.

Program's Admission Requirements

Students wishing to declare the Digital Humanities minor complete a brief form (https://oregon.qualtrics.com/jfe/form/SV_80W3vvIWTgPoUBw/) and then connected with the Director of the Digital Humanities Minor (currently Assistant Professor Mattie Burkert) for further advising.

Digital Humanities Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Code	Title	Credits
ENG 250	Literature and Digital Culture	4
LIB/DSCI 350M	Humanities Research Data Management (Humanities Research Data Management) 1	4

Total Credits		24

¹ This requirement may also be fulfilled by LIB 410 (Spring 2023).

² At least one class must be at the upper division level. To ensure interdisciplinary, these three courses must come from at least two different departments.

ENG 470/570 (capstone course) must be taken in residence. All other courses can be taken as traditional, hybrid, or online courses at UO or at other universities offering comparable courses. Transfer credits from other institutions must be approved by the DH coordinator in order to count for credit in the minor.

Disability Studies Minor

<http://disability.uoregon.edu>

Brian Trapp, Director

108 Alder Building
541-346-0508
trapp@uoregon.edu

Disability studies is a dynamic interdisciplinary minor that considers disability as a civil and human rights issue, an identity, a community, a history, and a form of critical analysis. Disability studies investigates how different cultures define normality and abnormality in terms of bodies and minds, and how the resultant distinctions impact peoples' everyday lives. Rather than approaching disability as a problem in need of a cure, disability studies as a field understands disability as a defining human experience that offers unique perspectives on culture and society. It explores issues and histories from the viewpoints of disabled people and communities, in intersection with other identities like race, class, gender, sexuality and nationality.

Minor in Disability Studies

The minor in disability studies prepares students for a growing range of careers through study of disability and deaf cultures, politics, and histories in fields such as international development, health, design, sign language interpreting, education, and nonprofit management. The interdisciplinary program of study ranges across the university, and many courses fulfill university general-education, multicultural, and second-language requirements.

At least 12 of the required 24 credits must be taken at the University of Oregon; at least 12 must be upper-division credits.

Courses used to fulfill the minor requirements must be passed with a letter grade of at least C- or better. Fieldwork may receive a mark of P* where pass/no pass is the only grading option for the course.

Code	Title	Credits
ENG 240	Introduction to Disability Studies	4
Choose three from the following list of courses on social models: ¹		12
ASL 201–203	Second-Year American Sign Language

¹ Visit disability.uoregon.edu for a full list of options.

² Fieldwork gives students direct contact with disability and deaf communities, and ranges from self-designed internships to such options as adaptive skiing, community theater, and consultation with international advocates. Please contact the department for approved topic courses (e.g., ENG 404 and PSY 406).

Writing, Public Speaking, and Critical Reasoning Minor

<https://wscr.uoregon.edu/>

Emily Simnitt, Director

301E Tykeson Hall
1267 University of Oregon
Eugene, OR 97403-1267
541-346-3517
esimnitt@uoregon.edu

To leave college with the ability to write well, to speak in public, and to think critically is one of the most valuable outcomes of a college education. The minor in writing, public speaking, and critical reasoning offers students a coherent program of courses that will strengthen their abilities in all three essential areas. This interdisciplinary minor is built on courses in English, Writing, and Philosophy, and is taught by professors from English, Philosophy, and the Honors College. The minor is open to all University of Oregon undergraduates in any major. Undergraduates who want even more concentrated work in this area may enroll in the

Certificate program, which requires 36 credits (9 courses, including a senior capstone course).

Through coursework in Writing, English, Philosophy, and more, students develop written and speaking skills about how to be effective culturally responsive communicators in career and civic life.

More information about the program can be found at wscr.uoregon.edu.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Describe the role of language, identity, and power in community/public communication contexts.
- Examine one's own critical communication process, including reading, writing, listening, and speaking.
- Practice culturally responsive deliberation with others on contemporary issues in the public sphere.
- Examine writing, speaking, and other critical communication forms in a variety of disciplines and public contexts using ethical rhetorical analysis.
- Compose and deliver relevant, purpose-driven documents, speeches, and other forms/genres for audiences beyond the classroom.

Writing, Public Speaking, and Critical Reasoning Minor Requirements

A minor in Writing, Public Speaking, and Critical Reasoning requires 24 credits as follows:

Code	Title	Credits
Select two courses in writing from the following: ¹		8
WR 123	College Composition III	
WR 320	Scientific and Technical Writing	
WR 321	Business Communications	
ENG 413		
ENG 420	The Art of the Sentence	
WR 423	Advanced Composition	
Select two courses in rhetoric from the following (at least one of which must be ENG 200 or ENG 330): ¹		8
ENG 200	Public Speaking as a Liberal Art	
ENG 330	Oral Controversy and Advocacy	
ENG 492	History of Rhetoric and Composition	
ENG 493	Modern Rhetorical Criticism	
Select two courses in reasoning from the following: ¹		8
PHIL 103	Critical Reasoning	
ENG 335	Inventing Arguments	
Total Credits		24

¹ Reasoning, Speaking, Writing (ENG 494), Internship: [Topic] (ENG 404) or Laboratory Projects: [Topic] (WR 198) may be taken to satisfy one course requirement.

English (MA)

The Department of English offers graduate study in English and American literature, film and television studies, folklore, critical theory, rhetoric and composition, cultural studies, popular culture, ecocriticism,

ethnic literatures, gender studies, postcolonial studies, comic studies, disability studies. It offers the master of arts (MA) and doctor of philosophy (PhD) degrees in English.

The Department of English offers an MA for students who want to study beyond the BA but who do not plan to complete a PhD. Students whose goal is a doctorate should apply for admission to the department's doctoral program. Students who complete the MA program at the University of Oregon and want to enter the PhD program must reapply to the department for admission into that program. The number of seats in the MA program is limited, and admission is competitive.

Program's Admission Requirements

Please visit the program's website (<https://cas.uoregon.edu/english/apply/graduate-admissions/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate broad knowledge of literary texts (which may also include film, media, folklore, and/or other objects of study covered in English Department areas of emphasis) in English as well as a general understanding of English and American literary history.
- Demonstrate ability to write to a professional standard within the field of literary studies.
- Demonstrate ability to analyze literary texts (which may include film, media, and/or folklore) using theoretically informed methods as well as skills in close reading.
- Demonstrate ability to speak coherently and professionally about literature (which may also include film, media, and/or folklore), including literary form and genre, literary history, and literary scholarship.
- Demonstrate ability to conduct original research and writing on literature, film, and media, as well as other cultural expressions related to literature, film, and media.
- Demonstrate mastery of a specialized subject area within literary and/or film/media and/or folklore studies, including mastery of both primary sources and scholarship within that area.

English Major Requirements

Code	Title	Credits
ENG 690	Introduction to Graduate Studies in English	5
One seminar before 1800		
One seminar after 1800 or rhetoric or advanced theory		
Nine formal 600-level seminars ¹		
ENG 503	Thesis (if electing the thesis option) ²	9

¹ Chosen according to the graduate student's interests, in consultation with the Faculty Advisor and approved by the Director of Graduate Studies. MA students may wish to develop an area of focus, but they may also choose to take courses in many different areas.

² A master's thesis may be substituted for 1 elective seminar with the prior approval of the director of graduate studies in consultation with the faculty thesis advisor. Note that ENG 503 may substitute for only 1 of the 12 seminars, which means that electing the thesis option adds 4 credits to the requirements for the degree.

Graduate course work should be completed at the 600 level. Exceptions to this policy must be made in advance by the director of graduate studies in consultation with the individual faculty advisor.

A minimum cumulative GPA of 3.50 in all graduate course work at the UO is required for completion of the MA degree. At least nine courses must be taken in residence at the University of Oregon.

Students who have completed 12 graduate-level English courses (nine taken at the university), attained reading knowledge of one foreign language, and maintained a cumulative GPA of 3.30 or better may apply for the MA degree with a specialty in English or American literature.

English (PhD)

The Department of English offers graduate study in English and American literature, film and television studies, folklore, critical theory, rhetoric and composition, cultural studies, popular culture, ecocriticism, ethnic literatures, gender studies, postcolonial studies, comic studies, disability studies. It offers the master of arts (MA) and doctor of philosophy (PhD) degrees in English.

In the English PhD program, students take courses exploring a variety of fields and theoretical approaches in years one and two and then focus on their special area of study in years three through five. After fulfilling a limited number of distribution requirements, each student fashions an Individual Program of Study with the assistance of their faculty advisor, who is a specialist in the appropriate field. The number of places in the PhD program is limited, and admission is competitive.

Program's Admission Requirements

Please visit the program's website (<https://cas.uoregon.edu/english/apply/graduate-admissions/#doctoral>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge of literary texts (which may also include film, media, folklore, and/or other objects of study covered in English Department areas of emphasis, hereafter understood as included in literature literary texts) in English as well as a general understanding of English and American literary history.
- Demonstrate ability to write to a professional standard within the field of literary studies.
- Demonstrate ability to analyze literary texts using theoretically informed methods as well as skills in close reading.
- Demonstrate ability to speak coherently and professionally about literature, including literary form and genre, literary history, and literary scholarship.
- Demonstrate ability to conduct original research and writing on literature, film, and media, as well as other cultural expressions related to literature, film, and media.
- Demonstrate mastery of a specialized subject area within literary and/or film/media studies, including mastery of both primary sources and scholarship within that area.
- Demonstrate ability to write an in-depth, original work of scholarship.
- Demonstrate ability to teach undergraduate composition and/or literature courses to a professional standard.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
ENG 614	Introduction to Literary and Cultural Theory	5
ENG 690	Introduction to Graduate Studies in English	5
ENG 608	Workshop: [Topic] (Publication)	1
Select two of the following: ¹		
Pre-1500 course		
1500-1660 course		
1660–1800 course		
Select two of the following: ¹		
19th century course		
20th century course		
Rhetoric or advanced theory course		
Twelve seminars ²		

- ¹ Film and folklore courses are included under the appropriate time period.
- ² The seminars, constituting the individual plan of study, may be distributed among any areas, and the plan must be approved by the student's graduate faculty advisor and the director of graduate studies before the second year of study.

Graduate course work should be completed at the 600 level. Exceptions to this policy must be made in advance by the director of graduate studies in consultation with the individual faculty advisor.

A cumulative GPA of 3.50 or better in all graduate work at the UO is the minimum requirement for satisfactory progress toward the PhD.

Second Language

The graduate language requirement for the doctoral degree is reading competence in one non-English language is required for the PhD. Reading competence may be demonstrated in the foreign language as specified under the language requirement for the MA degree. High proficiency may be demonstrated by a grade of A– or better in an approved 400-, 500-, or 600-level literature course, with readings in the target language; scoring at the required levels on the College Level Examination Program (CLEP) test; or passing the Toronto Medieval Latin examination at the PhD level.

Students may petition the graduate committee to test in languages that don't fit the above criteria.

Teaching

Doctoral candidates must have experience as classroom teachers in the department before they receive the degree.

Breadth Examination

Doctoral candidates must take the PhD breadth examination at the beginning of the third year of study, or, if they enter with 6 or more transfer credits, at the beginning of the second year of study. The student and the student's advisor select two examination fields chosen for proximity to and/or importance for the separate, primary research field and project. These fields may provide broad familiarity with readings, texts, or methods that will inform dissertation research, and may also develop areas of relevant professional or teaching competence. They may include historical fields adjacent to the primary research field; genres; or areas of critical theory. The examination includes written

(take-home) and oral components based on reading lists generated by the student in consultation with faculty examiners and approved by the Graduate Committee. A student must pass the breadth examination in order to take the PhD major field examination, administered the following year. Students who fail either written portion of the breadth examination do not take the oral portion until they have retaken and passed the failed written part; retakes will occur at the end of that term, postponing the PhD major field examination to the following term.

Major Field Examination

After students in the PhD program have completed their course work, they must take a two-and-a-half-hour major field examination. Typically taken fall term following completion of all course work and the language requirement, the major field examination provides each student with the opportunity to present and defend a short paper on a topic related to the dissertation. The examination also allows the student to demonstrate expertise in his or her field of specialization. It is divided into two parts:

1. A discussion of a relatively broad field of study that provides a context for the topic or problem examined in part two
2. A prepared presentation by the student on a topic or problem of the student's choice that is related to the dissertation, followed by a discussion of that topic

The topic and areas covered by the major field examination are defined, in the form of a project description and reading list, by the student in consultation with an advisor or advisors and must be approved by the English department graduate committee. As a supplement to the major field examination, a student may choose to complete a one- to two-hour written examination on part two. The major field examination may be retaken only once.

PhD Dissertation

After completing all other degree requirements, the candidate should consult with a faculty advisor willing to work in the area of the student's interest and submit a dissertation prospectus for approval by the student's dissertation committee. Once the prospectus is approved by the committee and the director of graduate studies, the student is advanced to candidacy. A three-year period for completion of the dissertation begins when the Division of Graduate Studies approves the advancement to candidacy.

The dissertation may be a work of literary, film, folklore, or linguistic scholarship or, with the approval of the committee, a collection of three substantial essays exhibiting internal coherence though not necessarily treating a single subject. The candidate gives an oral presentation or defense of the dissertation when it is completed and found acceptable by the committee.

Residency Requirements

The Division of Graduate Studies requires at least three years of full-time work beyond the bachelor's degree for the doctorate with at least one year spent in continuous residence on the Eugene campus. The Division of Graduate Studies requires three consecutive terms (fall, winter, spring) with a minimum of 9 graduate credits of formal course work per term for the PhD year of residency; graduate employees (GEs) must also enroll for a minimum of 9 graduate credits each term they hold a GE appointment.

Writing, Public Speaking, and Critical Reasoning Certificate

To leave college with the ability to write well, to speak in public, and to think critically is one of the most valuable outcomes of a college education. The minor in writing, public speaking, and critical reasoning offers students a coherent program of courses that will strengthen their abilities in all three essential areas. This interdisciplinary minor is built on courses in English, Writing, and Philosophy, and is taught by professors from English, Philosophy, and the Honors College. The minor is open to all University of Oregon undergraduates in any major. Undergraduates who want even more concentrated work in this area may enroll in the Certificate program, which requires 36 credits (9 courses, including a senior capstone course).

Through coursework in Writing, English, Philosophy, and more, students develop written and speaking skills about how to be effective culturally responsive communicators in career and civic life.

More information about the program can be found at wscr.uoregon.edu.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Describe the role of language, identity, and power in community/public communication contexts.
- Examine one's own critical communication process, including reading, writing, listening, and speaking.
- Practice culturally responsive deliberation with others on contemporary issues in the public sphere.
- Examine writing, speaking, and other critical communication forms in a variety of disciplines and public contexts using ethical rhetorical analysis.
- Compose and deliver relevant, purpose-driven documents, speeches, and other forms/genres for audiences beyond the classroom.

Writing, Public Speaking, and Critical Reasoning Certificate

A certificate in writing, public speaking, and critical reasoning requires 36 credits as follows:

Code	Title	Credits
Select three courses in writing (at least one at the 400 level):		12
ENG 413		
ENG 420	The Art of the Sentence	
WR 123	College Composition III	
WR 320	Scientific and Technical Writing	
WR 321	Business Communications	
WR 423	Advanced Composition	
Select three courses in rhetoric (at least one of which must be ENG 200 or ENG 330):		12
ENG 200	Public Speaking as a Liberal Art	
	or ENG 330 Oral Controversy and Advocacy	
ENG 492	History of Rhetoric and Composition	
ENG 493	Modern Rhetorical Criticism	
Select two courses in reasoning:		8
ENG 335	Inventing Arguments	

PHIL 103	Critical Reasoning	
One capstone course:		4
ENG 494	Reasoning, Speaking, Writing	
Total Credits		36

Politics, Culture, and Identity Graduate Specialization

Politics, Culture, and Identity Graduate Specialization

- The completion of 16 credits of approved specialization-related curriculum offered at the 600-level. At least 4 of those credits must come from the Department of English and at least 4 must come from the Department of Political Science.
- The completion of one term of a colloquia course (1 credit; P/NP; ENG 608 Wrk Coll Pol/Cul/Ident; offered during spring term)
- The completion of and two terms of a dissertation writing course (1 credit each; P/NP; ENG 608 Wrk Diss Pol/Cul/Ident; offered in fall and spring terms)
- At least one member of the student's dissertation committee must be a PCI participating faculty member.
- The student's dissertation must have a substantive focus on themes of politics, culture, and identity

Folklore and Public Culture

flr@uoregon.edu

The Folklore and Public Culture Program is one of a few major centers of folkloristic research in the United States. With more than thirty core and participating faculty, the program provides an interdisciplinary approach to an undergraduate major and minor as well as a Master's Degree, allowing students to create a focused course of study in their areas of interest. Participants in the Folklore and Public Culture Program use theoretical analyses, research methods, and fieldwork techniques to study the ways tradition continues to enrich human behavior throughout the world. Participants examine the historical, cultural, social, and psychological dimensions of expressive forms such as mythology, legend, folktale, music, dance, art, belief, food, ritual, and ceremony. Students will gain fresh perspectives on the ethnic, regional, occupational, gender, and other identities of individuals in specific communities.

The Folklore and Public Culture Program offers bachelor of arts, master of arts, and master of science degrees in folklore and public culture. An undergraduate minor is also available. Folklore and public culture courses cover an extensive range of interdisciplinary topics: cultural heritage, ethnicity, subcultures, popular culture, performance, gender, film, religion, public folklore, and issues of diversity and globalization. Folklore and public culture graduates work in public and private agencies

as educators, archivists, editors, arts and humanities consultants, museum curators, and festival planners.

Faculty

Martha J. Bayless, professor (Britain, Welsh, Old and Middle English medieval literature and culture). See **English**.

D. Gantt Gurley, associate professor (Scandinavian literature and folklore, Jewish literature and folklore, Old Norse literature). See **German and Scandinavian**.

Habib Iddrisu, assistant professor (Africa, dance, performance). See **Dance**.

Leah Lowthorp, assistant professor (folklore and gender, fieldwork methods and theory, social justice). See **Anthropology**.

Dorothee Ostmeier, professor (18th- and 20th-century literature, culture, philosophy). See **German and Scandinavian**.

Whitney Phillips, assistant professor (digital cultures, media ecologies, media ethics, narrative and identity). See **Journalism and Communication**.

Riki H. Saltzman, instructor (public folklore, foodways, ethnicity-identity).

Gordon M. Sayre, professor (early American literature, 18th-century literature, folklore). See **English**.

Philip W. Scher, professor (Caribbean, politics of culture, transnationalism). See **Anthropology**.

Thomas Glynne Walley, associate professor (Japanese literature and culture). See **East Asian Languages and Literature**.

Daniel N. Wojcik, professor (alternative religions, subcultures, vernacular arts). See **English**.

Juan Eduardo Wolf, associate professor (ethnomusicology, folklore, Latin American studies). See **Music**.

Participating

Ina Asim, history

Mokaya Bosire, linguistics

Bob Bussel, Labor Education and Research Center

Carl R. Bybee, journalism and communication

Matthew Dennis, history

Keith Eggener, history of art and architecture

Maria Fernanda Escallón, anthropology

Kenneth I. Helphand, landscape architecture

Lamia Karim, anthropology

Patricia Lambert, planning, public policy and management

Ana Lara, anthropology

Gabriela Martinez, journalism and communication

Debra L. Merskin, journalism and communication

Julianne H. Newton, journalism and communication

Jeffrey Ostler, history

Priscilla P. Ovalle, English

Eleonora Redaelli, School of Planning, Public Policy and Management

Ben Saunders, English

Janet Wasko, journalism and communication

Stephanie Wood, College of Education

Stephen R. Wooten, global studies

Undergraduate Programs

Major - Bachelor's Degree

Minor

- Folklore and Public Culture (p. 117)

Graduate Programs

Major - Master's Degree

- Folklore and Public Culture (MA/MS) (p. 117)

Specialization

- Folklore and Public Culture (p. 119)

Folklore and Public Culture (BA)

Students studying folklore and public culture at the UO receive comprehensive training in scholarly approaches and methods for researching, documenting, and presenting traditional arts and cultural practices within the United States and abroad.

Courses cover an extensive range of interdisciplinary topics: cultural heritage, ethnicity, subcultures, popular culture, performance, gender, film, religion, public folklore, and issues of diversity and globalization. Folklore and Public Culture graduates work in public and private agencies as educators, archivists, editors, arts and humanities consultants, museum curators, and festival planners.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify and explain key concepts in academic and public folklore.
- Demonstrate knowledge of the research methods associated with academic and public folklore.
- Understand and apply fieldwork methods and proper documentation techniques necessary for submission of fieldwork for archival preservation.
- Demonstrate knowledge of the multiple theoretical orientations contributing to an understanding and analysis of academic and public folklore.

- Demonstrate an understanding of the types of folkloric expression and various types of folk groups in relationship to historical, cultural, and social contexts.
- Understand and give examples of what academic and public folklorists do.
- Evaluate how academic and public folklore contributes to understanding contemporary issues requiring decision making and policy development.

Folklore and Public Culture Major

Students studying folklore and public culture at the UO receive comprehensive training in scholarly approaches and methods for researching, documenting, and presenting traditional arts and cultural practices within the United States and abroad. Students majoring in folklore and public culture must earn a minimum of 48 credits, of which 32 must be upper division, and 20 of the 48 must be Folklore (FLR) credits.

Students may substitute courses to fulfill requirements with the approval of their major advisor. Programs from other departments or programs offering folklore-related courses include anthropology, arts and administration, classics, dance, English, ethnic studies, German and Scandinavian, historic preservation, humanities, international studies, journalism and communication, Judaic studies, music, religious studies, Romance languages, theater arts, and women's, gender, and sexuality studies.

Minimum Grade

Course work required for the folklore and public culture major, both lower division and upper division, must be passed with grades of C– or better. No more than 8 pass/no pass credits may be applied to the major.

Foreign Language Requirement

Majors must complete the university foreign-language requirement for the BA degree.

Residency Requirement

Twenty-eight credits of upper-division coursework for the major must be completed at the University of Oregon.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Folklore and Public Culture Minor

The interdisciplinary Folklore Program offers perspectives on ethnic, regional, occupational, gender, and other traditional identities of individuals in specific societies and cultures. Students in the program study how traditions enrich and express the dynamics of human behavior throughout the world. Folklore courses examine the historical, cultural,

social, political, and economic dimensions of such expressive forms as mythology, legend, art, music, dance, culinary practices, religion, ritual, and ceremony. Folklore and Public Culture minors go on to work as educators, archivists, editors, arts and humanities consultants, museum curators, and festival planners.

Minor in Folklore and Public Culture

Courses

The minor requires the completion of 24 credits. Introduction to Folklore (FLR 250) is required of all minors. A maximum of 8 credits may be taken in lower-division courses. A minimum of 12 credits must be "FLR" courses. Remaining courses are selected from the list of courses on the program website. Students may substitute courses from other departments to fulfill this requirement with the approval of their minor advisor. Programs from other departments and programs offering folklore-related courses include anthropology, classics, dance, English, ethnic studies, German and Scandinavian, historic preservation, humanities, international studies, journalism and communication, Judaic studies, music, planning, public policy, and management, religious studies, Romance languages, theater arts, and women's and gender studies.

Minimum Grade

Course work required for the folklore and public culture minor, both lower division and upper division, must be passed with grades of C– or better. No more than 4 pass/no pass credits may be applied to the minor.

Residency Requirement

Sixteen credits of course work for the minor must be completed at the University of Oregon.

Folklore and Public Culture (MA/MS)

The master of arts (MA) or master of science (MS) degree in folklore and public culture is interdisciplinary. In consultation with an advising committee, students take designated courses from faculty members in anthropology, arts and administration, English, folklore and public culture, German, Scandinavian, and music in addition to elective courses that strengthen their areas of expertise. A public folklore track is available to students preparing for careers in the public sector. A thesis or terminal project is required for completion of the degree. Students working toward an MA degree must demonstrate competence in a second language.

Students in the masters degree program in Folklore and Public Culture may choose from two tracks with differing emphases. The General Folklore Track provides students with a strong foundation in folklore studies while also allowing students to take elective courses in their areas of focus. The General Folklore Track requires students to take specific classes from Folklore and Public Culture program faculty in a variety of subjects including anthropology, arts and administration, English, and music, among other disciplines. The Public Folklore Track prepares students who plan to work in the public sphere by building professional skills such as ethnographic research, documentation, grant writing, administration and programming. The program also focuses on building scholarly fundamentals of folklore and establishing relationships within the folklore field.

Program's Admission Requirements

Please visit the program's website (<https://folklore.uoregon.edu/admission-requirements/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify and explain key concepts in folklore studies.
 - Demonstrate knowledge of the research methods associated with folklore studies.
 - Understand and apply fieldwork methods and proper documentation techniques necessary for submission of fieldwork for archival preservation.
 - Demonstrate knowledge of the multiple theoretical orientations contributing to an understanding and analysis of folkloric expression.
 - Demonstrate an understanding of the types of folkloric expression and various types of folk groups in relationship to historical, cultural, and social contexts.
 - Understand and give examples of what academic and public folklorists do.
 - Understand ethical issues and responsibilities relating to fieldwork, professionalism, and the writing and publishing of scholarly papers.
 - Conduct independent research and analysis, culminating in a thesis or a terminal project based on original research, presented within a scholarly framework, that makes a substantive contribution to current knowledge in the field.
- General Folklore (p. 118)
 - Public Folklore (p. 118)

FLR 503 Thesis ⁴ 9
or FLR 609 Terminal Project

¹ Or other fieldwork course approved by advising committee.

² Students may substitute other courses not listed to fulfill requirements with the approval of their advising committee.

³ An internship related to public folklore amounting to 120 clock hours of service on-site, organized through the Folklore Program or the Oregon Folklife Network.

⁴ The number of thesis or terminal project credits that a candidate may complete has no maximum, although only 9 credits count toward the degree.

Language Requirement for the MA Degree

The master of arts degree requires the satisfactory completion of a second-year level of proficiency in a second language, as required for the B.A. degree (see Bachelor's Degree Requirements (p. 25) in the catalog for details). Competency may be demonstrated by either a standardized test or with adequate undergraduate course work. Language competence must be demonstrated within the overall seven-year limit for completion of a master's degree.

Additional Courses

Consult the program's website or members of its faculty each term for special offerings that fulfill degree requirements. Visit the program website for a list of additional approved courses.

Other undergraduate and graduate courses with related subject matter may be applied to folklore and public culture certificate programs by arrangement with the instructors and the folklore and public culture director. For a list of these courses, visit the program website.

Folklore and Public Culture Graduate Specialization**Graduate Specialization: Folklore and Public Culture**

Code	Title	Credits
FLR 681	History and Theory of Folklore Research	5
FLR 550		4
Minimum of 7 credits from the following: ²		7
FLR 511	Folklore and Religion	
FLR 513		
FLR 515	Folklore and Foodways	
FLR 583		
FLR 605	Reading and Conference: [Topic]	
FLR 606	Field Studies: [Topic]	
Total Credits		16

¹ One fieldwork/public folklore course, chosen from FLR 550 (*Public Folklore*), FLR 684 (*Fieldwork*) or another Folklore course or a course taught by core faculty approved by the Director of Graduate Studies in the Folklore and Public Culture Program.

² FLR 550 and FLR 684 are also applicable if not taken to satisfy the fieldwork and public folklore section.

³ Courses must be taken for a letter grade and grade must be a B- or better to count for the specialization. An overlap maximum of 4 credits may be permitted with permission of the Folklore Director of Graduate Studies.

See https://folklore.uoregon.edu/welcome/course_descriptions/ for course descriptions

Additional Requirements

A statement of interest and a transcript of higher education to date are required. Contact information for recommenders is required, but recommendations are not required at this stage. Send application, including statement of purpose, transcripts, and list of recommenders, to Folklore administrative staff at flr@uoregon.edu (emagee@uoregon.edu). Applications are accepted on a rolling basis. Students must be matriculated students at the University of Oregon.

German and Scandinavian

jlibrett@uoregon.edu

The Department of German and Scandinavian offers a range of courses and degree programs, from instruction in beginning German and Swedish through a wealth of general-education and advanced undergraduate and graduate offerings in the literatures and cultures of German-speaking and Scandinavian Europe. Students may earn a bachelor of arts (BA) or a bachelor of science (BS) degree with a focus on German language, literature, and culture; interdisciplinary German and Scandinavian studies; or Scandinavian. Minors in all three of these focuses are also possible, and many undergraduates pursue concurrent degrees with second majors or minors in other departments and programs. At the graduate level, the department offers the master of arts (MA) and doctor of philosophy (PhD) degrees in German. Our five-year combined BA/MA program is an excellent option for motivated students. Ours is the only program in the state of Oregon that grants a PhD in German.

Preparation

No prior knowledge of German is required to major or minor in German.

The beginning is simply curiosity about the language and culture of Germany, Austria, Switzerland, and Central Europe. With some prior knowledge, of course, one will be able to proceed more quickly through the major or minor by placing into a higher level. Similarly, one can choose the Scandinavian focus without prior knowledge of Swedish language or Scandinavian cultures. Curiosity about the cultures of Sweden, Norway, Finland, and Iceland would here provide the necessary and sufficient point of departure.

Careers

Our alumni have found positions in media and communications, government and public service, international business and law, education and teaching, social services, and the travel and tourism industry. Many go on to graduate school in education, law, the humanities, and other fields. Proficiency in a second language opens career opportunities in any number of fields that demand superior skills in oral and written communication, critical thinking and analysis, and intercultural understanding. Particularly in combination with another major or minor, the career possibilities are limitless. Students who graduate with a degree in German or Scandinavian enter a great variety of occupations, including but by no means limited to those with a direct connection to the languages and countries of Europe.

Major Requirements

The regular German Major requirements begin with the second year of German language (German 201, 202, 203). Once you've completed the second year (or placed out of it), you have only 9 further courses to complete. See 'Programs' for details on all German Major foci.

Note: the department does not accept a grade of C- or lower in any course used to fulfill requirements for a major in German.

Faculty

Corinne Bayerl, associate teaching professor (16th- to early 18th-century French and German literature and philosophy; gender questions; history of pedagogy). Currently in the Clark Honors College. See **Comparative Literature**.

Sonja Boos (†), associate professor (19th- through 21st-century German literature, culture, and film; critical thought). MA, 1997, Heinrich-Heine Universität Düsseldorf; MA, 2004, PhD, 2008, Princeton. (2013)

Miriam Chorley-Schulz, assistant professor and Mokin Fellow of Holocaust Studies (German & Scandinavian, Judaic Studies, History, Russian East European and Eurasian Studies). MA, M.Phil., PhD, 2015; 2018; 2021, Columbia University; MA, 2014, Freie Universität Berlin; BA, 2011, Freie Universität Berlin. (2023)

D. Gantt Gurley, associate professor (Scandinavian literature and folklore, Old Norse literature, Jewish studies). Currently in the Clark Honors College. BA, 1994, Bard College; MA, 2002, PhD, 2007, California, Berkeley. (2009)

Elizabeth Howard, assistant teaching professor (Swedish and Scandinavian). BFA, 2008, Emerson College; MFA, 2010, Boston University; PhD, 2020, University of Oregon.

Martin Klebes, associate professor (18th- to 21st- century literature, philosophy, critical thought). PhD, 2003, Northwestern. (2007)

Jeffrey S. Librett, professor (literature since 1750, theoretical discourses, Jewish studies). BA, 1979, Yale; MA, 1981, Columbia; PhD, 1989, Cornell. (2004)

Dawn A. Marlan, teaching professor (German and European literature and culture from 1700 forward; modernist novel). BA, 1989, Bennington College; MA, 1991, PhD, 2000, Chicago. (2004)

Dorothee Ostmeier, professor (18th- and 20th-century literature, culture, philosophy). Staatsexamen, 1984, MA, 1985, Ruhr; PhD, 1993, Johns Hopkins. (2001)

Michael Stern, associate professor (Nietzsche, Kierkegaard, 19th-century Scandinavian literature). BA, 1993, MA, 1995, PhD, 2000, California, Berkeley. (2001)

Matthias Vogel, teaching professor (second-language acquisition); language coordinator, German language programs; coordinator, German Global Scholars. BA, 1993, Johannes Gutenberg, Mainz; MA, 1996, Oregon. (2011)

Emeriti

Susan C. Anderson, professor emeritus. BA, 1978, North Carolina, Asheville; MA, 1981, PhD, 1985, North Carolina, Chapel Hill. (1986)

Kenneth S. Calhoon, professor emeritus. BA, 1979, Louisville; MA, 1981, PhD, 1984, California, Irvine. (1987)

Alexander Mathäs, professor emeritus. Staatsexamen, 1981, Tübingen; MA, 1984, Oregon; PhD, 1990, Texas, Austin. (1996)

James R. McWilliams, associate professor emeritus. BA, 1951, MA, 1957, PhD, 1963, California, Berkeley. (1960)

Helmut R. Plant, associate professor emeritus. BA, 1957, Fairmont; MA, 1961, PhD, 1964, Cincinnati. (1966)

Karla L. Schultz, professor emerita. BA, 1967, Alma; MA, 1968, Washington (Seattle); MA, 1980, PhD, 1984, Oregon. (1987)

Ingrid A. Weatherhead, senior instructor emerita. BA, 1950, MA, 1951, Puget Sound. (1962)

Virpi Zuck, professor emerita. BA, 1964, MA, 1965, University of Helsinki; PhD, 1977, Wisconsin, Madison. (1974)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

German Studies Participating Faculty

Nina Amstutz, history of art and architecture

Jack Boss, music

Anita Chari, political science

Joyce Cheng, history of art and architecture

James Conran, political science

Colin Koopman, philosophy

David M. Luebke, history

John McCole, history

Nicolae Morar, environmental studies

Barbara Muraca, philosophy

Craig Parsons, political science

Daniel Rosenberg, history

Emily Scott, history of art and architecture

Barbara Stawarska, philosophy

Alejandro Vallega, philosophy

Daniela Vallega-Neu, philosophy

Peter Warnek, philosophy

Graduate Programs

Major - Master's Degree

- German (MA) (p. 128)

Major - Doctoral Degree

- German (PhD) (p. 128)

German (BA/BS)

Learning another language fulfills the primary purpose of a university education: It prepares you to reason, analyze, solve problems, and communicate in a world of widely differing cultures. Within the Department of German and Scandinavian, students can choose a major focus in German; in Scandinavian; or in interdisciplinary German and Scandinavian Studies. In the 'interdisciplinary German and Scandinavian Studies' option, the student usually chooses German or Scandinavian for one half of their course work, and another discipline that overlaps with German or Scandinavian (such as History, Global Studies, Political Science, etc.) for the other half of their course work. We offer language instruction in both German and Swedish (Swedish being the language for the Scandinavian majors and minors). Culture and society courses are offered at the upper level in both German and in English, depending on the course.

More than 100 million people speak German as a first language, and it is the official language of six countries. More than one thousand companies based in German-speaking countries have subsidiaries in the U.S. In all of these firms there is a need for employees with an understanding of German language and culture.

Approximately 20 million people's mother tongue is a Scandinavian language, and notable Scandinavian literature spans a broad range from the beloved children's stories of Hans Christian Andersen to the modern crime novels by Stieg Larsson.

The UO Department of German and Scandinavian ranks among the top 10 colleges and universities in the number of students majoring in German. The UO also has the only program in Oregon in which students can get a major or a minor in Scandinavian. Classes are discussion-based with engaging activities designed to involve and engross students, with both group and individual writing assignments.

Many students choose to study abroad (<https://humanities.uoregon.edu/german-scandinavian/experiential-learning/study-abroad/>) some with awards from The Fulbright Program (<https://eca.state.gov/fulbright/>) and the German Academic Exchange Service (<https://www.daad.org/en/>)

(DAAD). The UO offers a local internship program for advanced students of German to teach German in an elementary or middle school. Or you might take advantage of an opportunity to intern in a German-speaking or Scandinavian country.

German Focus

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Language: Students should attain the point where they can discuss literature and culture in German fluently in an advanced academic environment. In addition, they should be able to write a fluent 20-30 page essay in German on an academic literary topic.
- Literature: Students should be able to provide a general characterization of the history and shapes of all major genres (lyric, drama, and narrative) in the literature of the German language from the early Enlightenment through the post-World War II period. Students should also possess an overview of all major interpretive paradigms in literary studies since World War I. Beyond this general knowledge, students must be able to demonstrate mastery of the stakes of one genre across several periods of German literary history, mastery of the literature of one period in all genres, and mastery of at least one philosophical movement or interpretive paradigm. Mastery here includes broad knowledge and significant comprehension, as well as a basic overview of the scholarly literature on the subject.
- Demonstrate mastery of the broader contours of German literary history in terms of genres, periods, as well as of relevant theoretical paradigms and critical traditions.
- Demonstrate effective oral and written scholarly communication skills in English and German.
- Demonstrate ability to conduct independent research and analysis in German studies, following professional standards of writing and citation.
- Present research in a professional setting, such as a colloquium or a conference.

German and Scandinavian Studies Focus

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Language: Students should master skills in listening, speaking, reading, and writing up to an advanced level, and become proficient users (C1-level) of German or Swedish according to the internationally recognized standards and proficiency levels determined in the Common European Frame of Reference for language learning (CEFR).
- Literature: Students should be able to identify, define, and contextualize works of literature from diverse populations in German and Scandinavian societies. Students should be familiar with the main concepts of literary analysis specific to the German or Scandinavian language traditions, including the major periods/movements (and their social-historical conditions), genres, and interpretive paradigms, as well as several main themes. This includes an awareness of the demographic changes in Germany and Scandinavia which open up the notion of these literatures to a more global analysis. Cultural change as a result of a changing population is also of central concern. Diversity in Germany and Scandinavia both

historically and of late is stressed as an important component of a changing field of study.

- **Culture:** Students should be able to describe and provide examples of several main aspects of contemporary German and Scandinavian cultures, including governmental structures, demographic changes and the corresponding cultural implications, major news media and periodical publications, and contemporary cinema, literature, and arts. The dynamic aspect of culture is stressed so that the students become aware of the changes happening due to global population and informational flows.
- **Critical Thought and Writing:** Students should be able to write essays of 5-7 pages that argue fluently in a coherent, logical, and persuasive manner for independently developed interpretive positions on cultural artifacts. Of late, we are stressing views from both the inside and outside of dominant cultures in Germany and Scandinavia.

Scandinavian Focus

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Language:** Students should master skills in listening, speaking, reading, and writing up to an advanced level, and become proficient users (C1-level) of German or Swedish according to the internationally recognized standards and proficiency levels determined in the Common European Frame of Reference for language learning (CEFR).
- **Literature:** Students should be able to identify, define, and contextualize works of literature from diverse populations in German and Scandinavian societies. Students should be familiar with the main concepts of literary analysis specific to the German or Scandinavian language traditions, including the major periods/movements (and their social-historical conditions), genres, and interpretive paradigms, as well as several main themes. This includes an awareness of the demographic changes in Germany and Scandinavia which open up the notion of these literatures to a more global analysis. Cultural change as a result of a changing population is also of central concern. Diversity in Germany and Scandinavia both historically and of late is stressed as an important component of a changing field of study.
- **Culture:** Students should be able to describe and provide examples of several main aspects of contemporary German and Scandinavian cultures, including governmental structures, demographic changes and the corresponding cultural implications, major news media and periodical publications, and contemporary cinema, literature, and arts. The dynamic aspect of culture is stressed so that the students become aware of the changes happening due to global population and informational flows.
- **Critical Thought and Writing:** Students should be able to write essays of 5-7 pages that argue fluently in a coherent, logical, and persuasive manner for independently developed interpretive positions on cultural artifacts. Of late, we are stressing views from both the inside and outside of dominant cultures in Germany and Scandinavia.

The department does not accept a grade of D+ or lower in any course used to fulfill requirements for a major in German.

- German Focus (p. 122)
- German and Scandinavian Studies Focus (p. 122)
- Scandinavian Focus (p. 123)

German Focus

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits
Core Language Courses		28
GER 201	Second-Year German I	
GER 202	Second-Year German II	
GER 203	Second-Year German III	
GER 311	Intermediate Language Training I	
GER 312	Intermediate Language Training II	
GER 313	Intermediate Language Training III	
GER 411	Advanced Language Training	
Five German literature and culture courses ¹²³		20
Total Credits		48

- ¹ All GER subject code courses except language courses listed above.
- ² At least three of the five German literature and culture courses must be upper division courses with the GER subject code, taught in the German language, and must be taken at the University of Oregon.
- ³ Of the remaining two literature and culture courses, up to two may be courses taught in English (GER 200-level courses, GER 345M, GER 350-359). One or both of these may be at the 200 level and both must be courses with the GER subject code.

Of the requirements listed above, the following rules apply:

- Six courses must be taken in the UO Department of German and Scandinavian.
- One course may be taken pass/no pass.

The following courses may not be used to satisfy major requirements:

Code	Title	Credits
GER 199	Special Studies: [Topic]	
GER 405	Reading and Conference: [Topic]	
GER 406	Practicum: [Topic] ¹	
GER 408	Workshop: [Topic]	
GER 409	Terminal Project	

- ¹ 4 credits of Practicum: Teaching Internship (GER 406) will satisfy a requirement for the major.

Since all courses are not offered every year, plans should be made well in advance so that students can take prerequisites for 300-level literature and culture courses and 400-level courses. Specific questions should be addressed to departmental undergraduate German advisors.

German and Scandinavian Studies Focus

German and Scandinavian studies is a focus for the German major offered by the Department of German and Scandinavian.

Requirements

The German and Scandinavian studies focus requires second-year language proficiency. Of the 48 credits beyond second-year language, at

least 24 must be in courses taught by the UO Department of German and Scandinavian; at least 44 must be taken for a letter grade.

Code	Title	Credits
16 upper-division credits in courses taught in German or a Scandinavian language ¹		16
16 additional upper-division credits in approved courses		16
16 additional lower- or upper-division credits in approved courses		16
Completion of an approved capstone project		
Total Credits		48

¹ Eligible courses in this category include GER 311–313, GER 340–341, GER 360–499, and SWED 405.

Approved Courses

- German (GER) and Scandinavian (SCAN) courses numbered 210–499
- Courses taken at a European university taught in German or a Scandinavian language above the second-year level
- Courses from the preapproved list, which count automatically toward the major and the minor: (EURO 415), German History: [Topic] (HIST 342), Europe in the 20th Century: [Topic] (HIST 428), (HIST 436), 16th-Century European Reformations (HIST 441), , Modern Germany: [Topic] (HIST 443), , The Jewish Encounter with Modernity (JDST 213), The Music of Bach and Handel (MUS 351), History of Philosophy: 19th Century (PHIL 312), 19th-Century Philosophers: [Topic] (PHIL 453), Shadows of Modernity (PS 312), European Politics (PS 324)
- Other courses taken as part of an approved thematic pathway

Thematic Pathways. These are recommended course lists that include a significant number of approved course options beyond those on the preapproved list. Students are strongly encouraged to follow a thematic pathway, culminating in a capstone project, in consultation with a faculty advisor. Details are posted on the department's website and are also available from the director of undergraduate studies.

Capstone Project. This is a piece of guided independent scholarly or creative work integrating knowledge acquired in courses for the major, typically as the culmination of a thematic pathway. It must be preapproved and either supervised or cosupervised by a faculty member in the department. This requirement typically will be met by a research paper of at least 15 pages or by a comparable scholarly or creative project in a 400-level course in an appropriate department, or through at least one credit of GER 401, 403, or 405; SCAN 401, 403, or 405; or SWED 401, 403, or 405. Work with non-English materials is strongly encouraged.

Double-Counting. Majors who seek an additional minor in either German or Scandinavian may count all credits for both. The same rule applies to minors who seek an additional major in either German or Scandinavian. Majors may not seek an additional major in either German or Scandinavian. The department encourages, and imposes no restrictions on, major or minor combinations with other programs.

Scandinavian Focus

Code	Title	Credits
One topical upper-division course from related field (advisor approved)		4
SWED 201–203	Second-Year Swedish (or the equivalent)	12
Eight Scandinavian literature or culture courses		32
Total Credits		48

Of the requirements listed above, the following rules apply:

- Three courses must be taken in the UO Department of German and Scandinavian
- One literature or culture course may be taken pass/no pass

Majors in Scandinavian must be proficient in Swedish at the third-year level, demonstrated either by evaluation by the Scandinavian advisor or by successful completion of work beyond Second-Year Swedish (SWED 203). Typically, this will occur through independent study in Reading and Conference: [Topic] (SWED 405), work with supplementary texts in advanced Swedish as extra requirements in the department's Scandinavian courses, and/or through study abroad in Scandinavia. Students should plan their course work carefully in consultation with a departmental undergraduate advisor in Scandinavian. They may also satisfy this requirement in Danish or Norwegian.

Honors

To earn a bachelor's degree with departmental honors, a student must maintain at least a 3.50 grade point average (GPA) and write an honors essay or thesis approved by the departmental honors committee for 4 credits in Thesis (GER 403).

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

German Minor

The German minor correlates well with studies that have an international or European concentration. It is particularly useful for students of global studies, international business, European history, medieval studies, sociology, political science, journalism, linguistics, philosophy, art history, music history, other languages, theater, and related fields.

German Minor Requirements

The German minor correlates well with studies that have an international or European concentration. It is particularly useful for students of Global Studies, international business, European history, medieval studies, sociology, political science, journalism, linguistics, art history, music history, other languages, theater, and related fields.

Code	Title	Credits
Four upper-division German courses ¹		16
GER 201	Second-Year German I	4
GER 202	Second-Year German II	4
GER 203	Second-Year German III	4
Total Credits		28

¹ May include courses in language, literature, or culture. Two courses taught in English may be applied to the minor in German. Grades of

at least C- or P (pass) must be earned in all courses used to satisfy requirements for the minor. One course may be taken pass/no pass. At least 12 credits must be taken in the UO Department of German and Scandinavian.

The following courses may not be used to satisfy minor requirements:

GER 408	Workshop: [Topic]	
GER 470		

German and Scandinavian Studies Minor

The German and Scandinavian Studies Minor is actually an *interdisciplinary* German and/or Scandinavian Studies Minor in which the student will normally choose to work on either German or Scandinavian, and then add to that linguistic-cultural focus courses from one other discipline or interest area (such as History, Cinema Studies, Philosophy, Global Studies, Art History, etc.) that overlaps with the German or Scandinavian world. A minor in German and Scandinavian Studies is a great choice for students interested in German and/or Scandinavian culture and history. Faculty members from the humanities, music, and social sciences who share a common interest in German and Scandinavian culture, letters, history, and society administer this program.

The influence of German and Scandinavian culture and letters on modern life is incalculable. In philosophy and religion; in sociology and psychology; in music; law; political science; and history, German-speaking thinkers have helped define our perception of the world.

German and Scandinavian studies is an interdisciplinary program offering undergraduates the opportunity to study these influences in context with the society and cultures that produced them. It combines advanced language training with an interdisciplinary program of literature courses offered in the Department of German and Scandinavian.

Minor in German and Scandinavian Studies

The German and Scandinavian studies minor requires second-year language proficiency. Of the 24 credits beyond second-year language, at least 12 must be in courses taught by the UO Department of German and Scandinavian; at least 20 must be taken for a letter grade.

Courses used to fulfill the minor requirements must be taken for letter grade and passed with a grade of C- or better.

Code	Title	Credits
	12 upper-division credits in courses taught in German or a Scandinavian language ¹	12
	8 additional upper-division credits in approved courses	8
	4 additional lower- or upper-division credits in approved courses	4
	Completion of an approved capstone project	
Total Credits		24

¹ Eligible courses in this category include GER 311–313, GER 340–341, GER 360–499, and SWED 405.

Approved courses are described in the Bachelor of Arts in German: German and Scandinavian Studies Focus section above.

Scandinavian Minor

You might want to study Scandinavian culture or learn Swedish to get in touch with your roots. Maybe your grandparents sang Nordic folk songs, baked delicious Danish pastries, or told tales about the old country. Maybe you've already traveled in Europe or want to learn about cultural differences and immerse yourself before doing so. Or you may want to build a career in a global business environment

Approximately 20 million people's mother tongue is a Scandinavian language, and notable Scandinavian literature spans a broad range from the beloved children's stories of Hans Christian Andersen to modern crime novels by Stieg Larsson. Scandinavian heritage permeates Western society, particularly in the areas of classical music, literature, science, philosophy, and theology.

Learning about other cultures fulfills the primary purpose of a university education—it will prepare you to reason, analyze, solve problems, and communicate in a world of widely differing cultures. The UO offers the only minor program in Scandinavian in Oregon. Classes are small and discussion-based with engaging activities designed to involve and engross students, with both group and individual writing assignments.

Assistant Professor **Gantt Gurley** says, "College is a time to learn to explore, to set boundaries and jump over boundaries that you won't have the luxury to do later on. Scandinavian studies sets up a larger configuration of European and cultural studies. It is about the life of the mind."

Minor in Scandinavian

The Scandinavian minor correlates well with studies that have an international or European concentration. It is particularly useful for students of international business, European history, sociology, political science, theater arts, and art history.

Code	Title	Credits
	Successful completion of one year of Swedish or equivalent	12
	Six Scandinavian literature or culture courses	24
Total Credits		36

Of the requirements listed above, the following rules apply:

- Three courses must be taken in the UO Department of German and Scandinavian
- One literature or culture course may be taken pass/no pass

Minors in Scandinavian must demonstrate basic aptitude in Swedish, demonstrated either by evaluation by the Scandinavian advisor or by successful completion of First-Year Swedish (SWED 103) with a grade of mid-C or better.

Specific questions about the Scandinavian minor should be addressed to departmental undergraduate advisors in Scandinavian.

German (MA)

The graduate program in German offers the master of arts (MA) in German, either through a regular two-year program or through a combined BA-MA program that enables students to complete the requirements for both the BA and the MA in German in five years. The program also offers the doctor of philosophy (PhD) degree in German, for which applicants may apply either with a BA or an MA already earned. The requirements for the PhD include one year of graded course work past the MA level and a written dissertation. The MA degree prepares students for teaching German language and culture up through the secondary-school level (in conjunction with teacher certification), while the PhD degree, as the highest degree in the field, is generally expected for an academic career involving both research and teaching.

The graduate curriculum acquaints students with the history of German letters (with a primary focus on modernity since the enlightenment), places this history in a European context, and provides tools for a critical analysis of the literary, theoretical, and cinematic discourses involved. The program encourages comparative, theoretically oriented work.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Language:** Students should attain the point where they can discuss literature and culture in German fluently in an advanced academic environment. In addition, they should be able to write a fluent 20-30 page essay in German on an academic literary topic.
- **Literature:** Students should be able to provide a general characterization of the history and shapes of all major genres (lyric, drama, and narrative) in the literature of the German language from the early Enlightenment through the post-World War II period. Students should also possess an overview of all major interpretive paradigms in literary studies since World War I. Beyond this general knowledge, students must be able to demonstrate mastery of the stakes of one genre across several periods of German literary history, mastery of the literature of one period in all genres, and mastery of at least one philosophical movement or interpretive paradigm. Mastery here includes broad knowledge and significant comprehension, as well as a basic overview of the scholarly literature on the subject.
- **Demonstrate mastery of the broader contours of German literary history** in terms of genres, periods, as well as of relevant theoretical paradigms and critical traditions.
- **Demonstrate effective oral and written scholarly communication skills** in English and German.
- **Demonstrate ability to conduct independent research and analysis** in German studies, following professional standards of writing and citation.
- **Present research in a professional setting**, such as a colloquium or a conference.

Core Curriculum

Students take one course each term. These courses are grouped according to common themes to give the program a topical and critical coherence. Core courses are paired with seminars of related or complementary content, and students are encouraged to explore connections between courses.

In the first year, core courses address a specific genre (narrative, drama, and lyric). While their content may vary with the instructor, they are

intended to present in general terms the history of the genre itself and of critical thinking about that genre. In the second year, core courses have less traditional themes and present a broader concept of textuality.

Code	Title	Credits
GER 621		
GER 622		
GER 623		
GER 624	¹	
GER 625	Translations-Transformations ²	4
GER 690	³	

¹ Acquaints students with important aspects of German philosophical discourse since Kant.

² Presents the theory and practice of translation. "Transformations" is added to suggest that translation is not limited to written texts (e.g., the sister arts, literature into film).

³ Various topics in research methodology, literary theory, history of German literature, and advanced methodology.

Beyond course work, the program features close mentoring, including guidance for developing portfolio papers that expand on writing done for courses, and, at the PhD level, a dissertation-writing colloquium in which students and faculty members join in responding to ongoing dissertation work by students in the program.

German (PhD)

The graduate program in German offers the doctor of philosophy (PhD) degree in German, for which applicants may apply either with a BA or an MA already earned. The requirements for the PhD include one year of graded course work past the MA level and a written dissertation. The PhD degree, as the highest degree in the field, is generally expected for an academic career involving both research and teaching.

The graduate curriculum acquaints students with the history of German letters (with a primary focus on modernity since the enlightenment), places this history in a European context, and provides tools for a critical analysis of the literary, theoretical, and cinematic discourses involved. The program encourages comparative, theoretically oriented work.

We work closely with the programs in Comparative Literature, Philosophy, Judaic Studies, and other related fields, and we encourage our students to take some courses outside the department in pursuit of their specific interests, as well as to obtain any of a broad number of interdisciplinary graduate certificates, such as those in New Media and Culture; Women's, Gender, and Sexuality Studies; Nonprofit Management; or Museum Studies.

Program's Admission Requirements

Please visit the program's website (https://insight.uoregon.edu/portal/academic_programs/?cmd=programcall&programid=91a71b32-1183-41d6-af97-a9f42c8d7549).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Literature and Culture -- Range:** Students should demonstrate the capacity to master a range of different specific topics within the

field of German literary and cultural studies, by writing at least three essays on diverse topics during their period of study.

- Literature and Culture -- Field Definition: Students should demonstrate a professional-level mastery of three literary-historical or literary-critical categories. This should include coverage of the primary literature, a strong knowledge base in the secondary literature, and a capacity to argue persuasively in written form for a given position on the category under consideration. Students should be able to design courses as well as answer questions in oral form on their chosen categories, so as to demonstrate their readiness to teach on the university level in the subfields defined by these categories.
- Literature and Culture -- Specialization: Students should demonstrate the capacity to develop a book-length argument of persuasively innovative character on a topic within the field of German literary and cultural studies (and related to at least one of the categories of focus under point 1 above). In addition, they should demonstrate the capacity to defend their written work orally--justifying the legitimacy of its argumentation in professional terms--in response to, and dialogue with, specific reasoned challenges and questioning.
- Demonstrate mastery of the full range of German literary history in terms of genres, periods, as well as of relevant theoretical paradigms and critical traditions.
- Demonstrate effective oral and written scholarly communication skills in English and German, as well as working knowledge in at least one additional language for research purposes.
- Demonstrate ability to conduct independent advanced research and analysis in German studies, following professional standards of writing and citation.
- Develop a professional profile through conference presentations and the submission of at least one article for publication.
- Contribute substantive and original work in the field in the form of a dissertation.

Humanities

Martha Bayless, Program Director

118 Prince Lucien Campbell Hall
1287 University of Oregon
Eugene, OR 97403-1287
541-346-3911
humanities@uoregon.edu

The Humanities Program offers general-education courses to students across the University. It also provides the opportunity for motivated and independently minded students to craft an individualized major with a humanistic orientation. Students working toward a Humanities major, which is designed in consultation with the program advisor, pursue their interests in a systematic and coherent way across several disciplines.

The curriculum of the Humanities Program provides opportunities for the student seeking intellectual coherence and integration, awareness of cultural contexts and traditions, and the connection of humanistic theory to practice. The program is pluralistic and multicultural in its vision and interdisciplinary in its approach. It is designed to provide essential skills and understanding for intelligent action and preparation for a wide range of careers.

The Humanities Program is committed to fostering an inclusive and diverse campus. Study of the humanities draws upon the many voices of the world in all their diversity, in time, in place, in gender, race, class, and age. The program welcomes all students and encourages the rational analysis of works of art and literature, and the reasoned expression of diverse points of view.

Program Committee

Katya E. Hokanson, comparative literature

Mary Jaeger, classics

Jeffrey S. Librett, German and Scandinavian

George J. Sheridan Jr., history

Michael Stern, German and Scandinavian

Lisa Wolverton, history

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Read critically and analyze texts from a variety of periods and cultures.
- Analyze critically a variety of cultural artifacts such as paintings, sculpture, architecture, and music.
- Show familiarity with the cultures that produced these texts and artifacts.
- Do research, write clearly, develop a coherent argument, and substantiate that argument with relevant evidence (citations of texts, references to cultural artifacts, etc.).
- Identify ideas that unite different disciplines.
- Understand issues of historical contingency and enculturation and, accordingly, be able to reflect critically on the thought systems (e.g. economic, political, religious) inculcated in our own culture.

Bachelor of Arts in Humanities

The humanities major is an interdisciplinary bachelor of arts (BA) degree program. Proficiency in at least one second language, a requirement for the BA degree, is central to the humanities major. Although majors are not required to do more than meet the BA requirement, it is strongly recommended that they continue language study in upper-division courses.

Grades of mid-C or better must be earned in courses taken to satisfy major requirements. For graduation, humanities majors must maintain at least a 2.00 grade point average (GPA) in required courses. No upper-division course may be used to satisfy more than one major requirement.

Humanities Major Requirements

Code	Title	Credits
Introductory Courses		
Option 1		8
Select two of the following:		
HUM 101	Introduction to the Humanities I	
HUM 102	Introduction to the Humanities II	
HUM 103	Introduction to the Humanities III	
Option 2

History (see Courses from Other Department below)		4
Concentration		
Seven upper-division courses in concentration ^{3, 4}		28
Total Credits		48-52

- ¹ Recommended for students who declare the major in the junior or senior year.
- ² At least two breadth requirement courses must be in the upper division.
- ³ Students must submit a brief essay defending the coherence of the concentration and outlining the seven courses they plan to take. No more than three of the seven courses may be taken in any one department.
- ⁴ Students are encouraged to take at least one Seminar (407) as part of their concentration.

Courses from Other Departments

Arts: Any course with an ARH, ART, MUP, MUS, or TA prefix.

Philosophy: Any course with a PHIL prefix excluding course(s) applied to Ancient World.

Ancient World: Any course with a CLAS prefix, (HIST 101), World History Antiquity to 1500 (HIST 104), Foundations of East Asian Civilizations (HIST 190), Precolonial Africa (HIST 325), History of Ancient Philosophy (PHIL 310), Early Judaism (REL 211).

History: Any course with a HIST prefix excluding course(s) applied to Ancient World.

Honors

Honors in humanities allows a student to focus on an area of concentration in a written thesis. Requirements are as follows:

- 1. Satisfaction of the requirements for the major
- 2. A grade point average of 3.50 or better in courses taken to meet the upper-division requirements of the major
- 3. A senior thesis of substantial quality, approved by the thesis director and at least one member of the program committee

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The interdisciplinary Harold Schnitzer Family Program in Judaic Studies provides a comprehensive undergraduate curriculum in the history, religion, and cultural traditions of the Jewish people and offers instruction in Hebrew language and literature. The program offers a major leading to a bachelor of arts (BA) degree and a minor. It sponsors courses, lectures, and other events of interest to the general student population and the wider community.

Faculty

Undergraduate Programs

Major - Bachelor's Degree

- Judaic Studies (BA) (p. 131)

Minor

- Judaic Studies (p. 133)

Judaic Studies (BA)

Students from many different backgrounds and diverse interests benefit from learning more about the history of Western civilization through the perspective of Judaic studies. The Harold Schnitzer Family Program in Judaic Studies offers both a major and a minor for students. The program emphasizes the history, religion, and civilization of the Jewish people,

as well as two years' proficiency in Hebrew language and literature. The major is interdisciplinary, meaning undergraduates can take courses from a variety of departments that appeal to their unique interests. Students graduate with both advanced language skills and an increased awareness of diverse cultures and traditions.

The Judaic studies program consists of core courses taught under the HBRW, JDST, and REL subject codes and related courses taught in the disciplines of participating faculty members—anthropology, art history, comparative literature, conflict and dispute resolution, English, geography, folklore and public culture, German and Scandinavian, history, landscape architecture, music, philosophy, political science, religious studies, Romance languages, and women's and gender studies.

The focus on Jewish cultures and experience as a lens to study the world provides a liberal arts background suitable to careers in a range of professional fields (law, education, rabbinate, social service, public policy) and prepares students for graduate work in Judaic studies, religious studies, and related fields.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Obtain B2 language proficiency in Modern Hebrew (CEFR); identify and explain the significance of language in assessing Jewish culture(s).
- Identify, describe and explain Jewish experiences, achievements, and challenges in various historical, social, religious, political, and cultural contexts.
- Identify and analyze Jewish aesthetic and cultural artifacts and be able to contextualize them and critically discuss their connection to other disciplines, i.e., political science, anthropology, literary theory, etc.
- Read and critically analyze primary sources and current scholarly literature, applying appropriate theoretical and methodological tools in the academic study of Judaism and Jewish culture.
- Make an effective and valid argument in speech and writing: one that successfully establishes a premise and critically supports that premise with appropriate and persuasive scholarly evidence.
- Knowledge of major historical figures, writers and other cultural figures and ability to evaluate and discuss them/their work.
- Critically understand the difference between the American Jewish experience and the Jewish experience in other nations.
- Identify, describe and explain materials, terminologies, and methodologies in literature, film and media pertaining to the field.

Judaic Studies Major Requirements

Courses used to fulfill the major requirements must be taken for letter grade and passed with a grade of C+ or better. A maximum of two courses can be overlapped with another major or minor (up to 8 credits).

Code	Title	Credits

Total Credits		48

Honors in Judaic Studies

A degree with honors in Judaic studies requires the following:

1. Satisfaction of the requirements of the major
2. A cumulative grade point average of 3.50 in courses taken to satisfy the major requirements
3. Satisfactory completion of an honors thesis

The candidate for honors must register for 4 credits in Research: [Topic] (JDST 401) winter term of the senior year in order to prepare for writing the thesis, and for 4 credits in Thesis (JDST 403) spring term for its completion. A faculty committee of two supervises the project. A first draft of the thesis must be submitted six weeks before the end of the term in which the student expects to graduate and the final draft two weeks before the end of the term.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Linguistics

<http://linguistics.uoregon.edu>

Vsevolod Kapatsinski, Department Head

367 Straub Hall
1290 University of Oregon
Eugene, OR 97403-1290
541-346-3923

Students and Faculty in the Department of Linguistics study language in all its forms: how it's used, how it's acquired, how it changes, and what it means. Our work lies at the intersection of cognition, culture, and computation, and our coursework and research experiences combine language with culture and society; action and cognition; and computation and learning.

We offer a major and a minor in Linguistics. These combine linguistic coursework with language courses. We also offer a minor in Interdisciplinary Cognitive Science and provide special emphasis courses for the Data Science major. As an interdisciplinary field, Linguistics combines well with majors or minors from a variety of other disciplines — from Romance Languages to Data Science, Psychology to Computer

Science, and Sociology to Communication Disorders and Sciences, to name but a few.

Students can also earn a certificate in Second Language Acquisition and Teaching (SLAT) as a starting point for careers in language teaching.

Faculty

B. Mokaya Bosire, associate teaching professor (Swahili). BA, 1991, MA, 1993, Nairobi; PhD, 2008, State University of New York, Albany. (2012)

Don Daniels, associate professor (languages of Papua New Guinea, language change and reconstruction, linguistic fieldwork, morphosyntax). BA, 2006, Dartmouth College; PhD, 2015, California, Santa Barbara. (2018)

Spike Gildea, professor (language description, diachronic syntax, typology, phonology, comparative linguistics, field methods and ethics, Cariban and other South American languages). BA, 1983, MA, 1989, PhD, 1992, Oregon. (2000)

Nika Jurov, assistant professor (computational psycholinguistics, cognitive science, speech, computational neuroscience). BA, 2008, MA, 2019, University of Paris; PhD, 2024, University of Maryland. (2025)

Vsevolod Kapatsinski, professor (psycholinguistics, corpus linguistics, experimental morphology and phonology, language learning in the lab). BA, 2003, MA, 2005, New Mexico; PhD, 2009, Indiana. (2009)

Kristopher Kyle, associate professor (second language acquisition, language assessment, natural language processing, second language writing). BA, 2005, Harding; MA, 2011, Colorado State; PhD, 2016, Georgia State. (2019)

Gabriela Pérez Báez, associate professor (language documentation and description, language revitalization, semantic typology, language and cognition, Zapotec languages). BFA, 1997, MA, 2005, PhD 2009, State University of New York, Buffalo. (2018)

Melissa Redford, professor (phonetics, laboratory phonology, psycholinguistics, cognitive science). BA, 1992, California, Berkeley; MA, 1995, PhD, 1999, Texas, Austin. (2002)

Julie M. Sykes, professor (second language acquisition, interlanguage pragmatics, transformative pedagogy). BA, 2001, MA, 2005, Arizona State; PhD, 2008, Minnesota. (2016)

Guillem Belmar Viernes, assistant professor (language revitalization, language documentation and description, language rights, minority multilingualism, indigenous diaspora). BA, 2013, Universitat Autònoma de Barcelona; MA, 2017, Universidad Nacional de Educación a Distancia; MA, 2019, Rijksuniversiteit Groningen; PhD, 2024, California, Santa Barbara. (2024)

Keli D. Yerian, teaching professor (language teacher education, curriculum development, gesture in discourse); director, Language Teaching Specialization MA Program. BA, 1991, North Carolina, Chapel Hill; MS, 1994, PhD, 2000, Georgetown. (2007)

Emeriti

Scott DeLancey, professor emeritus. BA, 1972, Cornell; PhD, 1980, Indiana. (1982)

T. Givón, professor emeritus. BSc, 1959, Jerusalem; MS, 1962, MA, 1966, PhD, 1969, California, Los Angeles. (1981)

Doris L. Payne, professor emerita (morphology, syntax, semantics, discourse; Amerindian and African languages). BS, 1974, Wheaton; MA, 1976, Texas, Arlington; PhD, 1985, California, Los Angeles. (1987)

Cynthia M. Vakareliyska, professor emerita. BA, 1973, Princeton; JD, 1976, Columbia; PhD, 1990, Harvard. (1994)

Participating

Gregory D. Anderson, linguistics

Dare A. Baldwin, psychology

Robert L. Davis, Romance languages

Robert Elliott, Northwest Indigenous Language Institute

Devin Grammon, Romance languages

Kaori Idemaru, East Asian languages and literatures

Zhuo Jing-Schmidt, East Asian languages and literatures

Mark Johnson, philosophy

Tyler Kendall, Linguistics

Nayoung Kwon, East Asian languages

Thomas E. Payne, Linguistics

Trish Pashby, Linguistics

Janne Underriner, Northwest Indigenous Language Institute

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

- Linguistics (BA/BS) (p. 135)

Minors

- Interdisciplinary Cognitive Sciences (p. 137)
- Linguistics (p. 136)

Certificate

- Second-Language Acquisition and Teaching (p. 138)

Graduate Programs

Major - Master's Degree

- Language Teaching Studies (MA) (p. 139)
- Linguistics (MA) (p. 140)

Major - Doctoral Degree

- Linguistics (PhD) (p. 141)

Linguistics (BA/BS)

<http://cas.uoregon.edu/linguistics/undergraduate-programs> (<http://cas.uoregon.edu/linguistics/undergraduate-programs/>)

Language is with you all day, every day of your life—it is central to the human experience. You use language to think, to learn new things, to get things done, to share your heart, and to engage with others more generally. In the Linguistics Department, you will be introduced to the science of language in a high-powered and welcoming research community. You will learn all about how language works, how it is learned, how it varies from society to society, and how it changes over time.

Work in linguistics cultivates key intellectual abilities: analytical skills, data analysis skills, reasoning and argumentation, and written and oral communication skills. A degree in linguistics prepares students for professions and further training in any number of areas that value these abilities. Those who pursue degrees in linguistics frequently go on to pursue careers in teaching (e.g., foreign language or ESL teaching in the US or abroad), the tech industry (e.g., software development and testing, speech analysis and synthesis), health sciences (e.g., speech-language pathology), or national security.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Perform basic acoustic analyses of recorded speech sounds.
- Discover the phoneme inventory and basic phonotactic structure in a sufficiently large set of phonetically transcribed words.
- Analyze the morphological and syntactic constructions in a sample of glossed linguistic data.
- Design a laboratory or field research project in some area of linguistics.
- Read and demonstrate an understanding of current research literature in areas of linguistics taught in our program.

Linguistics Major Requirements

Code	Title	Credits
Core Courses		
LING 301	Introduction to Linguistics Analysis	4
LING 302	Introduction to Linguistic Behavior	4
LING 311	Phonetics and Phonology	4
LING 312	Morphosyntax	4
Specialization Courses		20
LING 411	Phonetics	
LING 415	Semantics	
LING 416	Language and Cognition	
LING 430	Research Methods for Applied Linguistics	
LING 431	Statistical Methods in Linguistics	
LING 435	Advanced Morphology	
LING 444	Second-Language Acquisition	
LING 450	Introduction to Phonology	
LING 451	Advanced Syntax	
LING 460	Historical Linguistics	
LING 491	Sociolinguistics	
LING 493	Corpus Linguistics	

Seminar	4
EALL 407 Seminar: [Topic]	
LING 407 Seminar: [Topic]	
Electives	4
Any 200-level or greater LING course ¹	
Total Credits	44

¹ Excludes LING 403

Additional Requirements

Two years of one second language and one year of another.

Courses applied to the major in linguistics must be taken for letter grades. A course in which a grade of D+ or lower is earned cannot count toward the major.

The study program of undergraduate linguistics majors must be approved by a departmental undergraduate advisor.

Honors in Linguistics

By fulfilling the following requirements, any linguistics major may graduate with honors.

Grade Point Average

On entry to the honors program at the end of the junior year, a grade point average (GPA) of 3.75 or better in linguistics courses and at least 3.50 overall is required. At the end of the senior year, a GPA of 3.75 or better in linguistics courses is required.

Senior Thesis

Write an original honors thesis under the guidance of a thesis advisor from the linguistics faculty, chosen in consultation with the undergraduate advisor. The thesis must be a substantial piece of work; it may be a revised and expanded term paper. The thesis advisor determines whether the thesis is acceptable; the student is required to register for at least 6 credits in Thesis (LING 403), taken pass/no pass, over the course of at least two terms.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Linguistics

Course	Title	Credits	Milestones
First Year			
Fall			
WR 121Z	Composition I	4	
First term of 1st-year second-language sequence		4-5

Credits	16

Total Credits	195-201

Linguistics Minor

Linguists study how languages are used and structured by societies, how they are learned and processed by individuals, and how they change over time in society and the individual. Faculty in the UO Department of Linguistics have research interests that extend into the areas of speech-language pathology, psychology, anthropology, and the maintenance and revitalization of endangered languages. The Department offers a minor in linguistics which gives the student both a grounding in the basis of linguistic analysis and the opportunity to pursue areas of special interest.

The undergraduate minor requirements changed in Fall of 2020. Students admitted to the minor before Fall of 2020 can choose to follow the current degree requirements or the previous minor requirements. The Linguistics Department website provides more information.

Linguistics Minor

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits
Required Courses:		16
LING 301	Introduction to Linguistics Analysis	
LING 302	Introduction to Linguistic Behavior	
LING 311	Phonetics and Phonology	
LING 312	Morphosyntax	
Electives ¹		12
LING 201	Language and Power in the United States	
LING 211	Languages of the World	
LING 225	Writing Systems

LING 450	Introduction to Phonology	
LING 451	Advanced Syntax	
LING 455	Linguistic Research: [Topic]	
LING 460	Historical Linguistics	
LING 491	Sociolinguistics	
LING 493	Corpus Linguistics	
LING 494	English Grammar	
Total Credits		28

¹ Two electives must be taken at the 400+ level courses. The third must be taken at the 200+ level.

Language Requirement

The language requirement for the minor is the same as the language requirement that is required for the Bachelor of Arts at the UO. See the UO Academic Policies (<http://uocatalog.uoregon.edu/admissionto graduation/bachelorrequirements/>); scroll down to the "Bachelor of Arts Requirements" for an explanation of the BA second language requirement.

Interdisciplinary Cognitive Science Minor

What does it mean to think? How does our thought affect the way we interact with the world, and how do our experiences shape our thought? The Interdisciplinary Cognitive Sciences minor will introduce you to questions related to human (and non-human) cognition, thought, and consciousness. You will take courses from a wide variety of disciplines, all of which will help you wrestle through the relationships between thought, language, and the mind. The minor culminates with a capstone course that will let you synthesize everything you have learned and then propose an independent research project in cognitive science.

Admission Information

Students must meet with the Director of Undergraduate Studies in Interdisciplinary Cognitive Science and fill out the qualtrics form to declare.

Minor in Interdisciplinary Cognitive Sciences

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits
One course from each of the following core disciplines:		12
Linguistics		
LING 294	Child Language	
LING 302	Introduction to Linguistic Behavior	
LING 416	Language and Cognition

PHIL 403	Thesis	
PSY 403	Thesis	
Total Credits		28

¹ One additional course from one of the aforementioned disciplines (depth requirement). Note: If majoring in one of the three disciplines, this depth course must be in one of the disciplines outside of the major.

² Another department/course in consultation with advisor.

³ At least 12 credits must be upper division.

Additional Requirements

At least 16 credits must be taken in residence, including the upper division capstone course and 8 other upper division course credits.

Second Language Acquisition and Teaching Certificate

<http://slat.uoregon.edu>

In collaboration with several UO departments, the Department of Linguistics offers an undergraduate certificate that focuses on the theory of second-language acquisition and teaching and its application in pedagogical settings. The certificate complements any other major.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge of current linguistic and educational research and theory in the fields of Second Language Acquisition (SLA) and Second Language Teaching (SLT).
- Demonstrate critical understanding of influential current and historical methodological frameworks in language teaching.
- Successfully review, organize, synthesize, and critically evaluate appropriate scholarly sources, as well as demonstrate the ability to apply these to the development of their teaching materials.
- Demonstrate the ability to evaluate, adapt, and apply pedagogical techniques in principled and innovative lesson planning according to varied contextual and learner factors.
- Demonstrate sensitivity to the needs of culturally and linguistically diverse learners through differentiation and universal design of materials and practices.
- Demonstrate the ability to apply research and analysis of specific linguistic and cultural phenomena (i.e. of the chosen target language) to their own design of materials and practices.
- Demonstrate the ability to put key principles derived from current SLA/SLT research into embodied practice within actual teaching contexts, including the appropriate use of classroom management and leadership skills.

Students must complete a total of 36 credits (must include 24 upper-division credits) with 12 credits at the 400 level.

Code	Title	Credits
Three courses on second language acquisition and teaching:		12
LING 444	Second-Language Acquisition	
LT 435	Language Learning Design

¹ A substitute course may be accepted with advisor's approval

² If you would like to compose a SLAT certificate for other languages taught at UO, contact the SLAT Director, Dr. Keli Yerian at yerian@uoregon.edu

Language Teaching Studies (MA)

The University of Oregon Master of Arts (MA) degree program in Language Teaching Studies is an 11-month intensive graduate degree designed to prepare leaders in the field of language teaching and learning. A unique feature of this program is that participants are able to specialize in more than one language, including majority languages such as English and minoritized languages such as the indigenous languages of the Pacific Northwest.

The MA in Language Teaching Studies focuses on transformational approaches to language instruction through innovation in curriculum, pedagogy, materials development, digital technologies, and assessment, including how evidence-based principles and practices can be adapted across a wide range of language learning contexts. The program is particularly sensitive to the evolving needs of both majority and minority language learners in this era of globalization and internationalization.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge of current linguistic and educational research and theory in the fields of Second Language Acquisition (SLA) and Second Language Teaching (SLT). Students demonstrate understanding of how this research and theory applies to their own areas of focus in second language, world language, or indigenous language teaching and learning.
- Demonstrate critical understanding of influential current and historical methodological frameworks in language teaching, as well as demonstrate the ability to evaluate, adapt, and apply pedagogical techniques drawn from these frameworks in principled and innovative lesson planning, according to contextual need.
- Recognize, value, and integrate instructional, curricular, and learner initiated elements related to culture, interaction, and pragmatics within their teaching practices. Students will be able to value and integrate elements of text and performance as they pertain to literature and multiliteracies.
- Demonstrate ability to apply key principles derived from current SLA and SLT research, standards, and practice to curriculum design, course design, materials design, and assessment design in empirically grounded and innovative ways.
- Demonstrate the ability to apply key principles derived from current SLA/SLT research and practice to effective incorporation of digital technologies into their plans and teaching.
- Demonstrate the ability to put key principles derived from current SLA/SLT research into embodied practice within actual teaching contexts, including the appropriate use of classroom management and leadership skills.

- Successfully review, organize, synthesize, and critically evaluate appropriate scholarly sources, as well as demonstrate the ability to apply principled small-scale needs analysis research methods and appropriate data collection techniques for the development of their teaching and curriculum materials.
- Demonstrate sensitivity to the needs of culturally and linguistically diverse learners through differentiation of curricula and practice.
- Demonstrate flexibility and innovation in the face of the various sociocultural and contextual factors impacting language instruction.
- Demonstrate autonomy and initiative in their own professional development, including welcoming peer and faculty mentoring, engaging in teamwork, and adapting to the dynamic nature of the language-teaching field.

Only graded courses may be used to satisfy degree requirements. Exceptions must be approved by the department. No course with a grade lower than B- may be used to satisfy degree requirements.

Master of Arts in Language Teaching Studies

Code	Title	Credits
LING 530	Research Methods for Applied Linguistics	4
LT 534	Language Learning in Context	4
LT 536	Design for Learning Language Systems	4
LT 537	Second-Language Teaching Practice	4
LT 538	Design for Language Learning Pragmatics	4

LING 544	Second-Language Acquisition	4
LT 630	Curriculum and Materials Development	5
LT 631	Measuring Language Ability	5
LT 611	Terminal Project	5
Internship and Reading ¹		4
LT 604	Internship: [Topic]	
LING 605	Reading and Conference: [Topic]	
Total Credits		47

¹ Course selection must be approved by program director before enrollment in Internship: [Topic] (LING 604) and Reading and Conference: [Topic] (LING 605).

Electives

Students working towards an MA degree can take additional optional elective course work, which may include any language or education related coursework, internships, or supervised tutoring or teaching opportunities. Students who have already taken any of the required courses or their equivalents previous to entering the LTS program should replace them with elective credits in consultation with the LTS Director.

Courses that can count as electives include:

- Additional LT courses or seminars
- Graduate level courses in other language departments (such as Romance Languages or East Asian Languages and Literatures)
- Courses in the College of Education, International Studies, Psychology, and others

Internships are arranged on an individual basis in a range of language teaching or curriculum developing contexts. Students

can intern in language classrooms or participate in curriculum or materials development at the American English Institute (<https://aei.uoregon.edu/>) (AEI) at all levels, at Lane Community College (<https://www.lanecc.edu/>), in various Foreign Language classes at the UO or LCC, at the Center for Applied Second Language Studies (<https://casls.uoregon.edu/>) (CASLS), and in K-12 classrooms in the Eugene area, for example in the Chinese Immersion School. Classroom internships involve observation, assisting, and some teaching under the supervision of a cooperating teacher. LTS students can also earn internship credit through tutoring UO FL and ESL students individually, such as through the UO Writing Lab (<https://engage.uoregon.edu/tutoring/>), if the tutoring is part of a supervised program.

Language Requirement

All graduate students are required to either a) have taken at least two years of one additional language within the past seven years either before or by the time they graduate with the MA, or b) pass a proficiency test at an intermediate level or above in an additional language (administered at the UO). At the MA level, any additional language is acceptable, including English as an additional language for relevant international students.

Master's Project

All LTS students complete a final Master's Capstone Portfolio Project in the final Summer term. Projects are individual portfolios of materials designed during the program. It is presented in a public forum during the final term.

Master's Project

Students working toward the Language Teaching Studies MA degree must complete a master's project over two consecutive terms. The project topic must be approved by the faculty advisor, and be presented in an LT 611 class session during the final term.

Linguistics (MA)

Admissions

Students apply through the same procedure and application as for the PhD program in linguistics but specify that they are interested in the MA in linguistics. Students are required to submit a statement of purpose describing their interest in the program, goals for their time in the program and the faculty with whom they would like to work, a writing sample (such as a substantial term paper), any transcripts showing relevant coursework, and three recommendation letters. GRE scores are optional.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Be able to analyze and describe the structure of an unfamiliar language from provided and prepared data
- Be able to test the psychological reality of a pattern experimentally
- Acquire in-depth knowledge of functional and usage-based approaches to the core areas of linguistics (phonology, syntax and semantics)
- Acquire the methodological skills and command of the literature in a research area to complete an empirical study in linguistics

- Be able to describe the grammatical patterns that occur in languages of the world, how common they are and where they come from

Elective Courses		
Graduate-level linguistics or other relevant courses ²		24
Total Credits		48

¹ Or another seminar (course requiring reading primary literature and evaluated with a research term paper) in linguistics, chosen in consultation with your advisor

² Select electives in consultation with department's director of graduate studies and the student's faculty advisor.

No course with a grade lower than B– may be used to satisfy degree requirements.

Second-Language Requirement

Candidates for the MA are required to have taken at least two years of one second language within the past seven years. At the MA level, any foreign language is acceptable, including English for an international student whose first language is not English. It should be noted that the MA language may count toward the two language requirements for the PhD program if the language is used as a research language (see PhD requirements below).

MA Thesis or Substitute

Students in good standing may form an MA committee consisting of two linguistics faculty members who indicate their agreement to serve by signing a standard form and who share equal responsibility for directing the thesis. For the MA to be granted, both members of the committee must approve the thesis and the main content of the thesis must be presented as a departmental colloquium.

Linguistics (PhD)

The doctor of philosophy (PhD) program in linguistics is individually tailored to meet the needs and professional goals of the student, drawing strong interdisciplinary support from related fields at the university. These fields may include—but are not limited to—anthropological linguistics, cognitive science, communication disorders and sciences, discourse and text analysis, English linguistics, first- and second-language acquisition, language-data processing, neurolinguistics, and sociolinguistics.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Conduct independent research and advance knowledge in area of specialization.
- Write technical papers that are of sufficiently high-quality to merit publication in scholarly journals.
- Demonstrate mastery in at least 2 core areas of linguistics sufficient to teach lower division courses in linguistics.
- Demonstrate mastery of current theory, literature, research methods, and data management in area of specialization sufficient to teach upper-division and graduate-level courses in linguistics.
- Demonstrate clear understanding of the principles of ethical research in area of specialization and adhere to these principles when conducting research.

Linguistics Major Requirements

Students must complete at least 81 graduate credits, of which at least 18 must be dissertation research credits. As part of the requirements for completing the PhD, students must also take at least (30) credits of approved courses for the Linguistics PhD outlined below. The remaining (33) required graduate credits (considered below to be “electives”) may be fulfilled from a variety of course codes, areas, and departments, but these should all be approved and discussed with the student’s doctoral advisor beforehand.

Required Courses

Code	Title	Credits
Select two of the following:		8
LING 616	Linguistic Theory: Semantics	
LING 615	Linguistic Theory: Syntax	
LING 614	Linguistic Theory: Phonology	
Select two courses out of the following:		10
LING 507	Seminar: [Topic]	
LING 607	Seminar: [Topic]	
Equivalent seminar courses		
Three methods courses such as field methods, corpus linguistics, statistical methods in linguistics, or research methods in applied linguistics.		12
LING 531	Statistical Methods in Linguistics	
LING 593	Corpus Linguistics	
and other courses in quantitative methods		
LING 530	Research Methods for Applied Linguistics	
and other courses in applied research methods		
Combination of courses from these areas		
Dissertation		18
LING 603	Dissertation	
Electives		33
Total Credits		81

The course work must be approved by the student's doctoral advisor. Even those students who have already earned an MA degree are typically expected to complete all MA degree course work requirements at Oregon as part of the normal progress toward the PhD.

For each student, the specific courses are to be determined by the student's advisor and the department's director of graduate studies, as are all other courses required for the PhD. No course with a grade lower than B– may be used to satisfy degree requirements. Candidates for the PhD must demonstrate proficiency equivalent to two years of college-level study of a second language and either proficiency equivalent to one year in a third research-related language or proficiency in programming or statistics to be advanced to candidacy.

Residency Requirement

The Division of Graduate Studies requires at least three years of full-time work beyond the bachelor's degree for the doctorate, with at least one year spent in continuous residence on the Eugene campus. The Department of Linguistics interprets the latter requirement to mean that at least six courses, including seminars, must be taken in the program while the student is in continuous residence for three academic terms.

Doctoral Advisor

The department head appoints a doctoral advisor for each student upon admission to the PhD program.

Second-Year Review

By the end of a doctoral student's second year, he or she shall be given a review by the faculty members at a department meeting. Materials submitted by the student to the department for this review must include the following:

1. A report that includes a research plan for the next year's course work, potential topics for the two qualifying papers, a statement about

the student's career plans beyond the doctoral degree (and how the specific qualifying paper and thesis topics are relevant), and any other details worked out in consultation with the student's advisor

2. A curriculum vitae (CV)
3. Written evidence of research progress and scholarly potential, such as a substantive term paper or revision of a term paper that demonstrates excellence of original research or a linguistics master's thesis; the materials must be submitted to the Department by April 15

Following review of these materials, the faculty members decides either to *accept* or *deny* the student for continued study in the PhD program. In some cases, a probation year may be granted for a student's third year of study; the review process is repeated at the end of the third year with an *accept* outcome the only possibility for continued study.

As soon as possible after completion of the review, a letter to each graduate student under review is issued by the director of graduate studies informing the student of his or her status and, in the case of a one-year probation, specifying the conditions that must be met for a successful outcome during the additional third-year review. The language of the probation conditions is drafted by the student's doctoral advisor and the director of graduate studies. The director may also meet with any students who are denied continued study or who are granted probation.

Annual review

Beginning in the third year of the program, each graduate student must submit an annual report and CV to his or her advisor by April 15 of each year. The report should be no more than one page in length and should detail what the student has accomplished over the past year in the program.

Doctoral Examination and Advancement to Candidacy

Requirements for the Qualifying Paper

The doctoral examination consists of two original publishable papers (QPs) in different subfields of linguistics. The term "different subfields" may include two different methodological approaches to a single broad topic. Acceptance of a QP indicates that the review committee has deemed the paper to constitute sufficient evidence for the student's readiness to perform PhD-level research and write a dissertation. Submission of both QPs for publication is required before the student can advance to candidacy. The publishing venue may be a refereed journal, a refereed or nonrefereed conference proceedings volume, an online publication, or another venue. While submission of each qualifying paper to a publishing venue is required for advancement to candidacy, acceptance for publication is not a requirement.

An unmodified MA thesis cannot serve as one of the qualifying papers. A qualifying paper may be, however, a publishable expansion or revision of an MA thesis or publishable term paper written for a course conducted by any faculty member in the department or, where deemed reasonable, for a course conducted by a faculty member outside the department. The paper may be written under the supervision of either the student's advisor or another faculty member in consultation with the student's advisor, who approves the topic and the final version before submission to the QP Coordinator.

Doctoral Dissertation

A doctoral committee must include at least three linguistics faculty members and one outside member, and must be either chaired or cochaired by the student's doctoral advisor in linguistics. A dissertation prospectus must be submitted to and approved by the doctoral committee before the writing of the dissertation commences. The PhD will be granted upon completion of the preceding requirements, the writing of an original dissertation acceptable to the doctoral committee, and an oral examination on the dissertation.

Medieval Studies

<http://medieval.uoregon.edu>

Stephanie Clark, Director

118 Prince Lucien Campbell Hall

medieval@uoregon.edu

Medieval studies, an interdisciplinary undergraduate program, integrates various approaches to the Middle Ages by medievalists in diverse departments. Medieval studies provides an excellent general education or a solid base for graduate work in a more specialized area. Study abroad is strongly encouraged.

Medieval studies concentrates on the period from 300 to 1500, combining courses in art and architecture, history, language, literature, music, philosophy, and religion. A course of study might include literature from medieval England, Iceland, China, and Japan; Gothic art and architecture; Vikings and Crusades; religion, such as early Christianity, Judaism, and Islam; medieval languages like Latin and Old English; and cultural topics like gender in the cultures of the period. The program aims to provide a comprehensive introduction to the medieval worldview in Europe and beyond, and the origins of the modern world.

Participating Faculty

Ina Asim, history

Martha J. Bayless, English

Louise M. Bishop, honors college, EMERITA

Stephanie Clark, english

Rick Colby, religious studies

Stephen Dueppen, anthropology

Andrew E. Goble, history

Deborah A. Green, judaic studies

D. Gantt Gurley, german and scandinavian

David Hollenberg, religious studies

Maile Hutterer, history of art and architecture

Mary Jaeger, classics

Lori Kruckenberg, music

Charles H. Lachman, history of art and architecture, EMERITUS

C. Anne Laskaya, english

Eric Mentzel, music

Stephen J. Shoemaker, religious studies

Mark T. Unno, religious studies

Cynthia M. Vakareliyska, linguistics, EMERITA

David Wacks, romance languages

Lisa Wolverton, history

Undergraduate Programs

Major - Bachelor's Degree

- Medieval Studies (BA) (p. 143)

Minor

- Medieval Studies (p. 144)

Medieval Studies (BA)

Medieval studies, an interdisciplinary undergraduate program, integrates various approaches to the Middle Ages by medievalists in diverse departments. Medieval studies provides an excellent general education or a solid base for graduate work in a more specialized area. Study abroad is strongly encouraged.

Medieval studies concentrates on the period from 300 to 1500, combining courses in art and architecture, history, language, literature, music, philosophy, and religion. A course of study might include literature from medieval England, Iceland, China, and Japan; Gothic art and architecture; Vikings and Crusades; religion, such as early Christianity, Judaism, and Islam; medieval languages like Latin and Old English; and cultural topics like gender in the cultures of the period. The program aims to provide a comprehensive introduction to the medieval worldview in Europe and beyond, and the origins of the modern world.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify materials, terminologies, and methodologies within one or more following areas of study focused on the Middle Ages: art history; languages and literatures; history; religious studies and religious backgrounds to medieval culture; music history and performance; cross-cultural contacts and borrowings; classical backgrounds for medieval culture.
- Analyze primary material from the Middle Ages, explaining what specific features in the primary text/object carry medieval cultural content. (This can include focus, meaning, formal features, aims, assumptions, and purposes evident in the primary material.)
- Critically assess and interpret primary and secondary sources.
- Recognize and evaluate the cultural phenomena of the medieval world and their relationship to the modern world.
- Synthesize an argument from textual or other evidence and express it in formal prose. (Write organized, well-structured, clear essays that make use of evidence to advance assertions and a main thesis.)

Bachelor of Arts Degree Requirements

Medieval studies majors must complete twelve medieval courses in at least three departments with a grade of mid-C or better. At least 24 credits must be in upper-division work. Two years of Latin are recommended for those who want to do graduate work in medieval studies. See the program website for more information.

Honors in Medieval Studies

A degree with honors in medieval studies allows a student to focus on an area of concentration in a written thesis. Requirements are as follows:

1. Satisfaction of the requirements for the major
2. A grade point average of 3.50 or better in courses taken to meet the upper-division requirements of the major. A minimum cumulative UO grade point average of 3.00
3. A prospectus for the thesis approved by both the thesis director and the program director. The prospectus must be submitted no later than week seven of the term before the student plans to complete the honors project. When the prospectus has been approved, the student and thesis director will agree on a schedule of submission of work
4. A senior thesis of substantial quality, representing new or substantially new work beyond any project or paper submitted within other university courses, approved by the thesis director and at least one other member of the medieval studies participating faculty. The thesis must be complete and ready for public presentation no later than week seven of the fall, winter, or spring term
5. **A presentation of the project.** The student presents the honors project to students and faculty members and participates in an open discussion of the project with the audience. Presentations typically occur in weeks seven through ten of fall, winter, or spring terms and are arranged in consultation with both the director of the Medieval Studies Program and the student's thesis advisor
6. Honors in medieval studies are not given for substantially the same project or paper submitted for honors to any other unit in the university. Departmental honors theses shall be written exclusively for honors in medieval studies
7. Students normally enroll in at least one but no more than two terms of Thesis (MDVL 403). Enrollment in Thesis is not required but is recommended. Thesis credits cannot serve to fulfill the minimum major requirements

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Medieval Studies Minor

The Medieval Studies minor offers students an extensive curriculum which includes the Christian, Judaic, and Islamic Middle Ages, as well as courses in feudal Japanese culture and East Asian Art and religious traditions. Students gain deeper historical and cultural knowledge that contextualizes modern political and cultural developments and encourages cross-cultural connections. Courses are offered via a variety of departments, from philosophy, literature, and history to art, architecture, and music, grounding students' learning in a variety of disciplinary approaches.

Minor Requirements

Students who want a minor in medieval studies must complete seven medieval courses in at least two departments.

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Suggested Courses

Students should plan their programs as early as possible with the aid of a medieval studies faculty advisor. With the advisor's consent, courses numbered 199, 399, 405, 407, 408, or 410 may be substituted for suggested courses. At least five of the courses must be taken at the University of Oregon. More information is available from the medieval studies office or from the Medieval Studies Program director.

Philosophy

<http://philosophy.uoregon.edu>

Scott Pratt, Department Head

239 Susan Campbell Hall
1295 University of Oregon
Eugene, OR 97403-1295
541-346-5549
uophil@uoregon.edu

Philosophy asks fundamental questions about human identity, the nature of knowledge and reality, moral virtue and responsibility, the nature of community and political authority, aesthetic judgments and values, and other concepts central to the meaning and value of human existence. Through the study of primary texts and concrete issues, drawn from various historical periods and cultures, philosophy provides a means for reflection on actions, beliefs, and values while developing critical thinking, reading, and writing skills. Philosophy also strengthens the ability to reason, enlarges the imagination, and refines aesthetic sensitivity. A philosophical education thus offers excellent preparation for a broad range of careers that require critical intelligence and creative problem-solving as well as oral and written communication skills.

Offering both graduate (Ph.D. and M.A.) and undergraduate (B.A., B.S. and minors in Philosophy and in Ethics) degrees, the department is home to ongoing dialogues and inquiries across philosophical perspectives and academic disciplines.

Our graduate program produces first-rate scholars and teachers with a strong foundation in the history of philosophy, a well-rounded preparation in the diverse concerns of contemporary philosophy, and the skills to communicate effectively across different traditions and schools of thought.

Our thriving undergraduate program includes a major and minor in Philosophy as well as a minor in Ethics. Throughout our undergraduate curriculum, we encourage our students to become engaged, reflective citizens and lifelong learners while preparing them for careers in government, law, the non-profit sector, business, or higher education.

Faculty

Ramón Alvarado, assistant professor of philosophy (data ethics, philosophy of computation, philosophy of technology). BA, 2011, University of Texas at El Paso; MA, 2014, University of Texas at El Paso; MA, 2017, University of Kansas; PhD, 2019, University of Kansas. (2019)

Steven Brence, teaching professor (social and political philosophy, philosophy of film, ethics). BS, 1989, MA, 1993, PhD, 2001, Oregon. (2001)

Miguel Gualdrón Ramírez, assistant professor (decolonial philosophy, gender-race constructions, resistance). BA, 2005, MA, 2009, Universidad Nacional de Colombia; PhD, 2019, DePaul. (2023)

Colin Koopman, professor (political philosophy, data politics, pragmatism, genealogy). BA, 1997, Evergreen State College; MA, 1999, Leeds; PhD, 2006, McMaster. (2010)

Bonnie Mann, professor (feminist, Continental). BA, 1983, Portland State; PhD, 2002, State University of New York, Stony Brook. (2003)

Cintia Martinez Velasco, assistant professor (Feminist philosophy, Gender theory, Decolonial philosophy, Latinx philosophy, Critical theory in Latin America). BA, 2010, MA, 2013, PhD, 2019, University of Mexico. (2022)

Erin McKenna, professor (feminist theory, American pragmatism, animal ethics). BA, 1987, Claremont McKenna College; MA, 1990, PhD, 1992, Purdue. (2016)

Nicolae Morar, associate professor (bioethics, philosophy of biology, ecology). BA, 2004, MA, 2005, Université Jean Moulin Lyon 3; PhD, 2011, Purdue. (2015)

Barbara Muraca, associate professor (environmental and social philosophy, process philosophy, feminist philosophy). MA, 1998, Turin; PhD, 2008, Greifswald. (2019)

Jacob P. Neal, assistant professor (History of Philosophy of Science, History of Philosophy of Biology). BA/BS, 2008, Richmond; MA, 2010, Memphis; MS, 2012, Maryland, Baltimore County; PhD, 2021, Pittsburgh. (2023)

Scott L. Pratt, professor of philosophy (American philosophy, history of philosophy, education). BA, 1981, Beloit; PhD, 1995, Minnesota. (1995)

Camisha Russell, associate professor (critical philosophy of race, bioethics, feminist philosophy). BA, 2000, American; MA, 2008, Memphis; PhD, 2013, Penn State. (2017)

Beata Stawarska, professor (phenomenology, Continental, philosophical psychology). BA, 1992, MA, 1994, PhD, 2000, Louvain. (2003)

Alejandro Vallega, professor (Latin American philosophy, Continental philosophy, Ancient philosophy, aesthetics). BA, 1993, Saint John's College; MA, 1996, Boston; PhD, 1999, Vienna. (2010)

Daniela Vallega-Neu, professor (19th- and 20th-century European philosophy, history of philosophy, phenomenology). BA, 1984, European School, Varese; MA, 1992, PhD, 1995, Universitat Freiburg. (2010)

Peter Warnek, associate professor (ancient philosophy, 19th- and 20th-century Continental philosophy, Kant). BA, 1986, Seattle; MA, 1990, Villanova; PhD, 1998, Vanderbilt. (1999)

Emeriti

William E. Davie, associate professor emeritus. BA, 1964, Washington (Seattle); PhD, 1969, California, Irvine. (1968)

Mark Johnson, professor emeritus (cognitive science, metaphor theory, pragmatism). BA, 1971, Kansas; MA, 1972, PhD, 1977, Chicago. (1994)

Naomi Zack, professor (race, feminism, disaster). BA, 1966, New York University; PhD, 1970, Columbia. (2001)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Kristen Bell, Knight Law School

Joyce Cheng, history of art and architecture

Jeffrey S. Librett, German and Scandinavian

Lisa Mazzei, education studies

Jerry L. Rosiek, education studies

Steven Shankman, English

Michael Stern, German and Scandinavian

Philosophy (BA/BS)

Philosophy engages fundamental questions concerning human identity, the nature of knowledge and reality, moral virtue and responsibility, the nature of community and political authority, aesthetic judgments and values, and other concepts central to the meaning and value of human existence.

Through the study of primary texts and concrete issues drawn from various historical periods and cultures, philosophy facilitates reflection on actions, beliefs, and values while developing critical thinking, reading, and writing skills. Philosophy also strengthens the ability to reason, enlarges the imagination, and refines aesthetic sensitivity.

With over 200 undergraduate majors and minors, the Philosophy major at the University of Oregon is one of the most vibrant in the country. Our program emphasizes the study of ethics, social and political philosophy, American philosophy, continental philosophy, feminist philosophy, philosophy of mind, the philosophy of race, the history of philosophy, and environmental philosophy.

The philosophy department provides a wide range of opportunities for majors outside the classroom. These include public lectures by prominent visiting philosophers as well as an undergraduate philosophy club. The department also routinely hosts regional, national, and international conferences, and all undergraduates are invited and encouraged to participate in these events.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Delineate the history of Western philosophy and differentiate the main schools of thought, key authors, debates, terms, and methods, that emerged in the history of philosophy.
- Demonstrate critical thinking, reading, and writing skills through use of a broad range of research methods, including collaborative projects and scholarly essays that deal with primary and secondary sources in the literature and are written in an academic format.
- Present and assess views that differ from one's own, particularly perspectives relative to gender, race, class, and culture, including non-Western philosophical perspectives, within an inclusive classroom environment.
- Compare, contrast, and critique representative authors from various philosophical traditions and historical periods.
- Engage in philosophical inquiry that examines a broad range of topics such as human nature, the self and the community, political authority, morality, knowledge and reality, the arts, literature, film, the internet.
- Define and explain the various sub-disciplines within the field of philosophy, such as ethics, metaphysics, epistemology, aesthetics, philosophy of language, philosophical psychology, philosophy of law, environmental philosophy, social and political philosophy, and others, such as they are approached in within various philosophical fields of focus: Continental European, American and Latin American, Asian, feminist, critical race theory, and analytic.

Coursework for the major in philosophy must be passed with grades of C- or better or P (pass). No more than 8 credits may be taken pass/no pass.

Philosophy Major Requirements

Code	Title	Credits
PHIL 225	Introduction to Formal Logic	4
Select two of the following:		8
PHIL 310	History of Ancient Philosophy	
PHIL 311	History of Philosophy: Modern	
PHIL 312	History of Philosophy: 19th Century	
In addition to two of the three history of philosophy courses above, select two additional history or traditions courses:		8
PHIL 310	History of Ancient Philosophy	
PHIL 311	History of Philosophy: Modern	
PHIL 312	History of Philosophy: 19th Century	
PHIL 342	Introduction to Latin American Philosophy	
PHIL 415	Continental Philosophy: [Topic]	
PHIL 420	American Philosophy: [Topic]	
Select two of the following:		8
PHIL 421	Ancient Philosophers: [Topic]	
PHIL 433	17th- and 18th-Century Philosophers: [Topic]	
PHIL 453	19th-Century Philosophers: [Topic]	
PHIL 463	20th-Century Philosophers: [Topic]	
Select one of the following:		4
PHIL 110	Human Nature	
PHIL 170	Love and Sex	
PHIL 216	Philosophy and Cultural Diversity	
PHIL 315	Introduction to Feminist Philosophy	
PHIL 342	Introduction to Latin American Philosophy	
PHIL 443	Feminist Philosophy: [Topic]	
PHIL 451	Native American Philosophy	

PHIL 452	Philosophy and Race	
Additional philosophy courses		20
Total Credits		52

Additional Requirements

- At least 40 credits must be upper-division (300- or 400-level)
- At least 20 upper-division credits must be from courses taken at the University of Oregon

Honors in Philosophy

The philosophy honors program is designed to provide outstanding, highly motivated philosophy majors with the opportunity to develop their skills during the senior year through the independent exploration of a special topic of their own choosing under the guidance of a faculty mentor. To be eligible for admission to the honors program, students must have completed at least 24 credits in philosophy, at least 12 of which have been taken at the University of Oregon. The honors candidate's grade point average (GPA) in philosophy must be at least 3.50, maintained through graduation. To graduate with honors, the candidate must fulfill the following requirements:

Courses

Besides the courses required of majors, a candidate for departmental honors must take at least 16 of the 52 credits in philosophy at the 400 level.

Senior Thesis

The candidate must write an honors thesis under the guidance of a member of the philosophy faculty chosen as thesis advisor. The thesis must demonstrate the student's ability to formulate a significant research problem, research primary resources, interpret sources with imagination and technical skill, and present the finished work in a form meeting professional standards in philosophy. The thesis must be approved by a thesis committee consisting of two faculty members from the philosophy department. Approval of the thesis depends in part on a public defense attended by the committee.

Upon fulfilling these requirements, the candidate is approved to receive a bachelor's degree with honors in philosophy.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Philosophy

Philosophy Minor

Philosophy engages fundamental questions concerning human identity, the nature of knowledge and reality, moral virtue and responsibility, the nature of community and political authority, aesthetic judgments and values, and other concepts central to the meaning and value of human existence. Our program emphasizes the study of ethics, social and political philosophy, American philosophy, continental philosophy, feminist philosophy, philosophy of mind, the philosophy of race, the history of philosophy, and environmental philosophy.

Philosophy Minor Requirements

Code	Title	Credits
Select two of the following:		8
PHIL 310	History of Ancient Philosophy	
PHIL 311	History of Philosophy: Modern	
PHIL 312	History of Philosophy: 19th Century	
PHIL 342	Introduction to Latin American Philosophy	

PHIL 415	Continental Philosophy: [Topic]	
PHIL 420	American Philosophy: [Topic]	
Course on the work of a specific philosopher		4
PHIL 421	Ancient Philosophers: [Topic]	
PHIL 433	17th- and 18th-Century Philosophers: [Topic]	
PHIL 453	19th-Century Philosophers: [Topic]	
PHIL 463	20th-Century Philosophers: [Topic]	
Upper-division philosophy course		4
Two additional philosophy courses		8
Total Credits		24

Courses must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass.

Ethics Minor

Erin McKenna, Director

237 Susan Campbell Hall
1295 University of Oregon
Eugene, OR 97403-1295
541-346-5547
Fax: 541-346-5544
ethicsminor@uoregon.edu

The minor in ethics gives students tools for critically reflecting on moral questions. Students choose ethics-related courses from the Department of Philosophy, in topics such as medical ethics, internet ethics, and moral theory. Students who complete the minor in ethics will have skills in critical thinking and social engagement and be prepared to take on the major moral challenges of the 21st century.

