The PhD degree program focuses on sustainable design, addressing the needs of the profession as society faces the environmental impact of its cities. It prepares students for careers at universities and other institutions engaged in research related to sustainable design, such as national research laboratories, industry research and development, public agencies, and nongovernment organizations. PhD students address research topics that encompass spatial, environmental, historical, social, political, technical, and economic factors. In addition to a rigorous understanding of building performance, aspects of sustainable community development, and broader social processes and policies, each student is expected to demonstrate an understanding of theory and research in a related focus area. Completion of the program requires demonstrated excellence through original contributions to the field.

Depending on background and research goals, students can expect to complete the degree in three to six years, with four to five years being most typical. There is a minimum residency of two years of full-time graduate work at the Eugene campus.

The program supports advanced study in the following areas:

- Design and policy for sustainable cities and livable communities
- Design for climate change and adaptation
- Cultural, social, and economic sustainability
- Net-zero building and eco-district design
- Resource forecasting and simulation of place and building performance
- Energy-efficient, adaptive reuse of existing buildings
- Indoor environmental quality and occupant health
- High-performance building envelopes and green technologies
- Life-cycle building analysis design and modeling

The Ph.D. program in Architecture focuses on sustainable architecture and integrated design. The program is an advanced research degree that engages students in multidisciplinary investigations that create new knowledge in compelling and time-sensitive research topics. The PhD program prepares students for careers at universities, and at other entities engaged in research related to sustainable design such as national research laboratories, industries, public agencies, and non-government organizations.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Conduct independent original research and disseminate research results to the academic and professional community.
- Demonstrate thoughtful and professional conduct and contribute research advances and service to their professional communities and societies.
- Demonstrate broad knowledge of principal texts, journal and conference publications, methods, discussions, and problems in a selected field of study within architecture.
- Identify fundamental research problems and propose innovative solutions to these problems through their research projects using a strong theoretical and/or experimental and/or computational background.
- Create and deliver effective verbal and written presentations that contribute to the understanding of the field.

Doctor of Philosophy in Architecture

Ecological Design Graduate Certificate

The Ecological Design Certificate is a design-based, interdisciplinary program focused on the development of a practical framework for the integration of the built environment with local and region specific natural systems.

This certificate is available to all graduate students within the College of Design.

Participating students are challenged to develop an in-depth understanding of the relationships between ecological processes, issues of cultural and social sustainability, and urban development and form, and how allied design and planning disciplines approach these relationships. Students will acquire a theoretical and pragmatic basis to carry these understandings into the world of practice.

The Ecological Design Certificate Program provides explicit curricular structure in ecologically sensitive design, encouraging students to develop an ecologically based design awareness, solidifying the commitment of the University to interdisciplinary inquiry, and upholding its capacity for leadership in the field.

The Ecological Design Certificate is a graduate certificate program in the Department of Architecture that is available to all graduate students within the College of Design. The Ecological Design Certificate is meant to support students to develop an ecologically based design awareness, solidifying the commitment of the University to interdisciplinary inquiry, and upholding its capacity for leadership in the field.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Have a multi-disciplinary understanding of the principles of ecology and of how they may be integrated into the design of the built environment.
- Be familiar with current topics in cultural and social sustainability and urban development, including perspectives from multiple design disciplines.
- Have an in-depth theoretical and practical understanding of environmental and social sustainability.

Certificate in Ecological Design Requirements

Code	Title	Credits
Foundation Courses		11-12
Electives		12-13
Total Credits		23-25

Students must complete a minimum of 24 credits in approved ecological design subject courses. A maximum of 12 credits may be counted for both the certificate and a graduate degree program, but required courses for the degree will not satisfy certificate electives. For most architecture and interior architecture students, this certificate requires

12 credits in addition to their degree requirements. Some students may need to complete prerequisites to develop subject proficiency for approved electives. More information on course requirements and application to the certificate program may be found online (<https://archenvironment.uoregon.edu/architecture/grad/certificates/ecological-design/>).

Technical Teaching in Architecture Graduate Certificate

The Technical Teaching Certificate program prepares graduate students in the fields of architecture and interior architecture for teaching positions on building technology in academic and professional settings. Building technology includes subjects such as structural design, construction materials and processes, and environmental control systems. Students investigate curricula, tools, and strategies for teaching and concentrate on improving their comprehensive knowledge of the technical subjects. It is designed for graduate students enrolled in the postprofessional MS programs in architecture and interior architecture, but graduate students in the professional MArch Track I and II programs may apply. Individuals who hold a master's degree and at least one professional degree in architecture or interior architecture may apply to this certificate program without being concurrently enrolled in a master's program at the University of Oregon.

Certificate candidates must demonstrate advanced proficiency in at least one technical subject area (structures, construction, or environmental control) and have the background necessary to teach at the introductory level in the other two. This requirement may be fulfilled by submitting a portfolio documenting professional experience or prior course work to the technology faculty, or it can be met by completing a sequence of advanced courses.

The Technical Teaching Certificate is a graduate certificate program in the Department of Architecture that is available to all graduate students in Architecture. The Technical Teacher certificate is design for student interested in the design and building technology integration, and for those interested in teaching in their architectural careers, continuing the commitment to sustainability, curricular innovation, and leadership in the field.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop an area of experience in one or more subject areas in curriculum, understand critical principles and concepts of sustainability within the discipline.
- Communicate technical material effectively through curricular development, tools, strategies, and innovation specific to architectural design.
- Conduct a self-appraisal, learning-style inventory, and a peer-review of instructional skills; identify successes and areas of improvement; and articulate a philosophy of teaching.

Certificate in Technical Teaching in Architecture Requirements

A minimum of 24 credits is required for the certificate. A maximum of 12 credits may be counted for both the certificate and a graduate degree

program, but required courses for the degree will not satisfy certificate electives.

Code	Title	Credits
Technical Teaching Core Requirements		12
Sample courses include:		
ARCH 580	Supervised Design Teaching	
ARCH 609	Terminal Project	
ARCH 610	Experimental Course: [Topic] (History and Theory of Building Technology)	
ARCH 619	Terminal Project	
ARCH 661	Teaching Technical Subjects in Architecture	
Individualized study courses (ARCH/IARC 601: Research; ARCH/IARC 605: Reading and Conference, ARCH/IARC 606: Special Problems, ARCH 619/IARC 611: Terminal Project, and ARCH 620/678: Research Methods in Sustainable Design) may count toward the technical teaching core credits with review and approval by the certificate director of the teaching content.		
Advanced Electives in Technology¹		12
Sample courses include:		
ARCH 507	Seminar: [Topic] (Advanced Technology seminars, High Performance Buildings, Case Studies in Sustainable Design, Green Building Design: In Detail, Ecology of Building Materials)	
IARC 507	Seminar: [Topic]	
ARCH 510	Experimental Course: [Topic] (Advanced Technology courses, Green Design and Build for Residential Interiors, Oregon BILDS: Sustainable Construction at the Building Site, Passive Heating and Cooling Seminar)	
IARC 510	Experimental Course: [Topic]	
IARC 573	Working Drawings in Interior Architecture	
ARCH 574	Design the Unseen: [Topic] (Preservation and Restoration Technology)	
ARCH 584	Architectural Design	
	or IARC 586 Furniture Design	
IARC 584	Interior Design	
IARC 592	Electric Lighting	
ARCH 595		
ARCH 596	Passive House Design and Details	
ARCH 598	High Performance Buildings Design: [Topic] (Energy Scheming)	
ARCH 633	Fundamentals of Sustainable Design	
ARCH 606	Practicum: [Topic]	
Total Credits		24

¹ A variety of elective courses are offered during the year which may be counted toward the 12 advanced technology credits for the certificate. Seminar topics and experimental courses (507 and 510) may change and it is recognized that while some of the courses indicated as electives below may not be offered every year, other relevant courses may be offered.

Architecture and Environment Graduate Specializations

- Architectural Technology (p. 466)
- Housing (p. 466)
- Interior Architecture (p. 466)
- Urban Architecture and Urban Design (p. 466)
- Urban Historic Preservation (p. 466)

The specialization is available to students in the M.ARCH., M.I.ARC, and M.S. degree programs in the Department of Architecture. 16 credits of approved advanced technology-related courses and studio are required.

The specialization is available to students in the M.Arch. and M.S. degree programs in the Department of Architecture. 16 credits of approved housing-related courses and studios are required.

The IARC Specialization is available to students in the M.Arch. and M.S. degree programs in the Department of Architecture. 16 credits of approved Interior Architecture related courses and studios are required.

The specialization is available to students in the M.Arch. and M.S. degree programs in the Department of Architecture in Portland. 16 credits of approved urban architecture- and urban design-related courses and studios are required.

The specialization is available to students in the M.Arch. and M.S. degree programs in the Department of Architecture in Portland. The specialization will have two possible options: Policy, focusing on legal and economic issues related to historic preservation, and Building Fabric, focusing on building construction and design.

Historic Preservation

<http://hp.uoregon.edu>

Larissa Rudnicki & Chris Bell

University of Oregon
Eugene, Oregon

The University of Oregon's Historic Preservation Program is best described as having broad cultural concerns with a technical emphasis. Attention is given to historic places, buildings, and landscapes in terms of their specific forms, materials, construction, and use. The cultural and theoretical context in which they were developed is addressed, as is the impact of time upon their materials, meanings, and needs. The technologies, interpretations, and means for sustaining the presence of historic places in the future are also emphasized.

Students gain an understanding of historic resources and the processes for their preservation. This includes core courses in research methods, preservation history and theory, architectural history, and the economic, legal, and administrative processes of preservation.

Courses are augmented by fieldwork in the urban, suburban, and rural areas of the state. Oregon contains Native American sites, rural buildings and landscapes developed by U.S. and European immigrant pioneers from the 1830s, as well as urban development since the 1840s. More recent transformations of the landscape by various ethnic groups and technological innovations are also explored. Extensive instructional use of the region takes place through an emphasis on the cultural and technical aspects of vernacular resources, field trips, participation in

projects at the university, and through local community groups. There is also frequent involvement with the area's professionals, officials, and agencies concerned with historic resources.

Recent opportunities for experience include window restoration and traditional earth construction workshops, documentation for a Historic American Buildings Survey for the Alaska Regional Office of the National Park Service, U.S. Department of the Interior; a preservation field guide for the community of Ebey's Landing National Historical Reserve; a condition assessment and stabilization of Gilbert's Cabin in North Cascades National Park; a condition assessment of Frank Lloyd Wright's Usonian Gordon House in Silverton, Oregon; the documentation of the Finney House frontier cabin in Nevada City, Montana; the limestone roof replacement on a late sixteenth-century stone cottage on the island of Drvenik Veli, Croatia; and the reconstruction of the Ferry House porch in Ebey's Landing National Historical Reserve, Whidbey Island, Washington.

In addition to providing hands-on training in what might be considered mainstream preservation activities, the program emphasizes the importance of cultural conservation including issues of diversity, identity, and community development. This includes a concern not only for how various ethnic groups shaped buildings and landscapes in the distant past, but how similar settings are reproduced by cultural groups in the present. Individual research efforts by students are augmented by visiting lecturers, such as those by Boyd Pratt, Jean Carroon, and Gunny Harboe.

Beyond completing core and focal area courses, each student is required to complete individualized study, including reading and thesis research, a summer internship, and a thesis or terminal project. Some former students have chosen to develop specialties and concurrent master's degrees in closely related fields such as architecture, landscape architecture, and planning, public policy and management; others have created more unique combinations with studies in museums, economic development, and Russian, East European, and Eurasian studies. Besides encouraging students to develop an individualized course of study, the program is characterized by students who exhibit self-motivation and individual initiative. These traits, which are not only expected but are also necessary for successful completion of the program, contribute to the professional growth of students. Graduates of the Historic Preservation Program are employed in preservation-related fields over a wide geographic area. Some choose to pursue work in the private sector as specialists in architectural offices or as consultants. Others serve in the public sector with municipal planning departments, state historic preservation offices, or federal cultural resources divisions. Some graduates choose to work with nonprofit agencies, while others select careers in preservation and restoration.

Faculty

Christopher Bell, instructor (historic preservation). BA, 1998, Williams; MS, 2005, Oregon. (2009)

Elizabeth Carter, instructor (historic preservation). BA, 1988, MS, 1994, Oregon. (2005)

Suzana Radivojevic, adjunct instructor (wood science). BScFE, 1997, Belgrade; PhD, 2006, Toronto. (2013)

Kirk Ranzetta, instructor (historic preservation, planning). BA, 1994, Mary Washington; MA, 1996, PhD, 2006, Delaware. (2006)

Larissa Rudnicki, instructor (historic preservation). BA, 2008, Marquette; MS, 2013, Oregon. (2013)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Howard Davis, architecture

Keith Eggener, history of art and architecture

Mark Eischeid, landscape architecture

Mark Gillem, architecture

Maile Hutterer, history of art and architecture

Renee A. Irvin, planning, public policy and management

Robert L. Thallon, architecture

Jenny Young, architecture

Minor

- Historic Preservation (p. 467)

Major - Master's Degree

- Historic Preservation (MS) (p. 467)

Historic Preservation Minor

Historic preservation is an inherently interdisciplinary field. The minor is particularly well-suited for students studying anthropology, architecture, history, the history of art and architecture, landscape architecture, and planning, public policy and management. Undergraduate students, no matter their major, are eligible to enroll in the minor, however.

Historic Preservation Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. Some courses required for the minor are only offered every other year.

Code	Title	Credits
Core Courses		
AAAP 411	Introduction to Historic Preservation	3
Select three of the following:		12
AAAP 408	Workshop: [Topic] (Pacific Northwest Field School)	
AAAP 421	American Architecture from a Preservation Perspective I	
AAAP 422	American Architecture from a Preservation Perspective II	
AAAP 423	American Architecture from a Preservation Perspective III	
AAAP 441	Legal Issues in Historic Preservation	
AAAP 451	Historic Survey and Inventory Methodology	
Related Courses		
Select courses from the following:		12
AAAP 431	National Register Nomination

PPPM 480	Nonprofit Management	
PPPM 481	Fundraising for Nonprofit Organizations	
Total Credits		27

Courses from other university departments may be substituted with approval of the program director.

Historic Preservation (MS)

Larissa Rudnicki & Chris Bell

University of Oregon
Eugene, Oregon

The University of Oregon's Historic Preservation Program is best described as having broad cultural concerns with a technical emphasis. Attention is given to historic places, buildings, and landscapes in terms of their specific forms, materials, construction, and use. The cultural and theoretical context in which they were developed is addressed, as is the impact of time upon their materials, meanings, and needs. The technologies, interpretations, and means for sustaining the presence of historic places in the future are also emphasized.

The program offers a master of science (MS) degree in historic preservation. Although no particular training is preferred, students whose backgrounds are primarily in historic preservation, architecture, landscape architecture, and architectural history are most prepared for this program. Coursework includes training in the social sciences, preservation theory and law, the characteristics of historic buildings and landscapes, historic building technology, and the procedures for evaluating and recording historic sites and buildings.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate competency in analytical and critical intellectual tools used to address historic preservation issues
- Understand the range of applications historic preservation has in the built environment
- Develop the knowledge and skills to understand historical design influence, current context, and legal and ethical issues that support best approaches to preservation
- Demonstrate the visual and written communication competency needed to support historic preservation activities.
- Apply knowledge and skills to develop appropriate and informed approaches to treat historic resources
- Demonstrate in-depth technical and building material competency within the historic preservation field

Historic Preservation Major

The MS degree in historic preservation requires 62 credits in five areas: historic preservation core courses, architectural history core courses, research methods, experiential courses, and electives. Students choose coursework from across the College of Design, and may complete concurrent degrees with several programs.

Code	Title	Credits

LA 575	History of Landscape Architecture II	

LA 580	Cultural Landscapes
Total Credits	62

- ¹ Courses must be taken for a letter grade.
- ² Students may substitute a Thesis (AAAP 503) or Terminal Project (AAAP 611) in place of Community Planning Workshop project if they obtain approval from a committee of two or more faculty members, at least one of whom must be University of Oregon. Students work with their committee to develop a proposal and must present the results of the project to faculty members and students and gain final approval.

Interior Architecture

Esther Hagenlocher, Department Head

210 Lawrence Hall
1206 University of Oregon
Eugene, OR 97403-1206
541-346-3656

The Department of Interior Architecture provides a comprehensive professional design education within a unique interdisciplinary structure. By integrating subject-area coursework with studio design exploration, the program prepares students to act as independent problem-solvers and valuable design-team members.

Shared coursework with architecture in the early stages of the undergraduate or graduate curricula provides an interdisciplinary context for study and learning, leading to advanced courses and studies that explore theory, technology, and practice.

Central to the department is the design studio, where students gain experience with the design of interior spaces and elements and focus on the issues and conditions related to adapting existing sites and buildings. Topical intermediate studios concentrate on specific design issues, human factors, and building types. Specialized intermediate studios focus on the programming, design, and fabrication of furniture, and on construction documents that illustrate a small design project. A final independent two-term comprehensive project caps the design studio experience.

Interior Architecture (BIArch)

In interior architecture, we offer a broad professional curriculum that combines robust shared design courses with specialized study in interior design to create big picture design thinkers. Our aim is to help students develop research and design skills they will need to revitalize, reuse, and adapt existing buildings and interior spaces to enhance quality of life for users. Throughout the curriculum we focus on making spaces and objects that resonate with users and provide uplifting, healthy, and sustainable interior environments.

Our department has a long history of interdisciplinary collaborative learning. Interior architecture students are immersed in a rich mix of faculty, students, and courses in other design majors while earning a professional degree accredited by the Council for Interior Design Accreditation (CIDA). Our unique curriculum is project based and student driven. Interior architecture studio courses allow students to propose design solutions to real-life problems that focus on the critical issues of our time. A comprehensive project in the final year allows each student to conduct in-depth study and research into their specialized areas of interest.

The learning outcomes of our Interior Architecture programs, Bachelor of Interior Architecture (B.IArch.) and Master of Interior Architecture (M.IArch.) based upon "Professional Standards" that must be met to be an accredited professional program in Interior Design.

Standards are defined by our Professional Accreditation Agency, the Council for Interior Design Accreditation (CIDA).

There are a total of 16 standards, thirteen of this measure knowledge acquisition and application. Every six years, a team of site visitors examines student work to judge compliance with multiple expectations for each standard.

Expectations for knowledge and application must be verified through course content and completed student work from subject area course and our design studios.

For expectations that require applied knowledge, our goal is for students to show competent application in Interior Design Studios.

To that end, we evaluate student work at the conclusion of each design studio based on CIDA learning expectations.

The learning outcomes below reflect the overarching concept of the Council for Interior Design Accreditation (CIDA) Professional Standards.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Analyze complex design issues and develop meaningful and creative design solutions while addressing theoretical, historical, behavioral, cultural, economic, technological, ecological, social, cultural, and political aspects of the design problems, and applying evidence-based knowledge of human experience/behavior, building construction/systems, light/color theories, products/materials, and building codes.
- Employ all aspects of the design process with various media recording and communication and space-making tools to create convincing design solutions and effectively communicate them visually and verbally, as well as in writing. Students understand the

principles, processes, and responsibilities that define the profession and the value of interior architecture to society and social changes.

- Collaborate and participate in interdisciplinary teams and are prepared to maximize their effectiveness in leadership roles or as contributing team members.
- Understand that thinking critically and applying these thoughts in their design development is essential for taking on initiative and pushing boundaries for themselves and the professions.

Interior Architecture Major

The curriculum of the five-year professional BIArch degree program is highly structured the first two years and more flexible the last three. This flexibility allows each student to establish a study sequence according to individual interests and needs. Transfer students should be aware that an accelerated program is normally possible only for students who transfer from an accredited interior architecture or interior design program.

Courses used to fulfill the major requirements must be taken for a letter grade of C- or better or a mark of Pass (P or P*).

Interior Architecture Minor

The Interior Architecture minor provides a means for students majoring in architecture or landscape architecture to broaden their expertise as designers while exposing students with other majors to courses that integrate design thinking and place making with human behavior and function.

Minor Requirements: 26 credits

Courses used to fulfill the minor requirements must be taken for a letter grade of C- or better or a mark of Pass (P or P*).

Code	Title	Credits
Subject Area (Nonstudio) Requirements		
IARC 204	Understanding Contemporary Interiors	4
One intermediate studio is required for programs within the School of Architecture and Environment ¹		6
Subject Area Electives ²		16-22
ARCH 440	Human Context of Design	
ARH 314	History of World Architecture I	
ARH 315	History of World Architecture II	
IARC 407	Seminar: [Topic]	
IARC 444	Furniture: Theory and Analysis	
IARC 447	Color Theory and Application for the Built Environment	
IARC 471	Interior Construction Elements ¹	
IARC 472	Interior Finishes and Design Application ¹	
IARC 473	Working Drawings in Interior Architecture ¹	

IARC 474	History of Interior Architecture I
IARC 475	History of Interior Architecture II
IARC 476	History of Interior Architecture III
IARC 492	Electric Lighting ¹

Total Credits	26

¹ Course may not be taken by students outside of the Department of Architecture, with the exception of landscape architecture students.

² For students majoring in the Department of Architecture, 16 elective credits are required; for all others, 22 are required.

Undergraduates who are enrolled in any major can apply to the minor. Completed applications including supporting academic records are submitted to the Department of Architecture office. Applicants are notified when their applications have been approved. Because the department's first obligation is to its majors, it cannot guarantee availability of courses for minors. Minors may register if space is available after the needs of majors have been met. Enrollment in the minor program is limited. If the department is unable to accommodate additional minor students, it may suspend admittance to the minor program until space becomes available.

Interior Architecture (MIArch)

Our master of interior architecture degree allows students to complete an accredited professional degree in a stimulating academic environment that is characterized by cooperation, rigor, and a commitment to human quality in the interior environment.

Track I

Eligible applicants must hold a bachelor's degree or higher from a regionally accredited (<https://www.chea.org/regional-accrediting-organizations/>) four-year U.S. college or university OR hold an equivalent credential from a qualifying international institution.

Track II

Eligible applicants must hold an interior architecture/design or architecture bachelor's degree or higher from a regionally accredited (<https://www.chea.org/regional-accrediting-organizations/>) four-year U.S. college or university OR hold an equivalent credential from a qualifying international institution.

The learning outcomes of our Interior Architecture programs, Bachelor of Interior Architecture (B.IArch.) and Master of Interior Architecture (M.IArch.) based upon Professional Standards that must be met to be an accredited professional program in Interior Design.

Standards are defined by our Professional Accreditation Agency the Council for Interior Design Accreditation (CIDA). There is a total of 16 standards, thirteen of this measure knowledge acquisition and application.

Every six years, a team of site visitors examines student work to judge compliance with multiple expectations for each standard.

Expectations for knowledge and application must be verified through course content and completed student work from subject area course and our design studios.

For expectations that require applied knowledge, our goal is for students to show competent application in Interior Design Studios.

To that end, we evaluate student work at the conclusion of each design studio based on CIDA learning expectations.

The learning outcomes below reflect the overarching concept of the CIDA Professional Standards.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Analyze complex design issues and develop meaningful and creative design solutions while addressing theoretical, historical, behavioral, cultural, economic, technological, ecological, social, cultural, and political aspects of the design problems, and applying evidence-based knowledge of human experience/behavior, building construction/systems, light/color theories, products/materials, and building codes.
- Employ all aspects of the design process with various media recording and communication and space-making tools to create convincing design solutions and effectively communicate them visually and verbally, as well as in writing. Students understand the principles, processes, and responsibilities that define the profession and the value of interior architecture to society and social changes.
- Collaborate and participate in interdisciplinary teams and are prepared to maximize their effectiveness in leadership roles or as contributing team members.
- Understand that thinking critically and applying these thoughts in their design development is essential for taking on initiative and pushing boundaries for themselves and the professions.

Professional Master of Interior Architecture Degree Requirements

The professional, CIDA-accredited master of interior architecture (MIArch) degree program prepares students for careers in interior design practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study. Track I typically takes 10 terms to complete. Track II is a six-term advanced placement program.

Track I

Students enrolled in the MIArch Track I program must complete the following:

Code	Title	Credits
Design Studios		
IARC 584	Interior Design (four terms)	24
IARC 586	Furniture Design	6
IARC 587	Working Drawings	6
IARC 588 & IARC 589	Interior Design Comprehensive Project I and Interior Design Comprehensive Project II	16
ARCH 680	Introductory Graduate Design I	6
ARCH 681	Introductory Graduate Design II	6
Media and Process Skills		
ARCH 611	Graduate Design Process	3
Architectural computing course		2
Intermediate Media		
ARCH 523	Media for Design Development: [Topic]	3

Design Arts

ARCH 540	Human Context of Design	4
IARC 545	Comprehensive Project Preparation	3
IARC 547	Color Theory and Application for the Built Environment	3
ARCH 550	Spatial Composition	4

Furniture

IARC 544	Furniture: Theory and Analysis	3

Design Technology

ARCH 570	Building Construction	4
IARC 571	Interior Construction Elements	3
IARC 572	Interior Finishes and Design Application	3
IARC 573	Working Drawings in Interior Architecture	4
ARCH 592	Environmental Control Systems II	4
IARC 592	Electric Lighting	3

Professional Practice

ARCH 517	Context of the Architectural Profession	4

Architectural History

IARC 574	History of Interior Architecture I	3
IARC 575	History of Interior Architecture II	3
IARC 576	History of Interior Architecture III	3
One additional architectural history course taught in the Department of the History of Art and Architecture or the School of Architecture and Environment		4
Course in 20th-century architectural history		4

Subject Area Electives	16

Seminar	6

Total Credits	153

Track I students typically complete all or most of the MIArch degree requirements at the University of Oregon, and begin the program the summer before their first full academic year of study. Students with bachelor's degrees (BA, BS) other than a preprofessional degree in interior design, interior architecture, or architecture must apply to the Track I program.

Track II

Code	Title	Credits
Design Studios		
IARC 584	Interior Design (two terms)	12
IARC 586	Furniture Design	6
IARC 587	Working Drawings	6
IARC 588	Interior Design Comprehensive Project I	8
IARC 589	Interior Design Comprehensive Project II	8
Media and Process Skills		
ARCH 611	Graduate Design Process	3
Architectural computing course		2
Intermediate Media		
ARCH 523	Media for Design Development: [Topic]	3
Design Arts		
ARCH 540	Human Context of Design	4
IARC 545	Comprehensive Project Preparation	3
IARC 547	Color Theory and Application for the Built Environment	3

ARCH 550	Spatial Composition	4
Furniture		
IARC 544	Furniture: Theory and Analysis	3
Design Technology		
ARCH 570	Building Construction	4
IARC 571	Interior Construction Elements	3
IARC 572	Interior Finishes and Design Application	3
IARC 573	Working Drawings in Interior Architecture	4
ARCH 592	Environmental Control Systems II	4
Professional Practice		
ARCH 517	Context of the Architectural Profession	4
Architectural History		
IARC 574	History of Interior Architecture I	9
& IARC 575	and History of Interior Architecture II	
& IARC 576	and History of Interior Architecture III	
One additional architectural history courses taught in the Department of the History of Art and Architecture or the School of Architecture and Environment		4
Course in 20th-century architectural history		4
Subject Area Electives ¹		16
Seminar		6
Total Credits		126

¹ Subject area electives and seminars may be taken any term and in any order; one 3-credit (minimum) subject area elective must be an approved design arts course (not technology or media).

Applicants who have a four-year preprofessional degree in an environmental design discipline (interior architecture, interior design, or architecture) and an equivalent amount of professional studio and course work may be considered for Track II. Students admitted into Track II begin their studies fall term. Track II students must fulfill the same professional curriculum requirements as those in the Track I program, but are admitted with advanced standing in studio and subject-area courses. Transfer credit may be given to students who have had academic experience in an interior architecture or design program accredited by the Council for Interior Design Accreditation, or an architecture program accredited by the National Architectural Accrediting Board (NAAB). The extent of this advanced standing is determined in consultation with the department academic advisor before beginning the program, and the student's advanced standing is reevaluated at intervals. This preliminary evaluation of transfer credit is provisional, pending satisfactory completion of three terms in residence.

Track II students may receive credit for up to four previously taken design studios and up to 50 credits of subject-area courses. Students usually complete a minimum of six terms and the approximately 87 credits in residence.

MIArch Track I Sample Plan of Study

Course	Title	Credits	Milestones

¹ May be waived for students with appropriate background in design computing.

² Subject area electives and seminars may be taken any term and in any order; one 3-credit (minimum) subject area elective must be an approved design arts course (not technology or media).

Interior Architecture (MS)

The post-professional Master of Science interior architecture degree program allows individuals to complete advanced research that builds on an undergraduate professional degree in interior design/architecture or architecture.

Eligible applicants must hold a bachelor's degree or higher from a regionally accredited (<https://www.chea.org/regional-accrediting-organizations/>) four-year U.S. college or university OR hold an equivalent credential from a qualifying international institution.

This degree provides an opportunity for advanced study and contribution to knowledge in the field through the thesis. The course of study prepares students for careers in research, teaching, consulting, and further graduate study. Students will also gain a greater understanding of the relationship between the discipline and the profession while working closely with faculty mentors helping to guide individual research. This degree does not provide a path to licensure.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of subject content and technical skills through course work.
- Demonstrate effective artistic, oral, and written communication skills.
- Develop independent research, technical, and/or professional skills to carry out and report on MS thesis or Final Project as outlined in the Graduate handbook.
- Demonstrate pedagogic ability in teaching and/or supervising undergraduate learning.

Postprofessional Master of Science Degree Requirements

The postprofessional program is for individuals with an undergraduate professional degree in architecture or interior architecture. This degree provides an opportunity for advanced study and contribution to knowledge in the field through the thesis. The course of study prepares

students for careers in research, teaching, consulting, and further graduate study. Students also gain a greater understanding of the relationship between the discipline and the profession while working closely with faculty mentors helping to guide their individual research.

Prospective applicants may find information about the program and application requirements on the department website.

Landscape Architecture

<http://landarch.uoregon.edu>

Benjamin Shirtcliff, Department Head

210 Lawrence Hall

541-346-3641

archinfo@uoregon.edu

Landscape architecture is an environmental design and planning profession of broad scope concerned with the creation, protection, restoration, and management of landscapes. Landscape architecture is founded on an awareness of our deep connections to the natural world and how people and their work are part of the web of life. The profession is deeply attentive to how places serve human needs and support sustainable and resilient cities and other landscapes. A healthy society rests on a commitment to sound landscape design, planning, and conservation that respects the land, its processes, its integrity—and that of human-ecological processes, helping to fulfill human potential.

Both a science and an art, landscape architecture involves creative decision-making based on scientific knowledge of natural processes coupled with awareness of historical, cultural, and social dynamics. The profession also makes intensive use of technologies for landscape construction and environmental management—digital graphics, geographic information systems, and computer-aided design. These are applied to making richly supportive places for people and ecosystems that are beautiful and healthy, responding to human needs and to local natural and socioeconomic systems.

As a profession, landscape architecture includes design at many scales, including ecologically based planning activities, transformation of urban and rural landscapes, service to disadvantaged communities, and design of parks and gardens. As an academic discipline, it provides opportunities for personal development through environmental problem-solving, graphic and oral communication, and project-oriented study in which small groups of students work with instructors to address pressing contemporary problems through detailed development of land and sites.

Faculty

David Buckley Borden, associate research professor, BS, 1998, Northeastern; MLA, 2011, Harvard. (2021)

Kelly Densmore, instructor (plants, planting design, residential design, artist), BA, 1998, Oregon; MLA, 2006, Oregon. (2014)

Elisabeth "Liska" Chan, associate professor (design representation, design theory). BA, 1993, Hampshire; MLA, 2000, Cornell. (2001)

Arica Duhrkoop-Galas, associate teaching professor (plants, planting design, landscape construction). BA, 1998, Portland State; CE, 1999, Cambridge; MLA, 2005, Oregon; reg. landscape architect, Oregon. (2010)

Mark Eischeid, associate professor (landscape history, design theory, critical practice). BS, 1994, Stanford; MLA, 2000, California, Berkeley; MFA, 2010, Edinburgh; reg. landscape architect, California. (2014)

Harper Keeler, teaching professor (civic agriculture, landscape biodynamics, urban farm director). BLA, 1995; MLA 2011, Oregon. (2010)

Ignacio Lopez Buson, assistant professor (computational design, generative design, digital fabrication, landscape urbanism, urban design, GIS, remote sensing, drones, climate change). BARCH, MARCH 2006, ULPGC, Spain; MA, 2012, AASA London, UK; reg. landscape architect, Oregon. (2020)

Daniel Philips, assistant professor, BFA, 2008, Otis, CA; MLA, 2019, PhD, 2021, Michigan. (2024)

Kory Russel, assistant professor (water, container-based sanitation, informal settlements). BS, 2003, MES, 2005, Taylor; MS, 2012, Stanford. (2016)

Benjamin Shirtcliff, associate professor (adolescents, play, environmental justice, urban design). BA, 1999, Oregon; BLA, MLA 2006, Penn State; PhD, 2012, New Orleans. (2022)

Emeriti

Jerome Diethelm, professor emeritus. BArch, 1962, Washington (Seattle); MLA, 1964, Harvard; reg. architect and landscape architect, Oregon. (1970)

Kenneth I. Helphand, professor emeritus. BA, 1968, Brandeis; MLA, 1972, Harvard; Fellow, American Society of Landscape Architects. (1974)

David Hulse, professor emeritus. BSLA, 1981, Colorado State; MLA, 1984, Harvard. (1985)

Bart Johnson, professor emeritus. BS, 1987, Cornell; MLA, 1992, PhD, 1995, Georgia. (1995)

Robert Z. Melnick, professor emeritus. BA, 1970, Bard; MLA, 1975, State University of New York, College of Environmental Science and Forestry; Fellow, American Society of Landscape Architects. (1982)

Robert G. Ribe, professor emeritus. BS, 1977, California, Riverside; MSLA, 1981, MA, 1987, PhD, 1990, Wisconsin; Fellow, American Society of Landscape Architects. (1988)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Majors - Bachelor's Degree

- Environmental Design (BA/BS) (p. 475)
- Landscape Architecture (BLA) (p. 478)

Minor

- Landscape Architecture (p. 480)

Major - Master's Degree

- Landscape Architecture (MLA) (p. 480)

Major - Doctoral Degree

- Landscape Architecture (PhD) (p. 482)

Environmental Design (BA/BS)

The College of Design at the University of Oregon provides undergraduate students with a design school experience supported by the resources and benefits of a large research university.

The Environmental Design program is a multidisciplinary BA/BS focusing on visual and spatial design skills applied to the context of environmental sustainability. This degree combines coursework from landscape architecture; architecture, interior architecture, planning, public policy, art, product design, and historic preservation.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Critical Thinking
- Content Knowledge
- Dissemination

Environmental Design Major Requirements

Code	Title	Credits
Required Core Courses		
ARCH 201	Introduction to Architecture	4
IARC 204	Understanding Contemporary Interiors	4
ENVD 201	Environmental Design Careers	2
LA 260	Understanding Landscapes	4
LA 289	Landscape Architectural Design	6
LA 337	Landscape Field Work: [Topic]	4

Landscape Architecture (BLA)

As a landscape architecture major you'll combine science and art to design positive change in environments and communities around the world. Learn how to draw, the principles of ecological design, and how to present your ideas using specialized software and technologies. Collaborate with local communities to design parks and gardens that foster social development and environmental awareness. All you need is a desire to create something new—the landscape architecture department will show you how to do the rest.

You'll learn how to create outdoor spaces that take people's needs and the ecological context into account. Explore the connections between design and planning, theory and practice, art and technology, school and the "real world," head and hand, and large scale and small scale. Enrollment in the landscape architecture department starts with a pre-major status (<https://archenvironment.uoregon.edu/landarch/undergraduate/>). Once you are on campus, you will be advised on how and when to declare the landscape architecture major.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Show competency in understanding and deploying analytical tools used in the practice of Landscape Architecture.
- Understand range of design and building solutions to environmental problems and changing climate.
- Demonstrate graphic competency for landscape.

Landscape Architecture Premajor

UO students interested in landscape architecture should first declare as a premajor. Current UO students may change their premajor to landscape architecture at any time during their undergraduate years. Landscape architecture premajors receive departmental advising, priority registration, and departmental communications. The department also offers scholarships and funded field studies opportunities exclusively for such students.

Premajor Advising. Landscape architecture premajors are strongly encouraged to meet with the BLA director or the School of Architecture and Environment advisor in 210 Lawrence Hall to receive assistance with applications, gain information about the program, or check on their academic progress and completion of premajor requirements.

Listserver for Premajors. Once students declare the premajor, their UO email addresses are added to the landscape architecture undergraduate listserver, which is used for sharing important departmental information and posts that may be of interest to undergraduate premajors and majors.

Applications. Students in the premajor or landscape architecture minor, or UO applicants with evidence of design background, may apply to the BLA degree at any time prior to entering Landscape Architectural Design and Process (LA 439) studios, which are restricted to BLA students.

UO applicants with little or no design background should enter the premajor.

Current School of Architecture and Environment majors (architecture, interior architecture) in good-standing (2.50 minimum GPA), may enter the BLA program without a formal application. These students should discuss their degree plan with the BLA director, who will confirm

enrollment with the School of Architecture and Environment advising staff.

Students who wish to enter the BLA program must meet the requirements below, complete lower-division course work, and complete a separate application to the BLA prior to entering the Landscape Architectural Design and Process (LA 439) studios.

- Cumulative UO GPA of 2.50 or better
- Requirements listed below must be passed with at least a C– or P or P*.
- Satisfactory completion of the following:
 - Lower-division core courses: Understanding Landscapes (LA 260) or Introduction to Landscape Architecture (LA 227)
 - Introductory design studios Landscape Architectural Design (LA 289) (Winter and Spring) **or** Architectural Design I (ARCH 283) and Architectural Design II (ARCH 284)
 - Digital Landscape Media (LA 352)
- Satisfactory completion of one basic ecology or natural systems course

Applications may be submitted prior to completion of the premajor requirements. The department admits students fall, winter, and spring terms. Admission to the BLA is effective the following term. The deadline to apply falls on the Friday of the fourth week.

To be considered for admission to the major, students must complete and submit the following materials through the online SlideRoom applicant tracking system:

- Application form
- Landscape architecture premajor checklist, available as a PDF on the department website or in hard-copy form in 210 Lawrence Hall
- Portfolio of design and art work, completed in the Landscape Architectural Design (LA 289) studios, or media courses, or elsewhere

Prospective applicants may find information about the program and application requirements on the department website.

Landscape Architecture Major Requirements

Requirements for the BLA degree (including university requirements) total 180 credits. Courses required for the major must be passed with a grade of at least C– or P or P*. Studio courses are pass/no pass only; students must pass each studio to progress to the next studio level.

Code	Title	Credits
Landscape Architecture Design Studios		
LA 289	Landscape Architectural Design (two studios)	12
LA 439	Landscape Architectural Design and Process (three studios)	18
LA 489	Site Planning and Design (three studios)	18
LA 498	Comprehensive Project I	6
LA 499	Comprehensive Project II	8

LA 451	Landscape Media I	2
LA 452	Landscape Media II	2
LA 453	Landscape Media III	2
Electives ²		16
Total Credits		132

¹ Students admitted to Pre-LA in Winter or Spring terms may take LA 227 instead of LA 260

² To fulfill the electives for the major, the department will accept any course (200 level or above) that is offered within the School of Architecture and Environment. Alternative courses must be approved by the student's academic advisor and are typically found within the College of Design but may be found in the Department of Geography or the Environmental Studies Program. Additional elective courses may be necessary to meet the credit requirement for the major.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Landscape Architecture

Total Credits		180-182

Landscape Architecture Minor

Landscape architecture is a highly collaborative profession. Our minor exposes you to the histories, theories, and processes by which landscapes of all kinds are shaped and modified. Completing a minor in Landscape Architecture trains you to understand how decisions by designers, planners, and land managers influence the form and function of the landscapes we experience everyday.

Minor in Landscape Architecture

To earn a minor in landscape architecture, students file a declaration form with the program director. Once admitted, students remain in contact with the director for personalized advising.

Minor candidates are given preference on course waiting lists over nondepartmental students. Students in the minor should inform instructors when asking permission to enroll. To declare the minor, complete the following:

1. Obtain the Undergraduate Minor Declaration Form from the School of Architecture and Environment office, 210 Lawrence Hall. The form includes a curriculum worksheet with the requirements listed below.
2. Meet with the program director to discuss when courses are offered, which topics courses or seminars will be offered to fulfill minor requirements, and to develop a curricular plan.
3. Return the completed and signed form to the department office.

Minor Requirements (26 credits)

Courses used to fulfill the major requirements must be passed with a grade of Pass or C- or better.

Code	Title	Credits
LA 260	Understanding Landscapes	4
LA 413	Analyzing Landscape Systems	4
One subject area course in plants from list below		4
One subject area course in history and theory from list below		4

LA 407	Seminar: [Topic] (Landscape Architecture Theory)	4
LA 472	Landscape Architectural Theory: [Topic]	4
LA 474	History of Landscape Architecture I	4
LA 475	History of Landscape Architecture II	4
Elective Courses		
Any landscape architecture (LA) courses; Urban Farm (LA 390) may be repeated if taken during different terms		
Studio Options ¹		

¹ Architecture nonmajors may take Landscape Architectural Design (LA 289), which is offered every winter. Architecture and interior architecture majors may take a landscape architecture studio that is at their appropriate level of work in the major. Students should consult with their minor advisor, the landscape architecture studio instructor, and the Department of Architecture to determine which studio is appropriate *before* enrolling in the studio.

Landscape Architecture (MLA)

The three-year professional master of landscape architecture degree (MLA) is accredited by the Landscape Architecture Accreditation Board. The MLA prepares students for professional careers in environmental design with a core in design studio course work and curricular areas in land analysis, land planning, ecological systems, and planting design. The program's goal is to produce visually literate, technically skilled, ecologically knowledgeable, and socially responsible designers—innovators and leaders in solving the difficult problems of the built environment.

The curriculum is structured on a sequence of 10 design studios, advancing through design fundamentals to advanced research studios and leading to an independent capstone research project. Core curricular areas support the development of design skills, and elective courses allow each student to develop expertise in topics such as ecological restoration and design, ecological urbanism, climate-change-resilient design, environmental justice, landscape aesthetics, healthy built environments, natural resource analysis and planning, urban design, food systems and urban agriculture, landscape history and preservation, and environmental design research methods.

Program Learning Outcomes

- Upon successful completion of this program, students will be able to:
- Demonstrate an understanding of the depth and complexity of landscape architecture and its commitment to critical social analysis, environmental stewardship, and place making.
 - Demonstrate facility with the design of responsible, supportive, sustainable, socially equitable, and life-enhancing places for diverse communities.
 - Demonstrate facility with the technical skills of landscape architecture.
 - Demonstrate competence in a range of representational techniques and an understanding of when to optimally employ these techniques.

- Demonstrate facility in reading, critically analyzing, and applying research methods from the natural sciences, social sciences, humanities, design, and the arts.
- Demonstrate recognition of the multifaceted character of research as a fundamental aspect of the profession and the many ways it can inform and enhance landscape design and management.

The department offers two tracks of study, both of which lead to the MLA. The Track I MLA typically takes ten terms to complete and requires 140 credits. The Track II MLA is a six-term advanced placement program that requires approximately 56 credits (the exact number is determined through individual evaluation of prior course work at the time of admission.)

Track I (p. 481) MLA students typically complete all or most of the degree program requirements at the University of Oregon and begin the program the summer before their first full academic year of study. Students with bachelor's degrees other than a professional degree in landscape architecture must apply to the first professional degree program.

Students with degrees in related design disciplines (e.g., architecture, interior architecture, environmental design, or non-accredited landscape architecture degrees) may be given advanced standing, up to a maximum of four terms of studio credit for equivalent prior studio work. Studio placement will be based on a portfolio review; required core course work will be evaluated on a case-by-case basis.

Track II (p. 481) MLA is for applicants who have an accredited professional degree in landscape architecture. Students admitted into the Track II MLA begin their studies fall term. Track II students must fulfill the same professional curriculum requirements as first professional students, but are admitted with advanced standing in studio and subject-area courses. The extent of this advanced standing is determined by the department before beginning the program.

Postprofessional Master's Program

The two-year graduate program leading to the master of landscape architecture (MLA) degree is intended for students prepared to do advanced work in the field. Students entering the postprofessional MLA program must have a professionally accredited bachelor's degree in landscape architecture. Students are typically interested in pursuing an advanced independent research project with an interest in an academic career.

Students with professional landscape architecture degrees typically spend two years in residence satisfying course requirements.

Required course work includes one design and planning studio [Land Planning and Design (LA 594)], one course in landscape analysis and planning [Introduction to Landscape Planning Analysis (LA 540)], one course in history, literature, and theory, Landscape Research Methods I (LA 620), Landscape Research Methods II (LA 621), and mentored research with a faculty member. In addition, students must complete five courses (20 credits) in an area of concentration.

Postprofessional Master's Curriculum

Total Credits		56

¹ Courses used to satisfy analysis, research, and theory requirements above may not be used to satisfy area of concentration requirements.

² Before enrolling in Master's Project (LA 699), students must obtain department approval of a project or thesis proposal from their landscape architecture master's project advisor.

³ Completed during the second year.

Landscape Architecture (PhD)

The doctoral program in landscape architecture offers opportunities for advanced study and scholarship in ecological landscape planning, sustainable urban design, and design history and theory. Landscape planning is primarily concerned with assessing large landscapes and directing their policy, management, and land-use patterns to meet social and environmental ends, while design typically addresses smaller areas in greater detail.

Because the profession is broad and diverse, the landscape architecture PhD pursues robust development of academic, analytical, creative, and integrative capabilities that can continue to grow throughout subsequent careers. Accordingly, the program emphasizes the following:

- Advanced expertise and understanding in a focused topic
- The ability to form integrative conceptual models of landscape issues, problems, and solutions
- The ability to critically analyze deficiencies in knowledge in the field and identify needs for new, original contributions
- The ability to form and investigate operationally bounded questions
- The ability to independently design and execute a complete, intensive research project
- The ability to fully document a research project with high-quality writing and illustrations

The integrative nature of landscape design as a science and an art entails development of innovative models and methods for design, education, and research. The program offers students the opportunity to develop skills as innovative educators by working with faculty members as teaching assistants, and to teach courses under faculty guidance. The close and supportive relationships among scholarship, teaching, professional growth, and artistic achievement foster excellence in design education, research, and practice. Scholars follow many routes, and the program provides substantial flexibility to tailor students' programs to individual needs.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced expertise and understanding in a focused topic.

- Demonstrate the ability to form integrative conceptual models of landscape issues, problems, and solutions, particularly with regard to the student's area of specialization.
- Demonstrate the ability to critically analyze deficiencies in knowledge in the field and identify needs for new, original contributions.
- Demonstrate the ability to form, investigate, and answer operationally bounded questions.
- Demonstrate the ability to independently design and execute a complete, rigorous research project.
- Demonstrate the ability to fully document a research project with quality writing and illustrations.

Landscape Architecture Major Requirements

Length of Program and Steps to Completion

A PhD in landscape architecture requires a minimum of three years of full-time graduate work, including one year of residency. Depending on background and research goals, students can expect to complete the degree in three to six years, with a norm of four to five years.

The student's program of study depends substantially on their prior degrees.

Degree Held	Credits to Expect to Complete for PhD
MLA or MArch	68
BLA or BArch only	80
Master's degree without professional environmental-design degree	86

Requirements

A student's program of study is developed with the major advisor.

Code	Title	Credits
Theory, Research, Investigation ¹		26
LA 601	Research: [Topic]	
LA 605	Special Problems: [Topic]	
LA 620–621	Landscape Research Methods I-II	
	Outside analytic-synthetic courses ²	
Electives ³		24-42
	Advanced Electives: 500-level and above landscape architecture courses ⁴	
	Supporting Courses: courses typically taken outside of landscape architecture ⁴	
Dissertation		18
LA 603	Dissertation	
Total Credits		68-86

PhD Required Courses, Work

- ¹ A student entering with a master's degree but without a professional environmental-design degree should expect to take a minimum of 18 additional credits in landscape architecture.
- ² A student may be required to take more than 4 credits in analytic-synthetic courses in other departments.
- ³ A student entering the program with BLA or BArch but no master's degree takes an additional 12 credits of electives.

⁴ Selected in consultation with major professor.

At the completion of course work, normally the end of the second year, each student submits a written comprehensive exam, followed by an oral comprehensive exam. The examination committee will consist of three faculty members, two from landscape architecture and one from an outside department or program, who will prepare and administer the written and oral comprehensive exams. Once students have passed both comprehensive exams, they will be advanced to candidacy. Each student must submit the dissertation proposal within three terms of the exams. A student then forms a dissertation committee consisting of four members, with a minimum of two from landscape architecture and at least one from another field related to the student's area of research. The dissertation committee must approve the student's written dissertation proposal following a scheduled, public proposal presentation before the student undertakes the dissertation.

Some credit requirements may be waived or satisfied through transfer credits which must not have previously been applied to any graduate or undergraduate degree. No more than 15 credits may be transferred. Successful completion of the doctoral program is a matter of proven excellence through substantial, original contributions to the field and not the accumulation of a specific number of credits.

Art + Design

The School of Art + Design is a community of creatively and critically engaged artists and designers. Our work mines the intersection of thinking, making, seeing, and questioning.

Students in the UO School of Art + Design have the opportunity to study intensively across a uniquely broad set of studio practices, within a flagship research university. Students in Art can study 21st century approaches to sculpture, photography, painting, drawing, printmaking, ceramics, fibers, and metalsmithing. Art and Technology majors explore the potential of new technologies in an art context, working with interactivity, video, animation, visual communications, and emerging technology. Students in Product Design learn to design objects for use across a broad range of scales and purposes - tools, transportation, technology, clothing, furniture, and sporting equipment to fit a changing world.

Art

<http://art.uoregon.edu>

Anya Kivarkis, Department Head

254 Lawrence Hall
5232 University of Oregon
Eugene, OR 97403-5232
541-346-3610
artuo@uoregon.edu

The Department of Art curriculum approaches studio visual art through a broad range of media practices—ceramics, art & technology, drawing, fibers, metalsmithing and jewelry, painting, photography, printmaking, and sculpture. The department encourages breadth and interdisciplinary investigation, as well as depth within media, emphasizing the development of the material skills and understanding of art-making processes as well as a conceptual and critical understanding of the context of art. As actively practicing artists themselves, faculty members

offer students an introduction to the compelling challenges, questions, and rewards of artistic practice.

Four bachelor's degrees are offered by the department. A four-year program leads to the bachelor of arts (BA) or bachelor of science (BS) degree with a major in art or art and technology; the bachelor of fine arts (BFA) in art with a concentration in ceramics, fibers, metalsmithing and jewelry, painting, photography, printmaking, or sculpture; the bachelor of fine arts (BFA) in art & technology. At the graduate level, the master of fine arts (MFA) is the terminal professional degree in art.

Faculty

Jonathan Bagby, instructor of practice (art). BA, 2009, Tennessee; MFA, 2014, Oregon. (2014)

Carla Bengtson, professor (painting). BFA, 1980, Tyler School of Art; MFA, 1983, Yale. (1995)

Michael Bray, associate teaching professor (art and technology). BA, 1997, Illinois, Urbana-Champaign; MFA, 2008, Oregon. (2008)

Rebecca Childers, associate teaching professor (printmaking). BA, 1987, Cornell College; MFA, 1995, Iowa. (2002)

Isami Ching, associate teaching professor (art and technology, foundations). BA, 1994, Dartmouth College; BFA, 1998, Massachusetts College of Art and Design; MFA, 2002, Columbia. (2008)

Colleen Choquette-Raphael, associate teaching professor (photography). BA, 1991, BFA, 1992, Oregon; MFA, 1996, Washington (Seattle). (1997)

Jovencio de la Paz, assistant professor (fibers). BFA, 2008, School of the Art Institute of Chicago; MFA, 2012, Cranbrook Academy of Art. (2015)

Tannaz Farsi, associate professor (sculpture). BFA, 2004, West Virginia; MFA, 2007, Ohio. (2008)

Brian Gillis, professor (ceramics). BA, 2000, Humboldt State; MFA, 2002, Alfred. (2008)

Colin Ives, associate professor (art and technology). BA, 1987, Cornell College; MA, 1992, MFA, 1994, Iowa. (2002)

Ron Jude, professor (photography). BFA, 1988, Boise State; MFA, 1992, Louisiana State. (2015)

Anya Kivarkis, associate professor (metalsmithing and jewelry). BFA, 1999, Illinois, Urbana-Champaign; MFA, 2004, State University of New York, New Paltz. (2004)

Sylvan Lionni, assistant professor (painting, drawing). BFA, 1995, School of Visual Arts; MFA, 1998, Bard College. (2011)

Charlene Liu, associate professor (printmaking). BA, 1997, Brandeis; MFA, 2003, Columbia. (2007)

Christopher Michlig, associate professor (foundations); director, graduate program. BA, 1999, Oregon; MFA, 2007, Art Center College of Design. (2013)

Donald L. Morgan, associate professor (foundations). BFA, 1993, Oregon; MFA, 2001, Art Center College of Design. (2008)

John Park, associate teaching professor (art and technology). BA, 2003, Oregon; MFA, 2006, State University of New York, Buffalo. (2007)

Jack T. Ryan, professor (foundations). BFA, 1992, Oregon; MFA, 2000, Georgia. (2008)

Michael Salter, professor (art and technology). BFA, 1991, Miami; MFA, 1994, North Carolina, Chapel Hill. (2005)

James Schauer, associate teaching professor (foundations). BFA, 1999, Montana State; MFA, 2002, Oregon. (2003)

Stacy Jo Scott, assistant professor (ceramics, digital fabrication). BFA, 2010, Oregon; MFA, 2012, Cranbrook. (2017)

Rick Silva, associate professor (art and technology). BFA, 2001, MFA, 2007, Colorado, Boulder. (2013)

Jessica Swanson, associate teaching professor (ceramics). BA, 1996, Whitman College; MFA, 2002, School of the Art Institute of Chicago. (2010)

Ying Tan, associate professor (art and technology). BA, 1983, Teacher's University, Shandong, China; MAEd, 1987, Georgia State. (1996)

Jessie Vala, instructor. BFA California College of Arts 1999; MFA, 2015, University of Oregon.

Laura Vandenburg, professor (painting). BS, 1984, DVM, 1988, California, Davis; MFA, 1993, Hunter. (1998)

Tyrras Warren, associate teaching professor (art and technology, foundations). BA, 1998, BFA, 1998, Texas Christian; MFA, 2008, Oregon. (2009)

Amanda Wojick, professor (sculpture). BA, 1995, Colgate; MFA, 1999, Alfred; MFA, 2000, Bard. (2001)

Emeriti

Laura J. Alpert, associate professor emerita. BA, 1968, Stanford; MFA, 1971, Oregon. (1979)

Ronald J. Graff, associate professor emeritus. BFA, 1973, Kansas City Art Institute; MFA, 1975, Yale. (1981)

R. Craig Hickman, professor emeritus. BS, 1971, Portland State; MFA, 1981, Washington (Seattle). (1984)

Robert C. James, professor emeritus. BA, 1952, California, Los Angeles; MFA, 1955, Cranbrook Academy of Art. (1955)

George Kokis, professor emeritus. BFA, 1955, MFA, 1961, Alfred. (1973)

Sana Krusoe, associate professor emerita. BA, 1968, Occidental; MFA, 1987, Claremont Graduate. (1990)

Kenneth R. O'Connell, professor emeritus. BS, 1966, MFA, 1972, Oregon. (1977)

Kenneth H. Paul, associate professor emeritus. BA, 1961, MA, 1965, Wyoming. (1970)

Barbara Setsu Pickett, associate professor emerita. BS, 1971, Portland State. (1975)

Dan Powell, associate professor emeritus. BA, 1973, MA, 1977, Central Washington; MFA, 1980, Illinois. (1987)

Margaret Prentice, associate professor emerita. BFA, 1967, Arizona, Tucson; MFA, 1980, Colorado, Boulder. (1986)

Ying Tan, associate professor (art and technology). BA, 1983, Teacher's University, Shandong, China; MAEd, 1987, Georgia State. (1996)

Kathleen E. Wagle, professor (metalsmithing, jewelry). BS, 1975, Portland State; MFA, 1981, Arizona State. (1994)

Warpinski, professor emerita. BA, 1979, Wisconsin, Green Bay; MFA, 1983, Iowa. (1984)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Majors - Bachelor's Degree

- Art (BA/BS) (p. 484)
- Art (BFA) (p. 486)
- Art and Technology (BA/BS) (p. 487)
- Art and Technology (BFA) (p. 489)

Minors

- Art (p. 490)
- Art and Technology (p. 491)

Major - Master's Degree

- Art (MFA) (p. 491)

Art (BA/BS)

As an art student, you will learn to think critically, communicate clearly, and work creatively. With studio practice and interdisciplinary work you will develop an understanding of materials and tools, technical skills, strategies of experimentation, as well as fluency in visual languages and articulating meaning.

The art curriculum includes core art foundation courses, art history, and studio art in art and technology, ceramics, fibers, jewelry and metalsmithing, painting and drawing, photography, printmaking, and sculpture. While all art majors share the basic requirements, you have the flexibility to pursue advanced course work in the areas of your primary interests.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate technical and material competency
- Demonstrate visual literacy
- Understand historical and cultural context from a variety of perspectives
- Exercise critical thinking, analysis and discourse
- Synthesize technical and conceptual understanding into an independent art making practice

Art Major Requirements

Courses used to fulfill the major requirements must be passed with a grade of C- or better or a mark of Pass (P or P*).

No more than 12 credits passed with a mark of Pass (P or P*) will count towards major requirements.

Code	Title	Credits

Art (BFA)

The bachelor of fine arts (BFA) degree offers a studio-intensive opportunity to concentrate your expertise. In the BFA program, you will create an individual approach to making and thinking through advanced studio, interdisciplinary critique colloquia, history of art and architecture courses, seminars in art theory and criticism, and develop a body of work culminating in the BFA creative project in your declared concentration.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of studio practices and ideas.
- Develop an understanding of history, theory, and criticism, and an ability to analyze and situate work in relation to that body of knowledge.
- Acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.
- Develop an ability to synthesize material and intellectual knowledge and shape an independent studio practice.

Bachelor of Fine Arts: Art

The bachelor of fine arts degree is a professional baccalaureate degree. Students apply for admission for the BFA in a particular media area in the last term of their fourth year of study. Students who are working across more than one media area may earn their degree in art, with sponsorship from faculty members in more than one media area. The application process is competitive and includes a portfolio review. Students who have completed a comparable four-year degree in art at another institution may be admitted to the BFA program. Such candidates must satisfy the university's 45-credit residence requirement.

Students must complete the four-year program with a total of 108 credits in art (a total of 180 university credits).

Bachelor of Fine Arts Degree Requirements: Art

Courses used to fulfill the major requirements must be passed with a grade of C- or better or a mark of Pass (P or P*).

Art History courses used to fulfill the major requirements must be passed with a grade of C- or better or a mark of Pass (P or P*).

No more than 12 credits passed with a mark of Pass (P or P*) will count towards major requirements.

Total Credits		108

¹ 20 credits must be concentration studios; 4 credits must be 400-level concentration studio

² At least one course from each categories

Additional Requirement: Math/CS or Language

Math/CS:

- Complete the university mathematics/computer science requirement for the BS degree.

Language:

- Completion of at least the third term of the first year in a Second Language taught in the language (103 or Equivalent)
- Satisfactory completion of an examination administered by the appropriate language department

- International students: if your language or instruction in high school was in a language other than English, satisfactory completion of all AEIS courses and WR 121Z and either WR 122Z or WR 123

Art and Technology (BA/BS)

The art and technology major combines time-based, interactive, and experimental design skills with critical approaches to contemporary art and theory. Led by internationally known faculty members—who are also practicing artists—the Art and Technology program offers courses in:

- 2D and 3D animation
- Illustration, imaging, and experimental design
- Interactivity, programming, and games
- Video art and installation

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate technical and material competency.
- Demonstrate visual literacy.
- Understand historical and cultural context from a variety of perspectives.
- Exercise critical thinking, analysis and discourse.
- Synthesize technical and conceptual understanding into an independent art making practice.

Art and Technology Major Requirements

Courses used to fulfill the major requirements must be passed with a grade of C- or better or a mark of Pass (P or P*).

No more than 12 credits passed with a mark of Pass (P or P*) will count towards major requirements.

Art and Technology (BFA)

The BFA degree program in art and technology is a focused and selective undergraduate degree that allows students to take many studio courses. BFA students receive faculty mentoring and take BFA-specific courses that include professional practice strategies and opportunities. Students work toward a thesis project in their graduating year that includes a final BFA exhibition, a website, and a catalog publication.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate mastery of studio practices and ideas.
- Develop an understanding of history, theory, and criticism, and an ability to analyze and situate work in relation to that body of knowledge.
- Acquire a working knowledge of technologies and equipment applicable to their area(s) of specialization.
- Develop an ability to synthesize material and intellectual knowledge and shape an independent studio practice.

Bachelor of Fine Arts: Art and Technology

The bachelor of fine arts degree with a major in art and technology is a professional baccalaureate degree. Students enrolled in the digital arts BFA are in residence at the University of Oregon in Portland as they develop the body of work for their BFA terminal project.

The application process is competitive and includes a portfolio review. Students who have completed a comparable four-year degree in art at another institution may be admitted to the BFA program. Such candidates must satisfy the university's 45-credit residence requirement.

Students must complete the four-year program with a total of 118 credits in digital arts (a total of 180 university credits).

Courses used to fulfill the major requirements must be passed with a grade of C- or better or a mark of Pass (P or P*).

Art History courses used to fulfill the major requirements must be passed with a grade of C- or better or a mark of Pass (P or P*)

No more than 12 credits passed with a mark of Pass (P or P*) will count towards major requirements.

Additional upper-division credits in ARTD or ARTS (chosen from studios, independent studies, or internship) 15

Total Credits 118

¹ History of Design (ARH 358) is recommended.

² At least 24 of these credits must be in digital arts (ARTD) studio courses.

³ A maximum of 6 credits in Internship: [Topic] (ARTD 404) and a maximum of 12 credits in Practicum: [Topic] (ARTD 406) may be counted toward the 36 upper-division credits.

⁴ Three terms of course

Additional Requirement: Math/CS or Language

Math/CS:

- Complete the university mathematics/computer science requirement for the BS degree.

Language:

- Completion of at least the third term of the first year in a Second Language taught in the language (103 or Equivalent)
- Satisfactory completion of an examination administered by the appropriate language department
- International students: if your language or instruction in high school was in a language other than English, satisfactory completion of all AEIS courses and WR 121Z and either WR 122Z or WR 123

Art Minor

We encourage you to declare the minor at least three terms before graduating. At the time you declare your minor, you are encouraged to contact the Art Office to schedule a departmental advising appointment.

Art Minor Requirements

The minor requires 28 credits. Coursework must be taken in at least two departmental curricular areas, including courses taken to fulfill the core studios requirements.

Students are encouraged to declare the minor at least three terms before graduating. At the time the minor is declared, a departmental advisor may be assigned to help the student develop an individualized program.

Courses used to fulfill the minor requirements must be passed with a grade of C- or better or a mark of Pass (P or P*).

Art History courses used to fulfill the minor requirement must be passed with a grade of C- or better or a mark of Pass (P or P*).

No more than 12 credits passed with a mark of Pass (P or P*) will count towards minor requirements.

Total Credits **28**

¹ Of the 12 studio credits, 8 must be upper division, and all 12 credits must be taken in residence.

Art and Technology Minor

The minor in Art and Technology is an interdisciplinary endeavor, drawing on the expertise of faculty in the areas of Art and Technology, Computer and Information Science, Journalism, and Music. Students in the minor will receive an introduction to the possibilities available to students with a background in interdisciplinary multimedia studies. Courses offered in the minor will cover design, programming, writing and composing for a variety of different applications.

Art & Technology Minor Requirements

The minor requires 28 credits. Courses must be taken for letter grades and passed with a C– or better or a P* where Pass/No Pass is the only grading option for the course. No transfer work can be applied to the minor. The three core courses must be completed before registering for other courses required for the minor.

Art (MFA)

The graduate program seeks to prepare students for serious artistic practice. The objectives for students are not only to arrive at an accomplished body of work, but also to develop the practices and critical-thinking skills necessary to develop and sustain the work beyond school.

The program focuses on individual studio practice, the cultivation of a visual language, material process, and conceptual approach relevant to each student's intentions and sensibility. Students are challenged to devise strategies of experimentation and research and to cultivate an ability to articulate ideas and critical responses to work. As part of a larger community, students are expected to have a significant understanding of the historical frameworks and the contemporary discourse of art.

The MFA curriculum is designed to provide both interdisciplinary discourse and disciplinary depth. MFA students have much of their course work in common through classes such as Graduate Critique (ART 612), theory and history seminars, and special topics courses. Graduate review and thesis committees are made up of faculty members across the range of media concentrations. Through Issues and Practices seminars and independent studies, students also have opportunities to concentrate on particular areas of specialization. Specialized facilities and equipment are available in the eight media areas that compose the department—art & technology, sculpture, photography, ceramics, jewelry and metalsmithing, painting, printmaking, and fibers.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop of an accomplished, independent, professional level body of work.
- Conduct independent research and analysis in the discipline
- Demonstrate critical thinking and articulation of their creative work, including effective oral and written communication skills.
- Demonstrate competencies and strategies for experimentation, materially and conceptually, which will sustain the work beyond graduation
- Understand historical and contemporary contexts, and professional discourse in the discipline. 6. Demonstrate understanding of professional practices

Art Major

A minimum of 24 credits must be graded with a grade of mid-B or better.

Code	Title	Credits
ART 610	Experimental Course: [Topic] (Graduate Teaching Practicum)	6
ART 610	Experimental Course: [Topic] (Issues and Practices (3 terms, every fall))	9
or ART 510	Experimental Course: [Topic]	
ART 608	Workshop: [Topic] (Writing for Artists (or other graduate level writing course))	3
ART 612	Graduate Critique (5 terms at 3 credits per term)	15
2 terms of graduate level Art History (1 must be contemporary)		8

Theory Seminar (such as ARH 607, ART 507, or other university theory course approved by the Director of Graduate Study)	4
ART 614 Graduate Studio (4 credits per term for 6 terms, completed in the first two years)) ¹	24
ART 609 Terminal Project	18
Electives	3
Total Credits	90

Additional Requirements

- 3-year program (must have at least nine terms of full-time enrollment, with a minimum of nine credits each term, during the academic year)
- Satisfaction of the Division of Graduate Studies minimum degree requirements relevant to this program's Master of Fine Arts students which includes grades, incompletes, as well as other criteria listed on the division's site.
- Participation in at least two graduate reviews
- Public exhibition of the MFA Terminal Project and final review with the terminal project committee
- Terminal creative project report

Residency Requirements

Nine consecutive terms of full-time enrollment, not including summer session, is the minimum residence requirement. Under special circumstances, an official University of Oregon leave of absence may be requested.

Product Design

<http://pd.uoregon.edu>

Trygve Faste, Department Head

251E Lawrence Hall
5282 University of Oregon
Eugene, OR 97403-5282
541-346-6891

The Department of Product Design rigorously explores the invention, production, and use of products. It integrates the theories and applied practices in the design, art, and architecture disciplines, creating collaborative opportunities across campus with the business school and the anthropology and chemistry departments. The critical research and design work produced by students and faculty members has an impact on both the local and international design communities.

The program exposes and expands on the significance of materials in products, helping students develop an understanding of how aspects of sustainability and ergonomics, tactile and visual aesthetics, and structural integrity can influence their choices in materials.

Overview

The department offers a bachelor of fine arts (BFA) degree in product design. The BFA is a four-year program combining liberal arts and intensive product design studies designed to prepare students for a professional career in product design. Students enrolled in the program share a foundation in design, graphics, drawing, and art history with majors in both architecture and art.

Eugene

Students undertake the first three years of the BFA in product design at the university's main campus in Eugene. This location is well-equipped with computer and digital-imaging labs, a new digital computer-controlled mill, laser cutter, wood shop, digital loom, metals and ceramics shops, large-format printing facility, and other specialized art and design studios in Lawrence Hall, Downtown Eugene and the Northsite studio complex. The Eugene campus has strong undergraduate and graduate degree programs in architecture, art, ceramics, digital arts, fibers, interior architecture, metalsmithing and jewelry, painting, photography, printmaking, and sculpture. In addition, students have access to other university resources, such as the architecture and allied arts and main libraries, Student Recreation Center, Erb Memorial Union, and Craft Center.

Portland

Students pursuing the BFA degree complete their fourth year of study at the university's new facility in Portland's Old Town Historic District. The White Stag Block houses studio facilities, a digital fusion laboratory, classrooms, a library, exhibit and research spaces, the Sports Product Design Master's Program, and work areas for students and faculty members. An integrated shop and an output center for two- and three-dimensional computer numerical controlled production are available. Product design students benefit by interacting with students from other related professional disciplines, such as architecture and sports product design. An internship component of the BFA program gives students access to design professionals and direct experience at leading Northwest design companies.

Preparation

High school and college students interested in product design should prepare themselves by taking courses in the following subjects:

- Fine arts and design (e.g., drawing, painting, sculpture, two- and three-dimensional design, fiber arts, metal arts, ceramics, drafting, art history, architecture, furniture or interior design)
- Social sciences (e.g., sociology, psychology, cultural anthropology)
- Sciences and mathematics (e.g., physics, algebra, geometry)
- Humanities (e.g., literature, writing)

To better understand the professional field, prospective students may plan to visit and discuss opportunities with local designers and firms practicing product design.

Product design students are required to own a laptop computer. If students purchase recommended equipment, they are eligible for technical support from our computing staff. Recommended systems are listed on the program's website. Purchase of a digital camera to record studio work and use for classroom assignments is strongly advised.

Faculty

John Arndt, associate professor (product design). BFA, 1997, Alfred; MDes, 2006, Design Academy Eindhoven. (2008)

Wonhee Jeong Arndt, associate professor. BFA, 2002, Kookmin; MDes, 2006, Design Academy Eindhoven. (2014)

Trygve Faste, associate professor (product design). BA, 1997, Whitman College; MFA, 2004, Cranbrook Academy of Art. (2010)

Kiersten Muenchinger; Tim and Mary Boyle Chair in Material and Product Studies; associate professor (product design). BA, 1993, Dartmouth College; MS, 1998, Stanford. (2008)

Erdem Selek, associate professor (product design). BID, 2004, Middle East Technical; MA, 2007, Ecole Supérieure d'Art et de Design; MS, 2008, Istanbul Technical. (2015)

Hale Selek, associate professor (product design). BID, 2004, Middle East Technical; MA, 2007, Ecole Supérieure d'Art et de Design; MS, 2008, Istanbul Technical. (2015)

Susan Sokolowski, associate professor (sports product design). BFA, 1990, Fashion Institute of Technology; MA, 1997, Cornell; PhD, 1999, Minnesota, Twin Cities. (2015)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Major - Bachelor's Degree

- Product Design (BFA) (p. 493)

Major - Master's Degree

- Sports Product Design (MS) (p. 493)

Product Design (BFA)

Enhance the world around you by creating products that are useful, energy-efficient, ergonomically appropriate, cost-effective and socially responsible. As one of our students, you will solve real-world design challenges with fellow students, clients, and faculty members.

Students in the product design major develop the knowledge, skills, and methods essential to becoming a professional designer with courses in product design, art, and art and technology within the School of Art + Design. In the product design major, students work on the Eugene campus for three years and continue to the Portland campus for the final year of completion of their professional BFA degrees.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Realize a new product that solves a specific need based on needs found through observational research with and of an individual person.
- Create cohesive visual and verbal analysis about the impact of a new product on a civic or social structure.
- Articulate personal design sense through visual and verbal media.

Product Design Major Requirements

Courses used to fulfill the major requirements must be taken for a letter grade and passed with a grade of C- or better.

¹ Studio courses chosen from product design (PD), ceramics (ARTC), fibers (ARTF), metalsmithing and jewelry (ARTM), sculpture (ARTS), Sports Product Design (SPD)

Sports Product Design (MS)

The Department of Product Design offers a master's degree in Sports Product Design, a two-year program based in Portland, Oregon.

The Master of Sports Product Design prepares designers to be key members and leaders of multidisciplinary development teams within the more than 800 sports product companies located in Oregon and beyond. The program focuses on research and innovation methods, design tailored for the athlete, product materials and sustainability, marketing and branding through the study of sports-specific design techniques, along with human physiology and biomechanics.

Students who graduate from this program will be capable of making strong contributions to the sports design culture of Oregon and the world at large.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Create industry-competitive Sports Apparel.
- Create industry-competitive Sports Footwear.
- Create industry-competitive Sports Equipment.
- Create a project appropriate for contemporary introduction to the Sports Product industry as assessed by innovation, fabrication, financial viability and user need.

Master of Science in Sports Product Design

The Master of Sports Product Design is a two-year program intended for students already equipped with conceptual problem-solving abilities, knowledge of materials and production, strategies for emotional product resonance and relevance, and entrepreneurial skills (typically, but not always, acquired in an undergraduate program in product design or its equivalent).

Degree Requirements

The curriculum is divided into three categories, per NASAD requirements for terminal graduate degrees:

1. A minimum of 65% of the total credits for the degree in studio studies.
2. A minimum of 15% of the total credits for the degree should include academic studies concerned with visual media.
3. At least 10% of the total program should be reserved for elective credits.

Studio Studies. A minimum of 65% of the total credits for the degree shall be in studio. As part of this requirement, institutions are responsible for maintaining title/content consistency.

Code	Title	Credits
SPD 684	Research Methodology and Innovation Process Studio	6
SPD 645	Sports Product Design and Business (SPD and Business)	4
SPD 650	Sports Product Materials and Manufacturing	4
SPD 685	Sports Product Design Studio I	6
SPD 686	Sports Product Design Studio II	6
SPD 687	Sports Product Design Studio III	6
SPD 601	Research: [Topic]	1-6
SPD 688	Innovative Project Strategy Development Studio	9
SPD 689	Collaborative Creation and Launch Studio	9
J 616		4
HPHY 631	Human Performance and Sports Products	3
HPHY 632	Human Biomechanics and Sports Product Design	2

Academic Studies. A minimum of 15% of the total credits for the degree should be in academic studies concerned with visual media. Course assignments should be made with careful consideration of (1) the scope and objectives of the student's program, and (2) the content of studies completed at the undergraduate level.

Code	Title	Credits
SPD 515	Soft Goods Technologies	4
SPD 525	Digital Creation Technologies	4
SPD 503	Thesis (Thesis)	1-6

SPD 604	Internship: [Topic]	1-6
SPD 605	Special Problems: [Topic]	1-6

Elective Studies. Elective studies are important since they provide opportunities for students to follow specific areas of interest related to their areas of specialization or their prospective careers. It is strongly recommended that at least 10% of the total program be reserved for electives.

Code	Title	Credits
SPD 606	Practicum: [Topic]	1-6
PD 510	Experimental Course: [Topic]	1-6
J 621		4
J 624		2
MGMT 625	New Venture Planning	3

Professional Connections

Industry partners for Sports Product Design provide special opportunities for students, fulfilling a number of critical roles as part of the learning environment of this program: instructors, advisors, guest reviewers, lecturers, mentors. Some examples of recent partners include Intel, Leatherman, Logitech, Nike, and Under Armour.

History of Art and Architecture

<http://arthistory.uoregon.edu>

Maile Hutterer, Department Head

237C Lawrence Hall
5229 University of Oregon
Eugene, OR 97403-5229

The Department of the History of Art and Architecture offers study in the principal and architectural traditions of Asia, the Americas, Europe, and the Mediterranean. Courses are appropriate for students interested in history, art, and the larger cultural context of society. They are also suitable for students intending to concentrate on the practice of art or environmental design. The undergraduate program prepares students for a range of careers (including those in the business world, art museums, and galleries) as well as graduate studies in art history. The graduate program emphasizes both breadth and depth, and it is characterized by close working relationships between students and the faculty.

Students explore global history, culture, and society through art and architecture from antiquity to the present day. Trained to analyze the broad spectrum of human creativity and expression, art history students are natural ambassadors of pluralism and tolerance, developing skills in appreciating visual and material culture to make them true global citizens—ideally equipped to correlate historical events and concerns with important contemporary and international phenomena.

The history of art and architecture program at Oregon is comprehensive in scope. Students learn at least one ancient or modern language associated with their main area of interest, and courses examine cultural production from around the globe. The department trains students to become guardians and advocates for culture and the arts within Oregon, the United States, and the world.

Because of this rigorous training in critical thinking and communication, art history is not merely a preprofessional major for future art historians. An art history degree prepares students to embark on an array of professional careers, including those in business, education, law, private

and nonprofit organizations, professional writing, and publishing. More specialized careers include art-based professions in museums, galleries, archives, and cultural institutes.

Faculty

Nina Amstutz, professor (18th- and 19th-century art). BA, 2004, MA 2008, PhD, 2013, Toronto. (2014)

Simone Ciglia, assistant teaching professor (contemporary art). BA, 2004, MA 2006, PhD, 2012, University of Rome, Italy. (2021)

Joyce Cheng, associate professor (modern art). BA, 2001, Northwestern; MA, 2003, PhD, 2009, Chicago. (2009)

Keith Eggener, Marion Dean Ross Distinguished Professor in Architectural History (architectural history). BA, 1985, Portland State; MA, 1989, Washington (Seattle); MA, 1993, Stanford; PhD, 1995, Stanford. (2013)

Victoria Ehrlich (renaissance and baroque art), visiting assistant professor (2023-24). PhD, 2017, Cornell. (2020)

Mariachiara Gasparini, assistant professor (Chinese and Central Asian art and architecture). BA, 2005, University of Naples; MA, 2011, Sotheby's Institute of Art; PhD, 2015, Heidelberg University. (2002)

Maile Hutterer, associate professor (medieval art and architecture). BA, 2004, California, Santa Barbara; PhD, 2011, New York University. (2014)

Kate Mondloch, professor (contemporary art). BS, 1994, Georgetown; MA, 2000, PhD, 2005, California, Los Angeles. (2005)

Emily Scott, assistant professor (history of art and architecture and environmental studies); BA, Bryn Mawr; PhD, 2010, California, Los Angeles. (2018)

Kristen Seaman, professor (Greek and Roman art and architecture). BA, 1994, Yale University; MA, 2009, PhD, 2009, California, Berkeley. (2015)

Akiko Walley, Maude I. Kerns Professor of Japanese Art; associate professor (Japanese art). BA, 1998, MA, 2001, Aoyama Gakuin; AM, 2004, PhD, 2009, Harvard. (2009)

Emeriti

Charles H. Lachman, associate professor. AB, 1971, Temple; MA, 1974, McMaster; PhD, 1985, Toronto. (1992)

Jeffrey M. Hurwit, professor emeritus. AB, MA, 1971, Brown; MPhil, 1972, PhD, 1975, Yale. (1980)

Esther Jacobson-Tepfer, professor emerita. BA, 1962, MA, 1964, PhD, 1970, Chicago. (1966)

Andrew Morrogh, associate professor emeritus. BA, 1966, Jesus College, Oxford; MA, 1973, PhD, 1983, Courtauld Institute, University of London. (1993)

Kathleen D. Nicholson, professor emerita. BA, 1969, Connecticut; MA, 1971, PhD, 1977, Pennsylvania. (1995)

Leland M. Roth, professor emeritus. BArch, 1966, Illinois; MPhil, 1970, PhD, 1973, Yale. (1978)

W. Sherwin Simmons, professor emeritus. BA, 1967, Yale; MA, 1975, PhD, 1979, Johns Hopkins. (1973)

Richard A. Sundt, associate professor emeritus. BA, 1967, Indiana; MA, 1973, PhD, 1981, Wisconsin, Madison. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Major - Doctoral Degree

- Art History (PhD) (p. 499)

Certificates

- Museum Studies (p. 501)
- New Media and Culture (p. 502)

Art History (BA)

An art history major will help you to develop competence in visual literacy, analytical skills, communication skills, and cultural and historical awareness. Art history is a marketable major, and graduates make competitive candidates in museums, galleries, archives, and cultural institutions as well as business, education, law, private and nonprofit organizations, professional writing, and publishing.

Art history students explore global history, culture, and society through art and architecture from antiquity to the present day. Trained to celebrate cultural differences and the broad spectrum of human creativity and expression, art history students are natural ambassadors of pluralism and tolerance. As an art history student, you'll develop skills in appreciating visual and material culture to help you become a true global citizen—ideally equipped to understand how historical events and concerns relate to important contemporary and international phenomena.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify themes, forms and structures of works of art, architecture and visual/material culture, using appropriate art historical terms.
- Connect features of works of art, architecture and visual/material culture to their appropriate historical and cultural contexts.
- Evaluate scholarly interpretations of works of art, architecture and visual/material culture.
- Present arguments related to works of art, architecture and visual/material culture in scholarly writing.

Bachelor of Arts Degree Requirements

Majors in art history are required to complete the language requirement as described under the university's bachelor of arts requirements (p. 25).

Because some languages are required for advanced research and graduate study in art history as well as other humanistic disciplines, majors are urged to choose one of them to satisfy the BA requirement. For example, Greek and Latin are the most commonly used languages in art-historical study about the Ancient Mediterranean; Chinese and Japanese are essential for most areas of East Asian art history; French, German, and Italian are the most commonly used languages in European art-historical research; and Portuguese and Spanish are the most commonly used languages in Latin American art-historical research. Substitution of other languages may be appropriate to a field of interest. Students are urged to consult with their advisors when selecting a language for study.

Code	Title	Credits
General Requirements		
Studio art (e.g., drawing, sculpture, or design) ¹		4
ARH 411	Art History Critical Methods	4
Choose three of the following survey courses:		12
ARH 150	Introduction to Visual Culture	
ARH 204	Ancient Mediterranean Art	
ARH 205	Medieval Renaissance European Art	
ARH 206	History of Western Art III	
ARH 208	History of Chinese Art	
ARH 209	History of Japanese Art

ARH 211	Survey of Latin American Arts	
ARH 314	History of World Architecture I	
ARH 315	History of World Architecture II	
Eight upper-division lecture and seminar courses ²		32
Additional ARH course ³		4
Total Credits		56

¹ ART 115, 116, 199, 233, 333, 381, any courses from ARTC, ARTD, ARTF, ARTM, ARTO, ARTP, ARTR, and ARTS subject code courses. A course must be 3 credits or more to count toward the requirement.

² Choose any 300- and 400-level courses with the exception of History of World Architecture I (ARH 314) and History of World Architecture II (ARH 315). Four of the eight courses must be at the 400 level. Of the eight required upper-division courses, two courses must be taken in any three of the following four chronological breadth areas: ancient, medieval, early modern, modern-contemporary. The remaining two courses are electives and may be taken in any area. At least four of the eight required upper-division courses must be taken in residence at the University of Oregon.

³ Any lower- or upper-division ARH course.

Majors must take art history courses for letter grades and pass them with a C– or better.

Honors Program

Majors in the history of art and architecture department may enroll in the department's honors essay program if they have

- completed two lower-division and four upper-division art history courses (one of which must be taken in residence at the University of Oregon)
- completed Art History Critical Methods (ARH 411) with a grade of A– or better

- an average GPA of 3.50 or higher in art history courses
- submitted the departmental honors enrollment form (available online) to the director of undergraduate studies, indicating the support of a faculty advisor

Students are urged to present a first draft of the essay to the faculty advisor six weeks before the end of the term, and a final draft must be submitted two weeks before the end of the same term.

The honors essay must demonstrate the student's ability to formulate a significant research problem. The essay should have approximately 20–25 pages of text, not including notes, bibliography, and illustrations. A copy of the honors essay is deposited in departmental files.

Honors candidates who maintain a 3.50 GPA in all courses required for the art history major are awarded departmental honors upon the approval of their essay by the faculty advisor.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Art History (MA)

Candidates for the master's degree (MA) must complete at least 45 credits in courses approved by the student's advisor, as well as satisfy the general requirements of the UO Graduate School. Of the 45 credits, a minimum of 36 must be graduate credits in research-based courses, taken for a letter grade.*

All MA candidates must complete either a thesis or a terminal project, as determined by the student in consultation with the student's advisor.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Disciplinary Knowledge:** Demonstrate mastery of the principal works, texts, methods, discussions and problems in a chosen field or fields of study within art and/or architectural history.
- **Disciplinary Knowledge:** Demonstrate ability to analyze and critique discourse in a chosen field or fields of study within art and/or architectural history.
- **Disciplinary Knowledge:** Demonstrate proficiency in at least one language beyond English, selected to facilitate advanced research and analysis in a chosen field or fields of study.
- **Disciplinary Knowledge:** Demonstrate ability to develop and realize a comprehensive program of independent research as a means of establishing oneself as a part of a professional community.
- **Career Preparedness:** Demonstrate awareness of relevant career options, job search networks, cover letter and CV preparation, interview techniques, and other relevant skills.
- **Career Preparedness:** Demonstrate readiness to assume professional roles in the academy, the museum, and related

institutions via conference and workshop presentations, publications, graduate certificates, and other relevant professional activities.

- Engagement: Demonstrate knowledge, ethics, and skills to produce and disseminate scholarship representing diverse perspectives in a responsible and equitable manner.
- Engagement: Demonstrate ability to convey the relevance of art and architectural works, histories, and methods (e.g., critical visual analysis) to diverse publics, within and beyond academia.

Master of Arts Requirements

Candidates for the MA degree must complete 45 credits in courses approved by the student's advisor, as well as satisfy the general requirements of the Division of Graduate Studies for residence. Of the 45 credits, a minimum of 36 must be graduate credits in research-based courses, taken for a letter grade.

Code	Title	Credits
Graduate Seminar Requirements and First-Year Seminar Series ¹		16
Methods/Critical Approaches to Art History Study ²		4
ARH 511, ARH 611, or its equivalent		
Electives ³		12
ARH 503	Thesis	9
or ARH 614	Terminal Project	
Total Credits		45

¹ 16 credits total, 12 of which (3 courses, 4 credits each) must be taken at the 600-level during the student's first year.

² In years where ARH 611 is offered, students may use this course towards their 12 required 600-level credits.

³ Of the 12 credits, a maximum of 8 credits may be taken outside of the department with an advisor's permission. When the Graduate Studies in Art History is offered as a 500-level course, the expectation is that a student will take one more ARH 607 either in the fall of their first year or something during their second year.

Distribution Requirement. Students must undertake course work in three of four historic areas: prehistoric–ancient, medieval, early modern, and modern–contemporary. Students may petition to apply a thematic or non-period–specific course toward one of the distribution requirements by demonstrating substantial course work if a substantial part of the student's work in the thematic or non-period-specific course engaged in the appropriate historic area in question. While not required, it is highly recommended that students take a selection of both selection of courses spanning western, Asian, and other cultural traditions courses to fulfill their distribution and elective requirements.

Foreign Language Requirement. The department requires that MA degree candidates demonstrate reading proficiency in at least one foreign language. The chosen language must be approved by the student's advisor and should be relevant to the student's scholarly interests. Language proficiency is typically demonstrated in one of several ways:

- by passing a written language exam given by the department;
- by providing an official transcript from the University of Oregon or elsewhere that shows satisfactory completion of the second or third year of the language, as determined by the student's primary advisor;
- by presenting evidence of having achieved equivalent results on a standardized foreign-language placement test.

The foreign language requirement may be waived for a student who has completed a high school or higher degree that employed the target language as the primary language of instruction. Students who expect to pursue a PhD should also acquire a research capability in additional languages, as appropriate to the student's area of study, as soon as possible in their academic program.

Additional information regarding the MA is available from the Department of the History of Art and Architecture office or on the website.

An opportunity to earn a BA and MA in art history and a Graduate Certificate in Museum Studies within five years.

AMP in Art History and GCMS Department Application Requirements

Statement of Purpose

Describe in detail your interests in the field of art and/or architectural history. This statement should include an account of your research interests, professional goals, how these integrate with our department, and why you wish to be admitted to the AMP in Art History and GCMS. Be sure to indicate the faculty member (or members) and the resources and aspects of the program that seem particularly suited to your educational needs. (Please limit the length of this document to a maximum of four double-spaced pages.)

Writing Sample

Provide one sample of your scholarly work that reflects your research and critical writing skills (30 double-spaced pages maximum). A student applying to the AMP in Art History and GCMS may submit a polished term paper written in a 400-level seminar with an ARH prefix as one's writing sample.

AMP Advising Worksheet (see attached HAA AMP Museum Studies Sample Schedule for a sample AMP Advising Worksheet)

Your worksheet should include all qualifying courses you have taken by the time of the application. You should fill out your AMP Advising Worksheet in consultation with the college and departmental academic advisors.

CV

Upload a copy of your curriculum vitae (résumé) listing your educational background and experience.

Transcript(s)

Upload a PDF copy of all of your transcripts and degree certificates. Your UO transcript must show that you have fulfilled the following BA requirements:

- WR121 and either 122 or 123
- 2 years of second language
- At least 32 credits of CoreEd requirements
- 16 credits of ARH lower-division courses
- 4-credit of Studio Art
- At least 12 credits of ARH upper-division courses
- At least 4 credits of ARH 400-level seminars

Letters of Recommendation

Three (3) letters of recommendation are required, and recommenders should be former professors or similar professionals who are in a position to evaluate your potential for successful completion of a graduate degree in art history. For a student applying to the AMP in Art History and GCMS, two (2) out of the three letters must come from HAA faculty members.

The GradWeb Application System will guide you through the process. You will only have to enter names and email addresses. The system will request the recommendation directly.

³ Or another ARH 500-level GCMS-qualifying course; also fulfills MA and BA req.

⁴ Or another ARH 500-level GCMS-qualifying course that fulfills "Practice" distribution req.

⁵ Or another non-ARH 500 or 600-level course that fulfills GCMS non-major req and "Topics" distribution req.

⁶ Or another non-ARH 500 or 600-level course that fulfills GCMS non-major req.

⁷ Or another ARH 500- or 600-level GCMS-qualifying course.

⁸ Or another 500- or 600-level ARH course.

Art History Minor

Art History minors explore world history, culture, and society through art and architecture. Students and faculty maintain deep connections with the university's broad research community through long-standing collaborations with the museums and research units across campus. Through object-based learning, we celebrate cultural differences and the colorful spectrum of human creativity and expression. Become a true global citizen as you develop skills in appreciating visual and material culture.

Minors must take art history courses for letter grades and pass them with a C– or better.

Minor Requirements

Three lower-division and four upper-division art history courses (totaling 26 credits minimum) are required to complete the minor. At least 20 credits must be completed in residence at the University of Oregon (nontransfer courses), and all art and architectural history courses (subject code ARH) required for the minor must be passed with letter grades of C– or better.

Lower-division courses include any 100- or 200-level ARH courses as well as History of World Architecture I (ARH 314) and History of World Architecture II (ARH 315). Upper-division courses include any 300- or 400-level ARH courses (with the exception of ARH 314 and 315).

Art History (PhD)

History of Art & Architecture faculty members are scholars and teachers, easily accessible to all students and dedicated to mentoring graduates from the first year of course work to post-PhD career guidance. The HA&A faculty holds an annual review to ensure students are making satisfactory progress toward the degree.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Disciplinary Knowledge:** Demonstrate mastery of the principal works, texts, methods, discussions and problems in a chosen field or fields of study within art and/or architectural history.
- **Disciplinary Knowledge:** Demonstrate ability to analyze and critique discourse in a chosen field or fields of study within art and/or architectural history.
- **Disciplinary Knowledge:** Demonstrate proficiency in at least one language beyond English, selected to facilitate advanced research and analysis in a chosen field or fields of study.

- **Disciplinary Knowledge:** Demonstrate ability to develop and realize a comprehensive program of independent research as a means of establishing oneself as a part of a professional community.
- **Career Preparedness:** Demonstrate awareness of relevant career options, job search networks, cover letter and CV preparation, interview techniques, and other relevant skills.
- **Career Preparedness:** Demonstrate readiness to assume professional roles in the academy, the museum, and related institutions via conference and workshop presentations, publications, graduate certificates, and other relevant professional activities.
- **Engagement:** Demonstrate knowledge, ethics, and skills to produce and disseminate scholarship representing diverse perspectives in a responsible and equitable manner.
- **Engagement:** Demonstrate ability to convey the relevance of art and architectural works, histories, and methods (e.g., critical visual analysis) to diverse publics, within and beyond academia.

Doctor of Philosophy Requirements

HA&A Course Requirements for BA–PhD Track

To fulfill the HA&A course requirements for the PhD, students admitted on the BA–PhD track are expected to take a total of 81 credits of graduate-level work beyond the baccalaureate degree, over the course of at least 3 calendar years. Of the 81 graduate-level credits required, at least 36 graduate credits must be in art history and taken for a letter grade. Students must take a minimum of 12 credits in their major area and 8 credits in their minor area. A maximum of 4 credits of Research: [Topic] (ARH 601) and Special Problems: [Topic] (ARH 605) can be applied to the 20 credits in the student's major and minor fields, if those credits are taken with the major or minor field examiner and if they are taken for a letter grade.

Of these 36 credits, a minimum of 12 must be in graduate seminars (600-level), including Graduate Studies in Art History (ARH 611)* or its equivalent. An additional 12 graduate-level credits in art history must be taken in three of four historic areas: prehistoric–ancient, medieval, early modern, and modern–contemporary. All students are encouraged to take advantage of the global breadth of courses offered in the department and are highly encouraged to take courses outside of their time period and primary geographical area of specialization. Students may petition to apply a thematic or nonperiod-specific course toward one of the distribution requirements by demonstrating substantial course work if a substantial part of the student's work in the thematic or nonperiod-specific course engaged in the appropriate historic area in question.

Students must complete all required coursework before taking their comprehensive exams. All PhD students must register for a minimum total of 18 credit hours in ARH 603 Dissertation. Dissertation 603 cannot count towards the 36 credits required in art history. A maximum of 4 credits of Research 601 or Reading 605 can be applied to the 36 graded credits required in art history and only if those credits are taken with the major or minor field examiner.

In some years, ARH 559 Critical Approaches to Art History Study or ARH 507 Methods may be offered in place of ARH 611. The expectation is that students who took Graduate Studies in Art History at a 500-level will take one more graduate seminar at the 600-level.

HA&A Course Requirements for MA–PhD Track

(for students entering program with an MA in art and/or architectural history)

Students admitted on the MA–PhD track are expected to take a total of 81 credits of graduate-level work beyond the baccalaureate degree, over the course of at least 3 calendar years*. Of the 81 graduate-level credits, at least 36 graduate credits must be in art history and taken for a letter grade. Of these 36 credits, a minimum of 12 must be in graduate seminars (600-level), which may include Graduate Studies in Art History (ARH 611) if it is taken in our department. While not required, all students are encouraged to take advantage of the global breadth of courses offered in the department and are highly encouraged to take courses outside of their time period and primary geographical area of specialization. Students must complete all required coursework before taking their comprehensive exams and must register for a minimum total of 18 credit hours in ARH 603 Dissertation. Dissertation 603 cannot count towards the 36 credits required in art history. A maximum of 4 credits of Research: [Topic] (ARH 601) or Special Problems: [Topic] (ARH 605) can be applied to the 36 graded credits required in art history and only if those credits are taken with the major or minor field examiner.

*Students on the MA–PhD track may petition to waive some coursework requirements to more quickly progress through the program. A maximum of 36 transfer credits may be granted for equivalent graduate-level coursework taken outside of UO; regardless of the number of transfer credits granted, however, all PhD students are required to take a minimum of 12 credits in their major area and 8 credits in their minor area after matriculating into UO's HA&A graduate program. After accepting an offer of admission, the DGS and advisor will calculate transfer credits using the PhD Transfer Credit for Graduate Coursework form.

Major and Minor Requirements

Students are expected to declare major and minor fields of study and to identify the faculty members who will administer their comprehensive exams by the spring quarter of their first year. Students are required to take a minimum of 12 credits in their major field and at least 8 credits in their minor field at the graduate level (500- or 600-level) prior to taking their comprehensive exams. PhD students are encouraged to take as many 600-level courses as feasible beyond the required 12 credits.

The major field must be in HA&A; the minor field is typically in HA&A. With permission of the major advisor and the Director of Graduate Studies, the minor field may be in another discipline (e.g. classics, history, comparative literature, environmental studies, etc.).

To fulfill the requirements for the PhD, students are expected to take a total of 81 credits, selected in consultation with the student's advisor. Of the 81 credits, at least 36 credits must be in ARH courses and taken for a letter grade. Of the 36 graduate credits required, a minimum of 12 must be in graduate seminars (600 level), including Graduate Studies in Art History (ARH 611). Students are required to complete all required course work before taking their field exams. A maximum of 4 credits of ARH 601 Research: [Topic] or Special Problems: [Topic] (ARH 605) can be applied to the 20 credits in the student's major and minor fields, if those credits are taken with the major or minor field examiner and if they are taken for a letter grade.

Students are expected to declare a major field of study by spring term of their first year. Students are required to take a minimum of 12 credits in their major field and at least 8 credits in their minor field at the graduate level (500 or 600 level) prior to taking their field exams.

Students entering the PhD program with an MA in hand may petition to waive some course work requirements to more quickly progress through the program. The University residency requirement specifies that at least 27 credits—the equivalent of one full-time academic year—must

be completed following admission into the doctoral program. Courses in Research: [Topic] (ARH 601), Special Problems: [Topic] (ARH 605), and other individualized study options may be a part of the 9 credits, but the majority of the residency requirement is expected to consist of regular graduate course work.

Foreign Language Requirement

Students should acquire a research capability in two foreign languages appropriate to the student's area of study as soon as possible in their academic program, unless otherwise approved by the student's advisor.

Advancement to Candidacy

Students are required to complete all required course work before taking their field exams. Students are officially advanced to candidacy in the PhD program upon completion of two written field exams: one in a major field in art and architectural history and one in a minor field in art and architectural history or another discipline with departmental approval. The department offers field examinations in the following categories:

- Greek
- Roman
- Latin American (minor only)
- North American
- Medieval
- Modern
- Contemporary
- Chinese
- Japanese
- Renaissance (minor only)
- Baroque (minor only)

Additional information regarding the PhD is available from the Department of the History of Art and Architecture office or on the website.

Museum Studies Graduate Certificate

Mariachiara Gasparini, Certificate Director

gcms@uoregon.edu

The Graduate Certificate in Museum Studies (GCMS) is a transdisciplinary program open to UO graduate students interested in pursuing a career in a museum or in any profession that involves exhibition or curation. It addresses the demand for a deeper understanding of the guiding principles behind a museum's mission and its practical day-to-day operations.

Today, the practice of exhibiting is not just the purview of art and cultural museums. Exhibition history and practice is integral to museums of science, medicine, natural history, ethnography, theater, and music as well as institutions such as zoos, aquariums, art galleries, botanical gardens, and libraries.

Housed in the College of Design, the GCMS collaborates with departments, programs, and museum professionals across campus to provide foundational theoretical and practical training in the museum field, while allowing students the freedom to explore museum operations from a variety of perspectives.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Identify and explain the guiding principles of museum operations.
- Engage in theoretical and practical training relevant to museum careers.
- Apply their theoretical and practical training to first-hand experience in museum operations through an internship.

Graduate Certificate in Museum Studies

The Graduate Certificate in Museum Studies is a transdisciplinary program open to graduate students enrolled in any graduate program at the University of Oregon. The curriculum is designed to provide both scholarly engagement with issues related to museums and an introduction to the specialized skills pertinent to museum professionals. Students must complete a minimum of 24 credits in approved courses.

Among the minimum 24 credits, 4 credits must come from the core course, ARH540 (Museology), and 3 credits from DSGN604 (Internship). The remaining 17 credits are devoted to Electives. You may count up to 12 credits of relevant courses offered through your home department/program toward both the certificate and your major requirements.

The certificate requires a minimum of 17 Elective credits. Elective courses provide students the opportunity to explore issues surrounding museums today and to familiarize themselves with skill sets expected of the specific museum careers they are interested in. Students may choose courses from any of the preapproved elective courses, or may petition to the certificate director to substitute other courses when they are germane to their specific interests.

Interdisciplinary Requirement: You must take at least 5 credits of elective courses offered through a department or program outside of your home department/program.

Distribution requirements: The elective courses must fulfill the following two distribution requirements:

1. **Topics in Museum Studies (at least one course):** A topics-based course involves historical, theoretical, or philosophical exploration of issues surrounding museums, for instance a course on museum ethics (PPPM 571 Cultural Policy, for instance).
2. **Practice/Methods in Museum Studies (at least one course):** A practice/methods-based course deals with practical knowledge of and skills in museum operations, for instance a course on connoisseurship, exhibition planning or educational programming (ARH 510 Inside Museum Exhibition, for instance).

Certificate in Museum Studies

Code	Title	Credits
Core Requirements		7
ARH 540	Museology	4
DSGN 604	Internship: [Topic]	3
Electives ¹		17
Interdisciplinary Requirement		5
Students must take at least 5 credits of elective courses offered through a department or program outside of their home department/program.		
Distribution Requirements		12

The elective courses must fulfill the following two distribution requirements:

1. Topics in Museum Studies (at least one course): A topics-based course involves historical, theoretical, or philosophical exploration of issues surrounding museums

2. Practice/Methods in Museum Studies (at least one course): A practice/methods-based course deals with practical knowledge of and skills in museum operations

Total Credits

24

¹ Students may count up to 12 credits of relevant courses offered through their home department/program toward both the certificate and the major requirements.

New Media and Culture Graduate Certificate

The New Media & Culture Certificate for graduate students blends scholarly research on new media topics with hands-on experience creating new media content and using digital research tools. In conjunction with the multitude of creative opportunities made available by existing degree programs across campus, the certificate can be completed through courses spanning the criticism, history, aesthetics, and production of new media technologies.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Frame their own research projects through the lens of prominent theoretical analytics for the study of new media in its social, cultural, and technical contexts.
- Describe the specificities of the methodological approaches undergirding their own research projects.
- Compare the methodological approaches they take for the study of new media and/or legacy media with other possible methodological approaches.
- Situate their own new media research within a broader landscape of topics, themes, debates, and research programs in new media and culture.
- Specify the particular topical commitments and thematic threads informing their own research work concerning new media and/or legacy media.

Certificate in New Media and Culture Requirements

This multidisciplinary program offers exposure to an array of approaches to the study of contemporary new media topics such as social media, digital surveillance, gaming culture, and the social significance of data analytics through review of the history, theory, criticism, aesthetics, and production of new media technologies. Students blend scholarly research on new media topics with practical experience creating content using digital research tools.

The certificate program is open to graduate students in any UO department or program. Students must complete a minimum of 24 credits in approved courses. Among these, 12 credits must

come from a series of required core courses: one course (4 credits) in Theories and Histories of New Media (this is known as the core Common Seminar required of all NMCC students); one course (4 credits) from the list of methods courses, and one course (4 credits) from the list of Topics courses. The remaining 12 credits are devoted to electives. At least 8 of the 24 credits must be taken outside of the student's home department or program. For more information, including course offerings for the coming year, visit the certificate website. (<http://newmediaculture.uoregon.edu/>)

Code	Title	Credits
Common Seminar		4
Choose one:		
COLT 618	Histories, Theories, and Cultures of New Media	
JCOM 610	Experimental Course: [Topic] (Histories and Theories of New Media)	
Or other equivalent course		
Methods Course ¹		4
Topics Course ²		4
Electives ³		12
Total Credits ⁴		24

¹ Actual course offerings change year to year. See NMCC website (<https://newmediaculture.uoregon.edu/courses-overview/nmcc-courses/methods/>) for sample course listings. Students may also petition (<https://newmediaculture.uoregon.edu/apply/coursework-petitions/>) to substitute other relevant courses.

² Minimum **4 credits** in Topics courses. See NMCC website (<https://newmediaculture.uoregon.edu/courses-overview/nmcc-courses/topics/>) for sample course listings. Students may also petition (<https://newmediaculture.uoregon.edu/apply/coursework-petitions/>) to substitute other relevant courses.