Ethics Minor Requirements

Code	Title	Credits
PHIL 102	Ethics	4
or PHIL 323	Moral Theory	
Five ethics-related courses chosen from the following (or from additional rotating topics courses):		20
PHIL 102	Ethics	
PHIL 120	Ethics of Enterprise and Exchange	
PHIL 123	Internet, Society, and Philosophy	
PHIL 130	Philosophy and Popular Culture	
PHIL 135	Ethics in the Life Sciences	
PHIL 170	Love and Sex	
PHIL 216	Philosophy and Cultural Diversity	
PHIL 219	Sports Ethics	
PHIL 220	Food Ethics	
PHIL 223	Data Ethics	
PHIL 307	Social and Political Philosophy I	
PHIL 308	Social and Political Philosophy: [Topic]	
PHIL 309	Global Justice	
PHIL 315	Introduction to Feminist Philosophy	
PHIL 320	Philosophy of Religion	
PHIL 323	Moral Theory	
PHIL 335	Medical Ethics	

PHIL 340	Environmental Philosophy
PHIL 341	African Philosophy
PHIL 342	Introduction to Latin American Philosophy
PHIL 343	Critical Theory
PHIL 344	Introduction to Philosophy of Law
PHIL 423	Technology Ethics: [Topic]
PHIL 443	Feminist Philosophy: [Topic]
PHIL 451	Native American Philosophy
PHIL 452	Philosophy and Race
BA 325	Business Law and Ethics ¹
ENG 491	Rhetoric and Ethics ¹
ENVS 345	Environmental Ethics
ENVS 435	Environmental Justice ¹
ES 101	Introduction to Ethnic Studies ¹
JCOM 303	Media Ethics ¹
PS 106	Power, Politics, and Inequality ¹
PSY 202Z	Introduction to Psychology II ¹
SOC 207	Social Inequality ¹
WGS 101	Introduction to Women's and Gender Studies ¹
Any other PHIL course focusing primarily on topics in ethics (contingent upon review by and approval from instructor of record as well as Ethics Minor Director)	
Total Credits	

24

¹ One UO course from outside the Department of Philosophy (except ENVS 345) is allowed.

Courses must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass.

Twelve credits must be taken at the upper-division level, 4 credits of which must be at the 400 level.

A minimum of 12 upper-division credits must be taken in residence at the University of Oregon.

Students minoring in ethics and also pursuing either a minor in philosophy or a major in philosophy may have a maximum two-course overlap between their ethics minor courses and their philosophy major/minor courses.

Philosophy (MA)

The department offers a graduate program leading to the master of arts (MA) and the doctor of philosophy (PhD) degrees. The program, which is pluralistic in orientation, requires students to develop a broad knowledge of the history of philosophy, major fields, and various approaches and methods. Students are urged to concentrate in a specific area at the advanced level. Specializations are supported in American philosophy, Continental philosophy, feminist philosophy, Latin American philosophy, philosophy of race, philosophical psychology, and environmental philosophy.

Our program is known for its pluralism, close mentoring relationships between graduate students and faculty, a faculty committed to teaching excellence as well as research, supportive rather than competitive

relationships among graduate students, and professionally active and successful graduate students.

The department and faculty have particular strengths in a range of traditions and fields of focus. The program requires students to develop a broad knowledge of the history of philosophy, major fields, and various approaches and methods. We also welcome interdisciplinary approaches. Students are expected to concentrate in a specific area at the advanced level.

Each student designs a program in consultation with a faculty adviser. Two or more years are typically required to complete the master's degree and five years for the doctorate.

Program's Admission Requirements

Please visit the program's website (https://philosophy.uoregon.edu/graduate/how_to_apply/).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Represent the pluralistic orientation of philosophy including the four major traditions of inquiry: Continental European, American, Feminist, and Analytic.
- Delineate the history of Western philosophy, including the main eras: Ancient, Modern, 19th C., 20th and 21st C.
- Develop expertise in any combination of the sub-disciplines within the field of philosophy, such as ethics, data ethics, bioethics, metaphysics, epistemology, aesthetics, philosophy of language, philosophy of race, decolonial philosophy, social and political philosophy, critical theory, philosophical psychology, environmental philosophy, philosophy of race and others.
- Students must explore emerging and engaged areas of philosophical work.
- Develop proficiency in a second language relevant to their area of research.
- Develop proficiency in logic.
- Specialize in specific philosophical areas at an advanced research level by researching relevant primary and secondary literature, designing, and writing a doctoral dissertation or a master's thesis.

Philosophy Major Requirements

There are two paths to earning a master's degree. The first requires completion of the second-language requirement and 48 credit hours of graduate course work including the distribution requirements (listed below). The second requires satisfaction of the second-language requirement, completing 45 credits of graduate course work—9 of which are taken in Thesis (PHIL 503)—and the writing of a master's thesis under the direction of a thesis advisor with a second faculty reader.

The distribution requirements may be satisfied by receiving a mid-B or better.

- History Requirements (3 courses)
- Traditions Requirements (4 courses)
- Emerging and Engaged Philosophies Requirements (3 courses)

Coursework Track

Code	Title	Credits
History Requirements *		
One course from each of the following:		12
	Course from ancient period (e.g., PHIL 521)	
	Course from modern (16th-18th centuries) period (e.g., PHIL 533) *	
	Course from 19th century (e.g., PHIL 553)	
Traditions Requirements		
One course about continental philosophical traditions ¹		4
One course about analytic philosophic traditions ¹		4
One course about American philosophical traditions ¹		4
One course about feminist philosophical traditions ¹		4
Emerging and Engaged Philosophies *		
Two courses in Emerging Philosophies		8
PHIL 551	Native American Philosophy	
PHIL 643	Feminist Philosophy: [Topic]	
PHIL 657	Philosophy and Race: Contemporary Issues	
One course in Engaged Philosophies		4
PHIL 623	Data Ethics	
PHIL 645	Environmental Philosophy: [Topic]	
Electives		8
Total Credits		48

¹ Usually satisfied by taking the Advanced Introduction in each area (571, 572, 573, 574).

* May be filled by topics courses.

Note on criteria for multiple fulfillment:

Graduate courses may be listed as counting toward the simultaneous fulfillment of multiple categories of distribution simultaneously, though this is possible for only some of the categories. A course may count toward one Historical Period while also fulfilling a Philosophical Tradition or a course in Emerging and Engaged Philosophies. Courses may count toward either a Philosophical Tradition or the Emerging and Engaged requirement, but no course may count toward both of these requirements at once. For example, a course in nineteenth-century feminist philosophy can count toward either the requirement in the Feminist Tradition or in Emerging and Engaged Philosophies (but not both) and at the same time fulfill a requirement for Historical Periods. When a course is listed so as to provide an option for fulfillment of either the Traditions or Emergent & Engaged requirements, students must choose which requirement the course is to fulfill.

Thesis Track

Code	Title	Credits
PHIL 503	Thesis	9
Additional graduate-level philosophy courses ¹		36
Total Credits		45

¹ The Thesis track must still follow the Distribution Requirements above.

The student asks two faculty members to serve as his or her master's committee, with one agreeing to serve as chair. The student prepares

a short (maximum five pages) description of the proposed thesis topic. Once both committee members have approved the thesis proposal, the student registers for as many as 9 credits of Thesis (PHIL 503) during the one or two terms over which the thesis is written. Typically, the committee chair meets periodically with the student to assess progress and to oversee the writing of the thesis. When both members of the thesis committee agree that the thesis is suitable for a final defense, the candidate schedules a one-hour oral examination, during which the committee members ask questions about the argument and make suggestions for further revision, if necessary. The thesis is completed when it is given final approval by both members of the committee and is accepted by the Division of Graduate Studies as satisfying its requirements for thesis preparation.

Philosophy (PhD)

The department offers a graduate program leading to the master of arts (MA) and the doctor of philosophy (PhD) degrees. The program, which is pluralistic in orientation, requires students to develop a broad knowledge of the history of philosophy, major fields, and various approaches and methods. Students are urged to concentrate in a specific area at the advanced level. Specializations are supported in American philosophy, Continental philosophy, feminist philosophy, Latin American philosophy, philosophy of race, philosophical psychology, and environmental philosophy.

Our program is known for its pluralism, close mentoring relationships between graduate students and faculty, a faculty committed to teaching excellence as well as research, supportive rather than competitive relationships among graduate students, and professionally active and successful graduate students.

The department and faculty have particular strengths in a range of traditions and fields of focus. The program requires students to develop a broad knowledge of the history of philosophy, major fields, and various approaches and methods. We also welcome interdisciplinary approaches. Students are expected to concentrate in a specific area at the advanced level.

Each student designs a program in consultation with a faculty adviser. Two or more years are typically required to complete the master's degree and five years for the doctorate.

Program's Admission Requirements

Please visit the program's website (https://philosophy.uoregon.edu/graduate/how_to_apply/).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Represent the pluralistic orientation of philosophy including the four major traditions of inquiry: Continental European, American, Feminist, and Analytic.
- Delineate the history of Western philosophy, including the main eras: Ancient, Modern, 19th C., 20th and 21st C.
- Develop expertise in any combination of the sub-disciplines within the field of philosophy, such as ethics, data ethics, bioethics, metaphysics, epistemology, aesthetics, philosophy of language, philosophy of race, decolonial philosophy, social and political philosophy, critical theory, philosophical psychology, environmental philosophy, and others.

- Students must explore emerging and engaged areas of philosophical work.
- Develop proficiency in a second language relevant to their area of research.
- Develop proficiency in logic.
- Deepen the knowledge of main topics in the history of philosophy by producing an independent research paper (PhD students).
- Specialize in specific philosophical areas at an advanced research level by researching relevant primary and secondary literature, designing, and writing a doctoral dissertation or a master's thesis.

Philosophy Major Requirements

Students must complete at least 81 graduate credits, of which at least 18 must be dissertation research credits. As part of the requirements for completing the PhD, students must also take at least *twelve* 4-credit graduate courses within the department of philosophy. Students must complete the course distribution requirements, demonstrate proficiency in a second language and pass two comprehensive examinations, which in our program are extensive research projects — one in the history of philosophy (the 'history paper') and one in the student's intended area of research specialization (the literature review). Most students finish their doctoral degrees within five to six years. The Division of Graduate Studies imposes a limit of seven years for completion of the PhD degree.

The distribution requirements may be satisfied by receiving a mid-B or better in

- History Requirements (3 courses)
- Traditions Requirements (4 courses)
- Emerging and Engaged Philosophies Requirements (3 courses total)
- Logic Requirement (1 course)
- In the first year of employment as a GE, graduate students must also complete a total of 3 credits by enrolling in a one-credit professionalization pro-seminar on teaching for all three terms of the regular academic year.

Code	Title	Credits
History Requirements *		12
One course from each of the following:		
	Course from ancient period (e.g., PHIL 521)	
	Course from modern (16th-18th centuries) period (e.g., PHIL 533)	
	Course from 19th century (e.g., PHIL 553)	
Traditions Requirements		
One courses about continental philosophical traditions ¹		4
One courses about analytic philosophic traditions ¹		4
One courses about American philosophical traditions ¹		4
One courses about feminist philosophical traditions ¹		4
Engaged and Emerging Philosophy *		
Two courses in Emerging Philosophies		8
PHIL 551	Native American Philosophy	
PHIL 643	Feminist Philosophy: [Topic]	
PHIL 657	Philosophy and Race: Contemporary Issues	
One course in Engaged Philosophies		4
PHIL 623	Data Ethics	

PHIL 645	Environmental Philosophy: [Topic]	
Logic		
One course in advanced symbolic logic (PHIL 526)		4
Teaching Seminar		
Three one-credit teaching seminars		3
Dissertation		
PHIL 603	Dissertation	18
Electives		16
Total Credits		81

¹ The traditions requirement is usually fulfilled by completing the Advanced Introductory course in the area (571, 572, 573, 574).
* May be filled by topics courses.

Note on criteria for multiple fulfillment:

Graduate courses may be listed as counting toward the simultaneous fulfillment of multiple categories of distribution simultaneously, though this is possible for only *some* of the categories. A course may count toward one Historical Period while also fulfilling a Philosophical Tradition or a course in Emerging and Engaged Philosophies. Courses may count toward *either* a Philosophical Tradition *or* the Emerging and Engaged requirement, but no course may count toward both of these requirements at once. For example, a course in nineteenth-century feminist philosophy can count toward either the requirement in the Feminist Tradition or in Emerging and Engaged Philosophies (but not both) and at the same time fulfill a requirement for Historical Periods. When a course is listed so as to provide an option for fulfillment of either the Traditions or Emergent & Engaged requirements, students must choose which requirement the course is to fulfill.

Additional Requirements

The comprehensive examinations are passed by completing two substantial research papers under the supervision of faculty members. Students are advanced to candidacy upon completion of the comprehensives. A dissertation prospectus must be accepted by the candidate's committee after a preliminary oral examination. The written dissertation must receive the approval of the dissertation committee after a final oral examination.

Religious Studies

<http://religion.uoregon.edu>
Mark Unno, Department Head

311 Susan Campbell Hall
1294 University of Oregon
Eugene, OR 97403-1294
541-346-4971
Fax: 541-346-4118
religion@uoregon.edu

The Department of Religious Studies offers courses about the teachings and practices of the world's religions from an academic perspective. Courses focus on the history of religions including their origins, sacred texts, rituals and practices, beliefs, and subgroups. These courses provide a broad understanding of the nature and role of religion in the world's many cultures, present and past, for students in all fields, as well as integrated programs for majors in religious studies.

From antiquity to the present, religion has provided a vocabulary for individuals to confront ultimate questions about the meaning of life. At the societal level, religion drives the formation of community and conflict. The rise of militant Buddhism in Myanmar, the role of Evangelicals in US politics, and the struggle for legitimacy among contemporary Muslims are only a few contemporary examples of the relevance of religious studies. Understanding the role of religion is critical for analyzing socio-political forces shaping the world today.

An undergraduate major in religious studies can lead to graduate programs in religious studies—either academic or professional—as well as other related areas of graduate studies such as history, sociology, folklore, and various area studies (e.g., Middle East studies, East Asian languages and literatures).

Students with a bachelor of arts in religious studies have had success in various professional fields such as religion, journalism, social work, education, business, and law.

Faculty

Frederick Colby, associate professor (Islam). BA, 1991, Haverford College; MA, 1995, Chicago; PhD, 2002, Duke. (2008)

Hanan Elsherif, associate teaching professor (Arabic). BA, 1993, MA, 2002, PhD, 2009, Minia. (2011)

Deborah A. Green, associate professor (history and literature of Judaism, biblical studies). BA 1984, Brandeis University; MA 1997, University of Chicago; PhD 2003, University of Chicago. (2003)

Luke Habberstad, assistant professor. BA, 2003, Yale; MA, 2007, PhD, 2014, California, Berkeley. (2014)

David Hollenberg, associate professor (Arabic). BA, 1990, Wesleyan; MA, 1996, California, Santa Barbara; PhD, 2006, Pennsylvania. (2010)

Jeffrey Schroeder, assistant professor (religion and modern Asia). BA, 2005, MA, 2009, Reed; MA, 2009, Duke; PhD, 2015, Duke. (2017)

Stephen J. Shoemaker, professor (history of Christianity). BA, 1991, Emory; MA, 1994, PhD, 1997, Duke. (2000)

Mark T. Unno, associate professor (East Asian religions, Buddhism). BA, 1987, Oberlin; MA, 1991, PhD, 1994, Stanford. (2000)

Lily Vuong, assistant professor (Biblical Studies). BA, 2001, University of Toronto; MA, 2003 Wilfred Laurier University; PhD, 2010, McMaster University (2024)

Emeriti

Judith R. Baskin, professor emerita. BA, 1971, Antioch; PhD, 1976, Yale. (2000)

Hee-Jin Kim, professor emeritus. BA, 1957, MA, 1958, California, Berkeley; PhD, 1966, Claremont. (1973)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Andrew E. Goble, history

Akiko Walley, history of art and architecture

Anita M. Weiss, international studies

Daniel N. Wojcik, English

Undergraduate Programs

Major - Bachelor's Degree

Minors

- Arabic Studies (p. 156)
- Religious Studies (p. 156)

Religious Studies (BA/BS)

From antiquity to the present, religion has provided a vocabulary for individuals to confront ultimate questions about the meaning of life. Understanding the role of religion is critical for analyzing socio-political forces shaping the world. A major in religious studies provides training for any humanitarian profession. Recent graduates have gone on to study law, medicine, and journalism; work in social service organizations; and pursue graduate study in a variety of disciplines. The skills students hone as majors—critical reading, analytical thinking, and writing—along with knowledge of global religious traditions, serves them well in whatever career path they choose.

The Department of Religious Studies offers courses about the teachings and practices of the world's major religions from an academic perspective. Courses focus on the history and philosophy of religions including their origins, sacred texts, rituals and practices, beliefs, and subgroups. The courses provide a broad understanding of the nature and role of religion in the world's many cultures, present and past, for students in all fields, as well as integrated programs for majors in religious studies.

The religious studies department offers courses that reflect the research expertise of the faculty. Students can enroll in classes ranging from "Early Judaism," to "The Dark Self: East and West," and "War, Terrorism, and Religion." Many religious studies seminars are small, limited to fifteen students, allowing for deep exploration of the material and low student to professor ratios. For a full list of regular course offerings, follow the "courses" link on the right.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify, describe, and explain a wide diversity of religious phenomena in their historical, social, political, and cultural contexts.
- Discuss diverse religious phenomena with others in a well-informed, critical, and respectful manner.
- Read and critically evaluate current scholarly literature on method and theory in the academic study of religion.
- Read and critically analyze primary and secondary sources from and about diverse religious traditions, applying appropriate theoretical and methodological tools in the academic study of religion.
- In speech and writing, make an effective and valid argument about religion: one that successfully establishes a premise and supports the premise with appropriate and persuasive evidence.

Courses used to satisfy major requirements must be taken for letter grades and passed with a mid-C or better.

Religious Studies Major Requirements

Code	Title	Credits
REL 101–102	World Religions	8
Electives in religious studies or additional courses		8

Philosophy		
PHIL 320	Philosophy of Religion	

Honors in Religious Studies

Requirements for a degree with honors in religious studies typically include the following:

- 1. Satisfaction of the requirements for a major
- 2. A cumulative grade point average of 3.80 in courses taken to satisfy the major requirements
- 3. Formal approval of the department

The candidate for honors shall request approval no later than the second week of fall term in the senior year. Students are strongly encouraged to meet with the undergraduate advisor before applying. Application forms are available in the department office.

A faculty committee supervises the honors thesis project. Candidates typically register for 3 credits of Research: [Topic] (REL 401) for both fall and winter terms of the senior year to prepare for writing the thesis. Contingent on satisfactory progress, the candidate then enrolls for 4 credits of Thesis (REL 403) spring term. A first draft of the thesis must be submitted six weeks before the end of spring term and the final draft two weeks after that.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Religious Studies Minor

From antiquity to the present, religion has provided a vocabulary for individuals to confront ultimate questions about the meaning of life. Understanding the role of religion is critical for analyzing socio-political forces shaping the world today. The Religious Studies Department at the University of Oregon offers courses that reflect the research expertise of the faculty. Most seminars are small, allowing for deep exploration of the material. The critical reading, analytical thinking, and writing skills students hone as a Religious Studies minor, along with knowledge of global religious traditions, will serve them well in whatever career path they choose.

Courses used to satisfy minor requirements must be taken for letter grades and passed with a mid-C or better.

Religious Studies Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Arabic Studies Minor

<https://arabic.uoregon.edu>

David Hollenberg, Director of Arabic Studies

349 Susan Campbell Hall
541-346-8096
religion@uoregon.edu

The minor in Arabic Studies facilitates proficiency in the Arabic language, familiarizes students with the cultures of the Arabic-speaking world, provides facility with the Arabic textual tradition, and affords a foundation for professional and graduate work using the Arabic language. Coursework trains students to read, interpret, and contextualize "texts," broadly construed as written, oral, and audio-visual. This is accomplished through mastering the Arabic language, increasing knowledge of Arab cultural themes, and engaging apposite scholarly literature necessary to understand Arabic texts in an informed, relevant way.

Courses used to satisfy minor requirements must be taken for letter grades and passed with a mid-C or better.

Arabic Studies Minor Requirements

Code	Title	Credits
Category I: Third-Year Arabic		
ARB 301–303	Language and Culture	12
Category II: Advanced Arabic		
ARB 331	Reading Classical Arabic	4
An additional course, approved by an advisor		4
Category III: Arabic Culture and Society		
An elective from the following list (or any course with substantial content in Arabic, Middle Eastern, or Islamic studies):		4
ARB 199	Special Studies: [Topic]	
COLT 370	Comparative Comics	
GEOG 209	Geography of the Middle East and North Africa	
REL 102	World Religions: Near Eastern Traditions	
REL 233	Introduction to Islam	
REL 324–325	History of Eastern Christianity	
REL 335	Introduction to the Qur'an	
REL 432	Islamic Mysticism: [Topic]	
Total Credits		24

Modified Requirements for Students with Prior Literacy in Arabic

Students who already have skills that satisfy the equivalent of the ARB 301–303 third-year sequence—whether from native proficiency, study abroad, or courses from another university—may choose to test out of one or more of these courses by passing a proficiency examination, administered by the UO Testing Center, designed to demonstrate basic literacy in Arabic. If students wish to transfer their third-year Arabic courses from other universities or from overseas study, they may do so contingent on the successful completion of an examination at the appropriate level, to ensure proper placement.

Students who pass the proficiency exam must still complete 24 credits for the minor in Arabic studies, including at least 12 from among Category II courses and up to 12 from among Category III electives.

Romance Languages

<http://rl.uoregon.edu>

David Wacks, Department Head

119 Friendly Hall
1233 University of Oregon
Eugene, OR 97403-1233
541-346-4021
Fax: 541-346-4030
rlhead@uoregon.edu

The Department of Romance Languages offers an extensive range of courses and degree programs, from instruction in beginning languages through the study of the literatures and cultures of French-, Italian-, Portuguese-, and Spanish-speaking countries. Students can earn a bachelor of arts (BA) degree in French and Francophone Studies, Italian, Spanish, or Romance languages; the master of arts (MA) is also available in these areas. The doctor of philosophy (PhD), is awarded in either Spanish or Romance languages (RL). The RL PhD encompasses

a primary language and literature and a supporting area. Romance languages is a liberal-arts major, providing a valuable background for students interested in graduate work, teaching, and a wide array of other professional and international careers that require strong analytical and communication skills.

Preparation

The department recommends the following preparation for study leading to a major in any of the Romance languages:

- As much work as possible in the student's major language. Knowledge of a second Romance language is helpful but not required
- Knowledge of the history, geography, and politics of the areas where the student's major language is spoken
- Communication skills, speech, and essay writing that help the student convey ideas logically. In literature and film courses, papers or essay examinations are generally required
- Experience in literary and cultural studies and linguistics

Careers

Students who graduate with a bachelor of arts degree in Romance languages typically enter a variety of occupations. Language teaching is an obvious possibility. Proficiency in a second language and knowledge of other cultures enhances study and career opportunities in other areas as well. Romance languages majors, especially those who have a second major in another discipline (e.g., art history, business administration, economics, family and human services, history, international studies, journalism, music, or political science) find positions in communications media, government foreign service, international business and law, libraries, social service organizations, and travel and tourist-related agencies, among others.

Faculty

Faculty members in the Department of Romance Languages actively participate in other UO interdisciplinary programs and departments (e.g., African studies, cinema studies, comparative literature, European studies, Latin American studies, linguistics, medieval studies, and women's and gender studies). For descriptions, see those sections of this catalog.

Scholarships

The department administers scholarships for undergraduate and graduate students of Romance languages:

- The Beall Graduate Dissertation Scholarship is awarded to doctoral students to support dissertation writing
- The Françoise Calin scholarship is awarded every year to a French major or minor
- The Giustina Family Italian Fund provides a one-time scholarship to Italian major/minors and RL majors with a 3.0 GPA or higher.
- The Leona M. Kail Scholarship supports studies in the Department of Romance Languages (Offered on alternate years.)
- Wayne Andre Gottshall Fund supports undergraduate students in studies in the Department of Romance Languages
- The Emmanuel Hatzantonis Scholarship is awarded every year to a Romance languages major or minor who is studying in Italy with the university's overseas study program
- Dr. Carl L. Johnson Scholarship supports studies in the Department of Romance Languages with preference to French majors.

- The Helen Fe Jones Spanish Student Fellowship supports study abroad in a Spanish-speaking country
- The Perry J. Powers Scholarship is awarded annually to an outstanding Romance languages student
- The Charles Stickles Endowment Scholarship is awarded for study in a Spanish-speaking country
- Nicolette B. Weicker Memorial Scholarship is awarded with preference to students specializing in French or Italian.
- The James T. and Mary Alice Wetzel Graduate Scholarship is awarded every year to an outstanding graduate student in the Department of Romance Languages

More information may be obtained from the department office in early January or on the department website, Scholarships (RL) | RL: Romance Languages Major (uoregon.edu) (<https://romance.uoregon.edu/undergraduates/scholarships-rl/>)

Study Abroad

One of the best ways to learn a language and its culture is the experience of immersion in it. The Department of Romance Languages strongly encourages students to participate in one of the numerous study-abroad programs that the UO offers. Visit the GEO website for more information. Home | Global Education Oregon (uoregon.edu) (<https://geo.uoregon.edu/>)

The department sponsors programs for the study of French, Italian, Portuguese, and Spanish languages and cultures. Students live, study, and travel in Europe, Africa, and the Americas, in countries such as Argentina, Bolivia, Brazil, Ecuador, France, Italy, Mexico, Morocco, Peru, Senegal, and Spain. Cosponsoring programs include IE₃ Global, the Council on International Educational Exchange, the School for International Training, and the National Student Exchange.

To ensure success in goals of language and cultural study, majors and minors in the department need to identify the program that best fits their academic requirements, financial situation, and personal interests. The list of programs posted on the department website is recommended based on their outstanding academic, linguistic, and cultural opportunities and strong on-site support.

Before traveling abroad, students should consult their assigned major or minor advisor about the selection of a program and the courses to be taken within that program.

Tips for Selecting a Study-Abroad Program

- Choose a program that offers a maximum of immersion (e.g., living with host families or local students, course work entirely in the target language, direct university enrollment opportunities)
- Longer programs offer you more opportunity to acclimate to the language, to be more fully immersed in the local culture, and to form meaningful relationships with people from the host country
- Courses in which the readings and lectures are in English **do not** count toward majors or minors in the Department of Romance Languages or the UO bachelor of arts second-language requirement
- Students in all UO overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. Advisors can help students determine course equivalencies to maximize the credits applied to requirements for the degree

- The department offers scholarships to help students with travel expenses for language learning and research projects. For more information, visit the scholarships page (<http://rl.uoregon.edu/scholarships/>).

For additional information and to obtain applications for specific programs, contact the Office of International Affairs at (541) 346-3206. For questions on applying study-abroad credit to majors or minors, students should visit their assigned departmental advisor.

Cultural Ambassador Program in Spain

The Ministry of Education of Spain offers more than 1,200 openings for U.S. and Canadian language and culture assistants (termed “cultural ambassadors”). The positions are offered in Spain’s equivalent of the K–12 school system of public education.

Teaching Assistant Program in France

This program is coordinated by the French Embassy and offers 1,500 positions for native English speakers with a demonstrated knowledge of French to teach and its overseas department in France, to assist French teachers with English courses for a period of six to nine months, or both. The positions are offered in elementary and high schools (*écoles primaire, collèges, and lycées*). This is an excellent opportunity for graduating seniors with interest in education and experience abroad. It is open to United States citizens or permanent residents under 29 years of age with a demonstrated knowledge of French—not just majors or minors. The Department of Romance Languages does not administer the program, but simply offers guidance to interested students, and gives information and advice on the application process and on the program itself.

Faculty

Maria Licia Aldana Rogers, instructor I (Spanish). BA

Rafael Arias, teaching professor (Spanish). BA, 2009, MA, 2011, Oregon (2011)

Grecia Chirinos, assistant teaching professor (Spanish) BA 2010, Pontificia Universidad Católica del Perú; MA 2017, Middlebury College (2023)

Amy Costales, teaching professor (Spanish). BA, 1993, State University of New York, Cortland; MA, 2009, Oregon. (2007)

Liliana Darwin Lopez, teaching professor (Spanish). BA, 2001, MA, 2007, Oregon. (2007)

Robert L. Davis, professor (methodology and pedagogy, Spanish and Romance linguistics). BA, 1983, Southern Mississippi; MA, 1987, PhD, 1991, North Carolina, Chapel Hill. (1991)

Lauretta De Renzo-Huter, teaching professor (Italian); supervisor and coordinator, first-year Italian programs. Laurea in Lingue e Letterature Starniere Moderne, 1988, Torino; MA, 1992, PhD, 2001, Oregon. (2019)

Juanita Devereaux, teaching professor (Spanish). BA, 1999, MA, 2001, Oregon. (2001)

Connie Dickey, associate teaching professor (French); supervisor-coordinator, first-year French program. BA, 1979, Portland; MA, 1981, Seattle; PhD, 1991, California, Berkeley. (2014)

André Djiffack, associate professor (Francophone literatures, 20th-century French literature, colonial and postcolonial studies). BA, 1987, Maîtrise, 1988, Doctorat de 3e Cycle, 1992, Yaoundé; PhD, 1998, Cape Town. (2000)

Paula Ellister, teaching professor (Spanish); supervisor and coordinator, first-year Spanish program. BA, 1992, MA, 1994, Oregon. (1994)

Cecilia Enjuto Rangel, associate professor (Spanish and Latin American poetry, transatlantic studies, gender and literary theory); director of undergraduate studies. BA, 1998, Universidad de Puerto Rico; MA, 2002, PhD, 2005, Yale. (2005)

Pedro García-Caro, associate professor (19th- and 20th-century literatures of the Americas, postcolonial studies, literary theory). Licenciatura, 1995, Murcia; BA, 1996, Roehampton; MA, 1997, PhD, 2004, University College, London. (2006)

Diana Garvin, assistant professor (Mediterranean studies). AB, 2006, Harvard; PhD, 2016, Cornell. (2019)

Amalia Gladhart, professor (20th-century Latin American literature, theater, feminist studies). BA, 1989, Michigan State; PhD, 1995, Cornell. (1995)

Devin Grammon, assistant professor (Spanish socio-linguistics). BA, 2010; University of Northern Colorado; MA, 2012, University of Colorado, Boulder; PhD 2018, The Ohio State University, Columbus (2018)

Paulo Henriquez, instructor (Spanish); licenciado en castellano, 2000, Universidad Austral de Chile; MA, 2005, PhD, 2012, Oregon. (2012)

Gina Herrmann, associate professor (contemporary Spanish literature, politics and culture, autobiographical studies, gender studies). BA, 1990, Cornell; MA, 1993, Columbia; PhD, 1998, Cornell. (2002)

Nathalie Hester, associate professor (French and Italian Renaissance and baroque literature and culture, travel literature). BA, 1992; MA 1993; PhD, 2001, Chicago. (2001)

Jon Jaramillo, assistant teaching professor (Spanish) BA, 2013, MA 2015, Ph.D. 2023 Oregon (2023)

Harinder Kaur Khalsa, associate teaching professor (Italian). BA, 1991, Istanbul; MA, 1996 and 1998, Oregon. (1999)

Kelley León Howarth, teaching professor (Spanish). BA, 1995, Wisconsin, Eau Claire; MA, 2002, Oregon. (2002)

Sergio Loza, Assistant professor (Spanish heritage language education, Spanish socio-linguistics) BA, 2013, Arizona State University; PhD, 2019, Arizona State University. (2019)

Leah Middlebrook, associate professor (early modern Spanish and French literature and culture, lyric poetry, comparative literature). See **Comparative Literature**.

Lanie Millar, associate professor (20th- and 21st-century Caribbean and Latin American literature, Luso-African literature, global south studies). BA, 2002, Baylor; MA, 2003, Middlebury College; PhD, 2011, Texas, Austin. (2013)

Fabienne Moore, associate professor (French Enlightenment, prose poetry, contemporary France). License, 1987, Toulouse–Le Mirail; PhD, 2001, New York University. (2000)

Heather Quarles, teaching professor (Spanish). BA, 2000, MA, 2003, Oregon. (2001)

Sergio Rigoletto, associate professor (European cinema, popular culture, gender studies). Laurea, 2002, Catania; MA, 2004, Birkbeck, London; PhD, 2010, Reading. (2012)

Andrew Rothgery, teaching professor (Spanish); head undergraduate advisor. BA 1991, MA, 1994, Oregon. (1994)

Mariana Sabino Salazar, assistant teaching professor (Spanish) BS 2007 Universidad Iberoamericana; MA 2014 Benemérita Universidad Autónoma de Puebla; MA 2017, Ph.D. 2023, University of Texas at Austin (2023)

Maria Benedita Santos, associate teaching professor (Portuguese). BA, 1974, Federal University of Maranhão; MA, 2007, Oregon. (2012)

Jésus Sepúlveda, associate teaching professor (Spanish). BA, 1995, Universidad Metropolitana de Ciencias de la Educación; MA, 1997, PhD, 2003, Oregon. (2008)

Analisa Taylor, associate professor (Mexican literary and social history). BA, 1992, Oregon; MA, 1996, PhD, 2002, Duke. (2002)

Claudia Ventura, teaching professor (Italian); supervisor and coordinator, second-year Italian. Laurea, 1995, Bologna; MA, 2006, Ca' Foscari, Venice. (2005)

David Wacks, professor (medieval Iberian literature and culture, Sephardic studies). BA, 1991, Columbia; MA, 1997, Boston College; PhD, 2003, California, Berkeley. (2003)

Nathan Whalen, teaching professor (Spanish). BA, 1999, MA, 2001, Oregon. (2001)

Latifa Zoulagh, assistant teaching professor (French) BA, 1997, DESA, 1999 University of Sidi Mohammed Ben Abdallah; MA 2009, North Carolina State University; Ph.D. 2014 University of Oklahoma 2014 (2023)

Alex Zunterstein, teaching professor (Spanish); assistant department head; Spanish heritage language undergrad program coordinator. BA, 2000, MA, 2002, Oregon. (2002)

Emeriti

Alexandre Albert-Galtier, associate professor emeritus. Licence, 1981, DEA, 1983, PhD, 1988, Lyon II. (1994)

Randi M. Brox, professor emerita. Cand. Philol., 1960, Oslo; PhD, 1965, Illinois. (1965)

Françoise G. Calin, professor emerita. Licence, 1963, Diplôme d'Études Supérieures, 1964, CAPES, 1966, Sorbonne; PhD, 1972, Stanford. (1973)

Nadia Ceccacci, senior instructor emerita (Italian). Corso di laurea in Lingue e Letterature Straniere, 1981, Università degli Studi di Perugia; MA, 1986, Oregon. (1989)

Richard H. Desroches, associate professor emeritus. BA, 1947, Clark; PhD, 1962, Yale. (1957)

Juan A. Epple, professor emeritus. Licenciante, 1971, Chile; MA, 1977, PhD, 1980, Harvard. (1980)

Leonardo García-Pabón, professor emeritus (colonial Latin American literature, contemporary Latin American poetry, literary theory). BS, 1980, Universidad Mayor de San Andrés; MA, 1981, Université Catholique de Louvain; PhD, 1990, Minnesota, Twin Cities. (1990)

Sylvia Giustina, senior instructor emerita. BA, 1956, Marylhurst; MA, 1966, Oregon. (1968)

Evlyn Gould, professor emerita. BA, 1975, California, Irvine; MA, 1977, PhD, 1983, California, Berkeley. (1983)

Mónica Lara, senior instructor emerita (Spanish). BA, 1982, MA, 1992, Oregon. (1992) Massimo Lollini, professor emeritus. Laurea, 1978, Bologna; PhD, 1992, Yale. (1992)

Elisabeth A. Marlow, associate professor emerita. Diplôme, 1953, Hautes Études Commerciales, Paris; MA, 1958, PhD, 1966, Oregon. (1958)

Karen McPherson, professor emerita. BA, 1970, Oregon; MA, 1983, PhD, 1987, Yale. (1998)

Rosario Murcia, senior instructor emerita (Spanish); supervisor-coordinator, second-year Spanish program. BA, 1984, Alicante; MA, 1988, Oregon. (1988) Barbara D. May, associate professor emerita. BA, 1972, MA, 1973, PhD, 1975, Utah. (1976)

Amanda W. Powell, senior lecturer emerita. BA, 1977, Yale; MA, 1983, Boston University. (1991)

F. Regina Psaki, professor emerita. BA, 1980, Dickinson; MA, 1986, PhD, 1989, Cornell. (1989)

Steven Rendall, professor emeritus. BA, 1961, Colorado; PhD, 1967, Johns Hopkins. (1967)

Wolfgang F. Sohlich, associate professor emeritus. BA, 1959, Johns Hopkins; MA, 1970, PhD, 1971, Emory. (1970)

Gloria Zabala, senior instructor emerita (Spanish). BA, 1983, MA, 1989, Oregon. (1989)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Romance Languages (PhD) (p. 179)
- Spanish (PhD) (p. 182)

Specialization

- Translation Studies (p. 185)

French and Francophone Studies (BA)

In the eighth century, the emperor Charlemagne, “the father of Europe,” declared that, “to speak another language is to possess a second soul.” There’s something wonderful about studying another language, being able to think and express yourself in a new way. Using that skill to communicate with people whose culture and life experiences are very different from your own can be very exciting.

More than 250 million people in more than 50 countries speak French. It is an official language in 29 countries and maintains its status as a major language of culture, diplomacy, and economics. The Organisation Internationale de la Francophonie (<https://www.francophonie.org/>), established in 1970 and usually referred to as “La Francophonie,” includes 57 member states on four continents. French is a passport to much of the world!

You may want to study French language and culture to get in touch with your family’s history or to learn about the rich cultural legacies of France in Europe and across the globe. Perhaps you’re looking forward to traveling through some of the countries and regions of Europe, Africa, North America, or Asia, where French is spoken and you want to build your language skills. Or, maybe you’re interested in a diplomatic or global business career that involves multinational companies. Whatever the basis of your interest, a major in French in the University of Oregon’s Department of Romance Languages will help you to expand your knowledge and horizons.

The Department of Romance Languages is a diverse multicultural and multilingual unit with a first-rate faculty from around the world. As a major or minor, you will gain an extensive knowledge of languages and cultures and will have invaluable opportunities for intellectual growth. You’ll also be able to engage in a wide variety of extracurricular activities, including lectures and film festivals, language conversation groups, study abroad programs, and internships.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Language proficiency: French majors should reach at least a level of Intermediate-High (speaking) and Advanced (writing) in the primary target language according to ACTFL proficiency standards.

- Analytical skills related to the field/target language (research and writing): French majors should be able to: a) use basic tools/methods of analysis in literary and cultural studies; b) use technical vocabulary appropriate for the discipline (literary and cultural analysis, linguistic style and register, etc.); c) demonstrate understanding of academic writing (manage and cite bibliographic resources, document all sources, including in-line citations in writing, etc.)
- Content objectives (literature/culture): Demonstrate familiarity with examples of the cultural/artistic production in the target language from different historical periods and different geographical areas in the Francophone world. Identify authors, texts, themes, and literary/artistic/intellectual movements in the areas studied. Relate cultural artifacts (literature, film, fine arts) to the historical, cultural, and social contexts in which they were produced.
- Disciplinary methods (humanities or social science): identify basic disciplinary questions that define literary analysis/cultural studies or sociolinguistics; apply or relate disciplinary questions to current debates in the arts, politics, social conflicts, etc.
- Interact with proficient speakers on a variety of familiar and professional topics, in a culturally appropriate manner.

Courses for the major are principally taught in the language of study and immerse students in a diversity of cultures and variations spoken. Cultural, linguistic and literary production – writing, film and other media – studied in RL courses reflect variations of race, gender, social class, climate, religion, and historical and artistic movements and counter-movements.

All courses for French and Francophone Studies majors and minors must be *upper-division*, with the exception of two lower-division classes (FR 150 and FR 203). Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

French and Francophone Studies Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*

Code	Title	Credits
Culture and Language		8
FR 203	Intermediate French III	
FR 301	La France contemporaine	
FR 302	Culture et langage Le monde francophone contemporain	
FR 307	Oral Skills ((must take twice for 4 credits to count toward this requirement))	
Foundations ^{1, 4}		28
FR 150	Cultural Legacies of France	
300-Level or above FR courses ²		
Courses that address French-speaking communities (literature, culture, linguistics, food studies, history, art, art history, political science, etc) may be applied. ³		
Expertise ⁴		12

FR 407 or above FR courses

Total Credits 48¹ 16 credits must be in French (FR 300-level or above).² Extra Culture and Language courses may be used (FR 301, FR 302, FR 307).³ Contact the department's advisor for approved course list.⁴ RL 407 may be used with approval from department's advisor.**Additional Requirements**

- 12 credits must be taught by UO faculty (in-residence or study abroad/away)

Departmental Honors

Approval for graduation with honors is granted to any student who meets one of the following requirements:

1. Maintains at least a 4.00 grade point average (GPA) in all upper-division department course work and at least a 3.50 GPA overall, **or**
2. Maintains at least a 3.75 GPA in all upper-division department course work and at least a 3.50 GPA overall, and submits an honors thesis written under the guidance of a Romance languages faculty thesis advisor. The thesis adviser determines whether the thesis is acceptable and may require the student to register for up to 6 pass/no pass (P/N) credits in Thesis (FR, ITAL, SPAN 403)

If a student wishes to apply for honors by submitting an honors thesis, the application for graduation with honors must be submitted by the end of the term that immediately precedes the term of graduation. If a student is planning on graduating in the spring term, they must apply for graduation through their departmental advisor during the winter term.

Transfer credits and overseas-study work used to fulfill major graduation requirements are typically included in determining the major GPA.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Italian Studies (BA)

Leonardo da Vinci said, "The noblest pleasure is the joy of understanding." There's something especially wonderful about understanding another language. It enables you to think and express yourself in a new way. Using that newfound skill to communicate with people whose culture and life experiences are very different from yours can bring you much joy.

An estimated 180 million people worldwide speak Italian as their primary or secondary language. Almost 20 million North Americans identify as having Italian ancestry. Italy is internationally recognized for its rich contributions to art, architecture, music, literature, and philosophy. Today Italy attracts interest in a wide variety of areas, including tourism, emigrant heritage, filmmaking, fashion and design, and gastronomy.

You might want to study Italian to get in touch with your family's history, or with Italy's incomparable artistic heritage. Or maybe you're looking forward to traveling in a famously beautiful country, and you want to take some language skills with you. Perhaps you're interested in a global business career that involves multinational companies. Whatever the basis of your interest, the University of Oregon's Department of Romance Languages will help you to expand your knowledge and horizons.

Romance Languages is a diverse, multicultural and multilingual unit that offers a first-rate faculty from around the world. As a major or minor, you will gain an extensive knowledge of languages and cultures and will have invaluable opportunities for intellectual growth. You'll also be able to engage in a wide variety of extracurricular activities, including lectures

and film festivals, language conversation groups, study abroad programs, and internships.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Language proficiency: Italian majors should reach a level of Intermediate-High (speaking and writing) in the primary target language according to ACTFL proficiency standards.
- Analytical skills related to the field/target language (research and writing): Italian majors should be able to a) use basic tools/methods of analysis in either literary studies or linguistics; b) use technical vocabulary for literary analysis and criticism or linguistic analysis; c) demonstrate mastery of technical aspects of professional writing (manage bibliographic resources, document ideas using MLA or APA style, include in-line citations in writing, etc.)
- Content objectives (literature/culture): Demonstrate familiarity with examples of the cultural/artistic production in the target language from different historical periods. Identify authors, texts, themes, and literary/artistic/intellectual movements in the periods studied. Relate cultural artifacts (literature, film, fine arts) to the historical, cultural, and social contexts in which they were produced.
- Discipline (humanities or social science): identify basic disciplinary questions that define literary analysis/cultural studies or sociolinguistics; apply or relate disciplinary questions to current debates in the arts, politics, social conflicts, etc.

Courses for the major are principally taught in the language of study and immerse students in a diversity of cultures and variations spoken. Cultural, linguistic and literary production – writing, film and other media – studied in RL courses reflect variations of race, gender, social class, climate, religion, and historical and artistic movements and counter-movements.

Italian Studies Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

RL 407 or higher ²	
Total Credits	48

¹ 20 credits must be upper-division. 12 of 20 upper-division credits must be taught in Italian.

² Coursework must be completed in Italian.

Additional Requirements

- 28 upper-division credits
- 24 credits must be taught in Italian (200-level or higher ITAL courses)
- 12 credits must be taught by UO faculty (in-residence or study abroad)

Departmental Honors

Approval for graduation with honors is granted to any student who meets one of the following requirements:

1. Maintains at least a 4.00 grade point average (GPA) in all upper-division department course work and at least a 3.50 GPA overall, **or**
2. Maintains at least a 3.75 GPA in all upper-division department course work and at least a 3.50 GPA overall, and submits an honors thesis written under the guidance of a Romance languages faculty thesis advisor. The thesis adviser determines whether the thesis is acceptable and may require the student to register for up to 6 pass/no pass (P/N) credits in Thesis (FR, ITAL, SPAN 403)

If a student wishes to apply for honors by submitting an honors thesis, the application for graduation with honors must be submitted by the end of the term that immediately precedes the term of graduation. If a student is planning on graduating in the spring term, they must apply for graduation through their departmental advisor during the winter term.

Transfer credits and overseas-study work used to fulfill major graduation requirements are typically included in determining the major GPA.

Romance Languages (BA)

Students who major in Romance languages intensively study two Romance languages (French, Italian, Portuguese, or Spanish). Advanced knowledge of two languages opens up a world of travel, study, and job opportunities.

Our students explore not only the languages but also the literature and cultures of the modern and historical Romance world. Courses in the

program focus on prose, poetry, theater, and film, as well as history and language. Romance languages students are encouraged to travel and study abroad.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Language proficiency: RL majors should reach at least a level of Intermediate-High (speaking) and Advanced (writing) in the primary target language and for the second language at least a level of Intermediate-Mid in all skills according to ACTFL proficiency standards.
- Analytical skills related to the field/target languages (research and writing): Romance Languages majors should be able to: a) use basic tools/methods of analysis in either literary studies or linguistics, b) use technical vocabulary for literary analysis and criticism or linguistic analysis, c) demonstrate mastery of technical aspects of professional writing (manage bibliographic resources, document ideas using appropriate stylesheet, include in-line citations in writing, etc.)
- Content objectives (literature/culture): Demonstrate familiarity with examples of the cultural/artistic production in the target languages from different historical periods. Identify authors, texts, themes, and literary/artistic/intellectual movements in the periods studied. Relate cultural artifacts (literature, film, fine arts) to the historical, cultural, and social contexts in which they were produced.
- Discipline (humanities or social science): identify basic disciplinary questions that define literary analysis/cultural studies or sociolinguistics; apply or relate disciplinary questions to current debates in the arts, politics, social conflicts, etc.

Romance Languages Major Requirements

Romance languages majors must complete a minimum of 12 credits in literature, film, translation, and/or linguistics courses on the Eugene campus. At least 8 credits of these 12 must be in courses numbered 407 or higher.

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

Transfer credits and overseas-study work used to fulfill major graduation requirements are typically included in determining the major GPA.

Spanish (BA)

Courses in language, literature, film, visual arts, and other media from many different regions and periods offer students the chance to explore the breadth and depth of the cultures of the Spanish-speaking world. Students gain knowledge of the linguistic structure of the language and its different varieties and are exposed to the historical and social contexts of Spanish-speaking communities, highlighting the social characteristics of communities where Spanish is used.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Language proficiency: RL majors should reach at least a level of Intermediate-High (speaking) and Advanced (writing) in the primary target language according to ACTFL proficiency standards.
- Analytical skills related to the field/target language (research and writing): RL majors should be able to \ a) use basic tools/methods of analysis in either literary studies or linguistics , \ b) use technical vocabulary for literary analysis and criticism or linguistic analysis, \ c) demonstrate mastery of technical aspects of professional writing (manage bibliographic resources, document ideas using MLA or APA style, include in-line citations in writing, etc.)
- Content objectives (literature/culture): Demonstrate familiarity with examples of the cultural/artistic production in the target language from different historical periods. Identify authors, texts, themes, and literary/artistic/intellectual movements in the periods studied. Relate cultural artifacts (literature, film, fine arts) to the historical, cultural, and social contexts in which they were produced. Content objectives (language in society-Spanish): Identify the geographical distribution and historical origins of varieties of Spanish; recognize variation as a fundamental part of language, and explain the kinds of sociolinguistic variation (historical, social, geographic) that can occur in languages; explain the relationship between language and identity; demonstrate understanding of methods of linguistic data collection and analysis.
- Discipline (humanities or social science): identify basic disciplinary questions that define literary analysis/cultural studies or sociolinguistics; apply or relate disciplinary questions to current debates in the arts, politics, social conflicts, etc.
- Writing: write logical, convincing critical argument as response to a critical question, using evidence from primary literary and historical documents as well as secondary essays by modern scholars. Demonstrate continued improvement in written expression in Spanish, with increased attention to accuracy and fluency.

Courses for the major are principally taught in the language of study and immerse students in a diversity of cultures and variations spoken. Cultural, linguistic and literary production – writing, film and other media – studied in RL courses reflect variations of race, gender, social class, climate, religion, and historical and artistic movements and counter-movements.

Spanish Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

French and Francophone Studies Minor

As one of the major languages of world governance, diplomacy, commerce, and culture, French opens up a world of opportunities. In addition to gaining real-world proficiency and mastering communication skills across languages and cultures, students of French learn essential critical thinking skills, analytical reasoning, and adaptability. No matter the career and life path you choose, studying French will prepare you to face the challenges and opportunities both of the job market and of an increasingly globalized world.

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*. Further details are available on the department website.

- Minimum 20 credits must be taught in Italian.

Spanish Minor

Spanish is the official language of twenty-one countries in the world, and it is the second most spoken language in the United States. We provide classes in Spanish that help students develop linguistic abilities with an emphasis on real-world proficiency, as well as introduce students to the major historical and cultural phenomena that characterize the Spanish-speaking world.

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*. Further details are available on the department website.

Minor in Spanish

Code	Title	Credits
Upper-division SPAN courses taught in Spanish ¹		24
Elective ²		4
Total Credits		28

¹ 12 credits must be taught by UO faculty (in-residence or on approved study abroad/away)

² Electives may include SPAN 150, 203, 228, 238, 248, LAS 200, HIST 248, or any upper-division SPAN course taught in Spanish.

Upper-division SPAN courses taught in Spanish:

- 300-level SPAN courses (301-399)
- 400-level SPAN courses (407, 410-499)

French (MA)

As one of the major languages of world governance, diplomacy, commerce, and culture, French opens up a world of opportunities. In addition to gaining real-world proficiency and mastering communication skills across languages and cultures, students of French learn essential critical thinking skills, analytical reasoning, and adaptability. No matter the career and life path you choose, studying French will prepare you to face the challenges and opportunities both of the job market and of an increasingly globalized world.

The Department of Romance Languages offers an MA program in French. Our graduate students have the opportunity to study with leading scholars whose research interests range from modern and contemporary French studies in fields ranging from Francophone Africa and the French Enlightenment to terror studies and translation studies.

Admission Procedure

An applicant for admission to the master of arts (MA) program should have completed an undergraduate major in a Romance language and literature or its equivalent (e.g., licence, laurea, licenciatura). Students with a degree in another discipline may apply, provided they have a good knowledge of at least one Romance language and are familiar with one Romance literature.

To apply for graduate study in the Department of Romance Languages, you must first complete the University of Oregon online graduate application (<https://insight.uoregon.edu/apply/>).

All required items must be uploaded in order for the application to be considered complete. The department's application requires the following:

Graduate School/Department Application Questions: This serves as your application for both admission *and* application for Graduate Employee (GE) salary and benefits at .49 FTE. Please see our complete GE funding (<https://graduatestudies.uoregon.edu/funding/ge/salary-benefits/>) details.

Statement of Purpose: You must upload a 750-word statement of purpose describing: your academic experience, your reasons

for wanting to do graduate work at the Department of Romance Languages, and your eventual career goals. Students applying to the PhD program must also specify their research interests. Please see our suggested Guidelines on Writing a Statement of Purpose (https://romance.uoregon.edu/sites/romance1.uoregon.edu/files/guidelines_on_writing_a_statement_of_purpose_1.pdf).

Writing Sample: Only required if applying to the PhD program. The substantial writing sample may be a MA thesis, a graduate seminar paper, or an undergraduate research paper on a relevant topic.

Three (3) Letters of Recommendation: In the online application, you will provide contact information for three (3) professors who can make direct reference to your aptitude for graduate courses in literary and cultural studies, as well as your language competency. One referee may refer to your potential teaching ability. Please see our suggested Guidelines on Requesting Letters of Recommendation from Faculty (https://romance.uoregon.edu/sites/romance1.uoregon.edu/files/guidelines_for_requesting_letters_of_recommendation_from_faculty_1.pdf).

Your referees will be automatically emailed a request to provide their letter of recommendations at the email address you provide.

Transcripts: Upload official or unofficial copies to the online application. Please see detailed instructions on Official Transcript Requirements (<https://gradschool.uoregon.edu/admissions/how-to-apply/transcripts/>).

English Language Proficiency: Requirement now for all applicants whose native language is not English (not just international students). Please see detailed instructions here on acceptable tests and test scores (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/english-proficiency/>).

GRE scores are not required for the Department of Romance Languages graduate programs.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge.
- Demonstrate effective oral and written communication skills in discipline-specific genres.
- Understand ethical issues and responsibilities especially in matters related to professionalism and in presenting original work and writing and publishing papers.
- Conduct independent research and analysis in their discipline.

All courses must be taken on a graded basis. Coursework must be completed with grades of B– or better, and a grade point average (GPA) of 3.00 or better must be maintained.

A student whose knowledge of the language or languages is found to be deficient must take remedial work—an advanced writing class, additional study abroad, or some form of language immersion.

Research project	
Total Credits	52

¹ Typically taken fall term of first year.

² Typically taken winter term of first year.

³ Taken in preparation for second-year fall forum presentation.

Master of Arts Research Project

The degree requires a research project (either a master's essay or a pedagogy portfolio) that allows a student to expand his or her expertise in literary and cultural studies or in teaching language, literature, and culture. A faculty member oversees the development of the final product and evaluates it. The student must identify a faculty member willing to serve as director and secure his or her signature of approval for the project by the ninth week of spring term of the first year.

The research project should be between 6,000 and 9,000 words. In consultation with the research project director, the student chooses whether to write the project in a Romance language or in English.

Research projects are approved by the director and are referred to the student's MA examination committee (see below) for remediation if the work is found to be deficient or in need of revision. The director submits a final copy of the approved essay or portfolio to the department office by the last day of classes in spring term of the second year.

Essay in Literary and Cultural Studies

This essay allows students to widen their knowledge in one or more Romance languages, literatures, and cultures. In addition, the essay permits students to focus in greater depth on writing formal academic prose, presenting an interpretation, constructing an argument, documenting sources and references, and honing persuasive strategies. At the end of the first year of study, the student chooses one of the seminar papers that he or she submitted during the first three terms of course work. During the summer session immediately following, the student expands and polishes the paper.

Students who plan to apply for the PhD program in Romance languages at the University of Oregon must complete an essay in literary and cultural studies.

MA Pedagogy Portfolio in Teaching Language, Literature, and Culture

This project allows students to explore in depth specific issues of teaching a Romance language, its literature and cultures. The portfolio is designed in consultation with the director and serves to demonstrate the student's professional expertise. The portfolio may include the following documents: a coherent collection of teaching materials supported by a theoretical rationale; a description, personal assessment, and third-party evaluation of an internship experience (e.g., a participatory learning experience at the UO); a formal "philosophy of teaching" statement; documentation of participation in a professional conference; and other components as recommended by the director.

Students who plan to apply for the doctoral program in Romance languages at the University of Oregon must complete a master of arts essay in literary and cultural studies.

Examinations

The master of arts examination comprises two four-hour exams taken in the seventh week of spring term in the second year.

For students studying for the MA in French, Italian, or Spanish, the first exam consists of one specific question in each of the four literary periods. The second exam consists of a detailed analysis of a short text in two parts: a close reading of the text and a consideration of the text in its social, historical, cultural, and/or literary contexts. The student, in consultation with the examination committee, chooses in which of the four periods this second exam is done.

The exams for the Romance languages MA are similar to those for French, Italian and Spanish. However, in the first exam students are asked to draw on examples from both their major and minor literatures in their answer to at least one of the questions. They are encouraged (but not required) to refer to both literatures in their answers to the other three short questions.

The graduate secretary informs the students and the examination committee members of the scheduled exam date.

Examination Committee

By the sixth week of fall term in the second year, students submit to their advisors and to the director of graduate studies an MA Examination Committee form with the names of faculty members suggested to cover other examination periods and signed by the committee chair.

By the end of the tenth week of fall term in the second year, students submit a preliminary examination reading list of literary works on which to be examined to the members of their exam committees and to the director of graduate studies.

Examination Reading List

Students construct a reading list, drawn up in consultation with the exam committee, using the departmental reading list and the syllabuses and bibliographies of the seminars they have taken, as well as the summer reading done in preparation for the fall forum.

For students studying for the MA in French, Italian, or Spanish, the reading list consists of at least ten items in each of the four periods, drawn up in consultation with the exam committee. Of the ten works in each period, at least five must be chosen from the departmental reading list. The other works can be suggested by the student, based on his or her own interests and readings.

For students studying for the MA in Romance languages, the reading list consists of at least twelve items in each of the four periods: eight in the major language and four in the minor. Of the eight works in the major language, at least four must be chosen from the departmental reading list; all texts in the minor language must be chosen from the departmental reading list.

The examination reading list also contains two additional secondary readings (usually literary histories or general literary surveys) that cover the four periods, also drawn from the departmental reading list.

The final version of the examination reading list must be approved and signed by the student's exam committee and filed with the graduate secretary by the end of winter term of the second year. Students are

responsible for distributing the approved reading list to the MA committee members as soon as the list is approved.

Examination Questions

In all fields, one of the two exams must be answered in the candidate's major language; the other can be written in the major language or in English. Choice of language is to be determined in consultation with the committee chair.

The four members of the MA exam committee work together to prepare the questions for the candidate. The exam committee chair is responsible for collecting questions from the committee members and submitting them to the graduate secretary. On the first exam, the candidate answers four questions, choosing between two questions in each of four periods. On the second exam, the candidate chooses between two possible selections for the close reading analysis. The four members read and grade both exams and come to an agreement on the final grade to be submitted for each exam. The committee chair moderates this discussion, submits the grades to the graduate secretary, and communicates the results to the candidate. The student passes when the average grade for each exam is satisfactory (*low pass*, *pass* or *high pass*).

The master's examination is a closed book exam and therefore without footnotes or a bibliography. The exam must be typed using a twelve-point font, double-spaced.

Students who fail the master of arts examination in whole or in part will be allowed to take it over (in whole or in part) once. They are encouraged to do so during the course of the following term (usually the summer session) and no later than six months after failing. If they fail again, they are disqualified.

Research: [Topic] (FR 601), Research: [Topic] (ITAL 601), or Research: [Topic] (SPAN 601) and Practicum: [Topic] (FR 606), Practicum: [Topic] (ITAL 606), or Practicum: [Topic] (SPAN 606).

Students who hold a GTF appointment may register for 2 credits of Practicum or one credit of Research in order to complete the nine credits per term required by the Division of Graduate Studies (two graduate courses constitute 8 credits). During the first quarter of their first year, students holding a GTF appointment use Practicum to develop their teaching skills in practical application. Students not holding a GTF appointment are encouraged to take a third course (for a total of 12 credits) or 1 credit of Research to work on an independent research project.

Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605).

Students may request to do a Reading and Conference course to address a specific problem on which no course currently exists. Before the end of the term preceding the Reading and Conference course, the student prepares a project proposal and submits it to the faculty member with whom he or she wants to work. The project proposal should include a statement of the problem the student wants to explore and a tentative reading list of primary and secondary sources. Only one 4-credit Reading and Conference course may be used to satisfy requirements for the MA degree.

Reading and Conference: [Topic] (RL 605). The purpose of this required independent reading course is to motivate students to begin reading during the summer following their first year in the MA program in preparation for the exams that will take place in the spring term of their second year.

During the spring term of the first year of the MA program, students present to their advisors a reading list of eight to ten works to be studied during the summer. The books must belong to no more than two of the periods defined by the MA program, and five of the books must be taken from the departmental reading list. At least one of the texts should be a literary history or a similar text about the period. This approved list (signed by the faculty advisor) will be submitted to the director of graduate studies before the end of the spring term.

In fall term, students will register for a 2-credit, graded Reading and Conference course with the director of graduate studies as the instructor of record.

In the third week of the fall term of the second year, students present the findings of their summer study in a public forum. This one-day forum is organized as a professional meeting, with a chair for each session, a discussion following the presentations, and refreshments. Most Romance language faculty members are present during these presentations, as well as all MA students.

Presentations are fifteen minutes long and delivered in English. Presentations focus on the main themes that students have explored in their readings. Students should be able to discuss both literary techniques and historical context of the period selected, providing examples from the books they have read. Plot summaries should be avoided.

At the end of the presentations, the faculty members meet to evaluate the presentations. On satisfactory completion of this exercise, students receive 2 graded credits for the course. If the faculty members find that a presentation was deficient, they recommend that the student do supervised reading with the faculty specialist in the period before being assigned a grade and receiving course credit.

Italian (MA)

An estimated 180 million people worldwide speak Italian as their primary or secondary language. Almost 17 million North Americans identify as having Italian ancestry.

Italian culture is traditionally recognized for its rich contributions to art, architecture, music, literature, and philosophy. Today Italy attracts interest in a wide variety of areas, including tourism, its emigrant heritage, filmmaking, fashion industry, and gastronomy.

We offer an MA in Italian. The Master of Arts program consists of:

- Coursework (<https://italian.uoregon.edu/coursework-0/>)
- Fall Forum Presentation and Paper (<https://italian.uoregon.edu/fall-forum/>)
- Written Examinations (<https://italian.uoregon.edu/examinations/>)
- M.A. Research Project (<https://italian.uoregon.edu/ma-research-project/>)

The program is designed to be completed in two years.

Admission Procedure

An applicant for admission to the master of arts (MA) program should have completed an undergraduate major in a Romance language and literature or its equivalent (e.g., licence, laurea, licenciatura). Students with a degree in another discipline may apply, provided they have a good

knowledge of at least one Romance language and are familiar with one Romance literature.

To apply for graduate study in the Department of Romance Languages, you must first complete the University of Oregon online graduate application.

All required items must be uploaded in order for the application to be considered complete. The department's application requires the following:

Graduate School/Department Application Questions: This serves as your application for both admission *and* application for Graduate Employee (GE) salary and benefits at .49 FTE. Please see our complete GE funding details.

Statement of Purpose: You must upload a 750-word statement of purpose describing: your academic experience, your reasons for wanting to do graduate work at the Department of Romance Languages, and your eventual career goals. Students applying to the PhD program must also specify their research interests. Please see our suggested Guidelines on Writing a Statement of Purpose.

Writing Sample: Only required if applying to the PhD program. The substantial writing sample may be a MA thesis, a graduate seminar paper, or an undergraduate research paper on a relevant topic.

Three (3) Letters of Recommendation: In the online application, you will provide contact information for three (3) professors who can make direct reference to your aptitude for graduate courses in literary and cultural studies, as well as your language competency. One referee may refer to your potential teaching ability. Please see our suggested Guidelines on Requesting Letters of Recommendation from Faculty.

Your referees will be automatically emailed a request to provide their letter of recommendations at the email address you provide.

Transcripts: Upload official or unofficial copies to the online application. Please see detailed instructions on Official Transcript Requirements.

English Language Proficiency: Requirement now for all applicants whose native language is not English (not just international students). Please see detailed instructions here on acceptable tests and test scores.

GRE scores are not required for the Department of Romance Languages graduate programs.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge.
- Demonstrate effective oral and written communication skills in discipline-specific genres.
- Understand ethical issues and responsibilities especially in matters related to professionalism and in presenting original work and writing and publishing papers.
- Conduct independent research and analysis in their discipline.

All courses must be taken on a graded basis. Coursework must be completed with grades of B– or better, and a grade point average (GPA) of 3.00 or better must be maintained.

A student whose knowledge of the language or languages is found to be deficient must take remedial work—an advanced writing class, additional study abroad, or some form of language immersion.

³ Taken in preparation for second-year fall forum.

Master of Arts Research Project

The degree requires a research project (either a master's essay or a pedagogy portfolio) that allows a student to expand his or her expertise in literary and cultural studies or in teaching language, literature, and culture. A faculty member oversees the development of the final product and evaluates it. The student must identify a faculty member willing to serve as director and secure his or her signature of approval for the project by the ninth week of spring term of the first year.

The research project should be between 6,000 and 9,000 words. In consultation with the research project director, the student chooses whether to write the project in a Romance language or in English.

Research projects are approved by the director and are referred to the student's MA examination committee (see below) for remediation if the work is found to be deficient or in need of revision. The director submits a final copy of the approved essay or portfolio to the department office by the last day of classes in spring term of the second year.

Essay in Literary and Cultural Studies

This essay allows students to widen their knowledge in one or more Romance languages, literatures, and cultures. In addition, the essay permits students to focus in greater depth on writing formal academic prose, presenting an interpretation, constructing an argument, documenting sources and references, and honing persuasive strategies. At the end of the first year of study, the student chooses one of the seminar papers that he or she submitted during the first three terms of course work. During the summer session immediately following, the student expands and polishes the paper.

Students who plan to apply for the PhD program in Romance languages at the University of Oregon must complete an essay in literary and cultural studies.

MA Pedagogy Portfolio in Teaching Language, Literature, and Culture

This project allows students to explore in depth specific issues of teaching a Romance language, its literature and cultures. The portfolio is designed in consultation with the director and serves to demonstrate the student's professional expertise. The portfolio may include the following documents: a coherent collection of teaching materials supported by a theoretical rationale; a description, personal assessment, and third-party evaluation of an internship experience (e.g., a participatory learning experience at the UO); a formal "philosophy of teaching" statement; documentation of participation in a professional conference; and other components as recommended by the director.

Students who plan to apply for the doctoral program in Romance languages at the University of Oregon must complete a master of arts essay in literary and cultural studies.

Examinations

The master of arts examination comprises two four-hour exams taken in the seventh week of spring term in the second year.

For students studying for the MA in French, Italian, or Spanish, the first exam consists of one specific question in each of the four literary periods. The second exam consists of a detailed analysis of a short text in two parts: a close reading of the text and a consideration of the text in its social, historical, cultural, and/or literary contexts. The student, in consultation with the examination committee, chooses in which of the four periods this second exam is done.

The exams for the Romance languages MA are similar to those for French, Italian and Spanish. However, in the first exam students are asked to draw on examples from both their major and minor literatures in their answer to at least one of the questions. They are encouraged (but not required) to refer to both literatures in their answers to the other three short questions.

The graduate secretary informs the students and the examination committee members of the scheduled exam date.

Examination Committee

By the sixth week of fall term in the second year, students submit to their advisors and to the director of graduate studies an MA Examination Committee form with the names of faculty members suggested to cover other examination periods and signed by the committee chair.

By the end of the tenth week of fall term in the second year, students submit a preliminary examination reading list of literary works on which to be examined to the members of their exam committees and to the director of graduate studies.

Examination Reading List

Students construct a reading list, drawn up in consultation with the exam committee, using the departmental reading list and the syllabuses and bibliographies of the seminars they have taken, as well as the summer reading done in preparation for the fall forum.

For students studying for the MA in French, Italian, or Spanish, the reading list consists of at least ten items in each of the four periods, drawn up in consultation with the exam committee. Of the ten works in each period, at least five must be chosen from the departmental reading list. The other works can be suggested by the student, based on his or her own interests and readings.

For students studying for the MA in Romance languages, the reading list consists of at least twelve items in each of the four periods: eight in the major language and four in the minor. Of the eight works in the major language, at least four must be chosen from the departmental reading list; all texts in the minor language must be chosen from the departmental reading list.

The examination reading list also contains two additional secondary readings (usually literary histories or general literary surveys) that cover the four periods, also drawn from the departmental reading list.

The final version of the examination reading list must be approved and signed by the student's exam committee and filed with the graduate secretary by the end of winter term of the second year. Students are responsible for distributing the approved reading list to the MA committee members as soon as the list is approved.

Examination Questions

In all fields, one of the two exams must be answered in the candidate's major language; the other can be written in the major language or in English. Choice of language is to be determined in consultation with the committee chair.

The four members of the MA exam committee work together to prepare the questions for the candidate. The exam committee chair is responsible for collecting questions from the committee members and submitting them to the graduate secretary. On the first exam, the candidate answers four questions, choosing between two questions in each of four periods. On the second exam, the candidate chooses between two possible selections for the close reading analysis. The four members read and grade both exams and come to an agreement on the final grade to be submitted for each exam. The committee chair moderates this discussion, submits the grades to the graduate secretary, and communicates the results to the candidate. The student passes when the average grade for each exam is satisfactory (*low pass, pass or high pass*).

The master's examination is a closed book exam and therefore without footnotes or a bibliography. The exam must be typed using a twelve-point font, double-spaced.

Students who fail the master of arts examination in whole or in part will be allowed to take it over (in whole or in part) once. They are encouraged to do so during the course of the following term (usually the summer session) and no later than six months after failing. If they fail again, they are disqualified.

Research: [Topic] (FR 601), Research: [Topic] (ITAL 601), or Research: [Topic] (SPAN 601) and Practicum: [Topic] (FR 606), Practicum: [Topic] (ITAL 606), or Practicum: [Topic] (SPAN 606).

Students who hold a GTF appointment may register for 2 credits of Practicum or one credit of Research in order to complete the nine credits per term required by the Division of Graduate Studies (two graduate courses constitute 8 credits). During the first quarter of their first year, students holding a GTF appointment use Practicum to develop their teaching skills in practical application. Students not holding a GTF appointment are encouraged to take a third course (for a total of 12 credits) or 1 credit of Research to work on an independent research project.

Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605).

Students may request to do a Reading and Conference course to address a specific problem on which no course currently exists. Before the end of the term preceding the Reading and Conference course, the

student prepares a project proposal and submits it to the faculty member with whom he or she wants to work. The project proposal should include a statement of the problem the student wants to explore and a tentative reading list of primary and secondary sources. Only one 4-credit Reading and Conference course may be used to satisfy requirements for the MA degree.

Reading and Conference: [Topic] (RL 605). The purpose of this required independent reading course is to motivate students to begin reading during the summer following their first year in the MA program in preparation for the exams that will take place in the spring term of their second year.

During the spring term of the first year of the MA program, students present to their advisors a reading list of eight to ten works to be studied during the summer. The books must belong to no more than two of the periods defined by the MA program, and five of the books must be taken from the departmental reading list. At least one of the texts should be a literary history or a similar text about the period. This approved list (signed by the faculty advisor) will be submitted to the director of graduate studies before the end of the spring term.

In fall term, students will register for a 2-credit, graded Reading and Conference course with the director of graduate studies as the instructor of record.

In the third week of the fall term of the second year, students present the findings of their summer study in a public forum. This one-day forum is organized as a professional meeting, with a chair for each session, a discussion following the presentations, and refreshments. Most Romance language faculty members are present during these presentations, as well as all MA students.

Presentations are fifteen minutes long and delivered in English. Presentations focus on the main themes that students have explored in their readings. Students should be able to discuss both literary techniques and historical context of the period selected, providing examples from the books they have read. Plot summaries should be avoided.

At the end of the presentations, the faculty members meet to evaluate the presentations. On satisfactory completion of this exercise, students receive 2 graded credits for the course. If the faculty members find that a presentation was deficient, they recommend that the student do supervised reading with the faculty specialist in the period before being assigned a grade and receiving course credit.

Romance Languages (MA)

The Department of Romance Languages offers an extensive range of courses and degree programs, from instruction in beginning languages through the study of the literatures and cultures of French-, Italian-, Portuguese-, and Spanish-speaking countries. Students can earn a bachelor of arts (BA) degree in French, Italian, Spanish, or Romance languages; the master of arts (MA) is also available in these areas. The doctor of philosophy (PhD), is awarded in either Spanish or Romance languages (RL). The RL PhD encompasses a primary language and literature and a supporting area. Romance languages is a liberal-arts major, providing a valuable background for students interested in graduate work, teaching, and a wide array of other professional and international careers that require strong analytical and communication skills.

Preparation

The department recommends the following preparation for study leading to a major in any of the Romance languages:

- 1. As much work as possible in the student's major language. Knowledge of a second Romance language is helpful but not required
- 2. Knowledge of the history, geography, and politics of the areas where the student's major language is spoken
- 3. Communication skills, speech, and essay writing that help the student convey ideas logically. In literature and film courses, papers or essay examinations are generally required
- 4. Experience in literary and cultural studies and linguistics

Careers

Students who graduate with a bachelor of arts degree in Romance languages typically enter a variety of occupations. Language teaching is an obvious possibility. Proficiency in a second language and knowledge of other cultures enhances study and career opportunities in other areas as well. Romance languages majors, especially those who have a second major in another discipline (e.g., art history, business administration, economics, family and human services, history, international studies, journalism, music, or political science) find positions in communications media, government foreign service, international business and law, libraries, social service organizations, and travel and tourist-related agencies, among others.

Faculty

Faculty members in the Department of Romance Languages actively participate in other UO interdisciplinary programs and departments (e.g., African studies, cinema studies, comparative literature, European studies, Latin American studies, linguistics, medieval studies, and women's and gender studies). For descriptions, see those sections of this catalog.

Scholarships

The department administers scholarships for undergraduate and graduate students of Romance languages:

- The Beall Graduate Dissertation Scholarship is awarded to doctoral students to support dissertation writing
- The Françoise Calin scholarship is awarded every year to a French major or minor
- The Leona M. Kail Scholarship supports studies in the Department of Romance Languages (Offered on alternate years.)
- Wayne Andre Gottshall Fund supports undergraduate students in studies in the Department of Romance Languages
- The Emmanuel Hatzantonis Scholarship is awarded every year to a Romance languages major or minor who is studying in Italy with the university's overseas study program
- Dr. Carl L. Johnson Scholarship supports studies in the Department of Romance Languages with preference to French majors.
- The Helen Fe Jones Spanish Student Fellowship supports study abroad in a Spanish-speaking country
- The Perry J. Powers Scholarship is awarded annually to an outstanding Romance languages student
- The Charles Stickles Endowment Scholarship is awarded for study in a Spanish-speaking country

- Nicolette B. Weicker Memorial Scholarship is awarded with preference to students specializing in French or Italian.
- The James T. and Mary Alice Wetzel Graduate Scholarship is awarded every year to an outstanding graduate student in the Department of Romance Languages

More information may be obtained from the department office in early January or on the department website, rl.uoregon.edu/scholarships (<http://rl.uoregon.edu/scholarships/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge.
- Demonstrate effective oral and written communication skills in discipline-specific genres.
- Understand ethical issues and responsibilities especially in matters related to professionalism and in presenting original work and writing and publishing papers.
- Conduct independent research and analysis in their discipline.

All courses must be taken on a graded basis. Coursework must be completed with grades of B– or better, and a grade point average (GPA) of 3.00 or better must be maintained.

A student whose knowledge of the language or languages is found to be deficient must take remedial work—an advanced writing class, additional study abroad, or some form of language immersion.

Master of Arts Research Project

The degree requires a research project (either a master's essay or a pedagogy portfolio) that allows a student to expand his or her expertise in literary and cultural studies or in teaching language, literature, and culture. A faculty member oversees the development of the final product and evaluates it. The student must identify a faculty member willing to serve as director and secure his or her signature of approval for the project by the ninth week of spring term of the first year.

The research project should be between 6,000 and 9,000 words. In consultation with the research project director, the student chooses whether to write the project in a Romance language or in English.

Research projects are approved by the director and are referred to the student's MA examination committee (see below) for remediation if the work is found to be deficient or in need of revision. The director submits a final copy of the approved essay or portfolio to the department office by the last day of classes in spring term of the second year.

Essay in Literary and Cultural Studies

This essay allows students to widen their knowledge in one or more Romance languages, literatures, and cultures. In addition, the essay permits students to focus in greater depth on writing formal academic prose, presenting an interpretation, constructing an argument, documenting sources and references, and honing persuasive strategies. At the end of the first year of study, the student chooses one of the seminar papers that he or she submitted during the first three terms of course work. During the summer session immediately following, the student expands and polishes the paper.

Students who plan to apply for the PhD program in Romance languages at the University of Oregon must complete an essay in literary and cultural studies.

MA Pedagogy Portfolio in Teaching Language, Literature, and Culture

This project allows students to explore in depth specific issues of teaching a Romance language, its literature and cultures. The portfolio is designed in consultation with the director and serves to demonstrate the student's professional expertise. The portfolio may include the following documents: a coherent collection of teaching materials supported by a theoretical rationale; a description, personal assessment, and third-party evaluation of an internship experience (e.g., a participatory learning experience at the UO); a formal "philosophy of teaching" statement; documentation of participation in a professional conference; and other components as recommended by the director.

Students who plan to apply for the doctoral program in Romance languages at the University of Oregon must complete a master of arts essay in literary and cultural studies.

Examinations

The master of arts examination comprises two four-hour exams taken in the seventh week of spring term in the second year.

For students studying for the MA in French, Italian, or Spanish, the first exam consists of one specific question in each of the four literary periods. The second exam consists of a detailed analysis of a short text in two parts: a close reading of the text and a consideration of the text in its social, historical, cultural, and/or literary contexts. The student, in consultation with the examination committee, chooses in which of the four periods this second exam is done.

The exams for the Romance languages MA are similar to those for French, Italian and Spanish. However, in the first exam students are asked to draw on examples from both their major and minor literatures in their answer to at least one of the questions. They are encouraged (but not required) to refer to both literatures in their answers to the other three short questions.

The graduate secretary informs the students and the examination committee members of the scheduled exam date.

Examination Committee

By the sixth week of fall term in the second year, students submit to their advisors and to the director of graduate studies an MA Examination Committee form with the names of faculty members suggested to cover other examination periods and signed by the committee chair.

By the end of the tenth week of fall term in the second year, students submit a preliminary examination reading list of literary works on which to be examined to the members of their exam committees and to the director of graduate studies.

Examination Reading List

Students construct a reading list, drawn up in consultation with the exam committee, using the departmental reading list and the syllabuses and bibliographies of the seminars they have taken, as well as the summer reading done in preparation for the fall forum.

For students studying for the MA in French, Italian, or Spanish, the reading list consists of at least ten items in each of the four periods, drawn up in consultation with the exam committee. Of the ten works in

each period, at least five must be chosen from the departmental reading list. The other works can be suggested by the student, based on his or her own interests and readings.

For students studying for the MA in Romance languages, the reading list consists of at least twelve items in each of the four periods: eight in the major language and four in the minor. Of the eight works in the major language, at least four must be chosen from the departmental reading list; all texts in the minor language must be chosen from the departmental reading list.

The examination reading list also contains two additional secondary readings (usually literary histories or general literary surveys) that cover the four periods, also drawn from the departmental reading list.

The final version of the examination reading list must be approved and signed by the student's exam committee and filed with the graduate secretary by the end of winter term of the second year. Students are responsible for distributing the approved reading list to the MA committee members as soon as the list is approved.

Examination Questions

In all fields, one of the two exams must be answered in the candidate's major language; the other can be written in the major language or in English. Choice of language is to be determined in consultation with the committee chair.

The four members of the MA exam committee work together to prepare the questions for the candidate. The exam committee chair is responsible for collecting questions from the committee members and submitting them to the graduate secretary. On the first exam, the candidate answers four questions, choosing between two questions in each of four periods. On the second exam, the candidate chooses between two possible selections for the close reading analysis. The four members read and grade both exams and come to an agreement on the final grade to be submitted for each exam. The committee chair moderates this discussion, submits the grades to the graduate secretary, and communicates the results to the candidate. The student passes when the average grade for each exam is satisfactory (*low pass*, *pass* or *high pass*).

The master's examination is a closed book exam and therefore without footnotes or a bibliography. The exam must be typed using a twelve-point font, double-spaced.

Students who fail the master of arts examination in whole or in part will be allowed to take it over (in whole or in part) once. They are encouraged to do so during the course of the following term (usually the summer session) and no later than six months after failing. If they fail again, they are disqualified.

Research: [Topic] (FR 601), Research: [Topic] (ITAL 601), or Research: [Topic] (SPAN 601) and Practicum: [Topic] (FR 606), Practicum: [Topic] (ITAL 606), or Practicum: [Topic] (SPAN 606).

Students who hold a GTF appointment may register for 2 credits of Practicum or one credit of Research in order to complete the nine credits per term required by the Division of Graduate Studies (two graduate courses constitute 8 credits). During the first quarter of their first year, students holding a GTF appointment use Practicum to develop their teaching skills in practical application. Students not holding a GTF appointment are encouraged to take a third course (for a total of 12 credits) or 1 credit of Research to work on an independent research project.

Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605).

Students may request to do a Reading and Conference course to address a specific problem on which no course currently exists. Before the end of the term preceding the Reading and Conference course, the student prepares a project proposal and submits it to the faculty member with whom he or she wants to work. The project proposal should include a statement of the problem the student wants to explore and a tentative reading list of primary and secondary sources. Only one 4-credit Reading and Conference course may be used to satisfy requirements for the MA degree.

Reading and Conference: [Topic] (RL 605). The purpose of this required independent reading course is to motivate students to begin reading during the summer following their first year in the MA program in preparation for the exams that will take place in the spring term of their second year.

During the spring term of the first year of the MA program, students present to their advisors a reading list of eight to ten works to be studied during the summer. The books must belong to no more than two of the periods defined by the MA program, and five of the books must be taken from the departmental reading list. At least one of the texts should be a literary history or a similar text about the period. This approved list (signed by the faculty advisor) will be submitted to the director of graduate studies before the end of the spring term.

In fall term, students will register for a 2-credit, graded Reading and Conference course with the director of graduate studies as the instructor of record.

In the third week of the fall term of the second year, students present the findings of their summer study in a public forum. This one-day forum is organized as a professional meeting, with a chair for each session, a discussion following the presentations, and refreshments. Most Romance language faculty members are present during these presentations, as well as all MA students.

Presentations are fifteen minutes long and delivered in English. Presentations focus on the main themes that students have explored in their readings. Students should be able to discuss both literary techniques and historical context of the period selected, providing examples from the books they have read. Plot summaries should be avoided.

At the end of the presentations, the faculty members meet to evaluate the presentations. On satisfactory completion of this exercise, students receive 2 graded credits for the course. If the faculty members find that a presentation was deficient, they recommend that the student do supervised reading with the faculty specialist in the period before being assigned a grade and receiving course credit.

Spanish (MA)

<http://rl.uoregon.edu>

David Wacks, Department Head

119 Friendly Hall
1233 University of Oregon
Eugene, OR 97403-1233
541-346-4021
Fax: 541-346-4030

Spanish is the official language of twenty-one countries in the world, and it is the second most spoken language in the United States. Our department pioneers the teaching of Spanish as a Heritage Language. (<https://shl.uoregon.edu/>)

We provide classes in Spanish that help students develop linguistic abilities with an emphasis on real-world proficiency, as well as introduce students to the major historical and cultural phenomena that characterize the Spanish-speaking world.

We offer both MA and PhD programs in Spanish. Most of our graduate students have a Graduate Employee (GE) position that provides a tuition waiver, health insurance, and a stipend to cover living expenses. We also offer scholarships and support for travel to professional meetings.

The master's degree program provides solid grounding and broad coverage in the literatures and cultures of each of the language areas. The university's library resources for research in Spanish support the department's graduate programs; in some fields they are outstanding. The library's holdings of learned periodicals are extensive.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge.
- Demonstrate effective oral and written communication skills in discipline-specific genres.
- Understand ethical issues and responsibilities especially in matters related to professionalism and in presenting original work and writing and publishing papers.
- Conduct independent research and analysis in their discipline.

All courses must be taken on a graded basis. Coursework must be completed with grades of B– or better, and a grade point average (GPA) of 3.00 or better must be maintained.

A student whose knowledge of the language or languages is found to be deficient must take remedial work—an advanced writing class, additional study abroad, or some form of language immersion.

¹ Taken fall term of first year.

² Taken winter term of first year.

³ Taken in preparation for second-year fall forum.

⁴ This requirement can be satisfied with any SPAN graduate course or relevant RL graduate course.

Master of Arts Research Project

The degree requires a research project (either a master's essay or a pedagogy portfolio) that allows a student to expand his or her expertise in literary and cultural studies or in teaching language, literature, and culture. A faculty member oversees the development of the final product and evaluates it. The student must identify a faculty member willing to serve as director and secure his or her signature of approval for the project by the ninth week of spring term of the first year.

The research project should be between 6,000 and 9,000 words. In consultation with the research project director, the student chooses whether to write the project in a Romance language or in English.

Research projects are approved by the director and are referred to the student's MA examination committee (see below) for remediation if the work is found to be deficient or in need of revision. The director submits a final copy of the approved essay or portfolio to the department office by the last day of classes in spring term of the second year.

Essay in Literary and Cultural Studies

This essay allows students to widen their knowledge in one or more Romance languages, literatures, and cultures. In addition, the essay permits students to focus in greater depth on writing formal academic prose, presenting an interpretation, constructing an argument, documenting sources and references, and honing persuasive strategies. At the end of the first year of study, the student chooses one of the seminar papers that he or she submitted during the first three terms of course work. During the summer session immediately following, the student expands and polishes the paper.

Students who plan to apply for the PhD program in Romance languages at the University of Oregon must complete an essay in literary and cultural studies.

MA Pedagogy Portfolio in Teaching Language, Literature, and Culture

This project allows students to explore in depth specific issues of teaching a Romance language, its literature and cultures. The portfolio is designed in consultation with the director and serves to demonstrate the

student's professional expertise. The portfolio may include the following documents: a coherent collection of teaching materials supported by a theoretical rationale; a description, personal assessment, and third-party evaluation of an internship experience (e.g., a participatory learning experience at the UO); a formal "philosophy of teaching" statement; documentation of participation in a professional conference; and other components as recommended by the director.

Students who plan to apply for the doctoral program in Romance languages at the University of Oregon must complete a master of arts essay in literary and cultural studies.

Examinations

The master of arts examination comprises two four-hour exams taken in the seventh week of spring term in the second year.

For students studying for the MA in French, Italian, or Spanish, the first exam consists of one specific question in each of the four literary periods. The second exam consists of a detailed analysis of a short text in two parts: a close reading of the text and a consideration of the text in its social, historical, cultural, and/or literary contexts. The student, in consultation with the examination committee, chooses in which of the four periods this second exam is done.

The exams for the Romance languages MA are similar to those for French, Italian and Spanish. However, in the first exam students are asked to draw on examples from both their major and minor literatures in their answer to at least one of the questions. They are encouraged (but not required) to refer to both literatures in their answers to the other three short questions.

The graduate secretary informs the students and the examination committee members of the scheduled exam date.

Examination Committee

By the sixth week of fall term in the second year, students submit to their advisors and to the director of graduate studies an MA Examination Committee form with the names of faculty members suggested to cover other examination periods and signed by the committee chair.

By the end of the tenth week of fall term in the second year, students submit a preliminary examination reading list of literary works on which to be examined to the members of their exam committees and to the director of graduate studies.

Examination Reading List

Students construct a reading list, drawn up in consultation with the exam committee, using the departmental reading list and the syllabuses and bibliographies of the seminars they have taken, as well as the summer reading done in preparation for the fall forum.

For students studying for the MA in French, Italian, or Spanish, the reading list consists of at least ten items in each of the four periods, drawn up in consultation with the exam committee. Of the ten works in each period, at least five must be chosen from the departmental reading list. The other works can be suggested by the student, based on his or her own interests and readings.

For students studying for the MA in Romance languages, the reading list consists of at least twelve items in each of the four periods: eight in the major language and four in the minor. Of the eight works in the major language, at least four must be chosen from the departmental reading

list; all texts in the minor language must be chosen from the departmental reading list.

The examination reading list also contains two additional secondary readings (usually literary histories or general literary surveys) that cover the four periods, also drawn from the departmental reading list.

The final version of the examination reading list must be approved and signed by the student's exam committee and filed with the graduate secretary by the end of winter term of the second year. Students are responsible for distributing the approved reading list to the MA committee members as soon as the list is approved.

Examination Questions

In all fields, one of the two exams must be answered in the candidate's major language; the other can be written in the major language or in English. Choice of language is to be determined in consultation with the committee chair.

The four members of the MA exam committee work together to prepare the questions for the candidate. The exam committee chair is responsible for collecting questions from the committee members and submitting them to the graduate secretary. On the first exam, the candidate answers four questions, choosing between two questions in each of four periods. On the second exam, the candidate chooses between two possible selections for the close reading analysis. The four members read and grade both exams and come to an agreement on the final grade to be submitted for each exam. The committee chair moderates this discussion, submits the grades to the graduate secretary, and communicates the results to the candidate. The student passes when the average grade for each exam is satisfactory (*low pass*, *pass* or *high pass*).

The master's examination is a closed book exam and therefore without footnotes or a bibliography. The exam must be typed using a twelve-point font, double-spaced.

Students who fail the master of arts examination in whole or in part will be allowed to take it over (in whole or in part) once. They are encouraged to do so during the course of the following term (usually the summer session) and no later than six months after failing. If they fail again, they are disqualified.

Research: [Topic] (FR 601), Research: [Topic] (ITAL 601), or Research: [Topic] (SPAN 601) and Practicum: [Topic] (FR 606), Practicum: [Topic] (ITAL 606), or Practicum: [Topic] (SPAN 606).

Students who hold a GTF appointment may register for 2 credits of Practicum or one credit of Research in order to complete the nine credits per term required by the Division of Graduate Studies (two graduate courses constitute 8 credits). During the first quarter of their first year, students holding a GTF appointment use Practicum to develop their teaching skills in practical application. Students not holding a GTF appointment are encouraged to take a third course (for a total of 12 credits) or 1 credit of Research to work on an independent research project.

Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605).

Students may request to do a Reading and Conference course to address a specific problem on which no course currently exists. Before the end of the term preceding the Reading and Conference course, the student prepares a project proposal and submits it to the faculty member with whom he or she wants to work. The project proposal should include a statement of the problem the student wants to explore and a tentative reading list of primary and secondary sources. Only one 4-credit Reading

and Conference course may be used to satisfy requirements for the MA degree.

Reading and Conference: [Topic] (RL 605). The purpose of this required independent reading course is to motivate students to begin reading during the summer following their first year in the MA program in preparation for the exams that will take place in the spring term of their second year.

During the spring term of the first year of the MA program, students present to their advisors a reading list of eight to ten works to be studied during the summer. The books must belong to no more than two of the periods defined by the MA program, and five of the books must be taken from the departmental reading list. At least one of the texts should be a literary history or a similar text about the period. This approved list (signed by the faculty advisor) will be submitted to the director of graduate studies before the end of the spring term.

In fall term, students will register for a 2-credit, graded Reading and Conference course with the director of graduate studies as the instructor of record.

In the third week of the fall term of the second year, students present the findings of their summer study in a public forum. This one-day forum is organized as a professional meeting, with a chair for each session, a discussion following the presentations, and refreshments. Most Romance language faculty members are present during these presentations, as well as all MA students.

Presentations are fifteen minutes long and delivered in English. Presentations focus on the main themes that students have explored in their readings. Students should be able to discuss both literary techniques and historical context of the period selected, providing examples from the books they have read. Plot summaries should be avoided.

At the end of the presentations, the faculty members meet to evaluate the presentations. On satisfactory completion of this exercise, students receive 2 graded credits for the course. If the faculty members find that a presentation was deficient, they recommend that the student do supervised reading with the faculty specialist in the period before being assigned a grade and receiving course credit.

Romance Languages (PhD)

<http://rl.uoregon.edu>

David Wacks, Department Head

119 Friendly Hall
1233 University of Oregon
Eugene, OR 97403-1233
541-346-4021
Fax: 541-346-4030

The Department of Romance Languages the degree of doctor of philosophy (PhD) in Romance languages.

The PhD program allows students to focus on a specific literary and/or cultural field of interest.

Students follow these degree programs in an intellectually stimulating and supportive environment, characterized by close personal supervision, interdisciplinary approaches to literary and cultural studies, and

professional training in both research methods and foreign-language pedagogy.

The university's library resources for research in French, Italian, and Spanish support the department's graduate programs; in some fields they are outstanding. The library's holdings of learned periodicals are extensive.

The PhD program in Romance languages is designed to provide

- a thorough familiarity with several fields (e.g., a movement, a genre, a period, or a literary problem)
- the opportunity to situate the student's special interests in the wider context of Romance languages and literatures as well as in the context of trends inside and outside Western European culture
- the tools necessary to engage literary issues at a high level
- the ability to examine new and challenging literary or theoretical perspectives

Students who enter the PhD program with no knowledge of a second Romance language are required to start learning one as soon as possible during their graduate studies.

The PhD program has five components: course work, comprehensive examination, dissertation prospectus, original dissertation, and final oral defense.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge.
- Demonstrate effective oral and written communication skills in discipline-specific genres.
- Conduct independent research and analysis in their discipline.
- Demonstrate independent scientific thinking and advanced knowledge in their current discipline and in related areas of their discipline.
- Understand ethical issues and responsibilities especially in matters related to professionalism, field work, and in writing and publishing theses, dissertations and academic papers.
- Professionalization into the field of study: publications, presentations, attended conferences, funded fellowships, and professional association activities.

Program Overview

Academic advisors assigned to the students as they enter the program will give them concrete advice on how to fulfill our program requirements (core courses, electives and second language requirement, among other items). Students completing a PhD in Romance Languages will have the opportunity to develop expertise in primary and secondary fields based on cohesive themes, disciplinary approaches, and linguistic geographies:

- Geographies: Mediterranean studies, transatlantic studies, European studies, Latin American studies, Latinx studies
- Poetics, genre, and form
- Critical race and postcolonial studies
- Gender and queer studies
- Media studies (visual, material and digital cultures)
- Environment, food studies, and green and blue humanities

- Language in contact: sociolinguistics, second language studies, and/or language program directorship
- Translation studies
- Other fields proposed by student, approved by advisor and graduate committee

With their advisor's approval and by petition to the graduate committee, any graduate student can apply to fulfill a primary or secondary field not represented on this list or in fields outside the department.

Coursework

Coursework for the PhD in Romance Languages allows students to:

- Acquire exposure to a broad range of theoretical perspectives and methodological approaches.
- Develop expertise in a primary and secondary field.
- Broaden and deepen their conception of the PhD scholarly project/dissertation.
- Acquire exposure to interdisciplinary comparative approaches, transnational connections, and minority languages and cultures.
- Join and/or establish professional networks in their chosen discipline(s).

Besides English and their primary Romance language, students fulfill a second language requirement relevant to their research interests, either another Romance language taught in the department (French, Italian, Spanish, or Portuguese) or another language relevant to their research. A student wishing to integrate a language other than a Romance language in their PhD program is invited to develop its articulation with their research interests in their PhD statement and plan of study. The advisor will certify on the PhD timeline form that the student has completed the second language requirement before advancing to the PhD exam.

Course Requirements

Course requirements depend on a student's credentials when admitted. Students entering with a BA must complete 80 credits; students holding an MA degree in an appropriate field must complete 40 credits. All credits must be taken graded and at the graduate level (500-600), and a grade point average (GPA) of 3.00 or better must be maintained. Distribution of course requirements for the PhD is as follows:

- RL 636 Language teaching methods (4 credits)
- RL 620 Graduate Study in RL (4 credits)
- RL 623 RL Colloquium (4 credits)
- 4 courses in primary area (16 credits)
- 3 courses in secondary area (12 credits)
- RL 603 Dissertation (12-18 credits)

Students typically will register for RL 601 or RL 605 during the terms that they are preparing for exams or writing their prospectus.

PhD students who are teaching take FR, ITAL, or SPAN 609 1st year Pedagogy or FR, ITAL, or SPAN 609 2nd year Pedagogy (2 credits), which requires weekly meetings with their teaching supervisor and provides training that prepares them further to teach their classes successfully.

Graduate Courses (https://uoregon-my.sharepoint.com/:w/g/personal/Imillar_uoregon_edu/EFWF2EHaYXIZDu6wS-QxoceEBsp1Z_ADqmoEg-rVZOPBahQ/?e=BbVF7p)

Students Entering with a BA

Students entering the RL PhD program with a BA will need a total of 20 courses (80 credits) to complete their PhD requirements, and prepare in their primary and secondary fields:

- Three courses (12 credits) of RL required courses (RL 636, 620, 623)
- Eleven courses (44 credits) in the Romance Languages department, usually concentrated in the major language
- Three courses (12 credits) outside the department in fields related to their research (i.e., linguistics, philosophy, history, English, anthropology, ethnic studies, women and gender studies, education studies, comparative literature)
- Three courses (12 credits) with the RL prefix (RL, ITAL, PORT or FR), or in other departments if the courses are related to their primary and secondary fields, which may also satisfy the second language requirement

Students Entering with an MA

Students entering the RL PhD with an MA will complete a total of 10 courses (40 credits), with their primary and secondary field-satisfying courses drawn from any of the categories below:

- Three graduate courses (12 credits) of RL required courses (RL 636, 620, 623)
- Four graduate courses (16 credits) in the Romance Languages department, usually in the major language
- Three graduate courses (12 credits) in Romance Languages, SPAN, FR, PORT, ITAL, or outside the department, which may also satisfy the second language requirement

Students who have taken RL 636, RL 620, and RL 623 in the course of completing an MA in the Romance Languages department at UO will be considered to have met these requirements, and in consultation with their advisor may substitute these credits with courses of their choosing inside or outside the department. If the MA preparation is found to be deficient or if the MA has been taken in a different field, students may be required to take additional coursework.

FR, ITAL, and SPAN 609 (2 credits) are a required courses with the Teaching Language Supervisor for those graduate students who are teaching FR, ITAL, or SPAN 101, 102, 103 (1st year) or FR, ITAL, and SPAN 201, 202, 203 (2nd year). It is not a required course to graduate.

Second-Language Requirement

In addition to their major language, students must demonstrate proficiency in a second language that is relevant to their research interests and that will allow them to participate in additional academic discourse communities. This may be another Romance language taught in the department (French, Italian, Portuguese or Spanish) or another language relevant to their research (Latin, Arabic, or Ladino; Basque, Catalan, or Galician; Nahuatl, Quechua, or Yucatec Maya; etc.). Students will justify their choice of second language and how they will evidence competency in the annual review at the end of their first year.

Students can fulfill the second-language requirement in several ways, as follows:

- Completing three graduate courses or equivalent (12 graded credits) in a second Romance language: French, Italian, Spanish or Portuguese or RL-prefix course structured around readings in one of these languages

- Completing three graduate courses or equivalent (12 graded credits) in an approved language outside the Romance Languages department

Students will work with their advisor(s) to plan how they will satisfy their second language requirement and submit a petition to the graduate committee for approval.

Qualifying Examination

The PhD qualifying examination evaluates students in their chosen fields of specialization and consists of two written exams followed by an oral exam. It serves to clarify both the subject matter of the dissertation and possible approaches to it. Examinations are graded PASS or NO PASS by a faculty committee (the "exam committee"). Upon successful completion of the PhD qualifying examination, a student is advanced to candidacy and may present the dissertation prospectus.

The PhD qualifying examination is a two-term process. At least one term prior to the term in which the exam will take place, the student designates an exam committee. The exam committee is composed of three members of the RL graduate faculty, one of whom serves as the chair. A fourth committee member may be added from RL or another department. The student consults with their exam committee members to determine their fields of interest. These fields form the basis of their PhD qualifying examination, and typically the dissertation. During this term, students will register for guided readings (RL 605 for 2-4 credits) with the exam committee chair. In consultation with the members of the exam committee, students:

- Create a core reading list for their primary field of interest (15 works minimum) and a core reading list for their secondary field of interest (10 works minimum).
- Compose two annotated bibliographies (one page per work): one of works in the primary field (15 works) and one of works in their secondary field(s) (10 works). Students are encouraged to include both theoretical/methodological works as well as primary texts, case studies, or data sets, as appropriate, as part of the annotated bibliographies. These bibliographies form the basis for the exam reading list.
- Work with their committee chair to compose a one-page exam research statement. This statement explains their interests, presents connections among their fields of study, outlines the beginnings of their dissertation project, and offers a term-by-term plan of work.

During the term of the qualifying exam, the student composes two written exams. Each written exam responds to one of two questions formulated by members of the exam committee. These exams should be a maximum of 20 double-spaced, typed pages. The student has two weeks to write each of the essays. Two weeks after the successful completion of both written exams, the student takes an oral exam. The oral exam will integrate the areas addressed in the written exams with other facets of the student's declared fields of interest. During the two-hour oral exam, the candidate should be prepared to defend the written exams, respond to questions about the full reading list, and elaborate on ways in which the written essays help to define a dissertation project within the student's fields of interest.

Dissertation Prospectus

The prospectus should define the scope of the dissertation and demonstrate the originality of the project. The student submits an eight-to-ten-page prospectus and a substantial research bibliography of primary and secondary material to the faculty members on his or her

dissertation committee. Students are responsible for putting together a dissertation committee, which normally consists of four members: one director and one core member from the Department of Romance Languages, one additional core member from Romance Languages or another department, and one member from another department who serves as the institutional representative. A student may also choose to have two co-directors in the Department of Romance Languages (plus one further member of the department).

When the student has a solid draft of the prospectus, she or he will schedule a meeting with the dissertation committee members for a presentation and discussion of the prospectus. Following this conversation, the student will make final revisions to the prospectus. Once the committee has given its final approval, the student will submit the prospectus to the department for filing.

Students are reminded that they must have a dissertation committee in place and proper documents filed with the Graduate School six months before the dissertation defense. Any student making significant changes to the dissertation project after the final approval of the prospectus must schedule a meeting with the dissertation committee before proceeding.

Original Dissertation and Oral Defense

The dissertation should constitute an original and valuable contribution to scholarship in the student's field of interest. It should be characterized by mature analysis, informed and reasoned argument, and an awareness of the means and goals of research. It is the student's responsibility to ascertain the rules and deadlines of the Graduate School for proper filing of the dissertation.

Preparing the dissertation for approval: Students are strongly encouraged to familiarize themselves with the stringent formatting and structure guidelines for the dissertation (the information is provided by the Graduate School and is available online). Students are reminded that a final copy of the dissertation must be distributed to the dissertation committee for final approval at least four weeks before the dissertation defense. It must be complete at the time it is sent to the committee with all chapters including introduction and conclusion, appendices, and bibliography.

Final oral dissertation defense: When all members of the dissertation committee have approved the dissertation, a public oral presentation and defense of the work is held.

Program Benchmarks:

Annual Meeting: Students provide a progress report, a future plan of study term by term, and meet with their advisor annually during the spring term. We will have a template for the progress report with an advising checklist to assure consistency.

Dissertation Progress Meeting: No later than one year following approval of the prospectus, the student meets with the advisor and one other member of the dissertation committee to discuss the progress, status and trajectory of the dissertation, potential publications associated with it, and any factors impeding the work or troubling the student. The student will submit all drafted work to the advisor and second committee member at least one week before the meeting takes place. After this meeting, the advisor will submit a brief description of the student's qualitative and quantitative progress to the Director of Graduate Studies. Please use the First Year Dissertation Status Meeting form to document the meeting. Students may find it useful to have a fall term progress meeting with two members of their committee during each year of

dissertation writing. Advisors should submit a Progress Meeting form to the Director of Graduate Studies.

First Chapter Requirement: By the last day of classes of the third regular term of dissertation writing, the student must submit a fully drafted chapter of the dissertation to the Dissertation Advisor and the Graduate Coordinator. “Fully drafted” implies a chapter whose argumentative structure is complete, and which has been proofread and includes references, but which might not be considered “polished” or final text. Students who do not meet this milestone work must meet with the Director of Graduate Studies to discuss available resources and strategies to support their progress and to craft and execute a writing plan. (Such meetings are available to all students at any point of the degree.) As per the GDRS, graduate students must be making satisfactory progress toward degree. Students who fail to submit a fully drafted chapter of the dissertation to the Graduate Coordinator by the end of winter term of the first full year of dissertation writing risk losing their GE appointments, unless the advisor or the DGS can provide and document the reasons for an extension of this submission. Note: It is worth emphasizing that the first fully drafted chapter may be submitted as part of the dissertation progress meeting earlier, and that, ideally, students will have progressed well beyond a single chapter draft at the end of the first full year of dissertation writing. At the same time, individual paths and timelines to a complete dissertation vary widely among students.

Spanish (PhD)

Spanish is the official language of twenty-one countries in the world, and it is the second most spoken language in the United States. Our department pioneers the teaching of Spanish as a Heritage Language. (<https://shl.uoregon.edu/>)

We provide classes in Spanish that help students develop linguistic abilities with an emphasis on real-world proficiency, as well as introduce students to the major historical and cultural phenomena that characterize the Spanish-speaking world.

We offer both MA and PhD programs in Spanish. Most of our graduate students have a Graduate Employee (GE) position that provides a tuition waiver, health insurance, and a stipend to cover living expenses. We also offer scholarships and support for travel to professional meetings.

Coursework for the PhD in Spanish allows students to:

- acquire exposure to a broad range of theoretical perspectives and methodological approaches
- develop expertise in a primary and secondary field
- broaden and deepen their conception of the Ph.D. Scholarly Project/ dissertation
- acquire exposure to interdisciplinary comparative approaches, transnational connections, and minority languages and cultures
- join and/or establish professional networks in their chosen discipline(s)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge.
- Demonstrate effective oral and written communication skills in discipline-specific genres.

- Conduct independent research and analysis in their discipline.
- Demonstrate independent scientific thinking and advanced knowledge in their current discipline and in related areas of their discipline.
- Understand ethical issues and responsibilities especially in matters related to professionalism, field work, and in writing and publishing theses, dissertations and academic papers.
- Professionalization into the field of study: publications, presentations, attended conferences, funded fellowships, and professional association activities.

PhD in Spanish

Program Overview

Academic advisors assigned to the students as they enter the program will give them concrete advice on how to fulfill our program requirements (core courses, electives and second language requirement, among other items). Students completing a PhD in Spanish will have the opportunity to develop expertise in primary and secondary fields based on cohesive themes, disciplinary approaches, and linguistic geographies:

- Geographies: Mediterranean studies, transatlantic studies, European studies, Latin American studies, Latinx studies
- Poetics, genre, and form
- Critical race and postcolonial studies
- Gender and queer studies
- Media studies (visual, material and digital cultures)
- Environment, food studies, and green and blue humanities
- Language in contact: Sociolinguistics, second language studies, and/or language program directorship
- Translation studies
- Other fields proposed by student, approved by advisor and graduate committee

With their advisor’s approval and by petition to the graduate committee, any graduate student can apply to fulfill a primary or secondary field not represented on this list or in fields outside the department.

Course Requirements

Course requirements depend on a student’s credentials when admitted. Students entering with a BA must complete 80 credits; students holding an MA degree in an appropriate field (see Graduate Admissions) must complete 40 credits. All credits must be taken graded and at the graduate level (500-600), and a grade point average (GPA) of 3.00 or better must be maintained. Distribution of course requirements for the PhD is as follows:

- RL 636 Language teaching methods (4 credits)
- RL 620 Graduate Study in RL (4 credits)
- RL 623 RL Colloquium (4 credits)
- Four courses in primary area (16 credits)
- Three courses in secondary area (12 credits)
- RL 603 Dissertation (12-18 credits)

Students typically will register for RL 601 or RL 605 during the terms that they are preparing for exams or writing their prospectus.

PhD students who are teaching take SPAN 609 1st year Pedagogy or SPAN 609 2nd year Pedagogy (2 credits), which requires weekly

meetings with their teaching supervisor and provides training that prepares them further to teach their classes successfully.

Students Entering with a BA

Students entering the Spanish PhD program with a BA will need a total of 20 courses (80 credits) to complete their PhD requirements, and prepare in their primary and secondary fields:

- Three courses (12 credits) of RL required courses (RL 636, 620, 623)
- Eleven courses (44 credits) in the Romance Languages department. At least 9 courses must have a SPAN prefix; up to two courses may have an RL prefix when the written coursework is completed in Spanish
- Three courses (12 credits) outside the department in fields related to their research (i.e.: linguistics, philosophy, history, English, anthropology, ethnic studies, women and gender studies, education studies, comparative literature)
- Three courses (12 credits) with the RL prefix (RL, ITAL, PORT or FR), or in other departments if the courses are related to their primary and secondary fields, which may also be used to satisfy the second language requirement

Students Entering with an MA

Students entering the Spanish PhD with an MA will complete a total of 10 courses (40 credits), with their Primary and Secondary Field-satisfying courses drawn from any of the categories below:

- Three graduate courses (12 credits) of RL required courses (RL 636, 620, 623)
- Four graduate courses (16 credits) in the Romance Languages Department with SPAN prefix
- Three graduate courses (12 credits) in Romance Languages, SPAN, FR, PORT, ITAL, or outside the department, which may also satisfy the second language requirement (One of these courses may also satisfy the second language requirement.)

Students who have taken RL 636, RL 620, and RL 623 in the course of completing an MA in the Romance Languages department at UO will be considered to have met these requirements and in consultation with their advisor may substitute these credits with courses of their choosing inside or outside the department. If the MA preparation is found to be deficient or if the MA has been taken in a different field, students may be required to take additional coursework.

SPAN 609 (2 credits) is a required course with the Teaching Language Supervisor for those graduate students who are teaching SPAN 101, 102, 103 (1st year) or SPAN 201, 202, 203 (2nd year). It is not a required course to graduate.

Second-Language Requirement

In addition to their major language, students must demonstrate proficiency in a second language that is relevant to their research interests and that will allow them to participate in additional academic discourse communities. This may be another Romance language taught in the department (French, Italian, Portuguese or Spanish) or another language relevant to their research (Latin, Arabic, or Ladino; Basque, Catalan, or Galician; Nahuatl, Quechua, or Yucatec Maya; etc.). Students will justify their choice of second language and how they will evidence competency in the annual review at the end of their first year.

Students can fulfill the second-language requirement in several ways, as follows:

- Completing one graduate course or equivalent (4 graded credits) in a second Romance language: French, Italian, or Portuguese or RL-prefix course structured around readings in one of these languages
- Completing one graduate course or equivalent (4 graded credits) in an approved language outside the Romance Languages department.

Students will work with their advisor(s) to plan how they will satisfy their second language requirement and submit a petition to the Graduate Committee for approval.

Benchmarks

Graduate Portfolio: Students will file the materials they create throughout their progress in the program (Coursework essays, Pre-professional Experience Internship, Prospectus, publications, and their dissertation) in a Portfolio that will allow their committees to track their academic progress and their intellectual commitment to the field.

Professional Development Experience

Students interested in exploring alternative careers as future professional opportunities are encouraged to undertake an internship or a comparable experience in the community in Eugene in the summer or during the year, or in another state or any other Latin American country or Spain, in a place where they can use their Spanish linguistic skills while developing administrative skills. This is not a mandatory professional experience. Faculty advisors or/and the Career Center will work with students to locate appropriate opportunities. This professional development experience is envisioned to train further our graduate students for a career paths outside the academia. The experience does not have to be local; students can contemplate diverse options nationally or internationally. For example, some options would be to work as a volunteer interpreters in a court of law or in a hospital, as assistant teacher in a public school, internship in a government facility, administrative assistant or Public relations in a business, assistant or interpreter in an NGO such as Centro Latinoamericano in Eugene, or another NGO related to their field in the US, Latin America or the Iberian peninsula. The internship or voluntary work could range from 15 hours to 30 hours. It may be completed at any time during their years of study; it is an optional experience, not a requirement. Students must submit a brief reflection (500-1000 words) on their experience to their graduate advisor; the reflection should address how the experience has been formative, and how it affected their thinking about future career option once they finish their PhD. The reflection should also speak to how it may connect to their course of study and enrich their preparation as graduate students. The reflection should be shared with the contact person in the institution they worked with, who should also send a brief letter certifying that the student did the voluntary work.

Qualifying Examination

The PhD qualifying examination evaluates students in their chosen fields of specialization and consists of two written exams followed by an oral exam. It serves to clarify both the subject matter of the dissertation and possible approaches to it. Examinations are graded PASS or NO PASS by a faculty committee (the "Exam Committee"). Upon successful completion of the PhD Qualifying Examination, a student is advanced to candidacy and may present the dissertation prospectus.

The PhD qualifying examination is a two-term process. At least one term prior to the term in which the exam will take place, the student designates

an exam committee. the exam committee is composed of three members of the RL graduate faculty, one of whom serves as the chair. A fourth committee member may be added from RL or another department. The student consults with their exam committee members to determine their fields of interest.

These fields form the basis of their PhD qualifying examination, and typically for the dissertation. During this term, students will register for guided readings (RL 605 for 2-4 credits) with the exam committee chair. In consultation with the members of the exam committee, students:

- Create a core reading list for their Primary Field of interest (15 works minimum) and a core reading list for their secondary field of interest (10 works minimum).
- Compose two annotated bibliographies (one page per work), one of works in the primary field (15 works) and one of works in their secondary field(s) (10 works). Students are encouraged to include both theoretical/ methodological works as well as primary texts, case studies, or data sets, as appropriate, as part of the annotated bibliographies. These bibliographies form the basis for the exam reading list.
- Work with their committee chair to compose a one-page Exam Research Statement. This statement explains their interests, presents connections among their fields of study, outlines the beginnings of their dissertation project, and offers a term-by-term plan of work.

During the term of the qualifying exam, the student composes two written exams. Each written exam responds to one of two questions formulated by members of the Exam Committee. These exams should be a maximum of 20 double-spaced, typed pages. The student has two weeks to write each of the essays. Two weeks after the successful completion of both written exams, the student takes an oral exam. The oral exam will integrate the areas addressed in the written exams with other facets of the student's declared fields of interest. During the two-hour oral exam, the candidate should be prepared to defend the written exams, respond to questions about the full reading list, and elaborate on ways in which the written essays help to define a dissertation project within the student's fields of interest.

Dissertation Prospectus

The prospectus should define the scope of the dissertation and demonstrate the originality of the project. The student submits an eight-to ten-page prospectus and a substantial research bibliography of primary and secondary material to the faculty members on his or her dissertation committee. Students are responsible for putting together a dissertation committee, which normally consists of four members: one director and one core member from the Department of Romance Languages, one additional core member from Romance Languages or another department, and one member from another department who serves as the institutional representative. A student may also choose to have two co-directors in the Department of Romance Languages (plus one further member of the department).

When the student has a solid draft of the prospectus, she or he will schedule a meeting with the dissertation committee members for a presentation and discussion of the prospectus. Following this conversation, the student will make final revisions to the prospectus. Once the committee has given its final approval, the student will submit the prospectus to the department for filing.

Students are reminded that they must have a dissertation committee in place and proper documents filed with the Graduate School six months

before the dissertation defense. Any student making significant changes to the dissertation project after the final approval of the prospectus must schedule a meeting with the dissertation committee before proceeding.

Original Dissertation and Oral Defense

The dissertation should constitute an original and valuable contribution to scholarship in the student's field of interest. It should be characterized by mature analysis, informed and reasoned argument, and an awareness of the means and goals of research. It is the student's responsibility to ascertain the rules and deadlines of the Graduate School for proper filing of the dissertation.

Preparing the dissertation for approval: Students are strongly encouraged to familiarize themselves with the stringent formatting and structure guidelines for the dissertation (the information is provided by the Graduate School and is available online or in pamphlet form). Students are reminded that a final copy of the dissertation must be distributed to the dissertation committee for final approval at least four weeks before the dissertation defense. It must be complete at the time it is sent to the committee with all chapters including introduction and conclusion, appendices, and bibliography.

Final oral dissertation defense: When all members of the dissertation committee have approved the dissertation, a public oral presentation and defense of the work is held.

Program Benchmarks:

Annual Meeting: Students provide a progress report, a future plan of study term by term, and meet with their advisor annually during the spring term. We will have a template for the progress report with an advising checklist to assure consistency.

Dissertation Progress Meeting: No later than one year following approval of the prospectus, the student meets with the advisor and one other member of the dissertation committee to discuss the progress, status and trajectory of the dissertation, potential publications associated with it, and any factors impeding the work or troubling the student. The student will submit all drafted work to the advisor and second committee member at least one week before the meeting takes place. After this meeting, the advisor will submit a brief description of the student's qualitative and quantitative progress to the Director of Graduate Studies. Please use the First Year Dissertation Status Meeting form to document the meeting. Students may find it useful to have a fall term progress meeting with two members of their committee during each year of dissertation writing. Advisors should submit a Progress Meeting form to the Director of Graduate Studies.

First Chapter Requirement: By the last day of classes of the third regular term of dissertation writing, the student must submit a fully drafted chapter of the dissertation to the Dissertation Advisor and the Graduate Coordinator. "Fully drafted" implies a chapter whose argumentative structure is complete, and which has been proofread and includes references, but which might not be considered "polished" or final text. Students who do not meet this milestone work must meet with the Director of Graduate Studies to discuss available resources and strategies to support their progress and to craft and execute a writing plan. (Such meetings are available to all students at any point of the degree.) As per the GDRS, graduate students must be making satisfactory progress toward degree. Students who fail to submit a fully drafted chapter of the dissertation to the Graduate Coordinator by the end of winter term of the first full year of dissertation writing risk losing their GE appointments, unless the advisor or the DGS can provide and

document the reasons for an extension of this submission. Note: It is worth emphasizing that the first fully drafted chapter may be submitted as part of the dissertation progress meeting earlier, and that, ideally, students will have progressed well beyond a single chapter draft at the end of the first full year of dissertation writing. At the same time, individual paths and timelines to a complete dissertation vary widely among students.

RL 607 Professionalization and Dissertation Workshop This course will be offered every other year for students who have submitted their prospectus, and before or while they enter the job market. While the course will allow students to examine the range of career opportunities within and outside the academic job market, the focus will be on drafting cover letters, teaching statements, CVs, and grant proposals; throughout the term, workshop participants will draft a journal article, most likely from a dissertation chapter in progress, and identify an appropriate journal for submission and peer review. As part of this course requirements the students will be developing **Professional Portfolio**, and an **Individual Development Plan (IDP)** to explore professional, career opportunities outside the academia, and how to prepare for them competitively.

Translation Studies Graduate Specialization

Graduate Specialization in Translation Studies

The Oregon Center for Translation Studies, supported by the UO Global Studies Institute, draws together a diverse group of faculty, graduate students, and active professional community members and emeriti who work across languages and disciplines in the area of Translation Studies. We pursue research, teaching, and practice related to multiple forms of translation. As a group we are committed to exploring interdisciplinary aspects of these endeavors.

The Graduate Specialization in Translation Studies aims to strengthen and enrich opportunities for UO students by drawing on existing offerings across disciplines and, where possible, adding to the current curriculum, in Languages, Literatures, Anthropology, International Studies, and Folklore at UO. In this way, the Specialization contributes to strengthening graduate offerings in this vital and complex field.

Russian, East European, and Eurasian Studies

<http://reees.uoregon.edu>

Katya Hokanson, Program Director

114 Friendly Hall
541-346-4065

The Russian, East European, and Eurasian Studies Program is devoted to the study of the peoples living in the eastern third of Europe, throughout the northern steppes of Central Asia, and across Siberia to the Pacific Ocean. Settled over a territory that spans half the earth's time zones, these peoples have created a complex mosaic of cultures, expressed in literature and art as well as in institutions and social forms. Over the centuries, these lands have come under the sway of several great world-historical civilizations and empires: the Byzantine, Mongolian, Ottoman Turkish, Holy Roman, Austro-Hungarian, Russian, and Soviet. These lands have felt the influence of Orthodox Christianity,

Catholicism, Protestantism, Judaism, Islam, Buddhism and Communism. At the intersection of many powerful forces, these lands experience the historical drama of what some call "modernization" with its challenge to customary ways of life. Yet, after centuries of massive transplantation and transformation, national and ethnic heritages survive. Customary ways and native self-consciousness, more diverse than anywhere else on the globe, express themselves with new vigor.

REEES offers a bachelor of arts degree (BA) and a minor.

Fields of Concentration

The program offers the following concentrations for the undergraduate major and minor:

- Russian language, literature, and culture (humanities emphasis/field of concentration)
- Russian and East European history, politics, and society (social science emphasis/field of concentration)

Courses with these focus areas are offered by the program and such participating departments as anthropology, geography, history, political science, religious studies and sociology. Any course taken that includes instruction on one of these focus areas and has at least 40 percent Russian, East European, former Soviet Eurasian, or Slavic content, including independent research undertaken by the student, may be applied to the field of concentration requirement with administrative approval.

Students can view sample programs of study in the various concentrations on the program website.

The **major** requires 36 graded credits; courses must be passed with grades of C– or better. Credits used to fulfill the language requirement (students must complete three years of Russian or show they have attained third-year proficiency) may not be applied to the 36-credit requirement.

The **minor** requires 24 graded credits; courses must be passed with a grade of C– or better, and also requires third-year proficiency. Courses taken to fulfill the language requirement may not be used to fulfill the 24-credit requirement.

Overseas Study

Qualified students of Russian may spend a summer, semester, or academic year studying the language. While study in Russia is not currently supported, a direct exchange program with the University of Latvia is available, as well as Russian language study programs organized by SRAS in Armenia, Georgia, Latvia and Kyrgyzstan. American Councils offers Russian language programs in Kazakhstan, Armenia, and Georgia. Opportunities also exist for study in the Czech Republic, Hungary, and Poland. Limited fellowship aid is available for these programs.

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See International Affairs in the **Academic Resources** section of this catalog. Students interested in study in the Commonwealth of Independent States or in Eastern Europe should write or call the Overseas Program Coordinator, Office of International Affairs, 5209 University of Oregon, Eugene, Oregon 97403-5209; 541-346-3206.

Students may also wish to study Russian domestically at Middlebury College or the University of California, Los Angeles. Students with advanced proficiency are encouraged to apply for relevant internships and career development opportunities, such as working at *Lesnoe Ozero*, Concordia Language Villages' summer Russian immersion program for children ages 7-18

Cultural Programs

The program sponsors lectures, panel discussions, symposiums, films, plays, exhibitions, concerts, and festivals. These presentations involve scholars from other institutions in the United States and Europe as well as specialists at the university. In addition, the program faculty engages in outreach activities with local schools, community groups, and other organizations. Students in the program typically run a REEES club, focusing on cultural activities and the practice of Russian language skills.

Visiting Faculty Members

The program sponsors extended stays by visiting Fulbright and International Research and Exchange Board scholars from Russia and Eastern Europe.

Resources

The University of Oregon's library has more than 130,000 volumes in Russian and other Slavic and East European languages, more than 60,000 on Russia and Eastern Europe in Western languages; and subscribes to more than 100 serial titles. The library also has a large collection of Russian and East European films. The bulk of the collection is in the humanities and social sciences.

Facilities at the well-known Yamada Language Center enhance the learning of Slavic and East European languages. For more information, visit the website (<https://ylc.uoregon.edu/>).

Faculty

Heghine Hakobyan, instructor (Slavic librarian). BA, 1983, Kurgan College of Culture and Enlightenment; MA, 1988, Tyuman State; MLIS, 2003, City University of New York, Queens College. (2007)

Katya E. Hokanson, professor (Russian literature, travel literature, cultural studies). B.A., 1984, Williams; M.A., 1988, Ph.D., 1994, Stanford. (1995)

Susanna Soojung Lim, associate professor (19th- and 20th-century Russian literature). BA, 1996, MA, 1998, Korea; MA, 1999, PhD, 2006, California, Los Angeles. (2007)

Julia Nemirovskaya, associate teaching professor (Russian literature and theater). MA, 1986, PhD, 1991, Moscow State. (2002)

Jenifer Presto, associate professor (Russian literature, modernism, environmental criticism). A.B., 1985, Smith; M.A., 1988, Middlebury; M.A., 1989, Ph.D., 1996, Wisconsin, Madison. (2003)

Lara Ravitch, associate teaching professor (Russian language). B.A., 1998, Connecticut College; M.A., 2002, Monterey (Middlebury) Institute of International Studies. (2012)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Roy Bing Chan, East Asian languages and literatures (Chinese literature)

Miriam Chorley-Schulz, German and Scandinavian (Jewish studies, Yiddish studies, Holocaust studies)

Julie Hessler, history (20th-century Russia, Europe)

Ryan Tucker Jones, history (Russian and environmental history)

Mikhail Myagkov, political science (comparative politics, formal political theory)

Stephen J. Shoemaker, religious studies (history of Eastern Christianity)

Courtesy

Amanda Bird, courtesy instructor (folklore, translation, Persian literature). BA, 1994, Baylor; MA, 2006, Oregon. (2013)

Alexander Kashirin, courtesy professor. BA, 2002, Eastern New Mexico University; MA, 2005, Oregon; Ph.D., 2010, Oregon. (2003)

Tamara Morris, courtesy professor (Russian language, culture of "Old Believers"). Baccalaureate, D. Banzarov; MA, 1984, Krasnoyarsky State Pedagogical Institute; PhD, 1986, Institute of Russian Language. (2013)

Emeriti

Esther Jacobson-Tepfer, history of art and architecture

R. Alan Kimball, history (modern Russia)

Yelaina Kripkov, Russian Language

Steven Shankman, English (comparative literature, Russian novel)

Carol T. Silverman, anthropology (performance, eastern Europe, gender)

Sherwin Simmons, history of art and architecture

Ronald Wixman, geography

Cynthia Vakareliyska, linguistics

Associated

John E. Bonine, law

Lisa Wolverton, history

Russian, East European, and Eurasian Studies (BA)

The Russian, East European, and Eurasian Studies Program is devoted to the study of the peoples living in the eastern third of Europe, throughout the northern steppes of Central Asia, and across Siberia to the Pacific Ocean. Settled over a territory that spans half the earth's time zones, these peoples have created a complex mosaic of cultures, expressed in literature and art as well as in institutions and social forms. Over the centuries, these lands have come under the sway of several great world-historical civilizations and empires: the Byzantine, Mongolian, Ottoman Turkish, Holy Roman, Austro-Hungarian, Russian, and Soviet. These lands have felt the influence of Orthodox Christianity, Catholicism, Protestantism, Judaism, Islam, Buddhism and Communism. At the intersection of many powerful forces, these lands experience the historical drama of what some call "modernization" with its challenge to customary ways of life. Yet, after centuries of massive transplantation and transformation, national and ethnic heritages survive. Customary ways and native self-consciousness, more diverse than anywhere else on the globe, express themselves with new vigor.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Humanities Track: Be proficient in reading, writing, and speaking Russian (or other language of the region) consistent with completion of at least a third-year level (from novice high to intermediate high).
- Humanities Track: Have a broad general understanding of the region of Russia, Eastern Europe, and Eurasia including its history and culture, and ability to communicate about that culture in both Russian (or other language of the region) and English. Knowledge of major historical figures, writers and other cultural figures of the region and ability to evaluate and discuss them/their work.
- Humanities Track: Identify, describe and explain materials, terminologies, and methodologies in literature, film and media of the region.
- Social Science Track: Be proficient in reading, writing, and speaking Russian consistent with completion of at least a third-year level (from novice high to intermediate high).
- Social Science Track: Have a broad general understanding of the region of Russia, Eastern Europe, and Eurasia including its history and culture, and ability to communicate about that culture in both Russian (or other language of the region) and English. Knowledge of major historical figures, writers and other cultural figures of the region and ability to evaluate and discuss them/their work.
- Social Science Track: Identify, describe and explain important movements, terminologies, and methodologies in history, politics and religion of the region.

Fields of Concentration

The program offers the following concentrations for the undergraduate major and minor:

- Russian language, literature, and culture (humanities emphasis/field of concentration)
- Russian and East European history, politics, and society (social science emphasis/field of concentration)

Courses with these focus areas are offered by the program and such participating departments as anthropology, geography, history, political science, and sociology. Any course taken that includes instruction on one of these focus areas and has at least 40 percent Russian, East European, former Soviet Eurasian, or Slavic content, including independent research undertaken by the student, may be applied to the field of concentration requirement with administrative approval. Students may petition to the REEES Director of Undergraduate Studies to have courses taken in other disciplines count toward the concentration or elective requirement if the content of these courses meets the 40 percent standard. This applies to regularly scheduled courses and to independent reading and conference courses.

Students can view sample programs of study in the various concentrations on the program website.

Major Requirements

The major requires 36 graded credits; courses must be passed with grades of C– or better. Credits used to fulfill the language requirement may not be applied to the 36-credit requirement.

Bachelor of Arts Degree Requirements

Honors in Russian, East European, and Eurasian Studies

Majors who have an overall GPA of 3.50 by the end of the junior year and who are interested in honors should meet with the REEES Director of Undergraduate Studies, then submit a thesis proposal to the program’s director for approval. If approved, the student registers for a minimum of 4 credits in Thesis (403) under the supervision of a program faculty member. The thesis must be completed at least one term before the term of graduation.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years (Below is a sample for a Russian, East European, and Eurasian studies major with a concentration in Russian language, literature, and culture). There are alternative ways. Students should consult their advisor to determine the best path for them.

Russian, East European, and Eurasian Studies Minor

Students interact with native Russian speakers, perform in bilingual plays, and learn about the unique political foundations of the Russian Federation. REEES covers a wide array of subjects, allowing you to choose an emphasis in humanities or social science. Whether your interests in Russia, Eastern Europe, or Eurasia have roots in the literature of Dostoevsky and Pushkin or stem from a fascination with Russian zombie cinema, there is a place for you in REEES.

Minor Requirements

The minor requires 24 graded credits; courses must be passed with a grade of C– or better. Courses taken to fulfill the language requirement may not be used to fulfill the 24-credit requirement.

Code	Title	Credits

Language Courses

RUSS 101–103	First-Year Russian ¹	15

RUSS 201–203	Second-Year Russian ¹	15

RUSS 316–318	Third-Year Russian ¹	15

Field of Concentration Courses	12

Three upper-division courses in a chosen concentration ²	

Elective Courses	12

Total Credits	24

¹ Three years of college-level Slavic language study is usually fulfilled by taking Russian language courses. Students may petition to substitute one year of a second Slavic language for one year of the primary Slavic language. The language option is chosen in consultation with program advisors.

² One course in the field of concentration must be at the 400 level.

Additional Requirements

There is no limit on the number of language courses taken at other universities, including courses taken abroad, that may be used to satisfy the language requirement for the major or minor, subject to an equivalency assessment by the Russian language coordinator. With respect to concentration and elective requirements, undergraduate majors may apply as many as 16 transfer credits to the major, but no more than 8 of these credits can be applied to the field of concentration. Undergraduate minors may apply up to 8 transfer credits to the minor, but no more than 4 of them can be applied to the field of concentration.

Russian, East European, and Eurasian Studies (MA)

The Russian, East European, and Eurasian Studies Program is devoted to the study of the peoples living in the eastern third of Europe, throughout the northern steppes of Central Asia, and across Siberia to the Pacific Ocean.

Settled over a territory that spans half the earth's time zones, these peoples have created a complex mosaic of cultures, expressed in literature and art as well as in institutions and social forms.

Over the centuries, these lands have come under the sway of several great world-historical civilizations and empires:

- Byzantine
- Mongolian
- Ottoman Turkish
- Holy Roman
- Austro-Hungarian
- Russian
- Soviet

These lands have felt the influence of Orthodox Christianity, Catholicism, Protestantism, Judaism, Islam, and Communism.

At the intersection of many powerful forces, these lands experience the historical drama of what some call "modernization" with its challenge to customary ways of life. Yet, after centuries of massive transplantation and transformation, national and ethnic heritages survive.

Customary ways and native self-consciousness, more diverse than anywhere else on the globe, express themselves with new vigor.

The program offers an MA in Russian, East European, and Eurasian studies. The center is affiliated with the master's and PhD programs in comparative literature and linguistics, and students in the center have also successfully applied to PhD programs in history, geography, and other fields.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Be proficient in reading, writing, and speaking Russian consistent with completion of at least the fourth-year level.
- Translate specialized texts from the field of concentration into good professional English.
- Have a broad general understanding of the region of Russian, Eastern Europe, and Eurasia including its history and culture.
- Have in-depth competency in the field of concentration, its methodology, and foundational scholarship.
- Produce an extended piece of scholarship that is based on relevant primary and secondary materials and that makes a contribution to the field of study.

Russian, East European, and Eurasian Studies Major Requirements

The MA in Russian, East European, and Eurasian studies requires 40 graded graduate-level credits passed with a grade of B– or better and 9 thesis credits (taken pass/no pass), for a total of 49 graduate credits. Only the thesis may be graded pass/no pass, all other courses must be graded. Credits used to fulfill the language requirement may not be applied to the 49-credit requirement. The MA typically takes two years (six terms) to complete. Because the REES MA is interdisciplinary, courses are chosen in consultation with faculty advisers, and are typically offered in the prefixes of RUSS, REES, HIST, REL, PS, COLT, GLOBL and GEOG.

Code	Title	Credits
Language Courses		
Four years of university study of a Slavic language or equivalent, plus reading competency as defined by a translation exam in the student's field of concentration ¹		
Field of Concentration Courses		16
Four graded graduate-level courses in a chosen concentration		
Research and Thesis		9
REES 503 Thesis or RUSS 501 Thesis		
Elective Courses		24
Six graded graduate-level courses ²		
Total Credits		49

¹ In exceptional cases, a student may petition to substitute one year of a second Slavic language or equivalent mastery for one of the years of the primary language, but must pass the reading exam. Native speakers of a Slavic language may petition to substitute an appropriate alternative measure of English competency to the translation exam.

² Two courses may be in the field of concentration. The electives must include courses in at least two fields outside the student's concentration.

Additional Requirements

A written comprehensive examination on the field of concentration is typically taken the term prior to submission of the thesis. The thesis is defended before the candidate's committee. The defense may include discussion of the comprehensive exam.

Fields of Concentration

- Russian literature
- Russian and East European history
- Contemporary Russia, East Europe, and Eurasia

Russian, East European, and Eurasian Studies Graduate Certificate

The Russian, East European, and Eurasian Studies Program is devoted to the study of the peoples living in the eastern third of Europe, throughout the northern steppes of Central Asia, and across Siberia to the Pacific Ocean.

Settled over a territory that spans half the earth's time zones, these peoples have created a complex mosaic of cultures, expressed in literature and art as well as in institutions and social forms.

Over the centuries, these lands have come under the sway of several great world-historical civilizations and empires:

- Byzantine
- Mongolian
- Ottoman Turkish
- Holy Roman
- Austro-Hungarian
- Russian
- Soviet

These lands have felt the influence of Orthodox Christianity, Catholicism, Protestantism, Judaism, Islam, and Communism.

At the intersection of many powerful forces, these lands experience the historical drama of what some call "modernization" with its challenge to customary ways of life. Yet, after centuries of massive transplantation and transformation, national and ethnic heritages survive.

Customary ways and native self-consciousness, more diverse than anywhere else on the globe, express themselves with new vigor.

The program offers a graduate certificate in Russian, East European, and Eurasian studies. The center is affiliated with the master's and PhD programs in comparative literature and linguistics, and students in the center have also successfully applied to PhD programs in history, geography, and other fields.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Be proficient in reading, writing, and speaking Russian consistent with completion of at least the fourth-year level.
- Translate specialized texts from the field of concentration into good professional English.
- Have a broad general understanding of the region of Russian, Eastern Europe, and Eurasia including its history and culture.
- Complete a significant (e.g. 25-page) research paper written in conjunction with a course, or written as part of an individualized reading course.

Russian, East European, and Eurasian Studies Graduate Certificate

The graduate certificate in Russian, East European, and Eurasian studies requires 28 graded graduate-level credits; courses must be passed with grades of B– or better. Credits used to fulfill the language requirement may not be applied to the 28-credit requirement. Because the REEES Graduate Certificate is interdisciplinary, courses are chosen in consultation with faculty advisers, and are typically offered in the prefixes of RUSS, REES, HIST, REL, PS, COLT, GLBL and GEOG.

Code	Title	Credits
Language Courses		
Select one of the following:		
	Four years of college study or equivalent in one Slavic language	
	Total of four years of college study in two languages of the region	
Field of Concentration Courses		12
	Three graduate-level courses in chosen concentration	
Elective Courses		16
	Four graduate-level courses ¹	
Total Credits		28

¹ One elective may be in the field of concentration.

Additional Requirements

A research paper written in conjunction with a course or as a separate reading course in the field of concentration.

Fields of Concentration

- Russian literature
- Russian and East European history
- Contemporary Russia, East Europe, and Eurasia

The certificate may be earned in conjunction with any MA or PhD degree. Courses taken to fulfill the graduate degree may also be used to fulfill certificate requirements. Master's candidates in the program may earn the graduate certificate if the field of concentration chosen for the certificate is not the same as the one for the master's degree.

Theater Arts

<http://theatre.uoregon.edu>

Philip W. Scher, Department Head

331 McKenzie Hall
541-346-5104
asu5@uoregon.edu

The Department of Theater Arts offers major curricula leading to the Bachelor of Arts (BA), Bachelor of Science (BS), Master of Arts (MA), Master of Fine arts (MFA) with a specialization in design and technology, and Doctor of Philosophy (PhD) degrees. The Master of Science (MS) degree program is currently inactive.

Courses in Theater Arts are available for all students who want to develop their communication skills, explore lighting, scenic design and costume technology, practice leadership in collaborative teamwork, or study diverse Histories of Theater (including Middle Eastern American

and Arab American Theater, Native and Latinx Theater, Eco Dramaturgy, Ethnic and Communal Engagements). Students can also gain practical theater experience through involvement with our University Theater productions as actors, designers, technicians, dramaturgs and stage managers.

The Department offers a cross-disciplinary and liberal-arts education. Upper division courses provide vocational competence in many aspects of commercial theater. Students seek careers in professional, educational, and community theaters as designers, actors, technicians, stage managers, or theater managers, or continue specialized training in MFA degree programs or non-degree professional training schools. Other students use the Theater Arts' background to pursue vocational opportunities that require advanced skills in communication and organization.

At the graduate level, the department offers intensive study and practical work toward the MFA degree focus areas of costume design, scenic design, lighting design, and technical theater, with opportunities to also emphasize projection design, sound design, or both. The MFA also provides training and experience in teaching theater. The MA and PhD programs offer an in-depth study of theater and performance through contemporary critical and cultural theories as well as historiography and performance praxis.

Theaters

The James F. Miller Theatre Complex includes the renovated Robinson Theatre, a proscenium theater seating 300, and the Hope Theatre, a flexible venue that can seat 100–150. The complex includes a large lobby and costume and scene shops. The Pocket Playhouse, in Villard Hall, is a small proscenium stage and seats 75 people.

Technical Facilities

The scene shop is well equipped with power tools for wood and metal fabrication. Lighting equipment includes computerized controls and up-to-date instruments. The costume shop has power sewing and serging machines and a laundry and crafts area. Students are encouraged to sign up for production workshop classes or to practice their crafts as volunteers. Those who qualify for work-study financial aid are hired to assist in the shops. The shops are open every day.

Pocket Playhouse

Pocket Playhouse is the site for a series of productions presented by an elected student board.

University Theatre

The department's season is composed of productions in two venues: the Robinson Theatre and the Hope Theatre. Faculty members and graduate students direct and design as many as six shows a year. Auditions are open to UO students, and admission for UO students is free.

Faculty

Bradley Branam, associate professor (technical direction, media design). BA, 2000, Luther College; MFA, 2009, Missouri, Kansas City. (2012)

Bair, Heather, instructor, (costume shop). BFA, 1995, Southwest Missouri State University; MFA, 1999 Temple University. (2021)

Jeanette De Jong, associate professor. BA, 1982, Puget Sound; MFA, 1984, Oregon. (2015)

Jerry Hooker, associate professor (scene designer). BA, 1978, Puget Sound; MFA, 1985, Utah State. (2001)

Theresa May, professor (acting, embodiment, Native American theater); director, graduate studies. BA, 1980, California, Irvine; MFA, 1983, Southern California; PhD, 2000, Washington (Seattle). (2007)

Michael Malek Najjar, associate professor (Arab American theater and performance, playwriting, performance theory). BA, 1993, New Mexico; MFA, 1999, York; PhD, 2011, California, Los Angeles. (2011)

Tricia Rodley, instructor (acting, voice and dialect) BA, 1992, Oregon; MA, 2005, Royal Central School of Speech and Drama (London); PhD, 2014, Oregon. (2015)

Janet Rose, associate teaching professor (technical director, lighting designer). BFA, 1977, Florida Atlantic; MFA, 1979, Ohio. (1987)

John Schmor, associate professor (theory, history, acting). BA, 1984, Willamette; MA, 1989, PhD, 1991, Oregon. (1999)

Emeriti

Alexandra Bonds, professor emerita. BS, 1972, Syracuse; MA, 1974, Denver. (1979)

Robert Barton, professor emeritus. BA, 1967, Western Michigan; MA, 1968, PhD, 1977, Bowling Green State. (1980)

Jerry R. Williams, professor emeritus. BFA, 1964, Carnegie-Mellon; MA, 1965, Washington (Seattle). (1973)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

- Theater Arts (BA/BS) (p. 192)

Minor

- Theater Arts (p. 195)

Graduate Programs

Majors - Master's Degree

- Theater Arts (MA) (p. 196)
- Theater Arts (MFA) (p. 196)

Major - Doctoral Degree

- Theater Arts (PhD)

Important note: Theater Arts is not currently accepting PhD applications but will in the future as new faculty members are hired.

Theater Arts (BA/BS)

The Department of Theatre Arts combines a broad liberal arts education with practical experience through University Theatre (<https://blogs.uoregon.edu/theatre/>) productions and studio coursework.

Create purposeful works of art and use your voice to change the world. With outstanding facilities, knowledgeable faculty members, and a supportive theater community, the University of Oregon's Department of

Theatre Arts provides everything you need to hone your craft and achieve your goals.

You'll be given the opportunity to write, direct, and manage your own performances through classes and the Pocket Playhouse, a fully operational theater for undergraduates. In addition, you'll study the history, literature, and cultural aspects of theater across the globe, providing you with a valuable liberal arts background. Learn practical skills such as playwriting, acting, wood construction, sewing, and stage management. Take risks and gain insight in a nurturing and engaging environment. An adventure awaits you, whether your focus is on acting, stage production, or designing dazzling costumes.

For its undergraduate major program, the Department of Theater Arts has three principal objectives:

1. The attainment, by all of its majors, of a broad liberal arts education
2. Sufficient instruction to provide an appreciation of the different areas of theater
3. Direct experience in several aspects of theater production

Students study acting, directing, design, costume, lighting, stagecraft, history, dramatic literature, and theory. Courses in these fields are available to both majors and nonmajors.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge, research, and analysis of theatre history, dramatic literature and critical theory across time and cultures, employing effective written and oral communication.
- Demonstrate the comprehension of form and content in theatre through production-related practice, applying skillsets of design, technology, management, and performance.
- Demonstrate personal theatrical aesthetic and artistic vision through script analysis and interpretation, integrating the visual and material/physical in collaborative practice.
- Demonstrate understanding of degree requirements and production expectations for the major, and chart prospective internship and other educational or professional opportunities in current theatre and related fields during and especially after college.

Theater Arts Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of mid-C or better.

Code	Title	Credits

Grading Options

Some courses in theater arts are offered pass/no pass (P/N) only. Work counts toward fulfillment of the 180-credit requirement for a BA or BS only if satisfactorily completed.

Transfer Students

Transfer students must complete six 4-credit, upper-division courses and two of the production courses listed in the course list in residence at the University of Oregon.

Honors in Theater Arts

At the end of each academic year, the department's faculty selects certain graduating seniors and confers on them departmental honors. Criteria include academic performance as well as the quality of participation in the production program.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Total Credits	192

Theater Arts Minor

The purpose of the Minor degree in Theater is to expose the student to a variety of the disciplines within Theater and to allow for some specialization.

Theater Arts Minor Requirements

Coursework for the minor must be completed with letter grades of mid-C or better. At least 16 credits must be taken at the university. One course in each of the following areas must be included:

- literature and criticism
- performance
- technical theater
- theater history

Code	Title	Credits
Theater arts courses		8
Upper-division theater arts courses		16
Total Credits		24

Approved Courses

Code	Title	Credits
Literature and Criticism		
TA 271	Introduction to Theater Arts	
TA 471	Studies in Theater and Culture: [Topic]	
TA 472	Multicultural Theatre: [Topic]	
TA 490	Theater Capstone: [Topic]	
Performance		
TA 250	Introduction to Acting	
TA 251	Acting Scene Study	
TA 252	Acting Auditions	
TA 452	Advanced Acting: [Topic]	
Technical Theater		
TA 210	Introduction to Design	
TA 211	Theater Production I	
TA 212	Theater Production II	
TA 416	Costume Design	
TA 418	Costume Pattern Drafting	
TA 441	Scene Design: Single Set	
TA 467	Lighting for the Stage	
TA 445	Advanced Projects in Theater Technology: [Topic]	
Theater History		
TA 367	History of the Theater I	
TA 368	History of the Theater II	
TA 369	History of the Theater III	
TA 411	Costume History I	
TA 412	Costume History II	
TA 471	Studies in Theater and Culture: [Topic]	

Theater Arts (MA)

Each graduate student is expected to show ability in both academic and production areas. During residence at the university, a student is expected to make a significant contribution in three areas out of the following seven: acting, directing, technical theater, management, playwriting, teaching, and design.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content though course work.
- Demonstrate effective oral and written communication skills.
- Acquire research skills necessary to carry out a significant independent research project (i.e. an M.A. Thesis as described in the Graduate Handbook).
- Demonstrate pedagogic ability in teaching undergraduates.

- Complete requirements for foreign language proficiency (equivalent to completion of two years of college-level foreign language study in one foreign language).

Master of Arts in Theater Arts

Code	Title	Credits
Graduate credits in graded theater arts course work		28
TA 503	Thesis	12
TA 607	Seminar: [Topic] ¹	16
Total Credits		56

¹ Course topic changes every term. The master of arts requires at least 16 credits (four seminars). The student may also take approved 600-level course work.

Additional Requirements

- A minimum grade point average of 3.00
- Language proficiency (course work or examination)
- Completion of approved thesis
- Faculty-guided artistic production in design, acting, directing, technical production, dramaturgy, and playwriting

Theater Arts (MFA)

The master of fine arts is the terminal degree for those planning to work or teach in theatrical production. We offer three-year programs of study in scenic design, costume design, and lighting design, or a pairing of two of these areas. Some students also work on technical direction. Completion involves a creative project with an accompanying written report.

We do not offer the master of fine arts degree in acting, directing, or playwriting.

The master of fine arts in theater arts at the University of Oregon includes both academic and production components. In comparison to the master's degree, it requires additional credit hours in design and technology, and the satisfactory completion of a design project with a written component. Students are approved to begin work on a final project after a satisfactory qualifying presentation given to the full faculty.

The qualifying presentation is usually scheduled during the winter term of the second year. All master of fine arts final projects are juried by the full faculty and must demonstrate high artistic ability. The degree requires a minimum of 88 credit hours beyond the bachelor's degree. The minimum requirement for financial aid and a graduate employee appointment is nine credits. Students most commonly enroll for 12 credits per term, including practicum credits, except for the term in which the final project is being executed when the minimum of 9 credits is recommended.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content and technical skills though course work.
- Demonstrate effective artistic, oral, and written communication skills.
- Demonstrate pedagogic ability in teaching and/or supervising undergraduates.

- Develop technical and artistic skills necessary to carry out and report on a significant "Final Project" (as outlined in the Graduate Handbook).

Master of Fine Arts Degree Requirements

The following are minimum requirements, all of which must be taken for a letter grade with the exception of Research: [Topic] (TA 601) and Terminal Project (TA 609).

Code	Title	Credits
TA 601	Research: [Topic]	4
TA 607	Seminar: [Topic] ¹	8
TA 609	Terminal Project	16
Design and technology courses ²		24
Theater history, literature, and theory courses at the 500 and 600 level		8
Related courses outside the department ³		8
At least one course from acting, directing, dramaturgy, or stage management		4
Additional graded graduate-level theater arts course work		16
Total Credits		88

¹ Course topics change every term. The MFA requires at least 8 credits. Students may also take approved and graded 600-level course work.

² Must include at least one course each in lighting, scenery, and costumes.

³ With advisor approval, undergraduate courses at the 300 level may apply.

Additional Requirements

- A minimum grade point average of 3.00
- Completion and approval of a final project and written document

The master of fine arts degree does **not** require proficiency in a second language. Coursework is substantially completed during the first years; the MFA program typically takes three years to complete.

Natural Sciences

In Natural Sciences (<https://naturalsciences.uoregon.edu/>), our departments are committed to creating and disseminating new knowledge in their fields by combining research and teaching. Our 200 faculty members — including fellows of many learned societies and academies — are engaged in research that spans a broad range, from questions about the foundations of quantum mechanics, to the development of cancer cells and the workings of the brain, to work resulting in the spin-off of high-technology companies. Faculty share their excitement about their research with their students, training them to become part of the next generation of scientists who will push the frontiers of human knowledge.

Biologists investigate a broad spectrum of questions about living organisms and life processes—the physical and chemical bases of life, how organisms and their component parts are structured, how they function, how they interact with their environment, and how they have evolved.

Departmental teaching and research emphases in cellular and molecular biology, developmental biology, ecology and evolution, human biology, marine biology, neuroscience and behavior, and bioinformatics offer students opportunities to learn and work with scientists who are making important contributions to knowledge in these areas.

Faculty

Matthew F. Barber, associate professor (evolutionary genetics, host-microbe interactions, and biochemistry). BA, 2006, Colgate; PhD, 2012, Stanford. (2016)

Nicola C. Barber, associate teaching professor (molecular biology, science education). BA, 2006, Colgate; PhD, 2011, California, Berkeley. (2016)

Brendan J. M. Bohannon, Alec and Kay Keith Professor (microbial ecology and evolution). BS, 1991, Humboldt State; PhD, 1997, Michigan State. (2006)

Bruce A. Bowerman, professor (developmental genetics, regulation of the cytoskeleton in *C. elegans*). BA, 1981, Kansas State; PhD, 1989, California, San Francisco. (1992)

William E. Bradshaw, professor (evolutionary genetics, population biology, evolutionary physiology). BA, 1964, Princeton; MS, 1965, PhD, 1969, Michigan. (1971)

Mark C. Carrier, associate teaching professor (developmental biology and physiology). BS, BA, 1987, Massachusetts; MS, 1998, California, Berkeley. (2000)

Amy A. Connolly, instructor (genetics, cell biology, cell division). BS, 2008, Kansas; PhD, 2014, Oregon. (2018)

William A. Cresko, professor (evolutionary developmental genetics). BA, 1992, University of Pennsylvania; PhD, 2000, Clark. (2005)

Jeffrey M. Diez, associate professor (community ecology, phenology, climate change ecology). BA, MA, 1998, University of Pennsylvania; PhD, 2005, University of Georgia. (2020)

Chris Q. Doe, professor (development of the nervous system, neural stem cells, asymmetric cell division). BA, 1981, New College, Sarasota; PhD, 1987, Stanford. (1998)

Judith S. Eisen, professor (development and function of the nervous system). BS, 1973, MS, 1977, Utah State; PhD, 1982, Brandeis. (1985)

Richard B. Emlet, professor (evolution and development of marine invertebrates). BS, 1977, Duke; PhD, 1985, Washington, Seattle. (1992)

Aaron W. E. Galloway, associate professor (marine trophic ecology, fatty acids). BA, 1999, Evergreen State College; MS, 2004, Central Washington; PhD, 2013, Washington, Seattle. (2015)

David M. Garcia, assistant professor (molecular biology and epigenetics, prions that regulate RNA). BS, 2004, California, Santa Cruz; PhD, 2012, Massachusetts Institute of Technology. (2018)

Daniel T. Grimes, assistant professor (developmental biology, zebrafish genetics, human disease models). MBiochem, 2008, DPhil, 2013, Oxford. (2019)

Lauren M. Hallett, associate professor (plant community ecology, restoration ecology). BS, 2008, Yale; MSc, 2010, Western Australia; PhD, 2015, California, Berkeley. (2017)

Victoria Herman, associate professor (development and function of nervous system in *Drosophila*). BA, 1989, Harvard-Radcliffe; PhD, 1998, Massachusetts Institute of Technology. (2003)

Cristin L. Hulslander, associate teaching professor (behavioral ecology). BA, 1992, Bryn Mawr; PhD, 2003, Clark. (2003)

Santiago Jaramillo, associate professor (neuronal circuits underlying behavioral flexibility). BS, 1998, Universidad Pontificia Bolivariana; MS, 2002, New Mexico; PhD, 2007, National University of Ireland. (2013)

Eric A. Johnson, associate professor (*Drosophila* genetics, genomics and cellular physiology). BA, 1990, Grinnell; PhD, 1996, Iowa. (2001)

Andrew D. Kern, associate professor (population genetics, computational biology). ScB, 1999, Brown; PhD, 2005, California, Davis. (2017)

Diana E. Libuda, associate professor (molecular genetics, DNA repair, chromosome dynamics during meiosis). BS, 2003, California, Los Angeles; PhD, 2008, Harvard. (2014)

Shawn R. Lockery, professor (invertebrate neurobiology and neural networks). BA, 1981, Yale; PhD, 1989, California, San Diego. (1993)

V. Pattenon Lombardi, associate teaching professor with title of research assistant professor (human biology, medical physiology); director, undergraduate advising. BA, 1977, MAT, 1979, North Carolina, Chapel Hill; PhD, 1984, Oregon. (1984)

Stilianos Louca, assistant professor (microbial ecology and evolution, bioinformatics, mathematical modeling). BSc, 2010, Diplom, 2012, Friedrich Schiller; PhD, 2016, British Columbia. (2019)

Svetlana Maslakova, associate professor (evolution, development and systematics of marine invertebrates). BA, 1998, MS, 1999, Moscow State; PhD, 2005, George Washington. (2008)

Luca Mazzucato, assistant professor (neural basis sensory perception, neurostatistical analysis). MSci, 2002, Padua; PhD, 2005, Scuola Internazionale Superiore di Studi Avanzati. (2017)

David A. McCormick, professor (cellular mechanisms of cortical function); Presidential Chair. BA, BS, 1979, Purdue; PhD, 1983, Stanford. (2017)

Krista McGuire, associate professor (microbial ecology). BS, 2000, Muhlenberg College; PhD, 2007, Michigan, Ann Arbor. (2017)

Adam C. Miller, associate professor (neural circuit formation and function). BS, 2001, PhD, 2008, Oregon. (2016)

James M. Murray, assistant professor (theoretical neuroscience, learning in neural circuits). BS, 2006, Montana State University; PhD, 2013, Johns Hopkins University. (2020)

Cristopher M. Niell, associate professor (development and function of neural circuits for visual processing). BS, 1995, PhD, 2004, Stanford. (2011)

Ken-ichi Noma, professor (3D genome organization in yeast and human systems). BS, 1995, Nagaoka University; PhD, 2000, University of Tokyo. (2018)

Laurel E. Pfeifer-Meister, associate teaching professor (ecology, climate change, biodiversity). BA, BS, 2000, Westmont College; PhD, 2008, Oregon. (2016)

Patrick C. Phillips, professor (evolution, genetics, complex traits). BA, 1986, Reed; PhD, 1991, Chicago. (2000)

Tobias J. Policha, associate teaching professor (plant community ecology, pollination, tropical orchid conservation). BS, 2007, MS, 2011, PhD, 2014, Oregon. (2017)

Lauren C. Ponisio, assistant professor (community ecology, species interactions, data science). BS, 2010, Stanford University; MS, 2011, Stanford University; PhD, 2017, California, Berkeley (2020)

Jana Prikryl, associate teaching professor (molecular genetics). BS, 1999, Colorado, Boulder; PhD, 2009, Oregon. (2010).

Peter L. Ralph, associate professor (evolution and population genetics, data analysis, stochastic processes). AB, 2002, PhD, 2009, California, Berkeley. (2016)

Eric Selker, professor (epigenetic mechanisms). BA, 1975, Reed; PhD, 1980, Stanford. (1985)

Lucas Silva, associate professor (terrestrial ecology, biogeochemistry, biogeography) BS 2005, Forest Engineering, University of Brasilia; MS 2007, Ecosystem Ecology, University of Miami/University of Brasilia; PhD, 2011, Environmental Biology, University of Guelph (2016)

Nadia D. Singh, associate professor (evolutionary genetics, genomics). BA, 1999, Harvard; PhD, 2006, Stanford. (2016)

Kryn Stankunas, associate professor (chromatin and regulators as dynamic sources of epigenetic information during heart development). BS, 1997, British Columbia; PhD, 2003, Stanford. (2009)

Matthew A. Streisfeld, associate professor (adaptation in natural plant populations). BS, 1998, Emory; PhD, 2005, California, San Diego. (2009).

Kelly Sutherland, associate professor (marine biology). BS, 1999, Tufts; MSc, 2004, South Alabama; PhD, 2009, Massachusetts Institute of Technology. (2011)

Emily L. Sylwestrak, assistant professor (neural circuits of behavior, motivation, synaptic physiology). BS, 2006, Illinois Urbana-Champaign; PhD, 2011, California, San Diego. (2019)

George R. von Dassow, associate professor (cell biology of development). PhD, 2000, Washington (Seattle). (2014)

Philip E. Washbourne, associate professor (molecular neurobiology, synapse formation). BS, 1995, Imperial College; PhD, 2000, Padua. (2004)

Maya W. Watts, instructor/education coordinator (invertebrate zoology, parasitology). BS, 2004, College of Charleston; PhD, 2010, University of Oregon. (2018)

Monte Westerfield, professor (molecular genetics of nervous system development). AB, 1973, Princeton; PhD, 1977, Duke. (1981)

A. Michelle Wood, professor (microbial ecology and evolution, biological oceanography). BA, 1973, Corpus Christi; PhD, 1980, Georgia. (1990)

Craig M. Young, professor (marine ecology, deep-sea biology, invertebrate embryology); director, Oregon Institute of Marine Biology. BS, 1975, MS, 1978, Brigham Young. PhD, 1982, Alberta. (2002)

Anne Zemper, assistant professor (intestinal stem cell biology, adult homeostasis disease states). BA, 2003, Concordia; PhD, 2010, Oregon Health and Science. (2014)

Courtesy

Steven S. Rumrill, courtesy research associate (estuarine ecology and management, larval biology of marine invertebrates). BA, 1981, MS, 1983, California, Santa Cruz; PhD, 1987, Alberta. (1991)

Carl A. Stiefbold, courtesy associate teaching professor (science laboratory education). BS, 1971, Portland State. (1987)

David H. Wagner, courtesy associate professor (plant taxonomy, ecology, evolution of bryophytes and pteridophytes). BA, 1968, Puget Sound; MS, 1974, PhD, 1976, Washington State. (1976)

Emeriti

Andrew S. Bajer, professor emeritus. PhD, 1950, DSc, 1956, Cracow. (1964)

Alice Barkan, professor emerita (molecular genetics). BS, 1978, Massachusetts Institute of Technology; PhD, 1983, Wisconsin, Madison. (1991)

Howard T. Bonnett Jr., professor emeritus. BA, 1958, Amherst; PhD, 1964, Harvard. (1965)

Scott D. Bridgham, professor emeritus (ecosystem ecology, plant community dynamics). BA, 1980, BA, 1982, Maine; MS, 1986, Minnesota; PhD, 1991, Duke. (2002)

Roderick A. Capaldi, professor emeritus. BS, 1967, London; PhD, 1970, York. (1973)

George C. Carroll, professor emeritus. BA, 1962, Swarthmore; PhD, 1966, Texas. (1967)

John S. Conery, professor emeritus. BA, 1976, California, San Diego; PhD, 1983, California, Irvine. (1983)

David. O. Conover, professor emeritus (fisheries science, marine ecology, evolutionary biology). BS, 1975, Eckerd College; MS, 1979, PhD, 1981, University of Massachusetts, Amherst. (2016)

Alan Dickman, professor emeritus. BA, 1976, California, Santa Cruz; PhD, 1984, Oregon. (1986)

Janet Hodder, senior lecturer (ecology of marine birds and mammals, science education). BS, 1977, Liverpool; PhD, 1986, Oregon. (1986)

Charles B. Kimmel, professor emeritus. BA, 1962, Swarthmore; PhD, 1966, Johns Hopkins. (1969)

John H. Postlethwait, professor emeritus. BS, 1966, Purdue; PhD, 1970, Case Western Reserve. (1971)

William Roberts, professor emeritus. BA, 1970, Harvard; PhD, 1979, California, San Diego. (1989)

Bitty A. Roy, professor emerita. BS, 1982, Evergreen State; MS, 1985, Southern Illinois; PhD 1992, Claremont Graduate School. (2001)

Paul P. Rudy, professor emeritus. BA, 1955, MA, 1959, PhD, 1966, California, Davis. (1968)

Eric Schabtach, senior instructor emeritus. BS, 1963, McGill. (1969)

Alan Shanks, professor emeritus (marine and intertidal ecology, larval biology, zooplankton). BA, 1977, California, Santa Cruz; PhD, 1985, California, San Diego. (1993)

Lynda P. Shapiro, professor emerita. BA, 1960, MS, 1963, Arkansas; PhD, 1974, Duke. (1990)

George F. Sprague Jr., professor emeritus. BS, 1969, North Carolina State; PhD, 1977, Yale. (1981)

Karen U. Sprague, professor emerita. BA, 1964, Bryn Mawr; PhD, 1970, Yale. (1977)

Franklin W. Stahl, professor emeritus. AB, 1951, Harvard; PhD, 1956, Rochester. (1959)

Terry Takahashi, professor (analysis of neural circuitry). BS, 1975, California, Irvine; PhD, 1981, State University of New York, Downstate Medical Center. (1988)

Nora B. Terwilliger, professor emerita. BS, 1963, Vermont; MS, 1965, Wisconsin, Madison; PhD, 1981, Oregon. (1972)

Nathan J. Tublitz, professor emeritus (peptidergic regulation of behavior in insects and cephalopod mollusks). BA, 1975, Reed; PhD, 1984, Washington (Seattle). (1986)

Daniel Udovic, professor emeritus. BA, 1970, Texas; PhD, 1973, Cornell. (1973)

Janis C. Weeks, professor emerita. BS, 1975, Massachusetts Institute of Technology; PhD, 1980, California, San Diego. (1989)

Norman K. Wessells, professor emeritus; provost emeritus, academic affairs. BS, 1954, PhD, 1960, Yale. (1988)

James A. Weston, professor emeritus. BA, 1958, Cornell; PhD, 1963, Yale. (1970)

Peter B. Wetherwax, senior instructor emeritus with title of research assistant professor (pollination ecology, tropical ecology, science education). BA, 1980, California, Los Angeles; MA, 1985, Humboldt State; PhD, 1993, Oregon State. (1991)

Herbert P. Wisner, senior instructor emeritus. BA, 1949, MA, 1950, Syracuse. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Biology (BA/BS)

Thank you sincerely for your interest in studying Biology at the University of Oregon (U of O), a member of the Association of American Universities (<https://www.aau.edu/who-we-are/our-members/>) that includes 71 top public and private research universities devoted to enhancing

human life through education, research and discovery. We have developed an outstanding major that will prepare you for a multitude of options including graduate schools and careers in biomedicine and research, allied health, private industry and education. Our nationally and internationally recognized graduates have completed top MD, PhD, MD-PhD, MS programs and internships all over the world. Emphasis Areas for the Biology major include Ecology & Evolution, Human Biology, Marine Biology, Molecular Cellular & Developmental Biology and Neuroscience & Behavior.

University of Oregon faculty have been visionary pioneers in a variety of areas within biology. Biology faculty who conduct research and teach, specialize in cellular and molecular biology, data science, developmental biology, ecology and evolution, human biology, marine biology, microbiology, and neuroscience and behavior. The Oregon Institute of Marine Biology, the first established in Oregon, began in 1924 as a summer education and research program. Our faculty there combine world-class research in marine sciences with immersive undergraduate and graduate education and community engagement. In 1959, the Institute of Molecular Biology was established with research faculty from multiple departments engaging collaboratively to make discoveries. George Streisinger, one of the institute's founders, cloned the first vertebrate, a zebrafish in 1981, 15 years before Dolly the sheep. Now more than 1500 research labs worldwide use zebrafish, many based on U of O strains. So, it is in our nature to discover and foster collaboration among students, staff and faculty across Biology, Chemistry and Biochemistry, Human Physiology, Physics and Psychology Departments. Our students learn and work alongside scientists making important contributions in their field of expertise. Our rich history and interdisciplinary nature create many opportunities for students while they are studying here and well after they graduate.

Our graduates have secured a variety of jobs working with:

- Biomedical research groups
- Biotechnology companies
- Clinics and hospitals
- Industry and laboratories
- Inspection agencies and control boards
- Pharmaceutical companies
- Private research institutions
- Public health departments
- State and federal government agencies
- Universities and Colleges
- Zoos and aquariums

We are excited that you have considered Biology as a major and look forward to meeting with you soon here on campus in Eugene.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the process and application of scientific inquiry; develop well-reasoned hypotheses and design experiments by which to test them.
- Apply mathematical and statistical approaches to analyze and explain biological information; illustrate and interpret graphical representations of biological information.
- Express a broad-based knowledge of biology at multiple levels and in interdisciplinary contexts; demonstrate competency in reading,

understanding, and critically evaluating scientific information across major areas of the curriculum, from molecules to ecosystems.

- Communicate scientific ideas clearly, both orally and in writing to both general and professional audiences.
- Explain the relationship between science and modern society as well as the potential impact of scientific discovery on the future.
- Use modeling and simulation to study biological systems.

Fundamental Concepts:

After successfully completing a Biology major, students will comprehend the following fundamental concepts:

- Evolution and biological diversity: all living organisms are genetically related; the diversity of life evolved over time by processes of mutation and selection.
- Structure and function relationships: Basic units of structure give rise to the function of all living things.
- Information flow, exchange, and storage: Properties of organisms emerge from the flow, exchange, expression, and storage of genetic information.
- Pathways and transformations of energy and matter: Biological systems grow and change by processes based on chemical transformation pathways and are governed by the laws of thermodynamics.
- Systems: Living systems are interconnected and interacting.

Biology Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade of C- or better or a mark of Pass (P or P*).

Code	Title	Credits

& BI 282H	Physiology
& BI 283H	and Accelerated Biology II: Genetics and Molecular
	Biology
	and Accelerated Biology III: Evolution, Diversity and
	Ecology

Upper-Division Biology ⁵ 44

At least one course needs to be completed from each area (I, II, and III):

Area I: 300-level molecular, cellular, and developmental biology course

Area II: 300-level systems and organisms course

Area III: 300-level ecology and evolution course

At least one 300- or 400-level course with significant laboratory or fieldwork

12 credits of courses numbered BI 410, 420–499

At least one course in modeling, analysis, programming, and statistics (MAPS) ⁶

One course from the following: an additional Lab/Field course
OR an additional MAPS course OR 4 credits of BI 401
Research

Total Credits 104-106

¹ Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.

² Graduate programs in medicine and allied health typically require additional organic chemistry lectures, Organic Chemistry II (CH 335), Organic Chemistry III (CH 336), and laboratories (CH 337, 338) beyond that required by the biology major. Often, course work in biochemistry and genetics as well as other additional courses are typically required or preferred. Please consult the Health Professions Program (<https://healthprofessions.uoregon.edu/>) for further details.

³ Graduate programs in medicine and allied health typically require additional laboratories (PHYS 204, 205, 206) or three terms of Foundations of Physics Laboratory (PHYS 290) beyond that required by the biology major. Please consult the Health Professions Program (<https://healthprofessions.uoregon.edu/>) for further details.

⁴ Students may also take PHYS 251, 202, and 203 or PHYS 251, 252, and 203. Students may not go from the 201-203 series to the 251-253 series without approval from the department.

⁵ Students must complete a minimum of 44 upper-division biology credits. A maximum of 20 credits may be from other departments. For a complete list of approved courses and other details about upper-division requirements, see the online requirements for the biology major (<https://biology.uoregon.edu/undergraduate-program/requirements/>).

⁶ Visit the Biology Advising Center for a list of approved courses.

Area I Courses

Emphasis Areas for the Biology Major

Fulfilling the requirements for an undergraduate degree in biology provides a solid, general foundation in the discipline. Some biology majors choose to concentrate their upper-division course work in one of five emphasis areas:

- ecology and evolution
- human biology
- marine biology
- molecular, cellular, and developmental biology
- neuroscience and behavior

The requirements listed for each emphasis may be fulfilled as the student completes the upper-division course work for the biology major. Though not required, emphasis areas are designed to guide students, based on their specific interests, through upper-division course work. Upon graduation, students who complete the requirements for an emphasis area receive a written recognition from the department.

Visit biology.uoregon.edu/undergraduate-program/requirements (<http://biology.uoregon.edu/undergraduate-program/requirements/>) for the current requirements for each emphasis area, or contact the Biology Advising Center at 541-346-4525 for more information.

Honors Program in Biology

The honors program requires substantial laboratory or field research supervised by a faculty member. Biology majors who satisfy the following requirements are eligible to graduate with honors:

1. Registration for the honors program through the Biology Advising Center, which includes obtaining an acceptance signature from the faculty research advisor, *before* beginning research
2. Completion of all requirements for the major in biology
3. Attainment of a minimum 3.30 GPA in all upper-division biology courses (including 300- and 400-level approved courses outside the department; see a biology advisor for a list). The GPA will be calculated for **all** courses in this category, regardless of the total number of credits.
4. Completion of a minimum of three terms of intensive research (summer session counts as a term); at least four terms and summer research experience are strongly encouraged
5. Completion of a minimum of 4 credits in Research: [Topic] (BI 401) under the supervision of a single faculty advisor. Up to 4 credits may be applied towards the 44 upper-division elective Biology credits. (*See #7 for Honors College students.*)
6. Completion of a thesis, with the following requirements:
 - a. Oversight by a thesis committee comprising two faculty members—a primary advisor and one faculty member on the Biology Undergraduate Affairs Committee
 - b. A final version of the thesis must be provided to the committee one week prior to the thesis defense
 - c. Both committee members must sign the thesis within one week of the thesis defense, and a final signed copy must be submitted to the Biology Advising Center

7. Thesis defense
- a. Thesis committee must attend the thesis defense.

b. Defense must happen at least one week prior to the end of the term in which the student is graduating.

c. The thesis defense will be an open seminar. Other faculty, students, and staff will be encouraged to attend.

The chair of the Biology Undergraduate Affairs Committee will notify students during their senior year with the name of the committee member who will serve as their second thesis committee member. Students should contact both committee members via email sometime during the term before the defense to start working on a range of possible defense dates. For more information, contact the committee chair.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Marine Biology (BA/BS)

<https://oimb.uoregon.edu>

Maya Watts, Education Program Coordinator

Oregon Institute of Marine Biology

541-346-7277

mwolf1@uoregon.edu

What if your classrooms were tidepools and mudflats? Situated on 130 acres of coastal property along Coos Bay, the Oregon Institute of Marine Biology (OIMB) is a vast, living classroom where students in biology, marine biology, general science, and environmental science study marine organisms in their natural habitat.

Marine biology majors study physiology, ecology, biology, chemistry, mathematics, and physics on campus in Eugene. During junior or senior year, undergraduates immerse themselves in three terms of intensive field and lab classes at OIMB covering diverse topics of marine biology, with opportunities for independent research and internships. With courses such as Invertebrate Zoology, Oceanography, Marine Birds and Mammals, and Tropical Marine Biology in Panama, it is little wonder our majors consider their time at OIMB to be the highlight of their college experience.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the process and application of scientific inquiry; the ability to develop well-reasoned hypotheses and to design experiments by which to test them.
- Apply mathematical and statistical approaches to understanding biological information; an ability to interpret graphical representations of biological information.
- Have a broad-based knowledge of biology at multiple levels and in interdisciplinary contexts; competency in reading, understanding, and critically evaluating scientific information across major areas of the curriculum, from molecules to ecosystems.
- Communicate scientific ideas clearly, both orally and in writing to both general and professional audiences.
- Understand the relationship between science and modern society as well as the potential impact of scientific discovery on the future.
- Be aware of biological diversity in the marine environment and the mechanisms that shape this diversity.
- Understand the mechanisms that influence the structure and function of marine communities and ecosystems, and an appreciation for the bathymetric and biogeographic distributions of organisms in the sea.
- Be aware of both global and local environmental challenges in the marine environment.

Fundamental Concepts:

- Evolution and biological diversity: all living organisms are genetically related; the diversity of life evolved over time by processes of mutation and selection.
- Structure and function: Basic units of structure give rise to the function of all living things.
- Information flow, exchange, and storage: Properties of organisms emerge from the flow, exchange, expression, and storage of genetic information.
- Pathways and transformations of energy and matter: Biological systems grow and change by processes based on chemical transformation pathways and are governed by the laws of thermodynamics.
- Systems: Living systems are interconnected and interacting.

Marine Biology Major Requirements

Courses used to fulfill the major requirements must be passed with a grade of Pass or C- or better.

Code	Title	Credits
Core Courses		
Math ¹		8

Upper-Division Biology ³		44
At least one course needs to be completed from each area (I, II, and III)		
Area I: 300-level molecular, cellular, and developmental biology course		
Area II: 300-level systems and organisms course		
Area III: 300-level ecology and evolution course		
Three terms of full-time enrollment in courses at OIMB (at least 12 credits) ⁴		
12 credits of courses numbered BI 420–499		
One course in modeling, analysis, programming, and statistics (MAPS) ⁴		
Total Credits		100-102

¹ A course in statistics is required if an ecology and evolution or neuroscience and behavior emphasis area is selected.

² Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.

³ Students must complete a minimum of 44 upper-division biology credits. For a complete list of approved courses and other details about upper-division requirements, see the online requirements for the marine biology major (<https://biology.uoregon.edu/undergraduate-program/requirements/>).

⁴ Courses at the Oregon Institute of Marine Biology (OIMB) are offered summer session, fall, and spring terms. See oimb.uoregon.edu (<http://oimb.uoregon.edu>) for details of OIMB courses.

⁵ Visit the Biology Advising Center for a list of approved courses.

Students are required to spend three terms completing upper-division course work (taking at least 12 credits per term) at the Oregon Institute of Marine Biology. A program plan for the marine biology major is available in the Biology Advising Center, on the OIMB website, or Tykeson College and Career Advising.

Animal Use in Teaching Laboratories

Students should be aware that the biology and marine biology majors require courses in which a variety of organisms, including vertebrate animals, are used in laboratory dissections and experiments.

Prospective majors who are concerned about this should discuss it with their advisors before beginning either program. Students are encouraged to review the syllabuses for laboratory courses before enrolling. Syllabuses are available on the department's website.

Department and university policies require that the use of live vertebrate animals be minimized in teaching laboratories and be approved by the curriculum committee of the Department of Biology and by the Institutional Animal Care and Use Committee of the University of Oregon. Students who have ethical objections to animal use in a course that requires it should consult the instructor of record before enrolling.

Oregon Institute of Marine Biology

Located in Charleston on Coos Bay, the Oregon Institute of Marine Biology (OIMB), in conjunction with the biology department, offers an undergraduate marine biology major and a coordinated program of study for undergraduates in biology, general science, and environmental science or environmental studies. During fall and spring terms and the

summer session, 300- and 400-level courses take advantage of the institute's unique coastal setting. Typical offerings include the following:

Code	Title	Credits
BI 322	Cell Biology	4
BI 390	Animal Behavior	4
BI 451	Invertebrate Zoology	8
BI 454	Estuarine Biology	5
BI 455	Marine Birds and Mammals	1-6
BI 457	Marine Biology: [Topic] (Biology of Fishes, Comparative Embryology and Larval Biology, Marine Conservation Biology, Molecular Marine Biology, Subtidal and Deep Sea Ecology)	4-5
BI 458	Biological Oceanography	5
BI 474	Marine Ecology	1-8

A seminar series, Seminar: [Topic] (BI 407), features weekly invited speakers who are active researchers in the marine sciences. Undergraduate research is encouraged.

The summer program offers additional 400-level courses emphasizing field studies and includes a variety of eight- and two-week courses as well as weekend workshops. Information and applications are available from the Biology Advising Center, from the director of the institute, or from the OIMB website (<https://oimb.uoregon.edu>).

Malheur Field Station

The University of Oregon is a member of the Malheur Field Station consortium. Located in southeastern Oregon in the heart of the Great Basin desert, the field station provides an excellent opportunity for students to study terrestrial and aquatic systems. Credits earned in courses at the field station may be transferred to the university and are included in the total credits required for a University of Oregon degree. Courses that have been preapproved by the department may be counted for the biology major. Detailed course information and applications may be obtained from the field station website.

Honors Program in Marine Biology

To graduate with honors in marine biology, students must meet the following requirements:

1. Completion of all the requirements for the major in marine biology
2. A minimum cumulative GPA of 3.30 for all upper-division biology courses required for the major
3. Biology courses used to satisfy the marine biology degree requirements must be taken for letter grades
4. Registration for the honors program before research begins. This requires approval of the honors thesis topic by the faculty sponsor and the selection of a second member of the marine biology faculty to serve on the thesis approval committee
5. A minimum of 4 credits of research over at least three terms of research. One of these terms can be accomplished on the main campus while the thesis is being written. That term may, however, require periodic visits to the Oregon Institute of Marine Biology (OIMB)
6. Completion of a thesis, based on laboratory and/or field research that is approved by the OIMB faculty advisor and one other member of the OIMB faculty. Included at the front of the thesis should be a title page

and the thesis defense committee approval. A final copy of the thesis is to be submitted to the OIMB library

7. A public defense of the thesis at OIMB

Students in residence on the main campus while enrolled in the marine biology honors program should consider enrolling in Thesis (BI 403). Contact the instructor of record for information on this course.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Biology Minor

The Department of Biology at the University of Oregon offers expertise and research opportunities in a wide range of disciplines including cell and developmental biology, ecology, evolution, genetics, human biology, marine biology, and neuroscience and behavior. Our undergraduate curriculum provides an introductory overview in each of these areas and provides the opportunity for advanced training and specialization in particular areas through coursework and research experience.

Minor in Biology

Code	Title	Credits
Lower-Division Biology Courses		15
Select three of the following:		
BI 221Z	Principles of Biology I: Cells	
BI 222Z	Principles of Biology II: Organisms	
BI 223Z	Principles of Biology III: Ecology and Evolution	
BI 214	General Biology IV: Biochemistry and Genetics	
Or all three of the following:		

BI 281H	Accelerated Biology I: Cells, Biochemistry and Physiology	
BI 282H	Accelerated Biology II: Genetics and Molecular Biology	
BI 283H	Accelerated Biology III: Evolution, Diversity and Ecology	
Upper-Division Biology Courses ¹		16
Total Credits		31

¹ No more than 4 credits from BI 401–409.

Students interested in a minor in biology should develop a plan for the minor in consultation with an advisor in the Biology Advising Center. Students completing the minor in biology must provide the biology advisor with an electronic submission of a transcript or transfer evaluation that shows any transfer courses that may be applied to the minor.

At least 16 credits of biology applied to the minor must be taken at the University of Oregon.

Course work must be completed with grades of P or C– or better.

Biology (MS)

Master's degrees in biology may be earned in the following programs:

- Ecology and Evolution - this degree is typically completed on the UO campus and emphasizes ecology and evolution and can involve research on terrestrial, aquatic, or marine organisms.
- Marine Biology - this degree is typically completed at the Oregon Institute of Marine Biology campus location at Charleston Oregon (110 miles, 2.5 hours from Eugene) and provides training for a variety of careers in aquatic or marine biology.

Two years are typically required for completion of the master's degree. More information is available on the biology department website (<https://naturalsciences.uoregon.edu/biology/graduate-programs/masters-requirements/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Achieve fluency in the scholarly literature, compelling questions, and research methods in the student's primary field of research.
- Acquire demonstrable and autonomous research skills, in field or laboratory, as befits specialty.
- Learn to process and present scientific data in compelling, credible formats.

Biology Major

Code	Title	Credits
Graduate-level Coursework ¹		36
BI 503	Thesis ²	9
Total Credits		45

¹ Coursework is chosen in consultation with advisor based on student's area of interest. Minimum 30 hours of Graduate-Level Biology Coursework. 24 credits must be completed in residence and graded. Minimum of 9 credits must be at the 600 level.

² Nearly all master's candidates are admitted into the 'thesis' program. In very rare circumstances a student may complete a 'course only' program which would necessitate completing 60 graduate level credits.

Biology (PhD)

PhD students will be considered for one or more Institute-tracks depending on the research interests indicated on their application. Course requirements for individual students vary based on the recommendation of their committees and advisors, but in general, there are very few required courses.

During the first year, students take courses in their area of interest and participate in a laboratory rotation program. The rotations provide direct exposure to research activities in three laboratories and therefore invaluable in helping students select a laboratory in which to carry out dissertation research. After the first year in the program, students devote nearly all of their efforts to research. These activities culminate in the public defense of a dissertation.

More information about Biology PhD requirements can be found here: PhD Requirements | Biology | Natural Sciences (<https://naturalsciences.uoregon.edu/biology/graduate-programs/phd-requirements/>) and in the Graduate Student Handbook here (updated annually): Graduate Community | Biology | Natural Sciences (<https://naturalsciences.uoregon.edu/biology/graduate-programs/community/>)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Achieve fluency in the scholarly literature, compelling questions, and research methods in the student's primary field of research.
- Acquire demonstrable and autonomous research skills, in field or laboratory, as befits specialty.
- Learn to process and present scientific data in compelling, credible formats.
- Gain experience and skills in pedagogy and teaching.
- Develop and execute an original research project that would be judged credible by peers and has or will result in one or more peer-reviewed publications appropriate to the field of study.

Doctor of Philosophy Degree in Biology

Requirements for Doctoral Students

A PhD in Biology from the University of Oregon begins with first-year research rotations, teaching assistantships, coursework, and exams. To help introduce students to different PIs, research, approaches, and biological subdisciplines, first year students participate in three, 10-week long lab rotations. The rotation process helps students gain a sound basis for choosing an area of research for their dissertation and aids them in finding the lab best suited to their interests, personalities, and capabilities.

In addition to rotations, first year students are required to serve three terms as a Graduate Employee (GE) Teaching Assistant (TA). Three terms of being a TA are required to Advance to Candidacy. PhD students also take courses, including Seminars and Journal Clubs each term. There are very few required courses (the exception is BI 610, Ethics in Life Science) although students must complete a minimum of 81 credits to graduate, which is easily achieved over the five-year average time-to-graduation. Institute and training programs may dictate further course

requirements but typically there is abundant flexibility for students to choose courses that are of the greatest interest to them.

Following their first year students will identify a thesis lab and form their Dissertation Advisory Committee (DAC).

Outstanding students may be selected for specialized training as part of shared training programs:

- Molecular Biology and Biophysics Training Program (<https://imb.uoregon.edu/graduate-program/molbio-training-program/>)
- Genetics Training Program (<https://imb.uoregon.edu/graduate-program/genetics-training-program/>)
- Developmental Biology Training Program (<https://devbio.uoregon.edu/>)

During the first year, students take courses in their area of interest and participate in a laboratory rotation [program](#). The rotations provide direct exposure to research activities in three laboratories and therefore invaluable in helping students select a laboratory in which to carry out dissertation research. After the first year in the program, students devote nearly all of their efforts to research. These activities culminate in the public defense of a dissertation.

Second year students conduct research, meet with members of their DAC, take courses, and complete a Proposal Exam. Once students have successfully passed their proposal exam, completed rotations and the teaching requirement (three terms each), and maintained a minimum GPA of 3.0, they may Advance to Candidacy. Thereafter, the primary focus for the student is on their dissertation research.

Total Credits: 81

¹ • All Biology PhD students are required to register for, and participate in, one Journal Club each term of each academic year. Students are required to make at least one journal club presentation each year, starting in Year 2. See the UO course catalog for current journal club offerings. Students who are off campus for research purposes or have conflicts with teaching assignments are exempt from this requirement. The exemption is given on a case-by-case basis.

• All Biology PhD students and OIMB MS students are expected to attend research seminars. Each research institute sponsors a series of research seminars that are typically given by prominent scientists from other institutions. Students are required to register for seminars in their research area each term that relevant seminars are offered. Students who are off campus for research purposes or have conflicts with teaching assignments are exempt from this requirement. Students who are working remotely away from their home campus are still required to attend seminars at the campus they are visiting, or via remote options, if available. In general, remote attendance (i.e., via Zoom) should be considered a temporary measure and in-person participation, where possible, is expected. The exemption is given on a case-by-case basis.

² All Biology PhD students on the Eugene campus must meet their institute's requirement for training in statistics as determined by the IAC, DAC, advisor, or institute requirements. INGP students in the Developmental track and the Neurons, Circuits & Cognition Program are required to take Bi600/DSCI600 Advanced Biological Statistics (Fall) or, with approval from the ION representative to the Graduate Affairs Committee, DSCI626 Foundational Statistics (Spring).

³ INGP students in the Development Track are strongly encouraged to take Advanced Biochemistry - Ch662 in the Winter of the first year. Students in this track are further encouraged to take the other Advanced Development courses as they are offered.

⁴ In some cases, students may also take different combinations of courses from the sub-tracks listed above with approval by the IAC or DAC.

Chemistry and Biochemistry

<http://chemistry.uoregon.edu>

Vicki DeRose, Department Head

91 Klamath Hall
541-346-4603

The Department of Chemistry and Biochemistry offers bachelor of arts and bachelor of science degrees with majors in chemistry or biochemistry. The department enjoys a strong national reputation.

The curriculum in chemistry provides broad knowledge of the field as a part of the liberal education offered by the College of Arts and Sciences. Chemistry course work is a sound foundation for students interested in advanced work in chemistry or related sciences, particularly such fields as biochemistry, geochemistry, materials science, and molecular biology.

Faculty

Shannon W. Boettcher, professor (inorganic, materials science). BA, 2003, Oregon; PhD, 2008, California, Santa Barbara. (2010)

Carl Brozek, assistant professor (physical inorganic, materials science). SB, 2010, Chicago; PhD, 2015, Massachusetts Institute of Technology. (2018)

Jeffrey A. Cina, professor (physical). BS, 1979, Wisconsin, Madison; PhD, 1985, California, Berkeley. (1995)

Donald Clayton, instructor. BS, 2010, Central Washington; MS, 2013, PhD, 2017, Oregon. (2022)

Amanda Cook, assistant professor (organic, inorganic materials science). BS, 2010, California State, Fullerton; PhD, 2015, Michigan, Ann Arbor. (2018)

Victoria J. De Rose, professor (bioinorganic). BA, 1983, Chicago; PhD, 1990, California, Berkeley. (2006)

Deborah B. Exton, associate teaching professor. BS, 1987, Metropolitan State College of Denver; PhD, 1992, Denver. (1993)

Adam Glass, instructor. BS, 2006, Pacific; PhD, 2011, Oregon. (2021)

Marina G. Guenza, professor (physical). Laurea, 1985, Università degli Studi di Genova; PhD, 1989, degree granted by consortium of universities of Torino, Genova, and Pavia. (1998)

Tanya Gupta, instructor. BS, 1998, Beneras Hindu University; MS, 2000, Lunkow; M.Ed., 2007, PhD, 2012, Iowa State. (2021)

Michael M. Haley, Richard M. and Patricia H. Noyes Professor in Chemistry (organic, materials science). BA, 1987, PhD, 1991, Rice. (1993)

Scott Hansen, assistant professor (biochemistry, molecular biology and biophysics). BS, 2004, California, Davis; PhD, 2012, California, San Francisco. (2017)

Michael Harms, associate professor (biochemistry, molecular biology and biophysics). BS, 2004, Oregon State; PhD, 2008, Johns Hopkins. (2013)

Diane K. Hawley, professor (biochemistry). BA, 1976, Kansas; PhD, 1982, Harvard. (1986)

Christopher Hendon, assistant professor (computational materials). BSc, 2011, Monash; PhD, 2015, Bath. (2018)

James E. Hutchison, professor (organic, materials science); Lokey-Harrington Chair in the Department of Chemistry. BS, 1986, Oregon; PhD, 1991, Stanford. (1994)

Ramesh Jasti, professor (organic, inorganic, supramolecular). BS, 1998, North Carolina, Chapel Hill; PhD., 2006, California, Irvine. (2014)

Darren W. Johnson, Bradshaw and Holzapfel Research Professor in Transformational Science and Mathematics (organic). BS, 1996, Texas, Austin; PhD, 2000, California, Berkeley. (2003)

David C. Johnson, professor (inorganic, materials science); Rosaria P. Haugland Foundation Chair in Pure and Applied Chemistry. BA, 1978, Rutgers; MS, 1980, PhD, 1983, Cornell. (1986)

Michael E. Kellman, professor (physical). BS, 1971, California, Berkeley; PhD, 1977, Chicago. (1989)

Paul Kempler, research assistant professor. BS, 2015, Vanderbilt; PhD, 2020, California Institute of Technology. (2020)

Michael Koscho, associate teaching professor (organic). BS, 1993, Purdue; PhD, 1999, Illinois, Urbana-Champaign. (2006)

Mark Lonergan, professor (physical, materials science); director, Materials Science Institute. BS, 1990, Oregon; PhD, 1994, Northwestern. (1996)

Andrew H. Marcus, professor (physical, materials science). BA, 1987, California, San Diego; PhD, 1993, Stanford. (1996)

George V. Nazin, associate professor (physical). MS, 1999, Moscow Institute of Physics and Technology; PhD, 2007, California, Irvine. (2010)

Brad J. Nolen, professor (biochemistry). BA, 1997, Missouri State; PhD, 2003, California, San Diego. (2008)

Catherine J. Page, associate professor (inorganic, materials science). BA, 1980, Oberlin; PhD, 1984, Cornell. (1986)

Michael D. Pluth, professor (organic). BS, 2004, Oregon; PhD, 2008, California, Berkeley. (2011)

Kenneth E. Prehoda, professor (biochemistry). BA, 1991, California State, Sacramento; PhD, 1997, Wisconsin, Madison. (2001)

James Prell, associate professor (physical). BA, 2005, Washington (St. Louis); PhD, 2011, California, Berkeley. (2014)

Geraldine L. Richmond, professor (physical, materials science); Presidential Chair. BS, 1975, Kansas State; PhD, 1980, California, Berkeley. (1985)

Julia Widom, assistant professor (physical, biochemistry). BA, 2009, Northwestern; PhD, 2013, Oregon. (2018)

Cathy Wong, associate professor (physical). BSc, 2004, McMaster; PhD, 2011, Toronto. (2015)

Emeriti

Bruce P. Branchaud, professor emeritus. BS, 1976, Massachusetts; MA, 1981, Dartmouth College; PhD, 1981, Harvard. (1983)

Frederick W. Dahlquist, professor emeritus. BA, 1964, Wabash; PhD, 1969, California Institute of Technology. (1971)

Kenneth M. Doxsee, professor (organic, materials science). BS, 1978, MS, 1979, Stanford; PhD, 1983, California Institute of Technology. (1989)

Thomas R. Dyke, professor emeritus. BA, 1966, Wooster; PhD, 1972, Harvard. (1974)

Thomas Greenbowe, senior instructor. BA, 1972, William Paterson College of New Jersey; MS, 1974, Indiana State University; MS, 1979, Purdue University; PhD, 1982, Purdue University. (2015)

O. Hayes Griffith, professor emeritus. AB, 1960, California, Riverside; PhD, 1964, California Institute of Technology. (1965)

Julie A. Haack, senior instructor. BS, 1986, Oregon; PhD, 1991, Utah. (2000)

John F. W. Keana, professor emeritus. BA, 1961, Kalamazoo; PhD, 1965, Stanford. (1965)

James W. Long, senior instructor emeritus. BS, 1965, Washington (Seattle); PhD, 1969, California, Berkeley. (1978)

Robert M. Mazo, professor emeritus. AB, 1952, Harvard; MS, 1953, PhD, 1955, Yale. (1962)

Tom H. Stevens, Philip H. Knight Professor (biochemistry). BA, 1974, MS, 1976, San Francisco State; PhD, 1980, California Institute of Technology. (1982)

David R. "Randy" Sullivan, senior instructor. BS, 1982, MS, 1989, North Texas. (2001)

David R. Tyler, Charles J. and M. Monteith Jacobs Professor in Chemistry (inorganic, materials science). BS, 1975, Purdue; PhD, 1979, California Institute of Technology. (1985)

Peter H. von Hippel, professor emeritus. BS, 1952, MS, 1953, PhD, 1955, Massachusetts Institute of Technology. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Majors - Bachelor's Degree

- Chemistry (BA/BS) (p. 218)

Minors

- Biochemistry (p. 223)
- Chemistry (p. 223)

Graduate Programs

Major - Master's Degree

- Chemistry (MS) (p. 223)

Major - Doctoral Degree

- Chemistry (PhD) (p. 225)

Biochemistry (BA/BS)

The Department of Chemistry and Biochemistry offers majors in chemistry and biochemistry. Biochemistry majors complete an integrated, rigorous program that includes foundational course work in chemistry and biochemistry and additional course work in related fields. Undergraduate majors benefit from taking graduate courses in synthetic modeling, physical chemistry, materials, computational chemistry, biochemistry, molecular biology, and modern instrumental techniques.

The American Chemistry Society-certified degree emphasizes laboratory experience and the development of professional skills. A unique strength of the department is the opportunity for undergraduates to participate in the activities of a dynamic research group that considers problems extending well beyond textbook instruction.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Coursework:** Students will demonstrate an understanding of the fundamental concepts in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemical). Students will demonstrate a firm foundation in the conceptual, quantitative, and computational thinking that underlies the theories and models that form the basis for reasoning about molecular systems. Students will be able to connect this theoretical understanding to the experimental methods used to test those theories and models. Students will also have opportunities to obtain in-depth knowledge in multiple areas of the discipline. The foundational and in-depth coursework will be aligned with the most recent American Chemical Society Guidelines for Chemistry Programs (<https://www.acs.org/education/policies/acs-approval-program.html>).
- **Instructional Laboratory:** Students will demonstrate proficiency in laboratory techniques and the use of modern instrumentation. Students will be able to carry out experiments in the laboratory, accurately record data and observations, and be able to analyze the results of experiments. Students will be able to handle, synthesize, purify, and characterize new and existing substances. This includes knowing the proper procedures and regulations for the safe handling, use and disposal of chemicals.
- **Research:** Students will employ critical thinking and the scientific method to design, carry out, record, analyze and communicate the results of chemical/biochemical experiments. This includes the ability to identify, or create an appropriate model, formulate a hypothesis, choose an appropriate set of tools and techniques, and design an experiment that tests the hypothesis and analyze the results from that experiment drawing sound scientific conclusions from the results obtained. Students must be able to locate, identify and critically evaluate the chemical/biochemical literature.
- **Communication:** Students will demonstrate effective scientific communication skills, both orally and in writing, to a range of audience levels and for a variety of purposes. Students will

understand how scientific information is shared between peers in modern science, including responsible conduct for acknowledging prior and current contributions.

- **Professional Skills:** Students will develop the interpersonal skills to function cooperatively in a team setting. Students will successfully pursue their career objectives in advanced education in professional and/or graduate schools, in a scientific career in government or industry, in a teaching career in the school systems, or in a related career following graduation
- **Ethics:** Students will be able to understand and apply ethics and values to all professional activities. Students will demonstrate an awareness of the benefits and impacts of chemistry related to the environment, society, and other disciplines outside the scientific community. Students will be prepared to contribute solutions to society's challenges at the intersection of science and society.

Courses taken to satisfy major requirements must be passed with grades of C– or better. Variations in courses and order may be worked out in consultation with an advisor.

Students who plan to attend graduate school should include research in their advanced work. If chemical research is included as part of the advanced work, at least 6 credits of CH 401 Research: [Topic] must be completed. Students who plan to apply to medical schools should investigate the need for a physics laboratory course that is not included in this curriculum.

CH 465	Physical Biochemistry	
CH 466	Structural Biochemistry	
CH 468	Cellular Biochemistry	

Other Advanced Electives

See the table below ³	12
Total Credits	128-135

- ¹ Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.
- ² Students may also take PHYS 251, 202, and 203 or PHYS 251, 252, and 203. Students may not go from the 201-203 series to the 251-253 series without approval from the department.
- ³ Courses cannot be used to satisfy requirements in more than one area.
- ⁴ Minimum of 6 credits of CH 401 and a written report are required for Research.

Other Advanced Electives

Code	Title	Credits
Three approved 400-level courses in chemistry and biology. Students may use one approved 300-level biology course (BI 322, BI 328, or BI 360) as one of the three advanced electives. ¹

¹ See advisor for complete list. Courses used to satisfy the physical and advanced laboratory requirements cannot also be used as an advanced elective.

Honors Program

The criteria used for the selection of students who graduate with departmental honors in chemistry or biochemistry are as follows:

1. Grade point average (GPA) of at least 3.50 in all graded courses
2. Suitable accomplishment in undergraduate chemical or related research. Specifically, the student must pursue a research problem for one academic year or longer and be recommended as worthy of honors by the faculty supervisor. Positive accomplishment and publishable results are expected but not required
3. Endorsement for a major with honors by a member of the university faculty
4. Completion of all course requirements for the BS degree in chemistry (waivers or substitutions allowed with approval)

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Biochemistry

Course	Title	Credits	Milestones
First Year			
Fall			
MATH 112Z or MATH 251Z	Precalculus II: Trigonometry or Differential Calculus		4
WR 121Z	Composition I		4

Chemistry (BA/BS)

The Department of Chemistry and Biochemistry offers majors in chemistry and biochemistry. Biochemistry majors complete an integrated, rigorous program that includes foundational course work in chemistry and biochemistry and additional course work in related fields. Undergraduate majors benefit from taking graduate courses in synthetic modeling,

physical chemistry, materials, computational chemistry, biochemistry, molecular biology, and modern instrumental techniques.

The American Chemistry Society-certified degree emphasizes laboratory experience and the development of professional skills. A unique strength of the department is the opportunity for undergraduates to participate in the activities of a dynamic research group that considers problems extending well beyond textbook instruction.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Coursework:** Students will demonstrate an understanding of the fundamental concepts in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemical). Students will demonstrate a firm foundation in the conceptual, quantitative, and computational thinking that underlies the theories and models that form the basis for reasoning about molecular systems. Students will be able to connect this theoretical understanding to the experimental methods used to test those theories and models. Students will also have opportunities to obtain in-depth knowledge in multiple areas of the discipline. The foundational and in-depth coursework will be aligned with the most recent American Chemical Society Guidelines for Chemistry Programs (<https://www.acs.org/education/policies/acs-approval-program.html>).
- **Instructional Laboratory:** Students will demonstrate proficiency in laboratory techniques and the use of modern instrumentation. Students will be able to carry out experiments in the laboratory, accurately record data and observations, and be able to analyze the results of experiments. Students will be able to handle, synthesize, purify, and characterize new and existing substances. This includes knowing the proper procedures and regulations for the safe handling, use and disposal of chemicals.
- **Research:** Students will employ critical thinking and the scientific method to design, carry out, record, analyze and communicate the results of chemical/biochemical experiments. This includes the ability to identify, or create an appropriate model, formulate a hypothesis, choose an appropriate set of tools and techniques, and design an experiment that tests the hypothesis and analyze the results from that experiment drawing sound scientific conclusions from the results obtained. Students must be able to locate, identify and critically evaluate the chemical/biochemical literature.
- **Communication:** Students will demonstrate effective scientific communication skills, both orally and in writing, to a range of audience levels and for a variety of purposes. Students will understand how scientific information is shared between peers in modern science, including responsible conduct for acknowledging prior and current contributions.
- **Professional Skills:** Students will develop the interpersonal skills to function cooperatively in a team setting. Students will successfully pursue their career objectives in advanced education in professional and/or graduate schools, in a scientific career in government or industry, in a teaching career in the school systems, or in a related career following graduation.
- **Ethics:** Students will be able to understand and apply ethics and values to all professional activities. Students will demonstrate an awareness of the benefits and impacts of chemistry related to the environment, society, and other disciplines outside the scientific community. Students will be prepared to contribute solutions to society's challenges at the intersection of science and society.

The program described below is the recommended curriculum for chemistry majors. It includes courses in chemistry and related fields. Courses taken to satisfy major requirements must be passed with grades of C– or better. Variations in courses and order may be worked out in consultation with an advisor. Advisors can also provide lists of substitute courses and courses that are recommended but not required.

Students are encouraged to participate in CH 401 Research: [Topic].

Chemistry Major Requirements

Code	Title	Credits

CH 228Z & CH 218	General Chemistry II Laboratory and Chemistry Tools II ¹	2
CH 229Z & CH 219	General Chemistry III Laboratory and Chemistry Tools III ¹	2
Upper Division		
CH 331 & CH 335	Organic Chemistry I and Organic Chemistry II	8
CH 461 & CH 462	Biochemistry and Biochemistry	8
CH 463 or CH 467	Biochemistry Biochemistry Laboratory	4
Total Credits		38

¹ Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.

Other courses may be submitted for consideration and approval by the department. At least 12 credits for the biochemistry minor must be completed at the University of Oregon. All courses applied to the minor must be completed with grades of C– or better. Credits earned in CH 407 Seminar: [Topic], CH 405 Reading and Conference: [Topic], and CH 409 Capstone may not be applied to required coursework for the biochemistry minor.

Chemistry Minor

Chemistry minors complete an integrated, rigorous program that includes foundational work in general and organic chemistry. Undergraduates may also benefit from taking upper division courses in synthetic, physical, materials, computational chemistry, biochemistry, molecular biology, and modern instrumental techniques. A unique strength of the program is the opportunity for undergraduates to participate in the activities of a dynamic

research group that considers problems extending well beyond textbook instruction.

Biochemistry majors cannot minor in Chemistry minor.

Chemistry Minor

A minor in chemistry may be designed from course work in general chemistry, including the laboratory sequence, and at least four additional upper-division courses. University requirements for the minor include a total of 24 credits in chemistry, 15 of which must be in upper-division courses and 12 of which must be completed at the University of Oregon. All courses for the minor must be completed with grades of C– or better. Credits earned in CH 407 Seminar: [Topic], CH 405 Reading and Conference: [Topic], and CH 409 Capstone may not be applied as required course work for the minor.

Chemistry (MS)

Research at the University of Oregon is designed to keep student researchers at the forefront of chemical science. Our programs in the traditional areas of biochemistry, inorganic, organic, and physical chemistry lay the foundation for new discoveries in materials science, molecular biology, optics, and theoretical chemistry. Though our department is medium in size, we are a leading innovator in chemistry.

A unique strength of our program is its interdisciplinary approach to research and teaching. Chemical scientists may be interested in the Institute of Molecular Biology, the Institute for Fundamental Science, the Materials Science Institute, the Oregon Center for Optical, Molecular, and Quantum Science (OMQ), and the programs in cell biology and molecular synthesis, structure, and dynamics.

We offer a traditional Master's as well as several internship-based Master's programs. Internship salaries can help offset the cost of tuition for students in an internship program; the traditional Master's program does not include financial support.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Have in-depth knowledge in a main subfield of chemistry. Students will acquire this knowledge by doing advanced course work in the field, reading scientific papers, and optionally performing original research in the lab.
- Students pursuing a research master's degree will learn how to carry out independent chemistry research. Students will learn literature comprehension skills, will properly cite and reference techniques and methods, will be able to place one's research in context of the field, and will be able to communicate research results through scientific publications and presentations. Students will be able to formulate scientific hypotheses, understand the scientific method and apply it to research design, will become proficient at data gathering and interpretation, and will be able to write a research proposal. Students will pursue a research problem culminating in a written thesis that makes a significant and original contribution to the understanding of chemistry.
- Have professional development skills and knowledge. Students will attend professional meetings and make oral or poster presentations. Students will learn how to get internships in governmental labs, in industry, or in teaching. Students will learn soft skills, such as leadership, problem-solving, teamwork, communication.

- Understand and have awareness of professional, ethical and safety applications of their knowledge. Students will develop and understand the ethical and social dimension of science and the role and responsibility of chemistry for the advancement of the society. Students will learn and put into practice the expectations of responsible conduct in the professional field. Students will learn about laboratory safety and best safety practices.

University Requirements The Student will need complete the UO requirements in Writing, Arts and Letters, Social Science, and Cultural Literacy **53**

Total Credits **219**

¹ Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.

Admission Process

Students apply to program during their junior year.

- (1) GPA and course of study to date
- (2) resume including volunteer and paid work, and previous experiences
- (3) personal statement including experiences, career goals and discussion of contributions to diversity, equity, and inclusion
- (5) interview including technical, experience, and behavioral components

Chemistry (PhD)

Research at the University of Oregon is designed to keep student researchers at the forefront of chemical science. Our programs in the traditional areas of biochemistry, inorganic, organic, and physical chemistry lay the foundation for new discoveries in materials science, molecular biology, optics, and theoretical chemistry. Though our department is medium in size, we are a leading innovator in chemistry.

At the University of Oregon, we recognize the importance of diversity and breadth in graduate education and continue to respond to the shifts and changes in career opportunities available to our graduates. In pursuit of this goal, we take a cross-disciplinary, interdepartmental approach to research and graduate training. Institutes and centers facilitate scientific investigation at the boundaries of traditional fields and foster collaboration and cooperation between researchers in different departments. Faculty members and students are actively involved in collaborative research efforts in the department and in the interdepartmental research institutes, providing unique opportunities for defining and solving scientific problems. Students pursuing a Ph.D. in chemistry may choose to complete thesis projects under the guidance of faculty in other departments, such as biology or physics.

While we de-emphasize the boundaries of traditional disciplines, the classic areas of chemistry do provide a convenient and familiar way to describe the department's educational activities and research. They include: biochemistry, molecular biology and biophysical chemistry; organic-inorganic chemistry; and physical chemistry.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Acquire in-depth knowledge in a main subfield of chemistry. Students will acquire this knowledge by doing advanced course work in the field, reading scientific papers, performing original research in the lab, and passing an advancement exam in the student's research area.
- Acquire a breadth of knowledge in other subfields of chemistry. Students will acquire this knowledge by doing course work and taking cumulative exams.
- Learn how to carry out independent chemistry research. Students will learn literature comprehension skills, will properly cite and reference techniques and methods, will be able to place one's research in context of the field, and will be able to communicate research results through scientific publications and presentations. Students will be able to formulate scientific hypotheses, understand the scientific method and apply it to research design, will become proficient at data gathering and interpretation, and will be able to write a research proposal. Students will pursue a research problem culminating in a written thesis that makes a significant and original contribution to the understanding of chemistry.
- Acquire professional development skills and knowledge. Students will attend professional meetings and make oral or poster presentations. Students will learn how to obtain internships in governmental labs, in industry, or in teaching. Students will learn soft skills, such as leadership, problem-solving, teamwork, communication.
- Understand and apply ethics and values to all professional activities. Students will demonstrate an awareness of the benefits and impacts of chemistry related to the environment, society, and other disciplines outside the scientific community. Students will learn and put into practice the expectations of responsible conduct in the professional field. Students will learn about laboratory safety and best safety

practices. Students will be prepared to contribute solutions to society's challenges at the intersection of science and society.

Chemistry Major Requirements

Requirements for all students

- Participate in the undergraduate teaching program for at least 3 terms
- Rotate through 3 different labs during the first year
- Identify and join a research group by the end of the first year
- 4th term review is usually in the fall of 2nd year with a written and an oral report
- Annual review each year after advancement to candidacy with a written and an oral report

Biochemistry Requirements

- Advancement to Candidacy
- Satisfactory completion of BI 620, CH 662
- Seminars and Journal Club

Organic/Inorganic/Material Requirements

- Advancement to Candidacy Exam
- Six graded graduate-level courses of 3 or 4 credits each
- Seminars and Journal Club (CH 607, CH 623)

Physical Chemistry Requirements

- Advancement to Candidacy Exam; 3rd-year research presentation
- Six graded graduate-level courses of 3 or 4 credits each
- Seminars and Journal Club (CH 607, CH 624)

Computer science, the study of computation, offers students the challenge and excitement of a dynamically evolving science whose discoveries and applications affect every aspect of modern life. Computer science is a rich intellectual field where practitioners apply a computational approach to address a wide variety of interesting and challenging problems. Computer scientists are engaged in research in core areas of theoretical computer science, computer systems design, algorithms, and programming languages, as well as more application-oriented areas such as databases and networking.