³ Minimum of **12 Elective credits**. Students may choose Elective credits from any of the pre-approved NMCC course listings in Electives, Methods (<http://newmediaculture.uoregon.edu/courses-overview/methods/>), or Topics (<http://newmediaculture.uoregon.edu/courses-overview/topics/>). Pre-approved Electives include a robust portfolio of production-oriented classes as well as a range of thematic courses related to new technologies. Alternately, students may create customized study plans by pursuing the following options:

1. Students may petition to substitute other relevant courses for courses on this list if considered germane to an individual student's program in new media and culture. For example, a course on the topic of Copyrights (LAW 667) would be considered relevant to an Art History student's research on contemporary appropriation art. See NMCC Petition Guidelines (<https://newmediaculture.uoregon.edu/apply/coursework-petitions/>).
2. Students also may petition to have non-new media courses count toward the Electives requirement if the majority of the student's research in the course involves the production of new media content (websites, databases, blogs, digital arts, creation of new digital tools, etc.). For example, a course on Orientalism (COLT 562) in which the student created an interactive website on the topic of Edward Said could count toward the certificate in the Elective category. See NMCC Petition Guidelines (<https://newmediaculture.uoregon.edu/apply/coursework-petitions/>).

⁴ At least 8 of the 24 credits must be taken outside of the student's home department or program.

Planning, Public Policy and Management

<http://pppm.uoregon.edu>

Benjamin Clark, School Director

147B Hendricks Hall
1209 University of Oregon
Eugene, OR 97403-1209
541-346-7320

The School of Planning, Public Policy and Management is nationally known for academic rigor, intellectual leadership, innovative and applied instruction, and its inclusive and equitable climate. In PPPM you will:

- Learn by doing: Experience hands-on learning through practical activities.
- Study core subjects and specialized courses designed to tackle inequality.
- Benefit from a diverse community of faculty, students, and professionals.
- Feel welcomed and included in an environment that is open, welcoming, and inclusive to all, and in particular to those traditionally marginalized in society.
- Use theory, empirical evidence, and hands-on learning.
- Get involved in community projects --public, private, and nonprofit -- that tackle big issues including economic, environmental, and social issues
- Explore new ideas from different parts of the world and see if they can work in other places.
- Focus on making sure our actions are good for the environment, society, and the economy.

Faculty

Lisa Abia-Smith, associate teaching professor (art and special populations, art and museum education, arts in health care); director, educational outreach, Jordan Schnitzer Museum of Art. BA, 1989, St. Mary's College of California; MA, 1992, John F. Kennedy. (1997)

Anne Brown, assistant professor (transportation planning, mobility). BA, 2010, Macalester; MURP, 2014, California, Los Angeles. (2018)

Robert J. Choquette, associate teaching professor (strategic planning, project management); graduate programs coordinator. BS, 1982, MUP, 1991, Oregon. (1991)

Ben Clark, associate professor (public management, crowdsourcing, local government management). BA, 1999, Indiana, Bloomington; MPA, 2000, Syracuse; PhD, 2009, Georgia. (2016)

Patrick Hunnicutt, Assistant Professor (environmental management and policy). BA Duke University; MA UC Santa Barbara; PhD UC Santa Barbara.

Renee A. Irvin, associate professor (nonprofit and philanthropic sector economics, wealth policy). BA, 1984, Oregon; MA, 1991, PhD, 1998, Washington (Seattle). (2001)

Patricia Lambert, professor (performing arts, cultural policy). BM, 1990, Indiana; MA, 1997, Webster; MAS, 1998, International Center for Culture and Management; PhD, 2004, Ohio State. (2003)

Laura Leete, associate professor (poverty and social policy, work-force policy, nonprofit economics). BA, 1982, California, Berkeley; MA, 1988, PhD, 1992, Harvard. (2007)

Rebecca C. Lewis, associate professor (land-use policy, sustainable development, state and local finance). BA, 2006, Kentucky; MPP, 2008, PhD, 2011, Maryland, College Park. (2013)

Richard D. Margerum, professor (environmental planning and management, planning processes, conflict management). BA, 1987, Wittenberg; MCP, 1989, Cincinnati; MS, 1992, PhD, 1995, Wisconsin, Madison. (2001)

Dyana Mason, associate professor (nonprofit management, charitable giving, public management). BA, 1993, Southern California; MBA, 2010, William and Mary; PhD, 2014, Southern California. (2014)

Jessica Matthiesen, associate teaching professor (nonprofit management, program development, public service); director, undergraduate program and internship. BS, 1997, MPA, 2009, Oregon. (2012)

José Meléndez, assistant professor (civic engagement, designing participatory processes, Latino immigrants). BA, 2001, Oberlin; MEd, 2009; PhD, 2016, Illinois, Chicago. (2018)

Nicole S. Ngo, associate professor (health economics, environmental policy, urban sustainability). BA, BS, 2006, California, Irvine; MA, 2010, PhD, 2013, Columbia. (2013)

Eleonora Redaelli, associate professor. Laurea, 1997, Università degli Studi di Milano; DMA, 2000, Conservatorio di Musica Giuseppe Verdi; PhD, 2008, Ohio State. (2014)

Gerard Sandoval, professor (economic and community development, urban revitalization, immigrant neighborhoods). BS, 2000, California, Davis; MCP, 2002, PhD, 2007, California, Berkeley. (2010)

Marc Schlossberg, professor (geographic information systems, social planning, transportation planning). BBA, 1987, Texas, Austin; MUP, 1995, San Jose State; PhD, 2001, Michigan. (2001)

Julie Voelker-Morris, associate teaching professor. BA, 1996, Augustana College; MS, 2002, Oregon. (2014)

Yizhao Yang, associate professor (environmental planning, sustainable living design and analysis, geographic information systems). BArch, 1995, Tianjin; MS, 1998, Tsinghua; MRP, 2001, PhD, 2007, Cornell. (2006)

Yekang Ko, Associate Professor of Landscape Architecture.

Emeriti

Doug Blandy, professor emeritus (art and community service, art and special populations). BS, 1974, Ohio; MA, 1979, PhD, 1983, Ohio State. (1987)

Gaylene Carpenter, associate professor emerita. BA, 1965, MS, 1973, California State, Long Beach; EdD, 1980, Temple. (1983)

Rogena M. Degge, professor emerita. BA, 1964, Fresno State; MS, 1972, PhD, 1975, Oregon. (1979)

Bryan T. Downes, professor emeritus. BS, 1962, MS, 1963, Oregon; PhD, 1966, Washington (St. Louis). (1976)

Linda F. Ettinger, associate professor emerita. BFA, Southwest Missouri State; MS, 1973, Illinois State; PhD, 1983, Oregon. (1982)

Maradel K. Gale, associate professor emerita. BA, 1961, Washington State; MA, 1967, Michigan State; JD, 1974, Oregon. (1974)

Judith H. Hibbard, professor emerita. BS, 1974, California State, Northridge; MPH, 1975, California, Los Angeles; DrPH, 1982, California, Berkeley. (1982)

Michael Hibbard, professor emeritus. BS, 1968, California Polytechnic; MSW, 1971, San Diego State; PhD, 1980, California, Los Angeles. (1980)

Carl J. Hosticka, associate professor emeritus. BA, 1965, Brown; PhD, 1976, Massachusetts Institute of Technology. (1977)

Beverly J. Jones, associate professor emerita. BS, 1967, Oregon College of Education; MS, 1976, PhD, 1977, Oregon. (1977)

David C. Povey, professor emeritus. BS, 1963, Lewis and Clark; MUP, 1969, PhD, 1972, Cornell. (1973)

Jean Stockard, professor emerita. BA, 1969, MA, 1972, PhD, 1974, Oregon. (1974)

Kenneth C. Tollenaar, director emeritus. BA, 1950, Reed; MA, 1953, Minnesota. (1966)

Edward C. Weeks, associate professor emeritus. BA, 1973, PhD, 1978, California, Irvine. (1978)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Nico Larco, architecture

Robert G. Ribe, landscape architecture

Anita M. Weiss, international studies

Major - Bachelor's Degree

- Planning, Public Policy and Management (BA/BS) (p. 504)

Minors

- Nonprofit Administration (p. 507)
- Planning, Public Policy and Management (p. 507)

Undergraduate Studies

The undergraduate program provides an interdisciplinary liberal arts education that prepares students for work in the fields of planning,

policy, and public and nonprofit administration. Through coursework that integrates theory and practice, the curriculum focuses on the ways governments, nonprofit organizations, and other institutions solve public problems. Students explore the economic, social, and environmental characteristics of communities and systems of governance to determine effective ways to advance the public's goals. The practical, solutions-based curriculum helps students develop knowledge and skills pertaining to core issues related to planning, public policy, public administration, and nonprofit administration, as well as more in-depth knowledge in a chosen field of interest. Academic coursework and learning opportunities such as internships and applied courses create a hands-on educational climate that is both exciting and challenging.

Majors - Master's Degree

- Community and Regional Planning (MCRP) (p. 508)
- Nonprofit Management (MNM) (p. 510)
- Public Administration (MPA) (p. 513)

Major - Doctoral Degree

- Planning and Public Affairs (PhD) (p. 514)

Certificate

- Nonprofit Management (p. 515)

Planning, Public Policy and Management (BA/BS)

What do sustainable city planning, community change, food security, transportation planning, and nonprofit administration have in common? All are rooted in making a difference in our communities, states, and countries. Choose to study in the School of Planning, Public Policy and Management (PPPM) and you'll discover how governments, nonprofit organizations, and private-sector firms address some of the most important problems facing society—and how you can play a key role in finding innovative solutions.

As a PPPM major you'll gain a thorough grounding in the principles of civic responsibility, environmental sustainability, and international understanding. Experiential learning, evidence-based decision-making, and interdisciplinary study will be at the core of your PPPM curriculum. You'll learn from and work with faculty members who are internationally recognized scholars with a wide range of training and research interests. Your courses will focus on concepts and skills and explore how to implement them within communities, organizations, and governments.

Program's Admission Requirements

Please visit the program's website (<https://pppm.uoregon.edu/apply/ba-bs/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Synthesize core principles and policies guiding nonprofit and public organizations.
- Engage in evidence-based dialogue about urgent social, environmental, and economic issues.
- Apply learned skills to professional-level planning, nonprofit, and public policy projects by participating in courses that work on real-world issues with community partners.

- Build high-demand skills that public sector and nonprofit employers are seeking.
- Utilize professional development tools, like cover letter and resume writing or internship experience, to support their career interests in public service.

Planning, Public Policy and Management Major Requirements

Code	Title	Credits
Core Courses ¹		
PPPM 201	Introduction to Public Policy	4
PPPM 205	Introduction to City Planning	4
PPPM 280	Introduction to the Nonprofit Sector	4
PPPM 413	Quantitative Methods	4
PPPM 415	Policy and Planning Analysis ²	4
PPPM 434	Urban Geographic Information Systems	4
PPPM 494	Practice of Leadership and Change	4
Electives		
PPPM electives ³⁴		32
Total Credits		60

¹ PPPM majors must take core courses for letter grades and pass them with grades of C– or better.

² EC 201Z is a prerequisite for PPPM 415.

³ Up to 12 credits of Internship: [Topic] (PPPM 404) may count toward fulfilling this requirement. A maximum of 4 credits of lower-division courses may count toward fulfilling this requirement. All additional electives must be upper division.

⁴ Elective courses must be passed with a grade of Pass or C- or better to count towards the major requirements.

Students should expect extensive writing, analysis, and collaborative projects as part of their education in PPPM. For more information, contact an academic advisor in the College of Design.

Electives

Students are encouraged to work with a College of Design academic advisor to identify electives in one or more areas of interest which may include the following:

- arts and cultural leadership
- environment and sustainability
- equity and social justice
- global sustainability and development
- nonprofit administration
- public leadership and management
- social and health policy
- urban planning and development

Internship

Internships are optional but highly recommended for all PPPM students as a way to explore and clarify their interests and career goals, apply academic learning, develop new skills, and network with professionals. These career-building experiences help prepare students for fellowships, professional positions, or further academic study. Students interested in the PPPM Internship Program should enroll in PPPM 412 Internship and Professional Development and meet with the PPPM Undergraduate

Internship Director. More information is on the School website (<https://pppm.uoregon.edu/undergrad/ba-bs/#internships>).

Thesis and Honors Program

Students may pursue an undergraduate thesis in PPPM if they are accepted in the honors program (<https://pppm.uoregon.edu/undergrad/ba-bs/#thesis-honors>), or if they are enrolled in the Clark Honors College. Students may not pursue the thesis option without prior approval; interested students should contact the PPPM Undergraduate Program Director by the end of their sophomore year for more information. Students must have a 3.75 GPA to be considered for the honors program; a thesis is required.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Planning, Public Policy and Management Minor

Regardless of your major, a minor in Planning, Public Policy and Management (PPPM) will allow you to expand your learning experience by getting an overview of public sector issues and developing your professional skills.

Through the Planning, Public Policy and Management Minor, you can enhance your undergraduate education to include preparation for a variety of professional occupations and areas of graduate study. In the PPPM minor, you are introduced to a broad overview of issues in urban and regional planning, public policy and public management, and nonprofit management.

Through your selection of elective courses, you can choose to focus on a field of interest ranging from social and health policy to land use planning to public management.

Planning, Public Policy and Management Minor

The planning, public policy and management minor complements majors in the humanities or social sciences, including anthropology, geography, political science and economics. It provides a professional context in which to apply the knowledge, theories, and methods of the student's major discipline. Students pursuing the minor are introduced to a broad

overview of issues in urban and regional planning, public policy and public management, and nonprofit administration. The minor enhances any student's undergraduate education with preparation for a variety of professional occupations and graduate study.

Students may declare the minor in planning, public policy and management at any time by completing a Qualtrics form available on the PPPM website.

Code	Title	Credits
PPPM 201	Introduction to Public Policy ¹	4
PPPM 205	Introduction to City Planning ¹	4
PPPM 280	Introduction to the Nonprofit Sector ¹	4
PPPM 415	Policy and Planning Analysis ^{1, 2}	4
PPPM electives ³		12
Total Credits		28

¹ Must be taken for letter grades and passed with grades of C– or better.

² EC 201Z is a prerequisite for PPPM 415.

³ Up to 8 credits of Internship: [Topic] (PPPM 404) may be used toward fulfilling this requirement. A maximum of 4 credits of lower-division courses may count toward fulfilling this requirement. All additional electives must be upper division and must be passed with a grade of Pass or C- or better to count towards the minor requirements .

Credit Restrictions

- A PPPM minor and a NPA minor can only count PPPM 280 for both minors. All other classes (PPPM electives) need to be different between the minors.

Nonprofit Administration Minor

The School of Planning, Public Policy and Management offers a minor to students interested in a career in the nonprofit sector. Through the minor, you can enhance your undergraduate education to include preparation for occupations and graduate study in nonprofit administration. Nonprofit organizations comprise one of the fastest growing employment sectors in the country, creating a high demand for graduates with tailored knowledge and skills to work for these diverse and exciting entities.

The UO has one of the most comprehensive undergraduate nonprofit programs in the world. With a nonprofit administration (NPA) minor, you'll gain unique skills and insights through applied coursework and hands-on projects with local professionals and nonprofit organizations. The NPA minor will help you gain a thorough understanding of current nonprofit issues and trends and develop sector-specific skills—one of the reasons NPA graduates rise rapidly to fill positions in their organizations' ranks.

Nonprofit Administration Minor

The School of Planning, Public Policy and Management offers a minor of special value to students interested in a career in the nonprofit sector. Through the minor, students can enhance their undergraduate education to include preparation for occupations and graduate study in nonprofit administration. The nonprofit sector is one of the fastest-growing employment sectors in the country, creating a high demand for graduates with specialized skills to work for these diverse and exciting organizations.

Students may declare the minor in nonprofit administration at any time by completing a Qualtrics form available on the PPPM website. Core

courses must be taken for letter grades and passed with grades of C– or better, unless offered pass/no pass only. Electives must be passed with a grade of Pass or C- or better to count towards the minor requirements

PPPM 488	Nonprofit Legal Issues	
PPPM 494	Practice of Leadership and Change	
Total Credits		25

¹ PPPM 280 is the prerequisite.

² A list of additional approved elective courses is available on the PPPM website (<https://pppm.uoregon.edu/undergrad/minor-nonprofit-admin/>).

³ BA 316 and 317 do not count towards the electives for majors within the College of Business. LCB majors must take MKTG 311 and/or MGMT 311 in place of BA 316 and BA 317

Credit Restrictions

- Students are allowed to apply up to 4 credits of non-PPPM courses to the elective requirement.
- PPPM majors are allowed to apply up to 8 PPPM credits toward both PPPM major and NPA minor.
- A PPPM minor and a NPA minor can only count PPPM 280 for both minors. All other classes (PPPM electives) need to be different between the minors.

Community and Regional Planning (MCRP)

The master of community and regional planning (MCRP) program trains policy-oriented planners for leadership positions in planning and

planning-related organizations. The field of planning is concerned with rational and sensitive guidance of community and regional change. Planners are responsible for identifying and clarifying the nature and effect of planning problems, formulating potential solutions to these problems, and assisting in the implementation of alternative policies.

To realize these objectives, the planner must draw on the skills and insights of many professions and disciplines. The planner must have a basic understanding of the cultural, economic, social, political, and physical characteristics of a community.

Entering students should be prepared to become involved in and committed to resolving important social, economic, environmental, political, and cultural problems. Courses in and outside the school provide students with an integrated understanding of planning, public policy, and public management as well as specific skills needed for a chosen professional area.

Oregon is an especially fruitful location in which to study planning. The state has an international reputation as a source of innovative approaches to addressing planning issues.

Students select a set of courses in consultation with their advisors that focus their elective work on an area of special interest. The program has exceptional strengths in sustainable cities and transportation, land use and built environment, access and equity (community development) and environmental planning. In addition, the school's strengths in nonprofit management, local government management, and budget and finance are of interest to many students in the field of planning.

The program has strong ties with other programs on campus. Students often pursue concurrent degrees in planning and environmental studies, landscape architecture, business, economics, geography, international studies, or public administration. See Concurrent Master's Degrees in this section.

Preparation

Students are strongly encouraged to complete a thorough social science undergraduate program including courses in economics, sociology, geography, and history. Work experience, particularly if related to planning, is valuable, as are writing and public speaking skills. Courses in the natural sciences, policy sciences, environmental design, or analytic methods are helpful as background for advanced graduate work in a concentration area of interest to the student.

Students must complete either an advanced undergraduate or a graduate-level introductory course in statistics as a pre- or corequisite to Planning Analysis I (PPPM 613). No credit toward the MCRP degree is allowed for the statistics course. The requirement is waived for students with equivalent courses or work experience. Entering students are urged to satisfy this requirement before enrolling in the program.

Students may file petitions to transfer up to 15 graduate credits taken prior to admission to the planning program.

Careers

Graduates with an MCRP degree find employment in the public, private, and nonprofit sectors. Graduates work in the public sector at the local, state, regional and federal levels. In the private sector, graduates are typically employed by consulting firms, private developers, and other firms requiring research and analysis skills. Graduates are also employed by such nonprofit organizations as environmental and advocacy groups, community development organizations, and research firms. Positions

span a broad variety of sectors including land use, housing, social services, parks, transportation, economic development and natural resources.

Application Procedures

Importance is placed on the student's preference for and ability to undertake self-directed educational activity.

The admissions committee emphasizes the selection of candidates who present clear and specific reasons for choosing to pursue their graduate work in planning at the University of Oregon.

Application Materials

Interested applicants begin the application process by creating an account at https://gradweb.uoregon.edu/online_app/application/guidelines1.asp. The application process include submission of each of the following components:

1. A résumé summarizing education and professional experience.
2. A statement, organized into four questions related to: interest in Why are studying community and regional planning, interest in the University of Oregon, professional goals, and what you hope to accomplish. There is an optional prompt to share any personal challenges, barriers, or hardships you faced.
3. At least three letters of recommendation from people familiar with the applicant's ability to pursue graduate-level studies in planning unofficial transcripts from all prior undergraduate and graduate institutions in your online application.
4. You must have official transcripts from all colleges or universities where you received a bachelor's degree and all subsequent degrees. Find more information at <https://gradschool.uoregon.edu/admissions/how-to-apply/transcripts> (<https://gradschool.uoregon.edu/admissions/how-to-apply/transcripts/>). Graduate Record Examinations (GRE) scores are optional. If submitted, they are considered along with other application materials.
5. Demonstration of English language proficiency. International students should visit <https://gradschool.uoregon.edu/admissions/how-to-apply/english-proficiency> to review the options to demonstrate proficiency.

Applications are accepted beginning late September for admission the following fall term. The priority deadline for receipt of the application to the program is February 1. Applicants are notified of admission decisions in late February. Applicants may be accepted later in spring as space permits.

Program Learning Outcomes

The MCRP Program is accredited by the Planning Accreditation Board (PAB). The program learning outcomes relate to three key areas of knowledge, skills, and values in these eight categories:

- Planning knowledge: Describe and explain the purpose and meaning of planning, planning theories, principles, and practices. Students should be able to synthesize planning knowledge for the purpose of evaluating and describing, explaining, and arguing for different approaches in their future professional practice.
- Application of planning knowledge: Select relevant theory and knowledge to inform planning practice and tailor the application to the appropriate context by working with external clients on real-world projects.

- Substantive knowledge: Illustrate substantive and technical expertise in a specific field of interest.
- Methods: Apply appropriate quantitative and qualitative research methods to collect, analyze, and interpret data relevant to planning, and use the information to make informed decisions and recommendations.
- Communication: Demonstrate ability to communicate with expert and non-expert audiences through written, oral, and graphic methods.
- Teamwork: Collaborate effectively with interdisciplinary teams in planning and implementation processes.
- Ethics: Analyze, reflect, and develop a personal code of ethics or values system related to the ethical principles of the planning profession (AICP Code of Ethics).
- Planning impact: Recognize and assess power structures within institutions and policies that intersect with planning. Develop and test strategies for changing these institutions and policies to lead to more socially, economically, and environmentally just outcomes.

The Planning Curriculum

A total of 72 credits beyond the bachelor's degree is required for the MCRP degree. Core courses must be taken for letter grades, unless offered pass/no pass only.

Students are expected to enroll for six terms with an average course load of 12 credits a term. During the summer, students are encouraged to engage in planning work through external and internal internships. Students who have successfully completed the two-term Community Planning Workshop are eligible to apply for paid internships with the Institute for Policy Research and Engagement. Successful applicants will continue to provide support for planning projects across the state, gaining valuable experience and professional connections. Many students also pursue internships outside of PPPM (with governments, nonprofits and private planning firms). Internships are not required as part of curricular requirements for MCRP students.

PPPM 625	Community Planning Workshop	
PPPM 626	Community Planning Workshop	
FIELD OF INTEREST (25 credits)		25
Total Credits		72

Community Planning Workshop

A distinctive feature of the planning graduate curriculum is the Community Planning Workshop, an applied research and service program that is required for first-year students. Students work on six month planning projects in small teams supervised by program faculty members and second year graduate students in planning. Clients have included federal, state, county, and local governments as well as nonprofit organizations.

Projects typically focus on issues of immediate environmental, social, and economic importance to the client group and the general public. Recent project topics include

- Citizen involvement in planning process
- Housing needs analysis
- Land-use planning
- Natural hazards mitigation
- Program evaluation
- Strategic plans for communities and regions
- Tourism and recreational development
- Watershed planning

Each year, first-year graduate students enrolled in Community Planning Workshop (PPPM 625) and Community Planning Workshop (PPPM 626) complete five to 10 planning projects. Final written reports, prepared by each student team, provide evidence of the students' expertise and ability to conduct planning research and to prepare and present high-quality professional reports. After completing Community Planning Workshop (PPPM 625) and Community Planning Workshop (PPPM 626), selected students may continue to engage in planning research projects for compensation. The popularity of the program with students—and with government and private-sector clients—has enabled the Community Planning Workshop to provide research support for five to 15 students a year.

Federal grants and support from a variety of state agencies have helped the Community Planning Workshop become one of the most successful community planning assistance programs in the nation. Projects have received numerous state and national awards.

Nonprofit Management (MNM)

The master of nonprofit management (MNM) is a comprehensive professional degree that prepares students for executive leadership of nonprofit and philanthropic (grant-making) organizations.

Due to the astonishing growth of the nonprofit sector over the past 30 years in the U.S. and the equally rapid growth of nongovernmental organizations internationally, the sector has professionalized. Nonprofit

employers now seek master's degree graduates with specialized training that will allow them to propel their organization forward.

This degree is distinct from a master of business administration and a master of public administration due to the nonprofit sector's unique funding and management structures. For example, multiple revenue streams require expertise in sources such as membership, capital campaigns, government contracts, grants, crowdfunding, and income from entrepreneurial ventures.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Synthesize foundational concepts and theories in nonprofit leadership and management: Students will learn and apply the leading theories and evidence-based best practices surrounding organization management and governance to written assignments and in hands-on applied projects.
- Develop critical thinking skills to ethically manage, govern and lead nonprofit and philanthropic organizations: Through the use of discussions, current events, case studies and real-world examples, emerging leaders will develop the skills necessary to consider and critically analyze multiple perspectives and sources of information.
- Learn how to best develop and steward nonprofit financial and human resources: Through a series of courses focused on management, students will learn and apply skills necessary to fundraising, financial management, grant writing, working with under-served populations and volunteer management.
- Apply learned competencies to real-world organizational challenges: Students will develop professional expertise and demonstrate competence by partnering with local organizations throughout the program, including serving as a member of a board of directors, completing a capstone project with an organization, and engaging in other coursework on strategic planning, project management, philanthropy and grantmaking, grant writing, and an internship placement, among others.
- Articulate individual aspirations in nonprofit professional practice to address broader societal needs and outcomes: In PPPM students become change agents and problem solvers. Students have opportunities to comprehensively explore their personal and professional goals through coursework, internships, one-on-one advising with instructors and faculty leaders. The flexible curriculum also allows students to take electives across campus in various fields of interest important to them.

Nonprofit Management

The master of nonprofit management (MNM) is a professional degree designed to train students to lead nonprofit organizations. Due to the growth of the nonprofit sector over the past three decades in the US and the growth of nongovernmental organizations internationally, the sector has professionalized. People currently working in the nonprofit sector and others seeking to switch to or enter the nonprofit sector now seek master's-level training to advance their careers, specializing specifically in the administration of nonprofit organizations.

Critical skills for nonprofit administration are common to all nonprofit fields, including handling financial management challenges and tax-exempt reporting structures, raising funds from individual donors and institutions, and managing a mission-oriented workforce.

Unique Aspects of the Program

The program melds relevant best-practice elements from the business and government sectors with the management imperatives of the nonprofit and philanthropic sectors. Woven into the course work are opportunities to obtain practical experience at nonprofit organizations, so that participants in the program have significant administrative experience upon graduating. Examples include the review and consultation portion of the Fundraising for Nonprofit Organizations (PPPM 581) course, the nine-month board membership required for the Nonprofit Board Governance (PPPM 687) course, and the projects student teams complete for nonprofit organizations in the Nonprofit Consultancy (PPPM 688) course.

Students may combine the master of nonprofit management with another graduate degree from within the department or from other academic units across campus. In most cases, a student is able to obtain two master's degrees within three years. The normal time to completion for the master of nonprofit management degree is six terms (two years).

Application Procedures

To be eligible for the master of nonprofit management, an applicant must hold a bachelor's degree. The department strongly encourages applications from people of all backgrounds, and is dedicated to fostering a diverse academic environment.

The priority application deadlines are due February 1 for students entering the program in the following fall, although we also allow applications on a rolling basis as space permits. The online application requires the following (please follow the detailed checklist available on the department website):

- Official transcripts from undergraduate college or university, and from graduate study, if applicable
- GRE or GMAT scores (optional)
- TOEFL or IELTS scores for nonnative English speakers
- A personal statement, organized into four questions related to: your interest in studying nonprofit management, your interest in the University of Oregon, professional goals, and what you hope to accomplish. There is an optional prompt to share any personal challenges, barriers, or hardships you faced.
- Comprehensive employment and education résumé
- Three recommendation letters from those who can best speak to your preparation for graduate school and leadership in the nonprofit sector. At least one should be from a faculty member, but for those with extensive work experience three professional letters are also appropriate
- University of Oregon online graduate admission application

Nonprofit Curriculum

After completion of the core curriculum (33 credits focusing on financial, management, and revenue-development skills), students complete an internship and 20 credits of concentration electives. Students complete a management-based capstone sequence that culminates in successful completion of a consulting project for a nonprofit organization. The two-year program takes 70 credits to complete.

Master of Nonprofit Management Requirements

GLBL 522	Aid to Developing Countries
Other course (with MNM faculty advisor approval)	
Total Credits	70

¹ Completing a nonprofit internship (3 credits) is highly recommended for all MNM students, and required for those with fewer than two years of relevant professional experience.

² Courses must be approved by an advisor and should focus on a specific field of interest such as policy, community development planning, environmental sustainability, international development, marketing and development, arts management, public advocacy, and education and social services. More options for course work may be found online (<https://pppm.uoregon.edu/grad/master-of-nonprofit-management/>).

Accelerated Master's of Nonprofit Management

This 5-year Accelerated Master's degree program enables students who graduate with a Major in PPPM or Minor in Nonprofit Administration to add one additional year of coursework to earn a Master's of Nonprofit Management degree. University of Oregon is one of the few universities in the world with a master's degree fully dedicated to professional training for executive leadership of nonprofit organizations. Graduates are in high demand, and pursue remunerative and rewarding careers.

Many of our undergraduates choose to pursue graduate work in nonprofit management, but often not at the UO since there is a significant amount of course overlap between our undergraduate and graduate offerings. This program will allow highly qualified and motivated undergraduates to stay with us for one additional year and earn a Master's degree.

This is a 4+1 program as envisioned by much the materials and guidance for an accelerated master's program. Students will take 15 credits in master's-level coursework their senior year. They will take an additional 45 minimum graduate study credits (500+ courses) for graduate students seeking a master's degree in their 5th year.

Public Administration (MPA)

The master of public administration (MPA) is a two-year program for people interested in public service careers that address the critical social, economic, and environmental issues of our time. The curriculum is designed to provide a combination of academic theory, analytic skills, and real-world applications so that students become effective and creative leaders in public service.

A central focus of the program is to prepare students to become evidence-based policymakers, analysts, and managers. Evidence-based policy making—the idea that the formulation of policy and its implementation should be based on evidence of effectiveness—has gained widespread acceptance in the policy community, both in the United States and abroad, and requires a closer connection between research and practice. It requires that researchers ask policy-relevant questions and conduct meaningful and timely analyses that support the decision-making process; conversely, it requires that policymakers, managers, and leaders think critically about research and integrate appropriate evidence in the implementation and formulation of policy and practice.

Recent graduates work as advisors, policy analysts, and strategic planners in all levels of government, in Oregon, throughout the US, and around the globe. Their work addresses the full range of social issues, from improving health-care access, increasing government efficiency, and responsiveness to creating new governmental structures in developing democracies. Graduates also work in a broad range of

nonprofit organizations, for instance, as executive staff members in social service, arts, and environmental organizations.

The State of Oregon is an exciting place to study public administration. As a "laboratory of democracy," it has a long and distinguished record of policy innovation. Most recently, Oregon has been on the forefront of advances in land-use, health-care, and environmental policy.

Unique Aspects of the Program

The size of the program means that master's students at the University of Oregon receive a tremendous amount of individual attention, particularly in the second year when they conduct a team-based policy research project. The close, collegial working relationships between students and instructors means that faculty members are often able to help students attain relevant alumni contacts, internships, and job opportunities.

Since the department also houses a master's degree program in community and regional planning (MCRP), master of public administration students benefit from additional faculty and planning-related course offerings. In particular, students are invited in their first year to enroll in a two-term, field-based course—Community Planning Workshop (PPPM 625)—in which students consult on a topical issue for a local government or nonprofit agency in Oregon.

Students interested in a career in nonprofits can earn a certificate in nonprofit management concurrently with their master of public administration. The certificate program offers innovative courses including one on board governance, in which students serve on a nonprofit board, and another on philanthropy, in which students award a \$15,000 grant to a local agency. As an alternate, students may complete both the MPA and MNM degrees concurrently. See a member of the department staff for application procedures for concurrent programs.

Oregon is known for its progressive policy making, from the Bottle Bill, to vote-by-mail, to current efforts in health-care reform. Students find policymakers and public managers unusually accessible for consultation in Oregon.

The program prepares participants to become effective, creative leaders in the public and nonprofit sectors. The curriculum provides a combination of substantive knowledge, analytic skills, and professional experience that primes students for careers as evidence-based policymakers, analysts, or managers.

Application Procedures

To be eligible for the graduate program in public administration, an applicant must hold a bachelor's degree.

Submit the following documents, which must be received by February 1:

1. Graduate Admission Application, available online—follow the instructions on the department's website
2. Comprehensive employment and education résumé
3. A two-page, typed statement of purpose that clearly describes the applicant's reasons for pursuing graduate study in the program at Oregon, his or her professional goals and objectives, and professional work experience
4. Transcripts of grades in courses taken for the bachelor's degree and of any other college-level work. They should be sent directly by the institution that awarded the course credits
5. Three letters of recommendation
6. The Graduate Record Examination is optional for admission

7. Applicants whose native language is not English must supply results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination. The minimum acceptable TOEFL score for admission is 575 (paper-based test) or 88 (Internet-based test); the minimum acceptable IELTS exam score is 7.0. The results of the examination should be sent to the Office of Admissions, 1217 University of Oregon, Eugene OR 97403-1217

Students are selected for the program based on a combination of their undergraduate academic performance, intellectual aptitude, commitment to public service, and written statement. The deadline for receipt of fall term admission is February 1. Applications received after the deadline will be considered on a rolling basis as space allows.

The department strongly encourages applications from people of all backgrounds, and is dedicated to fostering a diverse academic environment. This, we believe, will help prepare better future public leaders.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Leadership:** Graduates will demonstrate effective leadership skills in managing and leading public and nonprofit organizations. This includes skills in decision-making, communication, and strategic planning and management.
- **Policy:** Graduates will be able to develop, implement, and evaluate public policies that are evidence-based, data-driven, and responsive to the needs of the community.
- **Analytical Skills:** Graduates will be able to use qualitative and quantitative methods to analyze complex public problems and to evaluate the effectiveness of various programs and initiatives for the purposes of decision-making in a complex and dynamic environment.
- **Public Service:** Graduates will understand the role of public servants as stewards of public resources, responsible for ensuring that government programs and services are effective, efficient, and equitable. They will understand the importance of emphasizing service to the community and the greater good, rather than individual or organizational interests.
- **Diversity:** Graduates will understand and appreciate the diversity of people, cultures, and ideas in the public and nonprofit sectors. They will be able to develop policies and programs that address the needs and concerns of diverse communities, and promote inclusion, equity, and social justice.

Master of Public Administration Requirements

Code	Title	Credits
CORE COURSES (33 credits) ¹		
PPPM 618	Public Sector Theory	4
PPPM 628	Public Sector Economics	4
PPPM 629	Public Budget Administration	4
PPPM 633	Public Management	4
PPPM 636	Public Policy Analysis	4
PPPM 656	Quantitative Methods	5
PPPM 657	Research Methods in Public Policy and Management	4

PPPM 684	Public and Nonprofit Financial Management	4
FIELD OF INTEREST (28 credits minimum)		
plus 24 credits from elective courses focused on a specific field of interest ²		24
PPPM 623	Professional Development	1
PPPM 604	Internship: [Topic] ³	3
APPLIED RESEARCH PROJECT (11 credits)		
PPPM 637	MPA Policy Analysis Project	1
PPPM 638	MPA Capstone Applied Research Project I	5
PPPM 639	MPA Capstone Applied Research Project II	5
Total Credits		72

¹ Must be taken for letter grades.

² Interest areas may include: policy, public management, nonprofit management, planning, environmental policy, or other field of interest. A list of potential courses for each field of interest is available on the department's website. Students who would like to develop their own field of interest are able to do so in consultation with a faculty advisor. Recent graduates have created customized fields of interest in food sufficiency, health policy, and international development.

³ Completing an internship (3 credits) is highly recommended for all MPA students, and required for those with fewer than two years of relevant professional experience.

The master of public administration (MPA) program provides students with two key opportunities to synthesize classroom learning and apply their research skills to current policy and management issues. At the start of the second year, students engage in a policy project intended to simulate the real-world environment where analysts and managers are given short time frames to research a topic that they know little or nothing about. Over forty-eight hours, students read relevant policy and research documents, write a memo detailing the evidence base and key issues, and give an oral presentation. The project takes place the week before fall courses begin, and incoming first-year students have the opportunity to view the presentations as part of their orientation to the program. This component of the curriculum is a signature event and rite of passage each fall.

Students also enroll in a two-term project sequence that serves as the synthesizing capstone of the curriculum. Over winter and spring terms of the second year of study, students work on real-world or simulated real-world projects that require conducting in-depth needs assessments, evaluations, cost-benefit analyses, or other applied research. A faculty member works closely with student groups on these projects over the two terms. Past projects have included a survey for a state commission to gauge attitudes among key shareholders on potential policy change, an analysis of administrative data on the impact of a post-policy implementation on Oregonians, and an examination of three potential communities for a nonprofit's expansion.

Planning and Public Affairs (PhD)

The UO PhD program in Planning and Public Affairs trains students to conduct rigorous, original research to inform scholarship, policy, and practice. Students must have a Masters degree in a related field to be admitted to the program;. Key aspects of our program include:

- **Innovative:** Focused around research groups working to address key societal issues with a high potential for academic employment
- **Interdisciplinary:** Flexible structure allows students to access a range of disciplines across our School and the University
- **Engaged:** Draws upon our international reputation of engaged teaching and scholarship in collaboration with agencies, cities, and communities
- **Inclusive:** Builds on our dedication to equity and inclusion and our diverse faculty

Each admitted student must choose a primary disciplinary track, which can be fulfilled with a previous graduate degree or coursework at Oregon.

1. Community and regional planning
2. Nonprofit management
3. Public administration and public policy

The program focuses on three, cutting-edge research areas that are strengths among the PPPM faculty. Students work with advisors based in these research groups, and may also engage with other faculty across campus:

- **Sustainable Cities and Transportation:** Analyzing the emerging trends related to technology and cities such as: land use, urban form, street design, new mobility, active transport, micromobility, public policy, and public budgeting/finance.
- **Access and Equity:** Issues of access, equity, social justice, representation, and power for under-represented and under-served communities. This work crosses planning, community engagement, community development, urban design, non-profit management, and public policy disciplines
- **Nonprofit, Philanthropic and Social Enterprise:** Innovative trends related to management, arts and cultural leadership, philanthropy and social enterprise. This work focuses in particular on issues such as social entrepreneurship, high impact philanthropy and the economics of nonprofit organizations

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop expertise in a disciplinary track for future research and teaching, while also developing in depth knowledge in a chosen concentration area(s) for the purpose of informing future scholarship, policy, and practice.
- Acquire and master a range of skills in research methods appropriate to a discipline and concentration area.
- Practice different pedagogical skills in a range of contexts, while being able to articulate a research based pedagogical philosophy and applied framework.
- Acquire and develop a range of professional skills for an academic and/or research career.
- Cultivate hard and soft skills to engage with communities and clients as partners.
- Practice and refine writing skills for publications and grant proposals.

Planning and Public Affairs Major

Code	Title	Credits

- ¹ Approved by the student's Pre-Dissertation Advisory Committee based on field of study.
- ² Disciplinary Track coursework must be approved by the student's Pre-Dissertation Advisory Committee.
- ³ Academic Career Development: may also substitute PS 602/608 teaching and professionalization seminars (or equivalent class with approval)

Nonprofit Management Graduate Certificate

The objective of our Graduate Certificate in Nonprofit Management is to prepare you for leadership positions in nonprofit and philanthropic (grant making) organizations. The curriculum, which centers on technical skills specific to the nonprofit and philanthropic sectors, is designed to develop the skills necessary to manage and lead financially stable, innovative, and effective organizations.

Opportunities for nonprofit managers with specialized skills have expanded sharply. Currently, approximately 8% of the U.S. total employment is in the nonprofit sector. Recent graduates serve in all nonprofit sectors in a variety of leadership positions.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Develop and steward nonprofit financial and human resources.
- Ethically manage, govern, and lead nonprofit and philanthropic organizations.
- Synthesize foundational concepts and theories in nonprofit management and leadership.
- Apply learned competencies to real-world nonprofit sector challenges.

Graduate Certificate in Nonprofit Management Requirements

The graduate certificate in nonprofit management prepares students for leadership in the nonprofit sector. The focused curriculum develops specific skills that are critical for success in managing nonprofit organizations.

Phenomenal growth in assets and activities of the nonprofit sector over the past two decades have led to career opportunities in the many areas of the nonprofit sector, including cultural and arts organizations, education, health care, human services, international development, and advocacy organizations. Nonprofit enterprise has broadened with developing sources of funding, and the complexities of its management require professional skills specific to the nonprofit sector.

Code	Title	Credits
Core Courses		
PPPM 522	Grant Proposal Writing	1
PPPM 581	Fundraising for Nonprofit Organizations	4
PPPM 680	Managing Nonprofit Organizations	4

PPPM 684	Public and Nonprofit Financial Management	4
Internship and Electives ¹		
Select three or more credits of elective course. Examples include: ¹		3
PPPM 525	Project Management	
PPPM 526	Strategic Planning for Management	
PPPM 565	Program Evaluation	
PPPM 583	Volunteer Resource Management	
PPPM 586	Philanthropy and Grant Making	
PPPM 587	Impact Philanthropy	
PPPM 588	Nonprofit Legal Issues	
PPPM 610	Experimental Course: [Topic]	
PPPM 685		
PPPM 686	Nonprofit 48-Hour Charrette	
PPPM 687	Nonprofit Board Governance	
PPPM 688	Nonprofit Consultancy	
PPPM 604	Internship: [Topic] ²	6
Total Credits		24

¹ Elective credits may be taken in other departments. Information about the many nonprofit elective courses or waiver of required courses is available from the program director.

² Students wishing to complete the certificate must complete an internship and 5 elective credits **or** take 11 credits of nonprofit-relevant elective courses. Students who have no significant work experience in the nonprofit sector are strongly recommended to complete an internship by enrolling in 6 credits of Internship: [Topic] (PPPM 604).

College of Education

<http://education.uoregon.edu>

Laura Lee McIntyre, Dean

230 HEDCO Education Building
1215 University of Oregon
Eugene, OR 97403-1215
541-346-7452

Preparing Educators in the 21st Century

The College of Education's academic majors are organized into three departments: counseling psychology and human services; education studies; and special education and clinical sciences.

The college offers undergraduate, master's, education specialist, and doctoral degrees and preparation for licensure, programs that link instruction to current research findings and pedagogical practices and to the needs of the educational community, ensuring students are prepared for collaborative practice in the field of education and related services. Students become active learners as they accumulate an understanding of disciplinary content and develop professional knowledge and skills that prepare them for careers in education or the social services. Surveys of graduates from the College of Education indicate that the overwhelming majority are successful in securing employment or continuing their professional preparation in their chosen field.

With school, community, and clinical partners, the college's nationally prominent teaching and research faculty offers opportunities for student practicum and field-based experiences in professional settings where effective policy and practice is created and then implemented.

Academic, research, and outreach service units provide integrated and cross-disciplinary learning experiences that help students acclimate to their professions, develop initial competence, acquire advanced proficiency, and become practicing professionals and scholars.

The College of Education is ranked by *US News and World Report* as one of the nation's top colleges of education (14th nationally in the 2018 rankings). Its scholarship, teaching, and practical learning opportunities offer students a respectful and affirming climate, a culture of belonging, and an inclusive learning environment.

Faculty

Julie Alonzo, teaching professor and research associate professor (teacher professional development, leading for equity, response to intervention); BA, 1990, Carleton College; PhD, 2007, Oregon. (2007)

Nancy Golden, professor of practice (leadership, equity, public policy). BS, 1973, Denver; MS, 1974, PhD, 1987, Oregon. (2015)

Sheree Jederberg, teaching professor (school leadership & practice, whole school systems reform, curriculum and instruction, public policy); BS, 1979, California San Diego; BA/MA, 1989, San Diego State; MA, 1991, San Diego State; Ed.D., 2006, Southern California. (2021)

Cengiz Zopluoglu, associate professor (latent variable modeling, longitudinal data analysis, statistical computing). BA, 2005, Abant Izzet Baysal; MA, 2009, PhD, 2013, Minnesota. (2020)

Emeriti

Gerald K. Bogen, professor emeritus. BA, 1959, Western Washington; MS, 1961, DEd, 1963, Oregon. (1961)

Michael D. Bullis, professor emeritus. BPE, 1973, MS, 1978, Purdue; PhD, 1983, Oregon. (1995)

David T. Conley, professor emeritus. BA, 1972, California, Berkeley; MA, 1983, PhD, 1986, Colorado, Boulder. (1989)

C. H. Edson, associate professor emeritus. BA, 1964, California, Berkeley; MA, 1970, Oregon; PhD, 1979, Stanford. (1973)

Arthur C. Hearn, professor emeritus. AB, 1934, MA, 1937, EdD, 1949, Stanford. (1950)

John E. Lallas, professor emeritus; executive dean emeritus. BA, 1947, Washington (Seattle); BA, 1952, Western Washington; EdD, 1956, Stanford. (1957)

Philip K. Piele, professor emeritus. BA, 1957, Washington State; MS, 1963, PhD, 1968, Oregon. (1967)

Richard A. Schmuck, professor emeritus. BA, 1958, MA, 1959, PhD, 1962, Michigan. (1967)

Joseph Stevens, professor emeritus. BA, 1974, MA, 1976, PhD, 1983, Arizona. (2005)

Gerald Tindal, professor emeritus. BA, 1975, PhD, 1982, Minnesota. (1984)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Graduate

Major - Master's Degree

- Educational Leadership (MEd) (p. 517)

Major - Education Specialist Degree

- Educational Leadership (EdS) (p. 518)

Major - Doctoral Degree

- Educational Leadership (DEd) (p. 520)

Other programs are listed under Counseling Psychology and Human Services, Education Studies, or Special Education and Clinical Sciences.

Educational Leadership (MEd)

Please see M.Ed. in Educational Leadership Program website (<https://education.uoregon.edu/edld/graduate/mef/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Use tangible skills that are immediately useful in using and understanding educational research and its application to problems of practice in a variety of educational settings.
- Apply data-driven methods and strategies to develop, implement, evaluate, and research educational programs.

Educational Leadership (EdS)

APPLICATION INSTRUCTIONS (for publication on the UO website)

Complete the online Graduate Admission Application (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp); select the Educational Leadership (EDLD) program within the College of Education.

Nonrefundable Application Fee: \$70 (Domestic Students)/\$90 (International Students), paid by credit card or eCheck. You will need to pay the application fee before you are able to submit the application.

Fee Waivers

Students who are applying to multiple graduate programs at the UO need to start the applications, pay the first application fee, and then contact the Division of Graduate Studies with a request for a fee waiver.

Students who have been admitted previously to the UO Division of Graduate Studies and have registered for credits the term they were admitted should still fill out the Admissions Application. The form will ask if you have ever enrolled as an admitted graduate student at the UO; saying yes to this will automatically waive the application fee.

You will be required to upload the following documents in the Slate application:

References or Letters of Recommendation

Three references are required for applicants

- As part of your online application, you will be asked to provide contact information for individuals who can help determine your potential for success in a graduate program.
- Individuals who have had previous opportunities to supervise or evaluate your work are the best candidates to write these letters.
- Upon submission of a completed application, Slate will email a request and instructions to referees to log in to the Slate system and provide their answers to a series of questions and optionally upload supplemental letters of recommendation.

- These references must be received before the deadlines for applications to close.
- We encourage you to list additional references to ensure you get the minimum number required.

Goal Statement

- Please write and upload a goal statement that answers the following:
 - Why are you applying for this program?
 - Address your current or future employment:
 - How would this degree/experience further your career aspirations?
 - How does your interest align with faculty and research centers at the UO?
- Your goal statement is a key document in the application process. It is your opportunity to describe your purpose in pursuing a graduate degree in education.
- Your statement should discuss any personal skills and experiences that explain your aspirations for graduate study, and how your work, experience, and goals are directly related to the expertise of the faculty.
- Successful applications reflect alignment between potential program of study and the expertise of the faculty in supporting this program of study.

Résumé or Curriculum Vitae

Your vitae should include the following information, beginning with most recent education, including degree and institution (with dates of graduation):

- Work experiences in education
- Presentations at conferences or workshops
- Publications, if any
- Organizational affiliations
- Any other relevant professional information

Writing Sample

Applicants submit a writing sample describing a problem of practice that warrants change. Your writing should address:

- What is being done that is either incomplete, incorrect, or ill-informed and could benefit from change in practice?
- Describe the problem in sufficient detail to understand the context and setting as well as the manner in which this change could/should occur (e.g., deploy professional development, consider experimentation, improve communication systems, etc.).
- Address the relevant targeted group (students, teachers, parents, administrators, school boards, state departments, etc.) and how this change would benefit them.
- Finally, in your analysis, cite the scholarly literature that supports your analysis.

In addition to the writing sample above, students have the option to submit one or more additional samples of scholarly writing (e.g., course papers, articles, essays).

Official Transcripts

At the time of application, applicants must submit unofficial transcripts from all colleges or universities previously attended, including the University of Oregon. Unofficial transcripts are uploaded as part of the online application.

Unofficial transcripts should show all coursework taken to date and, if applicable, the title of the degree earned and the date the degree was conferred. Applicants must provide English translations if the documents are issued in a language other than English.

Applicants who accept their offer of admission and matriculate must submit official transcripts from all colleges or universities from which they received a bachelor's degree or higher. Official transcripts received will be compared to the unofficial transcripts submitted as part of the application. If unofficial transcripts are later determined to be a forgery, or, if official transcripts are not submitted, your admission will be rescinded. Transcripts must show the title of the degree earned and the date the degree was conferred. Students admitted with in-progress coursework or requirements for bachelor's level degrees must have their degree conferred prior to the beginning of their term of admission at UO. Transcripts are subject to review and verification of authenticity.

In cases where documents are not issued in English, applicants must submit certified word-for-word English translations of all documents.

Mail to:

Office of the Registrar

5257 University of Oregon

Eugene, OR 97403

International Students

International students must provide the Registrar's Office with a copy of their official transcript in both the language of origin and in an officially recognized translated English version. Please read about special instructions for international transcripts. (<https://gradschool.uoregon.edu/admissions/how-to-apply/transcripts/>)

- International students should add an additional six weeks before application deadlines to accommodate the processing of additional required paperwork.
- Copies of official TOEFL or IELTS score sheets or an explanation must be uploaded as "Additional Documents" to your Slate application, and official copies sent to UO Admissions.
- International students should also visit the Division of Graduate Studies and follow the instructions listed there to submit additional requirements.
- Additional information and support can be found at UO International Student and Scholar Services.

Vaccination Requirements

Students will be required to meet the University of Oregon's current policies on vaccinations prior to being allowed to enroll in courses each term.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Mission, Vision, and Improvement
- Ethics and Professional Norms
- Equity, Inclusiveness, and Cultural Responsiveness
- Learning and Instruction
- Community and External Leadership
- Operations and Management
- Policy, Governance, and Advocacy
- Internship

SPED 528	Special Education Law	3
EDLD 604	Internship: [Topic] (Professional Administrator Licensure Clinical Internship) ¹	7
Total Credits		45

¹ Students must complete a minimum total of 7 credits of EDLD 604. This fulfills requirements for the Oregon Professional Administrator license. Candidates seek licensure through TSPC with UO/COSA's assistance once all coursework is completed. The Clinical Internship experience is a total of 7 credits and requires a minimum of 200 hours of meaningful district-level experiences distributed across the District Level National Educational Leadership Preparation (NELP) standards. A University internship supervisor and a district-based supervisor form the supervision team for each candidate. All University Internship Supervisors are highly qualified and experienced Oregon administrators, and all District-Based Supervisors must have held an Oregon Administrator license for at least three years. During the Internship experience, candidates are engaged in reading, discussion board posts and job-embedded assignments.

Educational Leadership (DEd)

Application and Admission

The department follows general university policy in its admission procedures. Students who transfer to the university from other institutions must meet UO entrance requirements. Information about admission to degree and licensure programs is available from the Program's and College of Education's websites, as well as from the Program's Academic Program Coordinator.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Synthesize research literature to evaluate the strengths and weaknesses of educational programs, interventions, and policies.
- Evaluate educational outcomes through an equity lens, with a particular focus on disproportionality.
- Conduct original research related to a problem of practice using quantitative, qualitative, or mixed methods approaches.
- Articulate the leadership qualities that foster the improvement of educational institutions (e.g., classrooms, schools, school districts).
- Communicate clearly and professionally in writing and oral presentations.

Counseling Psychology and Human Services

Leslie Leve, Department Head

240 HEDCO Education Building
541-346-9148

Programs in the Department of Counseling Psychology and Human Services educate and train professionals in counseling psychology, couples and family therapy, prevention science, and family and human services. Students are trained to effectively identify, prevent, and treat psychological and public health problems in children, adolescents, adults, and families. At the doctoral level, students extend scientific knowledge through research in collaboration with faculty mentors. Field placements, practicum placements, and internships at all levels of training provide students with opportunities to practice in schools, community agencies, and clinical and research settings under the supervision of faculty members, agency personnel, and collaborating scholars.

Faculty

- Tiffany Brown, teaching professor (self-harm, family dynamics of addiction, collegiate recovery communities). BS, 2002, MEd, 2005, Oregon; PhD, 2009, Texas Tech. (2011)
- Elizabeth Budd, Evergreen associate professor (early chronic disease prevention, physical activity and healthy eating promotion, adolescent and community health). BS, 2005, Santa Clara; MPH, 2009, Saint Louis; PhD, 2016, Washington (St. Louis). (2016)
- Krista Chronister, professor (domestic violence, career counseling, community intervention). BS, 1996, Florida; MS, 2000, PhD, 2003, Oregon. (2003)
- Jessica Cronce, associate professor (health and risk behaviors among young adults, individual-focused prevention). BS, 1999, Washington (Seattle); MS, 2005, MPhil, 2006, PhD, 2009, Yale. (2015)
- Dave DeGarmo, research professor (prevention science methodology, longitudinal analysis, fathers and parenting). BA, 1987, Lock Haven; MS, 1989, PhD, 1993, Akron. (2013)
- Jennifer Doty, associate professor (adolescent behavioral health, technology, prevention science). BA, 1997, Brigham Young; MS, 2003, Northern Illinois; PhD, 2015, Minnesota, Twin Cities. (2022)
- Wendy Hadley, Julie and Keith Thomson Faculty Chair and HEDCO Clinic Director, professor (adolescent sexual and substance use risk prevention, adolescent obesity, technology interventions). BS, 1994, University of Florida; MS, 2000, PhD, 2003, University of Memphis. (2019)
- Cindy Huang, associate professor. BA, 2005, MA, 2007, San Diego State; PhD, 2012, Oregon. (2024)

Nichole Kelly, Evergreen associate professor (obesity prevention and adolescent health, eating disorders, health promotion). BS, 2004, Virginia; PhD, 2013, Virginia Commonwealth. (2016)

Atika Khurana, professor (adolescent development and risk-taking, self-regulation and executive functions, family and ecological influences). BS, 2003, MS, 2005, Panjab; PhD, 2009, Ohio State. (2012)

Jean Kjellstrand, associate professor (corrections-involved families, positive youth development, reentry and preventive interventions). BA, 1989, Carleton College; MSW, 1991, Wisconsin, Madison; PhD, 2009, Portland State. (2014)

Heather Leonard, lecturer (prevention science, media use, adolescence). BS, 1996, Utah State; MEd, 2018, PhD, 2023, Oregon. (2023)

Leslie Leve, Lorry Lokey Chair in Education, professor (foster care, adoption, prevention science). BA, 1990, California, Santa Cruz; MS, 1991, PhD, 1995, Oregon. (2013)

Ashley Linden-Carmichael, associate professor (young adult higher-risk alcohol and cannabis use, psychosocial risk factors, prevention science). BS, 2010, Central Michigan; MS, 2012, PhD, 2016, Old Dominion. (2024)

Benedict T. McWhirter, professor (adolescents at risk, college student development, connectedness). BA, 1986, Notre Dame; MC, 1988, PhD, 1992, Arizona State. (1997)

Ellen Hawley McWhirter, Ann Swindells Professor in Counseling Psychology (adolescent career development, empowerment, Latino youth academic success). BA, 1983, Notre Dame; MC, 1988, PhD, 1992, Arizona State. (1997)

Christopher J. Murray, professor (lifespan disability issues, special education). BA, 1989, University of Maryland, College Park; MEd, 1992, Howard; PhD, 1998, Washington, Seattle. (2006)

Kristin Perry, assistant professor (prenatal substance exposure, early childhood aggression, parental substance misuse). BA, 2013, Santa Barbara, California; MA, 2015, San Diego State; PhD, 2022, University at Buffalo, New York. (2024)

Elizabeth A. Stormshak, Philip H. Knight Chair; professor (prevention of delinquency, conduct problems, peer rejection). BA, 1988, Washington (Seattle); MS, 1992, PhD, 1995, Pennsylvania State. (1996)

Rachel Rochester, instructor (literacy, scholarly writing, grant writing). BS, 2007, Lesley; MA, 2011, Arizona State; PhD, 2018, Oregon. (2023)

Emily Tanner-Smith, Thomson professor (applied research methodology, meta-analysis, substance use and addiction). BS, 2003, Belmont; MA, 2007, PhD, 2009, Vanderbilt. (2017)

Jeff Todahl, associate professor (child abuse and neglect prevention, intimate partner violence, community engagement). BA, 1985, Western Washington; MS, 1989, Seattle Pacific; PhD, 1995, Florida State. (1999)

Karrie P. Walters, teaching professor (human services, child and family interventions, prevention and social justice). BA, 1996, North Texas; MA, 2001, Minnesota, Twin Cities; PhD, 2010, Oregon. (2010)

Emeriti

Sally Fullerton, professor emerita. BS, 1956, Oregon State; MA, 1960, Cornell; PhD, 1970, Oregon. (1970)

Weston H. Morrill, professor emeritus. BS, 1960, MS, 1961, Brigham Young; PhD, 1966, Missouri, Columbia. (1990)

Shoshana D. Kerewsky, teaching professor emerita. BA, 1983, Swarthmore; MA, 1990, Lesley; PsyD, 1998, Antioch, New England. (1996)

Janet Moursund, associate professor emerita. BA, 1958, Knox; MS, 1961, PhD, 1963, Wisconsin, Madison. (1967)

Anita Runyan, associate professor emerita. BS, 1956, Pacific Union; MS, 1968, PhD, 1972, Oregon. (1972)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Majors - Bachelor's Degree

- Family and Human Services (BA/BS) (p. 521)

Graduate Programs

Majors - Master's Degree

- Counseling, Family, and Human Services (MEd) (p. 529)
- Couples and Family Therapy (MS) (p. 530)
- Prevention Science (MEd) (p. 531)
- Prevention Science (MS) (p. 533)

Majors - Doctoral Degree

- Counseling Psychology (PhD) (p. 535)
- Prevention Science (PhD) (p. 534)

Specializations

- Spanish Language Psychological Service and Research (p.)

Family and Human Services (BA/BS)

Jen Doty, Program Director

340 HEDCO Education Building
541-346-3167
fhs@uoregon.edu

Students in the family and human services (FHS) program are committed to helping individuals improve their quality of life. Reflecting the complexity of community and social science sectors, FHS is interdisciplinary, drawing on the fields of psychology and counseling, social work, prevention science, public health, human development, and sociology.

Alongside like-minded peers, you'll analyze and create systems of community care for children and families. You'll learn how to help children and families develop effective ways to succeed in today's complex world, and you'll gain an understanding of evidenced-based interventions, prevention, and agency policy and practices.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Graduates will understand human services history, theories, basic social science methods, and their applications in practice.
- Graduates will be able to systematically analyze individual, family, and community needs; plan and implement appropriate strategies and services; and evaluate effectiveness of services.
- Graduates will develop interpersonal skills and awareness of their own values, personalities, power/privilege, biases, interpersonal styles and limitations.
- Graduates will have knowledge of the legal, ethical and professional standards of human service professions and demonstrate an ability to apply strategies for these standards in human service contexts.
- Graduates will understand risk and protective factors across all levels of the social ecological model that promote or inhibit human functioning and health equity, and they will incorporate this knowledge when engaging with individuals, families, communities, and policymakers.

Students who major in FHS must select one track area in which to complete additional coursework beyond a shared set of core courses.

- **Fundamentals (p. 522)** track
- **Prevention Science (PS)** track
- **Direct Service Intensive (p. 523) (DSI)** track

The Family and Human Services major offers three pathways for study. By default, all FHS students are admitted into the Fundamentals track and must apply to the Direct Service Intensive (DSI) or Prevention Science (PS) track if they choose one of those options.

Family and Human Services Major Requirements

Courses used to fulfill the major requirements must be passed with a letter grade of at least C- or a P* where pass/no pass is the only grading option for the course.

Fundamentals Track

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

In addition to required course work, those working toward all degrees listed below must participate in work or volunteer experiences related to human services and maintain a cumulative grade point average (GPA) of 2.50 or better.

Bachelor of Arts

- Fundamentals Track (p. 524)
- Direct Service Intensive Track (p. 525)
- Prevention Science Track (p. 526)

Bachelor of Science

- Fundamentals Track (p. 527)
- Direct Service Intensive Track (p. 528)
- Prevention Science Track (p. 529)

Counseling, Family, and Human Services (MEd)

The MEd program is not currently accepting new applicants into the program; however, this degree program may be an option for UO students already enrolled in a masters or doctoral program within the College of Education (e.g., the Counseling Psychology doctoral program or the Couples and Family Therapy MS program), should their career path change.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Professionalism and Ethical Conduct: Students will develop an understanding of professional conduct and ethical standards and will

demonstrate an ability to effectively apply their knowledge in clinical practice.

- **Scientific Inquiry and Critical Evaluation:** Students will develop an ability to critically evaluate the research literature and demonstrate an understanding of the relationship between research results and clinical decision-making.
- **Theoretical Foundations:** Students will gain an understanding of the core theoretical assertions of couples and family therapy and will critically assess their own systems-oriented theory of change.
- **Social Context and Diversity:** Students will develop attitudes that value human diversity, will practice culturally sensitive analysis and critical self-awareness when counseling diverse populations, and will demonstrate cultural competence in all professional activities.
- **Clinical Application:** Students will develop an understanding of the unique systemically oriented assessment and intervention competencies, will apply them effectively in practice, and will critically evaluate their own practice.

Objectives:

Professionalism and Ethical Conduct: Students will develop an understanding of professional conduct and ethical standards and will demonstrate an ability to effectively apply their knowledge in clinical practice.

Objectives:

- Students will gain knowledge of couples and family therapy legal, ethical and professional standards and will demonstrate an ability to apply decision-making protocols and strategies in clinical and research contexts.
- Students will investigate and clarify their beliefs and values regarding clinical practice and ethical decision making.
- Students will collaborate effectively with a variety of professionals, including for instance physicians, psychologists, social workers, family law specialists, teachers, school counselors, members of the legal system and clergy.

Scientific Inquiry and Critical Evaluation: Students will develop an ability to critically evaluate the research literature and demonstrate an understanding of the relationship between research results and clinical decision-making.

Objectives:

- Students will develop an understanding of core principles of quantitative and qualitative research methodology and will demonstrate an ability to critically evaluate the merits of a given study.
- Students will demonstrate an understanding of ethical issues associated with research, with particular emphasis on research with human subjects and social justice.
- Students will be able to describe their procedures for incorporating empirically supported and evidence-based literature in practice and will demonstrate an ability to critically evaluate this literature from a systemic framework.

Theoretical Foundations: Students will gain an understanding of the core theoretical assertions of couples and family therapy and will critically assess their own systems-oriented theory of change.

Objectives:

- Students will develop an understanding of systemic epistemologies and core systemic constructs.
- Students will demonstrate an ability to apply systemic constructs across settings with a range of populations, with particular emphasis on clinical assessment, diagnosis, intervention, and evaluation of practice.
- Students will understand the distinction between eclecticism and theoretical integration and will demonstrate an ability to create a coherent theory of change that integrates systems theory, communications theory, and the evidence-based, common factors and trans-theoretical literatures.

Social Context: Students will develop attitudes that value human diversity, will practice sensitive analysis and critical self-awareness when working with a range of populations, and will demonstrate respect for all persons and competence in all professional activities.

Objectives:

- Students will adopt a practice framework that incorporates critical consciousness, self-awareness, and knowledge of the relationship between diverse life experiences, human development, and the role of diversity of thought and perspectives in resolving conflict.
- Students will demonstrate an ability to critically evaluate the role of social context in understanding and resolving human conflict, including issues such as social class, power, privilege, oppression, sexism, and injustice.
- Students will thoughtfully incorporate their knowledge of social context and personal characteristics when conducting a clinical assessment, constructing interventions, and evaluating practice.

Couples and Family Therapy (MS)

Tiffany Brown, Program Director

240 HEDCO Education Building
541-346-0909
cft@uoregon.edu

This two-year program trains students as professional family therapists in preparation for state licensure. This intensive training combines a strong theoretical base in systemic therapy with applied clinical experience.

Students learn how to provide culturally sensitive and responsive therapeutic services and collaborate with providers from other disciplines across a variety of health-care settings.

The clinical practicum includes 350 client contact hours with 150 hours in relational systems and 100 hours of individual and group supervision. Supervision at the Center for Healthy Relationships involves live observation, participation in reflecting teams, and feedback on

audiovisual recordings of therapy sessions. In addition, students see clients at community agencies, clinics, and therapist practices. The Couples and Family Therapy Program is one of two programs in Oregon to be accredited by the Commission on Accreditation for Marriage and Family Therapy Education and approved by the Oregon Board of Licensed Professional Counselors and Therapists. Students with Spanish language proficiency also have the option to complete the Spanish language specialization in addition to the standard program of courses.

Application and Admission

Detailed admission policies and procedures for the couples and family therapy degree are available on the Couples and Family Therapy website: <https://education.uoregon.edu/cft/apply> (<https://education.uoregon.edu/cft/apply/>). Students are admitted fall term only. Completed applications must be received by the deadline published on the website for the following fall term. Only completed applications are reviewed for admission. Applicants are evaluated on the following:

1. Quality of work
2. Related work, background, or experience
3. Résumé or CV
4. Statement of purpose
5. Three letters of recommendation
6. An interview

Notices about disposition of applications are emailed by April 15.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Professionalism and Ethical Conduct: Students will demonstrate an understanding of professional conduct and ethical standards and will demonstrate an ability to effectively apply their knowledge in clinical practice.
- Scientific Inquiry and Critical Evaluation: Students will demonstrate an ability to critically evaluate the research literature and demonstrate an understanding of the relationship between research results and clinical decision-making.
- Theoretical Foundations: Students will demonstrate an understanding of the core theoretical assertions of couples and family therapy and will critically assess their own systems-oriented theory of change.
- Social Context and Diversity: Students will demonstrate attitudes that value human diversity, will practice culturally sensitive analysis and critical self-awareness when counseling diverse populations, and will demonstrate cultural competence in all professional activities.
- Clinical Application: Students will demonstrate an understanding of the unique systemically oriented assessment and intervention competencies, will apply them effectively in practice, and will critically evaluate their own practice.

Applicants must pass a criminal background check before they may enroll.

Prevention Science (MEd)

<http://education.uoregon.edu/prevsci> (<http://education.uoregon.edu/prevsci/>)

Heather Leonard, Program Director

240 HEDCO Education Building
541-346-0909
prevsci@uoregon.edu

The Prevention Science program provides training in the design, evaluation, and delivery of interventions aimed at reducing risk and enhancing protective factors in children, youth, and families, and building resilient communities.

Our strengths-based program is designed to produce prevention scientists capable of advancing healthy outcomes across a range of individuals, populations, and settings.

The one-year master of education (MEd) degree in prevention science is primarily intended for students who have completed a bachelor's degree in a prevention science–related discipline or have human development, psychology, education, or prevention science experience, are currently working in the profession, and wish to enhance their education to improve their career opportunities in the field. It is also intended for students who

wish to refocus their education from a non-science or non-education bachelor's background, such as a humanities undergraduate degree, to gain training and skill development relevant to prevention science, program evaluation, and research in the human services professions for future career or academic study interests. This program is also ideal for students who are considering pursuing doctoral study or additional applied master's training and wish to improve their content knowledge and research skills to make themselves more competitive for other, more advanced graduate programs.

Program Goals and Competencies

Goals

- 1. Graduates describe theoretical models, risk and protective factors, preventive interventions (especially evidence-based ones), and implementation practices related to prevention programs and policies
- 2. Graduates understand and adhere to the standards of knowledge for prevention science, including best practices in research design and methods, data analysis, interpretation, dissemination and rigorous ethical practice
- 3. Graduates commit to multicultural competence and enhancing human welfare in their scholarly work related to prevention science
- 4. Graduates display professionalism in their relationships with faculty and staff members, peers, and community partners across settings

Competencies

Learning objectives for the prevention science graduate programs focus on preparing students to achieve the following set of minimum competencies that accompany the stated program goals:

- 1. Students describe the origins, foundations, and standards of prevention science (Goal 2)
- 2. Students design and carry out theoretically grounded research studies that contribute to the literature on risk and protective factors, and identify their mechanisms of influence associated with behavioral health outcomes across the lifespan (Goal 1, 2, 3)
- 3. Students demonstrate knowledge of evidence-based preventive interventions and policies and understand how to apply prevention science theories to the design, implementation, and evaluation of preventive interventions (Goal 1, 2, 3, 4)
- 4. Students integrate knowledge of research design, quantitative methods, data analysis, and multimethod, multiagent assessment methods commonly used in prevention science into their research activities (Goal 2)
- 5. Students demonstrate skill in disseminating their work to a variety of audiences via formal academic presentations, instructional activities, and professional or academic writing (Goal 1, 2, 3, 4)
- 6. Students demonstrate awareness and understanding of contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior (Goal 1, 3, 4)
- 7. Students indicate a commitment to continuous learning and professional development by establishing and maintaining effective professional relationships with faculty members, research and teaching supervisors, collaborators, participants, agency personnel, peers, and staff, and being responsive to constructive feedback (Goal 4)
- 8. Students demonstrate honesty, personal responsibility, and knowledge and appropriate application of relevant ethical and legal

codes related to prevention science (e.g., American Psychological Association ethical standards) (Goal 4)

Program Learning Outcomes

- Upon successful completion of this program, students will be able to:
- Design, carry out, and evaluate research studies that contribute to the prevention science literature.
 - Demonstrate skill in disseminating their work to diverse audiences via formal academic presentations, instructional activities, and professional/academic writing.
 - Demonstrate awareness and understanding of diversity and contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior.
 - Demonstrate honesty, personal responsibility, and knowledge and appropriate application of relevant ethical and legal codes related to prevention science (e.g., APA Ethical Standards).

Prevention Science (MS)

<http://education.uoregon.edu/prevsci> (<http://education.uoregon.edu/prevsci/>)

Heather Leonard, Program Director

240 HEDCO Education Building
541-346-0909
prevsci@uoregon.edu

The Prevention Science program provides training in the design, evaluation, and delivery of interventions aimed at reducing risk and enhancing protective factors in children, youth, and families, and building resilient communities.

Our strengths-based program is designed to produce prevention scientists capable of advancing healthy outcomes across a range of individuals, populations, and settings.

The two-year master of science (MS) degree in prevention science is primarily intended for students who have completed a bachelor's degree in a prevention science–related discipline or have human development, psychology, education, or prevention science experience and are seeking more in-depth scientific and methodological training in prevention science and program evaluation than students interested in the one-year MEd. The two-year MS program also provides greater opportunities for students to develop long-term collaborations in research centers and with faculty members both within and outside the program, but does not require the commitment involved in completing the PhD. Students may also opt to complete the MS degree as a route toward becoming more competitive for PhD applications, whether that's in Prevention Science or other doctoral programs.

Program Goals and Competencies

Goals

1. Graduates describe theoretical models, risk and protective factors, preventive interventions (especially evidence-based ones), and implementation practices related to prevention programs and policies
2. Graduates understand and adhere to the standards of knowledge for prevention science, including best practices in research design and methods, data analysis, interpretation, dissemination and rigorous ethical practice
3. Graduates commit to multicultural competence and enhancing human welfare in their scholarly work related to prevention science
4. Graduates display professionalism in their relationships with faculty and staff members, peers, and community partners across settings

Competencies

Learning objectives for the prevention science graduate programs focus on preparing students to achieve the following set of minimum competencies that accompany the stated program goals:

1. Students describe the origins, foundations, and standards of prevention science (Goal 2)

2. Students design and carry out theoretically grounded research studies that contribute to the literature on risk and protective factors, and identify their mechanisms of influence associated with behavioral health outcomes across the lifespan (Goal 1, 2, 3)
3. Students demonstrate knowledge of evidence-based preventive interventions and policies and understand how to apply prevention science theories to the design, implementation, and evaluation of preventive interventions (Goal 1, 2, 3, 4)
4. Students integrate knowledge of research design, quantitative methods, data analysis, and multimethod, multiagent assessment methods commonly used in prevention science into their research activities (Goal 2)
5. Students demonstrate skill in disseminating their work to a variety of audiences via formal academic presentations, instructional activities, and professional or academic writing (Goal 1, 2, 3, 4)
6. Students demonstrate awareness and understanding of contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior (Goal 1, 3, 4)

Prevention Science (PhD)

Heather Leonard, Program Director

240 HEDCO Education Building
541-346-0909
prevsci@uoregon.edu

The Prevention Science program provides training in the design, evaluation, and delivery of interventions aimed at reducing risk and enhancing protective factors in children, youth, and families, and building resilient communities.

Our strengths-based program is designed to produce prevention scientists capable of advancing healthy outcomes across a range of individuals, populations, and settings.

The doctoral program leads to a doctor of philosophy (PhD) degree in prevention science. This research-intensive degree program can be completed in four years, with students earning an MS en route to the PhD. This program is intended for students who have completed a bachelor's or master's degree in a prevention science-related discipline or have significant human development, psychology, social science, education, or prevention science experience. Students must complete a PhD dissertation that demonstrates a high standard of scholarship and the ability to conduct independent, original research.

Program Goals and Competencies

Goals

1. Graduates describe theoretical models, risk and protective factors, preventive interventions (especially evidence-based ones), and implementation practices related to prevention programs and policies
2. Graduates understand and adhere to the standards of knowledge for prevention science, including best practices in research design and methods, data analysis, interpretation, dissemination and rigorous ethical practice
3. Graduates commit to multicultural competence and enhancing human welfare in their scholarly work related to prevention science
4. Graduates display professionalism in their relationships with faculty and staff members, peers, and community partners across settings

Competencies

Learning objectives for the prevention science graduate programs focus on preparing students to achieve the following set of minimum competencies that accompany the stated program goals:

1. Students describe the origins, foundations, and standards of prevention science (Goal 2)
2. Students design and carry out theoretically grounded research studies that contribute to the literature on risk and protective factors, and identify their mechanisms of influence associated with behavioral health outcomes across the lifespan (Goal 1, 2, 3)
3. Students demonstrate knowledge of evidence-based preventive interventions and policies and understand how to apply prevention science theories to the design, implementation, and evaluation of preventive interventions (Goal 1, 2, 3, 4)
4. Students integrate knowledge of research design, quantitative methods, data analysis, and multimethod, multiagent assessment methods commonly used in prevention science into their research activities (Goal 2)
5. Students demonstrate skill in disseminating their work to a variety of audiences via formal academic presentations, instructional activities, and professional or academic writing (Goal 1, 2, 3, 4)
6. Students demonstrate awareness and understanding of contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior (Goal 1, 3, 4)
7. Students indicate a commitment to continuous learning and professional development by establishing and maintaining effective professional relationships with faculty members, research and teaching supervisors, collaborators, participants, agency personnel, peers, and staff, and being responsive to constructive feedback (Goal 4)
8. Students demonstrate honesty, personal responsibility, and knowledge and appropriate application of relevant ethical and legal codes related to prevention science (e.g., American Psychological Association ethical standards) (Goal 4)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Design, carry out, and evaluate research studies that contribute to the prevention science literature.
- Demonstrate skill in disseminating their work to diverse audiences via formal academic presentations, instructional activities, and professional/academic writing.

- Demonstrate awareness and understanding of diversity and contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior.
- Demonstrate honesty, personal responsibility, and knowledge and appropriate application of relevant ethical and legal codes related to prevention science (e.g., APA Ethical Standards).

The course work lays a solid foundation for students interested in careers in academia or local, state, or national prevention and public health agencies.

Counseling Psychology (PhD)

Jessica Cronce, Program Director

240 HEDCO Education Building
541-346-8866
cpsy@uoregon.edu

The doctoral program in Counseling Psychology is accredited by the American Psychological Association Commission on Accreditation (750 First Street NE, Washington, DC 20002-4242, 202-336-5979), and it is recognized as acceptable for licensure by the Board of Psychology for the State of Oregon. The program has been accredited since 1955.

Earning a doctoral degree in counseling psychology typically requires five to six years of study beyond the bachelor's degree. Graduate training includes research training; completion of separate pre-dissertation and dissertation research projects that each demonstrate a high standard of scholarship and the ability to conduct independent, original research; clinical practice working with children, adolescents, adults, and families; and a 1-year, full-time, supervised predoctoral internship.

The program follows an ecological model of training embedded in the scientist-practitioner tradition. Students learn to use evidence-based preventive and remedial intervention strategies for working with individuals, children, families, and groups within their many contexts. This includes training in culturally sensitive assessment and intervention strategies designed to increase understanding and effect change at all levels. Students engage in critical reflection on the science and practice of health service psychology as core to their training.

The doctoral program prepares health service psychologists specializing in counseling psychology who can make a significant contribution to the field through scholarly research and professional practice. Students participate in integrated classroom and practicum activities in research, prevention, and intervention with children and adults, families, groups, and communities. Training experience largely occurs within the HEDCO Clinic within the College of Education and in community agencies or nonprofit research centers.

Graduates are prepared to work as researchers, practitioners, and educators in research institutions, institutions of higher education, medical settings, managed and integrated health-care organizations, community college and university counseling centers, community mental health centers, juvenile corrections agencies, human resources departments in business, and career counseling agencies.

Application and Admission

Prospective applicants may find detailed information concerning admissions on the Counseling Psychology program website (<https://education.uoregon.edu/cpsy/apply/phd>). The closing date for receipt of completed applications is posted on the website for entry the following fall term. All materials must be received prior to the stated application deadline for an application to be considered complete. Only complete applications will be reviewed.

Prospective applicants still under consideration following application review will be invited for interview. Notifications of invitation to interview are emailed in December, and applicants are requested to RSVP for the interview by the deadline stated in the email. See the Counseling Psychology program website for this year's interview date(s).

Notices about the disposition of applications are e-mailed by April 15.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Research methods and statistical analysis: Demonstrate the substantially independent ability to formulate research or other scholarly activities (e.g., critical literature reviews, dissertation, efficacy studies, clinical case studies, theoretical papers, program evaluation projects, program development projects) that are of sufficient quality and rigor to have the potential to contribute to the scientific, psychological, or professional knowledge base. Conduct research or other scholarly activities. Critically evaluate and disseminate research or other scholarly activity via professional publication and presentation at the local (including the host institution), regional, or national level.
- Ethical and legal standards: Be knowledgeable of, and act in accordance with, each of the following: the current version of the APA Ethical Principles of Psychologists and Code of Conduct; Relevant laws, regulations, rules, and policies governing health service psychology at the organizational, local, state, regional, and federal levels; and Relevant professional standards and guidelines. Recognize ethical dilemmas as they arise and apply ethical decision-making processes in order to resolve the dilemmas. Conduct self in an ethical manner in all professional activities.
- Individual and cultural diversity: Have an understanding of how their own personal/cultural history, attitudes, and biases may affect how they understand and interact with people different from themselves. Be knowledge of the current theoretical and empirical knowledge base as it relates to addressing diversity in all professional activities, including research, training, supervision/consultation, and service. Have the ability to integrate awareness and knowledge of individual and cultural differences in the conduct of professional roles (e.g., research, services, and other professional activities). This includes the ability to apply a framework for working effectively with areas of individual and cultural diversity not previously encountered during the course of their careers. Also included is the ability to work effectively with individuals whose group membership, demographic characteristics, or worldviews create conflict with their own. Demonstrate the requisite knowledge base and ability to articulate an approach to working effectively with diverse individuals and groups, and apply this approach effectively in their professional work.
- Professional values and attitudes: Behave in ways that reflect the values and attitudes of psychology, including integrity, deportment, professional identity, accountability, lifelong learning, and concern for the welfare of others. Engage in self-reflection regarding one's personal and professional functioning; engage in activities to maintain and improve performance, well-being, and professional effectiveness. Actively seek and demonstrate openness and responsiveness to feedback and supervision. Respond professionally in increasingly complex situations with a greater degree of independence as they progress across levels of training.
- Communication and interpersonal skills: Develop and maintain effective relationships with a wide range of individuals, including colleagues, communities, organizations, supervisors, supervisees, and those receiving professional services. Produce and comprehend oral, nonverbal, and written communications that are informative and well integrated; demonstrate a thorough grasp of professional language and concepts. Demonstrate effective interpersonal skills and the ability to manage difficult communication well.

- Assessment and psychometrics: Select and apply assessment methods that draw from the best available empirical literature and that reflect the science of measurement and psychometrics; collect relevant data using multiple sources and methods appropriate to the identified goals and questions of the assessment as well as relevant diversity characteristics of the service recipient. Interpret assessment results, following current research and professional standards and guidelines, to inform case conceptualization, classification, and recommendations, while guarding against decision-making biases, distinguishing the aspects of assessment that are subjective from those that are objective. Communicate orally and in written documents the findings and implications of the assessment in an accurate and effective manner sensitive to a range of audiences.
- Intervention: Establish and maintain effective relationships with the recipients of psychological services. Develop evidence-based intervention plans specific to the service delivery goals. Implement interventions informed by the current scientific literature, assessment findings, diversity characteristics, and contextual variables. Demonstrate the ability to apply the relevant research literature to clinical decision making. Modify and adapt evidence-based approaches effectively when a clear evidence base is lacking. Evaluate intervention effectiveness and adapt intervention goals and methods consistent with ongoing evaluation.
- Supervision: Demonstrate knowledge of supervision models and practices.
- Consultation, interprofessional, and interdisciplinary skills: Demonstrate knowledge and respect for the roles and perspectives of other professions. Demonstrate knowledge of consultation models and practices.
- History and systems of psychology: Demonstrate knowledge of general systems and theoretical models in psychology as a general field and in Counseling Psychology as a specific discipline in applied psychology.
- Basic content areas in scientific psychology: Demonstrate basic competency in basic content areas in scientific psychology, including affective aspects of behavior (e.g., affect, mood, and emotion), biological aspects of behavior (e.g., neural, physiological, anatomical, and genetic influences), cognitive aspects of behavior (e.g., learning, memory, thought processes, and decision-making), developmental aspects of behavior (e.g., transitions and growth across an individual's lifespan), and social aspects of behavior (e.g., group processes, attributions, discrimination, and attitudes).
- Advanced integrative knowledge of basic discipline specific content areas: Demonstrate integration of at least two basic content areas in scientific psychology (i.e., affective, biological, cognitive, social, and/or developmental aspects of behavior).

Counseling Psychology and Human Services Graduate Specialization

Ellen McWhirter, Director

240 HEDCO Education Building
541-346-9148
slpsr@uoregon.edu

Spanish Language Psychological Service and Research Graduate Specialization

The 16-credit Spanish language psychological service and research specialization addresses the deficit in family-centered prevention services for the Spanish-speaking Latino community. It is open to students enrolled in the accredited graduate programs of counseling psychology, couples and family therapy, and school psychology who also meet the eligibility criteria. The specialization provides students with skills to support the provision of culturally relevant mental health services and research in Spanish for Latino populations. It is designed to enhance preexisting linguistic and multicultural competencies and increase cultural understanding of US Spanish-speaking populations. Students critically assess the unique social, historical, political, and cultural contexts that

shape the experiences of Latinos in the United States, with particular attention to conditions of social injustice and inequity, and how such conditions influence the health and well-being of Latino Spanish-speaking communities.

Eligibility for this specialization includes maintaining good standing in one of the three specified College of Education graduate programs focused on mental health services, approval from the student's advisor and the director of the specialization, and preexisting competencies in Spanish.

Education Studies

Joanna Goode, Department Head

125D Lorry I. Lockey Education Building
541-346-2826

License and degree programs in the Department of Education Studies prepare professionals to work in education. For teaching in elementary grade levels (K–5), the undergraduate major in educational foundations leads to a bachelor of arts (BA) or bachelor of science (BS) degree in educational foundations. Undergraduates may also earn a certificate in education foundations—secondary. For teaching in secondary grade levels (6–12), the certificate in educational foundations—secondary is intended to complement the subject area major.

The master's-level programs include

1. a degree in curriculum and teaching with a specialization in elementary multiple subjects education or secondary education, which includes a recommendation for a state-approved teaching license and a master of education (MEd) degree
2. a program in curriculum and teacher education for those already holding a teaching license and are seeking a master of science (MS) degree
3. a degree in education policy and leadership (EPoL) that combines methodological training, theoretical grounding, and practical expertise in US education policy, evidence-based decision-making, organizational leadership, and policy-making processes
4. add-on endorsements for licensed teachers in English for speakers of other languages and multicultural, multilingual reading

The doctoral degree programs lead to a doctor of philosophy degree (PhD) in critical and sociocultural studies in education (CSSE) or quantitative research methods in education (QRME).

Faculty

Katie Fitch, clinical assistant professor (critical geography and education, teacher education, science education); BA, 2007, MAT, 2008, Trinity University; PhD, 2021, Oregon. (2021)

Joanna Goode, Somerville Knight Professor (computer science education, urban education, educational equity and inclusion). BS 1997, MEd, 1998, PhD, 2004, California, Los Angeles. (2005)

Maithreyi Gopalan, associate professor (quantitative research methods, educational equity, health-education policy analysis); BA, 2002, Madras University; MA, 2004, Gokhale Institute of Politics and Economics; PhD, 2018, Indiana University, Bloomington. (2024)

Tina Gutierrez-Schmich, clinical associate professor (educational equity & inclusion, conflict resolution studies, teacher education, educational policy); BEd, 2002, MPA, 2005, MS, 2016, PhD, 2016, Oregon. (2023)

Julie Heffernan, senior lecturer (sexuality and gender studies in education, social studies and language arts curriculum, educational equity and inclusion); graduate director, UO Teach. BA, 1990, MEd, 2004, PhD, 2010, Oregon (2013)

Jenefer Husman, professor (educational psychology). BS, 1992, Evergreen State College; MA, 1996, PhD, 1998, Texas, Austin. (2016)

Michelle Jacob, professor (Indigenous studies in education, health, gender and decolonization). BA, 1998, MA, 2001, California State, San Marcos; PhD, 2004, California, Santa Barbara. (2016)

Abby Lane, instructor (bilingual education, English language learners, migrant education). BA, 1983, California State, Northridge; MEd, 1992, Oregon. (2000)

David Liebowitz, assistant professor (education policy analysis, educational inequity, school leadership). BA, 1999, Columbia; EdM, 2008, 2011, EdD, 2015, Harvard. (2018)

Audrey Lucero, associate professor (literacy, bilingualism, dual-language schooling). BA, BS, 1996, Boston; MIT, 2002, Seattle; PhD, 2011, Washington (Seattle). (2011)

Lisa A. Mazzei, professor (qualitative research methodology, curriculum theory, whiteness studies). BA, 1983, Marshall; MA, 1984, PhD, 1996, Ohio State. (2012)

Edward M. Olivos, professor (bilingual education, Latinos and education, teacher preparation). BA, 1991, MA, 1997, PhD, 2003, San Diego State. (2007)

Jerry L. Rosiek, professor (qualitative research methods, teacher education, critical race theory in education research). BA, 1987, BS, 1988, Texas A & M; PhD, 1997, Stanford. (2005)

Jennifer Ruef, associate professor (mathematics education, equity, inclusion and social justice). BS, 1990, MS, 2005, Wisconsin, Madison; PhD, 2016, Stanford. (2016)

Leilani Sabzalian, associate professor (indigenous studies in education, teacher education, elementary social studies). BA, 2001, MEd, 2002, PhD, 2015, Oregon. (2017)

Alison Schmitke, senior lecturer (social foundations of education, social studies curriculum, sports education); director, undergraduate degree program. BA, 1994, Willamette; MEd, 1996, Portland State; PhD, 2008, Alabama. (2006)

Sarah Stapleton, associate professor (food and environmental justice, social contexts of science and environmental education). BA, 2001, Sweet Briar College; EdM, 2005, Harvard; PhD, 2015, Michigan State. (2015)

Amanda R. Tachine, assistant professor (Indigenous knowledge systems, Indigenous and decolonizing qualitative methodology, higher education); BS, 2000, Northern Arizona; MA, 2006; PhD, 2015, Arizona. (2024)

Ilana Umansky, associate professor (education policy analysis, quasi-experimental methods and longitudinal data analysis, English learners

and immigration). BA, 1998, Wesleyan; MEd, 2003, Harvard; MA, 2012, PhD, 2014, Stanford. (2014)

Keith Zvoch, professor (quantitative methods, program evaluation, statistical modeling). BS, 1992, Pittsburgh; MA, 1995, PhD, 2001, New Mexico. (2007)

Emeriti

Juliet "Jill" A. Baxter, associate professor emerita. AB, 1975, MA, 1986, PhD, 1987, Stanford; MA, 1977, Minnesota. (2002)

Edna P. DeHaven, professor emerita. BS, 1951, Oregon College of Education; MEd, 1962, PhD, 1969, Oregon. (1969)

Gary W. Ferrington, senior instructor emeritus. BS, 1964, Portland State; MS, 1967, Southern California. (1967)

M. D. "Mark" Gall, professor emeritus. BA, 1963, MEd, 1963, Harvard; PhD, 1968, California, Berkeley. (1975)

Judith K. Grosenick, professor emerita. BS, 1964, Wisconsin, Oshkosh; MS, 1966, PhD, 1968 Kansas. (1984)

Ray E. Hull, professor emeritus. BS, 1958, MS, 1962, Oregon State; DEd, 1969, Oregon. (1970)

William E. Lamon, associate professor emeritus. BS, 1964, San Francisco; MS, 1965, California State; PhD, 1968, California, Berkeley. (1972)

Ione F. Pierron, associate professor emerita of librarianship. BA, 1936, Puget Sound; MA, 1955, Minnesota; MS, 1960, Oregon. (1948)

Kathleen M. Scalise, professor emerita. BA, 1982, MA, 2004, PhD, 2004, California, Berkeley. (2005)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Quantitative Research Methods (p. 547)

Educational Foundations (BA/BS)

The Educational Foundations (EdF) program is for undergraduates who are committed to social change and are pursuing a future in elementary education or related fields. The many strengths of the Educational Foundations (EdF) major include diverse field placements, opportunities to assist faculty with research, and a variety of other enriching experiences that are an integral part of the curriculum.

This 4-year major prepares aspiring future professionals in elementary education and related fields to be critical thinkers, well informed about theory and practice, and to possess the knowledge and skills that will enable them to be change agents in economically, racially, culturally, and linguistically diverse communities. Completion of the Educational Foundations major qualifies students to apply for a graduate degree and licensure program such as UOTeach.

Application and Admission

To add the EdF major, schedule an appointment with an advisor at the College of Education Student Academic Services Center (<https://education.uoregon.edu/student-academic-services/>).

If you aspire to be a middle or high school teacher, you should major in the content area you wish to teach, explore the Minor in Educational Foundations, and then pursue graduate studies and licensure in a program such as UOTeach.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate understanding of the roles and responsibilities of teachers working in public schools.
- Demonstrate understanding about the social and economic influences on teaching and learning.
- Analyze the benefits and limitations of educational practices that have resulted from the various disciplinary perspectives on learning.
- Demonstrate understanding of the various dimensions of literacy.
- Analyze the ways race, gender, sexuality, class, climate education, immigration, Indigeneity, intersectionality, and individualism are simultaneously reproduced and challenged by U.S. schools.
- Apply course lenses to understanding field experience.

Major Requirements

Students planning to major in educational foundations enter the university as education premajors. Transfer students and university students from other majors may become premajors by submitting a Request for Addition or Deletion Major form, available online. Premajors are not eligible to take most 300- and 400-level education courses. Premajor status does not guarantee admission to the educational foundations major.

The major is designed as a two-year program completed during the undergraduate junior and senior year. The major requires core courses in five areas: learning, teaching, and assessment; curriculum theory; technology and education; literacy; and equality of opportunity. Additional

courses are required in mathematics, science, and a variety of other subjects, including reading, art, music, and physical education.

Educational Foundation Major Requirements

Courses used to fulfill the major requirements must be passed with a letter grade of at least C- or a P* where pass/no pass is the only grading option for the course.

Secondary Educational Foundations Minor

The Secondary Educational Foundations minor is designed to complement the major/subject area preparation of undergraduates who desire to be middle/high school teachers. Rather than waiting until graduate school to begin developing the knowledge necessary for classroom life, the minor gives students a running start as undergraduates.

Educational Foundations majors cannot minor in Secondary Educational Foundations minor.

Secondary Educational Foundations Minor Requirements

Courses used to fulfill the minor requirements must be passed with a letter grade of at least C- or a P* where pass/no pass is the only grading option for the course.

Code	Title	Credits
EDST 111	Education and Social Change	4
EDST 225	School and Representation in Media	4

EDST 454	Patriarchy and Education	
EDST 455	Heteronormativity and Education	
EDST 456	Decolonization and Education	
EDST 457	Immigration, Diaspora and Education	
Total Credits		24

Additional Requirements

Upper division courses must be completed at UO. Transfer students can complete EDST 111 and EDST 225 equivalents at a community college. This is designated in the MTM agreement.

Curriculum and Teaching (UOTeach) (MEd)

Application and Admission

UOTeach prepares teacher leaders to have a lasting impact on the learning and lives of youth. We have an open-door policy, welcoming applicants with demonstrated academic distinction, the disposition and passion for learning and working with youth, and a commitment to supporting equitable educational learning communities.

UOTeach is committed to helping reshape the classroom experience for all students through increasing the numbers of educator candidates from underrepresented groups, including bilingual bicultural candidates, people with disabilities, and first-generation college students.

As a state-approved program, UOTeach adheres to Oregon Teacher Standards and Practices Commission (TSCP) (<http://www.oregon.gov/tspc/Pages/>), University of Oregon, and College of Education standards.

Admissions criteria are listed below.

Our graduate school application is **open Sept 20 to January 15** annually, for June start.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate an understanding of the 10 InTASC standards at the appropriate progression level(s) in the following categories: the learner and learning, content instructional practice and professional responsibility.
- Use research and evidence to develop an understanding of the teaching profession and use both to measure students' progress and their own professional practice.

- Apply content and pedagogical knowledge as reflected in outcome assessments in response to standards of Specialized Professional Associations (SPA), the National Board for Professional Teaching Standards (NBPTS), states, or other accrediting bodies.
- Demonstrate skills and commitment that afford all P-12 students access to rigorous college- and career-ready standards.
- Model and apply technology standards as they design, implement and assess learning experiences to engage students and improve learning and enrich professional practice.

Master of Education in Curriculum and Teaching (UOTeach)

Students pursuing a master of education degree (MEd) are admitted to the curriculum and teaching major through the K–12 licensure program, UOTeach. This graduate program emphasizes the sociocultural context of teaching and learning, culturally sustaining pedagogy, and supportive learning communities. Completion of the program leads to a teaching license and a master of education degree (MEd) in curriculum and teaching.

The UOTeach program offers the following general-education specializations:

1. Elementary Multiple Subjects (<https://education.uoregon.edu/uoteach/apply/elementary/>)
2. Middle-High school education (<https://education.uoregon.edu/uoteach/apply/secondary/>), in the following content endorsement areas:
 - English language arts (<https://education.uoregon.edu/uoteach/endorsements/english/>)
 - Social studies (<https://education.uoregon.edu/uoteach/endorsements/social-studies/>)
 - Science education (<https://education.uoregon.edu/uoteach/endorsements/science/>) (biology, chemistry, physics, or integrated general science)
 - Mathematics (<https://education.uoregon.edu/uoteach/endorsements/math/>) (advanced and foundational)
 - World languages (<https://education.uoregon.edu/uoteach/endorsements/languages/>) (French, German, Japanese, Mandarin, and Spanish)

The degree includes an embedded preparation for Oregon TSPC's English for Speakers of Other Languages (ESOL) teaching endorsement.

UOTeach is a four-term, full-time academic and field experience program. Study plans are based on a candidates admitted teaching endorsement area. The graduate program coursework begins in June, preparing students for 34 weeks of progressive field experience teaching in local schools. School district practicum placements start at the end of summer term.

It is a cohort-based program (students are taught as a community rather than as individuals) in which students explore approaches to teaching and learning that advance equity and access, value student's strengths, facilitate critical thinking, and reflect culturally responsive methods and practices that serve all learners.

Upon successful completion of related course work, field placement, and licensure requirements, candidates are eligible to apply for the Oregon Teacher Standards and Practices Commission preliminary Oregon teaching license. The preliminary teaching licenses and subsequent

renewals and out-of-state transfers require a College of Education program completion report.

¹ Students seeking to add-in program or post-licensure endorsement areas should take the appropriate methods course at this time. Students not looking to pursue an additional endorsement may select a 500/600 master-level course from EDST, EDLD, EDUC, SPED and/or a related content area course from other departments.

² * EDST Secondary Certificate requires minimum 52 credits

More information on the UOTeach Curriculum & Teaching Med / Licensure program is available at <https://education.uoregon.edu/uoteach> (<https://education.uoregon.edu/uoteach/>)

Curriculum and Teacher Education (MS)

Application and Admissions

The Curriculum and Teacher Education (CTED) program is for individuals who currently hold an Oregon teaching license, and wish to add to their knowledge by adding a master's degree or licensure endorsement.

The master of science degree program is designed to cover the foundations of the field of educational scholarship, while simultaneously providing considerable flexibility for students to pursue advanced studies in their individual areas of interest.

Enrollment is limited. Program admission is based on grade point average, recommendations, need in the field, and the interview. See the website (<https://education.uoregon.edu/program/curriculum-and-teachers-education/>) for application details.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate an understanding of the 10 InTASC standards at the appropriate progression level(s) in the following categories: the learner and learning, content instructional practice and professional responsibility.
- Use research and evidence to develop an understanding of the teaching profession and use both to measure students' progress and their own professional practice.
- Apply content and pedagogical knowledge as reflected in outcome assessments in response to standards of Specialized Professional Associations (SPA), the National Board for Professional Teaching Standards (NBPTS), states, or other accrediting bodies.
- Demonstrate skills and commitment that afford all P-12 students access to rigorous college- and career-ready standards.

Master of Science in Curriculum and Teacher Education

Core Courses		
	Foundations of education courses	8
	Teacher professionalism courses	8
	Research methodology courses	8
Specialization Courses		
	Program courses	16
	Electives	16
Total Credits		56

This program is designed for those who already hold a teaching license but want to build on their knowledge by adding a master's degree. Study plans are individualized based on an applicant's educational pursuits. The program accepts applicants on an annual basis. Interested applicants may access the application from October through January 30; the program begins summer session, in June.

Enrollment is limited. Program admission is based on grade point average, recommendations, need in the field, and the results of an interview. See the website (<https://education.uoregon.edu/program/curriculum-and-teachers-education/>) for application details.

Education Policy and Leadership (MS)

*Course sequence is subject to change. For current course information, please visit our website. (<https://education.uoregon.edu/epol/graduate-program/>)

About the Education Policy and Leadership (EPoL) Master's of Science Program

A pandemic that has heightened inequality. A renewed drive for racial and economic justice. A need for core beliefs and evidence to guide educational decision-making. A facility in a wide range of analytic methods. These are the kinds of motivating catalysts and personal characteristics of those who will thrive in the Education Policy and Leadership Master's Program at the University of Oregon. Now is the

time for an inter-disciplinary, reflective and skill-oriented education like the kind you will find in the EPoL program.

Our program is a 12-month place-based program that awards you a Master of Science degree in Education Policy and Leadership (EPoL). The program combines methodological training, theoretical grounding, and practical expertise in US education policy, evidence-based decision-making, organizational leadership, and policy-making processes. If desired, EPoL students can add on an optional specialization in data science.

For information on how to apply, please visit our website (<https://education.uoregon.edu/epol/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate understanding of the process for education policy development, implementation, and evaluation.
- Demonstrate skills to analyze data with a goal of identifying problems, understanding their possible causes, and evaluating potential solutions.
- Act as an effective, equity-oriented, continuous improvement change-maker and a responsive leader in education-related settings.
- Effectively communicate both through presentation of ideas and through receptive listening and processing of other stakeholders' ideas.

EDLD 654	Machine Learning for Educational Data Science

Total Credits **45**

Residency Requirements

This is an in-person program located at the main University of Oregon campus in Eugene, Oregon. All students must attend classes and required meetings in person. Three consecutive terms of full-time study (graduate credits) must be completed to meet graduate school residency requirements. Students are expected to take classes in person whenever possible. Only three courses total across the program and a maximum of one course per term may be taken in an online or virtual format.

Critical and Sociocultural Studies in Education (PhD)

The Critical and Sociocultural Studies in Education (CSSE) doctoral program is a research-intensive program designed for students who want to work in academic or other research and professional development careers. It focuses on the need to create more just, equitable, and inclusive schools. The program provides a comprehensive approach to educational research that considers the consequences of contemporary educational practices, questions the assumptions underlying educational reform programs, and develops alternative visions for what education can be.

Admission

The program is small—fewer than 10 students are typically admitted every two years. Applications are accepted from early fall through mid-January for admission in odd-numbered years. The next cohort will be admitted for Fall 2027. Application details are available online (<https://education.uoregon.edu/csse/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate preparation for positions as higher education faculty members or public and private sector education researchers and leaders with knowledge that enables them to advocate for equality and justice and in educational systems.
- Conduct high-quality, high-impact quantitative and/or qualitative research in their chosen field.

- Contribute to scholarship and institutional change initiatives in their field through presentations at national conferences, the publication of articles and books in their area of study, and the writing of grants to support educational change initiatives.
- Demonstrate learning of and respectful engagement in Indigenous epistemologies, methodologies, and the relation of social inquiry to processes of colonization, decolonization, and Indigenous community survivance.

Doctor of Philosophy in Critical and Sociocultural Studies in Education

The PhD in Critical and Sociocultural Studies in Education (CSSE) requires successful completion of a minimum of 130 graduate credits. Of these, at least 84 credits must be earned after admission to the program. All credits are assumed to be graduate-level courses, unless otherwise specified. Students must complete the course category, credit hour, and specific course requirements shown below in Table 1. These include:

- 48 credits of core courses
- 36 credits of research courses
- 12 credits of cognate courses
- 12 credits of electives
- 22 credits of advancement hours

Code	Title	Credits
Core Courses		48
Required Core Courses		
EDST 662	Curriculum Theory: Contesting Educational Content	
EDST 654	Learning and Motivational Sciences

EDUC 632	Qualitative Methodology II: Postcritical Inquiry	
EDUC 612	Social Science and Education Research Design	
EDUC 614	Introductory Statistics for Practitioners I	
EDUC 640	Introductory Statistics for Practitioners II	
Additional Research Methodology Courses ⁴		
Cognate		12
A set of thematically organized doctoral-level courses taken outside the Department of Education Studies. These are usually taken all within one department (e.g. Philosophy, Psychology, Anthropology, etc.) 500-level courses may be approved by advisor or program director.		
Electives		12

This is a minimum, not a maximum, and represents courses chosen with approval of faculty advisor. Some or all of these may be transfer credits.

Advancement		22
EDST 605	Reading and Conference: [Topic] (Comprehensive Exam)	
EDST 603	Dissertation	
Total Credits Required		130

- ¹ 2 credits per term, 6 credits total
- ² 2 credits per term, 6 credits total
- ³ Three additional core courses in CSSE (12 credits), chosen in consultation with advisor.
- ⁴ Courses focused on qualitative, quantitative, or psychometric research methods. These should be chosen in consultation with the advisor and may include courses from other departments outside the department and College of Education.

Quantitative Research Methods in Education (PhD)

Our PhD program in quantitative research methods in education (QRME) develops researchers, scholars, and policy leaders who engage in traditions of inquiry that create knowledge and understanding founded in empirical evidence.