Faculty

Zena M. Ariola, professor (programming languages, lambda calculus, logic). BS, 1980, Pisa; PhD, 1992, Harvard. (1992)

Hank Childs, professor (scientific visualization, high-performance computing, computer graphics). BS, 1999, PhD, 2006, California, Davis. (2013)

Jee W. Choi, assistant professor (high-performance computing, scientific computation, data analytics). BS, 2000, PhD, 2015, Georgia Institute of Technology. (2019)

Phil Colbert, instructor (education, healthcare, environmental sciences, IoT, full stack development, CIT Minor). BS, 1990 CSU Chico; MS, 2008, CSU Chico. (2014)

Dejing Dou, professor (artificial intelligence, data mining, natural language processing). BE, 1996, Tsinghua; MS, 2000, PhD, 2004, Yale. (2004)

Brittany Erickson, assistant professor (scientific computing, computational seismology, high performance computing). BS, 2004, MS, 2006, PhD, 2010, California, Santa Barbara. (2018)

Ramakrishnan Durairajan, assistant professor (computer networking, multi-cloud computing, Internet data science, programmable optics, cybersecurity). BS, 2010, College of Engineering, Guindy; MS, 2014, PhD, 2017, Wisconsin, Madison. (2017)

Stephen F. Fickas, professor (software engineering, formal modeling of distributed systems, digital humanities). BS, 1971, Oregon State; MS, 1973, Massachusetts; PhD, 1983, California, Irvine. (1983)

Kathleen Freeman Hennessy, associate teaching professor; director of undergraduate studies. BS, 1982, Bucknell; PhD, 1993, Oregon. (2011)

Anthony J. Hornof, professor (human-computer interaction, assistive technology, cognitive modeling). BA, 1988, Columbia; MS, 1996, PhD, 1999, Michigan. (1999)

Lei Jiao, assistant professor (networking and distributed computing, performance modeling and evaluation, algorithm design and application). BS, 2007, MS, 2010, Northwestern Polytechnical; PhD, 2014, Göttingen. (2016)

Jun Li, professor (computer and network security, network architectures and protocols, distributed systems). BS, 1992, Peking; ME, 1995, Chinese Academy of Sciences; MS, 1998, PhD, 2002, California, Los Angeles. (2002)

Yingjiu (Joe) Li, professor (cyber security and privacy). BS, 1990, Dalian University of Technology; PhD, 2003, George Mason University. (2019)

Daniel Lowd, associate professor (machine learning, data mining, artificial intelligence). BS, 2003, Harvey Mudd College; MS, 2005, PhD, 2010, Washington (Seattle). (2009)

Allen D. Malony, professor (parallel processing, performance evaluation, neuroinformatics). BS, 1980, MS, 1982, California, Los Angeles; PhD, 1990, Illinois, Urbana-Champaign. (1991)

Thanh H. Nguyen, assistant professor (artificial intelligence, multi-agent systems, machine learning). BS, 2010, Hanoi University of Science and Technology; PhD, 2016, University of Southern California. (2018)

Thien Huu Nguyen, assistant professor (natural language processing, data mining, machine learning, artificial intelligence). BE, 2011, HUST, Hanoi; MS, 2014, PhD, 2018, NYU, New York. (2018)

Boyana Norris, associate professor (high-performance computing, compilers, performance analysis and optimization, software engineering, data science). BS, 1995, Wake Forest; PhD, 2000, Illinois, Urbana-Champaign. (2013)

Reza Rejaie, professor (computer networks, networked systems, Internet measurement). BS, 1991, Sharif University of Technology; MS, 1996, PhD 1999, Southern California. (2002)

Humphrey Shi, assistant professor (Computer Vision, Machine Learning, AI Systems & Applications). BS, 2005, Tsinghua University; PhD, 2017, University of Illinois at Urbana-Champaign. (2019)

Joseph Sventek, professor (complex event processing, Internet of Things). BS, 1973, Rochester; PhD, 1979, California, Berkeley. (2014)

Dave Wilkins, instructor. BA, 1965, Whitman College; MS, 1971, Oregon. (2010)

Eric D. Wills, associate teaching professor. BS, 2000, MS, 2002, PhD, 2008, Oregon. (2010)

Christopher B. Wilson, associate professor (computational complexity, models of computation). BS, 1978, Oregon; MS, 1980, PhD, 1984, Toronto. (1984)

Michal Young, associate professor (software engineering, software test and analysis). BA, 1983, Oregon; MS, 1985, PhD, 1989, California, Irvine. (1997)

Emeriti

Sarah A. Douglas, professor emerita. AB, 1966, California, Berkeley; MS, 1979, PhD, 1983, Stanford. (1983)

Arthur M. Farley, professor emeritus. BS, 1968, Rensselaer Polytechnic Institute; PhD, 1974, Carnegie-Mellon. (1974)

Michael Hennessy, senior instructor. BS, 1982, MS, 1984, Oregon. (1984)

Virginia M. Lo, associate professor emerita. BA, 1969, Michigan; MS, 1977, Pennsylvania State; PhD, 1983, Illinois, Urbana-Champaign. (1984)

Eugene M. Luks, professor emeritus. BS, 1960, City University of New York, City College; PhD, 1966, Massachusetts Institute of Technology. (1983)

Andrzej Proskurowski, professor emeritus. MS, 1967, Warsaw University of Technology; PhD, 1974, Royal Institute of Technology, Stockholm. (1975)

Kent A. Stevens, professor emeritus. BS, 1969, MS, 1971, California, Los Angeles; PhD, 1979, Massachusetts Institute of Technology. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Affiliated Faculty

Sameer Shende, research associate professor and director, Performance Research Laboratory (performance evaluation tools, programming models, software stack for HPC and AI/ML). BTech, 1991, IIT Bombay; MS, 1996, PhD 2001, University of Oregon. (2001)

Participating

Heidi Kaufman, English

Amy K. Lobben, geography

Marc Schlossberg, planning, public policy and management

McKay M. Sohlberg, special education and clinical sciences

Sanjay Srivastava, psychology

Jeffrey Stolet, music

Don M. Tucker, psychology

Undergraduate Programs

Major - Bachelor's Degree

- Computer Science (BA/BS) (p. 227)
- Cybersecurity (BS) (p. 231)
- Mathematics and Computer Science (BA/BS) (p. 273)

Minors

- Computer Information Technology (p. 232)
- Computer Science (p. 233)

Graduate Programs

- Computer Science (MS) (p. 233)

Major - Doctoral Degree

- Computer Science (PhD) (p. 235)

Computer Science (BA/BS)

As a computer science major, you'll study the computer as a machine—both concrete and abstract—and as a powerful tool for solving problems and exploring in a wide variety of areas. Through your computer science courses, you will learn how to design, analyze, and implement algorithms and programs, computer systems, and programming languages. You will have the opportunity to take classes in topics such as data science, artificial intelligence, networks and security, graphics and visualization, and more. From research and web design to data mining and software engineering, students in this field are on the cutting edge of prospective careers.

As computer science becomes increasingly intrinsic to countless aspects of daily life, the spectrum of career opportunities in this field continues to expand. By the time you graduate with a degree in computer science, you'll be a computational thinker prepared to flourish in any profession you choose.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate technical competency in the main areas of computer science, including theoretical foundations, computer systems, programming languages, and software development.
- Draw on a broad knowledge of computer science to design, implement, and test software solutions to significant problems in a variety of areas.
- Understand the broad applicability and impacts of computing; be proficient in one or more subareas of computer science or applied computer science.

- Adapt and extend fundamental knowledge and skills to new problem domains and emerging technologies.
- Communicate and collaborate with others as part of a project team, and express ideas orally and in writing.
- Recognize professional responsibilities and make informed judgments in computing practice based on ethical principles.

Computer Science Major Requirements

Computer science majors must complete at least 60 credits of CS courses, of which 24, including 12 upper-division credits, must be earned in residence at the University of Oregon. In addition, majors must complete 28 credits in mathematics, 12 credits in the sciences, and 4 credits of technical or business writing. The specific requirements for the CS major fall into five categories: core courses, concentration and elective courses, mathematics, writing, and science.

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of **B– or better** before students can take the upper-division core courses. Advanced Placement or International Baccalaureate exams for CS 210, CS 211, MATH 251Z, MATH 252Z, and MATH 253Z are acceptable with a mark of P*.

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better, unless otherwise noted with * footnote.

Code	Title	Credits
Core Courses: Lower Division		
CS 210–212	Computer Science I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
Core Courses: Upper Division		
CS 313	Intermediate Data Structures	4
CS 314	Computer Organization	4
CS 315	Intermediate Algorithms	4
CS 330	C/C++ and Unix	4
CS 415	Operating Systems	4
CS 422	Software Methodology I	4
CS 425	Principles of Programming Languages	4
Core Courses: Mathematics		
MATH 251Z	Differential Calculus	4
or MATH 261		
or MATH 246	Calculus for the Biological Sciences I	
MATH 252Z	Integral Calculus	4
or MATH 247	Calculus for the Biological Sciences II	
MATH 341	Elementary Linear Algebra	4
MATH 343	Statistical Models and Methods	4
or MATH 345M	Probability and Statistics for Data Science	
Core Courses: Ethics *		
PHIL 223	Data Ethics	4
or PHIL 123	Internet, Society, and Philosophy	
Core Courses: Science *		
Select 12 credits from one the following science areas: ¹		12
Biology ^{2,3}		
CH 111	Introduction to Chemical Principles	
or CH 113	The Chemistry of Sustainability	

or CH 221Z General Chemistry I		
or CH 224H Advanced General Chemistry I		
BI 221Z	Principles of Biology I: Cells	
BI 222Z	Principles of Biology II: Organisms	
or BI 223Z	Principles of Biology III: Ecology and Evolution	
Chemistry ³		
CH 221Z–223Z	General Chemistry I-III	
or CH 224H-Honors General Chemistry 226H		
Earth Sciences		
ERTH 201	Dynamic Planet Earth	
ERTH 202	Earth's Surface and Environment	
ERTH 203	History of Life	
Geography		
GEOG 141	The Natural Environment	
Select two of the following:		
GEOG 321	Climatology	
GEOG 322	Geomorphology	
GEOG 323	Biogeography	
Physics ^{3,4}		
PHYS 201	General Physics

Psychology		
PSY 201Z	Introduction to Psychology I	
Select two of the following:		
PSY 301	Scientific Thinking in Psychology	
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 348	Music and the Brain	
Core Course: Writing [*]		
WR 320	Scientific and Technical Writing	4
or WR 321 Business Communications		
or HC 301H Research and Writing: [Topic]		
Electives: Upper Division		
Upper-division CS courses in student's chosen concentration or courses numbered 410 or higher ⁵		12
Upper-division CS courses in student's chosen concentration, honors thesis, capstone project, or other upper-division courses ^{*,5,6}		8
Upper-division mathematics or theoretical computer science course ^{*,7}		4
Total Credits		108

* Courses used to fulfill this requirement must be taken for a letter grade of C- or better or mark of Pass (P or P*).

¹ To support interdisciplinary study, students are encouraged to complete a minor (typically 24–32 credits) or major in a computing-related field. Students who complete a minor (other than computer information technology or mathematics) or another major (including

mathematics) in a computing-related field may, with the approval of the Undergraduate Education Committee, replace the CS laboratory science requirement with the completed minor or major.

² BI 221Z-223Z are acceptable.

³ Students are encouraged to complete the accompanying lab courses.

⁴ Physics is recommended for networks concentration students.

⁵ If Experimental Course: [Topic] (CS 410) courses are applied, they must have different topic subtitles to satisfy this requirement.

⁶ A maximum of 8 credits in upper-division courses numbered less than 410, multi-listed with CS course (DSCI 372M), or DSCI 311. CS courses numbered 400–409 may be taken for a maximum of 4 credits per course number. Special Studies: [Topic] (CS 399), Seminar: [Topic] (CS 407), and Experimental Course: [Topic] (CS 410) courses must have different topic subtitles to satisfy this requirement. CS 399 and CS 410 courses must have a prerequisite of CS 313 and have regular weekly class meetings and homework assignments.

⁷ The mathematics elective is selected from upper-division mathematics courses with a prerequisite of Integral Calculus (MATH 252Z) or higher, or from theoretical computer science courses. A list of theoretical computer science courses is available in the computer science office or the department website.

Major Progress Review and Major in Good Standing

Each major must meet with a computer science advisor and file the Major Progress Review form while taking Intermediate Data Structures (CS 313) or Computer Organization (CS 314). Mathematics and CS core courses and at least 12 credits of CS upper division elective courses numbered 410 or higher must be taken for letter grades and passed with grades of C- or better. Other courses used to satisfy the major requirements may be taken for letter grades or pass/no pass. Grades of C- or better or P must be earned in these courses. At least 12 of the CS upper-division credits applied to the degree must be taken in residence at the university.

Concentrations

Concentrations, or focus areas, highlight areas of specialization within the department and guide student elective choices. Each concentration has an approved list of CS courses, available from the Computer Science office or the department website. Concentrations may also include recommended science or mathematics courses or a recommended minor in another field.

AI and Machine Learning Concentration

The artificial intelligence and machine learning concentration prepares students to develop computational solutions to problems that require emerging problem solving techniques, often involving inference from large collections of noisy data. Course work focuses on neural and statistical approaches to inference as well as search.

Computer Networks Concentration

The Computer Networks concentration prepares students for careers as network systems administrators, network protocol developer-programmers, or network security specialists in a wide range of environments, including educational institutions, business enterprises, and government agencies, as well as for advanced graduate studies and research in the field of computer networks. Course work encompasses most aspects of network theory and practice.

High Performance Computing/Computational Science Concentration

The High Performance Computing/Computational science concentration prepares students to apply computational and mathematical techniques to the analysis and management of scientific data. Course work in this concentration combines depth in applied and formal aspects of Computer Science.

Security Concentration

The Security concentration provides a foundation in topics and concepts relating to the security of computer systems and networks. It prepares students to work as security analysts and provides a highly desirable skill set for all employers, ranging from software engineers to administrators, in both the private and government sectors. It also provides a foundation for further graduate study and research in security. Course work encompasses a strong understanding of computer systems and networks and their security, and can be tailored to a more theoretical or more applied focus.

Software Development Concentration

The Software Development concentration prepares students for careers in software engineering, software project management, software quality assurance, and other areas involving the creation of software. Course work focuses on solving problems related to the cost of development as well as the quality of the software delivered in complex software projects.

Honors Program

Students with a GPA of 3.50 or higher in computer science and a cumulative GPA of 3.50 or higher, or a GPA of 3.75 or higher in computer science and a cumulative GPA of 3.25 or higher, are encouraged to apply to the department honors program after completing Intermediate Data Structures (CS 313), Computer Organization (CS 314), Intermediate Algorithms (CS 315), and C/C++ and Unix (CS 330). The application form is available in the department office. To graduate with departmental honors, a student must write and present a thesis under the supervision of a faculty member. Honors students will take 4 credits of CS 403 Thesis and up to 4 credits of CS 401 Research to satisfy this requirement.

Computer Science Accelerated Master's Program

Computer Science undergraduate majors at the UO have the opportunity to graduate with B.S. and M.S. Computer Science degrees in a five-year program. See Computer Science Graduate Program (MS) (p. 234).

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them. Additional information may be found at the department website (<https://cs.uoregon.edu>).

Bachelor of Arts in Computer Science

Course	Title	Credits	Milestones
First Year			
Fall			
CS 122	Introduction to Programming and Problem Solving (recommended)	4	

MATH 112Z	Precalculus II: Trigonometry	4
WR 121Z	Composition I	4
Core-education course in arts and letters		4
Credits		16

Winter

CS 210	Computer Science I	4
MATH 251Z	Differential Calculus	4
or	or Calculus for the Biological Sciences I	
MATH 246	Sciences I	
WR 122Z	Composition II	4
or WR 123	or College Composition III	
Core-education course in social science		4
Credits		16

Spring

CS 211	Computer Science II	4
MATH 252Z	Integral Calculus	4
or	or Calculus for the Biological Sciences II	
MATH 247	Sciences II	
Core-education course in arts and letters		4
Core-education course in social science		4
Credits		16

Second Year

Fall

CS 212	Computer Science III	4
MATH 231	Elements of Discrete Mathematics I	4
First course of additional science sequence		4
Core-education course in social science that also satisfies a cultural literacy requirement		4
Credits		16

Winter

CS 314	Computer Organization	4
MATH 232	Elements of Discrete Mathematics II	4
Second course of additional science sequence		4
Core-education course in arts & letters		4
Credits		16

Spring

CS 322	Introduction to Software Engineering	4
or WR 320	or Scientific and Technical Writing	
	or Business Communications	
or	or Research and Writing: [Topic]	
WR 321		
or		
HC 301H		
MATH 253Z	Calculus: Sequences and Series	4
or	or Elementary Linear Algebra	
MATH 341	or Statistical Models and Methods	
	or Statistical Methods I	
or	or Probability and Statistics for Data Science	
MATH 343	Science	

or
MATH 425

or
MATH 345M

Third course of additional science sequence	4
Core-education course in arts & letters that also satisfies a cultural literacy requirement	4
Credits	16
Third Year	
Fall	
CS 313 Intermediate Data Structures	4
MATH 253Z Calculus: Sequences and Series	4
or MATH 341 or Elementary Linear Algebra or Statistical Models and Methods or Statistical Methods I or MATH 343 or Probability and Statistics for Data Science	
or MATH 425	
or MATH 345M	
WR 320 Scientific and Technical Writing	4
or WR 321 or Business Communications or Research and Writing: [Topic] or HC 301H Introduction to Software Engineering or CS 322	
First term of second-language sequence	4
Credits	16
Winter	
CS 315 Intermediate Algorithms	4
CS 330 C/C++ and Unix	4
Upper-division mathematics elective course	4
Second term of second-language sequence	4
Credits	16
Spring	
CS 415 Operating Systems	4
Upper-division elective course with CS subject code	4
PHIL 223 Data Ethics	4
Third term of second-language sequence	4
Credits	16
Fourth Year	
Fall	
CS 425 Principles of Programming Languages	4
Upper-division elective course (410-499) with CS subject code	4
Upper-division elective course	4
Credits	12
Winter	
CS 422 Software Methodology I	4
Upper-division elective course (410-499) with CS subject code	4
Upper-division elective course	4
Credits	12
Spring	
Upper-division elective course with CS subject code	4

Upper-division elective course (410-499) with CS subject code	4
Upper-division elective course	4

Cybersecurity (BS)

As our lives increasingly rely on cyberspace, the demand for securing cyberspace continues to grow. There is a substantial shortage of cybersecurity professionals in Oregon and nationwide. As a cybersecurity major, you will have the foundational knowledge and hands-on skills to become leaders in this crucial field. The curriculum for the major closely follows the guidelines and standards set by the National Security Agency (NSA) for cybersecurity education. This ensures that graduates possess a robust skill set and knowledge base that aligns with the latest developments in the field. Graduates of this program will be well-prepared to tackle the evolving challenges of modern cybersecurity threats.

We invite students who are passionate about cybersecurity, eager to immerse themselves in experiential learning, and ready to contribute to the safety of cyberspace to explore this exciting new program. Together, we will shape the future of cybersecurity and cultivate a generation of professionals who are at the forefront of defending against ever-evolving cyber threats.

Computer Science majors and Computer Science minors cannot major in Cybersecurity major.

Admission

Students may be admitted to the major after consultation with an adviser in the Department of Computer Science or with an advisor in Tykeson Hall. Students should seek admission to this major early in their career at the university as the requirements have a number of course dependencies.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Learn essential knowledge and up-to-date techniques in cybersecurity, including those in the main areas of fundamental

security concepts and principles, applied cryptography, program security, and system and network security.

- Hone hands-on skills in cybersecurity via computer and network security lab courses and field studies.
- Be able to draw on a broad knowledge and hands-on skills of cybersecurity to design, implement, and test solutions to cybersecurity tasks.
- Understand the wide-ranging effects and interdisciplinary aspects of cybersecurity while attaining proficiency in one or multiple subdomains within the field of cybersecurity.
- Apply and expand foundational knowledge and skills to new problem domains and emerging technologies.
- Possess effective communication and collaboration abilities and express ideas clearly and concisely both orally and in written form.
- Adhere to ethical principles and make well-informed decisions in the field of cybersecurity.

Cybersecurity Major Requirements

Code	Title	Credits
Stage 1 All courses must be taken graded with a grade of B- or better.		
CS 102	Fundamentals of Computer and Information Security	4
CS 210	Computer Science I	4
CS 211	Computer Science II	4
CS 212	Computer Science III	4
MATH 231	Elements of Discrete Mathematics I	4
MATH 232	Elements of Discrete Mathematics II	4
Stage 2 All courses must be taken graded.		
CS 313	Intermediate Data Structures	4
CS 314	Computer Organization	4
CS 315	Intermediate Algorithms	4
CS 330	C/C++ and Unix	4
CS 332	System and Security Administration Lab	4
CS 333	Applied Cryptography	4
Stage 3 All courses must be taken graded.		
CS 415	Operating Systems	4
CS 422	Software Methodology I	4
CS 425	Principles of Programming Languages	4
CS 432	Introduction to Networks	4
CS 433	Computer and Network Security	4
CS 437	Computer and Network Security Practicum (Computer and Network Security Practicum) to be submitted for approval soon	4
Stage-3 depth courses		8
CS 434	Computer and Network Security II	
CS 436	Secure Software Development	
Breadth Courses A maximum of 8 credits may be taken Pass/No Pass.		16
Any 400-level CS courses and CS 322		
A maximum number of 8 credits from courses CS 399, CS 400M, and CS 410 may be counted toward the degree		
A maximum number of 8 credits from CS 403 may be counted toward the degree		
A maximum number of 4 credits from courses CS 405 and CS 407 may be counted toward the degree		

CS 405, CS 407, CS 399, CS 410 repeatable only with different subtitles

Writing Requirement: one of the three The course may be taken Pass/No Pass or Graded. **4**

WR 320	Scientific and Technical Writing
WR 321	Business Communications
HC 301H	Research and Writing: [Topic]
Field Study Over one or multiple terms with a total four (4) credits. The course may be taken Pass/No Pass or Graded. 4	
CS 401	Research: [Topic]
CS 404	Internship: [Topic]
CS 406	Practicum: [Topic]

Total Credits **104**

Additional Requirements

- 24 CS credits must be earned in residence at the University of Oregon.
- Satisfactory progress: Apart from Stage 1, all other courses must be completed with a grade of C- or better if graded. Students who receive three grades below C- in all courses will be removed from the major. Below C- grades are cumulative. Retaking and passing a course does not change the total number of below C- grades.

Computer Information Technology Minor

The minor in computer information technology (CIT) teaches students about the development and management of business databases, computer networks, web applications, and software systems.

Computer Information Technology Minor

The minor in computer information technology (CIT) prepares students to work with evolving technologies for work environments that require development and management of web applications, databases, computer networks, open-source platforms, and cloud computing. It provides practical experience in understanding the tools and technologies of the computing field. It goes well with majors in the professional schools such as business and journalism and is an excellent match with almost any major on campus.

Before enrolling in CIT upper-division courses, students planning a minor in computer information technology must file an application form with the department. Each student should consult with an assigned CIT faculty advisor to plan the minor program.

Lower-division courses must be completed with grades of B- or better. Upper-division courses must be taken in sequence and are offered only once a year. Upper-division courses must be completed with grades of C- or better.

Code	Title	Credits
Lower-Division Courses		
CS 110	Fluency with Information Technology	4
CS 111	Introduction to Web Programming	4
CIT 281	Web Applications Development I	4
Upper-Division Courses		
CIT 381	Database Systems	4
CIT 382	Web Applications Development II	4

CIT 383	Networking Fundamentals	4
Total Credits		24

Computer Science Minor

The minor in computer science introduces the theories and techniques of computer science and develops programming skills that are applicable to the student's major. It is a strong complement to a major in any of the sciences and in other related fields such as multimedia, economics, digital humanities, data science, and more. Students from all majors have found their career opportunities enhanced through the CS minor.

Before enrolling in upper-division courses, students planning a minor in computer science must file an application form with the department. Each student should consult with a CS faculty advisor to plan the minor program.

Computer Science Minor Requirements

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B- or better before students can take the upper-division core courses.

Upper-division courses used to fulfill the minor requirements must be taken for a letter grade of C- or better or a mark of Pass (P, in courses where P/N is an option). 8 of 12 upper-division credits must be taken in residence.

Code	Title	Credits
Lower-Division Courses		
CS 210–212	Computer Science I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
Upper-Division Courses		
CS 313	Intermediate Data Structures	4
Electives ¹		8
Total Credits		32

¹ Complete at least two upper-division courses (CS 300-399, CS 410-499, DSCI 311, DSCI 372M). CS 400-409 courses do not count for CS minor requirements.

Computer Science (MS)

The Master of Science (MS) degree program prepares students for ever-expanding career opportunities. Possibilities range from the development of time-critical software for aerospace applications to the design of graphics and animation software, and implementation and testing of next-generation internet protocols.

Program's Admission Requirements

Please visit the program's website (<https://scds.uoregon.edu/cs/graduate-programs/masters/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Core Knowledge Breadth: Demonstrate a working knowledge of fundamental theories, research findings, and methodological

approaches within Computer Science (Foundations, Systems, Data Science).

- Core Knowledge Depth: Demonstrate a deep working knowledge of advanced theories, research findings, and methodological approaches within one of the Computer Science areas of Foundations, Systems, and Data Science.
- Software Engineering: Demonstrate a working knowledge of software engineering and development techniques and related hands-on skills.
- Thesis Option Additional Outcome - Scientific Inquiry: Achieve a fluency in the scientific literature and the ability to pursue compelling questions within a primary field of research, and (for empirical research studies) achieve proficiency in relevant experimental design, methodology, and data analysis/statistical methods.
- Thesis Option Additional Outcome - Scientific Communication: Demonstrate effective written scientific communication skills.

Master of Science in Computer Science Requirements

Code	Title	Credits
Breadth Requirement: 12 credits total ¹		12
CS 621	Algorithms and Complexity	
CS 670	Data Science	
And one of the following:		
CS 630	Distributed Systems	
CS 631	Advanced Parallel Computing	
Depth Requirement: Choose one, 12 credits total ¹		12
Each Depth requires three courses, at least one at 600-level		
Foundations Depth		
CS 513	Advanced Data Structures	
CS 520	Automata Theory	
CS 543	User Interfaces	
CS 545	Modeling and Simulation	
CS 561	Introduction to Compilers	
CS 624		
Data Science Depth		
CS 543	User Interfaces	
CS 551	Database Processing	
CS 553	Data Mining	
CS 571	Introduction to Artificial Intelligence	
CS 572	Machine Learning	
CS 573	Probabilistic Methods for Artificial Intelligence	
CS 600 level course		
Systems Depth		
CS 531	Introduction to Parallel Computing	
CS 532	Introduction to Networks	
CS 533	Computer and Network Security	
CS 534	Computer and Network Security II	
CS 541	Introduction to Computer Graphics	
CS 561	Introduction to Compilers	
CS 630	Distributed Systems	
CS 631	Advanced Parallel Computing	
CS 632	Computer Networks	
CS 633	Advanced Network Security	
Writing Requirement		2

CS 640	Writing in Computer Research
Elective Options: 28 credits total ⁴	
28	
Up to twelve credits in courses outside department in area closely related to professional goals may be used ⁵	
Thesis Option ⁶	
CS 503	Thesis
Maximum of 16 units (total) from CS 503 (thesis), CS 601 (research) and CS 609 (final project). Also, there must be between 9 and 12 units of CS 503.	
CS 5XX and CS 6XX: Minimum of 8 graded credits, maximum of 11 P/NP credits	
Non-Thesis Option	
CS 609	Terminal Project
CS 5XX and CS 6XX: Minimum of 18 graded credits, maximum of 10 P/NP credits	
DRP Option ⁸	
CS 601	Research: [Topic]
Maximum of 16 units (total) from CS 503 (thesis), CS 601 (research) and CS 609 (final project).	
Completion of the directed research project (DRP) milestone in the CS PhD program and approval from the DRP committee that the project meets the standards of an MS thesis.	
Total Credits	
54	

¹ A grade of B- or better is required
² Cannot duplicate Depth course used
³ Cannot duplicate Breadth course used
⁴ A grade of C or better is required in graded elective credits
⁵ Courses must be approved by petition to the CS GEC; options include courses in linguistics, mathematics, physics, and psychology.
⁶ Cannot include CS 609 Final Project
⁷ CS 609 Final Project requirements: 8-12 credits; graded or P/NP
⁸ No credit of CS 503 (Thesis) or CS 609 (Final Project) may count toward the elective credit requirements

Grade Requirements

The 24 credits in the breadth courses and the depth courses must be passed with grades of B– or better. Graded elective courses must be passed with grades of C or better. A 3.00 GPA must be maintained for courses taken in the program.

Master’s Thesis

The research option requires a written thesis and 9 to 12 credits in Thesis (CS 503). Thesis research is supervised by a faculty advisor; this advisor and other faculty members constitute the thesis committee. The master's thesis is expected to be scholarly and to demonstrate mastery of the practices of computer science. This option is recommended for students who plan subsequent PhD research.

Master’s Project

The project option requires a minimum of 9 credits, and as many as 12, in Final Project Terminal Project (CS 609).

Under the supervision of a faculty member, the project may entail a group effort involving several master’s degree students.

Computer Science Accelerated Master's Program

Computer Science undergraduate majors at the UO have the opportunity to graduate with B.S. and M.S. Computer Science degrees in a five-year program.

Students with junior or senior status in the Computer Science major who have completed the 300-level required courses and CS 415 (with a grade of A- or better), and have a GPA of 3.50 or higher in computer science and a cumulative GPA of 3.50 or higher, or a GPA of 3.75 or higher in computer science and a cumulative GPA of 3.25 or higher may apply to the Accelerated Master's Program in Computer Science (AMP-CS). This application form is available in the department office.

Interested students should schedule an appointment with the CS Director of Undergraduate Studies before applying. Upon acceptance to AMP-CS, students may take graduate courses to fulfill major requirements that will also fulfill Master's degree requirements, according to UO AMP guidelines, for students admitted to the Computer Science Master's degree program.

AMP-CS students will work closely with undergraduate and graduate advisors to ensure that they are on track to graduate with both degrees. Students who do not maintain satisfactory progress or who choose not to continue to a master's degree can still graduate with a B.S. degree in Computer Science in four years.

Computer Science Early Start Master's Program

This program is open to students who earn a BS or BA degree in computer science at the University of Oregon and who want to enter the master's degree program.

If a UO undergraduate takes one or two 400-level electives that also are offered as 500-level courses, the student can petition the department to have 4 or 8 credits deducted from the total number of elective credits required for the master's degree. The student must earn an A– or better in the 400-level course and have an overall GPA of 3.50 in upper-division CS courses to participate in this Computer Science Early Start Master's program. Note that all admission procedures, as outlined in the Master's Degree Program section, are also applicable. Applications are available in the department office. This program may be combined with the Computer Science Accelerated Master's Program (described above).

Code	Title	Credits

Total Credits: 54

- a CS 522 will fulfill an undergraduate major required course requirement (CIS 422) and a master's elective requirement.
- b A maximum of 8 credits of 5/60x courses, with some exclusions, may, with prior approval, be used toward CS major undergraduate requirements and M.S. requirements. CS 503 and other CS 60x courses (e.g., CS 601, 609), when taken for a master's thesis or project (9-16 credits), must be taken as a graduate student.
- c CS 500 and 600 level courses numbered 5/610 or higher and taken for a grade will meet undergraduate CS upper-division elective requirements when taken with a passing grade. CS 500 and 600 level courses numbered 5/610 or higher and taken for a grade and passed with a minimum grade of B will also meet graduate required or elective courses requirements.

¹ A grade of B- or better is required² Cannot duplicate Depth course used³ Cannot duplicate Breadth course used⁴ A grade of C or better is required in graded elective credits⁵ Up to 8 graded credits from CS Department Accelerated M.S. may be used. See CS website.⁶ Up to twelve credits in courses outside department in area closely related to professional goals may be used. Courses must be approved

by petition to the CS GEC; options include courses in linguistics, mathematics, physics, and psychology.

⁷ Cannot include CS 609 Final Project. Note that the Thesis Option requires at least 8 graded elective credits, which may include 500 and 600 level elective courses taken as an undergraduate.

⁸ Optional CS 609 Final Project requirements: 8-12 credits; graded or P/NP. Note that the Non-Thesis Option requires at least 18 graded elective credits, which may include 500 and 600 level elective courses taken as an undergraduate.

⁹ No credit of CS 503 (Thesis) or CS 609 (Final Project) may count toward the elective credit requirements. Note that the DRP Option requires at least 8 graded elective credits, which may include 500 and 600 level elective courses taken as an undergraduate.

Computer Science (PhD)

The doctor of philosophy in computer science is, above all, a high-quality degree that is not conferred simply for the successful completion of a specified number of courses or years of study. It is a degree reserved for students who demonstrate a comprehensive understanding of computer science and an ability to do creative research. Each PhD student produces a significant piece of original research, presented in a written dissertation and defended in an oral examination.

The PhD program is structured to facilitate the process of learning how to do research. Students begin by taking required courses to build a foundation of knowledge that is essential for advanced research. Early in the program the student gains research experience by undertaking a directed research project under the close supervision of a faculty member and the scrutiny of a faculty committee. In the later stages of the program, students take fewer courses and spend most of their time exploring their dissertation area to learn how to identify and solve open problems. The final steps are to propose an independent research project, do the research, and write and defend a dissertation.

Admission

Application materials should be submitted by December 15 for the following fall term. Materials include everything required for admission to the master's program as well as a discussion of the anticipated research area.

Students who enter the UO with a master's degree may petition the Graduate Education Committee for credit toward the course requirements listed below, indicating how their prior graduate work corresponds to these courses. See the graduate coordinator for the petition.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Core Knowledge Breadth:** Demonstrate a broad working knowledge of fundamental theories, research findings and methodological approaches in multiple content areas within Computer Science (Foundations, Systems, Data Science).
- **Core Knowledge Depth:** Demonstrate a deep working knowledge of advanced theories, research findings, and methodological approaches within one of the Computer Science areas of Foundations, Systems, and Data Science.
- **Software Engineering:** Demonstrate a working knowledge of software engineering and development techniques and related hands-on skills.

- Scientific Inquiry: Achieve a deep fluency in the scientific literature and the ability to ask and pursue compelling questions within a primary field of research, and achieve proficiency in relevant experimental design, methodology, and data analysis/statistical methods.
- Scientific Communication: Demonstrate effective oral and written scientific communication skills.

³ Cannot duplicate Breadth course used

⁴ A grade of C or better is required in graded elective credits

⁵ Elective Options require that PhD students must take an additional 24 credits of graduate-level courses, 12 of which must be from 600-level courses. Courses numbered 510, which appear on the approved course list, may be included in any 500-level credits. For graduate level courses taken in other departments on campus, a petition to the Graduate Education Committee is required.

PhD Degree Requirements

PhD candidates who enter the program without a master's degree in computer science must take 48 credits in graduate course work including the core and cluster courses required for the MS program. Doctoral students must earn a minimum grade of B– and an overall GPA of 3.50 in the six courses they use to satisfy the breadth and depth requirements.

Minimum Annual Enrollment

PhD students are expected to enroll in at least 6 credits of 600-level course work each year until their advancement to candidacy. Research: [Topic] (CS 601), Dissertation (CS 603), and Reading Conference: [Topic] (CS 605) do not satisfy this requirement. After candidacy, PhD students are encouraged to continue participation in 600-level courses

Directed Research Project

Complete a directed research project, which is supervised by a faculty member and evaluated by a faculty committee. The research project comprises the following:

1. The definition and expected results of the project in the form of a Directed Research Project Contract
2. Delivery of the materials constituting the results of the project and oral presentation of the results
3. A private oral examination by the committee members

Status Change

PhD candidates are admitted conditionally. Successful completion of the directed research project leads to a change in the student's doctoral status from conditional to unconditional.

Dissertation Advisory Committee

After successfully completing the directed research project, PhD students form a Dissertation Advisory Committee chaired by their research advisor. The main role of the committee is to advise the student between completion of the research project and mounting the dissertation defense. The committee takes primary responsibility for evaluating student progress. In addition, it approves the plan for the area examination, which in turn is approved by the graduate education committee. See the graduate coordinator for further instructions.

Area Examination

The student chooses an area of research and works closely with an advisor to learn the area in depth by surveying the current research and learning research methods, significant achievements, and how to pose and solve problems. The student gradually assumes a more independent role and prepares for the area examination, which tests depth of knowledge in the research area. The examination contains the following:

1. A survey of the area in the form of a position paper and an annotated bibliography

2. A public presentation of the position paper
3. A private oral examination by committee members

Advancement to Candidacy

After the area examination, the committee decides whether the student is ready for independent research work; if so, the student is advanced to candidacy.

Dissertation and Defense

Identify a significant unsolved research problem and submit a written dissertation proposal to the dissertation committee. The dissertation committee, comprising three department members and one member from an outside department, is approved by the graduate education committee. In addition to these four, the dissertation committee often includes a fifth examiner. This outside examiner should be a leading researcher in the candidate's field who is not at the University of Oregon. The outside member should be selected a year before the candidate's dissertation defense, and no later than six months before.

The student submits a written dissertation proposal to the committee for approval, and the proposal is then submitted to the graduate education committee. The proposal presents the research problems to be tackled, related research, methodology, anticipated results, and work plan. The committee may request an oral presentation, similar to the area exam, which allows the student to explain and answer question about the proposed research. The student then carries out the research.

The final stage is writing a dissertation and defending it in a public forum by presenting the research and answering questions about the methods and results. The dissertation committee may accept the dissertation, request small changes, or require the student to make substantial changes and schedule another defense

Division of Graduate Studies Requirements

PhD students must meet the requirements set by the Division of Graduate Studies as listed in that section of this catalog

Research Areas

It is important that a PhD student be able to work effectively with at least one dissertation advisor. Hence the student should identify, at an early stage, one or more areas of research to pursue. The student should also find a faculty member with similar interests to supervise the dissertation.

Data Science

<http://datascience.uoregon.edu>

Bill Cresko, Executive Director for the Data Science Initiative

541-346-4779

At the UO, Data Science students and faculty harness the power of data to unravel mysteries, predict trends and drive impactful change. Students have access to state-of-the-art facilities and resources, including high-performance computing clusters and extensive datasets, enabling them to explore and analyze real-world problems across diverse domains. Through collaboration with industry and academic partners, the Data Science Program fosters a vibrant and dynamic learning environment, preparing students for a successful career in data science.

Undergraduate Program

Major - Bachelor's Degree

- Data Science (BA/BS) (p. 237)

Data Science (BA/BS)

The volume, rate, and importance of data is growing exponentially, with more data being created in the past two years than in all history combined. At the University of Oregon we're bringing our strengths as a liberal arts university to the field – to not only ask what can we do with data – but what should we do.

As a data science major at the UO, you will learn key computational, statistical, and inferential data science skills side-by-side with applied knowledge in one of 10 different areas: accounting analytics, biology, earth science, economics, geography, linguistics, marketing analytics, music technology, physics, and sociology. Our unique interdisciplinary program teaches you how to extract knowledge and insight from data, empowering you to make decisions earlier, faster, better. When you graduate, your understanding of applied data science techniques, framed within the liberal arts, will help launch you directly into the workforce.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate the ability to assess data set quality, identifying and rectifying potential errors in such a way so as to lead to statistically meaningful derived information.
- Visualize complex data sets using descriptive statistics and graphs.
- Demonstrate understanding of basic regression, optimization, prediction, simulation, and visualization methods.
- Use critical thinking skills to translate substantive questions into well-defined statistical or probability problems and choose the appropriate graphical or numerical descriptive and/or inferential statistical techniques for a given problem, leading to actionable, valid, and meaningful conclusions.
- Develop successful strategies for formulating and testing hypotheses about data.
- Demonstrate an understanding of ethical, legal, societal, and economic concerns.
- Apply fundamental concepts of data science (data management, statistical prediction and inference, experimental design, etc.) to applications specific to the chosen specialization domain.

Data Science Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better.

The data science curriculum combines general principles with domain-specific application. The curriculum is sub-divided into the following categories with the corresponding requirements:

Code	Title	Credits
Data Science Core Courses		
DSCI 101	Foundations of Data Science I	4
DSCI 102	Foundations of Data Science II	4
DSCI 311	Principles and Techniques of Data Science	4

Foundations in Mathematics and Computing

CS 210 & CS 211 & CS 212	Computer Science I and Computer Science II and Computer Science III	12
MATH 251Z & MATH 252Z	Differential Calculus and Integral Calculus	8
MATH 341 & MATH 342	Elementary Linear Algebra and Elementary Linear Algebra	8

Probability

DSCI/MATH 345M	Probability and Statistics for Data Science	4

Modeling, Learning and Decision Making

DSCI/CS 372M	Machine Learning for Data Science	4

Ethics Course

PHIL 223	Data Ethics	4

Computational and Inferential Depth

Select three courses from the list below:		12
CS 314	Computer Organization	
CS 322	Introduction to Software Engineering	
CS 330	C/C++ and Unix	
CS 333	Applied Cryptography	
CS 415	Operating Systems	
CS 432	Introduction to Networks	
MATH 253Z	Calculus: Sequences and Series	
MATH 307	Introduction to Proof	
MATH 461	Introduction to Mathematical Methods of Statistics I	
MATH 462	Introduction to Mathematical Methods of Statistics II	
MATH 463	Mathematical Methods of Regression Analysis and Analysis of Variance	
MATH 458	Introduction to Mathematical Cryptography	
DSCI 401	Research: [Topic] ¹	
DSCI 404	Internship: [Topic] ¹	

Domain Emphasis **23-31**

Total Credits **87-95**

¹ 4 credits between DSCI 401 and DSCI 404 can collectively count for only one CID elective.

Domain Emphasis

The domain emphasis consists of completing 2-3 courses (8-15 credits) in the domain core, followed by a minimum of 4 courses (16 credits) of domain specialization. For each domain emphasis, a curated list of courses has been developed for both the core and specialization component. Please see the Concentrations tab (p. 238) for a detailed list of courses that satisfy each available domain emphasis.

Residency Requirements

At least 34 credits of coursework applied to the major must be taken at the University of Oregon. These credits must include enrollment in DSCI 311, DSCI 345, and DSCI 372.

An essential aspect of the degree in data science is that data science majors develop critical competencies in a domain emphasis of their choosing. The domain emphasis consists of completing 2-3 courses

(8-12 credits) in the domain core, followed by a minimum of 3 courses (12 credits) of domain specialization. For each domain emphasis, a curated list of courses has been developed for both the core and specialization component.

Currently, domain emphases have been established for biology, geography, accounting analytics, marketing analytics, and linguistics. The curated list of domain core and domain specialization courses for each domain is outlined below.

- Accounting Analytics (p. 238)
- Biology (p. 239)
- Cultural Analytics (p. 239)
- Earth Sciences (p. 239)
- Economics (p. 239)
- Geography (p. 239)
- Linguistics (p. 240)
- Marketing Analytics (p. 240)
- Music Technology (p. 240)
- Physics (p. 241)
- Sociology (p. 241)

Data Science Domain - Accounting Analytics

Data has proliferated in business as organizations generate large volumes of information within their day to day operations while increasingly having access to externally created information as well.

Data science applied to accounting data can help organizations understand the implications for decision-making and provide better insights. You might delve into company sales data, purchasing data, contracts, or company disclosures to help solve a variety of business problems.

In the data science domain area of accounting analytics, you will learn to search for relationships between different variables and outcomes they influence, driving business decisions and informing success.

Code	Title	Credits
Core Courses:		
BA 101Z	Introduction to Business	4
BA 215	Accounting: Language of Business Decisions	4
or BA 211Z	Principles of Financial Accounting	
EC 201Z	Principles of Microeconomics	4
Required		
BA 169Z	Data Analysis Using Microsoft Excel	4
ACTG 350	Intermediate Accounting I	4
Take two out of the following three		8
ACTG 410	Experimental Course: [Topic] (Accounting Data and Analytics Capstone)	
ACTG 480	Accounting Data Analytics I	
OBA 455	Data Driven Predictive Modeling	
Total Credits		28

Data Science Domain - Biology

Recent technological breakthroughs in DNA sequencing mean that scientists can characterize an organism's entire genome in a matter of days. But a great challenge remains in translating that genomic sequence — nature's data set — into biology.

That translation is fundamentally changing how we study biology.

In the data science domain area of biology, you will find yourself on the cutting edge of the field, working in the acquisition, analysis, and interpretation of data and how it applies to gene function, disease, microbial ecology, and the assembly and characterization of new genomes.

Code	Title	Credits
Core Courses:		
BI 221Z	Principles of Biology I: Cells	5
BI 222Z	Principles of Biology II: Organisms	5
BI 223Z	Principles of Biology III: Ecology and Evolution	5
or BI 214	General Biology IV: Biochemistry and Genetics	
Electives - Select four of the following:		16
BI 320	Molecular Genetics	
BI 360	Neurobiology	
BI 370	Ecology	
BI 430	Analysis of Neural Data	
BI 471	Population Ecology	
BI/MATH 497M	Deterministic Dynamical Modeling in Biology	
DSCI 411	Capstone Project	
Total Credits		31

EC 201Z	Principles of Microeconomics	4
EC 311	Intermediate Microeconomic Theory	4
EC 320	Introduction to Econometrics I	4
EC 421	Introduction to Econometrics II	4
Choose three from the following:		12
EC 422	Economic Forecasting	
EC 428	Behavioral and Experimental Economics	
EC 434	Environmental Economics	
EC 443	Health Economics	
EC 451	Issues in Labor Economics	
EC 460	Theories of Industrial Organization	
EC 482	Economics of Globalization	
EC 490	Economic Growth and Development	
Total Credits		28

Data Science Domain - Geography

Spatial data is integrated into our everyday lives and employed in a range of professions. We are all integrated into a complex web of movement, place, and discovery, whether we're navigating across town or interpreting maps of election results.

UO geographers use spatial data technologies to focus on remote sensing of the changing environment, climate-change analysis, web-mapping, cartography and data visualization, spatial cognition, and spatial patterns in public health.

In the data science domain area of geography, you will be studying how spatial data can revolutionize business, nonprofit, and government worlds.

Code	Title	Credits
Core Courses:		
GEOG 181	Our Digital Earth	4
GEOG 481	GIScience I	4
GEOG 482	GIScience II	4
Select four of the following		16
GEOG 485	Remote Sensing I	
GEOG 486	Remote Sensing II	
GEOG 490	GIScience: [Topic]	
GEOG 491	Advanced Geographic Information Systems	
GEOG 492	Web Mapping	
GEOG 493	Advanced Cartography and Geo-Visualization	
GEOG 495	Geographic Data Analysis	
DSCI 411	Capstone Project	
Total Credits		28

Data Science Domain - Linguistics

Usage-based linguistics studies language as a dynamic, constantly changing system. Much of this work involves working with large collections of text or speech – referred to as “corpora.” Examples of readily available real-world corpora include Amazon product reviews and collections of Twitter messages.

Linguists use corpora to help identify patterns and structures in language, providing insights into how we both acquire and lose language skills, how language use varies across people and contexts, and how real-life speech and language evolve.

In the data science domain area of linguistics, you will learn methods to identify linguistic structures within corpora, gleaning new insights while using the best and latest practices in the field. These methods will allow you to answer basic science questions as well as questions that are of interest to marketing firms, political consulting groups, or other commercial enterprises. So, for example, you can use the knowledge you acquire in the linguistics domain to explore how the use of a word like “cool” has changed over time (a basic science question) or to identify linguistic strategies associated with leading positive product reviews for different product types (a marketing question).

Code	Title	Credits
Core Courses:		
LING 301	Introduction to Linguistics Analysis	4
Select two of the following:		8
LING 302	Introduction to Linguistic Behavior	
LING 311	Phonetics and Phonology	
LING 312	Morphosyntax	
Electives - Select four of the following:		16
LING 411	Phonetics	
LING 415	Semantics	
LING 430	Research Methods for Applied Linguistics	
LING 431	Statistical Methods in Linguistics	

LING 435	Advanced Morphology
LING 451	Advanced Syntax
LING 493	Corpus Linguistics
Data Science Capstone Course	
Total Credits	28

Data Science Domain - Marketing Analytics

Marketing analytics is the practice of measuring, managing, and analyzing marketing performance to maximize effectiveness and optimize return on investment. Data science applied to marketing data can help a business predict consumer behavior, improve decision-making, and gauge the success of marketing investments.

For example, machine learning and statistical techniques can be used to classify data and detect patterns that might predict a campaign’s success.

In the data science domain area of marketing analytics, you will learn how to see the future, through the lens of both existing and new methods of predictive analytics.

Earth Sciences

<http://earthsciences.uoregon.edu>

Samantha Hopkins, Department Head

100 Cascade Hall
1272 University of Oregon
Eugene, OR 97403-1272
541-346-5976

Earth science applies the basic sciences of physics, biology, chemistry, and mathematics to understanding processes that have shaped the earth through the last 4.5 billion years. Here at the UO, we are well positioned to study these processes using the natural laboratory found in Oregon, where subduction drives volcanoes and earthquakes, which uplift mountains and inspire surface processes of erosion and deposition. These in turn have in turn fostered an unparalleled fossil record of the age of mammals.

Faculty

Ilya N. Bindeman, professor (stable isotope geochemistry, volcanology). BS, 1988, Moscow; PhD, 1998, Chicago. (2004)

Edward B. Davis, associate professor (vertebrate paleontology). BS, 1999, Tennessee, Knoxville; PhD, 2005, California, Berkeley. (2013)

Rebecca J. Dorsey, professor (sedimentology, basin analysis). BS, 1983, Vermont; MA, 1986, PhD, 1989, Princeton. (1997)

Josef Dufek, professor (volcanology). BS, 2000, Chicago; MS, 2004, PhD, 2006, Washington (Seattle). (2017)

Brittany Erickson, assistant professor (computational science). PhD, 2010, Santa Barbara (2018)

Thomas Giachetti, assistant professor (volcanology). MS, 2006, PhD, 2010, Université Blaise Pascal, Clermont-Ferrand. (2015)

Emilie Hooft Toomey, associate professor (marine geophysics). BSc, 1990, Trinity College, Toronto; PhD, 1997, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (1999)

Samantha Hopkins, associate professor (paleontology). See **Robert Donald Clark Honors College**.

Qusheng Jin, associate professor (biogeoscience). BS, 1994, Nanjing; MS, 1997, Chinese Academy of Sciences; PhD, 2003, Illinois, Urbana-Champaign. (2005)

Leif A. Karlstrom, assistant professor (volcanology, geomorphology, fluid mechanics). BS, 2006, Oregon; PhD, 2011, California, Berkeley. (2011)

Diego Melgar, assistant professor (earthquake seismology, tsunamis, geodetic imaging). BEng., 2009, Universidad Nacional Autonoma de Mexico; MS, 2010, PhD, 2014, Scripps College. (2017)

Marli B. Miller, associate teaching professor (structural geology). BA, 1982, Colorado College; MS, 1987, PhD, 1992, Washington (Seattle). (1997)

Matthew Polizzotto, associate professor (soil and environmental hydrogeochemistry). BS, BA, 2001, Rochester; PhD, 2007, Stanford. (2016)

Alan W. Rempel, professor (geomechanics and applied mathematics). BASc, 1991, MSc, 1995, British Columbia; PhD, 2001, Cambridge. (2004)

Gregory J. Retallack, professor (paleobotany, paleosols). BA, 1973, Macquarie; PhD, 1978, New England University, Australia. (1981)

Joshua J. Roering, professor (surface processes, geomorphology). BS, 1994, MS, 1995, Stanford; PhD, 2000, California, Berkeley. (2000)

Valerie Sahakian, assistant professor (tectonics, ground seismology, marine geophysics). BS, 2009, Rhode Island; MS, 2010, PhD, 2015, Scripps College. (2018)

David A. Sutherland, associate professor (physical oceanography). BA, 2001, North Carolina, Wilmington; PhD, 2008, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (2011)

Amanda M. Thomas, associate professor (earthquake seismology and fault mechanics). BS, 2007, Georgia Institute of Technology; PhD, 2012, California, Berkeley. (2015)

Douglas R. Toomey, professor (seismology, tectonics, midocean ridges). BS, 1981, Pennsylvania State; PhD, 1987, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (1990)

Meredith Townsend, assistant professor (volcanology). BS, 2011, Washington and Lee, PhD, 2017, Stanford (2019)

Paul J. Wallace, professor (igneous petrology, volcanology, geochemistry). BS, 1986, George Washington University; PhD, 1991, California, Berkeley. (2001)

James M. Watkins, associate professor (experimental petrology, geochemistry, volcanology). BS, 2005, Wisconsin, Eau Claire; PhD, 2010, California, Berkeley. (2012)

Research Staff

Andrew Hadlock, research assistant. BS, 2018, Florida (2019)

Sara Meyer, field technician. BS, 2010, California, Santa Cruz; IT specialist certification, 2015, Alaska, Fairbanks. (2017)

Leland O'Driscoll, seismic field technician. PhD, 2012, Oregon (2015)

James Palandri, research associate. PhD, 2000, Oregon. (2001)

Silas Thoms, research assistant. BS, 2019, Oregon State (2019)

Lucy Walsh, research assistant. MS, 2012, Oregon. (2017)

Emeriti

Eugene D. Humphreys, professor (seismology, regional tectonics). BS, 1974, MS, 1978, California, Riverside; PhD, 1985, California Institute of Technology. (1985)

A. Dana Johnston, professor (experimental petrology, geochemistry). BS, 1976, Bates; MS, 1978, PhD, 1983, Minnesota. (1986)

M. Allan Kays, professor emeritus. BA, 1956, Southern Illinois; MA, 1958, PhD, 1960, Washington (St. Louis). (1961)

William N. Orr, professor emeritus. BS, 1961, Oklahoma; MA, 1963, California, Riverside and Los Angeles; PhD, 1967, Michigan State. (1967)

Mark H. Reed, professor (mineral deposits, aqueous geochemistry). BA, 1971, Carleton; MS, 1974, PhD, 1977, California, Berkeley. (1979)

Jack M. Rice, professor emeritus. AB, 1970, Dartmouth College; MS, 1972, PhD, 1975, Washington (Seattle). (1977)

Norman M. Savage, professor emeritus. BSc, 1959, Bristol; PhD, 1968, Sydney. (1971)

Ray J. Weldon, professor (neotectonics, structural and quaternary geology). BA, 1977, Pomona; PhD, 1986, California Institute of Technology. (1987)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

Earth Sciences (BA/BS)

Students in the Department of Earth Sciences learn about the minerals, rocks, soils, and waters that make up the earth, and the processes that shape the earth from deep in its interior to the atmosphere. Earth science applies the basic sciences of physics, biology, chemistry, and

mathematics to understanding processes that have shaped the earth and other planetary bodies. Earth scientists combine field investigations with laboratory experiments and theoretical studies to understand the physical, chemical and biological processes that govern the behavior and interactions of complex earth systems.

Earth science applications include natural hazards such as earthquakes, floods, landslides and volcanic eruptions that affect humans. Other subdisciplines investigate how humans alter the earth's environments, where we pollute rivers and ground water, cause rapid erosion, attempt to re-engineer rivers and shorelines, and alter the earth's atmosphere, oceans, and global climate. Earth science research also includes the study of the deep earth to understand processes that drive the motions of tectonic plates and generate the earth's magnetic field.

Environmental Geoscience Track

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency with modern quantitative tools that are used in the Earth sciences.
- When confronted with real-world Earth science problems, develop and test hypotheses in a systematic way while stating caveats and assumptions.
- Recognize, describe, and quantify dynamic processes that operate on the Earth's surface environments, as well as the interaction of humans with these environments.

Geology Track

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency with modern quantitative tools that are used in the Earth sciences.
- When confronted with real-world Earth science problems, develop and test hypotheses in a systematic way while stating caveats and assumptions.
- Use techniques from modern earth science disciplines to solve complex problems across a diversity of scales through time and space that require consistent geological reasoning.

Geophysics Track

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency with modern quantitative tools that are used in the Earth Sciences.
- When confronted with real-world Earth science problems, develop and test hypotheses in a systematic way while stating caveats and assumptions.
- Develop a foundation in mathematics and physics that enables them to quantitatively describe key aspects of fundamental Earth processes.

Paleontology Track

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency with modern quantitative tools that are used in the Earth sciences.
 - When confronted with real-world Earth science problems, develop and test hypotheses in a systematic way while stating caveats and assumptions.
 - Demonstrate proficiency with the tools and techniques necessary to recognize geological evidence and reconstruct geological history for biological processes that have driven the evolution of life, as preserved in fossils extracted from ancient rocks.
- Geology (p. 244)
 - Geophysics (p. 245)
 - Environmental Geoscience (p. 245)
 - Paleontology (p. 246)

Earth Sciences Major - Geology Track

Code	Title	Credits

Undergraduate Research

As many as 4 credits of research can be counted toward electives in any of the tracks. To receive such credit, students must

- submit a short letter, approved by the faculty research advisor and addressed to the head undergraduate advisor in earth sciences, stating the nature of the research and asserting that there is faculty supervision
- submit a final written report to the faculty advisor describing the results of the research

Students may earn credit in this category by registering for any of the following:

Code	Title	Credits
ERTH 401	Research: [Topic]	1-21
ERTH 406	Field Studies: [Topic]	1-6
ERTH 408	Laboratory Projects: [Topic]	1-6

Students who complete an honors thesis may not apply this option toward elective credits.

Grade Options and Standards

Undergraduate majors must take for letter grades (the pass/no pass option is not acceptable) all the courses required in their degree program. Required courses must be completed with grades of C– or better. Exceptions for honors students are noted under Honors in Earth Sciences.

Honors in Earth Sciences

Application for graduation with honors in earth sciences must be made no later than spring term of the student’s junior year. To be eligible for graduation with honors, a student must

- maintain a grade point average (GPA) of 3.50 or better in geological sciences courses or a 3.00 or better in all science courses
- submit and orally present an acceptable honors thesis written under the supervision of a department faculty member and evaluated by a committee consisting of three faculty members including the supervisor. The thesis should be presented no later than three weeks before final examinations during the term the student plans to graduate

Honors students may register for 3 credits of Research: [Topic] (ERTH 401) the term before they intend to graduate, and 3 credits of Thesis (ERTH 403) the term of graduation. These credits may be applied toward electives.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Earth Sciences Minor

The undergraduate program in the Department of Earth Sciences provides an understanding of the materials that constitute the earth and the processes that have shaped the earth from deep in its interior to the surface environment—geology. Geology applies all the basic sciences—biology, chemistry, mathematics, and physics—to understanding earth processes in the historical context of geologic time. It is a science that explores problems by combining field investigations with laboratory experiments and theoretical studies.

Geology also addresses many natural hazards—earthquakes, flooding, and volcanic eruptions—that affect humans. It addresses the impact of humans on the earth’s surface environment, where we pollute rivers and ground water, cause rapid erosion and landslides, or attempt to re-engineer rivers and shorelines.

Earth Sciences Minor Requirements

Code	Title	Credits
Choose one of the following three-course sequences:		12
ERTH 101	Exploring Planet Earth	
or ERTH 201	Dynamic Planet Earth	
ERTH 102	Exploring Earth’s Environment	
or ERTH 202	Earth’s Surface and Environment	
ERTH 103	Exploring Earth History	
or ERTH 203	History of Life	
Choose from the following courses: ¹		16
ERTH 213	Geology of National Parks	

ERTH 300 - ERTH 499	
Total Credits	28

¹ 16 credits of earth sciences courses (exclusive of independent study courses) must be earned with course numbers greater than ERTH 299 (ERTH 213 is acceptable, however). No more than 8 credits may be applied to the minor from the following list: Geology of National Parks (ERTH 213), The Fossil Record (ERTH 304), Dinosaurs (ERTH 305), Volcanoes and Earthquakes (ERTH 306), Oceanography (ERTH 307), Geology of Oregon and the Pacific Northwest (ERTH 308), Earth Resources and the Environment (ERTH 310).

Undergraduate minors must take all required courses for letter grades and complete them with grades of C– or better.

Earth Sciences (MS)

The Department of Earth Sciences offers programs of graduate study leading to master of science (MS) and doctor of philosophy (PhD) degrees with opportunity for research in a wide variety of specialty fields. Course work is designed to meet individual needs, and students may pursue independent research in geobiology, geochemistry, geodesy, geomechanics, geomorphology, geophysics, mineralogy, petrology, volcanology, paleontology, stratigraphy, sedimentary petrology, structural geology, and ore deposit geology. The master's degree program requires two years or more for completion.

Graduate study in earth sciences is offered in five broad areas:

1. volcanology-petrology-geochemistry
2. stratigraphy-surface processes
3. paleontology-paleopedology-geobiology
4. structural geology-geophysics
5. economic geology (mineral deposits)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency with modern quantitative tools that are used in the Earth sciences.
- When confronted with real-world Earth science problems, develop and test hypotheses in a systematic way while stating caveats and assumptions.
- Show familiarity with scientific understanding of topics that tie directly to their thesis research, as reflected by the current refereed literature.
- Organize and present their scientific results both in concise, well-reasoned technical writing and in front of scientific audiences at major conferences.
- Demonstrate understanding of ethical issues and responsibilities associated with working in a diverse, global community of scientists.

Earth Sciences Major

Code	Title	Credits
500 or 600 level ¹		24
600-699 level ²		9
Thesis ³		9

Remaining Credits ⁴	3
Total Credits	45

At least 30 credit hours in residence, in the major

- ¹ A minimum of 15 credits must be taken graded; the remainder may be taken graded or pass/no pass. Up to 15 credits may be taken in courses offered outside the department (with advisor approval)
- ² May be taken graded or pass/no pass, but only graded courses can apply toward the 24 credits above.
- ³ ERTH 503. At least 3 thesis credits must be taken in the final term.
- ⁴ Can include research, readings, and seminars. Students are expected to register for and attend the department seminar and graduate student seminar (607) each term.

Earth Sciences (PhD)

The Department of Earth Sciences offers programs of graduate study leading to master of science (MS), master of arts (MA), and doctor of philosophy (PhD) degrees with opportunity for research in a wide variety of specialty fields. Course work is designed to meet individual needs, and students may pursue independent research in geobiology, geochemistry, geodesy, geomechanics, geomorphology, geophysics, mineralogy, petrology, volcanology, paleontology, stratigraphy, sedimentary petrology, structural geology, and ore deposit geology. The master's degree program requires two years or more for completion.

Graduate study in earth sciences is offered in five broad areas:

1. volcanology-petrology-geochemistry
2. stratigraphy-surface processes
3. paleontology-paleopedology-geobiology
4. structural geology-geophysics
5. economic geology (mineral deposits)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency with modern quantitative tools that are used in the Earth sciences.
- When confronted with real-world Earth science problems, develop and test hypotheses in a systematic way while stating caveats and assumptions.
- Show familiarity with scientific understanding of topics that tie directly to their thesis research, as reflected by the current refereed literature.
- Organize and present scientific results both in concise, well-reasoned technical writing and in front of scientific audiences at major conferences.
- Demonstrate understanding of ethical issues and responsibilities associated with working in a diverse, global community of scientists.
- Identify, define, and clearly argue the significance of a scientific problem, and execute the research necessary to advance scientific understanding of this problem.

Earth Sciences Major

Code	Title	Credits
500 or 600 Level Courses ¹		15
Dissertation ²		18

Additional Credits ³	48
Total Credits	81

¹ Must be taken for grade.

² GEOL 603, with a minimum of 3 credits must be taken in the last term.

³ 3+ years of full-time study (at least 9 credits/term may include research or reading credits). Students are expected to register for and attend the department seminar and graduate student seminar (607) each term.

Ph.D. students are required to take 15 graded classroom credits at the graduate-level (500-600 level). These courses must be approved by the guidance/dissertation committee chair to ensure that they are geared toward achieving balance between the increasing the breadth of their academic experience and maintaining focus on areas of relevance to their research. They must also take 18 hours of dissertation credits (GEOL 603).

The department does not set any further specific coursework requirements for Ph.D. students, within the 81 total minimum credits required by the UO Division of Graduate Studies. However, students are expected to acquire the graduate earth science background necessary to successfully complete the comprehensive examination and effectively carry out proposed dissertation research. If the student does not have a strong background in relevant areas of earth science, substantial coursework may be recommended. Undergraduate courses may, with the guidance committee's recommendation, be used to fill deficiencies in the student's background, but the majority of the work should be in graduate level courses.

Human Physiology

<http://physiology.uoregon.edu>

Andrew Karduna, Department Head

180A Esslinger Hall

541-346-4107

Fax: 541-346-2841

Human physiology is the science of the mechanical, physical, and biochemical function of humans, and serves as the foundation of modern medicine. As a discipline, it connects science, medicine, and health, and creates a framework for understanding how the human body adapts to stresses, physical activity, and disease.

Human physiology and anatomy are closely related—anatomy is the study of form, physiology is the study of function, and form and function are intrinsically linked. The study of human physiology integrates knowledge across many levels, including biochemistry, cell physiology, and organ systems. Contemporary research in human physiology explores new ways to maintain or improve the quality of life, the development of new medical therapies and interventions, and the unanswered questions about how the human body works. The Department of Human Physiology serves its students by providing strong training in human physiology and anatomy to prepare them for careers in medicine, allied health professions, and biomedical research.

Human Physiology (BA/BS)

Human physiology is the science of the mechanical, physical, and biochemical function of humans, and serves as the foundation of modern medicine. As a discipline, it connects science, medicine, and health and creates a framework for understanding how the human body adapts to stresses, physical activity, and disease.

Undergraduate students in human physiology complete preparatory science courses in chemistry, biology, mathematics and physics that prepare them for upper level coursework in human anatomy and physiology as well as courses that explore the functional and structural mechanisms underlying human health and performance across the life span. The majority of our students aspire to be professionals in health-science fields such as medicine, physical therapy, nursing, dentistry, pharmacy, education, and research.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Content Intellectual Breadth:** Demonstrate content knowledge and understanding of terminology, concepts, and relationships in human anatomy and physiology.
- **Inquiry:** Utilize a broad foundation of anatomical relationships and physiological principles in analysis, application, and synthesis related to human physiology and pathophysiology.
- **Critical Thinking:** Critically evaluate scientific information to help make decisions with respect to personal health, clinical applications, and research in human physiology.
- **Life-long Learning:** Demonstrate life-long learning skills, which include deciding what needs to be learned, articulating a learning plan, and implementing this plan.
- **Communication:** Communicate effectively, to a variety of audiences, in various modes.
- **Ethics Professionalism:** Demonstrate knowledge of ethical and professional behavior related to academic integrity, communication with others, and during individual and cooperative work.

Program Learning Outcomes with Sub-Outcomes

1. **Content & Intellectual Breadth:** Demonstrate content knowledge and understanding of terminology, concepts, and relationships in human anatomy and physiology.

1.1. Identify problems, articulate questions or hypotheses, and determine the need for information.

1.2. Access and collect the needed information from appropriate primary and secondary sources.

1.3. Use quantitative and qualitative methods, including the ability to recognize assumptions, draw inferences, make deductions, and interpret information to analyze problems in context and draw conclusions.

2. **Inquiry:** Utilize a broad foundation of anatomical relationships and physiological principles in analysis, application, and synthesis related to human physiology and pathophysiology.

2.1. Recognize the complexity of problems and identify different perspectives from which problems and questions can be viewed.

2.2. Evaluate and report on conclusions, including discussing the basis for and strength of findings, and identify areas where further inquiry is needed.

3. **Critical Thinking:** Critically evaluate scientific information to help make decisions with respect to personal health, clinical applications, and research in human physiology.

3.1. Identify, analyze, and evaluate reasoning and construct and defend reasonable arguments and explanations.

4. **Life-long Learning:** Demonstrate life-long learning skills, which include deciding what needs to be learned, articulating a learning plan, and implementing this plan.

4.1. Demonstrate in-depth knowledge and skills in Human Physiology.

4.2. Identify the fundamental principles of Human Physiology.

4.3. Apply the research methods and theoretical models of Human Physiology to define, solve, and evaluate problems.

4.4. Transfer knowledge and skills gained from general and specialized studies to new settings and complex problems.

4.5. Demonstrate life-long learning skills, including the ability to place problems in personally meaningful contexts, reflect on one's own understanding, demonstrate awareness of what needs to be learned, articulate a learning plan, and act independently on the plan using appropriate resources.

4.6. Achieve success in Human Physiology, including applying persistence, motivation, interpersonal communications, leadership, goal setting, and career skills.

5. **Communication:** Communicate effectively, to a variety of audiences, in various modes.

5.1. Demonstrate general academic literacy, including how to respond to needs of audiences and to different kinds of rhetorical situations, analyze and evaluate reasons and evidence, and construct research-based arguments using Standard Written English.

5.2. Effectively use the common genres and conventions for writing within Human Physiology.

5.3. Prepare and deliver effective oral presentations.

5.4. Collaborate effectively with others to share information, solve problems, or complete tasks.

5.5. Produce effective visuals using different media.

5.6. Apply the up-to-date technologies commonly used to research and communicate within Human Physiology.

6. **Ethics & Professionalism:** Demonstrate knowledge of ethical and professional behavior related to academic integrity, communication with others, and during individual and cooperative work.

6.1. Assembling and analyzing a set of sources that students have determined are relevant to the issue they are investigating.

6.2. Acknowledging clearly when and how they are drawing on the ideas or phrasings of others.

6.3. Learning the conventions for citing documents and acknowledging sources appropriate to the field they are studying.

6.4. Examine various concepts and theories of ethics and how to deliberate and assess claims about ethical issues.

6.5. Apply ethical concepts and theories to specific ethical dilemmas students will experience in their personal and professional lives.

CH 228Z & CH 218	General Chemistry II Laboratory and Chemistry Tools II	
CH 229Z & CH 219	General Chemistry III Laboratory and Chemistry Tools III	
Option B:		
PHYS 204– 206	Introductory Physics Laboratory	12
BI 221Z & BI 222Z & BI 223Z	Principles of Biology I: Cells and Principles of Biology II: Organisms and Principles of Biology III: Ecology and Evolution (may substitute BI 214 for BI 223Z)	
or BI 281H & BI 282H & BI 283H	Accelerated Biology I: Cells, Biochemistry and Physiology and Accelerated Biology II: Genetics and Molecular Biology and Accelerated Biology III: Evolution, Diversity and Ecology	
PHYS 201–203 or PHYS 251– 253	General Physics ³ Foundations of Physics I	12
MATH 246 or MATH 251Z	Calculus for the Biological Sciences I ¹ Differential Calculus	4
HPHY 211	Medical Terminology	3
HPHY 212	Scientific Investigation in Physiology	4
Upper-Division Requirements		
HPHY 321	Human Anatomy I ⁴	5
HPHY 322	Human Physiology I ⁴	5
HPHY 323	Human Anatomy II ⁴	5
HPHY 324	Human Physiology II ⁴	5
HPHY 325	Human Anatomy and Physiology III ⁴	5
HPHY 371	Physiology of Exercise	4
Upper-Division Electives ⁵		16
List A - select at least two of the following:		
HPHY 333	Motor Control	

HPHY 362	Tissue Injury and Repair
HPHY 374	Clinical Electrocardiography and Exercise
HPHY 375	Metabolism and Nutrition
HPHY 381	Biomechanics
HPHY 399	Special Studies: [Topic]
ANTH 362	Human Biological Variation
ANTH 366	Human Osteology Laboratory
ANTH 369	Human Growth and Development
BI 320	Molecular Genetics
BI 322	Cell Biology
BI 358	Investigations in Medical Physiology
BI 360	Neurobiology
CH 360	Physiological Biochemistry
CH 462	Biochemistry

List B - select at least one of the following capstone courses:

HPHY 412	Sleep Physiology
HPHY 413	Muscle Structure, Function, and Plasticity
HPHY 414	Muscle Metabolism
HPHY 422	Physiology of Obesity
HPHY 423	Physiology of Aging
HPHY 432	Neural Development
HPHY 433	Neurophysiology of Concussion
HPHY 434	Movement Disorders
HPHY 436	Clinical Neuroscience
HPHY 462	Therapeutic Techniques
HPHY 470	Environmental Physiology
HPHY 473	High Altitude Physiology and Medicine

List C - select any of the following (optional):

HPHY 401	Research: [Topic]
HPHY 403	Thesis
HPHY 404	Internship: [Topic]
HPHY 405	Special Problems: [Topic]
HPHY 406	Practicum: [Topic]
HPHY 408	Workshop: [Topic]
HPHY 409	Terminal Project
HPHY 411	Scientific Teaching
HPHY 420	Human Anatomy Dissection

Total Credits **101-104**

¹ Should be taken in the first year.

² Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.

³ Students may also take PHYS 251, 202, and 203 or PHYS 251, 252, and 203. Students may not go from the 201-203 series to the 251-253 series without approval from the department.

⁴ Must be taken in residence at the University of Oregon.

⁵ Students must take two courses from List A, one course from List B, and one course from List A, B, or C (total of 16 credits).

Courses required for the major must be taken for letter grades and passed with grades of C- or better.

Honors

To apply to graduate with departmental honors, a student must have a GPA of 3.50 or better in courses applied toward the human physiology degree requirements and complete an honors thesis under the supervision of a human physiology thesis committee. In addition, human physiology majors enrolled in the Robert Donald Clark Honors College at the University of Oregon are eligible to complete an honors thesis through that program.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The bachelor of science is shown below. A bachelor of arts in human physiology may be earned by completing (or demonstrating proficiency in) two years of a foreign language.

Bachelor of Science in Human Physiology

¹ Students not starting in Precalculus II: Trigonometry (MATH 112Z) may require additional terms to graduate.

² To complete core-education requirements within eight courses, students must take arts and letters or social science area-satisfying courses that also satisfy cultural literacy requirements.

³ List A and List B options may be found online. (<https://cas.uoregon.edu/physiology/undergraduates/major-requirements/>)

Human Physiology (PhD)

Our PhD program provides classroom and research experiences, helping students grow into professionals equipped with the experience to be great researchers. Providing students with an in-depth understanding of human physiology and advanced research skills is our hallmark. Our department houses state-of-the-art equipment, furthering our understanding of the physiological process.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Teaching and Mentoring: Demonstrate working knowledge of current teaching and mentoring best-practices.
- Professional Ethics: Demonstrate knowledge of ethical and professional behavior related to academic and research integrity.
- Career Development: Demonstrate proactive career planning and goal setting and participation in professional development activities.
- Core Knowledge: Demonstrate broad working knowledge of content areas and detailed knowledge of a primary content area.
- Scientific Inquiry: Demonstrate fluency in the scientific literature, current questions, and research methods in a primary content area.
- Scientific Communication: Demonstrate effective oral and written scientific communication skills, including data presentation.

Code	Title	Credits
HPHY 611 & HPHY 612 & HPHY 613	Professional Skills I: Effective Teaching and Professional Skills II: Responsible Research and Professional Skills III: Career Development	3
HPHY 621 & HPHY 622 & HPHY 623	Systems Physiology I and Systems Physiology II and Systems Physiology III	12
2 Courses in Statistical Analysis. Examples include: ¹		6
EDUC 614	Introductory Statistics for Practitioners I	
EDUC 640	Introductory Statistics for Practitioners II	
EDUC 641	Applied Statistics in Education and Human Services I	
EDUC 643	Applied Statistics in Education and Human Service II	
Human physiology courses or other courses most appropriate to student's line of study ²		38
At least one upper division 600 level Human Physiology class. Current options include:		4
HPHY 670	Advanced Respiratory Physiology	
HPHY 676	Human Cardiovascular Control	
HPHY 684	Kinematics of Human Movement	
HPHY 685	Kinetics of Human Movement	
HPHY 603	Dissertation ³	18
Total Credits		81

¹ Two courses in statistical analysis approved by the student's committee. Statistical analysis courses covering the following topics: descriptive statistics, logic of hypothesis testing, elementary inferential statistics, confidence intervals, one-way analysis of variance, post hoc

comparisons, a priori contrasts, within-subjects and between-subjects effects, two-way and higher-order designs, and interactions. For recent additions to these course options, check with the director of graduate studies for the department; alternatives available with prior approval.

² Determined in conjunction with dissertation advisory committee.

³ Must register for course every term of enrollment after advancing to candidacy.

The doctoral degree requires completion of a minimum of 81 graduate-level credits beyond the bachelor's degree; at least 60 of these credits must be completed through human physiology courses. Written and oral doctoral candidacy examinations are taken after completing a substantial portion of the program of study. Upon passing these examinations, the student is advanced to candidacy. A final oral defense is held after completion of the dissertation and after all other degree requirements have been met. Required courses must be taken for letter grades and passed with grades of B– or better. Students must maintain at least a 3.00 grade point average for all courses. Additional university doctor of philosophy degree requirements are described under Doctoral Degrees in the **Division of Graduate Studies** section of this catalog

Materials Science and Technology

Jayson Paulose, Program Director

Materials Science and Technology major will focus on the properties of materials needed for modern technology, and how they relate to the underlying physical and chemical structure.

Materials are the functional components of modern technology - electrodes for rechargeable batteries, semiconductors, conductors, and insulators in electronics for classical and quantum computers, polymers/plastics, sensors, and much more. Materials scientists invent new materials and study the connections between underlying atomic/molecular structure of a material, its properties, its processing methods, and its performance in applications.

Admission

Students will be required to apply for admission into the MSTC major after completing the foundational course sequences in physics (PHYS 201/2/3 or 251/2/3 + lab), chemistry (CH 221/2/3 or 224/5/6H + lab), materials science (MSTC 231/232), and the CH329 Research Immersion course. Students will be asked to provide their academic transcript, their choice of physics or chemistry emphasis, and potential research/industry area of interest as part of the application.

The requirement for admission is achieving a GPA of 3.0 or better in the foundational courses. Students not meeting this requirement, but with a strong academic record that demonstrates steady progress towards acquiring the quantitative and critical thinking skills necessary for success in the program, can petition for admission to the program through additional review. In addition to application materials listed above, applicants will be asked to provide a CV; short essay responses to prompts that aim to evaluate their clarity of purpose and dedication with regard to academic/career goals, ability to overcome obstacles, and ability to tackle open-ended research questions; and references from 1-2 instructors in the foundational courses. Applications will be evaluated by a three-member committee with members drawn from chemistry and physics faculty.

See program's website (<https://naturalsciences.uoregon.edu/materials-science-technology/apply/declare-major-minor/>) for more details.

Program Administration

Jayson Paulose, Program Director, Physics

Victoria DeRose, Department Head, Chemistry and Biochemistry

Richard Taylor, Department Head, Physics

Advisory Committee

Matthias Agne, Chemistry

Scott Fisher, Physics

Michael Koscho, Chemistry and Biochemistry

Ben McMorran, Physics

Celeste Melamed, Chemistry

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Materials Science and Technology majors will be able to connect the atomic and molecular structure of materials to their properties, understanding based on the foundations of physics and chemistry, how to design and test materials for advanced applications in energy, computation, transportation, bioengineering, mechanical applications and more. They will learn and apply modern techniques in data, programming, and computation to solve problems and develop technology specializations that launch their career in industry, national laboratories or academia.

Materials Science and Technology Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits
Foundation courses		
CH 224H–226H	Honors General Chemistry ¹	12

Mathematics

<http://math.uoregon.edu>

Nicholas Proudfoot, Department Head

205 Fenton Hall
1222 University of Oregon
Eugene, OR 97403-1222
541-346-4705

Courses offered by the Department of Mathematics are designed to satisfy the needs of majors and nonmajors interested in mathematics primarily as part of a broad liberal education. They provide basic mathematical and statistical training for students in the social, biological, and physical sciences and in the professional schools; prepare teachers of mathematics; and provide advanced and graduate work for students specializing in the field.

Faculty

Nicolas Addington, associate professor (algebraic geometry). BS, 2004, Washington (Seattle); PhD, 2009, Wisconsin, Madison. (2015)

Shabnam Akhtari, associate professor (number theory). BA, 2002, Sharif University of Technology; PhD, 2008, British Columbia. (2012)

Arkadiy D. Berenstein, professor (quantum groups, representation theory). MS, 1988, Moscow Transport Institute; PhD, 1996, Northeastern. (2000)

Tricia H. Bevans, associate teaching professor. BA, 1995, MS, 1998, Oregon. (2013)

Boris Botvinnik, professor (algebraic topology). MS, 1978, Novosibirsk State; PhD, 1984, USSR Academy of Sciences, Novosibirsk. (1993)

Marcin Bownik, professor (harmonic analysis, wavelets). Magister, 1995, Warsaw, Poland; MA, 1997, PhD, 2000, Washington (St. Louis). (2003)

Jonathan Brundan, professor (Lie theory, representation theory). BA, 1992, Queens College, Cambridge; PhD, 1996, University of London. (1997)

Daniel K. Dugger, professor (algebraic topology and geometry, K-theory, commutative algebra). BA, 1994, Michigan, Ann Arbor; PhD, 1999, Massachusetts Institute of Technology. (2004)

Ellen E. Eischen, associate professor (number theory). BA, 2003, Princeton; PhD, 2009, Michigan, Ann Arbor. (2015)

Ben Elias, associate professor (representation theory, categorification). BA, 2005, Princeton; PhD, 2011, Columbia. (2014)

Cassandra Fisher, associate teaching professor. BS, 2010, George Fox; MS, 2012, Texas Tech. (2012)

Laura Fredrickson, assistant professor (geometric analysis and complex geometry). BS, 2010, California, Irvine; PhD, 2016, Texas, Austin. (2019)

Hayden Harker, teaching professor. BA, 1995, Oberlin College; MS, 2000, PhD, 2005, Oregon. (2011)

Weiyong He, professor (differential geometry, geometric analysis and partial differential equations). MS, 2004, Science and Technology of China; PhD, 2007, Wisconsin, Madison. (2009)

Kristen Henderson, associate teaching professor. BA, 2001, California, Berkeley; MS, 2003, Nevada, Reno. (2015)

Patricia Hersh, professor (combinatorics). BA, 1995, Harvard; PhD, 1999, Massachusetts Institute of Technology. (2019)

Alexander S. Kleshchev, professor (algebra, representation theory). BS, MS, 1988, Moscow State; PhD, 1993, Institute of Mathematics, Academy of Sciences of Belarus, Minsk. (1995)

Elina Kleshcheva, instructor, BS, 1987, MS, 1988, Moscow State. (1995)

David A. Levin, associate professor (probability theory and stochastic processes). BS, 1993, Chicago; MA, 1995, PhD, 1999, California, Berkeley. (2006)

Huaxin Lin, professor (functional analysis). BA, 1980, East China Normal, Shanghai; MS, 1984, PhD, 1986, Purdue. (1995)

Robert Lipshitz, professor (differential topology). AB, 2002, Princeton; PhD, 2006, Stanford. (2015)

Peng Lu, professor (differential geometry, geometric analysis). BSc, 1985, Nanjing; MSc, 1988, Nanki Mathematics Institute; PhD, 1996, State University of New York, Stony Brook. (2002)

Luca Mazzucato, assistant professor (computational neuroscience). Laurea, 2001, Padua; PhD, 2005, ISAS, Trieste. (2017)

James Murray, assistant professor (computational neuroscience). BS, Montana State; PhD, Johns Hopkins, 2013. (2020)

Maria Nemirovskaya, instructor. MS, 1996, Brigham Young; PhD, 2002, Massachusetts Institute of Technology. (2017)

Tammy Nezel, associate teaching professor. BA, 2004, BS, 2006, MS, 2008, Oregon. (2008)

Victor V. Ostrik, professor (representation theory). MS, 1995, PhD, 1999, Moscow State. (2003)

Liliana Pazdan-Siudeja, associate teaching professor. MS, 2010, Illinois, Urbana-Champaign. (2013)

N. Christopher Phillips, professor (functional analysis). AB, 1978, MA, 1980, PhD, 1984, California, Berkeley. (1990)

Alexander Polishchuk, professor (algebraic geometry). MS, 1993, Moscow State; PhD, 1996, Harvard. (2003)

Michael R. Price, teaching professor; assistant department head. BS, 2003, MS, 2005, Oregon. (2005)

Nicholas J. Proudfoot, professor (algebraic geometry, combinatorics, topological groups). AB, 2000, Harvard; PhD, 2004, California, Berkeley. (2007)

Peter Ralph, associate professor (populations and evolution with genomic data). AB, 2002, PhD, 2009, California, Berkeley. (2016)

Hal Sadofsky, associate professor (algebraic topology, homotopy theory). BS, 1984, Rochester; PhD, 1990, Massachusetts Institute of Technology. (1995)

Bijan Shahir, instructor. MS, 1979, PhD, 1987, Oregon; MSEE, 1999, Washington (Seattle). (2011)

Yefeng Shen, assistant professor (algebraic geometry). BS, 2006, Zhejiang University; MS, 2009, Peking University; PhD, 2013, University of Michigan. (2017)

Christopher D. Sinclair, associate professor (random matrix theory, number theory). BS, 1997, Arizona; PhD, 2005, Texas, Austin. (2009)

Dev P. Sinha, associate professor (algebraic and differential topology). BS, 1993, Massachusetts Institute of Technology; PhD, 1997, Stanford. (2001)

David C Steinberg, associate teaching professor. BSc, 2004, Alberta; MA, 2006, State University of New York, Binghamton; PhD, 2012, British Columbia. (2013)

Jennifer Thorenson, associate teaching professor. BS, 2003, North Dakota State; MS, 2005, PhD, 2013, Montana State. (2013)

Craig Tingey, associate teaching professor. BA, BS, 1989, MS, 1991, Utah. (2001)

Arkady Vaintrob, associate professor (algebraic geometry, Lie theory and representation theory, mathematical physics). BA, 1976, Moscow Institute of Railway Engineering; MS, 1979, PhD, 1987, Moscow State. (2000)

Kai Shyang Wang, instructor. MA, 1985, California, Berkeley. (2009)

Micah Warren, associate professor (geometric analysis). BS, 2000, Pacific Lutheran; MS, 2006, PhD, 2008, Washington (Seattle). (2012)

Yuan Xu, professor (numerical analysis). BS, 1982, Northwestern (China); MS, 1984, Beijing Institute of Aeronautics and Astronautics; PhD, 1988, Temple. (1992)

Benjamin Young, associate professor (combinatorics). BS, 2001, MS, 2002, Carleton; PhD, 2008, British Columbia. (2012)

Emeriti

Bruce A. Barnes, professor emeritus. BA, 1960, Dartmouth College; PhD, 1964, Cornell. (1966)

Richard B. Barrar, professor emeritus. BS, 1947, MS, 1948, PhD, 1952, Michigan. (1967)

Glenn T. Beelman, senior instructor emeritus. BS, 1938, South Dakota State; AM, 1962, George Washington. (1966)

Charles W. Curtis, professor emeritus. BA, 1947, Bowdoin; MA, 1948, PhD, 1951, Yale. (1963)

Micheal N. Dyer, professor emeritus. BA, 1960, Rice; PhD, 1965, California, Los Angeles. (1967)

Peter B. Gilkey, professor (global analysis, differential geometry). BS, MA, 1967, Yale; PhD, 1972, Harvard. (1981)

James A. Isenberg, professor (mathematical physics, differential geometry, nonlinear partial differential equations). AB, 1973, Princeton; PhD, 1979, Maryland. (1982)

William M. Kantor, professor emeritus. BS, 1964, Brooklyn; MA, 1965, PhD, 1968, Wisconsin, Madison. (1971)

Richard M. Koch, professor emeritus. BA, 1961, Harvard; PhD, 1964, Princeton. (1966)

Shlomo Libeskind, professor emeritus. BS, 1962, MS, 1965, Technion-Israel Institute of Technology; PhD, 1971, Wisconsin, Madison. (1986)

Theodore W. Palmer, professor emeritus. BA, 1958, MA, 1958, Johns Hopkins; AM, 1959, PhD, 1966, Harvard. (1970)

Kenneth A. Ross, professor emeritus. BS, 1956, Utah; MS, 1958, PhD, 1960, Washington (Seattle). (1964)

Gary M. Seitz, professor emeritus. AB, 1964, MA, 1965, California, Berkeley; PhD, 1968, Oregon. (1970)

Brad S. Shelton, professor emeritus. BA, 1976, Arizona; MS, PhD, 1982, Washington (Seattle). (1985)

Allan J. Sieradski, professor emeritus. BS, 1962, Dayton; MS, 1964, PhD, 1967, Michigan. (1967)

Stuart Thomas, senior instructor emeritus. AB, 1965, California State, Long Beach; MA, 1967, California, Berkeley. (1990)

Kathy Trigueiro, senior instructor emerita

Marie A. Vitulli, professor emerita. BA, 1971, Rochester; MA, 1973, PhD, 1976, Pennsylvania. (1976)

Jerry M. Wolfe, associate professor emeritus. BS, 1966, Oregon State; MA, 1969, PhD, 1972, Washington (Seattle). (1970)

Charles R. B. Wright, professor emeritus. BA, 1956, MA, 1957, Nebraska; PhD, 1959, Wisconsin, Madison. (1961)

Sergey Yuzvinsky, professor (representation theory, combinatorics, multiplication of forms). MA, 1963, PhD, 1966, Leningrad. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Majors - Bachelor's Degree

- Mathematics (BA/BS) (p. 264)
- Mathematics and Computer Science (BA/BS) (p. 273)

Minor

- Mathematics (p. 276)
- Mathematical Statistics (p. 277)

Graduate Programs

Major - Master's Degree

- Mathematics (MS) (p. 277)

Major - Doctoral Degree

- Mathematics (PhD) (p. 278)

Mathematics (BA/BS)

The field of mathematics sits midway between the sciences and the humanities. Like the sciences, mathematical thought is very analytical, precise, and rigorous. But like the arts and humanities, mathematics is about exploring places of incredible grace and beauty, some of which can only be accessed through the power of imagination. You can explore geometry in ten-dimensional space, learn about advanced and exotic number systems, and study statistical techniques for finding patterns in data sets, all in a supportive and collaborative environment.

Students majoring in mathematics can choose a track from three areas: applied mathematics, pure mathematics, and secondary teaching. Applied mathematics studies physical, biological, and sociological aspects; pure mathematics focuses on the development of mathematical principles for their own sake; and secondary teaching prepares students to teach math. Regardless of your focus, the mathematics major will teach you the art of disciplined and logical thought, skills that are very valuable to future employers. A mathematics degree prepares you for work in fields like engineering, computer programming, information technology, financial planning, data management, business, and education.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Use the language of mathematics correctly in the context of linear algebra and multi-variable calculus.
- Read and interpret written mathematics expressed using definitions, axioms, theorems, proofs and conjectures.
- Write clear and logical explanations of mathematical ideas.
- Apply computational and problem solving skills to investigate new mathematical questions.
- Demonstrate familiarity with the remarkable breadth of classical mathematics, including at least one area from algebra (groups of symmetries, factorization in commutative rings), analysis (limits, derivatives, integrals, and series), and number theory (prime numbers, Diophantine equations, and quadratic reciprocity).

- (Pure track) Demonstrate an in-depth understanding of a more advanced topic in algebra, analysis or topology. Use appropriate software (such as LaTeX) for mathematical writing in the context of proofs in this area.
- (Secondary teaching track) Understand some of the foundations of geometry, and the history and applications of calculus, as appropriate for secondary teaching. Use software (such as Desmos, Mathematica) in this context.

The department offers undergraduate preparation for positions in government, business, and industry and for graduate work in mathematics and statistics. Each student's major program is individually constructed in consultation with an advisor.

Upper-division courses used to satisfy major requirements must be taken for letter grades, and only one D grade (D+ or D or D–) may be counted toward the upper-division requirement. At least 12 credits in upper-division mathematics courses must be taken in residence at the university.

Statistical Methods I (MATH 425) cannot be used to satisfy requirements for a mathematics major or minor.

To qualify for a bachelor's degree with a major in mathematics, a student must satisfy the requirements for one of three options: the standard track, pure mathematics, or secondary teaching. In each option, most courses require calculus as a prerequisite, and in each option some of the courses require satisfying the bridge requirement.

- Standard Track (p. 265)
- Pure Mathematics (p. 266)
- Secondary Teaching (p. 266)

Mathematics Major - Standard Track

Code	Title	Credits
MATH 253Z	Calculus: Sequences and Series	4
MATH 281–282	Several-Variable Calculus I-II	8
MATH 341–342	Elementary Linear Algebra	8
CS 122 or CS 210	Introduction to Programming and Problem Solving Computer Science I	4
Select one of the following sets of Bridge courses:		12
MATH 231–232 and two of MATH 201–206		
MATH 307 and four of MATH 201–206		
Select one of the following Fundamentals sequences:		8
MATH 316–317	Fundamentals of Analysis I-II	
MATH 347–348	Fundamentals of Number Theory I-II	
MATH 391–392	Fundamentals of Abstract Algebra I-II	
Select four of the following, including at least one two-term sequence: ¹		16
MATH 316	Fundamentals of Analysis I	
MATH 317	Fundamentals of Analysis II	
MATH 343	Statistical Models and Methods ^{2, 3}	
MATH 345M	Probability and Statistics for Data Science ^{2, 3}	

DSCI 345M	Probability and Statistics for Data Science ^{2, 3}
MATH 347	Fundamentals of Number Theory I
MATH 348	Fundamentals of Number Theory II
MATH 351	Elementary Numerical Analysis I
MATH 352	Elementary Numerical Analysis II
MATH 391	Fundamentals of Abstract Algebra I
MATH 392	Fundamentals of Abstract Algebra II
MATH 394	Geometries from an Advanced Viewpoint I
MATH 395	Geometries from an Advanced Viewpoint II
MATH 397	History and Applications of Calculus
MATH 411	Functions of a Complex Variable I
MATH 413	Introduction to Analysis I
MATH 414	Introduction to Analysis II
MATH 415	Introduction to Analysis III
MATH 421M	Partial Differential Equations: Fourier Analysis I
MATH 422	Partial Differential Equations: Fourier Analysis II
MATH 431	Introduction to Topology I
MATH 432	Introduction to Topology II
MATH 433	Introduction to Differential Geometry
MATH 441	Linear Algebra
MATH 444	Introduction to Abstract Algebra I
MATH 445	Introduction to Abstract Algebra II
MATH 446	Introduction to Abstract Algebra III
MATH 458	Introduction to Mathematical Cryptography
MATH 461	Introduction to Mathematical Methods of Statistics I
MATH 462	Introduction to Mathematical Methods of Statistics II ^{2, 3}
MATH 463	Mathematical Methods of Regression Analysis and Analysis of Variance
MATH 467	Stochastic Processes
Total Credits	60

¹ Sequences include Fundamentals of Analysis I-II (MATH 316–317), Fundamentals of Number Theory I-II (MATH 347–348), Elementary Numerical Analysis I-II (MATH 351–352), Fundamentals of Abstract Algebra I-II (MATH 391–392), Geometries from an Advanced Viewpoint I-II (MATH 394–395), Partial Differential Equations: Fourier Analysis I (MATH 421M) - Partial Differential Equations: Fourier Analysis II (MATH 422), Introduction to Analysis I-III (MATH 413–415), Introduction to Topology (MATH 431–432), Introduction to Abstract Algebra I-III (MATH 444–446), Introduction to Mathematical Methods of Statistics I-II (MATH 461–462), Introduction to Mathematical Methods of Statistics I (MATH 461) - Stochastic Processes (MATH 467); credit for these courses cannot count for both the two-term Fundamentals sequence and the four upper-division electives.

² After completing Introduction to Mathematical Methods of Statistics II (MATH 462), students cannot receive credit for: Statistical Models and Methods (MATH 343), Probability and Statistics for Data Science (MATH 345M), nor Probability and Statistics for Data Science (DSCI 345M).

³ Students can only use one of the following toward the two-course upper-division requirement: Statistical Models and

Methods (MATH 343), Probability and Statistics for Data Science (MATH 345M), Probability and Statistics for Data Science (DSCI 345M), and Introduction to Mathematical Methods of Statistics II (MATH 462).

Mathematics Major - Pure Mathematics

Code	Title	Credits

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

To enroll with courses that have prerequisites, students must complete the prerequisite course with grades of C– or better or P. All upper-division mathematics courses must be taken for letter grades to count toward a mathematics major or minor, and only one D grade (D+ or D or D–) may be counted toward the upper-division requirements for the major or minor.

Mathematics and Computer Science (BA/BS)

Arkady Vaintrob and Christopher B. Wilson, Advisors

Students who want training in both mathematics and computer science can declare a joint mathematics and computer science major. This allows them to develop skills and knowledge in both fields. The program develops team players prepared for information-based jobs. MACS students graduate with the tools to analyze complex problems and to compute the answers to them.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency in the main areas of computer science, including data structures and algorithms, computer systems, programming languages, and software development.
- Draw on broad knowledge of computer science to design, implement, and test software solutions to problems in a variety of areas.
- Demonstrate in-depth understanding of some area of computer science (theoretical foundations, computer systems, software development).
- Demonstrate proficiency with the calculational techniques and applications of calculus and linear algebra.
- Read and write mathematical proofs, producing arguments that are logically and syntactically correct.
- Demonstrate an in-depth understanding of some area of mathematics.
- Communicate and collaborate with others and express ideas orally and in writing.

Mathematics and Computer Science Major Requirements

The requirements for the mathematics and computer science (MACS) major fall into four categories: mathematics, computer science, writing, and science, with 44 credits taken in mathematics, 40 credits in computer science, and 16 credits (science and writing) in other departments.

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B– or better before students can take the upper-division core courses. Courses required for the major must be taken for a letter grade. Upper-division courses must be passed with a grade of C– or better. The science courses may be taken pass/no pass (P/N) or letter grades.

Code	Title	Credits
Core Courses		
CS 210–212	Computer Science I-III	12

MATH 231–232	Elements of Discrete Mathematics I-II	8
MATH 251Z– 253Z	Calculus: Differential, Integral, and Sequences & Series	12

Mathematics Requirements

Select one of the following:

MATH 316	Fundamentals of Analysis I	
MATH 347	Fundamentals of Number Theory I	
MATH 391	Fundamentals of Abstract Algebra I	
MATH 341–342	Elementary Linear Algebra	8
MATH 351–352	Elementary Numerical Analysis I-II	8
or MATH 461– 462	Introduction to Mathematical Methods of Statistics I-II	
Upper-level mathematics course ¹		4

Computer Science

CS 313	Intermediate Data Structures	4
CS 314	Computer Organization	4
CS 315	Intermediate Algorithms	4
CS 425	Principles of Programming Languages	4
Select one of the following:		4

CS 322	Introduction to Software Engineering	
CS 330	C/C++ and Unix	
CS 420	Automata Theory	
CS 422	Software Methodology I	
Two other upper-division CS courses ²		8

Writing Requirements

WR 320	Scientific and Technical Writing	4
or WR 321	Business Communications	

Science Requirements

Select 12 credits from one of the following science areas: 12

Biology ³		
BI 221Z & BI 223Z	Principles of Biology I: Cells and Principles of Biology III: Ecology and Evolution	
or BI 221Z & BI 222Z	Principles of Biology I: Cells and Principles of Biology II: Organisms	

Chemistry ³		
CH 111	Introduction to Chemical Principles	
or CH 113	The Chemistry of Sustainability	
or CH 221Z	General Chemistry I	
or CH 224H	Advanced General Chemistry I	
CH 221Z– 223Z	General Chemistry I-III	
or CH 224H-Honors General Chemistry 226H		

Geography

GEOG 141	The Natural Environment	
Select two of the following:		
GEOG 321	Climatology	
GEOG 322	Geomorphology	
GEOG 323	Biogeography	

Earth Sciences

ERTH 201	Dynamic Planet Earth	
ERTH 202	Earth's Surface and Environment	

ERTH 203	History of Life	
Physics ³		
PHYS 201– 203	General Physics	
or PHYS 251	Foundations of Physics I	
253		

Psychology

PSY 201Z	Introduction to Psychology I	
Select two of the following:		
PSY 301	Scientific Thinking in Psychology	
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 348	Music and the Brain	

Total Credits 96¹ Excludes Statistical Methods I (MATH 425)² At least one course must be numbered 410 or above and taken for a grade.³ Students are encouraged to complete the accompanying lab courses.**Additional Requirements**

Students must earn no grade below a B– in required lower-division mathematics and computer science courses—Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), Elements of Discrete Mathematics II (MATH 232)—for automatic advancement to upper-division computer science courses. At least 12 of the mathematics upper-division credits applied to the degree must be taken in residence at the university.

Major Progress Review and Major in Good Standing

Each major must meet with a CS advisor to file a Major Progress Review form after completing 12 credits of the upper-division core, including at least one course from each department. Mathematics and computer science courses and at least 8 credits of upper-division CS courses used to satisfy upper-division major requirements must be taken for letter grades and passed with grades of C– or better. At least 12 of the upper-division mathematics credits and 12 of the upper-division computer science credits applied to the degree must be taken in residence at the university. A student who receives two grades below C– in the upper-division core or three grades below C– in any upper-division courses may be removed from the major.

Code	Title	Credits
MATH 316	Fundamentals of Analysis I	4
MATH 341	Elementary Linear Algebra	4
MATH 342	Elementary Linear Algebra	4
CS 313	Intermediate Data Structures	4
CS 314	Computer Organization	4
CS 315	Intermediate Algorithms	4
CS 425	Principles of Programming Languages	4
One of the following:		
CS 330	C/C++ and Unix	4
CS 420	Automata Theory	4
CS 422	Software Methodology I	4

Honors Program

Both of the cooperating departments offer departmental honors programs to their undergraduate majors. After obtaining advance approval from both of their advisors, students in the joint degree program are eligible to attain honors in mathematics and computer science by meeting the honors requirements of either department, including writing a thesis.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Mathematics Minor

The minor is intended for any student, regardless of major, with a strong interest in mathematics. While students in such closely allied fields as computer science or physics often complete double majors, students with more distantly related majors such as psychology or history may find the minor useful.

The flexibility of the mathematics minor program allows each student, in consultation with a mathematics advisor, to tailor the program to his or her needs.

Mathematics and Computer Science majors cannot minor in Mathematics.

Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

One upper-division course used to fulfill the minor requirements may receive a grade of D (D+ or D or D-).

To earn a minor in mathematics, a student must complete at least 30 credits in mathematics at the 200 level or higher, with at least 15 upper-division mathematics credits; Statistical Methods I (MATH 425) cannot be used toward the upper-division requirement. A minimum of 15 credits must be taken at the University of Oregon.

Code	Title	Credits
MATH courses at or above the 200-level ^{1,2}		30
15 upper-division MATH credits		

¹ Students cannot receive credit for MATH 343, MATH 345M, or DSCI 345M after completing MATH 462.

² Students may only count one course in MATH 343, MATH 345M, MATH 462, or DSCI 345M toward the minor.

Mathematical Statistics Minor

Statistics is a fundamental discipline which is highly desired by employers in many areas of science and social science, business, finance, and medical research. Students will have a significant background and training in mathematics or data science.

Statistics Minor Requirements

Code	Title	Credits
MATH 253Z	Calculus: Sequences and Series	4
MATH 341–342	Elementary Linear Algebra ¹	8
MATH 461–462	Introduction to Mathematical Methods of Statistics I-II ²	8
MATH 463	Mathematical Methods of Regression Analysis and Analysis of Variance ²	4
Upper-Division Course in Statistics ²		4
MATH 467	Stochastic Processes	
MATH/DSCI 345M	Probability and Statistics for Data Science ³	
MATH/BI 499M	Stochastic Dynamical Modeling in Biology	
Total Credits		28

¹ Courses must be taken for a letter grade of C- or better or a mark of Pass (P or P*).

² Courses must be taken for a letter grade and passed with a grade of C- or better.

³ After completing MATH 462, students cannot receive credit for MATH 345M/DSCI 345M.

Residency Requirements

We expect students to be in residency for the core Math 461/462/463 sequence and for the remaining 4 credits of applied statistics taught in the Mathematics Department or another science/social science department on campus.

Overlap Policy

The core 461/462/463 sequence will not be allowed to count towards other majors or minors, including Mathematics, Data Sciences, or Computer Science. The additional upper-division 4 credit course in applied statistics will not be allowed to count towards the Mathematics major, Mathematics minor, or Mathematics and Computer Science major.

Mathematics (MS)

Master's degree programs are available to suit the needs of students with various objectives. There are programs for students who intend to enter a doctoral program and for those who plan to conclude their formal study of pure or applied mathematics at the master's level.

In addition to general Division of Graduate Studies requirements, the specific graduate program courses and conditions listed below must be fulfilled. More details can be found in the Department of Mathematics *Graduate Student Handbook*, available in the department office and online (<https://math.uoregon.edu/wp-content/uploads/2022/11/Handbook-22-23.pdf>). All mathematics courses applied to degree requirements, including associated reading courses, must be taken for letter grades. A final written or oral examination or both is required for master's degrees except under the pre-PhD option. This examination is waived under circumstances outlined in the departmental *Graduate Student Handbook*.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Upon successful completion of this program, students will be able to demonstrate mastery of subject knowledge in three core areas. The core subject areas taught in our graduate program are algebra, topology/geometry, analysis/probability, and applied mathematics. Students are expected to attain a mastery of this material at an intermediate level for two of these core areas, and at an advanced level for a third area. Mastery is demonstrated by completion of a full-year course sequence in each area, 500-level for intermediate and 600-level for advanced.

Explanation:

Demonstrate mastery of subject knowledge in three core areas.

Explanation: The three core subject areas taught in our department are algebra, topology/geometry, and analysis/probability. Graduate students are expected to attain a mastery of this material at an advanced level for two of the three core areas, and at an intermediate level for the third area.

Demonstrate ability to learn from non-expository sources.

Explanation: Learning material from research papers is different from learning from courses and textbooks. Graduate students are expected to demonstrate the ability to learn material from non-expository sources, including at least one source that is written in French, German, or Russian.

Conduct original and substantive research.

Explanation: The most important requirement completing a Ph.D. in mathematics is producing a dissertation containing original and substantive mathematical work.

The learning outcomes and assessments for students who earn a master's degree consist of a modified version of Learning Outcome #1 for Ph.D. students. To earn a master's degree, a student must complete full-year course sequences in each of the three core areas, one at the 600-level and two at the 500-level, with an average grade of B+ or better and a minimum grade of B or better in each sequence. In addition, the student is required to complete at least 45 graduate credit hours, at least 30 of which are completed in the Department of Mathematics.

Mathematics Major Requirements

Code	Title	Credits
Three of the following sequences below with at least one at 600-level¹		30
500-Level Sequences		
MATH 513 & MATH 514 & MATH 515	Introduction to Analysis I and Introduction to Analysis II and Introduction to Analysis III	
MATH 531 & MATH 532 & MATH 533	Introduction to Topology I and Introduction to Topology II and Introduction to Differential Geometry	
or MATH 531 and Introduction to Topology I and Introduction to Topology II & MATH 532 and Introduction to Topology III & MATH 534		
MATH 544 & MATH 545 & MATH 546	Introduction to Abstract Algebra I and Introduction to Abstract Algebra II and Introduction to Abstract Algebra III	
600-Level Sequences		
MATH 647 & MATH 648 & MATH 649	Abstract Algebra and Abstract Algebra and Abstract Algebra	
MATH 634 & MATH 635 & MATH 636	Algebraic Topology and Algebraic Topology and Algebraic Topology	
MATH 637 & MATH 638 & MATH 639	Differential Geometry and Differential Geometry and Differential Geometry	
MATH 616 & MATH 617 & MATH 618	Real Analysis and Real Analysis and Real Analysis	
MATH 616 & MATH 672 & MATH 673	Real Analysis and Theory of Probability and Theory of Probability	
MATH 607 & 607 & 607	Seminar: [Topic] and Seminar: [Topic] and Seminar: [Topic] ²	
Electives³		9-15
Total Credit Requirement:		45

¹ At least 9 credits of 600-level mathematics courses. Excluding Reading and Conference: [Topic] (MATH 605).

² Only MATH 607 courses in the "applied math" sequence count toward this requirement.

³ Up to 15 credits can be taken outside of mathematics.

Mathematics (PhD)

The Mathematics Department at the University of Oregon offers a PhD in a variety of areas of mathematics. The American Mathematical Society has ranked us in the top group of U.S. research departments. The department has distinguished research groups in algebra, analysis, topology, geometry, probability, number theory, and mathematical biology. We are large enough to provide the quality and breadth required for a major research department, yet small enough so that graduate students have close interactions with the faculty. There are about 30 faculty members and 65 graduate students.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject knowledge in three core areas. The core subject areas taught in our graduate program are algebra, topology/geometry, analysis/probability, and applied mathematics. Graduate students are expected to attain a mastery of this material at an advanced level for two of these core areas, and at least at an intermediate level for a third area.
- Demonstrate ability to learn from non-expository sources. Learning material from research papers is different from learning from courses and textbooks. Graduate students are expected to demonstrate the ability to learn material from non-expository sources, including at least one source that is written in French, German, or Russian.
- Conduct original and substantive research. The most important requirement for completing a Ph.D. in mathematics is producing a dissertation containing original and substantive mathematical work.
- The learning outcomes for students who earn a Master's degree consist of a modified version of LO1 for Ph.D. students. To earn a Master's degree, a student must complete full year course sequences in each of the three core areas, one at the advanced level and two at the intermediate level

Explanation:

Demonstrate mastery of subject knowledge in three core areas.

Explanation: The three core subject areas taught in our department are algebra, topology/geometry, and analysis/probability. Graduate students are expected to attain a mastery of this material at an advanced level for two of the three core areas, and at an intermediate level for the third area.

Demonstrate ability to learn from non-expository sources.

Explanation: Learning material from research papers is different from learning from courses and text books. Graduate students are expected to demonstrate the ability to learn material from non-expository sources, including at least one source that is written in French, German, or Russian.

Conduct original and substantive research

Explanation: The most important requirement completing a Ph.D. in mathematics is producing a dissertation containing original and substantive mathematical work.

Mathematics Major Requirements

The PhD is a degree of distinction not to be conferred in routine fashion after completion of a specific number of courses or after attendance in Graduate School for a given number of years.

The department offers a PhD degree in mathematics. Advanced graduate courses in each area of mathematics are typically offered in topics courses (numbered MATH 607). A student in the pre-PhD program may also be a candidate for the master's degree.

Pre-PhD Program

Students entering the pre-PhD program will have completed a course of study equivalent to the graduate preparatory bachelor's degree program described in the department's Undergraduate program. Students in the pre-PhD program must take the qualifying examination by the beginning of their third year, during the week before classes begin fall term. It consists of examinations on two basic 600-level graduate course sequences, one each from two of the following four categories:

1. algebra
2. analysis and probability
3. topology and geometry
4. applied math

The Sequence Requirement

Each student is required to complete at least one sequence from three of the following four areas: analysis/probability, topology/geometry, algebra, and applied mathematics, subject to the following requirements:

- The sequences in at least two areas must be at the 600-level.
- All courses applied to this requirement must be completed with a grade of B or above.
- The average grade in each sequence applied to this requirement must be at least B+.

Code	Title	Credits
Area 1: Analysis/Probability

Total Sequence Requirement Credits		36
Electives		27
Dissertation		18
MATH 603	Dissertation	
Total Credits		81

PhD Program

Admission to the PhD program is based on the following criteria:

- satisfactory performance on the qualifying examination
- completion of three courses at a level commensurate with study toward a PhD
- satisfactory performance in seminars or other courses taken as a part of the pre-PhD or PhD program.

Students who are not admitted to the PhD program because of unsatisfactory performance on the fall-term qualifying examination may retake the examination at the beginning of winter term.

A student in the PhD program is advanced to candidacy after passing a language examination and the comprehensive examination. To complete the requirements for the PhD, candidates must submit a dissertation, have it read and approved by a dissertation committee, and defend it orally in a formal public meeting.

Language Requirement

The department expects PhD candidates to be able to read mathematical material in a second language selected from French, German, and Russian. Other languages are acceptable in certain fields. To fulfill the language requirement, the student must meet with a faculty member—a doctoral advisor or a member of the PhD committee—to obtain advice for a suitable paper or book. The paper or book should be written in French, German, or Russian and have mathematical material beneficial to the student's area of study. After reading, translating, and understanding the material, the student meets with the faculty member again. The faculty member determines whether the student understands the material. If satisfied, the faculty member deems the requirement met and the decision is added in writing to the student's record.

Comprehensive Examination

This oral examination emphasizes the basic material in the student's general area of interest. A student is expected to take this examination by the end of the second academic year in the PhD program. To be eligible to take this examination, a student must have completed the language examination and nearly all the course work needed for the PhD.

Dissertation

PhD candidates in mathematics must submit a dissertation containing substantial original work in mathematics. Requirements for final defense of the dissertation are those of the Graduate School.

Multidisciplinary Science

<http://gensci.uoregon.edu>

Jana Prikryl, Program Director

65C Klamath Hall

jprikryl@uoregon.edu

A multidisciplinary science major allows students to design their own program of study in the natural sciences. Students choose their areas of specialization from a broad range of sciences, tailoring their studies to their specific interests and career goals.

The multidisciplinary science major is useful to students whose interests do not fit well within a single scientific field, as well as students who wish to pursue advanced degrees in health-related fields.

Multidisciplinary Science is different from traditional majors in that it pulls coursework from multiple STEM departments to provide students with a self-guided interdisciplinary education. Unlike many STEM majors, most MSCI students add the major during their junior or senior year. Assessment models that rely on learning outcomes based on the content of specific coursework and subdivided into yearly educational benchmarks are therefore not appropriate for the Multidisciplinary Science Program. Instead, the MSCI program outcomes are tied to its structure, which is designed to:

- Provide students with interdisciplinary curricular choices that develop competencies important for all STEM fields.
- Emphasize and develop skillsets commonly sought by employers.
- Address expectations of students entering the Multidisciplinary Science Program, for example timely degree completion.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop a personalized plan for timely degree completion in the MSCI program by thoughtfully selecting coursework from multiple STEM departments, taking into account the unique structure of the program and individual academic goals.
- Analyze and articulate connections between chosen STEM disciplines and their applications to career objectives.
- Explain the steps and limitations of the scientific methodology and apply this knowledge to critically evaluate scientific information as presented by popular and professional sources.
- Articulate how the MSCI coursework develops skills that are highly valued by employers, such as critical thinking, problem solving, work ethic, collaboration, effective communication, and analysis and interpretation of quantitative information.

Multidisciplinary Science Major Requirements

Code	Title	Credits
Lower Division MATH/CS Requirement ¹		8
MATH 251Z	Differential Calculus	
or MATH 24I Calculus for the Biological Sciences I		
Select one of the following		
CS 122	Introduction to Programming and Problem Solving	
MATH 231	Elements of Discrete Mathematics I	
STAT 243Z	Elementary Statistics I	
MATH 247	Calculus for the Biological Sciences II	
MATH 252Z	Integral Calculus	

MATH 425 Statistical Methods I (Students who complete MATH 425 as part of the math requirement, cannot also use this same class towards the 32 credits of upper-division Multidisciplinary Science major requirements.)

Foundations Courses 36-48

Select 3 sequences or 3-course combinations from the following; 2 sequences must include labs. ^{2, 3}

Anthropology: Applies as a non-lab course combination	
ANTH 270	Introduction to Biological Anthropology (Required for ANTH course combination)
Select two of the following:	
ANTH 145	Principles of Archaeology
ANTH 170	Introduction to Human Origins
ANTH 171	Introduction to Monkeys and Apes
ANTH 173	Evolution of Human Sexuality
ANTH 175	Evolutionary Medicine
ANTH 176	Introduction to Forensic Anthropology
ANTH 361	Human Evolution
ANTH 362	Human Biological Variation

Biology: Applies as a lab sequence

Select one of the options:	
Option A:	
BI 221Z	Principles of Biology I: Cells
BI 222Z	Principles of Biology II: Organisms
BI 223Z	Principles of Biology III: Ecology and Evolution
or BI 214	General Biology IV: Biochemistry and Genetics
Option B:	
BI 281H–283H Honors Biology I-III	

Chemistry: Can apply as either a lab sequence or a non-lab sequence

Select one of the options:	
Option A:	
CH 221Z–223Z	General Chemistry I-III
CH 227Z & CH 217	General Chemistry I Laboratory and Chemistry Tools I ⁴
CH 228Z & CH 218	General Chemistry II Laboratory and Chemistry Tools II ⁴
CH 229Z & CH 219	General Chemistry III Laboratory and Chemistry Tools III ⁴
Option B:	
CH 224H–226H	Honors General Chemistry
CH 227Z & CH 217	General Chemistry I Laboratory and Chemistry Tools I ⁴
CH 228Z & CH 218	General Chemistry II Laboratory and Chemistry Tools II ⁴
CH 229Z & CH 219	General Chemistry III Laboratory and Chemistry Tools III ⁴

Computer Science: Applies as a lab sequence

CS 210–212	Computer Science I-III

Earth Sciences: Applies as a lab sequence

ERTH 201	Dynamic Planet Earth (OR ERTH 101 with a mid-B or better grade)
ERTH 202	Earth's Surface and Environment (OR ERTH 102 with a mid-B or better grade)
ERTH 203	History of Life (OR ERTH 103 with a mid-B or better grade)
Geography: Applies as a non-lab course combination	
GEOG 141	The Natural Environment (Required for GEOG course combination)
Select two of the following:	
GEOG 181	Our Digital Earth
GEOG 321	Climatology
GEOG 322	Geomorphology
GEOG 323	Biogeography
GEOG 360	Watershed Science and Policy
GEOG 361	Global Environmental Change
Physics: Can apply as a lab sequence or a non-lab sequence	
Select one of the following:	
PHYS 201–203 & PHYS 204–206	General Physics and Introductory Physics Laboratory
PHYS 251–253 & PHYS 290	Foundations of Physics I and Foundations of Physics Laboratory (must take all 3 terms of PHYS 290 for this to count as a lab sequence)
Upper Division	32 credits of approved upper-division courses from the below departments⁵ 32
BI, CH, CS, ERTH, HPHY, MATH, PHYS, and PSY	Upper-division courses from these departments are approved for the major.
ANTH	Upper-division ANTH courses from the list below. Experimental courses (410) require program approval.
GEOG	Upper-division GEOG courses from the list below. Experimental courses (410) require program approval.
Emphasis areas	At least twelve graded credits (not P/NP) must be in one department and at least twelve graded credits must be in a second department. We strongly encourage students to take all majors classes for a grade.
401-409	4 of the 32 credits may be research (401), thesis (403), or supervised college teaching (402) credits. Seminar, Readings & Conference, Practicum, Internship, and Tutorial credits (404-409) may not be used for the Multidisciplinary Science major.
Double Majors	upper division credits used for another major may not be used to satisfy MSCI requirements.

Minors in related fields

There is no MSCI imposed restriction on course overlap between the MSCI major and any minor (though the department offering the minor might have restrictions). We encourage you to look into minors in your emphasis areas.

Prerequisites

All students are subject to all prerequisites, minimum grade requirements, and registration restrictions set by each department for its own courses. These things cannot be circumvented because one is a MSCI major. Please investigate the prerequisites and restrictions for the courses you are interested in taking early on.

Total Credits **76-88**

- ¹ All students must demonstrate a proficiency in mathematics by passing calculus I and one additional math or computer science class from the provided list. All courses must be completed with grades of C– or P (pass) or better
- ² All students must take three course sequences (or three course combinations in the case of ANTH and GEOG) from the provided list, two of which must include laboratories. The labs might be embedded in the class (as with BI, CS, and GEOL), or taken as separate courses (as with CH and PHYS). All courses must be completed with grades of C– or P (pass) or better, except ERTH 101-103 which must be completed with grades of mid-B or better.
- ³ If an upper-division course is used towards the Foundations requirements, the same course cannot also be used to satisfy the other upper-division MSCI requirements.
- ⁴ Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.
- ⁵ All courses must be completed with grades of C– or P or better. All upper division emphasis area courses must be taken for a letter grade.

Additional Requirements

At least 24 upper-division credits must be taken at the University of Oregon.

Approved Courses

Code	Title	Credits
Anthropology		
ANTH 332	Human Attraction and Mating Strategies	4
ANTH 341	Food Origins	4
ANTH 349	Origins of Art	4

GEOG 361	Global Environmental Change	4
GEOG 425	Hydrology and Water Resources	4
GEOG 427	Fluvial Geomorphology	4
GEOG 430	Long-Term Environmental Change	4
GEOG 433	Fire and Natural Disturbances	4
GEOG 481	GIScience I	4
GEOG 482	GIScience II	4
GEOG 485	Remote Sensing I	4
GEOG 486	Remote Sensing II	4
GEOG 491	Advanced Geographic Information Systems	4
GEOG 493	Advanced Cartography and Geo-Visualization	4
GEOG 494	Spatial Analysis	4
GEOG 495	Geographic Data Analysis	4
GEOG 497	Qualitative Methods in Geography	4

Multidisciplinary science courses must be completed with grades of C– or P (pass) or better. Courses graded N (no pass) or F may be repeated for credit, in accordance with university policy.

The upper-division requirements are for students who declared the multidisciplinary science major fall 2000 or later. Students who declared the major before fall 2000 follow the requirements that were in effect when they declared the major. Upper-division credits used to satisfy minimum requirements of another major may not be used to satisfy upper-division requirements in multidisciplinary science. At least 24 upper-division science credits must be completed at the University of Oregon to meet the multidisciplinary science residency requirement.

Upper-division courses may be selected from the multidisciplinary science website (<http://gensci.uoregon.edu/>).

Honors Program

Students preparing to graduate with honors in multidisciplinary science should notify the program director no later than the first term of the senior year.

Honors in multidisciplinary science centers on a thesis, which is the culmination of research conducted under the direction of a faculty advisor. The advisor does not need to be a member of the Multidisciplinary Science Committee.

To graduate with honors, students must have at least a 3.50 overall grade point average and an average GPA of 3.50 or better in all classes counting towards the multidisciplinary science major. In addition, they must complete 6 credits (or equivalent experience pre-approved by MSCI Director) of Research (401) or Thesis (403) or both in an appropriate department. These credits must be distributed over at least two terms and cannot be used to fulfill emphasis-area requirements.

Upon approval of the thesis by the advisor and the program director, honors in multidisciplinary science are awarded.

For guidelines and calendar, contact the Multidisciplinary Science Program Director.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Neuroscience

<http://neuroscience.uoregon.edu>
Nicole Dudukovic, Undergraduate Program Director

541-346-7225

neuro@uoregon.edu

Neuroscience is the interdisciplinary study of neural function, development, and behavior. The University of Oregon offers an undergraduate major in Neuroscience. The graduate training program in neuroscience is centered in the Institute of Neuroscience (<https://ion.uoregon.edu>). Affiliated faculty members in the undergraduate major as well as participating faculty members in the graduate training program are drawn from the Departments of Biology, Human Physiology, and Psychology, along with the Phil and Penny Knight Campus for Accelerating Scientific Impact.

Affiliated Faculty

Elliot Berkman, psychology

Melynda Casement, psychology

Robert Chavez, psychology

Paul Dassonville, psychology

Chris Doe, biology

Judith Eisen, biology

Tim Gardner, Knight Campus

Ian Greenhouse, human physiology

Tory Herman, biology

Benjamin Hutchinson, psychology

Adrianne Huxtable, human physiology

Santiago Jaramillo, biology

Brice Kuhl, psychology

Shawn Lockery, biology

Michelle Marneweck, human physiology

Ulrich Mayr, psychology

Luca Mazzucato, biology

David McCormick, biology

Adam Miller, biology

Kate Mills, psychology

James Murray, biology

Deepu Murty, psychology

Cris Niell, biology

Jennifer Pfeifer, psychology

Dasa Zeithamova, psychology

Undergraduate Program

Major - Bachelor's Degree

- Neuroscience (BA/BS) (p. 285)

Graduate Program

Specialization

- Neuroscience (p. 288)

Neuroscience (BA/BS)

Neuroscience is for undergraduate students interested in studying the relationship between the brain and behavior. Coursework is jointly taught by biology, human physiology and psychology faculty to provide well-rounded training. Foundational courses are in biology, chemistry, human physiology, math, physics, and psychology. Upper division coursework focuses on three main areas of neuroscience: molecular/cellular neuroscience, systems neuroscience, and cognitive neuroscience.

Students can also take advanced skills courses in programming or computational techniques. They may also conduct cutting-edge research in a neuroscience lab.

Neuroscience graduates will have a strong understanding of the structure and function of the nervous system, demonstrate critical thinking, quantitative and analytical skills, and communicate effectively about neuroscience research.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate broad-based content knowledge and understanding of terminology and concepts in neuroscience at multiple levels of organization.
- Critically read and evaluate scientific information.
- Apply data analysis skills to understand neuroscience information.
- Communicate clearly and effectively about neuroscience information.

Neuroscience Major

As outlined below, the Neuroscience majors consists of the following components: 1) foundation courses in the natural sciences; 2) math and statistics coursework; 3) life science fundamentals; 4) a core neuroscience sequence; 5) upper-division elective courses; and 6) advanced skills courses and/or research experience. The total number of credits is 101-104.

Code	Title	Credits
Foundation Courses in Natural Sciences:		49-52

PSY 403	Thesis	
PSY 412	Applied Data Analysis	
Total Credits		101-104

- ¹ Students who transfer CH 227Z/228Z/229Z credits from other schools may have the corresponding CH 217/218/219 course and credit requirements waived.
- ² Please contact the program's advisor for more information.
- ³ 16 required credits with at least 12 credits from 400-level courses; at least one course from each of the three area

Additional Requirements

- Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.
- At least 34 credits of coursework applied to the major must be taken at the University of Oregon.

Criteria for Honors

To graduate with Honors in Neuroscience, the following requirements must be met:

1. A completed Neuroscience Honors application with signature of a faculty research advisor from BI, HPHY or PSY
2. Completion of all Neuroscience major requirements
3. A minimum 3.5 GPA in all courses applied to the major
4. At least three credits in BI 403/HPHY 403/PSY 403 Thesis or BI 401/ HPHY 401/PSY 401 Research. (*These credits may be applied to the advanced skills courses and research experience requirement*).
5. Completion of an honors thesis under supervision of a committee, consisting of one BI, HPHY, or PSY faculty member and at least one other committee member (Ph.D. student, postdoctoral scholar, or faculty) from BI, HPHY, or PSY.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Neuroscience Graduate Specialization

Neuroscience Graduate Specialization

The Interdepartmental Neuroscience Graduate Program (INGP), administered through the Institute of Neuroscience offers robust graduate training in Neuroscience across departments at the University of Oregon. The goal of INGP is to train students to think independently, creatively, and critically about problems in neuroscience. We aim to train students in a variety of skills that will prepare students for a successful research, teaching, policy or industry career. Students can enter INGP through the department of biology (<https://biology.uoregon.edu/>), human physiology (<https://physiology.uoregon.edu/>), psychology (<https://psychology.uoregon.edu/>), mathematics (<https://math.uoregon.edu/>), and physics (<https://physics.uoregon.edu/>), depending on their interest. The majority of our students enter through the department of biology, which allows students to complete three rotations during their first year, in order to help students identify a laboratory in which to do their dissertation research. Students who enter through psychology, human physiology and mathematics begin in their dissertation labs immediately. Regardless of how students enter INGP, they are provided with a set of mentors at the peer, and faculty level. All graduate students are required to teach for at least one academic year during their graduate career; at least a portion of this teaching takes place the first year.

Students typically fall into a defined training program, however, training can be tailored to fit a student's need and research interest. We offer two training tracks:

Cellular, Developmental and Molecular neuroscience

- **Courses:** Molecular genetics, advanced biochemistry, developmental neurobiology, developmental genetics, cellular neuroscience, systems neuroscience
- **Journal clubs:** developmental and cell biology, developmental neurobiology
- **Meetings:** developmental interest group, zebrafish groupie

Systems, Cognitive and Theoretical

- **Courses:** cellular neuroscience, systems neuroscience, cognitive neuroscience, computational neuroscience, combinatorics, stochastic processes, neural networks
- **Journal clubs:** systems neuroscience, theoretical neuroscience
- **Meetings:** neural circuits and behavior, zebrafish groupie, joint theory lab meetings

Students who want to enter the neuroscience graduate program should apply to the PhD program of a participating department and indicate their interest in neuroscience. Typically, students interested in cognitive neuroscience apply to the psychology department; students interested in molecular, cellular, developmental, or systems neuroscience apply to the biology department. Such applications are reviewed by the neuroscience faculty as well as the departmental admission committee. Answers to specific questions about prerequisites and deadlines may be obtained by writing directly to one of the participating departments, University of Oregon, Eugene, Oregon 97403. Additional information about the

Institute of Neuroscience may be obtained from the institute website (<https://ion.uoregon.edu/>).

Physics

Physics, the most basic of the natural sciences, is concerned with the discovery and development of the laws that describe our physical universe. This endeavor serves, also, to directly benefit humankind: integrated circuits found in computers, mobile phones, and solar cells, lasers in DVD players and computer mice, and the Internet itself were developed from fundamental physics discoveries.

Faculty

Benjamín Alemán, associate professor (experimental condensed matter, optical physics). BS, 2004, Oregon; MA, 2010, PhD, 2011, California, Berkeley. (2013)

David Allcock, assistant professor (ion trapping and quantum information). MS, 2007, PhD, 2012, Oxford. (2019)

Jayanth Banavar, professor (statistical physics). BS, 1972, MS, 1974, Bangalore University, PhD, 1978, University of Pittsburgh. (2019)

Dietrich Belitz, professor (condensed matter theory). Dipl Phys, 1980, Dr.rer.nat., 1982, Technical University Munich. (1987)

Bryan S. Boggs, associate teaching professor (optical physics). BS, 1995, MS, 1996, PhD, 2012, Oregon. (2013)

Gregory D. Bothun, professor (astronomy). BS, 1976, PhD, 1981, Washington (Seattle). (1990)

James E. Brau, Philip H. Knight Professor (experimental elementary particle physics). BS, 1969, United States Air Force Academy; MS, 1970, PhD, 1978, Massachusetts Institute of Technology. (1988)

Spencer Chang, associate professor (theoretical high-energy physics). BS, 1999, Stanford; PhD, 2004, Harvard. (2010)

Timothy Cohen, associate professor (elementary particle theory). BS, 2006, MS, 2009, PhD, 2011, Michigan, Ann Arbor. (2015)

Eric Corwin, associate professor (biophysics, soft condensed matter). BA, 2001, Harvard; PhD, 2007, Chicago. (2010)

Ben Farr, assistant professor (gravitational waves). BS, 2009, Rochester Institute of Technology; PhD, 2014, Northwestern. (2017)

R. Scott Fisher, associate teaching professor (astronomy). BS, 1993, PhD, 2001, Florida. (2012)

Raymond E. Frey, professor (experimental elementary particle physics). BA, 1978, California, Irvine; MS, 1981, PhD, 1984, California, Riverside. (1989)

James N. Imamura, professor (astrophysics); director, Institute of Theoretical Science. BA, 1974, California, Irvine; MA, 1978, PhD, 1981, Indiana. (1985)

Laura Jeanty, assistant professor (high-energy physics). BS, 2006, Yale; MS, 2009, PhD, 2013, Harvard. (2018)

Stephen D. Kevan, professor (solid state physics). BA, 1976, Wesleyan; PhD, 1980, California, Berkeley. (1985)

Graham Kribs, professor (elementary particle theory). BAsC, 1993, Toronto; PhD, 1998, Michigan, Ann Arbor. (2004)

Dean W. Livelybrooks, associate teaching professor (geophysics). BS, 1977, Massachusetts Institute of Technology; MS, 1984, PhD, 1990, Oregon. (1996)

Stephanie Majewski, associate professor (experimental elementary particle physics). BS, 2002, Illinois, Urbana-Champaign; PhD, 2007, Stanford. (2012)

Benjamin McMorran, associate professor (experimental condensed matter, optical physics). BS, 2000, Oregon State; MS, PhD, 2009, Arizona. (2011)

Stanley J. Micklavzina, associate teaching professor (physics education). BS, 1982, MS, 1985, Oregon. (1985)

Jens Nöckel, associate professor (optical physics). Dipl. Phys., 1992, Hamburg; PhD, 1997, Yale. (2001)

Raghuveer Parthasarathy, Alec and Kay Keith Professor (condensed matter physics, biophysics). BA, 1997, California, Berkeley; PhD, 2002, Chicago. (2006)

Jayson Paulose, assistant professor (condensed matter theory). AB, 2007, Princeton; SM, 2009, PhD, 2013, Harvard. (2018)

Michael G. Raymer, Philip H. Knight Professor (quantum optics and optical physics). BA, 1974, California, Santa Cruz; PhD, 1979, Colorado. (1988)

William C. Scannell, lab instructor (physics education). BS, 2002, MS, 2004, PhD, 2010, Oregon. (2016)

James M. Schombert, professor (astronomy). BS, 1979, Maryland; MPhil, 1982, PhD, 1984, Yale. (1996)

Brian J. Smith, professor (quantum optics, optical physics). BA, 2000, Gustavus Adolphus College; PhD, 2007, Oregon. (2015)

Daniel Steck, associate professor (atom optics and nonlinear dynamics). BS, 1995, Dayton; PhD, 2001, Texas, Austin. (2004)

David M. Strom, professor (experimental elementary particle physics). BA, 1980, St. Olaf; PhD, 1986, Wisconsin, Madison. (1991)

Richard P. Taylor, professor (solid state physics). BS, 1985, PhD, 1988, Nottingham. CAD, 1995, Manchester School of Art; MA, 2000, New South Wales. (1999)

John J. Toner, professor (condensed matter theory). BS, 1977, Massachusetts Institute of Technology; MA, 1979, PhD, 1981, Harvard. (1995)

Eric Torrence, professor (experimental elementary particle physics). BS, 1990, Washington (Seattle); PhD, 1997, Massachusetts Institute of Technology. (2000)

Tristan S. Ursell, assistant professor (condensed matter physics, biophysics). BS, 2003, Rensselaer Polytechnic Institute; MS, 2003, PhD, 2009, California Institute of Technology. (2014)

Steven J. van Enk, professor (theoretical optical physics). MSc, 1988, Utrecht; PhD, 1992, Leiden. (2006)

Hailin Wang, professor (quantum optics); Alec and Kay Keith Chair. BS, 1982, Science and Technology (China); MS, 1986, PhD, 1990, Michigan. (1995)

David Wineland, research professor (atomic spectroscopy, quantum information, quantum-limited metrology). BA, 1965, California, Berkeley; MA, 1966, PhD, 1970, Harvard. (2018)

Tien-Tien Yu, assistant professor (high-energy physics). AB, 2007, Chicago; PhD, 2013, Wisconsin, Madison. (2017)

Research Faculty and Staff

Robert Schofield, research associate professor (nuclear biophysics). BS, 1982, Brigham Young; PhD, 1990, Oregon. (1993)

Nikolai Sinev, senior research associate (experimental high energy physics). BS, 1968, PhD, 1974, Moscow State. (1993)

Frank Vignola, senior research associate (solar energy). BA, 1967, California, Berkeley; MS, 1969, PhD, 1975, Oregon. (1977)

Emeriti

Paul L. Csonka, professor (elementary particle theory). PhD, 1963, Johns Hopkins. (1968)

Nilendra G. Deshpande, professor (elementary particle theory). BSc, 1959, MSc, 1960, Madras; PhD, 1965, Pennsylvania. (1975)

Rudolph C. Hwa, professor emeritus. BS, 1952, MS, 1953, PhD, 1957, Illinois; PhD, 1962, Brown. (1971)

Harlan Lefevre, professor emeritus. BA, 1951, Reed; PhD, 1961, Wisconsin. (1961)

David K. McDaniels, professor emeritus. BS, 1951, Washington State; MS, 1958, PhD, 1960, Washington (Seattle). (1963)

John T. Moseley, professor emeritus. BS, 1964, MS, 1966, PhD, 1969, Georgia Institute of Technology. (1979)

George W. Rayfield, professor emeritus. BS, 1958, Stanford; PhD, 1964, California, Berkeley. (1967)

David R. Sokoloff, professor emeritus. BA, 1966, City University of New York, Queens; PhD, 1972, Massachusetts Institute of Technology. (1978)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

- Physics (BA/BS) (p. 290)

Minor

- Physics (p. 293)

Graduate Programs

Major - Master's Degree

- Physics (MS) (p. 293)

Major - Doctoral Degree

- Physics (PhD) (p. 294)

Specialization

- Quantum and Nanotechnology (p. 295)

Physics (BA/BS)

Explore the laws of nature and the relationship between energy and matter with the Department of Physics. You will have the opportunity to research with award-winning faculty, participate in practical applications such as labs and demonstrations, and develop career skills through internships. We encourage physics majors to study across disciplines, pairing their work with chemistry, biology, or anything else of interest—at the University of Oregon, you have the freedom to choose your own path.

A degree in physics will give you a solid foundation to pursue careers and graduate studies in astrophysics, engineering, teaching, astronomy, medicine, technology, communication, and a host of other disciplines.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Have knowledge of principles and concepts for specific core subject areas listed above.
- Apply principles and concepts to analyze problems within specific core areas.
- Have capability with quantitative methods appropriate for the core areas.
- Analyze and interpret quantitative results.
- Have experience with integration of concepts: analysis of complex problems cutting across multiple core areas.
- Collect and appropriately analyze data working independently and in collaboration with others (experimentation; data collection, reduction and analysis; model-based computation including simulations and inversion of observations; and literature research using basic and state-of-the-art technology).
- Communicate orally and in writing by making appropriate use of current presentation technology.
- Have familiarity with current developments in physics.

Physics Major Requirements

Courses used to fulfill the major requirements must be taken for letter grade. [Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.](#)

Physics majors must keep an average Physics GPA of 2.0 or better in all Physics/Astronomy Courses.

Code	Title	Credits
Physics Core Courses		
MATH 251Z–253Z	Calculus: Differential, Integral, and Sequences & Series	12
MATH 256	Introduction to Differential Equations	4
MATH 281–282	Several-Variable Calculus I-II	8
PHYS 251–253	Foundations of Physics I	12
PHYS 290	Foundations of Physics Laboratory ¹	2
PHYS 351–353	Foundations of Physics II	12
PHYS 391	Physics Experimentation Data Analysis Laboratory	4
Interdisciplinary Science Core		
Two from the following: ²		8
CH 221Z	General Chemistry I	
CH 222Z	General Chemistry II	
CH 224H	Advanced General Chemistry I	
CH 225H	Advanced General Chemistry II	
BI 221Z	Principles of Biology I: Cells	
BI 222Z	Principles of Biology II: Organisms	
BI 223Z	Principles of Biology III: Ecology and Evolution	
CS 210	Computer Science I	
CS 211	Computer Science II	
CS 212	Computer Science III	
ERTH 201	Dynamic Planet Earth	
HPHY 212	Scientific Investigation in Physiology	
Astronomy or Physics Upper-Division Courses ³		30
Total Credits		92

¹ To be repeated, totaling 2 credits.

² Students are strongly urged to complete this requirement in the first two years.

³ Students must complete a minimum of 6 credits in upper-division laboratory courses from any combination of PHYS 401, 424, 425, 431, 432, 481, 491, 492, and 493. A maximum of 12 credits from these courses may count toward the major.

Honors

To be recommended by the faculty for graduation with honors in physics, a student must complete at least 46 credits in upper-division physics courses, of which at least 40 credits must be taken for letter grades, and earn at least a 3.50 grade point average in these courses.

As an alternative, undergraduate research leading to the defense of a thesis accompanied by at least a 3.30 grade point average can lead to recommendation for graduation with honors. Contact the director of undergraduate studies for more information.

Physics Minor

Physics, the most basic of the natural sciences, entails the discovery and elucidation of elementary principles which shape our physical universe. Students who minor in Physics as a supplement to their major course of study will learn how these elementary principles can systematically be applied to understand diverse phenomena and solve seemingly complex problems. Graduates with training in Physics find employment in the various areas of physics and other physical sciences, technological and health industries, financial services, computer science, library science, education, communication, law, and medicine.

Physics Minor Requirements

Code	Title	Credits
Pre-Minor Requirements		
Required Courses		
PHYS 251–253	Foundations of Physics I ¹	12
	or PHYS 201–203	General Physics I

PHYS 351–353	Foundations of Physics II	12
PHYS 391	Physics Experimentation Data Analysis Laboratory	4
400-level physics course ²		4
Total Credits		32

¹ General Physics (PHYS 201–203) may fulfill requirements with the approval of the Physics Director of Undergraduate Studies.

² All 400-level PHYS classes count towards this requirement. However, keep in mind that some classes have pre-requisites that need to be met before they can be taken. Contact the Physics Director of Undergraduate Studies if you have questions about this requirement.

Additional Requirements

Course work must be completed with grades of C– or better or P. At least 12 of the upper-division credits must be completed in residence at the University of Oregon.

Physics (MS)

The Department of Physics offers graduate programs leading to the master of science degree in applied physics or to the master of arts (MA) or master of science (MS) degrees with a variety of opportunities for research. Current research areas include astronomy and astrophysics, biophysics, condensed matter physics, elementary particle physics, and optical physics.

Several centers and institutes are supported by the Office of the Vice President for Research and Innovation (<http://research.uoregon.edu/>): the Institute for Fundamental Science (<http://ifs.uoregon.edu/>), the Materials Science Institute (<http://materials.science.uoregon.edu/>), and the Oregon Center for Optical, Molecular and Quantum Science (<http://omq.uoregon.edu/>). These interdisciplinary institutes maintain a close relationship with the Department of Physics (<https://physics.uoregon.edu/>) as well as related departments.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge. Students should gain a deep and broad understanding of physics. This involves a grasp of core concepts beyond the level typically seen in undergraduate education, as well as familiarity with the aims and methods of various subfields of physics. This understanding is typically achieved through combination of coursework and seminars, colloquia, and meetings.

Physics Major Requirements

Typically this degree is based solely on coursework. Detailed requirements can be found in the Graduate Student Handbook on the department's website. The master's degree program is typically completed in four terms, unless sufficient transfer credits are available, in which case it can be obtained in three.

Candidates must either submit a written thesis **or** take a program of specialized courses.

Thesis Option

A total of 9 credits must be taken either as PHYS 503 or a combination of PHYS 503 and PHYS 601.

Code	Title	Credits
Select one of the following:		9
PHYS 503	Thesis	
PHYS 503 & PHYS 601	Thesis and Research: [Topic]	

Specified-Course Option

The specified-courses option requires 40 graded graduate credits in physics with a GPA of at least 3.00 in these courses; 36 of those 40 credits must be selected from a list of courses approved by the department.

Physics (PhD)

The Department of Physics offers a doctor of philosophy (PhD) degree with a variety of opportunities for research. Current research areas include astronomy and astrophysics, biophysics, condensed matter physics, elementary particle physics, and optical physics.

Several centers and institutes are supported by the Office of the Vice President for Research and Innovation (<http://research.uoregon.edu/>): the Institute for Fundamental Science (<http://ifs.uoregon.edu/>), the Materials Science Institute (<http://materials.science.uoregon.edu/>), and the Oregon Center for Optical, Molecular and Quantum Science (<http://omq.uoregon.edu/>). These interdisciplinary institutes maintain a close relationship with the Department of Physics (<https://physics.uoregon.edu/>) as well as related departments.

The doctor of philosophy degree (PhD) in physics is based primarily on demonstrated knowledge of physics and doctoral dissertation research. PhD students also must take and pass the core graduate sequences, listed below, achieving a B– or better grade in each course. Courses may be retaken once to achieve this minimum grade. The director of graduate studies can selectively waive these requirements in exceptional cases:

Core Course Sequence:

Code	Title	Credits
PHYS 611–612	Theoretical Mechanics	6
PHYS 613–614	Statistical Physics	6
PHYS 610	Experimental Course: [Topic] (Math Methods)	4
PHYS 622–623	Electromagnetic Theory	8
PHYS 631–633	Quantum Mechanics	12
Total Credits		36

Breadth/Specialized Course Requirements:

Six 4-credit breadth or specialized courses.

In parallel, students must locate an advisor and an advisory committee, who then administer a comprehensive oral examination testing whether the student is ready to undertake dissertation research. The heart of the PhD requirements is research leading to a doctoral dissertation.

Detailed information is available in the Graduate Student Handbook on the department's website (http://physics.uoregon.edu/grad_studies/).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge. Students should gain a deep and broad understanding of physics. This involves a grasp of core concepts beyond the level typically seen in undergraduate training, as well as familiarity with the aims and methods of various subfields of physics. This understanding is typically achieved through combination of coursework and seminars, colloquia, and meetings.
- Conduct independent research and analysis in their discipline and contribute original and substantive work in their field. This is the primary goal of any doctoral program. Its achievement is demonstrated primarily by the writing of doctoral dissertation and the presentation of an oral dissertation defense, both of which are assessed by a faculty committee.
- Acquire familiarity with the current literature. To contribute original scientific work, a student must be knowledgeable about the present state of his or her field. This familiarity is typically attained through reading, attending seminars, participating in journal clubs, and other such activities.
- Be able to communicate scientific results. The ability to communicate scientific findings, in writing or in presentations, is an important component of a researcher's portfolio. Norms vary considerably between subfields of Physics, prohibiting blanket statements. Considering publications, for example, few author papers with a doctoral student as the lead author are standard in some subfields. In others, scientific papers can have many hundreds of authors. Similar variety exists for presentations. Nonetheless the development of communication skills is a learning objective for doctoral students in Physics.

There are as many paths to a Ph.D. as there are Ph.D. students. Unlike an undergraduate degree, or even a Master's degree, which can typically be completed through a standard program of coursework, a Ph.D. necessarily involves a unique, new contribution to human knowledge. Especially in a field like Physics, there is an enormous diversity of methods and procedures across sub-fields. Therefore, it is futile and unproductive to attempt to describe specific, universal learning goals beyond the broad goal of understanding Physics stated above.

We provide here examples of finer scale learning goals that can apply to some PhD students, stressing that it is not, nor can it be, a set that spans all students, dissertations, and degrees.

Proficiency in data analysis. Nearly all subfields of physics involved quantitative analysis of data. Exceptions include some purely theoretical studies, for example aiming for the invention of analytic mathematical treatments of physical problems. Where relevant, and objective of our Ph.D. program is facility with mathematical methods for data analysis, as well as presentation methods.

Proficiency in experimental design. Many studies in physics involve the design and execution of experiments. Where relevant, and objective of our Ph.D. program is the ability to design experiments, considering relevant issues of resolution, sample size, sources of noise, laboratory safety, etc. It should be noted that the scale of design varies enormously between subfields. In parts of high energy physics for example, studies involve thousands of researchers, with large-scale experimental design conducted by many individuals often years before a particular doctoral

student's tenure. In other subfields, experiments are designed by a few researchers, including the doctoral student.

Physics Major Requirements

The doctor of philosophy degree (PhD) in physics is based primarily on demonstrated knowledge of physics and doctoral dissertation research. PhD students also must take and pass the core graduate sequences, listed below, achieving a B– or better grade in each course. Courses may be retaken once to achieve this minimum grade. The director of graduate studies can selectively waive these requirements in exceptional cases:

Code	Title	Credits
Core Coursework Requirements		
PHYS 610	Experimental Course: [Topic] (Mathematical Methods)	4
PHYS 611	Theoretical Mechanics	4
PHYS 613 & PHYS 614	Statistical Physics and Statistical Physics	8
PHYS 622 & PHYS 623	Electromagnetic Theory and Electromagnetic Theory	8
PHYS 631 & PHYS 632 & PHYS 633	Quantum Mechanics and Quantum Mechanics and Quantum Mechanics	12
Specialized Coursework Requirements		28
Seven additional courses ¹		
Dissertation Courses		18
PHYS 603	Dissertation	
Research Courses		3
PHYS 601	Research: [Topic] (at least 3 terms)	
Total Credits		85

¹ Normally these courses will be additional courses in physics, but they may include other graduate science or mathematics courses with the prior approval of the Director of Graduate Studies. These courses must be graded and a grade of B or better must be obtained. It is recommended that students complete their specialized courses by the end of their third year.

Next, students must locate an advisor and an advisory committee, who then administer a comprehensive oral examination testing whether the student is ready to undertake dissertation research. The heart of the PhD requirements is research leading to a doctoral dissertation.

Detailed information is available in the *Graduate Student Handbook* on the department's website.

Quantum and Nanotechnology Specialization

Nikolay Zhelev, Director

Quantum and Nanotechnology graduate specialization, housed within the Applied Physics master's program, is an innovative, industry-focused program that equips students with advanced skills in quantum science, nanofabrication, radio-frequency electronics, and cryogenic technology. Building on the success of the University of Oregon's nationally recognized Applied Physics Master's program, this specialization combines rigorous coursework, hands-on training, and a nine-month

paid industry internship. It prepares graduates for high-demand careers in quantum computing, superconducting quantum circuits, nanoelectromechanical systems (NEMS), photonics, and advanced materials research.

Graduate Specialization in Quantum and Nanotechnology

Code	Title	Credits
Required Courses		
PHYS 533	Radiofrequency and Low-noise Measurements	4
PHYS 589	The Physics Behind Quantum Computers	4
PHYS 595	Nanofabrication	4
PHYS 681	Cryogenic and Quantum Measurements	4
PHYS 682	Optical Quantum Lab	4
PHYS 691	Industry Projects in Quantum and Nanotechnology	4
Successful completion of Applied Physics Master's requirements, including internship.		
Total Credits		24

Psychology

<http://psychology.uoregon.edu>

Ulrich Mayr, Department Head (Interim)

The Department of Psychology is well-known for its innovation and leadership in the field, conducting formative research in the fields of cognitive neuroscience and developmental psychopathology. We have made important contributions through cutting-edge work that uses machine learning, wearable data collection devices, and a suite of neuroimaging tools — to name just a few of our techniques.

Faculty

Jennifer Ablow, associate professor (developmental psychopathology, attachment, interpersonal emotional arousal and regulation). BA, 1988, Colorado, Boulder; PhD, 1997, California, Berkeley. (1999)

Nicholas Allen, Ann Swindells Professor in Clinical Psychology (adolescent development and mental health, mood disorders, developmental social and affective neuroscience). BS 1985, MS, 1988, PhD, 1993, Melbourne. (2013)

Sunhye (Sunny) Bai, assistant professor (clinical psychology, development, emotion regulation, family relationships, peer relationships). BS, 2008, MPH, 2010, PdD, 2017, California, Los Angeles. (2023)

Jagdeep Kaur Bala, associate teaching professor (cognitive neuroscience, perception, attention). BSc, 1988, MSc, 1990, All India Institute of Medical Sciences, New Delhi; PhD, 1997, Tata Institute of Fundamental Research, Mumbai. (2007)

Dare A. Baldwin, professor (language acquisition, semantic development, cognitive development). BA, 1982, California, Berkeley; MSc, 1984, California, Santa Cruz; PhD, 1989, Stanford. (1993)

Ted Bell, instructor (brain development, human memory, applied cognitive science). BS, 1990, Oregon State; MS, 1997, PhD, 2005, Oregon. (2011)

Elliot Berkman, professor (affective neuroscience, self-regulation, quantitative methods for neuroimaging). BA, 2002, Stanford; PhD, 2009, California, Los Angeles. (2010)

Melynda D. Casement, associate professor (clinical psychology). AB, 2002, Mount Holyoke College; PhD, 2010, Michigan. (2016)

Robert Chavez, associate professor (social neuroscience, interpersonal perception, personality and individual differences). BS, 2008, New Mexico; PhD, 2015, Dartmouth College. (2016)

Evelyn Cho, assistant professor (clinical psychology, access to mental health services). BA, 2013, California, Los Angeles; MA, 2017, PhD, 2021, Missouri. (2024)

Sheila Crowell, professor (clinical psychology, developmental psychopathology, emotion dysregulation, psychophysiology). BA, 1999, Boise State; MA, 2002, California, Los Angeles; PhD, 2009, Washington (Seattle). 2023

Paul Dassonville, associate professor (cognitive neuroscience, perception, sensorimotor integration). BS, 1986, Texas A & M; PhD, 1992, California, Los Angeles. (1999)

Dagmar Zeithamova Demircan, associate professor (cognitive neuroscience, memory). MA, 2003, Charles University, Prague; PhD, 2008, Texas, Austin. (2014)

Nicole M. Dudukovic, associate teaching professor (cognitive neuroscience, memory). BA, 2000, Stanford; MA, 2002, California, Los Angeles; PhD, 2007, Stanford. (2015)

Ruth Ellingsen, clinical associate professor (clinical psychology). BA, 2007, Wake Forest; MA, 2011, PhD, 2016, California, Los Angeles. (2018)

Caitlin M. Fausey, associate professor (development, language and cognition, experience sampling). BA, 2004, Northwestern; MA, 2008, PhD, 2010, Stanford. (2014)

Michelle Fenesy, assistant clinical professor (clinical psychology). BA, 2009, Lewis & Clark; MA, 2015, PhD, 2020, California, Los Angeles. (2023)

Lauren Forrest, assistant professor (clinical psychology, eating disorders, suicidal thoughts and behaviors, quantitative clinical science methods, intersectionality). BS, 2012, Utah; MA, 2015, PhD, 2020, Miami University. (2024)

Tina Gupta, assistant professor (clinical psychology, risk for severe mental illness, psychosis-risk, adolescent development, emotion). BA 2011, University of Colorado Boulder; PhD 2022, Northwestern University. (2025)

Sara D. Hodges, professor (social cognition, construction of social judgments). BA, 1989, Rhodes; MA, 1992, PhD, 1995, Virginia. (1995)

Benjamin Hutchinson, assistant professor (cognitive neuroscience, memory, attention). BA, 2004, Pennsylvania; PhD, 2011, Stanford. (2018)

Simran Johal, assistant professor (quantitative psychology, psychometric networks, longitudinal data analysis, dynamic modeling). BS, 2019, UC Davis; PhD, 2025, UC Davis. (2025)

Christina M. Karns, associate teaching professor (attention, social emotions, neuroplasticity, neuroimaging). BS, 1999, California, San Diego; PhD, 2008, California, Berkeley. (2008)

Mariah Kornbluh, associate professor (development, community psychology, youth participatory action research, diversity science). BA, 2008, California, Santa Cruz; MA, 2012, PhD, 2015, Michigan State. (2022)

Brice A. Kuhl, professor (cognitive neuroscience, memory, neuroimaging). BA, 2001, Kenyon College; PhD, 2009, Stanford. (2015)

Anne Mannering, instructor, program director Online Master's in Psychology (cognitive and social-emotional development, early life stress, self-regulation). BA, 1998, UT Austin; MS, 2001, PhD, 2006, Oregon. (2020)

Robert Mauro, associate professor (social, emotions, psychology and law). AB, 1979, Stanford; MS, 1981, Yale; PhD, 1984, Stanford. (1984)

Ulrich Mayr, Robert and Beverly Lewis Professor in Neuroscience (cognitive neuroscience, cognitive aging). BA, 1988, PhD, 1992, Berlin. (2000)

Jeffrey Measelle, professor (developmental psychology, emotional development, family). BA, 1985, Brown; PhD, 1997, California, Berkeley. (1999)

Chanel Meyers, assistant professor (social psychology, diversity science, intergroup processes). BS, 2012, Western Oregon University; PhD, 2018, Hawai'i, Manoa. (2022)

Kate Mills, associate professor (development, social neuroscience, adolescence). BA, 2011, Portland State; PhD, 2015, University College, London. (2018)

Vishnu (Deepu) Murty, associate professor (cognitive neuroscience, learning and memory, motivation, adaptive behavior). BS, 2005, Brown; PhD, 2012, Duke. (2024)

John Myers, instructor (research methods, evolutionary psychology). BS, 2007, MS, 2009, Oregon; PhD, 2016, Minnesota. (2022)

Alayna Park, assistant professor (clinical psychology, accessibility and effectiveness of mental health services, diversity science). BA, 2012, PhD, 2020, California, Los Angeles. (2022)

Jordan Pennefather, associate teaching professor (social and educational psychology, methodology, data analysis). BA, 2003, California State, Dominguez Hills; PhD, 2008, Colorado, Boulder. (2010)

Jennifer Pfeifer, professor (developmental and social cognitive neuroscience, adolescent self-perception and emotion processing). BA, 2000, Stanford; MA, 2003, PhD, 2007, California, Los Angeles (2008)

Curtis Phills, associate professor (social psychology, implicit bias, diversity science). BA, 2004, MS, 2006, PhD, 2013, York University. (2024)

Lisa Scotch, lecturer. BA, 1999, University of South Florida; MS, 2011, PhD, 2017, Walden. (2021)

Margaret E. Sereno, professor (visual cognition, neural network modeling, brain imaging). BA, 1983, Northern Illinois; PhD, 1989, Brown. (1991)

Sohna Shook, lecturer. BS, 2007, Friends; MEd, 2009, Wichita State; PhD, 2020, Walden. (2021)

Elizabeth Skowron, professor (clinical psychology, child-parent psychotherapy, emotion regulation and self-control in caregivers and children). BA, 1998, Ohio State; MS, 1991, PhD, 1995, SUNY, Albany. (2019)

Paul Slovic, professor (judgment, decision-making, risk assessment). BA, 1959, Stanford; MA, 1962, PhD, 1964, Michigan. (1986)

Matt Smear, associate professor (systems neuroscience, olfaction). ScB, 1998, Duke; PhD, 2005, California, San Francisco. (2014)

Nash Unsworth, professor (working memory, memory and attention differences, memory search and retrieval). BS, 2001, Idaho State; PhD, 2006, Georgia Institute of Technology. (2010)

Michael Wehr, professor (systems neuroscience, auditory neurophysiology, cortical circuits). ScB, 1991, Brown; PhD, 1999, California Institute of Technology. (2005)

Sara Weston, associate professor (social personality, health, personality development). BA, 2012, Northwestern; MA, 2014, PhD, 2017, Washington (St. Louis). (2019)

Ariel Williamson, assistant professor (clinical psychology, child and adolescent psychology, community-engaged research, sleep medicine). BA, 2006, California, Santa Barbara; MA, 2010, Northwestern; MA, 2012, PhD, 2016, Delaware. (2023)

Blanche Wright, assistant professor (clinical psychology, racial/ethnic inequities in mental health care, research-practice-policy gaps). BS, 2013, MA, 2017, PhD, 2022, California, Los Angeles. (2024)

Maureen Zalewski, professor (clinical psychology, emotion and stress regulation contributing to psychopathology) BS, 2005, Pennsylvania State; MS, 2008, PhD, 2012, Washington (Seattle). (2013)

Ahmar Zaman, instructor (psychopathology). BS, 2012, Lycoming; MA, 2016, PhD, 2020, University of Detroit Mercy. (2022)

Emerit Faculty

Holly Arrow, professor emerit (group dynamics, psychology of war). BA, 1977, Elmira; MFA, 1982, Colorado, Boulder; MA, 1995, PhD, 1996, Illinois, Urbana-Champaign. (1996)

Crystal Dehle, clinical associate professor emerit. AB, 1953, Harvard; MA, 1954, PhD, 1958, Michigan. (1960)

Lewis R. Goldberg, professor emerit. AB, 1953, Harvard; MA, 1954, PhD, 1958, Michigan. (1960)

Barbara Gordon-Lickey, professor emerit. AB, 1963, Radcliffe; PhD, 1966, Massachusetts Institute of Technology. (1969)

Marvin Gordon-Lickey, professor emerit. AB, 1959, Oberlin; MA, 1962, PhD, 1965, Michigan. (1967)

Douglas L. Hintzman, professor emerit. BA, 1963, Northwestern; PhD, 1967, Stanford. (1969)

Ray Hyman, professor emerit. AB, 1950, Boston University; MA, 1952, PhD, 1953, Johns Hopkins. (1961)

Carolyn Keutzer, associate professor emerit. BA, 1960, MA, 1963, PhD, 1967, Oregon. (1967)

Daniel P. Kimble, professor emerit. BA, 1956, Knox; PhD, 1961, Michigan. (1963)

Edward Lichtenstein, professor emerit. BA, 1956, Duke; MA, 1957, PhD, 1961, Michigan. (1966)

Richard Marrocco, professor emerit. BA, 1965, California, Los Angeles; PhD, 1972, Indiana. (1973)

Louis J. Moses, professor emerit. BA, 1983, Western Australia; PhD, 1991, Stanford. (1993)

Michael I. Posner, professor emerit. BS, 1957, MS, 1959, Washington (Seattle); PhD, 1962, Michigan. (1965)

Mary K. Rothbart, professor emerit. BA, 1962, Reed; PhD, 1967, Stanford. (1969)

Myron Rothbart, professor emerit. BA, 1962, Reed; PhD, 1966, Stanford. (1969)

Gerard Saucier, professor emerit (personality beliefs and values, psychometrics). BA, 1978, North Carolina, Chapel Hill; MA, 1984, PhD, 1991, Oregon. (1997)

Anne D. Simons, professor emerit. BA, 1974, Stanford; PhD, 1982, Washington (St. Louis). (2006)

Sanjay Srivastava, professor emerit (interpersonal perception and self-perception, social functions of emotions, personality dynamics and development). BA, 1995, Northwestern, PhD, 2002, California, Berkeley. (2004)

Marjorie Taylor, professor emerit. BS, 1979, MS, 1981, Acadia; PhD, 1985, Stanford. (1985)

Don M. Tucker, professor emerit (emotion, cognition, neuropsychology). BA, 1969, Colorado; MS, 1972, PhD, 1974, Pennsylvania State. (1984)

Robert L. Weiss, professor emerit. BA, 1952, PhD, 1958, State University of New York, Buffalo. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Psychology (BA/BS)

Sara D. Hodges, Department Head

Straub Hall
1227 University of Oregon
Eugene, OR 97403-1227

From cognitive and developmental psychology to practices in clinical psychology and psychopathology, the UO's Department of Psychology immerses you in the study of the human mind and behavior. All students collaborate on research as part of their academic sequence and many gain additional research experience in department labs. You will learn strong critical thinking skills and how to evaluate and convey evidence. Develop your skills in real-world settings with student-run peer programs, internships at local clinics, shelters, hospitals, and justice centers.

We are a community of scientists including faculty and postdoctoral scholars engaged in cutting-edge research. The psychology major will expose you to basic concepts, theories, findings, and ethical issues in multiple areas: social, personality and psychopathology, developmental, cognitive and experimental, and biological and physiological psychology.

Upon completing their training, UO psychology majors should have a broad knowledge of psychology, including basic statistical techniques and ethical issues, and be skilled at reading, evaluating, and communicating about the primary scientific literature in psychology.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify major theories, research findings, and methodological approaches in a variety of key content areas including, for example, cognition, neuroscience, development, social behavior, personality, and psychopathology and mental health; and apply research findings to human behavior in everyday life.
- Find relevant articles in the primary psychological literature on a given topic, identify key research questions and hypotheses in scientific articles, and critically evaluate the research design and the quality of evidence presented.
- Choose appropriate basic statistical analysis techniques for a specific research question and set of data, complete basic data analyses, and summarize the results in an APA-style report.
- Communicate clearly and effectively about psychological topics, including methodological and ethical issues in psychology, based on an understanding of both the strengths and limitations of empirical evidence.

To satisfy major requirements students take a total of 68 credits. Of those credits, 56 credits in psychology courses are required, 48 of which must be upper-division, and 16 of which must be taken in residence at the University of Oregon. Introduction to Psychology I (PSY 201Z) and Introduction to Psychology II (PSY 202Z) must be taken for letter grades and passed with grades of mid-C or better, although AP and IB coursework with appropriate grades is acceptable with a grade of P+, and elective upper-division psychology courses may be taken pass/no pass. A minimum grade point average of 2.00 in psychology coursework is required.

Psychology Major Requirements

Code	Title	Credits
Introductory Prerequisite Courses		20
WR 121Z	Composition I	
WR 122Z	Composition II (WR 123 recommended)	
or WR 123	College Composition III	
PSY 201Z	Introduction to Psychology I	
PSY 202Z	Introduction to Psychology II	
STAT 243Z	Elementary Statistics I ¹	
Methods Foundations Courses		12
PSY 301	Scientific Thinking in Psychology	
PSY 302	Statistical Methods in Psychology	
PSY 303	Research Methods in Psychology	
300-Level Core Courses		12
Select three of the following, one of which must be PSY 304 or PSY 305:		
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 306	Social Psychology ²	
PSY 307	Personality	
PSY 308	Developmental Psychology ³	
PSY 309	Psychopathology ⁴	
400-Level Specialty Courses		12
Select three of the following:		
PSY 420	Psychology and Law	
PSY 422	Forensic Psychology	
PSY 433	Learning and Memory	
PSY 436	Human Performance	
PSY 438	Perception	
PSY 439	Psychology and Evolution	
PSY 445	Brain Mechanisms of Behavior	
PSY 449	Cognitive Neuroscience	
PSY 450	Hormones and Behavior	
PSY 457	Group Dynamics	
PSY 458	Decision-Making	
PSY 459	Cultural Psychology	
PSY 460	Stereotyping and Prejudice	
PSY 468	Motivation and Emotion	
PSY 472	Psychology of Trauma	
PSY 473	Intimate Relationships	
PSY 475	Cognitive Development	
PSY 478	Social Development	
PSY 479	Infancy	
PSY 480	Development and Psychopathology	
Upper-Division Elective Courses ⁵		12
Select three upper division (300 or 400 level) psychology courses. Up to 4 credits can be in PSY 401 Research or PSY 406 Practicum.		
Total Credits		68

¹ STAT 243Z is recommended. MATH 241, MATH 246, or MATH 251Z may be substituted.

² or OXEU 388: PSY: Social Psychology

³ or OXEU 388: PSY: Human Development

⁴ or OXEU 388: PSY: Psychopathology

⁵ Students must take 12 upper-division psychology elective credits, 8 of which must be actual content courses. A maximum of 4 credits in Research: [Topic] (PSY 401) or Practicum: [Topic] (PSY 406) may be applied to the upper-division credits. Practicum credits must be earned at a practicum site approved by the head undergraduate faculty advisor.

Honors Curriculum

Students with excellent records who plan to pursue a career in psychology may consider applying to the departmental honors program. The honors program centers on an independent research project, which the student develops and carries out under the supervision of a departmental committee. Information about admission criteria and how to apply is available online (<https://naturalsciences.uoregon.edu/psychology/undergraduate-programs/honors-requirements/>).

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult psychology advisors to determine the best path for them.

Bachelor of Arts in Psychology

Course	Title	Credits	Milestones
First Year			
Fall			
	First-Year Interest Group or elective course	4	
	First-Year Interest Group or arts and letters area-satisfying course	4

Psychology Minor

Our psychology minor is designed to give students a broad survey of the study of psychology. Students in other majors may choose to complement their study in business, journalism, health and medicine, law and criminology, data science, education, human services, and many other fields.

Psychology Minor Requirements

All 28 credits must be taken for letter grades and passed with a C– or better. At least 16 credits must be upper-division courses taken in residence at the University of Oregon.

Special Studies: [Topic] (PSY 199) does not count toward the minor.

Code	Title	Credits
PSY 201Z	Introduction to Psychology I	4
PSY 202Z	Introduction to Psychology II	4
PSY 301	Scientific Thinking in Psychology	4
PSY 302	Statistical Methods in Psychology	4
Select three of the following, one of which must be PSY 304 or PSY 305:		12
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 306	Social Psychology	
PSY 307	Personality	
PSY 308	Developmental Psychology	
PSY 309	Psychopathology	
Total Credits		28

Psychology (MS)

The Department of Psychology offers two pathways to a master's degree: in-person or online. Self-motivated students who are pursuing a specific area of study and interested in advancing to doctoral candidacy can participate in our in-person Individualized Master's Program. Students interested in a career in the social service fields, or professionals working

in those fields, can pursue a degree online through our online master's in psychology program.

Graduate students seeking masters-level training will have a variety of professional goals. The Psychology program provides two separate opportunities: **Online Master's Degree Program** and **Individualized Master's Degree Program**. Our general learning outcomes and assessments are listed below, but these may vary in their detail according to the primary career aims of the student.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Professional Ethics: Demonstrate knowledge of ethical and professional behavior related to academic and research integrity.
- Core Knowledge: Demonstrate a working knowledge of major theories, research findings and methodological approaches within Psychology.
- Data Analysis: Demonstrate a working knowledge of analytical and statistical techniques.
- Scientific Inquiry: Achieve a deep fluency in the scientific literature and compelling questions within a primary field of research, and (for empirical research studies) achieve proficiency in relevant experimental design, methodology, and data analysis/statistical methods.
- Scientific Communication: Demonstrate effective written scientific communication skills.

Online Master's Degree Program

The Online Master's in Psychology program is designed to benefit people with bachelor's degrees working in community-based organizations and public agencies that address social and mental health needs. This terminal master of science (MS) degree requires 50 credits of coursework distributed over 6 consecutive term (9 credits per term), including summer. All courses are delivered asynchronously online. Students receive advanced training in program evaluation and the brain science of development and behavior change and complete a capstone research project. Upon completion of the program, students will be able to (a) evaluate current interventions delivered in their home agencies, (b) make informed selections of evidence-based programs to deliver, and (c) have a working knowledge of the basic psychological and neural processes at play in their clients as they participate in behavior change programs. This program does not provide clinical training.

Code	Title	Credits
PSY 615	Community Needs Assessments	4
PSY 616	Implementation with Community and Cultural Perspectives	3
PSY 619	Intervention Science	4
PSY 628	Methods of Program Evaluation	4
PSY 630	Translational Neuroscience in Early Childhood	3
PSY 631	Translational Neuroscience in Adolescence	3
PSY 632	Translational Neuroscience in Adulthood	3
PSY 672	Trauma Informed Interventions	3
PSY 690	Capstone Research	17
Choose Two Electives From The Following:		6
PSY 607	Seminar: [Topic] (Child Psychology and Neurological Development)	

PSY 607	Seminar: [Topic] (Special Topics in Neuroscience)
PSY 607	Seminar: [Topic] (Diversity, Equity and Inclusion in Research and Policy)
PSY 614	
PSY 618	Substance Use and Addiction

Total Credits **50**

Individualized Master's Degree Program

The individualized master's degree program does not lead to a PhD. This program is designed to provide advanced training for a small number of individuals who have a clearly focused research interest and an academic plan. Unlike other master's programs, this program is not designed for general master's level training in psychology. We expect persons entering the master's program to be highly self-motivated, with the goal of acquiring conceptual and research skills appropriate to their own work plans. Each program of master's study will be tailored to the individual student's goals within the discipline, so long as it satisfies core master's degree requirements. This program does not provide clinical training.

The master of science (MS) requires 45 credits of work. Program requirements and application information may be obtained from the department website. Clinical training is not available in the master's program.

- 45 credit hours in courses approved for graduate credit
- 24 of the 45 credits must be UO graded graduate credits (B- or higher)
- 30 of the 45 credits must be Psychology graduate credits
- 9 of the 45 credits must be in 600-level courses
- 2 approved graduate-level statistics courses (grade of B- or higher)
- Psy 607 Sem Research Ethics
- Completion of an approved research paper or thesis
- Maintain a UO Cumulative Graduate-Level GPA of 3.0 or higher

The Department expects that most students will complete the Master's degree in 1-2 years

Psychology (PhD)

The goal of the Psychology Department's doctoral program is to familiarize students with the theories and methods of psychology in their own and other specialties, so they will be able to make original contributions in research, teaching, and applied work.

The Ph.D. is a research and scholarly degree, and it is expected that students will be engaged in research throughout their graduate program. The ultimate goal of the graduate curriculum is to enable students to formulate interesting research questions and to put those questions to adequate empirical test. Therefore, student research is a basic and integral component of graduate work.

The research areas of study include:

- Clinical
- Cognitive/Neuroscience
- Developmental
- Social/Personality
- Systems Neuroscience

Graduate students in the Psychology program have a variety of professional goals. Our general learning outcomes and assessments are listed below, but these may vary in their detail according to the primary career aims of the student. Details on the Psychology Graduate Programs, including the departmental requirements meant to achieve the learning outcomes listed below, are provided in the Psychology Doctoral Student Handbook and in the Guide to the UO Clinical Psychology Doctoral Program, both posted on the Psychology Department website (<https://naturalsciences.uoregon.edu/psychology/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Professional Ethics: Demonstrate knowledge of ethical and professional behavior related to academic and research integrity.
- Core Knowledge: Demonstrate a broad working knowledge of major theories, research findings and methodological approaches in multiple content areas within Psychology (Developmental Psychology, Social/Personality, Clinical Psychology, Cognitive Neuroscience, Systems Neuroscience).
- Data Analysis: Demonstrate a broad working knowledge of analytical and statistical techniques.
- Scientific Inquiry: Achieve a deep fluency in the scientific literature and compelling questions within a primary field of research, and achieve proficiency in relevant experimental design, methodology, and data analysis/statistical methods.
- Scientific Communication: Demonstrate effective oral and written scientific communication skills.
- Teaching and Mentoring: Gain experience and skills in teaching and mentoring.

In addition to the learning outcomes specified above for all Ph.D. students, the Clinical Psychology Graduate Program has additional (somewhat overlapping) learning outcomes that are specified by the American Psychological Association's Commission on Accreditation. These additional learning outcomes are split into two categories, Discipline Specific Knowledge and Profession-wide Competencies:

Discipline Specific Knowledge&

- History and Systems of Psychology: Demonstrate a broad working knowledge of the intellectual and social history of Psychology, including the origins and development of major ideas within the discipline.
- Basic Content Areas in Scientific Psychology: Demonstrate a broad working knowledge of major theories, research findings and methodological approaches in basic content areas within Psychology (Affective, Biological, Cognitive, Developmental and Social aspects of behavior).
- Advance Integrative Knowledge: Demonstrate a broad working knowledge of the manner in which the basic content areas within Psychology interrelate.
- Research Methods, Statistical Analysis, and Psychometrics: Demonstrate a broad working knowledge of research methods, analytical and statistical techniques, and the theories and techniques of psychological measurement.

Profession-Wide Competencies

1. Research

- a. Demonstrate the substantially independent ability to formulate research or other scholarly activities (e.g., critical literature reviews, dissertation, efficacy studies, clinical case studies, theoretical papers, program evaluation projects, program development projects) that are of sufficient quality and rigor to have the potential to contribute to the scientific, psychological, or professional knowledge base.
- b. Conduct research or other scholarly activities.
- c. Critically evaluate and disseminate research or other scholarly activity via professional publication and presentation at the local (including the host institution), regional, or national level.

2. Ethical/Legal

- a. Be knowledgeable of and act in accordance with each of the following:
- b. The current version of the APA Ethical Principles of Psychologists and Code of Conduct;
- c. Relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels; and
- d. Relevant professional standards and guidelines.
- e. Recognize ethical dilemmas as they arise, and apply ethical decision-making processes in order to resolve the dilemmas.
- f. Conduct self in an ethical manner in all professional activities.

3. Individual/Cultural Diversity

- a. An understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves.
- b. Knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities including research, training, supervision/consultation, and service.
- c. The ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability apply a framework for working effectively with areas of individual and cultural diversity not previously encountered over the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own.
- d. Demonstrate the requisite knowledge base, ability to articulate an approach to working effectively with diverse individuals and groups, and apply this approach effectively in their professional work.

4. Professional Values/Attitudes

- a. Behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others.
- b. Engage in self-reflection regarding one's personal and professional functioning; engage in activities to maintain and improve performance, well-being, and professional effectiveness.
- c. Actively seek and demonstrate openness and responsiveness to feedback and supervision.
- d. Respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.

5. Communication/Interpersonal Skills

- a. Develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services.
- b. Produce and comprehend oral, nonverbal, and written communications that are informative and well-integrated; demonstrate a thorough grasp of professional language and concepts.
- c. Demonstrate effective interpersonal skills and the ability to manage difficult communication well.

6. Assessment

- a. Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient.
- b. Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective.
- c. Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.

7. Intervention

- a. Establish and maintain effective relationships with the recipients of psychological services.
- b. Develop evidence-based intervention plans specific to the service delivery goals.
- c. Implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables.
- d. Demonstrate the ability to apply the relevant research literature to clinical decision making.
- e. Modify and adapt evidence-based approaches effectively when a clear evidence-base is lacking.
- f. Evaluate intervention effectiveness, and adapt intervention goals and methods consistent with ongoing evaluation.

8. Supervision

- a. Demonstrate knowledge of supervision models and practices.

9. Consultation and Interprofessional/Interdisciplinary Skills

- a. Demonstrate knowledge and respect for the roles and perspectives of other professions.
- b. Demonstrate knowledge of consultation models and practices.

Doctoral Degree Programs

The five chief PhD program options are clinical, cognitive-neuroscience, systems neuroscience, developmental, and social-personality.

The department maintains a psychology clinic; specialized facilities for child and social research; experimental laboratories for human research, and well-equipped animal laboratories.

Applicants must provide three letters of recommendation, curriculum vitae, writing sample, statement of purpose, diversity statement, and official transcripts from all colleges and universities attended. Instructions,

deadlines, and a complete list of required materials may be obtained from the department website.

During the first year of graduate work, students acquire a broad background in psychology and are introduced to methods, research, and ethics. Each student's program is planned in relation to background, current interests, and future goals. Research experience and a dissertation are required of PhD candidates; teaching experience is recommended, and opportunities to teach are available.

Requirements for Doctoral Students

Code	Title	Credits
PSY 611–613	Data Analysis I-III	12
Three of five core courses:		
At least one from Group A:		
PSY 610	Experimental Course: [Topic] (Advanced Systems Neuroscience)	
PSY 610	Experimental Course: [Topic] (Advanced Cognitive Neuroscience)	
At least one from Group B: ¹		
PSY 610	Experimental Course: [Topic] (Developmental Core)	
PSY 610	Experimental Course: [Topic] (Clinical Science)	
PSY 610	Experimental Course: [Topic] (Social Personality)	
PSY 607	Seminar: [Topic] (three terms: Research, Ethics, Research)	3
PSY 601	Research: [Topic]	1-21
First-year research requirement		
Supporting area requirement		
Major preliminary examination		
Additional course work required for students in the clinical program ²		
Doctoral dissertation		18
PSY 603	Dissertation	

Additional Course Work and Requirements for Students in the Clinical Program ²

Code	Title	Credits
PSY 606	Practicum: [Topic] (2 Years In-House Clinical Prac)	24
PSY 606	Practicum: [Topic] (Continued Prac Training)	NaN

PSY 610	Experimental Course: [Topic] (Assessment II)	3
PSY 607	Seminar: [Topic] (Clinical Psych (3 academic years))	9

PSY 610 Experimental Course: [Topic] (Cultural and Mental Health) 3

PSY 610 Experimental Course: [Topic] (Supervision & Consultation) 3

PSY 621 Clinical Psychobiology 3

Completion of a one-year clinical internship

¹ Clinical students take all three from Group B.

² See the *Guide to the Clinical Psychology Program*.

Social Sciences

Social sciences (<https://socialsciences.uoregon.edu/>) provide an analytical approach to society's problems. As a result, faculty and students in the social sciences often focus on complex and intersectional issues such as racism, international conflict and war, climate change, and poverty. Through an objective and empirical approach to these issues, the goal is to generate genuine passion and equip future leaders with the skills they need to address the world's challenges.

African Studies

<http://africa.uoregon.edu>

Kemi Balogun, Program Director

kbalogun@uoregon.edu

The African Studies Program encourages teaching and scholarship on sub-Saharan Africa, North Africa, and the wider African diaspora. The program is a focal point for students and faculty members with expertise in African studies, encouraging course offerings related to Africa, promoting study abroad programs and internships, and organizing campus and local community events pertaining to Africa. In addition, the

program supports faculty and student research on Africa and facilitates dissemination of research through the lecture series.

Participating Faculty

Michael Allan, comparative literature

Oluwakemi "Kemi" Balogun, women's, gender, and sexuality studies

B. Mokaya Bosire, linguistics

Lindsay F. Braun, history

Yvonne A. Braun, global studies, women's, gender, and sexuality studies

Alfredo Burlando, economics

André Djiffack, romance languages

Stephen Dueppen, anthropology

Hanan Elsherif, religious studies

Maria Fernanda Escallón, anthropology

Stephen R. Frost, anthropology

Daphne Gallagher, honors college

Dennis C. Galvan, global studies

Ibrahim J. Gassama, law

Melissa Graboyes, history

Rita Honka, dance

Habib Iddrisu, music and dance

Leigh Johnson, geography

Allison McGuffie, cinema studies

Lanie Millar, romance languages

Senyo Ofori-Parku, journalism and communication

Doris L. Payne, linguistics

Kory Russel, landscape architecture

Leslie Steeves, journalism and communication

Nelson Ting, anthropology

Peter A. Walker, geography

Janis C. Weeks, biology

Frances J. White, anthropology

Stephen R. Wooten, global studies

Emeriti

Doug Blandy, arts and administration

Doris L. Payne, linguistics

Janis C. Weeks, biology

Undergraduate Program
Minor

- African Studies (p. 306)

Graduate Program
Specialization

- African Studies (p. 307)

African Studies Minor

The African Studies Program encourages teaching and scholarship on sub-Saharan Africa, North Africa, and the wider African diaspora. The program offers a minor, develops courses related to Africa, promotes study-abroad programs and internships, raises funds to expand African Studies resources, and organizes campus and local community events pertaining to Africa. In addition, the program supports faculty and student research on Africa and facilitates the dissemination of research through the African Studies Lecture Series.

African Studies Minor Requirements

Students who want to earn an undergraduate minor in African studies must satisfy the following requirements, comprising 28 credits total with 24 graded credits with a C- or better. Current Africa-related courses that count toward the minor are listed on the program website (africa.uoregon.edu (<http://africa.uoregon.edu>)) under the African studies minor link.

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. Up to 4 credits with a mark of Pass (P or P*) can be counted toward the minor requirements.

Code	Title	Credits
Core Courses		
AFR 215	Introduction to African Studies	4
History of Africa		4
Select one of the following (or an approved alternative):		
HIST 325	Precolonial Africa	
HIST 326	Colonial and Postcolonial Africa	
ANTH 453	African Archaeology	
Contemporary African Issues		4
Select one of the following (or an approved alternative):		
AFR 199	Special Studies: [Topic] (Health and Disease in Africa)	
BI 309		
ENVS 450	Political Ecology	
FLR 225	Voices of Africa	
FR 407	Seminar: [Topic] (Contemporary Africa)	
GEOG 209	Geography of the Middle East and North Africa	
HIST 417	Society and Culture in Modern Africa: [Topic]	
GLBL 345	African Contemporary Issues and Concerns	
Culture, Ethnicity, and Identity in Africa		4
Select one of the following (or an approved alternative):		

ANTH 410	Experimental Course: [Topic]
DANC 185	African I
DANC 199	Special Studies: [Topic] (African Drumming)
FLR 225	Voices of Africa
FR 407	Seminar: [Topic]
FR 490	20th-Century Literature: [Topic] (Postcolonial Africa or Mongo Beti)
LING 407	Seminar: [Topic] (African Language Families)
MUS 462	Popular Musics in the African Diaspora
Electives	
Electives (see Electives list) ¹	
Total Credits	

¹ Electives must be approved by a faculty advisor and must be at the 300 or 400level, although as much as 8 credits of Swahili courses at any level may be applied. Recommended courses include any courses listed in the course list or electives list. Additional courses may be approved by the faculty advisor. For study abroad, courses will be evaluated for UO credit on a case-by-case basis through the standard Office of International Affairs procedures for assigning credit and course equivalency. Students consult with the faculty member who is sponsoring their study-abroad experience to prepare an agreement that must include the following:

- a list of readings relevant to the experience, which are to be completed prior to and during the experience
- a reflective journal on the student’s activities and cross-cultural experiences
- a final paper integrating preparatory readings with the experience (approximately 4,500 words, plus references)

An African studies minor advisor must approve the credits earned in study-abroad or internship programs.

Electives

Code	Title	Credits
AFR 407	Seminar: [Topic] (Africa in Oregon)	1-5
AFR 410	Experimental Course	1-5

MUS 358	Music in World Cultures	4
MUS 451	Introduction to Ethnomusicology	4
MUS 452	Musical Instruments of the World	4
PS 399	Special Studies: [Topic] (Any courses with African topics)	1-5
SOC 313	Social Issues and Movements	4
SWAH 101	First Year Swahili	5
SWAH 102–103	First-Year Swahili	10
SWAH 201	Second-Year Swahili I	5
SWAH 201–202	Second-Year Swahili	10
SWAH 203	Second Year Swahili III	5
WGS 410	Experimental Course: [Topic] (Gender and Global Social Justice)	1-4
WGS 432	Gender, Environment, and Development	4

Deviations from the requirements listed must be approved by an African studies advisor.

Restrictions

- No more than 8 credits may be from courses with 25 to 49 percent Africa content.
- No more than 4 credits may be from performance courses.
- No more than 12 credits may be from a single department.
- No more than 4 credits may be taken pass/no pass.
- Students must consult with an African studies advisor to confirm that the curricular overlap between the student's major and the African studies minor maintains the principle of academic breadth.

African Studies Graduate Specialization

The African Studies Graduate Specialization may be earned by students from any University of Oregon MA or PhD program. The specialization is designed to be flexible, and will solidify opportunities for you to engage African Studies more formally in your studies. It will both enhance your

background preparation of Africanist-related education and research, and has the potential to positively impact future job opportunities.

To declare the specialization, please contact the Graduate Coordinators (gslgradcoord@uoregon.edu) or Director of African Studies, Kemi Balogun (kbalogun@uoregon.edu), and complete the specialization declaration form (https://africa.uoregon.edu/files/2016/09/Specialization-Declaration_0-1ljmy8e.pdf), (including obtaining a department representative signature), and be sure to file it with the Graduate School (Division of Graduate Studies) no later than week 5 of the term in which you want to make a change.

The UO Graduate School (<https://graduatestudies.uoregon.edu/academics/policies/specialization/administering-specialization/>) has general information about graduate specializations campus-wide.

Specialization Requirements

Students are required to take one class from each of 4 thematic areas, for a total of 4 classes and 16 units. These areas are:

- Core Course
- The African Past
- Contemporary Africa
- Culture, Ethnicity and Identity

Graduate Studies

Arranging a graduate degree program with a concentration in African studies is possible in a number of departments and programs in the College of Arts and Sciences and the School of Music and Dance. Anthropology, biology, dance, environmental studies, French (in the Romance languages department), folklore and public culture, geography, history, global studies, linguistics, political science, and sociology have faculty members with expertise and strong interest in this area.

Students should consult with the affiliated faculty members regarding such arrangements.

Graduate Specialization

Students in a University of Oregon MA or PhD program may choose a graduate specialization in African studies. The student will be assigned an advisor within African studies and must satisfy the following requirements:

Code	Title	Credits
ANTH 650		4
	Approved graduate course in African history	4
	Approved graduate course on issues in contemporary Africa	4
	Approved graduate course dealing with issues in African culture, ethnicity, and identity	4
Total Credits		16

Anthropology

<http://anthropology.uoregon.edu>
Josh Snodgrass, Department Head

308 Condon Hall
 541-346-4823

Anthropology, the study of humans, includes sociocultural anthropology, biological anthropology, and archaeology. Courses offered by the Department of Anthropology span the natural sciences, social sciences, and humanities and provide a broad understanding of human nature and society for students in other fields and for anthropology majors.

The broad perspective on human culture and biology that anthropology offers can enhance studies in many other fields, including history, psychology, international studies, environmental studies, ecology and evolution, geography, earth system science, literature, political science, folklore and public culture, language study, art history, and public policy and management.

Faculty

Scott A. Blumenthal, assistant professor, (paleoanthropology, biological anthropology, archaeology). BA, 2008, Illinois, Urbana-Champaign; PhD, 2015, City University of New York. (2018)

Alison K. Carter, assistant professor (archaeology). BA, 2001, Oberlin College; MS, 2007, PhD, 2013, Wisconsin, Madison. (2017)

L. Zachary DuBois, assistant professor (biocultural anthropology, gender and LGBT experience, stress and social determinants of health). BA, 2002, PhD, 2012, Massachusetts, Amherst. (2018)

Stephen Dueppen, associate professor (archaeology). BA, 1999, California, San Diego; MA, 2004, PhD, 2008, Michigan. (2012)

Maria Fernanda Escallón, assistant professor (sociocultural anthropology, cultural heritage). BA, 2003, MA, 2004, Los Andes; MA, 2009, PhD, 2016, Stanford. (2016)

Scott M. Fitzpatrick, professor; associate director, Museum of Natural and Cultural History. (island and coastal archaeology, Pacific, Caribbean) BA, 1994, Eastern Washington; MA, 1996, Montana; PhD, 2003, Oregon. (2012)

Stephen R. Frost, professor (human-primate evolution and paleontology, morphometrics, Africa). BA, 1994, California State, Long Beach; PhD, 2001, City University of New York, City College. (2004)

Lamia Karim, associate professor (cultural anthropology). BA, 1984, Brandeis; MA, 1993, Michigan; PhD, 2001 Rice. (2003)

Gyoung-Ah Lee, associate professor (paleoethnobotany, archaeology, East Asia); director, graduate studies. BA, 1992, Seoul National; MSc, 1997, PhD, 2003, Toronto. (2007)

Leah Lowthorp, assistant professor (cultural anthropologist, folklorist, critical heritage). BA, 2003, California, Berkeley; MA, 2005, Pennsylvania; MA, 2007, Institut Européen des Hautes Etudes Internationales; PhD, 2013, Pennsylvania. (2018)

Johanna Bard Richlin, assistant professor (religion, migration, and affect; U.S., Brazil, Europe) BA, 2008 Wesleyan University; M.T.S. 2010 Harvard Divinity School; MA, 2012, PhD, 2016, Stanford University. (2018)

Michelle Scalise Sugiyama, associate teaching professor, BA, 1985, San Diego State, MA, 1988, PhD, 1997 California Santa Barbara. (2015)

Philip W. Scher, professor (Caribbean, politics of culture, transnationalism); divisional dean, social sciences, College of Arts and Sciences. BA, 1987, Brown; MS, 1991, PhD, 1997, Pennsylvania. (2002)

J. Josh Snodgrass, professor (human biology, human nutrition and energetics, skeletal biology); associate vice provost, undergraduate education and student success. BA, 1995, California, Santa Cruz; MA, 1998, Florida; PhD, 2004, Northwestern. (2005)

Lynn Stephen, professor, Philip H. Knight Chair. (ethnicity and political economies, gender, U.S. Latinos and Latin America); BA, 1979, Carleton; PhD, 1987, Brandeis. (1998)

Kirstin Sterner, associate professor (molecular anthropology). BA, 2001, MA, 2005, PhD, 2009, New York. (2011)

Lawrence S. Sugiyama, professor (evolutionary psychology, behavioral ecology, biocultural anthropology). BA, 1985, MA, 1991, PhD, 1996, California, Santa Barbara. (1996)

Nelson Ting, associate professor (molecular anthropology, primate genetics, ecology, conservation Africa); director, undergraduate studies. BA, 1999, Washington (St. Louis); MA, 2001, Missouri, Columbia; PhD, 2008, City University of New York. (2011)

Larry R. Ulibarri, instructor; BA, 2002, Northern Colorado; MA, 2006, PhD, 2013, Colorado, Boulder. (2019)

Frances J. White, professor (evolution of primate behavior, Africa); department head. BA, 1980, MA, 1984, Cambridge; PhD 1986, State University of New York, Stony Brook. (2001)

Emeriti

C. Melvin Aikens, professor emeritus. BA, 1960, Utah; MA, 1962, PhD, 1966, Chicago. (1968)

William S. Ayres, professor emeritus. BA, 1966, Wyoming; PhD, 1973, Tulane. (1976)

Aletta Biersack, professor emerita. BA, 1965, MA, 1969, 1972, PhD, 1980, Michigan. (1982)

Don E. Dumond, professor emeritus. BA, 1949, New Mexico; MA, 1957, Mexico City College; PhD, 1962, Oregon. (1962)

Jon M. Erlandson, professor emeritus. BA, 1980, MA, 1983, PhD, 1988, California, Santa Barbara. (1990)

John R. Lukacs, professor emeritus. BA, 1969, MA, 1970, Syracuse; PhD, 1977, Cornell. (1976)

Geraldine Moreno Black, professor emerita. BA, 1967, State University of New York, Buffalo; MA, 1970, Arizona; PhD, 1974, Florida. (1974)

Madonna L. Moss, professor emerita. BA, 1976, William and Mary; MA, 1982, PhD, 1989, California, Santa Barbara. (1990)

Theresa O'Neill, associate professor emerita. BA, 1981, Notre Dame; MA, 1985, PhD, 1992, Harvard. (1998)

Carol T. Silverman, professor emerita. BA, 1972, City University of New York, City College; MA, 1974, PhD, 1979, Pennsylvania. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Andrew Boehm, Museum of Natural and Cultural History

Thomas J. Connolly, Museum of Natural and Cultural History

Ann Craig, Museum of Natural and Cultural History

Edward Davis, Museum of Natural and Cultural History

Pamela E. Endzweig, Museum of Natural and Cultural History

Samantha Hopkins, Museum of Natural and Cultural History

Dennis L. Jenkins, Museum of Natural and Cultural History

Elizabeth Kallenbach, Museum of Natural and Cultural History

Jaime Kennedy, Museum of Natural and Cultural History

Jeanne McLaughlin, Museum of Natural and Cultural History

Patrick O'Grady, Museum of Natural and Cultural History

Gregory Retallack, Museum of Natural and Cultural History

Chris Ruiz, Museum of Natural and Cultural History

Undergraduate Programs

Major - Bachelor's Degree

- Anthropology (BA/BS) (p. 309)

Minors

- Anthropology (p. 312)
- Forensic Anthropology (p. 312)

Graduate Program

Major - Doctoral Degree

- Anthropology (PhD) (p. 313)

Anthropology (BA/BS)

At the UO's Department of Anthropology, you can learn about various cultures and populations, dig up fossils, study gorillas, hunt for ancient relics, and more. Pursue your specific interests through our three anthropological subfields: cultural anthropology, biological anthropology, and archaeology.

You will be taught by working anthropologists who study societies from the past and present in West Africa, East Africa, Latin America, North America, East Asia, South Asia, Southeast Asia, Oceania, and the Caribbean. Learn about the human species from ecological and evolutionary perspectives, and gain a deeper understanding of human biological variation and our relation to other animals. You can participate in field schools that travel across the world digging for artifacts, and go abroad to study international cultures.

Program's Admission Requirements

Please visit the program's website (<https://anthropology.uoregon.edu/undergrad-program/major/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Explain how Anthropology as a discipline examines what it means to be human through a holistic and integrative approach.
- Explain how knowledge is produced and how incorporation of diverse perspectives leads to broader understandings of the human experience.
- Evaluate the influence of genetic, ecological, and sociocultural factors on human biological and cultural variation in the past, present, and future.
- Evaluate how anthropology can help us to better understand the broad range of important issues that will require decision and policy making in the future.
- Demonstrate cross cultural awareness, cultural competency, and the importance of understanding different perspectives.

Anthropology Major Requirements

Courses used to fulfill major requirements must be taken for letter grades and passed with a C– or better. To ensure a liberal education, anthropology majors are strongly encouraged to limit their anthropology credits to 52. Majors contemplating graduate work are advised to complete two years of a second language. Statistics is desirable for those with interests in biological anthropology and archaeology.

Code	Title	Credits
Core Requirements		12
ANTH 145	Principles of Archaeology	
	or ANTH 15(World Archaeology	
ANTH 161	Introduction to Cultural Anthropology	
ANTH 270	Introduction to Biological Anthropology	
Breadth Requirements		12
One upper-division geographic area course in archaeology		
One course in cultural anthropology		
One course in biological anthropology		
Four upper-division anthropology courses in one area of concentration ¹		16
Two upper-division anthropology electives ²		8
Total Credits		48

- ¹ Areas of concentration: cultural anthropology, biological anthropology, archaeology.
ANTH 406, ANTH 408, ANTM 406, and ANTM 408, may not be used to fulfill Area of Concentration requirement.
Courses that may only be taken P/NP, e.g., ANTH 401, 403, and 405 do not count toward the fulfillment of major requirements.
- ² No more than 8 credits of independent study and 8 credits of eligible courses in other departments may be used to fulfill Anthropology electives requirement.

Additional Requirements

Students must complete at least 28 upper-division (300- or 400-level) credits - with a minimum of 12 credits at the 400-level.

Majors must meet with an anthropology advisor at least once a year.

Concentration in Archaeology

Code	Title	Credits
Four Upper Division Archaeology Courses ¹		16
ANTH 340	Fundamentals of Archaeology	

ANTH 341	Food Origins
ANTH 342	Archaeology of Egypt and Near East
ANTH 343	Pacific Islands Archaeology
ANTH 344	Oregon Archaeology
ANTH 345	Archaeology of East Asia
ANTH 373	Psychoactive Substances in Ancient Societies
ANTH 442	Northwest Coast Archaeology
ANTH 443	
ANTH 446	
ANTH 448	Gender and Archaeology
ANTH 449	Cultural Resource Management
ANTH 453	African Archaeology
ANTH 456	Peopling of the Americas
ANTH 471	Zooarchaeology: [Topic]
Total Credits 16	

¹ The following additional upper division Anthropology courses MAY NOT be used to fulfill this requirement: ANTH 406, ANTH 408, ANTM 406 & ANTM 408.

Students may complete a second or third area of concentration by taking 3 additional courses (12 credits) in that area of concentration. Please see a major advisor for details.

All courses must be graded, with a minimum grade of C-. Courses that may only be taken P/NP, e.g., ANTH 401, 403, 405, and 409 do not count toward the fulfillment of major requirements.

Concentration in Biological Anthropology

Code	Title	Credits
Four Upper Division Biological Courses ¹		16
ANTH 332	Human Attraction and Mating Strategies	
ANTH 349	Origins of Art	
ANTH 361	Human Evolution	
ANTH 362	Human Biological Variation	
ANTH 366	Human Osteology Laboratory	
ANTH 369	Human Growth and Development	
ANTH 375		
ANTH 376	Decoding Your Genome	
ANTH 459	Advanced Evolutionary Medicine	
ANTH 462	Primate Evolution	
ANTH 463	Primate Behavior	
ANTH 466		
ANTH 467	Paleoecology and Human Evolution	
ANTH 468		
ANTH 470	Statistical Analysis of Biological Anthropology	
ANTH 472	Primate Conservation Biology	
ANTH 473		
ANTH 479	Taphonomy: Bones, Bugs, and Burials	
ANTH 481	Principles of Evolutionary Psychology	

ANTH 487	Bioanthropology Methods
Total Credits 16	

¹ The following additional upper division Anthropology courses MAY NOT be used to fulfill this requirement: ANTH 406, ANTH 408, ANTM 406 & ANTM 408.

Students may complete a second or third area of concentration by taking 3 additional courses (12 credits) in that area of concentration. Please see a major advisor for details.

All courses must be graded, with a minimum grade of C-. Courses that may only be taken P/NP, e.g., ANTH 401, 403, 405, and 409 do not count toward the fulfillment of major requirements.

Concentration in Cultural Anthropology

Code	Title	Credits
Four Upper Division Cultural Anthropology Courses ¹		16
ANTH 311	Anthropology of Globalization	
ANTH 315	Gender, Folklore, Inequality	
ANTH 320	Native North Americans	
ANTH 322	Anthropology of the United States	
ANTH 326		
ANTH 329	Immigration and Farmworkers	
ANTH 330	Hunters and Gatherers	
ANTH 331	Cultures of India and South Asia	
ANTH 365	Food and Culture	
ANTH 411		
ANTH 413		
ANTH 415		
ANTH 420	Culture, Illness, and Healing	
ANTH 427M	Latino Roots I	
ANTH 428M	Latino Roots II	
ANTH 429		
ANTH 434	Indigenous Peoples of South America	
ANTH 438	Race and Gender in Latin America	
Total Credits 16		

¹ The following additional upper division Anthropology courses MAY NOT be used to fulfill this requirement: ANTH 406, ANTH 408, ANTM 406 & ANTM 408.

Students may complete a second or third area of concentration by taking 3 additional courses (12 credits) in that area of concentration. Please see a major advisor for details.

All courses must be graded, with a minimum grade of C-. Courses that may only be taken P/NP, e.g., ANTH 401, 403, 405, and 409 do not count toward the fulfillment of major requirements.

Honors

The Anthropology Honors Program is designed for outstanding Anthropology majors interested in independent exploration of a special topic of their own choosing under the guidance of a faculty member.

Students should identify an area of research interest during their junior years or earlier, and approach members of the faculty with whom they want to work. It is best if a student can take a class taught by the faculty member during the junior year (at the latest). Some faculty members require students to take a course from them before allowing students to work in their laboratories.

An honors thesis is expected to make a substantial and persuasive argument situated within, and contributing to, current critical debates while demonstrating exceptional verbal clarity and sophistication.

If you intend to pursue honors in Anthropology you will need to notify the Director of Undergraduate Studies, Professor Alison Carter via email, acarter4@uoregon.edu (undergradasu7@uoregon.edu), no later than the first term of your senior year.

Students must meet all requirements:

- Maintains at least a 3.75 GPA in Anthropology coursework
- Maintain a cumulative 3.50 overall GPA
- Submit an original undergraduate thesis written under the guidance of a departmental faculty member, who serves as thesis advisor.
- The final version of the thesis must be approved by the thesis advisor by Thursday of Week 10 of the term you are graduating.
- The thesis advisor should send an electronic copy of the final and approved Honors Thesis to asu5@uoregon.edu for departmental records.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Anthropology

An optional minor is included in this example. Please consult with an anthropology advisor concerning a plan that is best for you.

Course	Title	Credits	Milestones

Anthropology Minor

Anthropology is the study of humans, and our selection of courses are designed to have better understanding of human cultural and biological origins and diversity.

Minor Requirements

Code	Title	Credits
100- or 200-level anthropology course		4
300- or 400-level anthropology courses		12
400-level anthropology courses		4
Elective anthropology course at any level		4
Total Credits		24

The minor in anthropology complements a major in another discipline. Courses used to complete the minor must be chosen in consultation with an anthropology advisor. Of the 24 credits required in anthropology, 20 must be graded and passed with a C– or better.

Forensic Anthropology Minor

Forensic Anthropology is the study of human remains for medicolegal purposes, relying on facets of human anatomy, skeletal biology, human

behavior, taphonomy, and pathology. Forensics applies these sciences to the legal process. This minor in Forensics Anthropology is intended to complement a major in another discipline.

Minor in Forensic Anthropology

16 of the 24 credits used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

No more than 4 credits can be used to fulfill the minor requirements if taken and passed with a grade of D-, D, or D+.

No more than 4 credits can be used to fulfill the minor requirements if taken and passed with a grade of Pass.

Code	Title	Credits
Required Core Courses:		8
ANTH 270	Introduction to Biological Anthropology	
ANTH 176	Introduction to Forensic Anthropology	
Choose three courses from the following:		12
ANTH 366	Human Osteology Laboratory	
ANTH 376	Decoding Your Genome	
ANTH 473		
ANTH 474		
ANTH 475	Regarding Remains	
ANTH 479	Taphonomy: Bones, Bugs, and Burials	
Electives - Choose one course from the following: ¹		4
ANTH 145	Principles of Archaeology	
ANTH 471	Zooarchaeology: [Topic]	
Total Credits		24

¹ Students may also select an additional course from the second section to satisfy the electives section.

Anthropology (PhD)

The UO Department of Anthropology offers the Doctor of Philosophy (Ph.D.) degree with a concentration in one of three subfields: Archaeology (<https://anthropology.uoregon.edu/research/archaeology-2/>), Biological Anthropology (<https://anthropology.uoregon.edu/biological-anthropology/>), or Cultural Anthropology (<https://anthropology.uoregon.edu/cultural-anthropology/>). While graduate students choose one subfield on which to focus their studies, many follow an interdisciplinary path that bridges between subfields, as well as to different disciplines. This approach is encouraged in our department, which is distinctive in its commitment to the integration of the anthropological subfields via five Areas of Expertise and Focus. (<https://socialsciences.uoregon.edu/anthropology/research/inter/#five-areas-~:text=The%20Department%20of%20Anthropology%20is%20distinctive%20in%20its%20integration%20of%20the%20anthropological%20subfields%20via%20five%20areas%20of%20expertise%20and%20focus%3A>)

Students without a relevant Master's degree (i.e., a Master's degree in Anthropology or a closely related field) are admitted as *Conditional Doctoral Students* and first obtain an M.A. or M.S. in Anthropology in the departmental Master's program before transitioning into the Ph.D. program. Students with relevant Master's degrees are admitted as *Doctoral Students* directly into the Ph.D. program.

Department of Anthropology seeks after understanding of humans through the integration of three distinct yet complementary subfields – archaeology, biological anthropology, and cultural anthropology. We are dedicated to better understanding human cultural and biological origins and diversity through education and research. Under this mission, our graduate program prepares students to obtain a degree in a timely manner in preparation for an academic career or for a career as a professional anthropologist doing applied work. Specific learning outcomes are varied by subfields and courses, but we identify the following overlapping fundamentals:

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Gain comprehensive knowledge on intellectual history and theoretical frameworks in anthropology and related fields.
- Be engaged in understanding recent and historical developments in the world.
- Familiarize themselves with, practice, and experiment various anthropological/archaeological, ethnographic, field, and scientific methods.
- Utilize such learning in identifying their research topics and designing the ProJet.
- Develop concrete skills in professional writing and scholarly communications.
- Through their research, to bring anthropological perspectives to bear on the problems of current global societies, including ethics in research, decolonization, power-gender-economic imbalance, and impending environmental issues.
- Accumulate knowledge and prepare themselves for job markets of their preferred fields.

Anthropology Major Requirements

Admission to the doctoral program is contingent on the possession of a valid master's degree in anthropology from a recognized institution or on the completion of master's requirements and a thesis developed in the department. Those who do not hold master's degree at time of entry into the program complete a master's in passing (M.A. or M.S.) on the way to the Ph.D. Those who enter with a master's degree in another discipline are required to take the 3 anthropology core courses early in the program.

The UO Department of Anthropology offers the Doctor of Philosophy (Ph.D.) degree with a concentration in one of three subfields: Archaeology, Biological Anthropology, or Cultural Anthropology. Students are required to successfully complete a professional development seminar, 3 subfield specific core courses, and subfield specific research methods courses (see Table). In addition, students are expected to enroll in graduate level courses in anthropology and other relevant disciplines based on their individual interests, as well as Individualized Study (IS) Courses (e.g., ANTH 503 Thesis, ANTH 601 Research, ANTH 603 Dissertation, and ANTH 605 Special Problems).

In addition to required coursework, all students are required to successfully complete the following: comprehensive examinations covering special fields of concentration in anthropology in relation to their subfield(s); a demonstration of proficiency in a professional skill, language, or in professional writing (e.g., publication of a manuscript or submission of a major research proposal); a formal dissertation prospectus; and, a doctoral dissertation (see Table). The dissertation

should be based on original research, which ordinarily involves fieldwork or laboratory work, and should be written in a professional and publishable style appropriate to the subfield of specialization.

Code	Title	Credits
Requirements¹		
ANTH 615	Proseminar in Anthropology	4
3 Anthropology Core Courses:		15
ANTH 610	Experimental Course: [Topic] or ANTH 68(Basic Graduate Physical Anthropology)	
ANTH 681	Archaeology and Anthropology	
ANTH 689	Social Theory II	
Additional Required Coursework:		4-20
1 subfield specific research methods course (all students)		
3 statistics courses (Biological Anthropology students only)		
Additional Requirements (at least one of the following):		
professional skill		
language proficiency		
paper publication		
major research proposal		
Comprehensive Exams (which vary by subfield)		
Dissertation Prospectus		
Dissertation and Defense		
ANTH 603	Dissertation	18

¹ Formal requirements of time and credit are secondary, but no candidate is recommended for the degree until the minimum Division of Graduate Studies requirements for credits, residence, and study have been satisfied. For information about general requirements, see the Division of Graduate Studies section of this catalog. More information about programs in anthropology may be obtained from the department.

Museum of Natural and Cultural History

The Museum of Natural and Cultural History and its research division, the Oregon State Museum of Anthropology, provide opportunities for students to gain research experience through field projects and museum experience through the natural history museum's public programs. The rich resources of the state museum's collections are available to anthropology students, faculty members, and other qualified researchers.

Asian Studies

<http://asianstudies.uoregon.edu>

Luke Habberstad, Program Director

114 Friendly Hall

541-346-9780

lukehabb@uoregon.edu

The University of Oregon's Asian Studies Program is an interdisciplinary instructional component of the College of Arts and Sciences. The program emphasizes study in Asian languages, history, society and culture, art and literature, politics and economics. Established in 1942, the Asian Studies Program is one of the oldest interdisciplinary programs in the United States to focus on Asia.

The Asian Studies Program is administered by the Asian Studies Faculty Committee, composed of faculty members with Asian specializations in over a dozen discipline areas. Degree programs offered include B.A. and M.A. programs that emphasize East Asia (China, Japan, and Korea), South Asia (particularly India and Pakistan) and, to a more limited extent, Southeast Asia (particularly Indonesia, the Philippines, Thailand and Vietnam). The program is supported by a strong faculty and on-going research activities.

Asian Studies students are required to complete two years of language training in addition to a rigorous program of classes covering several disciplines and national traditions. Chinese and Japanese are taught through the fifth year and Korean through the fourth year through the Department of East Asian Languages and Literatures (EALL).

Program Affiliated Faculty

Ina Asim, history (China)

Alison Carter, anthropology (Southeast Asia)

Steven T. Brown, comparative literature (Japan)

Daniel Buck, geography, Asian studies (China, East Asia)

Kathie Carpenter, global studies (Southeast Asia)

Shankha Chakraborty, economics (South Asia)

Roy Chan, East Asian languages and literatures (China)

Rachel DiNitto, East Asian languages and literatures (Japan)

Maram Epstein, East Asian languages and literatures (China)

Tara Fickle, English (Asian American culture)

Scott Fitzpatrick, anthropology (Pacific islands)

Alisa D. Freedman, East Asian languages and literatures (Japan)

Andrew E. Goble, history (Japan)

Bryna Goodman, history (China)

Sangita Gopal, cinema studies (South Asia)

Alison Groppe, East Asian languages and literatures (Chinese culture)

Luke Habberstad, East Asian languages and literatures, religious studies (China)

Jeffrey E. Hanes, history (Japan)

Analise Heinz, history (China)

Kaori Idemaru, East Asian languages and literatures (Japan)

Zhuo Jing-Schmidt, East Asian languages and literatures (China)

Lamia Karim, anthropology (South Asia)

Masami Kawai, cinema studies (Asian American)

Asian Studies (BA)

The Asian studies program explores a dynamic region encompassing the second and third largest world economies, more than a quarter of the globe's population, and some of the oldest civilizations. This interdisciplinary major allows students to focus on Japan, China, Korea, or with an outside language study, pursue a special interdisciplinary minor in Southeast Asian or South Asian studies.

The wide-ranging curriculum draws from departments around the university, including courses in anthropology, art history, Chinese language and literature, dance, film, geography, history, international studies, Japanese language and literature, linguistics, Korean language and culture, political science, South Asian culture, and religious studies.