The program focuses on:

- 1. Building a strong understanding of quantitative methods in research
- 2. Studying causal and complex relationships within applied educational, social, and institutional settings
- 3. Using research to inform policy and practice in applied educational and social settings

Ideal QRME PhD students:

- Understand the importance of evidence and data in making decisions
- Take an interdisciplinary and systems-level perspective to problems in education
- Value the union of rigorous research methodology with strong grounding in theory and practice

For more information about the PHD in QRME Program, please visit the Program's website at: Quantitative Research Methods in Education Program | College of Education (uoregon.edu) (<https://education.uoregon.edu/qrme/>)

For application instructions, please see: Apply to the Quantitative Research Methods in Education Program | College of Education (uoregon.edu) (<https://education.uoregon.edu/qrme/apply/>)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Meet professional standards by being able to read and critically consume and analyze research; translate research into practices, decisions, and policy; and understand and employ professional standards for equity, fairness, ethical treatment of human subjects, and principled leadership in research and practice.

- Engage in scholarly communications by demonstrating effective oral and written communication skills when working with diverse partners and communicating research findings; and by demonstrating knowledge and understanding of diversity issues, organizational identity, and strategic communication.
- Engage in educational inquiry by gathering and applying empirical evidence in practice; understanding how to conduct and supervise field-based research; and employing conceptual frameworks and methodological approaches appropriate for the line of inquiry.

Please contact EMPL Department for Admission Application and Declaration of Specialization.

Please see the Educational Data Science Specialization Program Website for more information: Specialization in Educational Data Science | College of Education (uoregon.edu) (<https://education.uoregon.edu/epol/specialization-educational-data-science/>)

To apply to DECLARE a specialization, please see the Division of Graduate Studies' instructional webpage at: <https://graduatestudies.uoregon.edu/academics/policies/specializations/pursuing-specialization>

Quantitative Research Methods Graduate Specialization

The graduate specialization in quantitative research methods is designed primarily for doctoral students who have chosen quantitative methods as their primary research tradition in the College of Education. Doctoral students in other colleges and programs may be eligible but should confirm with the sponsoring department, the Department of Educational Methodology, Policy, and Leadership. The specialization is a rigorous training program in advanced quantitative research methods designed to prepare PhD students, with a competitive focus on quantitative research methods, for research and scholarship careers in education and the social sciences. Students take a minimum of 20 credits (five 4-credit courses) from among the department's advanced quantitative methods course offerings, building critical expertise in quantitative methodology including applied educational statistics and research design. The course requirements include a two-course sequence in at least one advanced quantitative method and three additional quantitative methods courses.

Special Education and Clinical Sciences

Wendy Machalicek, Department Head

340 HEDCO Education Building
541-346-1638

Through teaching, research, and service, the Department of Special Education and Clinical Sciences seeks to improve the quality of education, employment, and community living for children and adults with special needs and their families. The department has four graduate majors: applied behavior analysis, communication disorders and sciences, school psychology, and special education. The department also offers an undergraduate degree in communication disorders and

sciences, a minor in special education, and coursework in American Sign Language.

Faculty

Emily Adler Mosqueda, clinical associate professor. BA, 2007, MA, 2009, Oregon. (2021)

Suzanne Bamonto, teaching professor. BA, 1993, SUNY College at Geneseo; PhD, 1999, Oregon. (2024)

Sarah Kate Bearman, professor (child and adolescent mental health treatment, effectiveness, and implementation). BA, 1997, Kenyon College; MA, 2001, PhD, 2005, Austin, Texas. (2024)

Sofia Benson-Goldberg, assistant professor. BA, 2010, Washington; MS, 2014, South Florida; PhD, 2021, Chapel Hill. (2024)

Gina Biancarosa, professor (measurement, reading difficulties, reading comprehension). BA, 1992, Boston College; MEd, 1999, EdD, 2006, Harvard. (2009)

Jeanine Brush, clinical associate professor. BS, 2007, MS, 2009, Indiana University of Pennsylvania. (2015)

Chad Catron, instructor (american sign language). BA, 2014, California State, Fresno; MA, 2017, Gallaudet. (2019)

Keith Catron, associate teaching professor (american sign language). BA, 1990, North Central University; MA, 2017, Gallaudet. (2023)

Gounah Choi, lecturer. BA, 2013, Southern California; MEd, 2016, Vanderbilt; PhD, 2023, Washington. (2023)

Ben Clarke, professor (math assessment and intervention; school psychology). BS, 1997, Wabash; MA, 2001, PhD, 2002, Oregon. (2016)

Sierra Corbin, clinical assistant professor. BA, 2009, Oregon; MS, 2014, Nebraska, Kearney. (2021)

David Cosottile, lecturer. BS, 2015, Maryland; MA, 2018, PhD, 2020, Western Michigan. (2022)

Lauren Cycyk, associate professor (early language development, Spanish-English dual language development, caregiver-influenced language development). BA, 2004, George Washington; MS, 2007, Arizona State; PhD, 2016, Temple. (2016)

Stephanie De Anda, associate professor (early language acquisition, bilingualism, language intervention). BS, 2011, PhD, 2017, California, San Diego. (2017)

Lillian Duran, professor. BA, 1995, Antioch College; MA, 1999, George Washington; PhD, 2008, Minnesota, Twin Cities. (2015)

Sarah Falcon, senior lecturer. BS, 2000, Washington; MS, 2005, MA, 2008, Oregon; PhD, 2007, Connecticut. (2023)

Jessica L. Fanning, clinical associate professor (fluency disorders, behavior management, intervention design with cultural humility). BA, 1989, MA, 1996, University of Colorado, Boulder; PhD, 2007, Oregon, Post Doc, 2011, Oregon. (2011)

Nicole R. Giuliani, associate professor (cognitive and affective science, translational neuroscience, obesity prevention), BA, 2003, Pennsylvania; PhD, 2011, Stanford. (2016)

Beth Harn, professor (learning disabilities, assessment, instructional design). BA, 1991, MS, 1994, California State, Fresno; PhD, 2000, Oregon. (2006)

Elisa Jamgochian, senior lecturer. BA, 2001, California, Davis; MS, 2004, California State, Fullerton; PhD, 2010, Oregon. (2015)

Wendy Machalicek, professor (low-incidence disabilities, autism, early intervention). BS, 2000, North Texas; MEd, 2004, PhD, 2008, Texas, Austin. (2011)

Kimberly Marshall, lecturer. BS, 2003, Bucknell; MA, 2008, Columbia, Teacher's college; PhD, 2021, Endicott. (2022)

Katie Mason, clinical supervisor (speech-language pathology). BA, 2003, MS, 2005, Oregon. (2012)

Kent McIntosh, professor (behavior management, research design, applied behavior analysis); director, educational and community supports. BA, 1997, Duke; MS, 2003, PhD, 2005, Oregon. (2012)

Laura Lee McIntyre, professor (developmental disabilities, early intervention, home-school collaboration). BA, 1997, La Sierra; MA, 2000, PhD, 2003, California, Riverside. (2009)

Jennifer Meyer, associate clinical professor; director, clinic education. BS, 2000, MS, 2002, Southern Illinois. (2010)

Rhonda N. T. Nese, associate professor (alternatives to exclusionary discipline, positive behavioral interventions and supports, implementation and sustainability of equitable schools). BA, 2004, Maryland; MEd, 2008, Howard; PhD, 2013, Oregon. (2016)

Miyoko Patricelli, clinical assistant professor. BA, 2010, Whitman; BS, 2013, Utah State; MA, 2015, Memphis. (2021)

Elise Peltier, clinical associate professor; clinic supervisor. BA, 1998, Oregon; MS, 2008, Northern Arizona. (2012)

Billie Jo Rodriguez, senior lecturer (applied behavior analysis, multi-tiered systems of support, educational consultation and collaboration). BS, 2005, Central Arkansas; MS, 2008, PhD, 2010, Oregon. (2015)

Geovanna Rodriguez, assistant professor (Autism Spectrum Disorder, school climate and mental health, bullying, teacher professional development). BA, 2009, California, Los Angeles; MA, 2015, PhD, 2017, California, Riverside. (2019)

Sara Schmitt, associate professor. BA, 2003, Wisconsin, Madison; MA, 2009, San Diego State; PhD, 2013, Oregon State. (2022)

John R. Seeley, professor (emotional and behavioral disorders). BS, 1985, MS, 1991, PhD, 2001, Oregon. (2015)

Stephanie Shire, associate professor (early intervention, autism spectrum disorders, community-based intervention). BA, 2008, MEd, 2010, Alberta; MA, 2013, PhD, 2013, California, Los Angeles. (2017)

Samantha Shune, associate professor (dysphagia, aging). BA, 2005, Michigan, Ann Arbor; MA, 2007, Ohio State; PhD, 2014, Iowa. (2014)

Jayme Sloan, clinical associate professor. BA, 2009, Oregon; MS, 2014, Nova Southeastern. (2021)

McKay Moore Sohlberg, professor (cognitive rehabilitation, traumatic brain injury). BA, 1982, Stanford; MS, 1984, PhD, 1990, Washington, Seattle. (1995)

Amanda Thompson, clinical assistant professor. BA, 2011, California State, Chico; MS, 2013, Oregon. (2021)

Sylvia Thompson, associate professor (learning disabilities, English learners, literacy). BS, 1988, Texas, Austin. MS, 1992, Miami. PhD, 1999, Texas, Austin. (2015)

Deanne Unruh, research professor (secondary special education and transition, high-risk adolescents, program evaluation). BS, 1985, MS, 1991, Kansas; PhD, 2001, Oregon. (2001)

Shelley Watson, clinical associate professor. BA, 1999, Dominican University, Illinois; MA, 2004, Oregon. (2018)

Angela J. Whalen, clinical professor (professional practices in school psychology, clinical supervision, educational assessment and intervention). BA, 1996, St. Thomas; PhD, 2002, Oregon. (2003)

Jarrod Zinser, clinical associate professor. BS, 2005, MS, 2007, Florida State. (2022)

Cengiz Zopluoglu, associate professor (latent variable modeling, longitudinal data analysis, statistical computing). BA, 2005, Abant Izzet Baysal; MA, 2009, PhD, 2013, Minnesota. (2020)

Emeriti

Barbara D. Bateman, professor emerita. BS, 1954, Washington (Seattle); MA, 1958, San Francisco State; PhD, 1962, Illinois; JD, 1976, Oregon. (1966)

Diane D. Bricker, professor emerita. BA, 1959, Ohio State; MS, 1965, Oregon; PhD, 1970, George Peabody. (1978)

Russell M. Gersten, professor emeritus. BA, 1967, Brandeis; PhD, 1978, Oregon. (1977)

Elizabeth G. Glover, assistant professor emerita. BS, 1959, Tufts; MS, 1963, EdD, 1974, North Carolina, Greensboro. (1964)

Robert H. Horner, professor emeritus. BA, 1971, Stanford; MS, 1975, Washington State; PhD, 1978, Oregon. (1976)

Marilyn A. Nippold, professor emeritus. BA, 1972, California, Los Angeles; MA, 1976, California State, Long Beach; PhD, 1982, Purdue. (1982)

Hill M. Walker, professor emeritus. BA, 1962, Eastern Oregon; MA, 1964, PhD, 1967, Oregon. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

Major - Bachelor's Degree

- Communication Disorders and Sciences (BA/BS) (p. 549)

Minor

- Special Education (p. 552)

Graduate Programs

Majors - Master's Degree

- Applied Behavior Analysis (MS) (p. 553)
- Communication Disorders and Sciences (MS) (p. 554)
- Special Education (MA/MS) (p. 558)
- Special Education (MEd) (p. 561)

Major - Education Specialist Degree

- School Psychology (EdS) (p. 556)

Majors - Doctoral Degree

- Communication Disorders and Sciences (PhD) (p. 555)
- School Psychology (PhD) (p. 557)
- Special Education (DEd) (p. 562)
- Special Education (PhD) (p. 562)

Communication Disorders and Sciences (BA/BS)

240 HEDCO Education Building
541-346-2480
cds@uoregon.edu

The communication disorders and sciences program prepares you to understand, assess, and treat individuals who are experiencing challenges in speech, language, literacy, communication, cognition, and swallowing. Students learn to address these challenges across diverse ethnic, cultural, linguistic, social and economic backgrounds. We emphasize the ability to apply empirical evidence, logic, and a scientific perspective to the process of enhancing communication skills in meaningful and ecologically valid contexts.

The goals of the communication disorders and sciences program are based on the belief that the ability to communicate effectively is a fundamental right of all human beings. When this right is compromised, society suffers along with the individual.

Coursework in the major focuses on acquiring knowledge in the following areas:

- anatomical-physiological bases of speech, language, and hearing
- acoustic properties of sound and speech production
- role of biology, cognition, environment, and culture in language acquisition
- development of speech and language
- speech, language, and hearing disorders across the life span
- assessment and treatment procedures for individuals with speech, language, and hearing disorders
- professional issues in speech-language-pathology and audiology

Program plans for the communication disorders and sciences bachelor of arts (BA) and bachelor of science (BS) degrees are located on the program website.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Apply information regarding the bases for human communication (e.g., biological, linguistic, and cultural bases) to evaluate clinical scenarios as a precursor to future clinical practice.
- Demonstrate the prerequisite speaking and expository writing skills to pursue graduate study, clinical training, or work in an allied field post-graduation.
- Analyze the social impact of communication disorders on affected individuals and families and consider how intersecting identities (e.g., race/ethnicity, SES) further influence that impact.
- Participate in career and self-development opportunities, particularly during junior and senior years, to determine optimal post-graduation plans.

Students must earn a C– or better or P in required courses.

Communication Disorders and Sciences
Major Requirements

Code	Title	Credits
LING 150	Structure of English Words	4
CDS 201	Communication Disorders in Society and Media	4
CDS 430	Speech Pathology-Audiology as Professions	2
CDS 431	Beginning Clinical Methods	3

SPAN 324	Spanish Pronunciation and Phonetics
Total Credits	
68-69	

Program Plan

Students must meet with the department’s undergraduate advisor to develop an academic program plan and ensure that general university requirements and communication disorders and sciences prerequisites are met. Beginning fall term of their junior year, students must follow the program plan of courses in their prescribed sequence. Students who fail to do so will likely delay their graduation date.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Special Education Minor

Elisa Jamgochian, Coordinator

340 HEDCO Education Building
541-346-5185
ejamgoch@uoregon.edu

The Special Education (SPED) undergraduate minor is designed to provide students with foundational knowledge and experiences for careers in teaching general or special education, working with individuals with disabilities in transition, employment, or community settings, or who are interested in issues concerning people with disabilities. This minor is open to students from all majors.

The SPED minor coursework is grounded in research and practical applied work, preparing students to work collaboratively to promote the success of all individuals and their families through evidence-based practices in inclusive settings. The minor consists of a core of required coursework and electives. Some of these credits can be applied toward meeting the requirements for an Oregon Special Educator Teaching License.

Special Education Minor Requirements

Electives provide students with a breadth of interdisciplinary options. Students may plan a course of study that introduces them to the field of special education and prepares them to begin a licensure program, focusing on classroom settings and specific instructional skills and strategies for teaching students with disabilities. Other major course work such as English, comparative literature, law, journalism, architecture, arts administration, business, or planning, public policy and management may be augmented by completing minor course work focused on broad issues concerning people with disabilities. The option provides an enhanced understanding of perspectives on disability and issues in each student's chosen profession.

Courses used to fulfill the minor requirements must be taken for a letter grade of C- or better or a mark of Pass (P or P*), unless otherwise stated.

Code	Title	Credits
Required Courses

HPHY 434	Movement Disorders	
IARC 204	Understanding Contemporary Interiors	
PSY 475	Cognitive Development	
PSY 478	Social Development	
Total Credits		24

¹ A minimum grade of B- must be earned.

² Any SPED course that does not fulfill other SPED requirements may count toward the Electives.

Additional Requirements

- 18 credits must be completed in residence at the University of Oregon.
- 13 credits must be SPED prefix courses.
- At least 12 credits must be taken on a graded basis.
- No more than 6 applied experience/field study credits (e.g., 406) can be counted toward the minor requirements.
- No more than 2 courses from the same subject code, excluding SPED, can be counted toward the minor.

Application and Admission

Complete SPED 411 with a minimum grade of "B-".

Schedule a meeting with a COE advisor to review requirements and declare the minor.

Applied Behavior Analysis (MS)

<http://education.uoregon.edu/aba> (<http://education.uoregon.edu/aba/>)
Kimberly Marshall

340 HEDCO Education Building
 541-346-7170
uoaba@uoregon.edu

The University of Oregon Online Master of Science in Applied Behavior Analysis (ABA) is designed to:

- Prepare clinician-researchers to apply the science of human behavior and learning to a variety of populations and settings
- Provide a strong foundation in the principles and conceptual underpinnings of ABA and the application of behavior analysis in multidisciplinary contexts
- Give students opportunities to gain supervised research experience in behavior analysis

If you are interested in designing supportive environments that help others achieve their goals, you may be interested in studying behavior analysis. Special educators, psychologists, behavior assistants, educational assistants, and others looking for a career change can all benefit from becoming certified as a behavior analyst.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate fluent knowledge of technical terminology pertaining to the concepts and principles of behavior analysis
- Implement culturally responsive methodological approaches, skills, and techniques reflecting understanding of the role of culture in the life of the client in cross-cultural applications with clients of different racial, ethnic, religious or spiritual, and/or social economic class
- Actively involve clients in the selection of behavior change interventions and the evaluation of the social validity of the goals, procedures, and outcomes of behavior change interventions
- Design a single case experimental research study to answer a socially meaningful research question or questions
- Apply ethical decision making frameworks to problems of practice in behavioral research and practice
- Define a research problem, design a method to address the problem, and conduct and report an investigation that carries out the method to conclusion

Online Master of Science in Applied Behavior Analysis

Option 1

Code	Title	Credits
SPED 570	Principles of Applied Behavior Analysis	5
SPED 571	Applied Behavior Analysis Assessment	3
SPED 572	Behavior Change Group Settings	3
SPED 573	Behavior Change Procedures 1	3
SPED 676	Ethics in Applied Behavior Analysis	5

Communication Disorders and Sciences (MS)

<http://education.uoregon.edu/CDS> (<http://education.uoregon.edu/CDS/>)
 240 HEDCO Education Building
 541-346-2480
[cgs@uoregon.edu](mailto:cds@uoregon.edu)

The mission of the CDS master's program is to prepare students to understand, assess, and treat individuals across diverse ethnic, cultural, linguistic, social, and economic backgrounds experiencing challenges in speech, language, literacy, communication, cognition, and swallowing. The program is dedicated to achieving excellence in student preparation via the integration of clinical and classroom education, the generation and application of research, and the provision of community outreach. Our vision is to train leaders in the field in an environment that encourages inclusion, critical thinking, freedom of inquiry, and social justice. The master's program offers all of the courses and clinical experiences required for the American Speech-Language-Hearing Association Certificate of Clinical Competence. The program also offers course work and clinical experiences required to obtain an Oregon teaching license to work in the public schools.

Students who have fulfilled the undergraduate prerequisites typically spend two fall-through-spring academic years and one summer session completing the degree as a full-time student. Every student completes an evidence-based practice project, equivalent to a master's thesis, that integrates research and applied clinical experience. A minimum cumulative GPA of 3.00 is required for students to maintain good standing in the program and for graduation.

Application and Admission

The Communication Disorders and Sciences program typically matriculates 35 students each year. Additional information on program acceptance rates, student achievement data, and application instructions and deadlines can be found on the program website: <https://education.uoregon.edu/cds/graduate> (<https://education.uoregon.edu/cds/graduate/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate the following attributes and abilities and demonstrate those attributes and abilities in the manners identified: Accountability, Integrity, Effective Communication Skills, Critical Reasoning, Evidence-Based Practice, Concern for Individuals Served, Cultural

Competence, Professional Duty, Collaborative Practice. (CAA Standard 3.1.1B Professional Practice Competencies)

- Demonstrate knowledge of the discipline of human communication sciences and disorders; basic human communication and swallowing processes, including the appropriate biological, neurological, acoustic, psychological, developmental, and linguistic and cultural bases; ability to integrate information pertaining to normal and abnormal human development across the life span; nature of communication and swallowing processes (CAA Standard 3.1.2B Foundations of Speech-Language Pathology Practice)
- Demonstrate knowledge of principles and methods of identification of communication and swallowing disorders and differences, and principles and methods of prevention of communication and swallowing disorders. (CAA Standard 3.1.3B Identification and Prevention of Speech, Language, and Swallowing Disorders and Differences)
- Demonstrate knowledge and skills in assessment across the lifespan for disorders and differences associated with Articulation; Fluency; Voice and resonance, including respiration and phonation; Receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities; Hearing, including the impact on speech and language; Swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology); Cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning); Social aspects of communication (e.g., behavioral and social skills affecting communication); and Augmentative and alternative communication needs. (CAA Standard 3.1.4B Evaluation of Speech, Language, and Swallowing Disorders and Differences)
- Demonstrate knowledge and skills in intervention for communication and swallowing differences with individuals across the lifespan to minimize the effect of those disorders and differences on the ability to participate as fully as possible in the environment and intervention for disorders and differences associated with Articulation; Fluency; Voice and resonance, including respiration and phonation; Receptive and expressive language (phonology, morphology, syntax, semantics, pragmatics, prelinguistic communication, and paralinguistic communication) in speaking, listening, reading, writing, and manual modalities; Hearing, including the impact on speech and language; Swallowing (oral, pharyngeal, esophageal, and related functions, including oral function for feeding; orofacial myology); Cognitive aspects of communication (e.g., attention, memory, sequencing, problem solving, executive functioning); Social aspects of communication (e.g., behavioral and social skills affecting communication); and Augmentative and alternative communication needs (CAA Standard 3.1.5B Intervention to Minimize the Effects of Changes in the Speech, Language, and Swallowing Mechanisms)
- Demonstrate knowledge and skills in working with individuals with the aforementioned communication and swallowing disorders across the lifespan and by demonstration of ethical conduct; integration and application of knowledge of the interdependence of speech, language, and hearing; engagement in contemporary professional issues and advocacy; processes of clinical education and supervision; professionalism and professional behavior in keeping with the expectations for a speech-language pathologist; Interaction skills and personal qualities, including counseling and collaboration; Self-evaluation of effectiveness of practice. (CAA

Standard 3.1.6B General Knowledge and Skills Applicable to Professional Practice)

Communication Disorders and Sciences Major Requirements

Total Credits		102

¹ All students complete a capstone project. For most students this consists of the Evidence-Based Practice Project (EBP project). Occasionally students interested in research may do a thesis or complete an alternative EBP project. The requirements for these alternatives are described in the EBP project handbook and thesis guide. Students completing a thesis will be required to complete 9 credits of CDS 503 Thesis, they will not take CDS 620.

² Students who have taken an equivalent course prior to beginning the program may be exempt from this requirement. Students must have approval from program director before the start of the program.

In addition to the core master's degree requirements, ASHA certification requires coursework in statistics, biological sciences, physical sciences (chemistry or physics), behavioral/social sciences, and basic communication processes. See Prerequisite Checklist section under Supporting Documents on program application page for details (<https://education.uoregon.edu/cds/apply/ms>).

ASHA Requirements

In addition to the core master's degree requirements, additional course work may be needed to fulfill ASHA certification requirements. Of the 50 credits, 36 must be taken at the graduate level.

Communication Disorders and Sciences (PhD)

<http://education.uoregon.edu/CDS> (<http://education.uoregon.edu/CDS/>)
240 HEDCO Education Building
541-346-2480
cds@uoregon.edu

The primary mission of the CDS doctoral program is to cultivate the talent and ability of a new generation of scholars and innovators in the field of Communication Disorders and Sciences. The degree program emphasizes advanced knowledge, scholarship, leadership, and clinical competence in the areas of cognitive communication sciences, speech-language acquisition in monolingual and multilingual contexts, and swallowing. A major goal is to instill in each student the capacity for rigorous scholarship, independent judgement, academic excellence, and intellectual honesty. Our vision is to train leaders in the field in an environment that encourages inclusion, critical thinking, freedom of inquiry, and social justice.

Application and Admission

Students should have a GPA of at least 3.50. Most applicants have a master's degree and their certificate of clinical competence upon admission.

Information on program acceptance rates and application instructions and deadlines can be found on the program website: <https://education.uoregon.edu/cds/graduate> (<https://education.uoregon.edu/cds/graduate/>).

Prior to submitting an application, an applicant should have contact with a UO faculty member in the desired area of specialization and have identified a potential doctoral mentor. Upon admission and in consultation with the student, an academic advisor is selected, taking into account the student's personal and professional goals. This advisor chairs the student's program committee.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate competence in scholarly, scientific writing by the end of their second year of study.
- Demonstrate competence, including cultural competence, in designing and implementing a research study by the end of their fourth year of study.
- Demonstrate competence in conducting teaching in an inclusive and culturally responsive manner by the end of their fourth year of study.

The primary area of specialization is determined through discussion with the student's Doctoral Advisor. The collateral or secondary area may involve courses in more than one academic department. Doctoral students must choose an area of research interest (e.g., single-subject or quantitative methodologies). Other requirements are detailed in the Doctoral Program Handbook, available through the program office.

Options for primary area of specialization include speech-language acquisition in monolingual contexts and swallowing. The collateral or secondary area may involve courses in more than one academic department. Examples of collateral areas are neuropsychology, linguistics, or developmental psychology. Doctoral students must choose an area of research interest (e.g., single-subject or quantitative

methodologies). Other requirements are detailed in the *Doctoral Program Handbook*, available through the program office.

Required Doctoral Coursework

The doctoral program plan will be determined in consultation with and approved by the student’s Doctoral Advisor. A total of 81-quarter hours of doctoral study are required beyond the master’s degree. Note: The requirements listed below are considered the minimum requirements for graduation. However, the doctoral training experience is, by nature, individualized to meet the long-term goals of each student. Students should therefore expect that there will be additional training activities suggested and/or required to meet individualized training needs, which will be determined in consultation with the Doctoral Advisor and/or program committee.

Code	Title	Credits
Research Methodology Requirement ¹		21
EDUC 612	Social Science and Education Research Design	
4 courses in a primary methodology		
2 courses in a secondary methodology		
Classroom Instruction/Supervision/EBP Mentorship Requirement ²		5
EDUC 605	Reading and Conference: [Topic]	
Primary Area of Specialization ³		21
Collateral or Minor Area of Specialization ⁴		9
Grant Writing		
SPED 626	Grant Writing ⁵	3
Pre-Dissertation Research Requirements ⁶		6
Dissertation Research Requirements		18
CDS 603	Dissertation	
Total Credits		81

¹ A minimum of 6 courses must be taken in research methodologies, split between **two** areas of emphasis selected from quantitative, qualitative, single subject courses, and program evaluation. One selected area of emphasis **must be** quantitative methodology.

² At least 5 credit hours must be taken in mentored classroom instruction and/or supervision outside of the bounds of graduate employment commitments (if applicable) as well as EBP capstone project mentorship (CDS 605).

³ A minimum of 21 credit hours must be taken in the student's primary area of specialization, as determined through discussion with the student's Doctoral Advisor (e.g., cognitive rehabilitation, child language, swallowing).

⁴ At least 9 credit hours will be required from a collateral area or minor area of specialization (e.g., professional development, early intervention).

⁵ Or an equivalent course as determined by the Advisor.

⁶ At least 6 hours must be completed as part of a Pre-Dissertation Research Project. Doctoral students are required to conduct a research project under the direction of a CDS faculty member prior to beginning the dissertation (this could be the student's Doctoral Advisor or another faculty member in a related area). The pre-dissertation project does not necessarily address the same topics as the dissertation but often does.

School Psychology (EdS)

<https://education.uoregon.edu/spsy> (<https://education.uoregon.edu/spsy/>)
Billie Jo Rodriguez, Program Director

340 HEDCO Education Building
541-346-7170
spsy@uoregon.edu

The education specialist (Ed.S.) program in school psychology requires 94 credit hours and typically takes three years to complete. It includes a sequence of supervised field experiences, including practica and a 1,200 hour internship. The program is accredited by the National Association of School Psychologists and approved by the Oregon Teachers Standards and Practices Commission for the educational licensure of school psychologists in the state of Oregon.

Admission

Information about program admissions requirements and acceptance rates is available on the program’s website. Students are admitted for fall term only.

Applicants are evaluated on:

- academic record
- letters of recommendation
- previous related work or experiences
- a statement of purpose in seeking admission
- an interview
- *Optional - Graduate Record Examinations (GRE) general test scores*

Applications and supplemental materials are submitted online. Completed applications must be received by December 1. After initial file screening, finalists will be selected and invited for interviews.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Master foundational knowledge in the ten domains of school psychology practice (NASP, 2020).
- Demonstrate proficiency of practice/applied skills in the ten domains of school psychology practice (NASP, 2020).
- Demonstrate skills in leadership and professional service.
- Develop patterns of professional behavior and participate in experiences consistent with becoming a lifelong learner in the field of school psychology.

Billie Jo Rodriguez, Program Director

340 HEDCO Education Building
541-346-7170
spsy@uoregon.edu

The doctoral program is accredited by the American Psychological Association and the National Association of School Psychologists, and approved by the Oregon Teachers Standards and Practices Commission for the educational licensure of school psychologists in the state of Oregon.

Graduates of this program meet school psychologist licensure requirements through the Oregon Teacher Standards & Practices and are eligible for the nationally certified school psychologist credential offered by the National Association of School Psychologists. Additionally, the doctoral program prepares students to qualify for licensure as a professional psychologist through the state board of psychologist examiners.

Upon completion of doctoral training in school psychology at the University of Oregon, students will be prepared for a variety of careers in the field including careers in university teaching, research, leadership, and provision of school psychological services. This preparation involves completion of eight objectives that are reflective of our mission, values, and program philosophy. Each objective is linked to specific competencies which delineate specific behaviors students will engage in to demonstrate mastery of an objective.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Master basic foundational knowledge in the fields of psychology and education.
- Develop expertise in planning and conducting applied research in psychology and education.
- Demonstrate proficiency in professional writing and scholarly analysis.
- Deliver psychological services in school settings, including assessment, intervention, and consultation skills, with proficiency.
- Demonstrate skill in teaching, at both the university pre-service level and the professional in-service level.
- Develop skills in supervision of school psychology services.
- Demonstrate skills in leadership and professional service.
- Develop patterns of professional behavior and participate in experiences consistent with becoming a lifelong learner in the field of school psychology.

School Psychology Major Requirements

The doctoral program includes an individualized plan of study with 160 credits minimum, culminating in an original research dissertation, a predoctoral internship, and the doctor of philosophy (PhD) degree. Students may enter the doctoral program with or without a master's degree. Prior graduate course work may reduce the amount of time needed to finish the doctoral program.

The program prepares students to qualify for licensure as a professional psychologist through the state board of psychologist examiners, as well as state certification or licensure as a school psychologist in Oregon and most other states. Students who complete this program are eligible for the nationally certified school psychologist credential offered by the National Association of School Psychologists.

Completion of the Ph.D. program in School Psychology at the University of Oregon requires a minimum of 160 credit hours, including coursework, practicum, and a 1,500 clock hour internship. This program typically requires four years of full-time study on campus for completion of coursework and practica, plus a full-time internship that is completed during the fifth year of the program. All students in the Ph.D. program complete comprehensive exams and a dissertation.

Beth Harn, Program Director

340 HEDCO Education Building
541-346-1412
sped@uoregon.edu

Master's + Licensure

Our master's + licensure programs prepare preservice teachers to meet the preliminary special education licensure requirements for Oregon in either:

- K-12/Generalist
- Early Intervention

Inservice teachers can complete coursework to meet the added endorsement requirements for these age groups, as well through our endorsement program.

Master's Only (Non-Licensure)

The master's only option is ideal for current teachers who are interested in pursuing advanced graduate training in special education and

completing a program that is individualized and based on their interests and goals.

This option is ideal for individuals with a bachelor's degree who want to learn more about special education, but who do not necessarily want to pursue a career in teaching.

Please see program website for additional information: <https://education.uoregon.edu/sped/graduate> (<https://education.uoregon.edu/sped/graduate/>)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Analyze disabilities from a within- and across-categorical perspective including definitions, etiologies, characteristics, and interventions - and- identify pivotal concepts and procedures in educating individuals with disabilities (OAR 584-420-0460 [3, 5, 7; CEC 1, 3, 5]; OAR 584-420-0020 [3a b, 5b c; InTASC 1, 3, 7, 8]; OAR 584-420-0465 [4, 8]); OAR 584-017-1020), as measured by a grade of B- or better in SPED 511 Foundations of Disability.
- Practice within ethical and legal guidelines; advocate for improved outcomes for individuals with exceptionalities and their families while considering their social, cultural, and linguistic diversity (CEC Initial Prep. Sub-Standards 1.1 and 1.2), as measured by a grade of B- or better in SPED 528 SPED Law.
- Create and contribute to safe, respectful, and productive learning environments for individuals with exceptionalities through the use of effective routines and procedures and use a range of preventive and responsive practices to support social, emotional and educational well-being (CEC Initial Prep. Sub-standard 6.1), as measured by a grade of B- or better in SPED 526 Behavior and Classroom Management.

Minimum Requirements:

- 45 credits as an officially admitted master's degree student
- 15 credit hours of previous graduate-level work may be transferred into your program pending instructor and advisor approval
- 9 credit hours of 600 level courses
- 30 graduate credit hours in special education (SPED) courses
- 24 graded credit hours in UO courses
- Students who wish to obtain a Master of Arts degree must complete the equivalent of two years of a second language

Please see program website for additional information: <https://education.uoregon.edu/sped/graduate> (<https://education.uoregon.edu/sped/graduate/>)

The general framework for a Master's degree in special education includes three components: (a) courses in required core areas, (b) elective courses, and (c) a terminal activity. Master's degree students can specialize in a) Early Intervention, b) school-age individuals K-12 level, or c) a general master's with an individualized interest. The specific courses students take to complete a master's degree is determined by student-identified career interests and whether the student has been admitted to both the master's degree and a license/ endorsement program.

Thesis (9)	
Specialization Area (3 graduate courses of at least 9 credits)	
Total Minimum Credits	45-51

¹ Work with advisor to determine mix of Methods and Transition courses to take for this emphasis.

Students who wish to obtain a master of arts degree must complete the equivalent of two years of a second language.

The minimum requirements for the Accelerated Master's in Special Education align with the requirements for our graduate licensure program. Students must be in good standing and have recommendation of program and practicum coordinators to continue with graduate level coursework. Students must maintain a cumulative grade point average of 3.0 on a 4.0 scale in all graduate courses taken in the licensure program, and are required to earn a B- or better in all K12 instructional methods courses (SPED 540, 541, 542, and 543) and all core EI/ECSE courses (SPED 680, SPED 681, SPED 682, SPED 683, SPED 687, SPED 688, SPED 689).

Beth Harn, Program Director

340 HEDCO Education Building
541-346-1412
sped@uoregon.edu

To be eligible for the MEd in Special Education, a candidate must have a valid teaching license and have completed at least one year of successful classroom teaching in the United States.

The program of study leading to the master's degree requires a minimum of 45 credits of graduate work. The program of study includes required core courses, associated field studies, electives, and a terminal project.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Create safe, inclusive, culturally responsive learning environments so that individuals with exceptionalities become active and effective learners and develop emotional well-being, positive social interactions, and self-determination. (CEC Initial Prep. Standard 1), as measured by passing grades (P) in all practicum and/or student teaching experiences.
- Practice within ethical and legal guidelines; advocate for improved outcomes for individuals with exceptionalities and their families while considering their social, cultural, and linguistic diversity (CEC Initial Prep. Sub-Standards 1.1 and 1.2), as measured by a grade of B- or better in SPED 428/528 SPED Law.
- Create and contribute to safe, respectful, and productive learning environments for individuals with exceptionalities through the use of effective routines and procedures and use a range of preventive and responsive practices to support social, emotional and educational well-being (CEC Initial Prep. Sub-standard 6.1), as measured by

a grade of B- or better in SPED 426/526 Behavior and Classroom Management.

- Consider individual abilities, interests, learning environments, and cultural and linguistic factors in the selection, development, and adaptation of learning experiences for individuals with exceptionalities (CEC Sub-standard 5.1), as measured by grades of B- or better in all instructional methods courses.

Minimum Requirements:

- 45 credits as an officially admitted master's degree student
- 15 credit hours of previous graduate-level work may be transferred into your program pending instructor and advisor approval
- 9 credit hours of 600 level courses
- 30 graduate credit hours in special education (SPED) courses
- 24 graded credit hours in UO courses

Special Education (DEd)

Our primary goal of the doctoral program is to prepare you to assume leadership roles in special education. These roles may be in institutions of higher education, private research firms, school districts, or state, county, or federal education agencies.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Provide supervision to teacher candidates and have experience in designing, revising, and teaching a course in the field of special education that promotes equity, diversity, and inclusion and effectively supports the learning development of undergraduate and/or graduate students.
- Critically evaluate, design, and implement research that promotes equity, diversity, and inclusion to better meet the needs of individuals, students, and families with disabilities.
- Engage in program, college, university, profession, or community service to better understand the roles and responsibilities involved in collaborative efforts with a variety of partners.

Special Education (PhD)

Beth Harn, Program Director

340 HEDCO Education Building
541-346-1412
sped@uoregon.edu

Our nationally ranked University of Oregon Special Education program has a track record of preparing graduates to stand out in their careers and improve educational practices. The research, resources, and practices our program faculty conduct impacts the field of education in the US and globally.

Our doctoral training experience is unique and individualized. Our program competencies are designed to support you to develop expertise in the domains of teaching, service, and research. Working with your advisor and other program faculty, you will create a plan that will provide you expertise in the areas you are interested in studying while being

exposed to all of the service and research experiences our program and COE faculty conduct.

Our program faculty teach and research a wide range of topics in the field of special education (e.g., dual language learners, assessment, autism, social emotional learning, early childhood, behavioral analysis, post-school community engagement, instruction, equity in school discipline, etc.) with a critical eye toward improving systems and practices to promote equity in educational outcomes for all students. We typically admit 4-8 students a year to work as a cohort to maximize your learning and experiences.

Please see the program website for additional information:
<https://education.uoregon.edu/sped/graduate/phd> (<https://education.uoregon.edu/sped/graduate/phd/>)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Provide supervision to teacher candidates and have experience in designing, revising, and teaching a course in the field of special education that promotes equity, diversity, and inclusion and effectively supports the learning development of undergraduate and/or graduate students.
- Critically evaluate, design, and implement research that promotes equity, diversity, and inclusion to better meet the needs of individuals, students, and families with disabilities.
- Engage in program, college, university, profession, or community service to better understand the roles and responsibilities involved in collaborative efforts with a variety of partners.

Doctor of Philosophy in Special Education

The Special Education Doctoral Program requires 81 credits past the master's degree.

Code	Title	Credits
Foundational Coursework		11
SPED 607	Seminar: [Topic] (Doctoral seminar taken twice for 1 credit each)	
SPED 622	History of Special Education and Disability	
EDUC 612	Social Science and Education Research Design ¹	
SPED 626	Grant Writing	
Research Requirement²		18
Educational Equity (Choose two courses, at least one with SPED prefix)³		6
Electives⁴		28
Dissertation		18
SPED 603	Dissertation	
Total Credits		81

¹ Program prerequisite for Research Requirement coursework.

² 4 courses from one tradition (quant, qual, or single subject) + 2 from another (quant, qual, single subject, or program evaluation)

³ Students must complete at least two courses of graduate-level coursework at the University of Oregon specifically focusing on supporting underserved populations (e.g., emergent bilingual, racially/ethnically minoritized, etc.). There are a number of courses (including topical doctoral seminars) that can satisfy this requirement both within

the College of Education and across the University; however, at least one of these courses must have a SPED prefix (e.g., SPED 515, SPED 518). Students should speak with their advisor about course options to fulfill this requirement.

⁴ Electives are determined and approved in the process of developing and reviewing the student's program plan.

School of Journalism and Communication

<http://journalism.uoregon.edu>

Juan-Carlos Molleda, Edwin L. Artz Dean

217A Allen Hall
1275 University of Oregon
Eugene, OR 97403-1275
541-346-3602

The UO School of Journalism and Communication is a community dedicated to excellence in learning, research, and creative projects. We are scholars, professionals, and students studying issues that champion freedom of expression, dialogue, and democracy in service to current and future generations.

While our Pacific Northwest home inspires our explorations of media, technology, and the human condition, our work at the undergraduate and graduate levels has global impact—researching, advocating for, and reporting on critical issues such as diversity and equity, the environment, and social and economic justice. Along the way, we facilitate relationships across media professions that promote public advocacy, social responsibility, transparency, and civic engagement.

By integrating theory and practice, we advance communication and media scholarship and prepare students to become professional storytellers, critical thinkers, thought leaders, and responsible citizens in a global society.

Come to Oregon; change the world.

With a century-long history, the University of Oregon School of Journalism and Communication is one of the first professional journalism schools in the nation, the only accredited comprehensive journalism program to include advertising and public relations in the Pacific Northwest, and one of only 112 accredited programs worldwide. More than a century after its founding, our school is a national leader in scholarship and education in advertising, journalism, media studies, public relations, and strategic communication. With a student enrollment of more than 2,200, we offer doctoral, master's, and undergraduate degree programs that challenge students to become productive scholars, ethical communicators, critical thinkers, and responsible citizens in a global society.

We attract and nurture students who seek the truth, challenge the status quo, and move society forward, together. These shared values shape our community and support a culture that's collaborative, immersive, inclusive, and entrepreneurial. Our classes and hands-on learning programs foster critical thinking and creativity while giving students a supportive environment to push their limits, explore new interests, and build innovative and transferrable skills. Our faculty and student researchers shape the professions we partner with by offering groundbreaking insights and new approaches to advertising, journalism, media, public relations, and strategic communication. Our success is measured by our student and alumni work, our faculty and student contributions to research, our collaboration and partnerships with our partners in the field, and our impact on the world around us.

Faculty

Jesse Abdenour, associate professor (news processes and production, documentary, investigative journalism). BS, 1999, Ohio; MA, 2010, Arkansas; PhD, 2015, North Carolina. (2015)

Shan Anderson, associate teaching professor (advertising, digital publishing, visual design). BFA, 1991, Oregon. (2014)

Steven Asbury, instructor I (visual communications, design, advertising). BS, 1997, Oregon. (2014)

Jakki Bailey, assistant professor (media studies), PhD, Stanford

Thomas (Tom) H. Bivins, John L. Hulteng Chair in Media Ethics and Responsibility; professor (communication ethics, communication history). BA, 1974, MFA, 1976, Alaska, Anchorage; PhD, 1982, Oregon. (1985)

Marquis (Mark) E. Blaine, professor of practice (multimedia journalism, feature writing). BJ, 1993, Missouri, Columbia; MS, 2000, Oregon. (2003)

Charles Butler, instructor I (magazines, narrative nonfiction, sports journalism). BA, 1985, MS, 1999, Columbia. (2016)

Dayna Chatman, assistant professor (race, gender, and media; television studies; social media). BA, 2005, Saint Mary's College of California; MA, 2012, Illinois, Chicago; MA, 2013, PhD, 2016, Southern California. (2018)

Christopher Chávez, Carolyn Silva Chambers Distinguished Professor of Advertising; Interim Director, Advertising and Brand Responsibility Program; Director, Center for Latina/o and Latin American Studies (advertising, popular culture, media studies and globalization). BS, 1993, California State Polytechnic, Pomona; MA, 1995, MA, 2006, PhD, 2009, Southern California. (2012)

Alexandra (Alex) Segre Cohen, assistant professor (science communication -- environmental focus). BA, 2016, Clark University; PhD, 2022, Southern California. (2022)

Diego Cortes, assistant professor (media studies), BA, Hunter College; MA, UC San Diego; PhD, UC San Diego

Nicole Smith Dahmen, professor (visual communication). BGS, 1997, MMC, 2001, Louisiana State; PhD, 2007, North Carolina, Chapel Hill. (2014)

Donna Davis, associate professor (strategic communication, public relations, virtual worlds); director, Strategic Communication Program. BA, 1981, MS, 2005, PhD, 2010, Florida. (2011)

Charlie Deitz, Instructor. BA, 2002 Montclair State; MS 2013, PhD, 2018 Oregon (2022)

Andrew DeVigal, professor of practice (media innovation, community engagement, experience design); Chair in Journalism Innovation and Civic Engagement. BS, 1993, San Francisco. (2014)

Nicole (Nikki) Dunsire, instructor (Oregon Reality Lab Manager). BA, 2002 Denver; MS, 2004, DePaul University (2021)

Troy R. Elias, Associate Vice Provost for Diversity & Inclusion; associate professor (advertising, race and ethnicity, information and communication technology). BS, 2004, Claflin; MA, 2006, PhD, 2009, Ohio State. (2014)

David Ewald, professor of practice (advertising, brand innovation). BS, 2001. (2019)

Maxwell (Max) Foxman, assistant professor (game studies, gamification, immersive media). BA, 2007, Columbia; MA, 2012, New York; MPhil, 2015, PhD, 2018, Columbia. (2018)

Saima Kazmi, assistant professor (advertising), PhD, Colorado, Boulder

Torsten Kjellstrand, professor of practice (photojournalism, multimedia and visual journalism). BA, 1984, Carleton College; MA, 1997, Missouri, Columbia. (2013)

Kathryn Kuttis, instructor I (cultural and media studies, visual design, representation). BA, 1995, Drew; MLA, 2010, Oregon. (2014)

Peter D. Laufer, James N. Wallace Chair of Journalism: News-Editorial; professor (long-form journalism, radio journalism, international journalism). MA, 1986, American; PhD, 2009, Leeds Metropolitan. (2010)

Regina Lawrence, professor (political communication, civic engagement, journalism innovation); Associate Dean, George S. Turnbull Portland Center and Agora Journalism Center. BA, 1985, Denver; MA, 1991, Colorado; PhD, 1997, Washington, Seattle. (2015)

Seth C. Lewis, Shirley Papé Chair in Emerging Media; professor; director, journalism. BS, 2002, Brigham Young; MBA, 2005, Barry; PhD, 2010, Texas, Austin. (2016)

Hayoung (Sally) Lim, assistant professor (cultural diversity and brand responsibility). BA, 2016, Korea; MA, 2018, PhD, 2022, Texas, Austin (2022)

Ed Madison, associate professor (multimedia journalism, digital publishing, media entrepreneurship). BS, 1979, Emerson College; PhD, 2012, Oregon. (2012)

Gabriela Martinez, professor (electronic media, international communication, Latin American studies); director, Journalism Master's Program. BA, 1999, MA, 2000, San Francisco State; PhD, 2005, Oregon. (2005)

Kelli I. Matthews, associate teaching professor (public relations, strategic communication, social media). BA, 2001, MA, 2004, Oregon. (2011)

Nikki McClaran, assistant professor (public relations), PhD, Michigan State

Tom McDonnell, professor of practice (advertising). BS, 1982, Oregon. (2014)

Karen McIntyre, assistant professor (journalism), BS, Cal State Chico; MA, UC Berkeley; PhD, North Carolina

Daniel L. Miller, associate professor (video production, documentary film and video). BS, 1983, MS, 1986, PhD, 1994, Oregon. (2001)

Ivan Miller, visiting professor of practice (sports journalism)

Juan-Carlos Molleda, professor; Edwin L. Artzt Dean. BS, 1990, Zulia; MS, 1997, Radford; PhD, 2000, South Carolina. (2016)

Daniel D. (Dan) Morrison, teaching professor (photojournalism, multimedia and visual journalism). BA, 1984, MPA, 1994, Texas, Austin. (2010)

Deborah (Deb) K. Morrison, professor (advertising and brand creativity, creative process, social responsibility); associate dean for undergraduate

affairs. BA, 1978, Sam Houston State; MA, 1984, PhD, 1988, Texas, Austin. (2006)

Dean E. Mundy, associate professor (public relations, media framing); director, public relations. BA, 1996, MA, 2006, PhD, 2010, North Carolina, Chapel Hill. (2014)

Courtney Munther, associate teaching professor (nonprofit communication, fundraising, strategic public relations writing). BA, 2004, Smith; MA, 2012, Nebraska, Lincoln. (2014)

Bryce Newell, associate professor (media studies, media law and policy). BS, 2006; JD, 20010, UC Davis; PhD, 2015, University of Washington. (2019)

Julianne H. Newton, director, communication and media studies MA and PhD program, professor (visual communication, visual ethics, visual behavior, photojournalism, and cognitive theory). BA, 1970, Baylor; MA, 1983, PhD, 1991, Texas, Austin. (2000)

S. Senyo Ofori-Parku, associate professor (consumer insights and strategy, corporate sustainability, consumer behavior). BA, 2003, Cape Coast; MA, 2010, Ghana; PhD, 2015, Oregon. (2017)

Sung J. Park, associate teaching professor (photojournalism, multimedia journalism). BS, 1991, MFA, 2010, Syracuse. (2010)

Ellen Peters, professor (Philip H. Knight Chair of Science Communication and director of the science and communication research [SCR]). BS/BSE, 1989, MS, 1994, PhD, 1998, Oregon. (2019)

Lisa Peyton, instructor (immersive and strategic communications). BA, Virginia Commonwealth; MA, 2017, Fielding Graduate University, Santa Barbara. (2021)

Whitney Phillips, assistant professor (digital platforms and ethics). BA, 2004, Humboldt State; MFA, 2007, Emerson College; PhD, 2012, University of Oregon (2022)

Danny Pimentel, assistant professor (immersive media psychology). BS, Florida; MS, Florida International, 2014; PhD, 2020, Florida. (2020)

Donnalyn Pompper, professor (public relations, corporate social responsibility, critical race and feminist studies). BA, 1983, Rowan; MJ, 1994, PhD, 2001, Temple. (2017)

Wes Pope, associate professor (multimedia journalism). BA, 1996, Washington, Seattle; MA, 2010, Syracuse. (2012)

Damian Radcliffe, Carolyn S. Chambers Professor in Journalism; professor of practice (community journalism, trends in social media and technology, media business models). BA, 1998, MA, 2009, Oxford. (2015)

Hollie Smith, associate professor (science and environmental communication); associate director science and communication research (SCR). BS, 2007, Southern Utah; MA, 2010, Washington State; PhD, 2014, Maine. (2018)

Gretchen Soderlund, associate professor (media history, gender and media); director, media studies. BA, 1993, Virginia Commonwealth; PhD, 2002, Illinois, Urbana-Champaign. (2013)

H. Leslie Steeves, professor (diversity and media, development communication and social change); senior associate dean, academic affairs. BS, 1971, Vermont; MS, 1974, PhD, 1980, Wisconsin, Madison. (1987)

Paul Swangard, instructor (advertising and sport brand strategy). BA, 1990, MBA, 1999, Oregon (2019)

John Sutter, assistant professor (science communication), MFA, Utah

Brent Walth, associate professor (journalism). BS, 1984, Oregon; MFA, 2012, Warren Wilson College. (2007)

Janet Wasko, Philip H. Knight Chair; professor (communication studies, political economy of communication); director, media studies. BA, 1973, MA, 1974, California State; PhD, 1980, Illinois. (1986)

Christine Wise, professor of practice (advertising), BA, Wisconsin-Madison

Will Yurman, instructor (digital video news/broad cast production). BA, 1983, State University of New York, Albany. (2022)

Daniel Zweifach, assistant professor (advertising), BA, Harvard; MA, UCLA; PhD, UCLA

Emeriti

Patricia A. Curtin, professor emerita. AB, 1977, Earlham College; MA, 1991, PhD, 1996, Georgia. (2006)

Rebecca G. Force, professor emerita. BA, 1968, Vassar College. (1996)

Charles F. Frazer, professor emeritus. AB, 1968, Rutgers; MA, 1972, Fairfield; PhD, 1976, Illinois. (1990)

Timothy W. Gleason, professor emeritus. BA, 1980, State University of New York, Empire State; MA, 1983, PhD, 1986, Washington (Seattle). (1987)

Lauren J. Kessler, professor emerita. BSJ, 1971, Northwestern; MS, 1975, Oregon; PhD, 1980, Washington (Seattle). (1980)

David Koranda, professor emeritus. BA, 1970, Wilkes; BS, 1978, Oregon. (2001)

Scott R. Maier, professor emeritus. BA, 1977, Oberlin; MA, 1989, Southern California; PhD, 2000, North Carolina, Chapel Hill. (2000)

Ann C. Maxwell, associate professor emerita. BA, 1973, MA, 1975, California State, Fullerton; PhD, 2008, Pacifica Graduate Institute. (1986)

Duncan L. McDonald, professor emeritus. BS, 1966, Ohio; MS, 1972, Oregon. (1975)

Debra L. Merskin, professor emerita. BA, 1983, South Florida, Tampa; MLA, 1989, South Florida, St. Petersburg; PhD, 1993, Syracuse. (1993)

Karl J. Nestvold, professor emeritus. BS, 1954, Wyoming; MS, 1960, Oregon; PhD, 1972, Texas, Austin. (1961)

Jon Palfreman, professor emeritus. BS, 1971, University College, London; MS, 1972, Sussex; PhD, 2005, Glamorgan. (2006)

Stephen E. Ponder, associate professor emeritus. B.A., 1964, Washington (Seattle); MA, 1975, George Washington; PhD, 1985, Washington (Seattle). (1985)

Deanna M. Robinson, professor emerita. BA, 1964, MA, 1972, PhD, 1974, Oregon. (1976)

John T. Russial, associate professor emeritus. BA, 1973, Lehigh; MA, 1975, Syracuse; PhD, 1989, Temple. (1992)

William E. Ryan II, associate professor emeritus. BA, 1964, Loras; MA, 1975, EdD, 1991, South Dakota. (1987)

Kim Sheehan, professor emerita. BS, 1980, Northwestern; MBA, 1993, Boston University; PhD, 1998, Tennessee, Knoxville. (1998)

Ronald E. Sherriffs, professor emeritus. BA, 1955, MA, 1957, San Jose State; PhD, 1964, Southern California. (1965)

James R. Upshaw, professor emeritus. BA, 1962, San Diego State. (1992)

William B. Willingham, associate professor emeritus. AB, 1957, MA, 1963, Indiana. (1965)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate

Majors - Bachelor's Degree

- Journalism (BA/BS) (p. 567)
- Journalism: Advertising (BA/BS) (p. 569)
- Journalism: Media Studies (BA/BS) (p. 570)
- Journalism: Public Relations (BA/BS) (p. 572)

Minors

- Documentary Film Production (p. 573)
- Game Studies (p. 573)
- Media Studies (p. 574)
- Science Communication (p. 574)

The community of scholars and practitioners in the University of Oregon School of Journalism and Communication (SOJC) believe in our mission of developing critical, creative thinkers dedicated to ethical and innovative storytelling. Our curricular emphasis melds liberal arts studies with professional acumen, a sensibility that tracks with our goal of leveraging theory and practice to best prepare our students for the challenges of the

21st century. We help students become thinkers and makers, focusing more on perspective for a robust career than only a first-job mindset.

The SOJC offers four majors (Advertising, Journalism, Public Relations, and Media Studies) and four minors (Documentary Film Production, Game Studies, Media Studies, and Science Communication). The Advertising, Journalism, and Public Relations programs are under the accreditation authority of the Accrediting Council on Education in Journalism and Communication (ACEJMC). The ACEJMC accrediting standards are used to develop curriculum and assess our strengths in offering courses and programs. Accreditation visits occur every six years with the next one scheduled for January 2031.

Incoming students (first year or transfer students) planning to major in any of the four SOJC majors do not need to meet special admission requirements beyond the general university requirements. A university student in another major may switch to an SOJC major through the website. Current UO students must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Transfer Credit

The SOJC accepts major credits earned at other colleges and universities as follows:

1. Credits earned at schools or colleges of journalism accredited by ACEJMC are accepted for "JCOM" or "J" credit and may fulfill specific course requirements, upon review of the course syllabi.
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course requirements. They do count toward the 70-credit limit set by national accrediting standards.
3. Regardless of the number of credits transferred, students must take at least 45 credits of journalism in residence to earn a degree from the University of Oregon.
4. The school accepts equivalent courses taught at other colleges to meet the Media and Society/Making Sense of Media (J 201/JCOM 201).

Transfer students who want to discuss the transfer policy may consult the advisors in the SOJC Student Success Center.

Internship

A major may earn no more than 9 credits in Internship: [Topic] (JCOM 404).

Honors Program

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition, students complete an original piece of scholarship or creative work in the senior year.

The program targets SOJC students entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete all of the school's requirements for graduation including the school's nonjournalism requirement and university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

Graduate

Majors - Master's Degree

- Advertising and Brand Responsibility (MA) (p. 574)
- Communication and Media Studies (MA/MS) (p. 575)
- Immersive Media Communication (MS) (p. 578)
- Journalism (MA/MS) (p. 578)
- Multimedia Storytelling (MA) (p. 579)
- Strategic Communication (MS) (p. 581)

Major - Doctoral Degree

- Communication and Media Studies (PhD) (p. 576)

Certificate

- Communication Ethics

Microcredential

- Community Podcasting (p. 582)
- Video Production (p. 582)

Important note: Communication Ethics Graduate Certificate program is not accepting applications at this time.

The graduate programs at the University of Oregon School of Journalism and Communication guide students in learning about a wide range of ideas concerning the structures, functions, and roles of media and communication in society. Students in all programs study and work alongside some of the best faculty, researchers and creative professionals in the field.

Journalism (BA/BS)

<http://journalism.uoregon.edu>

Journalism is a legacy profession that today must be defined by bold solutions and entrepreneurial storytelling. Our approach challenges you to find and produce important stories via one of our three tracks: Writing & Reporting, Photojournalism, or Broadcast & On-Air. You'll learn to tell ethical, accurate, and compelling stories, beginning with How Stories Work, Journalism and Democracy, and Fundamentals of Reporting and Interviewing.

From there, the path to mastery and career readiness leads you to data journalism, investigative reporting, audio and video reporting, or multimedia stories. You'll have access to podcast and broadcast studios, along with a range of high-end equipment (think cameras, drones,

light kits, immersive tech) to produce quality work. Our faculty teach by example: award-winning writers, photographers, reporters, editors, and entrepreneurs mentor students for a changing world that needs dedicated journalists more than ever before.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the range of freedom of expression around the world and apply the principles and laws of freedom of speech to their profession/field.
- Demonstrate an understanding of how professionals and institutions shaped communications relevant to their profession/field.
- Demonstrate an understanding of diversity in domestic and global society and its impact as relevant to their profession/field.
- Demonstrate a conceptual understanding of the use and presentation of images and information and apply them to their profession/field.
- Understand and apply ethical principles appropriate to their profession/field.
- Think critically, creatively and independently.
- Conduct research and evaluate information by methods appropriate to their profession/field.
- Write correctly and clearly in forms and styles appropriate to their profession/field.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply basic numerical and statistical concepts.
- Apply tools and technologies appropriate to their profession/field, including verbal and visual presentation as apt.

Additional Requirements

- JCOM courses used to fulfill the major requirements must be passed with a letter grade of at least C- or a P* where pass/no pass is the only grading option for the course.
- Minimum 70 JCOM credits
- Minimum 70 non-JCOM credits (any subject code other than JCOM)
- Minimum 40 upper division JCOM credits
- Students must also complete one of the following:
 - SOJC minor (24 credits)
 - Other UO minor (24-40 credits)
- SOJC students who opt to minor within the SOJC may only overlap one JCOM course with the major and minor requirements.
- Upper division multilisted courses can only count toward programs in the School of Journalism and Communication if taken under the JCOM subject.

Four-Year Degree Plan

Requirements for the School of Journalism and Communication are complex, and students are strongly encouraged to consult with an advisor in the school's Student Success Center in 134 Allen Hall to ensure accurate interpretation of requirements and timely degree completion. For more information, visit the website (<http://journalism.uoregon.edu/students/undergrad/academic-requirements/>).

Journalism: Advertising (BA/BS)

<http://journalism.uoregon.edu>

Advertising can no longer be defined simply as selling. Instead, today's advertising careers mean bringing value to brands and social systems, understanding audiences and their relationship to culture, and addressing social problems with brave creative ideas. The Oregon path to an advertising career means you'll be trained to be creative, curious, and courageous, ready to bring your best.

Our creative strategist approach means your creativity and strategic thinking thrive no matter if you're a strategist, a writer, an art director, a media planner, or a business leader. You'll create a portfolio of evidence that shines a light to help brands, organizations, and big ideas be better, do better in a global culture. Here, you have opportunities to build your dream career. Be a part of the student-run agency, Allen Hall Advertising, or the award-winning legacy of AdTeam, part of the National Student Advertising Competition. Become a sports strategist or a sustainable brand leader or a filmmaker who travels the world. It's all a part of our flourishing creative community dedicated to making things of meaning.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the range of freedom of expression around the world and apply the principles and laws of freedom of speech to their profession/field.
- Demonstrate an understanding of how professionals and institutions shaped communications relevant to their profession/field.
- Demonstrate an understanding of diversity in domestic and global society and its impact as relevant to their profession/field.
- Demonstrate a conceptual understanding of the use and presentation of images and information and apply them to their profession/field.
- Understand and apply ethical principles appropriate to their profession/field.
- Think critically, creatively and independently.
- Conduct research and evaluate information by methods appropriate to their profession/field.
- Write correctly and clearly in forms and styles appropriate to their profession/field.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply basic numerical and statistical concepts.
- Apply tools and technologies appropriate to their profession/field, including verbal and visual presentation as apt.

For more information, visit the website (<http://journalism.uoregon.edu/students/undergrad/academic-requirements/>).

Journalism: Media Studies (BA/BS)

<http://journalism.uoregon.edu>

With a degree in media studies, you don't just learn how to create media. You ask why it matters. You examine its history, research its forms, and explore its effect on some of the most pressing issues of our time, from free speech to issues of gender, diversity, and politics. At the SOJC, you'll unpack the latest research with guidance from some of the field's leading minds and develop the skills employers need.

Media Studies (MEST) minors may not also earn a major in Journalism: Media Studies (JMS).

The undergraduate media studies major has as its goal to produce students who display purposeful, reflective judgment concerning what to believe or what to do, especially as relates to the media and to communication as a whole. The media studies faculty has delineated 11 core competencies, similar to those of ACEJMC, but has recast them to reflect the sequence goal.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the range of freedom of expression around the world and apply the principles and laws of freedom of speech to their profession/field.
- Demonstrate an understanding of how professionals and institutions shaped communications relevant to their profession/field.
- Demonstrate an understanding of diversity in domestic and global society and its impact as relevant to their profession/field.
- Demonstrate a conceptual understanding of the use and presentation of images and information and apply them to their profession/field.
- Understand and apply ethical principles appropriate to their profession/field.

Journalism: Public Relations (BA/BS)

<http://journalism.uoregon.edu>

Public relations is all about connecting people—to information, to organizations, and to other people. In our nationally certified program, you'll learn how to convey the right message to the right audience at the right time while forging relationships built on ethics, trust, and transparency.

Our students plan, create, and strategize in real-world settings. You'll build your portfolio as you develop innovative campaigns for real clients in our student-run public relations firm (<https://blogs.uoregon.edu/allenhallpr/>), or expand your network in the Public Relations Student Society of America (<https://prssa.prsa.org/>). Travel the country (<https://around.uoregon.edu/sojc/public-information-officer/>) to rub elbows with public relations professionals, tour Silicon Valley agencies, and peek behind the scenes of high-profile communication departments at companies like Nike and Google.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand the range of freedom of expression around the world and apply the principles and laws of freedom of speech to their profession/field.
- Demonstrate an understanding of how professionals and institutions shaped communications relevant to their profession/field.
- Demonstrate an understanding of diversity in domestic and global society and its impact as relevant to their profession/field.

- Demonstrate a conceptual understanding of the use and presentation of images and information and apply them to their profession/field.
- Understand and apply ethical principles appropriate to their profession/field.
- Think critically, creatively and independently.
- Conduct research and evaluate information by methods appropriate to their profession/field.
- Write correctly and clearly in forms and styles appropriate to their profession/field.
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness.
- Apply basic numerical and statistical concepts.
- Apply tools and technologies appropriate to their profession/field, including verbal and visual presentation as apt.

Documentary Film Production Minor

The Minor in Documentary Film Production combines hands-on and conceptual aspects of documentary film production. The minor is designed for students coming from a range of disciplines to serve their interest in media content production, with emphasis in documentary film/video production.

Students who want to minor in documentary film production should declare the minor online. You must have at least a 2.00 UO GPA to apply to the minor. SOJC majors pursuing this minor may overlap one "JCOM" course between the major and minor. Jour: Media Studies (JMS) majors pursuing the documentary studies major track should discuss implications of this restriction with their SOJC advisor.

Documentary Film Production Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits

Total Credits		24

Restrictions

- SOJC majors pursuing this minor may overlap one "JCOM" course between the major and minor.

Game Studies Minor

The Game Studies minor gives students an understanding of how to communicate and understand the culture of gaming. It is one of the biggest entertainment industries and one with the most evolving technology industries and occupations from social media influencers to artificial intelligence. This minor will help prepare those who want to communicate about, or for, game companies. It is not a game development minor.

The minor requires 24 credits; 4 are required and 20 are chosen from a list of approved electives. Students who meet the prerequisites for the ARTD courses may use up to three selected ARTD courses toward the minor.

Students who want to minor in game studies should declare the minor online. You must have at least a 2.00 UO GPA to apply to the minor. SOJC majors pursuing this minor may overlap one "JCOM" course between the major and minor. Jour: Media Studies (JMS) majors should discuss the implications of this restriction with their SOJC advisor.

Game Studies Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

- Upper division multilisted courses can only count toward programs in the School of Journalism and Communication if taken under the JCOM subject.

Science Communication Minor

<http://journalism.uoregon.edu>

The Science Communication Minor offers an undergraduate focus on the issues, skills and scholarship growing around the science of science communication. It offers majors across campus a way to explore the field and apply the research and tools of communicators in a variety of contexts, exploring original research and story development and production. It will also be a connector between students and careers that rely on science communication.

The minor requires 24 credits; eight are from UO's science area of inquiry requirement (">3" or ">4" courses). All courses must be taken graded and passed with a C- or better.

Students who want to minor in science communication should declare the minor online. You must have at least a 2.00 UO GPA to apply to the minor. [SOJC majors pursuing this minor may overlap one eligible "JCOM" course between the major and minor.](#)

Science Communication Minor Requirements

The minor requires 24 graded credits from approved courses. Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better. All JCOM courses for the minor must be taken through the University of Oregon.

Code	Title	Credits
Required courses (12 credits/3 courses):		
Any two area-satisfying courses used to fulfill UO's Science (>3 or >4) core education requirement. Must be graded and passed with a C- or better; recommend completing this before taking JCOM 385.		8

Advertising and Brand Responsibility (MA)

<https://journalism.uoregon.edu/academics/graduate-programs/advertising-and-brand-responsibility/>
Carolyn Silva Chambers, Interim Director

207 Allen Hall
 541-346-9141
cchavez4@uoregon.edu

Based at our Eugene campus, this one-year, full-time master's program in Advertising and Brand Responsibility (MABR) operates on the idea that successful brands in the twenty-first century must be authentic and committed to the common good and benefit of society. Issues of sustainability, social justice, and equity can and should be strategic considerations for brands, people and organizations. Who can help shape these ideas during challenging times? This degree prepares students for these career opportunities. This industry must have talented people ready to consider these important considerations in a strategic manner.

Coursework examines the theory and practice of persuasive communication and brand responsibility. Students participate in a three-term seminar that trains them in best practices in planning, brand management, and creative messaging. The course of study concludes with a professional project in which students develop a campaign, a research paper, audience or thematic guidebook, or some other effort on brand responsibility under the guidance of an advisor. Students must earn at least 46 graduate credits.

Admission Process

Please visit the program's website (<https://journalism.uoregon.edu/academics/graduate-programs/advertising-and-brand-responsibility/>).

Master's Degree in Advertising and Brand Responsibility

This Eugene-based program leads to a master of arts or master of science degree in advertising and brand responsibility. This one-year, full-time program operates on the idea that successful brands in the 21st century must be authentic and committed to the common good and the benefit of society. Diverse brands such as Nike, Patagonia, Cheerios, and Yoplait have successfully addressed social issues while building brand equity by recognizing the power of persuasive communication in making the world a better place.

Course work examines the theory and practice of persuasive communication and brand responsibility; students participate in a three-term seminar that trains students in best practices in planning, brand management, and creative marketing. The course of study concludes with a professional project in which students develop a campaign, a research paper, or some other effort on brand responsibility under the guidance of an advisor.

Applicants should have an interest in the field and some background, either professional or academic, in advertising, public relations, marketing, or strategic communication.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Degree Requirements

In order to maintain academic standing as a graduate student, all students must meet the requirements specified by the Division of Graduate Studies (DGS) and the SOJC:

- Per DGS policy, graduate students must maintain at least a 3.0 grade point average (GPA) in graduate courses.

- Grades of D+ or lower for graduate courses are not accepted for graduate credit but are computed in the GPA. A grade of N (no pass) is not accepted for graduate credit.
- A grade of pass (P) must represent work equal to or better than a B-.
- Per DGS policy, a GPA below 3.0 at any time during a graduate student's studies or the accumulation of more than five credits of N or F grades--regardless of the GPA--is considered unsatisfactory.
- At least 46 graduate (500 & 600-level) credits (49 if completing a thesis rather than a terminal project)
- At least 24 credits must be graded
- At least 9 credits at at 600-level
- At least 6 credits of JCOM 609 or 9 credits of JCOM 503

Master's Degree Requirements

JCOM 609	Terminal Project ³	6-9
	or JCOM 503 Thesis	
Electives ²		12
Total Credits		46-49

¹ Yearlong course. Required for every term (Fall, Winter, Spring).

² Electives include courses in green brand strategy, writing design concepts, quantitative and qualitative methods, "ideasmithing," interactive media, and courses taught as part of the strategic communication master's program such as Introduction to Strategic Communication Marketing (JCOM 616), Strategic Communication Leadership (JCOM 618), or Strategic Communication: [Topic] (JCOM 624).

³ With program director approval, students may substitute 6 credits of JCOM 609 Terminal Project for 9 credits of JCOM 503 Thesis, which means that at least 49 graduate credits must be completed.

Communication and Media Studies (MA/MS)

Julianne Newton, Director

206 Allen Hall
541-346-2167
jhnewton@uoregon.edu

The Eugene-based master's program in Communication and Media Studies is aligned with our doctoral program in exposing students to a wide range of ideas concerning the structure, function and role of

media in society. Areas of overlapping faculty and program strength that students may study include: media institutions; science, health, and environmental communication; technology and society; game studies; global media; critical/cultural approaches to communication; persuasion and media psychology; media and public life; media ethics and law; journalism studies; and visual communication.

Students in the master's program in Communication and Media Studies must earn at least 46 graduate credits.

Goals for individual students vary. Some seek preparation for doctoral work; others pursue careers as leaders and innovators who actively contribute to improving the quality of media and communications.

Admission Process

Please visit the program's website (<https://journalism.uoregon.edu/academics/graduate-programs/media-studies-masters/>).

Program Learning Outcomes

- Upon successful completion of this program, students will be able to:
- Discuss cultural, societal, global, economic and technological issues in media and communication.
 - Understand theories that inform the study of media and communication.
 - Design and present an empirical study that brings in new knowledge in the field of Media Studies.
 - Design and present research that contributes new knowledge in communication and media studies.
 - Demonstrate proficiency in an outside area of study.

Communication and Media Studies (MA/MS) Requirements

Code	Title	Credits
Required Core		18
JCOM 611	Media and Society	
JCOM 612	Media Theory I	
JCOM 613	Media Theory II	
JCOM 641	Qualitative Research Methods	
	or JCOM 642 Quantitative Research Methods	
Additional Methods Course		4
Methodology course (inside or outside the School of Journalism and Communication)		
Additional SOJC Conceptual Courses		4
Additional 600-level, or approved 500-level, SOJC conceptual courses ²		
Graduate Level Credits Outside the SOJC		8
At least 8, but no more than 16, graduate credits outside the SOJC ³		
Thesis/Terminal Projects Credits		
JCOM 503	Thesis	6-9
	or JCOM 609 Terminal Project	
Total Minimum Credits		46

¹ Taken in the first year of graduate study.
² Subject to approval by the school's graduate affairs committee.

- ³ The courses chosen must be part of a consistent, related, educationally enhancing plan that has been approved by the student's advisor prior to enrollment.
- ⁴ Approved and supervised by a faculty committee. A written proposal, approved by the advisor and committee, is required before work is begun on either a thesis or project. A student should register for Thesis (JCOM 503) or Terminal Project (JCOM 609) during the terms in which the research and writing occurs.

This program awards an MA degree for students who have completed two years of foreign language within the past seven years. For students who have not completed this foreign language requirement, the program awards an MS. No foreign language background is required to receive an MS.

Communication and Media Studies (PhD)

Julianne Newton, Director

206 Allen Hall
541-346-2167
jhnewton@uoregon.edu

The doctoral program in Communication and Media Studies provides a foundation in theory and methods for research in the field of communication and media studies. Students acquire an overview of theoretical and methodological approaches to studying the gathering, expression and dissemination of ideas, images and information in society. Each student also develops both an inside and outside area of specialization. Each student's program is monitored to facilitate preparation for comprehensive exams and dissertation research, and students work closely with advisors and other faculty in small seminar settings and via independent study.

Our internationally recognized faculty offer students the opportunity to study with leading experts in a range of overlapping specialties, including: media institutions; science, health, and environmental communication; technology and society; game studies; global media; critical/cultural approaches to communication; persuasion and media psychology; media and public life; media ethics and law; journalism studies; and visual communication.

Admission Process

Please visit the program's website (<https://journalism.uoregon.edu/academics/graduate-programs/media-studies-phd/>).

Program Learning Outcomes

- Upon successful completion of this program, students will be able to:
- Acquire an understanding of key theories that define the field of media studies.
 - Gain a working understanding of empirical methods.
 - Demonstrate a proficiency in one outside area and one outside.
 - Develop and present an empirical research project.
 - Communicate their findings in the form of a dissertation.

Communication and Media Studies Major Requirements

Candidates for the PhD degree in communication and media studies take a minimum of 81 graduate-level credits of course work beyond the master's degree. The program concludes with a dissertation.

Note: Please review the SOJC graduate student handbook for updated program requirements, which do not yet appear in the catalog: <https://sojcstudent.uoregon.edu/graduate/student-handbook/>

Candidates for the Ph.D. degree typically take 81 graduate-level credits of course work beyond the master's degree; the exact number of credits depends on the student's prior graduate study experience. The program concludes with a dissertation. The Division of Graduate Studies requires that doctoral students spend at least one academic year (three consecutive terms of full-time study with a minimum of 9 completed graduate credits per term) in residence on the Eugene campus after being accepted into a doctoral program. All coursework leading to the doctoral degree must be completed within seven years.

Code	Title	Credits
Core Sequence		
JCOM 615	Teaching and the Professional Life	
JCOM 612	Media Theory I	
JCOM 613	Media Theory II	
JCOM 641	Qualitative Research Methods	
JCOM 642	Quantitative Research Methods	
JCOM 643	Advanced Doctoral Research	
JCOM Communication/Media Studies Inside Specialty Courses ¹		12
Outside Field Courses ²		12
Methodology Courses ³		4-5
JCOM 603	Dissertation	18
Total Credits		81

¹ Each student must specify an area of expertise within the SOJC. An area of specialization may coincide with the current areas of faculty expertise or may represent another area within the field of communication/media studies. The area of specialization must be supported with relevant course work, which typically includes three to four courses (12 credits minimum) in the SOJC, although courses outside the school may also be appropriate.

² In close consultation with their advisor, each student designs an integrated outside-related field component consisting of 3-4 courses (12 credits minimum) for their course of study. The Ph.D. program stresses the interconnectedness of communication/media studies with other disciplines; therefore, the outside field may involve more than one outside department.

³ At least one additional methodology course must be taken. These courses may be taken outside the school.

- Methodological Tool Requirement: A student may be required to take additional methods courses depending on the student's specific research aims within and/or outside the SOJC.
- University Teaching: All students are required to take JCOM 619 Teaching and Professional Life during their first term in the program. After completing this course, appropriate teaching experience in the SOJC will be arranged and coordinated by the Doctoral Program Director in coordination with other SOJC leadership.

- Comprehensive Examination: After course work is complete, the student, the advisor, and the student's comprehensive examination committee will schedule an examination process that synthesizes what the student has learned. Student will register for 9 credits of JCOM 601 Research and JCOM 605 Reading credits while they study for their comprehensive exams.
- Proposal Approval: Within one or two terms of the comprehensive exams, the student must complete a dissertation proposal in consultation with their chair and committee members. Once Page 52 the proposal is complete, the student must arrange a meeting with the committee to discuss the proposal and agree on any changes. The student should notify the Graduate Programs Assistant with the date and time of the meeting. The student should bring proposal approval forms to the meeting. Once the proposal has been approved by all committee members, the student may advance to candidacy and begin work on the dissertation. It is expected that doctoral students will advance to candidacy within two terms of passing the comprehensive exam.
- Dissertation: The dissertation is a substantial document presenting independent research that makes a contribution to the current body of knowledge in a scholarly field. Students must enroll for at least 18 credits of JCOM 603 after passing the comprehensive exams.
- Doctoral students are required to maintain a cumulative GPA of 3.25 and to earn no lower than a B- in graded and Pass/No Pass courses. Course grades below B- are not accepted toward degree credits but are computed in the GPA. Should students earn a grade of lower than a B- in any of the 27 CMS core, required credits, they must retake those credits and earn a B- or higher.
- Doctoral students are required to take at least 54 of their 81 total minimum credits as graded courses with a grade of B- or better. A grade of N (no pass) in a Pass/No Pass course is not accepted for graduate credit.
 - Core CMS courses = 27 credits
 - Inside specialty = 12 credits minimum
 - Outside specialty = 12 credits minimum
 - Third Methods Course = 3 credits minimum
 - Total = 54 graded credits
- Students may count up to 27 P/N credits toward their 81 minimum credits required for a CMS PhD. These include JCOM601 Research, JCOM605 Reading/Conference and JCOM 603 Dissertation, as well as similar outside independent studies courses.
- Doctoral students are expected to take scheduled seminars to satisfy their inside and outside specializations, working with coursework professors when possible, to tailor seminar work toward their specializations. When supervised independent study is needed to support specializations, and appropriate seminars are not available, students may work with their advisors to obtain approval for a limited number of independent study courses to count toward their required inside/outside specializations. These independent study courses must be described in a student's first- and second-year program statements along with course descriptions and rationales for why the courses were needed and how the courses support the student's and degree plan."
- Note: JCOM 605 Reading and Conference refers to independent study credits taken through agreement with a faculty supervisor. "Conference" does NOT refer to work related to a scholarly conference.

Immersive Media Communication (MS)

<https://journalism.uoregon.edu/academics/graduate-programs/immersive-media> (<https://journalism.uoregon.edu/academics/graduate-programs/immersive-media/>)

Donna Davis, Director

SOJC Portland
503-412-3658
dzdavis@uoregon.edu

In this fully online master's program in Immersive Media Communication, students will learn how to design and critically analyze strategies that use emerging technologies to influence key audiences. Along the way, students will work with highly skilled faculty and become part of a tight-knit cohort of professionals who are passionate about using immersive media as effective and ethical communication tools.

Our program prepares students for the communication trends of the future by teaching students how to create immersive and experiential marketing strategy, including user experience and design, the psychology of immersive media, and how to plan content creation, including the building process and production pipelines, for AR, VR, and XR platforms.

This 46-credit-hour program is designed to be completed in one year, but the pace can flex to meet students' needs. All students will receive a tech package (included in tuition) so they can complete coursework at home, or they can use our state-of-the-art immersive media gear in the Oregon Reality Lab based at SOJC Portland.

Admission Process

Please visit the program's website (<https://journalism.uoregon.edu/academics/graduate-programs/immersive-media/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate an understanding of immersive media with a particular focus on immersive VR, AR, and XR experiences.
- Clearly define key attributes of augmented (AR), virtual (VR), and cross reality (XR) important to communication and its potential use.
- Consider appropriate and measurable communication outcomes for targeted publics using AR/VR/XR/VWs.
- Demonstrate creativity in approaching communications solutions using immersive technologies.
- Articulate ethical, best practices in AR/VR/XR and VWs.

Degree Requirements

- 46 credits if completing a Terminal Project or Internship; 49 credits if completing a Thesis
- At least 24 credits graded
- At least 9 credits at 600-level
- At least 6 credits of JCOM 609 or JCOM 604 or 9 credits JCOM 503 (thesis)

Immersive Media Communication Major Requirements

Code	Title	Credits
Immersive Media Communication Core		24
JCOM 664	Foundations in Immersive Media

JCOM 667	User Experience Design	
JCOM 668	Immersive Marketing in Communication (Experiential Marketing)	
JCOM 669	Creating for Immersive Platforms	
JCOM 610	Experimental Course: [Topic] (Current Topics in Immersive Media)	
Mass Communication Core		18-21
JCOM 570	Strategic Communications Research Methods	
JCOM 611	Media and Society	
JCOM 629	Media and Communication Ethics: [Topic] (Communication Ethics in the Digital Age)	
JCOM 609	Terminal Project ¹	
	or JCOM 604 Internship: [Topic]	
	or JCOM 503 Thesis	
Professional Specialization Elective Core (no less than 4 credits) ²		4
JCOM 624	Strategic Communication: [Topic]	
JCOM 610	Experimental Course: [Topic]	
Total Credits		46-49

¹ At least 6 credits of JCOM 609 Terminal Project or JCOM 604 Internship, OR 9 credits of JCOM 503 Thesis

² Graduate courses from the Eugene-based Game Studies minor can also serve as elective credits. Check the schedule and with the instructor to confirm availability of online courses. Students in the Portland metro area can also take any of the immersive media building classes offered in the Oregon Reality Lab to satisfy elective credits.

Journalism (MA/MS)

<https://journalism.uoregon.edu/academics/graduate-programs/journalism> (<https://journalism.uoregon.edu/academics/graduate-programs/journalism/>)

Will Yurman, Interim Director

310 Allen Hall
541-346-3754
yurman@uoregon.edu

In our full-time, one-year program in Eugene, journalism master's students learn the fundamentals of writing and reporting for journalism, including story research and development, investigative journalism, fact-finding, all with an emphasis on writing fact-based non-fiction. They will also study the ethics and laws that are the underpinning of journalism.

The program is designed for students with little or no academic or professional journalism experience who want to acquire professional skills within an intellectual context.

The 46-credit program begins with a summer immersed in learning fundamental journalism skills including interviewing, research, writing,

photography and video, and is followed by three full-time terms of classes, allowing students to earn their degree in 12 months. Over the course of the year students will create a professional project or complete an internship to finish their degree requirements. This program is offered on our main campus in Eugene.

Admission Process

Please visit the program's website (<https://journalism.uoregon.edu/academics/graduate-programs/journalism/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand and analyze journalism's role in society.
- Apply research and reporting skills to produce journalistic stories.
- Identify news story structures and demonstrate an ability to write clearly.
- Understand and analyze the economics and delivery of contemporary news and media.
- Demonstrate an ability to produce and showcase professional, quality work.
- Use multimedia skills to produce journalistic stories across platforms.

The Eugene-based Journalism master's program is geared toward students of any background. It serves students who have worked professionally and are looking to expand their skills as well as students who are new to the field. No previous journalism experience is required for admission.

The program emphasizes writing and reporting for journalism and non-fiction. Every student will also take a course in basic multimedia skills. Advanced multimedia classes in audio, video and photojournalism are available with permission for students with previous experience.

Note: Please review the SOJC graduate student handbook (<https://sojcstudent.uoregon.edu/graduate/student-handbook/>) for updated program requirements, which do not yet appear in the catalog.

Journalism Requirements

Code	Title	Credits

JCOM 508	Workshop: [Topic] (Visual Journalism)	4
JCOM 611	Media and Society	4
JCOM 610	Experimental Course: [Topic] (Public Affairs Journalism)	4
JCOM 610	Experimental Course: [Topic] (Law and Business for Doc & Journalism)	4
JCOM 629	Media and Communication Ethics: [Topic]	4
JCOM 609	Terminal Project	6
or JCOM 604	Internship: [Topic]	
Electives		16
Total Credits		46

- At least 46 graduate (500 or 600-level) credits (at least 24 graded)
- At least 6 credits of JCOM 609 Terminal Project or JCOM 604 Internship
- At least 9 credits at 600 level

- Cumulative GPA of 3.00 or higher
- This program awards an MA degree for students who have completed two years of foreign language within the past seven years. For students who have not completed this foreign language requirement, the program awards an MS. No foreign language background is required to receive an MS.

Multimedia Storytelling (MA)

<https://journalism.uoregon.edu/academics/graduate-programs/multimedia-journalism/> (<https://journalism.uoregon.edu/academics/graduate-programs/multimedia-journalism/>)

Wes Pope, Director

SOJC Portland
503-412-3759
wpope@uoregon.edu

The Portland-based master's degree in Multimedia Journalism blends the best of journalism's past with the promise of its future. In today's fluid media landscape, successful journalists must be able to report and tell compelling non-fiction stories across multiple platforms while employing the ethics and integrity that have distinguished the industry. Students in the MMJ program learn how to tell stories that matter in video and other media to make a difference in their communities.

Our program focuses on journalistic storytelling in video, audio, photography, data visualization, and virtual reality. Classes typically meet weeknights and weekend days. The 48-credit program can be completed in five terms, but students have the option to negotiate a slower pace.

Note: Current SOJC Journalism undergraduates can apply for the accelerated MA in Multimedia Journalism. Students should work with the MMJ program director to meet course requirements.

Admission Process

Please visit the program's website (<https://journalism.uoregon.edu/academics/graduate-programs/multimedia-journalism/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Acquire the expertise in multimedia storytelling skills to understand fundamental approaches to narrative storytelling in order to create dynamic, engaging multimedia productions.
- Understand and apply the concepts and techniques of engaged journalism to address public interests and concerns.
- Demonstrate an understanding of contemporary journalism ethical standards, including issues of equity and inclusion, fairness, balance, accuracy, and transparency across the media landscape.
- Critically assess the state of the journalism industry. Evaluate content delivery methods across media platforms.
- Create professional portfolio-caliber work.

Note: Please review the SOJC graduate student handbook for updated program requirements, which do not yet appear in the catalog: <https://sojcstudent.uoregon.edu/graduate/student-handbook/>

JCOM 611	Media and Society	4
Electives¹		10
JCOM 630	Multimedia Production: [Topic]	
JCOM 638	Community Voices	
JCOM 604	Internship: [Topic]	
Total Credits		48

¹ Other SOJC graduate level classes, including those offered by the IMC and/or STC programs in Portland may count. Students may also choose to take interdisciplinary classes across the UO as well as via our tuition-sharing agreement with Portland State University.

Multimedia Journalism - Accelerated Master's Requirements

Students must take a minimum of 10 graduate-level credits (and no more than 16) per the requirements below while an undergraduate. Students must complete at least one course from Section I below. They should work closely with their MMJ adviser to determine how to reach the 10-credit minimum.

1. MMJ Core Course: At least one of the following courses must be taken during senior year:

- J611 Mass Comm & Society
- J627 MMJ Foundations
- J654 Reporting within Communities - or allowable substitute: J563 Engaged Journalism
- J629 Topics in Media and Communication Ethics: Digital Ethics or J596 Visual Ethics

2. Multimedia or Area Elective(s): Students take may take one or more elective courses to reach the 10-credit minimum of graduate-level credits. Electives can include SOJC electives such as those on the list below; MMJ electives offered in Portland; up to 2 credits of J601 while working on the terminal project proposal (see below); or graduate-level non-SOJC electives that align with the student's MMJ terminal project plans. Students should work closely with their advisor to select appropriate electives.

Example electives:

J510 Media Entrepreneurship

J532 Reporting for Electronic Media

J536 Topics: Web Design

J563 Audio Story

J566 Advanced Photojournalism

J601 Research

J608 Audio Storytelling

J608 Motion Graphics

J610 VR Building

J608 Drone Cinematography

J608 Intro to 360 Video

3. MMJ Terminal Project Preparation: In order for students to complete the 4+1 program on time, they will need to arrive at the start of their fifth year in Portland prepared to move forward on their terminal project. Therefore, during their senior year, students in the 4+1 program are required to work with their advisor and/or the co-directors of the program to develop a short list of project ideas and begin initial research toward creating a project proposal and developing a production plan for their project. Students may enroll in J601 Research credits while completing this requirement, but are not required to do so.

4. After admission to the program and throughout their senior year, students will work with their adviser to develop a **written graduation plan**, including **quarterly check-ins** to update the plan as SOJC course offerings become listed for each term.

5. As per Graduate School requirements, students must complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the quarter in which they take their first graduate courses as part of the accelerated program. Students are expected to complete their remaining MMJ degree requirements within 15 months of beginning that program. Students are strongly advised to begin production work toward their terminal project during the summer after their senior year.

Overall, students must begin the MMJ program with# 10 #credit hours comprised of

a) at least one required course from section 1 above,

b) as needed, an additional elective(s),

Students must take the required number of remaining credits during their 5th (MMJ) year to reach the 48 required for the program. (For example, if 10 graduate-level credits are taken senior year, 38 credits remaining credits must be completed in the 5th year).

Total program minimum required credits: 48

Admission Procedure

Students must apply for the accelerated pathway toward the MMJ degree in the spring term of their junior year. Applications are available from the MMJ program co-directors or from the SOJC's graduate coordinator.

To be eligible for admission, applicants must have earned a B or better in J331 Digital Video Production by the time of application; alternatively, applicants can be provisionally admitted and complete J331 with a grade of B or more in their senior year.

Applicants must provide a short written statement of purpose along with a portfolio of their journalistic work.

Strategic Communication (MS)

<https://journalism.uoregon.edu/academics/graduate-programs/strategic-communications> (<https://journalism.uoregon.edu/academics/graduate-programs/strategic-communications/>)

Attila Schillinger, Director

325 Allen Hall
541-346-3511
attilas@uoregon.edu

In our flexible Portland-based master's program in Strategic Communication, students master a broad skill set encompassing creativity, critical thinking, strategic analysis, ethics, and practical application. The program is designed for working professionals who know that in a complex and rapidly changing world, communicating strategically is more important than ever. #Classes meet evenings and weekends.

The program consists of a core of required four-credit communication courses complemented by two-credit, shorter-term classes, culminating with a capstone project. Coursework is consistent with the Public Relations Society of America's guidelines for accreditation.

Students may choose between two program timelines to complete the 48-credit program: the standard two-year, six-term pathway or the accelerated five-term pathway. Students may also choose to complete the program on a part-time basis and extend the total time to degree.

Admission Process

Please visit the program's website (<https://journalism.uoregon.edu/academics/graduate-programs/strategic-communications/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate the leadership skills necessary to facilitate professional teams, design communication campaigns, and advise top-level management and clients in moving their goals forward through effective communication.
- Understand the communication challenges faced by organizations doing business locally and globally.
- Analyze the political, economic, and cultural significance of the media and understand the responsibility inherent in creating and distributing effective messaging.
- Understand theoretical concepts and apply them to understanding how professionals and institutions shape communications relevant to their profession/field.
- Demonstrate an understanding of ethical principles and apply them to work ethically in pursuit of truth, fairness, and diversity.
- Analyze diversity in a global society as relevant to their profession/field with an expectation of engaging in equity and inclusion.
- Critique information to determine accuracy, authenticity, and appropriateness for developing content and advancing research and communication agendas.
- Critically evaluate self and peer work, suggesting performance improvements in materials in a variety of formats.

- Demonstrate proficiency in the range of research methods (primary, secondary, quantitative, and qualitative) used by communication researchers.
- Evaluate data and measure targeted outcomes associated with communication strategies.

Strategic Communication (MS) Requirements

Successful applicants for this program typically have significant professional experience as well as strong academic credentials. Candidates for this MS degree must earn at least 48 credits with a cumulative GPA of 3.00 or better. Courses that do not carry graduate credit do not count toward the graduate credit minimum and are not included in the GPA.

Note: Please review the SOJC graduate student handbook (<https://sojcstudent.uoregon.edu/graduate/student-handbook/>) for updated program requirements, which do not yet appear in the catalog:

Degree Requirements

- Cumulative GPA of 3.00 or higher
- Required 48 graduate credits
 - At least 24 credits graded
 - At least 9 credits at 600-level

Strategic Communication Major Requirements

Code	Title	Credits
Strategic Communication Core		
JCOM 629	Media and Communication Ethics: [Topic]	4
JCOM 623	Creativity in Strategic Communication	4
JCOM 621	Foundations of Strategic Communication	4
JCOM 624	Strategic Communication: [Topic] (Campaign Planning and Management)	2

JCOM 610	Experimental Course: [Topic] (Strategic Influence)	4
JCOM 624	Strategic Communication: [Topic]	2
Total Credits		48

¹ Students completing a Terminal Project take 6 credits of JCOM 609. Students approved to complete the Portfolio option take 6 additional credits of elective and 1 credit of JCOM 609. Students approved to complete a Thesis option take 9 credits of JCOM 503.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Community Podcasting Microcredential

This program is designed for professionals and community members in the greater Portland metro region and environs who want to acquire skills in audio recording and podcasting to tell community stories. This program provides a pathway for people who want to advance their knowledge and skill development without committing to a full graduate degree program.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Build proficiency in audio recording and podcasting\
- Build proficiency in participatory methods for creating and disseminating community narratives

Community Podcasting Microcredential Requirements

School of Law

<http://law.uoregon.edu>

Jennifer W. Reynolds, Dean | Dave Frohnmayer Chair in Leadership and Law

105 Knight Law Center
1221 University of Oregon
Eugene, OR 97403-1221
541-346-3852
Fax: 541-346-1564
lawadmissions@uoregon.edu

The School of Law offers a three-year, full-time professional curriculum leading to the doctor of jurisprudence (JD) degree; a two-year, full-time program leading to an interdisciplinary master's degree (MA or MS) in conflict and dispute resolution; a one-year, full-time program leading to a master of laws (LLM) with concentrations in American Law, Business Law, and Environmental and Natural Resources Law; and an undergraduate minor in legal studies.

The law school's broad-based curriculum and clinical programs prepare students for careers in almost every practice area and professional setting. Special centers and programs include appropriate dispute resolution; business law; criminal justice; environmental and natural resources law; estate planning; family law; intellectual property law; international law; legal research and writing; the Portland program; public law and policy; sports law; tax law; and the Wayne Morse Center for Law and Politics.

The Center for Career Planning and Professional Development offers counseling, seminars, mentoring programs, and connections to Oregon Law graduates throughout the world.

The William W. Knight Law Center offers a spacious, welcoming environment for study and community activities. The building houses the School of Law, the Wayne Morse Center for Law and Politics, Resolution Oregon, and the Oregon Law Commission.

The John E. Jaqua Law Library is a light-filled space occupying three floors, housing collections that support coursework, research, and instruction in Law. The Law Library also provides access to computers, reservable study rooms, and numerous services to support teaching and learning. It is located on the second floor of the Knight Law Center. Attorney librarians teach students how to perform legal research in class and in the library.

Oregon Law students run three journals and nearly 30+ active student organizations, serve the public in numerous clinical programs, and organize the world's oldest and largest public interest environmental law conference, attracting more than 3,000 participants each year. In addition, a wide range of options are available to students to perform pro bono work in the local community, continuing the strong tradition of Oregon Law's commitment to public service.

Academic Calendar for Law Students

Law students are on the semester schedule. On this schedule, registration for fall and spring semesters begins the third week of April, fall semester examinations are given before the winter vacation, and the spring semester ends in mid-May. More information about calendar dates

is available online at registrar.uoregon.edu/calendars/academic (<http://registrar.uoregon.edu/calendars/academic/>).

January Term

The School of Law offers a collection of one-week intensive courses held the week before the start of the regular spring semester.

Summer Session

The School of Law offers a summer session that is open to law students who have completed at least one year of legal studies and who are in good standing at a law school accredited by the American Bar Association. Summer session is not open to beginning law students.

Faculty

Sarah J. Adams-Schoen, assistant professor (land use, state and local government, ocean and coastal law). BA, 1994, Sarah Lawrence; MSc, 1995, London School of Economics; JD, 2002, Lewis and Clark; Federal Bar for U.S. District Court, 2002; Oregon bar, 2002. (2019)

Angela Addae, assistant professor (civil rights, race and law, social enterprise law). BA, 2011, Fisk; MA, 2013, JD, 2016, PhD, 2019, Arizona; Oregon bar, 2016. (2019)

Adell L. Amos, Clayton R. Hess Professor of Law (environmental and natural resources law). BA, 1995, Drury; JD, 1998, Oregon (Coif); Missouri bar, 1999. (2005)

Howard Arnett, professor of practice (Indian law). BA, 1970, Stanford; MSc, 1971, London School of Economics; JD, 1977, Oregon; Oregon bar, 1977. (2019)

Kristen Bell, assistant professor (criminal law, advanced appellate advocacy). BA, 2005, Stanford; PhD, 2010, North Carolina; JD, 2013, Stanford; California bar, 2014. (2018)

Carl S. Bjerre, Wallace L. and Ellen A. Kaapcke Law Professor of Law (commercial law, contracts). BA, 1982, California, Berkeley; JD, 1988, Cornell (Coif); New York bar, 1989; Oregon bar, 2001. (1996)

Roy Catalani, assistant clinical professor; Director, Nonprofit Clinic. BA, 1982, JD 1986, Oregon. (2023)

Stuart Chinn, Frank Nash Professor of Law (constitutional law, legislation). BA, 2001, MA, 2001, JD, 2004, PhD, 2008, Yale. (2009)

Andrea Coles-Bjerre, associate professor (creditors' rights, bankruptcy, civil procedure); faculty director, business law. BA, 1984, Barnard; JD, 1987, Brooklyn Law; New York bar, 1988. (1996)

Bryan Dearing, LRW assistant clinical professor (legal research and writing). BA, 2022, Portland; JD, 2005, Drake. (2023)

Greg Dotson, associate professor (environmental and energy law). BA, 1991, Virginia Polytechnic Institute and State; JD, 1995, Oregon. (2016)

Garrett Epps, professor of practice (constitutional law). BA, 1972, Harvard; MA, 1975 Hollins; JD, 1991, LLM, 1994, Duke. (2021)

Michael Fakhri, professor (international business transactions, law and development). LLB, 2001, Queen's (Ontario); LLM, 2006, Harvard. (2010)

Elizabeth R. Frost, LRW associate clinical professor (legal research and writing, real estate transactions). BA, 2002, Yale; JD, 2006, Michigan, Ann Arbor. (2010)

Kristie Gibson, assistant clinical professor (in-house counsel, business law). BA, JD, Oregon. LLM Willamette. (2018)

Erik Girvan, Bernard B. Kliks Professor of Law (civil procedure, remedies); Executive Director of Law & Conflict Studies (Legal Studies, LL.M, and Conflict and Dispute Resolution Master's Program & Certificate); Associate Dean, Academic Affairs. BA, 1998, Alaska, Fairbanks; JD, 2002, Harvard; PhD, 2012, Minnesota, Twin Cities. (2012)

Rebekah Hanley, LRW clinical professor (legal research and writing, legal profession). BA, 1996, Yale; JD, 2000, California, Los Angeles. (2004)

Laurie Hauber, assistant clinical professor (local government and public interest, business law); Director, Experiential Education. BA, 1990, Harvard; JD, 1998, Boston. (2020)

Jane Larrington, Director, Law Library, professor. BA, 1997, Carleton; JD, 2001, Michigan; MA, 2007, Arizona. (2023)

Tom Lininger, Orlando John and Marian H. Hollis Professor of Law (ethics, criminal law, public interest law). BA, 1988, Yale; JD, 1991, Harvard; California bar, 1993; Oregon bar, 2008. (2003)

Mohsen Manesh, Mr. & Mrs. L.L. Stewart Professor of Business Law (advanced business law, business associations, contracts); Faculty Director, Portland Program; Associate Dean, Faculty Research & Programs. BS, 2003, Arkansas; JD, 2006, Georgetown. (2011)

Megan McAlpin, LRW clinical professor (legal research and writing). BS, 2000, Western Oregon; JD, 2003, Willamette; Oregon bar, 2003. (2007)

Michelle McKinley, Bernard B. Kliks Professor of Law (immigration law, refugee and asylum law, international law). BA, 1985, Wellesley; MPhil, 1988, Oxford; JD, 1995, Harvard. (2007)

Michael L. Moffitt, Philip H. Knight Professor of Law (civil procedure, negotiation, appropriate dispute resolution); Professor In-Residence for Clarks Honor's College. BA, 1991, Marietta; JD, 1994, Harvard. (2001)

Orli Oren-Kolbinger, assistant professor (tax law). BA, 2004, LLB, 2004, LLM, 2010, Haifa; PhD, 2020, Bar-Ilan. (2024)

Eric Priest, professor (copyright law, trademark law, property). BA, 1999, Minnesota, Twin Cities; JD, 2002, Illinois Institute of Technology; LLM, 2005, Harvard. (2009)

Ofer Raban, professor; Elmer Sahlstrom Senior Faculty Fellow (constitutional law, criminal investigation, legal interpretation). BA, 1994, City University of New York, City College; DPhil, 1994, Oxford; JD, 1999, Harvard. (2008)

Alai Reyes-Santos, professor of practice (environmental justice, conflict resolution). BA, 2001, Puerto Rico; MA, 2004, PhD, 2007, California, San Diego. (2021)

Jennifer Reynolds, Dave Frohnmayer Chair in Leadership in Law (dispute resolution); Faculty Director, Appropriate Dispute Resolution Center; Dean. AB, 1992, Chicago; MA, 1996, Texas, Austin; JD, 2008, Harvard. (2009)

Joan Rocklin, LRW clinical professor (legal research and writing). BA, 1993, Williams; JD, 1998, Pennsylvania (Coif); New York bar, 1998. (2001)

Suzanne E. Rowe, James L. and Ilene R. Hershner Professor in Jurisprudence; Director, Legal Research and Writing Program. BA, 1983, North Carolina, Chapel Hill; JD, 1989, Columbia; California bar, 1992; District of Columbia bar, 1992. (2000)

Jasmine Samara, lecturer; Faculty Director, Legal Studies (anthropology, identity politics). BA, 2000, Yale; JD, 2004, Columbia; PhD, 2018, Harvard. (2022)

Joel Sati, assistant professor (criminal law, crimmigration). BA, 2016, City University of New York; JD, 2022, Yale; PhD, 2023, California, Berkeley. (2023)

Allison Schmitt, assistant professor (patent law, health law). BS, 2005, Washington (Seattle); PhD, 2012, Duke; JD, 2015, California, Berkeley. (2025)

Nancy E. Shurtz, B. A. Kliks Professor of Law (taxation, estate planning, women and the law). BA, 1970, Cincinnati; JD, 1972, Ohio State; LLM, 1977, Georgetown; Ohio bar, 1973; Tennessee bar, 1973; District of Columbia bar, 1977. (1982)

Elizabeth Tippet, professor; James O. and Alfred T. Goodwin Senior Fellow (employment law, negotiations). BA, 2002, Harvard; JD, 2006, Harvard. (2012)

David Weber, professor (contracts, negotiations, sports law). BA, 2001, St. John's; JD, 2005, Minnesota (Coif). (2025)

Merle H. Weiner, Philip H. Knight Professor of Law (torts, family law, domestic violence). BA, 1985, Dartmouth College; LLM, 1988, Cambridge; JD, 1990, Harvard; District of Columbia bar, 1991; Maryland bar, 1991; California bar, 1993. (1998)

Andrew Winden, assistant professor (mergers & acquisitions, business associations, sustainable business). BA, 1990, Stanford; MA, 1995, Fletcher; JD, 1995, Harvard. (2022)

Mindy Wittkop, assistant clinical professor (business law, judicial); Director, Business Law Clinic. BA, 1993, Portland. JD, 1997, Oregon. (2010)

Mary C. Wood, Philip H. Knight Professor of Law (Indian law, public lands, property); Faculty Director, Environmental and Natural Resources Law Program. BA, 1984, Washington (Seattle); JD, 1987, Stanford; Washington bar, 1989; Oregon bar, 1990. (1992)

Emeriti

John E. Bonine, professor emeritus (environmental law, administrative law, constitutional law). AB, 1966, Stanford; LLB, 1969, Yale; California bar, 1970; Oregon bar, 1977. (1978)

Donald W. Brodie, professor emeritus. BA, 1958, Washington (Seattle); LLB, 1961, New York University; Washington bar, 1961; Oregon bar, 1981. (1967)

Caroline Forell, professor emerita. BA, 1973, JD, 1978, Iowa (Coif); Oregon bar, 1978. (1978)

Susan N. Gary, professor emerita (trusts and estates, estate planning, nonprofit organizations). BA, 1977, Yale; JD, 1981, Columbia; Illinois bar, 1981; Oregon bar, 1989. (1992)

Ibrahim J. Gassama, professor emeritus (torts, international law, human rights). BA, 1980, Virginia Polytechnic; JD, 1984, Harvard; New York bar, 1985. (1991)

Leslie J. Harris, professor emerita. BA, 1973, New Mexico State; JD, 1976, New Mexico (Coif); New Mexico bar, 1976; District of Columbia bar, 1977. (1982)

Richard G. Hildreth, professor emeritus. BSE, 1965, JD, 1968, Michigan (Coif); diploma in law, 1969, Oxford; diploma in law, 1973, Stockholm; California bar, 1969; Oregon bar, 1982. (1978)

Dennis Hyatt, professor emeriti. (1976)

Mary Ann Hyatt, professor emerita. BA, 1979, Rhodes; ML, 1980, Emory; JD, 1993, Washington (Seattle). (2004)

Roberta Mann, professor emerita (tax law, property law, environmental law). BS, 1980, MBA, 1982, JD, 1987, Arizona State; LLM, 1995, Georgetown; Arizona bar, 1987; District of Columbia bar, 1989. (2008)

Ralph James Mooney, professor emeritus. BA, 1965, Harvard; JD, 1968, Michigan (Coif); California bar, 1968. (1972)

Michael Musheno, professor emeritus (law and society, public policy, conflict management). BA, 1969, Lycoming College; MA, 1971, PhD, 1974, American. (2014)

Cheyney Ryan, professor emeritus (philosophy and law). BA, 1969, MA, 1973, PhD 1974, JD, 1982, Harvard. (1974)

Peter Swan, professor emeritus. (1970)

Margaret L. Paris, professor emerita. BA, 1981, JD, 1985 (Coif), Northwestern; Illinois bar, 1985. (1992)

Dominick R. Vetri, professor emeritus (art law, torts, gay and lesbian legal issues). BS, ME, 1960, New Jersey Institute of Technology; JD, 1964, Pennsylvania (Coif); New Jersey bar, 1965; Oregon bar, 1977. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Minor

- Legal Studies (p. 586)

Major - Law Degree

- Law (JD) (p. 590)

Majors - Master's Degree

- American Law (LLM) (p. 587)
- Business Law (LLM) (p. 587)
- Conflict & Dispute Resolution (MA/MA) (p. 588)
- Environmental and Natural Resources Law (LLM) (p. 589)

Certificate

- Institutional and Organizational Conflict Management (p. 591)

Concurrent Degree Programs

JD/MA in Global Studies

The School of Law and the International Studies Program offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts degree in international studies with a specialization in international law. Students receive two degrees in four years. Applicants must apply to and be accepted by both programs.