The major in Asian studies offers

- strong training in at least one Asian language (Chinese, Japanese, or Korean)
- knowledge of the histories and cultures of the societies in which that language is used
- a sense of how academic disciplines contribute to interdisciplinary study
- a knowledge of transnational Asia beyond the primary language and civilization focus listed above

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Exhibit broad knowledge and understanding of Asia as a transnational region, including its history, cultures, languages, politics, economics, societies, and diversity.
- Use multiple disciplinary approaches and perspectives to critically analyze, interpret, and contextualize major issues and themes in Asian cultures and societies.
- Demonstrate skills in effective written and oral communications, research, and inter-cultural competence that are relevant to a range of careers.
- Achieve intermediate language competence (2 years) in a major Asian language.

Students who have an overall grade point average (GPA) of 3.70 or higher and want to graduate with honors in Asian Studies write a 30- to 50-page thesis. A faculty advisor must be selected and a proposal must be approved by the advisor and the Asian Studies Program Director at least two terms before graduation. Students may apply as many as 4 credits in Research (401) or Thesis (403) to the appropriate block of the 48 credits required for the Asian Studies major. The thesis must address an international or cross-cultural topic relevant to Asian Studies, and it must make meaningful use of at least two sources in an Asian language.

Asian Studies Major Requirements

Students must complete 48 credits as specified below. As many as 8 of these credits may be taken pass/no pass; at least 40 of the 48 credits must be chosen at the 300 level or above. All other courses used to satisfy major requirements must be taken for letter grades and passed with grades of C– or better. Students should consult their advisors in planning programs of study.

Code	Title	Credits
Seminar		
ASIA 350	What Is Asia: Theoretical Debates	4
Subregional Interdisciplinary Focus ¹		
Six courses in the chosen subregion, if available; two courses must be in history, two in the social sciences, and two in the humanities; may include as many as 15 credits of upper-division Asian language courses related to the chosen subregion		24
Discipline or Thematic Focus		
Three courses in one discipline or theme ²		12
Regional Breadth		
Course in Asian studies outside chosen subregion; may include lower-division language courses of a second Asian language		4
Language Requirement		
Two years of Asian language related to the chosen subregion ³		

¹ Subregions: China, Japan, Korea, Southeast Asia, South Asia

² Disciplines or themes include but are not limited to film, food, literature, religion, pop culture, linguistics, or art. Discipline and thematic courses may be double-dipped from Interdisciplinary courses, but the major must include a minimum of 48 credits. Courses selected for the thematic area do not need to be taken within the declared subregional focus area. Courses selected for the thematic area cannot be language-based; linguistic and literature courses are acceptable.

³ Chinese and Japanese are taught through the fifth year in the Department of East Asian Languages and Literatures. Languages must be taken for letter grades and passed with grades of C– or better. Under special circumstances, students may demonstrate an equivalent competence by examination or by work in advanced language courses.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. This degree plan would grant a BA in Asian studies with a focus on Japan.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

Bachelor of Arts in Asian Studies

East Asian Studies Minor

The East Asian studies minor explores a dynamic region encompassing some of the largest world economies and some of the oldest civilizations. This minor allows students to focus on Japan, China, Korea, drawing on a wide-ranging curriculum with courses in anthropology, art history, Chinese language and literature, dance, film, geography, history, international studies, Japanese language and literature, linguistics, Korean language and culture, political science, and religious studies.

First- and second-year language courses cannot be used to satisfy requirements for the minor. All courses used to satisfy minor requirements must be taken for letter grades and passed with grades of C– or better.

East Asian Studies Minor

Code	Title	Credits
ASIA 350	What Is Asia: Theoretical Debates	4
Courses from at least two departments focused on East Asia		20
Two years of study in relevant Asian language or equivalent level of proficiency		
Total Credits		24

At least 12 of the 24 credits must be upper-division.

South Asian Studies Minor

The South Asian studies minor explores a dynamic region that includes some of the largest world economies and some of the oldest civilizations. This minor allows students to focus on India, Pakistan, Bangladesh, and Sri Lanka, drawing on a wide-ranging curriculum with courses in anthropology, art history, dance, film, geography, history, international studies, linguistics, music, political science, South Asian culture, and religious studies.

First- and second-year language courses cannot be used to satisfy requirements for the minor. All courses used to satisfy minor requirements must be taken for letter grades and passed with grades of C– or better.

South Asian Studies Minor Requirements

Code	Title	Credits
Courses in South Asia history		4
Course in South Asian history, religion, or philosophy		4
Course in contemporary South Asian issues		4
Course on South Asian media or culture		4
Courses with full or partial South Asia focus		8
Total Credits		24

At least 12 of the 24 credits must be upper division. Students must consult with one of the South Asia faculty members when determining courses to take.

In addition, students must either demonstrate first-year proficiency in any South Asian vernacular language or complete a ten-week term of study

or internship in South Asia, under the supervision of a member of the UO South Asia faculty.

Asian Studies (MA/MS)

<http://asianstudies.uoregon.edu>

The university offers an interdisciplinary program in East Asian Studies leading to the Master of Arts (MA) and master of science (MS) degree. The curriculum includes courses in anthropology, art history, Asian studies, Chinese language and literature, cinema studies, comparative literature, geography, history, international studies, Japanese language and literature, journalism, Korean language, linguistics, political science, religious studies, and sociology. Students who complete three years equivalent of Southeast and /or South Asia language study abroad or in other institutions may, with the support of an Asian Studies faculty advisor, construct a special concentration in Southeast and/or South Asian Studies. The program is administered by the Asian Studies Committee, which is composed of faculty members with Asian specializations.

A bachelor's degree is required for admission, and it is expected that applicants have some undergraduate preparation in courses relating to Asia. Students lacking adequate Asian language or disciplinary training must take appropriate preparatory courses, for which no graduate credits are earned.

Prior to registration, the Asian Studies Committee assigns each student an advisor, who helps the student develop an individual program. During the first year, the student should request that an Asian Studies graduate committee be formed to provide guidance throughout the second year of study and thesis preparation. Graduate students should meet with their advisors at least once a term.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Exhibit broad knowledge and understanding of the Asia region, including its history, cultures, languages, politics, economics, societies and diversities.
- Use multiple disciplinary approaches and transnational perspectives to critically analyze, interpret, and contextualize major issues and themes in Asian cultures and societies.
- Exhibit familiarity with the current academic literature on at least one of the issues or themes in LO 2.
- Exhibit proficiency in at least one research methodology (or approach such as literary or artistic criticism), in relation to issues or themes in LO 2.
- Demonstrate effective written and verbal communication skills.
- Demonstrate advanced language competence (3 years) in a major Asian language.

Students must complete 48 credits of graduate study, including at least 44 in Asia-related courses, and a final project. Graduate credit for language study may only be earned for work beyond the second-year level.

600-Level Courses. The Division of Graduate Studies requires that at least 9 credits in courses numbered 600–699 must be taken in residence.

Graded Courses. 24 of the total credits required must be earned at the University of Oregon for a letter grade. A minimum of 36 credits of course work and a minimum of 9 credits of Thesis (ASIA 503) is required. Credit for the thesis is given pass/no pass. In the final term, master's students

must register for at least 3 credits, at least 1 of which must be in Thesis (ASIA 503).

Final Project Options.

Two Seminar Papers Option. Students choosing this option submit two Asia-related papers written for graduate seminars or colloquiums and pass an examination based on the submitted papers in their final term. The examination committee will include two members of the Asian studies faculty proposed by the student and approved by the director.

Thesis Option. Students choosing this option are required to take a minimum of 9 credits of Thesis (ASIA 503) as part of the 48 credits required for the degree. Credit for the thesis is given a grade of pass/no pass at the completion of the thesis. Students form a two-member thesis committee in their second or third term. Thesis writers are expected to defend their theses in the second year. In the final term, master's students must register for at least 3 credits, at least 1 of which must be in Thesis (ASIA 503).

In some circumstances, and in consultation with advisors, students may petition the director to extend the defense date of their thesis or seminar paper for up to but no more than two academic terms.

Continuous Enrollment and On-Leave Status. Master's students are expected to maintain continuous enrollment for a minimum of 3 credits each term until all degree requirements have been completed, unless on-leave status has been approved.

Minimum GPA. Graduate students must maintain at least a 3.00 grade point average (GPA) in all graduate courses taken with a graded option.

Time Limit. All requirements for the master's degree must be completed within a seven-year time period.

Asian Studies Major: Area Studies Track

(Using the Two Seminar Papers Option as an Example)

Code	Title	Credits
ASIA 611		1
ASIA 612		3
Seminars or colloquia		8
Two courses in architecture, art history, literature, music, religious studies		8
Two courses in anthropology, economics, geography, international studies, political science		8
Two history courses		8
Two courses in a region other than the primary language and civilization focus ¹		8
ASIA 605	Reading and Conference: [Topic] (only if needed to complete credit requirement)	4
Total Credits		48

¹ (ASIA 611), (ASIA 612), and interdisciplinary courses may be used to satisfy this cross-regional awareness requirement.

Asian Studies Major: Disciplinary Track

(Using the Thesis Option as an Example)

Code	Title	Credits
Courses within the primary region of focus, drawn from two or more departments		16
Courses in primary discipline with at least one theory or methods course chosen in consultation with an advisor or the program director		12
Courses in region other than primary focus ¹		8
ASIA 503	Thesis	9
Additional course work		3
Total Credits		48

¹ (ASIA 611) and (ASIA 612) may be counted toward this cross-regional focus.

Academic courses are to be mutually agreed upon by an academic advisor and the program director. A list of Asia-related courses approved for inclusion in the Asian studies graduate curriculum is available from the program coordinator.

Students should also review the Division of Graduate Studies' regulations for information on the university's general master of arts degree requirements.

Asian Studies Graduate Specialization

Graduate Specialization in Asian Studies

The 16-credit graduate specialization in Asian studies is open to all UO graduate students except for MA students in the Asian Studies Program. This specialization enhances student education and future marketability in careers with nongovernmental or international organizations, the media, government service, education, or the academe.

Overview

In collaboration with faculty members, students achieve mastery in Asian studies by

- analyzing and critiquing primary and secondary sources related to Asia
- developing multiple disciplinary perspectives, sources, methods, and modes of analyses used in the study of Asia
- identifying major themes in Asian history, particularly historical continuities and critical junctures
- developing an advanced understanding of Asia's physical and political geography
- studying major topical issues relevant to modern Asia, which may include economic development, tropical diseases, environmental change, and globalization
- honing skills to critically analyze modern debates about Asia

Specialization Requirements

Code	Title	Credits
Core Seminars		
ASIA 611		1
ASIA 612		3
Breadth Requirement		

Three 4-credit courses ¹	12
Total Credits	16

¹ Must include more than one academic discipline and more than one Asian country. One course must be outside the student's focal academic division (e.g., humanities, social science). No more than two of the three courses may be substantially focused on the same Asian country.

To apply for the graduate specialization, fill out the Division of Graduate Studies form (<https://gradschool.uoregon.edu/sites/gradschool2.uoregon.edu/files/Specialization%20Declaration.pdf>)

The Division of Graduate Studies has general information (<http://gradschool.uoregon.edu/academic-programs/#specializations>) about graduate specializations campus-wide.

Black Studies

Charise Cheney, Department Head

104 Alder Building
5268 University of Oregon
Eugene, OR 97403-5268
541-346-0900
Fax: 541-346-0904

Born out of the Black freedom struggle of the 1960s and 1970s, Black studies is a political and an intellectual project, through which scholarly inquiry serves as a path to the empowerment and liberation of people of African descent socially, politically, and spiritually. The Black studies minor also honors centuries-long histories of Black thought, from pre-colonial, thriving African civilizations through the anti-slavery abolition movement to the prison abolition movement, from decades of Race Men to Black feminism and Black Queer studies, from the African continent to the Americas to the Caribbean and all throughout the Diaspora.

Black studies spans centuries, crosses oceans, and is shaped by multiple geographies and cultural practices. Students can immerse themselves in histories of African and African-descended people rooted in and routed through the Atlantic slave trade, colonialism, and imperialism across the Diaspora.

Black Studies Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits
Core Course:		4
ES 250	Introduction to Black Studies	
Lower Division - At least 12 credits from the following: ¹		12
ENG 241	Introduction to African American Literature	
HIST 250	African American History	
HIST 251	African American History	
Upper Division - At least 12 credits from the following: ²		12
ENG 360	African American Writers	
ES 310	Race and Popular Culture: [Topic]	
ES 352	Social Equity and Criminal Justice	

ES 360	Black Sexual Politics
ES 440	Race, Literature, and Culture: [Topic]
ES 450	Race and Incarceration
FR 312	French Survey of Francophone Literature
GLBL 345	African Contemporary Issues and Concerns
GLBL 415	The Global Story of Race
HIST 325	Precolonial Africa
HIST 326	Colonial and Postcolonial Africa
HIST 417	Society and Culture in Modern Africa: [Topic]
HIST 470	African American History to 1877: [Topic]
HIST 471	African American History since 1877: [Topic]
MUS 360	Hip-Hop History, Culture, Aesthetics
MUS 367	Survey of African Music
MUS 462	Popular Musics in the African Diaspora
PHIL 341	African Philosophy
PS 316	Black Lives Matter and American Democracy
Total Credits	28

¹ Following the successful completion of their gateway course and meeting with an advisor, students can decide if they want lower-division work in a combination of Anthropology, English, History, IRES, and WGSS lower-division courses.

² Consult with your advisor to discuss upper-division coursework.

Residency Requirements

20 of 28 credits must be taken in-residence, including all upper-division credits.

Economics

<http://economics.uoregon.edu>

Shankha Chakraborty, Department Head

175 Prince Lucien Campbell Hall
541-346-8845
economics@uoregon.edu

Economics addresses the problem of using scarce resources to satisfy society's unlimited wants. The discipline is divided into two general areas—microeconomics and macroeconomics. Microeconomics explores questions about the way society allocates resources; it applies to public policy in such areas as urban, industrial organization, and labor economics. Macroeconomics considers such questions as the causes of inflation and unemployment; it applies to such areas as monetary policy, development and international economics.

Faculty

Laura Bakkensen, Mikesell Professor in Environmental and Natural Resource Economics. BA, 2005, Whitman College; MSc, 2007, London School of Economics; MPhil, 2012, PhD, 2014, Yale (2024)

Bruce A. Blonigen, Philip H. Knight Professor (international trade, industrial organization, applied econometrics); Edward Maletis

Dean, Lundquist College of Business. BA, 1988, Gustavus Adolphus; MA, 1992, PhD, 1995, California, Davis. (1995)

Alfredo Burlando, associate professor (development, labor economics, industrial organization). BA, 2003, MA, 2003, California, Davis; PhD, 2010, Boston. (2010)

Jose Carreno-Garcia, assistant professor (macroeconomics). BA, 2012, Castilla-La Mancha; M.Phil, 2014, CEMFI; MA, 2016, PhD 2020, Northwestern. (2021)

Shankha Chakraborty, professor (growth and development, macroeconomics). BS, 1992, Presidency; MA, 1994, Delhi School of Economics; PhD, 1999, California, Los Angeles. (1999)

Mark Colas, assistant professor (labor and public). BA, 2009, California, Davis; MS, 2013, PhD, 2017, Wisconsin, Madison. (2017)

Anca D. Cristea, associate professor (international economics, industrial organization, applied econometrics). BA, 2003, Babes-Bolyai; MA, 2005, Clemson; PhD, 2010, Purdue, West Lafayette. (2010)

Jonathan M. V. Davis, assistant professor (applied microeconomics, labor economics). BA, 2009, PhD, 2016, Chicago. (2018)

Timothy A. Duy, assistant professor with title of professor of practice (macroeconomics, monetary policy, international finance); director, Oregon Economic Forum. BA, 1991, Puget Sound; MS, PhD, 1998, Oregon. (2002)

David Evans, associate professor (macroeconomics, computational economics, public finance). BS, 2008, Stanford; PhD, 2015, New York. (2015)

George W. Evans, professor (macroeconomics, econometrics); John Hamacher Chair in Economics. BA, 1972, Oxford; BA, 1974, MA, 1976, PhD, 1980, California, Berkeley. (1994)

Benjamin Hansen, W. E. Miner Professor in Economics (labor economics, public economics, econometrics); associate professor. BA, 2004, Brigham Young; MA, 2005, PhD, 2009, California, Santa Barbara. (2010)

Van Kolpin, professor (microeconomic theory, game theory, social choice theory). BA, 1982, Coe; MS, 1983, MA, 1984, PhD, 1986, Iowa. (1986)

Michael Kuhn, associate professor (behavioral economics, labor, public finance). BA, 2009, California, Los Angeles; PhD, 2014, California, San Diego. (2014)

Bruce McGough, professor (macroeconomics). BA, 1991, Reed; MS, 1993, PhD, 2000, Oregon. (2012)

Keaton Miller, associate professor (industrial organization, health economics, applied econometrics). BS, 2008, Wisconsin, Madison; PhD, 2015, Minnesota, Twin Cities. (2015)

Kathleen Mullen, associate professor and Petrone Chair in Economics (labor economics, public economics, economics of aging, disability, health & retirement). BA, 1999, Virginia; PhD, 2005, Chicago. (2022)

Jeremy M. Piger, professor (macroeconomics, econometrics). BA, 1996, Seattle Pacific; MA, 1998, PhD, 2000, Washington (Seattle). (2006)

Edward A. Rubin, assistant professor (environmental and energy, development economics, econometrics and data science). BS, 2007,

MS, 2013, Nebraska, Lincoln; MS, 2015, PhD, 2018, California, Berkeley. (2018)

Michael B. Urbancic, associate teaching professor (behavioral economics, experimental economics, economic history). BA, BA, BS, 2002, Arizona; MA, 2007, PhD, 2012, California, Berkeley. (2012)

Anne van den Nouweland, professor (game theory, microeconomic theory). BA, 1984, MA, 1989, Nijmegen; PhD, 1993, Tilburg. (1996)

Glen R. Waddell, professor (applied econometrics, industrial organization, labor economics). BS, 1995, Trent; MS, 1996, Miami; PhD, 2000, Purdue. (2001)

Woan Foong Wong, assistant professor (international economics, international trade). BA, BM, 2009, Oberlin; MS, 2013, PhD, 2017, Wisconsin, Madison. (2017)

Jiabin Wu, associate professor (evolutionary game theory, cultural transmission, behavioral economics). BA, 2008, Hong Kong; MS, 2010, PhD, 2014, Wisconsin, Madison. (2014)

Emeriti

Trudy Ann Cameron, professor emerita. BA, 1977, British Columbia; PhD, 1982, Princeton. (2001)

Christopher J. Ellis, professor emeritus. BA, 1978, Essex; MA, 1979, PhD, 1983, Warwick. (1983)

Jo Anna Gray, professor emerita. BA, 1971, Rockford; AM, 1973, PhD, 1976, Chicago. (1989)

William T. Harbaugh, professor emeritus. BS, 1983, MS, 1986, Montana State; PhD, 1995, Wisconsin, Madison. (1995)

Stephen E. Haynes, professor emeritus. BA, 1968, PhD, 1976, California, Santa Barbara. (1978)

Peter J. Lambert, professor emeritus. PhD, 1971, Oxford. (2002)

Joe A. Stone, professor emeritus. BA, 1970, Texas, El Paso; MA, 1974, PhD, 1977, Michigan State. (1979)

Mark A. Thoma, professor emeritus. BA, 1980, California State, Chico; PhD, 1985, Washington State. (1987)

Wesley W. Wilson, professor emeritus. BS, BA, 1980, North Dakota; MA, 1984, PhD, 1986, Washington State. (1989)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

- Economics (BA/BS) (p. 325)

Minor

- Economics (p. 327)

Graduate Programs

Major - Master's Degree

- Economics (MS) (p. 328)

Major - Doctoral Degree

- Economics (PhD) (p. 329)

Economics (BA/BS)

Do longer prison sentences lower crime rates? Does socialized medicine improve health outcomes? Do lower taxes pay for themselves? Economics affords the intellectual architecture needed to systematically address these types of questions. The economics discipline provides a rigorous framework for modeling how individuals and institutions make decisions, how these decisions shape our society, and how laws and policies can be designed to improve outcomes. This framework is implemented through advanced quantitative analysis, including statistical methods and data science, and can be used, quite simply, to change the world.

An economics degree indicates proficiency in data analysis, the modeling of behavioral patterns, the analysis of business practices, and the assessment of policy issues and challenges. Equipped with problem solving and analytical reasoning skills, undergraduate students in economics pursue careers in business, finance, data-science, law, government and many other paths, as well as advanced degrees in business, economics, law and public affairs. Economics majors also have the opportunity to complete a master's degree in economics (<https://economics.uoregon.edu/masters/>) in just one additional year following their undergraduate studies.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Be proficient in basic microeconomic and macroeconomic concepts.
- Be proficient in microeconomic analysis.
- Be proficient in macroeconomic analysis.
- Use economic data to examine empirical evidence of hypothesized relationships through statistical/econometric techniques.
- Apply the knowledge outlined in goals 1) through 4) to particular issues across various fields in economics.

Learning Outcome Explanations:

- Proficiency in basic microeconomic and macroeconomic concepts.
- Proficiency in microeconomic analysis. This builds on the microeconomic knowledge required in educational goal 1) and requires the ability to examine models of agents' decisions, including consumer utility maximization and firm profit maximization, using mathematical tools.
- Proficiency in macroeconomic analysis. This builds on the macroeconomic knowledge required in educational goal 1) and requires knowledge of theoretical models that explain fluctuations in output, employment, the price level, inflation, interest rates, and other macroeconomic variables, as well as the effect of monetary and fiscal policies on these macroeconomic outcomes.
- The ability to use economic data to examine empirical evidence of hypothesized relationships through basic statistical/econometric techniques.
- The ability to apply the knowledge outlined in goals 1) through 4) to particular issues across various fields in economics which may include, for example, environmental, international, labor, or urban economics.

Economics Major Requirements

Code	Title	Credits
EC 201Z & EC 202Z	Principles of Microeconomics and Principles of Macroeconomics ¹	8
MATH 241	Calculus for Business and Social Science I ¹	4
or MATH 251Z	Differential Calculus	
or MATH 261		
MATH 242	Calculus for Business and Social Science II ¹	4
or MATH 252Z	Integral Calculus	
or MATH 253Z	Calculus: Sequences and Series	
STAT 243Z	Elementary Statistics I ¹	4
or DSCI 102	Foundations of Data Science II	
or DSCI 345M	Probability and Statistics for Data Science	
or MATH 343	Statistical Models and Methods	
or MATH 345M	Probability and Statistics for Data Science	
or MATH 425	Statistical Methods I	
EC 311 & EC 313	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory ^{2,3,4}	8
EC 320 & EC 421	Introduction to Econometrics I and Introduction to Econometrics II ^{2,3}	8
or EC 423– 424	Econometrics	
Economics courses numbered 300 or above ^{3,5}		28
Total Credits		64

¹ Should be completed by the end of the sophomore year.

² Should be completed by the end of the junior year.

³ At least 28 of the 44 required upper-division credits required for the major (i.e., EC 311 Intermediate Microeconomic Theory, EC 313 Intermediate Macroeconomic Theory, EC 320 Introduction to Econometrics I, EC 421 Introduction to Econometrics II, and the 28 required field course credits) must be taken at the University of Oregon

⁴ Students cannot receive credit for both EC 311 and FIN 311.

⁵ At least 20 credits in courses numbered 400 or above. No more than 8 of the 28 credits may be in courses numbered 401, 404, 405, 407, 408 or CAS 417; no more than 2 credits in course numbered 407 may count toward the 8 of the 28 credits.

Grades of C– or better in courses taken to satisfy major requirements.

Courses Offered Pass/No Pass Only

Code	Title	Credits
EC 401	Research: [Topic]	1-21
EC 404	Internship	1-4
EC 405	Reading and Conference: [Topic]	1-21
EC 408	Workshop: [Topic]	1-21

EC 320 Introduction to Econometrics I (or EC 423 Econometrics) is a prerequisite for almost all 400-level courses. EC 311 Intermediate Microeconomic Theory and sometimes EC 313 Intermediate Macroeconomic Theory are as well. Because MATH 242 Calculus for Business and Social Science II and Elementary Statistics I (STAT 243Z) are prerequisites for EC 320 Introduction to Econometrics I, it is important

for students to take those courses early. See the course listings for details on prerequisites.

Departmental Honors

Qualified students may apply to graduate with honors in economics. Two requirements must be met:

- 1. Completion of upper-division economics courses with at least a 3.50 grade point average
- 2. Completion of a research paper, written under the guidance of a faculty member, for 4 credits in EC 401 Research: [Topic]. A copy of the completed paper, approved by the faculty advisor, must be presented to the department by Friday of the week before final examinations during the term the student plans to graduate

Students interested in honors also should consider taking EC 418 Economic Analysis of Community Issues I and EC 419 Economic Analysis of Community Issues II. Instructor approval is required for EC 418–419. Students who intend to satisfy these requirements should notify the director of undergraduate studies early in the term in which they intend to graduate.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Economics

Economics Minor

The Department of Economics offers a minor for students pursuing other majors. Undergraduate courses in Economics provide broad knowledge of the field as a part of the program of liberal arts education offered by the College of Arts and Sciences. They also lay a solid foundation in economics for students interested in professional graduate training in Economics or in careers in business, law, government, or journalism.

Economics Minor Requirements

Code	Title	Credits
EC 201Z	Principles of Microeconomics	4
EC 202Z	Principles of Macroeconomics	4
EC 311	Intermediate Microeconomic Theory	4
EC 313	Intermediate Macroeconomic Theory	4
Two additional upper-division 4-credit courses in economics		8
Total Credits		24

Two of the four upper-division 4-credit courses must be taken from the UO economics department. Minor requirements cannot be satisfied with EC 401 Research: [Topic], EC 404 Internship, EC 405 Reading and Conference: [Topic], EC 407 Seminar: [Topic], or EC 408 Workshop:

[Topic]. Courses applied to the economics minor must be completed with grades of C– or better.

Economics (MS)

The Department of Economics offers an intensive one-academic-year master's degree. Students gain applied skills in microeconomics, macroeconomics, and econometrics while specializing through elective courses. The program prepares students for consulting, applied research, and data science careers in private industry and government. The program also offers outstanding preparation for students interested in pursuing a PhD in economics.

The master's degree program consists of the following departmental requirements in addition to university and Division of Graduate Studies requirements. Each master's degree candidate chooses either the course work or the research option. The department also offers an Accelerated Master's Program for well-prepared undergraduate Economics majors in their senior year. Students may apply to the program in either their junior or senior year.

Credit Requirements

The course work option requires a minimum of 48 graduate credits. The research option requires a minimum of 45 graduate credits if the candidate writes a research paper or a minimum of 51 graduate credits if the candidate writes a thesis.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Exhibit mastery in basic microeconomic, macroeconomic, and econometric concepts. Students show proficiency in these areas through required course grades.
- Exhibit mastery of theoretical and empirical tools used in specific fields of microeconomics, macroeconomics, and econometrics. Students show proficiency with these tools through required course grades.
- Think critically, identify and answer policy questions, and demonstrate skills in these areas using quantitative methods in focused field classes. Students show proficiency with required course grades.

Economics Major Requirements

Code	Title	Credits
Core Courses		
EC 523–525	Econometrics ¹	12
EC 511	Advanced Microeconomic Theory ¹	4
EC 513	Advanced Macroeconomic Theory ¹	4
EC 512	Foundations of Economic Policy Analysis	4
Elective Economics Courses ²		
Option 1: Course work		24
Six elective courses taken at the 500 level.		
Option 2: Research		27
Four elective courses taken at the 500 level (16 credits) ³		
2 credits EC 601 (in term when developing research proposal)		

9 credits EC 503 (to complete thesis) in the following term

Total Credits 48 (coursework) or 51 (thesis)

- ¹ To be completed by the end of the first full academic year.
- ² PhD students who transfer to the master's program and who have completed the micro- and macroeconomics core courses (EC 607 Seminar: [Topic]) may apply those courses to master's degree requirements.
- ³ The research option is satisfied by completing a thesis. No more than 9 credits in EC 503 Thesis may be applied to the 51-credit minimum for the thesis.

The thesis, on a topic from the area of economics in which a 500-level field course was taken, must be approved by two department faculty members. The candidate's committee must have approved a prospectus developed as part of EC 601 and before the term in which the thesis is approved.

Courses taken to satisfy master's degree requirements must be taken for a grade, except for EC 503 Thesis, EC 601 Research: [Topic], and EC 605 Reading and Conference: [Topic]), which are only offered pass/no pass. Graded coursework must be completed with at least a 3.00 cumulative grade point average. To be eligible for the thesis option, student must have a 3.0 GPA or above before they can take 601 and must have a 3.0 after all coursework is complete to be eligible to take 503. A GPA below the level of 3.00 at any time during a graduate student's studies or the accumulation of more than 5 credits of N or F grades, regardless of GPA, is considered unsatisfactory and may lead to termination from the program.

Unless on-leave status has been approved, a student must attend the university continuously until all program requirements have been completed. The student must register for 3 graduate credits each term, excluding summer sessions, to be continuously enrolled. A minimum of 30 credits toward the master's degree must be taken in residence over a period of at least two terms.

Substitutions and Waivers

Substitutions of alternative courses or courses taken elsewhere require the joint approval of the master's program committee and the department head before they can be counted toward the credit minimum. Any other waivers or exceptions to departmental requirements require the approval of the department faculty.

Time Limits

Students who choose the course work option must complete all the master's degree requirements within three years. Students who choose the research option must complete all the master's degree requirements within five years.

DEGREE REQUIREMENTS

Students in the accelerated degree program must meet all degree requirements for both degrees.

A. Graded credit requirements:

Must the graduate-level courses taken while an undergraduate be taken for a letter grade and/or passed with a minimum grade to count toward the master's degree?

Yes, the graduate-level courses must be taken for a letter grade and passed with a minimum grade of “B” in order to count toward the master’s degree.

B. Shared credit hour allowance:

12 credits.

C. Which courses may count toward both the undergraduate and graduate degree, and what requirements will they fulfill for each degree?

Students in the AMPED may choose any three courses from the list of all 500 level courses offered in a given year, with the exception of EC 503, 511, 512, 513, 523, 524, and 525. The courses will count as upper-division electives for the bachelor’s degree, and as electives for the Master’s degree.

D. List all courses that may not be shared (i.e., must be taken as a graduate student):

EC 503, EC 511, EC 512, EC 513, EC 523, EC 524, EC 525

Culminating experiences (e.g., terminal project, capstone, etc.) may not be shared. An undergraduate thesis may not serve as a substitute for a master’s thesis. See guidelines for details.

SAMPLE PLANS OF STUDY

Provide a sample plan of study for both the undergraduate (senior year) and graduate portions of the program. If proposing more than one combination of majors, provide a sample plan of study for each.

Sample Program of Study – Senior Year

Fall Quarter: EC 421, University Requirement, EC 4xx

Winter Quarter: EC 4xx, EC 4xx, EC 5xx

Spring Quarter: EC 4xx, EC 5xx, EC 5xx

Sample Program of Study – Master’s Program

Fall Quarter: EC 523, EC 511, EC 5xx elective

Winter Quarter: EC 524, EC 513, EC 5xx elective

Spring Quarter: EC 525, EC 512, EC 5xx elective

Economics (PhD)

Graduate fields include macroeconomics; applied econometrics; game theory; economic growth and development; industrial organization; and international, labor, public, environmental, and behavioral-experimental economics. A detailed description of degree requirements may be obtained from the department website.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Exhibit mastery in core microeconomic, macroeconomic, and econometric concepts. Students show proficiency in graduate level foundations in economics through required course grades and qualifying exams.
- Exhibit mastery of the literature, empirical tools and theoretical models used in specific fields of microeconomics and

macroeconomics. Through choosing two specific fields in economics, and completing five additional electives, students show mastery of specific areas of economics in which they will pursue original research topics.

- Teach foundational, intermediate and field courses at the undergraduate level. By serving as graders, teaching assistants with sections, and instructors of record, our graduate students are prepared to develop and teach curriculum as tenure track professors.
- Identify and answer original research questions in microeconomics and/or macroeconomics. Through focused field classes, a third-year paper, and writing a dissertation, our students develop the ability to identify and conduct original research.
- Communicate original research, both written and verbal. By writing a field paper, and proposing, writing, and defending a dissertation, our graduate students develop the ability to communicate economic research both through their writing and orally.

Doctor of Philosophy

Degree Requirements

A PhD in economics prepares students to teach at liberal arts and research universities; to work in state, federal, and international organizations; and to conduct research or work as a consultant for private industry. Graduate students seeking the PhD degree in economics at the University of Oregon must complete the following departmental requirements as well as all university requirements. Except for EC 601 Research: [Topic], EC 603 Dissertation, EC 605 Reading and Conference: [Topic], and EC 606 Practicum: [Topic], economics courses must be taken for letter grades.

Code	Title	Credits
Core Coursework ¹		
EC 607	Seminar: [Topic] (Core Microeconomic Theory (Three Terms))	12
EC 607	Seminar: [Topic] (Core Macroeconomic Theory (Three Terms))	12
EC 607	Seminar: [Topic] (Core Econometrics (Three Terms))	12
Field and Breadth Courses ²		
EC 607	Seminar: [Topic] (two-term sequences)	16
EC 607	Seminar: [Topic] (five courses)	20
Research ³		
EC 601	Research: [Topic] (Field Paper)	3
EC 601	Research: [Topic] (Prospectus)	3
Dissertation ⁴		
EC 603	Dissertation	18
Total Credits		96

¹ Students who complete these courses with a GPA of 2.90 or higher will be invited to take the qualifying examination in microeconomic and macroeconomic theory when it is offered in early summer. Records of students whose GPA is lower than 2.90 are evaluated to determine eligibility for the qualifying examination. Students who fail the qualifying examination may be invited to retake it early the following September. Students who pass the qualifying examination but have a GPA less than 3.00 in econometrics must take a competency examination in econometrics, which is administered the Thursday before the first week of fall classes. Students who fail the competency examination must retake each econometrics course in which they received a grade of

less than B and pass it with a grade of B or better. Students must file an approved program of study by December 15 following the qualifying examination.

- ² Sequences in two fields of economics must be completed with a 3.00 GPA or better. Breadth courses must be taken outside the two chosen fields and completed with a 3.00 GPA or better. Credit for Research: [Topic] (EC 601), Dissertation (EC 603), Reading and Conference: [Topic] (EC 605), or Practicum: [Topic] (EC 606) cannot be counted toward the field or breadth requirements.
- ³ By the end of fall term of the third year, a research paper for at least 3 credits must be completed in one of the fields and approved by a faculty member with a specialty in that field. A student advances to candidacy after completing the above requirements, taking a minimum of 3 additional credits of EC 601 (Research), and orally defending a prospectus for the dissertation. Students must be enrolled for at least 3 credits during the term of advancement.
- ⁴ The dissertation must be a significant contribution to the field and must be completed in conjunction with at least 18 credits of Dissertation (EC 603). A formal, public defense must take place at a date set by the committee chair and approved by the Division of Graduate Studies.

Time Limits

The seven-year time limit for completion of PhD degree requirements begins with the first term of admission as a doctoral student at the university. Meeting the doctoral residency requirement, passing of comprehensive examinations for advancement to candidacy, and completion of the doctoral dissertation must all be accomplished within this seven-year limit.

Courses other than those described above and courses taken elsewhere may not be substituted without approval of the PhD program committee and the department head. In no instance can the qualifying examination be waived.

Students in the PhD program may apply to be awarded a master's degree upon completion of the master's program requirements and the approval of the master's program advisor.

Detailed information is given on the department's website.

Environmental Studies

<http://envs.uoregon.edu> 144 Columbia Hall
5223 University of Oregon
Eugene, OR 97403-5223
541-346-5064

Environmental Studies crosses the boundaries of traditional disciplines in the natural sciences, social sciences, humanities, management, policy, design, and law. It challenges students to look at the relationship between humans and their environment from new perspectives. The Environmental Studies Program is dedicated to gaining greater understanding of the natural world from an ecological perspective; devising policies and behaviors that address contemporary environmental problems; and promoting a rethinking of basic cultural premises, ways of structuring knowledge, and the root metaphors of contemporary society.

Faculty

With 22 core faculty from three colleges and 13 different departments, the Environmental Studies Program is doing exciting boundary-breaking interdisciplinary research and teaching related to the environment. In

addition, over 100 faculty from all UO colleges who have environmental expertise are affiliated with Environmental Studies as participating faculty. Profiles for core faculty and a list of participating faculty are on the Environmental Studies website.

Stacy Alaimo, professor (material ecocriticism, anthropocene feminisms, blue humanities).

Adell Amos, professor of law (water law, federal administrative law, environmental conflict resolution, and oregon water law and policy).

Lillian Aoki, assistant professor (coastal ecology, ecological resilience, ecosystem restoration).

Peg Boulay, teaching professor (environmental monitoring, wildlife conservation, outreach and education); co-director, environmental leadership.

Mark Carey, professor (glaciers, climate change, natural disasters).

Ashley Cordes, assistant professor (Indigenous studies, digital humanities)

Lauren Hallett, assistant professor (plant community and restoration ecology).

Leigh Johnson, associate professor (climate change and environmental risk, political ecology, finance, development studies, east Africa, labor, firefighting).

Stephanie LeMenager, professor (19th century american literary studies, environmental humanities, postmodern and contemporary literary studies).

Melissa Lucash, assistant professor (forest ecology, climate change, wildfire, spatial modeling, landscape ecology).

Kathryn Lynch, distinguished teaching professor (environmental education, environmental anthropology); co-director, environmental leadership.

Richard D. Margerum, associate professor (collaborative environmental management, conflict management in multistakeholder processes).

Erin Moore, associate professor (life-cycle environmental impacts), assistant director of environmental studies program.

Nicolae Morar, associate professor (applied ethics, recent continental philosophy, philosophy of biology)

Barbara Muraca, assistant professor (human-nature relationships, ecosystem services valuation, sustainability theory).

Alexandra Rempel, assistant professor (environmental design, passive heating and cooling), director of graduate studies.

Joshua J. Roering, associate professor (geomorphology, landscape evolution modeling).

Kory Russel, assistant professor (sustainable design; water, public health, and environment).

Emily Scott, assistant professor (art and the public sphere, critical approaches to the built environment, visual cultures of nature).

Lucas Silva, assistant professor (terrestrial ecology, biogeochemistry, biogeography).

Sarah Stapleton, associate professor (climate change education, science and environmental education, food and schools, participatory research).

Amanda Stasiewicz, assistant professor (human dimensions of wildfire, community and organizational adaptation to hazards, cooperative fire risk management, evacuation and alternatives to evacuation, forest and rangeland policy, qualitative and quantitative social science).

Sarah Wald, associate professor (race and ethnic studies, environmental humanities).

Peter A. Walker, professor (environmental politics, political ecology).

Marsha Weisiger, associate professor (environmental, native american, american west).

Richard York, associate professor (assessing anthropogenic driving forces of global environmental change); director, environmental studies program.

Emeritus

Scott D. Bridgman, professor (ecosystem ecology, climate change).

Trudy Ann Cameron, professor (environmental economics).

Alan Dickman, professor emeritus (forest ecology and management).

Matthew Dennis, professor (colonial and early national america, american cultural and environmental history, american indian history).

Patricia McDowell, professor (river management and restoration).

Ronald Mitchell, professor (environmental politics, international relations).

Undergraduate Programs

Majors - Bachelor's Degree

- Environmental Science (BA/BS) (p. 331)
- Environmental Studies (BA/BS) (p. 334)

Minors

- Environmental Humanities (p. 338)
- Environmental Studies (p. 338)

Graduate Programs

Major - Master's Degree

- Environmental Studies (MA/MS) (p. 339)

Major - Doctoral Degree

- Environmental Sciences, Studies, and Policy (PhD) (p. 340)

Certificate

- Environmental Humanities (p. 340)

Environmental Science (BA/BS)

Work alongside world-class scholars and researchers, develop concrete skills and analytical abilities, and gain real-world experience with the environmental science major. You will learn from an interdisciplinary approach to the natural sciences—including biology, geology, chemistry, physical geography, and data analysis—and gain an understanding of how social sciences, policy, humanities, and design inform our approaches to solving environmental issues.

The environmental science major is flexible, allowing you to tailor coursework to meet your specific educational and career goals. We also prioritize practical learning experiences where you will link theory to practice and build transferable skills through internships, research, and community involvement. This major is designed for students who want to focus on careers in fields such as conservation biology; pollution prevention and abatement; climate and the atmosphere; water resources; and ecosystem protection, restoration, and management.

Program's Admission Requirements

Please visit the program's website (<https://cas.uoregon.edu/envs/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Articulate the contributions from the social sciences, natural sciences, and humanities in understanding and addressing environmental issues.
- Discuss major root causes of environmental problems and avenues for addressing them.
- Discuss several key concepts within the field of environmental sciences (e.g., biodiversity and biological conservation, climate change, watershed health, water and nutrient cycles, energy flows), drawing on interdisciplinary perspectives.
- Demonstrate critical thinking and communication skills, including the ability to: a) Critically analyze environmental information, data and problems; b) Interpret scientific communication, including writing, figures, and tables; c) Synthesize diverse information sources; d) Communicate effectively through written and oral communication.

The Environmental Science major is customizable, allowing students to tailor their coursework to meet specific education and career goals. Students can concentrate on a focal area of their choosing and select from a variety of courses across scientific and other disciplines. The major requires a minimum of 112 credits including 60 upper-division credits. Except for ENVS 401-409, all courses applied to the major or minor must be graded, and a C- or better must be earned in all graded courses. As many as four upper-division courses may be used to fulfill the requirements of another major. Major requirements sheets containing detailed information about specific courses are available on the Environmental Studies website, in the Environmental Studies office, or by visiting an advisor in Tykeson Hall.

Environmental Science Major Requirements

The major requires a minimum of 112 credits including 60 upper-division credits. Upper-division credits may be earned through coursework or through a combination of coursework and an honors thesis. Sample course plans are available on the program's website. Major requirements sheets containing detailed information about specific courses that meet the major requirements are available in the program office, from

an environmental science advisor, or on the program website (<http://envs.uoregon.edu/undergrad/escifocus/>).

Courses used to fulfill the major requirements must be taken for letter grade and passed with a grade of C- or better.

Environmental Studies courses 401, 403, 404, 406, 408, and 409 with a mark of Pass (P or P*) can count toward the major requirements.

Code	Title	Credits
Area 1. Lower-Division ESCI Core		
ENVS 201	Introduction to Environmental Studies: Social Sciences	4
ENVS 203	Introduction to Environmental Studies: Humanities	4
Area 2. Math and Statistics		
MATH 246	Calculus for the Biological Sciences I or MATH 251Z Differential Calculus	4
MATH 247	Calculus for the Biological Sciences II or MATH 252Z Integral Calculus	4
	Approved statistics course	4
	Approved course in analytical approaches	4
Area 3A. Natural Science		
	Two lower-division introductory sequences in focal area	24
	Up to three approved lower-division introductory courses in nonfocal area ¹	12
	Six upper-division natural science courses in focal area (life sciences or earth and physical sciences)	24
	At least two upper-division courses in nonfocal area ¹	8
Area 3B. Upper-Division Soc Sci, Policy, Humanities and Design		
	Three courses from the areas of social science, policy, humanities, or design (no more than one course per area)	12
Area 4. Environmental Issues		
ENVS 411	Environmental Issues: [Topic]	4
	or ENVS 425 Environmental Education Theory and Practice	
	or ENVS 427 Environmental and Ecological Monitoring	
Area 5. Practical Learning Experience		
	Choose from one of several approved practical learning experience options. These include internships, participation in the Environmental Leadership Program, research experiences with UO faculty members, and honors thesis.	4
Total Credits		112

¹ Five courses total are required for nonfocal area.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Environmental Studies (BA/BS)

The environmental studies major provides students with opportunities to work alongside world-class scholars and researchers, develop concrete skills and analytical abilities, and gain hands-on experience solving environmental issues. The environmental studies major emphasizes an interdisciplinary approach to environmental topics that combines the natural sciences, social sciences, policy studies, sustainable design, and the humanities. The curriculum includes environmentally-related courses taught by more than 100 participating faculty from 30 campus programs and departments.

The environmental studies major is flexible, allowing you to tailor coursework with a focal point of your choice to meet specific educational and career goals. We prioritize practical learning experiences where you will link theory to practice and build transferable skills through internships, research, and community involvement. Our Environmental Leadership Program and a robust internship program offer capstone experiences for undergraduate students that provide training in teamwork, time management, communication, and problem solving skills that are increasingly valued in all careers.

Program's Admission Requirements

Please visit the program's website (<https://cas.uoregon.edu/envs/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Articulate the contributions from the social sciences, natural sciences, and humanities in understanding environmental issues.
- Articulate major root causes of environmental problems and avenues for addressing them.
- Discuss several key concepts within the field of environmental studies (e.g. sustainability, environmental justice, climate change, humans varied ways of understanding and representing nature, the relationship between nature and culture), drawing on interdisciplinary perspectives.
- Demonstrate critical thinking and communication skills, including the ability to: a) Critically analyze environmental information, data and problems; b) Interpret a variety of environmental writings; c) Synthesize diverse information sources; d) Communicate effectively through written and oral communication.

Environmental Studies Major Requirements

The Environmental Studies major is customizable, allowing students to tailor their coursework to meet specific education and career goals.

Students can concentrate on focal areas of their choosing and select from a variety of courses across disciplines, which provides students with a robust, well-rounded educational experience. The major requires a minimum of 92 credits including 56 upper-division credits. Except for ENVS 401-409, all courses applied to the major or minor must be graded, and a C- or better must be earned in all graded courses. As many as four upper-division courses may be used to fulfill the requirements of another major. Major requirements sheets containing detailed information about specific courses are available on the Environmental Studies website, in the Environmental Studies office, or by visiting an advisor in Tykeson Hall.

Environmental Studies Minor

The Environmental Studies Minor is strongly interdisciplinary, with a particular focus on social sciences, policy studies, environmental design, and the humanities, while also providing a foundation in the natural sciences.

Environmental Studies Minor

The Environmental Studies minor is customizable, allowing students to tailor their coursework to meet their specific education and career goals. Students can concentrate on a focal area of their choosing and select from a variety of courses across disciplines, which provides students with a robust, interdisciplinary educational experience. The minor requires a minimum of 32 credits. Except for ENVS 401-409, all courses applied to the minor must be graded, and a C- or better must be earned in all graded courses. As many as two upper-division courses from a students' major department may be used to fulfill the minor requirements. #Minor maps, which outline the requirements to earn a minor, are available on the ENVS website, in the Environmental Studies office, or by visiting an advisor in Tykeson Hall.

Code	Title	Credits
Required Courses		
ENVS 201	Introduction to Environmental Studies: Social Sciences	4
ENVS 202	Introduction to Environmental Studies: Natural Sciences	4
ENVS 203	Introduction to Environmental Studies: Humanities	4
Advanced Course Requirements		
One upper-division course from the Area 3A courses listed in the current ENVS major requirements		4
One upper-division course from the Area 3B courses listed in the current ENVS major requirements		4
Three courses from any of the following categories listed in the current ENVS major requirements		12
Area 3A - Natural Science		
Area 3B - Social Science, Policy, Humanities, and Sustainable Design and Practice		
Area 4 - Environmental Issues		
Area 5 - Practical Learning Experience		
Total Credits		32

Environmental Humanities Minor

The minor in environmental humanities (EH) complements environmental science and policy with a focus on cultural expression and analysis. EH is an interdisciplinary field of study, where students learn environmental history, storytelling, critical thinking, philosophy, and the arts. In EH, we understand that ecological well-being relies on cultural solutions as well as scientific and technical ones.

EH students can explore international approaches to sustainable living, including philosophies and lifeways of the global south and of Indigenous nations worldwide. EH embraces the arts as a means of storytelling and advocating for environmental health, and it embraces philosophy and history as means of better knowing where we are and how we might best live as humans in a changing climate. This is a minor that works well with

science and technology majors, to help students cultivate a broad cultural vision, imagination, and vocabulary for change.

Environmental Humanities Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits
ENVS 203	Introduction to Environmental Studies: Humanities	4
Electives ¹		
Lower Division Electives:		4

WGS 331	Science, Technology, and Gender	

WGS 432	Gender, Environment, and Development
Total Credits	24

¹ Undergraduate students must take 24 credit hours, 20 of which come from an approved list of electives (listed below). Students must take ENVS 203, Introduction to Environmental Studies: Humanities, for a maximum of 4 credit hours. No more than two courses for the Environmental Humanities minor may have the same subject code with the exception of ENVS, which can be two courses beyond the required ENVS 203.

All upper-division courses for the minor must be taken in residency at UO. Up to 4 lower-division credits may be taken elsewhere, with the approval of academic and career advisors in Tykeson Hall.

Environmental Studies (MA/MS)

Our master's program in Environmental Studies offers a unique opportunity to pursue interdisciplinary study of environmental topics and issues. Each student designs an individualized curriculum responsive to their educational and career goals. The degree typically takes two years to complete.

Students who succeed in our program typically are self-starters, have academic and/or work experience that has given them a foundation of skills and led them to specific goals for their graduate program, and are collaborative and like working with others.

Specific learning outcomes vary depending on individual course plans and courses, but we identify the items below as overlapping fundamentals for learning outcomes:

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Gain an interdisciplinary perspective of the fields of studies and how they can be used to address environmental research.
- Familiarize themselves with the research methods available within and across disciplines, and to acquire competent, demonstrable, and autonomous research skills in their specializations.
- Discuss a relevant body of scholarly literature fluently and to generate compelling research questions.
- Identify or develop, and to apply, rigorous research methods in an independent investigation of a problem of contemporary environmental importance.
- Develop concrete skills in professional writing and scholarly communications in order to present and disseminate research results in compelling, appropriate formats.
- Accumulate knowledge and prepare themselves for job markets of their preferred fields, such as by gaining experience and skills in pedagogy and teaching for Ph.D. students seeking academic careers.
- Be engaged in fostering communication and collaboration between departments, colleges, and the university as a whole.

Environmental Studies Requirements

Students who wish to obtain a master of arts degree instead of the master of science must demonstrate proficiency in a second language.

Code	Title	Credits

ENVS 632	Environmental Studies Research Methodology	
ENVS 633	Environmental Studies Thesis Development	
Concentration area course work ²		24
Electives		12
Thesis or terminal project ³		12
Total Credits		57

¹ First year.

² Graduate-level courses related to environmental studies in each of two 12-credit concentration areas.

³ Public defense or presentation required.

Environmental Sciences, Studies, and Policy (PhD)

The interdisciplinary PhD degree is offered by the Environmental Studies Program under the umbrella of the Joint-Campus Graduate Program in Environmental Sciences, Studies, and Policy, established by Oregon State University, Portland State University, and the University of Oregon.

The environmental sciences, studies, and policy program takes four or more years of study after earning the master's degree.

Admissions Procedure

Admission to the PhD program must be granted by the Environmental Studies Program and approved by the focal department—another University of Oregon academic unit, chosen by the applicant, that offers a PhD degree. Applications are reviewed independently by the admissions committee in the Environmental Studies Program and in the focal department. Both committees must approve the application before the applicant can be accepted into the program. The online application must be completed and submitted by December 1 for the following fall admission.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of core environmental studies knowledge and knowledge of specific disciplinary fields as relevant to their specific focal area (e.g. English-ENVS students will have mastery of core English field).
- Be proficient in interdisciplinary methods and approaches of environmental studies regarding research, analysis, and communication.
- Demonstrate independent scientific thinking and advancement of knowledge within the interdisciplinary environmental studies field.
- Demonstrate skills of professional engagement including oral and written communication (e.g. skills for conference presentations, journal publication, grant writing).
- Understand career practices and professional standards and responsibilities in environmental studies, including ethical issues with regard to research and publication.

Doctor of Philosophy Degree in Environmental Sciences, Studies, and Policy Requirements

Code	Title	Credits
Focal department course work ¹		
Environmental studies course work ²		32
Focal department assessment of competence ³		
Interdisciplinary assessment of competence ³		
Dissertation:		18
ENVS 603	Dissertation	

¹ Completion of graduate course work as established by the focal department, which includes basic graduate-level proficiency in research methods appropriate to the designated focal discipline.

² Courses taken in departments or programs outside the focal department. First-year students participate in a sequence of courses required of all incoming environmental studies graduate students.

³ The term "assessment of competence" is used in lieu of "comprehensive examination" in recognition of the different ways in which departments engage in such assessments.

PhD students must satisfy breadth and concentration requirements established by the Environmental Studies Program and the focal department. Working with an advisory committee, each student customizes a plan of action for completion of the degree.

Requirements may vary depending on the chosen focal department. In addition to the course work, candidates are required to complete and defend a written dissertation and receive approval of the dissertation by a committee chosen in accordance with Division of Graduate Studies regulations. The committee must have at least five members. The chair and two additional members must be from the focal department. At least three members of the committee must be participants in the Environmental Studies Program.

Graduate Courses

Graduate students typically choose courses that contribute to their individual environmental focus from the Departments of Anthropology; Architecture; Biology; Chemistry and Biochemistry; Earth Sciences; Economics; English; Geography; History; Landscape Architecture; Philosophy; Physics; Planning, Public Policy and Management; Political Science; Psychology; and Sociology; from the International Studies Program; from the School of Law; and others. Consult the individual department listings in this catalog for course descriptions.

Environmental Humanities Graduate Certificate

The field of the Environmental Humanities is inherently interdisciplinary, drawing on the humanities disciplines of history, literature, philosophy, art and architectural history, theater arts, and the humanistic social sciences (anthropology, historical and cultural geography, sociology). The purpose of this certificate is to encourage students to deepen and broaden their understanding of the Environmental Humanities by sampling from a variety of disciplines that focus on the interactions between humans and the natural environment. Students will gain a deeper understanding

of these interactions by studying the environment from a variety of humanistic perspectives.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Gain an interdisciplinary understanding of the Environmental Humanities, beyond the students' major discipline.
- Demonstrate an understanding of how other disciplines within the Environmental Humanities can illuminate one's own discipline through a public-facing creative project that brings together least two disciplinary perspectives on an issue or problem.
- Learn to translate humanities scholarship to general audiences through interdisciplinary, public-facing creative projects.
- Provide professional credentials for students interested in pursuing work in the Environmental Humanities.

Graduate Certificate in Environmental Humanities

The field of the Environmental Humanities is inherently interdisciplinary, drawing on the humanities disciplines of history, literature, philosophy, art and architectural history, theater arts, and the humanistic social sciences (anthropology, historical and cultural geography, sociology). The purpose of this certificate is to encourage students to deepen and broaden their understanding of the Environmental Humanities by sampling from a variety of disciplines that focus on the interactions between humans and the natural environment. Students will gain a deeper understanding of these interactions by studying the environment from a variety of humanistic perspectives.

ENVS 609	Terminal Project

- ¹ No more than two courses with the same subject code.
- ² One of these courses may be taken as part of the 24 credit hours of electives, subject to the limitation on more than two courses with the same subject code.
- ³ Up to 4 credit hours may be taken as part of the 24 credit hours of electives. This course is not subject to the limitation on more than two courses with the same subject code.

Graduate students must take 24 credit hours from an approved list of courses. No more than two of those courses may have the same subject code (with the exception of ENVS 609), and only one course can come from the Methods Elective courses list. All courses must be at the 500 level or above. There are no required courses. However, students must produce and successfully present a public-facing creative project that draws on two or more disciplines, in consultation with a project advisor from each discipline. Students may elect to take up to 4 credit hours of ENVS 609 Terminal Project as part of their required credit hours, in addition to up to two courses with the ENVS subject code.

16 hours must be earned "in residence" at UO.

European Studies

<https://europe.uoregon.edu>

Craig Parsons, Program Director

114 Friendly Hall

541-346-4402

Fax: cap@uoregon.edu

The Minor in European Studies allows undergraduates to incorporate, within any other major program, an increased international perspective in their work with a special focus on an understanding of Europe's identity and role in the world. See the requirements section of the web site for more information. Click here for an advising form.

Mission

The European Studies Program is a pedagogical community and research forum for students and scholars at the UO interested in Europe. This program combines the strengths of faculty in the humanities, social sciences, business, law and science to study the current developments in Europe. Our program distinguishes itself from other European Studies programs by its very broad interdisciplinary approach, combining not just the social sciences-principally history, geography, and political science-but other disciplines as well. Our attention to the contemporary situation is enriched by a deep sense of history extending back even to classical antiquity. We believe that in the European Union we have the opportunity to study the progress of a great social experiment in all its lived reality, and that our students will be able to consider the interaction of the full range of human forces coming to create 21st century Europe.

Minor in European Studies

To earn a minor, a student must complete 24 credits in addition to a paper or project on a European topic and two to three years of a European language other than English, as described below. Of the 24 credits of core and elective courses, a minimum of 16 credits must be upper division. Courses taken to fulfill the language requirement may not be used to fulfill the 24-credit requirement.

The courses that satisfy the minor are distributed as follows: two core courses, four elective courses, and two to three years of a European foreign language. Core and elective courses applied to the minor must be taken for letter grades and passed with grades of C– or better.

Code	Title	Credits

PS 475	Politics of the European Union	
Foreign Language Requirement		
Two to three years of a European foreign language ⁵		
Total Credits		24

¹ At least three of the six courses taken to satisfy core and elective course requirements must be taken outside the student's major. With the advisor's approval, exceptions can be made for double majors and for certain interdisciplinary majors, especially global studies and humanities.

² Sixteen of the 24 credits of core and elective courses must be at the upper-division level.

³ Courses preapproved are listed on the program website. Substitutions may be made only with the approval of the student's advisor. At least 4 credits of the humanities electives must be at the 400 level, and at least 4 credits of the social sciences electives must be at the 400 level.

⁴ At least one course must be a non-HIST course.

⁵ For BA students, at least three years of college study of a European language other than English is required. For BS students majoring in science, studying for a bachelor of architecture, or majoring in subjects outside the social sciences and humanities, two years of college-level study of a European language other than English is required.

Students seeking to qualify for a minor should, as early as possible, consult the program director, who will assign the student an advisor. Developing the plan for elective courses with the advisor's help ensures that the courses selected satisfy the minor requirements.

No later than two terms before graduation, the student must notify the advisor of intent to graduate for verification of European studies course work and transcript evaluation. The student must also indicate the European studies minor on the application for graduation. Students must

complete major requirements for an undergraduate degree in another department or school of the university.

Significant Paper or Project

A research paper on a topic appropriate to the student's interests is the final requirement. Many EURO minors complete this requirement in the Idea of Europe seminar. For students majoring in disciplines such as music, theater, or the fine arts, a project that draws on these crafts may be substituted for the research paper. The paper or project requirement may be satisfied by work done in the student's major, such as a seminar paper, as long as the content of the paper or project is focused primarily on Europe. The requirement may also be satisfied by a paper done for any of the courses listed below. Students who want to satisfy the requirement in this way must notify the instructor of their intention at the outset of the term so that the instructor can evaluate the paper with this intent in mind. The requirement may also be satisfied by a research paper done under the supervision of a professor in any field for 3 graded credits, such as a paper for Thesis (403). The instructor's agreement to supervise must be obtained in advance, and the 403 subject code may be either in that instructor's department or Thesis (EURO 403).

Food Studies

Food is central to human life. It is therefore no surprise that the research interests of faculty and students across a wide range of disciplines relate to food in some way. In the social sciences and humanities, for example, scholars examine issues including food access and affordability as well as the cultural significance and representation of food and agriculture. In the natural and applied sciences, researchers explore the biological and ecological dimensions of food systems and food-related health issues. For decades, scholars working in these various fields have highlighted important aspects of food's key position in the human experience over time and across space. Too often though, these streams of inquiry have stayed relatively isolated from one another.

The UO Food Studies Program developed out of a growing recognition that an integrated perspective on food matters is vital to developing fuller understandings of complex food-related issues. Food Studies brings the power of an interdisciplinary approach to widely varied food themes and topics. Such an approach is more than the sum of its disciplinary parts; it provides new insights into the ways in which food mediates social, political, environmental, cultural and economic processes.

Food Studies minors and graduate students are learning about and investigating both global and local food systems, sustainability, and the impacts of climate change on food. Students interact with programs and schools across (and beyond) the university, including the Law School,

School of Education, School of Business, the Native American and Indigenous Studies program, and Study Abroad offerings in Italy and Greece.

Food Studies Affiliated Faculty: foundational courses

Hannah Cutting-Jones, instructor (food studies, history of food, pacific history, colonialism, protein). BA, 1997; MA, 1998, Brown University; PhD, 2018, University of Auckland. hcutting@uoregon.edu

Michael Fakhri, professor (international economic law, commercial law, and food law). mfakhri@uoregon.edu

Julie Hessler, Associate Professor (20th-century Russia, Europe). BA, 1988, Yale; MA, 1989, PhD, 1996, Chicago. (1995) hessler@uoregon.edu

Mary K. Jaeger, professor (Latin literature, historiography, food in antiquity). BA, 1982, Gustavus Adolphus; MA, 1984, PhD, 1990, California, Berkeley. (1990) maryjaeg@uoregon.edu

Harper Keeler, instructor (civic agriculture, landscape biodynamics, urban farm director). BLA, 1995; MLA 2011, Oregon. (2010) hkeeler@uoregon.edu

Katie Lynch, professor (environmental anthropology, environmental education, ethnobotany). klynch@uoregon.edu

Galen Martin, teaching professor (environmental and cultural geography, global food security, Latin America). AA, 1977, Hesston College; BA, 1980, Goshen College; MA, 1985, Oregon; PhD, 2003, California, Davis. (1998) gmartin@uoregon.edu

Erin McKenna, professor (feminist theory, American pragmatism, food ethics). BA, 1987, Claremont McKenna College; MA, 1990, PhD, 1992, Purdue. (2016) emckenna@uoregon.edu

David Meek, assistant professor (food sovereignty, popular education, India and Brazil). BA, 2004, Bard College; MSc, 2007, Antioch, New England; PhD, 2014, Georgia. (2018) dmeek@uoregon.edu

Michelle Scalise Sugiyama, associate teaching professor, BA, 1985, San Diego State, MA, 1988, PhD, 1997 California Santa Barbara. (2015) mscalise@uoregon.edu

Sarah Stapleton, assistant professor (food and environmental justice, social contexts of science and environmental education). BA, 2001, Sweet Briar College; EdM, 2005, Harvard; PhD, 2015, Michigan State. (2015) sstaplet@uoregon.edu

Stephen R. Wooten, associate professor (local-global dynamics, food studies, Africa). BA, 1986, Massachusetts, Amherst; MA, 1993, PhD, 1997, Illinois, Urbana-Champaign. (1999) swooten@uoregon.edu

Undergraduate Program Minor

- Food Studies (p. 344)

Graduate Program Specialization

- Food Studies (p. 345)

Food Studies Minor

The minor in food studies gives students the opportunity to learn more about food and its central place in the human experience. Students take courses in a wide variety of disciplines, such as anthropology, history, environmental science, and human physiology. They also gain practical experience outside the classroom. Because food itself plays such a central role in the life and well-being of communities, the food studies minor promotes students' civic engagement.

Program's Admission Requirements

Please visit the program's website (<https://foodstudies.uoregon.edu/people/undergraduate-minor-in-food-studies/>).

Minor in Food Studies

Code	Title	Credits
Foundational Courses		
ENVS 225	Introduction to Food Studies	4
ANTH 220	Introduction to Nutritional Anthropology	4
or ANTH 248		
or HPHY 105	Principles of Nutrition	
HIST 215	Food in World History	4
or HUM 245		
or PHIL 220	Food Ethics	
Elective Courses		8
ANTH 110	Introduction to Traditional Ecological Knowledge	
ANTH 248		
ANTH 329	Immigration and Farmworkers	
ANTH 330	Hunters and Gatherers	
ANTH 341	Food Origins	
ANTH 365	Food and Culture

GLBL 425	Global Food Security	
LA 390	Urban Farm	
LA 429	Civic Agriculture	

SOC 416	Issues in Environmental Sociology: [Topic]
Total Credits	24

Additional Requirements

- The minor requires 24 graded credits (6 courses) from approved courses, at least twelve of which must be upper-division courses.
- Letter grades of C- or better must be earned in all courses applied to the minor.
- Students can count up to two upper-division courses from their major department.
- Students are required to take at least one 400-level course or capstone seminar.
- No more than three courses with the same subject heading will count for the minor (including ENV5).
- Food-related UO Study Abroad courses apply to the minor. Programs | Global Education Oregon (uoregon.edu) (<https://geo.uoregon.edu/programs/>)

Applicable courses are not limited to the ones shown here. Check the Food Studies website for a Tip Sheet each term: Undergraduate Minor in Food Studies | Food Studies Program (uoregon.edu) (<https://foodstudies.uoregon.edu/people/undergraduate-minor-in-food-studies/>)

Food Studies Graduate Specialization

Food is central to human life. It is therefore no surprise that the research interests of faculty and students across a wide range of disciplines relate to food in some way. In the social sciences and humanities, for example, scholars examine issues including food access and affordability as well as the cultural significance and representation of food and agriculture. In the natural and applied sciences, researchers explore the biological and ecological dimensions of food systems and food-related health issues. For decades, scholars working in these various fields have highlighted important aspects of food's key position in the human experience over time and across space. Too often though, these streams of inquiry have stayed relatively isolated from one another.

The UO Food Studies Program developed out of a growing recognition that an integrated perspective on food matters is vital to developing fuller understandings of complex food-related issues. Food Studies brings the power of an interdisciplinary approach to widely varied food themes and topics. Such an approach is more than the sum of its disciplinary parts; it provides new insights into the ways in which food mediates social, political, environmental, cultural and economic processes.

For questions about declaring this graduate specialization, please contact the GSL Graduate Coordinators at gslgradcood@uoregon.edu.

Graduate Specialization in Food Studies

This 18-credit interdisciplinary graduate specialization track is open to all UO graduate students. By combining the food studies specialization with their primary degree, students can enhance their education and future marketability. The specialization offers a coherent structure that allows students to develop a richer intellectual foundation than would be possible or practical outside the program. The specialization also is designed to enrich the qualifications of Master's and doctoral students, whether they have academic or community-based work aspirations.

General Social Sciences

<http://gss.uoregon.edu>

Leslie McLees, Program Director

175 Prince Lucien Campbell Hall

541-346-7772

gensocialsciences@uoregon.edu

General Social Sciences (GSS) is a multidisciplinary, undergraduate program that prepares students for success in an interconnected global environment. The GSS curriculum provides flexibility in both class schedules and coursework, allowing students to tailor their education according to their interests and to balance multiple academic or personal pursuits. Our program welcomes students of all identities and is committed to fostering a diverse and inclusive intellectual community.

Undergraduate Programs

Major - Bachelor's Degree

- General Social Sciences (BA/BS) (p. 345)

Minors

- Commerce and Society (p. 353)

General Social Sciences (BA/BS)

General social sciences is a multidisciplinary, undergraduate program that prepares students for success in an interconnected global environment. GSS majors learn how analyze social issues using research and critical thinking. They also develop innovative problem-solving skills, which are applicable towards professional fields like business, government, law, and education. The GSS curriculum provides flexibility in both class schedules and coursework. This allows students to tailor their educations according to their interests, and to balance multiple academic or personal pursuits in their lives.

Applied Economics, Business, and Society (p. 346)

This concentration combines technical training in business with the analytical training of the liberal arts. It draws heavily from courses in the business college and the economics department to offer specific business skills while exploring how business functions in society, on the national level, and in the global context. This concentration is designed specifically for students who plan to work in business or to pursue a master of business administration degree.

Crime, Law, and Society (p. 347)

This concentration provides broad exposure to problems that confront society on the causes and consequences of, and policies on, crime,

offering preparation for students with an interest in criminology, law practice, law enforcement, or social services.

Globalization, Environment, and Policy (p. 348)

This concentration focuses on broad social-political and environmental issues at the regional, national, and global levels, as well as the policy planning required to meet these issues within an interdisciplinary context. The globalization concentration provides training for students planning to work in green industry, government, NGOs, and environmental organizations. In addition, the concentration prepares students to earn graduate degrees in planning, public management, policy studies, or other applied social sciences with a global emphasis.

Social Studies Teaching (p. 349)

This concentration prepares students with the course requirements for admission to the graduate teacher licensure program at the University of Oregon—UO Teach. This concentration does not, in and of itself, lead to a teaching license; rather, it provides a well-defined content so that students are prepared to enroll in a graduate program to become licensed to teach social studies at the middle or high school level.

General social science majors are encouraged to consult with their advisors at least once a year to ensure their remaining course work is structured to meet all the requirements for the major. Students should notify the General Social Science Program office of their intention to graduate at least one term before the proposed graduation date.

General Social Sciences is a multidisciplinary, undergraduate program that prepares students for success in an interconnected global environment. GSS majors learn how to analyze social issues. GSS majors take courses on specific social topics from a variety of disciplinary perspectives. Students can also earn course credit for internships in their desired fields. The curriculum is divided into 4 distinct concentrations:

- Applied Economics, Business and Society (AEBS)
- Crime, Law, and Society (CLS)
- Globalization, Environment, and Policy (GEP)
- Social Science Teaching (SST)

Like many disciplines in the liberal arts, the General Social Sciences program (GSS) fosters the development of students as globally conscious equity-minded citizens and professionals.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Analyze and evaluate fundamental features of society, such as social conflict, inequalities, institutions, group relations, the experiences of individuals, and/or human interactions with the earth's natural environment.
- Synthesize, analyze, and assess the validity of qualitative, quantitative, and/or spatial data using social scientific methods.
- Construct an evidence-based argument.
- Describe how power, agency, and authority are constituted, disseminated, and exercised, including similarities and differences within and across groups, countries, and in the international arena.
- Appreciate and seek to understand myriad cultural, ethnic, gender, and socio-economic perspectives and experiences.
- Recognize and clearly articulate the career competencies they have developed as an undergraduate.

GSS majors take courses on specific social topics from a variety of disciplinary perspectives. Students can also earn course credit for internships in their desired fields. The curriculum is divided into 4 distinct concentrations:

- Applied Economics, Business, and Society (p. 346)
- Crime, Law, and Society (p. 347)
 - A GSS-CLS major will not be permitted to declare Criminology minor.
- Globalization, Environment, and Policy (p. 348)
- Social Science Teaching (p. 349)

Each concentration serves as a central focus for required and elective courses within the major. After declaring a concentration, students select courses from a wide range of social sciences departments as well as the university's professional schools (Business, Education, Journalism, and Planning and Public Policy Management).

Overlap Policy

GSS will accept three courses that overlap with each major and three courses that overlap with each minor. For additional information, meet with an advisor.

General Social Sciences Major - Applied Economics, Business, and Society

Code	Title	Credits
Preliminary Core		
BA 101Z	Introduction to Business	4
EC 201Z	Principles of Microeconomics	4
EC 202Z	Principles of Macroeconomics	4

Recommended Courses ³

¹ We recommend that students select one course from each of the two categories (European and world history).

² The remaining two courses must be taken exclusively in one area of concentration.
400-level courses from several areas of specialization are not listed below due to the significant number of prerequisites. However, you may take 400-level courses as substitutes for 300-level courses with approval from a General Social Science adviser

³ It is recommended (but not required) that students take one to three courses in Education Studies in preparation for teacher training. Recommended courses include EDST 111, and 420. Additional courses might include EDST 342, 343, 399, 451, 452, 453, 454, 455, 456, 457.

Additional Requirements

Students must complete 68 credits with a minimum of 40 upper division credits within the major.

At least 24 graded credits of major coursework must be completed in residence at the University of Oregon to qualify for a bachelor's degree in General Social Sciences.

Courses subject to change as UOTeach/Oregon/National Content standards change.

Courses cannot overlap between sections (i.e., section 1 & 2 or section 2 & 6, etc.).

Courses must be completed with a grade of C- or better. A maximum of one course with a grade of 'P' or 'P*' may be used.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in General Social Sciences

Course	Title	Credits	Milestones

Commerce and Society Minor

The buying and selling of goods and services shapes our lives every single day and connects us with people around the globe. The

Commerce and Society minor allows students to analyze how these daily transactions work and how they impact people, governments, and the environment.

Commerce and Society Minor Requirements

The buying and selling of goods and services shapes our lives every single day and connects us with people around the globe. The Commerce and Society minor allows students to analyze how these daily transactions work and how they impact people, governments, and the environment. Coursework for the minor encourages the examination of the relationship between commerce and issues such as climate change, social inequality, and globalization from a variety of social scientific perspectives.
The minor is a great option for:
Entrepreneurial and socially-conscious students interested in learning sustainable, equitable business practices.
Intellectually curious students who want to take courses from multiple different departments on campus like political science, global studies, business, and economics.
Independent students who want to tailor the minor to their schedule and their interests.

Code	Title	Credits
Preliminary Core:		12
PHIL 120	Ethics of Enterprise and Exchange	
GLBL 270	Globalization and the Global Economy (Globalization and the Global Economy (In workflow))

Total Credits		36

¹ The courses on this list do not have pre-requisites (except where noted). Students are encouraged to request approval of new upper-division courses from any department on related topics and courses that have pre-requisites (in cases where students have completed the required pre-reqs).

Students may take no more than 3 courses from the same subject code (includes both preliminary core and specialization courses). All courses must be taken for a letter grade and be passed with a C- or better. At least 16 credits must be upper-division courses. At least one course must be at the 400 level; it is recommended that students select a 400-level course from a subject code in which they have previously taken a course. Topics courses count toward the minor no matter what the topic.

The Commerce and Society minor is designed for students that are not majoring in GSS-Applied Economic, Business, and Society. A GSS-AEBS major will not be permitted to declare this minor in Commerce and Society.

Residency Requirements

At least 20 credits must be completed at the University of Oregon.

Geography

Dan Gavin, Department Head

107 Condon Hall
1251 University of Oregon
Eugene, OR 97403-1251
541-346-5787
dgavin@uoregon.edu

The Department of Geography at the University of Oregon is one of the top ten geography programs in the country. We feature faculty and students researching and teaching about cutting-edge important societal issues, such as racism, climate change, water resources, economic development, land use, conflict, migration, spatial data science, cartography, and more.

Students are encouraged to develop skills in communication, problem-solving, critical thinking, and data analysis as they explore subjects that ask them to think holistically about the systems that shape our planet. Our faculty help students see the amazing complexity that shapes our planet and our experiences within it. Our classrooms provide inclusive and engaged learning environments so that students find their own interests to explore, helping them make meaning and find their place in the world.

Faculty

Daniel P. Buck, associate professor (political economy, food geographies, East Asia). BA, 1987, California State, Chico; MA, 1996, PhD, 2002, California, Berkeley. (2008) See **Asian Studies**

Mark Carey, professor (environmental history, human geography, environmental justice, and science and technology studies). BA, 1991, State University of New York at Potsdam; MA, 1998, University of Montana, Missoula; PhD, 2005 University of California, Davis. (2010) See **Environmental Studies**

John Christian, assistant professor (glacier and ice-sheet dynamics, climate, earth-system models). BA, 2014, St. Olaf College; PhD, 2020 University of Washington. (2023)

Shaul E. Cohen, associate professor (political, environmental, cultural; Middle East). BA, 1983, Clark; MA, 1987, PhD, 1991, Chicago. (1996)

Carolyn Fish, assistant professor (geographic information system science, cartography). BS, 2008, Pennsylvania State; MS, 2010, Michigan State; PhD, 2018, Pennsylvania State. (2018)

Mark Fonstad, associate professor (geomorphology, remote sensing, hydrology). BA, 1995, Wisconsin, Madison; MA, 1997, Ohio; PhD, 2000, Arizona State. (2011)

Daniel G. Gavin, professor (biogeography, paleoecology, climate change). BA, 1992, Dartmouth College; MS, 1997, PhD, 2000, Washington (Seattle). (2006)

Leigh Johnson, assistant professor (political ecology, development, economic geography). BA, 2003, Columbia; PhD, 2011, California, Berkeley. (2016)

Nicholas P. Kohler, associate teaching professor (geographic information systems, cartography, human-environmental relations). BA, 1989, Princeton; MA, 1997, PhD, 2005, Oregon. (2006)

Melissa Lucash, assistant professor (forest ecology, climate change, wildfire, spatial modeling, landscape ecology). BS, 1993, MS, 1996, PhD 2005, Syracuse. (2020) See **Environmental Studies**

Leslie McLees, senior instructor/ug director (urban geography, urban agriculture, Africa); undergraduate advisor. BS, 1999, Washington State; MA, 2004, Hawaii, PhD, 2012, Oregon. (2014)

Katherine Meehan, associate professor (Water policy and governance; infrastructure and cities; science/policy interface; political ecology; Latin American science and technology studies). BA, 1999, MS 2005, PhD, 2010. (2010)

Laura Pulido, professor (critical ethnic studies, environmental justice, Chicano studies). See **Indigenous, Race, and Ethnic Studies**.

Xiaobo Su, professor (cultural politics, tourism and urban conservation, China). BArch, 2000, Southeast University (Nanjing); MSc, 2003, Sun Yat-sen University; PhD, 2007, National University of Singapore. (2007)

Peter A. Walker, professor (cultural and political ecology, US West, Africa). BA, 1986, California, Berkeley; MS, 1990, Harvard; PhD, 1997, California, Berkeley. (1997) See **Environmental Studies**

Emeriti

Patrick J. Bartlein, professor emeritus. BA, 1972, MS, 1975, PhD, 1978, Wisconsin, Madison. (1982)

Stanton A. Cook, professor emeritus. AB, 1951, Harvard; PhD, 1960, California, Berkeley. (1960)

Amy K. Lobben, professor emeritus. BA, 1991, MA, 1996, Georgia State; PhD, 1999, Michigan State. (2004)

W. Andrew Marcus, professor emeritus. BS, 1978, Stanford; MA, 1983, Arizona State; PhD, 1987, Colorado. (2001)

Patricia F. McDowell, professor emeritus. BA, 1971, MA, 1977, Illinois Institute of Technology; PhD, 1980, Wisconsin, Madison. (1982)

Alexander B. Murphy, professor emeritus. BA, 1977, Yale; JD, 1981, Columbia; PhD, 1987, Chicago. (1987)

Alvin W. Urquhart, professor emeritus. AB, 1953, MA, 1958, PhD, 1962, California, Berkeley. (1960)

Ronald Wixman, professor emeritus. BA, 1968, Hunter; MA, 1972, Columbia; PhD, 1978, Chicago. (1975)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Majors - Bachelor's Degree

- Geography (BA/BS) (p. 356)
- Spatial Data Science and Technology (BA/BS) (p. 359)

Minors

- Climate Studies (p. 362)
- Geography (p. 363)

Graduate Programs

Major - Master's Degree

- Geography (MA/MS) (p. 363)

Major - Doctoral Degree

- Geography (PhD) (p. 364)

Geography (BA/BS)

Home to a number of breathtaking geographic landforms, from the Cascade Range to the McKenzie and Rogue rivers, Oregon is the ideal place to study geography. But geography is more than mountains and rivers and maps. It's about how cultures and societies are affected by their natural surroundings and how people can enact change in the world. Geography is a way of looking at the world, understanding the dynamics between humans and the environment, and learning to use that information to make real change.

As a geography major, you'll come to understand how national and physical boundaries affect power and inequality; the significance of resource abundance and resource shortage for different people in different places; why particular regions contribute more to environmental issues than others; how climate change affects plants, animals, and water resources; how place defines who we are, how we act, and the choices we make; and much more. You'll learn how to use cutting edge spatial technologies that are in high demand in business, governments, and nonprofits around the world. Asking these questions and using these methods, you'll learn where positive change is taking place and how to be a part of it.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Recognize the diverse human and biophysical processes shaping places and spaces in the world around us.
- Apply quantitative and qualitative methods to spatial data to critically evaluate processes shaping places.
- Identify key geographic research questions and critically evaluate them in the context of the evidence presented.
- Communicate clearly and effectively about complex geographical topics using written, verbal, or graphic approaches.
- Identify and communicate the skills and competencies relevant to their potential career path.

An undergraduate major in geography follows a broadly based general degree program. Both bachelor of arts (BA) and bachelor of science (BS) degrees are offered in the department. To achieve depth in a particular subfield of geography, electives are chosen from one of six specializations:

1. environment, economy, and sustainability (p. 357)
2. water science and policy (p. 357)
3. culture, politics, and place (p. 357)

4. environmental systems (p. 357)
5. geographic information system science (p. 357)

Although a degree in geography is a liberal arts degree, many graduates have found related vocational opportunities in government or private employment, principally in planning, environmental research, cartography, or geographic information system science.

Geography Major Requirements

Code	Title	Credits
Fundamentals: Introductory Core		
GEOG 141	The Natural Environment	4
GEOG 142	The Human Planet	4
GEOG 181	Our Digital Earth	4

Spatial Data Science and Technology (BA/BS)

Spatial data is integrated in our everyday lives. From geotagging to geocaching to finding a place to enjoy some coffee, we are all integrated in a complex web of movement, place, and discovery. Spatial data science and technology is not a program about making maps—it's about asking relevant questions, harnessing data, and understanding the appropriate way to use it. It's not just about learning how to use software programs, but about how you can contribute to a new generation of digital technologies that represent a high-growth industry—one that is revolutionizing business, nonprofit, and government worlds alike. At the UO, faculty members use spatial technologies to focus on remote sensing

of river systems, climate change analysis, web-mapping, cartography, spatial cognition, spatial decision-making, and social equity.

This major is very flexible with four required courses in geography and computer science, and then eight electives that students can focus in their areas of interest. Our courses focus on geographic information systems science, cartography, remote sensing, spatial analysis, and spatial modeling.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Exhibit an understanding of the spatial and mathematical foundations of spatial data
- Be able to develop and utilize technology infrastructure and interface design in order to contribute to the development of geospatial technologies and analysis.
- Recognize the ethical implications of geospatial data and technologies, including individual-level location information sharing, inequalities that some geospatial technologies produce, and the role of geospatial technologies in humanitarian crises
- Apply geospatial data and technologies to collect and analyze information from real-world situations
- Develop the skills to interpret and effectively communicate findings of geospatial data analysis to a wide range of audiences

The spatial data science and technology major requires a minimum of 48 credits, drawing on courses in geography and computer information science. The major requires four compulsory courses (16 credits) that provide foundational skills, concepts, and critical thinking abilities. An additional eight elective courses (32 credits) are required. Upon declaring the major, students meet with the geography undergraduate advisor to tailor a series of elective courses best suited to individual student needs and employment aspirations. At least nine courses used for the major must be taken for a letter grade. A grade of C– or better and a GPA of 2.25 or better is required in courses applied to the major.

For more information, contact the Tykeson hall advising center at tykesonadvising@uoregon.edu, or email the Director of Undergraduate Studies, Leslie McLees here (geogadvr@uoregon.edu), or schedule an advising appointment at https://cas.uoregon.edu/advising/access-advising (https://cas.uoregon.edu/advising/access-advising/)

Spatial Data Science and Technology Major Requirements

Core courses provide foundational skills, concepts, and critical thinking abilities. Some of the introductory courses, such as GIScience I (GEOG 481), are prerequisites for more advanced courses. Students are not required to complete these before moving to elective courses (except where prerequisites are required).

Electives. Rather than adopting a series of specializations, the electives component will remain flexible. Upon declaring the major, students should meet with the undergraduate advisor to work out a series of courses that best fit student needs and employment aspirations. A full list of elective courses can be found on the major page (https://geography.uoregon.edu/sdst/) on the department website.

Code	Title	Credits
Core Courses		
GEOG 181	Our Digital Earth	4

DSCI 101	Foundations of Data Science I	4
or MATH 343	Statistical Models and Methods	
or MATH 425	Statistical Methods I	
or STAT 243Z	Elementary Statistics I

Climate Studies Minor

Climate change is the environmental challenge of our era, presenting risks to economic, cultural, and social structures at local, national and international scales. This interdisciplinary minor takes advantage of the University of Oregon’s strengths in the science of weather and climate, climate and environmental change, and the social context for these changes. The minor integrates studies and classes that draw on the strength of climate studies in geography—with supporting classes in environmental studies, earth sciences, and political science—to help students understand and respond to this crisis.

The minor provides an understanding the scientific principles that drive climate change, natural and human causes of climate change, and possibilities for climate action. In addition to the principles of climate science, elective courses engage students with the multiple dimensions of human-driven climate change, including climate modelling, climate impacts, mitigation, and adaptation. Students will investigate the societal drivers and ramifications of modern climate change through elective courses on environment and development, climate policy, and environmental justice.

Climate Studies Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

No more than three upper-division courses may count for both the minor and the Geography major.

Code	Title	Credits
Required Course Courses: ¹		
GEOG 141	The Natural Environment	4
GEOG 321	Climatology	4
GEOG 361	Global Environmental Change	4
Minimum two social science courses on impacts, policy, and adaptation: ²		8-12
GEOG 465	Environment and Development	
PS 367	Politics, Science, and Climate Change	
PS 477	International Environmental Politics	
ENVS 345	Environmental Ethics	
ENVS 350	Ecological Footprint of Energy Generation	
ENVS 435	Environmental Justice	
	or ENVS 535Environmental Justice	
PPPM 340	Climate Change Policy	
Science Electives: ³		4
GEOG 430	Long-Term Environmental Change	
Total Credits		24

¹ GEOG 321 and 361 can be taken in any order but must follow 141.
² Experimental Course: [Topic] (GEOG 410), (ENVS 400M),Experimental Course: [Topic] (EDST 410) and Experimental Course: [Topic] (SOC 410) courses approved individually.

³ One required if using two social-science electives. Experimental Course: [Topic] (GEOG 410) and (ENVS 400M) courses approved individually.

Geography Minor

The Geography minor provides breadth in human and biophysical geography and GIScience. This minor complements many other programs, including Geology, Environmental Studies and Science, Public Policy, Planning and Management, Anthropology, Computer Information Science, and more.

Geography Minor Requirements

At least 16 credits must be taken for a letter grade and 12 credits must be upper division. Grades of C– or better or P must be earned in all geography courses applied to the minor.

Code	Title	Credits
Upper-division GIScience course		4
GEOG 393	Data Driven Cartography

Total Credits	24

Geography (MA/MS)

The master's degree in geography (MA or MS) emphasizes broad understanding of physical and human geography and basic geographic techniques. Students develop specialized research skills during work on the thesis.

The master of arts degree requires second-year university-level proficiency in a second language. Competency may be demonstrated by a standardized test or with adequate undergraduate course work. Competency in a foreign language or a computer language may be used to meet the departmental language requirement for the master of science degree.

The master's degree option in geographic education is designed for teachers who have K–12 teaching licensure or are working toward their initial or continuing licensure. Most graduate students who take the geographic education option also have several years of teaching experience.

A committee of two geography faculty members supervises the research and writing of a master's thesis that shows evidence of original research and writing.

Program's Admission Requirements

Please visit the program's website (<https://socialsciences.uoregon.edu/geography/apply/graduate-admissions/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate breadth of knowledge across two or more subfields of geography and mastery within subfield of geography. Subfields here are defined as within biophysical geography (e.g., biogeography, climatology, or geomorphology), human geography (e.g., cultural, political, or human-environment relationships), or GIScience (e.g., remote sensing, data analysis and visualization, or map cognition).
- Identify and use geospatial techniques to analyze spatial data towards problem solving or modeling, critically analyze geographic problems, ask research questions, conduct literature reviews, understand methods, and conduct independent research and analysis.
- Conduct independent research and analysis and contribute substantial work.
- Demonstrate effective written, verbal, and graphic communication skills.
- Understand ethical issues and responsibilities especially in matters related to professionalism, data collection within the laboratory or field setting, and in writing and publishing theses and scientific papers.

Geography Major Requirements

Code	Title	Credits
Core Courses		16
GEOG 611	Theory and Practice of Geography I	

GEOG 612	Theory and Practice of Geography II	
GEOG 613	Research Design	
Select one of the following:		
GEOG 594	Spatial Analysis	
GEOG 595	Geographic Data Analysis	
GEOG 597	Qualitative Methods in Geography	
Breadth Requirement		12
Three upper-division courses, at least one in each subfield (Physical Geography, Human Geography, Spatial Data Science). The phrase “upper-division” means a 300-level class or higher. Breadth requirements may be satisfied by classes already taken from another institution. Examples include: ¹		
Spatial Data Science: GEOG 581, GEOG 582, GEOG 585, GEOG 586, GEOG 589, GEOG 590, GEOG 591, GEOG 592, GEOG 593		
Human Geography: GEOG 541, GEOG 542, GEOG 544, GEOG 545, GEOG 548, GEOG 561, GEOG 565, GEOG 568		
Physical Geography: GEOG 523, GEOG 525, GEOG 527, GEOG 530, GEOG 533		
Research Workshop		
GEOG 608	Workshop: [Topic] (each fall and spring term the student is enrolled) ²	4
Graduate Seminars		8
Completion of a minimum of two graduate seminars (GEOG 607) from different faculty members. Graduate seminars may not be substituted with seminars from other departments unless specifically approved by both the advisor and the DGS.		
Thesis		
GEOG 503	Thesis	9
Total Credits		49

¹ If 300- or 400-level courses, or courses from other institutions, are used to meet this requirement, graduate credit must be made up with additional graduate coursework (electives, 605s, or research in GEOG, or graduate courses in other units on campus).

² Students are expected to enroll in GEOG 608 every fall and spring while enrolled in the degree program.

Geography (PhD)

The PhD program requires competent understanding of one of the systematic fields of geography and a broad understanding of geographic topics that enables the student to address and synthesize problems that cross the various fields of geography. While this program is designed to suit each individual's background and interests, prospective candidates should pay attention to the systematic specialization and regional interests of the department's faculty members before applying for admission.

Program's Admission Requirements

Please visit the program's website (<https://socialsciences.uoregon.edu/geography/apply/graduate-admissions/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate breadth of knowledge across two or more fields of geography and mastery of a field of geography, including biophysical geography, human geography, or GIScience.
- Demonstrate independent scientific thinking and advanced knowledge in their field, including the ability to critically analyze geographic problems, ask research questions, conduct literature reviews, design methods.
- Conduct independent research and analysis and contribute original and substantive work.
- Demonstrate effective oral and written communication skills.
- Understand ethical issues and responsibilities especially in matters related to professionalism, including data collection with human subjects, within the laboratory and field setting and in writing and publishing theses and scientific papers.
- Become active in a variety of professional activities in their field such as submitting publications, presenting locally and at conferences, receiving funded fellowships, and contributing to professional association activities.

The candidate may use Research: [Topic] (GEOG 601) and Reading and Conference: [Topic] (GEOG 605) to follow specific interests with individual members of the faculty. The PhD program, planned with faculty committee approval, is measured by achievement of the stated goals rather than by any specific number of credits.

Geography Major Requirements

Code	Title	Credits
Core Courses		
GEOG 611	Theory and Practice of Geography I	4
GEOG 612	Theory and Practice of Geography II	4
GEOG 613	Research Design	4
Methods		
Select two of the following:		
GEOG 594	Spatial Analysis	
GEOG 595	Geographic Data Analysis	
GEOG 597	Qualitative Methods in Geography	
Breadth Requirement		
Four upper-division courses, at least one in each subfield (Physical Geography, Human Geography, Spatial Data Science) plus one additional course not in the student's area of specialization. The phrase “upper-division” means a 300-level class or higher. Breadth requirements may be satisfied by classes already taken from the UO or another institution before being admitted as a doctoral student. ¹		
Examples include: Spatial Data Science: GEOG 581, 582, 585, 586, 589, 590, 591, 592, 593 Human Geography: GEOG 541, 542, 544, 545, 548, 561, 565, 568 Physical Geography: GEOG 523, 525, 527, 530, 533		
Research Workshop		
GEOG 608	Workshop: [Topic] ²	
Graduate Seminars		
GEOG 607	Seminar: [Topic]	

Completion of a minimum of two graduate seminars (GEOG 607) from different faculty members. Graduate seminars may not be substituted with seminars from other departments unless specifically approved by both the advisor and the DGS.

Dissertation	18
Total minimum number of credits	81

¹ If 300- or 400-level courses, or courses from other institutions, are used to meet this requirement, graduate credit must be made up with additional graduate coursework (electives, 605s, or research in GEOG, or graduate courses in other units on campus).

² Students are expected to enroll in GEOG 608 every fall and spring while enrolled in the degree program.

PhD students must complete a preparation in fields of specialization requirement that entails completion of courses and seminars recommended by the advisor or committee members.

After completing the appropriate course work, graduate seminars, advancement to candidacy is achieved by passing a comprehensive written examination. The comprehensive exam is an opportunity to demonstrate that the student

- can articulate core areas of expertise and situate the student's overall research agenda in relation to these areas of expertise
- understands and can defend major theoretical and methodological issues in these core research and teaching areas
- has a sense of where those theories and methods stand in relation to major themes in contemporary and interdisciplinary scholarship

PhD students develop their own questions. These questions should focus on the three areas of expertise as identified in consultation between the student and advisor. At least three questions should be developed for each of the three areas. The committee may ask for more than three. At this point, the committee selects four examination questions. The committee may constrain, expand, or otherwise edit any of the student-written questions. The student has four weeks to write the responses (four to five pages to each question). Approximately one to three weeks after turning in the written responses, the student defends the responses orally. Please see the geography department's *Graduate Program Handbook* for additional details.

Within nine months of completing the comprehensive examination, the student must present a dissertation proposal for approval by the student's dissertation committee. The completed dissertation, the capstone of the doctoral program, presents the results of substantive and original research on a significant geographic problem. It is defended in a public oral presentation.

Global Studies

<http://cas.uoregon.edu/global-studies> (<http://cas.uoregon.edu/global-studies/>)

Yvonne Braun, Department Head

114 Friendly Hall
1161 E 13th Avenue, University of Oregon
Eugene, OR 97403
541-346-9780

Students who major in Global Studies learn interdisciplinary approaches to considering human wellbeing and development, and develop skills to understand complex social, cultural, political, economic, and environmental dynamics shaping contemporary issues in the world today from a critical perspective. Global Studies offers bachelor of arts (BA), bachelor of science (BS), and master of arts (MA) degrees in global studies and minors in global studies, global health, and global service, as well as a Peace Corps Prep Certificate. The programs are tailored to give students the theoretical tools to make sense of the fast-changing global arena; ensure the practical application of their research and learning; immerse them in the learning of language, history, and culture of a major world region; ensure they live, study, conduct research, or hold an internship that enhances their intercultural knowledge, understanding, and skills; and help them develop a professional concentration area suitable for their career goals. For the Global Studies undergraduate major programs, professional concentration and geographic focus options are listed in the Undergraduate section of the department page.

The Department of Global Studies is a member of the Association of Professional Schools of International Affairs and the International Studies Association. These associations provide more opportunities in research, internships, funding, and employment for global studies students. A degree in an interdisciplinary field such as Global Studies prepares graduates for many different career avenues. From media to politics, government, business, the non-profit sector, law, and education, Global Studies prepares students to step into the career of their dreams well-equipped with the necessary experience to be successful. Faculty

Aneesh Aneesh, professor (sociology, global studies). BA, 1987, University of Allahabad, Allahabad; MA, 1996, University of California, Irvine; PhD, 2001, Rutgers University, New Jersey. (2022)

Yvonne A. Braun, professor (gender and development, social change, Africa). BA, 1994, State University of New York, Geneseo; MA, 2000, PhD, 2005, California, Irvine. (2005)

Kathie Carpenter, professor (childhood, children's museums, Southeast Asia). BA, 1975, California, San Diego; MA, 1983, PhD, 1987, Stanford. (1989)

Dennis C. Galvan, professor (comparative politics, international development, Africa and Indonesia). BA, 1987, Stanford; MA, 1990, PhD, 1996, California, Berkeley. (2001)

Derrick Hindery, associate professor (environment and development, global economic restructuring, indigenous movements, Latin America). BA, 1994, MA, 1997, PhD, 2003, California, Los Angeles. (2007)

Galen Martin, teaching professor (environmental and cultural geography, global food security, Latin America). AA, 1977, Hesston College; BA, 1980, Goshen College; MA, 1985, Oregon; PhD, 2003, California, Davis. (1998)

David Meek, associate professor (food sovereignty, popular education, India and Brazil). BA, 2004, Bard College; MSc, 2007, Antioch, New England; PhD, 2014, Georgia. (2018)

Lesley Jo Weaver, associate professor (health disparities, race, India and Brazil). BA, 2004, Smith College; MPH 2008, PhD, 2014, Emory University. (2018)

Stephen R. Wooten, associate professor (local-global dynamics, food studies, Africa). BA, 1986, Massachusetts, Amherst; MA, 1993, PhD, 1997, Illinois, Urbana-Champaign. (1999)

Kristin Yarris, associate professor (global health, migration, Latin America). BA, 1994, Lewis and Clark College; MPH, MA, 2004, PhD, 2011, California, Los Angeles. (2012)

Emeritus

Gerald W. Fry, professor emeritus. BA, 1964, Stanford; MPA, 1966, Princeton; PhD, 1977, Stanford. (1981)

Anita M. Weiss, professor (gender and development, political Islam, South Asia). BA, 1975, Rutgers; MA, 1976, PhD, 1983, California, Berkeley. (1987)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Carlos Aguirre, history

Ina Asim, history

Oluwakemi Balogun, women's, gender, and sexuality studies

Diane B. Baxter, anthropology

Erin Beck, political science

Bruce A. Blonigen, economics

Lindsay F. Braun, history

Daniel P. Buck, geography

Alfredo Burlando, economics

Mark Carey, honors college

Shankha Chakraborty, economics

Liska Chan, landscape architecture

Shaul E. Cohen, geography

Rick Colby, religious studies

Jane K. Cramer, political science

Robert L. Davis, Romance languages

André Djiffack, Romance languages

Maram Epstein, East Asian languages and literatures

Michael Fakhri, law

John B. Foster, sociology

Alisa D. Freedman, East Asian languages and literatures

Pedro García-Caro, Latin American studies

Ibrahim J. Gassama, law

Bryna Goodman, history

Sangita Gopal, English

Jeffrey E. Hanes, history

Robert S. Haskett, history

Michael Hibbard, planning, public policy and management

David Hollenberg, religious studies

Zhuo Jing-Schmidt, East Asian languages and literatures

Lamia Karim, anthropology

Craig Kauffman, political science

Karrie Koesel, political science

Nicolas Larco, architecture

Jeffrey Magoto, Yamada Language Center

Gabriela Martinez, journalism and communication

Michelle McKinley, law

Karen McPherson, Romance languages

Ronald B. Mitchell, political science

Alexander B. Murphy, geography

Michael Malek Najjar, theater arts

Kevin Nute, architecture

Eileen M. Otis, sociology

Craig Parsons, political science

Doris L. Payne, linguistics

Eric W. Pederson, linguistics

Philip W. Scher, anthropology

Carol T. Silverman, anthropology

Lars Skalmes, political science

Alison Snyder, architecture

H. Leslie Steeves, journalism and communication

Lynn Stephen, anthropology

Jeffrey Stolle, management

Xiaobo Su, geography

Tuong Vu, political science

Peter A. Walker, geography

Janis C. Weeks, biology

Undergraduate Programs

Major - Bachelor's Degree

- Global Studies (BA/BS) (p. 367)

Minors

- Global Health (p. 379)
- Global Service (p. 380)
- Global Studies (p. 383)

Graduate Program

Major - Master's Degree

- Global Studies (MA) (p. 383)

Global Studies (BA/BS)

Formerly known as international studies, global studies is an interdisciplinary major. What this means is that students can tailor majors to their own specific interests. Global studies provides an excellent general education for students interested in the complex interrelationships (political, economic, social, and cultural) of our interdependent modern world. The program offers students tools to make sense of a fast-changing global arena; it ensures the practical application of their research; and it immerses them in the language, history, and culture of a major world region.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Critical Thinking:** Use analytical tools to examine global issues in the primary thematic areas of the department: international development, culture and globalization, gender and development, environmental sustainability, global health and well-being, and cross-cultural communication and understanding. Critically analyze the complex interrelationships that exist among first nations, nation states and between peoples, and civil society organizations and the environment throughout the interdependent modern world.
- **Critical Thinking:** Contrast methods of interdisciplinary social science research from qualitative ethnographic methods to quantitative survey instruments; use library databases to categorize relevant literature, appraise the strengths and weaknesses of academic arguments, use evidence to support arguments.
- **Critical Thinking:** Modify and apply a critical and well-grounded understanding of multiple worldviews and perspectives, experiences, power structures, and ethical and cultural positions in relation to contemporary global issues.
- **Content Knowledge:** Describe, explain and apply basic knowledge of the historic and contemporary role and effects of different actors in the global system (e.g., multilateral and bilateral organizations, development agencies, social movements, nation-states, civil society, business, and philanthropic and non-governmental organizations).
- **Content Knowledge:** Describe and discuss the history, culture, society, geography and political economy of a major world region, and its relations to global political economic processes.
- **Content Knowledge:** Describe, summarize and transfer basic knowledge of a professional concentration area onto a real-world career objective.

- **Content Knowledge:** Connect course content surrounding political systems, health, history, culture, economics, or education, to a set of intercultural experiences.
- **Communication:** Demonstrate receptive and productive proficiency in at least one language other than English.
- **Communication:** Convey complex information and ideas in written English that are clear, robust, carefully edited, well organized, and stylistically engaging and accessible.
- **Communication:** Interact with people from a diverse range of cultural, religious, ethnic, and national backgrounds in a way that is respectful and informed. Use knowledge and skills to develop and advocate for informed, appropriate action to solve complex problems in the human and natural worlds.

Global Studies Major Requirements

Code	Title	Credits
Preparatory Courses		8
GLBL 101	Introduction to Global Issues	
GLBL 102	Foundations for Intercultural Competence	
Block A: International Core Foundation		16
GLBL 230	Global Wellbeing	
GLBL 240	Perspectives on International Development	
GLBL 250	Value Systems in Cross-Cultural Perspective	
GLBL 270	Globalization and the Global Economy	
Block B: Professional Concentration Area		16
Either Internal Block B Option 1: Four upper-division courses (16 credits) in one of 4 areas of concentration or External Block B Option 2: four upper-division GLBL courses (16 credits) plus a minor/certificate in any other UO department. See professional concentration areas list and tables. Students are allowed to declare only ONE professional concentration area. ¹		
1) Internal Block B Option: Choose 1 of 4 Professional Concentration options. Earn 16 credits total: A) 1 or 2 required GLBL course(s) (4-8 credits); B) 2 or 3 electives (8 or 12 credits); C) All credits must be upper division.		
2) External Block B Option: A) Complete any minor or certificate in any other UO department; B) In addition, breadth requirement of 4 additional GLBL courses; C) If a GLBL course is counted towards the minor/certificate, it may also count among those 4.		
Block C: Geographic Focus		16
Four upper-division courses on one of the following areas: Africa, Europe, Southeast & East Asia, South & Central Asia, Latin America & Caribbean, Middle East, and North America; at least one of the four must have the GLBL subject code. See geographic focus areas list and tables. ²		
Total Credits		56

¹ Students may design their own professional concentration area if none of the predefined areas fits the student's professional goals. Students who choose this option must designate one of the core faculty members of the Department of Global Studies as an advisor and work with that individual in designing the concentration.

² As many as 4 credits in a third-year language sequence may be used to fulfill the geographic focus requirement. Appropriate courses should have significant course content on the region of study. Areas of focus

may include Africa, Europe, Latin America and the Caribbean, the Middle East, North America, South and Central Asia, and East and Southeast Asia. A North American geographic focus is only open to international students.

Additional Requirements

Courses must be passed with grades of C- or better to satisfy major requirements. In addition, three years' proficiency in a second language is required (see below for details).

Courses applied to the major, with the exception of the language requirement and up to 8 credits in Field Studies: [Topic] (GLBL 406) or Terminal Project (GLBL 409), must be taken for letter grades.

A maximum of 12 credits in courses taken to fulfill the university area requirements may be applied toward the global studies major.

A maximum of 20 credits in courses taken in a single department other than global studies may be applied toward the global studies major, exclusive of the language requirement and the External Block B Professional Concentration option.

For the most current information about courses and requirements, visit the department website.

Language Requirement

To satisfy this requirement, students must achieve proficiency in a second language at a level associated with three years of study. Proficiency in the language may be demonstrated by passing three terms of a 300-level language sequence with grades of mid-C or better, by an examination, or by graduating from a high school in which English was not the medium of instruction.

A student may also fulfill the language requirement with two years' proficiency in two different languages exclusive of the student's native language. Students wishing to pursue this option must get approval from the director of undergraduate studies faculty.

Intercultural Experience

The Global Studies Major requires a significant intercultural experience to fulfill the major requirements. An experience is *intercultural* when it involves direct engagement with people from a cultural group or subcultural group that is significantly different from the participant's own background.

To meet this requirement, experiences should provide the opportunity to:

- 1. Explore multiple worldviews and perspectives, experiences, power structures, and ethical and cultural positions in relation to contemporary global issues.
- 2. Connect course content surrounding political systems, health, history, culture, economics, environment, or education, to a set of intercultural experiences.

Interact with people from a diverse range of cultural, religious, ethnic, and national backgrounds in a way that is respectful and informed. Use knowledge and skills to develop and advocate for informed, appropriate action to solve complex problems in the human and natural worlds.