JD/MBA

The School of Law and the Lundquist College of Business Graduate School of Management offer a doctor of jurisprudence and master of business administration (JD/MBA) concurrent degree program. The program prepares students to use their legal skills in fields that require understanding of business principles, finance, accounting, corporate management, sports marketing, and international business. Students receive two degrees in four years rather than in the standard five. Applicants must apply to and be accepted by both schools.

JD/MA or MS in Environmental Studies

The School of Law and the Environmental Studies Program offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts or a master of science in environmental studies. This program introduces students to scientific, social, and legal aspects of environmental regulation and resource development. Students receive two degrees in four years rather than in the standard five. Applicants must apply to and be accepted by both programs.

JD/MA or MS in Media Studies

The School of Law and the School of Journalism and Communication offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts or master of science in media studies. The degrees provide students with opportunities for both legal and communications internships. Applicants must apply to and be accepted by both schools.

JD/MCRP in Community and Regional Planning

The School of Law and the School of Planning, Public Policy and Management offer a concurrent degree program leading to a doctor of jurisprudence and a master of community and regional planning. The degrees provide students with opportunities for both legal and planning internships. Applicants must apply to and be accepted by both programs.

JD/MNM in Nonprofit Management

The School of Law and the School of Planning, Public Policy and Management offer concurrent degrees that provide students with professionally accredited degrees in both law and public administration, the opportunity to interact with professionals in both the legal and public administration communities, opportunities for both legal and public administration internships, and an array of course work that prepares students for a wide range of professional careers.

JD/MPA in Public Administration

The School of Law and the School of Planning, Public Policy and Management offer a concurrent degree program leading to a doctor of jurisprudence and a master of public administration. The degrees provide students with opportunities for both legal and public administration internships. Applicants must apply to and be accepted by both programs.

JD/MS in Water Resources Policy and Management

The School of Law and Oregon State University offer a concurrent degree program leading to a doctor of jurisprudence and a master of science in water resources engineering, water resources science, or water resources policy and management. Applicants must apply to and be accepted by both programs.

Legal Studies Minor

Jasmine Samara, Faculty Director; Noah Glusman, Managing Director

Whatever your career path, understanding the law, and your impact as a citizen in helping shape those laws, is a fundamental part of life. A minor in Legal Studies will give you better grounding in the history and concepts behind the kinds of legal disputes that dominate the news.

Legal Studies Minor Requirements

The legal studies minor examines how law shapes and is shaped by society. It combines the analytical tools associated with legal scholarship with elements of a liberal arts education to investigate the power of the law and its potential to create social change.

Code	Title	Credits

Total Credits

24

¹ Credit for these courses cannot count for both the Core Courses and Law Elective courses.

Courses must be passed with grades of C– or better, with at least 12 credits earned in upper-division courses at the 300 or 400 levels. Courses

taken by the student toward the minor may also count, as appropriate, to fulfill requirements for other degree programs. The legal studies minor does not count toward any other degree offered by the School of Law (JD, LL.M., CRES master's).

The law elective courses are organized into two fields of interest: law in American society and law in global society. The electives include courses from the following departments and programs: business administration (BA), cinema studies (CINE), education studies (EDST), ethnic studies (ES), family and human services (FHS), geography, (GEOG) global studies (GLBL), journalism and communication (JCOM), philosophy (PHIL), planning, public policy, and management (PPPM), political science (PS), psychology (PSY), and sociology (SOC).

Students may petition the School of Law's Managing Director of Legal Studies for approval of another outside course related to legal studies.

American Law (LLM)

The American Law track in the LL.M. program at the University of Oregon School of Law is designed for international lawyers who want to gain a deeper understanding of American law and the American legal system. The program is intended to provide students with the tools they need to practice law in a global context, with a particular emphasis on the United States.

The program consists of two required courses (Introduction to American Law & Practice and LL.M. Advanced and Persuasive Legal Writing, 5 credits total). The remaining credits (19) needed to complete the LL.M. program can be achieved through any of the courses offered at the Law School unless restricted to JD students. This flexible LL.M. track allows students to design a course of study that reflects their interests and/or career needs.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate the knowledge and ability necessary to practice substantive and procedural law and understand the dynamic processes through which law is created, developed, and changed by completing an organized program of courses in a selected specialization.
- Employ sound and articulate legal reasoning to identify, research, and analyze legal problems.
- Communicate effectively with clients, decision-makers, and other relevant stakeholders.
- Recognize the responsibility of lawyers to serve as informed and professional leaders.
- Appreciate the critical role that lawyers play in ensuring meaningful access to the legal system, promoting the just application of its laws, and serving their clients and the community.
- Learn how lawyers work together by demonstrating team lawyering skills, managing conflict, and forging relationships.
- Additional outcomes for students on the two-year pathway: \
 - Students develop advanced proficiency in legal English, including reading, writing, and comprehension skills specific to the legal profession.
 - Students acquire a foundational understanding of the American legal system and its principles.
 - Students master legal research and writing, demonstrating the ability to conduct legal research and articulate legal arguments effectively.
 - Students gain

comparative and international legal analysis skills, understanding the global context of law.

American Law Requirements

Only for students without a doctor of jurisprudence (JD) degree.

One-Year Program (Two-Year Program Second Year)

Code	Title	Credits
LAW 782	Introduction to American Law and Practice	3
LAW 783	LLM Advanced and Persuasive Legal Writing	2
Track Specific Courses in American Law		15
Elective Courses		4
Total Credits		24

Additional Requirements

- Master of laws students must complete a written comprehensive paper or project in connection with one of the required courses.
- Students in the general American Law major will enroll in JD courses necessary to meet the requirements to sit for the bar in a particular jurisdiction or based on their individual academic and professional career goals.
- Students enrolled in the two-year program must successfully complete the following sequence of required courses:

Two-Year Program First Year

Code	Title	Credits
LAW 785	American Legal System	2
GRST 635	Reading for the Legal Profession	4
GRST 637	Master of Laws Reading	2
LAW 784	Comparative Law	2
GRST 636	Writing for the Legal Profession	4
GRST 638	Master of Laws Writing	2

- Prior to the second year, students will be required to successfully demonstrate a level of English language proficiency at or above the standard minimum English proficiency requirements for graduate admission to the University of Oregon on the TOEFL, IELTS, an assessment by AEI, or other method accepted by the University of Oregon. Students in the two-year pathway who do not meet the University's general graduate-level English language requirement within two years of matriculation are not eligible to continue in the LL.M. program.

Business Law (LLM)

The Business Law track in the LL.M. program at the University of Oregon School of Law is designed for students who want to specialize in business law and gain a deeper understanding of the legal framework that governs businesses in the United States. The program is intended to provide students with the knowledge and skills they need to advise clients on a wide range of legal issues that arise in the context of business.

In this program, students take 15 credits of business law-specific courses, such as Contracts, Business Associations, Intellectual Property, Bankruptcy, and Federal Tax. Students may also choose from a special list of sports and sports-related business law courses to complete a Sports Law concentration within the Business Law LL.M. track. The

remaining 4 credits needed to complete the LLM program can be achieved through any elective courses offered at the law school unless restricted to JD students.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate the knowledge and ability necessary to practice substantive and procedural law and understand the dynamic processes through which law is created, developed, and changed by completing an organized program of courses in a selected specialization.
- Employ sound and articulate legal reasoning to identify, research, and analyze legal problems.
- Communicate effectively with clients, decision-makers, and other relevant stakeholders.
- Recognize the responsibility of lawyers to serve as informed and professional leaders.
- Appreciate the critical role that lawyers play in ensuring meaningful access to the legal system, promoting the just application of its laws, and serving their clients and the community.
- Learn how lawyers work together by demonstrating team lawyering skills, managing conflict, and forging relationships.
- Additional outcomes for students on the two-year pathway:\
 - Students develop advanced proficiency in legal English, including reading, writing, and comprehension skills specific to the legal profession.\
 - Students acquire a foundational understanding of the American legal system and its principles.\
 - Students master legal research and writing, demonstrating the ability to conduct legal research and articulate legal arguments effectively.\
 - Students gain comparative and international legal analysis skills, understanding the global context of law.

Business Law Requirements

One-Year Program (Two-Year Program Second Year)

Code	Title	Credits
LAW 782	Introduction to American Law and Practice	3
LAW 783	LLM Advanced and Persuasive Legal Writing	2
Track Specific Courses in Business Law		15
Elective Courses		4
Total Credits		24

Additional Requirements

- Master of laws students must complete a written comprehensive paper or project in connection with one of the required courses.
- Students must take at least five courses from the core Business Law offerings indicated by the LLM Program Director.
- Students enrolled in the two-year program must successfully complete the following sequence of required courses:

Code	Title	Credits
LAW 785	American Legal System	2
GRST 635	Reading for the Legal Profession	4
GRST 637	Master of Laws Reading	2
LAW 784	Comparative Law	2

GRST 636	Writing for the Legal Profession	4
GRST 638	Master of Laws Writing	2

- Prior to the second year, students will be required to successfully demonstrate a level of English language proficiency at or above the standard minimum English proficiency requirements for graduate admission to the University of Oregon on the TOEFL, IELTS, an assessment by AEI, or other method accepted by the University of Oregon. Students in the two-year pathway who do not meet the University's general graduate-level English language requirement within two years of matriculation are not eligible to continue in the LLM program.

Conflict and Dispute Resolution (MA/MS)

The graduate program in conflict and dispute resolution (CRES), housed in the School of Law, offers an interdisciplinary master's degree (MA or MS) granted by the Division of Graduate Studies. It is an interdisciplinary program that prepares professionals from all disciplines to be collaborative problem-solvers in every aspect of society. The curriculum includes a balance of theory and skills-based learning designed to sharpen analytical and practical skills, encourage intellectual rigor and foster the lively exchange of ideas in and out of the classroom. The program operates on the quarter (term) calendar. The calendar is available for review online (<http://registrar.uoregon.edu/calendars/academic/>).

Tuition information can be found here (<https://registrar.uoregon.edu/tuition-fees/law/?term=202101&sc=1934>). For fee information, please refer to financialaid.uoregon.edu (<https://tuition.uoregon.edu/tuition-fees/law/?term=202101&sc=1934>).

For specific questions: Email: cres@uoregon.edu.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Integrate and apply a broad range of theoretical concepts, processes, skills, and strategies to analyze, prevent, manage, and resolve conflicts.
- Understand the contexts in which conflicts occur and apply to them the appropriate conflict and dispute resolution theory and skills.
- Facilitate, lead, and engage in constructive communication and collaborative problem-solving in a variety of interpersonal, cross-cultural, and intra-and inter-institutional settings.
- Recognize, understand, acknowledge, and address the role of power, difference, and inequity in conflict.
- Demonstrate deepened and self-reflective skills in critical thinking, research, writing, ethics, and the craft of conflict management.

Conflict and Dispute Resolution Requirements

Code	Title	Credits
Core Courses		31
CRES 621	Culture, Power, and Conflict Resolution I

Electives		20
Internship		8
CRES 604	Internship: [Topic]	
Thesis/Terminal Project/Course Concentration		9
Total Credits		68

*Students who wish to obtain a master of arts degree instead of the master of science must demonstrate proficiency in a second language (<https://gradschool.uoregon.edu/academics/completing-degree/masters-minimum-requirements/#language-requirement>).

Additional Requirements

Students currently enrolled in the program must finish all CRES requirements by end of Spring 2026.

The thesis, terminal project, or course concentration component (the final project for the degree requirement) is flexible in format and content to allow students to choose among a theory-based academic paper that studies an aspect of the field, a practical applied project, or a set of courses selected to build specific expertise in a given area. Successful completion of the final project requires an oral defense before the student's final project committee.

Environmental and Natural Resources Law (LLM)

The Environmental and Natural Resources (ENR) Law track in the LLM program at the University of Oregon School of Law is designed for students who want to specialize in environmental and natural resources law and gain a deeper understanding of the legal framework that governs these areas in the United States. The program is intended to provide students with the knowledge and skills they need to address complex environmental issues and work effectively with clients in this field.

In this program, students take 15 credits of environmental and natural resources law-specific courses, such as Climate Change Law & Policy, Environmental Law, Ocean and Coastal Law, Land Use Law, and Natural Resources Law. The remaining 4 credits needed to complete the LLM program can be achieved through any elective courses offered at the law school unless restricted to JD students.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate the knowledge and ability necessary to practice substantive and procedural law and understand the dynamic

processes through which law is created, developed, and changed by completing an organized program of courses in a selected specialization.

- Employ sound and articulate legal reasoning to identify, research, and analyze legal problems.
- Communicate effectively with clients, decision-makers, and other relevant stakeholders.
- Recognize the responsibility of lawyers to serve as informed and professional leaders.
- Appreciate the critical role that lawyers play in ensuring meaningful access to the legal system, promoting the just application of its laws, and serving their clients and the community.
- Learn how lawyers work together by demonstrating team lawyering skills, managing conflict, and forging relationships.
- Additional outcomes for students on the two-year pathway: \
 - Students develop advanced proficiency in legal English, including reading, writing, and comprehension skills specific to the legal profession.
 - Students acquire a foundational understanding of the American legal system and its principles.
 - Students master legal research and writing, demonstrating the ability to conduct legal research and articulate legal arguments effectively.
 - Students gain comparative and international legal analysis skills, understanding the global context of law.

Environmental and Natural Resources Law Requirements

One-Year Program (Two-Year Program Second Year)

Code	Title	Credits
LAW 782	Introduction to American Law and Practice	3
LAW 783	LLM Advanced and Persuasive Legal Writing	2
Track Specific Courses in Environmental and Natural Resources Law		15
Elective Courses		4
Total Credits		24

Additional Requirements

- Master of laws students must complete a written comprehensive paper or project in connection with one of the required courses.
- Students must take at least five courses from the core Environmental and Natural Resources Law offerings indicated by the LLM Program Director.
- Students enrolled in the two-year program must successfully complete the following sequence of required courses:

Two-Year Program First Year

Code	Title	Credits
LAW 785	American Legal System	2
GRST 635	Reading for the Legal Profession	4
GRST 637	Master of Laws Reading	2
LAW 784	Comparative Law	2
GRST 636	Writing for the Legal Profession	4
GRST 638	Master of Laws Writing	2

- Prior to the second year, students will be required to successfully demonstrate a level of English language proficiency at or above the standard minimum English proficiency requirements for graduate admission to the University of Oregon on the TOEFL, IELTS, an assessment by AEI, or other method accepted by the University of Oregon. Students in the two-year pathway who do not meet the University's general graduate-level English language requirement within two years of matriculation are not eligible to continue in the LLM program.

Law (JD)

Oregon Law is part of the University of Oregon, a premier AAU research university in the Pacific Northwest. Our home, the William W. Knight Law Center, is modern, inspiring, designed to encourage collaboration, and it's one of the few law schools that's also an art gallery. We're also home to the outstanding John E. Jaqua Law Library.

The Oregon Law curriculum is designed to build the analytical and practical skills necessary to be activists, advocates, and leaders in our communities.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate the knowledge and ability necessary to practice substantive and procedural law and to understand the dynamic processes through which law is created, developed, and changed.
- Employ sound and articulate legal reasoning to identify, research, and analyze legal problems.
- Engage in and appreciate the importance of their professional and ethical responsibilities towards clients, the local community, our nation, and the world.
- Communicate effectively with clients, decision makers, and other relevant stakeholders.
- Recognize the responsibility of lawyers to serve as informed and professional leaders.
- Understand and appreciate diversity, equity, and inclusion as components of their personal and professional success.
- Appreciate the critical role that lawyers play in ensuring meaningful and equitable access to the legal system.
- Understand the interrelationship between the creation, development, reform, and practice of law, the natural and social sciences, the humanities, and the arts.

Doctor of Jurisprudence Requirements (Standard program)

The curriculum presents fundamental subjects of law during the first year, and the first year of the program is prescribed. These required courses are designed to provide a solid foundation in legal theory, practical writing and research skills, and a theoretical and practical knowledge of the law.

Only two second- and third-year courses are specifically prescribed.

Code	Title	Credits
First-Year Required Courses		
LAW 611	Contracts	4
LAW 613	Torts	4
LAW 615	Civil Procedure	4

LAW 617	Property	4
LAW 618	Criminal Law	4
LAW 622	Legal Research and Writing I	3
LAW 623	Legal Research and Writing II	3
LAW 643	Constitutional Law I	3

Second- and Third-Year Required Courses

LAW 644	Constitutional Law II	3
LAW 649	Legal Profession	3

Electives

Elective courses must be in program of legal study. A portion of the elective course credits must include a minimum of 6 semester law credits of experiential courses and one diversity course of at least 2 semester law credits.	50

Total Credits	85

Students who have been admitted to the School of Law, have satisfactorily completed at least 85 semester credits and who have otherwise satisfied the requirements of the university and the School of Law are awarded the standard JD degree provided that they also:

- Earn a BA, BS, or equivalent degree from an accredited college or university before completing work for the JD degree.
- Satisfy Law School's academic standards (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/20250303_academic_standards_1.pdf) for good standing.
- Earn a minimum of 65 graded semester law credits. Graded on the traditional A-F scale. (Grades of D- not used.)
- Earn a minimum of 65 scheduled semester law credits. Scheduled courses meet regularly for faculty instruction for the total hours indicated by the number of credits. The following courses are NOT scheduled: Field Placements, Clinics, Journals, Moot Court, Independent Study, and Asynchronous online courses.
- Earn a minimum of 6 semester law credits of experiential courses. An experiential course must be a simulation course, a law clinic, or a field placement as defined by ABA accreditation Standard 304.
- Complete all 35 credits of prescribed courses (listed above). The 29 first-year required credits must be completed by the end of the fourth semester of enrollment excluding summers.
- Complete one diversity course of at least 2 semester law credits.
- Complete a total of 6 semesters of full-time (9 or more semester law credits) resident professional study at the UO School of Law or another ABA-accredited law school.
 - At least 55 semester law credits (making up at least 4 full-time resident semesters) must be completed specifically at the University of Oregon School of Law.
 - A maximum of 30 credits (making up no more than 2 full-time resident semesters) may be transferred in from another ABA-accredited law school.
- Complete the JD Writing Requirement, demonstrating extensive research and analysis, original thought, good organization, thorough editing, and a sound understanding of the topic.
- Complete the Professional Planning requirement.
- Fulfill other requirements of the JD program and ABA accreditation standards.

The UO School of Law reserves the right to modify its curriculum and graduation requirements at any time.

Students in the standard JD program may accrue up to 5 of the required 85 semester law credits by completing non-law graduate-level courses at the University of Oregon. These non-law credits do *not* count toward the Graded or Scheduled credit requirements, must be relevant to the student's program of legal study and approved in advance by the associate dean for academic affairs.

Doctor of Jurisprudence-Concurrent Degree Programs

UO Law partners with eight master's degree programs to allow JD students to earn two degrees in four years rather than the standard five years.

- JD/MA in Global Studies
- JD/MBA - Master of Business Administration
- JD/MA or MS in Environmental Studies
- JD/MA or MS in Media Studies
- JD/MCRP in Community & Regional Planning
- JD/MNM in Nonprofit Management
- JD/MPA in Public Administration
- JD/MS in Water Resources Policy & Management (with Oregon State University)

All Standard JD Program requirements remain the same with the following exceptions:

- 75 total semester law credits AND award of the concurrent master's degree are required for graduation from the Concurrent Degree program. Requirements for master's degree are presented in the catalog sections of those degrees. The JD standard degree will be awarded separately only if the student has earned 85 or more law credits.
- At least 55 semester law credits must be completed specifically at the University of Oregon School of Law.
- No non-law graduate-level courses may be applied to the 75 total semester law credits.
- A total of 5 semesters of full-time resident professional study (9 or more semester law credits) at the UO School of Law or another ABA-accredited law school.
- A required master's degree thesis can also meet the Law Writing Requirement if a law faculty member serves on the student's thesis committee.

Institutional and Organizational Conflict Management Graduate Certificate

For specific questions: Email: cres@uoregon.edu.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Integrate and apply a broad range of theoretical concepts, processes, skills, and strategies to analyze, prevent, manage, and resolve conflicts.
- Understand the contexts in which conflicts occur and apply to them the appropriate conflict and dispute resolution theory and skills.

- Recognize, understand, acknowledge, and address the role of power, difference, and inequity in conflict.

Graduate Certificate in Institutional and Organizational Conflict Management

Code	Title	Credits
Required Courses		
CRES 614	Negotiation, Bargaining and Persuasion	4
CRES 620	Facilitation	2
CRES 631	Managing Conflict in Organizations	4
CRES 670	Adversarial Processes	4
Electives Courses		12
CRES 515	Conflict and Gender	
CRES 612	Philosophy of Conflict Resolution	
CRES 660	Environmental Conflict Resolution	
CRES 621 & CRES 622 & CRES 623	Culture, Power, and Conflict Resolution I and Culture, Power, and Conflict Resolution II and Culture, Power, and Conflict Resolution III ¹	
CRES 625	Psychology of Conflict	
Total Credits		26

¹ Must complete all three courses to receive 4 credits toward electives.

School of Music and Dance

<https://musicanddance.uoregon.edu/>

Sabrina MADison-Cannon, Phyllis and Andrew Berwick Dean

219R Frohnmayer Music Building

541-346-5651

smadison@uoregon.edu

The University of Oregon School of Music and Dance serves as an educational and cultural resource for the University of Oregon, the local community, and the state of Oregon. We prepare students to lead enriching lives by providing comprehensive programs for professional arts-based careers, as well as those seeking to gain a fully realized liberal arts education.

The School of Music and Dance (SOMD) presents more than 300 concerts, performances, and events during the academic year featuring guest artists, faculty artists, and student ensembles. The incredible wealth of concert material ranges from contemporary dance to African dance, early music and classical to contemporary music, world music, and jazz. SOMD is also home to the Grammy-winning Oregon Bach Festival (OBF) and ChamberMusic@Beall performance series.

We welcome risk-takers. Our students and faculty foster experimentation and innovation by supporting the creation of new work that is grounded in the traditional canon and technique. The community is our classroom. This region is full of off-campus arts organizations, concert venues, and opportunities to perform. We aim to constantly learn from our past and strive for a better future. We welcome feedback from our students about how to improve our community and create a friendly, integrated environment that feels like a family.

Dance

<https://musicanddance.uoregon.edu/dance> (<https://musicanddance.uoregon.edu/dance/>)

Patty Delaney, Interim Department Head of Dance

170 Gerlinger Annex

541-346-5623

pdelaney@uoregon.edu

The goal of the department is to provide comprehensive dance training within the liberal arts framework of the university. The study of dance involves intellectual, artistic, and physical development. The Department of Dance emphasizes all three areas of growth, a commitment made possible by the breadth of its curricular offerings and the depth of faculty expertise. In addition to the academic components, dance students experience the rigorous professional discipline that is inherent in studio classes. The department explores diverse idioms in dance: African dance and drumming, ballet, contact improvisation, contemporary, jazz, hip-hop, modern, partnering, and Salsa.

Regardless of a student's career goals, education in dance at the University of Oregon provides the opportunity to develop motivation and self-discipline, intellectual curiosity, and creative imagination. These attributes are essential not only for a successful career but also for experiencing a fulfilling life.

Faculty

Christian Cherry, associate professor (music for dance, composition, contact improvisation); undergraduate director, music director. BA, 1983, Ohio Wesleyan; MM, 1993, Ohio State. (2001)

Patty Harrington Delaney, Professor, Head of Dance Department, BFA, 1978, Southern Methodist University, MFA, 1980, Southern Methodist University (2024)

Rita Honka, teaching professor (African, modern, African diaspora and culture, anatomy, somatics). BS, 1989, Wayne State; MS, 1992, Oregon. (1993)

Habib Iddrisu, associate professor (West African music, African dance, performance). BA, 2002, MA, 2004, Bowling Green State; PhD, 2011, Northwestern. (2013)

Walter Kennedy, associate professor (modern and ballet, dance history, composition); BFA, 1996, California State, Long Beach; MFA, 1999, Illinois, Urbana-Champaign. (2000)

Shannon Mockli, associate professor (modern, contemporary, and ballet; improvisation, composition). BFA, 2003, Utah; MFA, 2008, Utah. (2008)

Florabelle Moses, instructor (ballet, Salsa and Bachata). B. Dance and Dance Education, Rubin Academy of Music and Dance, Israel (1991); MA in Dance, University of Oregon. (1993)

Amy Swanson, assistant professor (African Dance Aesthetics, Dance and Power, Contemporary Issues); BFA, 2008, University of Illinois at Urbana-Champaign, MA 2015 Northwestern University, PhD 2019 Northwestern University (2024)

Hannah Victoria Thomas, assistant professor (hip hop, jazz, and contemporary technique, dance history and culture, composition), BA, 2016, Georgia College and State University; MFA, 2020, Arizona State University. (2021)

Emeriti

Steven Chatfield, professor emeritus. BA, 1975, MA, 1984, PhD, 1989, Colorado, Boulder. (1989)

Jenifer P. Craig, associate professor emerita. BA, 1971, MA, 1973, Oregon; PhD, 1982, Southern California. (1986)

Bruno V. Madrid, senior instructor emeritus. BMus, 1955, Santo Tomas Conservatory of Music; MMus, 1963, Oregon. (1966)

Susan Zadoff, senior instructor emerita. Ballet Russe de Monte Carlo. (1976)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Regardless of a student's career goals, education in dance at the University of Oregon provides the opportunity to develop motivation and self-discipline, intellectual curiosity, and creative imagination. These attributes are essential not only for a successful career but also for experiencing a fulfilling life.

Program's Admission Requirements

Please visit the program's website (<https://musicanddance.uoregon.edu/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Synthesize approaches to dance through immersion in multiple dance forms, performance, creative practice, and theory.
- Contextualize and understand dance from philosophical and cultural perspectives.
- Cultivate awareness and responsibility as a global dance citizen.
- Engage in music, science and somatics, history and culture, pedagogy and production of dance.
- Communicate about dance through writing, speaking, embodied practice, and creative inquiry.

Courses required for a dance major must be taken for letter grades when that option is available. A grade of P must be earned in courses designated pass/no pass (P/N) only.

Program Learning Outcomes

- Upon successful completion of this program, students will be able to:
- Synthesize approaches to dance through immersion in multiple dance forms, performance, creative practice, and theory.
 - Contextualize and understand dance from philosophical and cultural perspectives.
 - Cultivate awareness and responsibility as a global dance citizen.
 - Engage in music, science and somatics, history and culture, pedagogy and production of dance.
 - Communicate about dance through writing, speaking, embodied practice, and creative inquiry.

Courses required for a dance major must be taken for letter grades when that option is available. A grade of P must be earned in courses designated pass/no pass (P/N) only.

Bachelor of Fine Arts in Dance

DAN 491	Teaching Dance	

DAN 404	Internship: [Topic]
Total Credits	133

¹ 18 credits minimum in upper division. 6 courses minimum per idiom in DANC.

All courses listed are required unless noted as Electives e.g. DANC 199 Special Studies: Topic, DANC 399 Special Studies: Topic, and DAN 410 Loft.

All Technique courses must be taken in sequence. Students can test out of a level through a Placement Class, but must meet the same number of credits in the dance Technique category in that same idiom e.g. African, or Ballet etc.

Performance courses; DAN 480 Dance Repertory, DAN 481 Repertory Company: Rehearsal, and DAN 482 Repertory Company: Touring must be taken in that sequence.

The Creative Practices must be taken in sequence in this order; DANC 171 Dance Improvisation, DANC 271 Contact Improvisation, DAN 351 Dance Composition 1, DAN 352 Dance Composition 2, DAN 452 Dance Composition 3, and DAN 412 Student Concert.

There is some flexibility within the Theory courses, but the following courses must be taken in sequence (*see Course-to-Course Pre-requisites listed previously):

History and Culture; DAN 251 Looking at Dance is a pre-requisite for DAN 453 Dance and Power and DAN 454 Contemporary Issues in Dance,

Science and Somatics; DAN 260 Anatomy of Human Movement is a pre-requisite for DAN 360 Dance Kinesiology,

Music; DAN 252 Fundamentals of Rhythm is a pre-requisite for DAN 458 Music for Dancers, Production; DAN 255 Dance Production 1 is a pre-requisite for DAN 355 Dance Production 2.

No tracks or concentrations.

Electives: BFA in Dance majors can take DANC 199 and DANC 399 Special Studies: Topic, which might include dance techniques outside the core curriculum e.g. hip-hop, Salsa, Partnering, Pointe, or Conditioning.

They can also take DAN 410 Loft, where they choreograph for semi-formal live performances offered twice per year under a faculty mentor.

BFA in Dance students will also be provided a recommended list of elective course options outside the Dance department in such areas as; Music, Art, Theatre, Women and Gender Studies, and Journalism.

Dance Minor

<https://musicanddance.uoregon.edu/dance-minor-program> (<https://musicanddance.uoregon.edu/dance-minor-program/>)

The goal of the department is to provide comprehensive dance training within the liberal arts framework of the university. The study of dance involves intellectual, artistic, and physical development. The Department of Dance emphasizes all three areas of growth, a commitment made possible by the breadth of its curricular offerings and the depth of faculty expertise. In addition to the academic components, dance students experience the rigorous professional discipline that is inherent in studio classes. The department explores diverse idioms in dance: African dance and drumming, ballet, contact improvisation, contemporary, jazz, hip-hop, modern, partnering, and Salsa.

The dance minor is available to undergraduate students who want to combine an interest in dance with a major in another area of study. The minor allows students flexibility in constructing a program of courses to enhance and complement any chosen major.

Program's Admission Requirements

Please visit the program's website (<https://musicanddance.uoregon.edu/admissions/dance/>).

Dance Minor Requirements

Courses used to fulfill the minor requirements must be passed with a letter grade of at least C- or a P* where pass/no pass is the only grading option for the course. Most upper-division courses have prerequisites, co-requisites, or both.

127 Marabel B. Frohnmayer Music Building
541-346-5589; 541-346-3786
ser@uoregon.edu; sjpaul@uoregon.edu

Our teaching is engaging, inclusive, and research-led. We seek to cultivate a synergy between academic and creative pursuits. We welcome risk-takers. We strive to experiment and invest in new creations while critically examining existing work. We look for opportunities to share music-dance knowledge and value all lived experience, all forms of education, and all fields of study that inform our artistic pursuits. We work to build and maintain a supportive environment so that our musicians and dancers feel safe to explore and flourish. The community is our classroom. Our area is full of off-campus arts organizations, performance venues, and creative opportunities, connecting student artists with the skills and information they need to effect positive change within their communities and move the fields of music and dance forward.

Faculty

D. Tyler Abbott, teaching professor (double bass, jazz string bass). BM, 1999, Eastern Washington; MM, 2003, Oregon. (2003)

Jon Paul Bellona, assistant professor (music technology). BA, 2003, Hamilton College; MM, 2011, Oregon; PhD, 2018, Virginia. (2017)

Jack Boss, professor (theory, composition). BMus, 1979, MMus, 1981, Ohio State; PhD, 1991, Yale. (1995)

Andiel Brown, instructor (gospel choirs). BMus, 2008, Oregon. (2008)

Keith Brown, assistant professor (jazz & contemporary piano). BM, 2009, MM 2011 Tennessee, Knoxville. (2022)

Melissa Brunkan, associate professor (choral music education). BM, 1995, Minnesota; MMus, 1999, Northwestern; PhD, 2012, Kansas. (2017)

Gustavo Castro-Ramirez, vocal coach and accompanist (voice and piano). MMus, Costa Rica, 2006; MMus, Florida, 2007; MMus, Florida, 2009; DMA, Texas, 2012. (2022)

Sunmi Chang, assistant professor (violin). BMus, 2005; MMus, Yale, 2008; DMA, 2020, Michigan. (2023)

Joyce Wei-Jo Chen, assistant professor (historical keyboards). BS, 2001, UC Berkeley; MM, 2013, Stony Brook University; DMA, 2017, Stony Brook University. (2023)

Kwan Leong "Pius" Cheung, professor (percussion). BMus, 2004, Curtis Institute; Artist Diploma, 2006, Boston Conservatory; DMA, 2010, Michigan, Ann Arbor. (2011)

Jacqueline Cordova-Arrington, assistant professor (flute). BM, 2008, Michigan; MM, 2010, Cincinnati; DMA, 2015, Eastman School of Music. (2018)

David Crumb, professor (composition, theory). BM, 1985, Eastman School of Music; MA, 1991, PhD, 1992, Pennsylvania. (1997)

Alexandre Dossin, professor (piano, piano literature). MFA, 1996, Moscow Tchaikovsky Conservatory; DMA, 2001, Texas, Austin. (2006)

Karen Esquivel, associate teaching professor (opera, voice). BS, 1978, Nebraska, Lincoln; MM, 1990, 2006, DMA, 2009, Florida State. (2011)

Abigail Fine, assistant professor (musicology). BA, 2010, Pennsylvania; PhD, 2017, Chicago. (2019)

Arnaud Ghillebaert, associate teaching professor (viola). DEM, 2006, National Regional Conservatory, Saint-Maur-des-Fossés; MPerf, 2008, Royal College of Music; DMA, 2016, State University of New York, Stony Brook. (2017)

Michael Grose, professor (tuba, music appreciation). BM, 1984, MM, 1985, Northwestern. (2001)

Hal Grossman, associate professor (violin). BM, 1981, Michigan; MM, 1985, Eastman School of Music. (2019)

Akiko Hatakeyama, associate professor (music technology). Associate's degree, 1994, Otsuma Women's; AA, 2006, Community College of Philadelphia; BA, 2009, Mills College; MA, 2011, Wesleyan; MA, 2013, Brown. (2016)

Henry Henniger, associate professor (trombone). BM, 2002, Indiana, Bloomington; MM, 2004, Manhattan School of Music. (2010)

Brian Hsu, associate professor (piano). BM, 2004, Juilliard; MM, 2006, Juilliard School; Artist Diploma, 2008, Yale; DMA, 2012, Michigan. (2023)

Habib Iddrisu, associate professor (African dance and music, ethnomusicology). BA, 2002, MA, 2004, Bowling Green State; PhD, 2011, Northwestern. (2013)

David Jacobs, associate professor (conducting, orchestra); director, orchestral studies. BM, 2000, Duquesne; MA, 2002, Central Florida; DMA, 2011, Eastman School of Music. (2012)

Wonkak Kim, associate professor (clarinet). BMus, BA, 2007, North Carolina, Chapel Hill; MMus, 2009, DM, 2012, Florida State. (2017)

Tobias Koenigsberg, associate professor (jazz piano, jazz studies); associate director, jazz studies. BMus, 1998, Oregon; MM, 2003, Eastman School of Music. (2003)

Lori Kruckenberg, professor (musicology). BA, 1985, Bethany (Kansas); MA, 1991, PhD, 1997, Iowa. (2001)

Paul Krueger, assistant professor (jazz history, jazz studies); director, jazz studies. BME, 2009, Nebraska, Lincoln; MMus, 2011, Oregon. (2016)

Robert Kyr, professor (composition, theory); director, Pacific Rim Gamelan, Vanguard Concert Series, Music Today Festival. BA, 1974,

Yale; postgraduate certificate, 1976, Royal College of Music; MA, 1980, Pennsylvania; PhD, 1989, Harvard. (1990)

Dennis Llinás, associate professor (conducting); director of bands. BME, 2003, Florida International; MM, 2010, Texas, Austin; DMA, 2012, Texas, Austin. (2019)

Brian McWhorter, professor (music appreciation). BMus, 1998, Oregon; MM, 2000, Juilliard. (2006)

Eric Mentzel, professor (voice, diction, collegium musicum). BM, 1980, Temple; MFA, 1983, Sarah Lawrence. (2002)

Lance Miller, senior sound and video recording engineer (audio recording). AA, 1982, Mt. Hood Community. (1998)

Drew Nobile, associate professor (theory, musicianship). ScB, 2007, Brown; MA, 2009, Washington (Seattle); PhD, 2014, City University of New York, Graduate Center. (2015)

Camille Ortiz, assistant professor (voice, solo vocal music). BM, 2004, Oral Roberts; MM, 2007 Manhattan School of Music; DMA, 2017, University of North Texas College of Music. (2020)

Timothy Pack, teaching professor (theory, musicianship). BA, 1993, Huntingdon College; MM, 1998, Westminster Choir College, Rider; PhD, 2005, Indiana, Bloomington. (2005)

Sharon J. Paul, Robert M. Trotter Chair of Music; professor (choral conducting); director, choral activities. BA, 1978, Pomona; MFA, 1981, California, Los Angeles; DMA, 1984, Stanford. (2000)

Melissa Peña, associate professor (oboe, music appreciation). BM, 1996, Illinois, Urbana-Champaign; MM, 1998, Missouri, Kansas City. (2012)

Craig Phillips, associate professor (voice, pedagogy, diction). BMus, 1993, Appalachian State; MMus, 1998, College-Conservatory of Music, Cincinnati; DMA, 2017, North Carolina, Greensboro. (2017)

Steven Pologe, professor (cello, chamber music). BM, 1974, Eastman School of Music; MM, 1978, Juilliard School. (1993)

Jesús Ramos-Kittrell, assistant professor (musicology). BM 1998, MM 2001, PhD 2006, Texas, Austin. (2022)

David Riley, professor (collaborative piano). BM, 1992, Ithaca College; MM, 1995, Cleveland Institute of Music; DMA, 2000, Eastman School of Music. (2004)

Holly Roberts, associate director (performance practice and instrumental programs). BMus, Arizona, 2011; MMus, Oregon, 2016; PhD, Oregon, 2020. (2022)

Lindsey Henriksen Rodgers, instructor (musicology). BA, 2003, Walla Walla; MM, 2005, Yale; PhD, 2013, Oregon. (2014)

Stephen Rodgers, Edmund A. Cykler Chair in Music, professor (music theory, musicianship). MPhil, 2001, PhD, 2005, Yale. (2005)

Miki Sasaki, assistant professor (trumpet). BM, 2013 Juilliard; MM, 2015, Yale; DMA, 2022, Texas, Austin. (2022)

Idit Shner, Philip H. Knight Professor (saxophone, jazz studies). BA, 1998, Oklahoma City; MM, 2001, Central Oklahoma; DMA, 2007, North Texas. (2005)

Jason Silveira, professor (instrumental music education). BM, 2002, MM, 2008, Ithaca College; PhD, 2011, Florida State. (2016)

Jeffrey Stolet, professor (music technology, intermedia collaboration); director, Future Music Oregon, CPU Concert Series. BMus, 1977, MMus, 1979, New Mexico; PhD, 1984, Texas, Austin. (1988)

John Storie, assistant processor (jazz guitar, jazz studies). BMus, 2006, University of Southern California; MFA, 2012, California Institute of the Arts. (2025).

Leslie Straka, professor (viola, chamber music); associate dean, graduate studies; director, Community Music Institute. BM, 1976, MM, 1978, DMA, 1987, Arizona State. (1987)

Steve Vacchi, professor (bassoon, chamber music); associate dean, faculty affairs. BM, 1990, Eastman School of Music; MM, 1993, Hartt School; DMA, 1997, Louisiana State. (2000)

Lydia Van Dreel, professor (horn). BM, 1991, Wisconsin, Madison; MM, 1993, Juilliard. (2006)

Zach Wallmark, associate professor (musicology). BM, 2003, NYU; MA, 2007, Oregon; PhD, 2014, UCLA. (2019)

Lawrence Wayte, associate teaching professor (musicology). BA, 1985, Wesleyan; JD, 1988, Stanford; MA, 1999, San Francisco State; PhD, 2007, California, Los Angeles. (2008)

Eric Wiltshire, associate professor (instrumental music education); assistant director, bands. BA, 1991, San Jose State; MA, 1994, Washington State; PhD, 2006, Washington (Seattle). (2006)

Juan Eduardo "Ed" Wolf, associate professor (ethnomusicology); coordinator, UO World Music Series. BA, BS, 1993, Notre Dame; MS, 1995, Northwestern; MA, 2007, PhD, 2013, Indiana, Bloomington. (2013)

Emeriti

Wayne Bennett, professor emeritus. BME, 1968, Oklahoma State; MM, 1969, PhD, 1974, North Texas. (1978)

Leslie T. Breidenthal, professor emeritus. BS, 1948, MA, 1949, Columbia; AMusDoc, 1965, Michigan. (1967)

Richard G. Clark, associate professor emeritus. BS, 1964, MA, 1971, Oregon; DMA, 1977, Washington (Seattle). (1982)

David P. Doerksen, associate professor emeritus. BME, 1956, Willamette; MM, 1969, Southern California; DMA, 1972, Oregon. (1983)

C. Brad Foley, professor emeritus. BA, 1975, Ball State; MM, 1977, DMA, 1983, Michigan. (2002)

J. Robert Hladky, professor emeritus. BMus, 1950, Oklahoma State; MMus, performer's certificate, 1952, AMusDoc, 1959, Eastman School of Music. (1961)

Dean F. Kramer, professor emeritus. BMus, 1973, Oberlin Conservatory; MMus, 1976, DMA, 1992, Texas, Austin. (1983)

Gary M. Martin, professor emeritus. BA, 1961, MA, 1963, Adams State; PhD, 1965, Oregon. (1966)

James A. Miller, professor emeritus. BA, 1952, Goshen; MMus, 1956, AMusDoc, 1963, Michigan. (1965)

J. Robert Moore, professor emeritus. BMusEd, 1961, MMus, 1962, Tulsa; DMA, 1980, Eastman School of Music. (1975)

Randall S. Moore, professor emeritus. BA, 1963, MA, 1965, Oregon; PhD, 1974, Florida State. (1974)

Harold Owen, professor emeritus. BMus, 1955, MMus, 1957, DMA, 1972, Southern California. (1966)

Stephen W. Owen, professor emeritus. BMusEd, 1980, North Texas State; MMus, 1985, Northern Colorado. (1988)

Robert D. Ponto, associate professor emeritus. BME, 1979, Wisconsin, Eau Claire; MM, 1985, Michigan, Ann Arbor. (1992)

George W. Recker, associate professor emeritus. Former principal trumpet, Kennedy Center Opera House Orchestra, Florida State University, George Peabody College, 1964–69. (1983)

H. Royce Saltzman, professor emeritus. BA, 1950, Goshen; MMus, 1954, Northwestern; DMA, 1964, Southern California. (1964)

Marian Elizabeth Smith, professor emerita. BA, 1976, Carleton; BMus, 1980, Texas, Austin; PhD, 1988, Yale. (1988)

Victor Steinhardt, professor emeritus. BMus, 1964, Mount St. Mary's; MA, 1967, California, Los Angeles. (1968)

Stephen Stone, associate professor and assistant dean emeritus. BS, 1949, MS, 1956, DMA, 1971, Oregon. (1976)

Ann Tedards, professor emerita. AB, 1970, Sweet Briar; MM, 1972, North Carolina, Chapel Hill; DMA, 1997, Peabody Conservatory of Music, Johns Hopkins. (1987)

Richard Trombley, associate professor emeritus. BS, 1961, Juilliard School; MMus, 1962, Manhattan School; DMA, 1977, Stanford. (1963)

Mary Lou Van Rysselberghe, senior instructor emerita. BMus, 1956, MMus, 1976, Oregon. (1977)

Milagro Vargas, professor emerita. BM, 1977, Oberlin Conservatory; MM, 1981, Eastman School of Music. (1992)

Claire L. Wachter, professor emerita. BM, 1975, Peabody Conservatory; MM, 1977, DMA, 1993, Texas, Austin. (1991)

Jeffrey Williams, professor emeritus. BMus, 1965, North Texas; MS, 1966, Illinois; DMA, 1974, North Texas. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Ann B. Shaffer, library

Fees

Other Fees (per term)	Dollars
Private performance studies (studio instruction) per term	200-400/term
Ensemble fee	50-80
Music education course fee	50-300
Keyboard skills course fee	20
MIDI music lab course fee	110

Audio recording lab course fee	100-110
Electronic studio course fee	110-125
Recital fee (per recital)	90
Instrument locker fee	8-25
Other music course fees	50-150
Dance course fee	75
Instrument fee per term for harpsichord, organ, classical percussion	50
Rental of university instruments is based on use and value-maximum fee	30-60
Short-term instrument rental (per week)	10
Summer instrument rental	60
Oregon Marching Band uniforms and equipment fee	45–180

Performance Studies

Courses in performance studies are listed with the MUP subject code. Fees are required. These courses customarily include weekly lessons and studio master classes. MUP courses fall into two general categories:

- Basic and Intermediate Performance Studies: MUP 114, 115.
- Performance Studies: MUP 165, 265, 270, 365, 465, 635, 650, 665, 765.

Enrollment in any performance studies registration number between 165 - 765 must be preceded by an audition. Auditions are conducted to establish the appropriate registration number.

Students must register for at least 2 credits of performance study. Students will receive a minimum of nine lessons per term.

Enrollment in performance studies is sometimes limited because of faculty teaching loads. Under such circumstances, priority is given to continuing music majors. Students who are not assigned to a faculty member may study with a graduate employee for credit at extra cost.

Undergraduate Music Performance and Music Education students advance from one registration number to the next through area juries.

Performance studies courses carry 2 or 4 credits per term. Students giving recitals must be enrolled in performance studies. During the term of the recital, students may not enroll in Reading and Conference: [Topic] (MUS 405) or Reading and Conference: [Topic] (MUS 605) in preparation for their recital. Pre-recital hearings are required to evaluate the student's readiness for public performance. After the recital, a faculty evaluation is required. If approval is given, the recital is formally acknowledged as a fulfilled degree requirement.

For details concerning specific registration numbers, repertory, and any other questions, please contact the individual studio faculty members.

Music Performance majors whose primary instrument is piano have an accompanying requirement, described under the Bachelor of Music in Music Performance heading in the Undergraduate section.

Undergraduate Programs

Majors - Bachelor's Degree

- Music (BA/BS) (p. 609) [multiple concentrations available]
- Music Composition (BMus) (p. 623)
- Music Education (BMME) (p. 625) [multiple concentrations available]
- Music: Jazz Studies (BMus) (p. 638)
- Music Performance (BMus) (p. 632)
- Popular Music (BA/BS) (p. 641) [one concentration available]

Minors

- Music (p. 646)

A detailed checklist of requirements for each undergraduate degree is available online.

Students who want a conservatory-style education in music should work toward the bachelor of music (BMus) degree or a music major with the music history and literature concentration, music theory concentration or music technology concentration. The bachelor of arts (BA) and bachelor of science (BS) degrees with the general music concentration or popular music studies concentration are primarily for students who want a broad liberal arts education while majoring in music.

Ensembles

Course numbers through 499 are undergraduate-level courses; 500-, 600-, and 700-level courses are graduate-level courses.

Code	Title	Credits
Primary Ensembles		
MUS 394/694	Chamber Ensemble: [Topic]	1
MUS 395/695	Band: [Topic]	1-2
MUS 396/696	Orchestra: [Topic]	2
MUS 397/697	Chorus: [Topic]	2
Jazz Ensembles		
MUJ 391/691	Jazz Laboratory Band II	1
MUJ 392/692	Oregon Jazz Ensemble	1-2
MUJ 395/695	Small Jazz Ensemble: [Topic]	1-2
Alternative Ensembles		
MUS 391/691	Collegium Musicum	1-3
MUS 393	Oregon Electronic Device Orchestra	2
MUS 398/698	Opera Workshop	2
MUS 436	World Music Ensemble: [Topic]	2
MUS 490/590	Balinese Gamelan	2

Admission

Students who are eligible for admission to the university may apply to the School of Music and Dance as music majors. For information about admission to the University of Oregon, refer to the Admissions (p. 13) section of this catalog.

Application Procedure

1. Complete the University of Oregon application for admission
2. Review the school's undergraduate music major admission requirements (<http://music.uoregon.edu/apply/undergraduate-music/>)
3. Complete the school's online application (<http://music.uoregon.edu/apply/undergraduate-music/>)

Early action—submit UO and School of Music and Dance applications

November 1

Early action—undergraduate auditions; recorded auditions and music technology portfolios

Mid-November

School of Music and Dance standard application deadline

January 15

Undergraduate audition days; recorded auditions and music technology portfolios due

Late January through February

School of Music and Dance mails admission and scholarship offers

April 1

[For audition dates and submission deadlines for recordings and portfolios, visit the undergraduate music admissions website.](http://music.uoregon.edu/apply/undergraduate-music/)

Auditions

In many degree programs, the audition is the most important factor in determining admission to the School of Music and Dance. As part of the admission process, applicants to most music degree programs must either audition (in person or via recording) or submit a portfolio (the option for applicants to the music technology program). Students who submit recorded auditions may be required to audition in person upon arrival on campus. Auditions for admission are held in November, January, and February. Each student who auditions for admission is automatically considered for a music scholarship. For more detailed information about repertoire and procedure, visit the School of Music and Dance admissions website (<http://music.uoregon.edu/apply/undergraduate-music/>). (<http://music.uoregon.edu/apply/>)

An audition is not required for admission to the BA or BS in music with Theory, History & Literature, General Music or Popular Music Studies concentrations. However, the Theory and History & Literature concentrations do have specific requirements for continuation in the program. See the Music Degree Program Continued Enrollment Requirements section below for details.

Jazz Studies

Students who want to enter the jazz studies major have a jazz audition. In addition, a placement examination specific to jazz studies is required of transfer students wishing to enter the program.

Music Technology

Students who want to enter the music technology program must submit a portfolio. A classical audition is not required for admittance to the bachelor or science music technology degree program. However, students admitted only on the basis of a portfolio are only considered for the music technology program and are not eligible to pursue other degree programs within the school.

English Language Proficiency

Scores for the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for students whose first language is not English. For admittance as an undergraduate music major, English language proficiency requirements must be met by one of the following: a minimum total TOEFL score of 575 on the paper-based test or a minimum total score of 88 on the Internet-based test; a minimum total score of 7.0 on the International English Language Testing System (IELTS); or completion of all required Academic English for International Students (AEIS) course work.

Placement Examinations

Before enrolling in music core classes (music theory, aural skills, keyboard skills) students are required to complete the musicianship diagnostic, which is designed to assess basic skills to succeed in those courses. During Week of Welcome, incoming students have to option to take the music core placement exam (in total or in part) for the opportunity to test out of classes if applicable. Incoming students are advised to register for all first term music core courses even if they expect to test out of them. The undergraduate advisor will notify students of the results of their placement exams assist with adjusting their schedules if needed.

All transfer students are required to take a music core placement examination, which determines level placement in music theory, aural skills, and keyboard skills courses. Exceptions may be made for students from institutions with whom the School of Music and Dance has a program articulation agreement, including Lane Community College and Mt. Hood Community College. For details, students should consult the Undergraduate Office (<https://musicanddance.uoregon.edu/academics/undergraduate-advising/>). Incoming freshman students may choose to take the music core placement exam (for the purpose of testing out of part of the music core). Study guides for the placement are available from the music undergraduate website (<https://somedresources.uoregon.edu/student/studentgeneral/information-for-undergraduate-students/study-guides/>).

Admission to a Specific Degree Program

Students are placed in their primary program of choice, as indicated on their School of Music and Dance application, upon Initial admission to the school. Requirements for continued enrollment in music majors vary significantly, as outlined in the chart below. Additional information is available from the undergraduate office.

Program Overlap Limitations

Due to significant curricular overlap, concurrent pursuit of the following music programs is not allowed:

- Music minor with any other major or minor program in music.
- Music Technology major with a minor in Music Technology or a minor in Music Production (previously Audio Production).
- General Music or Popular Music major with any other music major.
- A Bachelor of Arts or Science (BA/BS) in Music cannot have multiple concentrations.

Music Degree Program Progression Milestones

Candidates for the BMus, BMME, BA in Music: History and Literature concentration, BA in Music: Theory concentration, or BS in Music: Music Technology concentration must successfully complete the two-year

musicianship core (with the exception of MUS 327 Analysis) within their first two years of residence. If this is not met, it may result in delayed graduation.

For most music majors, a checkpoint occurs at the end of the student's sophomore year or upon completion of the music core. Before students are allowed to register for the advanced courses of their curriculum, they must **pass all music core courses with C- or better** and successfully complete their major-specific checkpoint. See below for checkpoint requirements.

Degree Program	Continued Enrollment Requirements
BA/BS in Music: Applied Piano	Successful completion of six terms of MUP 365 Performance Study in piano with grades of B- or better.
BA/BS in Music: Applied Voice	Successful completion of six terms of MUP 365 Performance Study in voice with grades of B- or better.
BA/BS in Music: General Music	N/A
BA/BS in Music: Music History & Culture	Successful completion of WR 121 College Composition I with a grade of C- or better. In anticipation of their senior portfolio, students should identify at least one completed final course project that might form part of this portfolio. Students will submit a research paper and unofficial transcripts to the musicology area and will complete an interview with an ethnomusicology/musicology faculty member.
BA/BS in Music: Music Technology	Successful completion of MUS 447 Digital Audio and Sound Design and MUS 448 Interactive Media Performance with grades of B- or better.
BA/BS in Music: Music Theory	Successful completion of the 200-level series of musicianship courses (MUS 231, 232, 233, 234, 235, 236) with grades of B- or better.
BA/BS in Popular Music	N/A
BA/BS in Popular Music: Music Production	Popular Music majors may apply for admission to the Music Production concentration during their second year of study. Admission to the program is contingent upon a cumulative UO GPA of 2.7 or higher, completion of MUS 151 Popular Songwriting, MUS 131 Music Theory I, and MUS 134 Aural Skills I with grades of C- or better. Admission to the concentration is determined by the Popular Music faculty.
BMME in Music Education	Minimum cumulative UO GPA of 2.75 and a grade of B- or better in MUE 326 Foundations of Music Education.

BMus in Music Composition	Successful completion of the Composition I series (MUS 240, 241, 242) with grades of B- or better and demonstration of piano proficiency via exam or coursework.
BMus in Jazz Studies	Successful completion of the music notation software proficiency as determined by jazz faculty and the Sophomore Barrier Exam.
BMus in Music Performance	Successful completion of six terms of MUP 270 Performance Study in the primary instrument/voice with grades of B- or better.

Several music majors also include junior- and/or senior-level milestones. See below for requirements.

Degree Program	Continued Enrollment Requirements
BA/BS in Music: Applied Piano	Applied Piano students prepare and present a junior recital (consisting of approximately 30 minutes of music). In order to present a recital, the student must attain approval from their faculty committee by passing a pre-recital hearing at least 3 weeks before the scheduled performance.
BA/BS in Music: Applied Voice	Applied Voice students prepare and present a junior recital (consisting of approximately 30 minutes of music). In order to present a recital, the student must attain approval from their faculty committee by passing a pre-recital hearing at least 3 weeks before the scheduled performance.
BA/BS in Music: General Music	N/A
BA/BS in Music: Music History & Culture	In the senior year, Music History & Culture students will need to submit a senior project proposal at least two terms in advance; the project proposal must be approved by the Musicology faculty before students can register for MUS 499 Senior Project.
BA/BS in Music: Music Technology	In the senior year, Music Technology students must pass (with a minimum score of 80%) the Brown Book and Listening Exams during the final year of study. Additionally, Music Technology students will need to submit a senior project proposal at least two terms in advance; the project proposal must be approved by Music Technology faculty before students can register for MUS 499 Senior Project.

BA/BS in Music: Music Theory	In the senior year, Music Theory students will need to submit a senior project proposal at least two terms in advance; the project proposal must be approved by Music Theory faculty before students can register for MUS 499 Senior Project.
BA/BS in Popular Music	N/A
BA/BS in Popular Music: Music Production	N/A
BMME in Music Education	Music Education students are admitted to full-time student teaching in their senior year based on the criteria that follows. Students must: pass the Qualifying Exam in their area of specialty, maintain a minimum UO GPA of 2.75 and at least 5 terms of residence, achieve grades of B- or better in all Music Ed core and specialty coursework, and complete all required practicum hours. Completion of the Music Education program is contingent upon: completion and submission of edTPA (passing score = 35), passing student teaching (MUE 406), proficiency on the FEET, and completion of an online exit interview.
BMus in Music Performance	Music Performance students prepare and present a junior recital (consisting of approximately 30 minutes of music) and a senior recital (consisting of approximately 60 minutes of music). In order to present a recital, the student must attain approval from their faculty committee by passing a pre-recital hearing at least 3 weeks before the scheduled performance.
BMUS in Jazz Studies	Continuation to advanced Jazz Studies coursework is dependent upon successful completion of the Junior Barrier Exam administered by the Jazz faculty. Jazz Studies students prepare and present a senior recital (consisting of approximately 60 minutes of music). In order to present a recital, the student must attain approval from their faculty committee by passing a pre-recital hearing at least 3 weeks before the scheduled performance.

Grade Policy for Major-Required Coursework

Courses required for the music major must be taken in the default grading mode to count toward the degree. (Courses that are offered only Pass/No Pass* are counted toward requirements.)

Coursework required for the major must be passed with grades of C- or better (or P* if applicable). Some music majors require grade of B- or better in specific major coursework; see Music Degree Program Progression Milestones above for details. Music majors who achieve these standards are considered to be in good academic standing with the SOMD.

Departmental Academic Standing

The SOMD Undergraduate office conducts a review of music major grades each term. (Academic performance for dance majors is administered by the Dance Department Head.) Those music major students who did not meet the necessary grade thresholds will be informed of their change in departmental academic status as outlined below.

- Level 0 - Good Standing
- Level 1 - Academic Notice
- Level 2 - Academic Alert
- Level 3 - Academic Intervention
- Level 4 - Program Dismissal

Each subsequent term in which the student earn sub-threshold grades in one or more major required courses will escalate their Departmental Academic Status. A student's Departmental Academic Status will be changed by no more than one level per term, regardless of the number of sub-threshold grades in that term.

If a student does not meet the grade threshold for a required music course, they must retake it at the earliest opportunity (summer not included). The student must pass the course on the second attempt; doing so will roll back" their Departmental Academic Status. If a student does not achieve the necessary grade on the second attempt, they will be subject to dismissal from the music major regardless of their current Departmental Academic Status.

Students whose Departmental Academic Standing is anything other than "Good Standing" are required to meet with the SOMD Academic Advisor before registering for the next term. A student with "Intervention" status must develop an academic recovery plan with the SOMD Academic Advisor by the end of the term; if the student does not do so, they will be subject to dismissal from the major.

If a student is dismissed from a music major, they have the opportunity to petition for reinstatement. The student should consult with the SOMD Academic Advisor to prepare their petition for reinstatement. The student's petition is reviewed by the Undergraduate Committee in conjunction with the SOMD Undergraduate Office. If the petition is approved, the student will be returned to "Intervention" standing in the department; the SOMD Academic Advisor will work with the student to develop and carry out their academic recovery plan. If the petition is denied, the student should consult with the SOMD Academic Advisor to determine whether they are eligible to change to another music major.

Non-Enrollment

Undergraduate music majors re-enrolling after three or more consecutive terms of non-enrollment in the music major curriculum (excluding summer session) are required to petition for re-admission to the music major. Depending on the results of this petition, a student may be required to reapply for music major admission through standard music admission processes or re-audition for level placement in performance studies as a music major. Placement exams in theory, aural skills, and keyboard skills may also be required. In addition, undergraduate majors admitted to a specific degree program prior to being un-enrolled for three or more

consecutive terms may also be required to re-apply for admittance to that specific degree program by their major department or area. Students studying abroad or in an approved exchange program are exempt from the re-admission petition requirement.

Program Requirements

Ensemble Requirements for Music Majors

Performance studies and ensemble requirements vary by program. A detailed checklist of requirements for each undergraduate degree is available online (<http://music.uoregon.edu/current-students/undergraduate-music-students/undergraduate-checklists/>). Students must audition for ensemble placement before each fall term, and may also be required to re-audition before each spring term. Assignments take into account the student's preference, level of ability, major performance medium, educational and musical needs, and the needs of the school's ensembles.

Instrumentalists

Ensembles that satisfy this requirement are:

- MUS 396 University Symphony Orchestra (only option for string players)
- MUS 395 Oregon Wind Ensemble
- MUS 395 Oregon Wind Symphony

Singers

Ensembles that satisfy this requirement are:

- MUS 397 University Singers
- MUS 397 Chamber Choir
- MUS 397 Repertoire Singers

Accompanying Requirement for Piano Students

Bachelor of Music and Bachelor of Music in Music Education majors whose primary instrument is piano have an accompanying requirement.

Ensemble Credits for Transfer Students

A limited number of ensemble credits may be transferred:

BA in Music (General Music Concentration)—three of the required six terms may be transferred (see checklist for transfer credit limitations)

BA in Music (Music History and Literature Concentration)—all three of the required terms must be completed in residence

BA in Music (Music Theory Concentration)—all three of the required terms must be completed in residence

BA in Music (Popular Music Studies Concentration)—two of the required four terms may be transferred (see checklist for transfer credit limitations)

BS in Music (General Music Concentration)—three of the required six terms may be transferred (see checklist for transfer credit limitations)

BS in Music (Music Technology Concentration)—all three of the required terms must be completed in residence

BS in Music (Popular Music Studies Concentration)—two of the required four terms may be transferred (see checklist for transfer credit limitations)

BMus in Music Composition—three of the required nine terms may be transferred

BMus in Music: Jazz Studies—three of the required nine terms of small jazz ensemble may be transferred; all three of the required terms of classical ensemble may be transferred

BMus in Music Performance—six of the required twelve terms may be transferred

BMME in Music Education—three of the required nine terms may be transferred

Only one approved ensemble per term may be transferred. For the purposes of transfer, two semesters shall equal three terms of credit and one semester shall equal one term of credit.

Exceptions to Ensemble Requirements

Students who meet one of the following exceptions are not required to audition for ensemble placement:

- Harp, harpsichord, and organ students may enroll in MUS 394 Chamber Ensemble: [Topic] (Chamber Ensemble) instead of the large conducted ensembles.
- Jazz Studies majors must enroll in three terms of classical ensembles according to their primary instrument, which may include MUS 394 Chamber Ensemble: [Topic], Band: [Topic] (MUS 395), Orchestra: [Topic] (MUS 396), or Chorus: [Topic] (MUS 397). Jazz guitar students may enroll in additional terms of jazz ensemble instead of a large conducted ensemble.
- With instructor approval, piano students may enroll in MUS 394 Chamber Ensemble: [Topic] (Accompanying) or MUS 421 The Collaborative Pianist, MUS 422 The Collaborative Pianist, MUS 423 The Collaborative Pianist instead of large conducted ensembles.
- Composition students may enroll in three terms of MUS 490 Balinese Gamelan in partial fulfillment of the requirement.
- Students pursuing the Popular Music major have nonclassical ensemble options and requirements. For details, see checklist.

Other exceptions to ensemble requirements may be considered by the ensemble petition committee after the student completes the following:

- Auditions for the appropriate ensemble auditioning committee (choral or instrumental).
- Submits a petition to the Music Undergraduate Office.

Specific Degree Requirements

Minimum requirements for a bachelor's degree in music are 36 credits in the major, including 24 upper-division credits. In addition to general university requirements and the general requirements for all undergraduate music degrees, each undergraduate music degree has the following specific requirements.

Graduate Programs

Majors - Master's Degree

- Intermedia Music Technology (MMus) (p. 647)
- Music Composition (MMus) (p. 648)
- Music: Conducting (MMus) (p. 650)
- Music Education (MMus) (p. 651)
- Music: Jazz Studies (MMus) (p. 661)
- Music Performance (MMus) (p. 653)
- Music Theory (MA) (p. 659)
- Musicology (MA) (p. 663)
- Pedagogy: Piano (MMus) (p. 662)

Majors - Doctoral Degree

- Data-Driven Music Performance and Composition (PhD) (p. 646)
- Music Composition (PhD) (p. 649)
- Music Education (PhD) (p. 652)
- Music Performance (DMA) (p. 657)
- Music Theory (PhD) (p. 660)
- Musicology (PhD) (p. 664)

Certificate

- Music Performance (p. 665)

Specializations

- Collaborative Piano (p. 666)
- Ethnomusicology (p. 666)
- Historical Performance Practice (p. 666)
- Jazz Pedagogy (p. 666)
- Music Theory Pedagogy (p. 666)
- Piano Pedagogy (p. 666)
- Violin/Viola Pedagogy (p. 667)

Admission

Applicants must satisfy general university, Division of Graduate Studies, and School of Music and Dance requirements governing admission. See the **Division of Graduate Studies** section of this catalog for information about credits, residence, and transfer of graduate work taken elsewhere.

Submit an online Graduate Admission Application. In addition, send two sets of sealed, official transcripts from all colleges or universities from which a bachelor's and all subsequent degrees were earned; transcripts must show the degrees awarded. Address one set to Office of Admissions, 1217 University of Oregon, Eugene, Oregon 97403-1217. Address the second set to School of Music and Dance, Graduate Admissions, 1225 University of Oregon, Eugene, Oregon 97402-1225.

Additional Requirements for International Students

International applicants must have a credential that is equivalent to a four-year bachelor's degree earned in the United States. These credentials must be received from an institution recognized by the

country's educational body that oversees institutional approval, such as the Ministry of Education. Two copies of the following documents should be requested:

- Official transcripts
- Certified English translations of all college or university work
- If the degree and conferral date do not appear on the transcripts, official degree certificates with certified English translations

Send two sets of transcripts, one to the Office of Admissions, 1217 University of Oregon, Eugene, Oregon 97403-1217 USA, the other to the School of Music and Dance, Graduate Admissions, 1225 University of Oregon, Eugene, Oregon 97402-1225 USA.

International applicants must file the International Student Financial Statement online.

A recent TOEFL exam is required of all international graduate applicants whose native language is not English. An acceptable score must be reported directly to the Office of Admissions by December 10 in order for the application to be complete. Master's degree applicants from a non-English-speaking country must provide a TOEFL score of 575 or better (paper-based test) or 88 or better (Internet-based test) or an International English Language Testing System (IELTS) score of 7.0. Doctoral degree applicants must provide a TOEFL score of 600 or better (paper-based test) or 100 or better (Internet-based test); or an IELTS score of 7.0.

Master's Degree Admission

All submissions must include the University of Oregon online Graduate Application (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp). Following are additional admission requirements for specific programs:

Degree Program	Continued Enrollment Requirements
MA, Musicology	Résumé; statement of purpose; two research or analysis papers in history or ethnomusicology; recent concert or recital programs (optional); three references
MA, Music Theory	Curriculum vitae; statement of purpose; two scholarly writing samples exemplifying scholarship and student's ability to develop a single, coherent line of reasoning and ability to analyze tonal or atonal music or both; Preliminary Written Exam for the Music Theory GE (written test designed to evaluate part-writing and analysis skills); interview with music theory faculty; three references

MMus, Music Composition	Résumé; statement of purpose; scholarly writing sample; evidence of live performance of student works; list of compositions; list of performances of compositions; scores of original works for large and small ensembles that demonstrate marked ability and technical skill in composition; audio or video recordings of compositions; interview with member of composition faculty (optional); three references	MMus, Music Education	Master's music education applicants must have a baccalaureate degree in music education. Résumé detailing teaching experience and educational background; statement of professional and personal goals; scholarly writing sample; copies of concert or recital programs you have conducted (elementary-general applicants may substitute a sample curriculum in lieu of concert-recital programs); recent video recording of K–12 music teaching and ensemble performances; campus visit and interview with members of the music education faculty is recommended; three references
MMus, Music: Conducting (Choral, Orchestral, or Wind Ensemble)	Résumé; statement of purpose; scholarly writing sample; recent concert or recital programs conducted; preliminary audition recording; live audition and interview (if invited to campus following review of preliminary recorded audition); three references. For conducting audition details, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf	MMus, Music Performance	Résumé; statement of purpose; research or music analysis paper; repertoire list; recent concert or recital programs; audition (either live or recorded); three references. For current audition requirements and procedures, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf . Saxophone, Piano and Voice applicants must submit a preliminary audition recording by December 10. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.
MMus, Intermedia Music Technology	Résumé; statement of purpose; scholarly writing sample; recent concert or recital programs; intermedia music technology statement; intermedia music technology-related work summary; software-hardware experience; portfolio recordings; three references	MMus, Music: Piano Pedagogy	Résumé; statement of purpose; scholarly writing sample; repertoire list; recent concert or recital programs; video of student teaching a beginning-level student and an intermediate- or advanced-level student; either a live or a recorded audition; three references. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.
MMus, Music: Jazz Studies (Instrumental Performance or Composition-Arranging)	Résumé; statement of purpose; scholarly writing sample; repertoire list (optional); recent concert or recital programs (optional); preliminary audition recording (due by December 10); live audition, if selected from preliminary audition recording; three references. For audition details, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf . For composition and arranging emphasis, submit two representative scores and recordings of arrangements and/or compositions for jazz ensemble. At least one of these pieces should be scored for a large ensemble (10 or more performers). Students admitted on the basis of recorded performances must perform a placement audition upon arrival on campus to begin studies.		

Doctoral Degree Admission

All submissions must include the University of Oregon online Graduate Application (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp).

Details are available from the School of Music and Dance graduate office. Following are additional admission requirements for specific programs:

Degree Program	Continued Enrollment Requirements
PhD and DMA, Music Composition	Résumé; statement of purpose; scholarly writing sample; evidence of live performance of works; list of compositions; list of performances of compositions; scores of original works for large and small ensembles that demonstrate marked ability and technical skill in composition; audio or video recordings of compositions; interview with a member of the composition faculty (optional); three references
PhD, Music Education	Doctoral music education applicants must have at least one degree in music education. Résumé detailing evidence of at least three years of successful full-time music teaching experience in elementary or secondary public school or both; statement of professional and personal goals; scholarly writing sample; copies of concert or recital programs conducted (elementary-general applicants may substitute a sample curriculum in lieu of concert-recital programs); a recent video recording of K–12 music teaching and ensemble performances; an on-campus interview with members of the music education faculty; three references
PhD, Musicology	Résumé; statement of purpose; two research or analysis papers in history or ethnomusicology; recent concert or recital programs (optional); if interested in historical performance practice, submit recent audio or video recordings of performances (optional); three references
PhD, Music Theory	Curriculum vitae; statement of purpose; two scholarly writing samples exemplifying scholarship and ability to develop a single, coherent line of reasoning and ability to analyze tonal or atonal music or both; recent concert or recital programs (optional); Preliminary Written Exam for Music Theory GE (a written test designed to evaluate part-writing and analysis skills); interview with member of music theory faculty; three references

DMA, Music Performance

Résumé; statement of purpose; research or music analysis paper; repertoire list; recent concert or recital programs; audition; three references. For current audition requirements and procedures, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf. Applicants to the DMA, music performance—piano pedagogy option program have two additional application requirements: (1) a list of pedagogical materials and literature used in the applicant's teaching; and (2) a high-quality, 45-minute video recording demonstrating piano instruction of two different works to an advanced-level student. Teaching repertoire may be chosen from works such as the following: Bach two- and three-part inventions; Beethoven, Haydn, or Mozart sonatas, rondos, or a set of variations; a Chopin nocturne or Brahms intermezzo; a Debussy prelude, or a work by Ravel; a modern work written after 1900. Saxophone, Piano and Voice applicants must submit a preliminary audition recording by December 10. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.

Admission Requirements for Graduate Certificate in Music Performance

Applications for admission into the graduate certificate in music performance program are reviewed at the same time as applications for graduate music degree programs. For current audition requirements and procedures, visit https://music.uoregon.edu/Performance_Certificate (https://music.uoregon.edu/Performance_Certificate/). Saxophone, Piano and Voice applicants must submit a preliminary audition recording by December 10.

To be considered for admission, applicants must hold a bachelor of music degree from an accredited institution and must complete a recorded or live audition. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies. For current audition requirements and procedures, see the School of Music and Dance website (<https://music.uoregon.edu/>).

As with all other graduate certificates, applicants must satisfy minimum admission requirements set by the UO Division of Graduate Studies.

All submissions must include the University of Oregon Graduate Application, available online (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp).

Entrance Examinations

Before their first term of enrollment, students who are admitted into a graduate music degree program must take the Graduate Entrance Examination in music theory, aural skills, and music history. The outcome of these exams determines whether graduate music students may register for graduate-level music theory and musicology courses or if subsequent courses will be required to meet the proficiency requirement. Students in the graduate certificate in music performance program are not required to meet the Graduate Entrance Examination proficiency level but must pass the Graduate Entrance Examination in order to meet prerequisites to register for graduate-level music theory and musicology classes.

The Graduate Entrance Examination is administered before each fall term during Week of Welcome. Students are required to either pass the GEE or pass required remedial course work in order to meet the proficiency requirement. Students who fail to pass the examination or pass required remedial undergraduate course work by the end of fall term in their second year will be dismissed from the program.

Students who fail the Graduate Entrance Examination in music theory and/or aural skills (i.e., earn a score of less than 70 percent) will be required to take the undergraduate theory placement exam, the undergraduate aural skills placement exam, or both. Based on the results of the placement exams, students will be required to take the appropriate undergraduate music theory and/or aural skills courses to meet the proficiency requirement. Students who are required to take undergraduate core courses in the first and second years of their program may retake the GEE at the beginning of the second year to satisfy the Level IV requirement. For more information, please see the music school's Procedures and Policies (<https://blogs.uoregon.edu/gradmus/procedures-policies/>).

Students scoring between 50 and 69 percent on the music history portion of the GEE are required to take and pass an additional music history survey course from the MUS 660–665 series (in addition to any MUS 660–665 courses required for the degree). Based on the test results and demonstrated areas of weakness, members of the musicology faculty determine one or two of the survey courses to be taken by the student.

Students scoring below 50 percent are required to pass History of Music 800 to 1600 (MUS 267), Survey of Music History 1600 to 1800 (MUS 268), and Survey of Music History 1800 to Present (MUS 269).

Master's Degree Requirements

In addition to the University of Oregon Division of Graduate Studies' requirements for master's degrees, the School of Music and Dance has the following requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students/>) webpage.

A minimum of 9 credits must be taken in 600- or 700-level courses and at least one-half of the required credits must be in courses intended for graduate students only. Degree candidates must complete a terminal project (e.g., recital, thesis, project), all of which must be archived in one of the following locations: Music Services in Knight Library, Scholars' Bank, ProQuest, or Cykler Music Education Library.

Doctoral Program Requirements

Comprehensive Examinations

Written and oral comprehensive examinations are taken before advancement to candidacy but after meeting the following conditions:

1. Completion of all course work and additional requirements
2. Approval from area advisor

Additional information about comprehensive examinations is available from the music graduate office and the advisor.

Advancement to Candidacy

Advancement to candidacy is based on successful completion of the comprehensive examination, approval by the advisory committee of the dissertation or lecture-document proposal, and the recommendation of the advisor.

Dissertation

A dissertation is required in all doctoral degree programs except the DMA in performance, for which a lecture-document that focuses on some aspect of the performance medium may be substituted. Students in the DMA data-driven instruments track are required to complete a digital portfolio dissertation.

For PhD composition, the dissertation must be an original composition of major proportions composed during doctoral study and performed and recorded on the University of Oregon campus.

Time Limit

Doctoral students have seven years from the term of matriculation to complete the degree. All course work, comprehensive examinations, any required recitals, and the dissertation must be satisfactorily completed before the end of the seven-year period. If this period is exceeded, an additional year of residence or a new set of comprehensive examinations or both are required.

Research (MUE or MUS 601), Dissertation (MUE or MUS 603), and Reading and Conference (MUE, MUJ, or MUS 605) are available during summer session only with advisor's consent.

Final Oral Defense

A final oral defense is required in all degree programs. The candidate is expected to defend the dissertation or lecture-document and show a command of the research area. Members of the dissertation or lecture-document advisory committee typically conduct the final examination; their appointment is subject to approval by the Division of Graduate Studies.

Music (BA/BS)

The Bachelor of Arts (BA) and Bachelor of Science (BS) degrees in Music are primarily for students who want a broad liberal arts education while majoring in music. They typically involve approximately two or three years of music coursework. With the exception of Music Technology, students can be admitted to these majors without audition or portfolio submission. Through these programs, our faculty produce well-rounded, skilled scholars and performers who are flexible leaders with global perspectives and great people skills who become cultural influencers and entrepreneurs.

Concentrations

- Applied Music: Piano (p. 610) (BA/BS)
- Applied Music: Voice (p. 611) (BA recommended)
- General Music (p. 612) (BA/BS)
- Music History and Culture (p. 612) (BA recommended)
- Music Technology (p. 613) (BS recommended)
- Music Theory (p. 614) (BA recommended)

For specific program admission requirements, please visit the program's website (<https://musicanddance.uoregon.edu/apply/>).

Learning Outcomes for:

Bachelor of Arts in Music (General, History and Culture, Theory, Popular Music Studies, Applied Voice)
Bachelor of Science in Music (General, Music Technology, Popular Music Studies, Applied Voice)

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- General Studies: The ability to think, speak, and write clearly and effectively, and to communicate with precision, cogency, and rhetorical force.
- General Studies: An informed acquaintance with the mathematical and experimental methods of the physical and biological sciences; with the main forms of analysis and the historical and quantitative techniques needed for investigating the workings and developments of modern society.
- General Studies: An ability to address culture and history from a variety of perspectives.
- General Studies: Understanding of, and experience in thinking about, moral and ethical problems.
- General Studies: The ability to respect, understand, and evaluate work in a variety of disciplines.
- General Studies: The capacity to explain and defend views effectively and rationally.
- Musicianship: Identify, and work conceptually with the elements of music such as rhythm, melody, harmony, form structure, timbre, texture.
- Musicianship: Accurately read and realize musical notation.
- Musicianship: Demonstrate understanding of compositional processes, aesthetic properties of style, and the ways these shape and are shaped by artistic and cultural forces.
- Musicianship: Demonstrate familiarity with a wide selection of musical literature, the principal eras, genres, and cultural sources, for example, classical, jazz, popular, and music from various cultures and people groups from around the world.
- Musicianship: Develop and defend musical judgments.
- Performance and Music Electives: Perform at levels consistent with the goals and objectives of the specific liberal arts degree program/ concentration being followed.
- Performance and Music Electives: Perform in a variety of musical styles.
- Performance and Music Electives: Demonstrate knowledge and/ or skills in one or more areas of music beyond basic musicianship

appropriate to the individual's needs and interests, consistent with the goals and objectives of the specific liberal arts degree program.

Music Major Requirements: Applied Music: Piano Concentration

Courses used to fulfill the major requirements must be passed with a grade of at least C-, or a mark of P* where pass/no pass is the only grading option for the course.

Music Composition (BMus)

<https://musicanddance.uoregon.edu/music-composition> (<https://musicanddance.uoregon.edu/music-composition/>)

At the core of Oregon's composition program is a thriving artistic community of forty to forty-five undergraduate, master's, and doctoral composers. Our comprehensive approach integrates compositional studies with theory, history, ethnomusicology, intermedia technology, contemporary performance practice, multimedia collaboration, and an intensive career development seminar. Our diverse yet focused curriculum prepares each student for a future as a professional composer.

Many of our students are accomplished instrumentalists, vocalists, and/or conductors, and as part of our program, they continually perform their own music and the works of their colleagues. Opportunities abound for the performance of new music through the Oregon Composers Forum, Music Today Festival, Oregon Bach Festival Composers Symposium, Composing for Orchestra Seminar, and Pacific Rim Gamelan, as well as any of our five student-run new music ensembles.

Program's Admission Requirements

Please visit the program's website (<https://musicanddance.uoregon.edu/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- General Studies Competencies: Think, speak, and write clearly and effectively.
- General Studies Competencies: A familiarity with fields of study beyond music such as those in the arts and humanities, the natural and physical sciences, and the social sciences.
- General Studies Competencies: A functional awareness of the differences and commonalities regarding work in artistic, scientific, and humanistic domains.
- General Studies Competencies: Awareness that multiple disciplinary perspectives and techniques are available to consider all issues and responsibilities including, but not limited to history, culture, moral and ethical issues, and decision-making.
- General Studies Competencies: The ability to identify possibilities and locate information in other fields that have bearing on musical questions and endeavors.
- Common Body of Musical Knowledge and Skills - Performance: Technical skills requisite for artistic self-expression in at least one major performance area at a level appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills - Performance: An overview understanding of the repertory in their major performance area and the ability to perform from a cross-section of that repertory.
- Common Body of Musical Knowledge and Skills - Performance: The ability to read at sight with fluency demonstrating both general musicianship and, in the major performance area, a level of skill relevant to professional standards appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills - Performance: Knowledge and skills sufficient to work as a leader and in collaboration on matters of musical interpretation. Rehearsal and

conducting skills are required as appropriate to the particular music degree.

- Common Body of Musical Knowledge and Skills - Performance: Keyboard competency.
- Common Body of Musical Knowledge and Skills - Performance: Growth in artistry, technical skills, collaborative competence and knowledge of repertory through regular ensemble experiences. Ensembles should be varied both in size and nature.
- Musicianship Skills and Analysis: An understanding of the common elements and organizational patterns of music and their interaction, the ability to employ this understanding in aural, verbal, and visual analyses, and the ability to take aural dictation.
- Musicianship Skills and Analysis: Sufficient understanding of and capability with musical forms, processes, and structures to use this knowledge and skill in compositional, performance, analytical, scholarly, and pedagogical applications according to the requisites of their specializations.
- Musicianship Skills and Analysis: The ability to place music in historical, cultural, and stylistic contexts.
- Composition/Improvisation: Students must acquire a rudimentary capacity to create original or derivative music: written, electronic, or improvisatory forms and methods. These may include but are not limited to the creation of original compositions or improvisations, variations or improvisations on existing materials, experimentation with various sound sources, the imitation of musical styles, and manipulating the common elements in non-traditional ways. A basic understanding of how to work freely and cogently with musical materials in various composition-based activities, particularly those most associated with the major field shall be demonstrated.
- History and Repertory: Students must acquire basic knowledge of music history and repertoires through the present time, including study and experience of musical language and achievement in addition to that of the primary culture encompassing the area of specialization.
- Synthesis: While synthesis is a lifetime process, by the end of undergraduate study students must be able to work on musical problems by combining, as appropriate to the issue, their capabilities in performance; aural, verbal, and visual analysis; composition/improvisation; and history and repertory.

Music Composition Major Requirements

Select one of the following:		3-4
MUS 447	Digital Audio and Sound Design	
MUS 448	Interactive Media Performance	
Select one of the following:		2-4
MUS 359	Music of the Americas	
MUS 365		
MUS 367	Survey of African Music	
MUS 451	Introduction to Ethnomusicology	
MUS 452	Musical Instruments of the World	
MUS 490	Balinese Gamelan	
Senior Recital ²		
Total Credits		128-131

- ¹ Music Composition students must take 3 consecutive terms of MUP 163 Functional Piano for Composers, with exceptions allowed by proficiency examination administered by piano faculty during Week of Welcome.
- ² A public performance of compositions written by the student under the guidance of the composition faculty. Final approval of the student's recital and general qualifications are provided by the composition faculty.
- ³ For continued enrollment in the Music Composition major, students must successfully complete the music core courses (listed above) with grades of C- or better. They must also successfully complete the Composition I series (MUS 240, 241, 242) with grades of B- or better. Lastly, students may retake only one course in the nine-quarter Composition course sequence (Composition I, II & III series) in which they earn a C+ or lower.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Music Education (BMME)

<https://musicanddance.uoregon.edu/music-education> (<https://musicanddance.uoregon.edu/music-education/>)

The UO's music education program is among the most comprehensive and innovative in the western United States, and the only one in Oregon to offer bachelor's, master's, and doctoral degrees. Our faculty members provide expertise in band, choral, elementary general, and string music education. UO is among only a handful of West Coast schools to offer music teacher licensure within the four-year bachelor's degree.

For more than two decades, nearly 100 percent of UO music education graduates seeking employment as K–12 public school music teachers have received job offers upon graduation. Our alumni teach throughout the United States and internationally, including in China, Italy, Spain, and Vietnam. For future music teachers, a UO music education degree

signals outstanding preparation through a rigorous and comprehensive program.

Program's Admission Requirements

Please visit the program's website (<https://musicanddance.uoregon.edu/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- General Studies - Competencies: Think, speak, and write clearly and effectively.
- General Studies - Competencies: A familiarity with fields of study beyond music such as those in the arts and humanities, the natural and physical sciences, and the social sciences.
- General Studies - Competencies: A functional awareness of the differences and commonalities regarding work in artistic, scientific, and humanistic domains.
- General Studies - Competencies: Awareness that multiple disciplinary perspectives and techniques are available to consider all issues and responsibilities including, but not limited to history, culture, moral and ethical issues, and decision-making.
- General Studies - Competencies: The ability to identify possibilities and locate information in other fields that have bearing on musical questions and endeavors.
- Common Body of Musical Knowledge and Skills -Performance: Technical skills requisite for artistic self-expression in at least one major performance area at a level appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills -Performance: An overview understanding of the repertory in their major performance area and the ability to perform from a cross-section of that repertory.
- Common Body of Musical Knowledge and Skills -Performance: The ability to read at sight with fluency demonstrating both general musicianship and, in the major performance area, a level of skill relevant to professional standards appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills -Performance: Knowledge and skills sufficient to work as a leader and in collaboration on matters of musical interpretation. Rehearsal and conducting skills are required as appropriate to the particular music degree.
- Common Body of Musical Knowledge and Skills -Performance: Keyboard competency.
- Common Body of Musical Knowledge and Skills -Performance: Growth in artistry, technical skills, collaborative competence and knowledge of repertory through regular ensemble experiences. Ensembles should be varied both in size and nature.
- Musicianship Skills and Analysis: An understanding of the common elements and organizational patterns of music and their interaction, the ability to employ this understanding in aural, verbal, and visual analyses, and the ability to take aural dictation.
- Musicianship Skills and Analysis: Sufficient understanding of and capability with musical forms, processes, and structures to use this knowledge and skill in compositional, performance, analytical, scholarly, and pedagogical applications according to the requisites of their specializations.
- Musicianship Skills and Analysis: The ability to place music in historical, cultural, and stylistic contexts.

- **Composition/Improvisation:** Students must acquire a rudimentary capacity to create original or derivative music: written, electronic, or improvisatory forms and methods. These may include but are not limited to the creation of original compositions or improvisations, variations or improvisations on existing materials, experimentation with various sound sources, the imitation of musical styles, and manipulating the common elements in non-traditional ways. A basic understanding of how to work freely and cogently with musical materials in various composition-based activities, particularly those most associated with the major field shall be demonstrated.
- **History and Repertory:** Students must acquire basic knowledge of music history and repertoires through the present time, including study and experience of musical language and achievement in addition to that of the primary culture encompassing the area of specialization.
- **Synthesis:** While synthesis is a lifetime process, by the end of undergraduate study students must be able to work on musical problems by combining, as appropriate to the issue, their capabilities in performance; aural, verbal, and visual analysis; composition/improvisation; and history and repertory.

Music Education Major Requirements

Courses used to fulfill the "Core Requirements" must be taken for a letter grade and passed with a grade of C- or better. "Core Requirements" that are fulfilled through Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

Courses used to fulfill the "Music Education Core" and "Specialty Requirements" must be taken for a letter grade a passed with a grade of B- or better. A grade of P* must be earned in courses designated pass/no pass (P/N) only.

Other Requirements

- A minimum cumulative grade point average (GPA) of 2.75 and at least two years in residence. Students must achieve a B– or better in all courses with the MUE subject code. Those failing to do so must retake the course before enrolling in student teaching
- Continued enrollment in the music education program, for which students typically apply at the end of their sophomore year, requires a minimum cumulative GPA of 2.75, a grade of B– or better in Foundations of Music Education (MUE 326), a successfully completed audition and application, and faculty approval

Choral option: Students must also pass three terms of Functional Piano (MUP 163). Students whose primary performance is piano or any other

wind, percussion, or stringed instrument, must also complete three terms of voice performance studies at MUP 265.

Elementary option: Students must also pass three terms of Functional Piano (MUP 163). Students whose primary performance is piano or any other wind, percussion, or stringed instrument must also complete one term of voice performance studies at MUP 265.

Instrumental Option (Band and Orchestra). Piano, organ, recorder, harp, guitar, or other nontraditional instruments may not be used to meet the primary studio option requirements. String speciality students are also required to complete one term of studio instruction on a secondary string instrument at MUP 265.

The current music education checklist is available from the music undergraduate office.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Band Specialty (p. 627)
- Choral Specialty (p. 628)
- Elementary Specialty (p. 630)
- Strings Specialty (p. 631)

Music Performance (BMus)

<https://musicanddance.uoregon.edu/music-performance> (<https://musicanddance.uoregon.edu/music-performance/>)

The UO School of Music and Dance has the largest full-time, in-residence music faculty on the West Coast north of Los Angeles. The school is grounded in the strength of the traditional canon while concurrently fostering the creation and performance of new work.

Our faculty produce well-rounded, skilled scholars and performers who are flexible leaders with global perspectives and great people skills who become cultural influencers and entrepreneurs.

Program's Admission Requirements

Please visit the program's website (<https://musicanddance.uoregon.edu/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- General Studies - Competencies: Think, speak, and write clearly and effectively.
- General Studies - Competencies: A familiarity with fields of study beyond music such as those in the arts and humanities, the natural and physical sciences, and the social sciences.
- General Studies - Competencies: A functional awareness of the differences and commonalities regarding work in artistic, scientific, and humanistic domains.
- General Studies - Competencies: Awareness that multiple disciplinary perspectives and techniques are available to consider all issues and responsibilities including, but not limited to history, culture, moral and ethical issues, and decision-making.
- General Studies - Competencies: The ability to identify possibilities and locate information in other fields that have bearing on musical questions and endeavors.
- Common Body of Musical Knowledge and Skills -Performance: Technical skills requisite for artistic self-expression in at least one major performance area at a level appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills -Performance: An overview understanding of the repertory in their major performance area and the ability to perform from a cross-section of that repertory.
- Common Body of Musical Knowledge and Skills -Performance: The ability to read at sight with fluency demonstrating both general musicianship and, in the major performance area, a level of skill relevant to professional standards appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills -Performance: Knowledge and skills sufficient to work as a leader and in collaboration on matters of musical interpretation. Rehearsal and conducting skills are required as appropriate to the particular music degree.
- Common Body of Musical Knowledge and Skills -Performance: Keyboard competency.
- Common Body of Musical Knowledge and Skills -Performance: Growth in artistry, technical skills, collaborative competence and knowledge of repertory through regular ensemble experiences. Ensembles should be varied both in size and nature.
- Musicianship Skills and Analysis: An understanding of the common elements and organizational patterns of music and their interaction, the ability to employ this understanding in aural, verbal, and visual analyses, and the ability to take aural dictation.
- Musicianship Skills and Analysis: Sufficient understanding of and capability with musical forms, processes, and structures to use this knowledge and skill in compositional, performance, analytical, scholarly, and pedagogical applications according to the requisites of their specializations.
- Musicianship Skills and Analysis: The ability to place music in historical, cultural, and stylistic contexts.
- Composition/Improvisation: Students must acquire a rudimentary capacity to create original or derivative music: written, electronic, or

improvisatory forms and methods. These may include but are not limited to the creation of original compositions or improvisations, variations or improvisations on existing materials, experimentation with various sound sources, the imitation of musical styles, and manipulating the common elements in non-traditional ways. A basic understanding of how to work freely and cogently with musical materials in various composition-based activities, particularly those most associated with the major field shall be demonstrated.

- **History and Repertory:** Students must acquire basic knowledge of music history and repertoires through the present time, including study and experience of musical language and achievement in addition to that of the primary culture encompassing the area of specialization.
- **Synthesis:** While synthesis is a lifetime process, by the end of undergraduate study students must be able to work on musical problems by combining, as appropriate to the issue, their capabilities in performance; aural, verbal, and visual analysis; composition/improvisation; and history and repertory.

Bachelor of Music in Music Performance

Courses used to fulfill the major requirements must be passed with a grade of at least C-, or a mark of P* where pass/no pass is the only grading option for the course.

Code	Title	Credits
MUS 131–133	Music Theory I-III	6
MUS 134–136	Aural Skills I-III	6
MUS 137–139	Keyboard Skills I-III	3
MUS 231–233	Music Theory IV-VI	6
MUS 234	Aural Skills IV	2
MUS 235	Aural Skills V	2
MUS 267	History of Music 800 to 1600	4
MUS 268	Survey of Music History 1600 to 1800	4
MUS 269	Survey of Music History 1800 to Present	4
MUS 358	Music in World Cultures	4
Performance Studies ¹		24-48
Ensemble (at least 12 terms) ²		24
MUS 327	Analysis: [Topic] (one term)	3
MUS 384	Introduction to Conducting	2
Upper-division MUS electives		5
Junior and senior recitals ^{3, 4}		
Total Credits		99-123

¹ Six terms at the MUP 270 level and six terms at the MUP 465 level (48 total performance studies credits), with concurrent enrollment in assigned ensemble.

Voice Students: Six terms at the MUP 265 level and six terms at the MUP 365 level (24 total performance studies credits), with concurrent enrollment in assigned ensemble.

² For Music Performance majors whose primary instrument is piano, 6 of the 12 required terms of Ensemble must be MUS 394 Accompanying.

³ Credit may not be earned toward recitals with Reading and Conference: [Topic] (MUS 405).

⁴ Pre-recital hearings must be approved at least four weeks before the proposed recital date. For details, consult studio instructor.

Areas of Specialization

- bassoon
- cello
- clarinet
- classical guitar
- double bass
- euphonium
- flute
- harp
- harpsichord
- horn
- oboe
- organ
- percussion
- piano
- saxophone
- studio guitar
- trombone
- trumpet
- tuba
- viola
- violin
- voice

Students may also specialize in more than one wind instrument. For details, consult studio instructor.

Additional Requirements

Voice Option

Code	Title	Credits
Proficiency in French, German, or Italian equivalent to completion of one year of college study in each of two languages or two years of study in one language (typically 27–30 credits)		
MUS 155–156	Introduction to Lyric Diction	4
MUP 163	Functional Piano (three terms or equivalent)	6
MUS 394	Chamber Ensemble: [Topic] (one term)	1

Piano Option

Code	Title	Credits
Six of the twelve terms of ensemble must be in MUS 394 Chamber Ensemble: Accompanying.		
MUE 471–473	Piano Pedagogy I-III	7
MUE 409	Terminal Project	1-4

Harpsichord and Organ Option

Six of the 12 terms of ensemble must be in MUS 394 Chamber Ensemble: [Topic] (Accompanying).

Strings, Woodwinds, Brass, and Harp Option

In addition to the 12 terms of ensemble, at least three terms of MUS 394 Chamber Ensemble: [Topic] are required.

Percussion Option

In addition to 12 terms of ensemble, 12 terms of MUS 394 Chamber Ensemble: [Topic] (Oregon Percussion Ensemble) are required.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Instrumental (p. 634)
- Percussion (p. 635)
- Piano (p. 636)
- Voice (p. 637)

Music: Jazz Studies (BMus)

<https://musicanddance.uoregon.edu/jazz-studies> (<https://musicanddance.uoregon.edu/jazz-studies/>)

The University of Oregon is home to a renowned program in Jazz Studies, known for an innovative and rigorous curriculum that prepares students adapt to the ever-evolving musical world in which we live. We believe that an in-depth study of improvisation, composition, and arranging facilitates the development of a versatile skill set that allows our graduates to embrace opportunities in a professional landscape that is always changing.

Program's Admission Requirements

Please visit the program's website (<https://musicanddance.uoregon.edu/apply/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- General Studies - Competencies: Think, speak, and write clearly and effectively.
- General Studies - Competencies: A familiarity with fields of study beyond music such as those in the arts and humanities, the natural and physical sciences, and the social sciences.
- General Studies - Competencies: A functional awareness of the differences and commonalities regarding work in artistic, scientific, and humanistic domains.
- General Studies - Competencies: Awareness that multiple disciplinary perspectives and techniques are available to consider all issues and responsibilities including, but not limited to history, culture, moral and ethical issues, and decision-making.
- General Studies - Competencies: The ability to identify possibilities and locate information in other fields that have bearing on musical questions and endeavors.
- Common Body of Musical Knowledge and Skills - Performance: Technical skills requisite for artistic self-expression in at least one major performance area at a level appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills - Performance: An overview understanding of the repertory in their major performance area and the ability to perform from a cross-section of that repertory.
- Common Body of Musical Knowledge and Skills - Performance: The ability to read at sight with fluency demonstrating both general musicianship and, in the major performance area, a level of skill relevant to professional standards appropriate for the particular music degree.
- Common Body of Musical Knowledge and Skills - Performance: Knowledge and skills sufficient to work as a leader and in collaboration on matters of musical interpretation. Rehearsal and conducting skills are required as appropriate to the particular music degree.
- Common Body of Musical Knowledge and Skills - Performance: Keyboard competency.
- Common Body of Musical Knowledge and Skills - Performance: Growth in artistry, technical skills, collaborative competence and knowledge of repertory through regular ensemble experiences. Ensembles should be varied both in size and nature.

- Musicianship Skills and Analysis: An understanding of the common elements and organizational patterns of music and their interaction, the ability to employ this understanding in aural, verbal, and visual analyses, and the ability to take aural dictation.
- Musicianship Skills and Analysis: Sufficient understanding of and capability with musical forms, processes, and structures to use this knowledge and skill in compositional, performance, analytical, scholarly, and pedagogical applications according to the requisites of their specializations.
- Musicianship Skills and Analysis: The ability to place music in historical, cultural, and stylistic contexts.
- Composition/Improvisation: Students must acquire a rudimentary capacity to create original or derivative music: written, electronic, or improvisatory forms and methods. These may include but are not limited to the creation of original compositions or improvisations, variations or improvisations on existing materials, experimentation with various sound sources, the imitation of musical styles, and manipulating the common elements in non-traditional ways. A basic understanding of how to work freely and cogently with musical materials in various composition-based activities, particularly those most associated with the major field shall be demonstrated.
- History and Repertory: Students must acquire basic knowledge of music history and repertories through the present time, including study and experience of musical language and achievement in addition to that of the primary culture encompassing the area of specialization.
- Synthesis: While synthesis is a lifetime process, by the end of undergraduate study students must be able to work on musical problems by combining, as appropriate to the issue, their capabilities in performance; aural, verbal, and visual analysis; composition/improvisation; and history and repertory.

Music: Jazz Studies Major Requirements

Courses used to fulfill the major requirements must be passed with a grade of at least C-, or a mark of P* where pass/no pass is the only grading option for the course.

Code	Title	Credits
Music Core Requirements		
MUS 131–133	Music Theory I-III	6
MUS 231	Music Theory IV	2
MUS 134–136	Aural Skills I-III	6
MUS 137–139	Keyboard Skills I-III	3
Two courses from the following list ¹		8
MUS 267	History of Music 800 to 1600

Electives		
Select courses totaling at least 18 credits from:		18
Courses in the music of other cultures		
Courses in music technology		
Courses in audio recording		
Other music courses ⁵		
Senior Recital		
Total Credits		141-162

¹ At least 4 credits must be from MUS 267-269.

² Including nine terms of jazz performance studies (at MUP 165, MUP 265, or MUP 365) and five terms of classical performance studies at MUP 165, MUP 265 or MUP 365. Classical and jazz performance studios may be taken concurrently.

³ For students whose primary instrument is guitar: Three additional terms of MUP 165, MUP 265, or MUP 365 Jazz Performance Studies may be taken in place of Classical Performance Studies. Three terms of Guitar Ensemble or three additional terms of large jazz ensemble may be taken in place of Classical Ensembles.

⁴ Chamber Ensemble: [Topic] (MUS 394) with Chamber Ensemble topic only

⁵ For details, consult jazz studies advisor.

Other Requirements

Continuation in the jazz studies program requires successful completion of sophomore and junior proficiency examinations.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Popular Music (BA/BS)

A Bachelor of Arts or Science degree with a Popular Music provides students with a comprehensive course of study focused on songwriting, music production, music performance, music theory, and popular music history and culture. It can also include preparation for music entrepreneurship through coursework in marketing, business, and law. Students choose from a variety of performance ensembles, including gospel choirs, a hip hop ensemble, and popular music combos, among others.

Students can use elective requirements to deepen their engagement with a variety of subjects, including music production, jazz, electronic music, and the history and culture of popular music. A degree in Popular Music requires approximately two years of music coursework with no audition or portfolio needed. Students can elect to take more music coursework to complete general elective requirements, and can take music courses for four years should they choose to.

Program's Admission Requirements

Please visit the program's website (<https://musicanddance.uoregon.edu/apply/>).

Popular Music majors may apply for admission to the Music Production concentration during their second year of study. Admission to the program is contingent upon a cumulative UO GPA of 2.7 or higher, completion of MUS 151 Popular Songwriting, MUS 131 Music Theory I, and MUS 134 Aural Skills I with grades of C- or better. Admission to the concentration is determined by the Popular Music faculty.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Have an understanding of, and skill with, musicianship, defined as the fundamental comprehension of and ability to work with the elements of music.
- Have knowledge of the history of popular music and an understanding of the historical function of the music in relation to culture.
- Compose and produce popular music.
- Understand the financial and legal practices of the music industry.
- Perform music with an instrument and/or voice.
- Perform popular music in an ensemble with a group of people.

- Music Production Concentration (p. 642)

Popular Music Major Requirements

Code	Title	Credits
Theory and Musicianship		
MUS 131	Music Theory I	2
MUS 134	Aural Skills I	2
MUS 249	Popular Music Analysis	3
Theory and Musicianship Electives - Select courses from the following to reach at least 6 credits:		6-8
MUS 132	Music Theory II	
MUS 133	Music Theory III	
MUS 135	Aural Skills II	
MUS 136	Aural Skills III	
MUS 141	Popular Piano and Musicianship I	
MUS 142	Popular Piano and Musicianship II	
MUS 143	Popular Piano and Musicianship III

Music Minor

<https://musicanddance.uoregon.edu/music-minor-programs#music>
<https://musicanddance.uoregon.edu/music-minor-programs/#music>

Undergraduates pursuing a Minor in Music will take courses in various areas of music. This highly flexible program allows students to explore the vast offerings of music classes at the University of Oregon to customize their learning experience.

Music Minor Requirements

The minor in music requires a minimum of 26 credits, 15 of which must be upper division. A minimum of 15 credits must be taken in residence. Courses must be taken for a grade if the graded option is offered. Courses applied to the minor must be graded C– or better or P (pass). No specific courses or categories are required. The minor in Music may not be taken concurrently with any other music degree program. Credits for the minor may be earned by taking any of the following pre-approved courses. For additional information, please visit the website (<http://music.uoregon.edu/current-students/undergraduate-music-students/>) or contact the music undergraduate office (ugradmus@uoregon.edu).

Code	Title	Credits
	Upper-division music courses ¹	15
	Music courses at any level ¹	11
Total Credits		26

¹ MUS subject code courses, MUJ subject code courses, MUP subject code courses, Physics of Sound and Music (PHYS 152), Music and the Brain (PSY 348), and Themes in the Humanities (HUM 300).

Other music courses may be approved by petition to the undergraduate committee.

Data-Driven Music Performance and Composition (PhD)

<https://musicanddance.uoregon.edu/>

Please visit the Music Technology Graduate Program (<https://musicanddance.uoregon.edu/music-technology-graduate-program/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate substantial skill and knowledge related to real-time performance and composition of electroacoustic music with data-driven musical instruments,
- Demonstrate substantial skill and knowledge related to design and fabrication of data-driven musical instruments.
- Demonstrate substantial skill and knowledge related to data-mapping strategies and techniques.

- Demonstrate substantial skill and knowledge related to sound synthesis techniques.
- Demonstrate substantial skill and knowledge related to data-driven instrumental performance techniques.
- Demonstrate substantial skill and knowledge related to data sonification techniques.

Comprehensive Exam		
MUS 603	Dissertation ⁴	18
Public Lecture & Oral Defense of Dissertation		
Total Credits		84-87

¹ Chosen in consultation with faculty advisor that are contained on the menu of approved courses for the degree. The course menu is

intended to evolve and update over time. Other courses are possible through a petition to faculty.

- A solo recital containing five original electroacoustic compositions to be performed with data-driven instruments that employ a variety of interface devices as the front-end to the data-driven instrument. The expected total duration will be approximately one hour. Degree recital must occur prior to the comprehensive exam.
- The portfolio is comprised of six original electroacoustic compositions performed by the candidate and documented with excellent audio/video recordings. Each composition in the portfolio must be musically substantial and well-executed in the documentation. All of the compositions of the portfolio must have received a public performance. Only one of the portfolio compositions may include other musical performers. The videos of the six works should be created as studio productions and not produced from recordings of live performances (except in cases when audience impact is vital to the work itself).
- The dissertation will be comprised of 1) an original large-scale computer music composition of a substantial and ambitious scope that is at least fifteen minutes in duration, that is performed with a data-driven instrument, and that is documented with a high-definition audio video recording; 2) the original software that contributes to documentation of the composition and that forms an essential component to the data-driven instrument; and 3) a text document that analyzes and describes the composition and the data-driven instrument.

Same as university's residency requirement. See Division of Graduate Studies section of this catalog.

Intermedia Music Technology (MMus)

<https://musicanddance.uoregon.edu/>

Please visit the Music Technology Graduate Program (<https://musicanddance.uoregon.edu/music-technology-graduate-program/>) page for more information:

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Have a basic understanding of the scope, integrative nature, and various functions of music technology as a field, including acquaintance with various applications of music technology in music, technological development, research, pedagogy, and in other fields.
- Have knowledge of and ability to use various terminologies and procedures in music technology, music, and technology, and their combinations as employed in and associated with the work of music technology. This includes, but is not limited to, their respective vocabularies of practice, ways work is conceptualized, developed, synthesized, and finalized, and phases of production, presentation, and/or distribution.
- Solve music technology problems, including (a) problem identification, information gathering, solution development, and testing, and (b) knowledge and skill to produce case-specific decisions about what is useful, usable, effective, and desirable during the course of music technology project development and production.
- Describe and respond to the needs or expectations of users, audiences, and/or contexts associated with doing professional work in two or more areas of music technology.

- Apply advanced knowledge of the properties of musical structures and processes to solving music technology problems.
- Have fundamental knowledge of current technologies and technological principles widely applicable to music technology, including but not limited to those associated with recording, manipulating, and presenting music and sound, signal flow and processing, music communication protocols, synthesis and interface technologies, sound synthesis, and interactive and generative media.
- Use industry standard technologies at a professional level to achieve goals and objectives associated with specific areas of music technology. These goals may be in terms such as mastery of production techniques, artistic expression, support for work in other fields, and relationships with other technologies and media.
- Apply knowledge of fundamental science, engineering, and math concepts and other aspects of the science of sounds and the electrical manipulations of sounds in music technology situations.
- Have a basic understanding of connections among music, technology, music technology, and culture, including the evolution of music technology, the impact of technology on music and culture, technological influences on multiple musical styles, including contemporary styles, and their cultural contexts, and information and means for projecting future possibilities in music technology; and basic understanding of these connections with regard to current and emerging Internet- and network-based programs, services, and environments related to the creation, sharing, and distribution of music.
- Have knowledge of the basic principles, laws, regulations, and ethical considerations and practices associated with music technology and intellectual property as it is both acquired and created by individuals working in the music technology program.
- Have comprehensive capabilities to use and integrate the above competencies in at least one area of music technology to produce professional-level work in at least one area, and basic-level work in a second area.

Intermedia Music Technology Requirements

Code	Title	Credits
Two 500- or 600-level seminars or courses in music outside the music technology area, approved by the advisor		6-8
MUS 550	Sensor Music	3
MUS 570	History of Electroacoustic Music	3
MUS 571	Musical Performance Networks	3
MUS 609	Terminal Project	9
MUS 611	Research Methods in Music	3
MUS 693	Oregon Electronic Device Orchestra	2
Completion of 18 credits of the following:		18
MUS 645	Advanced Electronic Composition	
Two nonmusic courses, approved in advance by the advisor		6-8
MUS 579	Data Sonification	4
Total Credits		57-61

Additional Requirements

- electroacoustic listening exam—a listening examination covering contemporary and classic works of electroacoustic music literature
- technical exam—a four-hour written examination on theoretical aspects of music technology

- final oral examination—reviewing the terminal project and degree course work

Music Composition (MMus)

<https://musicanddance.uoregon.edu/>

Please visit the Music Composition Graduate Program (<https://musicanddance.uoregon.edu/music-composition-graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced competencies in composition. Studies in this area comprise as much as two-thirds or at least one-third of the total curriculum.
- Gain knowledge and skills in one or more fields of music outside the major such as history and literature, theory and analysis, musicology and ethnomusicology, performance, and pedagogy. Such supportive studies in music that broaden and deepen musical competence comprise at least one-third of the total curriculum.
- Be afforded regular opportunities to hear their works performed.
- Show a culminating demonstration of professional capability in the major field, the student must submit at least one original composition appropriate as a final project.

Master of Music in Music Composition Requirements

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUS 538	Composers Forum (6 terms)	6
Select one of the following:		3

Notation Proficiency		
Orchestration Proficiency		
Piano Proficiency ³		
Composition Recital ⁴		
Final Oral Examination ⁵		
Total Credits		61

¹ Composition Thesis Proposal. Must be taken no later than fourth quarter of Advanced Composition Studies.

² A composition of substantial dimension, composed under the guidance of a member of the music composition faculty. A reading (or performance) and recording of the thesis is required.

³ Students have 2 ways of meeting the piano proficiency: (1) Three consecutive terms of MUP 163 (2) pass the proficiency exam administered in Week of Welcome.

⁴ Public performance of at least 50 minutes of music composed under the guidance of and approved by the composition faculty.

⁵ Oral Examination reviewing thesis and degree coursework.

Music Composition (PhD)

<https://musicanddance.uoregon.edu/>

Please visit the Music Composition Graduate Program (<https://musicanddance.uoregon.edu/music-composition-graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- The doctoral degree program in composition stresses creative activity emphasizing the development of a personal aesthetic expressible in sound.
- Competencies also include a broad knowledge of historical and contemporary compositional practices, music theory, history and criticism, and creative approaches to relationships of these to the compositional process.

Doctor of Philosophy in Music Composition Requirements

¹ MUS 660-664 can only count after the student has already fulfilled the Music in Historic Era requirement.

Music: Conducting (MMus)

<https://musicanddance.uoregon.edu/>

Options are available in

- Choral (p. 650)
- Orchestral (p. 650)
- Wind Ensemble (p. 651)

Please visit the Music Conducting Graduate Program (<https://musicanddance.uoregon.edu/conducting-program/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced competencies in conducting. Conducting, analytical studies, score reading, and rehearsal techniques comprise as much as two-thirds or at least one-third of the total curriculum.
- Gain knowledge and skills in one or more fields of music outside the major such as orchestration, history and literature, musicology and ethnomusicology, performance, and composition. Such supportive studies in music that broaden and deepen musical competence comprise at least one-third of the total curriculum.
- Choral conducting majors must be proficient in vocal pedagogy and in English, German, French, Italian, and Latin diction. They must have general phonetic knowledge and skills that can be related to other languages. They should have language competencies sufficient to understand texts in the repertory.
- Be afforded the opportunity for regular conducting experience under faculty supervision and with an appropriate ensemble.
- As a culminating demonstration of professional capability in the major field, the student must conduct a concert-length public performance or the equivalent.

MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	3
MUS 695	Band: [Topic] (three terms of Wind Ensemble)	6
Total Credits		45

Additional Requirements

- as a culminating demonstration of professional capability in the major field, the student must conduct a juried rehearsal and concert-length public performance or the equivalent
- academic year in residence
- a final oral examination that covers degree course work

- a research paper dealing with some aspect of wind ensemble conducting

Music Education (MMus)

<https://musicanddance.uoregon.edu/>

Please visit the Music Education Graduate Program (<https://musicanddance.uoregon.edu/music-education-graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced competencies in music education. Studies in this area comprise as much as two-thirds or at least one-third of the total curriculum.
- Gain knowledge and skills in one or more fields of music outside the major such as performance, conducting, theory and analysis, and history and literature. Such supportive studies in music that broaden and deepen musical competence comprise at least one-third of the total curriculum. To ensure breadth of competence, it is strongly recommended that institutions require at least one advanced course in music history, musicology, or ethnomusicology; one in performance; and one in music theory analysis.
- Develop graduate-level perspectives on contemporary issues and problems in music education. This may include a review of curriculum developments, teaching methodology, innovations, and multidisciplinary concepts in advanced seminars or by other means.

Master of Music in Music Education Requirements

Candidates are required to establish an area of emphasis among the following:

- Choral music education (voice and piano must be used)
- Elementary general music education (voice and piano must be used)
- Instrumental music education: band (traditional wind or percussion instruments must be used)
- Instrumental music education: orchestra (violin, viola, cello, or double bass must be used)

Music Education (PhD)

<https://musicanddance.uoregon.edu/>

Please visit the Music Education Graduate Program (<https://musicanddance.uoregon.edu/music-education-graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- The doctoral degree program in music education emphasizes the preparation of music administrators, teachers, researchers, and educational leaders who are able to think abstractly, generalize knowledge, carry on research and apply research results to their own areas of specialization, and communicate effectively both orally and in written form. The program involves the scholarly study of the philosophical and psychological foundations of music education and the processes of teaching and learning music, culmination in a dissertation.

Doctor of Philosophy in Music Education

Code	Title	Credits
Graduate Course in Qualitative Research ¹		3-4
MUE 612	Quantitative Research in Music Education	3
MUE 641	College Music Teaching	3

Additional graduate credits (transferred from master's or taken at UO) to reach 81 total credits		
Public Lecture and final oral defense		
Total Credits		81

¹ Chosen in consultation with faculty advisor.

² Seminar in Music Education.

³ Chosen in consultation with faculty advisor. These courses are intended to prepare students for the research and writing/creation of dissertation.

⁴ Can be taken concurrently with or after comprehensive exam.

⁵ Summer session enrollment requires advisor's consent.

Music Performance (MMus)

<https://musicanddance.uoregon.edu/>

Options are available in

- Brass (p. 653): Euphonium, Horn, Trombone, Trumpet, Tuba
- Keyboards (p. 653): Harpsichord, Solo Piano
- Multiple Instruments (p. 654): Brass, Woodwinds
- Strings (p. 654): Double Bass, Cello, Viola, Violin
- Percussion (p. 655)
- Voice (p. 655)
- Woodwinds (p. 655): Bassoon, Clarinet, Flute, Oboe, Saxophone

Please visit the Music Performance Graduate Program (<https://musicanddance.uoregon.edu/music-performance-graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced competencies in performance. Studies in this area comprise as much as two-thirds or at least one-third of the total curriculum.
- Gain knowledge and skills in one or more fields of music outside the major such as theory and analysis, history and literature, musicology and ethnomusicology, and pedagogy. Such supportive studies in music that broaden and deepen musical competence comprise at least one-third of the total curriculum.
- Voice majors are expected to be proficient in English, German, French, and Italian diction and to have general phonetic knowledge and skills that can be applied to other languages. They should have language competencies sufficient to understand texts in the repertory.
- As a culminating demonstration of professional capability in the major field, the student must present a public performance, which may serve as the thesis. Normally, the performance includes at least sixty minutes of recital in which the performer is a soloist.

Music Performance - Brass

Code	Title	Credits

Music Performance (DMA)

<https://musicanddance.uoregon.edu/>

Options are available in

- Instruments (p. 657): Brass (Euphonium, Horn, Trombone, Trumpet, Tuba), Double Bass, Cello, Percussion, and Woodwinds (Bassoon, Clarinet, Flute, Oboe, Saxophone)
- Keyboards (p. 657): Solo Piano, Collaborative Piano
- Violin and Viola (p. 658)
- Voice (p. 659)

Please visit the Music Performance Graduate Program (<https://musicanddance.uoregon.edu/music-performance-graduate-programs/>) page for more information.

At the doctoral level, the basic orientation is the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works and pedagogy. Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced competencies in performance. Studies in this area comprise as much as two-thirds or at least one-third of the total curriculum.
- Gain knowledge and skills in one or more fields of music outside the major such as theory and analysis, history and literature, musicology and ethnomusicology, and pedagogy. Such supportive studies in music that broaden and deepen musical competence comprise at least one-third of the total curriculum.
- Voice majors are expected to be proficient in English, German, French, and Italian diction and to have general phonetic knowledge and skills that can be applied to other languages. They should have language competencies sufficient to understand texts in the repertory.
- As a culminating demonstration of professional capability in the major field, the student must present three public performances and complete a lecture/document or dissertation. The performances include at least sixty minutes of recital in which the performer is a soloist.

MUS 665	Music in the 20th Century	
Ensemble, MUS 696 (at least 6 terms)		12
Non-Music Courses ¹		8
Research Development Courses (2 courses) ²		6-8
MUE 639	Pedagogy and Practicum: [Topic]	3
Two Musicology/Ethnomusicology or Theory courses at the 500-level or above ³		6-8
Performance Studies, MUP 765 (at least 6 terms)		24
Select one of the following:		2
MUE 563	Pedagogy Methods: Violin and Viola	
MUE 564	Advanced Violin/Viola Pedagogy	
MUE 565	Somatics for String Players	1
MUE 559	Fundamentals of Violin and Viola Teaching	2
MUS 607	Seminar: [Topic] ⁴	2
Three solo recitals		
Comprehensive Exam		
Lecture Document or Dissertation - select one from the following:		6-18
MUS 601	Research: [Topic] (6 credits)	
MUS 603	Dissertation (18 credits)	
Public Lecture & Oral Defense of Lecture Document/ Dissertation		
Total Credits		84-100

¹ Chosen in consultation with faculty advisor. These courses are intended to assist with content creation of the final writing/creation of dissertation or lecture document.

² Chosen in consultation with faculty advisor. These courses are intended to prepare students for the research and writing/creation of dissertation or lecture document.

³ Courses are listed in the Approved Courses (p. 659) section.

⁴ DMA Thesis Organization

DMA in Music Performance - Voice

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUS 629	Repertoire and Analysis	3
Music in Historic Era - select two from the following:		6
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
Ensemble (at least 6 terms)		12
MUS 697	Chorus: [Topic]	
	or MUS 698 Opera Workshop	
Non-Music Courses ¹		8
Research Development Courses (2 courses) ²		6-8
MUE 639	Pedagogy and Practicum: [Topic]	3
Two Musicology/Ethnomusicology or Theory courses at the 500-level or above ³		6-8
Performance Studies, MUP 765 (at least 6 terms)		24
Foreign Language ⁴		
MUS 607	Seminar: [Topic] ⁵	2
Three solo recitals		
Comprehensive Exam		
Lecture Document or Dissertation - select one from the following:		6-18
MUS 601	Research: [Topic] (6 credits)	
MUS 603	Dissertation (18 credits)	
Public Lecture & Oral Defense of Lecture Document/ Dissertation		
Total Credits		79-95

¹ Chosen in consultation with faculty advisor. These courses are intended to assist with content creation of the final writing/creation of dissertation or lecture document.

² Chosen in consultation with faculty advisor. These courses are intended to prepare students for the research and writing/creation of dissertation or lecture document.

³ Courses are listed in the Approved Courses (p. 659) section.

⁴ One year of college study in at least two of the languages - French, German, Italian. Can have been completed at previous institutions.

⁵ DMA Thesis Organization

Musicology/Ethnomusicology & Music Theory Courses 500-level up

Code	Title	Credits
MUS 528	Cultures of Musical Celebrity	4
MUS 551	Introduction to Ethnomusicology	4

MUS 552	Musical Instruments of the World	4
MUS 562	Popular Musics in the African Diaspora	4
MUS 575	History of Opera	4

MUS 670	Graduate Seminar in Musicology: [Topic]	4
MUS 671	Seminar in Ethnomusicology: [Topic]	4
MUS 680	Historical Performance Practices I	3
MUS 681	Historical Performance Practices II	3
MUS 682	Historical Performance Practices III	3
MUS 683	Rhetoric and Music	4
MUS 684	Musical Iconography	4
MUS 516	Post-Tonal Theory I	3
MUS 517	Post-Tonal Theory II	3
MUS 530	Tonal Analysis: Linear Prolongational Analysis	3
MUS 531	Tonal Analysis: Form in Tonal Music	3
MUS 532	Tonal Analysis: Analysis of Popular Music	3
MUS 533	Counterpoint	4
MUS 534	Counterpoint	4
MUS 535	Counterpoint	4
MUS 615	Current Trends in Music Theory	3
MUS 629	Repertoire and Analysis	3
MUS 630	History of Theory I	3
MUS 631	History of Theory II	3
MUS 632	History of Theory III	3
MUS 634	Advanced Post-Tonal Theory	3

¹ These courses can also count in this category, but only after the Music in Historic Era requirement is completed.

Music Theory (MA)

<https://musicanddance.uoregon.edu/>

Please visit the Music Theory Graduate Program (<https://musicanddance.uoregon.edu/graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Gain advanced competency in analytical methodologies for tonal and post-tonal music
- Develop academic research and writing skills to a level commensurate with scholarly publications in music theory and musicology

- Acquire knowledge of current research in the field of music theory
- Gain familiarity with one or more fields other than music theory, such as musicology or ethnomusicology.
- Develop a research specialty by producing a larger research project in that area

Music Theory Major Requirements

Code	Title	Credits
MUS 615	Current Trends in Music Theory	3
MUE 639	Pedagogy and Practicum: [Topic] ((music theory pedagogy))	3
One course in post-tonal theory selected from the following:		3
MUS 516	Post-Tonal Theory I	
MUS 517	Post-Tonal Theory II	
MUS 634	Advanced Post-Tonal Theory	
One course in tonal analysis selected from the following:		3
MUS 530	Tonal Analysis: Linear Prolongational Analysis	
MUS 531	Tonal Analysis: Form in Tonal Music	
MUS 532	Tonal Analysis: Analysis of Popular Music	
MUS 589	Analysis of Rhythm and Meter	
One history of theory course selected from the following:		3
MUS 630–632	History of Theory I-III	3
One music history survey selected from the following:		
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
One seminar selected from the following:		4
MUS 670	Graduate Seminar in Musicology: [Topic]	
MUS 671	Seminar in Ethnomusicology: [Topic]	
MUS 672	Seminar: Music Theory: [Topic] (Seminar Music Theory)	
Menu-based electives		
Two additional music theory courses selected from the following:		6-8
MUS 516–517	Post-Tonal Theory I-II	
MUS 634	Advanced Post-Tonal Theory	
MUS 530	Tonal Analysis: Linear Prolongational Analysis	
MUS 531	Tonal Analysis: Form in Tonal Music	
MUS 532	Tonal Analysis: Analysis of Popular Music	
MUS 589	Analysis of Rhythm and Meter	
MUS 533–535	Counterpoint	
MUS 630–632	History of Theory I-III	
MUS 672	Seminar: Music Theory: [Topic]	6-8
Two additional music courses outside of music theory, selected from the following:		
MUS 528	Cultures of Musical Celebrity	
MUS 551	Introduction to Ethnomusicology	
MUS 552	Musical Instruments of the World	
MUS 562	Popular Musics in the African Diaspora	

MUS 563	Popular Music Studies	
MUS 570	History of Electroacoustic Music	
MUS 587	Music and Emotion	
MUS 614	Introduction to Musicology	
MUS 643	Notation of Medieval and Renaissance Music	
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
MUS 670	Graduate Seminar in Musicology: [Topic]	
MUS 671	Seminar in Ethnomusicology: [Topic]	
MUS 680–682	Historical Performance Practices I-III	
MUE 639	Pedagogy and Practicum: [Topic] ((music history pedagogy))	
Two additional courses from either of the menus above		6-8
Research Development Course ²		1-4
Thesis		
MUS 503	Thesis	9
Final Oral Examination ³		
Total Credits		50-59

¹ Chosen in consultation with advisor.

² Chosen in consultation with faculty advisor. Undergraduate or graduate courses can count towards this requirement. These courses are intended to prepare students for the research and writing/creation of the final thesis.

³ Oral Exam reviewing thesis & degree coursework.

Music Theory (PhD)

<https://musicanddance.uoregon.edu/>

Please visit the Music Theory Graduate Program (<https://musicanddance.uoregon.edu/graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Gain advanced competency in analytical methodologies for tonal and post-tonal music.
- Understand the history of the discipline of music theory
- Develop academic research and writing skills to a level commensurate with scholarly publications in music theory and musicology
- Acquire deep knowledge of current research in the field of music theory
- Gain familiarity with one or more fields other than music theory, such as musicology or ethnomusicology.
- Gain skills in and knowledge of pedagogical methods for music theory at the collegiate level

- Develop a research specialty by acquiring professional expertise and producing a large-scale research project in that area

Doctor of Philosophy in Music Theory Requirements

Code	Title	Credits
Core requirements		
MUS 615	Current Trends in Music Theory	3
MUE 639	Pedagogy and Practicum: [Topic] (music theory pedagogy)	3
One music history survey, selected from the following:		3
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
One course in post-tonal theory, selected from the following:		3
MUS 516	Post-Tonal Theory I	
MUS 517	Post-Tonal Theory II	
MUS 634	Advanced Post-Tonal Theory	
One course in tonal analysis, selected from the following:		3
MUS 530	Tonal Analysis: Linear Prolongational Analysis	
MUS 531	Tonal Analysis: Form in Tonal Music	
MUS 532	Tonal Analysis: Analysis of Popular Music	
MUS 589	Analysis of Rhythm and Meter	
Two history of theory courses		6
MUS 630	History of Theory I	
MUS 631	History of Theory II	
MUS 632	History of Theory III	
Seminars		12
Three seminars chosen from the following:		
MUS 670	Graduate Seminar in Musicology: [Topic]	
MUS 671	Seminar in Ethnomusicology: [Topic]	
MUS 672	Seminar: Music Theory: [Topic]	
Menu-based coursework		18-24
Six additional courses selected from the following:		
MUS 516	Post-Tonal Theory I	
MUS 517	Post-Tonal Theory II	
MUS 634	Advanced Post-Tonal Theory	
MUS 530	Tonal Analysis: Linear Prolongational Analysis	
MUS 531	Tonal Analysis: Form in Tonal Music	
MUS 532	Tonal Analysis: Analysis of Popular Music	
MUS 589	Analysis of Rhythm and Meter	
MUS 533	Counterpoint	
MUS 534	Counterpoint	
MUS 535	Counterpoint	
MUS 630	History of Theory I	
MUS 631	History of Theory II	
MUS 632	History of Theory III	
MUS 672	Seminar: Music Theory: [Topic]	

MUS 528	Cultures of Musical Celebrity	
MUS 551	Introduction to Ethnomusicology	
MUS 552	Musical Instruments of the World	
MUS 562	Popular Musics in the African Diaspora	
MUS 563	Popular Music Studies	
MUS 570	History of Electroacoustic Music	
MUS 587	Music and Emotion	
MUS 670	Graduate Seminar in Musicology: [Topic]	
MUS 671	Seminar in Ethnomusicology: [Topic]	
MUS 614	Introduction to Musicology	
MUS 643	Notation of Medieval and Renaissance Music	
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
MUS 680	Historical Performance Practices I	
MUS 681	Historical Performance Practices II	
MUS 682	Historical Performance Practices III	
MUE 639	Pedagogy and Practicum: [Topic] (music history pedagogy)	
Non-Music Courses ¹		8
Research Development Courses (2 courses) ²		6-8
Comprehensive Exam		
Dissertation		18
MUS 603	Dissertation	
Final Lecture and Oral Defense of Dissertation		
Total Credits		83-91

¹ Chosen in consultation with faculty advisor. These courses are intended to assist with content creation of the final dissertation.

² Chosen in consultation with faculty advisor. These courses are intended to prepare students for the research and writing/creation of the final dissertation.

Music: Jazz Studies (MMus)

<https://musicanddance.uoregon.edu/>

Options are available in

- Composition-Arranging (p. 662)
- Instrumental Performance (p. 662)

Please visit the Jazz Studies Graduate Program (<https://musicanddance.uoregon.edu/jazz-studies/graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced competencies in jazz studies including areas such as jazz performance, improvisation, composition, and arranging.

Studies in these areas comprise as much as two-thirds or at least one-third of the total curriculum.

- Gain knowledge and skills in one or more fields of music outside the major such as history and literature, theory and analysis, musicology and ethnomusicology, and recording and studio techniques. Such supportive studies in music that broaden and deepen musical competence comprise at least one-third of the total curriculum.
- As a culminating demonstration of professional capability in the major field, the student must present either a public performance or submit at least one original composition as a thesis.

Master of Music in Music: Jazz Studies—Composition-Arranging Emphasis

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUJ 583–584	Advanced Jazz Arranging I-II	6
MUJ 540	Jazz Pedagogy Practicum	3
MUJ 660	Survey of Jazz Composition	3
MUJ 661	Jazz Program Planning and Development	3
MUJ 605	Reading and Conference: [Topic] ¹	4
Six terms of large jazz ensemble - select one of the following:		6-12
MUJ 690	Jazz Laboratory Band III (six terms)	
MUJ 691	Jazz Laboratory Band II (six terms)	
MUJ 692	Oregon Jazz Ensemble (six terms)	
Applied study in Jazz Composition (at least 3 terms)		6-12
MUP 650	Music Performance Studies	
or MUP 665	Music Performance Studies	
MUJ 695	Small Jazz Ensemble: [Topic] (at least 3 terms)	3
At least four 500-level or above seminars or courses in music outside the jazz area ²		12-16
Graduate Jazz Arranging Barrier Exam		
Recital or CD project of composed works		
Public lecture-presentation of independent research		
Final Oral Examination ³		
Total Credits		49-65

¹ Research Presentation Preparation.

² Any MUS, MUP, MUE 500-level up course. No MUJ.

³ Oral examination with emphasis on jazz history, literature and pedagogy.

Master of Music in Music: Jazz Studies—Instrumental Performance Emphasis

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUJ 577–579	Advanced Jazz Repertoire I-III	9
MUJ 540	Jazz Pedagogy Practicum	3
MUJ 661	Jazz Program Planning and Development	3
Jazz performance studies		12-24
MUP 650	Music Performance Studies	
or MUP 665	Music Performance Studies	
Three terms of large ensemble - select one of the following:		3-6
MUJ 690	Jazz Laboratory Band III (three terms)	
MUJ 691	Jazz Laboratory Band II (three terms)	

MUJ 692	Oregon Jazz Ensemble (three terms)	
MUJ 695	Small Jazz Ensemble: [Topic] (six terms)	6
At least four 500-level or above seminars or courses in music outside the jazz area ¹		12-16
Graduate Jazz Performance Barrier Exam		
Recital or CD Project		
Public lecture-presentation of independent research		
Final Oral Examination ²		
Total Credits		51-70

¹ Any MUS, MUP, MUE 500-level up course. No MUJ.

² Oral examination with emphasis on jazz history, literature and pedagogy.

Pedagogy: Piano (MMus)

<https://musicanddance.uoregon.edu/>

Please visit the Piano Pedagogy Graduate Program (<https://musicanddance.uoregon.edu/piano-pedagogy/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate advanced competencies in piano pedagogy and its repertory. Studies in these areas comprise as much as two-thirds or at least one-third of the curriculum.
- Gain knowledge and skills in one or more fields of music outside the major such as theory, history, musicology, ethnomusicology, and performance. Such supportive studies in music that broaden and deepen musical competence comprise at least one-third of the curriculum.
- As a culminating demonstration of professional capability in the major field, the student must present a final project, research paper, and/or recital.

Master of Music in Pedagogy: Piano Requirements

Code	Title	Credits
MUE 571	Piano Pedagogy I: Teaching Beginners	3
MUE 572	Piano Pedagogy II Teaching Groups	3
MUE 573	Piano Pedagogy III Teaching Intermediate Levels	3
MUE 606	Field Studies: [Topic] (three terms)	3
MUE 639	Pedagogy and Practicum: [Topic]	3
MUS 611	Research Methods in Music	3
MUS 650–652	Piano Literature	9
Applied Piano Study		12-24
6 terms of MUP 650 or MUP 665 for a total of 12-24 credits		
Two 500-level or above courses in music history/ethnomusicology, Literature, or theory		6
Appropriate ensemble (3 terms) ¹		3-6
MUE 601	Research: [Topic] (Final Project)	3
Recital ²		

Final Oral Examination ³

Total Credits	51-66

¹ At least 3 terms to be chosen from MUS 694, MUS 521-523, or participation in a large conducted ensemble as a principal keyboardist or accompanist.

² Recital of at least 30-minutes of music performance. If pursuing a concurrent piano performance degree, a lecture demonstration or lecture recital may serve in lieu of the recital.

³ Oral examination reviewing the project and degree coursework.

Music History/Ethnomusicology, Literature, or Theory Courses

Final Lecture and Oral Defense of Dissertation		
Total Credits		85-89

¹ Chosen in consultation with faculty advisor. These courses are intended to assist with content creation of the final dissertation.

² Chosen in consultation with faculty advisor. These courses are intended to prepare students for the research and writing/creation of the final dissertation.

Music Performance Graduate Certificate

<https://musicanddance.uoregon.edu/>

The graduate certificate in music performance offers post-baccalaureate students the opportunity to focus deeply on performance studies outside the academic rigors of traditional graduate music degrees. This program is geared toward performing instrumentalists and singers who plan on full-time careers as a musician. The graduate certificate is a one-year stand-alone program.

Options are available in

- Brass (Euphonium, Horn, Trombone, Trumpet, Tuba)
- Keyboards: Harpsichord, Solo Piano
- Percussion
- Strings (Violin, Viola, Double Bass, Cello)
- Voice
- Woodwinds (Bassoon, Clarinet, Flute, Oboe, Saxophone)

Please visit the Music Performance Graduate Program (<https://musicanddance.uoregon.edu/music-performance-graduate-programs/>) page for more information.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Performance: Have achieved of the highest possible level of performance. The study in the major performing medium will continue throughout the entire certificate program.
- Performance: Have solo and ensemble experience in a variety of formal and informal settings.
- Basic Musicianship: Develop fundamental musicianship, including basic understanding of musical properties such as rhythm, melody, harmony, timbre, texture, and form; abilities to respond to, interpret, create, analyze, and evaluate music; and sight-reading and aural skills.
- Basic Musicianship: Develop a general knowledge of music history through performance, listening, and discussion to enable them to place compositions in historic and stylistic perspective.

Music Performance Graduate Certificate Requirements

Courses used to fulfill the certificate requirements must be taken for a letter grade and passed with a grade of B- or better. All credits must be taken at the UO.

Code	Title	Credits
Three terms of applied lessons (MUP 665)		12
Three terms of large ensemble chosen from:		6
MUS 521–523	The Collaborative Pianist	
MUS 695	Band: [Topic]	
MUS 696	Orchestra: [Topic]	
MUS 697	Chorus: [Topic]	
MUS 698	Opera Workshop	
Three terms of Chamber ensemble chosen from:		3
MUS 691	Collegium Musicum	
MUS 694	Chamber Ensemble: [Topic]	
Electives at the 500-level or above ¹		6
Recital		
Community Outreach Event in the Northwest Region ²		
Total Credits		27

¹ Students who wish to take 500- or 600-level theory or musicology courses must either pass the graduate music entrance exams or SOMD undergraduate courses as required.

² A written proposal is required as well as a written report of the final event.

Large Ensemble Requirements:

- Instrumental ensemble options: University Symphony Orchestra, Oregon Wind Ensemble, Oregon Wind Symphony
- Voice ensemble options: University Singers, Chamber Choir, Opera Ensemble
- Students studying piano, collaborative piano have other ensemble options. Contact your advisor.

Music Graduate Specializations

Options are available in

- Collaborative Piano (p. 666)
- Ethnomusicology (p. 666)
- Historical Performance Practice (p. 666)
- Jazz Pedagogy (p. 666)
- Music Theory Pedagogy (p. 666)
- Piano Pedagogy (p. 666)
- Violin/Viola Pedagogy (p. 667)

Please visit the Music Graduate Specialization (<https://musicanddance.uoregon.edu/graduate-specializations/>) page for more information.

Graduate Specialization in Collaborative Piano

Code	Title	Credits
MUS 521	The Collaborative Pianist	2
MUS 522	The Collaborative Pianist	2
MUS 523	The Collaborative Pianist	2
MUP 650	Music Performance Studies	2
MUP 650	Music Performance Studies	2
MUP 650	Music Performance Studies	2
MUS 567	Solo Vocal Music	3
MUS 568	Solo Vocal Music	3
Total Credits		18

Two Chamber Music Recitals

Year One: A 45-60 minute chamber music/art-song recital.

Year Two: A 60-90 minute chamber music/art-song recital.

This specialization is available to all MM Piano Performance, MM Piano Pedagogy, & DMA Piano Performance Majors. Exceptions may be made with permission of the UO SOMD Director of Collaborative Piano.

/programadmin/461/index.html

Graduate Specialization in Ethnomusicology

Code	Title	Credits
Core Courses		
MUS 551	Introduction to Ethnomusicology	4
FLR 595	Folklore Fieldwork	4
MUS 671	Seminar in Ethnomusicology: [Topic]	4
Ensemble Courses		2
MUS 536	World Music Ensemble: [Topic] (One of the two ensemble options)	
DAN 536	Dema African Performance Ensemble: [Topic]	
Additional 4-credit class		4
MUS 552	Musical Instruments of the World (Possible elective)	
MUS 562	Popular Musics in the African Diaspora	
MUS 671	Seminar in Ethnomusicology: [Topic] (Must be different topic other MUS 671)	

Graduate Specialization in Historical Performance Practice

Code	Title	Credits
Choose 1 of the following (total 3 credits):		
MUS 660	Music in the Middle Ages	3
MUS 661	Music in the Renaissance	3
MUS 662	Music in the Baroque Era	3
MUS 663	Music in the Classical Period	3
Choose 2 of the following (total 6 credits):		
MUS 680–682	Historical Performance Practices I-III	6
The following required courses:		

MUS 683: Rhetoric & Music (currently a MUS607 recurring seminar; course change has been submitted to UOCC for approval)	4
MUS 684: Musical Iconography (currently a MUS607 recurring seminar; course change has been submitted to UOCC for approval)	4
MUS 691 Collegium Musicum	1
Total Credits	18

Graduate Specialization in Jazz Pedagogy

Code	Title	Credits
MUJ 540	Jazz Pedagogy Practicum	3
MUJ 661	Jazz Program Planning and Development	3
MUP 635	Music Performance Studies: [Topic] (Three terms required/2 credits each term)	2
MUP 635	Music Performance Studies: [Topic]	2
MUP 635	Music Performance Studies: [Topic]	2
MUE 615	Jazz Practicum (3 terms, 1 credit per term)	3
Ensemble Requirements, to be chosen from list		3
MUJ 690	Jazz Laboratory Band III	
MUJ 691	Jazz Laboratory Band II	
MUJ 692	Oregon Jazz Ensemble	
MUJ 695	Small Jazz Ensemble: [Topic]	
MUS 694	Chamber Ensemble: [Topic] (Jazz Guitar)	
MUS 694	Chamber Ensemble: [Topic] (Latin Jazz)	
Total Credits		18

In addition, students must pass a skills exam testing jazz/commercial music theory and keyboard skills.

Graduate Specialization in Music Theory Pedagogy

Code	Title	Credits
Choose one of the following:		3
MUS 530	Tonal Analysis: Linear Prolongational Analysis	
MUS 531	Tonal Analysis: Form in Tonal Music	
MUS 532	Tonal Analysis: Analysis of Popular Music	
MUE 639	Pedagogy and Practicum: [Topic] (Music Theory Pedagogy)	3
MUS 516	Post-Tonal Theory I	3
MUS 615	Current Trends in Music Theory	3
MUS 672	Seminar: Music Theory: [Topic] (Graduate Seminar in Music Theory)	4

Students must also pass a skills exam testing aural musicianship and keyboard skills

Total Credits		16

Graduate Specialization in Piano Pedagogy

Code	Title	Credits
MUE 571	Piano Pedagogy I: Teaching Beginners	3
MUE 572	Piano Pedagogy II Teaching Groups	3
MUE 573	Piano Pedagogy III Teaching Intermediate Levels	3

MUE 639	Pedagogy and Practicum: [Topic]	3
MUP 650	Music Performance Studies	2
MUP 650	Music Performance Studies	2
MUP 650	Music Performance Studies	2
Total Credits		18

Students who have been admitted into the M.M. Piano Performance, M.M. Collaborative Piano, D.M.A. Piano Performance, and D.M.A. Collaborative Piano degree programs may declare the Graduate Specialization in Piano Pedagogy without any additional audition or admissions procedures.

Students in other music graduate degree programs (that are not piano) will need to audition and demonstrate piano ability at the advanced level.

Graduate Specialization in Violin/Viola Pedagogy

Code	Title	Credits
MUE 559	Fundamentals of Violin and Viola Teaching	2
MUE 564	Advanced Violin/Viola Pedagogy	2
MUE 565	Somatics for String Players	1
MUE 560	Early-Intermediate Violin Repertoire and Technique	2
MUE 566	Community Music Institute Practicum (4 terms required)	4
MUE 563	Pedagogy Methods: Violin and Viola	2
MUE 639	Pedagogy and Practicum: [Topic]	3
Minimum Required Credits:		16

Ballmer Institute for Children's Behavioral Health

<http://childrensbehavioralhealth.uoregon.edu>

Katie McLaughlin, Executive Director

2800 NE Liberty Street
Portland, OR 97211
541-346-2500
ballmerinstitute@uoregon.edu

The Ballmer Institute for Children's Behavioral Health at the University of Oregon Portland establishes a new national model for behavioral healthcare for children and families by creating the nation's first undergraduate program in child behavioral health. The institute prioritizes the needs of youth who have been historically or persistently underserved and seeks to make real system change by:

- Creating a new mental health profession;
- Delivering supports in schools and the community;
- Training existing youth-serving professionals;
- Developing new approaches to support child behavioral health; and
- Transforming the Pacific Northwest into a national model of thought and action.

This groundbreaking institute was made possible by an extraordinary gift from Connie and Steve Ballmer, co-founders of Ballmer Group Philanthropy.

Child Behavioral Health (BA/BS)

The child behavioral health major provides students with knowledge and skills to improve the behavioral health and wellness of youth. Students will learn how to equitably deliver evidence-based interventions to

promote wellness and prevent mental health problems from developing or worsening in children and adolescents. Training elements typically present in graduate degree programs have been brought into this innovative undergraduate major. Students will receive training in applied skills such as relaxation, problem-solving, and flexible thinking; gain 700 hours of applied practice in community settings supervised by clinical faculty; and learn how to effectively work as part of a behavioral health team.

The major is designed as a 2 + 2 program with the first two years focused on the completion of UO's bachelor degree requirements which includes core education courses. The latter two years involve specialized coursework and applied practical experiences completed at the Ballmer Institute at the University of Oregon Portland.

Students interested in the Child Behavioral Health major should declare the pre-major in Child Behavioral Health.

To progress to the Child Behavioral Health major offered at UO Portland, students must apply. Each November, the admission application opens for the next cohort. Students who meet the priority deadline receive full consideration. Applications received after the priority deadline are accepted based on program capacity. More information about the admission process can be found here: <https://childrensbehavioralhealth.uoregon.edu/undergraduate-admissions> (<https://childrensbehavioralhealth.uoregon.edu/undergraduate-admissions/>).

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Demonstrate knowledge of evidence-based approaches to early identification of behavioral health concerns and exhibit competence in administration, scoring, and interpretation of behavioral health screening tools.
- Demonstrate knowledge of evidence based behavioral health promotion supports and exhibit competence in delivering these supports to youth and families#.
- Demonstrate knowledge of evidence-based behavioral health prevention strategies and interventions and exhibit competence in delivering these interventions to youth and families.
- Demonstrate ability to evaluate behavioral health risk, identify youth and families who require referral, and engage in appropriate referral practices#.
- Demonstrate knowledge of behavioral health disparities and exhibit cultural responsiveness and inclusive practices in delivering early identification, promotion, prevention, and intervention practices to youth and families from diverse backgrounds, particularly those from historically underserved communities.
- Demonstrate professionalism across service settings, including understanding of professional ethics and ability to appropriately consult with other professionals.

Child Behavioral Health Major Requirements

Courses used to fulfill the pre-major requirements must be taken for a letter grade and passed with a grade of C- or better. Coursework transferred in from Advanced Placement or International Baccalaureate exams are acceptable with a mark of P*.

Courses used to fulfill the major requirements must be passed with a letter grade of mid-C or a P* where pass/no pass is the only grading option for the course.

Child Behavioral Health Microcredential

Overview

The Graduate Microcredential in Child Behavioral Health is a fully online, 12-credit program designed for educators and other youth-serving professionals seeking foundational knowledge in child behavioral health. Across three courses, students gain practical, evidence-based skills to support the mental and emotional well-being of children and teens.

Designed with working professionals in mind, the program offers flexible evening classes delivered remotely. No prior experience in behavioral health is required, making it an accessible entry point into the field.

Admission

Students who hold a bachelor's degree from an accredited university may apply to complete the graduate microcredential as a standalone program. Applications are reviewed for admission once per year. Complete information about admission to the program is available on the institute's website.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Understand individual and contextual influences in common behavioral health concerns for children and adolescents.

Knight Campus

<https://accelerate.uoregon.edu/>

Robert Guldberg, Vice President; Leona DeArmond, Executive Director

1505 Franklin Blvd
Eugene, OR 97403-6231
541-346-2120
accelerate@uoregon.edu

The Phil and Penny Knight Campus for Accelerating Scientific Impact is a campus designed to accelerate the cycle of moving discoveries to impacts for the greater good. Rooted in the University of Oregon's 60-year history of interdisciplinary collaboration, it is training new generations of scientists, forging tighter ties with industry and entrepreneurs, and creating new opportunities for graduate and undergraduate students.

Mission: Science advancing society

Vision: Dramatically shorten the timeline between discovery and societal impact through world-class research, training and entrepreneurship in a nimble scientific enterprise.

Goals:

- Redefine the modern research university by fostering world-changing research unfettered by traditional academic boundaries
- Serve as the educational engine driving the new economy of Oregon
- Transform student education through discovery-driven learning
- Engage the public in the excitement and creativity of scientific research
- Foster diverse perspectives and participation in scientific research
- Improve the health and wellbeing of the citizens of Oregon, the nation, and the world

Programs:

Bioengineering PhD Program:

We Focus on Your Success. The PhD program is designed to jump start and accelerate your success. Earn a dual-shield degree from the University of Oregon (UO) and Oregon State University (OSU) with full access to the world-class facilities and resources at both universities. Make impactful and innovative discoveries at the forefront of bioengineering research in areas like regenerative medicine, synthetic biology, biosensors and devices. Engage in an immersive curriculum, high impact research opportunities, and targeted research and career training programs that will take your science, and your career, to the next level.

The design of our curriculum helps students create an academic plan that drives their research and career success. This starts with minimizing core requirements to four courses that prepare students to apply bioengineering fundamentals toward innovations that advance human health. Students then tailor their individual experience through an unrivaled set of elective options. Joint program students can choose

any graduate-level course at UO or OSU that aligns with their research or career goals. Students take exactly what they need to advance their science.

Knight Campus graduate students complement their academic coursework through a career acceleration program: a suite of advanced trainings in ethics, science communication, innovation and entrepreneurship, grant writing, design thinking, and career planning that accelerates their academic and professional success.

Knight Campus Graduate Internship Program (KCGIP):

KCGIP is an accelerated master's program with five focus areas that combines lab and lecture content with a paid internship. We train students to be successful in the fast-paced, collaborative environment typical of the industrial or government lab setting. We believe graduate education should equip you with the skills that allow you to excel in your career: technical expertise, hands-on experience and professional skills (including communication, leadership, and teamwork).

Students gain these skills first, through our focused coursework and hands on training in our academic labs, professional development training, and a 9-month paid internship. Program tracks span the fields of engineering, physics, chemistry and biology and include:

- Bioinformatics and Genomics
- Molecular Sensors and Biotechnology
- Polymer Science
- Semiconductor and Photovoltaic Device Processing
- Optical Materials and Devices

Bioengineering Minor Program:

Students in the minor apply their natural sciences background towards bioengineering problems, research, and innovations. You will learn through a combination of experiential approaches including hands-on work in our bioengineering teaching labs. Students in the minor also have access to elective courses in innovative technologies like 3D printing, protein engineering, and biomaterials. Completing the minor is a great way to prepare for a career in the biotech industry or to pursue graduate training in bioengineering, medicine, or law.

The minor is also a great way to meet and network with Knight Campus faculty and students and launch conversations about undergraduate research in Knight Campus research groups.

Brewing Innovation Minor Program:

The Brewing Innovation minor uses brewing as backdrop for experiential learning within the innovation process. The design of the minor complement's disciplinary majors in the sciences, humanities, communications, design and innovation. The minor uses design thinking as an approach to innovation that involves understanding and defining customer needs and the innovation challenge, generating many ideas

for addressing that challenge, prototyping ideas, and evaluating possible solutions. The design thinking process is iterative with the results of each step feeding back to inform and improve ideas in the next iteration.

More information about content of these courses can be found on the program website (<https://knightcampus.uoregon.edu/brewinginnovation/>).

Jenni Van Wyk, Student Recruiter & Advisor

Knight Campus, Rm 261
541-346-2120
bioengineering@uoregon.edu

To complete the bioengineering minor, you must complete 12 required credits and 12 elective credits. At least 4 elective credits must be from the BIOE subject-code and up to 8 credits from the requirements tab may be applied towards the upper-division bioengineering minor requirement. Courses used to complete a student's major core requirements may not be applied towards the bioengineering minor elective requirement.

Bioengineering resides at the interface of engineering and the natural sciences, and a thorough knowledge of both is essential for innovation and problem solving in the discipline. The courses below provide an opportunity for students to strengthen their knowledge within their primary discipline in several areas particularly relevant to bioengineering, including: genetics, microbiology, physiology, chemistry, neuroscience, physics and electronics.

Admissions Process:

Contact the Bioengineering Recruiter and Advisor at bioengineering@uoregon.edu.

Minor in Bioengineering

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

At least 12 upper-division credits must be completed in residence.

Brewing Innovation Minor

The Brewing Innovation minor uses brewing as backdrop for experiential learning within the innovation process. The design of the minor complement's disciplinary majors in the sciences, humanities, communications, design and innovation. Required courses in the minor will help you develop skills and offer an immersive experience to build your innovation skills in a rich, interdisciplinary setting that leverages science and engineering, history, innovation, and storytelling. You will tap the historical context of innovation, learn practical brewing skills needed to prototype ideas, immerse in the innovation process, and gain experience communicating your ideas and innovations to broad audiences. With this foundation, along with the disciplinary expertise you develop in your major field of study, you will immerse in a capstone experience that provides them an immersive innovation experience.

Admission Procedures:

Program Admissions Procedure

Due to limited laboratory capacity, there is an application process to enter the minor. The selection of students into the minor will be based upon multiple factors: a student's ability to complete the minor requirements before they graduate, their potential for diversifying and contributing to the interdisciplinary nature of the minor's upper-division courses, a student's transcripts, and a 300-word statement of interest. The program will accept applications for the minor annually (please see the program website for deadlines (<https://knightcampus.uoregon.edu/brewinginnovation/>)).

Enrollment management into the BRIN minor introductory course and acceptance into the minor will be supported by the Program Recruiter and Advisor. Students can contact them at BrewingInnovation@uoregon.edu.

Brewing Innovation Minor Requirements

Courses used to fulfill the minor requirements must be taken for a letter grade and passed with a grade of C- or better.

Code	Title	Credits

Applied Physics (MS)

<https://internship.uoregon.edu/tracks> (<https://internship.uoregon.edu/tracks/>) 541-346-2120

The Knight Campus Graduate Internship Program (KCGIP (<https://internship.uoregon.edu/>)) is an accelerated master's program with five focus areas that combines lab and lecture content with a 9-month paid internship. We train students to be successful in the fast-paced, team-driven environment typical of the industrial or government lab setting.

The applied physics master of science (MS) degree requires the completion of 54 total credits—24 graded credits at the 500 level or higher and 30 internship research credits. The internship requirement must be fulfilled through the industrial internship program. Internship credits are taken pass/no pass. A student who is working full-time as an intern typically earns 10 credits each term. Graded credits must be selected from an approved departmental list. The table below highlights courses commonly taken by students in the program. Other 600-level physics courses qualify, but may require additional prerequisites. Some graduate-level courses in chemistry may qualify. Other courses may be

added or substituted with the approval of the applied physics program advisor.

Photovoltaic & Semiconductor Device Processing

Situated at the intersection of chemistry, physics and chemical engineering, the semiconductor (microelectronics) industry enables greener, smarter, and more connected economy. The field has significant implications in society's ability to support technology innovation and address the global energy crisis through applications in microprocessors, photovoltaics, LEDs and power transistors. For students who love to stay connected, semiconductor technology has driven advancements in the internet, 5G and IoT. And for anyone who loves smart technology – iPhone, Fitbit, self-driving cars- this field is ripe with opportunities. The continued success of this vast, interdisciplinary, and sophisticated yet innovative industry is deemed critical to long-term U.S. national competitiveness, which translates into impactful and well-paid job opportunities for those who choose to join this sector. Alumni from this track work in a wide variety of engineering and management roles in manufacturing, hardware development, materials research, battery development, supply chain, research & development, and analytics. Skills developed in this track transfer to a myriad of roles peripheral to these roles, including systems engineering, software engineering, applications engineering and others.

Optical Materials & Devices

Optics is the branch of physics that utilizes both simple and sophisticated instruments to study, measure and influence how photons propagate through and interact with matter. The field of optics is critical to the technology found in our modern lives - computers, smartphones, medical equipment and many other 21st century amenities we take for granted. Optical engineers and scientists use their technical knowledge to develop and operate metrology tools (instruments designed to take high-precision, non contact measurements). These tools are used in applications ranging from the life sciences to the semiconductor industry; to build laser writing and cutting tools that revolutionize our ability to mass manufacture advanced technology; and contribute to cutting edge research and development activities impacting the fields of medicine, defense, microelectronics, and astronomical observation. Alumni from this track work in a wide variety of engineering roles within the life sciences, semiconductor, and defense sectors, as well as peripheral sectors such as next-gen computing and autonomous vehicles. Skills developed in this track have been successfully transferred to a wide variety of engineering and management roles in manufacturing, hardware development, materials research, analytics, software development and research and development.

Master of Science: Applied Physics

Bioengineering (PhD)

https://bioengineering.uoregon.edu/phd_program (https://bioengineering.uoregon.edu/phd_program/)

Jenni Van Wyk, Student Recruiter & Advisor

Knight Campus, Rm 261
541-346-2120

Earn a dual-shield degree from the University of Oregon (UO) and Oregon State University (OSU) with full access to the world-class facilities and resources at both universities. Make impactful and innovative discoveries at the forefront of bioengineering research in areas like regenerative medicine, synthetic biology, biosensors, and devices. Engage in an immersive curriculum, high impact research opportunities, and targeted research and career training programs that will take your science, and your career, to the next level.

A master of science degree is only attainable as part of the doctoral program, not as a standalone master's degree.

Program's Admission Requirements

Please visit the program's website (<https://advanced.oregonstate.edu/portal/BioE/>). Note, the program also adheres to the UO and OSU Graduate School admissions requirements.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Scholarship:** The student will be able to identify and conduct original research resulting in a significant contribution to knowledge in the fields spanned by Bioengineering and to effectively communicate this work to a technically literate audience.
- **Mastery of Subject Material:** The student will be able to think critically, creatively and to address technical problems in the fields spanned by Bioengineering. The student will be able to plan and conduct research and entrepreneurial activities that leads to translation of research discoveries to solutions that meet societal needs.
- **Ethical Conduct:** Students will be educated in ethical and responsible conduct in research and professional activities.

Total Credits		108-109

Biology (MS)

<https://internship.uoregon.edu/> 541-346-2120

The Knight Campus Graduate Internship Program (KCGIP (<https://internship.uoregon.edu/>)) is an accelerated master's program with five focus areas that combines lab and lecture content with a 9-month paid internship. We train students to be successful in the fast-paced, team-driven environment typical of the industrial or government lab setting.

Bioinformatics and Genomics

Our accelerated bioinformatics master's program brings together learners from diverse scientific backgrounds into a cohort-based learning model that will fast track you from classroom to career. Learn how to apply algorithmic logic, statistical methods, and biological concepts within a team, while honing your professional skills during your first 9 months in our fast-paced, immersive training program. Next, apply your skills in the real-world during your paid, 9-month internship. By graduation, you will have relevant work experience, a foot in the door, and a professional network of alumni and program staff to support you.

Chemistry (MS)

<https://internship.uoregon.edu/>

The Knight Campus Graduate Internship Program (KCGIP (<https://internship.uoregon.edu/>)) is an accelerated master's program with five focus areas that combines lab and lecture content with a 9-month paid internship. We train students to be successful in the fast-paced, team-driven environment typical of the industrial or government lab setting.

Polymer Science

Polymers are an unusual class of materials because they simultaneously exhibit both fluid and solid like behavior. Polymers play a critical part in the fields of optics, semiconductors and molecular sensors. Within the field of optics, OLED and LCD displays rely heavily on polymers as both part of the assembly and in the case of OLEDs, the functional light emitting material. Every integrated circuit (semiconductor) relies on polymers for the lithography and etching steps needed to create the patterning of the microchip. The molecular sensor used to detect traces of TNT is in fact a polymer. Students in the polymer track typically have a bachelor's degree in Chemistry, Chemical Engineering, Polymer Science, Materials Science, Biochemistry and related disciplines. Students will earn a Master of Science in Chemistry with Emphasis in Polymer Science.

Photovoltaics and Semiconductors

Situated at the intersection of chemistry, physics and chemical engineering, the semiconductor (microelectronics) industry enables greener, smarter, and more connected economy. The field has significant implications in society's ability to support technology innovations and address the global energy crisis through applications in microprocessors, photovoltaics, LEDs and power transistors. For students who love to stay connected, semiconductor technology has driven advancements in the internet, 5G and IoT. And for the tech geeks who love smart technology – iPhone, Fitbit, self-driving cars- this field is ripe with opportunities. The continued success of this vast, interdisciplinary, and

sophisticated yet innovative industry is deemed critical to long term US national competitiveness, which translates into impactful and well-paid job opportunities for those who choose to join this sector. Given the highly interdisciplinary nature of this track, students are recruited from multiple backgrounds including physics, chemistry, chemical engineering, materials science and electrical engineering.

Molecular Sensors and Biotechnology

This is a specialized field of chemistry, has wide spanning applications in the areas of health diagnostics, environmental monitoring, and national security. Like designing a lock for a key, each molecular sensor is designed to interact, detect and produce a measurable signal in the presence of a specific analyte. Inexpensive, user-friendly, and mass producible devices employing molecular sensors include CO detectors, glucose monitors and pregnancy tests. Advanced applications also exist for the diagnosis of COVID-19, detection of explosives and identification of air and water contaminants. Students interested in the biomedical field can apply their knowledge in the development of sensors for fluorescent imaging, drug development, pathogen detection and early detection of diseases. Students in this focal area typically have a bachelor's degree in Chemistry, Biochemistry, Chemical Biology, Chemical Engineering and related disciplines. Students will earn a Master of Science in Chemistry with Emphasis in Molecular Sensors & Probes. Common industrial and national lab job titles and general descriptions of roles that span the consumer products, pharmaceutical, medical, life science, agricultural and defense industries are provided below.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- Have in-depth knowledge in a main subfield of chemistry. Students will acquire this knowledge by doing advanced course work in the field, reading scientific papers, and optionally performing original research in the lab.
- Students pursuing a research master's degree will learn how to carry out independent chemistry research. Students will learn literature comprehension skills, will properly cite and reference techniques and methods, will be able to place one's research in context of the field, and will be able to communicate research results through scientific publications and presentations. Students will be able to formulate scientific hypotheses, understand the scientific method and apply it to research design, will become proficient at data gathering and interpretation, and will be able to write a research proposal. Students will pursue a research problem culminating in a written thesis that makes a significant and original contribution to the understanding of chemistry.
- Have professional development skills and knowledge. Students will attend professional meetings and make oral or poster presentations. Students will learn how to get internships in governmental labs, in industry, or in teaching. Students will learn soft skills, such as leadership, problem-solving, teamwork, communication.
- Understand and have awareness of professional, ethical and safety applications of their knowledge. Students will develop and understand the ethical and social dimension of science and the role and responsibility of chemistry for the advancement of the society. Students will learn and put into practice the expectations of responsible conduct in the professional field. Students will learn about laboratory safety and best safety practices.

Division of Graduate Studies

<https://graduatestudies.uoregon.edu/>

Krista Chronister, Vice Provost for Graduate Studies

Susan Campbell Hall, first floor
1219 University of Oregon
Eugene, OR 97403-1219
541-346-5129

Graduate Council

The Graduate Council advises and makes recommendations to the vice provost for graduate studies on matters pertaining to graduate study at the University of Oregon, including changes or additions to policies and regulations governing graduate study. The council consists of a representative elected committee of 12 faculty members, two students, and the vice provost for graduate studies. The current Graduate Council membership is listed on the Division of Graduate Studies website.

General Information

The University of Oregon offers graduate level study in a wide range of subjects. Program offerings are listed in the **Graduate Majors and Specializations (p. 43)** section of this catalog. For information about law degrees, see the **School of Law** section of this catalog.

Specific program requirements for most of these degrees appear in the departmental sections of this catalog; general requirements of the Division of Graduate Studies are stated in this section.

Graduate Student Types

- Admitted Graduate Non-Degree
- Doctoral
- Exchange
- Graduate Certificate
- Graduate Microcredential
- Master's

The following student types are sunseting and no new students will be admitted to these types:

- Conditional Master's
- Conditional Doctoral
- Post-Master's
- Pre-Master's

Graduate Admission

Eligibility

To be admitted to the University of Oregon for the purpose of seeking a graduate degree or graduate certificate or for enrolling in a formal non-degree graduate program, students must hold a bachelor's degree from a regionally accredited four-year college or university in the United States or its equivalent from a foreign country and must be accepted by the major department in which they propose to study. All applicants for whom English is not a native/primary language must show proof of language

proficiency. Information about requirements may be found online (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/>).

Students who want to earn a second bachelor's degree should not apply to the Division of Graduate Studies. They should submit an application for postbaccalaureate undergraduate student status to the Office of Admissions as described on their website (<https://admissions.uoregon.edu/other-applicants/postbaccalaureate/>).

The university's schools and departments determine their own requirements for graduate admission beyond the university's minimums.

Application Fee

The Graduate Microcredential application fee is \$35. The application fee for all other applicants is \$70 (domestic applicants) or \$90 (international applicants). The Division of Graduate Studies offers fee waivers and discounts for applicants who meet specific criteria. More information is available here (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/application-fee-waivers/>).

Application Procedure & Requirements

Students seeking graduate admission must submit an online application. Links can be found on each program's website, or by contacting the program directly. At the time of application, applicants must submit unofficial transcripts from all colleges or universities previously attended, including the University of Oregon. Applicants who accept their offer of admission and matriculate must submit official transcripts from all colleges or universities from which they received a bachelor's degree or higher. More information is available here (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/transcripts/>).

The applicant may also be asked to submit materials such as transcripts of test scores (e.g., Graduate Record Examinations, Miller Analogies Test) and letters of reference. The applicant should ascertain from the program what additional materials, if any, are expected and submit them in the manner described by the program. In some cases, these materials will be collected electronically as part of the online application.

Students should become familiar with these requirements before applying and address inquiries about graduate admission to the department or school in which they plan to study, not to the Division of Graduate Studies or to the Office of Admissions.

A student who has been admitted to a graduate program and wants to enter a different graduate program must apply for admission to the new program.

Admitted Graduate Non-Degree Status Application

Applicants who wish to take graduate coursework but do not intend to pursue a specific graduate degree must apply online. Instructions are available here (<https://graduatestudies.uoregon.edu/postbaccalaureate-graduate-status-non-degree-seeking/>).

Language Requirement for International Graduate Employees

Students whose native/primary language is not English who accept teaching-related Graduate Employee (GE) positions must submit a test score demonstrating their proficiency in speaking English.

Native/primary language is defined as: A language you used as a primary language in your childhood, rather than learning it as a foreign language.

This policy is independent from the English Language Proficiency (ELP) requirement for admission; non-native English speakers who receive an ELP exception as part of their admission are still subject to the GE language proficiency requirement if they are placed in teaching-related GE assignments.

The following tests are accepted to fulfill this requirement:

- Internet-based (iBT) TOEFL Speaking: Minimum score: 26
- International English Language Testing System (IELTS) Academic Module Speaking Band: Minimum Score: 7
- Speaking Proficiency English Assessment Kit (SPEAK): Minimum score: 50

Individuals who score below the minimum scores will be required to attend one or more language support classes and may be subject to limitations on the kinds of activities they may carry out as GEs (see guidelines on the Division of Graduate Studies website).

Course Numbering System

500–599

Courses that offer graduate-level work in classes that may also include undergraduate students.

600–699

Graduate courses for graduate students only.

700–799

Except in the School of Music and Dance, courses of a highly technical nature that count toward a professional degree only, not toward advanced academic degrees such as an MA, MS, or PhD. Both 600- and 700-level courses with the MUP subject code denote graduate courses that apply toward advanced academic degrees in the School of Music and Dance.

503, 507, 508, 510, 601–610, 704–710

Graduate and professional courses that may be repeated for credit under the same number.

General Requirements and Policies

Students are responsible for staying informed about, and complying with, departmental regulations as well as Division of Graduate Studies regulations.

Course Registration Requirements and Limits

Graduate students may enroll for up to 16 credits during the initial registration period. Just before the beginning of each term (see Office of the Registrar website for exact dates), graduate students may increase their enrollment to a maximum of 18 credits.

Students who enroll for more than 16 credits will be billed additional tuition.

In summer term, graduate students are limited to 16 hours.

Students who wish to enroll for more than 18 credits (or 16 credits in summer) are required to submit a general petition form to the Division of Graduate Studies.

For the term in which a degree is granted (except for Summer term), graduate students must register for at least three graduate credits. If submitting a master's degree thesis in this final term, registration must include at least one of the three credits as Thesis (503)—see master's policies.

If a doctoral dissertation is being completed, registration must include no fewer than three credits of Dissertation (603) in the term of graduation (except Summer)—see Doctoral policies.

Exceptions may be made depending on the timing of the submission of the thesis or dissertation; see Division of Graduate Studies website for details.

Doctoral students who have advanced to candidacy are considered to be full-time enrolled when registered in a minimum of three credits of Dissertation (603). However, various on-and off-campus agencies and offices have their own course-load requirements.

For example, GEs must register for and satisfactorily complete at least nine graduate credits each term. Some agencies offering student loans also set registration requirements.

Because the minimum registration requirements for the Division of Graduate Studies may not satisfy some agency requirements, it is the student's responsibility to register for the required number of credits based on their individual situation. The Office of the Registrar can certify a student's registration.

Doctoral students that have not advanced to candidacy and master's students are considered to be full-time enrolled when registered in a minimum of nine graduate credits.

Examples of minimum enrollment requirements:

Graduate Employees

- Nine graduate credits toward the degree

International Student Visa Holders

- Nine credits[#] for master's students and doctoral students not yet advanced to candidacy
- Three credits of 603 Dissertation for advanced doctoral students.
- International students should request information from International Student and Scholar Services about immigration and naturalization regulations and minimum credit requirements.

Federal Financial Aid and Federal Loan Deferment

- Five credits for master's students and doctoral students not yet advanced to candidacy
- Three credits of 603 Dissertation for advanced doctoral students.

As previously noted, these guidelines are examples. Please contact the Office of Financial Aid and Scholarships for accurate confirmations of eligibility.

Advancement and Financial Aid

Once formally advanced to candidacy, doctoral students receive email confirmation of their advancement from the Division of Graduate Studies. Students are not considered advanced to candidacy prior to receiving this email.

While the advancement is tied to an academic term and not a specific date, the financial aid office adheres to date-based timelines for disbursement of loans.

Students should be advanced prior to the disbursement date in order to be full-time eligible for aid while registered for three credits of 603 Dissertation.

Contact the Office of Financial Aid and Scholarships for more information. # International student visa holders should confirm their eligibility by contacting both the Division of Graduate Studies and the Division of Global Engagement.

Reservation of Graduate Credit: Permission to Register for Graduate Credit

An undergraduate student must request permission to register for a graduate-level course. The student must file a Reservation of Graduate Credit form with the Division of Graduate Studies by Wednesday of week 1 of the term in which they want to enroll in the graduate course. The form is available on the Division of Graduate Studies website. Two options are available for disposition of course credits.

Note: These options do not apply to students participating in an Accelerated Master's Program (AMP). AMP students should refer to Accelerated Master's Program policies for information about taking graduate classes while classified as an undergraduate.

Option 1

Include the graduate-level course in requirements for the bachelor's degree. To be eligible, the student must be admitted as an undergraduate and have earned a minimum GPA of 3.00 in each of the three terms prior to enrolling in the graduate course. Non-admitted non-degree seeking students are ineligible for this status. Undergraduates receiving less than a grade of B in a graduate-level course will be ineligible for further enrollment in graduate-level course work.

Option 2

Reserve the graduate-level course for consideration by a department after admission as a graduate student. This option is available to seniors only and is limited to a maximum of three graduate courses not exceeding a total of 12 credits. To be eligible, the student must have earned a minimum GPA of 3.00 in each of the three terms prior to enrolling in the graduate course. Non-admitted non-degree seeking students are ineligible for this status. Undergraduates receiving less than a grade of B in a graduate-level course will not be allowed to use the course toward a master's degree, and will be ineligible for further reservations of graduate credit.

Undergraduates do not qualify to receive credits for the following graduate classes: Research (601), Internship (604), Reading and Conference or Special Problems (605), Field Studies or Practicum (606), Workshop or Laboratory Projects (508 or 608), and Terminal Project or Capstone (609).

Course Enrollment for Faculty and Staff Members

Faculty and staff members who want to take graduate courses should refer to the Human Resources office for information about regulations and fees.

Faculty members (including officers of administration) may not pursue an advanced degree in the department in which they hold an appointment. To pursue a degree in another department, they must submit a petition to the vice provost for graduate studies for approval. More information about the petition process is available on the Division of Graduate Studies website.

Joint-Campus Program

The Joint-Campus program allows UO graduate students to enroll in courses at Portland State University and Oregon State University. The most current information about this program is available on the Division of Graduate Studies website.

WICHE Regional Graduate Programs

The Western Interstate Commission for Higher Education (WICHE) coordinates a graduate exchange program, the Western Regional Graduate Program (WRGP), to enable students from Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming to apply for admission to selected professional programs and, if admitted, to be treated as resident students for tuition purposes.

The University of Oregon currently has a WRGP program in historic preservation. For information, visit the website (<https://archenvironment.uoregon.edu/hp/>).

WGRP certification must be renewed each academic year.

Grade Requirements

Graduate students must maintain at least a 3.00 grade point average (GPA) in graduate courses taken in the degree program. Grades of D+ or less for graduate courses are not accepted for graduate credit but are computed in the GPA. Similarly, the grade of N (no pass) is not accepted for graduate credit. A grade of pass (P) must represent work equal to or better than a B–.

A GPA below 3.00 at any time during a graduate student's studies or the accumulation of more than 5 credits of N or F grades—regardless of the GPA—is considered unsatisfactory. Accumulation of more than 7 credits of Incomplete is also considered unsatisfactory. Students found to be not making satisfactory progress may be placed on academic probation, and may be dismissed from the program if improvement is not made. Additional satisfactory progress requirements and procedures may be found on the Division of Graduate Studies website.

Incompletes

There are two sets of policies regarding incompletes in graduate courses: (1) Department/Program policies as outlined in the program's graduate student handbook; and (2) University policies as outlined below. Graduate students should become familiar with both.

University Policy for Incompletes Assigned Fall 2022 or Later

Effective Fall 2022, students and faculty members must file an Incomplete Request Form to request a grade of Incomplete. Policy and

procedure details, including the link to the request form, are available on this page (<https://registrar.uoregon.edu/current-students/incomplete-policy/>).

University Policy for Incompletes Assigned Prior to Fall 2022

For Incompletes assigned in graduate courses prior to Fall 2022, Division of Graduate Studies policy requires that graduate students must convert a graduate course grade of Incomplete ("I") into a passing grade within one calendar year of the term the course was taken.

After one year, the student must petition the Division of Graduate Studies for the removal of an incomplete.

A petition to remove an incomplete (<https://graduatestudies.uoregon.edu/sites/default/files/forms1/remove-incomplete.pdf>) must meet all the following criteria to be eligible for Division of Graduate Studies approval:

1. The incomplete must be no more than seven years old.
2. The student must have the approval of the instructor to complete the outstanding course requirements.
3. The student must not have completed a terminal graduate degree since the term of enrollment in the course.

Incompletes that remain on the academic record after a degree has been awarded may not be removed.

All coursework documented on the transcript at the time of the awarding of a degree stands as a permanent record and it is not permissible to revise the record.

An incomplete, "I", assigned to Research (601) or Terminal Project (609, AAAP 611, ARCH 619, BA 740, CRES 611, IARC 611, LA 699, LT 611) does not require a petition.

Thesis (503) and Dissertation (603) credits should be assigned a grade of "P" for students making satisfactory progress. An "I" grade should only be assigned for students who did work of acceptable quality during the term, but some component of the work was not completed within the timeframe expected.

Research and Terminal Project credits are converted after the instructor submits a Supplementary Grade Report to the Office of the Registrar.

Continuous Enrollment

Unless academic leave has been approved, a student in an graduate degree or certificate program must remain in continuous enrollment at the university, taking at least 3 graduate credits each term, until all the program's requirements have been completed. Registration for summer term is not required unless a) it is the student's first term in the program, or b) the student's program requires it. For students who do register for summer, the minimum enrollment requirement is one graduate credit.

Failure to maintain continuous enrollment effectively withdraws the student from graduate status. See Reinstatement (p. 681).

Academic Leave

A graduate student interrupting a study program for one or more terms, excluding summer session, must apply for academic leave to ensure a place upon return.

The Division of Graduate Studies must receive the application by the last day of finals week of the term the leave begins. Academic leave is granted for a specified period excluding summer session. Students with approved academic leave should not use university facilities or faculty

or staff services during the academic leave and therefore need not pay tuition or fees.

Academic leave does not extend the seven-year deadline.

Master's Students

Master's students, except summer-only students, may apply for a maximum of three academic terms of academic leave during the course of study for the degree. A master's student in a program that is structured as a summer-only program must obtain academic leave for each ensuing school year. These summer-only students also must complete all degree requirements within the seven-year time limit.

Doctoral Students

Doctoral students may apply for a maximum of six academic terms of academic leave during the course of study for the degree. See Continuous Enrollment (p. 687) under Doctoral Degrees.

Additional details about academic leave and how to apply are available on the Division of Graduate Studies website.

Reinstatement

A graduate student who fails to maintain continuous enrollment or file for academic leave is required to file a Petition for Reinstatement form, available on the Division of Graduate Studies website. The petition is reviewed by the student's academic program and the Division of Graduate Studies. The student may, at the discretion of the department, be required to meet departmental admission policies and degree completion requirements that are in effect on the date of reenrollment. Doctoral students may, at the discretion of the department, be required to complete the doctoral residency requirement again. They may also be required to retake the comprehensive examinations if completed prior to stopping out, if the department feels that this is necessary in order to demonstrate currency of knowledge.

Review of the Petition for Reinstatement may result in a change of residency status from resident to nonresident for purposes of tuition assessment if the student has not maintained residency in Oregon. More information is available from the residency officer in the Office of Admissions.

Graduate Residency

Each graduate degree at the University of Oregon has a residency requirement that dictates how much of the work required for that degree must be completed at the University of Oregon. Please refer to the **Master's Degrees** and **Doctoral Degrees** sections below for details about residency requirements for each type of degree.

Waiver of Regulations

Graduate students may file a petition requesting exemption from any academic requirement. The petition must first be submitted to the student's home academic program for review and supporting statement. The Division of Graduate Studies then reviews the educational purpose the regulation in question was designed to serve. Petitions are seldom granted if the only reason given is to save the student from inconvenience or expense.

Division of Graduate Studies petition forms are available on the Division of Graduate Studies website.

Research Compliance

University policy requires that students who intend to engage in research involving human or animal subjects have their research procedures approved before they begin to collect data. Researchers who want to use human subjects may obtain protocol forms and procedures from the Research Compliance Services website (<https://research.uoregon.edu/about/administrative-units/research-compliance-services/>). Researchers who want to use vertebrate animals may obtain protocol forms and procedures from the Animal Welfare Services website (<https://aws.uoregon.edu/>).

Graduate Tuition, Fees, and Financial Aid

Tuition and Fees

Graduate tuition varies by program. Please refer to the tuition website (<https://tuition.uoregon.edu/>) for the current tuition and fees schedule.

Fellowships and Financial Aid

Financial aid is available through graduate employee (GE) opportunities and research fellowships, training grant stipends, scholarships, work-study, loans, and part-time jobs. GEs are available to qualified graduate students who are enrolled in a graduate degree program. Inquire at the department for specific application deadlines. All GEs—research, teaching, and administrative—are represented by the Graduate Teaching Fellows Federation (GTFF), American Federation of Teachers, Local 3544. Recruitment and selection follow established published procedures from departments and the provisions of the GTFF collective bargaining agreement. Details of appointment procedures are available from the departments. Reappointment is subject to departmental policy but is always contingent upon making satisfactory progress toward the degree.

Nearly all the schools and departments award graduate employee (GE) opportunities. Salaries vary by department, and also depend on the student's past degrees and status within their academic program. More information about salary is available on the Division of Graduate Studies website. The minimum appointment is 0.25 FTE (Full Time Equivalent) and the maximum appointment is .49 FTE. Graduate employees (GEs) must be enrolled in a graduate degree program and must register for and complete a minimum of 9 graduate credits toward the degree each term. Audited courses do not count toward this requirement. Tuition for 9 to 16 credits a term, a health insurance premium subsidy, and partial mandatory fees subsidy are provided by the university. Failure to enroll for and complete the minimum of 9 credits a term may nullify an appointment.

Non-native speakers of English who accept teaching-related GE positions must demonstrate appropriate English language proficiency. See "Language Requirement for International Graduate Employees" above.

Fellowships from Other Sources

Graduate students may be eligible for fellowship awards granted by federal agencies and private foundations. Information on internal and external funding opportunities is available on the website (<http://research.uoregon.edu/>) for the Office of the Vice President for Research and Innovation.

Postdoctoral Fellowships

The University of Oregon participates in several postdoctoral fellowship programs and provides facilities for postdoctoral study under faculty supervision. More information is available from individual schools and departments. Additional resources for postdoctoral fellows can be found on the Division of Graduate Studies website.

Other Financial Assistance

Some forms of financial aid depend on financial need, defined as the difference between the cost of attending an institution and the amount the student and his or her family can contribute toward these expenses. See the **Student Financial Aid and Scholarships (p. 30)** section of this catalog for information about available aid and application procedures.

International Students

International students may work on campus during the school year but should not expect to work off campus. Those who hold student (F-1) visas are expected to have sufficient funds for the period of their studies. Their dependents are not usually allowed to work. However, if it is necessary for a dependent to work, students should contact International Student and Scholar Services in the Division of Global Engagement.

International students are eligible for institutionally supported teaching and research fellowships described above.

Master's Degrees

Master's degree candidates must fulfill the requirements of the Division of Graduate Studies, which are listed below. Students must also complete the additional requirements set by the school or department in which the degree is to be awarded. These are described in the departmental sections of this catalog.

Credit Requirements

To earn a master's degree, students must complete a program of study totaling no fewer than 45 graduate credits. As noted above, some departments require more than 45 credits.

- The credits must be taken after admission to the master's degree program or approved for transfer (see **Transferred Credit** (p. 683) below).
- Of the total, at least 24 credits must be in graded courses taken at the UO and passed with a grade point average (GPA) of 3.00 or better. Certain programs are exempt from this requirement; see the Division of Graduate Studies website for details.
- A minimum of 30 credits in the major are required for a master's degree with a departmental major.
- At least 9 credits in courses numbered 600–699 must be taken in residence at the University of Oregon. The master's program in Economics is exempt from this requirement.
- Students working toward a master's degree with thesis must register for a minimum 9 credits of Thesis (503). Credit for thesis is given pass/no pass.

Language Requirements

There is no university-wide language requirement for master's degrees. Departments and programs have the option of requiring or not requiring one or more languages other than English (LOTE). If one or

more languages are required, the degree-granting unit is responsible for monitoring and enforcing that requirement.

Second Master's Degree

Students who earned the first master's degree from the University of Oregon may earn a second master's degree in another field by taking at least 30 graduate credits, of which 24 must be in courses taken for letter grades, after official admission as a master's degree candidate in the new major at the university. This provision does not apply to a second master's degree in the Interdisciplinary Studies Program (ISP). Although the second master's degree may be permitted with reduced credits, complete records of the student's graduate-level study must reflect the equivalent of all requirements for completion of the degree as described in the University of Oregon Catalog. Schools and departments may require more than this 30-credit minimum or deny the request. If the first master's degree is from another institution, the second master's degree program must comply with the standard university master's degree requirements (a minimum of 45 credits). Students pursuing two graduate degrees at the same time must file a concurrent degree form, available on the Division of Graduate Studies website.

Accelerated Master's Programs (AMPs)

The Division of Graduate Studies offers exceptional undergraduate students in selected majors the opportunity to earn both a bachelor's degree and master's degree in as few as 5 years. Accelerated Master's Programs (AMPs) are for high-achieving undergraduates in participating majors who plan to continue in a master's program. To determine if this is an option in your major, see the list of currently approved AMPs on the Division of Graduate Studies website.

Each AMP sets its own admission criteria and internal admissions processes. Interested students should inquire with the program offering the AMP regarding admission.

AMP Policies:

- Students must be classified as Juniors or Seniors in order to apply to an AMP.
- AMP students must be classified as Seniors in order to begin taking graduate-level courses.
- Typically, AMP students may take up to 24 graduate credits while classified as undergraduates, some of which may be used toward both bachelor's and master's degree requirements. However, AMP requirements and credit limits vary from program to program. Check with the department offering the AMP for more information about requirements specific to that program.
- Students will be charged at the undergraduate rate and retain eligibility for undergraduate scholarships during this transition year.
- Students will be considered undergraduates until the bachelor's degree is conferred, at which point they will be officially admitted as master's students, be charged at the graduate tuition rate, and be eligible for graduate assistantships.
- While classified as undergraduates, even if taking graduate classes, students will be subject to all undergraduate policies, including Academic Standing rules for undergraduate students.
- Students who have been accepted to an accelerated master's program must complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the quarter in which they begin taking graduate courses as part of the accelerated program. Students who fail to do so will undergo a progress review and may be dismissed from the AMP.

- A student who is admitted to an AMP and subsequently decides not to continue into the master's program may still count up to 24 graduate credits earned as an undergraduate toward the bachelor's degree, but they may not use those graduate credits toward a UO graduate degree should they decide to return to the UO at a later date.
- 400-level courses will not be allowed to count toward minimum master's degree requirements, even by petition and even if the associated 500-level course would have been accepted toward master's degree requirements. In the case of a student who has already taken a 400-level course and the corresponding 500-level course is required for the master's degree, the student may be required to take the 500-level course. Once accepted to an accelerated master's program, the designated AMP coordinator for the program should work closely with students to ensure registration in the appropriate graduate-level courses.

Time Limit

Students must complete all work for the master's degree within seven years, including transferred credits, thesis or terminal project, and all examinations. Academic leave does not extend the seven-year deadline.

Residency and Enrollment Requirements

For a master's degree, the Division of Graduate Studies requires that a minimum of 30 credits (applicable to degree requirements) be taken at the University of Oregon during at least two terms of study. A second University of Oregon master's degree also requires a minimum of 30 credits and at least two terms of study at the University of Oregon. Individual schools or departments may have additional residence requirements.

Students enrolled in a graduate degree program must attend the university continuously, except for summers, until all the program's requirements have been completed, unless academic leave has been approved. For more information, see Course Registration Requirements and Limits (p. 679), Continuous Enrollment (p. 681), Graduate Residency (p. 681), and Academic Leave (p. 681) under General Requirements and Policies.

Transferred Credit

Graduate Credit from Other Institutions

Graduate credit earned while enrolled as a graduate student at another accredited college or university may be counted toward the master's degree under the following conditions:

1. Total transferred credits may not exceed 15 credits
2. Courses must be relevant to the degree program as a whole
3. The student's home department and the Division of Graduate Studies must approve the transfer
4. Grades earned must be A+, A, A–, B+, B, or P
5. The courses may not have been used to satisfy the requirements for another degree
6. Transfer courses are subject to the seven-year limit for degree completion

Transferred credit may not be used to meet the requirement of 24 credits in University of Oregon graded graduate courses, nor are they used in computing the UO cumulative GPA.

Transfer of Reserved Graduate Credit

Undergraduates who completed graduate-level courses at the University of Oregon under the Reservation of Graduate Credit petition process and who reserve the courses by choosing Option 2 on the petition form may apply up to 12 credits toward the master's degree.

Course work taken for letter grades (B or better) and P/N courses, if accompanied by the instructor's statement that the passing grade was equal to a B or better, is eligible for consideration. If approved, these courses can be used to satisfy relevant university master's degree requirements. A Request for Transfer of Graduate Credit form (available on the Division of Graduate Studies website) must be filed within two terms of acceptance into a master's degree program and within two years of earning the bachelor's degree. Any credits transferred under this option fall within the 15-credit transfer maximum.

Other University of Oregon Transferred Credit

A maximum of 15 graduate credits* earned at the University of Oregon while classified as a graduate postbaccalaureate student, a non-admitted non-degree seeking graduate student, or a student earning a graduate certificate may later be counted toward the master's degree (see Graduate Student Types (p. 678) under Division of Graduate Studies), pending school or department endorsement and Division of Graduate Studies approval. This is within the overall 15-credit maximum for transfer. Grades earned must be A+, A, A–, B+, B, or P. A Request for Transfer of Graduate Credit form (available on the Division of Graduate Studies website) must be approved for credits completed under these classifications to be applied to degree requirements.

*The MEd in Educational Leadership allows up to 27 credits to be transferred from a UO licensure program to the MEd.

Examinations and Thesis

The student's major school or department may require qualifying, comprehensive, or final examinations or any combination of these. The content and methods of conducting such examinations are the responsibility of the school or department.

In some fields, master's degree candidates must submit a thesis; in others the thesis is optional. A student who writes a thesis must complete the following procedures:

1. Request information from the major school or department about the various steps involved and the standards expected
2. Consult the Thesis and Dissertation Style and Policy Manual, available on the Division of Graduate Studies website. Only theses that meet the standards of style and form discussed in that manual are accepted

The advisory committee, appointed by the department, determines the work to be completed in light of the student's academic background and objectives. The number of committee members is determined by the department. The advisor is expected to be a member of the regular faculty, tenured or tenure-track, though non-tenure-track faculty members may be appointed as committee chairs if the department deems it appropriate.

Research Compliance

See Research Compliance (p. 682) in the **General Requirements and Policies** section of this catalog.

Summary of Division of Graduate Studies Requirements

The following outline lists minimum Division of Graduate Studies requirements for master's degrees. Specific departmental requirements must also be met before the student is awarded an advanced degree. Credit requirements listed below must be met with graduate credits.

Minimum GPA	3.00
Minimum thesis credits*	9 credits
Time limit for program completion	Seven years
Total credit minimum	45 credits
Registration minimum per term	3 credits
Minimum graded credits taken in residence**	24 credits
Minimum 600 level credits in residence***	9 credits
Minimum credits in major	30 credits
Minimum credits taken at UO	30 credits

*The school or department specifies whether a thesis is mandatory or optional; however, a student writing a thesis must register for at least 9 credits in Thesis (503).

**Certain programs are exempt from the 24 graded credit requirement. See the Division of Graduate Studies website for details.

***The master's degree in Economics is exempt from the 600-level course requirement.

Interdisciplinary Studies Program

Note: the ISP is currently on pause and not accepting new applications.

The Interdisciplinary Studies Program (ISP) is the university's most flexible interdisciplinary program leading to MA and MS degrees. The program is designed for students with specific, well-articulated goals that cannot be reached through established departmental programs. Although flexibility is allowed in program design, the program must be composed of existing graduate courses from two or three approved master's degree programs. Detailed requirements are available on the Division of Graduate Studies website.

Admission is selective. Acceptance into the program is based on background qualifications, the statement of purpose, and the appropriateness and availability of courses and advisors at the university. An applicant who has been denied admission to a departmental graduate program at the university must have departmental permission to use that department as a program area.

Approval must be obtained in writing from each of the two or three advisors, indicating their willingness to serve and their approval of the Tentative Program of Study. One of the advisors must be designated as chair. Prior to being offered admission, approval is also required from the department head or director of graduate studies from each department included in the applicant's program of study. Subsequent changes in the program must be approved by both the advisor in the area involved and the ISP director. More information about the ISP is available on the Division of Graduate Studies website.

Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Integration of Disciplinary Knowledge:** Develop the ability to synthesize knowledge and methods from multiple disciplines to create new knowledge and research questions and address complex problems.
- **Critical Thinking:** Enhance critical thinking skills necessary for comprehending, analyzing and evaluating information, theories, and methodologies across different disciplines.
- **Communication:** Improve oral and written communication skills to effectively consider and convey complex ideas to diverse audiences in a clear and coherent manner.
- **Research Methods:** Acquire proficiency in interdisciplinary research methodologies, including data collection, analysis, and interpretation, in order to conduct rigorous interdisciplinary research projects.
- **Interdisciplinary Collaboration:** Foster skills to dialogue and work collaboratively with individuals from different disciplines and communities.
- **Creative Problem-Solving:** Cultivate innovative and creative thinking skills to generate novel, interdisciplinary solutions to complex problems.
- **Self-Reflection and Intellectual Growth:** Encourage self-reflection and personal growth as an interdisciplinary scholar, and cultural being living within multiple social contexts, recognizing strengths and areas for improvement, and engaging in continuous intellectual development.

Requirements

The Interdisciplinary Studies Program (ISP) requires a total of at least 45 graduate credits; a minimum of 12 graduate credits in each of two focal departments; a minimum of 12 graduate credits from any department(s); and 9 graduate credits for an integrated terminal project or thesis determined by the student and advisors during the course of study.

Guidelines in the ISP program include the following:

1. A maximum of 12 credits may be used from practicum, field studies, research, and reading and conference courses. Such credit must be distributed across multiple focal departments (i.e., one focal department cannot consist entirely of these individualized credits)
2. 9 credits selected from either Terminal Project (IST 609) or Thesis (IST 503)
3. At least 30 of the 45 minimum credits for the degree must be taken after the candidate is admitted to the ISP program

Education Specialist Degrees

Education Specialist (EdS) degree candidates must fulfill the requirements of the Division of Graduate Studies, which are listed below. Students must also complete the additional requirements set by the school or department in which the degree is to be awarded. These are described in the departmental sections of this catalog.

Summary of Division of Graduate Studies Requirements

The following outline lists minimum Division of Graduate Studies requirements for EdS degrees. Specific departmental requirements must

also be met before the student is awarded a graduate degree. Credit requirements listed below must be met with graduate credits.

Minimum GPA	3.00
Time limit for program completion	Seven years
Total credit minimum	45 credits
Registration minimum per term	3 credits
Minimum graded credits taken in residence	27 credits
Minimum 600 level credits in residence	30 credits
Minimum credits in major	30 credits
Minimum credits taken at UO	30 credits

Language Requirement

There is no language requirement for the Education Specialist degree unless the department offering the degree so specifies.

Time Limit

Students must complete all work for the EdS degree within seven years, including transferred credits and all other requirements. On-leave status does not extend the seven-year deadline.

Residency and Enrollment Requirements

For an EdS degree, the Division of Graduate Studies requires that a minimum of 30 credits (applicable to degree requirements) be taken at the University of Oregon during at least two terms of study. Individual schools or departments may have additional residence requirements.

Students enrolled in a graduate degree program must attend the university continuously, except for summers, until all the program's requirements have been completed, unless on-leave status has been approved. For more information, see Course Registration Requirements and Limits (p.), Continuous Enrollment (p. 681), Graduate Residency (p. 681), and On-Leave Status (p. 681) under General Requirements and Policies.

Transferred Credit

Graduate Credit from Other Institutions

Graduate credit earned while enrolled as a graduate student at another accredited college or university may be counted toward the EdS degree under the following conditions:

1. Total transferred credits may not exceed 15 credits
2. Courses must be relevant to the degree program as a whole
3. The student's home department and the Division of Graduate Studies must approve the transfer
4. Grades earned must be A+, A, A-, B+, B, or P
5. The courses may not have been used to satisfy the requirements for another degree
6. Transfer courses are subject to the seven-year limit for degree completion

Transferred credit may not be used to meet the requirement of 27 credits in University of Oregon graded graduate courses, nor are they used in computing the UO cumulative GPA.

Transfer of Reserved Graduate Credit

Undergraduates who completed graduate-level courses at the University of Oregon under the Reservation of Graduate Credit petition process and who reserve the courses by choosing Option 2 on the petition form may apply up to 12 credits toward an EdS degree.

Course work taken for letter grades (B or better) and P/N courses, if accompanied by the instructor's statement that the passing grade was equal to a B or better, is eligible for consideration. If approved, these courses can be used to satisfy relevant university EdS degree requirements. A Request for Transfer of Graduate Credit form (available on the Division of Graduate Studies website) must be filed within two terms of acceptance into an EdS degree program and within two years of earning the bachelor's degree. Any credits transferred under this option fall within the 15-credit transfer maximum.

Other University of Oregon Transferred Credit

A maximum of 15 graduate credits* earned at the University of Oregon while classified as a graduate post-baccalaureate student, a non-admitted non-degree seeking graduate student, an admitted non-degree graduate student, or a graduate certificate student may later be counted toward the EdS degree (see Graduate Student Types (p. 678) under Division of Graduate Studies), pending school or department endorsement and Division of Graduate Studies approval. This is within the overall 15-credit maximum for transfer. Grades earned must be A+, A, A–, B+, B, or P. A Request for Transfer of Graduate Credit form (available on the Division of Graduate Studies website) must be approved for credits completed under these classifications to be applied to degree requirements.

*The EdS in Educational Leadership allows up to 27 credits to be transferred from a UO licensure program to the EdS.

Research Compliance

See Research Compliance (p. 682) in the **General Requirements and Policies** section of this catalog.

Doctoral Degrees

Doctor of Philosophy

The degree of doctor of philosophy (PhD) requires distinguished achievement in both scholarship and original research. The degree is granted chiefly in recognition of the candidate's high attainment and ability in a special field of an academic discipline, as shown by work on required examinations and by the preparation of a dissertation. Minimum university and school, college, or department requirements of residence and study must be satisfied. The requirements for PhD degrees established by the Division of Graduate Studies are given below. Individual programs have additional specific requirements, which are presented in the departmental sections of this catalog.

Residency and Credit Requirements

For the PhD degree, the student must complete the equivalent of at least 81 credits of graduate-level academic work beyond the bachelor's degree over the course of at least three calendar years.

The doctoral residency requirement is as follows:

- At least 27 credits of graduate course work toward the doctoral degree must be completed at the University of Oregon while classified as a doctoral student. Course work completed as

a UO master's student may count toward the doctoral residency requirement under these circumstances: (1) the master's program is in the same major as the doctoral program; (2) no more than one calendar year has lapsed between the last term of enrollment as a master's student and the start of the doctoral program

- Of these 27 credits, at least 14 credits must be in regular course work—i.e., not in individualized study credits such as Research (601), Reading and Conference (605), and Special Problems (605)
- The 18 required credits in Dissertation (603) do not count toward the residency requirement

Transfer of Credit for Doctoral Students

There is no formal university transfer credit process for doctoral students. Each program sets its own policy regarding acceptance of transfer credits, and is responsible for tracking how transfer credits fit into departmental degree requirements. Transfer credits can only be used to meet departmental degree requirements; they cannot be used toward the doctoral residency requirement or the 18 required credits of 603 Dissertation.

Language Requirement

Individual departments or programs may require knowledge of a second language or of other specialized disciplines, such as computer science or statistics, as part of a PhD program. Information about these requirements is available from the department or program offering the degree.

Candidates for the doctor of philosophy degree at the University of Oregon are expected to have proficiency in at least one language in addition to English if a substantial, relevant body of literature in one or more languages exists in the candidate's specialized field of dissertation research. It is the responsibility of the candidate's advisor or doctoral committee to determine which languages the candidate is expected to know before beginning dissertation research. Guidelines for language proficiency are established by the candidate's home department or program.

Advisory Committee

The advisory committee, appointed by the department, determines the work to be completed in light of the student's academic background and objectives. This committee usually consists of three or four members, and the student's advisor is chair.

Examinations and Advancement to Candidacy

Every PhD student must pass comprehensive examinations (oral, written, or both) or other similar requirements set by the department that cover the primary areas of the student's program and, if applicable, any supporting area required by the department. The student is responsible for material directly covered in completed graduate courses and for additional independent study in his or her field. Students should consult their department's/program's website or graduate handbook for information about requirements for advancing to candidacy.

Within two weeks of the student meeting these requirements, an advancement to candidacy form must be submitted. See the Division of Graduate Studies website for details.

Advancing to candidacy signifies that the student has completed their coursework, as well as other requirements as defined by their graduate

program, and is ready to move forward to the dissertation phase. Minimum requirements for advancement to candidacy:

- Completed UO residency requirement (<https://graduatestudies.uoregon.edu/academics/policies/doctoral/residency-requirements/>)
- Completed pre-advancement coursework required by the program
- Completed all program-level non-coursework advancement requirements
- Cumulative UO GPA of at least 3.0
- In good standing (<https://graduatestudies.uoregon.edu/academics/policies/general/satisfactory-progress/>) according to UO and program standards

Dissertation

All PhD candidates must submit a dissertation based on independent and original research. The dissertation must contribute significantly to knowledge, show a mastery of the literature of the subject, be written in acceptable literary style, and conform to the standards outlined in the University of Oregon Thesis and Dissertation Style and Policy Manual. The manual is available from the Division of Graduate Studies website. Doctoral dissertations must be submitted electronically to ProQuest. Copyright registration is optional. Theses and dissertations completed at the University of Oregon will be available in Scholars' Bank, the UO's open-access repository for the intellectual work of its faculty, students, and staff at the University of Oregon.

Research Compliance

See Research Compliance (p. 682) in the **General Requirements and Policies** section of this catalog.

Dissertation Committee

Following advancement to candidacy, the candidate's department proposes the membership of the dissertation committee to the vice provost of graduate studies, who appoints the committee after approving it.

The dissertation committee consists of a minimum of four members, each with a particular role. A detailed description of the policy on dissertation committees is available on the Division of Graduate Studies website.

Dissertation Registration

Registration for Dissertation (603) is allowed only after the candidate has advanced to candidacy. PhD students must have a minimum of 18 credits of Dissertation (603) to graduate. PhD students are required to enroll for a minimum of 3 credits of Dissertation (603) in the term of degree completion (unless completing in Summer term) and during any other term in which they are utilizing faculty time or university resources.

Defense of Dissertation

A formal, public defense must take place at a date set by the committee chair and approved by the Division of Graduate Studies.

Tentative approval of the dissertation by the committee is recommended prior to formal defense. This evaluation is based on copies of the final manuscript, which the candidate provides for the dissertation committee at least three weeks before the formal defense.

The approved application for final oral defense must also be filed with the Division of Graduate Studies two weeks before the formal defense. Visit the Division of Graduate Studies website for specific instructions.

The time and place of the defense must be publicly noted. The dissertation committee must be present at the defense (with some exceptions—see the Division of Graduate Studies website for details). Remote defenses are also allowed; refer to the Division of Graduate Studies website for details.

Completion of Dissertation

Within two weeks following the defense of the dissertation but before the dissertation is submitted to the Division of Graduate Studies, committee members must confirm their approval of the defense, only if they have seen and approved what is substantially a final draft and if they are willing to delegate the oversight of any remaining minor revisions to the chair. If this is not the case, they should not approve the defense. Approval requires a unanimous vote. In the event of a split vote, the vice provost for graduate studies determines the review procedure after consultation with the student, the department chair (or the school or college dean), and the committee. Once the dissertation has been approved by the committee, the student must submit the dissertation electronically to the Division of Graduate Studies. Visit the Division of Graduate Studies website for deadlines and submission instructions.

Time Limit

The seven-year time limit for completing a doctoral degree begins with the first term of admission as a doctoral student at the University of Oregon. The residency requirement, the completion of advancement to candidacy requirements, and the completion of the doctoral dissertation must all be accomplished within this seven-year period. Taking academic leave does not automatically extend the seven-year deadline.

A petition for an extension of the seven-year time limit can only be considered if the student has already advanced to candidacy and has an approved dissertation proposal by the end of the seventh year. Petitions for extension of the seven-year limit may include the requirements of reCompleting the doctoral residency requirement, advancement to candidacy requirements, or both. Petitions are evaluated case by case and are not automatically granted. Students on seven-year extensions must submit quarterly renewals outlining their progress before they are allowed to register for the next quarter.

Continuous Enrollment

Unless academic leave has been approved, a student enrolled in a doctoral program must attend the university continuously until all the program and university requirements, including submission of the dissertation to the Division of Graduate Studies, have been met. To be continuously enrolled, the student must register for 3 graduate credits each term excluding summer sessions. See Academic Leave (p. 681) under General Requirements and Policies.

Academic Leave

While on academic leave, the doctoral candidate acknowledges that he or she is not using any university or faculty services (e.g., no examinations are being taken, no committee changes are being processed, and no dissertation chapters are being submitted for review). Academic leave maintains the student's status as a degree candidate and reserves a place for dissertation supervision and other academic

affairs upon the student's return to active enrollment within the seven-year time limit.

Doctor of Education

The Doctor of Education (DEd) degree is granted in recognition of the candidate's mastery of theory, practice, and research in professional education. The general requirements for residence, dissertation, advancement to candidacy, time limit, and continuous enrollment are the same as for the PhD degree. See the **College of Education (p. 517)** section of this catalog for details.

Doctor of Musical Arts

Requirements for the doctor of musical arts (DMA) degree include formal admission, proficiency and comprehensive examinations, second languages, a program of study including area of emphasis, and a dissertation, lecture document, or digital portfolio. Requirements for residence, time limit, and continuous enrollment are the same as those listed for the PhD degree. See the **School of Music and Dance** section of this catalog for details.

Chronological Summary of Procedures Leading to Doctoral Degrees

1. **Admission**
2. **Continuous enrollment.** Students enrolled in advanced degree programs must attend the university continuously (except for summers) until all the program's requirements are completed, unless academic leave has been approved. Minimum enrollment is 3 graduate credits a term.
3. **Course work and residence.** Student's advisory committee, appointed by the department, school, or college, determines the program, which must include at least 81 credits of accredited graduate work beyond the bachelor's degree over the course of at least three years, of which at least 27 credits must be completed at the University of Oregon, and of which 18 credits are in Dissertation (603).
4. **Second languages or other specialized knowledge.** Regulations are set by the department, school, or college.
5. **Advancement to candidacy.** Completion of comprehensive examinations or other similar requirements covering the major discipline advances the student to candidacy for the degree. Advancing to candidacy signifies that the student has completed their coursework, as well as other requirements as defined by their graduate program, and is ready to move forward to the dissertation phase.
6. **Appointment of dissertation committee, registration for Dissertation (603), and completion of dissertation.** The committee is appointed following advancement to candidacy and at least six months before completion of the dissertation. Typically, the committee consists of at least three members of the graduate faculty of the candidate's home department as well as an Institutional Representative who is a graduate faculty member from outside the candidate's department. A minimum of 18 credits in Dissertation (603) are required after advancement.
7. **Application for graduation** made to the Division of Graduate Studies. Deadlines and instructions are available on the Division of Graduate Studies website.
8. **Defense of dissertation.** The approved application for final oral defense must be filed with the Division of Graduate Studies no later than two weeks before the date of defense.
9. **Dissertation submission and publication.** Dissertations are submitted electronically through ProQuest. Detailed instructions are available on the Division of Graduate Studies website.
10. **Conferral of degree.** The degree is conferred at end of term in which all degree requirements are satisfied.
11. **Diploma issued.** The diploma is issued by Office of the Registrar approximately 6-10 weeks after the end of the term of degree conferral.

Graduate Certificates

The University of Oregon offers a number of graduate certificates in specific academic and professional subjects. Students pursuing graduate certificates must be admitted to the university, but are not required to be degree-seeking.

Admission Process

In order to pursue a graduate certificate, a student must be admitted to the University of Oregon as a graduate level student, either in a master's or doctoral program or, in the case of a stand-alone certificate program, as an admitted graduate certificate student.

The admission process is specific to each certificate program. To get started, the student should contact the department/program offering the graduate certificate.

All students pursuing both a graduate degree and a graduate certificate concurrently must complete and submit the graduate certificate declaration form within one term after being admitted to the certificate program.

This form must be filed in the Division of Graduate Studies no later than week 5 of any term in which you want to make the change effective. Forms submitted after Week 5 of the term will automatically be considered for the next academic term.

Students pursuing only a graduate certificate do not need to complete the declaration form and instead apply via the online application.

Financial Aid and Graduate Certificates

Students pursuing a standalone graduate certificate (that is, without also being concurrently enrolled in a graduate degree program) may not access federal financial aid unless the graduate certificate program has been individually approved as Title IV aid-eligible.

Contact the department/program offering the graduate certificate to find out if it is offered as a standalone certificate and is Title IV-aid eligible.

Important Information about Pursuing and Completing a Graduate Certificate

Graduate certificates consist of a minimum of 24 credits of graduate-level coursework taken at the UO. Specific course requirements are established by the department.

UO graduate coursework taken prior to acceptance into the certificate program may count toward certificate requirements, with approval from the department offering the certificate.