A sustained intercultural experience is a core component of our program. Students may fulfill this requirement via study or internship abroad, or via local intercultural engagement. Please consult with

your faculty advisor to tailor your plans for your personal academic and professional aims.

Option #1 - A credit-bearing intercultural experience consisting of at least 4 credits (e.g., GEO study abroad, GlobalWorks internship, or a credited research experience such as GLBL 406 or 409). This option does not need to be pre-approved by the Director of Undergraduate Studies.

Option #2 - A non-credit-bearing intercultural experience consisting of a minimum of 120 hours of engagement (e.g., internship with an organization). Prior to applying for or starting an experience for Option #2, students should first contact the Intercultural Experience coordinator for pre-approval, and provide a one-paragraph abstract detailing how they foresee the proposed opportunity will meet the criteria enumerated on the Department of Global Studies website.

Following completion of the experience, for verification, students will choose from:

- 8-10 page reflection paper
- Academic poster
- Multi-media product (blog, story map, program evaluation, project report etc).

Verification, which should address how the opportunity involved the above criteria, will be submitted to Intercultural Experience Coordinator (not the advisor) for approval.

Approved field experiences for the Global Health Minor (<https://ghprogram.uoregon.edu/>) may count toward the intercultural experience requirement.

Overlap Policy

- 16 credits can be overlap with another major
- 8 credits can be overlap with another minor

Block B: Professional Concentration Areas

- External Block B (p. 368)
- Internal Block B
 - Global Business, Technology, and Communication (p. 369)
 - Global Governance, Diplomacy and Human Rights (p. 369)
 - Global Wellbeing: Health, Food and Education (p. 370)
 - Sustainable Development and Environment (p. 371)

External Block B Option

- 1. Complete any minor or certificate in any other UO department;
- 2. In addition, breadth requirement of 4 additional INTL/GLBL courses;
- 3. If a INTL/GLBL course is counted towards the minor/certificate, it may also count among those 4.

Code	Title	Credits

Block C: Geographic Focus Areas

Choose 1 of the following 7 Geographic Focus options. Earn 16 credits total:

- A) 1 required GLBL course (4 credits)
- B) 2 or 3 electives (12 credits)
- C) All credits must be upper division.
- As many as 4 credits in a third-year language sequence may be used to fulfill the geographic focus requirement. Appropriate courses should have significant course content on the region of study. Areas of focus may include Africa, Europe, Latin America and the Caribbean, the Middle East, North America, South and Central Asia, and East and Southeast Asia. A North American geographic focus is only open to international students.
- Students may submit a substitution request to use one term (4.00 or 5.00 credits) of introductory (100 or 200-level) language for their geographic focus requirement, and, as long as it is confirmed as different from the language the student is using for their 3-year language requirement for the major, the substitution will be approved. Students seeking this exceptional substitution should discuss the matter with Global Connections Advisors in the Tykeson College & Career Advising unit.
- Africa (p. 372)
 - Europe (p. 373)
 - Southeast & East Asia (p. 374)
 - South & Central Asia (p. 375)
 - Latin America & Caribbean (p. 375)

- Middle East (p. 376)
- North America (p. 377)

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Global Studies

Below is an example of how to complete a BA in global studies with a diplomacy and international relations professional concentration and a Middle East geographic focus. Since the major offers 16 options for professional concentration areas and seven different geographic focus regions, with a wide variety of courses that can count toward each concentration, there are innumerable paths through the global studies major.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

Global Health Minor

Students in the Global Health program are exposed to diverse disciplinary approaches to research and practice in Global Health through core and elective coursework in the social and natural sciences and humanities. Students also complete a required global health field experience, internship, or practicum. More info on our website (<https://ghprogram.uoregon.edu/>).

Deviations from the requirements listed must be approved by a global health advisor.

Restrictions

- 24 Credits are required for the minor, with a minimum of 12 upper division credits
- A maximum of 12 credits in a single department (including major department) will count towards the Global Health minor. No more than 3 courses with the same subject heading.
- Twenty credits for the minor must be taken in residence
- All courses taken for the minor must be taken for a letter grade, with the exception of the Field Work Experience requirement
- Courses applying to the minor must be passed with a C- or above

No more than three courses (12 credits) from a single department (courses with the same subject code) may count toward the minor.

Global Service Minor

The Global Service Minor and the Peace Corps Prep program both guide students in adding a global, intercultural, service dimension to any major, while encouraging students to reflect on their place in the wider world and their own responsibilities as a global citizen. The requirements for the Global Service minor and the Peace Corps Prep Certificate are identical, and fulfilling requirements for one automatically fulfills requirements for the other. The application process is likewise identical for both, and students may choose to apply for one or both programs simultaneously.

The Global Service minor is a UO degree that, upon completion, will appear on University of Oregon transcripts. Peace Corps Prep is a certificate program for undergraduates awarded by the U.S. Peace Corps, and does not appear on the UO transcript. More info on our website (<https://globalservice.uoregon.edu/>).

In order to elect the Global Service minor, students apply at <https://blogs.uoregon.edu/globalservice/apply-for-global-service-minor/> and meet with the program director to select and approve their coursework and other requirements.

Students select a professional sector concentration and a world region concentration.

- The six sector concentrations are: *Youth in Development, Health, Environment, Community Economic Development, Education and Agriculture*

- The three world region concentrations are: Latin America, West Africa, World at large

All students complete four required core competencies and students who select Latin America or West Africa also complete a language competency.

- **Core competency 1: Professional Sector Concentration (12 credits)**

- **Core competency 2: Intercultural Competence (12 credits)**

- **Core competency 3: Practical experience (non-credit)**

- Students complete 50 hours practical experience related to their professional sector concentration. Site supervisor certifies satisfactory completion of hours and tasks.

- **Core competency 4: Professional and leadership development - 3 activities (non-credit)**

- Resume review/critique with UO Career Center or Faculty Mentor
- Attend a workshop on interview skills with the UO Career Center
- Develop and carry out a significant leadership experience and submit a 2-page reflection paper on it.

- **Core competency 5: Language proficiency (variable; up to 8 credits)**

- Latin America-focused students: Two 200-level Spanish courses or equivalent proficiency

- West Africa-focused students: One 200-level course in a Romance language, or equivalent proficiency

Recommended courses. Note that other courses may fulfill requirements - see advisor for suggestions and approvals.

Residency Requirements

12 credits must be taken in residence

Global Studies Minor

The Global Studies minor provides students with the opportunity to add a global perspective to any major, in addition to providing a solid grounding in intercultural communication and the foundations of global citizenship. Students can tailor coursework to their own professional and personal objectives, so the minor is a suitable complement to a BA or BS degree in any school or department. More info on our website (<https://cas.uoregon.edu/global-studies/undergraduate-programs/minor-requirements/>).

Global Studies Minor

Global studies minors must complete 24 international studies (subject code GLOBL) course credits, 12 of which must be upper division, with a grade of C– or better or P. Course selection is up to the individual student, but for advising purposes optional, nonrigid tracks are suggested for students coming from different majors, tracks that can especially complement particular career goals. Student may elect up to 12 lower-division credits, which share a common purpose of fostering critical and cross-cultural thinking as well as encouraging students to seek out and understand diverse perspectives and ways of approaching and communicating about current global issues. The 12 required upper-division credits allow a deeper investigation of issues, regions, and cultures and also hone skills in research, effective writing, and oral presentation to address rapidly changing and complex current and future issues.

Global Studies (MA)

Faculty and students in the Department of Global Studies integrate theory and praxis, drawing pragmatically from a variety of fields and perspectives in order to address rapidly changing and complex global issues. We offer an interdisciplinary MA degree in Global Studies for students who contemplate careers in global sustainable development, international education, global health, human rights, and related fields.

The MA degree program is tailored to meet the unique professional and academic interests of each student. In close consultation with a faculty advisor, the student develops a program that combines expertise in a specific professional concentration area with interdisciplinary training in Global Studies. A minimum of 56 credits must be completed for the degree.

Professional Concentration

In consultation with their faculty advisor, students identify and curate a professional concentration based on their interests, such as:

- education and development
- cross-cultural communication
- environment
- indigenous rights and sovereignty
- food and food systems
- gender and development
- global health
- international community development
- international education
- human rights and conflict resolution
- non-profit management
- public policy and planning

Concentrations in other professional areas can be arranged.

Graduates of the Department of Global Studies successfully secure careers in non-profit organizations, international non-governmental organizations, policy organizations, study abroad offices, public service, and higher education settings.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content knowledge in the field of Global Studies
- Demonstrate effective oral and written communication skills.
- Conduct independent research and analysis and contribute substantively in their field.
- Demonstrate knowledge of a professional concentration and/or a geographic focus, dependent on coursework and degree.
- Demonstrate a proficiency in a second language relevant to their professional or geographic focus.
- Understand ethical issues and responsibilities especially in matters related to professionalism, data collection and in writing and publishing theses and academic/policy papers.

Master of Arts Degree Requirements

Code	Title	Credits
Interdisciplinary Core		
GLBL 655	International Studies Graduate Core Seminar	4
Proseminar Series		
GLBL 656		1
GLBL 657	Proseminar: Proposal Writing	2
Professional Concentration Area ¹		
	Concentration area courses from relevant departments or professional schools ²	24
Geographic Focus		
	Courses in geographic focus area ³	12
Supervised Field Internship or Field Research		
	Internship or research experience related to student's career plans	12
Master of Arts Project		
	Thesis or capstone project	9
Total Credits		64

¹ Three of the four courses (12 credits) must have the GLBL subject code.

² Concentration areas are tailored to individual student interests. If students complete a geographic focus, students will complete 24 credits of professional concentration; if students don't do a geographic focus, students will complete 36 credits of professional concentration.

³ Geographic focus areas are Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia. Students may opt to not do a geographic focus and instead substitute an additional 12 credits in the professional concentration for the 12 credits of geographic focus. Students are encouraged to choose a geographic focus outside their home region.

Additional Requirements

Students must take a minimum of 24 graded credits in the professional concentration area. A maximum of 24 credits may be taken in any department other than global studies in order to allow an appropriate degree of specialization.

Language Study and Competence

Students must demonstrate a third-year level of proficiency in a second language relevant to their professional or geographic focus before completing the program. The University of Oregon offers formal courses in a number of European and non-European languages. Students also may study languages through self-instruction at the Yamada Language Center. International students whose high school or university instruction was not in English demonstrate proficiency in English as a second language through completion of the master's degree requirements. It is recommended that international students study a language from their geographic focus.

Supervised Field Internship or Field Research

The program assists students in locating internships or research opportunities and securing funding. All students may do their internship or research in the United States. Students are responsible for obtaining funding for the costs or for otherwise paying the costs in their entirety.

Many graduate students in the program have competed successfully for funding to support internship and research experiences.

The international studies faculty expects students to gain the following from the internship or research experience:

1. a reasonably in-depth experience in a culture other than the student's own
2. greater fluency in the language of the culture in which the internship or research takes place
3. knowledge and experience useful to the career goals of the intern

Master of Arts Project

Each student must prepare an MA thesis or other professional or research project. While most students complete an academic thesis based on primary or secondary research, many students elect to develop other types of MA projects, such as policy analyses, grant proposals, or documentary films. Students develop their thesis project in consultation with their primary GLBL faculty advisor and their MA committee. Nine credits are required for either a thesis or project.

History

<http://history.uoregon.edu>

Ryan Tucker Jones, Department Head

383 McKenzie Hall
541-346-4859
rtj@uoregon.edu

The study of history offers a framework for a liberal education and the background that is essential for understanding the contemporary world. Through analyzing interpretive studies, accounts by witnesses to past events, and historical records, students come to appreciate the complexity of human experience. By examining changes in the past, they develop a broad perspective and the ability to weigh evidence and argument.

Besides paving the way to careers in fields like government, law, journalism, and education, the study of history at the undergraduate or graduate level cultivates critical skills useful in all careers. The top occupations for the department's majors are: lawyers, teachers, management and administration professionals, marketers, public relations specialists, and fundraisers. One in four history majors will go on to careers in business and business management.

Faculty

Carlos Aguirre, Professor (Latin America). BA, 1986, Lima (Peru); MA, 1990, Peru; PhD, 1996, Minnesota. (1996)

Ina Asim, Associate Professor (Premodern China). MA, 1982, PhD, 1992, Dr. phil. habil., 2001, Wurzburg. (2002)

Steven Beda, Assistant Professor (20th-century United States, history of labor, environmental history). BA, 2002, Colorado, Boulder; MA, 2008, PhD, 2014, University of Washington (Seattle). ()

Lindsay F. Braun, Associate Professor (Africa). BS, 1994, Eastern Michigan; MA, 1997, Michigan State; PhD, 2008, Rutgers. (2009)

Jamie M. Bufalino, Instructor (Women and Gender in history). BA, 1997, MA, 2001, PhD, 2009, California, Riverside. (2012)

Alexander Dracoby, Associate Teaching Professor (Modern Europe, military, medical). BA, 1987, Grinnell; MA, 1989, PhD, 1996, Chicago. (1995)

Andrew E. Goble, Professor (Premodern Japan, Medical History, East Asia). BA, 1975, MA, 1981, Queensland; PhD, 1987, Stanford. (1990)

Bryna Goodman, Professor (modern China). BA, 1978, Wesleyan; MA, 1982, PhD, 1990, Stanford. (1991)

Melissa Graboyes, Associate Professor (Africa, history of medicine, global health, infectious diseases), Director of African Studies. BA, 2002, UC Davis, MA and MPH, 2007, PhD, 2010, Boston University. (2011)

Annelise Heinz, Assistant Professor (US women's & gender, LGBTQ, race/ethnicity). BA, 2003, Whitman College, Walla Walla, WA. PhD, Stanford. (2015)

Ellen Herman, Professor (Modern United States). BA, 1979, Michigan; PhD, 1993, Brandeis. (1997)

Julie Hessler, Associate Professor (20th-century Russia, Europe). BA, 1988, Yale; MA, 1989, PhD, 1996, Chicago. (1995)

Ocean Howell, Associate Professor (Urban City history US). PhD, 2009, Berkeley (Univ. of California). (2010)

Ryan Tucker Jones, Associate Professor (early modern Europe, Russian empire, Atlantic history); Ann Swindells Chair in History. BA, 1998, Walla Walla; MA, 2001, Georgetown; PhD, 2008, Columbia. (2016)

Vera Keller, Associate Professor (history of science). BA, 2002, Harvard; PhD, 2008, Princeton. (2010)

David M. Luebke, Professor (early modern Europe, Germany). BA, 1983, Nebraska; PhD, 1990, Yale. (1997)

John McCole, Associate Professor (European intellectual, cultural, and social; modern Europe; historiography and theory). BA, 1975, Brown; MA, 1982, PhD, 1988, Boston. (1994)

Ian F. McNeely, Professor (Europe, the world). AB, 1992, Harvard; MA, 1993, PhD, 1998, Michigan. (2000)

Daniel Rosenberg, Professor (Intellectual History, History of Science and Technology, Visual Culture, Language and Linguistics, Enlightenment). BA, 1988, Wesleyan University, PhD, 1996, UC Berkeley. (2012)

Brett Rushforth, Associate Professor (Colonial America, Atlantic world). BA, 1995, Utah; MA, 1998, Utah State; PhD, 2003, California, Davis. (2016)

Arafaat Valiani, Associate Professor (South Asia). BFA, 1996, Concordia; MA, 1997, London School of Economics and Political Science; PhD, 2005, Columbia. (2012)

Lissa Wadewitz, Associate Professor, (Native American, Pacific/Marine World, US West, US Environmental); Carrie C. Beekman Professor of Northwest and Pacific History. BA, Pomona College, PhD, UCLA. (2004)

Marsha Weisiger, Associate Professor (Environmental, Native American, American West); Julie and Rocky Dixon Chair in US Western History. BA, 1978, Arizona State; MA, 1991, PhD, 2000, Wisconsin, Madison. (2010)

Julie Weise, Associate Professor (20th-century United States, modern Mexico, global migration). BA, 2000, MA 2005, MPhil, 2006, PhD, 2009, Yale. (2013)

Timothy Williams, Associate Professor (19th Century U.S., the Civil War and Reconstruction, intellectual and cultural history, book history, gender, education, prisons and prisoners). BA, 2003, Wake Forest, PhD, 2010, University of North Carolina at Chapel Hill. (2014)

Lisa Wolverton, Professor (medieval Europe). BSFS, 1986, Georgetown; MMS, 1991, PhD, 1997, Notre Dame. (2000)

Reuben Zahler, Associate Professor (Latin America). BA, 1991, Cornell; MA, 1999, PhD, 2005, Chicago. (2012)

Emeriti

Robert Bussel, Labor Education and Research Center

Matthew Dennis, Professor Emeritus. BA, 1977, California, Irvine; MA, 1979, PhD, 1986, California, Berkeley. (1988)

Robert S. Haskett, Professor (Latin America). BA, 1975, California, Long Beach; MA, 1978, PhD, 1985, California, Los Angeles. (1988)

Jeffrey E. Hanes, Associate Professor (modern Japan). AB, 1973, Williams; MA, 1978, PhD, 1988, California, Berkeley. (1993)

R. Alan Kimball, Professor Emeritus. (modern Russia). BA, 1961, Kansas; MA, 1963; PhD, 1967, Washington (Seattle).

Jack P. Maddex, Professor Emeritus. BA, 1963, Princeton; PhD, 1966, North Carolina. (1966)

Randall E. McGowen, Professor Emeritus. BA, 1970, American; MA, 1971, PhD, 1979, Illinois. (1982)

James C. Mohr, Professor Emeritus. BA, 1965, Yale; MA, 1966, PhD, 1969, Stanford. (1992)

John Nicols, Professor Emeritus. AB, 1966, California, Berkeley; MA, 1968, PhD, 1974, California, Los Angeles. (1980)

Jeffrey Ostler, former Carrie C. Beekman Professor of Northwest and Pacific History (American West). BA, 1979, Utah; MA, 1984, Oregon; PhD, 1990, Iowa. (1990)

Daniel A. Pope, Professor Emeritus. BA, 1966, Swarthmore; MA, 1968, PhD, 1973, Columbia. (1975)

George J. Sheridan Jr., Professor (France, European Socioeconomic). BA, 1969, Princeton; MA, 1974, PhD, 1978, Yale. (1976)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Judith R. Baskin, Judaic studies

Mark Carey, Honors College

Charise Cheney, Ethnic Studies

James D. Fox, Library

Kevin Hatfield, Office of University Housing

Roxann Prazniak, Honors College

Elizabeth Reis, Women's and Gender Studies

Gretchen Soderlund, Journalism and Communication

Undergraduate Programs

Major - Bachelor's Degree

- History (BA/BS) (p. 386)

Minor

- History (p. 388)

Graduate Programs

Major - Master's Degree

- History (MA) (p. 389)

Major - Doctoral Degree

- History (PhD) (p. 390)

History (BA/BS)

From the controversies over monuments to the “Lost Cause” of the American south to the impact of pandemics on indigenous communities to the roots of authoritarianism, understanding the past and its resonance in the present and future is more important than ever. Studying the past trains majors to think rigorously, to write clearly, and to interpret events and problem-solve with creativity and confidence.

The bachelor of arts and bachelor of science in history are amazingly versatile degrees. The history major cultivates learning and skills that are crucial for careful and systematic thinking and, more broadly, are integral to a liberal arts education.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Recognize the complexity of historical experiences in diverse parts of the world.
- Understand other chronological eras in context, including substantial historical knowledge of premodern histories.
- Analyze historical arguments and evaluate conflicts of interpretation, examine the evidence, and learn how historians construct explanations in writing.
- Identify a historical problem for study, locate evidence relevant to that problem, analyze that evidence critically, and develop a research strategy to address the historical questions.
- Synthesize information from a variety of sources to construct cogent arguments, and express those arguments in clear, convincing prose.

All history majors, regardless of whether they are earning a BA or BS, must fulfill the second-language requirement associated with the university's bachelor of arts core-education requirement. They must demonstrate proficiency in a second language either by completing, with a C– or better or P, at least the third term, second year of a second

language. History courses that satisfy major requirements must be taken for a letter grade and that grade must be a C- or better. Specific requirements follow:

Bachelor's Degree in History (BA/BS)

Code	Title	Credits
Upper-Division History Courses		33
21 credits at the 400 level, including a 5-credit Seminar (HIST 407) ¹		
8 credits in history before 1800		
4 credits in each of four concentration areas selected from a list of six historical fields ²		
Additional History Courses ³		12

Additional Requirements

A grade point average (GPA) of 2.50 or higher is required in history courses taken at the University of Oregon. A mid-C or better is required in (HIST 407). Majors who maintain a GPA of 3.50 or better qualify for the history honors track. More information on this option may be found on the department website.

A total of 21 upper-division credits, including three courses numbered 408, 410–499, and the required (HIST 407) Seminar must be taken at the University of Oregon.

History Honors Program

The honors program provides an opportunity for capable and highly motivated history majors to develop their interests in historical research by writing a thesis during the senior year. To be eligible for admission to the program, students must have completed at least 28 credits in history, of which at least 16 upper-division credits must have been taken at the University of Oregon. The grade point average in all history courses must be 3.50 or better. Students who satisfactorily complete the thesis and related work and fulfill the requirements of the history major are eligible for a bachelor's degree with honors in history. Information about procedures for admission to the honors program, the course of study, the nature of the thesis, and the oral examination on the thesis may be obtained from the history department staff.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in History: Environmental History Emphasis

History Minor

Students can declare a minor in history through meeting with a History advisor or a university academic advisor (e.g., at Tykeson Hall or the Office of Academic Advising).

The current primary Advisor for Undergraduate Studies can be contacted at HistoryAdvising@uoregon.edu.

The faculty advisor helps develop a plan that directs the course of study and ensures timely completion of the requirements.

Minor Requirements

At least 20 credits—including at least 8 400-level credits—must be completed at the University of Oregon. Courses in history before 1800 and non-European or non-U.S. history require a grade of C– or better to apply toward the minor requirements. Four of the credits may be completed at the lower division. Specific requirements follow:

Code	Title	Credits
History Courses		
24 upper-division credits ¹		
4 credits in a course on history before 1800		
4 upper-division credits in a course that does not focus on either European or United States history		

¹ 12 of the 24 credits must be at the 400 level (three courses from among HIST 408, 410–499).

Additional Requirements

A grade point average (GPA) of 2.50 or higher is required in history courses taken at the University of Oregon.

History (MA)

Our MA program provides students and their faculty advisors with maximum flexibility in designing fields of study. Many of our MA students choose to continue their studies in our PhD program, while others have won admission into some of the most prestigious programs in North America, including Princeton University, the University of California, Berkeley, the University of Chicago, the University of Toronto, and the University of California, Santa Barbara.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Become conversant and proficient in the most important interpretive frameworks and significant debates in history, as well as the major historical sub-disciplines.
- Become conversant and proficient in the most important historical scholarship in at least one major research field.
- Able to present persuasive historical arguments to scholarly and public audiences in both written and oral form, substantiated with primary and secondary sources.
- Able to navigate historical archives, both physical and digital, in order to produce new historical knowledge that is relevant for the discipline and the broader public.
- Knowledgeable about the major professional organizations, conferences, and funding organizations for the discipline. Knowledgeable about the various career opportunities available to professional historians, including but not limited to work in academia, public history, public service, and non-profit organizations.
- Able to productively collaborate in a multicultural context being aware of historical issues of equity and inclusion for historically marginalized individuals/groups within and around the workplace.

Master of Arts in History

Applicants are expected to have completed an undergraduate degree in the liberal arts with emphasis on history. The MA program is typically completed in two years of full-time study. Before receiving the degree, students must demonstrate competence in a second language.

Students must write a master's thesis or complete two substantial research papers in the primary field and defend the thesis or research papers in an oral examination.

Major Field Requirement

Students must declare a major field of study, chosen in consultation with a faculty advisor.

Plan of Study

By the end of the first term in the program, students are required to file a plan of study, signed by the advisor, in which they state their major field, list all anticipated course work, and specify their language requirement.

The plan of study may be modified later by agreement of both student and advisor. All plans of study are reviewed and approved by the director of graduate studies.

Code	Title	Credits
HIST 611	Field Readings ¹	5
HIST 612	Historical Methods and Writings ²	5
HIST 615	Professional Development ³	1
HIST 616	Graduate Student Conference ⁴	1
HIST 507	Seminar: [Topic] (two seminars)	10
or HIST 607	Seminar: [Topic]	
HIST 608	Workshop: [Topic] (two colloquia) ⁵	10
HIST 503	Thesis ⁶	9
Electives (in History or another department)		4
Total Credits		45

¹ Completed during the first two terms of the first year. This requirement may also be satisfied by completion of (1) an appropriate 500-level course, approved by an advisor, or (2) Workshop: [Topic] (HIST 608), if equivalent to Field Readings (HIST 611).

² Taken fall term.

³ Taken winter term.

⁴ Taken spring term.

⁵ Student may petition to replace Workshop: [Topic] (HIST 608) with Workshop: [Topic] (HIST 508).

⁶ Students pursuing the two-paper option instead of the thesis should take other coursework, including HIST 601 research, in lieu of thesis credits.

Language Requirement

All MA students must demonstrate proficiency in at least one foreign language by passing an exam that tests the ability to read and comprehend a passage of average difficulty drawn from primary sources or the secondary literature. The language exam is offered once each term during the regular academic year.

Advisors must approve the choice of language. MA students whose thesis or research papers require work in foreign language sources are strongly urged to complete this requirement by the end of the first year of study. Advisors may set higher standards or include additional languages in which students must demonstrate competence. These standards should be established at the time a faculty member accepts a graduate student and fills out the plan of study form.

Writing Requirement

There are two options for satisfying the major writing requirement for the MA:

- A student must complete a master's thesis in his or her major focus of study and pass an oral defense of the thesis before a committee of three faculty members
- A student must complete two substantial research papers and pass an oral defense of these papers before a committee of three faculty members. For the purposes of this option, a research paper is defined as a paper of twenty-five pages or more, based on primary source research

Students completing the thesis option may enroll in a maximum of 10 credits of Thesis (HIST 503), usually in the winter and spring of their second year. Students choosing the research papers option may register

for 5 credits of Research: [Topic] (HIST 601), usually in either winter or spring of their second year.

Under ordinary circumstances, it takes students two full years of work to complete this program.

History (PhD)

Our PhD program combines an emphasis on research and teaching designed to equip students to compete successfully for faculty positions. We offer focal fields in the North American West/ Borderlands, Indigenous People/Native Americans, Environmental history, African American/African history, the history of Women/Gender/Sexuality, Asia (with particular strengths in the history of China and Japan), Latin America, and Transnational history. Additionally, we have strengths in the history of Russia, science and the social sciences, and intellectual history. Most of our doctoral students come to the UO with a master's degree. We also admit a small number of highly qualified students with bachelor's degrees into our PhD program.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop expertise in the most important interpretive frameworks and significant debates in history, as well as the major historical sub-disciplines.
- Develop expertise in the most important historical scholarship in at least three major fields.
- Present persuasive historical arguments to scholarly and public audiences in both written and oral form, substantiated with primary and secondary sources.
- Navigate historical archives, both physical and digital, in order to produce new historical knowledge that is relevant for the discipline and the broader public.
- Be knowledgeable about the major professional organizations, conferences, and funding organizations for the discipline. Knowledgeable about the various career opportunities available to professional historians, including but not limited to work in academia, public history, public service, and non-profit organizations.
- Productively collaborate in a multicultural context being aware of historical issues of equity and inclusion for historically marginalized individuals/groups within and around the workplace.

Doctor of Philosophy in History

Typically, incoming PhD students who enter with a master's degree are expected to have completed the equivalent of the history department's MA program. Students admitted on the BA-to-PhD track complete the program's MA requirements as they progress toward their PhD degrees. In some cases, doctoral students might be admitted without having fulfilled some of these prerequisites—for example, a course equivalent to Historical Methods and Writings (HIST 612). If this is the case, doctoral students will be required to take Historical Methods and Writings (HIST 612), Professional Development (HIST 615), and Graduate Student Conference (HIST 616).

PhD students prepare themselves in three fields, as follows:

1. **Major Research Field.** A specific, more narrowly defined field—typically, the area of one's dissertation, as conventionally understood

2. **Major Teaching Field.** A general, more broadly defined field that encompasses the research field but is more extensive—typically, a teaching field, as conventionally understood
3. **Minor Thematic, Methodological, or Comparative Field.** Typically the theme, method, or comparison to be advanced in the dissertation

For example, a student of modern France might choose modern France as a major research field, modern Europe as a major teaching field, and gender history, intellectual history, or military history as a minor thematic field. A student of China might take a major research field in modern China, a teaching field in China, and a minor comparative field in Japan.

Plan of Study

By the end of the first term in the program, students are required to file a plan of study, signed by the advisor, in which they state their major field, list all anticipated course work, and specify their language requirement. The plan of study may be modified later by agreement of both student and advisor. All plans of study are reviewed and approved by the director of graduate studies.

An entering PhD student lacking the equivalent to Historical Methods and Writings (HIST 612) must take the same HIST 612, 615, 616 sequence (<http://history.uoregon.edu/graduate/ma/#course>) as that required of MA students (see table below). This requirement may be waived for incoming students with sufficient preparation based on prior graduate work.

Code	Title	Credits
HIST 611	Field Readings ¹	5
HIST 612	Historical Methods and Writings ²	5
HIST 615	Professional Development ³	1
HIST 616	Graduate Student Conference ⁴	1
HIST 507	Seminar: [Topic] ⁵	5
or HIST 607	Seminar: [Topic]	
HIST 608	Workshop: [Topic] (two colloquia) ⁶	10
One additional 5/600-level HIST course		4
Minor Field ⁶		8
Distribution Requirement ⁷		8
HIST 603	Dissertation	18
Additional coursework to reach 81-credit minimum		16
Total Credits		81

- ¹ Completed during the first two terms of the first year. This requirement may also be satisfied by completion of (1) an appropriate 500-level course, approved by an advisor, or (2) Workshop: [Topic] (HIST 608), if equivalent to Field Readings (HIST 611).
- ² Taken fall term.
- ³ Taken winter term.
- ⁴ Taken spring term.
- ⁵ Students entering the PhD program without a Master's degree must complete two HIST 507 or 607 seminars.
- ⁶ Student may petition to replace Workshop: [Topic] (HIST 608) with Workshop: [Topic] (HIST 508).
- ⁷ **Minor Field:** Two courses at the 500 or 600 level that, together, define a thematic, methodological, or comparative field. A nonhistory course may be used with approval.
- ⁸ **Distribution Requirement:** two courses focusing on subjects outside their country or region of geographic specialization.

The Division of Graduate Studies minimum credit requirement for the PhD is 81 credits. With approval from the History Department, this may include appropriate graduate work completed prior to admission to the PhD program at UO.

Language Requirement

PhD students must demonstrate proficiency in at least one foreign language by passing an exam that tests their ability to read and comprehend a passage of average difficulty drawn from primary sources or the secondary literature. The language exam is offered once each term during the regular academic year.

Advisors must approve the choice of language. The language requirements of PhD students, however, will vary according to field. Students admitted into the PhD program should have the language preparation required to enable historical work in their field. Some additional language study might be required by individual advisors as an essential part of a student's PhD work. These standards should be established at the time a faculty member accepts a graduate student and fills out the plan of study form.

Oral Comprehensive Examination

PhD students should take and pass their oral comprehensive examinations in the winter term of their second year, or during spring term at the latest. BA-to-PhD students should take their oral comprehensive exams in their third year. Students may, but are not required, to register for Comprehensive Exam Preparation (HIST 618) to prepare for their comprehensive examinations with the appropriate faculty members.

Dissertation

After completing course work, demonstrating language competence, and passing the oral comprehensive examination, the doctoral student advances to candidacy. The doctoral candidate must compose and defend a dissertation prospectus and then research and write a dissertation that makes an original scholarly contribution to the field and shows evidence of ability in independent investigation. Finally, the candidate defends the dissertation in a formal, public session.

Students should have tentatively identified a dissertation topic by the end of their first year (or, for BA-to-PhD students, by the fall of the third year) and should then file a Tentative Dissertation Topic Form with the graduate director.

PhD students must also prepare and defend a dissertation prospectus no later than the term subsequent to successful passage of the oral comprehensive exam. Students may, but are not required, to register for Dissertation Prospectus (HIST 619) to prepare their dissertation prospectus with the appropriate faculty.

Time to Degree

Applicants with MA degrees who are accepted into the PhD program must complete the PhD requirements within seven years.

Students with BA degrees who are admitted to the PhD program must complete the MA requirements within two years. Such students must complete both the MA and the PhD requirements within a total of seven years from the time of admission.

Indigenous, Race, and Ethnic Studies

<http://ethnicstudies.uoregon.edu>

Ernesto Javier Martínez, Department Head

104 Alder Building
5268 University of Oregon
Eugene, OR 97403-5268
541-346-0900
ejm@uoregon.edu

IRES classes examine the construction and context of indigeneity, race, and ethnicity in the United States, highlighting the histories, experiences, and movements of people of color and Indigenous peoples in the Americas. As elements of identity that cut across disciplinary categories, indigeneity, race, and ethnicity require a mode of study that draws on the humanities and the social sciences as well as interdisciplinary sources such as cultural studies.

IRES scholars investigate race and racism alongside settler colonialism and other historical and contemporary manifestations of white supremacy and domination, analyzing how such systems of domination have created, and continue to create, social injustice. While the social construction of race in the United States is at the center of traditional ethnic studies, it is impossible to discuss racial dynamics without also paying significant attention to issues of gender, class, sexuality, indigeneity, immigration, transnational migration, and the diasporic formations resulting from the slave trade, indentured labor, colonialism, postcolonialism, imperialism, and globalization.

IRES courses that satisfy university core-education requirements are listed under Area Requirements and Cultural Literacy Requirement in the Bachelor's Degree Requirements section of this catalog.

Faculty

Charise L. Cheney, associate professor (African American popular and political cultures; Black nationalist ideologies and practices; gender and sexuality). BSJ, 1993, Northwestern; PhD, 1999, Illinois, Urbana-Champaign. (2009)

Courtney M. Cox, assistant professor (Race and Sport, cultural, political and economic effects of global sport, advanced analytics in sport). BJ, 2008, University of Texas at Austin; MA, 2013, University of Texas at Austin; MA, 2017, University of Southern California; PhD, 2019, University of Southern California. (2019)

Lynn H. Fujiwara, associate professor (women of color, Asian American studies, labor). BA, 1990, California, San Diego; MA, 1993, PhD, 1999, California, Santa Cruz. (2000)

Brian Klopotek, associate professor (federal recognition of Indian tribes, Native American education, environmentalism). BA, 1994, Yale; PhD, 2004, Minnesota, Twin Cities. (2003)

Abigail Lee, assistant professor (Asian-American studies, Black studies, film and television studies, critical race and relational ethnic Studies, multi-ethnic literatures, Prison-industrial complex abolition, carceral Studies). BA, 2012, University of Virginia, PhD, 2022, University of North Carolina, Chapel Hill. (2023)

Ernesto J. Martínez, associate professor (comparative ethnic studies, queer studies, feminist theory). BA, 1998, Stanford; MA, 2003, PhD, 2005, Cornell. (2006)

Jennifer R. O'Neal, acting assistant professor (Native American and Indigenous history, American West history, decolonizing methodologies, cultural heritage archives, traditional knowledge systems, digital humanities). BS, 1999, Utah State University; MA, 2002, Utah State University; MA, 2003, University of Arizona; (ABD) PhD, 2019, Georgetown University. (2019)

Cera Smith, assistant professor, (U.S. Black literatures: African American, Afro-Latinx, and other Black diasporic, radical protest literatures of the U.S., Black Studies, critical race theories, affect theory, gender and sexuality, histories of science and medicine, health humanities). BA, 2015, California State University, Long Beach, PhD, 2023 Yale University. (2023)

Laura Pulido, professor (critical human geography, environmental justice, Chicano studies). BA, 1984, California State, Fresno; MA, 1987, Wisconsin, Madison; PhD, 1991, California, Los Angeles. (2016)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Majors - Bachelor's Degree

- Ethnic Studies (BA/BS) (p. 392)
- Native American and Indigenous Studies (BA/BS) (p. 394)

Minors

- Ethnic Studies (p. 396)
- Latinx Studies (p. 396)
- Native American and Indigenous Studies (p. 397)

Graduate Programs

Major - Doctoral Degree

- Indigenous, Race, and Ethnic Studies (PhD) (p. 398)

Certificate

- Indigenous, Race, and Ethnic Studies (p. 399)

Ethnic Studies (BA/BS)

Our department looks at the way that race is tied to many other issues, including gender, class, sexuality, migration, indigeneity, and colonialism. With our students, we investigate and critique examples of white supremacy, both historical and present. We focus not only on race in the United States, but also on migrations and diasporas (such as those that result from the slave trade, settler colonialism, and globalization).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the relationship of race and ethnicity to power and inequality, with special emphasis on intersections with class, gender, immigration, indigeneity and sexuality.

- Explain how white domination and a culture of white supremacy work historically and in the present to create legal, economic, social, and political hierarchies within and between racial and ethnic groups.
- Understand the racial formation of at least two groups within the U.S., including transnational connections when appropriate, from among the following: Native Americans, African American and other Black communities, Chicana/os and Latina/os, Asian Americans, and Pacific Islanders.
- Analyze conflicts, tensions, and building of effective intra- and intergroup coalitions and alliances among racial groups.
- Analyze cultural production generated by and about communities of color, especially as they speak to relationships of power.
- Articulate clearly, coherently, and convincingly the major concepts and theories in ethnic studies through critical writing and oral communication.
- Engage in original research that culminates in a research paper that reflects and utilizes a comprehensive understanding of ethnic studies methodologies and theories, synthesizes and applies knowledge from earlier ethnic studies coursework, and attends to the details of evidence and argumentation in knowledge production.
- Understand the principles of community-oriented action and research.

Ethnic Studies Major Requirements

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Select one of the following:		4
ES 250	Introduction to Black Studies	
ES 252	Introduction to Asian American Studies	
ES 254	Introduction to Chicanx and Latinx Studies	
ES 256	Introduction to Native American Studies	
ES 258	Introduction to Pacific Islander Studies	
Additional 100- or 200-level course		4
Upper Division		
ES 301	Theoretical Perspectives in Ethnic Studies	4
Two 400-level courses		8
Six additional 300- or 400-level courses		24
Total Credits		48

Majors must construct their programs in consultation with an ethnic studies advisor. At least 24 of the required upper-division credits must be taken in residence at the University of Oregon. Courses applied to the major must be taken for letter grades and passed with grades of mid-C or better. Majors must maintain a grade point average of at least 2.00 in courses applied to the major. Students majoring in ethnic studies may apply credits in Research: [Topic] (ES 401) and Reading and Conference: [Topic] (ES 405) toward their degree only if completed with letter grades of mid-C or better. Practicum: [Topic] (ES 406) may be applied toward the major on a graded or pass/no pass basis.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Native American and Indigenous Studies (BA/BS)

<http://nativestudies.uoregon.edu>

Kirby Brown, Director

104 Alder Building
nas@uoregon.edu

Native American and Indigenous Studies is an interdisciplinary field that draws upon multiple approaches from history, anthropology, law, literature, ethnic studies, and other disciplines to understand Native American history, culture, politics, and contemporary lives. NAIS highlights the unique place of tribes in the state-tribal-federal intergovernmental matrix and the myriad of distinct issues Native peoples of the United States face, from language and cultural protection to environmental issues to economic development and beyond.

Students in NAIS will join a diverse, tightly knit community of scholars who cherish our connections with Native communities and strive to make our work valuable for the project of building up Native nations. UO NAIS affords students extensive grounding in Indigenous history and culture as well as nuanced understanding of tribal sovereignty, Indigenous nationhood, settler colonialism, and the diversity and beauty of contemporary Indigenous lives and experiences.

Such work prepares students for a variety of postsecondary opportunities ranging from government, law, research, and education; to nonprofit and public interest work, environmental and resource management, and business and economic development; to the arts, journalism, communication, new media, and more. In a state with nine federally recognized indigenous nations and with a Native American population 50% higher proportionally than the national average, this knowledge is crucial for future leaders in all fields.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Articulate significance of Indigenous nations as political entities, not just ethnic or racial minorities.
- Apply gender as a critical analytic element in Indigenous studies in multiple ways.
- Gain at least partial competence in Indigenous languages.
- Demonstrate fluency in place-based knowledge in Indigenous studies of Oregon.
- Apply academic knowledge to issues in tribal communities and contexts.

Undergraduate Studies

Students may earn an undergraduate major in Native American and Indigenous Studies (NAIS) housed in the Department of Indigenous, Race, and Ethnic Studies (IRES). The primary goal of the NAIS major is to provide students extensive grounding in Indigenous history and culture as well as nuanced understandings of tribal sovereignty, Indigenous nationhood, and the diversity and beauty of contemporary Indigenous identities, lives, and experiences across the Americas and throughout the Pacific. A secondary goal of the program is to encourage student awareness of the ethnic and cultural dimensions and applications of other major fields of study. Students of literature, social sciences, education, urban planning, arts, humanities, law, and international studies—to name only a few—find that related Native American and Indigenous Studies courses greatly enrich their academic programs. This foundation prepares students for diverse career paths including tribal political leadership, education and administration, social services/social work, language revitalization and instruction, environmental policy, natural/cultural resources management, law, cultural heritage preservation, the arts, journalism and new media, and community/economic development.

Up to 3 courses, or 12 credits, applied to the Native American and Indigenous Studies major may be used to satisfy major or minor requirements for other programs. All courses applied to a minor in Native American and Indigenous Studies may be used to satisfy major or minor requirements for other programs.

Specific details and course approvals must be obtained from the director of the Native American and Indigenous Studies program (nastudies@uoregon.edu).

Requirements for the Major: Conventional Track

The conventional track of the Native American and Indigenous Studies major requires 56 credits. At least 28 credits must be taken in residence at the University of Oregon. Up to two courses, or 8 credits, may be counted toward the major from a list of related courses that fall outside the core of NAIS but that focus on other issues closely related to the field (see course list below). Courses must be taken for a grade, and grades must be mid-C or higher to count toward the minor. The conventional track requires one year of Native language classes that may be fulfilled at the University of Oregon or any other accredited institution or tribal partner. See program director for details. The course load is distributed as follows:

Code	Title	Credits
ES 256	Introduction to Native American Studies	4
	Additional lower division elective	4
	One year of Ichishkiin or Chinuk Wawa (or other Indigenous language) (3 quarters/12 credits)	12
Upper Division Courses		
	Six upper-division electives from approved courses list, one of which must be in NAIS group 3 (literature/media/creative arts)	24
ES 321	Indigenous Peoples of Oregon	4
ES 468	Indigenous Research Methods and Ethics Students who elect to pursue a senior research practicum (ES 409) will need to be concurrently enrolled in or have satisfactorily completed this course	4

ES 470	Native American and Indigenous Feminisms (OR WGS 251: Transnational and Indigenous Feminisms) Students who fulfill this requirement with WGS 251 may do so via a lower division elective; they will still need to fulfill all upper division requirements for the major.	4

Total Credits 56

Requirements for the Major: Language Track

The language track of the Native American and Indigenous Studies major requires 56 credits. At least 28 credits must be taken in residence at the University of Oregon. Up to two courses, or 8 credits, may be counted toward the major from a list of related courses that fall outside the core of NAIS but that focus on other issues closely related to the field (see course list below). Courses must be taken for a grade, and grades must be mid-C or higher to count toward the minor. The language track requires two years of Indigenous language classes that may be taken at the University of Oregon or any other accredited institution or tribal partner. See program director for details. The course load is distributed as follows:

Code	Title	Credits
ES 256	Introduction to Native American Studies	4
	Two years (6 quarters) of Ichishkiin (UO), Chinuk Wawa (LCC), or other Indigenous language	24
Upper Division Courses		
	Four upper-division electives from approved courses list, one of which must be in NAIS group 3 (literature/media/creative arts)	16
ES 321	Indigenous Peoples of Oregon	4
ES 468	Indigenous Research Methods and Ethics Students who elect to pursue a senior research practicum (ES 409) will need to be concurrently enrolled in or have satisfactorily completed this course.	4
ES 470	Native American and Indigenous Feminisms (OR WGS 251: Transnational and Indigenous Feminisms) Students who fulfill this requirement with WGS 251 may do so via a lower division elective; they will still need to fulfill all upper division requirements for the major.	4

Ethnic Studies Minor

The Indigenous, Race, and Ethnic Studies Department offers an interdisciplinary undergraduate minor, constructed in consultation with an Indigenous, Race, and Ethnic Studies faculty adviser.

Minor in Ethnic Studies

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Two 200-level courses with ES subject code		8
Upper Division		
Four approved courses, including two with ES subject code		16
Total Credits		28

Upper-division courses must be taken in residence at the University of Oregon. The minor program must be planned in consultation with an ethnic studies advisor at least two terms before graduation. Courses applied to the minor must be taken for letter grades and passed with grades of mid-C or better. Students minoring in ethnic studies may apply credits in Research: [Topic] (ES 401) and Reading and Conference: [Topic] (ES 405) only if completed with letter grades of mid-C or better. Credits in Practicum: [Topic] (ES 406) may be applied toward the minor on a graded or pass/no pass basis.

Latinx Studies Minor

<http://latinxstudies.uoregon.edu>
José Cortez, Director

319 Prince Lucien Campbell Hall
541-346-0069

jcortez3@uoregon.edu

The minor in Latinx studies introduces students to the diverse perspectives, histories, and contemporary experiences of Latinx communities in the US and Latin America. The minor is interdisciplinary, meaning that students will take courses from a variety of different fields within the humanities, social sciences, and professional schools. For example, students can choose to take courses in literature, history, the arts, environmental studies, or journalism, to name a few.

Students can also delve deeper into specialized Spanish language courses, especially those that focus on the contexts in which Spanish is spoken and the social and political implications of being a Spanish-speaker in the US.

Minor in Latinx Studies

The Latinx Studies Minor will require a broad introduction to the study of race and ethnicity in the United States as well as a focused introduction to the study of Latinx peoples in the United States.

Code	Title	Credits
ES 101	Introduction to Ethnic Studies	4
At least one of the following courses:		4
ENG 243	Introduction to Chicano and Latino Literature	
ES 254	Introduction to Chicanx and Latinx Studies	
HIST 248	Latinos in the Americas	
SPAN 218	Latino Heritage I	
SPAN 228	Latino Heritage II	
SPAN 308	Culture and Language Bilingual Communities	
UGST 111	Academic Residential Community—Arts and Letters: [Topic]	
UGST 112	Academic Residential Community—Social Science: [Topic]	
At least TWO qualifying course from any of the following Latinx-specific courses:		8
ANTH 329	Immigration and Farmworkers	
ANTH/JCOM 427M	Latino Roots I	
ANTH/JCOM 428M	Latino Roots II	
ENG 243	Introduction to Chicano and Latino Literature

SOC 207	Social Inequality	
SOC 345	Race and Ethnicity	
SOC 452	Issues of Migration: [Topic]	
TA 472	Multicultural Theatre: [Topic]	
SOC 445	Sociology of Race and Ethnicity: [Topic]	
Total Credits		24

Additional Requirements

- At least 16 credits must be completed for a letter grade and passed with a mid-C or better to count toward the minor.
- Coursework must include 12 upper-division credits and must represent a range of disciplinary and professional approaches to the subject of Latinx Studies.
- All 12 upper-division credits must be taken in residence.

Native American and Indigenous Studies Minor

<http://nativestudies.uoregon.edu>

The Native American and Indigenous Studies minor compliments numerous other fields of study and provides access to ways of knowing and living that are part of the heritage and future of this state, and this nation.

Native American and Indigenous Studies

Students may earn an undergraduate minor in Native American and Indigenous Studies (NAIS) housed in the Department of Indigenous, Race, and Ethnic Studies (IRES).

The primary goal of the NAIS minor is to provide students extensive grounding in Indigenous history and culture as well as nuanced understandings of tribal sovereignty, Indigenous nationhood, and

the diversity and beauty of contemporary Indigenous identities, lives, and experiences across the Americas and throughout the Pacific. A

secondary goal of the program is to encourage student awareness of the ethnic and cultural dimensions and applications of other major fields of study. Students of literature, social sciences, education, urban planning, arts, humanities, law, and international studies—to name only a few—find that related Native American and Indigenous Studies courses greatly enrich their academic programs. This foundation prepares students for diverse career paths including tribal political leadership, education and administration, social services/social work, language revitalization and instruction, environmental policy, natural/cultural resources management, law, cultural heritage preservation, the arts, journalism and new media, and community/economic development.

Courses applied to a minor in Native American and Indigenous studies may be used to satisfy major or minor requirements for other programs.

Specific details and course approvals must be obtained from the Native American and Indigenous Studies program director/adviser (nastudies@uoregon.edu).

Requirements for the Minor

The Native American and Indigenous Studies minor requires 28 credits. At least 16 credits must be taken in residence at the University of Oregon. Up to 4 credits may be counted toward the minor from a list of related courses that fall outside the core of Native American studies but that focus on other issues closely related to the field. Courses must be taken for a grade, and grades must be mid-C or higher to count toward the minor. The course load is distributed as follows:

Code	Title	Credits
ES 256	Introduction to Native American Studies	4
Additional Courses		24
16 credits must be in upper-division courses		
At least 4 credits focusing on Oregon Indians ¹		
At least 4 credits in each of three distribution groups ²		
Up to 4 credits may be taken from a list of related courses approved by a program advisor		
Total Credits		28

¹ ES 321 or any courses with NAS4 course attribute code.

Indigenous, Race, and Ethnic Studies (PhD)

Graduate students in the Department of Indigenous, Race, and Ethnic Studies join a diverse and dynamic community of scholars dedicated to pursuing transformative knowledge through original research and community engagement. We train scholars in transdisciplinary, intersectional, and creative scholarship. Students receive a comprehensive course of study grounded in the lives of Indigenous communities and people of color.

Graduate students work closely with faculty mentors to customize a program of study that enables a comprehensive breadth and depth within core fields of ethnic studies, and that prepares students for their post-PhD careers. Doctoral areas of specialization include: Women of Color and Indigenous feminisms, queer race studies, Latinx and Chicanx studies, media and sports studies, literary and cultural studies, carceral studies, Environmental justice, Indigenous and racial formations, comparative race relations, and social justice activism.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Assess and intervene in multiple bodies of scholarly literature, with attention to the critical interventions of Ethnic Studies research vis-a-vis knowledge produced through dominant academic paradigms and disciplines.
- Demonstrate mastery of their field's chosen subject material. Specifically, they will be able to articulate, explain, and apply a comprehensive understanding of theoretical frameworks in Ethnic Studies to their field of expertise.
- Conceptualize and articulate robust and significant research questions and engage in original research for academic publication.
- Acquire the skills to assess undergraduate education, develop a pedagogical skill-set, and teach their own courses.
- Conduct research and scholarly or professional activities in an ethical manner. They will have the experience and relevant credentials (such as publications, teaching, experience, and/or advanced administrative skills) to teach and conduct research in an ethical manner at an institution of higher education and/or assume a leadership position in an organization within their field.

Additional Requirements

- Qualifying Exams and Advancing to Candidacy
- Completion of Qualifying Exams by end of the third year (One field paper, one specialized area plus syllabus, and preliminary dissertation prospectus)
- Dissertation
- Final dissertation prospectus defense by Spring quarter of the third year
- Dissertation years 4 and 5
- Successful dissertation defense
- Completion and filing the degree in year 5

Students who have earned a Master's degree from another program must consult the Director of Graduate Studies to assess the course work that will transfer towards earning the PhD.

Indigenous, Race, and Ethnic Studies Graduate Certificate

Graduate students from any UO department may apply for admission and add the certificate to their degree programs.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Gain an understanding of many of the central theoretical debates in the discipline of ethnic studies and be able to bring theoretical knowledge to bear on their areas of study.
- Critically engage a breadth of topics across different fields within Ethnic Studies, such as: Indigeneity, Queer Race Studies, Social Policy, Environmental Justice, Media and Popular Culture, Immigration and Migration studies, Carceral Studies, Social Justice and Resistance.
- Critically engage in-depth debates within particular fields or areas in ethnic studies.
- Craft persuasive arguments supported by interdisciplinary and intersectional resources in Indigenous, Race, and Ethnic Studies.

Graduate Certificate in Indigenous, Race, and Ethnic Studies

The graduate certificate in Indigenous, Race, and Ethnic Studies provides graduate students across campus the opportunity to enroll in a concentrated program of study centered on race, indigeneity, and intersectionality. The certificate provides a foundational curriculum as well as a specialized focus in areas aligned with students' interests.

Graduate students will develop their curriculum plans with the IRES Director of Graduate Studies to best complement individual needs and goals for their graduate studies. Courses not taught by our graduate faculty may be approved by the Director of Graduate Studies.

To Apply:

Students should email the Director of Graduate Studies at iresgradstudies@uoregon.edu to apply for the graduate certificate, more information and forms can be found on our graduate certificate website (<https://ethnicstudies.uoregon.edu/graduate-certificate/>).

Latin American Studies

<http://las.uoregon.edu>

Juan Eduardo Wolf, Program Director

126 Frohnmayer Music Building
541-346-2852
ewolf2@uoregon.edu

The University of Oregon offers a bachelor of arts degree in Latin American studies. A minor in Latin American studies is also available. An emphasis on Latin America is available for master of arts (MA) degrees with majors in anthropology, history, global studies, and Spanish. See

the **Anthropology (p. 307)**, **History (p. 384)**, **Global Studies (p. 365)**, and **Romance Languages** sections of this catalog.

Study Abroad

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study.

Participating Faculty

Michael B. Aguilera, sociology

Carlos Aguirre, history

Monique Balbuena, honors college

Erin Beck, political science

Mark Carey, honors college

Christopher Chavez, journalism and communication

Alexandre Dossin, music

Michael Dreiling, sociology

Stephen Dueppen, anthropology

Cecilia Enjuto Rangel, Romance languages

Dennis Galvan, global studies

Pedro García-Caro, Romance languages

Spike Gildea, linguistics

Amalia Gladhart, Romance languages

Miguel Gualdrón Ramirez, philosophy

Nathalia Hernandez-Vidal, sociology

Derrick Hindery, global studies

Craig Kauffman, political science

Ana M. Lara, anthropology

Kathryn A. Lynch, environmental studies

Galen Martin, international studies

Gabriela Martinez, journalism and communication

Cintia Martinez Velasco, philosophy

Michelle McKinley, law

Lanie Millar, Romance languages

Juan-Carlos Molleda, journalism and communication

Edward Olivos, education studies

Priscilla P. Ovalle, English

Gabriela Perez Baez, linguistics

Gerardo Sandoval, planning, public policy and management

Philip W. Scher, anthropology

Lynn Stephen, anthropology

Analisa Taylor, Romance languages

Alejandro Vallega, philosophy

Jessica Vasquez-Tokos, sociology

Julie Weise, history

Juan Eduardo Wolf, music

Kristin Yarris, global studies

Linda O. Fuller, women's and gender studies

Leonardo García-Pabón, Romance languages

Linda Kintz, English

Undergraduate Programs

Major - Bachelor's Degree

- Latin American Studies (BA) (p. 400)

Minor

- Latin American Studies (p. 403)

Latin American Studies (BA)

Investigate why Frida Kahlo's paintings are so enduringly popular. Dive into the world of Latin American soccer. Separate fact from fiction in the biography of Ernesto "Che" Guevara. Sample popular dishes in countries across Latin America. The Latin American Studies Program offers an in-depth look at the richness and diversity of a vast area and its people. Whether pre-Columbian art, the striking wonder of the Amazon rainforest, or the history of colonialism tugs at your heartstrings, you'll be forever changed by your newfound knowledge.

Take advantage of study abroad (<https://geo.uoregon.edu/>) programs where you'll travel to Costa Rica, Ecuador, Mexico, or other exciting places to sharpen your language skills and become familiar with new cultures. In Eugene, you can volunteer for a variety of organizations such as Centro Latino Americano (<https://centrolatinoamericano.org/>), a local bilingual multicultural agency dedicated to helping the Latino community. UO students have also worked with the local school districts to mentor youth. Others have volunteered at Siempre Amigos, which provides health services to survivors of torture and political violence.

You'll delve into politics, literature, science, ecology, and other engaging topics in courses such as Caribbean Migrants in the Literary Imagination or The Cold War in Latin America. Learn from top-notch scholars who offer encouragement in a supportive atmosphere. "We cannot understand the United States without understanding its relationship to Latin America," says Professor **Carlos Aguirre**. "Latin American people and culture have been misrepresented and there are preconceptions and stereotypes that we need to help overcome."

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate a broad knowledge and understanding of the region's geography, history, politics, gender and sexuality issues, cultures, environment, economics, and artistic and literary trends.
- Show Spanish or Portuguese reading and writing proficiency that allows them to clearly communicate and function in at least one of those languages.
- Analyze and offer interpretations of Latin America's many contributions to world cultures as well as the causes and effects of specific problems facing the region's peoples and nations within a comprehensive, interdisciplinary framework.
- Critically process different types of information about the region and its peoples and assess them using systematic forms of reasoning, such as contrasting data, consulting relevant bibliographies, databases, and sources, and constructing solid arguments.
- Carry out interdisciplinary research on a Latin American topic and present the results in a clear and coherent way.
- Effectively communicate in both spoken and written formats to a variety of audiences.

Total Credits		48

¹ Students may confer with a program advisor to determine other applicable courses not listed here. Check for courses with Latin American Studies (LAS) themes listed in the Schedule of Classes each term; courses listed under LAS count toward the major or minor. In addition, students may petition the director of the major or minor for the inclusion of other applicable LAS-related courses that have at least 50 percent Latin American Studies-related content.

Additional Requirements

Of the total 48 credits required for the Latin American studies major—

- 40 credits must be taken for a letter grade and passed with a grade of C- or better (8 credits may be taken pass/no pass)

- 36 credits must be upper-division (300 or 400-level)
- 28 credits must be taken at the University of Oregon's campus in Eugene, OR
- **Limit on Multiple Department Credits:** No more than 16 credits (or four courses) from any single department can count toward the major
- **Limit on LAS Credits Focused on United States Topics:** No more than 16 credits in courses related to United States Latino studies or US Hispanic culture or society can count toward the major.
- **Social Science Credits Required:** 8 of the 48 credits must be from the following Social Science units: ANTH, EC, ENVS, ES, EURO, GEOG, GLOBL, PS, SOC, WGS.
- **Limit on Individualized Study Credits:** 8 credits maximum may be independent study or internship credit.
- **Allowances for Study Abroad and Study Away (i.e.,Escuela Helvetia) Credits:** 8 credits may be earned through successful completion of pre-approved courses in a study abroad program at an accredited Latin American college or university, a faculty-led field school; transfer credits from universities outside Latin America are considered individually, following existing procedures in appropriate departments for determining their equivalence to UO courses.

Language Requirements

In addition to the minimum of 48 credits in required and elective courses, all majors are required to demonstrate a third-year level of proficiency in Spanish, Portuguese, or an Indigenous language from our area of study. This will entail completing (with a grade of C– or better or P) the basic two years of college-level language courses and taking at least four 300-level courses taught in the respective foreign language —such as Cultura y lengua: Identidades hispanas (SPAN 301), Cultura y lengua: Expresiones artisticas (SPAN 303), Cultura y lengua Cambio social (SPAN 305), Hispanic Cultures through Literature III (SPAN 343), or Hispanic Cultures through Literature IV (SPAN 344).

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Its purpose is to provide an example of one possible route through the Latin American studies major.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

Latin American Studies Minor

Latin American Studies provides a thorough grounding in the languages, history, geography, and some of the central cultural and socio-economic issues at stake in the region. The diversity of peoples, cultures, languages, and environments makes the study of Latin America an exciting intellectual adventure. Core courses in the minor are complemented by courses drawn from departments and programs such as Anthropology, Ethnic Studies, Philosophy, Geography, Romance Languages, History, Global Studies, and Environmental Studies. Advanced language study is a part of the program. Minors will pursue second-year proficiency in a related language.

Total Credits	28

¹ Students may confer with a program advisor to determine other applicable courses not listed here. Check for courses with Latin American Studies (LAS) themes listed in the Schedule of Classes each term; courses listed under LAS count toward the major or minor. In addition, students may petition the director of the major or minor for the inclusion of other applicable LAS-related courses that have at least 50 percent Latin American Studies-related content.

Language Requirements

Students must satisfactorily complete, with grades of C– or better or P, two years of college-level Spanish- or Portuguese-language courses. Language credits may be earned at the University of Oregon through an approved study abroad or study away program or transferred from another accredited college or university. As an alternative, students may satisfy the language requirement by examination, demonstrating a level of competence equivalent to two years of college-level Spanish

or Portuguese. Students whose native language is either Spanish or Portuguese may substitute equivalent competence in English in lieu of this requirement.

Additional Requirements

Of the total 28 credits for the Latin American studies minor—

- 20 credits must be taken for a letter grade and a passed with a grade of C- or better (8 credits may be taken pass/no pass)
- 20 credits must be in upper-division (300- or 400-level)
- 20 credits must be taken on campus at the University of Oregon or in a UO faculty-led study abroad or study away program
- **Limit on Multiple Department Credits:** No more than four departments, disciplines, or programs can count toward the minor.
- **Limit on Single Department Credits:** No more than 12 credits (or three courses) from any single department can count toward the minor.
- **Allowances for Study Abroad and Study Away Credits:** 8 credits may be earned through successful completion of pre-approved courses in a study abroad program at an accredited Latin American college or university or a study away program such as Escuela Helvetia; transfer credits from universities outside Latin America are considered individually, following existing procedures in appropriate departments for determining their equivalence to UO courses.
- **Allowances for Upper-Division Language Courses as Electives for the LAS Minor:** Spanish, Portuguese, or Indigenous language courses must be upper-division literature and culture courses to count toward completion of the 28-credit minor requirement.

Middle East and North Africa Studies

<http://mena.uoregon.edu>

Michael Allan, Program Director

114 Friendly Hall
541-346-9780
mena@uoregon.edu

Often referred to as the “cradle of civilization,” the Middle East and North Africa was of central importance in the development of agriculture, cities, mathematics, science, and western religious traditions. The Middle East and North Africa region is home to a broad diversity of peoples and cultures as well as the first written language, monumental architecture, long-distance trade, and centralized state systems.

This minor is a broad examination of the Middle East and North Africa region. Students focus their study with a concentration in language, study abroad, or research. The minor is designed to offer flexibility to examine critical issues across the region and to focus on particular areas of interest. The minor requires a minimum of 24 credits and one of three concentrations: language study, study abroad, or research.

Participating Faculty

Michael Allan, comparative literature

Diane Baxter, anthropology

Shaul Cohen, geography

Rick Colby, religious studies

Jane Cramer, political science

Alex Dracobly, political science

Stephen Dueppen, anthropology

Hanan Elsherif, religious studies

David Frank, honors college

Deborah Green, Judaic studies

David Hollenberg, religious studies

Farhad Malekafzali, political science

Michael Malek Najjar, theater arts

Lindsey Mazurek, history

Stephen Shoemaker, religious studies

Priscilla Southwell, political science

David Wacks, Romance languages

Minor in Middle East–North Africa Studies

Students must satisfactorily complete a minimum of 24 credits of course work. Courses applied toward the minor must be passed with a C– or better or P (pass). Of the 24 credits, a minimum of 20 must be graded. Students must take a minimum of 16 credits in residence. In addition, students must complete an area of concentration (language, study abroad, or research). Some credits toward the concentration may be used to satisfy the 24 credits of course work, as described below. Because not every course in the follow list of 'Requirements' will be offered regularly enough or at a time that fits each students' schedules, students are encouraged to contact the Program Director to discuss potential substitutions when such issues arise.

Requirements

Code	Title	Credits
MENA 111	Media Coverage of the Middle East	4
Choose one of the following:		4
GEOG 209	Geography of the Middle East and North Africa	
GLBL 423

COLT 470	Studies in Identity: [Topic] ¹	
Elective courses		16
Total Credits		24

¹ Taken as applicable and/or available.

Electives. Of the 16 required credits in elective courses, 8 must be drawn from social science courses and 8 must be drawn from humanities courses, as listed of below. Confer with a program advisor to determine

other applicable courses not listed below. Check for courses with Middle East–North Africa (MENA) themes listed in the Schedule of Classes each term; courses listed under MENA count toward the minor. In addition, students may petition the director of the minor for the inclusion of other applicable MENA-related courses that have at least 50 percent Middle East–North Africa content.

A minimum of 12 credits must be in upper-division courses (300 or 400 level). No more than 8 elective credits from any one department may count toward the minor. Courses must be taken from a minimum of three departments.

The social science and humanities elective course lists are not exhaustive, as new courses are added periodically. Other courses may count toward these requirements. See the program advisor and/or the Middle East–North Africa studies entry in the Schedule of Classes for up-to-date information.

Social Science Electives

- ANTH 250: Introduction to Middle East Studies
- ANTH 342: Archaeology of Egypt and Near East
- ANTH 429: Jewish Folklore and Ethnology
- CRES 435: Israel and Palestine
- GEOG 209: Geography of the Middle East and North Africa
- GLBL 323: Islam and Global Forces
- GLBL 423: Development and the Muslim World
- HIST 325: Precolonial Africa
- HIST 417: Society and Culture in Modern Africa: [Topic]
- HIST 419: African Regional Histories: [Topic]
- HIST 450: The Iraq War
- JDST 212: Medieval and Early Modern Judaism
- JDST 213: The Jewish Encounter with Modernity
- JDST 352: Jewish Literature and Culture
- JDST 353: Jewish Image and the Media
- JDST 354: Jewish Thought and History
- PS 384: Nuclear Politics in the Middle East

Humanities Electives

- ARB 201: Second-Year Arabic

- REL 357: War, Terrorism & Religion
- REL 414: Biblical Book: [Topic]
- REL 418: Martyrdom
- REL 432: Islamic Mysticism: [Topic]

Concentration

In addition to the credit requirements above, students choose to complete one of the three following concentrations: language, study abroad, or research.

Language Concentration. Students must satisfactorily complete a minimum of one year of a MENA language: Arabic, Hebrew, Turkish, or Persian-Farsi. Language credits may be earned at the UO, through an approved overseas program, or transferred from another college or university. Students may also satisfy the language requirement by examination, demonstrating a level of competence equivalent to one year of college-level language.

Currently, Arabic and Hebrew are offered as regular UO language courses. Turkish and Persian-Farsi are offered through the Yamada Language Center. Students may earn university credit for courses taken at the Yamada Center (1–3 credits per term). In order to complete the minimum one-year requirement for Turkish and Persian, students must take the New York University 12-point Foreign Language Proficiency Examination. Students who receive 12 points on the exam have satisfactorily completed the minimum one-year language requirement.

In addition, students may complete a second year of a MENA language and apply 8 credits of this work toward satisfaction of the humanities credits requirements.

Study-Abroad or Internship Concentration. Students spend a minimum of one term in an approved study-abroad or internship program in a Middle Eastern–North African country.

Currently, there are 19 study-abroad programs offered through the UO, in Jordan, Morocco, Israel, Turkey, and Tunisia. All of these programs meet the study-abroad requirement option. Other programs through accredited universities and organizations may be accepted for university credit and for the study-abroad requirement option. For these programs to count toward the concentration, the student must meet with the minor advisor. Students planning on the study-abroad or internship option must meet

with the program advisor to discuss the study-abroad program that fits with the objectives of the minor.

The UO participates in IE₃ Global, which offers internships in Tunisia and which count toward the study-abroad or internship requirement. Other internship possibilities may be available. For these programs to count toward the concentration, the student must meet with the minor advisor and have it approved before signing up for the internship program.

Once students return from their study-abroad or internship experience, they must write a five- to six-page reflection of their experiences abroad, to be read and approved by the minor advisor. As noted, the minor advisor must approve courses taken abroad and the structure and content of an internship in advance. With the approval of the advisor, up to 8 credits taken abroad may count toward the overall minor requirement of 24 credits.

Research Concentration. Students write a high-quality, 15- to 20-page research paper on a MENA-related topic. For this pathway, students work with a professor who guides their research, monitors their progress, and approves their completed research paper. To research and write their paper, students may select to enroll in a 401 (Research) or 405 (Reading and Conference) course. Four credits of 401 or 405 may apply to the 24-credit requirement.

Political Science

<http://polisci.uoregon.edu>

Alison Gash, Department Head

175 Prince Lucien Campbell Hall
1284 University of Oregon
Eugene, OR 97403-1205
541-346-4864
polisci@uoregon.edu

Understanding the dynamics of politics, and how to make them serve you, is a critical element of understanding and shaping your own life. Studying political science teaches you how collective decisions are made — and how you can have a role in them — across all the arenas of your life. Within our close-knit community of scholars, you'll develop the critical thinking, analytic, writing, and sharp communication skills needed to examine the forces that shape our world.

Faculty

Yvette Alex-Assensoh, professor (immigration, racial politics) & vice president for equity and inclusion. BA, 1988, Columbia; MA, 1991, PhD, 1993, Ohio State; JD, 2006, Indiana, Bloomington. (2012)

Erin Beck, associate professor (Latin American politics, gender politics, international development, violence against women). BA, 2004, Providence College; MA, 2007, PhD, 2012, Brown. (2012)

Neil O'Brian, assistant professor (political parties, Congress, public opinion, polarization). BA, 2011, Case Western Reserve University; PhD, 2020, California, Berkeley. (2019)

Michael Brown, instructor (social and political theory, science, technology & society, incarceration, political economy). BA, 2007, Oregon; PhD, 2018, Michigan State. (2019)

Rutger Ceballos, assistant professor (American politics, political theory, race and American political development). BA, 2014, Washington; MA,

2016, Queen Mary – University of London; PhD, 2024, Washington. (2024)

Anita Chari, associate professor (political theory). BA, 2001, Georgetown; MA, 2003, PhD, 2008, Chicago. (2010)

Jane K. Cramer, associate professor (international relations, international security, US foreign policy). BA, 1986, Oberlin; PhD, 2002, Massachusetts Institute of Technology. (2000)

Dennis C. Galvan, professor (Africa, development, comparative politics); vice provost for international affairs. See **Global Studies**.

Alison Gash, professor (public law). BA, 1995, Vassar College; MPA-URP, 2000, Princeton; MA, 2004, PhD, 2010, California, Berkeley. (2010)

Burke Hendrix, professor (normative political theory, indigenous politics, global justice). BA, 1992, Linfield College; MA, 2000, PhD, 2002, Colorado, Boulder. (2012)

Ellen Alexandra Holtmaat, assistant professor (environmental politics, global governance, international political economy, business). BA, 2007, Utrecht University; MS, 2011, University of Amsterdam; MS, 2012, University of Essex; PhD, 2020, Geneva Graduate Institute. (2024)

Chandler James, assistant professor (American politics, US presidency, public opinion). AB, 2014, MA, 2020, PhD, 2023, Chicago. (2023)

Janel Jett, assistant professor (environmental politics, media and politics, political psychology). BA, 2008, University of Evansville; MA, 2018, PhD, 2021, Purdue. (2024)

Craig Kauffman, professor (environmental politics, global governance, democratization). BA, 1992, College of Wooster; MS, 1996, George Mason; PhD, 2012, George Washington. (2012)

Ronald B. Mitchell, professor (environmental politics, international relations). BA, 1981, Stanford; MPP, 1985, PhD, 1992, Harvard. (1993)

Mikhail Myagkov, professor (comparative politics, formal political theory). BS, 1990, Moscow Institute of Physics and Technology; MS, 1994, PhD, 1996, California Institute of Technology. (1996)

Craig Parsons, professor (comparative politics, European politics). BA, 1992, Stanford; CEP, 1993 Institut d'Etudes Politiques; MA, 1994, PhD, 1999, California, Berkeley. (2004)

Lars Skalnnes, associate professor (international political economy, international relations). CandMag, 1984, Bergen; MA, 1989, PhD, 1993, California, Los Angeles. (1992)

Daniel Tichenor, professor (immigration, civil rights, social movements, political parties, Congress, and the Presidency); Philip H. Knight Chair. BA, 1988, Earlham College; PhD, 1996, Brandeis. (2008)

Tuong Vu, professor (comparative politics, political economy, nationalism, revolution, East and Southeast Asia). BA, 1994, Minnesota, Twin Cities; MPA, 1997, Princeton; PhD, 2004, California, Berkeley. (2007)

Emeriti

William H. Baugh, associate professor emeritus. SB, 1963, Massachusetts Institute of Technology; MS, 1965, Rochester; MA, 1971, PhD, 1973, Indiana. (1978)

Deborah Baumgold, professor emerita. BA, 1971, Oberlin; MA, 1975, PhD, 1980, Princeton. (1987)

Gerald Berk, professor emeritus. BA, 1977, Clark; PhD, 1987, Massachusetts Institute of Technology. (1994)

Daniel Goldrich, professor emeritus. BA, 1955, Antioch; MA, 1957, PhD, 1959, North Carolina, Chapel Hill. (1963)

Arthur M. Hanhardt Jr., professor emeritus. BA, 1953, Rochester; M.A., 1958, Colgate; Ph.D., 1963, Northwestern. (1963)

Richard Kraus, professor emeritus. BA, 1966, Grinnell; certificate (East Asian Institute), 1969, MA, 1969, PhD, 1974, Columbia. (1983)

Jerry F. Medler, associate professor emeritus. BA, 1963, Northwestern; MA, 1965, PhD, 1966, Oregon. (1968)

Priscilla Southwell, professor emerita. BA, 1974, MA, 1977, Colorado; PhD, 1983, North Carolina, Chapel Hill. (1981)

Richard P. Suttmeier, professor emeritus. AB, 1963, Dartmouth College; PhD, 1969, Indiana. (1990)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Major - Doctoral Degree

- Political Science (PhD) (p. 410)

Political Science (BA/BS)

As a political science major at the University of Oregon, you'll gain an in-depth understanding of how power, politics, and people converge. Understanding politics and how to make them better serve the community is a critical element in shaping your own possibilities. From concentrations in global affairs and international trade to mediating local council meetings and analyzing societal reactions, there are a wide range of opportunities within our political science community. A degree in political science teaches you how collective decisions are made and how our government works—or doesn't.

You will study political theory and international and national politics as you develop critical thinking, analytic and writing abilities, and sharp communication. These skills lead into a wide variety of careers. Our program opens doors to graduate work and professional opportunities in law, business, government, teaching, journalism, and social activism. Our students' substantive expertise in political institutions, key policy issues, ideology, law and regulation, and political identities empowers them to successfully navigate—and change—the world that awaits beyond UO.

This program is designed to

1. provide students with substantive expertise in political institutions, key policy issues, salient ideologies, law and regulation, and political identities in local, national, and global contexts
2. prepare students for graduate work or professional careers in law, business, government, teaching, journalism, social activism, or the academic community

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Recognize and describe major variations in political institutions and policy processes.
- Recognize the defining features of major political ideologies and their conceptual relations to one another.
- Identify sources and expressions of various forms of inequality, as well as different ways that groups challenge inequalities through the exercise of different forms of power and agency.
- Identify and evaluate multiple explanations for why political processes or policy outcomes vary across countries, policy realms, and time.
- Evaluate a theoretical claim against alternative theoretical approaches using appropriate methods and evidence in a written paper, oral presentation, and/or other creative output.
- Demonstrate engagement with social and political issues, including through politically-related employment or internships, regular critical reading about current events, or other forms of policy and political experience.

Political Science Major Requirements

Code	Title	Credits
Lower-division credits		16
Two courses must be at the 100-level		
Two courses must be at the 200-level		
Upper-division credits ¹		32
Eight credits must be at the 400-level ²		
Total Credits		48

¹ A minimum of 20 upper-division credits must be completed in residence at the University of Oregon.

² A minimum of eight credits from courses numbered 407, 410, or 412–499 are required.

Additional Requirements

The 48 credits that satisfy major requirements must be taken for letter grades and passed with C– or better with the exception that one course (as many as 4 credits) may be taken pass/no pass (P/N). Courses such as Thesis (PS 403) and Honors Thesis Prospectus (PS 411) are offered pass/no pass only and may be applied to the 48 credits. Credits earned in PS 409 may not be applied to the major.

No more than a total of 16 credits in Research: [Topic] (PS 401), Thesis (PS 403), Internship: [Topic] (PS 404), Reading and Conference: [Topic] (PS 405), Workshop: [Topic] (PS 408), Honors Thesis Prospectus (PS 411), Career Readiness (CAS 417), and Overseas Study: Internships (OINT 488) may be applied toward the 48-credit requirement. Overseas Study: Internships (OINT 488) is subject to preapproval by the political science department.

8 of the 16 credits may be from Internship: [Topic] (PS 404) , LERC 406 , and Overseas Study: Internships (OINT 488) and must be earned at the University of Oregon or through UO programs abroad. This work must be done under the direction of a faculty member who, prior to registration, must approve and set up academic criteria to evaluate the work.

Students must take at least one Political Theory course at any level. Other courses may apply, please ask an advisor.

Code	Title	Credits
Political Theory Courses		
PS 206	Ethics, Identity, and Power	
PS 308	United States Political Thought	
PS 309	Political Ideologies	
PS 310	Roots of Democracy	
PS 311	Sovereignty and Revolution	
PS 312	Shadows of Modernity	
PS 372	Music and Politics	
PS 390	American Indian Politics	
PS 391	Non-Western Political Theory	
PS 433	Marxism and Radical Thought	
PS 458	Feminist Political Theories	
PS 472	Matters of Life and Death	

Honors in Political Science

Political science majors who have reached junior standing and meet GPA minimums are eligible to enter the honors program. The honors program spans the spring term of a student's junior year to the spring term of senior year. GPA minimums must be maintained to participate—an overall grade point average for UO and transfer credits of at least 3.50, plus a 3.70 GPA or above in the political science major. Students must successfully complete Honors Thesis Prospectus (PS 411) during fall term of the academic year in which the thesis is completed, then complete 4 credits in Thesis (PS 403) in the following winter term. Honors students select a thesis advisor and reader; the advisor supervises and grades the thesis course. The thesis advisor and reader determines if the thesis is approved for honors distinction after eligibility is determined prior to graduation.

Political Science Minor

The minor in political science teaches you how collective decisions are made—and how you can have a role in them—across all the arenas of your life. Our program prioritizes a concrete skill set of critical thinking, analytic and writing abilities, and sharp communication.

Minor Requirements

Code	Title	Credits
Political science courses		8
Upper-division political science courses ¹		16
Total Credits		24

¹ Only 6 credits may be in Research: [Topic] (PS 401), Reading and Conference: [Topic] (PS 405), and Workshop: [Topic] (PS 408).

All credits must be taken for letter grades and passed with grades of C– or better. As many as 8 credits may be transferred from another institution.

Thesis (PS 403), Internship: [Topic] (PS 404), Honors Thesis Prospectus (PS 411), Overseas Study: Internships (OINT 488), and LERC 406 do not count toward the minor.

Political Science (PhD)

This program is designed to allow the well-prepared student to complete course requirements for the PhD in two years of full-time study. Students complete a research paper in their second year and take comprehensive examinations during their third year, followed by preparation of a dissertation.

Program Learning Outcomes

- Upon successful completion of this program, students will be able to:
- Demonstrate mastery of the literature, empirical tools, and theoretical models used in at least one subfield in the discipline of political science (American Politics, Comparative Politics, International Relations, or Political Theory), and strong familiarity with a second subfield.
 - Demonstrate the ability to identify and answer original research questions by designing and producing publishable research.
 - Develop the ability to communicate original research, both written and verbal.
 - Develop the ability to teach foundational, intermediate, and field courses at the undergraduate level.
 - Achieve the doctoral degree within six years.

PhD in Political Science

This program is designed to allow the well-prepared student to complete course requirements for the PhD in two years of full-time study. Students complete a research paper in their second year and take comprehensive examinations during their third year, followed by preparation of a dissertation. Requirements for the PhD in political science include the following:

1. Completion of 100 credits (18 credits are for dissertation) beyond the bachelor's degree. Research: [Topic] (PS 601) and Reading and Conference: [Topic] (PS 605) may be taken pass/no pass. All other course work must be taken for letter grades
2. Demonstrated proficiency in quantitative and qualitative research methods
3. Completion of a research paper no later than the sixth term of enrollment (excluding summer)

4. Completion of required seminars in the two area fields in which the student takes comprehensive examinations. Students should take these seminars as early as possible, and prior to examination
5. Passing two comprehensive examinations: one major field and one minor field, selected from the list below. Each field comprises several themes from which the student must choose a subset
 - classical and contemporary political theory
 - comparative politics
 - international relations
 - public policy
 - United States politics
6. After passing the comprehensive examinations, completion of PS 621 and 18 credits in Dissertation (PS 603), to be taken while completing the PhD dissertation
7. Defense of the written dissertation in an oral examination

Code	Title	Credits
Seminar Requirement		
A minimum of 10 credits must be from required field core seminars that thematically parallel the student's comprehensive exams. Core seminars by subfield are listed below:		
Comparative Politics		
PS 628	States and State-Society Relations	
PS 629	Comparative Political Economy	
PS 630	States and Regimes	
International Relations		
PS 624	International Relations	
PS 626	International Political Economy	
Political Theory		
PS 622	Political Theory	
United States Politics		
PS 607	Seminar: [Topic] (American Politics Pro-Seminar)	
One 600-level U.S. political science seminar		
One additional 500- or 600-level U.S. political science course		
Public Policy		
PS 625	Public Policy	
Select one of the following:		
PS 566	Civil Rights in Post-Warren Era	
PS 567	The United States Presidency	
PS 577	International Environmental Politics	
PS 595	United States Political Economy	
PS 630	States and Regimes	
Methods Requirement		
PS 545	Methods for Politics and Policy Analysis I ¹	
PS 546	Methods for Politics and Policy Analysis II ¹	
PS 612	Qualitative Methods	
PS 613	Interpretive Methods in Political Science	
PS 614	Research Design	
PS 621	Dissertation Prospectus	
Supervised College Teaching		
PS 615	Teaching and Learning in Politics and Policy	

Professional Development

PS 616	Professionalization in Politics and Policy: [Topic] ²

Dissertation

PS 603	Dissertation

Total Credits **100**

¹ If PS 545 and/or 546 are not offered during a specific year, the Graduate Coordinator will notify students of the quantitative methods courses that will count towards this requirement.

² Taken twice in the first year (Winter and Spring terms)

A complete description of graduate requirements, including an explanation of themes and field requirements, is available on the department website (<http://polisci.uoregon.edu/>).

Sociology

<http://sociology.uoregon.edu>

Giannbin Shiao, Department Head

175 Prince Lucien Campbell Hall
1291 University of Oregon
Eugene, OR 97403-1205
541-346-5002
sociology@uoregon.edu

Sociology is the systematic study of human social life, groups, and societies. Sociology can reveal how society works, what motivates individuals to behave in certain ways, how particular rules and norms get established, why people obey those rules and norms, how seemingly invisible social forces might govern our behavior, and how the outcome of our lives are frequently determined by forces largely outside of our control. It can even help us understand why we might sometimes act in ways that are contrary to our deeply held beliefs.

Sociologists study how societies form, change, and die out. They study how society affects you and vice versa. The department curriculum focuses on social institutions—the family, work, religion, and the economy; culture—the governing ideas and beliefs of a society; and social interactions—the way people behave as individuals and in groups. Taken together, they make up what sociologists call the social structure: enduring, patterned, orderly relationships among institutions, people, and other elements of a given society. Through a systematic study of society, sociology helps us understand social problems such as inequality, racism, environmental degradation, and poverty, to name a few, and aids in the development of creative solutions to solve them.

Faculty

Michael B. Aguilera, associate professor (international migration, race & ethnicity, economic sociology, social inequality, public health, social networks). BA, 1995, California, Irvine; MA, 1995, PhD, 1999, State University of New York, Stony Brook. (2004)

Oluwakemi Balogun, associate professor (gender, race and migration, African Studies). See **Women's, Gender, and Sexuality Studies**.

Michael Brown, instructor (social and political theory, science, technology & society, incarceration, political economy). BA, 2007, University of Oregon; PhD, 2018, Michigan State. (2023)

MacKenzie A. Christensen, assistant professor (digital sociology, gender, marriage and family). BA, 2015, Washington State, Vancouver; MS, 2018, Portland State; MA, 2022, PhD, 2024, California, Irvine. (2024)

Michael C. Dreiling, professor (political sociology, environmental sociology, social movements). BA, 1990, California, Irvine; MA, 1993, PhD, 1997, Michigan, Ann Arbor. (1996)

Clare R. Evans, associate professor (medical sociology, quantitative methods, social networks). BA, 2008, Lewis and Clark College; MPH, 2011, Columbia; ScD, 2015, Harvard. (2015)

Isabel García Valdivia, assistant professor (immigration, race & ethnicity, Latine/x Sociology, life course and aging). BA, 2014, Pomona College; MA, 2017, PhD, 2022, California, Berkeley. (2024)

Aaron O. Gullickson, associate professor (race and ethnicity, stratification, demography). BA, 1998, Washington (Seattle); MA, 1999, 2001, PhD, 2004, California, Berkeley. (2007)

Jill A. Harrison, associate professor (work, organizations, qualitative methods). BA, 2000, Youngstown State; MA, 2004, PhD, 2009, Ohio State. (2009)

Claire W. Herbert, associate professor (crime & socio-legal studies, housing, urban sociology, race, poverty & inequality). BS, 2006, University of Oregon; MA, 2014, University of Michigan; PhD, 2016, University of Michigan. (2019)

Nathalia Hernández-Vidal, assistant professor (environmental sociology, racial and ethnic relations, science and technology). PhD, 2020, Loyola University Chicago. (2023)

Jocelyn Hollander, professor (gender, microsociology, gender-based violence). BA, 1987, Stanford; MA, 1991, PhD, 1997, Washington (Seattle). (1997)

Raoul S. Liévanos, associate professor (environment and health, race and ethnicity, science and technology). BA, 2004, California State, Fresno; MA, 2007, PhD, 2013, California, Davis. (2016)

Ryan Light, professor (cultural sociology, inequality, social networks). BA, 2000, Kenyon College; MA, 2004, PhD, 2009, Ohio State. (2009)

Krystale Littlejohn, associate professor (health and medicine, social cognition, inequality). BA, 2007, Occidental College; MA, 2010, PhD, 2013, Stanford. (2019)

Julius McGee, associate professor (race, class, and gender, environmental sociology). PhD, 20017, Oregon. (2021)

Kari Marie Norgaard, professor (environmental sociology, gender and environment, race and environment, climate change, sociology of culture, social movements and sociology of emotions). BS, 1992, Humboldt State; MA, 1994, Washington State; PhD, 2003, Oregon. (2011)

Matthew Norton, associate professor (political and cultural sociology, theory). BA, 1998, Villanova; MA, 2002, Bradford; PhD, 2012, Yale. (2012)

C. J. Pascoe, professor (sexuality and gender, childhood and youth, new media). BA, 1996, Brandeis; MA, 2000, PhD, 2006, California, Berkeley. (2013)

Elaine Replogle, associate teaching professor (sociology of medicine and mental health, culture, qualitative methods). BA, 1989, Earlham College; MTS, 1994, Harvard; MA, 2002, PhD, 2005, Rutgers. (2008)

Ellen K. Scott, professor (low-wage work, public policy, gender). BA, 1982, Williams; MA, 1991, New School for Social Research; MA, 1992, PhD, 1997, California, Davis. (2001)

Giannbin Lee Shiao, professor (race and ethnicity, research methods, Asian America). BA, 1991, Brown; MA, 1994, 1996, PhD, 1998, California, Berkeley. (1998)

Jessica Vasquez-Tokos, professor (race and ethnicity, immigration, family). BA, 1998, Princeton; MA, 2002, PhD, 2007, California, Berkeley. (2012)

Byron Villacis, assistant professor (demography, sociology of statistics, economic sociology, sociology of expertise, and sociology of corruption). BA, 2001, U. San Francisco Quito-Ecuador; MSc, 2005, FLACSO Quito-Ecuador; MA, 2015 California, Berkeley; PhD, 2023, California, Berkeley. (2023)

Hannah Waight, assistant professor (computational sociology, digital media, China, information). AB, 2010, AM, 2014, Harvard; MA, 2017, PhD, 2022, Princeton. (2024)

Stephanie Wiley, instructor (criminology, juvenile delinquency, race and punishment, school discipline). BS, 2006, Western Oregon; MS, 2008, Portland State; PhD, 2014, University of Missouri - St. Louis. (2023)

Richard York, professor (environmental sociology, statistics, research methods). BS, 1994, Southern Oregon; MS, 1997, Bemidji State; PhD, 2002, Washington State. (2002)

Emeriti

Vallon L. Burris, professor emeritus. BA, 1969, Rice; PhD, 1976, Princeton. (1977)

John Bellamy Foster, professor emeritus. BA, 1975, Evergreen State; MA, 1977, PhD, 1984, York. (1985)

Marion Sherman Goldman, professor emerita. AB, 1967, California, Berkeley; MA, 1970, PhD, 1977, Chicago. (1973)

Patricia A. Gwartney, professor emerita. AB, 1973, California, Berkeley; MA, 1979, PhD, 1981, Michigan. (1981)

Kenneth B. Liberman, professor emeritus. BA, 1970, State University of New York, Old Westbury; MA, 1976, PhD, 1981, California, San Diego (1983)

Gregory McLauchlan, professor emeritus. BA, 1974, MA, 1978, PhD, 1988, California, Berkeley. (1989)

Robert M. O'Brien, professor emeritus. BS, 1967, Pomona; MS, 1970, PhD, 1973, Wisconsin. (1981)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

- Sociology (BA/BS) (p. 412)

Minor

- Criminology (p. 415)
- Sociology (p. 414)

Graduate Programs

Major - Doctoral Degree

- Sociology (PhD) (p. 416)

Sociology (BA/BS)

Sociology is the systematic study of human groups and societies -- how they develop, how they are structured, and how they function. Like human society itself, the field of sociology is extremely broad. Sociologists study the social world, from small groups of friends and families, to formal organizations, such as universities and corporations, to entire nations. We look at social relationships and interactions, at power and conflict, at structures that hold societies together, and at how societies change.

Hands-on learning and applied sociology are key aspects of our program. Options available to students include, but are not limited to participating in the Inside/Out Program partnered with a class at Oregon State Penitentiary, the Sociology Honors program where students produce their own research and write a thesis, presenting original research at the Undergraduate Research Symposium, a wide variety of community outreach and research internships, peer advising and mentoring, and more.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop a sociological imagination allowing them to analyze and evaluate fundamental features of society, including social conflict, inequalities, institutions, group relations, the experiences of individuals, and human interactions with the earth's natural environment.
- Recognize and understand major theoretical traditions and be able to use sociological theories to critically analyze systems of social power, institutions, human difference, or behavior.
- Be proficient in basic research methods including interviews, direct observation, content analysis, and surveys. They will know how to collect and analyze data, and how to identify appropriate methods for answering different sociological questions.
- Develop literacy with statistical methods for describing numerical data and for drawing inferences from samples to populations. They will be able to understand statistical models and evaluate quantitative research results.
- Be able to apply their theoretical and empirical knowledge to complex social problems, and to assess the quality of evidence for competing claims regarding social issues.

Courses used to satisfy major requirements must be taken for letter grades and passed with grades of C– or better; at least a 2.00 grade point average (GPA) must be achieved in these courses. Four credits from a course not numbered 401–409 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major.

Courses numbered 401–406 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major. No more than 8 credits from these courses may be applied to the major.

Concentrations

- General Sociology (p. 413)
- Critical Thinking with Data (p. 413)
- Culture, Identities, and Institutions (p. 413)
- Environment, Health, and Community (p. 414)
- Inequalities, Crime, and Social Justice (p. 414)

General Sociology

Work in sociology begins with Introduction to Sociology (SOC 204Z) or Social Inequality (SOC 207), both of which provide an introduction to the discipline. They emphasize how sociology can be applied to contemporary social issues. Students specializing in general sociology move on to courses that provide a more in-depth study of social institutions. Courses on social stratification, social psychology, social change, and sociological theory help to tie these diverse areas together by providing perspectives that are useful in the study of any institutional area. Finally, courses in methodology and statistics provide a tool kit of analytical and research skills that are useful both in sociology courses and in whatever activities the student pursues after graduation.

Sociology Major Requirements

Code	Title	Credits
Core Courses		
SOC 204Z	Introduction to Sociology (May be replaced by SOC 207 Social Inequality)	4
SOC 310	Social Theory	4
SOC 311	Research Methods	4
SOC 312	Statistical Analysis in Sociology ¹	4
Upper-Division Courses		
400-level lecture courses (407, 410–499) ²		12
300- or 400-level courses ³		8
Additional Courses		
Sociology courses (any level) ³		12
Total Credits		48

¹ STAT 243Z, MATH 425, or PSY 302 can be taken as substitutes for SOC 312. If STAT 243Z is substituted for SOC 312 then at least 4 credits of the Additional Course requirement must be upper-division.

² These credits must be earned at the University of Oregon.

³ CAS 417 and LERC 406 may be applied to these credits

Sociology Minor

Sociology is the scientific study of human groups and societies - how they develop, how they are structured, and how they function. Sociologists look at social relationships and interactions, power and conflict, structures that hold societies together, and how societies change. The undergraduate program in sociology at the University of Oregon is designed to provide a broad understanding of human society for students in all fields. The Minor in Sociology is a popular choice for students in other fields who wish to enhance their understanding of society and the behavior of people.

Minor Requirements

The minor in sociology complements a major in another discipline. Courses used to satisfy requirements for the minor must be taken for letter grades and passed with grades of C– or better.

- Of the 24 credits required in sociology courses, 12 must be upper division
- 12 credits must be taken in residence at the University of Oregon; 8 of those credits must be upper division
- No more than 8 credits from the sociology minor may be used to complete the requirements of another major or minor

Code	Title	Credits
Select one from the following:		4
SOC 204Z	Introduction to Sociology	

SOC 207	Social Inequality	
Select one of the following: ¹		4
SOC 310	Social Theory	
SOC 311	Research Methods	
SOC 312	Statistical Analysis in Sociology ²	
Other sociology courses ^{3,4}		16
Total Credits		24

¹ Students in the minor may take 400-level courses only after completing this requirement. Exceptions may be made by instructor permission.

² STAT 243Z, MATH 425, or PSY 302 can be taken as substitutes for SOC 312.

³ No more than 4 credits in courses numbered 401–406 may be applied to the minor.

⁴ LERC 406 may be applied to these credits.

Criminology Minor

Who defines crime and criminal behavior? Why do people commit crimes? What does society do, and what can society do better to prevent and respond to crime? The criminology minor gives students the tools to analyze how society defines, regulates and tries to prevent crime, as well as considering social issues and structures that may cause people to break laws. The minor program in criminology allows students to pair their majors with an exploration of issues of crime and the criminal justice system.

The criminology minor affords students the opportunity to analyze how society defines, regulates and seeks to prevent criminal behavior as well as considering what factors lead people to commit crimes.

Courses address the role of systemic inequality and state violence in relation to crime. Students select courses from multiple social scientific disciplines including sociology, anthropology, political science, psychology and indigenous, race and ethnic studies to gain an understanding of the nature of crime, including the social and cultural factors contributing to criminal behavior and institutional efforts to prevent it. They also gain skills in analyzing evidence as well as identifying, apprehending and rehabilitating perpetrators.

General Social Science major with Crime, Law, and Society concentration cannot minor in Criminology minor.

Criminology Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

Total Credits		36

¹ Up to 4 credits of internship or practicum can be applied towards the minor.

Additional Requirements

- At least 16 credits must be at the upper-division level

Residency Requirements

- At least 24 minor credits must be taken at UO.

Sociology (PhD)

The Department of Sociology offers graduate work leading to a doctor of philosophy (PhD) and is intended for students seeking a professional career in research and teaching in both academic and nonacademic settings. The department does not offer a terminal master's degree, although students enrolled in the PhD program will also receive a master's degree as part of their training.

Students receive training in qualitative and quantitative research methodologies, sociological theory, and major substantive fields within sociology such as gender, sexuality, environment, race and ethnicity, culture, social networks, labor, immigration, and political economy. The department places a strong emphasis on research, and many students will find opportunities to participate in projects conducted by faculty members.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of core sociological knowledge and knowledge of several sub-fields within sociology.
- Become proficient in research design, primary or secondary data collection, and empirical data analysis.
- Demonstrate independent scientific thinking and advance knowledge within the discipline of sociology.
- Demonstrate effective oral and written communication skills reflective of presenting, publishing, and writing standards in sociology and the broader social sciences.
- Understand career practices, including, for example, ethical issues with regard to human subjects research, teaching, and related professional standards and responsibilities.

Sociology Major Requirements

Code	Title	Credits
Introduction		5
SOC 607	Seminar: [Topic]	
Methods		23
SOC 512	Sociological Research Methods	
SOC 513	Sociological Research Methods	
SOC 612	Overview of Sociological Methods	
SOC 613	Advanced Sociological Methods: [Topic] (taken twice for 5 credits each)	
Theory		15
SOC 615	Advanced Sociological Theory: [Topic]	
SOC 617	Sociological Theory I	
SOC 618	Sociological Theory II	
Substantive Seminars		15

Students must take at least three substantive graduate seminars. Any of the seminars may be taken more than once, so long as the class content differs substantially each time. Examples include:

SOC 616	Environment and Resource Issues: [Topic]	
SOC 644	Race and Ethnicity Issues: [Topic]	
SOC 656	Issues in Sociology of Gender: [Topic]	
SOC 664	Political and Economic Sociology Issues: [Topic]	
Master's Paper Project ¹		5
SOC 608	Workshop: [Topic]	
Electives		15

Students must complete three additional courses. These courses can include:

Additional advanced theory (SOC 615), advanced methods (SOC 613), or substantive seminars within the department beyond the basic requirements listed above.

500-level sociology courses or an independent study course (SOC 601 Research or SOC 605 Reading) with a faculty advisor. This requires the student and their supervising faculty member to agree to a specific reading list, regular meeting times, and a paper is required at the end of the term. Only one 500-level and one independent study course can each be used to meet elective requirements.

SOC 621 Teaching in the Social Sciences	
SOC 610	Experimental Course: [Topic] ²
Dissertation	18
SOC 603	Dissertation
Total Credits	
96	

¹ Students who have earned a master's degree from another program must still complete the master's paper requirement from the department as one of the steps toward earning the PhD.

² Depending on the topic, 610 may be eligible to fulfill other program requirements.

Code	Title	Credits
SOC 601	Research: [Topic]	1-16
SOC 603	Dissertation	1-16
SOC 605	Reading and Conference: [Topic] ¹	1-16
SOC 606	Field Studies: [Topic]	1-12
SOC 608	Workshop: [Topic]	1-16

¹ In some cases, Reading and Conference: [Topic] (SOC 605) must be taken for a grade. Consult with the graduate coordinator.

Master's-Level Requirements

Students typically complete 55 credits of master's-level requirements in the first six terms of full-time work. Students are awarded a master's degree if they have completed their required courses, achieved a mid-B or better average in their graded courses, and passed the master's paper requirement. Students who enter with a master's degree in sociology may request substitution of as many as five courses from their previous institutions to meet programmatic requirements.

Doctoral-Level Requirements

After earning the master's degree, students take an additional 20 credits of doctoral-level course work and prepare for a comprehensive examination in a sociological subfield chosen jointly by the student and the advisor.

Upon passing the comprehensive examination, the student is advanced to PhD candidacy and begins work on the doctoral dissertation. The final product is a book-length manuscript presenting empirical research that demonstrates originality and the scholar's ability to conduct independent investigation.

Women's, Gender, and Sexuality Studies

Kristin Yarris, Department Head

313 Prince Lucien Campbell Hall
541-346-1363
asu5@uoregon.edu

The Department of Women's, Gender, and Sexuality Studies offers students an interdisciplinary curriculum that focuses on the diverse experiences of women in both national and international contexts. The department also examines the meaning of gender as a socially constructed category that shapes personal identities, beliefs, opportunities, and behaviors. The wide range of courses explores the intersections of gender, race, class, and sexuality; the institutional structures that have an impact on women's and men's lives; and the broad range of feminist theory that seeks to explain and influence women's status in society. Among the areas of emphasis in women's, gender, and sexuality studies are gender and sexuality, queer studies, third-world feminism, cultural representation and literature, women and labor, feminist theory, critical race feminism, immigration and citizenship, and social activism.

Core and affiliated faculty members in the department come from a wide range of disciplinary perspectives including history, literature, anthropology, sociology, geography, environmental studies, ethnic studies, philosophy, religious studies, architecture and fine arts, music, Romance and Germanic languages, political science, public policy, and law.

Any student may take women's, gender, and sexuality studies courses. Some students take a few courses to complement the curriculum in another major. Others choose to fulfill the requirements for a major in women's, gender, and sexuality studies or a minor in women's, gender, and sexuality studies or in queer studies.

Faculty

Oluwakemi Balogun, associate professor (globalization, nationalism, African studies). BA, 2003, Pomona College; PhD, 2012, California, Berkeley. (2013)

Jamie M. Bufalino, associate teaching professor (gender and sexuality in US history, history of feminism, US consumer culture). See **History**.

Ana-Maurine Lara, associate professor (Black feminisms, decolonial theories and methodologies, speculative fiction and poetry). BA, 1997, Harvard-Radcliffe University; MA, 2012, Yale University; PhD, 2014, Yale University. (2015)

Isabel Millán, assistant professor (Latino and Chicano studies, transnational feminism, women and queer of color theory). BA, 2004, California, Santa Barbara; MA, 2007, San Francisco State; PhD, 2013, Michigan, Ann Arbor. (2018)

Judith Raikin, associate professor (postcolonial literature, feminist theory, sexuality). BA, 1979, California, Berkeley; MA, 1981, Chicago; PhD, 1989, Stanford. (1995)

Yvette Saavedra, assistant professor (Chicana/o history, US history, gender and sexuality history). BA, 2001, Pitzer College; MA, 2003, University of Texas, El Paso; PhD, 2013, University of Texas, El Paso. (2019)

Carol Stabile, professor (gender, race, and class in the media). AB, 1983, Mount Holyoke College; MA, 1985, PhD, 1992, Brown. (2008)

Kristin Yarris, associate professor, (disability studies, global studies, women's gender and sexuality studies). BA, 1994, Lewis & Clark College; MA, 2007, PhD 2011 UCLA. (2012)

Emerita

Barbara Corrado Pope, professor emerita. BA, 1964, Hiram; MA, 1966, Iowa; PhD, 1981, Columbia. (1976)

Linda O. Fuller, professor emerita. BA, 1966, MA, 1977, PhD, 1985, California, Berkeley. (1989)

Elizabeth Reis, professor emerita. AB, 1980, Smith; MA, 1982, Brown; PhD, 1991, California, Berkeley. (2002)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

- Women's, Gender, and Sexuality Studies (BA/BS) (p. 418)

Minors

- Queer Studies (p. 422)
- Women's, Gender, and Sexuality Studies (p. 421)

Graduate Programs

Certificate

- Women's, Gender, and Sexuality Studies (p. 423)

Women's, Gender, and Sexuality Studies (BA/BS)

The major in women's, gender, and sexuality studies explores gender and sexuality in all areas of life – political, cultural, economic and bodily dimensions. Through interdisciplinary courses, students examine how gender, race, class, sexualities, and abilities shape personal identities, beliefs, opportunities, and behaviors. They also explore multiple dimensions of power in courses on black feminist theories, transnational feminisms, and feminist histories, literature and the arts. The department is committed to critical views and ideas that encourage possibilities for transformation and change.

In the Department of Women's, Gender, and Sexuality Studies, students challenge the status quo by asking questions of themselves and the communities and worlds around them. The department's majors revisit and revise histories, understand and evaluate economic disparities, and through creative problem solving, learn to effect social change.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop a broad understanding of feminist studies, histories, and theories through interdisciplinary, intersectional, and transnational conceptual lenses.

- Develop skills in critical thinking and analysis through feminist research and methods.
- Communicate complex information and ideas (e.g., feminist theory) in a written manner that is clear and accessible.
- Apply feminist knowledge and skills to real-world problems in order to participate in social justice activism and civic engagement.

Graded courses in the major must be completed with grades of C– or higher. No more than 8 credits taken pass/no pass in these courses may be counted toward the major.

At least 36 credits must be in upper-division courses; of those 36 credits, as many as 12 may be approved in other subject codes with advisor approval. At least 16 credits applied to the major must be taken at the University of Oregon. Women's, gender, and sexuality studies (WGS) majors must attain a grade point average of 2.50 or higher in courses applied to the major. No more than 8 credits from another major or minor may count toward the major.