However, to be considered, such coursework must have been completed as an admitted graduate student in one of the following classifications:

- Conditional Master's
- Master's
- Conditional Doctoral
- Doctoral
- Pre-master's
- Post-master's
- Postbaccalaureate Graduate
- Admitted Non-Degree Graduate

Graduate certificate students are subject to the following general policies governing satisfactory progress:

- Continuous enrollment
- Minimum three-credit registration each term
- Maintenance of a 3.0+ cumulative GPA
- Completion of the program within seven years.
 - Note: The seven-year time period begins with the first course being used to meet certificate requirements.
- Maintaining satisfactory progress/good standing

Graduating with the Certificate

No later than Friday of Week 2 in the term of graduation (for the graduate certificate, the graduate degree, or both the degree and the certificate), the student must apply for graduation.

No later than the term deadline in the term of graduation for the certificate, the department/program must submit a statement of completion for graduate certificate, as well as a copy of the departmental program plan indicating the courses (titles, term taken, number of credits, and grade for each) being used to fulfill the requirements of the certificate.

Graduate Specializations

A graduate specialization is either a subdivision of a major or an interdisciplinary track in which a strong graduate-level curriculum is available.

Graduate specializations are indicated after the major on official records and transcripts once the student graduates with their primary degree.

The University of Oregon offers a number of graduate specializations in specific academic and professional subjects.

Students pursuing a graduate specialization must be admitted to a graduate degree program at the university.

Admission/Declaration Process

In order to pursue a specialization, a student must be admitted to a University of Oregon master's or doctoral program.

The admission/declaration process is specific to each specialization. To get started, the student should contact the department or program offering the specialization.

The student must complete and submit the specialization declaration form as soon as they have been approved to pursue (or is admitted to) the specialization, but no later than the term prior to applying for graduation.

This form must be filed in the Division of Graduate Studies no later than week 5 of any term in which you want to make the change effective. Forms submitted after Week 5 of the term will automatically be considered for the next academic term.

Important Information about Pursuing and Completing a Specialization

Specific course and credit requirements are established by the department or program at the time that the graduate specialization is established.

All specializations must consist of a minimum of 16 credits of graduate level coursework taken at the UO. All courses must be completed with grades of B or better, or P.

Coursework taken prior to declaring a graduate specialization may count toward specialization requirements, with approval from the department or program offering the specialization.

However, to be considered, such coursework must have been completed as an admitted graduate student in one of the following classifications:

- Conditional Master's
- Master's
- Conditional Doctoral
- Doctoral
- Pre-master's
- Post-master's
- Postbaccalaureate Graduate
- Admitted Graduate Non-Degree
- Graduate Certificate
- Graduate Microcredential

All graduate students are subject to the following general policies governing satisfactory progress:

- Continuous enrollment
- Minimum three-credit registration each term
- Maintenance of a 3.0+ cumulative GPA
- Completion of the program within seven years
- Maintaining satisfactory progress/good standing

Graduating with the Specialization

No later than Friday of Week 2 in the term of graduation, the student must apply for graduation online and be sure to select the graduate specialization they also plan to receive.

After the end of the term of graduation, the department or program housing the specialization must submit a statement of completion for graduate specialization.

The specialization will appear on the final transcript only if the above steps are taken.

Graduate Microcredentials

Graduate Microcredentials offer specialized training that helps meet important educational and workforce needs and advance learners' knowledge and/or skill development without the commitment of a full graduate degree program.

Students pursuing graduate microcredentials are not eligible for federal financial aid or for Division of Graduate Studies scholarships.

Graduate microcredentials are only available as stand-alone credentials; students may not concurrently complete a graduate microcredential and a graduate degree or certificate.

Minimum requirements

A graduate microcredential consists of at least 3 graduate courses totaling a minimum of 12 credits.

While enrolled in a graduate microcredential program, students are subject to all graduate student academic policies, including satisfactory progress requirements.

Admissions

Anyone who meets the UO minimum requirements for graduate admission may apply to complete a graduate microcredential. Each program offering graduate microcredential may have additional prerequisites or eligibility requirements. Applicants apply online via the Division of Graduate Studies' application system.

Pathway to a degree or certificate

Acceptance to pursue a UO graduate microcredential does not guarantee acceptance into a UO degree or certificate program. However, credits that a learner earns toward a graduate microcredential may later be applied to a UO master's degree, doctoral degree, or graduate certificate, depending on the program and subject to all current Division of Graduate Studies transfer credit policies.

Physical Education

Chantelle Russell, Associate Director

The physical education program offers physical activity courses for university students, UO faculty and staff members, and members of the Eugene-Springfield community. Physical education courses emphasize the development of physical skills, improvement in fitness levels, and the acquisition of knowledge that contributes to a healthy lifestyle and holistic well-being.

Approximately 130 courses are offered each term in a variety of activity areas—aquatics and scuba, fitness, individual activities, leadership, martial arts, mind-body, outdoor pursuits, racquet sports, running, team sports, and weight training. This ever-changing array of courses is taught by an exceptional staff of faculty members and contract employees.

Most classes meet twice a week for 1 credit. As many as 12 credits in physical education may be applied as electives to a bachelor's degree. Each term's offerings are listed in the Schedule of Classes online. Students may register for courses through DuckWeb, which is explained in the **Registration and Academic Policies** section of this catalog.

Students and members of the staff, faculty, and community may enroll in physical education courses as noncredit participants, if space is available. Noncredit participants pay the PE course fee and register online (<https://recweb.uoregon.edu/>).

Opportunities are available for students who have disabilities or who need special accommodations in order to participate in physical education courses. More information and support is available by visiting the PE and Rec website. (<https://rec.uoregon.edu/>)

Fees for Physical Education Courses

Course	Fee
Activity (1 credit)	\$90
Activity (2 credits)	\$180
Outdoor pursuits	\$105–\$200
Practicum (1–3 credits)	\$40

Some courses require additional fees to pay for equipment, transportation, contract expenses, and certification. Fees and fee-refund schedules are printed in each term's schedule of classes.

Faculty

Anne Borland, associate teaching professor (outdoor pursuits). BA 1987, Oregon. (2008)

Daniel Crowe, associate teaching professor (outdoor pursuits). BA, 1997, Concordia College. (2004)

David Rubino, associate teaching professor (individual activities, martial arts, running, team sports, weight training); assistant director. BS, 1987, State University of New York, Cortland; MA, 1988, Northern Colorado. (2001)

Joan Dobbie, associate teaching professor (mind body). BA, 1967, State University of New York, Potsdam. (1998)

Justine Halliwill, associate teaching professor (martial arts, mind body). BS, 2005, Oregon. (2005)

Linda Metzger, associate teaching professor (fitness). BA, 2008, Platteville; WI. (2011)

Michele Bulgatz, associate teaching professor (mind body). BA, 1985, California, Santa Barbara. MS, 1994, Oregon. (2001)

Michie Kawada, associate teaching professor (aquatics, fitness). BA, 1998, Oregon. (2002)

Nat Lundin, associate teaching professor (mind body). BS, 2007, Oregon. (2009)

Ryan Kelly, associate teaching professor (martial arts). (1999)

Emeritae

Karla S. Rice, senior instructor emerita. BS, 1962, Central Michigan; MA, 1965, Michigan State. (1967)

Becky L. Sisley, professor emerita; athletic liaison. BA, 1961, Washington (Seattle); MSPE, 1964, EdD, 1973, North Carolina, Greensboro. (1965)

Lois J. Youngen, associate professor emerita. BS, 1955, Kent State; MA, 1957, Michigan State; PhD, 1971, Ohio State. (1960)

Michael Strong, senior instructor II emerita (outdoor pursuits). MS, 1986, University of Oregon. BS 1976, University of Alberta. (1986)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Supplementary Academic Programs

The college experience may not be limited to what is learned solely on the university campus. Continuing and Professional Education offers options for those returning to higher education after a period away, those interested in noncredit educational opportunities, or those who seek degree credit outside the classroom. Opportunities to study abroad are available through the Division of Global Engagement for those who want to expand their intellectual and cultural horizons and to broaden their perspective of the world. For those who want to pursue a career in the military, the Department of Military Science provides opportunities to study leadership principles, military organization and history, and the place of the armed forces in serving the goals of national policy.

- Study Abroad (<https://geo.uoregon.edu/>)

Academic Resources and Student Services

Administrative units at the University of Oregon provide a network of student services that support success in the classroom and challenge students to develop as individuals through an array of cocurricular experiences.

Emergencies

Many support services, including the Office of the Dean of Students (<https://dos.uoregon.edu/>) (541-346-3216), the University Health Center (<https://health.uoregon.edu/>) (541-346-2770), and University Health Center Counseling Services (<https://counseling.uoregon.edu/>) (541-346-3227) provide emergency aid to students during regular office hours—8:00 a.m. to 5:00 p.m., Monday through Friday.

Counseling Services offers a crisis line staffed at all hours by mental health professionals, and the University Health Center offers a health nurse advice line when the center is closed (541-346-2770, then press 1). In addition, a 24-hour, round-the-clock crisis line is available for those seeking support after experiencing sexual violence (541-346-7233).

In case of any other emergency, call 911 or the UO Police Department (541-346-2919).

To help students succeed in navigating the rigors of competitive higher education, the University of Oregon offers an array of support programs and resources for dedicated scholars in their quest for academic excellence.

Undergraduate Education and Student Success

<https://uess.uoregon.edu> 5256 University of Oregon
Eugene, OR 97403-5256
541-346-1608

Undergraduate Education and Student Success, a division of the Office of the Provost, offers programs that enrich the academic life of all undergraduate students. Under the leadership of the vice provost for undergraduate education and student success, the division promotes

- a campus culture of intellectual curiosity and engagement
- opportunities for students at all levels to be creative and to work in close association with outstanding faculty members
- a coherent approach to general education

The central responsibility of the division is to introduce students to the university and the world of ideas, supporting those who are curious and intellectually vigorous regardless of their cultural background or socioeconomic circumstances.

Veterans Education Benefits

<https://registrar.uoregon.edu/veterans-benefits> (<https://registrar.uoregon.edu/veterans-benefits/>)

School Certifying Officials

234 Oregon Hall
541-346-3119
veterans@uoregon.edu

The Office of Veterans Education Benefits, a unit within the Office of the Registrar, assists eligible student veterans, reservists, and dependents utilize educational benefits in compliance with the procedures and regulations of the United States Department of Veterans Affairs (VA). The office provides basic information about educational benefits administered by the VA and those provided by Oregon state laws.

Eligible students should contact the office by telephone or e-mail after being admitted to the university.

Veterans Access, Choice, and Accountability Act of 2014

Veterans Health Care and Benefits Improvement Act of 2016

Department of Veterans Affairs Expiring Authorities Act of 2018

Isakson and Roe Veterans Health Care and Benefits Improvement Act of 2020

Colonel John M. McHugh Tuition Fairness for Survivors Act of 2021

The following individuals shall be charged the in-state rate for tuition and fees purposes:

- A veteran using educational assistance under either Chapter 30 (Montgomery GI Bill®—Active Duty Program) or Chapter 33 (Post-9/11 GI Bill®), of Title 38, United States Code, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using transferred post-9/11 GI Bill® benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship [38 U.S.C. § 3311(b)(9)] who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using educational assistance under Chapter 31, Veteran Readiness and Employment, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using educational assistance under Chapter 35, Dependents Educational Assistance, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the University of Oregon.

GI Bill® is a registered trademark of the US Department of Veterans Affairs. More information about education benefits offered by the department is available at the official US government website (<https://www.benefits.va.gov/gibill/>).

Veteran and Dependent Priority Registration

Students who are active members of the military, veterans with an honorable discharge or general discharge under honorable conditions, or dependents receiving Veterans educational benefits are offered priority registration. Students must self-report to the Office of the Registrar to obtain priority registration.

Students who are eligible for priority registration are able to register before other students in their category as shown below. Priority is given to graduate students, then to undergraduates. Seniors register before juniors, juniors before sophomores, and so forth, based on number of credits accumulated.

1. Graduate and postbaccalaureate students
2. Seniors with 135 or more credits
3. Juniors with 90 or more credits
4. Sophomores with 45 or more credits
5. Freshman students with fewer than 45 credits

Veterans Benefits and Transition Act of 2018

The following policy (38 U.S.C., section 3679) applies to any covered individual, who is any individual entitled to educational assistance under Chapter 31, Vocational Rehabilitation and Employment, or Chapter 33, Post-9/11 GI Bill benefits:

1. Any covered individual is permitted to attend or participate in the course of education during the period beginning on the date on which the individual provides to the University of Oregon a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33 (a “certificate of eligibility” can also include a “Statement of Benefits” obtained from the Department of Veterans Affairs website or a VAF 28-1905 form for Chapter 31 authorization purposes) and ending on the earlier of the following dates: (a) the date on which payment from the VA is made to the institution or (b) the date that is 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.
2. The University of Oregon will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from the VA under Chapter 31 or 33.
3. The University of Oregon requires the covered individual to take the following additional actions:
 - a. Submit a certificate of eligibility for entitlement to educational assistance no later than the first day of a course of education
 - b. Submit a written request to use such entitlement every quarter/semester
 - c. Provide additional information, if requested, necessary to the proper certification of enrollment by the educational institution
 - d. Make a payment for the amount that is the difference between the amount of the student's financial obligation and the amount of the VA education benefit disbursement and understand that late fees may apply to these charges

Courses

AEIS 101. Introductory Academic Oral Communication. 4 Credits.

Focuses on strategies to improve aural-oral academic communication through discussions, seminars, dialogue, videos, and lectures. Sequence with AEIS 102.

Requisites: Pre- or coreq: placement test.

AEIS 102. Advanced Academic Oral Communication. 4 Credits.

Focuses on strategies to improve aural-oral academic communication through discussions, seminars, dialogue, and presentations. Sequence with AEIS 101.

Requisites: Prereq: Placement test.

AEIS 107. Reading Academic Discourse. 4 Credits.

Focuses on interactive reading of academic text, building reading strategies for better comprehension, speed, and confidence, and developing critical reading skills.

Requisites: Prereq: placement test.

AEIS 110. Introductory Academic Writing. 4 Credits.

Introduces conventions of expository essay writing. Emphasizes clear, effective written communication and development of editing skills. Covers grammar in context. Sequence with AEIS 111, AEIS 112.

Requisites: Prereq: placement test.

AEIS 111. Intermediate Academic Writing. 4 Credits.

Intermediate writing for nonnative speakers of English. Critical analysis of academic texts leading to summary, paraphrase, essay-examination responses, and expository essays. Sequence with AEIS 110, AEIS 112.

Requisites: Prereq: Placement test.

AEIS 112. Advanced Academic Writing. 4 Credits.

Advanced writing for non-native speakers of English. Critical reading of academic texts for response in various academic modes: reporting research, critical analysis, and argumentation. Sequence with AEIS 110, AEIS 111.

Requisites: Prereq: placement test or AEIS 110, AEIS 111.

AEIS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Accounting (ACTG)

Courses

ACTG 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

ACTG 340. Accounting for Entrepreneurs. 4 Credits.

Sources and uses of cash in the context of start-up and small firms. Emphasis on cash generated by operations and used for operations and growth. Secondary emphasis on external sources of cash.

Requisites: Prereq: BA 211Z or MGMT 335.

ACTG 350. Intermediate Accounting I. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards; analysis of alternatives for income measurement and asset and liability valuation.

Requisites: Prereq: BA 101Z; BA 169Z; BA 213Z or BA 215; EC 201Z; MATH 241 or MATH 251Z; STAT 243Z or MATH 345M or DSCI 102; WR 122Z or WR 123.

ACTG 351. Intermediate Accounting II. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards. Analysis of alternatives for income measurement and asset and liability valuation.

Requisites: Prereq: ACTG 350.

ACTG 352. Intermediate Accounting III. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards; analysis of alternatives for income measurement and asset and liability valuation.

Requisites: Prereq: ACTG 351, FIN 316.

ACTG 360. Cost Accounting. 4 Credits.

Development and communication of cost information to assist in planning, motivating managers, controlling costs, and evaluating performance.

Requisites: Prereq: BA 101Z, BA 169Z, BA 213Z, EC 201Z, EC 202Z, MATH 241, STAT 243Z; WR 122Z or WR 123.

ACTG 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ACTG 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ACTG 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ACTG 405. Reading and Conference: [Topic]. 1-12 Credits.

A particular selection of material read by a student and discussed in a conference with a faculty member.

Repeatable 99 times

ACTG 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ACTG 407. Seminar: [Topic]. 4 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ACTG 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ACTG 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ACTG 410. Experimental Course: [Topic]. 1-4 Credits.

A recent topic is Accounting Information Systems.

Requisites: Prereq: BA 101Z, BA 169Z, BA 213Z, EC 201Z, EC 202Z, STAT 243Z; one from MATH 241, MATH 246, MATH 251Z.

Repeatable 99 times when topic changes

ACTG 425. Professional Ethics for Accountants. 4 Credits.

This course presents the ethical standards of the accounting profession with emphasis on contemporary issues confronting accountants and auditors including their social and ethical responsibilities.

Requisites: Prereq: BA 213Z.

ACTG 440. Auditing. 4 Credits.

The audit environment, examinations of financial statements, and the audit process. Includes professional standards, audit sampling, and the audit profession; concepts underlying professional ethics for auditors.

Requisites: Prereq: ACTG 350.

ACTG 450. Advanced Financial Accounting. 4 Credits.

Accounting for equity; financial accounting and reporting for corporate consolidation.

Requisites: Prereq: ACTG 352.

ACTG 460. Government & Not for Profit Accounting. 4 Credits.

This course teaches differences in accounting and financial reporting for governmental and not-for-profit organizations and differences between private sector and public-sector accounting, standards-setting, meeting stakeholder needs.

ACTG 470. Federal Taxation. 4 Credits.

Federal income tax law covering primarily the taxation of individuals with a focus on business income and property transactions. Introduction to tax planning.

Requisites: Prereq: BA 101Z, BA 169Z, BA 213Z, EC 201Z, EC 202Z, MATH 241, STAT 243Z.

ACTG 480. Accounting Data Analytics I. 4 Credits.

Focuses on the increased use of data analytics within the accounting profession, including an understanding of data analytic thinking, terminology and application.

Requisites: Prereq: ACTG 350.

ACTG 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ACTG 510. Experimental Course: [Topic]. 1-4 Credits.

A recent topic is Accounting Information Systems.

Repeatable 99 times when topic changes

ACTG 525. Professional Ethics for Accountants. 4 Credits.

This course presents the ethical standards of the accounting profession with emphasis on contemporary issues confronting accountants and auditors including their social and ethical responsibilities.

ACTG 540. Auditing. 4 Credits.

The audit environment, examinations of financial statements, and the audit process. Includes professional standards, audit sampling, and the audit profession; concepts underlying professional ethics for auditors.

ACTG 550. Advanced Financial Accounting. 4 Credits.

Accounting for equity; financial accounting and reporting for corporate consolidation.

ACTG 560. Government & Not for Profit Accounting. 4 Credits.

This course teaches differences in accounting and financial reporting for governmental and not-for-profit organizations and differences between private sector and public-sector accounting, standards-setting, meeting stakeholder needs.

ACTG 570. Federal Taxation. 4 Credits.

Federal income tax law covering primarily the taxation of individuals with a focus on business income and property transactions. Introduction to tax planning.

ACTG 580. Accounting Data Analytics I. 4 Credits.

Focuses on the increased use of data analytics within the accounting profession, including an understanding of data analytic thinking, terminology and application.

ACTG 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ACTG 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ACTG 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ACTG 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ACTG 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ACTG 607. Seminar: [Topic]. 1-5 Credits.

Current Research in Accounting is a recent topic.

Repeatable 99 times

ACTG 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ACTG 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ACTG 610. Experimental Course: [Topic]. 1-5 Credits.

Recent topics include Developing the Business Professional, International Accounting, Tax Pass-Through Entities.

Repeatable 99 times when topic changes

ACTG 612. Financial Accounting. 3 Credits.

Introduces the accounting model and financial statements for external users. Emphasizes the use of accounting information in valuation and performance evaluation.

Requisites: Prereq: BA 211Z or equivalent.

ACTG 616. Tax Research. 4 Credits.

Introduces tax law, tax authority, and how to research complex tax issues. Emphasizes development of professional research memorandums and advising clients on tax strategies.

Requisites: Prereq: ACTG 570 or ACTG 617.

ACTG 617. Taxation of Business. 4 Credits.

Taxation of business entities (C corporations, partnerships, S corporations, and limited liability companies) as they form, operate, and dissolve.

ACTG 618. Taxes and Business Strategy. 4 Credits.

How to use economic analysis as a tax planning tool, thereby incorporating tax factors in economic decisions.

Requisites: Prereq: ACTG 617.

ACTG 619. Taxation of Pass Through Entities. 4 Credits.

Designed for accountants, managers, and entrepreneurs, covers basics of taxation of partnerships, S corporations and their shareholders, and trusts and their beneficiaries. Also covers taxation of exempt entities. Students cannot receive credit for both ACTG 619 and LAW 681.

ACTG 630. Accounting Measurement and Disclosure. 4 Credits.

Recent Financial Accounting Standards Board decisions; current measurement and disclosure conflicts facing the accounting profession. Includes exposure to governmental and not-for-profit accounting issues.

ACTG 631. Financial Statement Analysis and Valuation. 4 Credits.

Examines the role of accounting information in financial decisions. Highlights valuation's relationship to accounting earnings and book value.

ACTG 642. Advanced Assurance Services. 4 Credits.

Knowledge and application of generally accepted accounting principles and generally accepted auditing standards systems, design and flow charting, work paper preparation and review, oral and written presentation, and application of judgment.

Requisites: Prereq: ACTG 540.

ACTG 662. Strategic Cost Management. 4 Credits.

Theory and application of management accounting techniques to decisions made under uncertainty in complex business environments.

ACTG 681. Accounting Data and Analytics II. 4 Credits.

Leveraging skills and knowledge developed in ACTG 580, this course focuses on enabling students to successfully engage with an iterative process to more effectively perform and communicate analytics across increasingly complex scenarios, producing actionable results that consider risks related to data quality, privacy and misinterpretation.

Requisites: Prereq: ACTG 580.

ACTG 682. Accounting Data and Analytics III. 4 Credits.

Leveraging prior coursework, accounting students are challenged to initiate and complete end-to-end data analytics projects, with more reliance on self-directed problem solving, incorporating aspects of visual perception and principles of design to tell stories with data that influence business leaders through actionable insights. Sequence with ACTG 580, ACTG 681.

Requisites: Prereq: ACTG 580, ACTG 681.

ACTG 691. Developing the Accounting Professional I. 1 Credit.

Developing the Accounting Professional I is the first course in a two course series. This course equips students with essential communication and leadership skills and is intended to be "applied" and/or "hands on."

The course fosters change agility, effective business communication, and a growth mindset for continuous learning in dynamic professional environments. Class discussion will focus on real problems and potential approaches used by accounting professionals. Sequence with ACTG 692.

ACTG 692. Developing the Accounting Professional II. 1 Credit.

Developing the Accounting Professional II is the second course in a two course series. This class equips students with essential career advancement skills and fosters change agility, effective business communication, and a growth mindset for continuous learning in dynamic professional environments. This class is intended to be "applied" and/or "hands on." Class discussion will focus on real problems and potential approaches used by accounting professionals. Sequence with ACTG 691.

Requisites: Prereq: ACTG 691.

African Studies (AFR)

Courses

AFR 196. Field Studies: [Topic]. 1-5 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

AFR 198. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

AFR 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

AFR 215. Introduction to African Studies. 4 Credits.

Introduction to the interdisciplinary field of African studies. Evaluates the social, cultural, political, economic and environmental diversity of and issues affecting historical and contemporary Africa and African peoples.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

AFR 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

AFR 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated.

Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

AFR 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

AFR 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

AFR 405. Reading and Conference: [Topic]. 1-12 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

AFR 406. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

AFR 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

AFR 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

AFR 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

AFR 410. Experimental Course. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

AFR 503. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

AFR 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

AFR 508. Workshop: [Topic]. 1-12 Credits.

Repeatable 99 times

AFR 510. Experimental Course. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

AFR 601. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated.

Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

AFR 603. Dissertation. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

AFR 604. Internship: [Topic]. 1-4 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 1 time for a maximum of 8 credits

AFR 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

AFR 606. Field Studies: [Topic]. 1-4 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 1 time for a maximum of 8 credits

AFR 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

American Sign Language (ASL)

Courses

ASL 101. First-Year American Sign Language. 5 Credits.

Study of basic grammatical structure and vocabulary of American Sign Language, expressive and receptive finger-spelling, and introduction to American deaf culture.

Requisites: Prereq: one from WR 122Z, WR 123, HC 221H, HC 231H.

ASL 102. First-Year American Sign Language. 5 Credits.

Increased receptive and expressive communication skills in ASL, and study of cultural values and behavioral rules of the deaf community.

Requisites: Prereq: ASL 101.

ASL 103. First-Year American Sign Language. 5 Credits.

Concentration on understanding and acquiring advanced conversational proficiency. Emphasis on ASL classifiers. Continued study of deaf culture as a linguistic minority.

Requisites: Prereq: ASL 102.

ASL 201. Second-Year American Sign Language. 4 Credits.

Applied conversational use of ASL through literature, narratives, poetry, and plays. Explores various underlying metaphors found in ASL literature.

Requisites: Prereq: ASL 103.

Additional Information:

Arts Letters Area

ASL 202. Second-Year American Sign Language. 4 Credits.

Emphasis on more abstract and challenging conversational and narrative ranges. Lab and readings cover historical aspects of deaf community and culture.

Requisites: Prereq: ASL 201.

Additional Information:

Arts Letters Area

ASL 203. Second-Year American Sign Language. 4 Credits.

Further emphasis on more abstract and challenging conversational and narrative ranges. Explores broader political and social activities of international deaf community.

Requisites: Prereq: ASL 202.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

ASL 301. American Deaf Culture. 4 Credits.

Study of the relationship between small groups and dominant culture in the United States. Explore issues of language, culture, self-representation, identity, and social structure.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ASL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Anthropology (ANTH)

Courses

ANTH 110. Introduction to Traditional Ecological Knowledge. 4 Credits.

Traditional ecological knowledge (TEK) includes moral precepts that guide interaction with the local ecosystem, skill and knowledge sets used for resource extraction and management, and expressive media used for knowledge transmission. This course integrates Indigenous and Western perspectives to examine TEK in global perspective.

Additional Information:

Science Area

Cultural Literacy: Global Perspectives

ANTH 114. Anthropology of Pirates and Piracy. 4 Credits.

Examines the political and economic origins and legacies of piracy through 500 years of history in the Americas, Europe, and Africa.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

ANTH 119. Anthropology and Aliens. 4 Credits.

Examines how anthropology and speculative fiction have mutually constituted each other historically as each explores culture and society, and what makes us human.

Additional Information:

Social Science Area

ANTH 145. Principles of Archaeology. 4 Credits.

Introduction to archaeology methods and interpretation.

Additional Information:

Science Area

ANTH 150. World Archaeology. 4 Credits.

Introduction to prehistoric societies and cultural change through the examination of archaeological case studies from around the world. Taught once or more per academic year.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

ANTH 161. Introduction to Cultural Anthropology. 4 Credits.

A first look into the work of cultural anthropology and an introduction to the cultural diversity of the world.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

ANTH 163. Origins of Storytelling. 4 Credits.

Application of evolutionary thinking to the origins and function of literature.

Additional Information:

Science Area

Cultural Literacy: Global Perspectives

ANTH 165. Sexuality and Culture. 4 Credits.

Examines sexuality through the historical, cultural, economic, and political factors that contribute to the construction of sexual identities, relationships, and institutions.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 170. Introduction to Human Origins. 4 Credits.

Homo sapiens as a living organism; biological evolution and genetics; fossil hominids.

Additional Information:

Science Area

ANTH 171. Introduction to Monkeys and Apes. 4 Credits.

Evolutionary biology of the primates: the fossil record and ecology in the age of mammals, primate anatomy, locomotor feeding adaptations, taxonomic relations, primate ethology, primate conservation

Additional Information:

Science Area

ANTH 173. Evolution of Human Sexuality. 4 Credits.

Includes basic genetics, physiology, and behavior. Evolution of sex, of the sexes, and of the role of sex in mammal, primate, and human behavior.

Additional Information:

Science Area
Cultural Literacy: Global Perspectives

ANTH 175. Evolutionary Medicine. 4 Credits.

Focuses on the application of evolutionary thinking to the study of human health and disease.

Additional Information:

Science Area

ANTH 176. Introduction to Forensic Anthropology. 4 Credits.

Introduction to human skeletal analysis and its application in a legal context, using biological and anthropological approaches to the recovery and identification of human remains.

Additional Information:

Science Area

ANTH 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times**ANTH 198. Laboratory Projects: [Topic]. 1-12 Credits.**

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times**ANTH 199. Special Studies: [Topic]. 1-5 Credits.**

Experimental course - topic varies.

Repeatable 99 times**ANTH 199L. Special Studies: [Topic]. 4 Credits.**

Experimental course - topic varies.

Repeatable 99 times**ANTH 209. Business Anthropology. 4 Credits.**

This course provides a comprehensive overview of business anthropology on a range of topics including entrepreneurship, finance capital, multinational corporations, and race/gender in business. Readings and discussions will focus on how to apply anthropological knowledge to solve real-world business problems.

Requisites: Prereq: ANTH 161.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 220. Introduction to Nutritional Anthropology. 4 Credits.

Human nutrition from a biocultural anthropological perspective, including the relationship of food consumption patterns to evolution, contemporary issues relating to malnutrition, and diseases of nutrition.

Additional Information:

Science Area
Cultural Literacy: Global Perspectives

ANTH 243. Island Archaeology. 4 Credits.

Provides an in-depth understanding about the prehistory of various island regions in a comparative perspective as seen in the material culture and how islands help archaeologists decipher patterns of changing human behavior over time, including migration processes, settlement patterns, environmental interactions, and exchange systems.

Additional Information:

Science Area

ANTH 255. Atlantis, Aliens, and Archaeology. 4 Credits.

Critically examines pseudoscientific examples of archaeology using case studies from around the world (e.g. the lost city of Atlantis, ancient aliens) and explores how proper scientific archaeological research is conducted.

Additional Information:

Science Area

ANTH 260. Domestic Animals. 4 Credits.

Explores human relationships with domestic animals, examining the domestication process and the effects of animal domestication on human society.

Additional Information:

Science Area

ANTH 270. Introduction to Biological Anthropology. 4 Credits.

Examines the biological aspects of the human species from comparative, ecological, and evolutionary perspectives. Explores theoretical and methodological issues in biological anthropology.

Additional Information:

Science Area

ANTH 274. Animals and People. 4 Credits.

Explores contemporary and historical examples of human-animal interactions around the globe from a cross-cultural perspective. We analyze the influences of culture and biology on these interactions, explore perspectives, and engage in hypothesis testing.

Additional Information:

Science Area
Cultural Literacy: Global Perspectives

ANTH 278. Science, Race, and Society. 4 Credits.

Understanding past scientific attitudes on racial variation helps place modern concepts of human diversity and racial segregation in a broader anthropological and scientific context.

Additional Information:

Science Area
Cultural Literacy: US: Difference, Inequality, Agency

ANTH 311. Anthropology of Globalization. 4 Credits.

Introduces students to a wide range of issues related to economic, cultural, and ideological aspects of globalization.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 315. Gender, Folklore, Inequality. 4 Credits.

Cross-cultural exploration of the expressive and artistic realm of women's lives. Topics include life-cycle rituals, religion, healing, verbal arts, crafts, and music.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 320. Native North Americans. 4 Credits.

Interpretive approach to accomplishments, diversity, and survival of precontact, postcontact, and present-day American Indian peoples. Impact of Euro-American stereotypes on politics and identity.

Requisites: Prereq: ANTH 161.

Additional Information:

Social Science Area
Cultural Literacy: US: Difference, Inequality, Agency

ANTH 322. Anthropology of the United States. 4 Credits.

In addition to accounting for the rise of the United States as an object of anthropological inquiry, this course explores the culture and political-economy of life in the contemporary United States, with a focus on gender, race, class, faith, migration, and inequality.

Requisites: Prereq: ANTH 161.

Additional Information:

Social Science Area
Cultural Literacy: US: Difference, Inequality, Agency

ANTH 329. Immigration and Farmworkers. 4 Credits.

Mexican farmworkers in the United States, their history and living and working conditions explored within the political culture of immigration. Introductory social science course recommended.

Additional Information:

Social Science Area
Cultural Literacy: US: Difference, Inequality, Agency

ANTH 330. Hunters and Gatherers. 4 Credits.

Survey of contemporary hunter-gatherer societies. Foraging, decision-making, exchange, prestige, marriage, gender roles, parenting, history, and demography in an ecological and evolutionary perspective.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 331. Cultures of India and South Asia. 4 Credits.

Survey of contemporary South Asia's religious and cultural diversity, issues of ethnic identity, gender construction, social conflict, and politics of poverty.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 332. Human Attraction and Mating Strategies. 4 Credits.

Evolutionary theory, experimental and real-world data illuminate what we find attractive in others, variation in who we are attracted to, and why.

Additional Information:

Science Area

ANTH 340. Fundamentals of Archaeology. 4 Credits.

Methods modern archaeology uses to reconstruct the past, including background research, field methods, laboratory analyses, and interpreting data.

Requisites: Prereq: ANTH 145 or ANTH 150.

Additional Information:

Science Area

ANTH 341. Food Origins. 4 Credits.

Biological, ecological, and social dimensions of plant-animal domestication and the environmental impact of agriculture in the Late Pleistocene-Holocene epochs.

Additional Information:

Science Area

ANTH 342. Archaeology of Egypt and Near East. 4 Credits.

The archaeology of ancient Egypt and the Near East.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 343. Pacific Islands Archaeology. 4 Credits.

Archaeology and prehistoric cultural development of Pacific island peoples from earliest settlement through early Western contact. Emphasizes Southeast Asian cultural foundations and ecological adaptations.

Requisites: Prereq: ANTH 145 or ANTH 150.

Additional Information:

Social Science Area

ANTH 344. Oregon Archaeology. 4 Credits.

Native American cultural history of Oregon based on archaeological evidence. Environmental and ecological factors that condition human adaptations and contemporary cultural resource protection.

Additional Information:

Social Science Area
Cultural Literacy: US: Difference, Inequality, Agency

ANTH 345. Archaeology of East Asia. 4 Credits.

Explores the evolution of diverse cultures and ethnic identities in East Asia during prehistoric and early historical times.

Additional Information:

Social Science Area

ANTH 346. Archaeology of Southeast Asia. 4 Credits.

Explores the evolution of the diverse cultures of Southeast Asia during the prehistoric and early historic periods.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

ANTH 349. Origins of Art. 4 Credits.

Examines prehistoric and recent hunter-gatherer art to understand the role that art behavior played in ancestral human life.

Additional Information:

Science Area
Cultural Literacy: Global Perspectives

ANTH 351. Decolonizing Archaeology. 4 Credits.

This course examines the development of decolonizing practices within the field of archaeology, otherwise known as Indigenous archaeology, collaborative archaeology, community-engaged archaeology, and community-based participatory research. The course will provide a global perspective of Indigenous archaeology case studies and outline similarities and differences in practice in Indigenous archaeology(ies).

Requisites: Prereq: ANTH 145 or ANTH 150.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ANTH 361. Human Evolution. 4 Credits.

Fossil evidence of human evolution; Homo sapiens' place among the primates; variability of populations of fossil hominids.

Requisites: Prereq: ANTH 170 or ANTH 270.

Additional Information:

Science Area

ANTH 362. Human Biological Variation. 4 Credits.

Genetic and biological structure of human populations; population dynamics and causes of diversity; analysis of genetically differentiated human populations and their geographic distribution.

Additional Information:

Science Area

Cultural Literacy: Global Perspectives

ANTH 365. Food and Culture. 4 Credits.

Anthropological approach to the role of nutrients in human development (individual and group); cultural determinants and differences among populations; world food policy; applied nutritional anthropology.

ANTH 366. Human Osteology Laboratory. 4 Credits.

Introduction to the human skeleton from the perspective of biological anthropology. This course uses anatomical, developmental, and evolutionary approaches to understand fundamental aspects of human biology in general, as well as the individuals represented by skeletal remains.

Requisites: Prereq: one from ANTH 170, ANTH 176, ANTH 270, HPHY 321.

ANTH 369. Human Growth and Development. 4 Credits.

Examines key issues in human and nonhuman primate growth and development; addresses genetic, social and ecological determinants of variation in growth.

Additional Information:

Science Area

ANTH 373. Psychoactive Substances in Ancient Societies. 4 Credits.

Global review of psychoactive substances in past human societies, including the paraphernalia, iconography, and residues of drugs found in the archaeological record.

Requisites: Prereq: ANTH 145 or ANTH 150.

Additional Information:

Social Science Area

ANTH 376. Decoding Your Genome. 4 Credits.

Explores what genomic data can tell us about human variation and evolution, and discusses how genomics is currently used in our daily lives.

Requisites: Prereq: one from ANTH 175, ANTH 270, BI 221Z, BI 282H.

Additional Information:

Science Area

ANTH 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times**ANTH 399L. Special Studies: [Topic]. 4 Credits.**

Experimental course - topic varies.

Repeatable 99 times**ANTH 401. Research: [Topic]. 1-21 Credits.**

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times**ANTH 403. Thesis. 1-12 Credits.**

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times**ANTH 405. Special Problems: [Topic]. 1-12 Credits.**

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times**ANTH 406. Field Studies: [Topic]. 1-12 Credits.**

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times**ANTH 407. Seminar: [Topic]. 1-5 Credits.**

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times**ANTH 408. Workshop: [Topic]. 1-21 Credits.**

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times**ANTH 409. Terminal Project. 1-12 Credits.**

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times**ANTH 410. Experimental Course: [Topic]. 1-5 Credits.**

Experimental course - topic varies.

Repeatable 99 times**ANTH 417. Field Methods in Cultural Anthropology. 4 Credits.**

Techniques of participant observation, community definition and extension, nondirective interviewing, and establishing rapport. Provides theoretical perspectives and emphasizes investigator's ethical responsibilities.

Requisites: Prereq: 8 credits of upper-division cultural anthropology.

ANTH 420. Culture, Illness, and Healing. 4 Credits.

Cultural foundations of illness and healing. Attempts to analyze illness experiences, looks at therapies cross-culturally, and examines the nature of healing.

Requisites: Prereq: ANTH 161.

Additional Information:

Cultural Literacy: Global Perspectives

ANTH 425. Migrant, Citizen, Refugee. 4 Credits.

This course introduces students to the anthropological study of migration. Students will study both early and contemporary intellectual trends in the study of migration, including “globalization,” “transnationalism,” “diaspora,” “borderlands,” “transmigration,” and “imagined community,” through relevant ethnographic case studies from the U.S., with global comparisons.

Requisites: Prereq: ANTH 161.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ANTH 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with JCOM 427M. Sequence with ANTH 428M. Offered alternate years.

Equivalent to: JCOM 427M

ANTH 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with JCOM 428M. Sequence with ANTH 427M. Offered alternate years.

Requisites: Prereq: ANTH 427M or JCOM 427M.

Equivalent to: JCOM 428M

ANTH 434. Indigenous Peoples of South America. 4 Credits.

Contact period and contemporary ethnography of native peoples; ecological adaptation, socioeconomic organization, and culture change.

Requisites: Prereq: ANTH 161 or ANTH 330.

Additional Information:

Cultural Literacy: Global Perspectives

ANTH 438. Race and Gender in Latin America. 4 Credits.

Examines intersecting systems of race, gender, ethnicity, and nationalism through 600 years of Latin American history, focusing on five countries in three regions.

ANTH 441. Recent Cultural Theory. 4 Credits.

Survey of various cultural frameworks: Durkheimian, Marxian, feminist, transnationalism, Orientalism.

Requisites: Prereq: 8 credits in social science.

ANTH 442. Northwest Coast Archaeology. 4 Credits.

This course examines the more than 12,000-year-old archaeological record of the Northwest Coast of North America. We begin by establishing the ecological and ethnographic background for the region and then study how these have shaped archaeologists' ideas about the past. Next, we study the contents of sites and consider the relationship between data, interpretation, and theory. Throughout the term, we discuss the dynamics of contact and colonialism.

Requisites: Prereq: ANTH 145 or ANTH 150.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ANTH 448. Gender and Archaeology. 4 Credits.

Discussion of gender as a focus of archaeological theory, method, and interpretation. Examination of case studies from around the world.

Requisites: Prereq: ANTH 145 or ANTH 150.

Additional Information:

Cultural Literacy: Global Perspectives

ANTH 449. Cultural Resource Management. 4 Credits.

Objectives, legal background, operational problems, ethical and scholarly considerations in the management of prehistoric and historic cultural resources.

Requisites: Prereq: ANTH 145 or ANTH 150.

ANTH 453. African Archaeology. 4 Credits.

The archaeology of humans in Africa with an emphasis on the past 15,000 years.

ANTH 456. Peopling of the Americas. 4 Credits.

Reviews anthropological methods of the Americas including biological, genetic, archaeological, and paleoenvironmental evidence.

Requisites: Prereq: ANTH 145 or ANTH 150.

ANTH 459. Advanced Evolutionary Medicine. 4 Credits.

Explores current research in the field of evolutionary medicine.

Requisites: Prereq: one from ANTH 175, ANTH 270, ANTH 468, BI 380; ANTH 175 strongly suggested.

ANTH 462. Primate Evolution. 4 Credits.

The fossil record and theoretical implications of the Cenozoic primates with special reference to their various adaptations: locomotion, special senses, dentition.

Requisites: Prereq: ANTH 270.

ANTH 463. Primate Behavior. 4 Credits.

Ecology and ethology of free-ranging primates. Classification, distribution, and ecological relationships of living primates; social structure and social organizations.

Requisites: Prereq: ANTH 171 or ANTH 270.

ANTH 467. Paleoeecology and Human Evolution. 4 Credits.

Relationship between ecology and comparative morphology as a basis for theories of hominid phylogeny; analysis of methods of paleoecological inference; current theories of hominid origins.

Requisites: Prereq: ANTH 270.

ANTH 470. Statistical Analysis of Biological Anthropology. 4 Credits.

The important methods in biometry (biological statistics) and their inherent assumptions, limitations, interpretations, and common uses (and misuses) as relevant to biological anthropology.

Requisites: Prereq: STAT 243Z or MATH 425.

ANTH 471. Zooarchaeology: [Topic]. 4 Credits.

Analysis and interpretation of bone and shell animal remains from archaeological sites.

Requisites: Prereq: ANTH 145 or ANTH 150.

Repeatable 1 time for a maximum of 8 credits when topic changes

ANTH 472. Primate Conservation Biology. 4 Credits.

Evaluates the conservation status of the order Primates. Explores biological-ecological issues and social-cultural influences on primate biodiversity, distribution, and abundance.

Requisites: Prereq: ANTH 171 or ANTH 270.

ANTH 473. Advanced Forensic Anthropology. 4 Credits.

Teaches theory and analysis of human remains for medico-legal professionals, including estimating biological parameters from skeletons and outdoor crime scene processing and testimony.

Requisites: Prereq: ANTH 176 with a grade of B– or better or ANTH 366 with a C– or better.

ANTH 475. Regarding Remains. 4 Credits.

This course covers the policies and regulations of human and non-human remains in biological anthropology and forensic sciences contexts. It explores the considerations important for establishing, building, maintaining and working with skeletal collections.

Requisites: Prereq: ANTH 176.

ANTH 479. Taphonomy: Bones, Bugs, and Burials. 4 Credits.

Application of taphonomic studies in the fields of paleontology, archaeology, and forensic-medicolegal anthropology.

Requisites: Prereq: one from ANTH 170, ANTH 176, ANTH 270, ANTH 366, BI 222Z.

ANTH 481. Principles of Evolutionary Psychology. 4 Credits.

Investigates how understanding of our evolutionary history is used to further understanding of the human mind.

Requisites: Prereq: ANTH 170 or ANTH 270.

ANTH 487. Bioanthropology Methods. 4 Credits.

Laboratory-based introduction to research methods in biological anthropology, with an emphasis on research among living human populations.

Requisites: Prereq: ANTH 270.

ANTH 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ANTH 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ANTH 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ANTH 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ANTH 520. Culture, Illness, and Healing. 4 Credits.

Cultural foundations of illness and healing. Attempts to analyze illness experiences, looks at therapies cross-culturally, and examines the nature of healing.

ANTH 525. Migrant, Citizen, Refugee. 4 Credits.

This course introduces students to the anthropological study of migration. Students will study both early and contemporary intellectual trends in the study of migration, including "globalization," "transnationalism," "diaspora," "borderlands," "transmigration," and "imagined community," through relevant ethnographic case studies from the U.S., with global comparisons.

ANTH 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with JCOM 527M. Sequence with ANTH 528M. Offered alternate years.

ANTH 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with JCOM 528M. Sequence with ANTH 527M. Offered alternate years.

Requisites: Prereq: ANTH 527M or JCOM 527M.

ANTH 534. Indigenous Peoples of South America. 4 Credits.

Contact period and contemporary ethnography of native peoples; ecological adaptation, socioeconomic organization, and culture change.

ANTH 538. Race and Gender in Latin America. 4 Credits.

Examines intersecting systems of race, gender, ethnicity, and nationalism through 600 years of Latin American history, focusing on five countries in three regions.

ANTH 541. Recent Cultural Theory. 4 Credits.

Survey of various cultural frameworks: Durkheimian, Marxian, feminist, transnationalism, Orientalism.

Requisites: Prereq: 8 credits in social science.

ANTH 542. Northwest Coast Archaeology. 4 Credits.

Archaeological and prehistoric cultural development of peoples indigenous to the Northwest Coast of North America, from Alaska to northern California, from earliest settlement through Western contact.

ANTH 548. Gender and Archaeology. 4 Credits.

Discussion of gender as an emerging focus of archaeological theory, method, and interpretation. Examination of case studies from around the world during prehistory.

ANTH 549. Cultural Resource Management. 4 Credits.

Objectives, legal background, operational problems, ethical and scholarly considerations in the management of prehistoric and historic cultural resources.

ANTH 553. African Archaeology. 4 Credits.

The archaeology of humans in Africa with an emphasis on the past 15,000 years.

ANTH 559. Advanced Evolutionary Medicine. 4 Credits.

Explores current research in the field of evolutionary medicine.

ANTH 562. Primate Evolution. 4 Credits.

The fossil record and theoretical implications of the Cenozoic primates with special reference to their various adaptations: locomotion, special senses, dentition.

ANTH 563. Primate Behavior. 4 Credits.

Ecology and ethology of free-ranging primates. Classification, distribution, and ecological relationships of living primates; social structure and social organizations.

ANTH 567. Paleoecology and Human Evolution. 4 Credits.

Relationship between ecology and comparative morphology as a basis for theories of hominid phylogeny; analysis of methods of paleoecological inference; current theories of hominid origins.

ANTH 570. Statistical Analysis of Biological Anthropology. 4 Credits.

The important methods in biometry (biological statistics) and their inherent assumptions, limitations, interpretations, and common uses (and misuses) as relevant to biological anthropology.

ANTH 571. Zooarchaeology: [Topic]. 4 Credits.

Analysis and interpretation of bone and shell animal remains from archaeological sites.

Repeatable 1 time for a maximum of 8 credits when topic changes

ANTH 572. Primate Conservation Biology. 4 Credits.

Evaluates the conservation status of the order Primates. Explores biological-ecological issues and social-cultural influences on primate biodiversity, distribution, and abundance.

ANTH 573. Advanced Forensic Anthropology. 4 Credits.

Teaches theory and analysis of human remains for medico-legal professionals, including estimating biological parameters from skeletons and outdoor crime scene processing and testimony.

ANTH 575. Regarding Remains. 4 Credits.

This course covers the policies and regulations of human and non-human remains in biological anthropology and forensic sciences contexts. It explores the considerations important for establishing, building, maintaining and working with skeletal collections.

ANTH 579. Taphonomy: Bones, Bugs, and Burials. 4 Credits.

Application of taphonomic studies in the fields of paleontology, archaeology, and forensic-medicolegal anthropology.

ANTH 581. Principles of Evolutionary Psychology. 4 Credits.

Investigates how understanding of our evolutionary history is used to further understanding of the human mind.

ANTH 587. Bioanthropology Methods. 4 Credits.

Laboratory-based introduction to research methods in biological anthropology, with an emphasis on research among living human populations.

ANTH 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ANTH 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ANTH 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ANTH 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ANTH 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ANTH 608. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ANTH 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ANTH 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ANTH 611. Ethnographic Research: Epistemology, Methods, Ethics. 4 Credits.

Various techniques in ethnographic research. Examines the relationships between methods, theory, and ethics.

ANTH 615. Proseminar in Anthropology. 4 Credits.

Presents the department's structure, program, and faculty; explore various research and teaching facilities in UO; introduces research, writing, and funding resources.

ANTH 680. Basic Graduate Physical Anthropology. 5 Credits.

Introduction to major subfields of physical anthropology; geochronology, primate classification, paleoprimatology, paleoanthropology, human biology and diversity, processes of evolution, and primate ethology.

ANTH 681. Archaeology and Anthropology. 5 Credits.

Use by archaeologists of concepts drawn from anthropology; modifications and additions made necessary by the nature of archaeological data.

ANTH 685. Professional Writing. 2-4 Credits.

Covers the basics of professional writing for grant proposals, journal articles, and papers presented at professional meetings. Requires short proposal, longer proposal or article, and workshop participation.

ANTH 689. Social Theory II. 5 Credits.

Social theory survey organized around keywords: colonialism-postcolonialism, meaning, materiality-materialism, local-national-global, structure-agency-history, power, and difference.

Arabic (ARB)

Courses

ARB 101. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing, and comprehension. Sequence with ARB 102, ARB 103.

ARB 102. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing, and comprehension. Sequence with ARB 101, ARB 103.

Requisites: Prereq: ARB 101.

ARB 103. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing and comprehension. Sequence with ARB 101, ARB 102.

Requisites: Prereq: ARB 102

ARB 199. Special Studies: [Topic]. 1-10 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARB 301. Language and Culture I. 4 Credits.

Provides intermediate level Arabic proficiency. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence with ARB 302, ARB 303.

Requisites: Prereq: ARB 103.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ARB 302. Language and Culture II. 4 Credits.

Provides intermediate Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence with ARB 301, ARB 303.

Requisites: Prereq: ARB 301.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARB 303. Language and Culture III. 4 Credits.

Provides intermediate Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence with ARB 301, ARB 302.

Requisites: Prereq: ARB 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

ARB 331. Reading Classical Arabic. 4 Credits.

Improves students' abilities to work with classical Arabic texts; serves as a gateway to other classical Arabic text courses.

Requisites: Prereq: ARB 202 or equivalent.

Additional Information:

Arts Letters Area

ARB 353. Arab Cinema. 4 Credits.

Introduction to Arab cinema and culture through an examination of the development of cinema in Arabic-speaking countries. Offered alternate years.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARB 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARB 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARB 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARB 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARB 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARB 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARB 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARB 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARB 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

Architecture (ARCH)

Courses

ARCH 196. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

ARCH 198. Workshop: [Topic]. 1-3 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARCH 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 201. Introduction to Architecture. 4 Credits.

Offers a structure of principles for making places for people. Examines places, design procedures, and the use of architectural principles in general.

ARCH 202. Design Skills. 3 Credits.

Introduction to basic design processes, methods, and media.

Requisites: Prereq: ARCH 201 or IARC 204; coreq: ARCH 283.

ARCH 222. Introduction to Architectural Computer Graphics. 4 Credits.

Introduces basic skills and literacy with the computer for architectural illustration, drafting, and design.

Requisites: Prereq: ARCH 202.

ARCH 283. Architectural Design I. 6 Credits.

Design studio projects and exercises introducing fundamental concepts and considerations in environmental design. Teaches knowledge and skills needed in subsequent studios and professional course work.

Sequence with ARCH 284.

Requisites: Prereq: ARCH 201 or IARC 204; coreq: ARCH 202.

ARCH 284. Architectural Design II. 6 Credits.

Design studio projects and exercises introducing fundamental concepts and considerations in environmental design. Teaches knowledge and skills needed in subsequent studios and professional course work.

Sequence with ARCH 283.

Requisites: Prereq: ARCH 202, ARCH 283; coreq: ARCH 222.

ARCH 383. Architectural Design III. 6 Credits.

Studio projects. Integration of issues of context, activity support, spatial order, construction, structure, and environmental control. Emphasis on schematic concept formation and subsequent architectural development.

Sequence with ARCH 384.

Requisites: Prereq: ARCH 284.

ARCH 384. Architectural Design IV. 6 Credits.

Studio projects. Integration of issues of context, activity support, spatial order, construction, structure, and environmental control. Emphasis on schematic concept formation and subsequent architectural development. Sequence with ARCH 383.

Requisites: Prereq: ARCH 222, ARCH 383.

ARCH 399. Special Studies: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 401. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARCH 403. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ARCH 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARCH 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ARCH 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARCH 407. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARCH 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARCH 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARCH 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 410L. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 417. Context of the Architectural Profession. 4 Credits.

Introduction to the professional practice of architecture and related careers. Examines the professional, legal, and regulatory environment; firm organization and management; marketing; contractual issues; and the construction process.

Requisites: Prereq: ARCH 484 or IARC 484 or LA 489.

ARCH 423. Media for Design Development: [Topic]. 3 Credits.

Instruction in media for design process. Techniques for problem and context analysis, generating concepts, developing form, and testing proposals. Subject emphasis varies with instructor.

Requisites: Prereq: ARCH 202.

Repeatable 99 times

ARCH 425. Building Information Modeling. 2-3 Credits.

Introduces fundamentals of building informational modeling: conceptual design, design development, and project representation to create 3D models and drawings using BIM software and modeling tools.

ARCH 430. Architectural Contexts: Place and Culture. 4 Credits.

How the design of buildings interacts with physical and cultural contexts of human traditions, landscape, settlements, cities, and suburbs.

Historical and contemporary examples.

Requisites: Prereq: ARCH 284 or architectural minor status.

ARCH 431. Community Design. 3 Credits.

Multidisciplinary examination of the history, theory, and practice in the design and development of meaningful and sustainable neighborhoods. Special focus selected by faculty. Open to all majors. Offered alternate years.

ARCH 434. Sustainable Urbanism. 3 Credits.

Seminar investigates contemporary trends and thinking about 'Sustainable Urbanism' and will evaluate these trends in light of their applicability to current design and development projects.

ARCH 435. Principles of Urban Design. 4 Credits.

Introduction to theory and practice of urban design, comparative studies of neighborhood conservation, central city regeneration, growth policies and prospects for restructuring cities, metropolitan regions.

ARCH 437. Theory of Urban Design II. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. 1700 to the present.

ARCH 438. Housing Prototypes. 3 Credits.

An examination of modern housing prototypes (1920s to the present) with an emphasis on understanding the many and varied factors involved in the production of quality housing. Open to all majors.

ARCH 439. Minimal Dwelling. 3 Credits.

Examination of the design of small dwelling units for a variety of users. Offered alternate years.

ARCH 440. Human Context of Design. 4 Credits.

Theoretical principles, case studies, and technical skills for assessing user needs, developing building programs, applying research findings to design, and evaluating performance of the built environment.

Requisites: Prereq: ARCH 284 or architectural minor status.

ARCH 447. Simulation and Visualization. 4 Credits.

Exploration of simulation tools to build skills to evaluate the performance of buildings for daylight, electric light, thermal comfort, and energy use.

Requisites: Prereq: ARCH 492.

ARCH 450. Spatial Composition. 4 Credits.

Architectural space as a means to measure existence and expand awareness. Focus on compositional principles in architecture and methods for analyzing and generating spatial organizations.

Requisites: Prereq: ARCH 284 or architectural minor status.

ARCH 458. Types and Typology. 3 Credits.

Critical introduction to theory of typology that categorizes urban and architectural forms by formal characteristics and cultural meaning. Lectures cover basic concepts, historical development, and case studies.

Requisites: Prereq: ARCH 384, ARCH 450.

ARCH 461. Structural Behavior. 4 Credits.

Develops understanding of behavior of structural elements and systems and their implications on architectural form with reference to historical and contemporary buildings. Sequence with ARCH 462.

Requisites: Prereq: PHYS 201, ARCH 470.

ARCH 462. Structural Design. 4 Credits.

Historical development of materials. Analyzes elements, connections, and systems of wood, steel, and concrete structures from the perspective of construction process, spatial and structural design. Sequence with ARCH 461.

Requisites: Prereq: ARCH 461.

ARCH 470. Building Construction. 4 Credits.

Provide an understanding of the basic materials and methods of architecture with emphasis on the design, construction and performance of primary structure.

Requisites: Prereq: ARCH 284 or architecture minor status.

ARCH 471. Building Enclosure. 4 Credits.

Selection, design, detailing, and performance evaluation of building envelopes: wood, metals, glass, concrete, and masonry veneers and roofing.

Requisites: Prereq: ARCH 462, ARCH 470, ARCH 491.

ARCH 472. Natural Building Systems and Materials: [Topic]. 4 Credits.

Investigations of inorganic and organic natural building materials, benefits, challenges, embodied energy and carbon, latest technological and process innovations, potential use in mainstream construction.

Requisites: Prereq: ARCH 470.

ARCH 473. Advanced Mass Timber Design. 4 Credits.

In-depth examination of mass timber buildings, advanced wood products, timber industry, production, integrated design process involving Architectural Engineering and Design industries, structural systems, and case studies.

ARCH 474. Design the Unseen: [Topic]. 4 Credits.

Advanced topics in the design of the unseen element in the built environment that impact the health of occupants, communities, and the planet.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARCH 476. Residential Construction. 4 Credits.

Provides an understanding of basic materials and methods of North American residential construction with emphasis on design and construction of the wood light frame. Offered alternate years.

Requisites: Prereq: ARCH 484.

ARCH 480. Supervised Design Teaching. 1-3 Credits.

Supervised assistance with desk critiques and tasks related to studio teaching. Written application required.

Requisites: Prereq: ARCH 384.

Repeatable 2 times for a maximum of 3 credits

ARCH 484. Architectural Design. 6 Credits.

Design projects requiring comprehensive and integrative study over a wide range of project options. Individual criticism, group discussions, lectures and seminars by visiting specialists, public review of projects.

Requisites: Prereq: ARCH 384.

Repeatable 99 times

ARCH 485. Advanced Architectural Design I. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios. Sequence.

Requisites: Prereq: 24 credits in ARCH 484.

ARCH 486. Advanced Architectural Design II. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios.

Requisites: Prereq: ARCH 485.

ARCH 491. Environmental Control Systems I. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Architectural and mechanical means to manipulate thermal environment. Sequence.

Requisites: Prereq: ARCH 284 or architecture minor status.

ARCH 492. Environmental Control Systems II. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Implications of lighting, acoustics, and water and waste for architectural design.

Requisites: Prereq: ARCH 284 or architecture minor status.

ARCH 493M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ENVS 493M.

Requisites: Prereq: ARCH 491.

Equivalent to: ENVS 493M

ARCH 495. Daylighting. 3 Credits.

"Daylighting"—increasing the energy efficiency of a building by maximizing the amount of daylight versus electric light—as an element in architectural design. Models and photography used to study behavior of light. Case studies and prediction techniques.

Requisites: Prereq: ARCH 492.

ARCH 496. Passive House Design and Details. 4 Credits.

In-depth examination climate-specific passive house standard designing principles, building envelope detailing, mechanical systems, net zero design, dynamic modeling, and consultant certification.

Requisites: Prereq: ARCH 470, ARCH 491.

ARCH 498. High Performance Buildings Design: [Topic]. 4 Credits.

Integrated building design and simulation advanced architectural technology course covers the theory and history of high-performance buildings with topical applications of design strategies.

Requisites: Prereq: ARCH 384.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARCH 503. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ARCH 507. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARCH 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARCH 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 510L. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 517. Context of the Architectural Profession. 4 Credits.

Introduction to the professional practice of architecture and related careers. Examines the professional, legal, and regulatory environment; firm organization and management; marketing; contractual issues; and the construction process.

ARCH 523. Media for Design Development: [Topic]. 3 Credits.

Instruction in media for design process. Techniques for problem and context analysis, generating concepts, developing form, and testing proposals. Subject emphasis varies with instructor.

Requisites: Prereq: ARCH 611.

Repeatable 99 times

ARCH 525. Building Information Modeling. 2-3 Credits.

Introduces fundamentals of building informational modeling: conceptual design, design development, and project representation to create 3D models and drawings using BIM software and modeling tools.

ARCH 530. Architectural Contexts: Place and Culture. 4 Credits.

How the design of buildings interacts with physical and cultural contexts of human traditions, landscape, settlements, cities, and suburbs. Historical and contemporary examples.

Requisites: Prereq: ARCH 680 or ARCH 683.

ARCH 531. Community Design. 3 Credits.

Multidisciplinary examination of the history, theory, and practice in the design and development of meaningful and sustainable neighborhoods. Special focus selected by faculty. Open to all majors. Offered alternate years.

ARCH 534. Sustainable Urbanism. 3 Credits.

Seminar investigates contemporary trends and thinking about 'Sustainable Urbanism' and will evaluate these trends in light of their applicability to current design and development projects.

ARCH 535. Principles of Urban Design. 4 Credits.

Introduction to theory and practice of urban design, comparative studies of neighborhood conservation, central city regeneration, growth policies and prospects for restructuring cities, metropolitan regions.

ARCH 537. Theory of Urban Design II. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. 1700 to the present.

ARCH 538. Housing Prototypes. 3 Credits.

An examination of modern housing prototypes (1920s to the present) with an emphasis on understanding the many and varied factors involved in the production of quality housing. Open to all majors.

ARCH 539. Minimal Dwelling. 3 Credits.

Examination of the design of small dwelling units for a variety of users. Offered alternate years.

ARCH 540. Human Context of Design. 4 Credits.

Theoretical principles, case studies, and technical skills for assessing user needs, developing building programs, applying research findings to design, and evaluating performance of the built environment.

Requisites: Prereq: ARCH 680 or ARCH 683.

ARCH 547. Simulation and Visualization. 4 Credits.

Exploration of simulation tools to build skills to evaluate the performance of buildings for daylight, electric light, thermal comfort, and energy use.

Requisites: Prereq: ARCH 592.

ARCH 550. Spatial Composition. 4 Credits.

Architectural space as a means to measure existence and expand awareness. Focus on compositional principles in architecture and methods for analyzing and generating spatial organizations.

Requisites: Prereq: ARCH 680.

ARCH 558. Types and Typology. 3 Credits.

Critical introduction to theory of typology that categorizes urban and architectural forms by formal characteristics and cultural meaning. Lectures cover basic concepts, historical development, and case studies.

Requisites: Prereq: ARCH 550; ARCH 682 or ARCH 683.

ARCH 561. Structural Behavior. 4 Credits.

Develops understanding of behavior of structural elements and systems and their implications on architectural form with reference to historical and contemporary buildings.

Requisites: Prereq: ARCH 570.

ARCH 562. Structural Design. 4 Credits.

Historical development of materials. Analyzes elements, connections, and systems of wood, steel, and concrete structures from the perspective of construction process, spatial and structural design. Sequence with 561.

Requisites: Prereq: ARCH 561.

ARCH 570. Building Construction. 4 Credits.

Provide an understanding of the basic materials and methods of architecture with emphasis on the design, construction and performance of primary structure.

Requisites: Prereq: ARCH 680.

ARCH 571. Building Enclosure. 4 Credits.

Selection, design, detailing, and performance evaluation of building envelopes: wood, metals, glass, concrete, and masonry veneers and roofing.

Requisites: ARCH 562, ARCH 570, ARCH 591.

ARCH 572. Natural Building Systems and Materials: [Topic]. 4 Credits.

Investigations of inorganic and organic natural building materials, benefits, challenges, embodied energy and carbon, latest technological and process innovations, potential use in mainstream construction.

Requisites: Prereq: ARCH 570.

ARCH 573. Advanced Mass Timber Design. 4 Credits.

In-depth examination of mass timber buildings, advanced wood products, timber industry, production, integrated design process involving Architectural Engineering and Design industries, structural systems, and case studies.

ARCH 574. Design the Unseen: [Topic]. 4 Credits.

Advanced topics in the design of the unseen element in the built environment that impact the health of occupants, communities, and the planet.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARCH 576. Residential Construction. 4 Credits.

Provides an understanding of basic materials and methods of North American residential construction with emphasis on design and construction of the wood light frame. Offered alternate years.

ARCH 580. Supervised Design Teaching. 1-3 Credits.

Supervised assistance with desk critiques and tasks related to studio teaching. Written application required.

Requisites: Prereq: ARCH 681 or ARCH 683.

Repeatable 2 times for a maximum of 3 credits

ARCH 584. Architectural Design. 6 Credits.

Repeatable. Design projects requiring comprehensive and integrative study over a wide range of project options. Individual criticism, group discussions, lectures and seminars by visiting specialists, public review of projects.

Requisites: Prereq: ARCH 682 or ARCH 683.

Repeatable 99 times

ARCH 585. Advanced Architectural Design I. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios. Sequence.

Requisites: Prereq: 30 credits in ARCH 584.

ARCH 586. Advanced Architectural Design II. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios.

Requisites: Prereq: ARCH 585.

ARCH 591. Environmental Control Systems I. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Architectural and mechanical means to manipulate thermal environment. Sequence.

Requisites: Prereq: ARCH 680 or ARCH 683.

ARCH 592. Environmental Control Systems II. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Implications of lighting, acoustics, and water and waste for architectural design.

Requisites: Prereq: ARCH 680 or ARCH 683.

ARCH 593M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ENVS 593M.

Requisites: Prereq: ARCH 591.

ARCH 596. Passive House Design and Details. 4 Credits.

In-depth examination climate-specific passive house standard designing principles, building envelope detailing, mechanical systems, net zero design, dynamic modeling, and consultant certification.

Requisites: Prereq: ARCH 570, ARCH 591.

ARCH 598. High Performance Buildings Design: [Topic]. 4 Credits.

Integrated building design and simulation advanced architectural technology course covers the theory and history of high-performance buildings with topical applications of design strategies.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARCH 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARCH 603. Dissertation. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ARCH 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARCH 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ARCH 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARCH 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARCH 608. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 6 times

ARCH 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARCH 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 610L. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARCH 611. Graduate Design Process. 3 Credits.

Foundation knowledge, concepts, and skills fundamental to design process and media subject areas.

ARCH 619. Terminal Project. 1-9 Credits.

Repeatable 99 times

ARCH 620. Research Methods in Sustainable Design. 2-6 Credits.

Research methods to assess the design of buildings and communities; discussions include defining research themes, hypotheses, and developing thesis proposals.

Requisites: Prereq: conditional MArch or PhD standing.

ARCH 622. Computational Design. 2 Credits.

This course will introduce computational design methods to support individual design intent through: Diagrams and 3D modeling; Analog Parametric Design and Lighting; Digital Parametric Design.

Requisites: Prereq: ARCH 611.

Repeatable 9 times for a maximum of 20 credits

ARCH 631. Global Modern Architecture. 4 Credits.

Graduate introduction to architectural history. Buildings and landscapes of the twentieth and twenty-first centuries, emphasizing interactions between Western and non-Western cultures.

ARCH 633. Fundamentals of Sustainable Design. 4 Credits.

Fundamentals of sustainable design practices; codes and standards related to building design; perspectives and implementation strategies by leading practitioners.

ARCH 661. Teaching Technical Subjects in Architecture. 1-3 Credits.

Covers techniques for effective teaching. Focuses on one or more standard building-technology courses in architecture and interior architecture.

Repeatable 3 times for a maximum of 12 credits

ARCH 680. Introductory Graduate Design I. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios. Sequence.

ARCH 681. Introductory Graduate Design II. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios. Sequence.

Requisites: Prereq: ARCH 680.

ARCH 682. Introductory Graduate Design III. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios.

Requisites: Prereq: ARCH 681.

ARCH 683. Introduction Graduate Design IV. 6 Credits.

Design to expand perception and response to issues in architectural design. Design as exploration of fundamental theoretical ideas. Studio projects require comprehensiveness and integrative study.

Repeatable 99 times

ARCH 695. Advanced Dissertation Proposal Development. 4-6 Credits.

Directed study for the development of dissertation proposals. Approval of faculty advisor required. Repeatable twice for a maximum of 18 credits based on development of proposal for dissertation.

Requisites: Prereq: PhD standing.

Repeatable 2 times for a maximum of 18 credits

Art (ART)

Courses

ART 101. Understanding Contemporary Art. 4 Credits.

Examine contemporary art concepts, approaches and themes. Understand how to interpret contemporary artwork and contextualize arts' relationship to culture, society and life today.

Additional Information:

Arts Letters Area

ART 111. The Artist Experience. 4 Credits.

Explore concepts defining contemporary art through the individual studio practice of art faculty. Artist presentations will examine their creative process, influences, professional experiences and career.

Additional Information:

Arts Letters Area

ART 115. Surface, Space, and Time. 4 Credits.

Introduces interdisciplinary media processes, critical theory, formal communication design, color theory, skills in objective evaluation and critique, and how materials, processes, and context establish meaning.

ART 116. Core Interdisciplinary Laboratory. 4 Credits.

Rigorous studio projects in the core studio sequence stressing interdisciplinary media transitions and the interrelatedness of conceptual and formal concerns.

Requisites: Prereq: ART 115.

ART 198. Technical Workshop: [Topic]. 1-3 Credits.

Possible topics include Beginning Woodworking, Book Arts, Professional Practices.

Repeatable 14 times for a maximum of 15 credits when topic changes

ART 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ART 233. Drawing I. 4 Credits.

Introduction to basic drawing concepts and practices.

Repeatable 99 times

ART 333. Drawing II. 4 Credits.

Emphasizes synthesis of ideas and approaches, complex subjects, investigation, and expression while building on previous drawing skills. Sequence with ART 233.

Requisites: Prereq: ART 116 or ARTS 288; ART 233.

ART 381. Letterpress. 4 Credits.

Experiments with lead and wooden type as related to graphic composition and communication.

Requisites: Prereq: ART 116 or ARTS 288; ART 233.

Repeatable 10 times for a maximum of 44 credits

ART 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ART 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ART 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ART 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ART 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ART 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ART 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ART 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ART 412. BFA Critique. 3 Credits.

Interdisciplinary critique and discussion course for B.F.A. students.

Prereq: B.F.A. standing.

Repeatable 1 time for a maximum of 6 credits

ART 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ART 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ART 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ART 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated.

Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ART 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ART 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ART 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ART 607. Seminar: [Topic]. 1-4 Credits.

Topics change every term. If link to syllabus is not available, contact instructor by e-mail.

Repeatable 99 times

ART 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ART 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ART 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ART 612. Graduate Critique. 3 Credits.

Repeatable. Interdisciplinary critique and discussion course for MFA students.

Repeatable 5 times for a maximum of 18 credits

ART 614. Graduate Studio. 4 Credits.

Students engage in a rigorous studio practice through independent production, experimentation, and research. Faculty mentors instruct in rotation.

Repeatable 5 times for a maximum of 24 credits

Art History (ARH)

Courses

ARH 150. Introduction to Visual Culture. 4 Credits.

This course introduces to students to a wide variety of methods for looking at and analyzing images and objects of visual culture, drawing on concepts and methods from art history, anthropology, archaeology, and media studies.

Additional Information:

Arts Letters Area

ARH 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARH 204. Ancient Mediterranean Art. 4 Credits.

This course is a survey of the art and architecture of Africans, Christians, Jews, Greeks, Persians, Romans, and others in the ancient Mediterranean world.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ARH 205. Medieval Renaissance European Art. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the medieval to early Renaissance cultures producing them.

Additional Information:

Arts Letters Area

ARH 206. History of Western Art III. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the Renaissance to modern cultures producing them.

Additional Information:

Arts Letters Area

ARH 207. History of Indian Art. 4 Credits.

Historical Survey of the visual art of India. Selected works of painting, sculpture, architecture, and other arts studied in relation to the culture in which they were created.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ARH 208. History of Chinese Art. 4 Credits.

Historical survey of the visual arts of China. Selected works of painting, sculpture, architecture, and other arts will be studied in relation to the culture in which they were produced.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ARH 209. History of Japanese Art. 4 Credits.

Historical survey of the visual arts of Japan. Selected works of painting, sculpture, architecture, and other arts studied in relation to the culture in which they were produced.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 211. Survey of Latin American Arts. 4 Credits.

Overview of the rich tradition of visual arts within Latin America from the pre-Columbian period, through the art of the Spanish viceroyalties, to the contemporary artistic landscape.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 314. History of World Architecture I. 4 Credits.

Survey of global architectural developments from prehistory to the Middle Ages.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 315. History of World Architecture II. 4 Credits.

Survey of global architectural developments from c. 1400 to the present.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 316. Gothic Architecture. 4 Credits.

A specialized survey of Gothic architecture in western Europe (c. 1140 to c. 1500). This course gives special consideration to the constructional and structural developments of the Gothic period, but will also consider architecture in relationship to social, religious, and economic practices.

Additional Information:

Arts Letters Area

ARH 317. Romanesque Architecture. 4 Credits.

Examines Romanesque architecture through the lens of pilgrimage, a major cultural force in the Middle Ages.

Additional Information:

Arts Letters Area

ARH 320. Classical Greek Art and Architecture. 4 Credits.

This course is a survey of ancient Greek art and architecture in the Classical Period, encompassing works throughout the ancient Mediterranean.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 321. Ancient Jewish Art. 4 Credits.

A survey of Jewish art and architecture throughout the ancient Mediterranean (e.g., Aegina, Beth Alpha, Corinth, Dura Europos, Jerusalem, Masada, Ostia, Rome, Sardis, Sepphoris, Qumran)

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 322. Hellenistic Art and Architecture. 4 Credits.

This course is a survey of ancient Greek art and architecture in the Hellenistic period, encompassing works throughout the ancient Mediterranean and Near East.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 323. Roman Art & Architecture. 4 Credits.

This course is a survey of the art and architecture of Republican and Imperial Rome throughout the Mediterranean and Near East. Considering the Roman world as a multicultural space, it explores works at locations such as Alexandria, Athens, Dura Europos, Jerusalem, Petra, Pompeii, and Rome.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 325. Islamic Art & Architecture. 4 Credits.

This course is a survey of visual culture from the Islamic world, beginning with its origins in the seventh century CE.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 327. Medieval Art. 4 Credits.

Introduction to the most important monuments of the Middle Ages, spanning the fourth through the 15th centuries with the primary focus on Western Europe and Byzantium.

Additional Information:

Arts Letters Area

ARH 341. Italian Renaissance Art. 4 Credits.

Painting and sculpture of the Renaissance and mannerist periods analyzed in terms of style, iconography, theory, patronage, and social context.

Additional Information:

Arts Letters Area

ARH 343. Northern Renaissance Art. 4 Credits.

Painting and graphic arts in the Netherlands, Germany, and France in the 15th and 16th centuries. Van Eyck, Durer, Holbein, other leading artists.

Additional Information:

Arts Letters Area

ARH 350. History of Manga. 4 Credits.

Survey of the history of Manga (Japanese comics) from the 19th Century to the present.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 351. 19th Century Art. 4 Credits.

Introduction to artistic movements in Europe from 1780 to the 1880s including neoclassicism, romanticism, realism, and impressionism.

Additional Information:

Arts Letters Area

ARH 352. Art of the Enlightenment. 4 Credits.

Explores European art of the 18th century. Lectures cover major movements—rococo, chinoiserie, neoclassicism, early romanticism—in the context of changing social values, the scientific revolution, secularization, and globalization.

Additional Information:

Arts Letters Area

ARH 353. Modern Art 1880 to 1950. 4 Credits.

History of modern art from the end of Impressionism to Abstract-Expressionism in relation to social, political, intellectual and cultural contexts.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

ARH 354. Contemporary Art. 4 Credits.

Survey of contemporary art in the West from 1945 to the present in relation to historical, social, cultural, and political concerns.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

ARH 358. History of Design. 4 Credits.

Survey of the history of modern design from the 18th-century to the present day. The course explores the intersection of the historical development of design with its technological, social, commercial and aesthetic dimensions.

Additional Information:

Arts Letters Area

ARH 359. History of Photography. 4 Credits.

History of photography from the early 19th-century to the present, aesthetics of the medium, its relationship to art, and its social role.

Additional Information:

Arts Letters Area

ARH 368. Arts and Visual Cultures of Climate Change. 4 Credits.

Critical exploration of climate change and its representation in contemporary art and visual culture (e.g., satellite imagery, activism, science fiction)

Additional Information:

Cultural Literacy: Global Perspectives

ARH 372. Arts of Colonial Latin America. 4 Credits.

This course examines the role of art and architecture in colonial Latin America (ca. 1492- 19th century).

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ARH 373. 20th Century Latin American Art. 4 Credits.

Examines art and architecture across 20th-century Latin America, with special emphasis on the formation and expression of ethnic, cultural, regional, and national identity through them.

Additional Information:

Cultural Literacy: Global Perspectives

ARH 382. Arts of the Silk Road. 4 Credits.

This course examines cross-cultural and artistic encounters between Asia, Africa, Europe, and the Americas by studying, diasporas and migrations, religions, urban settlements, trade, and slavery.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ARH 387. Chinese Buddhist Art. 4 Credits.

Introduction to selective aspects of the history of Buddhist art in China. Emphasis on sculpture and painting.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ARH 399. Special Studies: [Topic]. 1-5 Credits.

Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 99 times

ARH 401. Research: [Topic]. 1-8 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARH 403. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Requisites: Prereq: ARH 401; major standing.

Repeatable 99 times

ARH 404. Internship: [Topic]. 1-5 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARH 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARH 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARH 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times when topic changes

ARH 408. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARH 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARH 410. Experimental Course: [Topic]. 1-5 Credits.

Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 99 times when topic changes

ARH 411. Art History Critical Methods. 4 Credits.

Methods used to study art history (formalist, iconographical, social history of art, etc). Materials are drawn from art historical scholarship on art from a variety of regions and periods.

ARH 421. Ancient Mediterranean Art: [Topic]. 4 Credits.

This course examines art and architecture from the ancient Mediterranean world, exploring material from a particular region/period or through a particular critical/thematic lens.

Repeatable 99 times when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

ARH 425. Medieval Art and Architecture: [Topic]. 4 Credits.

An in-depth study of a discrete theme within the field of medieval art and architecture. Themes will vary from year to year and will reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 440. Museology. 4 Credits.

This course covers the history and theory of museums. Through readings, written assignments, lecture and classroom discussion we engage issues of museum ethics, the role of museums in society, and curatorial practice. The scope includes art museums as well as other types of museums.

ARH 441. Renaissance and Baroque: [Topic]. 4 Credits.

In-depth examination of art, architecture, and material culture of the Renaissance and Baroque eras as situated within their historical, social, religious, and economic contexts. Topics vary.

Repeatable 99 times when topic changes

ARH 450. Romanticism in the Visual Arts. 4 Credits.

The course offers an overview of the diverse artists and interests of the Romantic Movement in European art, while critically examining Romanticism as a period term.

ARH 451. Studies in 19th Century Art: [Topic]. 4 Credits.

Focuses on a specific area, movement, period or issue in visual art of the long 19th century (c. 1770–1914).

Repeatable 1 time for a maximum of 8 credits when topic changes

ARH 453. Modern Art: [Topic]. 4 Credits.

This course focuses on a specific movement, sub-period, geographical region, or theoretical issue in the history of global modern art and the avant-gardes roughly between 1880 to the postwar period.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 456. World Architecture Since 1960. 4 Credits.

Examines key themes, designs and structures, conversations, events, and people in architectural history, theory, and practice from around the world, from the early 1960s up to the present.

Requisites: Prereq: ARH 206 or ARH 315.

ARH 457. Contemporary Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with art since 1945. Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 459. Art Theory and Criticism: [Topic]. 4 Credits.

This is an upper-division course focusing on concepts and problems in art theory, criticism, or methods, ideally for advanced undergraduate and graduate students.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 462. Modern Architecture. 4 Credits.

Examines modern architecture from 1885 to 1965, and the discourse surrounding it. Emphasis on the meanings and manifestations of modernity as these evolved in Europe, the US, and around the world.

Requisites: Prereq: ARH 206, ARH 315.

ARH 465. American Architecture II. 4 Credits.

Major developments in American architecture, 1800–1900. Includes the rediscovery of national symbols, the impact of industry, and the national focus on the single-family residence.

Requisites: Prereq: ARH 206 or ARH 315.

ARH 466. American Architecture III. 4 Credits.

Major developments in American architecture, 1885 to the present. Emphasizes academicism, the impact of international modernism, and the rediscovery of eclectic symbolism.

Requisites: Prereq: ARH 206 or ARH 315.

ARH 471. Latin American Art History: [Topic]. 4 Credits.

Topics related to arts of Latin America from the Pre-Columbian period to the present. Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 481. Chinese Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with Chinese art. Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

ARH 485. Japanese Art: [Topic]. 4 Credits.

Explores the issues surrounding material cultures of Japan from prehistoric to contemporary periods.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

ARH 488. Japanese Prints. 4 Credits.

The woodblock print in Japan as part of the cultural, social, and political conditions.

Additional Information:

Cultural Literacy: Global Perspectives

ARH 503. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ARH 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times when topic changes

ARH 508. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARH 510. Experimental Course: [Topic]. 1-5 Credits.

Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 99 times when topic changes

ARH 511. Art History Critical Methods. 4 Credits.

Methods used to study art history (formalist, iconographical, social history of art, etc). Materials are drawn from art historical scholarship on art from a variety of regions and periods. Students cannot receive credit for both ARH 511 and ARH 611.

Equivalent to: ARH 611

ARH 521. Ancient Mediterranean Art: [Topic]. 4 Credits.

This course examines art and architecture from the ancient Mediterranean world, exploring material from a particular region/period or through a particular critical/thematic lens.

Repeatable 99 times when topic changes

ARH 525. Medieval Art and Architecture: [Topic]. 4 Credits.

An in-depth study of a discrete theme within the field of medieval art and architecture. Themes will vary from year to year and will reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 540. Museology. 4 Credits.

This course covers the history and theory of museums. Through readings, written assignments, lecture and classroom discussion we engage issues of museum ethics, the role of museums in society, and curatorial practice. The scope includes art museums as well as other types of museums.

ARH 541. Renaissance and Baroque: [Topic]. 4 Credits.

In-depth examination of art, architecture, and material culture of the Renaissance and Baroque eras as situated within their historical, social, religious, and economic contexts. Topics vary.

Repeatable 99 times when topic changes

ARH 550. Romanticism in the Visual Arts. 4 Credits.

The course offers an overview of the diverse artists and interests of the Romantic Movement in European art, while critically examining Romanticism as a period term.

ARH 551. Studies in 19th Century Art: [Topic]. 4 Credits.

Focuses on a specific area, movement, period or issue in visual art of the long 19th century (c. 1770–1914).

Repeatable 1 time for a maximum of 8 credits when topic changes

ARH 553. Modern Art: [Topic]. 4 Credits.

This courses focuses on a specific movement, sub-period, geographical region, or theoretical issue in the history of global modern art and the avant-gardes roughly between 1880 to the postwar period.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 556. World Architecture Since 1960. 4 Credits.

Examines key themes, designs and structures, conversations, events, and people in architectural history, theory, and practice from around the world, from the early 1960s up to the present.

ARH 557. Contemporary Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with art since 1945. Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 559. Art Theory and Criticism: [Topic]. 4 Credits.

This is an upper-division course focusing on concepts and problems in art theory, criticism, or methods, ideally for advanced undergraduate and graduate students.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 562. Modern Architecture. 4 Credits.

Examines modern architecture from 1885 to 1965, and the discourse surrounding it. Emphasis on the meanings and manifestations of modernity as these evolved in Europe, the US, and around the world.

ARH 565. American Architecture II. 4 Credits.

Major developments in American architecture, 1800–1900. Includes the rediscovery of national symbols, the impact of industry, and the national focus on the single-family residence.

ARH 566. American Architecture III. 4 Credits.

Major developments in American architecture, 1885 to the present. Emphasizes academicism, the impact of international modernism, and the rediscovery of eclectic symbolism.

ARH 571. Latin American Art History: [Topic]. 4 Credits.

Topics related to arts of Latin America from the Pre-Columbian period to the present. Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 581. Chinese Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with Chinese art. Offerings vary from year to year and reflect the interests of faculty members.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 585. Japanese Art: [Topic]. 4 Credits.

Explores the issues surrounding material cultures of Japan from prehistoric to contemporary periods.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARH 588. Japanese Prints. 4 Credits.

The woodblock print in Japan as part of the cultural, social, and political conditions.

ARH 601. Research: [Topic]. 1-9 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARH 603. Dissertation. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ARH 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARH 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ARH 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARH 607. Seminar: [Topic]. 1-5 Credits.

Departmental offerings vary from year to year and reflect the specialized interests of faculty members.

Repeatable 99 times when topic changes

ARH 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARH 609. Capstone. 1-12 Credits.

A culminating academic project that demonstrates a student's mastery of their field of study.

Repeatable 99 times

ARH 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

ARH 611. Graduate Studies in Art History. 4 Credits.

Introduction to bibliographic resources research methodology, and critical issues in art history.

Requisites: Prereq: major standing.

Equivalent to: ARH 511

ARH 612. Art and Architectural History: [Topic]. 4 Credits.

This graduate seminar explores cutting-edge theoretical and/or methodological approaches in art and architectural history.

Repeatable 5 times for a maximum of 24 credits when topic changes

ARH 614. Terminal Project. 1-12 Credits.

Student-directed research and writing intended to culminate in the production of a master's level project under the supervision of a faculty member.

Repeatable 99 times

Art: Art & Technology (ARTD)

Courses

ARTD 198. Technical Workshop: [Topic]. 1-3 Credits.

Possible topics include DreamWeaver, InDesign, PhotoShop.

Repeatable 14 times for a maximum of 15 credits when topic changes

ARTD 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTD 250. Print Media Digital Arts. 4 Credits.

Examines application of print media in contemporary visual culture; explores its use in a fine art context. Introduces digital drawing, digital photo editing, and typographic layout to visually communicate expressive concepts. Laboratories, lectures.

Repeatable 1 time for a maximum of 8 credits

ARTD 251. Time-Based Digital Arts. 4 Credits.

Explores the notion of time as a medium in relation to contemporary art through which concepts of sequence, narration, scoring, and motion are expressed. Laboratories, lectures.

Repeatable 1 time for a maximum of 8 credits

ARTD 252. Interactive Digital Arts. 4 Credits.

Introduces resources that the computer offers the artist. Concentrates on animation, interaction, and the web as expressive mediums. Laboratories, lectures.

Repeatable 1 time for a maximum of 8 credits

ARTD 256. Introduction to Production. 4 Credits.

Traditional camera, sound, and lighting techniques in production; nonlinear editing; and key theoretical, historical, and aesthetic approaches to video art.

Requisites: Prereq: JCOM 201; ENG 260M or CINE 260M; two from CINE 265, CINE 266, CINE 267.

ARTD 350. Digital Drawing. 4 Credits.

Applies technology as a drawing medium to communicate concepts visually. The entire creative process is researched in an experimental studio environment.

Requisites: Prereq: ART 116 or ARTS 288; ART 233; ARTD 250.

ARTD 360. Digital Imaging. 4 Credits.

Intermediate-level focus on the proper preparation and presentation of digital images for use in print and on screen. Covers color theory.

Requisites: Prereq: ART 116 or ARTS 288; ART 233; ARTD 250.

ARTD 361. Introduction to Animation. 4 Credits.

Introduction to principles of animation, timing, sequence; key frames, in-betweens, and metamorphosis. Uses various methods to record and edit animation tests.

Requisites: Prereq: ART 116 or ARTS 288; ART 233; ARTD 251.

ARTD 362. Digital Letterform. 4 Credits.

Concepts in the history, use, and appreciation of digital typography.

Considers issues in communicative power of type and situations where it functions as message.

Requisites: Prereq: ARTD 350.

ARTD 370. Digital Interactivity. 4 Credits.

Students will learn programming to interactive artworks. This class will include how to program microcontrollers and use electronics to create responsive and expressive interactive systems.

Requisites: Prereq: ART 116 or ARTS 288; ART 233; ARTD 252.

Repeatable 1 time for a maximum of 8 credits

ARTD 378. Computational Aesthetics. 5 Credits.

Introduces screen-based programming and data navigation; use of motion, duration, and time-based interaction as a means of artistic expression. Students build navigational structures and explore stochastic principles in developing an individual approach to interactivity.

Requisites: Prereq: ART 116 or ARTS 288; ART 233; ARTD 252.

Repeatable 1 time for a maximum of 10 credits

ARTD 379. Introduction to Video Art. 4 Credits.

Intermediate video-audio production and nonlinear editing, including camera, sound, and lighting techniques. Key theoretical, historical, and aesthetic approaches to time-based art in video and sound are surveyed.

Requisites: Prereq: ART 116 or ARTS 288; ART 233; ARTD 251.

ARTD 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTD 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTD 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ARTD 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTD 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTD 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTD 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTD 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTD 412. Experimental Animation. 5 Credits.

Intermediate to advanced students explore personal creative practice and experiment with film, video, and computer animation techniques. Integrates readings, screening, and discussion with production.

Requisites: Prereq: ARTD 361.

ARTD 413. Emerging Technologies. 5 Credits.

Explores use of emerging technologies in art. Create works using emerging technologies and techniques and explore contemporary artworks, philosophies, and cultural trends.

Requisites: Prereq: ARTD 370, ARTD 378 or ARTD 416.

ARTD 415. Video Art: Experimental Film. 4 Credits.

Video and sound art practices, from conceptual deconstructions of the film-video apparatus to self-reflexive socio-political and/or cultural critique, are examined through short format and video installation.

Repeatable 1 time for a maximum of 8 credits

ARTD 463. Communication Design. 4 Credits.

Explores the communication of ideas and information through visual means. Introduces design process and principles, visual language, and the art of problem solving in visual communication.

Requisites: Prereq: ARTD 350.

Repeatable 1 time for a maximum of 8 credits

ARTD 471. 3-D Computer Imaging. 5 Credits.

Introduces 3-D computer graphic arts: 3-D digital space and form, model building, scene composition, surface properties, lighting, and rendering 3-D images.

Requisites: Prereq: ARTD 350 or ARTD 361.

Repeatable 1 time for a maximum of 10 credits

ARTD 472. 3-D Computer Animation. 5 Credits.

Introduces 3-D computer animation arts. Includes time and space in the digital 3-D environment, animation concepts and techniques in 3-D space, production techniques for various multimedia applications.

Requisites: Prereq: ARTD 471.

Repeatable 1 time for a maximum of 10 credits

ARTD 490. Issues and Practices in Digital Arts. 1-5 Credits.

Intensive critique, discussion, readings, and presentations.

Requisites: Prereq: B.F.A. standing.

Repeatable 9 times for a maximum of 50 credits

ARTD 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTD 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTD 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTD 512. Experimental Animation. 5 Credits.

Intermediate to advanced students explore personal creative practice and experiment with film, video, and computer animation techniques. Integrates readings, screening, and discussion with production.

ARTD 513. Emerging Technologies. 5 Credits.

Explores use of emerging technologies in art. Create works using emerging technologies and techniques and explore contemporary artworks, philosophies, and cultural trends.

Requisites: Prereq: ARTD 516.

ARTD 515. Video Art: Experimental Film. 4 Credits.

Video and sound art practices, from conceptual deconstructions of the film-video apparatus to self-reflexive socio-political and/or cultural critique, are examined through short format and video installation.

Repeatable 1 time for a maximum of 8 credits

ARTD 563. Communication Design. 4 Credits.

Explores the communication of ideas and information through visual means. Introduces design process and principles, visual language, and the art of problem solving in visual communication.

Repeatable 1 time for a maximum of 8 credits

ARTD 571. 3-D Computer Imaging. 5 Credits.

Introduces 3-D computer graphic arts: 3-D digital space and form, model building, scene composition, surface properties, lighting, and rendering 3-D images.

Repeatable 1 time for a maximum of 10 credits

ARTD 572. 3-D Computer Animation. 5 Credits.

Introduces 3-D computer animation arts. Includes time and space in the digital 3-D environment, animation concepts and techniques in 3-D space, production techniques for various multimedia applications.

Requisites: Prereq: ARTD 571.

Repeatable 1 time for a maximum of 10 credits

ARTD 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTD 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTD 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTD 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTD 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTD 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTD 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTD 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Art: Ceramics (ARTC)

Courses

ARTC 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTC 255. Introduction to Ceramics. 4 Credits.

Specific skills focus each term. Subjects includes processes related to design development, forming and fabrication, firing methods, glazing.

Requisites: Prereq: ART 116 or ARTS 288; ART 233 or PD 223.

ARTC 354. Industrial Ceramics. 4 Credits.

Intermediate-level course focusing on skill development pertinent to ceramics industry. Emphasis on material, tools, techniques, and history.

Requisites: Prereq: ART 115; ART 116 or ARTS 288; ART 233 or PD 223.

Repeatable 3 times for a maximum of 16 credits

ARTC 355. Intermediate Ceramics: [Topic]. 4-5 Credits.

Advanced processes and concepts. Areas of technical focus include slip casting, glaze and decorator surface embellishment, architectural ceramic, low fire, and raku.

Requisites: Prereq: ARTC 255.

Repeatable 2 times for a maximum of 12 credits

ARTC 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTC 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTC 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ARTC 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTC 407. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTC 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTC 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTC 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTC 455. Advanced Ceramics. 4 Credits.

Students will be exposed to a range of ceramic histories, technical processes, conceptual frameworks, and professional practices to develop an artistic practice.

Requisites: Prereq: ARTC 355.

Repeatable 10 times for a maximum of 44 credits

ARTC 507. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTC 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTC 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTC 555. Advanced Ceramics. 4 Credits.

Students will be exposed to a range of ceramic histories, technical processes, conceptual frameworks, and professional practices to develop an artistic practice.

Repeatable 10 times for a maximum of 44 credits

ARTC 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTC 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTC 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTC 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTC 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTC 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTC 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTC 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Art: Fibers (ARTF)

Courses

ARTF 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTF 270. Introduction to Fibers: [Topic]. 4 Credits.

Skills and conceptual concerns of fibers, pertaining to structural textile forms and embellished or manipulated surfaces. Introduces historical and contemporary work through slides and lectures.

Requisites: Prereq: ART 116 or ARTS 288; ART 233 or PD 223.

Repeatable 2 times for a maximum of 12 credits when topic changes

ARTF 369. Woven Structures. 4 Credits.

Introduction to floor-loom hand weaving. Traditional and experimental use of materials, techniques, and structures are used to understand weaving as a cross-disciplinary practice.

Requisites: Prereq: ARTF 270.

Repeatable 5 times for a maximum of 24 credits

ARTF 370. Stitchwork Strategies. 4 Credits.

Exploration of stitch techniques, including embroidery, beading, applique, collage, piecing, and quilting. Topics include public versus private, language and narrative, and dimensional forms.

Requisites: Prereq: ARTF 270.

Repeatable 3 times for a maximum of 16 credits

ARTF 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTF 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTF 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTF 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTF 407. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTF 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTF 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTF 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTF 456. Advanced Fibers: [Topic]. 3-5 Credits.

Develops individual studio practice through exploration of contemporary issues in textile-based processes and expansion of the rhetoric of craft.

Requisites: Prereq: ARTF 270; ARTF 368 or ARTF 369.

Repeatable 99 times

ARTF 507. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTF 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTF 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTF 556. Advanced Fibers: [Topic]. 3-5 Credits.

Develops individual studio practice through exploration of contemporary issues in textile-based processes and expansion of the rhetoric of craft.

Repeatable 99 times

ARTF 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTF 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTF 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTF 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTF 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTF 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTF 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTF 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Art: Metalsmithing and Jewelry (ARTM)

Courses

ARTM 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTM 257. Introduction to Jewelry and Metalsmithing. 4 Credits.

Explores developing and constructing jewelry and objects rooted in material culture. Introduces historical and contemporary work through image presentations, lectures, and independent research.

Requisites: Prereq: ART 116 or ARTS 288; ART 233 or PD 223.

ARTM 357. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Further exploration of techniques related to conceptual problems. Content varies by term with a focus on individual processes: hollowware, forging, connections, casting, aluminum anodizing, enameling, stone setting.

Requisites: Prereq: ARTM 257.

Repeatable 99 times

ARTM 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTM 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTM 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTM 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTM 407. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTM 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTM 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTM 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTM 457. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Emphasis on creative work. Advanced investigation of techniques and process. Content varies by term related to process focus. Includes hollow-ware, forging, connections, casting, aluminum anodizing, enameling, stone setting.

Requisites: Prereq: ARTM 357.

Repeatable 99 times

ARTM 459. Advanced Metalsmithing and Jewelry. 3-5 Credits.

Emphasis on individual creative development. Various conceptual problems.

Requisites: Prereq: ARTM 357.

Repeatable 99 times

ARTM 507. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTM 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTM 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTM 557. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Emphasis on creative work. Advanced investigation of techniques and process. Content varies by term related to process focus. Includes hollow-ware, forging, connections, casting, aluminum anodizing, enameling, stone setting.

Requisites: Prereq: ARTM 357 or equivalent.

Repeatable 99 times

ARTM 559. Advanced Metalsmithing and Jewelry. 3-5 Credits.

Emphasis on individual creative development. Various conceptual problems.

Requisites: Prereq: ARTM 357.

Repeatable 99 times

ARTM 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTM 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTM 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTM 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTM 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTM 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTM 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTM 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Art: Painting (ARTP)

Courses

ARTP 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTP 281. Introductory Painting I. 4 Credits.

Basic visual elements and their application to painting as a means of expression. Incorporates traditional subject matter: still life, landscape, figure.

Requisites: Prereq: ART 116 or ARTS 288; ART 233.

Repeatable 99 times

ARTP 381. Introductory Painting II. 4 Credits.

Integrates concepts and approaches introduced in Introductory Painting I (ARTP 281) to develop more individual and complex strategies of form and meaning. Sequence with ARTP 281.

Requisites: Prereq: ARTP 281.

ARTP 390. Intermediate and Advanced Painting. 4 Credits.

Advanced painting concepts and technical processes. Independent initiative is encouraged.

Requisites: Prereq: ARTP 381.

Repeatable 2 times for a maximum of 12 credits

ARTP 391. Intermediate and Advanced Drawing. 4 Credits.

Continued study in observation related to visual and spatial phenomena.

Requisites: Prereq: ART 333.

Repeatable 2 times for a maximum of 12 credits

ARTP 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTP 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTP 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTP 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTP 407. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTP 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTP 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTP 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTP 481. Advanced Painting Practice. 4 Credits.

Pursuit of individual creative practice and forming the critical intelligence necessary to develop as an artist. Sequence with ARTP 281, 381, 390.

Requisites: Prereq: two terms ARTP 390.

Repeatable 5 times for a maximum of 24 credits

ARTP 507. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTP 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTP 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTP 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTP 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTP 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTP 606. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTP 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTP 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTP 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTP 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Art: Photography (ARTO)

Courses

ARTO 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTO 250. Introduction to Photography. 4 Credits.

Covers basic elements of photography using a DSLR camera and provides a broad-based understanding of photographic practice in a fine art context. Sequence with ARTO 350.

Requisites: Prereq: ART 116 or ARTS 288; ART 233.

Repeatable 1 time for a maximum of 8 credits

ARTO 350. Film and Darkroom. 4 Credits.

Technical and aesthetic consideration of black-and-white analog photography. Basics of camera, film development, and photographic print controls in the darkroom. Sequence with ARTO 250.

Requisites: Prereq: ARTO 250.

Repeatable 1 time for a maximum of 8 credits

ARTO 351. Constructed Image Photography. 4 Credits.

Explores processes and concepts extending beyond the single photographic image. Narrative and formal strategies in manipulation and sequencing, exploring the materiality of the photograph. Studio course.

Repeatable 1 time for a maximum of 8 credits

ARTO 352. Creative Large-Format Photography. 4 Credits.

Introduces large-format cameras and their aesthetic possibilities. Four-by-five and eight-by-ten view cameras provided. Includes camera use, film and development, printing skills.

Requisites: Prereq: ARTO 350.

Repeatable 1 time for a maximum of 8 credits

ARTO 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTO 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTO 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTO 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTO 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTO 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTO 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTO 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTO 455. Conceptual Strategies in Photography. 4 Credits.

Studies the 1960s conceptual art movement and its influence on contemporary photography practice: open-ended projects respond to various conceptual frameworks.

Requisites: Prereq: ARTO 250.

Repeatable 1 time for a maximum of 8 credits

ARTO 476. Alternative Photographic Processes. 4 Credits.

Combines painterly concerns with printmaking ideas and photographic principles in a mixed-media approach to contemporary image-making through historic and antiquated processes. Studio course.

Requisites: Prereq: ARTO 350; ARTO 351 or ARTO 352.

Repeatable 1 time for a maximum of 8 credits

ARTO 484. Advanced Photography: [Topic]. 4 Credits.

Investigates photographic practice and philosophy through readings and discussion; students engage in personal studio practice and class critiques.

Requisites: Prereq: ARTO 450.

Repeatable 1 time for a maximum of 8 credits

ARTO 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTO 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTO 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTO 555. Conceptual Strategies in Photography. 4 Credits.

Studies the 1960s conceptual art movement and its influence on contemporary photography practice: open-ended projects respond to various conceptual frameworks.

Repeatable 1 time for a maximum of 8 credits

ARTO 576. Alternative Photographic Processes. 4 Credits.

Combines painterly concerns with printmaking ideas and photographic principles in a mixed-media approach to contemporary image-making through historic and antiquated processes. Studio course.

Repeatable 1 time for a maximum of 8 credits

ARTO 584. Advanced Photography: [Topic]. 4 Credits.

Investigates photographic practice and philosophy through readings and discussion; students engage in personal studio practice and class critiques.

Requisites: Prereq: ARTO 554.

Repeatable 1 time for a maximum of 8 credits

ARTO 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTO 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTO 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTO 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTO 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTO 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTO 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTO 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Art: Printmaking (ARTR)

Courses

ARTR 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTR 245. Introduction to Printmaking. 4 Credits.

Introduction to printmaking methodologies. Explores the unique print, multiples, and variable edition; techniques may include monotype, linocut, collagraph, etching, and screen print.

Requisites: Prereq: ART 116 or ARTS 288; ART 233.

ARTR 346. Relief. 4 Credits.

Creative exploration of graphic and conceptual possibilities through woodcut and related relief printing methods; techniques include block cutting, registration, single and multicolor printing.

Requisites: Prereq: ARTR 245.

Repeatable 1 time for a maximum of 8 credits

ARTR 347. Intaglio. 4 Credits.

Techniques of etching, drypoint, engraving, aquatint, soft ground, lift ground, white ground, embossment, relief plate printing. Emphasizes personal imagery development.

Requisites: Prereq: ARTR 245.

Repeatable 1 time for a maximum of 8 credits

ARTR 348. Screen Printing. 4 Credits.

Creative exploration of graphic and conceptual possibilities through screen printing; techniques include registration, color, edition printing, and stencil-making using hand-drawn, photographic, and digital methods.

Requisites: Prereq: ARTR 245.

Repeatable 1 time for a maximum of 8 credits

ARTR 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTR 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTR 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTR 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTR 407. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTR 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTR 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTR 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTR 446. Intermediate and Advanced Printmaking. 4 Credits.

Further exploration of printmaking techniques and concepts with an emphasis on creating a body of work; includes research, discussion, readings, and critiques.

Requisites: Prereq: two from ARTR 245, ARTR 346, ARTR 347, ARTR 348.

Repeatable 99 times

ARTR 507. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTR 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTR 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTR 546. Intermediate and Advanced Printmaking. 4-6 Credits.

Further exploration of printmaking techniques and concepts with an emphasis on creating a body of work; includes research, discussion, readings, and critiques.

Repeatable 99 times

ARTR 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTR 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTR 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTR 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTR 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTR 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTR 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTR 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Art: Sculpture (ARTS)

Courses

ARTS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTS 288. Sculpture I: Mixed Media. 3-5 Credits.

Investigation of 3-D forms in space using a range of processes.

Requisites: Prereq: ART 115.

Repeatable 3 times for a maximum of 20 credits

ARTS 393. Sculpture II: [Topic]. 3-5 Credits.