Women's, Gender, and Sexuality Studies Major Requirements

Code	Title	Credits
WGS 101	Introduction to Women's and Gender Studies	4
Two 200-level WGS courses		8
Select eight of the following: ¹		32
WGS 303	Women and Gender in American History	
WGS 315	History and Development of Feminist Theory	
WGS 321	Feminist Perspectives on Identity, Race, Culture	
WGS 322	Queer Theory	
WGS 331	Science, Technology, and Gender	
WGS 341	Women, Work, and Class	
WGS 350	Literature as Feminist Theory	
WGS 351	Decolonial Feminisms	
WGS 361	Gender, Film and the Media	
WGS 407	Seminar: [Topic]	
WGS 409	Terminal Project	
WGS 421	Bodies and Embodiment	
WGS 422	Sexuality Studies: [Topic]	
WGS 432	Gender, Environment, and Development	
WGS 450	Literature and Feminist World-Making	
WGS 451	Global Perspectives on Gender: [Topic]	
Independent Study courses - see below		
Pre-approved non-WGS subject code courses - see below		
WGS 411	Feminist Praxis ²	4
Total Credits		48

¹ Students may choose one of two options to satisfy the eight-course requirement:

- Choose three 300-level courses and five 400-level courses
- Choose four 300-level courses and four 400-level courses

² Offered fall term only.

Independent Study Courses

8 credits of Independent Study (IS) courses can count towards the major, unless pursuing an Honors Thesis. WGSS majors pursuing an Honors Thesis can apply up to 12 credits (this needs an exception granted by the Director of Undergraduate Studies). IS credits can be taken Pass/No Pass or graded. If students decide to take the credits Pass/No Pass, these courses will count toward the maximum allowable 8 Pass/No Pass for the major.

Code	Title	Credits

SOC 455	Issues in Sociology of Gender: [Topic]	
SOC 456	Feminist Theory	
SOC 457	Sex and Society	

Senior Honors Thesis

Students interested in producing a substantial piece of original research and writing may elect to write a senior thesis in women's, gender, and sexuality studies.

To be eligible to write an honors thesis, students should have a cumulative GPA of 3.50 in WGS courses. Students who satisfy the major requirements, maintain throughout their undergraduate studies at Oregon a GPA of 3.50 or above in courses in the major, and submit a copy of the honors thesis approved by their committee to the department receive a baccalaureate degree with honors in women's, gender, and sexuality studies.

Thesis Criteria

A thesis must be based on a student's original research. Depending on the discipline, it can be a written paper that presents the results of the research. Theses average between 30 and 50 pages, including notes and bibliographies.

Only theses that meet the following criteria will be approved and awarded honors:

- Identifies a clear and original topic or research question
- Demonstrates knowledge of the literature concerning that topic or research question in the field of gender studies by reviewing that body of literature and providing a substantive bibliography
- Provides an analysis of the topic or research question, using clearly identified methodology
- It uses the citational style appropriate to its disciplinary focus
- The thesis is mindful of the relationships among gender, race, class, ability, and national identity as these pertain to the object of study

Students producing a senior thesis should expect to do the following work over the course of a full year prior to their graduation. In the spring and summer before the thesis writing begins, students need to identify a primary advisor (first reader) and a second reader, both of whom are either a faculty member in the department or an affiliated faculty member (see faculty list). If an affiliated faculty member is the first reader, then the instructor of Reading and Conference: [Topic] (WGS 405) will be the second reader.

In fall, students should register for Reading and Conference: [Topic] (WGS 405) (1–4 variable credits) with their thesis advisor and submit a timeline for completion of the thesis to the thesis advisor.

By the end of the fall term, students should complete a draft of a research proposal that is five to eight pages in length and includes a literature review, a short section on the methods that will be used, research questions or a thesis statement (depending on the discipline), and a bibliography.

Research proposals must be approved by the thesis advisor and a copy must be submitted to the department. If an affiliate faculty member is the thesis advisor, the proposal must be approved by the student's primary advisor in the department as well.

In winter, students should register for Thesis (WGS 403). Using the timeline submitted in the fall, students spend winter term conducting research and writing the thesis in consultation with their advisor. By the end of winter term, research should be complete and thesis writing should be significantly underway.

In spring, students write, revise, and produce a final draft of the thesis following the timeline submitted in the fall. By no later than the end of the fifth week of the term, students must submit their final thesis to their departmental advisor, their affiliate advisor, or both. Upon approval, students must submit a copy of their final thesis to the department head.

The student's performance on the thesis and on courses taken during the senior year will be reviewed before the honors distinction is granted. Obtain complete instructions and required forms from the department office.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The degree plan shows courses that are solely within the department (subject code WGS) and suggestions for arranging general-education courses, language courses, and mathematics courses. The plans below do not necessarily include sufficient courses to meet the 180-credit minimum to graduate.

It is suggested that students look for courses that meet the multicultural requirements when taking general-education requirements.

Women's, Gender, and Sexuality Studies Minor

Students must apply for the WGSS minor in the Women's, Gender, and Sexuality Studies office well in advance of graduation for transcript evaluation.

Graded courses in the minors must be completed with grades of C– or higher. No more than 8 credits taken pass/no pass in these courses may be counted toward the minors.

A minimum of 16 credits applied to the minors must be taken at the University of Oregon. No more than 8 credits from other majors or minors may count toward the minors for women's, gender, and sexuality studies and queer studies.

Women's, Gender, and Sexuality Studies Minor Requirements

Code	Title	Credits
WGS 101	Introduction to Women's and Gender Studies	4
One 200-level WGS course		4
Select three of the following:		12
WGS 303	Women and Gender in American History	
WGS 315	History and Development of Feminist Theory	
WGS 321	Feminist Perspectives on Identity, Race, Culture	
WGS 322	Queer Theory	
WGS 331	Science, Technology, and Gender	
WGS 341	Women, Work, and Class	
WGS 350	Literature as Feminist Theory	
WGS 351	Decolonial Feminisms	
WGS 361	Gender, Film and the Media	
WGS 407	Seminar: [Topic]	
WGS 409	Terminal Project	
WGS 411	Feminist Praxis	
WGS 421	Bodies and Embodiment	

WGS 422	Sexuality Studies: [Topic]	
WGS 432	Gender, Environment, and Development	
WGS 450	Literature and Feminist World-Making	
WGS 451	Global Perspectives on Gender: [Topic]	
Independent Study courses - see below		
Choose one 300- or 400-level WGS elective or an advisor-approved course with another subject code		4
ANTH 315	Gender, Folklore, Inequality	
CLAS 314	Gender and Sexuality in Antiquity	
COLT 360	Gender and Identity in Literature	
ES 330	Women of Color Issues and Concerns	
FLR 370	Folklore and Sexuality	
GER 354	German Gender Studies	
GLBL 465	Global Reproductive Health	
HIST 308	History of Women in the United States I	
HIST 309	History of Women in the United States II	
JCOM 301	Gender, Media and Diversity	
PHIL 315	Introduction to Feminist Philosophy	
PS 348	Women and Politics	
PS 368	Gender in the Law	
PS 380	Gender and Politics in Developing Countries	
PS 465	LGBT Rights in the Courts	
PSY 380	Psychology of Gender	
SOC 355	Sociology of Gender	
SOC 455	Issues in Sociology of Gender: [Topic]	
SOC 456	Feminist Theory	
SOC 457	Sex and Society	
Total Credits		24

Independent Study Courses

4 credits of Independent Study (IS) courses can count towards the minor. IS credits can be taken Pass/No Pass or graded. If students decide to take the credits Pass/No Pass, these courses will count toward the maximum allowable 8 Pass/No Pass for the minor.

Code	Title	Credits
WGS 401	Research: [Topic]	
WGS 403	Thesis	
WGS 405	Reading and Conference: [Topic]	
WGS 406	Practicum: [Topic]	
WGS 408	Workshop: [Topic]	
WGS 409	Terminal Project	

Credit Requirements

1. No more than 8 credits may be taken pass/no pass.
2. At least 16 credits applied to the minor must be taken at the University of Oregon.
3. No more than 8 credits from another major or minor may count toward the minor.

Queer Studies Minor

The Queer studies minor introduces students to a dynamic, interdisciplinary field that explores lesbian, gay, bisexual, and

transgender lives, and the evolving landscape of gender, sexualities, and identities. Queer studies courses help students understand the diversity of LGBTQ communities, the history and present conditions of sexual identity formation, the function of ideologies of sexuality, and how homophobia and transphobia's interact with racism, colonialism, sexism, ableism, classism and other forms of power.

Queer Studies Minor Requirements

Courses used to fulfill the minor requirements must be passed with a grade of Pass or C- or better.

No more than 8 credits with a grade of 'Pass' can be counted towards the minor requirements.

Code	Title	Credits
WGS 201	Introduction to Queer Studies	4
Select one WGS 200-level course with a queer focus (50% queer content)		4
Select one of the following:		4
WGS 322	Queer Theory	
WGS 422	Sexuality Studies: [Topic] (repeatable when topic changes)	
Select one queer studies approved course at any level—100, 200, 300, or 400		4
Select two 300- or 400-level queer studies approved courses		8
Total Credits		24

Residency Requirements

A minimum of 16 of the 24 total credits for the minor must be earned at the University of Oregon.

Independent Study Courses

4 credits of Independent Study (IS) courses can count towards the minor. IS credits can be taken Pass/No Pass or graded. If students decides to take the credits Pass/No Pass, these courses will count toward the maximum allowable 8 Pass/No Pass for the minor

Code	Title	Credits
WGS 401	Research: [Topic]	
WGS 403	Thesis	
WGS 405	Reading and Conference: [Topic]	
WGS 406	Practicum: [Topic]	
WGS 408	Workshop: [Topic]	
WGS 409	Terminal Project	

Students wishing to minor in queer studies should consult frequently with a women's, gender, and sexuality studies advisor to determine which courses offered during any given academic year will count toward the fulfillment of credits.

Students must apply for the queer studies minor in the women's, gender, and sexuality studies office well in advance of graduation for transcript evaluation. In order to be eligible for the minor, students must complete all degree requirements and a major in women's, gender, and sexuality studies or another academic department.

Women's, Gender, and Sexuality Studies Graduate Certificate

Whether pursuing an academic career path, a career in law or social justice, industry, government, or the nonprofit sector, a graduate certificate in women's and gender studies offers students knowledge and research skills well-suited to employment and citizenship in an increasingly diverse and global world.

The University of Oregon's WGSS graduate certificate program is interdisciplinary, intersectional, and international in its orientation. The certificate provides graduate students enrolled in UO departments with training in intersectional feminist scholarship and theory, as well as opportunities to teach undergraduate courses in WGSS (enrolled certificate students will receive preference in their applications for WGSS GTFs and summer teaching) and to explore research opportunities with UO's Center for the Study of Women in Society.

No more than 8 credits may be taken pass/no pass without specific approval.

Applicants should arrange an appointment with the graduate advisor.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge of intersectional and interdisciplinary feminist theories and scholarship.
- Demonstrate competence with feminist practices and methodologies.
- Demonstrate knowledge of feminist pedagogies.
- Communicate an understanding of current events and issues shaping and impacting WGSS or WGSS-related fields.

Graduate Certificate Requirements

Code	Title	Credits
Core Courses		
WGS 615	Contemporary Feminist Theory	5
Select WGS courses totaling 12 credits from the following:		12
WGS 507	Seminar: [Topic]

¹ Indicates a variable-credit course. The student must declare the credit value upon registering online—e.g., Practicum: [Topic] (WGS 606).

Additional Requirements

No more than 4 credits in Reading and Conference: [Topic] (WGS 605) and Practicum: [Topic] (WGS 606) can be applied to the certificate.

School of Computer and Data Sciences

At the School of Computer and Data Sciences (<https://scds.uoregon.edu/>), students and faculty work to advance knowledge in computer and data science, train the next generation of scholars, and engage with the wider world to tackle interdisciplinary challenges. The new school, housed within the College of Arts and Sciences, offers courses to all UO students. The school engages in cutting-edge research, experiential learning, and interdisciplinary collaborations, preparing students for the ever-evolving world of technology and data-driven fields.

Robert Donald Clark Honors College

<http://honors.uoregon.edu>

Carol Stabile, Acting Dean

108 Chapman Hall
1293 University of Oregon
Eugene, OR 97403-1293
honors@uoregon.edu

The Clark Honors College provides curious and motivated students with a broad-based liberal arts education that combines challenging academic coursework with hands-on learning experiences, internships, research, and other opportunities that allow them to develop skills that will support their individual career goals. Our award-winning faculty and staff empower students and help them develop into critical thinkers, excellent communicators, and future leaders so they can help find solutions to some of the world's most urgent issues.

Clark Honors College is a community rich with diverse perspectives and opinions, reflected in the make-up of faculty, staff, and students, and the content of curriculum and programming. We offer small classes capped at 19 students. Our students learn from a curriculum taught primarily by core faculty who are dedicated to teaching excellence, pedagogical innovation, and student success. Our interdisciplinary curriculum emphasizes critical thinking, strong written and oral communication skills, collaboration, and problem-solving through coursework and special degree and course opportunities, and support for the research-informed pedagogy that teaches these skills.

Faculty

Dare Baldwin, Professor, Psychology

Corinne Bayerl, Associate Teaching Professor, Comparative Literature, German/Scandinavian

Anita Chari, Associate Professor, Political Science

Nicole Dudukovic, Associate Teaching Professor, Neurosciences Major Director, Psychology

Daphne Gallagher, Associate Teaching Professor, Clark Honors College

Alison Gash, Associate Professor, Political Science

Lindsay Hinkle, Instructor, Clark Honors College

Trond Jacobsen, Instructor, Director of Forensics, Clark Honors College

Ian McNeely, Professor, History, European Studies, German & Scandinavian

Brian McWhorter, Professor, School of Music and Dance

Michael Moffitt, Professor, School of Law

Kate Mondloch, Professor, History of Art & Architecture

Barbara Mossberg, Professor of Practice in Literature, Clark Honors College

Lisa Munger, Instructor, Clark Honors College

Carol Paty, Professor, Earth Sciences, Physics

Elizabeth Raisanen, Officer of Admin, Clark Honors College

Angela Rovak, Office of Admin, Clark Honors College

Casey Shoop, Associate Teaching Professor, Clark Honors College

Carol Stabile, Professor, Women & Gender Studies

Lisa Wolverton, Professor, History

Emeritus Faculty

Henry M. Alley, Professor emeritus.

Louise M. Bishop, Associate Professor emerita.

Joseph G. Fracchia, Professor emeritus.

David Frank, Professor emeritus.

Roxann Prazniak, Professor emerita.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Critical Reasoning:** Apply and demonstrate critical reasoning through the use of appropriate evidence and methods
- **Communication Skills:** Use effective communication skills, both written and oral, by constructing coherent, logical, and persuasive arguments
- **Research Competence:** Develop research competence through inquiry, project-based and active learning based on students' own questions
- **Intellectual Engagement:** Show initiative, independence and intellectual engagement in the classroom and in assessments
- **Disciplinary Methods:** Identify and appropriately apply disciplinary methods in the humanities, social sciences and the natural sciences
- **Interdisciplinary Inquiry:** Engage in interdisciplinary inquiry by integrating insights from more than one research approach and by synthesizing diverse perspectives and modes of thinking
- **Intercultural Competence:** Demonstrate intercultural competence through linguistic diversity and awareness of and appreciation for diverse cultural backgrounds, experiences, and perspectives.

Academic Requirements

Requirements in the honors college satisfy the core-education requirements that other University of Oregon students meet for graduation. Honors college faculty and professional advisors advise honors college students concerning these requirements and mentor them concerning their academic choices. Students retain full responsibility for understanding and shaping their study programs.

Depending on test scores, students may use advanced placement or international baccalaureate credits as well as transfer credits from other higher education institutions toward honors college outside course requirements, second-language requirements, applicable major requirements, cultural literacy requirements, or university electives. To earn a BS degree, students must complete one year of college-level mathematics or the equivalent. Advanced placement, international

baccalaureate, and transfer credits may help fulfill either such a math requirement or the language requirement.

University and Major Requirements

Honors college requirements, which replace university core-education requirements, represent roughly one-third of a student’s total four-year schedule. Before graduating, Clark Honors College students must also meet the requirements, listed elsewhere in this catalog, of their major department or professional school. They must maintain a 3.00 or better cumulative grade point average (GPA).

Clark Honors College students who have completed the CHC#core#education requirements (HC 101H, 221H, 231H, 241H, and 301H; Area of Inquiry approved courses outside the CHC in Arts and Letters, Social Science, and Science (one course in each area); an approved quantitative reasoning course; and the CHC Colloquium and Electives requirements) have fulfilled the university’s Area of Inquiry requirements. Should a student leave the CHC after successful completion of all of these requirements, the student will retain their clearance of the university’s Area of Inquiry requirements.

Honors College Degree Requirements

Code	Title	Credits
Foundations in Liberal Arts Inquiry		
HC 101H	Liberal Arts: [Topic]	4
200-level Disciplinary Requirements

HC 441H	Honors College Science Colloquium: [Topic]	4
Electives Requirement		
Option A for Electives Requirement		
two elective colloquia from HC 421H, HC 431H, HC 441H, HC 434H, HC 444H		
Option B for Electives Requirement		
one elective colloquium from HC 421H, HC 431H, HC 441H, HC 434H, HC 444H		

four credits of independent thesis research (401, 403, 405, or other course numbers as applicable), taken within or outside the honors college ²

Option C for Electives Requirement		
12 credits in a language other than English taken at the University of Oregon or through a University of Oregon study abroad or exchange program		
Thesis Requirements		
HC 277H	Thesis Orientation	2
HC 477H	Thesis Prospectus ³	2
Successful completion and defense of a thesis		

- ¹ Designated honors college colloquia carry a supplemental course number if they satisfy one of the below categories—, Honors College Global Perspectives Colloquium: [Topic] (HC 434H), HC US: Difference, Inequality, Agency Colloquium: [Topic] (HC 444H)—or any approved (p. 45) UO courses may be used to satisfy the multicultural/ cultural literacy requirement.
- ² Independent research credits may be taken P/NP, including when taken with an HC subject code
- ³ Course taken at least one term before intended graduation to formalize the thesis project.

Writing

The honors college is committed to excellence in writing. The core curriculum integrates instruction and practice in fundamental rhetorical skills—writing, reading, speaking, and listening—with the subject matter of the courses. If they choose to leave the honors college, students who pass HC 101H with the minimum grade of C- or P have completed the university’s Writing 121Z requirement. Students who pass HC 221H with the minimum grade of C- or P have completed the university’s Writing 122Z/23 requirement.

Four-Year Degree Plan

The degree plan shown is only an example of how students may complete their degrees in four years. There are alternative ways to navigate the CHC curriculum. Students should consult their advisor to determine the best path for them. The Robert D. Clark Honors College is not a major. Students who follow the honors college curriculum fulfill all of the University of Oregon’s core education requirements. Honors college requirements must be taken for a letter grade, unless pass/no pass is the only option. In addition, only courses passed with grades of C– or better will fulfill honors college requirements.

Charles H. Lundquist College of Business

<https://business.uoregon.edu>

Bruce Blonigen, Edward Maletis Dean

Lillis Business Complex
1208 University of Oregon
Eugene, OR 97403
uobusiness@uoregon.edu

The Lundquist College of Business is an integral part of the University of Oregon, a comprehensive public research university committed to innovative teaching, discovery, and service. The college's mission is to

- Provide outstanding undergraduate education that combines a strong foundation in the liberal arts, excellence in traditional business disciplines, and experiential opportunities drawing on the strength of Oregon's distinctive qualities.
- Support economic development by offering master's programs associated with signature centers derived from Oregon's distinctive qualities, and by providing expert services to the Oregon community and beyond.
- Contribute to the advancement of business knowledge through scholarship and doctoral programs in accordance with the research mission of the university.

The Lundquist College of Business is a top-tier business school with a unique mission and vision that draws strength from its links to the Pacific Rim and the distinctive qualities of Oregon culture: innovation, sustainability, active lifestyles, and financial stewardship.

The Lundquist College is housed in the Lillis Business Complex, a striking state-of-the-art educational facility that is home to more than 200 faculty and staff members. The college enrolls more than 5,000 full-time undergraduate and graduate students and offers undergraduate degree programs in business administration and accounting, as well as MBA, Executive MBA, Master of Science in Sports Product Management, Master of Accounting, Master of Science in Finance, and PhD graduate programs.

These degree programs are supported by the School of Accounting and four departments in finance, management, marketing, and operations and business analytics. In addition, an important innovation in the college's approach to business education are the four centers of excellence (Center for Sustainable Business Practices, Warsaw Sports Center, Lundquist Center for Entrepreneurship, and Cameron Center for Finance and Securities Analysis) that advance a "learning by doing" approach to business education. The centers originate connections to industry that provide students with collaborative learning opportunities addressing real-time business issues and challenges.

The college is accredited by the Association to Advance Collegiate Schools of Business (AACSB), the highest accreditation standard for business schools internationally. Only 6 percent of the world's business schools are AACSB accredited and less than 2 percent are accredited in both business and accounting.

Majors - Bachelor's Degree

- Accounting (BA/BS) (p. 431)
- Business Administration (BA/BS) (p. 434)

Concentrations for Accounting and Business Administration

- Accounting (p. 437) (Business Administration major only)
- Entrepreneurship (p. 438)
- Finance (p. 438)
- Marketing (p. 438)
- Operations and Business Analytics (p. 438)
- Sports Business (p. 438)

Minors

- Business Administration (p. 438)
- Entrepreneurship (p. 439)
- Sports Business (p. 440)
- Sustainable Business (p. 440)

Certificate

- Global Business (p. 441)

Business Premajor Admission

New students planning to earn a bachelor's degree in the Lundquist College of Business typically enter the university as business premajors. Transfer students and university students from other majors may become business premajors by submitting a Request for Addition or Deletion Major form, available in the Advising Office. Students who seek premajor status in business should meet with an advisor in the college if their GPA is below 3.00. Business premajors typically are not eligible to take most 300- and 400-level business courses. Business premajor status does not guarantee admission to the accounting or business administration major.

Admitted business premajors typically spend the first two years fulfilling general-education and premajor requirements.

Premajor Requirements

- **Coursework** of 75 or more credits must be complete.
- **Cumulative GPA Requirement.** Guaranteed admission requires a 3.00 cumulative grade point average in college course work, including transfer work. The college includes all course work when calculating the cumulative GPA for admission to the major.
- **Holistic Review.** Students who have taken all required business premajor course work but fall slightly below the minimum GPA requirements may be considered for admission under a holistic review process. For more details, interested students may visit an academic advisor in 203 Peterson Hall.
- **English Competence.** International students must have a Test of English as a Foreign Language (TOEFL) score of at least 575 (paper-based test), 233 (computer-based test), 89 (internet-based test), an International English Language Testing System (IELTS) score of 7.0, or have completed the Academic English for International Students (AEIS) program.

First-Year Direct Admission

Direct admission is only offered to first-year students who are entering in the fall term and list their intended major as business administration. The University of Oregon considers a number of factors when making direct admissions decisions, including high school GPA, strength of academic course work, test scores, and ability to add to the breadth and depth of the student body. Students selected for direct admission will need to complete the lower-division course requirements but will not need to apply to the major like other students interested in business administration or accounting.

Pre-Major Requirements

For guaranteed admission to the major, students must obtain at least a 3.0 cumulative GPA (including both UO and transfer coursework) and pass all pre-business core classes with a minimum core GPA of 3.00. All pre-major requirements must be taken for a letter grade and passed with a C- or better for admission to the major. BA 240 and AP or IB coursework is acceptable with a grade of P*. The university limits retaking of courses in which a P or mid-C or better is earned. The university also limits attempting a course to a maximum of 3 attempts (including marks of W,N,F,D, C-); a petition is required for an exception. When repeating a core course, only the most recent grade is used in calculating the pre-business core GPA.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Application to the Major

Students seeking admission through the standard pathway must submit a formal application for admission to the major one term prior to enrolling in upper-division business courses. Typically this takes place in the term they are completing their lower-division requirements. To be eligible for admission as a major, a student must apply before the term deadline. Applications are due the first week of the term for admission the following term. Applications are not accepted during summer session. Students

who are completing their final term of business premajor requirements may submit applications.

The following documents are required for admission:

1. Completed application form (<https://business.uoregon.edu/ug/apply/major/>)
2. Academic transcripts or proof of enrollment
3. A cover letter and résumé
4. Short answer essays

Definitions, Limitations, and Policies

Transfer Students

The sequential nature of this program requires careful academic planning. Students who want to transfer to the college are encouraged to meet with an advisor in the Lundquist College of Business early in their academic careers. Students are admitted to the university as business pre-majors. Once admitted, they may apply for major status in accordance with the procedure described. Applications are due the first Friday of the term for admission the following term.

Second Bachelor's Degree

A student who was awarded a degree in a major in a substantially similar discipline may not be able to earn enough credits to complete a second bachelor's degree in business administration or accounting at the University of Oregon. Talk with an advisor in the Lundquist College of Business if you are concerned this may pertain to you. Second-degree candidates must meet the same admission requirements and follow the same application process described.

Students retain business pre-major status until admission requirements are completed or waived because of completed coursework. Second-degree students must complete the same upper-division requirements as first-degree candidates. The Second Bachelor's Degree section of this catalog, under **Bachelor's Degree Requirements**, lists university requirements for a second bachelor's degree; the Undergraduate Advising office has information about Lundquist College requirements.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head's approval, credits may be transferred from other accredited institutions, independent study, or approved courses in other departments. Accounting majors must complete all upper-division accounting courses at the University of Oregon.

Grading

Premajor required courses and upper-division courses must be taken for letter grades and passed with grades of C- or better. See the **Registration and Academic Policies** section of this catalog for an explanation of the university's grading systems.

Upper-Division Courses

Courses for the minor are open to nonmajors. Only admitted majors in the Lundquist College of Business may enroll in all other 300- and 400-level business courses.

Majors - Master's Degree

- Accounting (MActg) (p. 442)
- Finance (MS) (p. 443)

- General Business (MBA) (p. 443)
- General Business Executive (MBA) (p. 446)
- Management (MS) (p. 447)
- Sports Product Management (MS) (p. 447)

Specializations for General Business (MBA)

- Advanced Strategy and Leadership (p. 444)
- Finance and Securities Analysis (p. 445)
- Innovation and Entrepreneurship (p. 445)
- Sports Business (p. 446)
- Sustainable Business Practices (p. 446)

Specializations for Accounting (MActg)

- Accounting and Data Analytics (p. 442)
- Audit and Financial Reporting (p. 442)
- Taxation (p. 443)

Majors - Doctoral Degree (PhD)

- Accounting (p. 448)
- Finance (p. 448)
- Management (p. 449)
- Marketing (p. 450)
- Operations and Business Analytics (p. 451)

Accounting (BA/BS)

<http://business.uoregon.edu/ug/majors/accounting> (<http://business.uoregon.edu/ug/majors/accounting/>)

For more information, contact lcb.undergrad@uoregon.edu.

Students who major in accounting will learn more than just how to crunch numbers. They will attain excellent conceptual and technical skills that help them excel in a career as a future business leader. Accounting students will practice the communications skills necessary to share the story the numbers reveal. Learn from some of the best accounting professors in the nation—professors who keep ahead of the curve through their engagement with ongoing research on the evolving global business economy.

Earn both a bachelor's degree and a master of accounting in just four years at the UO Lundquist College of Business. Qualified students entering the UO with AP or IB credit are eligible for the 3+1 Accounting Pathway (<https://business.uoregon.edu/ug/majors/accounting/3-1/>). 3+1 students will have the opportunity to finish their accounting undergraduate degree in three years and complete their master's degree in their fourth year.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Be creative and analytical problem solvers.
- Be effective communicators.
- Effectively work in a multi-cultural professional environment.
- Be skilled in leading and working successfully in diverse teams.
- Identify and evaluate the ethical, legal and sustainability implications of business decisions.

- Apply fundamental principles and theories in financial accounting, managerial accounting, auditing, taxation, and professional ethics to measure, analyze, validate, and communicate accounting information to the appropriate user group such as investors and creditors and business internal decision makers.

Pre-Major Requirements

For guaranteed admission to the major, students must obtain at least a 3.0 cumulative GPA (including both UO and transfer coursework) and pass all pre-business core classes with a minimum core GPA of 3.00. All pre-major requirements must be taken for a letter grade and passed with a C- or better for admission to the major. BA 240 and AP or IB coursework is acceptable with a grade of P*. The university limits retaking of courses in which a P or mid-C or better is earned. The university also limits attempting a course to a maximum of 3 attempts (including marks of W,N,F,D, C-); a petition is required for an exception. When repeating a core course, only the most recent grade is used in calculating the pre-business core GPA.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

¹ Cultural Awareness for Business Decisions requires students take one course (4 credits) that helps them develop a deeper sensitivity to cultural differences and an understanding of how such differences can impact interactions and relationships in a business setting. Students who study abroad or intern for credit in one country for six weeks or more may have the Cultural Awareness requirement waived with the approval of an academic advisor.

- The 400-level courses are typically taken in the senior year. Upper-division accounting credits applied toward the major must be taken at the Lundquist College. Exceptions require explicit approval from the Director of the School of Accounting.
- Students pursuing the certified public accountant (CPA) designation are required to take additional course work prior to sitting for the Certified Public Accountant Examination.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head's approval, credits may be transferred from other accredited institutions, independent study, or approved courses in other departments. Accounting majors must complete all upper-division accounting courses at the University of Oregon.

3 + 1 Accounting Pathway

The 3+1 Accounting Pathway is an accelerated program for accounting majors, an opportunity for qualified incoming freshman students interested in accounting to complete their bachelor's degree and master of accounting degree within four years. Through an evaluation of college-ready credits (e.g., Advanced Placement and International Baccalaureate programs), high-achieving students are fast-tracked for admission to the Lundquist College of Business one full year before their contemporaries. Students in this program may complete their undergraduate degree in three years, with the fourth year used to complete the master of accounting program. Students must submit applications for admission

to the 3+1 Accounting Pathway during the winter term of their freshman year.

For more information, visit the website (<https://business.uoregon.edu/master-accounting/>). For application information, visit the admissions website (<https://business.uoregon.edu/ug/majors/accounting/3-1/application-instructions/>).

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them. Milestones are not specific to one course unless explicitly stated. Please visit the website (<https://business.uoregon.edu/ug/advising/>) for more information.

Business Administration (BA/BS)

<http://business.uoregon.edu/ug/majors/business-administration> (<http://business.uoregon.edu/ug/majors/business-administration/>)

For more information, contact lcb.undergrad@uoregon.edu.

Get ready to make a difference. Students majoring in business administration learn to build their ideas into a small business—or a small business empire. Lead a Fortune 500 company. Market an NFL franchise. Realize financial goals. Take Wall Street (or Main Street) by storm. The Lundquist College of Business (<https://business.uoregon.edu/>) at the University of Oregon can take students where they want to go. Lundquist students are part of an intelligently informal community of thinkers and doers who are serious, determined, focused, and hands-on.

A degree in business administration is just part of the story. Students can pursue a general business focus or choose a concentration (p. 437) in accounting, entrepreneurship, finance, marketing, operations and

business analytics, or sports business. No matter which degree or concentration is chosen, the Lundquist College of Business provides a collaborative environment where students find ample opportunities to try out real-world projects and scenarios, giving them career experience before they even graduate.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Be creative and analytical problem solvers.
- Be effective communicators.
- Effectively work in a multi-cultural professional environment.
- Be skilled in leading and working successfully in diverse teams.
- Identify and evaluate the ethical, legal and sustainability implications of business decisions.
- Demonstrate proficiency in fundamental and concentration-specific business knowledge.

Pre-Major Requirements

For guaranteed admission to the major, students must obtain at least a 3.0 cumulative GPA (including both UO and transfer coursework) and pass all pre-business core classes with a minimum core GPA of 3.00. All pre-major requirements must be taken for a letter grade and passed with a C- or better for admission to the major. BA 240 and AP or IB coursework is acceptable with a grade of P*. The university limits retaking of courses in which a P or mid-C or better is earned. The university also limits attempting a course to a maximum of 3 attempts (including marks of W,N,F,D, C-); a petition is required for an exception. When repeating a core course, only the most recent grade is used in calculating the pre-business core GPA.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

- ¹ It is possible to select business upper division elective courses in such a way to earn a concentration. Concentrations are available in accounting, entrepreneurship, finance, marketing, operations and business analytics, and sports business. For students completing a concentration, four of their seven business electives are met by the concentration courses, and they must complete three more electives. If their concentration courses are all from one department, at least one of their three remaining electives must be from a business department other than their concentration department (Marketing and Sports Business are considered the same department). Concentrations are optional and do not appear on the UO academic transcript or diploma.
- ² BA courses count as one of the seven electives, but do not count toward the two-department requirement.
- ³ Cultural Awareness for Business Decisions requires students take one course (4 credits) that helps them develop a deeper sensitivity to cultural differences and an understanding of how such differences can

impact interactions and relationships in a business setting. Students who study abroad or intern for credit in one country for six weeks or more may have the Cultural Awareness requirement waived with the approval of an academic advisor. Students will not be able to apply courses to the upper-division elective requirement and the Cultural Awareness requirement.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head’s approval, credits may be transferred from other accredited institutions, independent study, or approved courses in other departments.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Business Administration Minor

<http://business.uoregon.edu/ug/minors/business-administration> (<http://business.uoregon.edu/ug/minors/business-administration/>)

The business minor gives students the opportunity to develop a core set of business skills that complement their major passion. The minor in business administration is open to students from all majors except pre-business, business administration, accounting, or general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

It is possible to earn more than one minor within the Lundquist College of Business. However, for students earning more than one business-related minor, no more than three courses can be used to satisfy multiple business minors.

Students may declare a minor in business administration online on the college's website (<https://business.uoregon.edu/programs/undergraduate/minors-certificates/business-administration/>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Business Administration Minor

All professions and organizations, public and private, operate according to business principles. Earning a minor in business administration prepares students to participate in organizational conversations and become leaders within their future professions. The minor in business administration is open to students from all majors other than business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of coursework, which can be completed in one academic year.

Students may declare a minor in business administration online at the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Entrepreneurship Minor

<http://business.uoregon.edu/ug/minors/entrepreneurship> (<http://business.uoregon.edu/ug/minors/entrepreneurship/>)

The minor in entrepreneurship is intended for nonbusiness students who want to learn about innovation processes and the managerial and leadership skills required to create a new venture. The entrepreneurship minor gives students the opportunity to envision, develop, test, and build a for-profit or nonprofit venture working within an interdisciplinary framework of exploration and self-discovery.

The minor in entrepreneurship is open to students from all majors except pre-business, business administration, or accounting. For general social sciences majors with a concentration in applied economics, business, and society, students must adhere to the GSS double-dipping policy. See the GSS website (<https://gss.uoregon.edu/faqs/>) for more information. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

It is possible to earn more than one minor within the Lundquist College of Business. However, for students earning more than one business-related minor, no more than three courses can be used to satisfy multiple business minors.

Students may declare a minor in entrepreneurship online at the college's website (<https://business.uoregon.edu/ug/minors/entrepreneurship/>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

¹ Students who take BA 215 instead of ACTG 340 will be required to take one upper-division elective course.

² It is possible to earn more than one minor within the Lundquist College of Business. However, for students earning more than one business-related minor, no more than three courses can be used to satisfy multiple business minors. Please see an advisor for more details.

Sports Business Minor

<http://business.uoregon.edu/ug/minors/sports-business> (<http://business.uoregon.edu/ug/minors/sports-business/>)

The minor in sports business is intended to provide baseline business skills and knowledge to students who are not intending to pursue a sports business career per se, but rather are pursuing sports-related professional paths in which business acumen is a supporting skill (e.g., sports journalist, sports psychologist, sportswear designer). The sports business minor develops skills in teamwork, writing, and oral communications with an emphasis on providing core business competencies to those pursuing sports industry-related careers.

The minor in sports business is open to students from all majors except pre-business, business administration, or accounting. For general social sciences majors with a concentration in applied economics, business, and society, students must adhere to the GSS double-dipping policy. See the GSS website (<https://gss.uoregon.edu/faqs/>) for more information. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

It is possible to earn more than one minor within the Lundquist College of Business. However, for students earning more than one business-related minor, no more than three courses can be used to satisfy multiple business minors.

Sustainable Business Minor

<http://business.uoregon.edu/ug/minors/sustainable-business> (<http://business.uoregon.edu/ug/minors/sustainable-business/>)

The minor in sustainable business is designed for non-business majors who want to learn to apply business solutions to address social and environmental challenges. The sustainable business minor teaches students how to use the power of business for good, finding ways to make the world better for everyone.

The minor in sustainable business is open to students from all majors except pre-business, business administration, or accounting. For general social sciences majors with a concentration in applied economics, business, and society, students must adhere to the GSS double-dipping policy. See the GSS website (<https://gss.uoregon.edu/faqs/>) for more information. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

It is possible to earn more than one minor within the Lundquist College of Business. However, for students earning more than one business-related minor, no more than three courses can be used to satisfy multiple business minors.

Students may declare a minor in sustainable business online on the college's website (<https://business.uoregon.edu/programs/undergraduate/minors-certificates/sustainable-business/>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

The sustainable business minor consists of three business administration courses, two courses from specialized clusters, and one elective (total of 24 credit hours).

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

BA 101 can be taken as Pass/No Pass and will count toward the minor requirements if passed with a grade of Pass.

Global Business Certificate

<http://business.uoregon.edu/ug/certificates/global-business> (<http://business.uoregon.edu/ug/certificates/global-business/>)

The Certificate in Global Business is for those who want to be prepared to accept a job internationally and appreciate the different cultural values, economies, and communication styles of our vast and varied business world and is open to students in all University of Oregon majors. Upon successful completion of an approved plan, students will receive their certificate in addition to their diploma. Applications can be submitted to an academic advisor.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Discuss the promises of globalization, whether the global economy has delivered on those promises, and how we might reform globalization to represent the needs of people and the planet.
- Identify cross-country cultural differences in political, economic, social, and legal factors, and evaluate their implications for business decisions.
- Analyze global and country-level macro-environments of marketing, choose an appropriate market-entry or expansion strategy, and manage product, pricing, distribution, and communication strategies in international markets.

To receive a Certificate in Global Business, students must complete a total of 36 credits (must include 24 upper division credits) with 12 credits at the 400 level. Of the 12 400-level credits, 8 are included in the international business core. The remaining 4 credits must be planned as part of the area studies.

MKTG 470	International Marketing	4

Area Study/Global Systems/Cross Cultural Competencies ¹	20
Total Credits	36

¹ Area study requirements consist of 20 credits of coursework that relate to an international theme with at least 4 credits at the 400 level. This must be approved by an advisor in the Lundquist College of Business. Area studies coursework must include at least two department prefixes. Usually this theme will be geographically-based, focusing on a region such as Latin America, North Africa, or Europe. Other themes that are not geographic may be submitted for approval; for example global systems, cross cultural competencies, and macro level international forces (such as globalization). Four credits of second year second language can be used toward this requirement. Literature or cultural studies courses taught in a second language may be applied to the area studies. Only 4 credits of business course work can be used in this category and must be pre-approved.

Accounting (MActg)

<http://business.uoregon.edu/master-accounting> (<http://business.uoregon.edu/master-accounting/>) lcbmacc1@uoregon.edu

At the University of Oregon's Master of Accounting program at the Lundquist College of Business, students develop a mindset that goes beyond learning new accounting methods and tax laws. They hone their ability to work in a constructive and respectful way. They learn how to communicate attention to detail through precise and engaging presentations. And they bring it all together to achieve true professional success to land a great job.

The Master of Accounting program is designed for students whose undergraduate major is accounting or the equivalent. The program is constructed so that it can be completed in three terms (one academic year) of full-time study. The curriculum is designed to sharpen written and oral communication, leadership, critical thinking, and analytical skills that are needed to excel in the accounting profession.

Program's Admission Requirements

Please visit the program's website (<https://business.uoregon.edu/programs/master-accounting/apply/application-process/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Accounting Knowledge - Each accounting major is proficient in expanded conceptual and technical accounting knowledge.
- Critical Thinking and Discipline Intergration - Each student will think critically and integratively to solve complex business problems.
- Research Skills - Each student will be able to apply research techniques to solve complex business problems.
- Communication Skills - Each student will effectively communicate in writing the solution of a business problem.

Finance (MS)

<http://business.uoregon.edu/ms-finance> (<http://business.uoregon.edu/ms-finance/>) msinfo@uoregon.edu

With a focus on valuation and asset management, the University of Oregon Master of Science in Finance (MSF) program is ideal for those targeting a coveted career as a financial analyst—whether at a "sell-side" investment firm evaluating specific sectors/industries, a "buy-side" investment house managing its own funds, an investment bank, or a corporate finance department.

The master of science in finance is a 12-month degree program with an emphasis on valuation and asset management designed for students who recently graduated with majors in science, technology, engineering, mathematics, business, economics, or equivalent subjects. The curriculum is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending professional development seminars. Through the UO's Cameron Center for Finance and Securities Analysis, students have opportunities to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry.

Program's Admission Requirements

Please visit the program's website (<https://business.uoregon.edu/programs/ms-finance/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Critical Thinking - Students will be able to identify and provide adequate solutions to financial problems.
- Financial Knowledge - Students will be able to have a deep understanding on the functioning of financial markets.
- Business Ethics - Students will be knowledgeable about the ethical standard of business conduct.
- Communication - Students will be able to communicate effectively and professionally in the business context.

Master of Science in Finance

The MSF curriculum totals a minimum of 45 credits, allowing students to complete the degree in 12 months (four quarters).

The program consists of six required courses - including a capstone practicum and a quarterly seminar - along with 13 available electives. Emphasis is on valuation and asset management. The required core courses have no pre-requisites for MSF students. The program will coordinate with industry partners to design such real-world projects as

security analysis, portfolio allocation, risk management, and valuation of corporate investment projects or startups.

General Business (MBA)

<http://business.uoregon.edu/mba> (<http://business.uoregon.edu/mba/>) mbainfo@uoregon.edu

for more information, contact mbainfo@uoregon.edu.

The Oregon MBA degree embodies the college's emphasis on interdisciplinary study, experiential learning, research excellence, and a supportive learning environment. No other program inspires individual distinction and deep and practical experience like the Oregon MBA. Earn an MBA with a specialization in one of four select areas: finance and securities analysis, innovation and entrepreneurship, sports business, and sustainable business practices. The four specializations of the MBA curriculum are aligned with the college's centers of excellence—the Lundquist Center for Entrepreneurship, the Cameron Center for Finance and Securities Analysis, the Center for Sustainable Business Practices, and the James H. Warsaw Sports Center. The centers promote research collaboration among faculty members from different departments, facilitate student interactions with industry professionals, and provide practical, real-world learning opportunities.

Strong faculty involvement and the state-of-the art facilities of the Lillis Business Complex create an ideal learning environment. An emphasis on group work ensures that students get to know one another and their

instructors well. In addition, a strong cohort model aids in developing solid working relationships and strong friendships. Finally, students enhance their education by participating in global and domestic experiential learning trips and co-curricular opportunities offered through the college's Professional Edge Program.

Two years of full-time study are needed to earn the minimum of 76 credits required for the degree.

Program's Admission Requirements

Please visit the program's website (<https://business.uoregon.edu/programs/mba/>).

Accelerated Program

The accelerated master's degree program is intensive, allowing outstanding undergraduate majors in business from an accredited institution to earn an MBA degree in 15 months by taking a minimum of 49 credits over four terms. Applicants should have a strong overall academic record and significant full-time work experience. Students choose one of the four specializations listed above. See the website (<https://business.uoregon.edu/mba/degree-programs/accelerated/>) for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Make sound business decisions by using fundamental business concepts in analyzing and synthesizing information.
- Be guided by ethical and sustainability precepts in making business decisions.
- Think strategically in a global business context.
- Develop and communicate solutions to real world problems and/or opportunities.

Specialization and General Electives		30
Total Credits		49

Program Requirements

- Students are required to complete one of four center-affiliated specializations: Innovation & Entrepreneurship, Finance & Securities Analysis, Sports Business, or Sustainable Business Practices; Advanced Strategy and Leadership may be added as a second specialization.
- Students are required to complete a series of modules on facilitation skills designed to help them work more effectively in teams during their first year of the program.
- Students are required to complete a professional development plan during their first year of the program.
- Students are required to participate in a center-based series of modules on specialization-specific topics led by external presenters.

Specializations

- Finance and Securities Analysis (p. 445)
- Innovation and Entrepreneurship (p. 445)
- Sports Business (p. 446)
- Sustainable Business Practices (p. 446)
- Advanced Strategy and Leadership (p. 444) (*Advanced Strategy and Leadership may only be added as a secondary specialization.*)

Advanced Strategy and Leadership Specialization Requirements

Code	Title	Credits
Required Courses:		
BA 661	Oregon Advanced Strategy	3
MGMT 615	Leadership	3
MGMT 623	Negotiation	3
One course of the following for the Finance Requirement:		3

ACTG 580	Accounting Data Analytics I
ACTG 618	Taxes and Business Strategy
ACTG 631	Financial Statement Analysis and Valuation
ACTG 662	Strategic Cost Management
FIN 671	Corporate Finance and Valuation
FIN 673	Advanced Topics in Corporate Finance
FIN 685	Alternative Investments

One course of the following for the Sustainable Business Requirement: **3**

MGMT 543	Life Cycle Assessment
MGMT 641	Industrial Ecology
OBA 566	Project and Operations Management Models
OBA 577	Supply-Chain Operations and Information

One course of the following for the Marketing Requirement: **3**

OBA 555	Data Driven Predictive Modeling
MKTG 660	Marketing Research
MKTG 665	Marketing Strategy
MKTG 668	Strategic Brand Management

One course of the following for the Innovation and Entrepreneurship Requirement: **3**

MGMT 510	Experimental Course: [Topic]
MGMT 620	Managing Global Business
MGMT 625	New Venture Planning
MGMT 635	Opportunity Recognition

Finance and Securities Analysis Specialization

Code	Title	Credits
Required Courses:		
ACTG 631	Financial Statement Analysis and Valuation	4
FIN 671	Corporate Finance and Valuation	3
FIN 606	Practicum: [Topic] (Masters Investment Group)	6
FIN 683	Concepts of Investments	3
Financial Markets Elective (minimum of 3 credits)		3
FIN 562	Derivative Markets and Financial Institutions	
FIN 675	Fixed Income Securities	
Specialization Electives (minimum of 6 credits) ¹		6
ACTG 617	Taxation of Business	
ACTG 618	Taxes and Business Strategy	
ACTG 619	Taxation of Pass Through Entities	
FIN 562	Derivative Markets and Financial Institutions	
FIN 564	Commercial Banking	
FIN 610	Experimental Course: [Topic]	
FIN 673	Advanced Topics in Corporate Finance	
FIN 675	Fixed Income Securities	
FIN 685	Alternative Investments	

FIN 687

Total Credits **25**

¹ If Finance 671 used to satisfy MBA core requirement then minimum of 9 specialization elective credits required.

Innovation and Entrepreneurship Specialization

Code	Title	Credits
MGMT 635	Opportunity Recognition	3
MGMT 625	New Venture Planning	3
MGMT 645	New Venture Scaling	3
MGMT 655	New Venture Execution	4
Electives: ¹		3
BE 625	Business Law and Ethics	
BIOE 610	Experimental Course: [Topic]	
FIN 671	Corporate Finance and Valuation	
FIN 685	Alternative Investments	
J 548		
J 624		
LAW 610	Experimental Course: [Topic]	
LAW 633	Business Planning	
LAW 673	Patent Law and Policy

MGMT 615	Leadership	
MGMT 620	Managing Global Business	
MGMT 623	Negotiation	
MGMT 640	Sustainable Business Development	
MKTG 660	Marketing Research	
OBA 510	Experimental Course: [Topic]	
OBA 544	Business Database Management Systems	
OBA 555	Data Driven Predictive Modeling	
PPPM 581	Fundraising for Nonprofit Organizations	
PPPM 685		
SBUS 645	Sports Product	
SPD 650	Sports Product Materials and Manufacturing	
Total Credits		16

* Law classes run on a semester basis. Semester credits are worth 1.5 times more than quarter credits. Thus, a 2-credit law class is worth 3 quarter credits. The credits listed here are quarter-credit equivalents. Students who wish to take a law class need to complete a non-law student enrollment request form.

¹ BE 625, MGMT 615, MGMT 623, MGMT 640 may not count toward both MBA core requirement and specialization elective requirement.

Sports Business Specialization

Code	Title	Credits
Required Courses:		
SBUS 650	Marketing Sports Properties	3
SBUS 652	Sports Sponsorship Alliances	3
SBUS 655	Economic Aspects of Sports	3
SBUS 645	Sports Product	3
SBUS 653	Legal Aspects of Sports Business	3
SBUS 606	Practicum: [Topic] (Strategic Planning Project)	6
SBUS Specialization Electives (Minimum of 9 credits required)		9
OBA 565	Sports Analytics	
MKTG 515	Marketing Analytics	
MKTG 660	Marketing Research	
MKTG 668	Strategic Brand Management	
JCOM 557	Sports Brand Strategy	
Total Credits		30

¹ SBUS 653 will substitute for BE 625 MBA core requirement for students in SBUS specialization.

Sustainable Business Practices Specialization

Code	Title	Credits
Required Courses		
MGMT 641	Industrial Ecology	3
MGMT 543	Life Cycle Assessment	4
MGMT 606	Practicum: [Topic] (Strategic Planning Project)	6

MGMT 608	Workshop: [Topic] (Clean Energy Finance)	
MGMT 610	Experimental Course: [Topic]	
MKTG 568	Marketing, Sustainability, and Ethics	
OBA 544	Business Database Management Systems	
OBA 566	Project and Operations Management Models	
OBA 577	Supply-Chain Operations and Information	
Total Credits		22

General Business Executive (MBA)

<http://business.uoregon.edu/executive-mba> (<http://business.uoregon.edu/executive-mba/>) 2800 NE Liberty St
Portland, OR 97211
oemba@uoregon.edu

Designed for accomplished mid-to-senior managers, executives, entrepreneurs, and business leaders with demanding schedules, the Oregon Executive MBA in Portland is a transformational experience that gives already accomplished professionals the confidence and skills

to become successful leaders in today's complex and global business world. Executive MBA programs are designed for those who want to work full time while earning a graduate degree in twenty months, with the summer off. Executive MBA programs cater to midcareer professionals positioning themselves to move up the corporate ladder by deepening their already broad knowledge base, by sharpening their skills, and by tackling problems their organization will face in the coming years.

Classes are held twice a month on consecutive Fridays and Saturdays. Courses are open only to students who apply and are admitted to this program.

Program's Admission Requirements

Please visit the program's website (<https://business.uoregon.edu/programs/executive-mba/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Analyze information and use fundamental business concepts to make strategic decisions.
- Be guided by ethical precepts in making business decisions.
- Think strategically in a global business context.
- Develop and communicate solutions to real world problems and/or opportunities.

General Business Executive Major Requirements

Please choose 2 from the following list of electives		2
BA 743	Innovation and Entrepreneurship: [Topic] ¹	
BA 744	Managing Conflict and Change: [Topic] ¹	
BA 745	Analytic Tools : [Topic] ¹	
Total Credits		72

¹ BA 743, 744 and 745 are repeatable up to three times for a total of 4 credits.

Additional Requirements

- Four-day Executive Immersion in Portland and Eugene course before the academic year begins in a non-credit requirement
- Capstone and Global Trip Workshops are non-credit requirements in the first year of the program

Management (MS)

<https://business.uoregon.edu/programs/ms-management>
(<https://business.uoregon.edu/programs/ms-management/>)
lundquistadmissions@uoregon.edu

The Lundquist College of Business offers an intensive one-academic year master's degree in management (MSM). The program is designed for students with non-business undergraduate degrees and minimal post-undergraduate work experience. Students gain fundamental business skills and engage in applied experiences that prepare them for a wide range of business-related roles.

Students completing the MSM are eligible for the accelerated option of the Oregon MBA (OMBA) program after gaining sufficient full-time work experience.

Program's Admission Requirements

Please visit the program's website (<https://business.uoregon.edu/programs/ms-management/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate proficiency in fundamental business knowledge.
- Think strategically in a business context.
- Identify and evaluate the ethical and legal implications of business decisions.
- Be skilled in leading and working successfully in diverse teams.

Management Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits
Core Courses		
ACTG 612	Financial Accounting	3
BE 625	Business Law and Ethics	3
FIN 612	Fundamentals of Finance	3
FIN 613	Managerial Economics	3
MGMT 612	Managing Individuals and Organizations	3

MGMT 614	Strategic Management	3

Total Credits	45

¹ Graduate level LCB courses and other graduate level courses with program approval.

Sports Product Management (MS)

<http://business.uoregon.edu/spm> (<http://business.uoregon.edu/spm/>)

For more information, contact uospm@uoregon.edu

The University of Oregon partnered with the sports and outdoor product industry's best to create a Master of Science in Sports Product Management. Our mission is to build worldwide leaders in the sports product industry by offering hands-on opportunities to build products, networking with sports and outdoor industry leaders, and teaching through the lenses of global business, sustainability, and innovation. We teach the business of product creation.

The master's degree is available as an immersive, 18-month program onsite in Portland for emerging talent and an innovative, 21-month online program for working professionals.

Program's Admission Requirements

Please visit the program's website (<https://business.uoregon.edu/programs/spm/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the components of developing a marketing strategy and the steps required to bring a product to market.
- Understand the subcomponents of product strategy and execute them effectively to address real-world challenges.
- Understand the principles of sustainability, supply chain, prototyping and human physiology to create innovative sports and outdoor products with an emphasis on the consumer and insights. Apply those learnings in making products in the SPM Innovation Lab.
- Understand and navigate the complexities of producing and marketing sports and outdoor products in a global context through visiting domestic and foreign factories, making and prototyping.
- Develop self-awareness and leadership skills to guide teams toward shared success in a diverse, dynamic, and competitive industry.

Accounting (PhD)

<http://business.uoregon.edu/phd> (<http://business.uoregon.edu/phd/>)
Jaewoo Kim, Program Coordinator

386 Lillis Hall
 541-346-3540
jkim27@uoregon.edu

The Lundquist College of Business Doctoral Program in Accounting prepares students for careers as accounting faculty at a college or university that values scholarly research.

We believe this objective can best be attained by having faculty work closely with students and monitoring their progress throughout the program. The accounting program also encourages joint research projects among faculty and students and maintains a learning environment that is supportive of the student. Our primary focus is to train students to use economic reasoning to produce research of sufficient quality to warrant publication in a top academic journal.

Faculty expertise in the Accounting PhD program focuses on federal income taxation, disclosure of financial information, and use of accounting information in corporate governance.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Acquire advanced knowledge relevant to their areas of specialization.
- Develop advanced research skills for their areas of specialization.
- Assume teaching responsibilities at high-quality colleges and universities.
- Successfully graduate and place at high-quality, research-focused colleges and universities.

PhD in Accounting

Code	Title	Credits
Major Area of Concentration		
Students are required to take at least 3 out of 9 courses in the major areas. Examples include:		
ACTG 607	Seminar: [Topic] (Capital Market Research in Accounting)	
ACTG 607	Seminar: [Topic] (Disclosure Research in Accounting)	
ACTG 607	Seminar: [Topic] (Tax Research in Accounting)	
ACTG 607	Seminar: [Topic] (Accounting Theory)	
ACTG 607	Seminar: [Topic] (Contemporary Topics in Accounting)	
FIN 607	Seminar: [Topic] (Asset Pricing Theory)	
FIN 607	Seminar: [Topic] (Empirical Asset Pricing)	
FIN 607	Seminar: [Topic] (Corporate Finance Theory)	
FIN 607	Seminar: [Topic] (Empirical Corporate Finance)	

Statistics and Research Methods

Students are required to take at least 5 courses in the Statistics/Research Methods area. Examples include:

EC 523–525	Econometrics
MGMT 607	Seminar: [Topic] (Applied Econometrics)

Behavioral Science/Economics/Mathematics

Students are required to take at least 3 courses in the Behavioral/Economics/Math area. Examples include:

Dissertation

ACTG 603	Dissertation

Total Credits¹ **69**

¹ Students entering with no prior graduate work must take additional credits to reach the University's 81 credit minimum.

Please visit the Accounting PhD Program website (<https://business.uoregon.edu/programs/phd/concentrations/accounting/>) page for more information.

Finance (PhD)

<http://business.uoregon.edu/phd> (<http://business.uoregon.edu/phd/>)
Robert Ready, Program Coordinator

382 Lillis Hall
 541-346-8653

ready@uoregon.edu

The Lundquist College of Business Doctoral Program in Finance develops scholars who become productive researchers and effective teachers at leading colleges and universities.

The program emphasizes analytical training in financial economics and quantitative methods and equips students to conduct original research on important problems that are of interest to both academics and practitioners in the field of finance.

Our faculty members are active researchers who publish regularly in top-tier scholarly finance journals and are widely recognized for their empirical research in the areas of corporate finance and investments.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Acquire advanced knowledge relevant to their areas of specialization.
- Develop advanced research skills for their areas of specialization.
- Assume teaching responsibilities at high-quality colleges and universities.
- Successfully graduate and place at high-quality, research-focused colleges and universities.

PhD in Finance

Code	Title	Credits

Management (PhD)

<http://business.uoregon.edu/phd> (<http://business.uoregon.edu/phd/>)

Ralph Heidl, Program Coordinator

393F Anstett Hall
541-346-3586
heidl@uoregon.edu

The Lundquist College of Business Doctoral Program in Management trains students to become researchers and educators in strategic management with a focus on technology, innovation, entrepreneurship, and sustainability.

Students have unsurpassed intellectual freedom. Our faculty is open-minded to the pursuit of novel research questions, approaches, and contexts. We do demand that our students create sound theoretical arguments, gather unique datasets, analyze them rigorously, and consider managerial implications. We expect and enable our students to make a real contribution through both publishing and teaching.

Faculty research encompasses organizational change, supply-chain relationships, technology strategy, entrepreneurship, and sustainability.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Acquire advanced knowledge relevant to their areas of specialization.
- Develop advanced research skills for their areas of specialization.
- Assume teaching responsibilities at high-quality colleges and universities.
- Successfully graduate and place at high-quality, research-focused colleges and universities.

PhD in Management

Marketing (PhD)

<http://business.uoregon.edu/phd> (<http://business.uoregon.edu/phd/>)
Ryan Rahinel, Program Coordinator

484 Lillis Hall
541-346-3321
rahinel@uoregon.edu

The Lundquist College of Business Doctoral Program in Marketing develops scholars who will be productive researchers and effective teachers at leading colleges and universities throughout the world.

The program emphasizes training in consumer behavior and marketing strategy, with corresponding support in their cognate disciplines (e.g., psychology, economics, and statistics). It equips students to conduct original research on important problems that are of interest to both academics and practitioners in the field of marketing.

The marketing faculty have received their doctoral training at leading business schools and behavioral science departments. They are active researchers who publish regularly in scholarly marketing journals. Many have served or currently serve on editorial review boards at prominent journals and are widely recognized for their research, including national research excellence awards.

Program Learning Outcomes

- Upon successful completion of this program, students will be able to:
- Acquire advanced knowledge relevant to their areas of specialization.
 - Develop advanced research skills for their areas of specialization.
 - Assume teaching responsibilities at high-quality colleges and universities.
 - Successfully graduate and place at high-quality, research-focused colleges and universities.

PhD in Marketing		
Code	Title	Credits
Major Area Of Concentration		
Students must take at least 4 PhD seminars and/or Readings courses taught by LCB marketing faculty. Examples include:		
MKTG 687	Theory and Research in Marketing Management	
MKTG 689	Theory and Research in Consumer Behavior	
MKTG 607	Seminar: [Topic] (Marketing, Ethics, and Emotions)	
Statistics & Research Methods		
Students are required to take at least 6 courses in the Statistics/Research Methods area. Examples include:		
PSY 611	Data Analysis I	
PSY 612	Data Analysis II	
PSY 613	Data Analysis III	
EDUC 640	Introductory Statistics for Practitioners II	
JCOM 660	Advanced Research Methods: [Topic] (Text as Data)	
Behavioral Science		
Students are required to take at least 6 courses in the Behavioral Sciences area, incl. 3 outside of LCB. Examples include:		
PSY 558	Decision-Making	
PSY 533	Learning and Memory	
PSY 559	Cultural Psychology	
SOC 613	Advanced Sociological Methods: [Topic] (Social Network Analysis)	
PSY 610	Experimental Course: [Topic] (Advanced Cognitive Neuroscience)	
EC 528	Behavioral and Experimental Economics	
Dissertation		
MKTG 603	Dissertation	
Total Credits ¹		66

Operations and Business Analytics (PhD)

<http://business.uoregon.edu/phd> (<http://business.uoregon.edu/phd/>)

Behrooz Pourghannad, Program Coordinator

478 Lillis Hall
541-346-7579
behroozp@uoregon.edu

The Lundquist College of Business Doctoral Program in Operations Management prepares students seeking academic and research careers.

Operations Management concerns how organizations should optimize business processes (e.g., production, distribution) and policies (e.g., staffing, pricing) both internally and within the broader supply chain.

Researchers in the operations management area address these complex decisions using rigorous research methods that require a solid foundation in model building, theory development, and data analysis. These foundational skills reflect the strength of the Lundquist College's Department of Operations and Business Analytics, whose faculty work closely with students within the operations management doctoral program.

In addition to its faculty, the Department of Operations and Business Analytics spans the areas of information systems and statistics, allowing doctoral students to benefit from coursework and research opportunities in two areas complementary to the operations management area. Due to the quantitative orientation of this PhD option, students entering the program should have interests that lie at the intersection of applied mathematics and business research.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Acquire advanced knowledge relevant to their areas of specialization.
- Develop advanced research skills for their areas of specialization.
- Be able to assume teaching responsibilities at high-quality colleges and universities.
- Successfully graduate and place at high-quality, research-focused colleges and universities.

PhD in Operations and Business Analytics

Code	Title	Credits
Major Area Of Specialization		
Students are required to take ten (10) courses in specialization area, at least three of which must be taken after admission to the University of Oregon, Lundquist College of Business doctoral program. Specialization courses can be in the Functional area or in the Research Methods area. Examples include:		
OBA 607	Seminar: [Topic] (Advanced Optimization)	
OBA 607	Seminar: [Topic] (Research Methods in Operations Management)	
OBA 607	Seminar: [Topic] (Operations Research Modeling)	
OBA 607	Seminar: [Topic] (Inventory Models and Supply Chain)	

OBA 510	Experimental Course: [Topic] (Data Analytics)
OBA 555	Data Driven Predictive Modeling
OBA 566	Project and Operations Management Models
OBA 613	Operations Management
OBA 605	Reading and Conference: [Topic] (at most 5 can be counted toward degree)

Supporting Courses

Students are required to take at least three (3) courses in the Accounting, Finance, Marketing, Statistics, Microeconomics, and Linear Algebra. Examples include:

MGMT 607	Seminar: [Topic] (Academic Life)
FIN 613	Managerial Economics
EC 560	Theories of Industrial Organization
EC 543	Health Economics
EC 528	Behavioral and Experimental Economics

Courses in Mathematical Statistics

Quantitative Methods

Students are required to take at least six (6) courses in topics including, but not limited to probability & statistics, stochastic processes, regression analysis, and optimization. Examples include:

EC 607	Seminar: [Topic] (Core Econometrics (three courses))
EC 607	Seminar: [Topic] (Core Microeconomic (three courses))
EC 511	Advanced Microeconomic Theory
EC 527	Games and Decisions
MATH 567	Stochastic Processes

Dissertation

OBA 603	Dissertation

Total Credits¹ **72**

¹ Students entering with no prior graduate work must take additional credits to reach the University's 81 credit minimum.

Angela Davis, Jack O. Rickli Professor (financial reporting, valuation); Senior Associate Dean, Academic Programs. BS, 1993, Idaho; PhD, 2001, Washington. (2006)

Qintao Fan, associate professor (earnings management, incentive compensation and capital budgeting, information economics, initial public offerings). BA, 1996, Renmin University of China; MA, 1998, Maryland; MS, 2001, PhD, 2004, Stanford. (2016)

Nicole Johnson, Robert and Lois Braddock Research Scholar, associate professor (managerial incentives, performance measurement). Academic Director, Undergraduate Programs. BS, 1996, MAcc, 1996, Brigham Young; MS, 2002, PhD, 2005, Stanford. (2013)

Drummond Kahn, professor of practice (auditing). BA, 1989, Whitman; MS, 1990, Oregon. (2000)

Jaewoo Kim, Booth Research Scholar, associate professor (capital markets, financial reporting, information intermediaries, financial accounting for income taxes); Coordinator, Accounting PhD Program. BA, 2000, Korea; MBA, 2004, Korea Advanced Institute of Science and Technology; PhD, 2013, Iowa. (2019)

Linda Krull, Richard W. Lindholm Professor in Taxation (capital structure decisions, effects of taxes on corporate financial reporting and investment). BS, 1992, Indiana; MAcc, 1994, Florida; PhD, 2001, Arizona. (2008)

Jacqueline Mumford, instructor. University of Utah, BS, 2020, Macc, 2021. (2025)

Sarah Nutter, Charles E. Kern Professor (impact of taxes and taxation structures on individuals and businesses, incentives and differences on institutional and individual behavior). BS, Ferris State; MBA, PhD, Michigan State. (2017)

Stephanie Peel, George E. Porter Accounting Faculty Fellow, professor of practice (financial, operational, compliance, and systems auditing; data analysis). BS, 1990, Washington University. (2018)

Kyle Peterson, Charles E. Johnson Memorial Professor of Accounting, associate professor (comparability, disclosure, financial statement complexity, revenue recognition). Director of School of Accounting; BS, 2001, MAcc, 2001, Brigham Young; PhD, 2008, Michigan. (2008)

Scott Robinson, assistant professor. BS, 2012, University of Delaware; PhD, 2024, University of Colorado, Boulder. (2024)

Mary Savage, instructor. BS, 1997, MBA, 1999, JD, 2003, Oregon. (2021)

Joel Sneed, associate teaching professor (accounting information systems, financial and international accounting, US corporate, international corporate, and individual taxation). BS, 1986, MBA, 1988, Appalachia State; MS, 1997, PhD, 2001, Arizona. (2000)

Drew Stevenson, professor of practice. North Dakota State University, BS, 2009, University of South Dakota, MBA, 2024. (2025)

Michael Tomcal, associate teaching professor (financial accounting, cost accounting, federal taxation). BS, 1982, DePaul; MEd, 2005, Oregon State; MActg, 2005, Oregon. (2006)

Jennifer Welander, instructor. BA, 1993, Oregon; MBA, 2013, Oregon. (2021)

Laura Wellman, Tykeson Associate Professor of Accounting. associate professor. BS, 2006, MT, 2007, PhD, 2014, Arizona State. (2023)

Emeriti

Robin Clement, professor emerita. BSBA, 1979, Ohio State; MBA, 1983, Wisconsin; PhD, 1994, Michigan State. (2003)

Helen Gernon, professor emerit. BBA, 1968, Georgia; MBA, 1972, Florida Atlantic; PhD, 1978, Pennsylvania State; CPA, Florida. (1978)

David Guenther, professor emeritus. BA, 1976, California State, San Bernardino; PhD, 1990, Washington. (2005)

Michele Henney, professor emerit. BS, 1982, California State; MS, 1988, Golden Gate; PhD, 1994, Oregon. (2004)

Ray King, professor emerit. BS, 1971, Montana State; MBA, 1974, Montana; PhD, 1980, Oregon; CPA, Montana. (1982)

Steven Matsunaga, professor emerit. BA, 1979, San Francisco State; MBA, 1984, William and Mary; PhD, 1992, Washington. (1992)

Dale Morse, professor emerit. BA, 1969, MBA, 1975, Oregon; PhD, 1978, Stanford. (1991)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Finance

<http://business.uoregon.edu/departments/finance> (<http://business.uoregon.edu/departments/finance/>)

Z. Jay Wang, Alumni Investment Management Research Scholar

Department Head
Associate Professor of Finance

Faculty

Deborah Bauer, Peter and Molly Powell teaching professor of Finance (investment strategies, competitive analysis). BS 1997, Bryant; MS, 2001, Oregon. (2001)

Ioannis Branikas, assistant professor (household finance, corporate social responsibility, mutual funds). BA, 2010, MSc, 2012, Athens University of Economics and Business; MA, 2014, PhD, 2018, Princeton. (2018)

Roger Busse, James F. and Shirley J. Rippey Professor of Practice. BA, Reed; MTS, Harvard. (2021)

Maria Chaderina, assistant professor (capital structure, liquidity management, financial intermediation). BS, 2007, London; BS, 2007, Higher School of Economics; PhD, 2013, Carnegie Mellon. (2019)

John Chalmers, Abbott Keller Professor of Finance (household finance, municipal bond markets, mutual funds, retirement behavior, transaction costs); BA, 1985, Middlebury; MS, 1992, PhD, 1995, Rochester. (1996)

Diane Del Guercio, Gerry and Marilyn Cameron Professor in Finance (corporate governance, institutional investors, pension funds and mutual funds); BA, 1986, California, Santa Barbara; MA, 1989, PhD, 1994, Chicago. (1994)

Roberto Gutierrez, associate professor (asset pricing, return anomalies, trading of institutional money managers); Academic Director, Master of Science in Finance Program. BS, 1992, Tulane; PhD, 1999, North Carolina. (2003)

Brandon Julio, Alumni Investment Management Research Scholar, associate professor (corporate investment, international finance, mergers and acquisitions, payout policy, politics and finance, capital structure). BA, 1998, Brigham Young; MS, 2001, South Carolina; MS, 2005, PhD, 2007, Illinois, Urbana-Champaign. (2014)

Derek Nalle, associate teaching professor (greening economies and investment); Program Manager, Cameron Center for Finance and Securities Analysis. BS Miami University; MS, PhD, Oregon State (2001)

Robert Ready, Doug McKay Research Scholar, associate professor (asset pricing, commodities, international finance, macroeconomics). BA, 2003, Carnegie Mellon; MS, 2008, PhD, 2011, Pennsylvania. (2017)

Garrett Stanford, instructor. BS, 2014, University of Puget Sound; MS, 2020, PhD, 2023, University of Oregon. (2025)

Zhi "Jay" Wang, Alumni Investment Management Research Scholar, associate professor (asset management, institutional investors, market liquidity). Head, Department of Finance; BA, 1994, Peking (Beijing); MS, 1998, PhD, 2000, Iowa State; PhD, 2004, Michigan, Ann Arbor. (2012)

Michael Wismer, instructor (real estate). BA, 1970, MS, 1974, Brigham Young. (1996)

Daniel Wright, instructor. AS, 2001, MBA, 2009, Brigham Young; BS, 2004, University of Utah; MPS, 2018, Cornell University. (2025)

Youchang Wu, John B. Rogers Research Scholar, associate professor (asset pricing, corporate finance); Coordinator, Finance PhD Program. BS, 1994, MS, 1996, Peking, Beijing; PhD, 2004, Vienna. (2015)

Yuchi Yao, assistant professor (IPO, SPACs, director networks, entrepreneurship, financial networks, financial intermediation, investment banking, Bayesian uncertainty and learning). BS 2014, MS 2016, Nankai University, China; MS, 2018, University of Virginia; MS 2019, PhD 2024, University of Rochester. (2024)

Calvin Zhang, assistant professor (real estate and household finance, housing markets, urban economics, political economy); BA, 2009, Northwestern University; PhD, 2017, UC Berkeley. (2024)

Jane Zhang, assistant professor (household finance, behavioral finance); Bachelor of Management, 2018, Fudan University, China; PhD, 2024, UCLA. (2024)

Emeriti

Larry Dann, professor emerit. BS, 1967, Northwestern; MBA, 1969, Harvard; PhD, 1980, California, Los Angeles. (1977)

Jennifer Ellis, senior instructor I emerit. BA, 1977, MA, 1978, University of Essex; PhD, 1992, Oregon (1997)

Jerome Dasso, professor emerit. BS, 1951, Purdue; MBA, 1952, Michigan; MS, 1960, PhD, 1964, Wisconsin, Madison. (1966)

Wayne Mikkelsen, professor emerit. BA, 1974, Macalester; MS, 1978, PhD, 1980, Rochester. (1984)

George Racette, associate professor emerit. BA, 1966, Stanford; MBA, 1967, Michigan; PhD, 1972, Washington. (1974)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Glen R. Waddell, professor (applied econometrics, industrial organization, labor economics). See **Economics**.

Management

<http://business.uoregon.edu/departments/management> (<http://business.uoregon.edu/departments/management/>)

David Wagner, Doug McKay Research Scholar

Department Head

Associate Professor of Management

Faculty

Geoffrey Borchhardt, assistant professor (entrepreneurship and self-employment, global micro-enterprises, innovation, careers); BSc, Copenhagen Business School; MSc, Oxford; PhD, 2024, Yale. (2024)

Tina Boscha, instructor. BA, Calvin College; MA, 1997, Wisconsin; MFA, 2002, Oregon. (2019)

Thomas Cieslak II, associate teaching professor. BS, MA, Wayne State; PhD, 2004, The Ohio State. (2022)

Innessa Colaiacovo, assistant professor (entrepreneurship, innovation and growth); BA, 2012, Brown University; MSc, 2018, Universita Bocconi; PhD, 2024, Harvard. (2024)

Michael Crooke, professor of practice. BS, MBA, Humboldt; PhD, Claremont. (2012)

John Davis, professor of practice (business sustainability, international business and brand strategy, leadership, marketing and sales management, marketing measurement and accountability, sports marketing); Program Manager, Center for Sustainable Business Practices. BA, 1982, Stanford; MBA, Columbia, 1990. (2022)

Scott Day, Peter and Molly Powell Associate Teaching Professor of Management. BA, 1980, Wisconsin; JD, 1984, Toledo (2022)

Khonika Gope, assistant professor. BS, 2007, Bangladesh University; MBA, 2010, Emory; PhD, 2023, Stanford. (2023)

Ralph Heidl, Inman Research Scholar, associate professor (collaborative networks, innovation management, intellectual property strategy, technology entrepreneurship). MS, 1994, MS, 2000, Pennsylvania State; PhD, 2010, Washington. (2015)

Greg Hennessy, instructor. BS, 1987, Houston; MS, 1989, California Institute of Technology; MS, 1993, Massachusetts Institute of Technology; PhD, 2021, Claremont. (2021)

Dan Howard, instructor. (business law, negotiations, professional ethics, and tax research). BA, 1996, Ohio State; JD, 2000, California (2022)

Jody Johannessen, associate teaching professor (management strategy, organizational behavior, and international business). AB, Princeton: MBA, MM, 2000, Northwestern (2022)

Lauren Lanahan, Inman Research Scholar, associate professor (high tech ventures, research and development, institutions, public policy). BA, 2006, Reed College; MA, 2013, PhD, 2015, North Carolina. (2015)

Nathan Lillegard, instructor (early-stage finance and operations, new venture development, technology transfer and licensing, venture capital and business funding). BA, 1998, MBA, 2006, Oregon. (2012)

Chris Liu, associate professor (entrepreneurship, scientists, social influences): Coordinator, Management PhD Program. BA, 1997, Washington; PhD, 2005, Massachusetts Institute of Technology; DBA, 2010, Harvard. (2019)

Farhad Malekafzali, instructor (American institutions, international relations, comparative government). PhD, 1994, Wisconsin. (2012)

Emily Moore, instructor. BS, 2002, New Hampshire; MS, 2019, Oregon. (2019)

Alex Murray, assistant professor (crowdfunding, decentralized governance, distributed ledger technology, entrepreneurship, innovation, resource mobilization, technology entrepreneurship, venture finance). BS, 2011, Alabama; MS, 2012, Virginia; PhD, 2018, Washington. (2019)

Andrew Nelson, Randall C. Papé Chair in Entrepreneurship and Innovation, professor (entrepreneurship, innovation, interorganizational networks, occupations and technology, research commercialization). BA, 1998, Stanford; MS, 2000, Oxford; PhD, 2007, Stanford. (2008)

Amy Nuetzman, instructor. BA, 1997, Western Oregon; MA, 2000, New Mexico Highlands. (2019)

Natasha Overmeyer, assistant professor. AB, 2013, Harvard; PhD, 2023, Stanford. (2023)

Sung ho Park, assistant professor (entrepreneurship, strategy, and international business); BA, 2016, Chung-Ang University, South Korea; MS, 2017, Erasmus University, The Netherlands; PhD, 2024, University of Washington. (2024)

Anne Parmigiani, Carolyn S. Chambers Professor of Management (capabilities, firm boundaries, firm capabilities, interfirm relationships, knowledge transfer, supply chain management, vertical interfirm relationships). BS, 1987, MBA, 1996, Pennsylvania State; PhD, 2003, Michigan, Ann Arbor. (2004)

Steve Schmidt, instructor. BS, 1992, Oregon State; MBA, 2011, Northwest Christian. (2016)

Joshua Skov, associate teaching professor (life-cycle assessment, clean energy finance, carbon accounting); Academic Director and Industry Mentor, Center for Sustainable Business Practices. BA, 1992, Yale; MA, 1994, Washington; MA, 1997, California, Berkeley. (2009)

Jeffrey Stolle, Bashaw teaching professor of Management (ethics, critical thinking). BA, 1990, St. Thomas - Minnesota; MA, 1994, Vanderbilt; PhD, 2001, Oregon. (2007)

David Wagner, Doug McKay Research Scholar, associate professor (human sustainability, work-life interface, mood and emotion, sleep and work); Head, Department of Management. BS, 2002, MAcc, 2004, Brigham Young; PhD, 2009, Michigan State. (2014)

Peter A. Younkin, Inman Research Scholar, associate professor (entrepreneurship, diversity, cultural industries). BA, 1999, Columbia; PhD, 2010, California, Berkeley. (2018)

Emeriti

David Dusseau, senior instructor I emerit. BS, 1974, Ohio State; MBA, 1985, PhD, 1992 Oregon. (1984)

Warren Brown, professor emerit. BS, 1955, Colorado; MS, 1957, Stanford; MS, 1959, PhD, 1962, Carnegie-Mellon. (1967)

Beth Hjelm, senior instructor I emerit. BA, 1980, Notre Dame; MS, 1982, Kellogg School of Management. (2002)

Chuck Kalnbach, senior instructor II emerit. BA, 1991, Thomas Edison State; MS, 1995, Indiana, Bloomington; EdD, 2008, Nova Southeastern. (2003)

Alan Meyer, professor emerit. BA, 1968, MBA, 1970, Washington; PhD, 1978, California, Berkeley. (2009)

Peter Mills, professor emerit. BS, 1970, MBA, 1971, California State, Long Beach; PhD, 1978, Stockholm; PhD, 1980, California, Irvine. (1995)

Rick Mowday, professor emerit. BS, 1970, San Jose; MS, 1972, PhD, 1975, California, Irvine. (1977)

Mike Russo, professor emerit. BS, 1979, Columbia; MS, 1980, Stanford; MBA, 1986, PhD, 1989, California, Berkeley. (1989)

Bill Starbuck, courtesy professor in residence emerit. AB, 1956, Harvard College; MS, 1959, PhD, 1964, Carnegie Institute of Technology. (2017)

Tina Starr, senior instructor I emerit. BSc, 2000, Derby; MSc, 2001, PhD, 2006, Nottingham. (2011)

Richard Steers, professor emerit. BA, 1967, Whittier; MBA, 1968, Southern California; PhD, 1973, California, Irvine. (1975)

James Terborg, professor emerit. BA, 1970, Calvin; MS, 1972, Eastern Michigan; PhD, 1975, Purdue. (1980)

College of Design

<http://design.uoregon.edu>

Adrian Parr, Dean

105 Lawrence Hall
541-346-3631

A unique academic ecosystem, the College of Design includes not only creative practitioners—artists, architects, and designers—but also social scientists, humanities scholars, engineers, economists, biologists, planners, and policy makers. Using diverse methods, we are asking critical questions and tackling complex problems. The college (founded in 1914 and formerly known as the School of Architecture and Allied Arts) has degree programs in both Eugene and Portland.

The College of Design comprises three schools and one independent department:

- School of Architecture and Environment (p. 457)
- School of Art + Design (p. 483)
- School of Planning, Public Policy and Management (p. 503)
- Department of the History of Art and Architecture (p. 494)

Architecture and Environment

The School of Architecture and Environment is nationally recognized for its innovation and sustainability research including the design of buildings, interiors, landscapes and communities. We are committed to the principles of civic responsibility, environmental sustainability, international understanding, and interdisciplinary education. The School of Architecture and Environment is located on the University of Oregon campus in Eugene, and at the historic White Stag Block in Portland.

Architecture

<http://architecture.uoregon.edu>

Michael Zaretsky, Department Head

210 Lawrence Hall
1206 University of Oregon
Eugene, OR 97403-1206
541-346-3656

Contact information for Portland Architecture Programs

70 NW Couch St.
Portland, Oregon 97209
503-412-3718

Students of architecture learn how to make physical changes to their surroundings that enhance the quality of the built environment and their community's experience of life. Within this broad purpose, architectural study and practice include the tasks of providing shelter and environmental protection, providing appropriate settings for human activities, and creating forms that are aesthetically pleasing and supportive of social well-being. In the context of rapid urbanization, climate change, transforming economies, emerging technologies, growing inequalities, and other challenges, the potential impact and value of architectural design has never been greater.

Because interdisciplinary collaboration is key to the practice of architecture, the Department of Architecture shares classes and facilities with the Interior Architecture Program and the Department of Landscape Architecture in Eugene and the Historic Preservation Program in Portland, all units within the College of Design's School of Architecture and Environment.

A central part of education in the field of architecture is the design studio, where students learn by doing—hands-on application of knowledge and skills toward the design of buildings. This type of learning is demanding, and students are expected to stay motivated and work independently and responsibly toward program and course objectives. In the design studio, continuous evaluation and response are the basic learning modes.

The department sets high standards for student performance. Advanced students often work together in courses and as collaborators with faculty members in research investigations through independent-study courses.

Faculty

Kyu-Ho Ahn, associate professor (interior architecture). BFA, 1992, Hong-Ik; MFA, Iowa State. NCIDQ certificate. (2008)

Juli Brode, associate teaching professor.

G. Z. Brown, professor (design, environmental control systems, effect of energy and material conservation on architectural form). BA, 1964, MA, 1966, Michigan State; MBA, 1971, Akron; MArch, 1974, Yale; reg. architect, Oregon; fellow, American Institute of Architects. (1977)

Virginia Cartwright, associate professor (design, Finnish architecture, lighting). AB, 1975, California, Berkeley; MArch, 1981, Oregon. (1986)

Nancy Yen-Wen Cheng, associate professor (design, digital media). BA, 1983, Yale; MArch, 1990, Harvard; reg. architect, Massachusetts (inactive); NCARB certificate. (1996)

Donald B. Corner, professor (design, construction systems, housing production). BA, 1970, Dartmouth College; MArch, 1974, California, Berkeley; reg. architect, Massachusetts. (1979)

Howard Davis, professor (design, urban vernacular architecture, culturally sustainable urban districts); director, graduate studies. BS, 1968, Cooper Union; MS, 1970, Northwestern; MArch, 1974, California, Berkeley; Association of Collegiate Schools of Architecture Distinguished Professor. (1986)

Mark Donofrio, associate professor (design, structures, interdisciplinary design). BA, 2004, Illinois, Chicago; MArch, 2006, Illinois, Urbana-Champaign; reg. architect, Illinois. (2010)

Stephen F. Duff, associate professor (design; structures, construction, and design-build; naval architecture). BA, 1985, Washington (Seattle); MArch, 1988, MS, 1993, California, Berkeley. (1994)

Ihab Elzeiyadi, professor (design, environmental control systems). BArch, 1988, Graduate Diploma in Architectural Engineering, 1990, Ain Shams University; MS, 1996, Pennsylvania State; PhD, 2001, Wisconsin, Milwaukee; reg. architect, reg. engineer, Egypt. (2001)

Michael E. Fifield, professor (design, housing, urban design). BA, 1973, California, Berkeley; MArch, 1980, California, Los Angeles; reg. architect, Oregon, Arizona, Idaho; NCARB certificate; fellow, American Institute of Architects; member, American Institute of Certified Planners. (1998)

Gerald Gast, associate professor (urban and architectural design, urban studies). BArch, 1967, MArch, 1969, Illinois; reg. architect, California. (1994)

Donald Genasci, professor (history and theory, architecture and urban design). BArch, 1963, Oregon; Dipl. in Urban Design, 1965, Architecture Association; MA, 1974, Essex; reg. architect, Oregon, NCARB certificate; Architects' Registration Council of the United Kingdom. (1977)

Mark Gillem, professor (urban design, social and cultural factors in design). BArch, 1989, Kansas; MArch, 1996, PhD, 2004, California, Berkeley; reg. architect, California, South Dakota; NCARB certificate; member, American Institute of Architects, American Institute of Certified Planners. (2005)

James W. Givens, associate teaching professor (design, design theory and process). BArch, 1985, MArch, 1989, Oregon. (1986)

Esther Hagenlocher, associate professor (architecture, interior architecture). Certificate of Profession—Cabinet Maker, 1987, Technical College, Stuttgart; DiplIng, 1994, State Academy of Art and Design, Stuttgart; MArch, 1998, University College, London; reg. architect, Germany (inactive). (2004)

Peter A. Keyes, associate professor (design, housing research and building technology, community design). AB, 1978, Harvard; MArch, 1983, Columbia; reg. architect, New York (inactive). (1990)

Solmaz Mohammadzadeh Kive, assistant professor (interior, history and theory). MArch, 2005, Shahid Beheshti; MArch, 2010, McGill; reg. architect, Tehran. (2017)

Alison G. Kwok, professor (design, environmental control systems). BA, 1977, Knox; MEd, 1980, Hawaii; MArch, 1990, PhD, 1997, California, Berkeley; reg. architect, California, Oregon; NCARB certificate; certified passive house consultant. (1998)

Nico Larco, professor (design, urban design, suburban development). BA, BArch, 1996, Cornell; MArch, MCUP, 2001, California, Berkeley; reg. architect, Massachusetts, NCARB certificate. (2005)

Erin Moore, associate professor (design, technology, media). BA, 1996, Smith; MArch, 2003, California, Berkeley; reg. architect, Arizona; NCARB certificate. (2008)

Brook Muller, associate professor (design theory, environmentally responsive architecture); associate dean for academic affairs. BA, 1987, Brown; MArch, 1992, Oregon. (2004)

Hans Joachim Neis, associate professor (urban and architectural design and theory). DiplIng, Darmstadt, 1976; MArch, 1979, MCP, 1980, PhD, 1989, California, Berkeley; reg. architect, urban designer, Germany. (2000)

Kevin Nute, professor (design history and theory, time-sensitive buildings). BA, 1981, BArch, 1985, Nottingham; PhD, 1993, Cambridge. (2000)

Otto P. Poticha, adjunct associate professor (design, architectural practice, community involvement in physical change). BS, 1958, Cincinnati; reg. architect, California, Colorado, Illinois (inactive), New Mexico, Oregon, Virginia (inactive), Washington, Washington, D.C. (inactive); NCARB certificate; fellow, American Institute of Architects. (1962)

Siobhan Rockcastle, assistant professor (design, lighting, environmental psychology); director, Baker Lighting Laboratory. BArch, 2008, Cornell; SMArchS, 2011, Massachusetts Institute of Technology; PhD, 2017, École polytechnique fédérale de Lausanne. (2017)

John S. Rowell, associate professor (design, construction, building enclosure). BS, 1984, British Columbia; MArch, 1990, Oregon; reg. architect, Washington, Oregon, California; NCARB certificate; member, American Institute of Architects. (1996)

Judith E. Sheine, professor (design, history and theory, housing). AB, 1975, Brown; MArch, 1979, Princeton; reg. architect, California. (2012)

Philip Speranza, associate professor (design, design communications). BS, 1997, Virginia; MArch, 2002, Columbia; reg. architect, California, New York. (2011)

Robert L. Thallon, associate professor (design, media, construction). BA, 1966, California, Berkeley; MArch, 1973, Oregon; reg. architect, Oregon, California. (1979)

Roxi Thoren, associate professor. See **Landscape Architecture**.

James T. Tice, professor (urban design, architectural history and theory). BArch, 1968, MArch, 1970, Cornell; reg. architect, California. (1990)

Glenda Fravel Utsey, associate professor (design, site-specific process and skill development, settlement patterns). BArch, 1971, MLA, 1977, Oregon. (1981)

Kevin G. Van Den Wymelenberg, professor; director, Energy Studies in Buildings Laboratory. BS, 2000, Wisconsin, Milwaukee; MArch, 2002, PhD, 2012, Washington (Seattle). (2015)

Daisy-O'lice Ida Williams, associate professor (design, design communications); BS, 2002, MArch, 2005, Florida A&M. (2011)

Jenny Young, professor (design, programming, health-care facilities). BA, 1970, Vassar; MArch, 1974, California, Berkeley; reg. architect, Oregon. (1982)

Linda K. Zimmer, associate professor (design, media, behavioral factors). BIArch, 1982, Kansas State; MIArch, 1990, Oregon; NCIDQ certificate; member, Institute of Business Designers. (1990)

Courtesy

Edward Allen, courtesy professor (technical teaching program). BArch, 1962, Minnesota; MArch, 1964, California, Berkeley; reg. architect, Massachusetts. (2001)

Emeriti

Wilmot G. Gilland, professor emeritus. AB, 1955, MFA, 1960, Princeton; reg. architect, California, Oregon; Fellow, American Institute of Architects. (1969)

Arthur W. Hawn, professor emeritus. BA, 1961, MA, 1964, Washington State; Fellow, Interior Design Educators Council. (1967)

Earl E. Moursund, professor emeritus. BS, 1949, Texas; MArch, 1951, Cranbrook Academy of Art; reg. architect, Texas. (1955)

Gary W. Moye, associate professor emeritus. BArch, 1967, Oregon; MArch, 1968, Pennsylvania; reg. architect, Pennsylvania, New York, Oregon. (1976)

Donald L. Peting, associate professor emeritus; assistant dean, architecture and allied arts. BArch, 1962, Illinois; MArch, 1963, California, Berkeley; reg. architect, Oregon, Washington. (1963)

James A. Pettinari, professor emeritus. BArch, 1966, Minnesota; MArch, 1970, Pennsylvania; reg. architect, Minnesota; NCARB certificate. (1975)

Guntis Plesums, professor emeritus. BArch, 1961, Minnesota; MArch, 1964, Massachusetts Institute of Technology; reg. architect, Oregon, New York. (1969)

John S. Reynolds, professor emeritus. BArch, 1962, Illinois; MArch, 1967, Massachusetts Institute of Technology; reg. architect, Oregon; fellow, American Institute of Architects; Association of Collegiate Schools of Architecture Distinguished Professor. (1967)

Michael D. Utsey, associate professor emeritus. BArch, 1967, Texas; MEVD, 1971, Yale; reg. architect, Oregon. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Urban Historic Preservation (p. 466)

Architecture (BArch)

<http://architecture.uoregon.edu>

Architecture is about learning to make physical changes to our surroundings that enhance the quality of the built environment and our experience of life. This broad purpose includes providing shelter and environmental protection with the highest standards for energy efficiency and environmentally sustainable architecture, designing appropriate settings for human activities, and creating forms that are aesthetically pleasing and supportive of social well-being and environmental health.

While basics are taught in Eugene, as an advanced student, you may also study and work in the exciting urban setting of Portland at the UO's

White Stag Block. The Department of Architecture at the UO offers a large number of special topic courses, and a robust program of visiting architects from around the world who come to campus to lecture and teach. The department's exceptional faculty bring strengths to a wide variety of areas that include:

- healthy built environments
- sustainable, resilient design
- housing and urban design
- design process and theory
- art and science of building
- computational design
- lighting and lighting design

The Department of Architecture at the University of Oregon is accredited by the National Architectural Accrediting Board (NAAB). The program leading to the B.Arch degree is a vibrant and collaborative learning environment that prepares students to be value-based leaders in the architecture and design disciplines as well as within the communities in which they work and live.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge of issues of social justice and environmental sustainability as core components of a dynamic design process between built and natural environments.
- Demonstrate the critical thinking, values, knowledge, skills, and practices they need to create meaningful architecture that resonates with people and their cultural, physical, and ecological worlds.
- Develop a holistic design process that integrates human experience and building systems across a range of scales considering innovative approaches, methods and technologies.
- Develop a critical understanding of the histories and theories of architecture and urbanism as framed by diverse social, cultural, economic, and political forces, nationally and globally.
- Develop a capacity for collaboration along with an ability to communicate with diverse constituencies.
- Understand the paths to becoming licensed as an architect and the associated professional ethics, regulatory requirements, and fundamental business processes relevant to architecture practice in the United States.

The five-year professional BArch degree program is highly structured the first two years and more flexible the last three. This flexibility allows each student to establish a study sequence according to individual interests and needs. Transfer students should be aware that an accelerated program is normally possible only for students who transfer from an NAAB-accredited architecture program.

Architecture Major Requirements

Code	Title	Credits
Introductory Architectural Design Studios		
ARCH 283 & ARCH 284	Architectural Design I and Architectural Design II	12
ARCH 383 & ARCH 384	Architectural Design III and Architectural Design IV	12
Intermediate Architectural Design Studios		

ARCH 484	Architectural Design (repeatable studio for all professional-degree students; BArch students must complete four terms of ARCH 484) ¹	24

Advanced Architectural Design Studios

PHYS 202	General Physics	4

or PHYS 252	Foundations of Physics I	

Total Credits		164

¹ One may be Interior Design (IARC 484), Furniture Design (IARC 486), or Site Planning and Design (LA 489).

² Approved advanced technology courses vary by term; visit department website (<https://archenvstudents.uoregon.edu/architecture-and-interior-architecture/course-syllabi/eugene-courses/>) for full list.

³ Approved architectural history courses vary by term; visit department website (<https://archenvstudents.uoregon.edu/architecture-and-interior-architecture/course-syllabi/eugene-courses/>) for full list.

⁴ Approved subject area electives vary by term; visit department website for full list. One 3-credit (minimum) subject area elective must be an approved design arts course (not technology or media).

⁵ Art history (ARH) courses at the 300 level or above taken beyond the art history requirement may be applied toward the upper-division, general-education elective requirements.

⁶ These courses delve into the literature of academic subjects outside the subject areas of architecture and interior architecture. The upper-division electives may not be courses in service, weekend seminar, human development, or leisure studies. They must be taken in residence at the University of Oregon.

Courses required for the major must be passed with a grade of at least C- or P or P* to count toward the major.

A sample plan for the bachelor of architecture degree (<https://archenvironment.uoregon.edu/architecture/undergrad/barch/>) is available on the department website.

Architecture Minor

The Minor in Architecture exposes students to fundamental principles of architecture through coursework that integrates design thinking, place making with human behavior and need.

Minor Requirements: 26 credits

Courses used to fulfill the minor requirements must be taken for a letter grade of C- or better or a mark of Pass (P or P*).

Code	Title	Credits
ARCH 201	Introduction to Architecture	4
ARCH 484	Architectural Design (only required for interior architecture and landscape architecture majors) ¹	6
Electives (see table below; any students outside of interior architecture and landscape architecture must take 22 credits of electives)		16
Total Credits		26

¹ ARCH 484 Architectural Design is a course that may not be taken by students outside of the Department of Architecture, with the exception of landscape architecture students.

Electives

Code	Title	Credits
ARCH 407	Seminar: [Topic]	1-6
ARCH 409	Terminal Project	1-6
ARCH 410	Experimental Course: [Topic]	1-6
ARCH 430	Architectural Contexts: Place and Culture	4
ARCH 435	Principles of Urban Design	4
ARCH 437	Theory of Urban Design II	3
ARCH 438	Housing Prototypes	3
ARCH 439	Minimal Dwelling	3
ARCH 440	Human Context of Design	4
ARCH 450	Spatial Composition	4
ARCH 491	Environmental Control Systems I	4
ARCH 492	Environmental Control Systems II	4
ARH 314	History of World Architecture I	4
ARH 315	History of World Architecture II	4

It is possible to take other architecture courses and apply them to the minor with the permission of the instructor.

Undergraduates who are enrolled in any major may apply to the minor. Completed applications including a statement of support from the student's major advisor are submitted to the Department of Architecture office. Applicants must make an appointment with the architecture advisor to discuss their plan of study. Because the department's first obligation is to its majors, it cannot guarantee availability of courses for minors. Minors may register if space is available after the needs of majors have been met. Space for enrollment in the minor program is limited.

Architecture (MArch)

Our master of architecture degree allows students to complete a professional degree, leading to licensure, in a stimulating academic environment that is characterized by cooperation, rigor, and a commitment to human quality in the built environment.

The program is studio-based, with a full complement of professional courses with opportunities to focus on an area of special interest. Students can take advantage of numerous on and off-campus opportunities for expanding their academic experience. We offer a full array of foreign-study programs, internships in architectural offices, and various opportunities to work directly with communities.

Track I

Eligible applicants must hold a bachelor's degree or higher from a regionally accredited four-year U.S. college or university OR hold an equivalent credential from a qualifying international institution.

Track II

Eligible applicants must have a pre-professional degree in architecture from a regionally accredited four-year U.S. college or university OR hold an equivalent credential from a qualifying international institution. A four-year program is considered qualified if the school has an accredited graduate program.

The Department of Architecture at the University of Oregon is accredited by the National Architectural Accrediting Board (NAAB). The program leading to the M.Arch degree is a vibrant and collaborative learning environment that prepares students to be value-based leaders in the architecture and design disciplines as well as within the communities in which they work and live.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge of issues of social justice and environmental sustainability as core components of a dynamic between built and natural environments.
- Demonstrate the critical thinking, values, knowledge, skills, and practices they need to create meaningful architecture that resonates with people and their cultural, physical, and ecological worlds.
- Develop a holistic design process that integrates human experience and building systems across a range of scales considering innovative approaches, methods and technologies.
- Develop a critical understanding of the histories and theories of architecture and urbanism as framed by diverse social, cultural, economic, and political forces, nationally and globally.

- Develop a capacity for leadership, collaboration and research along with a capacity to engage diverse constituencies.
- Demonstrate understanding of the paths to becoming licensed as an architect and the associated professional ethics, regulatory requirements, and fundamental business processes relevant to architecture practice in the United States.

• Track I (p. 461)

• Track II (p. 462)

Professional Master of Architecture Degree Requirements

The professional, NAAB-accredited master of architecture (MArch) degree program prepares students for careers in architectural practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study, both of which lead to the MArch degree. Track I typically takes ten terms to complete and requires 144 credits.

Track I students typically complete all or most of the MArch degree program requirements at the University of Oregon, and begin the program the summer before their first full academic year of study. Students with bachelor's degrees (BA, BS) other than a preprofessional degree in architecture must apply to the Track I program.

Students with degrees in related design disciplines (e.g., landscape architecture, interior architecture, environmental design, or architecture degrees from programs at schools that are not accredited) may be given advanced standing, up to a maximum of three terms of studio credit for equivalent prior studio work. Track I students may apply to transfer to Portland after completing the introductory design studio sequence in Eugene.

¹ LA 589 Site Planning and Design, IARC 584 Interior Design, or IARC 586 Furniture Design may be substituted for one of the required ARCH 584 Architectural Design studios.

Courses required for the program must be passed with a grade of at least C- or P or P* to count toward the program. There is no minimum graded credit requirement for Architecture, however, the Division of Graduate Studies requires a GPA of a 3.0 to remain in good standing.

MArch Track I Sample Plan of Study

Professional Master of Architecture Degree Requirements

The professional, NAAB-accredited master of architecture (MArch) degree program prepares students for careers in architectural practice and careers in allied professions that contribute to shaping the built environment.

Track II is a six-term advanced placement program that requires approximately 87 credits (the exact number determined on the basis of individual evaluation of prior course work at the time of admission).

Track II is for applicants who have a four-year preprofessional degree in architecture from an institution where the four-year degree is part of a "four plus two" NAAB-accredited degree program. Students admitted into Track II begin their studies fall term. Applicants who have a four-year preprofessional degree in an environmental design discipline and an equivalent amount of professional studio and course work may be considered for Track II. Track II students must fulfill the same professional curriculum requirements as the Track I program, but are admitted with advanced standing in studio and subject-area courses. The extent of this advanced standing is determined by the department before beginning the program. This preliminary evaluation of course waivers is provisional, pending satisfactory completion of three terms in residence.

ARCH 517	Context of the Architectural Profession	
TOTAL CREDITS		87

¹ LA 589 Site Planning and Design, IARC 584 Interior Design, or IARC 586 Furniture Design may be substituted for one of the required ARCH 584 Architectural Design studios.

² Architectural Core requirements will vary depending on prior coursework credits after an evaluation of academic transcripts by the Director of Graduate Studies. All possible core courses students may be required to take are shown. Architectural Core and Subject Area Electives make up the remaining degree credit requirements to total a minimum of 87 credits earned for the degree.

Courses required for the program must be passed with a grade of at least B- or P or P* to count toward the program. There is no minimum graded credit requirement for Architecture, however, the Graduate School requires a GPA of a 3.0 to remain in good standing.

Of the required 87 credits done in residence, 15 credits must be applied to an advanced study cluster (<http://architecture.uoregon.edu/current/m.arch-cluster/>) or 16 credits must be applied to a specialization or 12 credits must be applied to one of the department's graduate certificate programs. Students who complete a concurrent master's degree in an

allied field are exempt from this requirement. This work may include an independent research project.

Students admitted into the Track II program are expected to have completed professional courses in building technology, architectural history, architectural design, and other subject areas in their undergraduate degree program. Students with insufficient preparation may be admitted with deficiencies. Satisfaction of the specific deficiencies may require additional course work for the degree. Students intending to enroll in the Track II program in Portland may be required to fulfill deficiencies on the Eugene campus before they may commence study in Portland.

Architecture (MS)

The post-professional architecture master of science (MS) degree allows students to complete advanced research and design work that builds on an existing professional degree in architecture, architectural engineering, structural engineering, construction management, or a related field.

Eligible applicants must hold a bachelor's degree or higher from a regionally accredited (<https://www.chea.org/regional-accrediting-organizations/>) four-year U.S. college or university OR hold an equivalent credential from a qualifying international institution. This degree does not provide a path to licensure.

The Master of Science in Architecture is a STEM-designated degree (<https://archenvironment.uoregon.edu/architecture/stem-designated-degrees/>).

The Master of Science in Architecture degree program provides an opportunity for advanced study and contribution to knowledge in the field through a thesis or terminal project. The post-professional Master of Science in Architecture (MS) degree allows students to complete advanced research and/or design inquiry that builds on an existing professional degree in architecture, interior architecture, landscape architecture, architectural engineering, structural engineering, construction management, or another related field.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Integrate design and advanced research to address the pressing and complex issues of the built environment.
- Develop research techniques appropriate for investigating advanced systems.
- Advance the knowledge and practice of architecture through critical thinking and experimentation in a research project (thesis) or design research project (terminal project).

MS Architecture: Post-professional Master of Science in Architecture Degree Requirements

The Master of Science in Architecture degree program provides an opportunity for advanced study and contribution to knowledge in the field through a thesis or terminal project. The post-professional Master of Science in Architecture (MS) degree allows students to complete advanced research and/or design inquiry that builds on an existing professional degree in architecture, interior architecture, landscape architecture, architectural engineering, structural engineering, construction management, or another related field. Students enrolled in the Master of Science degree program must take a minimum of 45 graduate credits, of which 30 must be in architecture and 9 must

be at the 600 level. Students complete a minimum of three terms in residence and are required to complete 9 credits in ARCH 503 (<http://catalog.uoregon.edu/search/?P=ARCH%20503>) Thesis or Terminal Project (ARCH 619 (<http://catalog.uoregon.edu/search/?P=ARCH%20619>)). Students in this program are expected to develop an individual research topic leading to a thesis or terminal project in one or more of the following areas of faculty research and design excellence:

- **Sustainable Buildings:** Green Technologies, High-Performance Envelopes, Net-Zero Buildings, and Eco-Districts.
- **Sustainable Construction:** Mass Timber Design, Green Building Materials, Fabrication, Construction Methods, and Life Cycle Analysis.
- **Lighting Design:** Daylighting, Electric Lighting, Luminaires and Photometrics, and Visual Comfort.
- **Health and Indoor Environments:** Indoor Environmental Quality, Human-Centric Design, Occupant Performance and Health.
- **Sustainable Urbanism and Housing:** Urban Architecture and Urban Design, Housing Design, Community Design, Livable Communities, New Mobility, and Climate Action.
- **Design for Social Sustainability:** Environment-Behavior Studies, Human-Context of Design, Spatial Justice, Accessibility and Universal Design, Cultural, Social and Economic Sustainability.
- **Design Computing:** Modeling, Simulations, and Design Communication.
- **Architectural History and Theory:** Preservation, Adaptive-reuse, Architectural Theory and Criticism.

The post-professional MS curriculum focuses on individual research and/or design inquiry that draws from professional and general university courses and consultation with the student's advisor and thesis or terminal project committee. For more information about the thesis, see the **Division of Graduate Studies** section of this catalog.

Code	Title	Credits
	Research Inquiry ¹	9-18
	Area of Research/Design Focus	27-36
	Minimum Total Credits:	45

¹ Students complete a minimum of three terms in residence and are required to complete 9 credits in ARCH 503 (<http://catalog.uoregon.edu/search/?P=ARCH%20503>) Thesis or Terminal Project (ARCH 619 (<http://catalog.uoregon.edu/search/?P=ARCH%20619>)).

Architecture (PhD)