Integration of concepts and materials in sculpture; investigation of individual methodology. Topics vary by term: wood, moldmaking, steel. Reading, presentation on issues and artists.

Requisites: Prereq: ARTS 288.

Repeatable 99 times when topic changes

ARTS 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTS 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTS 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTS 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTS 407. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTS 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTS 409. Terminal Creative Project BFA. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTS 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTS 491. Methodologies: [Topic]. 4 Credits.

Explores conceptually driven topics in sculpture such as formless, assemblage, and new landscapes. Sequence with ARTS 288, ARTS 393, ARTS 493.

Requisites: Prereq: ARTS 393.

Repeatable 2 times for a maximum of 12 credits

ARTS 493. Advanced Sculpture. 4 Credits.

Designed for students who have completed several upper-division sculpture courses. Individual and group critiques; development and articulation of individual voice.

Requisites: Prereq: ARTS 393.

Repeatable 1 time for a maximum of 8 credits

ARTS 507. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTS 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTS 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

ARTS 591. Methodologies: [Topic]. 4 Credits.

Explores conceptually driven topics in sculpture such as formless, assemblage, and new landscapes.

Repeatable 2 times for a maximum of 12 credits

ARTS 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ARTS 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ARTS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ARTS 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ARTS 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ARTS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ARTS 609. Terminal Creative Project MFA. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ARTS 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Asian Studies (ASIA)

Courses

ASIA 111. Great Books on Modern Asia. 4 Credits.

Students learn about Asia and how knowledge about Asia is produced by reading and discussing four great books written by different authors in various writing genres and perspectives.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ASIA 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Requisites: Prereq: freshman or new student.

Repeatable 99 times when topic changes

ASIA 350. What Is Asia: Theoretical Debates. 4 Credits.

An interdisciplinary seminar designed to introduce students to current theoretical debates about Asia, modernization, and area studies.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

ASIA 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ASIA 401. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ASIA 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Requisites: Prereq: major honor's student.

Repeatable 99 times

ASIA 405. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ASIA 406. Practicum: [Topic]. 1-16 Credits.

Closely supervised participation in the activities of public or private organizations, institutes, and community service agencies.

Repeatable 99 times

ASIA 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ASIA 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ASIA 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ASIA 425. Asian Foodways. 4 Credits.

Explores socio-cultural, political-economic and historical dimensions of food in China, Japan, Korea, Southeast Asia and India, including modernization, transnationalism, globalization. Offered alternate years.

Additional Information:

Cultural Literacy: Global Perspectives

ASIA 480. Chinese Economy: Transition, Development, Globalization. 4 Credits.

Comprehensive introduction to the Chinese economy: market transition; macroeconomic conditions and policies; key sectors such as industry, banking, finance, energy, export, technology, agriculture; globalization. Offered alternate years.

Additional Information:

Cultural Literacy: Global Perspectives

ASIA 503. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ASIA 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ASIA 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ASIA 525. Asian Foodways. 4 Credits.

Explores socio-cultural, political-economic and historical dimensions of food in China, Japan, Korea, Southeast Asia and India, including modernization, transnationalism, globalization. Offered alternate years.

ASIA 580. Chinese Economy: Transition, Development, Globalization. 4 Credits.

Comprehensive introduction to the Chinese economy: market transition; macroeconomic conditions and policies; key sectors such as industry, banking, finance, energy, export, technology, agriculture; globalization. Offered alternate years.

ASIA 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ASIA 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ASIA 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ASIA 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Astronomy (ASTR)

Courses

ASTR 121. The Solar System. 4 Credits.

Naked-eye astronomy, development of astronomical concepts, and the solar system.

Additional Information:

Science Area

ASTR 122. Birth and Death of Stars. 4 Credits.

The structure and evolution of stars.

Additional Information:

Science Area

ASTR 123. Galaxies and the Expanding Universe. 4 Credits.

Galaxies and the universe.

Additional Information:

Science Area

ASTR 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ASTR 321. Topics in Astrophysics. 4 Credits.

Problem solving of the orbits, kinematics, and dynamics of astronomical systems, structure and evolution of stars and galaxies.

Requisites: Pre- or coreq: MATH 252Z, PHYS 252.

Behavioral Health (BEHT)

Courses

BEHT 320. Youth Risk and Resilience. 3 Credits.

This course focuses on behavioral and mental health problems in childhood and adolescence, and the multitude of risk and protective factors that influence child behavioral and emotional development - including associated contexts, developmental processes, and biological and environmental factors. Students cannot receive credit for both BEHT 320 and FHS 329.

Equivalent to: FHS 329

BEHT 321. Digital Media and Behavioral Health. 4 Credits.

This course examines how children and adolescents use digital media and internet connected technologies, the benefits and risks associated with these patterns of use, and the potential of digital technology to allow new modes of support and service delivery for behavioral health problems.

BEHT 324. Trauma Informed Supports. 4 Credits.

Learn how traumatic and adverse experiences can occur at individual, familial, community and historical/generational levels. Identify commonly used screening tools and evidence-based approaches, including trauma-informed supports and trauma treatments. Address impacts on behavioral health professionals working with youth and families who have experienced traumatic stress and adversity.

BEHT 340. Clinical Decision in Child Behavioral Health. 4 Credits.

This course will introduce students to empirical research and practical tools related to making decisions as a Child Behavioral Health Specialist across contexts and service modalities. Clinical decision-making in child behavioral health includes considering who may be appropriate for services, planning the details of service delivery, and deciding how to proceed with services that fall within the Child Behavioral Health Specialist (CBHS) scope of practice.

BEHT 350. Foundations of Culturally Responsive Practice. 4 Credits.

This course is the first in a two-course series centered on diversity, equity, and inclusivity in youth behavioral health. This course is designed to provide the foundational knowledge and theories needed for a better understanding of youth and families with diverse identities.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

BEHT 351. Diversity Equity and Inclusion II. 3 Credits.

This course is the second in a two-course series centered on diversity, equity, and inclusivity in youth behavioral health. This course is designed to provide students with the foundational practices and skills needed to equitably serve youth and families with diverse and often marginalized identities.

Requisites: Prereq: BEHT 350.

BEHT 352. Inclusive Practices I. 3 Credits.

This advanced course will expand on previous course content related to tailoring interventions for individuals with diverse identities, abilities, and backgrounds. It will offer a clear framework for inclusive interventions to support progress towards identified behavioral health goals.

BEHT 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BEHT 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BEHT 402. Supervised College Teaching. 1-12 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 99 times

BEHT 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BEHT 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BEHT 405. Reading and Conference: [Topic]. 1-12 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BEHT 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BEHT 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BEHT 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BEHT 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

BEHT 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BEHT 411. Foundational Skills for Behavioral Health. 4 Credits.

This course is designed to build students' knowledge and implementation of foundational skills necessary for engaging youth and families in interventions to promote youth emotional and behavioral well-being.

BEHT 412. Ethics and Professional Practice for CBHS. 4 Credits.

The focus of this course is ethical and professional issues facing mental health providers, and child behavior health specialists in particular. The course includes foundational knowledge in ethics, as well as models for ethical decision-making. Students cannot receive credit for both BEHT 412 and FHS 471.

Equivalent to: FHS 471

BEHT 413. Youth Screening and Risk Assessment. 4 Credits.

This course is designed to equip students with foundational skills in screening children and adolescents for behavioral and emotional strengths and difficulties. The goal of the class is to provide students with the information and skills necessary to identify and select screening tools to assess behavioral and emotional strengths and difficulties in diverse populations of youth and families

BEHT 421. Behavioral Health Promotion I. 4 Credits.

Learn how to identify and implement universal evidence-based strategies and interventions to promote self-regulation, self-awareness, and mental health literacy in children. Gain skills in identifying and delivering developmentally and culturally appropriate evidence-based strategies to children and adolescents. Sequence with BEHT 422, BEHT 423.

BEHT 422. Behavioral Health Promotion II. 4 Credits.

In this course, students will develop an understanding of the central role that relationships and identity play in influencing wellbeing in youth. Students will learn about key interpersonal and social skills that can promote healthy relationships. They will also learn about challenging interpersonal situations that can undermine well-being. Sequence with BEHT 421, BEHT 423.

BEHT 423. Behavioral Health Promotion III. 4 Credits.

Promoting health behaviors such as sleep, physical activity, and digital media use through evidence-based strategies. Evidence based strategies include (1) assessing readiness for health behavior change and self-efficacy, (2) developing behavioral monitoring plans, (3) and identifying SMART(IE) (Specific, Measurable, Attainable, Realistic, Timely, and as applicable, Inclusive, and Equitable) goals for health behavior change. Sequence with BEHT 421, BEHT 422.

Requisites: Prereq: BEHT 421, BEHT 422.

BEHT 450. Supporting Behavioral Health of Tribal Youth. 3 Credits.

This course provides an introduction to the political nature of Tribal experiences, the professional knowledge necessary, and methods appropriate for working with Tribal and urban Native communities in behavioral health and educational settings.

Requisites: Prereq: BEHT 350, BEHT 351.

BEHT 451. Behavioral Health: Asian and Pacific Islander. 3 Credits.

This course is designed to promote student awareness and knowledge for effectively working with Asian and Pacific Islander children and adolescents. Topics include immigration and acculturation, identity development, stereotyping and discrimination, family socialization, and culturally-responsive behavioral health promotion, prevention, and limited intervention.

Requisites: Prereq: BEHT 350, BEHT 351.

BEHT 452. Supporting Behavioral Health of Latinx Youth. 3 Credits.

The purpose of this course is to examine factors that influence the well-being of the U.S. Latinx population within a cultural context with an emphasis on youth. This includes focusing on the socio-political context Latinx youth face and how that affects their behavioral health.

Requisites: Prereq: BEHT 350, BEHT 351.

BEHT 453. Supporting Behavioral Health of Black Youth. 3 Credits.

This course is designed to provide knowledge and skills to behavioral health professionals working to improve the social-emotional and behavioral health of Black youth, with a focus on the K-12 school context.

Requisites: Prereq: BEHT 350, BEHT 351.

BEHT 454. Inclusive Practices II. 3 Credits.

This course provides an in-depth exploration of key domains of cognitive functioning critical to offering individualized inclusive behavioral health interventions. Students will gain a comprehensive understanding of how these domains of cognition change across development and may influence behavioral health, as well as how these domains connect to neurodiversity (e.g. autism and/or ADHD) and the spectrum of ability/disability.

Requisites: Prereq: BEHT 350.

BEHT 455. Improving Behavioral Health of LGBTQ Youth. 3 Credits.

This course is designed to provide knowledge and skills to students working to improve the behavioral health of LGBTQ youth. Topics include: understanding of LGBTQ identities and history; risk and protective factors; knowledge of prevention and selecting evidence-based practices; and demonstration of intervention skills.

Requisites: Prereq: BEHT 350, BEHT 351.

BEHT 471. Child Behavioral Health Prevention and Intervention I. 4 Credits.

This is the first course in a 3 course Prevention and Intervention sequence, that trains child behavioral health students in the common elements of effective approaches to improve wellness and a wide range of youth behavioral health problems. Students will understand basic skills to effectively manage behaviors in individual and group settings. Students will also learn several skills, including-- Calming and Problem-Solving, and how they are connected to youth behavioral health problems. Sequence with BEHT 472.

Requisites: Prereq: BEHT 411.

BEHT 472. Child Behavioral Health Prevention and Intervention II. 4 Credits.

This is the second course in a 3 course Prevention and Intervention sequence, that trains child behavioral health students in the common elements of effective approaches to improve wellness and a wide range of youth behavioral health problems. This course is designed to build students' knowledge and skills in the evidence-based practice of "doing the opposite"- a strategy that involves acting in a way that is opposite to how you are feeling. Sequence with BEHT 471.

Requisites: Prereq: BEHT 411.

BEHT 473. Parenting Interventions. 4 Credits.

This course is designed to introduce students to evidence-based approaches to parent training and behavioral support for families. The course will explore theoretical models about family systems and structures, sociocultural considerations, and how parenting links to child emotional and behavioral outcomes across development. Additionally, the course will focus on common behavioral intervention elements (i.e. reinforcement, limit setting) that cut across most evidence-based parenting interventions.

Requisites: Prereq: BEHT 411.

BEHT 474. Community Interventions to Support Youth and Families. 4 Credits.

This course provides students with foundational knowledge of how to intervene at the community level to support the development of children, adolescents, and families. Students will learn about empirically supported models and emerging interventions that address community-level social issues.

Requisites: Prereq: BEHT 411.

BEHT 475. Child Behavioral Health Prevention and Intervention III. 4 Credits.

The final course in the three-course Prevention and Intervention series introduces a final element of effective interventions—Flexible Thinking, in which students will gain knowledge about the connection of flexible thinking with youth mental health as well as demonstrate competency using flexible thinking. In addition, the course consolidates learning across all other Prevention Intervention skills taught in the CBH program. Sequence with BEHT 471, BEHT 472.

Requisites: Prereq: BEHT 472.

BEHT 476. Interprofessional Collaboration and Consultation. 4 Credits.

This course focuses on knowledge and skills needed to engage in consultation and interprofessional collaboration when supporting youth behavioral health across different settings. Students will learn about processes and contextual factors that are important to consider when entering different settings (e.g., schools, primary care, mental health agencies) and working collaboratively with other providers who support youth in those settings.

BEHT 481. Supervised Practicum I in Child Behavioral Health. 4 Credits.

Supervised Practicum I is the first course in a two-part practicum series. The supervised practicum course series provides students the opportunity to observe and gain 90 hours of supervised experience in a behavioral health setting, providing promotion, prevention, and limited intervention services for youth.

Requisites: Prereq: BEHT 412.

BEHT 482. Supervised Practicum II in Child Behavioral Health. 4 Credits.

Supervised Practicum II is the second course in a two-part practicum series. The supervised practicum course series provides students the opportunity to observe and gain 90 hours of supervised experience in a behavioral health setting, providing promotion, prevention, and limited intervention services for youth.

Requisites: Prereq: BEHT 481.

BEHT 487. Integrated Practice I in Child Behavioral Health. 8 Credits.

Integrated Practice I is the first course in a three-part integrated practice series. Integrated Practice I in Child Behavioral Health provides students the opportunity to assume the role of a child behavioral health specialist under the supervision of a licensed mental health professional.

Requisites: Prereq: BEHT 482.

BEHT 488. Integrated Practice II in Child Behavioral Health. 8 Credits.

Integrated Practice II is the second course in a three-part integrated practice series. Integrated Practice II in Child Behavioral Health provides students the opportunity to assume the role of a child behavioral health specialist under the supervision of a licensed mental health professional.

Requisites: Prereq: BEHT 487.

BEHT 489. Integrated Practice III in Child Behavioral Health. 8 Credits.

Integrated Practice III is the final course in a three-part integrated practice series. Integrated Practice III in Child Behavioral Health provides students the opportunity to assume the role of a child behavioral health specialist under the supervision of a licensed mental health professional.

Requisites: Prereq: BEHT 488.

BEHT 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BEHT 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BEHT 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BEHT 510. Experimental Course. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BEHT 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BEHT 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BEHT 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BEHT 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BEHT 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BEHT 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BEHT 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BEHT 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

BEHT 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BEHT 621. Teaching Self-Regulation in Childhood and Adolescence. 4 Credits.

In this course, students will acquire foundational knowledge in self-regulation, with a focus on the behavioral, cognitive, and emotional domains. Students will also learn how to select and install evidence-based self-regulation strategies, curricula, and programs.

BEHT 622. Trauma-Informed Supports for Children and Adolescents. 4 Credits.

In this course, students will learn how to recognize and respond to trauma in children and adolescents. Students will develop skills for engaging in critical conversations with children and adolescents, caregivers, and service professionals centered on meeting children and adolescents' behavioral health needs.

BEHT 623. Developing and Maintaining Healthy Relationships. 4 Credits.

In this course, students will develop an understanding of the central role that relationships can have on the well-being of self, children, adolescents, and adults. Students will gain self-awareness into their own relationship styles, identify keys for successful relationships, and how to avoid destructive relationships.

Bioengineering (BIOE)

Courses

BIOE 196. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

BIOE 198. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

BIOE 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 251. Fundamentals of Bioengineering I. 4 Credits.

This course introduces students to foundational principles in bioengineering. Topics include units, dimensional analysis, energy balances, conservation of mass, energy, and momentum, and introductory biomechanics.

Requisites: Prereq: MATH 247 or MATH 252Z. Recommend co-req: PHYS 201 or PHYS 251.

BIOE 252. Fundamentals of Bioengineering II. 4 Credits.

This course introduces students to foundational principles in bioengineering. Topics include linear circuits, Fourier transforms, fluid pressure, the Bernoulli Equation, conservation principles in fluid control volumes, and laminar fluid flow.

Requisites: Prereq: MATH 247 or MATH 252Z; recommend co-req: PHYS 202 or PHYS 252.

BIOE 253. Fundamentals of Bioengineering III. 4 Credits.

This course introduces students to foundational principles in bioengineering. Students will learn basic concepts and experimental approaches across a variety of bioengineering topics and applications, including mass and energy balances, biomass conversion, fluid flow, spectrophotometry, and diffusion.

Requisites: Prereq: MATH 247 or MATH 252Z; PHYS 202 or PHYS 252 recommended.

BIOE 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BIOE 402. Supervised College Teaching. 1-5 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 99 times

BIOE 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BIOE 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BIOE 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BIOE 406. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

BIOE 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BIOE 408. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

BIOE 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

BIOE 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 410L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 510L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 601. Research: (Topic). 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BIOE 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BIOE 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BIOE 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BIOE 610L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

Biology (BI)

Courses

BI 121. Introduction to Human Physiology. 4 Credits.

Study of body functions with emphasis on organs and systems. Cell function, genetics, nutrition, exercise; function of the gut, heart, vessels, glands, lungs, nerves, and muscles with practical applications. Lecture, laboratories.

Additional Information:

Science Area

BI 123. Biology of Cancer. 4 Credits.

Comparison of cancer cells with normal cells; causes of cancer, including viral and environmental factors; biological basis of therapy. Lectures, laboratories.

Additional Information:

Science Area

BI 125. Biology of Immortality. 4 Credits.

Is immortality possible? Aging increases the risk of maladies such as cancer, heart disease, and memory loss, and inevitably leads to death. However, some organisms escape aging altogether - that is, are theoretically immortal. In this course, we will examine the interesting biology that underlies aging, the evolutionary explanations for why different species age at different rates, and the approaches that have been shown to extend lifespan. Throughout, we will consider the ethical implications of experimenting on living things and of manipulating lifespan.

Additional Information:

Science Area

BI 130. Introduction to Ecology. 4 Credits.

The concept of an ecosystem; organismal energetics; biogeochemical cycles; succession; population growth; species interactions, species diversity; implications for human ecosystems. Lectures, discussions.

Additional Information:

Science Area

BI 132. Introduction to Animal Behavior. 4 Credits.

Animal behavior, its evolutionary origins, and its neural mechanisms. Readings and films illustrate the adaptive nature of orientation, navigation, communication, and social behavior. Lectures, discussions.

Additional Information:

Science Area

BI 140. Science, Policy, and Biology. 4 Credits.

Explores the biology behind important topical issues such as stem cells, cloning, and genetically modified organisms. How policy decisions affect research in these areas. Lectures, discussions.

Additional Information:

Science Area

BI 150. Ocean Planet. 4 Credits.

This course is designed to give students an appreciation for the global ocean, the diversity of marine life, methods and techniques for studying the sea, and their own opportunities to contribute to sustainable and healthy marine ecosystems. Credits will be deducted for regression if BI 357 is taken first. Students cannot receive credit for both BI 150 and EARTH 307.

Equivalent to: EARTH 307

Additional Information:

Science Area

BI 170. Happiness: a Neuroscience and Psychology Perspective. 4 Credits.

Examination of studies in neuroscience and positive psychology that explore the mental and behavioral actions leading to the self-reporting of a well-lived and fulfilling life. Exploration of the interaction of multiple psychological and neural circuit variables in development of a positive mental state.

Additional Information:

Science Area

BI 185M. Science and Popular Media. 4 Credits.

By evaluating how science stories are told, reflecting on their impact, and taking some first steps in creating science stories, we will explore a powerful approach to critical thinking about scientific information and its role in popular media. Multilisted with JCOM 185M.

Additional Information:

Science Area

BI 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

BI 198. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

BI 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BI 199L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

BI 214. General Biology IV: Biochemistry and Genetics. 5 Credits.

Topics in Biochemistry: Amino Acid Chemistry, Protein Structure and Function, Hemoglobin, DNA Structure and Mutations; Topics in Genetics: Metabolic Pathways, Mutant Analysis, Complementation Tests, Regulation of Transcription, and the Lac Operon. Both lectures and laboratories. Sequence with BI 221Z, BI 222Z.

Requisites: Prereq: BI 222Z; CH 223Z or CH 226H.

Additional Information:

Science Area

BI 221Z. Principles of Biology I: Cells. 5 Credits.

Explores fundamental biological concepts and theories about the cellular and molecular basis of life including cell structure and function, metabolism, genetic basis of inheritance and how information flows from DNA to proteins, with a focus on the iterative process of science. Intended for science majors.

Requisites: Prereq: one from CH 111, CH 113, CH 114, CH 221Z, CH 224H.

Equivalent to: BI 211

Additional Information:

Science Area

BI 222Z. Principles of Biology II: Organisms. 5 Credits.

Explores fundamental biological concepts and theories about the structure and function of diverse organisms (including plants and animals), evolution and development, transformation of energy and matter, and body systems at a multicellular organismal level. Intended for science majors.

Requisites: Prereq: BI 221Z.

Equivalent to: BI 212

Additional Information:

Science Area

BI 223Z. Principles of Biology III: Ecology and Evolution. 5 Credits.

Explores the unity and diversity of life through evolutionary mechanisms and relationships, and adaptation to the environment. Examines population, community, and ecosystem ecology. Intended for science majors.

Requisites: Prereq: BI 221Z.

Equivalent to: BI 213

Additional Information:

Science Area

BI 281H. Accelerated Biology I: Cells, Biochemistry and Physiology. 6 Credits.

Focuses on the cellular structures and chemical reactions that allow cells to grow, to transform energy, and to communicate. Lectures, laboratories. Sequence with BI 282H, BI 283H.

Requisites: Prereq: CH 223Z or CH 226H.

Additional Information:

Science Area

BI 282H. Accelerated Biology II: Genetics and Molecular Biology. 6 Credits.

How living organisms store, replicate, and transmit their genetic information, and how this information directs the activities of the cell and organism. Lectures, laboratories. Sequence with BI 281H, BI 283H.

Requisites: Prereq: BI 281H.

Additional Information:

Science Area

BI 283H. Accelerated Biology III: Evolution, Diversity and Ecology. 6 Credits.

The genetic basis and ecological context of evolutionary change leading to an examination of the generation and major patterns of biodiversity. Lectures, laboratories, field trips. Sequence with BI 281H, BI 282H.

Requisites: Prereq: BI 282H.

Additional Information:

Science Area

BI 307. Forest Biology. 4 Credits.

Structure and function of forested ecosystems emphasizing the Pacific Northwest. Interactions among trees, microorganisms, and animals; disturbance and recovery; forest management. Lectures, laboratories, field trips.

Requisites: Prereq: BI 223Z or BI 283H.

Additional Information:

Science Area

BI 320. Molecular Genetics. 4 Credits.

Molecular mechanisms regulating control of gene expression. Topics include chromosome structure, transcription and processing of RNA, control of transcription, translational control, and genetic rearrangement. Lectures, discussions.

Requisites: Prereq: BI 214 or BI 282H.

BI 322. Cell Biology. 4 Credits.

Eukaryotic cell nuclear structure and exchange, protein trafficking, endocytosis, chaperones, cytoskeletal functions, intercellular junctions, extracellular materials, signaling, cell division mechanics and controls, aging and death. Lectures, discussions.

Requisites: Prereq: BI 214 or BI 282H; CH 331 recommended.

BI 326. Immunology and Infectious Disease. 4 Credits.

In this course we will explore the principles of immune system function as well as how microorganisms avoid the immune system to cause infectious disease. Topics include innate and adaptive immunity, cells of the immune system, vaccines, antibiotics, and immune-based therapies.

Requisites: Prereq: BI 214 or BI 282H.

BI 328. Developmental Biology. 4 Credits.

Topics include genetic regulation, nucleocytoplasmic interactions, organogenesis, morphogenesis, pattern formation, cell differentiation, and neoplasia. Lectures, laboratories.

Requisites: Prereq: BI 214 or BI 282H.

BI 330. Microbiology. 3 Credits.

Biology of bacteria: photosynthetic, heterotrophic, and others. Cell structure and function, metabolism including anaerobic and O₂-producing photosynthesis, nitrogen fixation, species interactions, and role in major geochemical cycles. Lectures.

Requisites: Prereq: BI 214 or BI 282H.

BI 331. Microbiology Laboratory. 3 Credits.

Microbial diversity through laboratory projects involving enrichments, culture isolations, and partial characterizations. Two scheduled laboratories and one scheduled lecture per week; additional unscheduled time required. Laboratories.

Requisites: Prereq: BI 214 or BI 282H; pre- or coreq: BI 330.

BI 353. Sensory Physiology. 4 Credits.

Introduction to physiology of the senses: cellular physiology of peripheral receptors through the computational mechanisms that are ultimately related to perception. Lectures, discussions.

Requisites: Prereq: BI 214 or BI 282H.

BI 356. Animal Physiology. 5 Credits.

Neurophysiology, endocrinology, muscle contraction, and homeostatic mechanisms of circulation, respiration, metabolism, ionic regulation, and excretion in mammals; comparison with those in other animals. Lectures, laboratories.

Requisites: Prereq: BI 214 or BI 281H.

BI 357. Marine Biology. 4 Credits.

Ecology and physiology of marine plants and animals. Comparisons of various marine habitats. Human influences on marine systems. Lectures, laboratories, field trips. Credits will be deducted for regression if BI 458 or BI 474 are taken first.

Requisites: Prereq: BI 223Z or BI 283H.

Additional Information:

Science Area

BI 358. Investigations in Medical Physiology. 4 Credits.

Human physiology with research and clinical medicine applications. Nervous system, addiction medicine, endocrinology, immunology, cardiology, digestion, nutrition, reproduction, infertility, pediatrics, and ophthalmology. Lectures, discussions, primary literature research. Human anatomy and physiology background preferred.

Requisites: Prereq: one from BI 214, BI 283H, HPHY 324.

BI 359. Plant Biology. 4 Credits.

A detailed introduction of the unique features of the biology of land plants, including ecology, physiology, developmental genetics, and evolutionary biology. Lectures, discussions.

Requisites: Prereq: [BI 221Z, BI 222Z, BI 223Z] or [BI 281H, BI 282H, BI 283H].

BI 360. Neurobiology. 4 Credits.

Function of the nervous system from the single neuron to complex neural networks. Topics range from molecular and cellular neurobiological mechanisms to systems and behavioral analyses. Lectures, discussions.

Requisites: Prereq: BI 214 or BI 282H.

BI 370. Ecology. 5 Credits.

Relationship of organisms to their environment in space and time. Factors controlling the distribution and abundance of organisms, introductions to community systems, and ecosystems. Required fieldwork. Lectures, laboratories, field trips.

Requisites: Prereq: BI 223Z or BI 283H. Calculus or statistics recommended.

BI 374. Conservation Biology. 4 Credits.

Global patterns of biological diversity; major threats to biodiversity; application of ecology, evolution, genetics, and other areas to protect and maintain biodiversity. Lectures, discussions.

Requisites: Prereq: BI 223Z or BI 283H.

BI 380. Evolution. 4 Credits.

Origin and maintenance of genetic variability. Historical and geographic patterns of variation. Application of population genetics to understanding evolutionary processes; modes of speciation. Lectures, discussions.

Requisites: Prereq: college algebra and BI 223Z or BI 283H.

BI 390. Animal Behavior. 4 Credits.

How and why animals behave, and how animal behavior is studied. Mechanisms of behavior, behavioral ecology, and sociobiology. Lectures, discussions.

Requisites: Prereq: BI 223Z or BI 283H.

BI 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Requisites: Prereq: [BI 222Z, BI 223Z, BI 214] or BI 283H.

Repeatable 99 times

BI 399L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Requisites: Prereq: [BI 222Z, BI 223Z, BI 214] or BI 283H.

Repeatable 99 times

BI 401. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BI 402. Supervised College Teaching. 1-6 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 8 times for a maximum of 9 credits

BI 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BI 404. Internship: [Topic]. 1-16 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BI 405. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BI 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BI 407. Seminar: [Topic]. 1-2 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BI 408. Workshop: [Topic]. 1-12 Credits.

Special laboratory training in research methods. A fee may be charged for supplies and materials that become the property of the student.

Repeatable 99 times

BI 409. Capstone. 1-12 Credits.

A culminating academic project that demonstrates a student's mastery of their field of study.

Repeatable 99 times

BI 410. Experimental Course: [Topic]. 1-16 Credits.

Experimental course - topic varies.

Requisites: Prereq: [BI 222Z, BI 223Z, BI 214] or BI 283H.

Repeatable 99 times

BI 410L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

BI 422. Protein Toxins in Cell Biology. 4 Credits.

Mechanisms used by protein toxins to kill other organisms and how they have been used as molecular scalpels to dissect pathways in cell and neurobiology. Lectures, discussions.

Requisites: Prereq: one from BI 322, BI 356, BI 360.

BI 423. Human Molecular Genetics. 4 Credits.

Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. Lectures, discussions.

Requisites: Prereq: BI 320.

BI 424. Advanced Molecular Genetics. 4 Credits.

Structure and function of chromosomes with emphasis on unsolved genetic problems such as genomic imprinting, position effects, and gene silencing. Lectures, discussions.

Requisites: Prereq: BI 320.

BI 426. Genetics of Cancer. 4 Credits.

Genetic regulation of cancer. Topics include oncogenes and tumor suppressor genes, signal transduction pathways, genetic animal models, and rationale treatment design. Lectures, discussions.

Requisites: Prereq: BI 214 or BI 282H; BI 320 or BI 322.

BI 428. Developmental Genetics. 4 Credits.

Genetic regulation of development, including investigations of molecular mechanisms and studies of developmental mutants. Topics include molecular biology of eukaryotic chromosomes, genetic mosaics, and models of gene regulation. Lectures, discussions.

Requisites: Prereq: BI 320, BI 328.

BI 430. Analysis of Neural Data. 4 Credits.

This course will focus on developing basic tools and techniques from probability, statistics, and scientific computation that are useful in data analysis, applying these techniques to the analysis of neuroscience datasets.

Requisites: Prereq: MATH 246 or MATH 251Z.

BI 432. Mycology. 5 Credits.

Physiology, ecology, structure, and classification of fungi; emphasis on structural and physiological adaptations to saprophytic, parasitic, and symbiotic modes of existence. Lectures, laboratories.

Requisites: Prereq: BI 223Z or BI 283H.

BI 433. Bacterial-Host Interactions. 4 Credits.

Examines spectrum of interactions between bacteria and animals, from pathogenesis to symbiosis, focusing on the molecular and cellular bases of these interactions. Lectures, discussions.

Requisites: Prereq: one from BI 320, BI 322, BI 330.

BI 442. Systematic Botany. 5 Credits.

Principles of plant classification with emphasis on flowering plants, introduction to taxonomic theory and methods of biosystematics, collection and identification procedures, recognition of common families in native flora. Lectures, laboratories, field trips.

Requisites: Prereq: BI 223Z or BI 283H.

BI 448. Field Botany. 4 Credits.

Intensive study of the regional flora; ecology and native uses; sight recognition of prominent species; field characteristics of principal plant families; identification using dichotomous keys. Lectures, field trips. Offered summer session only.

Requisites: Prereq: BI 223Z or BI 283H.

BI 451. Invertebrate Zoology. 1-10 Credits.

Representative invertebrate groups with emphasis on marine forms; morphology, systematics, life history, and ecology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Requisites: Prereq: BI 223Z or BI 283H.

BI 454. Estuarine Biology. 5 Credits.

The biological and physical factors regulating abundance, distribution, production, and biodiversity within estuaries. Includes field trips to marshes, tidal flats and exploration of estuarine habitats. Offered at Oregon Institute of Marine Biology.

Requisites: Prereq: BI 223Z or BI 283H.

BI 455. Marine Birds and Mammals. 1-6 Credits.

Principles of morphology, physiology, evolution, life history, and systematics as demonstrated through study of birds and mammals of the Oregon coast. Comparison of the fauna from the open sea to coastal waters. Lectures, laboratory, field trips. Offered at Oregon Institute of Marine Biology.

Requisites: Prereq: BI 223Z or BI 283H.

BI 457. Marine Biology: [Topic]. 1-8 Credits.

Content varies. Topics include comparative embryology, environmental issues, biology of fishes, and other subjects related to marine biology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Requisites: Prereq: [BI 222Z, BI 223Z] or BI 283H.

Repeatable 99 times when topic changes

BI 458. Biological Oceanography. 5 Credits.

Examines patterns of biological productivity and controlling physical and chemical mechanisms in the various environments of the world's oceans. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Requisites: Prereq: BI 223Z or BI 283H.

BI 461. Systems Neuroscience. 4 Credits.

Principles of organization of nervous systems with emphasis on vertebrate brain and spinal cord. Functional implications of synaptic organization and pattern of projections, and comparative aspects. Lectures, discussions.

Requisites: Prereq: BI 353 or BI 360.

BI 463. Cellular Neuroscience. 4 Credits.

Physiology of excitation, conduction, and synaptic transmission. Lectures, discussions.

Requisites: Prereq: BI 360.

BI 466. Developmental Neurobiology. 4 Credits.

Mechanisms underlying development of the nervous system. The genesis of nerve cells; differentiation of neurons; synaptogenesis and neuronal specificity; plasticity, regeneration, and degeneration of nervous tissue. Lectures, discussions.

Requisites: Prereq: BI 320, BI 328.

BI 471. Population Ecology. 4 Credits.

Theoretical, experimental and applied aspects of growth, structure, and regulation of natural populations; population estimation; demographic analysis; life-history theory. Lectures, discussions.

Requisites: Prereq: BI 223Z or BI 283H.

BI 472. Community Ecology. 4 Credits.

Quantitative and conceptual approaches to the study of biological communities. Biodiversity measurement. Effect of climate and climate change on ecosystem structure and function. Lectures, discussions.

Requisites: Prereq: BI 370.

BI 474. Marine Ecology. 1-8 Credits.

Factors that influence the distribution, abundance, and diversity of marine organisms. Field emphasis on local intertidal and shallow-water communities. Offered at Oregon Institute of Marine Biology.

Requisites: Prereq: BI 223Z or BI 283H.

BI 484. Molecular Evolution. 4 Credits.

General description of patterns of molecular variation within and between species, underlying mechanisms, and methods of analysis.

Requisites: Prereq: BI 320 or BI 380.

BI 488. Evolutionary Processes. 4 Credits.

Critical discussion of the ecological and evolutionary genetic processes associated with adaptation in natural populations; draws from topics in population, quantitative, and molecular genetics, molecular evolution, and statistics.

Requisites: Prereq: BI 380.

BI 497M. Deterministic Dynamical Modeling in Biology. 4 Credits.

This course covers deterministic dynamical models in biology, i.e., models that describe the behavior of a biological system over time as a result of internal feedback loops and external forcings. The focus will be on differential equations, discrete-time models and related computational (programming) tools. Multilisted with MATH 497M.

Requisites: Prereq: One from MATH 242, MATH 247, MATH 252Z, MATH 320; one from STAT 243Z, DSCI 345M, MATH 345M, MATH 461, MATH 467.

Equivalent to: MATH 497M

BI 499M. Stochastic Dynamical Modeling in Biology. 4 Credits.

This course covers stochastic dynamical models in biology, i.e., mathematical models that describe the behavior of non-deterministic biological systems as a result of internal feedback loops, external forcings and random processes. Topics include stochastic iterative maps, Markov chains, vector autoregression models, and time series analysis. Multilist with MATH 499M.

Requisites: Prereq: One from MATH 242, MATH 247, MATH 252Z, MATH 320; one from STAT 243Z, DSCI 345M, MATH 345M, MATH 461, MATH 467. Basic programming skills recommended.

Equivalent to: MATH 499M

BI 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BI 507. Seminar: [Topic]. 1-2 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BI 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BI 510. Experimental Course: [Topic]. 1-16 Credits.

Experimental course - topic varies.

Repeatable 99 times

BI 510L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

BI 522. Protein Toxins in Cell Biology. 4 Credits.

Mechanisms used by protein toxins to kill other organisms and how they have been used as molecular scalpels to dissect pathways in cell and neurobiology. Lectures, discussions.

BI 523. Human Molecular Genetics. 4 Credits.

Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. Lectures, discussions.

BI 524. Advanced Molecular Genetics. 4 Credits.

Structure and function of chromosomes with emphasis on unsolved genetic problems such as genomic imprinting, position effects, and gene silencing. Lectures, discussions.

BI 526. Genetics of Cancer. 4 Credits.

Genetic regulation of cancer. Topics include oncogenes and tumor suppressor genes, signal transduction pathways, genetic animal models, and rationale treatment design. Lectures, discussions.

BI 528. Developmental Genetics. 4 Credits.

Genetic regulation of development, including investigations of molecular mechanisms and studies of developmental mutants. Topics include molecular biology of eukaryotic chromosomes, genetic mosaics, and models of gene regulation. Lectures, discussions.

BI 530. Analysis of Neural Data. 4 Credits.

This course will focus on developing basic tools and techniques from probability, statistics, and scientific computation that are useful in data analysis, applying these techniques to the analysis of neuroscience datasets.

BI 532. Mycology. 5 Credits.

Physiology, ecology, structure, and classification of fungi; emphasis on structural and physiological adaptations to saprophytic, parasitic, and symbiotic modes of existence. Lectures, laboratories.

BI 533. Bacterial-Host Interactions. 4 Credits.

Examines spectrum of interactions between bacteria and animals, from pathogenesis to symbiosis, focusing on the molecular and cellular bases of these interactions. Lectures, discussions.

BI 542. Systematic Botany. 5 Credits.

Principles of plant classification with emphasis on flowering plants, introduction to taxonomic theory and methods of biosystematics, collection and identification procedures, recognition of common families in native flora. Lectures, laboratories, field trips.

BI 548. Field Botany. 4 Credits.

Intensive study of the regional flora; ecology and native uses; sight recognition of prominent species; field characteristics of principal plant families; identification using dichotomous keys. Lectures, field trips. Offered summer session only.

BI 551. Invertebrate Zoology. 1-10 Credits.

Representative invertebrate groups with emphasis on marine forms; morphology, systematics, life history, and ecology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

BI 554. Estuarine Biology. 5 Credits.

The biological and physical factors regulating abundance, distribution, production, and biodiversity within estuaries. Includes field trips to marshes, tidal flats and exploration of estuarine habitats. Offered at Oregon Institute of Marine Biology.

BI 555. Marine Birds and Mammals. 1-6 Credits.

Principles of morphology, physiology, evolution, life history, and systematics as demonstrated through study of birds and mammals of the Oregon coast. Comparison of the fauna from the open sea to coastal waters. Lectures, laboratory, field trips. Offered at Oregon Institute of Marine Biology.

BI 557. Marine Biology: [Topic]. 1-8 Credits.

Content varies. Topics include comparative embryology, environmental issues, biology of fishes, and other subjects related to marine biology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Repeatable 99 times when topic changes

BI 558. Biological Oceanography. 5 Credits.

Examines patterns of biological productivity and controlling physical and chemical mechanisms in the various environments of the world's oceans. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

BI 561. Systems Neuroscience. 4 Credits.

Principles of organization of nervous systems with emphasis on vertebrate brain and spinal cord. Functional implications of synaptic organization and pattern of projections, and comparative aspects. Lectures, discussions.

BI 563. Cellular Neuroscience. 4 Credits.

Physiology of excitation, conduction, and synaptic transmission. Lectures, discussions.

BI 566. Developmental Neurobiology. 4 Credits.

Mechanisms underlying development of the nervous system. The genesis of nerve cells; differentiation of neurons; synaptogenesis and neuronal specificity; plasticity, regeneration, and degeneration of nervous tissue. Lectures, discussions.

BI 571. Population Ecology. 4 Credits.

Theoretical, experimental and applied aspects of growth, structure, and regulation of natural populations; population estimation; demographic analysis; life-history theory. Lectures, discussions.

BI 572. Community Ecology. 4 Credits.

Quantitative and conceptual approaches to the study of biological communities. Biodiversity measurement. Effect of climate and climate change on ecosystem structure and function. Lectures, discussions.

BI 574. Marine Ecology. 1-8 Credits.

Factors that influence the distribution, abundance, and diversity of marine organisms. Field emphasis on local intertidal and shallow-water communities. Offered at Oregon Institute of Marine Biology.

BI 584. Molecular Evolution. 4 Credits.

General description of patterns of molecular variation within and between species, underlying mechanisms, and methods of analysis.

BI 588. Evolutionary Processes. 4 Credits.

Critical discussion of the ecological and evolutionary genetic processes associated with adaptation in natural populations; draws from topics in population, quantitative, and molecular genetics, molecular evolution, and statistics.

BI 597M. Deterministic Dynamical Modeling in Biology. 4 Credits.

This course covers deterministic dynamical models in biology, i.e., models that describe the behavior of a biological system over time as a result of internal feedback loops and external forcings. The focus will be on differential equations, discrete-time models and related computational (programming) tools. Multilisted with MATH 597M.

BI 599M. Stochastic Dynamical Modeling in Biology. 4 Credits.

This course covers stochastic dynamical models in biology, i.e., mathematical models that describe the behavior of non-deterministic biological systems as a result of internal feedback loops, external forcings and random processes. Topics include stochastic iterative maps, Markov chains, vector autoregression models, and time series analysis. Multilisted with MATH 599M.

BI 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BI 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BI 604. Internship: [Topic]. 1-16 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BI 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BI 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BI 607. Seminar: [Topic]. 1-3 Credits.

Topics may include neurobiology, developmental biology, ecology colloquium, genetics, molecular biology, and neuroscience.

Repeatable 99 times

BI 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BI 609. Capstone. 1-12 Credits.

A culminating academic project that demonstrates a student's mastery of their field of study.

Repeatable 99 times

BI 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BI 610L. Experimental Course: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

BI 620. Molecular Genetics. 4 Credits.

Use of modern genetic techniques to analyze gene function. Illustrates the use of model organisms including yeast, worms, flies, and mice. Covers forward genetics (function-driven gene discovery) and reverse genetics.

BI 621. Computational Methods in Genomic Analysis. 4 Credits.

An introduction to Unix shell, Python, and R programming skills for analysis of biological data sets, specifically focusing on high-throughput sequencing data.

BI 622. Genomics Techniques. 4 Credits.

Students will be introduced to various genomics laboratory techniques, as well as trained in oral and written scientific communication.

BI 623. Advanced Topics in Genomics Analysis. 4 Credits.

Exposure to a variety of topics in genomics analysis including phylogenetics, transcriptome assembly, transcript quantification, and microbial community analysis.

BI 624. Genomics Research Lab. 4 Credits.

Group research on high-throughput sequencing data.

BI 625. Advanced Genomic Analysis. 4 Credits.

Group research on high-throughput sequencing data and special topics in genomics analysis.

Requisites: Prereq: BI 624.

Black Studies (BLST)

Courses

BLST 196. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

BLST 198. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BLST 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BLST 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BLST 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BLST 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BLST 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BLST 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BLST 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BLST 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BLST 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

BLST 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Brewing Innovation (BRIN)

Courses

BRIN 221. Tapping into the World of Beer and Brewing. 4 Credits.

This course focuses on the science and art of the sensory experience in beer. It connects the sensory experience to beer's ingredients and chemical composition, and ultimately to the finished beer's flavor, appearance and aroma. Students will design and brew a style of their choice.

BRIN 322. Advanced Brewing Laboratory. 4 Credits.

Students will learn the practical aspects of producing fermented beverages with an emphasis on brewing beer. Sequence with BRIN 323, BRIN 424.

Requisites: Prereq: BRIN 221.

BRIN 323. Brewing Innovation: Past, Present, and Future. 4 Credits.

Students examine how innovations in brewing at global, regional, and local levels have shaped the beers and brewing process throughout history and how these innovations have fostered broader advances in society. Students learn to apply design thinking as an approach to future innovations in the craft. Sequence with BRIN 322, BRIN 424.

Requisites: Prereq: BRIN 322.

BRIN 424. Capstone: Interdisciplinary Beer Design Lab. 4 Credits.

In this capstone course, students design and refine a brewing technique or recipe that is relevant to the history of brewing innovation or that addresses an identified customer need or design challenge. Sequence with BRIN 322, BRIN 323.

Requisites: Prereq: BRIN 323.

Business Administration (BA)

Courses

BA 101Z. Introduction to Business. 4 Credits.

Presents an integrated view of both established and entrepreneurial businesses by studying their common characteristics and processes in a global context. Introduces theory and develops basic skills in the areas of accounting, finance, management, and marketing, with an emphasis on social responsibility and ethical practices. Explores how businesses can create value for themselves and society by addressing environmental and social challenges.

Equivalent to: BA 101

Additional Information:

Social Science Area

BA 169Z. Data Analysis Using Microsoft Excel. 4 Credits.

Covers Microsoft Excel software skills necessary for evidence-based problem-solving, including workbook editing, formula creation, charting, and pivot tables. Emphasizes hands-on learning using Excel functions to perform data analysis to enhance decision-making. Previously taught as BA 240.

Requisites: Prereq: BA 101Z.

Equivalent to: BA 240

BA 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

BA 211Z. Principles of Financial Accounting. 4 Credits.

Imparts an understanding of the purpose of accounting, common financial statement items, and the principles of internal controls. Focuses on recording the impact of economic events on account balances using U.S. Generally Accepted Accounting Principles, and the creation and analysis of financial statements to aid in external decision making.

Equivalent to: ACTG 211

BA 213Z. Principles of Managerial Accounting. 4 Credits.

Builds an understanding of the role of managerial accounting in a business, focusing on the development and use of information to evaluate production costs and operational performance in support of short- and long-term organizational decision-making.

Requisites: Prereq: BA 211Z.

Equivalent to: ACTG 213

BA 215. Accounting: Language of Business Decisions. 4 Credits.

How the accounting model reflects business transactions or events. Interpretation and analysis of financial statements. Understanding cost and revenue information, organization, and decisions.

Requisites: Prereq: BA 101Z.

BA 252. Global Perspectives in Business. 4 Credits.

An interdisciplinary introduction to what it means to participate in a global economy, critically reflecting on globalization, the impacts of business activity, human rights, global finance, marketing, and management. Also explores concepts and skills in intercultural communication and working with others from around the world.

Additional Information:

Cultural Literacy: Global Perspectives

BA 308. Leadership and Communication. 4 Credits.

Personal leadership and communication skills. Focuses on self-awareness for leading, persuading, and working with others; effective business writing and speaking; and team development. Students may not receive credit both BA 308 and BA 308H. Sophomore standing required.

Requisites: Prereq: BA 101Z; one from WR 122Z, WR 123, HC 221H.

Equivalent to: BA 308H

BA 308H. Leadership and Communication. 4 Credits.

Personal leadership and communication skills. Focuses on self-awareness for leading, persuading, and working with others; effective business writing and speaking; and team development. Students may not receive credit both BA 308 and BA 308H. Open only to students in the LCB Honors Program.

Requisites: Prereq: BA 101Z; one from WR 122Z, WR 123, HC 221H.

Equivalent to: BA 308

BA 315. Economy, Industry, and Competitive Analysis. 4 Credits.

Free enterprise capitalism and market competition. Economic value added, product cost, and product pricing. Organizational arrangements and the control of economic activity.

Requisites: Prereq: BA 101Z.

BA 316. Management: Creating Value through People. 4 Credits.

Management systems for planning, controlling, organizing, and leading; how they influence human behavior in organizations. Selecting, training, retaining, and motivating the human resource in organization.

Requisites: Prereq: BA 101Z.

BA 317. Marketing: Creating Value for Customers. 4 Credits.

Market analysis, target customer identification, and development of marketing-mix strategies to deliver superior customer value and contribute to the performance of the organization.

Requisites: Prereq: BA 101Z.

BA 318. Finance: Creating Value through Capital. 4 Credits.

Financial statement analysis, pro forma statements and capital budgeting, time value of money, net present-value analysis, risk and cost of capital.

Requisites: Prereq: BA 101Z; BA 211Z or BA 215.

BA 322. Fundamentals of Sustainable Business. 4 Credits.

Survey of the ideas, tools, and skills used by businesses to address environmental and social challenges, including new business attitudes, models, ventures, and ecosystems.

Requisites: Prereq: MGMT 311.

BA 325. Business Law and Ethics. 4 Credits.

Legal and ethical environments of business, including U.S. legal concepts, social and environmental impacts of business, and ethical decision making.

Requisites: Prereq: BA 101Z; one from WR 122Z, WR 123, HC 221H.

Equivalent to: BA 325H

BA 325H. Business Law and Ethics. 4 Credits.

BA 325H offers an intensive exploration of legal and ethical environments of business, including U.S. legal concepts, social and environmental impacts of business, and ethical decision making. Students cannot receive credit for both BA 325 and BA 325H.

Requisites: Prereq: BA 101Z; WR 122Z or WR 123; BA 308 or BA 308H.

Equivalent to: BA 325

BA 361. Cross-Cultural Business Communication. 4 Credits.

Theoretical and practical approach to value dimensions across cultures and their impact on communication in business and professional contexts. Develops intercultural business communication skills.

Requisites: Prereq: WR 121Z recommended.

BA 365. Cross-Cultural Negotiation. 4 Credits.

Theory and practice of negotiating effectively across cultures. Research and analysis of culturally specific models for negotiating and experience using those models in cross-cultural simulations.

Requisites: Prereq: WR 121Z recommended.

BA 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BA 404. Internship: [Topic]. 1-4 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BA 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BA 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BA 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

BA 425. Law for Managers. 4 Credits.

Critical legal concepts that managers, entrepreneurs, and professionals need to understand to succeed in their careers and contribute positively to society. The course will examine how legal and ethical considerations interact focusing on the legal system of the United States.

BA 453. Business Strategy and Planning. 4 Credits.

Capstone course focusing on strategy formulation and decisional processes. Includes writing a business plan that applies knowledge and develops course of action to accomplish organizational objectives. Students cannot receive credit for both BA 453 and BA 453H.

Requisites: Prereq: MGMT 311 (or MGMT 311H), MKTG 311 (or MKTG 311H), BA 308 (or BA 308H), OBA 312 (or OBA 312H), OBA 335 (or OBA 335H), FIN 311 (or FIN 311H or EC 311), FIN 316 (or FIN 316H), BA 325 (or BA 325H), OBA 311 (or OBA 311H).

Equivalent to: BA 453H

BA 453H. Business Strategy and Planning. 4 Credits.

Provides conceptual tools for in-depth strategic analysis and interactive discussions from sources relevant to the challenge of developing and implementing strategy. Students cannot receive credit for both BA 453 and BA 453H.

Requisites: Prereq: MGMT 311 (or MGMT 311H), MKTG 311 (or MKTG 311H), BA 308 (or BA 308H), OBA 312 (or OBA 312H), OBA 335 (or OBA 335H), FIN 311 (or FIN 311H or EC 311), FIN 316 (or FIN 316H), BA 325 (or BA 325H), OBA 311 (or OBA 311H).

Equivalent to: BA 453

BA 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

BA 525. Law for Managers. 4 Credits.

Critical legal concepts that managers, entrepreneurs, and professionals need to understand to succeed in their careers and contribute positively to society. The course will examine how legal and ethical considerations interact focusing on the legal system of the United States.

BA 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BA 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

BA 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BA 606. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BA 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BA 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BA 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

BA 621. Business Writing. 1 Credit.

Reviews the theory and practice of writing effectively for U.S. and international business audiences, addressing the use of rhetorical, cultural, and organizational analysis to create persuasive business documents.

BA 661. Oregon Advanced Strategy. 3 Credits.

Examines advanced strategic analysis in corporate setting and integrates multidisciplinary values such as sustainability, product-service excellence, cultural values, financial strength, advanced marketing, entrepreneurial thinking, customer relationship management, big data analytics. This course is taught through the C-level practitioner's perspective.

Requisites: Prereq: MGMT 614.

BA 680. Data Visualization and Communication in Business. 3 Credits.

Focuses on how to organize and understand data, present visual information to varied audiences, and tell logical and persuasive data stories in order to make data more understandable in business contexts, focusing on clarity rather than complexity.

Requisites: Prereq: OBA 612.

BA 691. Professional Development for Emerging Managers. 2 Credits.

This course is designed to equip MS in Management students with essential professional skills needed to be successful in the program and beyond. Through interactive workshops, case studies, and skill-building exercises, students will develop competencies in communication, team collaboration, networking, and career readiness. By the end of this course, students from diverse academic backgrounds will gain the tools needed to navigate business environments confidently and pursue successful careers in business.

BA 705. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BA 707. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BA 708. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BA 710. Experimental Course: [Topic]. 1-9 Credits.

Experimental course - topic varies.

Repeatable 99 times

BA 711. Legal Environment of Business. 3 Credits.

Analysis of government policy and the legal environment in which business operates; the effects of law, government policy, and social forces on the formulation of business strategy and decision-making.

BA 712. Financial Accounting and Reporting. 3 Credits.

Preparation, interpretation, and use of external financial statements and reports. Covers basic accounting principles, recording and reporting techniques underlying valuation and income determination.

BA 713. Data and Business Decisions. 3 Credits.

Integrates statistical tools for analyzing business data and covers process analysis, data collection, regression, statistical control, and forecasting.

BA 714. Managerial Accounting. 3 Credits.

Introduction to cost accounting terminology; costing strategies, nontraditional costing systems, activity-based costing and product-service costing applications.

BA 715. Managerial Economics. 3 Credits.

Covers micro- and macroeconomic analyses and the concepts of cost, demand, profit, and competition. Examines monetary and fiscal policy, the Federal Reserve System, and money and capital markets.

BA 716. Managing Organizations. 3 Credits.

This course investigates organizations as complex social systems including: leadership, managing individuals, groups, teams, and formal and informal processes and systems.

BA 717. Marketing Management. 3 Credits.

Examines marketing analysis and planning necessary to develop marketing plans and strategies for a product-line. Includes basic marketing concepts and philosophies and brief exposure to macromarketing strategies. Sequence with BA 719.

BA 718. Financial Analysis. 4 Credits.

Covers objectives, tools, methods, and problems of financial management. Includes fund acquisitions, dividend policy, capital acquisitions, taxes, mergers, and investment banking. Sequence with BA 720.

BA 719. Marketing Strategy. 3 Credits.

Marketing strategies for product-service introduction, growth, maturity, and decline; managing product-service innovation and development; brand equity, relationship marketing. Sequence with BA 720.

Requisites: Prereq: BA 717.

BA 720. Corporate Financial Strategy. 3 Credits.

Advanced topics in firm evaluation (e.g., acquisitions, restructuring) and financial risk management (e.g., hedging, derivatives, foreign projects) as related to global and domestic corporate strategies. Sequence with BA 719.

Requisites: Prereq: BA 718.

BA 721. Business Writing. 1 Credit.

Reviews the theory and practice of writing effectively for U.S. and international business audiences, addressing the use of rhetorical, cultural, and organizational analysis to create persuasive business documents.

BA 722. Leadership and Motivation: [Topic]. 1 Credit.

LEAD is the leadership foundation course that runs across the entire first year. The instructors and 2nd year students lead the in-class discussions of a variety of leadership topics. Topics include elements of motivation and leadership that affect management decision-making and problem-solving.

Repeatable 2 times for a maximum of 3 credits

BA 723. Formulating Corporate Strategy. 3 Credits.

Focuses on how corporations choose to compete. Covers the analytical techniques and planning models appropriate for making this fundamental decision.

BA 725. Implementing Corporate Strategy. 3 Credits.

Uses problems and cases to examine the implementation of corporate strategy, the strategy process and cycle, and implementation methods. Sequence with BA 723.

BA 726. Global Business. 3 Credits.

Examines global competition and strategy, regional economic integration, cross-cultural challenges, foreign market entry, international joint ventures and strategic alliances, international dimensions in functional areas of business.

BA 727. Operations Management. 3 Credits.

Examines methods and processes for providing a competitive advantage through continuous quality and process improvements, supplier management, and efficient production of goods and services.

BA 728. Global Business Perspectives. 1 Credit.

Today's world requires managers to have a deep understanding of business practices on a global level. The curriculum of the Oregon Executive MBA program is focused on providing a global business education. The global study course is designed to complement the OEMBA curriculum by providing an immersive experience in global business.

BA 729. Business Negotiation. 3 Credits.

Explores the major theories and concepts of negotiation. Opportunities to practice deal-making and conflict resolution. Encourages improvement in communication and persuasion.

BA 730. Business Ethics. 1 Credit.

Studies the derivation of values and the application of those values to individual choices. Emphasizes the conflict manager's experience when choosing between two alternatives.

BA 731. New Venture Planning. 3 Credits.

Students identify and research a business opportunity; develop and present a professional start-up business plan that includes market, competitor, cash flow, and financial analyses.

BA 732. Technology and Innovation Management. 3 Credits.

Exposes students to the dynamics of industries driven by technological innovation, and focuses on thinking strategically about technological innovation and new product development and deployment.

BA 735. Opportunity Recognition. 3 Credits.

Provides students with techniques and models to identify and develop new opportunities and manage innovation processes.

BA 736. Alliances and Acquisitions. 3 Credits.

Using alliances and acquisitions as a strategic tool; emphasis on value creation. Includes deal valuation, deal-making, due diligence, integration, and ecosystem development. Builds on negotiation, strategy, and finance courses.

BA 740. Capstone Business Project I. 1-9 Credits.

Focuses on integration of functional areas of business. Includes writing a plan that applies knowledge and develops a course of action to accomplish organizational objectives. First in a series for 2yr OEMBA students.

Repeatable 3 times for a maximum of 9 credits

BA 741. Capstone Business Project II. 2 Credits.

Focuses on integration of functional areas of business. Includes writing a plan that applies knowledge and develops a course of action to accomplish organizational objectives. Second in a series for 2yr OEMBA students. Sequence with BA 740, BA 742.

BA 742. Capstone Business Project III. 4 Credits.

Focuses on integration of functional areas of business. Includes writing a plan that applies knowledge and develops a course of action to accomplish organizational objectives. Third in a series for 2yr OEMBA students. Sequence with BA 740, BA 741.

BA 743. Innovation and Entrepreneurship: [Topic]. 1 Credit.

This course focuses on various special topics related to both innovation and entrepreneurship. The ideas and tools discussed in this course may relate to new ventures and early-stage firms or explore the principles of innovation within a large and mature company. For example, the course may discuss how established organizations can apply entrepreneurial principles to innovate within their existing structures. The course may focus primarily on the venture capital market and explore funding sources, venture capital dynamics, business valuation, and legal agreements in new ventures.

Repeatable 3 times for a maximum of 4 credits when topic changes

BA 744. Managing Conflict and Change: [Topic]. 1 Credit.

The Oregon Executive MBA curriculum is focused on transitioning students from their current level of managerial expertise to a C-suite level of management. Part of that development requires the acquisition of management skills to navigate times when situations change or become difficult. This topics course provides opportunities to examine the dynamics of change and conflict within organizations, focusing on how leaders can effectively manage and navigate these challenges. Students will explore strategies for facilitating organizational transformation, resolving conflicts, and fostering positive outcomes in high-pressure environments. The course emphasizes the development of practical skills for managing both interpersonal and structural changes.

Repeatable 3 times for a maximum of 4 credits when topic changes

BA 745. Analytic Tools : [Topic]. 1 Credit.

The modern global business environment requires that managers not only be well trained in management principles, but also possess a set of analytical tools to help navigate complex decisions. This topics course provides opportunities for in-depth exploration of different analytical tools and techniques that support effective decision-making and problem-solving in organizational contexts. Students will develop skills to interpret data, evaluate complex scenarios, and apply quantitative and qualitative methods to drive strategic insights and improve business outcomes. The course emphasizes practical application and critical thinking to enhance managerial effectiveness.

Repeatable 3 times for a maximum of 4 credits when topic changes

Business Environment (BE)

Courses

BE 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

BE 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BE 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BE 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BE 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BE 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

BE 410. Experimental Course: [Topic]. 1-4 Credits.

A recent topic is Law for Managers.

Repeatable 99 times

BE 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BE 510. Experimental Course: [Topic]. 1-4 Credits.

A recent topic is Law for Managers.

Repeatable 99 times

BE 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

BE 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

BE 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

BE 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

BE 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

BE 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

BE 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

BE 610. Experimental Course: [Topic]. 1-5 Credits.

A recent topic is Global Business Environments.

Repeatable 99 times

BE 625. Business Law and Ethics. 3 Credits.

Examines the legal and ethical facets of real-life business cases and develops the core knowledge and critical thinking skills around law and ethics for today's successful business leaders.

Chemistry (CH)

Courses

CH 111. Introduction to Chemical Principles. 4 Credits.

Introduction to modern chemistry with emphasis on problem-solving skills and critical thinking. Fundamental mathematical techniques and skills are incorporated to illustrate the quantitative aspects of chemistry.

Requisites: Prereq: Satisfactory placement test score for MATH 111Z; Coreq: MATH 111Z.

Additional Information:

Science Area

CH 113. The Chemistry of Sustainability. 4 Credits.

Illustrates how chemistry provides innovative materials, processes, and consumer products that support sustainable solutions related to energy utilization, global warming and pollution prevention.

Requisites: Prereq: MATH 101 or higher; high school chemistry.

Additional Information:

Science Area

CH 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

CH 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CH 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 217. Chemistry Tools I. 1 Credit.

This course will introduce skills needed for success in chemistry and related sciences. Topics will include scientific writing, library and database searching, basic computer skills, the use of AI tools, and scientific ethics. This course is a sequence with CH 227Z, CH 228Z and CH 218, and CH 229Z and CH 219. Concurrent registration in CH 227Z required.

Requisites: Coreq: CH 227Z.

CH 218. Chemistry Tools II. 1 Credit.

This course is the second in a three-course sequence (CH 217/CH 218/CH 219) and will continue to develop skills needed for success in chemistry and related sciences. Topics will include data and error analysis, data presentation, library and database searching, and scientific writing. Concurrent registration in CH 228Z required.

Requisites: Coreq: CH 228Z.

CH 219. Chemistry Tools III. 1 Credit.

This course is the third in a three-course sequence (CH 217/CH 218/CH 219) and will further develop skills needed for success in chemistry and related sciences. Topics will include use of productivity and file management software, data and error analysis, presentation of scientific data, and scientific writing. Concurrent registration in CH 229Z required.

Requisites: Coreq: CH 229Z

CH 221Z. General Chemistry I. 4 Credits.

Explores and applies principles and applications of chemistry. Emphasis on measurement, components of matter, atomic and molecular structure, quantitative relationships including foundational stoichiometry, and major classes of chemical reactions. CH 221Z is a lecture course; CH 227Z is the laboratory component. Sequence with CH 222Z, CH 223Z.

Requisites: Prereq: CH 111 or satisfactory placement score; MATH 111Z. Coreq: MATH 112Z; CH 227Z recommended.

Equivalent to: CH 221, CH 224H

Additional Information:

Science Area

CH 222Z. General Chemistry II. 4 Credits.

Explores and applies principles presented in CH 221Z to the study of the solid, liquid, and gaseous states of matter. Principles of stoichiometry, thermochemistry, kinetics, and foundational equilibrium are explored and applied to the study of aqueous and gas-phase chemical reactions. CH 222Z is a lecture course; CH 228Z is the laboratory component. Sequence with CH 221Z, CH 223Z.

Requisites: Prereq: CH 221Z or CH 224H; MATH 112Z; Coreq: CH 228Z recommended.

Equivalent to: CH 222, CH 225H

Additional Information:

Science Area

CH 223Z. General Chemistry III. 4 Credits.

Builds upon the principles presented in CH 222Z, explores thermodynamics and chemical equilibrium, and applies them to the study of aqueous acid-base reactions, solubility, and electrochemistry. CH 223Z is a lecture course; CH 229Z is the laboratory component. Sequence with CH 221Z, CH 222Z.

Requisites: Prereq: CH 222Z or CH 225H; MATH 112Z; Coreq: CH 229Z recommended.

Equivalent to: CH 223, CH 226H

Additional Information:

Science Area

CH 224H. Advanced General Chemistry I. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical structure, reactions, stoichiometry, thermochemistry, and an introduction to quantum chemistry. Students cannot receive credit for both CH 221Z and CH 224H. Sequence with CH 225H, CH 226H.

Requisites: Prereq: satisfactory placement test score; MATH 112Z. Coreq: one from MATH 241, MATH 246, MATH 251Z, MATH 261.

Equivalent to: CH 221Z

Additional Information:

Science Area

CH 225H. Advanced General Chemistry II. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical bonding, states of matter, solutions, kinetics, and nuclear chemistry. Students cannot receive credit for both CH 222Z and CH 225H. Sequence with CH 224H, CH 226H.

Requisites: Prereq: CH 221Z or CH 224H; one from MATH 241, MATH 246, MATH 251Z, MATH 261. Coreq: one from MATH 242, MATH 247, MATH 252Z.

Equivalent to: CH 222Z

Additional Information:

Science Area

CH 226H. Advanced General Chemistry III. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical equilibrium, acid-base chemistry, thermodynamics, and electrochemistry. Students cannot receive credit for both CH 223Z and CH 226H. Sequence with CH 224H, CH 225H.

Requisites: Prereq: CH 222Z or CH 225H; one from MATH 242, MATH 247, MATH 252Z. Coreq: one from STAT 243Z, MATH 247, MATH 253Z.

Equivalent to: CH 223Z

Additional Information:

Science Area

CH 227Z. General Chemistry I Laboratory. 1 Credit.

Experiments correspond to the topics covered in CH 221Z including the fundamentals of chemical measurements, quantitative relationships in chemical analysis, and understanding atomic and molecular structure. CH 227Z is the laboratory component; CH 221Z is the lecture course. Concurrent registration in CH 217 required.

Requisites: Prereq: MATH 111Z. Co-req: CH 217, MATH 112Z. Pre- or coreq: CH 221Z or CH 224H.

Equivalent to: CH 227

CH 228Z. General Chemistry II Laboratory. 1 Credit.

Experiments correspond to the topics covered in CH 222Z including the fundamentals of intermolecular interactions, stoichiometric relationships, chemical equilibria and their application to the synthesis, identification, and analysis of chemical compounds. CH 228Z is the laboratory component; CH 222Z is the lecture course. Concurrent registration in CH 218 required.

Requisites: Prereq: CH 227Z; MATH 112Z. Coreq: CH 218; CH 222Z or CH 225H.

Equivalent to: CH 228

CH 229. General Chemistry Laboratory. 2 Credits.

Third term of the three-term laboratory sequence: synthesis, equilibrium, acids and bases, volumetric analyses, electrochemistry, nuclear chemistry. Students cannot receive credit for both CH 229 and CH 329.

Requisites: Prereq: CH 228 or CH 238; MATH 112Z; coreq: CH 223 or CH 226H.

Equivalent to: CH 229Z, CH 329

CH 229Z. General Chemistry III Laboratory. 1 Credit.

Experiments correspond to the topics covered in CH 223Z including the principles of chemical equilibria and their application to chemical analysis using volumetric and electrochemical methods. CH 229Z is the laboratory component; CH 223Z is the lecture course. Students cannot receive credit for both CH 229Z and CH 329. Concurrent registration in CH 219 required.

Requisites: Prereq: CH 228Z; MATH 112Z. Coreq: CH 219; CH 223Z or CH 226H.

Equivalent to: CH 229, CH 329

CH 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 329. Research Immersion Laboratory. 3 Credits.

Research lab immersion focused on developing basic concepts and practices of formulating and answering research questions based on data collected. Focus on applying concepts learned in general chemistry lecture classes to understand, collect and analyze research data. Students cannot receive credit for both CH 329 and CH 229Z.

Requisites: Prereq: CH 222Z or CH 225H; CH 228Z.

Equivalent to: CH 229, CH 229Z

CH 331. Organic Chemistry I. 4 Credits.

Structure, properties, and bonding of organic molecules.

Requisites: Prereq: CH 223Z or CH 226H with a grade of D- or better. Concurrent CH 337 recommended.

Equivalent to: CH 341

CH 335. Organic Chemistry II. 4 Credits.

Reactions and mechanisms of organic chemistry.

Requisites: Prereq: CH 331 or CH 341 with a grade of D- or better. Concurrent CH 338 recommended.

Equivalent to: CH 342

CH 336. Organic Chemistry III. 4 Credits.

Organic chemistry of biomolecules with a focus on chemical aspects.

Requisites: Prereq: CH 335 or CH 342 with a grade of D- or better.

Equivalent to: CH 343

CH 337. Organic Chemistry Laboratory. 3 Credits.

Principles and techniques of laboratory practice in organic chemistry.

Requisites: Prereq: CH 229Z; pre- or coreq: CH 331.

CH 338. Organic Chemistry Laboratory. 3 Credits.

Principles and techniques of laboratory practice in organic chemistry.

Requisites: Prereq: CH 331 or CH 341 with a grade of D- or better; CH 337 with a grade of D- or better; pre- or coreq: CH 335.

CH 341. Majors Track Organic Chemistry I. 4 Credits.

Structure, properties, and bonding of organic molecules. Provides a rigorous foundation appropriate for chemistry and biochemistry majors as they become chemical practitioners. Sequence with CH 342, CH 343.

Requisites: Prereq: CH 223Z or CH 226H. Concurrent CH 337 recommended.

Equivalent to: CH 331

CH 342. Majors Track Organic Chemistry II. 4 Credits.

Focuses on mechanisms and reactions of common organic functional groups. Sequence with CH 341, CH 343.

Requisites: Prereq: CH 331 (with a grade of B- or better) or CH 341. Concurrent CH 348 recommended.

Equivalent to: CH 335

CH 343. Majors Track Organic Chemistry III. 4 Credits.

Incorporates topics from the recent chemistry literature. Sequence with CH 341, CH 342.

Requisites: Prereq: CH 335 (with grade of B- or better) or CH 342. Concurrent CH 349 recommended.

Equivalent to: CH 336

CH 347. Majors Organic Chemistry Laboratory I. 3 Credits.

Organic chemistry laboratory techniques, theory and practice. Sequence with CH 348, CH 349.

Requisites: Prereq: CH 223Z, CH 229Z.

CH 348. Organic Chemistry Laboratory for Majors. 4 Credits.

Problem solving in the organic chemistry laboratory. Sequence with CH 337, CH 349.

Requisites: Prereq: CH 337; CH 331 or CH 341; coreq: CH 342.

CH 349. Organic Chemistry Lab for Majors. 4 Credits.

Organic chemistry laboratory projects. Two-dimensional nuclear magnetic resonance techniques. Sequence with CH 337, CH 348.

Requisites: Prereq: CH 348; coreq: CH 343.

CH 360. Physiological Biochemistry. 4 Credits.

For preprofessional health science students. Topics include protein structure and function, enzyme mechanisms, central metabolism and bioenergetics, integration and regulation of metabolism by hormone action. Students cannot receive credit for both CH 360 and CH 462.

Requisites: Prereq: CH 336 or CH 343; BI 214 or BI 282H recommended.

Equivalent to: CH 462

CH 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 399L. Special Studies: [Topic]. 3 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 401. Research: [Topic]. 1-21 Credits.

Introduction to methods of chemical investigation. For advanced undergraduates by arrangement with individual faculty members.

Repeatable 99 times

CH 403. Thesis. 1-12 Credits.

Open to students eligible to work for a bachelor's degree with honors in chemistry or biochemistry.

Repeatable 99 times

CH 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CH 406. Field Studies: [Topic]. 1-21 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

CH 407. Seminar: [Topic]. 1-5 Credits.

Biochemistry seminar for undergraduates who have completed or are enrolled in CH 461, CH 462, CH 463. No graduate credit.

Repeatable 99 times

CH 408. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

CH 409. Capstone. 1-12 Credits.

A culminating academic project that demonstrates a student's mastery of their field of study.

Repeatable 99 times

CH 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 410L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 411. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to chemical thermodynamics.

Requisites: Prereq: two years of college chemistry (except for physics majors); a grade of D- or better in PHYS 203 or PHYS 253; MATH 253Z with a grade of D- or better; MATH 256, MATH 281, MATH 282 strongly recommended.

CH 412. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to statistical mechanics and rate processes.

Requisites: Prereq: CH 411 with a grade of D- or better; MATH 256, MATH 281, MATH 282 strongly recommended.

CH 413. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to quantum chemistry.

Requisites: Prereq: CH 412 with a grade of D- or better; MATH 256, MATH 281, MATH 282 strongly recommended.

CH 417. Physical Chemistry Laboratory. 4 Credits.

Experiments in thermodynamics, modern electronic measurements, computer modeling, and data reduction.

Requisites: Pre- or coreq: CH 411.

CH 418. Physical Chemistry Laboratory. 4 Credits.

Experiments in statistical mechanics, chemical kinetics, plasma chemistry, and mass spectrometry.

Requisites: Prereq: CH 417; pre or coreq: CH 412.

CH 419. Physical Chemistry Laboratory. 4 Credits.

Experiments molecular spectroscopy, quantum chemistry, and laser-excited chemical and physical processes to illustrate theoretical principles.

Requisites: Prereq: CH 417; pre or coreq: CH 413.

CH 420. Physical Organic Chemistry I. 4 Credits.

Modern physical organic chemistry including chemical bonding, acid-base chemistry, thermochemistry, noncovalent interactions, and introduction to computational chemistry. Sequence with CH 421.

Requisites: Prereq: CH 336.

CH 421. Physical Organic Chemistry II. 4 Credits.

Modern physical organic chemistry including tools to study reaction mechanisms, kinetic analysis, isotope effects, and qualitative molecular orbital theory. Sequence with CH 420.

Requisites: Prereq: CH 420.

CH 429. Instrumental Analysis. 5 Credits.

Use of instrumental methods for quantitative determinations of unknown chemical samples.

Requisites: Prereq: CH 417.

CH 431. Inorganic Chemistry. 4 Credits.

Introduction to group theory for molecular symmetry; syntheses, structures, reactions, and reaction mechanisms of coordination complexes and organometallic complexes.

CH 432. Inorganic Chemistry. 4 Credits.

Bioinorganic chemistry: metals in biological systems; coordination chemistry, reactions, spectroscopy, metallocusters, and synthetic modeling.

Requisites: Prereq: CH 431 recommended.

CH 433. Inorganic Chemistry. 4 Credits.

Solid-state inorganic chemistry: solid-state structure and its determination; the electrical, magnetic, and mechanical properties of materials and their physical description.

Requisites: Prereq: CH 431 recommended.

CH 441. Quantum Chemistry. 4 Credits.

The principles of time-independent quantum mechanics and their application to model atomic and molecular systems.

Requisites: Prereq: CH 413 with a grade of D- or better.

CH 442. Quantum Chemistry and Spectroscopy. 4 Credits.

Molecular structure theory, perturbation theory, time-dependent quantum mechanics, theory of spectra, selection rules.

Requisites: Prereq: CH 441 with a grade of D- or better.

CH 443. Quantum Chemistry and Spectroscopy. 4 Credits.

Experimental spectra of atomic and molecular systems and surfaces.

Requisites: Prereq: CH 442 with a grade of D- or better.

CH 445. Statistical Mechanics. 4 Credits.

Molecular basis of thermodynamics. Applications to the calculation of the properties of noninteracting and weakly interacting systems.

Requisites: Prereq: CH 413 with a grade of D- or better.

CH 446. Chemical Kinetics: [Topic]. 4 Credits.

Description and interpretation of the time evolution of chemical systems.

Requisites: Prereq: CH 413 with a grade of D- or better.

Repeatable 99 times

CH 447. Computational Chemistry. 4 Credits.

Introduction to modern computational methods used to understand the properties of molecules.

Requisites: Prereq: [CH 411, CH 412] or PHYS 353.

CH 451. Advanced Organic-Inorganic Chemistry. 4 Credits.

Principles of organic-inorganic reaction dynamics; kinetics and mechanisms, linear free-energy relationships, isotope effects, substitution reactions, dynamic behavior of reactive intermediates, electron transfer chemistry.

Requisites: Prereq: CH 336 or CH 343 with a grade of D- or better.

CH 452. Advanced Organic Chemistry—Stereochemistry and Reactions. 4 Credits.

Principles and applications of stereochemistry; reagents and reactions, with mechanisms, used in contemporary organic synthesis; examples taken from the current literature.

CH 454. Advanced Electrochemistry. 4 Credits.

Advanced topics in electrochemistry including fundamental concepts (thermodynamics, kinetics, transport) and applications (analytical techniques, electrolysis, batteries).

Requisites: Prereq: CH 411.

CH 461. Biochemistry. 4 Credits.

Structure and function of macromolecules.

Requisites: Prereq: CH 336 or CH 343 with a grade of D- or better.

CH 462. Biochemistry. 4 Credits.

Metabolism and metabolic control processes. Energy and sensory transduction mechanisms.

Requisites: Prereq: CH 461 with a grade of D- or better.

Equivalent to: CH 360

CH 463. Biochemistry. 4 Credits.

Mechanisms and regulation of nucleic acid and protein biosynthesis. Other current topics in biochemical genetics.

Requisites: Prereq: CH 461 with a grade of D- or better or CH 360 with a grade of B- or better.

CH 464. RNA Biochemistry. 4 Credits.

Introduction to the diverse field of RNA biochemistry.

Requisites: Prereq: CH 463.

CH 465. Physical Biochemistry. 4 Credits.

Physical chemical properties of biological macromolecules; forces and interactions to establish and maintain macromolecular conformations; physical bases of spectroscopic, hydrodynamic, and rapid-reaction investigative techniques. Offered alternate years.

Requisites: Prereq: CH 461.

CH 466. Structural Biochemistry. 4 Credits.

Protein and nucleic acid structures and energetics. Structure determination by x-ray crystallography and nuclear magnetic resonance. Computational methods for structural analysis. Offered alternate years.

Requisites: Prereq: CH 461.

CH 467. Biochemistry Laboratory. 4 Credits.

Methods of modern molecular biology and protein purification.

Requisites: Coreq: CH 461.

CH 468. Cellular Biochemistry. 4 Credits.

This course surveys scientific discovery at the interface between cell biology and biochemistry. Emphasis will be placed on understanding how scientists visualize, quantify, and interpret how biochemical reactions are orchestrated in complex biological systems. Relationships between protein structure, function, and emergent properties will be defined.

Requisites: Prereq: CH 461.

CH 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CH 507. Seminar: [Topic]. 1-5 Credits.

Biochemistry seminar for undergraduates who have completed or are enrolled in CH 461, 462, 463. No graduate credit.

Repeatable 99 times

CH 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CH 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 510L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 511. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to chemical thermodynamics.

CH 512. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to statistical mechanics and rate processes.

CH 513. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to quantum chemistry.

CH 517. Physical Chemistry Laboratory. 4 Credits.

Experiments in thermodynamics, modern electronic measurements, computer modeling, and data reduction.

Requisites: Pre- or coreq: CH 511.

CH 518. Physical Chemistry Laboratory. 4 Credits.

Experiments in statistical mechanics, chemical kinetics, plasma chemistry, and mass spectrometry.

Requisites: Pre- or coreq: CH 512.

CH 519. Physical Chemistry Laboratory. 4 Credits.

Experiments in molecular spectroscopy, quantum chemistry, and laser-excited chemical and physical processes to illustrate theoretical principles.

Requisites: Pre- or coreq: CH 513.

CH 520. Physical Organic Chemistry I. 4 Credits.

Modern physical organic chemistry including chemical bonding, acid-base chemistry, thermochemistry, noncovalent interactions, and introduction to computational chemistry. Sequence with CH 521.

CH 521. Physical Organic Chemistry II. 4 Credits.

Modern physical organic chemistry including tools to study reaction mechanisms, kinetic analysis, isotope effects, and qualitative molecular orbital theory. Sequence with CH 520.

Requisites: Prereq: CH 520.

CH 531. Inorganic Chemistry. 4 Credits.

Introduction to group theory for molecular symmetry; syntheses, structures, reactions, and reaction mechanisms of coordination complexes and organometallic complexes.

CH 532. Inorganic Chemistry. 4 Credits.

Bioinorganic chemistry: metals in biological systems; coordination chemistry, reactions, spectroscopy, metallobusters, and synthetic modeling.

Requisites: Prereq: CH 531 recommended.

CH 533. Inorganic Chemistry. 4 Credits.

Solid-state inorganic chemistry: solid-state structure and its determination; the electrical, magnetic, and mechanical properties of materials and their physical description.

Requisites: Prereq: CH 531 recommended.

CH 541. Quantum Chemistry. 4 Credits.

The principles of time-independent quantum mechanics and their application to model atomic and molecular systems.

Requisites: Prereq: CH 513 or equivalent.

CH 542. Quantum Chemistry and Spectroscopy. 4 Credits.

Molecular structure theory, perturbation theory, time-dependent quantum mechanics, theory of spectra, selection rules.

Requisites: Prereq: CH 541 or equivalent.

CH 543. Quantum Chemistry and Spectroscopy. 4 Credits.

Experimental spectra of atomic and molecular systems and surfaces.

Requisites: Prereq: CH 542 or equivalent.

CH 545. Statistical Mechanics. 4 Credits.

Molecular basis of thermodynamics. Applications to the calculation of the properties of noninteracting and weakly interacting systems.

Requisites: Prereq: CH 513 or equivalent.

CH 546. Chemical Kinetics: [Topic]. 4 Credits.

Description and interpretation of the time evolution of chemical systems.

Requisites: Prereq: CH 513 or equivalent.

Repeatable 99 times

CH 547. Computational Chemistry. 4 Credits.

Introduction to modern computational methods used to understand the properties of molecules.

CH 551. Advanced Organic-Inorganic Chemistry. 4 Credits.

Principles of organic-inorganic reaction dynamics; kinetics and mechanisms, linear free-energy relationships, isotope effects, substitution reactions, dynamic behavior of reactive intermediates, electron transfer chemistry.

Requisites: Prereq: CH 336 or equivalent.

CH 552. Advanced Organic Chemistry—Stereochemistry and Reactions. 4 Credits.

Principles and applications of stereochemistry; reagents and reactions, with mechanisms, used in contemporary organic synthesis; examples taken from the current literature.

CH 554. Advanced Electrochemistry. 4 Credits.

Advanced topics in electrochemistry including fundamental concepts (thermodynamics, kinetics, transport) and applications (analytical techniques, electrolysis, batteries).

CH 561. Biochemistry. 4 Credits.

Structure and function of macromolecules.

CH 562. Biochemistry. 4 Credits.

Metabolism and metabolic control processes. Energy and sensory transduction mechanisms.

Requisites: Prereq: CH 561.

CH 563. Biochemistry. 4 Credits.

Mechanisms and regulation of nucleic acid and protein biosynthesis. Other current topics in biochemical genetics.

Requisites: Prereq: CH 561.

CH 564. RNA Biochemistry. 4 Credits.

Introduction to the diverse field of RNA biochemistry.

CH 565. Physical Biochemistry. 4 Credits.

Physical chemical properties of biological macromolecules; forces and interactions to establish and maintain macromolecular conformations; physical bases of spectroscopic, hydrodynamic, and rapid-reaction investigative techniques. Offered alternate years.

CH 566. Structural Biochemistry. 4 Credits.

Protein and nucleic acid structures and energetics. Structure determination by x-ray crystallography and nuclear magnetic resonance. Computational methods for structural analysis. Offered alternate years.

Requisites: Prereq: CH 561.

CH 567. Biochemistry Laboratory. 4 Credits.

Methods of modern molecular biology and protein purification.

CH 568. Cellular Biochemistry. 4 Credits.

This course surveys scientific discovery at the interface between cell biology and biochemistry. Emphasis will be placed on understanding how scientists visualize, quantify, and interpret how biochemical reactions are orchestrated in complex biological systems. Relationships between protein structure, function, and emergent properties will be defined.

CH 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CH 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CH 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CH 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

CH 607. Seminar: [Topic]. 1-5 Credits.

Seminars offered in biochemistry, chemical physics, materials science, molecular biology, neuroscience, organic-inorganic chemistry, and physical chemistry.

Repeatable 99 times

CH 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CH 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CH 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 610L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

CH 623. Organic-Inorganic Chemistry Journal Club. 1-2 Credits.

Preparation and delivery of colloquium-style lectures in organic-inorganic chemistry based on papers from the literature.

Repeatable 99 times

CH 624. Physical Chemistry Journal Club. 1 Credit.

Preparation and delivery of colloquium-style lectures in physical chemistry based on papers from the literature.

Repeatable 11 times for a maximum of 12 credits

CH 662. Advanced Biochemistry. 4 Credits.

Detailed consideration of enzyme mechanisms, macromolecular structure, protein-nucleic acid interactions, and selected aspects of biological synthesis.

CH 667. Polymers: Synthesis, Characterization, Processing. 4 Credits.

Methods of polymer synthesis and characterization; kinetics and mechanisms of the principal polymerization reactions. Introduction to mechanical properties and fabrication techniques.

CH 668. Physical Chemistry of Polymers and Coatings. 4 Credits.

Statistical and thermodynamic models for the equilibrium configuration, conformation, structure, mechanical properties, and phase transitions of polymer solutions, dense melts, liquid crystals.

CH 669. Polymer Synthesis and Characterization Laboratory. 4 Credits.

Preparation and physical characterization of polymers; emphasis on polymers of commercial interest.

CH 670. Industrial Polymer Projects Laboratory. 4 Credits.

Polymer industry-focused projects with emphasis on formulation and optimization of adhesives, coatings, thermoplastics, thermosets, drug delivery systems, biopolymers, personal care products.

Requisites: Prereq: CH 667, CH 668, CH 669.

CH 677M. Semiconductor Device Physics. 4 Credits.

Introduction to the theory behind semiconductors. Elementary theory of inorganic solids; electronic structures and transport properties. Basic theory of devices including diodes, transistors, mosfets, and optoelectronic devices. Offered only in summer. Sequence with PHYS 678M, PHYS 679M. Multilisted with PHYS 677M.

CH 678M. Semiconductor Processing and Characterization Technology. 4 Credits.

Introduction to the techniques required to make semiconductors and test their properties. Solid-state and surface chemistry of inorganic semiconductors as it pertains to microelectronic devices. Offered only in summer. Multilisted with PHYS 678M.

Requisites: Prereq: CH 677M.

CH 679M. Device Processing and Characterization Laboratory. 4 Credits.

Students use theory and techniques learned to design, fabricate, and test a device that performs a specific function, with an emphasis on wafer processing and device realization. Offered only in summer. Sequence with CH 677M, CH 678M. Multilisted with PHYS 679M.

Requisites: Prereq: CH 678M.

CH 680. Electronics and Vacuum Systems. 4 Credits.

Introduction to modern electronic components, circuits, basic vacuum theory, vacuum failure modes, measurement systems, and troubleshooting.

CH 681. Introduction to Electron Microscopy. 4 Credits.

Introduction to theory and best practices for applying scanning electron (SEM) and transmission electron microscopy (TEM) in materials science.

CH 682. Electron Microprobe Analysis. 4 Credits.

Introduction to the theory and operation of instrumentation for electron microprobe analysis (EPMA) in materials science and geochemistry.

CH 683. Surface Analysis. 4 Credits.

Introduction to theory and best practices for surface analysis techniques (XPS and ToF-SIMS), with focus on applications for materials science.

CH 685. Advanced Transmission Electron Microscopy. 4 Credits.

Advanced theory and practices for using transmission electron microscopy, as applied to materials science.

Requisites: Prereq: CH 681.

CH 686. Advanced Scanning Electron Microscopy. 4 Credits.

Advanced theory and practices for using focused ion beam and scanning electron microscopy in research and nanofabrication.

Requisites: Prereq: CH 681.

CH 687. Advanced Surface Analysis. 4 Credits.

Advanced theory and practices for surface analysis spectroscopy, as applied to materials science.

Requisites: Prereq: CH 683.

CH 689. Chemistry Professional Development. 1 Credit.

Students will develop their awareness of pathways for professional development in chemical technology and identify strategic areas for pursuing growth. Working with the instructors, they will design a plan to explore their strengths and interests and identify career opportunities.

CH 690. Numerical Simulation in Electrochemistry. 2 Credits.

Modern finite-element simulation software is widely used in engineering to predict system performance/properties or in science to understand complex system behavior. Students will learn use industry standard software suites to simulate electrochemical cells and devices to predict performance and develop an understanding of underlying phenomena.

Requisites: Pre- or coreq: CH 554.

CH 691. Analytical Electrochemistry Laboratory. 2 Credits.

This course will focus on typical three-electrode electrochemical experiments and laboratory techniques that form the basis for analytical electrochemistry and for building the basic electrochemistry knowledge and intuition with respect to thermodynamics, kinetics and mass transport.

Requisites: Pre- or coreq: CH 554.

CH 692. Electrochemical Device Engineering. 4 Credits.

This course examines the operational principles of electrochemical energy storage devices (batteries and capacitors), energy conversion devices (fuel cells, electrolyzers), and bioelectrochemical interfaces. The emphasis is on materials and device design based on fundamental chemistry and physics concepts that govern the properties and performance.

Requisites: Prereq: CH 554.

CH 693. Electrochemical Device Laboratory. 4 Credits.

Students will work in small teams to build battery devices, electrolyzers for the production of chemicals and/or fuels, fuel cells, and biological interfaces. They will test the performance and response of these devices compared to theory and modelling, applying experimental design and statistical analysis methods.

Requisites: Prereq: CH 554; pre- or coreq: CH 692.

CH 694. Applied Electrochemistry Projects Laboratory. 4 Credits.

This course requires students to work in teams to solve open-ended research and development projects in electrochemistry. The applied research and development projects for the course come from industry partners, national laboratories, and academic research laboratories.

Requisites: Prereq: CH 554.

CH 695. External Graduate Internship. 1-10 Credits.

Student will complete internships in industry, a national laboratory, or other research setting to provide opportunities to make connections between the theory and practice of academic study and the practical application of that study in a professional environment.

Repeatable 2 times for a maximum of 30 credits

Chinese (CHN)

Courses

CHN 101. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

CHN 102. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

Requisites: Prereq: CHN 101.

Equivalent to: CHN 105

CHN 103. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

Requisites: Prereq: CHN 102.

Equivalent to: CHN 106

CHN 105. Accelerated First-Year Chinese I. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of listening comprehension, speaking, reading, and writing. Sequence with CHN 106.

Requisites: Prereq: CHN 101 with grade of A- or higher.

Equivalent to: CHN 102

CHN 106. Accelerated First-Year Chinese II. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 105.

Requisites: Prereq: CHN 102 with a grade of A or higher or CHN 105 with a grade of A or higher.

Equivalent to: CHN 103

CHN 150. Introduction to Chinese Narrative. 4 Credits.

Introduction to specific features of Chinese narrative. Readings may span traditional to contemporary literature. Focuses on analysis of characterization, symbolism, causality, and formal issues. Taught in English.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CHN 151. Introduction to Chinese Film. 4 Credits.

Introduction to the cinemas of China, Taiwan, and Hong Kong, featuring films by directors like Zhang Yimou, Chen Kaige, John Woo, Jia Zhangke, Edward Yang, Ann Hui, and Ang Lee. No background in Chinese necessary; English subtitles.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CHN 152. Introduction to Chinese Popular Culture. 4 Credits.

Introduction to popular Chinese cultures in China, Hong Kong, Taiwan, and the United States. Discussion focuses on nationalism, globalization, identity, and gender. No background in Chinese necessary; taught in English.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CHN 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

CHN 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CHN 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CHN 201. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Requisites: Prereq: CHN 103 or CHN 106.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CHN 202. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Requisites: Prereq: CHN 201.

Equivalent to: CHN 205

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CHN 203. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Requisites: Prereq: CHN 202.

Equivalent to: CHN 206

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

CHN 204. Accelerated Second-Year Chinese I. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 205, CHN 206.

Requisites: Prereq: CHN 103 with a grade of A or higher or CHN 106 with a grade of B+ or higher.

Equivalent to: CHN 201

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

CHN 205. Accelerated Second-Year Chinese II. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 204, CHN 206.

Requisites: Prereq: CHN 201 with a grade of A or higher or CHN 204 with a grade of B+ or higher.

Equivalent to: CHN 202

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

CHN 206. Accelerated Second-Year Chinese III. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 204, CHN 205.

Requisites: Prereq: CHN 202 with a grade of A or higher or CHN 205 with a grade of B+ or higher.

Equivalent to: CHN 203

Additional Information:

Arts Letters Area

Expansion of skills in formal written Chinese to communicate with native speakers about thoughts and professional knowledge.

Requisites: Prereq: CHN 420.

Repeatable 3 times for a maximum of 16 credits

CHN 445. Advanced Chinese: [Topic]. 4 Credits.

Focuses on group and individual language study on a specific topic, such as cultural geography of China, religious studies, or business.

Requisites: Prereq: CHN 422.

Repeatable 2 times for a maximum of 12 credits

CHN 452. Chinese Film and Theory. 4 Credits.

Examines Chinese film and film theory. Focuses on Chinese film in cultural debate and in the international film arena.

Additional Information:

Cultural Literacy: Global Perspectives

CHN 480. Chinese Linguistics. 4 Credits.

Introduces students to various linguistic levels of Chinese; covers basic concepts and methodologies of linguistic analysis, including the relationship between language structure, culture, and cognition.

CHN 482. History of the Chinese Language. 4 Credits.

Introduction to the various stages of the historical development of the Chinese language family. Offered alternate years.

CHN 503. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CHN 507. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources are in Chinese, English, or both.

Repeatable 99 times when topic changes

CHN 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CHN 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CHN 513. Modern Chinese Texts: [Topic]. 4 Credits.

Readings and discussion in Chinese of Chinese modern literary and cultural texts. Topics change yearly.

Repeatable 1 time for a maximum of 8 credits when topic changes

CHN 520. Intermediate Language Strategies. 4 Credits.

Focuses on group and individual language study that is typically correlated with a specific content course concerning China or other Chinese-speaking areas. Sequence with CHN 521, CHN 522.

CHN 534. Media Chinese. 4 Credits.

Advanced Chinese language course designed for students who have successfully completed at least three years of Chinese language studies to acquire Chinese language media literacy.

CHN 536. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 537. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 545. Advanced Chinese: [Topic]. 4 Credits.

Focuses on group and individual language study on a specific topic, such as cultural geography of China, religious studies, or business.

Repeatable 2 times for a maximum of 12 credits

CHN 552. Chinese Film and Theory. 4 Credits.

Examines Chinese film and film theory. Focuses on Chinese film in cultural debate and in the international film arena.

CHN 580. Chinese Linguistics. 4 Credits.

Introduces students to various linguistic levels of Chinese; covers basic concepts and methodologies of linguistic analysis, including the relationship between language structure, culture, and cognition.

CHN 582. History of the Chinese Language. 4 Credits.

Introduction to the various stages of the historical development of the Chinese language family. Offered alternate years.

CHN 601. Research: [Topic]. 1-10 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CHN 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CHN 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member. Repeatable as student projects warrant.

Repeatable 99 times

CHN 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

CHN 607. Seminar: [Topic]. 1-6 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources in Chinese, English, or both.

Repeatable 99 times when topic changes

CHN 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Cinema Studies (CINE)

Courses

CINE 110M. Introduction to Film and Media. 4 Credits.

Introduction to film and media studies and various methods of critical analysis. Multilisted with ENG 110M.

CINE 370. Narrative Production II. 4 Credits.

Focuses on the creative choices and intermediate skills of narrative production.

Requisites: Prereq: JCOM 201; CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267; one from ARTD 256, CINE 270, JCOM 220.

CINE 381M. Film, Media, and Culture. 4 Credits.

Study of film and media as aesthetic objects that engage with communities identified by class, gender, race, ethnicity, and sexuality. Multilisted with ENG 381M.

Equivalent to: ENG 381M

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

CINE 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

CINE 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CINE 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience. Only 4 credits may count toward the cinema studies major.

Repeatable 11 times for a maximum of 12 credits

CINE 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member. Only 4 credits may count toward the cinema studies major.

Repeatable 11 times for a maximum of 12 credits

CINE 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CINE 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Requisites: Prereq: JCOM 201; CINE 260M or ENG 260M; one from ARTD 256, CINE 270, JCOM 220; two from CINE 265, CINE 266, CINE 267.

Repeatable 99 times when topic changes

CINE 410. Experimental Course. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CINE 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry, examining key moments in the development of Hollywood, including the consolidation and restructuring of the major movie studios, the film industry's relationship to TV and the Internet. Journalism Majors and MEST minor. Multilisted with JCOM 411M.

Requisites: Prereq: JCOM 201.

Equivalent to: JCOM 411M

CINE 420. Advanced Screenwriting. 4 Credits.

Provides advanced screenwriting students with an organized strategy for writing a feature film screenplay. Sequence with CINE 320.

Requisites: Prereq: CINE 320 with grade of B– or better.

CINE 425. Cinema Production: [Topic]. 4 Credits.

Exploration of intermediate to advanced techniques used in cinema production—from music videos to digital sound recording to 16-millimeter film. Topics include Directing, Digital Single-Lens Reflex Camera Production, Music Video Production.

Requisites: Prereq: CINE 260M or ENG 260M; JCOM 201; two from CINE 265, CINE 266, CINE 267; one from ARTD 256, CINE 270, JCOM 220.

Repeatable 3 times for a maximum of 16 credits when topic changes

CINE 426. Art of Directing: [Topic]. 4 Credits.

Explores different approaches to directing by investigating a filmmaker's use of narrative and aesthetic tools. Students will learn to work with actors, visualize stories, and build narratives through exercises based on particular directing techniques.

Requisites: Prereq: JCOM 201; CINE 260M or ENG 260M; one from ARTD 256, CINE 270, JCOM 220; and two from CINE 265, CINE 266, CINE 267.

Repeatable 2 times for a maximum of 12 credits

CINE 430. Advanced Media Industry Studies: [Topic]. 4 Credits.

Engages in an advanced study of media industry practices across film, video, and television, with a focus on the economic, institutional, and cultural forces shaping the media landscape.

Repeatable 2 times for a maximum of 12 credits when topic changes

CINE 440. National and Regional Cinema: [Topic]. 4 Credits.

Explores cinematic traditions, artistic styles and industrial practices in specific national and regional contexts as well as cinema's global development. Also examines issues of transnationalism, globalization, and diaspora.

Repeatable 2 times for a maximum of 12 credits when topic changes

CINE 486M. New Media and Digital Culture: [Topic]. 4 Credits.

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Multilisted with ENG 486M.

Repeatable 2 times for a maximum of 12 credits

Equivalent to: ENG 486M

CINE 490. Directors and Genres: [Topic]. 4 Credits.

Aesthetic, historical, and theoretical analysis of films, video, and television.

Repeatable 2 times for a maximum of 12 credits when topic changes

CINE 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CINE 510. Experimental Course. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CINE 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with JCOM 511M.

CINE 540. National and Regional Cinema: [Topic]. 4 Credits.

Explores cinematic traditions, artistic styles and industrial practices in specific national and regional contexts as well as cinema's global development. Also examines issues of transnationalism, globalization, and diaspora.

Repeatable 2 times for a maximum of 12 credits when topic changes

CINE 586M. New Media and Digital Culture: [Topic]. 4 Credits.

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Multilisted with ENG 586M.

Repeatable 2 times for a maximum of 12 credits

CINE 590. Directors and Genres: [Topic]. 4 Credits.

Aesthetic, historical, and theoretical analysis of films, video, and television.

Repeatable 2 times for a maximum of 12 credits when topic changes

CINE 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

Classics (CLAS)

Courses

CLAS 110. Classical Mythology. 4 Credits.

Introduction to the world of Greek and Roman mythology with an emphasis on the issues of personal and social identity.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CLAS 111. Ancient Athletics in Greece and Rome. 4 Credits.

This course explores the role of sports, games and athletics in the lives of the ancient Greeks and Romans. Beginning with the disciplines of the ancient Olympic festivals in Greece, we consider the way these were interwoven with the development of Greek thought, society, warfare and politics, especially the democratic polis. We also consider the role of spectacular entertainments such as chariot racing and gladiatorial combat in imperial Rome.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CLAS 188. Introduction to Classical Archaeology. 4 Credits.

Introduction to the archaeology and material culture of the Ancient Greeks and Romans.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

CLAS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CLAS 201. Greek Life and Culture. 4 Credits.

Introduces students to the literature, history, and art of ancient Greece. Students develop an appreciation for Greek culture and its similarities to and differences from American culture.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CLAS 202. Roman Life and Culture. 4 Credits.

Examines a thousand years of Roman life and culture from the founding of the city Rome in the 8th century BCE to the founding of the "New Rome, Constantinople, in the fourth century CE.

Additional Information:

Arts Letters Area

CLAS 301. Greek and Roman Epic. 4 Credits.

Analysis of the heroic tradition and epic themes in the Homeric poems, the works of Hesiod, and the Aeneid. Emphasis on literary criticism and intellectual history and the reception of these works by later writers and artists.

Additional Information:

Arts Letters Area

CLAS 302. Greek and Roman Tragedy. 4 Credits.

Examination of the major Greek tragedians, Aeschylus, Sophocles, Euripides, and the Roman, Seneca, from the viewpoint of literary criticism and cultural and intellectual history.

Additional Information:

Arts Letters Area

CLAS 303. Classical Greek Philosophers. 4 Credits.

Introduction to the philosophies of Plato and/or Aristotle from the viewpoint of Greek intellectual history.

Additional Information:

Arts Letters Area

CLAS 310. Early China, Ancient Greece. 4 Credits.

Examines the relationship between knowledge and wisdom in literature produced by two different ancient civilizations, Greece and China, from c. 1000 BCE to 86 CE. Offered alternate years.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CLAS 311. Death and Rebirth in Greece and India. 4 Credits.

Explores Greco-Roman and Indian conceptions of the soul and beliefs concerning the afterlife, particularly those of reincarnation and soul transmigration. Offered alternate years.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CLAS 314. Gender and Sexuality in Antiquity. 4 Credits.

Introduction to construction of the categories of norms of Western sexuality through study of Greek and Roman attitudes toward gender roles, homo- and heterosexuality, the family, and privacy.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

CLAS 330. Greek and Roman Archaeology: [Topic]. 4 Credits.

A course of variable content focusing on issues and methods of Mediterranean archaeology from the Bronze Age to Late Antiquity.

Repeatable 2 times for a maximum of 12 credits when topic changes

CLAS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CLAS 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CLAS 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CLAS 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CLAS 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CLAS 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CLAS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CLAS 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CLAS 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Requisites: Prereq: second-year proficiency in Greek or Latin.

Repeatable 99 times

CLAS 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CLAS 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CLAS 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CLAS 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CLAS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CLAS 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CLAS 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CLAS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CLAS 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CLAS 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CLAS 611. Introduction to Philological Methods. 4 Credits.

Introduces graduate students to methodological approaches for the study of antiquity, employing faculty expertise in literary criticism, ancient art, historiography, epigraphy, ancient philosophy, and paleography.

College of Arts and Sciences (CAS)

Courses

CAS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CAS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CAS 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CAS 402. Supervised College Teaching. 1-5 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 99 times

CAS 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

CAS 407. Seminar: [Topic]. 1-12 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CAS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CAS 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CAS 410L. Experimental Course: [Topic]. 2 Credits.

Experimental course - topic varies.

Repeatable 99 times

CAS 417. Career Readiness. 2 Credits.

This class provides a foundation for students to critically reflect on their values, interests, personality, and skills. Students then focus on communicating these in different modalities and to different audiences through the job search, networking, job applications, and interviews. This course's credit contribution to the completion of the Bachelor's degree is limited by General Limitations 3d.

Additional Information:

General Limitation applies: Applied, skills, career, or professional development course

CAS 507. Seminar: [Topic]. 1-12 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

College of Design (DSGN)

Courses

DSGN 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

DSGN 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

DSGN 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSGN 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSGN 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

DSGN 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

DSGN 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

DSGN 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

DSGN 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

DSGN 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times when topic changes

DSGN 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times when topic changes

DSGN 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSGN 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

DSGN 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times when topic changes

DSGN 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSGN 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

DSGN 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

DSGN 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

DSGN 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

DSGN 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Communication Disorders and Sciences (CDS)

Courses

CDS 201. Communication Disorders in Society and Media. 4 Credits.
Survey of communication disorders and differences, comparing individual and social-cultural perspectives through popular media and real case examples.

Requisites: Prereq: WR 121Z or HC 101H.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

CDS 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CDS 405. Reading and Conference: [Topic]. 1-3 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CDS 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CDS 407. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CDS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CDS 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

CDS 430. Speech Pathology-Audiology as Professions. 2 Credits.

Introduces the broad dimensions of the speech-language pathology and audiology professions. Begins undergraduate process of acquiring observation hours required for graduate school. Sequence with CDS 431.

CDS 431. Beginning Clinical Methods. 3 Credits.

Focuses on basic methods for assessment and intervention within an evidence-based framework. Includes fifteen hours of guided observation. Sequence with CDS 430.

Requisites: Prereq: CDS 430.

CDS 442. Anatomy and Physiology of Speech Mechanism. 4 Credits.

Study of anatomy, physiology, and neurology of speech and language processes.

CDS 444. Clinical Phonetics and Phonology. 4 Credits.

Focuses on sounds and symbols of American English, foreign accents, and dialects using broad and narrow transcription methods. Presents speech production, distinctive features, and basics of phonology.

Requisites: Prereq: CDS 442, CDS 450.

CDS 450. Introduction to Language Development. 4 Credits.

Primary focus on the development of phonology, morphology, syntax, semantics, pragmatics, and literacy.

Requisites: Prereq: LING 150; one from WR 122Z, WR 123, HC 221H.

CDS 455. Child and Adolescent Development. 4 Credits.

Covers theories, norms, and concepts related to child and adolescent development. Geared toward allied health professionals and educators working in a variety of settings.

CDS 457. Fundamentals of Audiology. 4 Credits.

Anatomy and physiology of hearing and vestibular systems; causes, types, and symptomatology of hearing impairment.

CDS 458. Audiology Disorders and Treatment. 4 Credits.

Pure tone, speech and impedance audiometry. Special tests, difficult-to-test populations, and central auditory processing. Audiogram interpretation and report writing.

Requisites: Prereq: CDS 457.

CDS 460. Developmental Disorders in Communication. 4 Credits.

Explores growth and developmental disorders that cause or contribute to child and adult speech, language, and fluency impairments.

Requisites: Prereq: CDS 450.

CDS 462. Acquired Disorders of Communication. 4 Credits.

Explores neurologic disorders that cause or contribute to child and adult speech, language, and voice impairments.

Requisites: Prereq: CDS 470.

CDS 470. Neuroscience of Speech and Language. 4 Credits.

Foundation in normal neuroanatomy and neurophysiology and the clinical signs observed with nervous-system damage.

Requisites: Prereq: CDS 442.

CDS 503. Thesis. 1-15 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CDS 507. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CDS 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

CDS 542. Anatomy and Physiology of Speech Mechanism. 4 Credits.

Study of anatomy, physiology, and neurology of speech and language processes.

CDS 544. Clinical Phonetics and Phonology. 4 Credits.

Focuses on sounds and symbols of American English, foreign accents, and dialects using broad and narrow transcription methods. Presents speech production, distinctive features, and basics of phonology.

CDS 550. Introduction to Language Development. 4 Credits.

Primary focus on the development of phonology, morphology, syntax, semantics, pragmatics, and literacy.

CDS 557. Fundamentals of Audiology. 4 Credits.

Anatomy and physiology of hearing and vestibular systems; causes, types, and symptomatology of hearing impairment.

CDS 558. Audiology Disorders and Treatment. 4 Credits.

Pure tone, speech and impedance audiometry. Special tests, difficult-to-test populations, and central auditory processing. Audiogram interpretation and report writing.

CDS 560. Developmental Disorders in Communication. 4 Credits.

Explores growth and developmental disorders that cause or contribute to child and adult speech, language, and fluency impairments.

CDS 562. Acquired Disorders of Communication. 4 Credits.

Explores neurologic disorders that cause or contribute to child and adult speech, language, and voice impairments.

CDS 570. Neuroscience of Speech and Language. 4 Credits.

Foundation in normal neuroanatomy and neurophysiology and the clinical signs observed with nervous-system damage.

Requisites: Prereq: CDS 542.

CDS 601. Research: [Topic]. 1-9 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CDS 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CDS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CDS 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CDS 607. Seminar: [Topic]. 1-3 Credits.

Topics include Multicultural Issues in Communication Disorders and Sciences, Dysphagia, Professional Ethics.

Repeatable 99 times

CDS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CDS 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CDS 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CDS 611. Clinical Methods. 1 Credit.

Provides methodology behind the sound clinical practices and fundamentals of the UO Speech-Language-Hearing Center operations. Prepares students to begin working with clients.

CDS 620. Workshop: Evidence-Based Practice. 1-2 Credits.

This course supports students in developing their Evidence-Based Practice Projects via: (1) methods to promote critical evaluation and adoption of research findings; (2) principles of culturally responsive research practice, practice-based evidence and implementation science; and (3) activities to prepare students to complete their EBP projects.

Repeatable 3 times for a maximum of 4 credits

CDS 621. Practicum I. 1-7 Credits.

Designed to support first year master's students as they proceed with their clinical training. The course will provide methodology, evidence-based practice and clinic operations training. The focus on using evidence-based practice and rational clinical decision-making will be incorporated throughout class instruction and clinical experiences.

Repeatable 4 times for a maximum of 30 credits

CDS 622. Practicum II. 1-7 Credits.

Designed to help prepare second-year students for their medical and school externships. Students will learn clinical skills in the following areas: professional issues in medical settings; documentation in medical settings; ethical issues in speech-language pathology; school practicum requirements; professional issues in securing employment.

Repeatable 4 times for a maximum of 30 credits

CDS 623. September Experience in Speech Language Pathology. 3 Credits.

The primary goal of the 4-week School Externship (September Experience) is to prepare Graduate Student Clinicians (GSC) to become professionals who will make major contributions to the field of Speech-Language Pathology. There are specific skills that all Speech-Language Pathologists (SLP) perform and the GSC will be prepared to demonstrate these skills by the end of this externship.

Repeatable 1 time for a maximum of 6 credits

CDS 624. Medical Externship. 1-15 Credits.

Designed to prepare Graduate Student Clinicians to become Speech-Language Pathologists who can work in the medical setting. There are specific skills that Speech-Language Pathologists in the medical setting perform and the GSC will be prepared to demonstrate these skills by the end of this externship.

Repeatable 1 time for a maximum of 30 credits

CDS 625. Final Full-Time Practicum. 1-15 Credits.

Diagnostic and treatment experience in the public school setting.

Repeatable 1 time for a maximum of 30 credits

CDS 627. Fluency Disorders. 2 Credits.

This course is designed to provide students with a foundation in the diagnosis and treatment of fluency disorders across the lifespan, with an emphasis on developmental stuttering.

CDS 631. Cultural-Linguistic Diversity for Clinicians : [Topic]. 1-3 Credits.

Topics include Multicultural Issues in Communication Disorders and Sciences, Dysphagia, Professional Ethics.

Repeatable 1 time for a maximum of 6 credits

CDS 633. Practice with Dual Language Learners. 1 Credit.

Discussion-based seminar designed to further foundational knowledge of dual language assessment and intervention as it relates to the practice of speech-language pathology. Focus is on assessment and intervention with dual language learners ages 0-5 from Spanish-speaking language backgrounds in the context of the US. Sequence with CDS 632.

Requisites: Prereq: CDS 632.

CDS 649. Feeding and Swallowing Disorders. 4 Credits.

Nature and characteristics of feeding and swallowing; methods of evaluation and management of feeding and swallowing in adults and children.

CDS 651. School-Age Language Disorders. 4 Credits.

Presents normal language development and language disorders in school-age children and adolescents. Emphasizes contributions from linguistics, psychology, education, and learning theory.

CDS 652. Speech Sound Disorders. 4 Credits.

Causes and consequences of phonological disorders; principles and procedures for assessment and intervention.

CDS 654. Management of Adult Language Disorders. 4 Credits.

Provides a foundation in diagnosis and treatment of adult neurogenic language disorders, concentrating on aphasia and the cognitive-linguistic changes associated with dementia.

CDS 656. Voice Science and Disorders. 3 Credits.

Anatomy and physiology of vocal mechanism; diagnostic and therapeutic approaches for various voice disorders.

CDS 657. Augmentative Procedures for Communication Disorders. 2 Credits.

Recent advancements in design, development, and use of systems supplemental to vocal speech and language.

CDS 660. Motor Speech Disorders. 3 Credits.

Advanced study of speech disorders associated with lesions of central and peripheral nervous systems.

CDS 663. Management of Acquired Cognitive Disorders. 4 Credits.

Examines current theory and practice in cognitive rehabilitation. Reviews models and tools for treating attention, memory, and dysexecutive syndromes.

Requisites: Prereq: CDS 662.

CDS 665. Language Disorders in Children. 2,4 Credits.

Child language disorders and related topics, including principles of assessment and intervention, cultural awareness and sensitivity, clinical application, and working with families.

CDS 706. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CDS 707. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CDS 708. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CDS 709. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CDS 710. Experimental Course [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Comparative Literature (COLT)

Courses

COLT 101. Introduction to Comparative Literature. 4 Credits.

Introduction to the comparative study of literature. Emphasis on literary genre, world literature, historical period.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

COLT 102. Introduction to Comparative Literature. 4 Credits.

Introduction to the comparative study of literature. Emphasis on significant works of world literature in their social and political contexts.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

COLT 103. Introduction to Comparative Literature. 4 Credits.

Study of visual culture from around the world.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

COLT 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

COLT 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

COLT 211. Comparative World Literature. 4 Credits.

Explores literature from a global standpoint. Examines movement of literary forms (e.g., genres, motifs, rhetorical modes) across cultures, regions, historical epochs.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

COLT 212. Comparative World Cinema: [Topic]. 4 Credits.

Introduces the principles of comparative analysis, exploring the aesthetic, ideological, and socio-economic exchanges between national cinematic traditions. Themes vary by instructor. Recent themes include Melodrama, Zombies, Queer Cinema.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

COLT 213. United States Culture in Comparative Contexts. 4 Credits.

Introduction to comparative analysis of literature and culture with emphasis on multilingual US-based writers reflecting on history, memory, identity, and place. Emphasis on the representation of race, gender, power, identity, difference. Introduces core methodologies: close-reading, analysis, comparison, and critique.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

COLT 231. Literature and Society. 4 Credits.

Introduction to the interdisciplinary study of literature in relation to society and politics. Draws on perspectives from political science, law, sociology, and related fields.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

COLT 232. Literature and Film. 4 Credits.

Introduction to the interdisciplinary study of literature and film. Draws on perspectives from cinema studies, media aesthetics, and related fields.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

COLT 301. Approaches to Comparative Literature. 4 Credits.

Introduction to theory and methods in comparative literature, with some attention to the history and problems of the discipline.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

COLT 302. Theories of Poetry. 4 Credits.

Introduction to the study of poetry and poetic form from a world perspective. Offered alternate years.

COLT 303. Theories of the Novel. 4 Credits.

Introduction to the study of narrative and the novel from a world perspective. Offered alternate years.

COLT 305. Cultural Studies. 4 Credits.

Introduction to the interdisciplinary study of cultural discourses and practices.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

COLT 360. Gender and Identity in Literature. 4 Credits.

Introduction to the study of gender in literature, from Asia to Europe to the Americas, and from the classics to the late 20th century.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

COLT 370. Comparative Comics. 4 Credits.

Examines genre of narrative from a comparative and global standpoint, reviewing the impact of comics and other visual media on questions of national, regional, and ethnic identity. Offered alternate years.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

COLT 380. Comparative Media: [Topic]. 4 Credits.

Critical analysis of a range of media from a transnational and/or intercultural perspective. Taught as a hybrid course blending face-to-face and online learning. Recent topics include Tokyo Cyberpunk, Asian Horror, Listening to Cinema.

Repeatable 3 times for a maximum of 16 credits

COLT 390. Comparing Identities, Agencies and Differences. 4 Credits.

A critical reflection on contemporary US power imbalances and systems of race, ethnic, gender and religious privilege, as viewed through the lens of poetry. Students analyze U.S. poetry in comparative contexts (Europe, Asia, Africa). Depending on instructor, comparison may be across historical periods.

Additional Information:

Arts Letters Area
Cultural Literacy: US: Difference, Inequality, Agency

COLT 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

COLT 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

COLT 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

COLT 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

COLT 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

COLT 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

COLT 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

COLT 415. Capstone Seminar. 4 Credits.

Senior seminar for all comparative literature students includes development and presentation of an original research project.

Repeatable 3 times for a maximum of 16 credits

COLT 450. Comparative Studies in Cinema: [Topic]. 4 Credits.

Advanced consideration of the aesthetic (including literary) and cultural contexts of world film.

Repeatable 2 times for a maximum of 12 credits when topic changes

COLT 460. Major Theorists: [Topic]. 4 Credits.

Concentrates on the work of a single literary or cultural theorist (e.g., Walter Benjamin, Jacques Derrida, Gayatri Spivak). Offered every two to three years.

Repeatable 2 times for a maximum of 12 credits when topic changes

COLT 470. Studies in Identity: [Topic]. 4 Credits.

Advanced study of gender, ethnicity, and other identity formations in literature. Offered every two to three years.

Repeatable 2 times for a maximum of 12 credits when topic changes

COLT 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

COLT 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

COLT 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

COLT 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

COLT 550. Comparative Studies in Cinema: [Topic]. 4 Credits.

Advanced consideration of the aesthetic (including literary) and cultural contexts of world film.

Repeatable 2 times for a maximum of 12 credits when topic changes

COLT 560. Major Theorists: [Topic]. 4 Credits.

Concentrates on the work of a single literary or cultural theorist (e.g., Walter Benjamin, Jacques Derrida, Gayatri Spivak). Offered every two to three years.

Repeatable 2 times for a maximum of 12 credits when topic changes

COLT 570. Studies in Identity: [Topic]. 4 Credits.

Advanced study of gender, ethnicity, and other identity formations in literature. Offered every two to three years.

Repeatable 2 times for a maximum of 12 credits when topic changes

COLT 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

COLT 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

COLT 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

COLT 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

COLT 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

COLT 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

COLT 613. Graduate Studies in Translation. 4-5 Credits.

Approaches to literary translation in its theoretical, practical and pedagogical dimensions.

COLT 614. Graduate Studies in Comparative Literature. 5 Credits.

Overview of the state of the discipline. Treats historical and theoretical developments in literary studies including philology and cultural studies; reconsiders the place of comparative literature in a global, pluralistic curriculum.

COLT 615. Graduate Studies in Comparative Literature. 5 Credits.

Survey of contemporary literary theory.

COLT 616. Transmedial Aesthetics. 5 Credits.

Approaches to the analysis of film, photography, video, and new media. Emphasis on intersections between comparison and media theory.

COLT 618. Histories, Theories, and Cultures of New Media. 5 Credits.

Our class considers different traditions in media theory spanning generations, regions, languages, and methodological approaches to a range of media.

Computer Information Technology (CIT)

Courses

CIT 281. Web Applications Development I. 4 Credits.

Fundamentals of web application development using open-source software tools and technologies (Unix, Git), client-side frameworks, server-side programming (Node.js, PHP), model-view-controller pattern, data storage and APIs, cloud hosting.

Requisites: Prereq: CS 111 with a grade of B- or higher.

CIT 381. Database Systems. 4 Credits.

Introduction to database systems, emphasis on database design and access. Database concepts, data modeling, SQL, connecting database to web.

Requisites: Prereq: B- or better in CIT 281, CS 110.

CIT 382. Web Applications Development II. 4 Credits.

Server- and client-side technologies and their interaction for database-driven web applications: application frameworks, single-page applications, cloud platforms, and open-source software stacks—MEAN (MongoDB, ExpressJS, AngularJS, Node.js) versus LAMP (Linux, Apache, MySQL, PHP).

Requisites: Prereq: CIT 381.

CIT 383. Networking Fundamentals. 4 Credits.

Fundamentals of data communication and networks. Network management and security.

Requisites: Prereq: CIT 382.

CIT 405. Reading and Conference: [Topic]. 1-4 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

Computer Science (CS)

Courses

CS 102. Fundamentals of Computer and Information Security. 4 Credits.

This course introduces fundamental concepts, terminologies, principles, methods, and scenarios of computer and information security.

Additional Information:

Science Area

CS 110. Fluency with Information Technology. 4 Credits.

Introduction to the study of computer-based information systems (information technology). Overview of computing, including basics of the internet and world wide web and issues such as security and privacy. Students create websites using HTML and CSS.

Additional Information:

Science Area

CS 111. Introduction to Web Programming. 4 Credits.

Project-based approach to learning computer programming by building interactive web pages using JavaScript and HTML. Programming concepts including structured and object-oriented program design. CS 110 recommended preparation.

Requisites: Prereq: MATH 101 or equivalent.

Additional Information:

Science Area
BS Math

CS 122. Introduction to Programming and Problem Solving. 4 Credits.

Computational problem solving, algorithm design, data structures, and programming using a multi-paradigm programming language. Introduces techniques for program design, testing, and debugging.

Requisites: Prereq: MATH 101 or equivalent.

Additional Information:

Science Area
BS Math

CS 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

CS 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CS 199L. Special Studies in Computer Science: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CS 210. Computer Science I. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 211, CS 212.

Requisites: Prereq: MATH 112Z. Prior programming experience strongly encouraged.

Additional Information:

Science Area
BS Math

CS 211. Computer Science II. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 210, CS 212.

Requisites: Prereq: CS 210.

Additional Information:

Science Area
BS Math

CS 212. Computer Science III. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 210, CS 211.

Requisites: Prereq: CS 211.

Additional Information:

Science Area
BS Math

CS 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

Repeatable 99 times

CS 313. Intermediate Data Structures. 4 Credits.

Design and analysis of data structures as means of engineering efficient software; attention to data abstraction and encapsulation. Lists, trees, heaps, stacks, queues, dictionaries, priority queues.

Requisites: Prereq: CS 210, CS 211, CS 212, MATH 231, MATH 232 with grades of B- or better.

CS 314. Computer Organization. 4 Credits.

Introduction to computer organization and instruction-set architecture -- digital logic design, binary arithmetic, design of central processing unit and memory, machine-level programming.

Requisites: Prereq: CS 210, CS 211, CS 212 with grades of B- or better.

CS 315. Intermediate Algorithms. 4 Credits.

Algorithm design, worst-case and average-behavior analysis, correctness, computational complexity.

Requisites: Prereq: CS 313.

CS 322. Introduction to Software Engineering. 4 Credits.

A project-intensive introduction to software engineering intended to build skills, knowledge, and habits of mind that prepare students for 400-level computer science courses, internships, and other software.

Requisites: Prereq: CS 210, CS 211, CS 212 with grades of B- or better.

CS 330. C/C++ and Unix. 4 Credits.

Practical software design and programming activities in a C/C++ and Unix environment, with emphasis on the details of C/C++ and good programming style and practices.

Requisites: Prereq: CS 314.

CS 332. System and Security Administration Lab. 4 Credits.

This lab course is designed to help students develop hands-on skills in system and security administration, based on the following relevant Cyber Defense knowledge units defined by the National Security Agency (NSA) National Centers of Academic Excellence in Cybersecurity (NCAE-C): Operating System Administration (OSA), which provides students with skill to perform basic operations involved in system administration of operating systems; and Operating Systems Hardening (OSH), which provides students with the ability to apply methods such as managing applications, services, and network ports to improve the security and robustness of operating systems.

Requisites: Prereq: CS 330.

CS 333. Applied Cryptography. 4 Credits.

This course provides a systematic study of cryptography and its application. It covers cryptographic algorithms, including symmetric-key cryptography, public-key cryptography, cryptanalysis, cryptographic hash functions, and their usage toward message authentication codes, digital signatures, key management and distribution, and user authentication protocols.

Requisites: Prereq: CS 212.

CS 372M. Machine Learning for Data Science. 4 Credits.

Introduction to Machine Learning, with an emphasis on topics relevant for data science. Multilisted with DSCI 372M.

Requisites: Prereq: CS 212; DSCI 345M or MATH 345M; MATH 342.

Equivalent to: DSCI 372M

CS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

CS 401. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Requisites: Prereq: CS 313.

Repeatable 99 times

CS 402. Supervised College Teaching. 1-2 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Requisites: Prereq: CS 313.

Repeatable 99 times

CS 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Requisites: Prereq: CS 313.

Repeatable 99 times

CS 404. Internship: [Topic]. 1-4 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Requisites: Prereq: CS 313.

Repeatable 99 times

CS 405. Reading and Conference: [Topic]. 1-12 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Requisites: Prereq: CS 313.

Repeatable 5 times

CS 406. Practicum: [Topic]. 1-2 Credits.

Supervised consulting. Students provide learning assistance in computer science courses.

Requisites: Prereq: CS 313.

Repeatable 3 times for a maximum of 4 credits

CS 407. Seminar: [Topic]. 1-5 Credits.

Opportunity to study in greater depth specific topics arising out of other courses.

Requisites: Prereq: CS 313.

Repeatable 99 times when topic changes

CS 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Requisites: Prereq: CS 313.

Repeatable 99 times

CS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Requisites: Prereq: CS 313.

Repeatable 99 times

CS 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

CS 413. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

Requisites: Prereq: CS 315.

CS 415. Operating Systems. 4 Credits.

Principles of operating system design. Process and memory management, concurrency, scheduling, input-output and file systems, security.

Requisites: Prereq: CS 330.

CS 420. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

Requisites: Prereq: CS 315.

CS 422. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

Requisites: Prereq: CS 313.

CS 423. Software Methodology II. 4 Credits.

Application of concepts and methodologies covered in CS 422. Student teams complete a large system design and programming project. Final system specification, test plan, user documentation, and system walk throughs.

Requisites: Prereq: CS 422 with a grade of B- or better.

CS 425. Principles of Programming Languages. 4 Credits.

Syntax and semantics. Scope rules, environments, stores, denoted and expressed values, procedures, and parameters. Definitional interpreters. Types, overloading, parametric polymorphism, and inheritance. Varieties of abstraction.

Requisites: Prereq: CS 315.

CS 429. Computer Architecture. 4 Credits.

RISC (reduced instruction-set computer) and CISC (complex instruction-set computer) design, storage hierarchies, high-performance processor design, pipelining, vector processing, networks, performance analysis.

Requisites: Prereq: CS 313, CS 314, CS 330.

CS 431. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

Requisites: Prereq: CS 330.

CS 432. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

Requisites: Prereq: CS 330. CS 415 recommended.

CS 433. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

Requisites: Prereq: CS 415.

CS 434. Computer and Network Security II. 4 Credits.

This course covers security threats and solutions for distributed systems and networks, particularly the Internet, the Internet of Things, and distributed systems based on them.

Requisites: Prereq: CS 433.

CS 436. Secure Software Development. 4 Credits.

This course establishes a foundation for applying security principles to the lifecycle of software development in order to minimize software vulnerabilities and counter cyber threats.

Requisites: Prereq: CS 330.

CS 437. Computer and Network Security Practicum. 4 Credits.

This course is designed to help students solidify knowledge and develop hands-on skills in computer network security. Students will practice various attack and defense techniques. Specifically, we will systematically study each layer of the Internet, discuss the design and implementation vulnerabilities at each layer, and demonstrate how attacks may exploit the vulnerabilities. This course will cover many classic attacks in great technical detail in addition to high-level concepts and theories, to help students deeply understand why and how each attack works. We'll also discuss how each attack may be handled, and students will learn defense techniques such as firewalls, etc.

Requisites: Prereq: CS 433.

CS 441. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

Requisites: Prereq: CS 330.

CS 443. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

Requisites: Prereq: CS 313.

CS 445. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

Requisites: Prereq: CS 315, CS 330.

CS 451. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control. Students cannot receive credit for both CS 451 and DSCI 431.

Requisites: Prereq: CS 313, CS 314.

Equivalent to: DSCI 431

CS 453. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis. Students cannot receive credit for both CS 453 and DSCI 435.

Requisites: Prereq: CS 451.

Equivalent to: DSCI 431

CS 461. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.

Requisites: Prereq: CS 314, CS 425. CS 420 strongly recommended.

CS 471. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

Requisites: Prereq: CS 315.

CS 472. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.

Requisites: Prereq: CS 315.

CS 473. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.

Requisites: Prereq: CS 315.

CS 480. Game Programming. 4 Credits.

Introduction to theory topics related to game programming, including linear algebra, 3D graphics, lighting, audio, physics, and artificial intelligence. This course provides an opportunity to build games using a commercial game engine, reinforced by best practices in terms of implementation and project management.

Requisites: Prereq: CS 313, CS 314. MATH 341 recommended.

CS 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CS 507. Seminar: [Topic]. 1-5 Credits.

Opportunity to study in greater depth specific topics arising out of other courses.

Repeatable 99 times when topic changes

CS 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CS 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CS 513. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

CS 520. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

CS 522. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

CS 523. Software Methodology II. 4 Credits.

Student teams complete a large system design and programming project. Final system specifications, test plan, user documentation, and system walk-through.

Requisites: Prereq: CS 522.

CS 529. Computer Architecture. 4 Credits.

RISC (reduced instruction-set computer) and CISC (complex instruction-set computer) design, storage hierarchies, high-performance processor design, pipelining, vector processing, networks, performance analysis.

CS 531. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

CS 532. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

CS 533. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

CS 534. Computer and Network Security II. 1-4 Credits.

This course covers security threats and solutions for distributed systems and networks, particularly the Internet, the Internet of Things, and distributed systems based on them.

Requisites: Prereq: CS 532, CS 533.

CS 536. Secure Software Development. 4 Credits.

This course establishes a foundation for applying security principles to the lifecycle of software development in order to minimize software vulnerabilities and counter cyber threats.

CS 537. Computer and Network Security Practicum. 4 Credits.

This course is designed to help students solidify knowledge and develop hands-on skills in computer network security. Students will practice various attack and defense techniques. Specifically, we will systematically study each layer of the Internet, discuss the design and implementation vulnerabilities at each layer, and demonstrate how attacks may exploit the vulnerabilities. This course will cover many classic attacks in great technical detail in addition to high-level concepts and theories, to help students deeply understand why and how each attack works. We'll also discuss how each attack may be handled, and students will learn defense techniques such as firewalls, etc.

CS 541. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

CS 543. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

CS 545. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

CS 551. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control. Students cannot receive credit for both CS 551 and DSCI 531.

CS 553. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis. Students cannot receive credit for both CS 553 and DSCI 535.

Requisites: Prereq: CS 551.

Equivalent to: DSCI 535

CS 561. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.

Requisites: Prereq: CS 520 strongly recommended.

CS 571. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

CS 572. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.

CS 573. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.

CS 580. Game Programming. 4 Credits.

Introduction to theory topics related to game programming, including linear algebra, 3D graphics, lighting, audio, physics, and artificial intelligence. This course provides an opportunity to build games using a commercial game engine, reinforced by best practices in terms of implementation and project management.

CS 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CS 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CS 604. Internship: [Topic]. 1-4 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

CS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CS 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

CS 607. Seminar: [Topic]. 1-5 Credits.

Research topics are presented.

Repeatable 99 times

CS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CS 609. Terminal Project. 1-16 Credits.

Final project for master's degree without thesis.

Repeatable 99 times

CS 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CS 621. Algorithms and Complexity. 4 Credits.

Design and analysis of algorithms, strategies for efficient algorithms, introduction to complexity theory including NP-completeness.

Requisites: Prereq: CS 520 recommended.

CS 630. Distributed Systems. 4 Credits.

Principles of distributed computer systems: interprocess communication, distributed file systems, distributed timing and synchronization, distributed programming, transactions, process scheduling, distributed shared memory.

Requisites: Prereq: CS 529.

CS 631. Advanced Parallel Computing. 4 Credits.

Advanced topics in parallel processing including massively parallel computer architecture, supercomputers, parallelizing compiler technology, performance evaluation, parallel programming languages, parallel applications.

Requisites: Prereq: CS 529.

CS 632. Computer Networks. 4 Credits.

Advanced issues in computer networks, focusing on research to extend the services offered by the Internet.

Requisites: Prereq: CS 532.

CS 633. Advanced Network Security. 4 Credits.

Classic and state-of-the-art research topics in network security; threats and attacks, defense algorithms and mechanisms, measurement and evaluation of both security problems and solutions. Offered alternate years.

Requisites: Prereq: CS 533.

CS 640. Writing in Computer Research. 2 Credits.

Students learn to provide and accept constructive criticism of writing samples in a workshop format.

CS 670. Data Science. 4 Credits.

Data science is the development of methods to study large and complex data sets. Methods that scale to very large data sets are of particular interest. This course introduces state-of-art data science methods focused on processing very large data sets of real-world data.

Requisites: Prereq: CS 551.

Conflict and Dispute Resolution (CRES)

Courses

CRES 101. Introduction to Conflict Resolution. 4 Credits.

Explores up-to-date conflict management theories and practical steps to communicate effectively in sensitive situations.

CRES 199. Special Studies: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

CRES 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CRES 401. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CRES 404. Internship: [Topic]. 1-4 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

CRES 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CRES 415. Conflict and Gender. 4 Credits.

Focuses on the multiple relationships among conflict, violence, and gender in situations of warfare, militarization, and peacemaking.

CRES 420. Restorative Justice. 4 Credits.

Provides a critical introduction to the principles and practices of restorative justice.

CRES 435. Israel and Palestine. 4 Credits.

Examination of the Palestinian and Israeli conflict. Evolution of the political struggle with a broad look at the human side of conflict, and examination of critical negotiation issues.

CRES 440. Dialogue across Differences. 2 Credits.

Introduction to processes and facilitation of discourse and dialogue, with special emphasis on participation. Sequence with CRES 441.

CRES 441. Dialogue Across Differences II. 2 Credits.

Advanced course in dialogic processes and facilitation, with special emphasis on context. Sequence with CRES 440.

Requisites: Prereq: CRES 440.

CRES 445. Conflicts of Incarceration. 4 Credits.

Issues of crime, incarceration, and justice within the Western context.

CRES 503. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CRES 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CRES 515. Conflict and Gender. 4 Credits.

Focuses on the multiple relationships among conflict, violence, and gender in situations of warfare, militarization, and peacemaking.

CRES 535. Israel and Palestine. 4 Credits.

Examination of the Palestinian and Israeli conflict. Evolution of the political struggle with a broad look at the human side of conflict, and examination of critical negotiation issues.

CRES 540. Dialogue Across Differences. 1-2 Credits.

Introduction to processes and facilitation of discourse and dialogue, with special emphasis on participation. Sequence with CRES 541.

CRES 541. Dialogue Across Differences II. 2 Credits.

Advanced course in dialogic processes and facilitation, with special emphasis on context. Sequence with CRES 540.

Requisites: Prereq: CRES 540.

CRES 545. Conflicts of Incarceration. 4 Credits.

Issues of crime, incarceration, and justice within the Western context.

CRES 601. Research: [Topic]. 1-9 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CRES 604. Internship: [Topic]. 1-8 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 7 times for a maximum of 8 credits

CRES 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CRES 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CRES 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CRES 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CRES 611. Terminal Project. 1-9 Credits.

Repeatable.

Repeatable 99 times

CRES 612. Philosophy of Conflict Resolution. 4 Credits.

Study of how philosophical and theoretical frameworks influence current views and practices of conflict resolution.

CRES 614. Negotiation, Bargaining and Persuasion. 4 Credits.

Examines issues that pervade negotiations, including framing arguments, analyzing bargaining conditions, and crafting deals. Basic skills in negotiation, bargaining and persuasion developed through simulated negotiations.

CRES 616. Mediation Skills. 4 Credits.

Develop mediation skills such as problem framing, listening, and issue identification and sequencing. Learn to diagnose problems, clarify facts and craft interventions.

CRES 620. Facilitation. 2 Credits.

Fundamentals of facilitating group discussions and decision-making.

CRES 621. Culture, Power, and Conflict Resolution I. 2 Credits.

This course introduces multiple approaches to conflict drawing from distinct cultural traditions. It asks students to consider how cultural differences and power dynamics impact how people approach conflict and conflict resolution.

CRES 622. Culture, Power, and Conflict Resolution II. 1 Credit.

Students will explore creative ways to engage cultural difference and power as central assumptions in conflict resolution.

Requisites: Prereq: CRES 621.

CRES 623. Culture, Power, and Conflict Resolution III. 1 Credit.

In this course students theorize how they would like to engage cross cultural dynamics and existing power structures in their own practice.

Requisites: Prereq: CRES 622.

CRES 625. Psychology of Conflict. 4 Credits.

Examines the psychological sources, nature, and functions of conflict, covering multiple levels of analysis relevant to intrapersonal, interpersonal, intragroup, and intergroup conflict.

CRES 631. Managing Conflict in Organizations. 4 Credits.

Prepares students to assist in managing disputes within organization. Students will receive a basic introduction to organizational context, and structure, leadership and communication styles, and sources of workplace disputes. The course also provides an overview of the processes by which organizations typically resolve disputes.

CRES 632. Research Methods. 3 Credits.

Explores questions that research may encounter or raise, and how to resolve them. Considers both qualitative and quantitative research methods.

CRES 650. Capstone Seminar. 1 Credit.

Provides student with opportunities to systemically consider lessons from their practicum experiences. Class sessions based on student fieldwork.

CRES 651. Academic Capstone: Course Concentration. 1 Credit.

Fulfills the course component of the course concentration final project for conflict resolution students.

Requisites: Prereq: students must have completed 50 percent or more of their course concentration credits prior to the term in which they enroll in this course.

CRES 660. Environmental Conflict Resolution. 4 Credits.

Students learn and critically examine methods of environmental conflict resolution, including conflict assessment, negotiation, decision-making, adaptive management, collaboration, and public participation.

CRES 665. Family Mediation. 4 Credits.

Preparation for work-related experiences in family mediation, specifically domestic relations involving custody and parenting time.

CRES 670. Adversarial Processes. 4 Credits.

This course is an introduction to the primary adversarial or adjudicative processes used to resolve civil disputes: Litigation and Arbitration.

Counseling Psychology (CPSY)

Courses

CPSY 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CPSY 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CPSY 217. Foundations of Student Health and Well-Being. 3 Credits.

This course examines risk and protective factors for college students and reviews educational and behavioral strategies for reducing personal risk and enhancing well-being, with focus on topics including stress, physical health, healthy sexuality, sexual violence prevention, substance use, social media use, and being allies.

CPSY 401. Research: [Topic]. 1-5 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CPSY 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

CPSY 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

CPSY 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CPSY 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CPSY 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CPSY 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CPSY 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CPSY 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CPSY 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CPSY 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CPSY 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CPSY 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CPSY 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CPSY 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CPSY 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CPSY 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CPSY 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CPSY 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CPSY 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CPSY 611. Counseling Skills. 2-3 Credits.

Emphasizes experiential learning of a broad range of communication skills needed to form effective helping relationships. Covers client intake procedures and interviewing strategies. Includes laboratory. Prereq for nonmajors; instructor's consent.

CPSY 612. Professional Ethics. 3 Credits.

Ethical and legal concerns in the professional practice of psychology. Ethical theory and decision-making processes; legal aspects of client-psychologist relationships.

CPSY 613. Introduction to Counseling Psychology. 3 Credits.

Historical foundations of counseling psychology. Major theories and theorists. Counseling as an ecological and context-sensitive interactive process. Settings and roles of the profession.

CPSY 614. Theories of Counseling. 3 Credits.

Overview of selected historical and current counseling theories.

CPSY 615. Counseling Diverse Populations. 3 Credits.

Influence of gender, race, ethnicity, and other factors related to diverse populations on the identity-formation process in contemporary society. Applications to counseling psychology.

CPSY 617. Theories of Career Development. 3 Credits.

Addresses life-span career development including issues, concepts, and definitions; theories of career development and choice; intervention in strategies; and career resources in the context of a multicultural society.

CPSY 618. Group Dynamics and Counseling. 3 Credits.

Presents basic elements of general group counseling theory and group dynamics; includes introduction to group-based interventions, guidelines for multicultural practice, ethical and professional issues in group practice, and group leadership.

CPSY 621. Lifespan Developmental Psychology. 3 Credits.

Understanding continuity and change in human development and the ways in which the development of children, adolescents, and adults can be enhanced.

Repeatable 1 time for a maximum of 6 credits

CPSY 622. Psychological Assessment II. 3 Credits.

This course develops skills related to psychological assessment and provision of assessment findings to clients and other professionals, focused on personality structure and its relationship to psychopathology. Topics include (a) psychometric properties of instruments, (b) utility of assessment in clinical practice, (c) consideration of context when conducting assessments, (d) potential influences on test results/interpretations, and (e) practicing ethically, with attention to relevant human diversity considerations.

CPSY 625. Child and Family Interventions. 3 Credits.

Empirically oriented interventions with children and families, ranging from early childhood through adolescence. Integrates developmental and intervention sciences.

CPSY 626. Psychological Services for Latinos. 3 Credits.

Provide graduate students with content specific to carrying out human services work and research with those who are Latino and/or Spanish-speaking.

CPSY 627. Latinx Mental Health: [Topic]. 3 Credits.

This course is designed to enhance understanding of Spanish-speaking and Latinx populations in the US with attention to strengths, resilience, social injustice and inequity, and how these influence the health and well-being of Latinx communities as applied in clinical mental health and school settings.

Repeatable 2 times for a maximum of 9 credits

CPSY 635. Social Aspects of Behavior. 4-5 Credits.

This course introduces research and concepts related to social influences on human behavior, including prejudice, conformity, aggression, prosocial behavior, internalized social norms, and social cognition.

CPSY 645. Health Promotion and Equity. 3 Credits.

This course introduces theoretical and empirical work in prevention-focused health psychology, integrating cultural, developmental, and community psychology concepts as they pertain to health related behaviors.

CPSY 654. Supervision and Consultation. 4 Credits.

Focuses on didactic knowledge of supervision theory, research, models of practice, and evidence-based practices in supervision and consultation and acquisition of supervision and consultation skills. Students refine their knowledge of supervision theory, research, and techniques and integrate these into supervision and consultation activities.

CPSY 690. Adult Practicum. 4 Credits.

Adult Practicum is a three-term experience over one academic year in which counseling psychology doctoral students work in a clinical setting and provide therapy services to adult clients. Students receive individual and group supervision and training in evidence-based interventions and theoretical models of practice.

Repeatable 3 times for a maximum of 16 credits

CPSY 691. Child and Family Practicum. 3 Credits.

Child Family Practicum is a three-term experience over one academic year in which counseling psychology doctoral students work in a clinical setting and provide therapy services to children and families. Students receive individual and group supervision and training in evidence-based interventions and theoretical models of practice.

Repeatable 3 times for a maximum of 12 credits

CPSY 704. Internship: [Topic]. 1-15 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

CPSY 706. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CPSY 708. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CPSY 709. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Couples and Family Therapy (CFT)

Courses

CFT 401. Research: [Topic]. 1-5 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CFT 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CFT 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CFT 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CFT 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CFT 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CFT 601. Research: [Topic]. 1-16 Credits.

A current topic is Methods.

Repeatable 99 times

CFT 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

CFT 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CFT 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

CFT 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

CFT 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CFT 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CFT 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

CFT 612. Parenting Interventions. 3 Credits.

Examines evidence-based practices for parenting children and adolescents, including trauma-focused parenting strategies.

CFT 615. Introduction to Couples and Family Therapy. 3 Credits.

Surveys the distinct disciplines of couples and family therapy.

CFT 616. Systems Theory Foundations. 3 Credits.

Surveys macro theories and their relationship to families and family therapy with emphasis on systems, communications, and ecological theories.

CFT 620. Mental Health and Diagnosis. 3 Credits.

Study of maladaptive behavior, treatment, and prevention emphasizing the integrative contributions of biological, behavior, cognitive, psychodynamic, humanist-existential, and community perspectives, including the "Diagnostic and Statistical Manual of Mental Disorders."

CFT 625. Violence, Trauma, and Healing. 4 Credits.

Theories and research on the acceleration and cessation of violence in the family and assessment of responses to violent family behaviors and to perpetrators, survivors, and families.

CFT 626. Relational Sex Therapy. 3 Credits.

Increases understanding and clinical abilities for working with couples; special emphasis on the role of intimacy and sexual relationships.

CFT 628. Substance Use and Recovery. 4 Credits.

Increases the conceptual understanding and skills of family therapists working with contemporary issues; emphasis on addictions and addiction recovery.

CFT 629. Intimate Partner Therapy. 4 Credits.

Application of systems theory to problems within relationships and their resolution. Includes research findings, assessment, motivation, change, content and process, ethics, and social-macro considerations.

CFT 640. Beginning Practicum. 3 Credits.

Provides basic clinical skills for initial work with client systems including intake and consent procedures, clinical assessment, treatment planning, and risk assessment.

BA Language Satisfying Course

Creative Writing (CRWR)

Courses

CRWR 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 6 times

CRWR 225. Kidd Workshop I. 4 Credits.

Introduction to an intensive, yearlong sequence devoted to the study and practice of poetry, fiction, and nonfiction.

CRWR 230. Introduction to Poetry Writing. 4 Credits.

Introduction to forms and techniques of writing poetry.

CRWR 235. Kidd Workshop II Poetry. 4 Credits.

Second in a yearlong sequence devoted to the studying and practicing poetry and fiction, with an emphasis on poetry. Projects include beginning to develop an individual line of inquiry as well as workshoping original poetry.

Requisites: Prereq: CRWR 225 with a grade of B- or better.

CRWR 240. Introduction to Fiction Writing. 4 Credits.

Introduction to forms and techniques of writing fiction.

CRWR 245. Kidd Workshop II: Fiction. 4 Credits.

Second class in a yearlong sequence devoted to studying and practicing poetry and fiction, with an emphasis on fiction. Projects include beginning to develop an individual line of inquiry as well as workshoping original fiction.

Requisites: Prereq: CRWR 225 with a grade of B- or better.

CRWR 330. Intermediate Poetry Writing. 4 Credits.

Intermediate-level study of poetry writing.

Requisites: Prereq: one from CRWR 230, CRWR 235 with a grade of B- or better.

Repeatable 2 times for a maximum of 12 credits

CRWR 335. Kidd Workshop III: Poetry. 4 Credits.

Third class in a yearlong sequence devoted to studying and practicing poetry and fiction, with a special emphasis on poetry. Projects include completing the individual line of inquiry, an original portfolio, and the Kidd Workshops student anthology.

Requisites: Prereq: CRWR 235 with a grade of B- or better.

CRWR 336. Intermediate Creative Nonfiction. 4 Credits.

Intermediate-level study of literary nonfiction writing.

Requisites: Prereq: one from CRWR 225, CRWR 230, CRWR 240, CRWR 244 with a grade of B- or better.

CRWR 340. Intermediate Fiction Writing. 4 Credits.

Intermediate-level study of fiction writing.

Requisites: Prereq: one from CRWR 240, CRWR 244, CRWR 245 with a grade of B- or better.

Repeatable 2 times for a maximum of 12 credits

CRWR 345. Kidd Workshop III: Fiction. 4 Credits.

Third class in a yearlong sequence devoted to studying and practicing poetry and fiction, with a special emphasis on fiction. Projects include completing the individual line of inquiry, an original portfolio, and the Kidd Workshops student anthology.

Requisites: Prereq: CRWR 245 with a grade of B- or better.

CRWR 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 6 times

CRWR 405. Writing and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CRWR 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 6 times

CRWR 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 6 times

CRWR 413. Literature for Poets. 4 Credits.

Advanced discourse on issues and principles related to the craft of poetry.

Requisites: Prereq: one from CRWR 330, CRWR 335 with a grade of B- or better.

Repeatable 2 times for a maximum of 12 credits

CRWR 414. Literature for Fiction Writers. 4 Credits.

Advanced discourse on issues and principles related to the craft of fiction.

Requisites: Prereq: One from CRWR 336, CRWR 340, CRWR 345 with a grade of B- or better.

Repeatable 2 times for a maximum of 12 credits

CRWR 435. Advanced Poetry Writing. 4 Credits.

Advanced workshop in the writing of poetry.

Requisites: Prereq: One from CRWR 330, CRWR 335 with a grade of B- or better.

Repeatable 2 times for a maximum of 12 credits

CRWR 445. Advanced Fiction Writing. 4 Credits.

Advanced workshop in the writing of fiction.

Requisites: Prereq: One from CRWR 336, CRWR 340, CRWR 345 with a grade of B- or better.

Repeatable 2 times for a maximum of 12 credits

CRWR 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

CRWR 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 6 times

CRWR 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated.

Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

CRWR 605. Writing and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

CRWR 607. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year.

Repeatable 99 times when topic changes

CRWR 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

CRWR 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

CRWR 610. Experimental Course [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

CRWR 635. MFA Poetry Workshop. 6 Credits.

Concentration on student writing in a workshop setting. Open only to students admitted to creative writing master of fine arts program in poetry.

Repeatable 5 times for a maximum of 36 credits

CRWR 645. MFA Fiction Workshop. 6 Credits.

Concentration on student writing in a workshop setting. Open only to students admitted to creative writing master of fine arts program in fiction.

Repeatable 5 times for a maximum of 36 credits

Dance Activity (DANC)

General Limitations (p. 27)

- Non-Dance majors: a maximum of 12 credits of dance activity (in subject DANC), physical education activity, and military science activity.
- BA/BS degree in Dance: a maximum of 36 credits of dance activity (in subject DANC).
- BFA degree in Dance: no limit of dance activity (in subject DANC); a course limit will apply.

DANC 170. Contemporary I. 1 Credit.

DANC 170 Contemporary I is the study of basic principles of dance movement in the contemporary idiom with an emphasis on the elements of space, time and energy.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 172. Ballet I. 1 Credit.

Ballet I explores basic movement vocabulary in the ballet idiom.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 175. Hip Hop I. 1 Credit.

Hip hop I is a beginning level hip hop technique class incorporating guided warm-up exercises, choreographed sequences, improvisation, and performance.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 185. African I. 1 Credit.

DANC 185 is a beginning level studio course in dance vocabulary from the African diaspora.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 199. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Tango, Hip-Hop, Salsa, Drumming, and Swing.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

DANC 270. Contemporary II. 1 Credit.

DANC 270 Contemporary II is intermediate dance training designed to build upon previously developed technical skills and artistic expression, with a focus on contemporary aesthetics.

Requisites: Prereq: DANC 170.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 272. Ballet II. 1 Credit.

Ballet II is an intermediate studio technique course in the ballet idiom.

Requisites: Prereq: DANC 172.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 275. Hip Hop II First Term. 1 Credit.

Hip hop II is an intermediate level hip hop technique class incorporating guided warm-up exercises, choreographed sequences, improvisation, and performance. Sequence with DANC 175.

Requisites: Prereq: DANC 175 or placement audition.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 276. Hip Hop II Second Term. 1 Credit.

This course advances intermediate Hip Hop skills by integrating the instructor's specialty style (e.g., commercial choreography, Krump, popping, locking, breaking) into groove-based choreography. Students will also explore the process of producing choreography for performance and film. Sequence with DANC 175, DANC 275.

Requisites: Prereq: DANC 275.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 285. African II. 1 Credit.

African II offers students an intermediate level integration of African movement, traditions, culture, history, music, and storytelling.

Requisites: Prereq: DANC 185.

Repeatable 8 times for a maximum of 9 credits

Additional Information:

General Limitation applies: Activity Course

DANC 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

DANC 370. Contemporary III. 2 Credits.

This studio technique course is designed for advanced students to enhance skills in modern/contemporary concert dance. Emphasis is on technical and expressive aspects, including stability, mobility, alignment, musicality, and dynamic range. Students will also engage in readings, writing, viewing, and discussions to deepen their understanding of this art form. Sequence with DANC 170, DANC 270.

Requisites: Prereq: DANC 270.

Repeatable 8 times for a maximum of 18 credits

Additional Information:

General Limitation applies: Activity Course

DANC 372. Ballet III. 2 Credits.

This class Infuses the movement practice of ballet with aesthetic, historic, cultural, social, and political learning and seeks to enhance physical and artistic abilities in ballet for expressive movement, moving towards precision, presence, and artistic awareness. Ballet III is an advanced technique studio course in the ballet idiom. Sequence with DANC 172, DANC 272.

Requisites: Prereq: DANC 272.

Repeatable 8 times for a maximum of 18 credits

Additional Information:

General Limitation applies: Activity Course

DANC 375. Hip Hop III. 2 Credits.

This advanced Hip Hop course focuses on developing freestyle techniques and battle culture by building on previous training. Students will enhance their skills through weekly freestyle video journals, tracking their progress, and providing peer feedback within their crew. The course explores "open style" battling, where individuality and movement history fuse for originality, alongside research into giants of the freestyle battle scene to analyze their strategies and success. The culmination will be a freestyle exhibition or battle.

Requisites: Prereq: DANC 276.

Repeatable 8 times for a maximum of 18 credits

Additional Information:

General Limitation applies: Activity Course

DANC 385. African III. 2 Credits.

African Dance III offers students an advanced exploration of tradition, culture, history, music, storytelling, improvisation, and choreography through the study of dances from the African continent. These neo-traditional forms will also be explored in reference to the application of African Aesthetics to American Diasporic dance forms. Sequence with DANC 185, DANC 285.

Requisites: Prereq: DANC 285.

Repeatable 8 times for a maximum of 18 credits

Additional Information:

General Limitation applies: Activity Course

DANC 399. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Tango, Hip-Hop, Salsa, Drumming, and Swing.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Dance Professional (DAN)

Courses

DAN 125. First Year Seminar: [Topic]. 1 Credit.

DAN 125 provides a general introduction to dance as a field of study in higher education with a specific focus on opportunities in Dance and allied studies at UO.

Repeatable 2 times for a maximum of 3 credits

DAN 171. Dance Improvisation: [Topic]. 1 Credit.

Dance Improvisation covers a range of solo and group improvisational techniques to develop improvisational skill and heighten creative instincts. Attention will be given to developing safe practices to heighten movement exploration. Topics vary based on the chosen focus of the teacher of record.

Repeatable 2 times for a maximum of 3 credits

DAN 198. Workshop: [Topic]. 1-2 Credits.

Recent topics include Performance, Production Experience, Repertory.

Repeatable 99 times

DAN 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DAN 241. Screendance: History and Theory. 4 Credits.

This Arts and Letters group satisfying course explores the historical, theoretical, and cultural contexts of screendance, an interdisciplinary art form at the intersection of dance, film, and new media technologies. It focuses on critical inquiries into screendance while locating that subject in a broader context.

Additional Information:

Arts Letters Area

DAN 251. Looking at Dance. 4 Credits.

Overview of dance as a cultural and aesthetic experience. Examines its meaning and impact on contemporary United States society.

Additional Information:

Arts Letters Area

DAN 252. Dance Composition I. 3 Credits.

This course is an introduction to the elements of dance composition. Students will create studies that concentrate on details of formal compositional structure as well as some more contemporary models

Requisites: Prereq: DAN 171, DAN 258, DAN 371.

DAN 255. Dance Production I. 2 Credits.

Introduction to production planning, management, lighting, design, costuming, and publicity for dance. Practical experience in Dougherty Dance Theatre. Students cannot receive credit for both DAN 255 and any Theater Arts production courses (TA 211, TA 212, TA 321, TA 322, TA 323, TA 324, TA 467). Sequence with DAN 355.

Equivalent to: TA 211, TA 212, TA 321, TA 322, TA 323, TA 324, TA 467

DAN 256. Dance Somatics. 3 Credits.

Exploration of patterning in movement. Various body therapies—Bartenieff Fundamentals, ideokinesis, and body-mind centering—provide a framework for experiential investigations.

DAN 258. Musical Elements of Dance. 3 Credits.

Explores musical elements of dance and dancing; especially music/dance culture, rhythm, melody, phrasing and form. Sequence with DAN 458.

DAN 260. Anatomy of Human Movement. 4 Credits.

An introduction to scientific reasoning focusing on methodology and current research in dance anatomy and kinesiology.

Additional Information:

Science Area

DAN 271. Contact Improvisation: [Topic]. 1 Credit.

This course is designed to develop skills, experience and awareness of contact improvisation. Sequence with DAN 171.

Requisites: Prereq: DAN 171.

Repeatable 2 times for a maximum of 3 credits

DAN 280. Dance Loft Performance. 1 Credit.

Dance Loft Performance is a beginning level repertory dance course modeled after a professional choreographic rehearsal process and performance experience. Participants in this course will perform the work of a student choreographer, under the supervision of a faculty mentor, in a single informal performance.

Repeatable 2 times for a maximum of 3 credits

DAN 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

DAN 301. African Dance Aesthetics. 4 Credits.

Using the field of dance studies to examine African dance aesthetics in popular culture, daily media landscapes, and expressive cultures in Africa and the diaspora.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

DAN 352. Dance Composition II. 3 Credits.

This course is a continuation of skill development from Dance Composition I. Students will create studies that concentrate on details of formal compositional structure as well as some more contemporary models. The goal of this class is not to make finished dances, but to examine and refine elements of the craft that contribute to dance-making, to further develop and deepen an individual movement awareness and vocabulary, and to develop a shared creative dialogue from which to begin the process of training one's critical eye for movement form. Sequence with DAN 252.

Requisites: Prereq: DAN 252.

DAN 355. Dance Production II. 1-2 Credits.

Extended application of skills and procedures used in producing a concert. Practical backstage work; pre- and postconcert sessions.

Requisites: Prereq: DAN 255.

Repeatable 11 times for a maximum of 24 credits

DAN 360. Dance Kinesiology. 3 Credits.

This course explores advanced movement concepts begun in DAN 260- Anatomy of Movement. We will investigate the relationships between different anatomical structures and various body systems. Concepts of Anatomy, Kinesiology, Motor Control and Somatics will be explored through readings, discussions, and physical embodiment practices. Included is analysis and direct application to dance technique and expression. Sequence with DAN 260.

Requisites: Prereq: DAN 260.

DAN 371. Improvisation II. 1 Credit.

A continuation of study of Dance Improvisation including structured improvisation geared towards facility with movement invention, some aspects of contact improvisation and site-specific exploration. Students will enhance and deepen their fundamental skills and learn to problem solve "in the moment" at a more sophisticated level of immediate movement discourse. Sequence with DAN 171.

Requisites: Prereq: DAN 171.

Repeatable 8 times for a maximum of 9 credits

DAN 380. Student Dance Concert Performance. 2 Credits.

Student Dance Concert Performance is an intermediate level practical studio course. Participants in this course will perform the work of a student choreographer, under the supervision of a faculty mentor, performed in a run of fully produced performances.

Repeatable 2 times for a maximum of 6 credits

DAN 401. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 2 times

DAN 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 3 times

DAN 404. Internship: [Topic]. 1-4 Credits.

Apprenticeship under the guidance of a supervising teacher in areas such as teaching, arts management, administration, and dance production.

Repeatable 2 times for a maximum of 12 credits

DAN 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 6 times

DAN 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

DAN 407. Seminar: [Topic]. 1-5 Credits.

Recent topics include Choreographic Analysis, Contemporary Issues.

Repeatable 99 times when topic changes

DAN 408. Workshop: [Topic]. 1-21 Credits.

Topics include rehearsal and performance for department-sponsored events.

Requisites: Prereq: Audition for performance experiences.

Repeatable 99 times

DAN 409. Terminal Project. 1-12 Credits.

Current topics are Choreography, Production Design, and Management.

Repeatable 99 times

DAN 410. Experimental Course: [Topic]. 1-5 Credits.

Current topics include Neuromuscular Bases of Dance, Topics in Technique, Composition III.

Repeatable 99 times

DAN 412. Student Dance Concert. 1-6 Credits.

Students apply ideas learned about concert choreography, production, and management. In a cooperative venture, students produce dance works in Dougherty Dance Theatre.

Requisites: Prereq: DAN 255, DAN 352.

Repeatable 6 times for a maximum of 24 credits

DAN 425. Senior Seminar: [Topic]. 1 Credit.

This multi term topics course focuses on professional development within dance for senior dance majors.

Repeatable 2 times for a maximum of 3 credits

DAN 436. Dema African Performance Ensemble: [Topic]. 3 Credits.

Dema is the concept of total performance experience through dance, music, singing, storytelling, and costume-making through education, teaching, and to entertaining. Dema is a means of encouraging independence, critical thinking, self-worth, and freedom of the mind for students to discover their voices.

Repeatable 2 times for a maximum of 9 credits

DAN 443. Dance and Power. 3 Credits.

This course uses identity as a lens through which we examine structures of power in dance, including, but not limited to, intersections of race, gender, religion, sexual orientation, ethnicity, nationality, socioeconomic status, language, (dis)ability, age, religious commitment, and political perspective. Sequence with DAN 444.

Requisites: Prereq: DAN 251.

DAN 444. Contemporary Issues in Dance. 3 Credits.

This course engages critical conversations about dance in contemporary society with emphasis on understanding various ways that dance functions within communities, how dance can participate and promote social change, and ways that dance makers are expanding possibility in dance.

Requisites: Prereq: DAN 251.

DAN 452. Dance Composition III. 3 Credits.

Advanced skills in dance composition to engage critical creative processes for the development of substantial choreographies. Sequence with DAN 351, DAN 352.

Requisites: Prereq: DAN 352.

Repeatable 1 time for a maximum of 6 credits

DAN 458. Music for Dancers. 3 Credits.

Surveys musical form, style, and expressive content as it relates to dance. Examines the interrelationship of elements of music and dance in significant works from a range of cultures.

Requisites: Prereq: DAN 258.

DAN 480. Faculty Dance Concert Performance. 2 Credits.

Participants in this course will perform the work of a faculty choreographer, or guest artist, in a run of fully produced dance concerts.

Repeatable 4 times for a maximum of 10 credits

DAN 486. Student Dance Collective: [Topic]. 3 Credits.

Student Dance Collective is an advanced dance performance ensemble modeled after a professional repertory dance company, which includes a collaborative rehearsal process and multiple live performances.

Requisites: Prereq: DAN 480, DANC 370, DANC 372, DANC 375.

Repeatable 2 times for a maximum of 9 credits

DAN 491. Teaching Dance. 3 Credits.

Application of teaching theories, course planning methods, teaching resources and techniques. Emphasis on teaching in university situation.

Requisites: Prereq: DAN 258, DAN 260; one from DANC 370, DANC 372, DANC 375.

DAN 494. Advanced Movement Practice. 2 Credits.

Advanced Movement Practice is a synthesis of physicality, creative practice, and theory whereby students will investigate the relationships between form, expression, technique, style and identity through embodiment, discussion, readings, writing, video and performance.

Requisites: Prereq: three from DANC 370, DANC 372, DANC 375, DANC 385.

Repeatable 5 times for a maximum of 12 credits

DAN 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 9 times

DAN 507. Seminar: [Topic]. 1-5 Credits.

Recent topics include Choreographic Analysis, Contemporary Issues.

Repeatable 99 times when topic changes

DAN 508. Workshop: [Topic]. 1-21 Credits.

Topics include rehearsal and performance for department-sponsored events.

Requisites: Prereq: Audition for performance experiences.

Repeatable 99 times

DAN 510. Experimental Course: [Topic]. 1-5 Credits.

Current topics include Neuromuscular Bases of Dance, Topics in Technique, Composition III.

Repeatable 99 times

DAN 536. Dema African Performance Ensemble: [Topic]. 3 Credits.

Dema is the concept of total performance experience through dance, music, singing, storytelling, and costume-making through education, teaching, and to entertaining. Dema is a means of encouraging independence, critical thinking, self-worth, and freedom of the mind for students to discover their voices.

Repeatable 2 times for a maximum of 9 credits

DAN 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

DAN 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

DAN 606. Practicum: [Topic]. 1-16 Credits.

Topics include Formal Compositional Structure, Solo Composition, and student-initiated topics. Limited by faculty workload and availability.

Repeatable 99 times

DAN 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

DAN 608. Workshop: [Topic]. 1-16 Credits.

Topics include Performance, Production, Rehearsal.

Repeatable 99 times

DAN 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

DAN 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Danish (DANE)

Courses

DANE 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times**DANE 399. Special Studies: [Topic]. 1-5 Credits.**

Experimental course - topic varies.

Repeatable 99 times**DANE 401. Research: [Topic]. 1-16 Credits.**

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times**DANE 403. Thesis. 1-12 Credits.**

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times**DANE 405. Reading and Conference: [Topic]. 1-16 Credits.**

A particular selection of material read by a student and discussed in conference with a faculty member.

Data Science (DSCI)

Courses

DSCI 101. Foundations of Data Science I. 4 Credits.

This course utilizes a quantitative approach to explore fundamental concepts in data science. Students will develop key skills in programming and statistical inference as they interact with real-world data sets across a variety of domains. Ethical and privacy concerns are explored. Sequence with DSCI 102.

Additional Information:

Science Area

DSCI 102. Foundations of Data Science II. 4 Credits.

This course expands upon critical concepts and skills introduced in DSCI 101. Topics include the normal distribution, confidence intervals, regression, and classifiers. Sequence with DSCI 101.

Requisites: Prereq: DSCI 101, MATH 101 (or equivalent placement score) or any other college-level math course.

DSCI 196. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times**DSCI 198. Workshop: [Topic]. 1-12 Credits.**

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times**DSCI 199. Special Studies: [Topic]. 1-5 Credits.**

Experimental course - topic varies.

Repeatable 99 times**DSCI 299. Special Studies: [Topic]. 1-5 Credits.**

Experimental course - topic varies.

Repeatable 99 times**DSCI 311. Principles and Techniques of Data Science. 4 Credits.**

Intermediate and advanced techniques in data science. Topics include managing data using software programs, data cleaning, handling text, dimensionality, principle component analysis, regression, classification and inference.

Requisites: Prereq: DSCI 102, CS 211, MATH 342.

DSCI 345M. Probability and Statistics for Data Science. 4 Credits.

Introduction to probability and statistics, with an emphasis upon topics relevant for data science. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Requisites: Prereq: MATH 342, CS 211.

Equivalent to: MATH 343, MATH 345M

DSCI 350M. Humanities Research Data Management. 4 Credits.

This course provides students with theoretical and practical experience in collecting, processing, archiving, and publishing humanities data (images, video, sound, text, maps, etc.) gathered from galleries, libraries, archives, and museums (GLAMs). Multilisted with LIB 350M.

Equivalent to: LIB 350M

DSCI 372M. Machine Learning for Data Science. 4 Credits.

Introduction to Machine Learning, with an emphasis on topics relevant for data science. Multilisted with CS 372M.

Requisites: Prereq: CS 212; DSCI 345M or MATH 345M; MATH 342.

Equivalent to: CS 372M

DSCI 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times**DSCI 401. Research: [Topic]. 1-12 Credits.**

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times**DSCI 402. Supervised College Teaching. 1-6 Credits.**

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 5 times for a maximum of 6 credits**DSCI 403. Thesis. 1-12 Credits.**

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times**DSCI 404. Internship: [Topic]. 1-12 Credits.**

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times**DSCI 405. Reading and Conference: [Topic]. 1-5 Credits.**

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times**DSCI 406. Field Studies: [Topic]. 1-12 Credits.**

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

DSCI 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

DSCI 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

DSCI 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSCI 410L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSCI 411. Capstone Project. 4 Credits.

This course for Data Science majors provides a student the opportunity to apply the theoretical knowledge and techniques acquired during the Data Science degree curriculum to a project involving real data from the student's domain of specialization. Requires an average 3.75 GPA in courses required.

Requisites: Prereq: DSCI 311; DSCI 372M or CS 372M; PHIL 223.

DSCI 431. Data Access and Management. 4 Credits.

Data management using structured and unstructured databases. Students learn to interface with common database systems. Working with structured databases, students learn the fundamentals of relational data and query languages. Students also learn to work with unstructured databases. Students cannot receive credit for both DSCI 431 and CS 451.

Requisites: Prereq: DSCI 311.

Equivalent to: CS 451

DSCI 435. Data Mining, Exploration, and Visualization. 4 Credits.

Effective data summarization and description. This course will teach students how to efficiently develop intuition for a dataset. Best practices in data manipulation, including key concepts in data cleaning and tidying will be covered. Students will learn how to summarize data with summary statistics and ordination techniques, as well as visualize data using a range of transformations and plotting approaches. Students cannot receive credit for both DSCI 435 and CS 453.

Requisites: Prereq: DSCI 431.

Equivalent to: CS 453

DSCI 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSCI 531. Data Access and Management. 4 Credits.

Data management using structured and unstructured databases. Students learn to interface with common database systems. Working with structured databases, students learn the fundamentals of relational data and query languages. Students also learn to work with unstructured databases. Students cannot receive credit for both DSCI 531 and CS 551.

Equivalent to: CS 551

DSCI 535. Data Mining, Exploration, and Visualization. 4 Credits.

Effective data summarization and description. This course will teach students how to efficiently develop intuition for a dataset. Best practices in data manipulation, including key concepts in data cleaning and tidying will be covered. Students will learn how to summarize data with summary statistics and ordination techniques, as well as visualize data using a range of transformations and plotting approaches. Students cannot receive credit for both DSCI 535 and CS 553.

Requisites: Prereq: DSCI 531.

Equivalent to: CS 553

DSCI 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

DSCI 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

DSCI 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

DSCI 625. Foundational Mathematics for Data Science. 4 Credits.

Key math for data science models, algorithms, and processes. Taught at a level accessible to those with minimal college-level math. Topics include differential calculus including higher-order and partial derivatives, linear algebra including linear transformations and eigenanalysis, and select topics in discrete mathematics.

DSCI 626. Foundational Statistics for Data Science. 4 Credits.

An introduction to data visualization and statistical inference. Taught at a level accessible to those with no background in statistics. Topics include basic simulation, publication-quality plot production, parameter estimation, hypothesis testing and p-values, linear models, and non-parametric statistical analysis.

DSCI 627. Foundational Programming for Data Science. 4 Credits.

An introduction to computer programming for data science. Taught at a level accessible for those with no prior programming experience. Topics include an introduction to programming, debugging, reproducible code and documentation, data cleaning and visualization, libraries, and a basic introduction to simple machine-learning approaches.

DSCI 632. Statistics for Data Science. 4 Credits.

Probability for classical and Bayesian inference. This course will cover statistical uncertainty as applied to hypothesis testing, experimental design, and parameter estimation. Students will gain exposure to common probability distributions in the Sciences, and their application in statistical models, validation of model assumptions, and hypothesis formulation and testing. Basic maximum likelihood methods using linear models (regression, ANOVA) will be covered. Will include an introduction to Bayesian statistics.

DSCI 633. Machine Learning I. 4 Credits.

Applied concepts and methods in machine learning. This course will cover fundamental concepts, algorithms, and techniques. High-level conceptual and statistical tradeoffs in machine learning will feature prominently, as will key processes in model optimization, including resampling methods and an introduction to gradient descent. Both supervised and unsupervised learning techniques covered.

DSCI 634. Machine Learning II. 4 Credits.

Advanced methods in machine learning. This course will feature a diverse range of techniques to round out student mastery of cutting-edge predictive modeling. Includes clustering and multivariate ordination redux, Bayesian model fitting procedures with Hamiltonian Monte Carlo, and deep learning with various classes of artificial neural network. Students will also gain exposure to the art of feature engineering and learn how to define effective, tailored loss functions. Sequence with DSCI 633.

DSCI 636. Synthetic Project Capstone. 4 Credits.

Project-driven application of data science knowledge and skills. Students will gather, tidy, visualize, and analyze a large data set conducive to a predictive modeling problem. Curated data sets from biological and materials sciences will be provided by program faculty and colleagues. Key learning outcomes include a reproducible workflow published in a code repository, original design and implementation of a machine learning model, and communications of finding in a written report.

Requisites: Prereq: DSCI 531, DSCI 535, DSCI 632, DSCI 633, DSCI 634, PHIL 623.

Earth Sciences (ERTH)

Courses

ERTH 101. Exploring Planet Earth. 4 Credits.

Plate tectonics, mantle flow, and magmatism. Volcanoes, earthquakes, mountain building, generation of Earth's crust; rocks and minerals; Earth's internal structure. Comparison with other planets. Laboratory, lecture.

Additional Information:

Science Area

ERTH 102. Exploring Earth's Environment. 4 Credits.

Landforms, surface processes, and interactions between humans and the environment. Weathering, erosion, sedimentation, ground water, streams, glaciers, deserts, oceans, and coastlines; geologic hazards. Laboratory, lecture. Roering.

Additional Information:

Science Area

ERTH 103. Exploring Earth History. 4 Credits.

History of the Earth. Geologic time, sedimentary environments; oceans, mountains, and climate through time; stratigraphic history of North America; evolution of plants and animals; interactions between humans, science, and the environment.

Additional Information:

Science Area

ERTH 137. Mountains and Glaciers. 4 Credits.

Survey of the geological processes that create mountain ranges around the world, and the glaciers that both adorn and erode them; an introduction to these select topics in geological science.

Additional Information:

Science Area

ERTH 156M. Scientific Revolutions. 4 Credits.

Surveys several major revolutions in our views of the natural and technological world, focusing on scientific concepts and methodological aspects. For nonscience majors. Multilisted with PHYS 156M.

Equivalent to: PHYS 156M

Additional Information:

Science Area

ERTH 198. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times**ERTH 199. Special Studies: [Topic]. 1-6 Credits.**

Studies of geologic topics combine background lectures with guided field trips to areas of geologic interest.

Repeatable 99 times**ERTH 201. Dynamic Planet Earth. 4 Credits.**

Processes that cause earthquakes, volcanism, mountain building, and plate tectonics. Includes Earth's origin and internal structure, rocks and minerals, gravity and magnetism. Weekly lectures, two-hour laboratory.

Additional Information:

Science Area

ERTH 202. Earth's Surface and Environment. 4 Credits.

Earth materials, the rock record, human interactions with surface environment. Sedimentary rocks and environments, chemical and physical weathering, hydrogeology, ground-water contamination, surface processes, human impacts. Weekly lectures, two-hour laboratory.

Additional Information:

Science Area

ERTH 203. History of Life. 4 Credits.

Origin, history, and physical evolution of the Earth; geologic time scales, development of the global stratigraphic section. Weekly lectures, two-hour laboratory.

Additional Information:

Science Area

ERTH 213. Geology of National Parks. 4 Credits.

Examines selected geologic features in United States national parks/monuments and the processes that form them within a historical approach to the development of the North American continent. Focuses on parks and monuments throughout the conterminous 48 states.

Additional Information:

Science Area

ERTH 304. The Fossil Record. 4 Credits.

This course will cover the history of life on Earth through time as found in the fossil record, as well as how scientists go about studying the fossil record. The curriculum also includes the processes of speciation and the disciplines of functional morphology and paleoecology.

Additional Information:

Science Area

ERTH 305. Dinosaurs. 4 Credits.

This course covers the evolution, occurrence, and variety of animals classified within the Dinosauria and the changing climate and vegetation during their time. Students will discuss dinosaur video depiction in popular culture and will assess the accuracy of those representations.

Additional Information:

Science Area

ERTH 306. Volcanoes and Earthquakes. 4 Credits.

Mechanisms that cause earthquakes and volcanoes, relation to plate tectonics, associated hazards, examples in Oregon and the western United States.

Additional Information:

Science Area

ERTH 307. Oceanography. 4 Credits.

Characteristics and physical, chemical, and biological processes of the world's oceans. Includes sections on origin of the oceans, plate tectonics, and human use and misuse of oceans. Students cannot receive credit for both BI 150 and ERTH 307.

Equivalent to: BI 150

Additional Information:

Science Area

ERTH 308. Geology of Oregon and the Pacific Northwest. 4 Credits.

The region's geologic and tectonic history and the plate tectonic processes responsible for its evolution.

Additional Information:

Science Area

ERTH 310. Earth Resources and the Environment. 4 Credits.

Geology of energy, mineral, and water resources and environmental issues related to their use. Topics include fossil fuels, metals, nuclear waste disposal, and water pollution.

Additional Information:

Science Area

ERTH 311. Earth Materials. 5 Credits.

Chemical and mineralogical composition of rocks, sediment, and soil. Properties of common minerals; origin of rocks; microscopic study of rock textures; environmental issues.

Requisites: Prereq: ERTH 101, ERTH 102 or ERTH 201, ERTH 202; coreq CH 221Z or CH 224H.

ERTH 315. Earth Physics. 4 Credits.

Physics of basic Earth processes; application of physics to plate tectonics and lithospheric deformation. Topics include forces, deformation, gravity, and seismology. Taught once or more per academic year.

Requisites: Prereq: MATH 252Z, PHYS 201.

ERTH 316. Introduction to Hydrogeology. 4 Credits.

Examines the role of water in geologic and environmental processes. Topics include the water cycle, groundwater flow, and contaminant transport.

Requisites: Pre- or coreq: MATH 252Z, PHYS 201.

ERTH 318. Introduction to Field Methods. 3 Credits.

Introduction to geologic mapping and related field skills, rock descriptions, cross sections, and structures. Lectures, laboratories, mandatory field trips.

Requisites: Prereq: ERTH 101–ERTH 103 or ERTH 201–ERTH 203.

ERTH 319. Field Studies Oregon Geology. 4 Credits.

Two-week summer course. Introduction to Oregon geology in the field with emphasis on processes and materials that shape the Earth's surface. Students use field data and maps to investigate volcanic activity, erosion, landslides, tectonic faults, and/or geologic hazards.

Requisites: Prereq: ERTH 101 or ERTH 201.

ERTH 331. Mineralogy. 5 Credits.

Crystal chemistry, systematic study of rock-forming silicate, and selected other minerals, mineral optics, and x-ray diffraction. Lab work with hand samples and petrographic microscopes.

Requisites: Prereq: ERTH 201, ERTH 202 or ERTH 101, ERTH 102; coreq: CH 221Z or CH 224H.

ERTH 332. Introduction to Petrology. 5 Credits.

Origin and classification of igneous, metamorphic, and sedimentary rocks. Microscopic study of rocks in thin section.

Requisites: Prereq: ERTH 331.

ERTH 334. Sedimentology and Stratigraphy. 4 Credits.

Sedimentary processes; characteristic properties of sedimentary rocks and their use in interpreting depositional environments; principles of lithostratigraphy and sequence stratigraphy.

Requisites: Prereq: ERTH 101–ERTH 103 or ERTH 201–ERTH 203; pre- or coreq: ERTH 311 or ERTH 332.

ERTH 337. Introduction to Physical Oceanography. 4 Credits.

Introduction to the physical processes that occur in the ocean. These processes control the movement of sediment, pollution, nutrients, and biota, as well as heat and freshwater. Topics might include waves, global ocean circulation, sediment transport, estuarine circulation, and biological oceanography.

Requisites: Prereq: [ERTH 101, ERTH 102] or [ERTH 201, ERTH 202]; [PHYS 201, PHYS 202] or [PHYS 251, PHYS 252].

Additional Information:

Science Area

ERTH 350. Structural Geology. 3 Credits.

Description, analysis, and origin of geologic structures including faults, folds, and tectonites. Focus on kinematic and dynamic analysis of deformation of earth materials.

Requisites: Prereq: ERTH 318; ERTH 311 or ERTH 332.

ERTH 351. Structural Geology Problems. 1 Credit.

Exercises in solving structural geology problems using orthographic and stereographic projection techniques. Problems emphasize calculating stress and strain from structural markers.

Requisites: Coreq: ERTH 350.

ERTH 352. Structural Geology Laboratory and Field. 1 Credit.

Collection and interpretation of field and map data for structural analysis. Includes field trips, map and cross-section generation, and some computer-based exercises.

Requisites: Coreq: ERTH 350.

ERTH 353. Geologic Hazards. 4 Credits.

A hands-on study of natural hazards, their physical processes and geography, and their impact on societies worldwide including recent occurrences of natural disasters. This course is accessible and to individuals interested in Geosciences, Geography, and Environmental Science.

Requisites: Prereq: ERTH 101 or ERTH 201.

Additional Information:

Science Area

ERTH 363. Computational Tools for Earth Sciences. 4 Credits.

Introduction to computational tools vital to the work of Earth scientists, including data management and analysis, algorithms, basic programming, computational environments, and visualization.

Requisites: Prereq: MATH 251Z.

ERTH 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ERTH 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ERTH 403. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Requisites: Prereq: earth sciences honors or senior thesis students only.

Repeatable 3 times for a maximum of 6 credits

ERTH 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ERTH 406. Field Studies: [Topic]. 1-6 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

ERTH 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ERTH 408. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

ERTH 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ERTH 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ERTH 410L. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ERTH 416. Geophysical and Environmental Sensors. 4 Credits.

This experiential course will provide students an introduction to sensors, microcontrollers, automation, data collection and programming from the perspective of sensing the Earth and the environment.

Requisites: Prereq: MATH 252Z; ERTH 363 or CS 122.

ERTH 418. Earth and Environmental Data Analysis. 4 Credits.

Tools-based instruction in data analysis for earth and environmental scientists. Topics include descriptive statistics, visualization, uncertainty analysis, hypothesis testing, regression, time series, and directional data.

Requisites: Prereq: MATH 246 or MATH 251Z.

ERTH 420. Geocommunication. 3 Credits.

Scientific writing and presentations for the geological sciences. Focus on writing scientific papers and proposals, preparing oral and visual presentations.

ERTH 423M. Introduction to Space Physics. 4 Credits.

Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.

Requisites: Prereq: PHYS 253, MATH 282.

Equivalent to: PHYS 423M

ERTH 434. Vertebrate Paleontology. 4 Credits.

Evolution of vertebrates, including ourselves, based on fossil evidence. Physical and other evolutionary constraints are addressed, and lab exercises provide practical experience.

Requisites: Prereq: ERTH 103 or ERTH 203.

ERTH 436. Paleocology and Functional Morphology. 4 Credits.

Ecological methods for the study of fossil organisms, both terrestrial and marine. Covers a range of methods from those that reconstruct the ecology of individual species to those that deal with whole communities and ecosystems. Laboratory offers practical and analytical experience in the methods.

Requisites: Prereq: one from ERTH 103, ERTH 203, BI 223Z.

ERTH 441. Hillslope Geomorphology. 4 Credits.

Hillslope processes and landforms; includes hillslope hydrology, overland flow erosion, weathering and soil formation, soil creep, landslides and related hazards, glacial and periglacial processes, effects of land-use practices and fire, and landscape evolution.

ERTH 451. Hydrogeology. 4 Credits.

Study of the origin, motion, and physical and chemical properties of ground water. Emphasizes quantitative analysis of flow and interaction with geologic materials.

Requisites: Prereq: CH 222Z or CH 225H; ERTH 316.

ERTH 453. Tectonics. 3 Credits.

Tectonic processes and examples. Global kinematics of plates and the forces that drive them. Continental deformation in compressional, shear, and extensional settings.

Requisites: Prereq: ERTH 350 and calculus.

ERTH 454. Fluid Dynamics. 4 Credits.

Introduction to the continuum theory of fluid dynamics, focusing on the Navier-Stokes equations of motion including common simplified limits and extensions. Applications are drawn from Earth and Planetary Science, Biology, and Physics.

Requisites: Prereq: PHYS 252, MATH 252Z.

ERTH 455. Mechanical Earth. 4 Credits.

Introduction to continuum mechanics. Includes stress and strain, friction, elasticity, viscous fluids, constitutive laws, equations of motion, and deformation of the Earth.

Requisites: Prereq: ERTH 315 or PHYS 202; MATH 256.

ERTH 456. Signal Processing. 4 Credits.

A theoretical and hands-on introduction to signal processing techniques that are widely used in geophysical, geological, and related fields.

Requisites: Prereq: MATH 252Z or ERTH 363.

ERTH 468. Introduction to Seismology. 4 Credits.

Introduction to observational, theoretical, and computational seismology. Includes review of earth structure, source representation, ray theory, and seismic wave phenomena.

Requisites: Prereq: MATH 256, ERTH 455.

ERTH 471. Thermodynamic Geochemistry. 4 Credits.

Introduction to geologic application of classical chemical thermodynamics. Gibbs free energy and its temperature, pressure, and composition derivatives; fugacity, activity, and chemical potential. Solutions, ideal and nonideal.

Requisites: Prereq: ERTH 311 or ERTH 332; CH 223Z; MATH 253Z.

ERTH 473. Isotope Geochemistry. 4 Credits.

Introduction to nuclear physics and isotope systematics; techniques of isotope analysis; applications of stable and radioactive isotopes in geochronology and as tracers of geological processes.

ERTH 474. Soil and Environmental Chemistry. 4 Credits.

Understanding the flow and cycling of chemicals in soils is vital for addressing many pressing societal issues, including mitigating climate change, growing abundant and safe food, and protecting water quality. This class will describe fundamental soil chemical principles and consider their broader applications.

Requisites: Prereq: ENVS 477, CH 222Z.

ERTH 480. Volcanology. 4 Credits.

Products and processes of volcanism, transport of magma in the conduit and into the atmosphere, eruptive mechanisms, volcanic hazards.

Requisites: Prereq: ERTH 201; PHYS 201 or PHYS 251; MATH 251Z or MATH 246.

ERTH 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ERTH 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ERTH 508. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

ERTH 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ERTH 510L. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ERTH 516. Geophysical and Environmental Sensors. 4 Credits.

This experiential course will provide students an introduction to sensors, microcontrollers, automation, data collection and programming from the perspective of sensing the Earth and the environment.

ERTH 518. Earth and Environmental Data Analysis. 4 Credits.

Tools-based instruction in data analysis for earth and environmental scientists. Topics include descriptive statistics, visualization, uncertainty analysis, hypothesis testing, regression, time series, and directional data.

ERTH 520. Geocommunication. 3 Credits.

Scientific writing and presentations for the geological sciences. Focus on writing scientific papers and proposals, preparing oral and visual presentations.

ERTH 523M. Introduction to Space Physics. 4 Credits.

Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.

Equivalent to: PHYS 523M

ERTH 534. Vertebrate Paleontology. 4 Credits.

Evolution of vertebrates, including ourselves, based on fossil evidence. Physical and other evolutionary constraints are addressed, and lab exercises provide practical experience.

ERTH 536. Paleocology and Functional Morphology. 4 Credits.

Ecological methods for the study of fossil organisms, both terrestrial and marine. Covers a range of methods from those that reconstruct the ecology of individual species to those that deal with whole communities and ecosystems. Laboratory offers practical and analytical experience in the methods.

ERTH 541. Hillslope Geomorphology. 4 Credits.

Hillslope processes and landforms; includes hillslope hydrology, overland flow erosion, weathering and soil formation, soil creep, landslides and related hazards, glacial and periglacial processes, effects of land-use practices and fire, and landscape evolution.

ERTH 551. Hydrogeology. 4 Credits.

Study of the origin, motion, and physical and chemical properties of ground water. Emphasizes quantitative analysis of flow and interaction with geologic materials.

ERTH 553. Tectonics. 3 Credits.

Tectonic processes and examples. Global kinematics of plates and the forces that drive them. Continental deformation in compressional, shear, and extensional settings.

ERTH 554. Fluid Dynamics. 4 Credits.

Introduction to the continuum theory of fluid dynamics, focusing on the Navier-Stokes equations of motion including common simplified limits and extensions. Applications are drawn from Earth and Planetary Science, Biology, and Physics.

ERTH 555. Mechanical Earth. 4 Credits.

Introduction to continuum mechanics. Includes stress and strain, friction, elasticity, viscous fluids, constitutive laws, equations of motion, and deformation of the earth.

ERTH 556. Signal Processing. 4 Credits.

A theoretical and hands-on introduction to signal processing techniques that are widely used in geophysical, geological, and related fields.

ERTH 568. Introduction to Seismology. 4 Credits.

Introduction to observational, theoretical, and computational seismology. Includes review of earth structure, source representation, ray theory, and seismic wave phenomena.

ERTH 573. Isotope Geochemistry. 4 Credits.

Introduction to nuclear physics and isotope systematics; techniques of isotope analysis; applications of stable and radioactive isotopes in geochronology and as tracers of geological processes.

ERTH 574. Soil and Environmental Chemistry. 4 Credits.

Understanding the flow and cycling of chemicals in soils is vital for addressing many pressing societal issues, including mitigating climate change, growing abundant and safe food, and protecting water quality. This class will describe fundamental soil chemical principles and consider their broader applications.

ERTH 580. Volcanology. 4 Credits.

Products and processes of volcanism, transport of magma in the conduit and into the atmosphere, eruptive mechanisms, volcanic hazards.

ERTH 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ERTH 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ERTH 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ERTH 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

ERTH 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ERTH 608. Laboratory Projects: [Topic]. 1-16 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

ERTH 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ERTH 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ERTH 620. Advanced Igneous Petrology. 3 Credits.

Igneous rocks of the ocean basins, continental margins, and stable continental interior including basalts, calcalkaline series, and granites. Content varies according to research interests.

Requisites: Prereq: EARTH 514, 571, or equivalent.

ERTH 692. Advanced Volcanology. 4 Credits.

This course introduces students to concepts of heat and mass transfer to understand the transport of magma in the subsurface and the physical processes involved in volcanic eruptions.

Requisites: Prereq: EARTH 580.

East Asian Languages and Literatures (EALL)

Courses

EALL 109. Language of Food in East Asia. 4 Credits.

This introductory course offers an intellectual feast on the language of food and foodways in East Asia. It introduces students to East Asian food cultures and heritages through the lens of language.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

EALL 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

EALL 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EALL 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EALL 199L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

EALL 209. Languages and Societies in East Asia. 4 Credits.

Introduction to languages and societies in East Asia. Topics include the structure of Chinese, Japanese, and Korean; politeness; intercultural communication; writing; minority and immigrant communities. Taught in English.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

EALL 211. Japan A Cultural Odyssey. 4 Credits.

Introduction to distinctive features of Japan's linguistic, literary, artistic, and religio-philosophical heritage. Includes guest lectures, films.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

EALL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EALL 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

EALL 402. Supervised Tutoring. 1-12 Credits.

A student, under faculty supervision, accepts responsibility for tutoring other students within the discipline.

Repeatable 99 times

EALL 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EALL 406. Field Studies: [Topic]. 1-21 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

EALL 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EALL 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EALL 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

EALL 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EALL 440. Chinese, Japanese, and Korean Phonetics. 4 Credits.

This course introduces students to the articulatory and acoustic analyses of Chinese, Japanese, and Korean sound systems. Students acquire knowledge of the sound systems of the three languages and to engage in the examination of current issues involving Chinese, Japanese and Korean phonetics.

Requisites: Prereq: One from CHN 103, JPN 103, KRN 103.

EALL 442. Second-Language Acquisition. 4 Credits.

Analyzes how important theories and concepts in second-language acquisition apply specifically to the learning of Chinese, Japanese, and Korean.

EALL 443. Chinese, Japanese, and Korean Pedagogy. 4 Credits.

Advanced language pedagogy; includes investigation of issues pertinent to the teaching of East Asian languages.

Requisites: Prereq: one from CHN 303, JPN 303, KRN 303.

Additional Information:

BA Language Satisfying Course

EALL 445. East Asian Psycholinguistics. 4 Credits.

Language is a fundamental aspect of human beings and is central to social life. In this course, we will consider a range of topics relevant to our ability to comprehend and produce language, focusing on East Asian languages. We will discuss various topics ranging from the nature of abstract linguistic representation to the relationships between language, cognition, and culture.

EALL 460. Teaching East Asian Languages and Literatures at College Level. 2 Credits.

Training in Chinese and Japanese language instruction through lectures, observations, and teaching practicums.

Repeatable 3 times for a maximum of 8 credits

EALL 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EALL 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EALL 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EALL 540. Chinese, Japanese, and Korean Phonetics. 4 Credits.

This course introduces students to the articulatory and acoustic analyses of Chinese, Japanese, and Korean sound systems. Students acquire knowledge of the sound systems of the three languages and to engage in the examination of current issues involving Chinese, Japanese and Korean phonetics.

EALL 542. Second-Language Acquisition. 4 Credits.

Analyzes how important theories and concepts in second-language acquisition apply specifically to the learning of Chinese, Japanese, and Korean.

EALL 543. Chinese, Japanese, and Korean Pedagogy. 4 Credits.

Advanced language pedagogy; includes investigation of issues pertinent to the teaching of East Asian languages.

EALL 545. East Asian Psycholinguistics. 4 Credits.

Language is a fundamental aspect of human beings and is central to social life. In this course, we will consider a range of topics relevant to our ability to comprehend and produce language, focusing on East Asian languages. We will discuss various topics ranging from the nature of abstract linguistic representation to the relationships between language, cognition, and culture.

EALL 560. Teaching East Asian Languages and Literatures at College Level. 2 Credits.

Training in Chinese and Japanese language instruction through lectures, observations, and teaching practicums.

Repeatable 3 times for a maximum of 8 credits

EALL 601. Research: [Topic]. 1-10 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

EALL 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

EALL 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EALL 607. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EALL 608. Workshop: [Topic]. 1-4 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 3 times for a maximum of 12 credits when topic changes

EALL 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

EALL 611. Critical Approaches. 2 Credits.

Introduces recent research and methodologies in the fields of Chinese, Japanese and Korean traditional and modern literary, cultural, film, and linguistic studies.

EALL 680. Linguistics Research and Bibliography. 5 Credits.

Provides critical training in quantitative and qualitative methods and bibliography research in linguistics and language pedagogy.

Economics (EC)

Courses

EC 101. Contemporary Economic Issues. 4 Credits.

Examines contemporary public policy using economic principles. Topics may include balanced budgets and tax reform, unemployment, health care, poverty and income redistribution, environmental policy, and international trade policy.

Additional Information:

Social Science Area

EC 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EC 201Z. Principles of Microeconomics. 4 Credits.

Examines how consumers and firms make choices when facing scarce resources, and how those choices are related to government policy and market outcomes, such as prices and output.

Equivalent to: EC 201

Additional Information:

Social Science Area

EC 202Z. Principles of Macroeconomics. 4 Credits.

Examines the aggregate activity of a market economy, economic growth, inflation, unemployment, and the use of fiscal and monetary policy to address macroeconomic problems.

Equivalent to: EC 202

Additional Information:

Social Science Area

EC 311. Intermediate Microeconomic Theory. 4 Credits.

Consumer and firm behavior, market structures. General equilibrium theory, welfare economics, collective choice, rules for evaluating economic policy. Students cannot receive credit for both EC 311 and FIN 311.

Requisites: Prereq: EC 201Z; MATH 241 or MATH 251Z.

Equivalent to: FIN 311, FIN 311H

EC 313. Intermediate Macroeconomic Theory. 4 Credits.

Determination of aggregate income, employment, and unemployment; evaluation of macroeconomic policies.

Requisites: Prereq: EC 202Z; MATH 241 or MATH 251Z; EC 311 strongly recommended.

EC 320. Introduction to Econometrics I. 4 Credits.

Application of classical statistical techniques of estimation, hypothesis testing, and regression to economic models. Includes laboratory section.

Requisites: Prereq: MATH 242 or MATH 252Z; one from STAT 243Z, DSCI 102, MATH 343, MATH 345M, DSCI 345M.

EC 327. Introduction to Game Theory. 4 Credits.

Introductory course in game theory. Develops game-theoretic methods of rational decision making and equilibriums, using many in-class active games.

Requisites: Prereq: EC 101 or EC 201Z.

Additional Information:

Social Science Area

EC 328. Behavioral Economics and Its Applications. 4 Credits.

This is an introductory course on behavioral economics, which brings together economics and psychology to understand human decision making in a wide range of real life applications.

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

EC 330. Urban and Regional Economic Problems. 4 Credits.

Topics may include urban and metropolitan growth, land use, race and poverty, education systems, slums and urban renewal, transportation, crime, and pollution and environmental quality.

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

EC 333. Resource and Environmental Economic Issues. 4 Credits.

Economic analysis of replenishable and nonreplenishable natural resources; environmental issues and policies.

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

EC 340. Issues in Public Economics. 4 Credits.

Principles and problems of government financing. Expenditures, revenues, debt, and financial administration. Production by government versus production by the private sector. Tax measures to control externalities.

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

EC 350. Labor Market Issues. 4 Credits.

Topics may include the changing structure of employment, the minimum wage, the dual labor market hypothesis, collective bargaining, discrimination, and health and safety regulation.

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

EC 360. Issues in Industrial Organization. 4 Credits.

Topics may include analysis of market power, trends in industrial structure, the role of advertising, pricing policies and inflation, impact of social regulation (e.g., OSHA, EPA), and international comparisons.

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

EC 370. Money and Banking. 4 Credits.

Operations of commercial banks, the Federal Reserve System, and the Treasury that affect the United States monetary system.

Requisites: Prereq: EC 202Z.

Additional Information:

Social Science Area

EC 380. International Economic Issues. 4 Credits.

Exchange across international boundaries, theory of comparative advantage, balance of payments and adjustments, international financial movements, exchange rates and international financial institutions, trade restrictions and policy.

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

EC 390. Problems and Issues in the Developing Economies. 4 Credits.

Topics may include the role of central planning, capital formation, population growth, agriculture, health and education, interaction between economic and cultural change, and the "North-South debate."

Requisites: Prereq: EC 201Z.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

EC 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EC 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

EC 404. Internship. 1-4 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 3 times for a maximum of 4 credits

EC 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EC 407. Seminar: [Topic]. 1-5 Credits.

Yearly offerings vary depending on interests and needs of students and on availability of faculty members.

Repeatable 99 times when topic changes

EC 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EC 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Requisites: Prereq: EC 311; EC 313; one from EC 320, EC 423.

Repeatable 99 times when topic changes

EC 411. Advanced Microeconomic Theory. 4 Credits.

Advanced theory of consumer and firm behavior, market structures.

Requisites: Prereq: MATH 253Z.

EC 412. Foundations of Economic Policy Analysis. 4 Credits.

Advanced theoretical foundations of economic policy design and analysis.

Requisites: Prereq: EC 411.

EC 413. Advanced Macroeconomic Theory. 4 Credits.

Advanced theory about the determination of aggregate income, employment, unemployment; evaluation of macroeconomic policies.

Requisites: Prereq: MATH 253Z.

EC 418. Economic Analysis of Community Issues I. 2 Credits.

Hands-on experience applying economic analysis and econometrics to problems that face local community nonprofits and government agencies.

Requisites: Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 419. Economic Analysis of Community Issues II. 4 Credits.

Hands-on experience applying economic analysis and econometrics to problems that face local community nonprofits and government agencies.

Requisites: Prereq: EC 311, EC 320.

EC 421. Introduction to Econometrics II. 4 Credits.

Analysis of departures from classical regression assumptions, corrections, and other related topics. Includes laboratory section.

Requisites: Prereq: one from EC 320, EC 423.

EC 422. Economic Forecasting. 4 Credits.

Basic techniques of economic forecasting that are typically used in a business environment.

Requisites: Prereq: one from EC 320, EC 423; coreq: one from EC 421, EC 424.

EC 423. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Requisites: Prereq: MATH 281, MATH 341; MATH 282 and MATH 461 strongly recommended.

EC 424. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Requisites: Prereq: EC 423.

EC 425. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Requisites: Prereq: EC 424.

EC 427. Games and Decisions. 4 Credits.

Game-theoretic methods of decision-making. Topics may include extensive-form games, noncredible threats, subgame perfect equilibrium, strategic-form games, undominated strategies, Nash equilibrium, coalitional games, and the core.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 428. Behavioral and Experimental Economics. 4 Credits.

Investigates the "rational choice" model and behavioral alternatives, using laboratory experiments. Topics may include altruism, auctions, bargaining, behavioral finance, hyperbolic discounting, and decision-making under uncertainty.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 430. Urban and Regional Economics. 4 Credits.

Location theory; urbanization and metropolitan growth; regional analysis; intraurban rent, location and land use, size distribution of urban areas; welfare economics, political economy, and urban problems.

Requisites: Prereq: EC 311, FIN 311 or equiv; one from EC 320, EC 423.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

EC 434. Environmental Economics. 4 Credits.

Introduction to the field that includes theoretical environmental policy, issues in environmental regulation, and empirical techniques used by practitioners.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 440. Public Economics. 4 Credits.

Theory of public goods and their optimal provision. Collective choice versus private choice and implications for resource allocation and efficiency.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 443. Health Economics. 4 Credits.

Includes moral hazard and adverse selection; incentives faced by health care providers through reimbursement, managed care, and malpractice; rationale for government intervention in the health care sector.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 448. Political Economy. 4 Credits.

Covers the economic problems that arise when the government is a self-interested actor in the economy. We study political agency, voting, the economic origins of political institutions and the size and number of nations.

Requisites: Prereq: EC 311, EC 313, EC 320.

EC 449. Computational Economics. 4 Credits.

This course provides an introduction to modern computational economics. Computational economics allows us to tackle problems that would be impossible or too time-consuming to solve by hand.

Requisites: Prereq: EC 311; EC 313; one from EC 320, EC 423.

EC 450. Labor Economics. 4 Credits.

Supply and demand for labor, wage determination under various market structures, minimum wage and worker exploitation, human capital investments, labor market signaling and sorting, discrimination, uncertainty, and job matching.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 451. Issues in Labor Economics. 4 Credits.

Topics may include the determination of wages, employment, and unemployment; globalization and immigration; income inequality; internal labor markets; the role of unions; human capital, education, and schools.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 460. Theories of Industrial Organization. 4 Credits.

Theories, quantitative measures, and institutional descriptions of the structure, conduct, and results that characterize American industry. Emphasis is on the determinants and consequences of market power.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 471. Monetary Theory. 4 Credits.

Money creation, deficit finance, and taxation in monetary economies. Topics may include the government budget constraint, causes and consequences of inflation, Richardian equivalence, and seigniorage.

Requisites: Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 480. International Finance. 4 Credits.

Foreign exchange markets, interaction between spot and forward markets, speculation and interest arbitrage, balance-of-payments accounting, measures of deficits and surpluses, "open-economy" macroeconomic issues.

Requisites: Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 481. International Trade. 4 Credits.

Theories of international trade, direction of trade flows, determination of prices and volumes in international trade, tariffs, quotas, customs unions, free versus restricted trade.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 482. Economics of Globalization. 4 Credits.

Applications of economic theories and empirical methods to globalization issues: market integration of goods and factors, international labor and environmental standards, economic growth and income inequality, financial stability, global governance.

Requisites: Prereq: EC 311, EC 320.

EC 484. Multinational Corporations. 4 Credits.

Economist's perspective of multinational corporations. Explores the policies governments use to influence corporate behavior and patterns of investment; taxation as a tool for implementing public policy.

Requisites: Prereq: EC 311; one from EC 320, EC 423.

EC 490. Economic Growth and Development. 4 Credits.

Experience of developed countries and theories of development. Analysis of specific development programs, role of agriculture, sources of investment, techniques and strategies of investment planning.

Requisites: Prereq: EC 311, EC 313; one from EC 320, EC 423.

Additional Information:

Cultural Literacy: Global Perspectives

EC 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

EC 507. Seminar: [Topic]. 1-5 Credits.

Yearly offerings vary depending on interests and needs of students and on availability of faculty members.

Repeatable 99 times when topic changes

EC 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EC 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

EC 511. Advanced Microeconomic Theory. 4 Credits.

Advanced theory of consumer and firm behavior, market structures.

EC 512. Foundations of Economic Policy Analysis. 4 Credits.

Advanced theoretical foundations of economic policy design and analysis.

EC 513. Advanced Macroeconomic Theory. 4 Credits.

Advanced theory about the determination of aggregate income, employment, unemployment; evaluation of macroeconomic policies.

EC 522. Economic Forecasting. 4 Credits.

Basic techniques of economic forecasting that are typically used in a business environment.

EC 523. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Requisites: Prereq: MATH 281, MATH 341; MATH 282 and MATH 461 strongly recommended.

EC 524. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Requisites: Prereq: EC 523.

EC 525. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Requisites: Prereq: EC 524.

EC 527. Games and Decisions. 4 Credits.

Game-theoretic methods of decision-making. Topics may include extensive-form games, noncredible threats, subgame perfect equilibrium, strategic-form games, undominated strategies, Nash equilibrium, coalitional games, and the core.

EC 528. Behavioral and Experimental Economics. 4 Credits.

Investigates the "rational choice" model and behavioral alternatives, using laboratory experiments. Topics may include altruism, auctions, bargaining, behavioral finance, hyperbolic discounting, and decision-making under uncertainty.

EC 530. Urban and Regional Economics. 4 Credits.

Location theory; urbanization and metropolitan growth; regional analysis; intraurban rent, location and land use, size distribution of urban areas; welfare economics, political economy, and urban problems.

EC 534. Environmental Economics. 4 Credits.

Introduction to the field that includes theoretical environmental policy, issues in environmental regulation, and empirical techniques used by practitioners.

EC 540. Public Economics. 4 Credits.

Theory of public goods and their optimal provision. Collective choice versus private choice and implications for resource allocation and efficiency.

EC 543. Health Economics. 4 Credits.

Includes moral hazard and adverse selection; incentives faced by health-care providers through reimbursement, managed care, and malpractice; rationale for government intervention in the health-care sector.

EC 548. Political Economy. 4 Credits.

Covers the economic problems that arise when the government is a self-interested actor in the economy. We study political agency, voting, the economic origins of political institutions and the size and number of nations.

EC 549. Computational Economics. 4 Credits.

This course provides an introduction to modern computational economics. Computational economics allows us to tackle problems that would be impossible or too time-consuming to solve by hand.

EC 550. Labor Economics. 4 Credits.

Supply and demand for labor, wage determination under various market structures, minimum wage and worker exploitation, human capital investments, labor market signaling and sorting, discrimination, uncertainty, and job matching.

EC 551. Issues in Labor Economics. 4 Credits.

Topics may include the determination of wages, employment, and unemployment; globalization and immigration; income inequality; internal labor markets; the role of unions; human capital, education, and schools.

EC 560. Theories of Industrial Organization. 4 Credits.

Theories, quantitative measures, and institutional descriptions of the structure, conduct, and results that characterize American industry. Emphasis is on the determinants and consequences of market power.

EC 571. Monetary Theory. 4 Credits.

Money creation, deficit finance, and taxation in monetary economies. Topics may include the government budget constraint, causes and consequences of inflation, Richardian equivalence, and seigniorage.

EC 580. International Finance. 4 Credits.

Foreign exchange markets, interaction between spot and forward markets, speculation and interest arbitrage, balance-of-payments accounting, measures of deficits and surpluses, "open-economy" macroeconomic issues.

EC 581. International Trade. 4 Credits.

Theories of international trade, direction of trade flows, determination of prices and volumes in international trade, tariffs, quotas, customs unions, free versus restricted trade.

EC 582. Economics of Globalization. 4 Credits.

Applications of economic theories and empirical methods to globalization issues: market integration of goods and factors, international labor and environmental standards, economic growth and income inequality, financial stability, global governance.

EC 584. Multinational Corporations. 4 Credits.

Economist's perspective of multinational corporations. Explores the policies governments use to influence corporate behavior and patterns of investment; taxation as a tool for implementing public policy.

EC 590. Economic Growth and Development. 4 Credits.

Experience of developed countries and theories of development. Analysis of specific development programs, role of agriculture, sources of investment, techniques and strategies of investment planning.

EC 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

EC 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

EC 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EC 606. Practicum: [Topic]. 1-16 Credits.

Graduate teaching fellows may earn 3 credits a term; available to other graduate students with department head's consent.

Repeatable 99 times

EC 607. Seminar: [Topic]. 1-5 Credits.

Recent topics are Econometrics, Game Theory, Labor Economics, and Public Finance.

Repeatable 99 times

EC 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EC 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Education (EDUC)

Courses

EDUC 199. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Exploring Careers in Education.

Repeatable 99 times

EDUC 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EDUC 406. Practicum: [Topic]. 1-12 Credits.

Recent topics include Peer Advising Experience.

Repeatable 99 times

EDUC 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EDUC 408. Workshop: [Topic]. 1-18 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDUC 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EDUC 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EDUC 508. Workshop: [Topic]. 1-18 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDUC 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EDUC 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EDUC 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

EDUC 607. Seminar: [Topic]. 1-5 Credits.

Recent topics include Advanced Professional Practices.

Repeatable 99 times

EDUC 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

EDUC 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EDUC 610L. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

EDUC 611. Survey of Educational Research Methods. 3 Credits.

Survey of qualitative, quantitative, and single-subject research methods.

Students develop competence in using published research to inform decision-making in various settings.

EDUC 612. Social Science and Education Research Design. 3 Credits.

Overview of qualitative, quantitative, and single-subject research methods. Emphasis on introducing students to considerations, issues, and techniques of social science research design.

EDUC 614. Introductory Statistics for Practitioners I. 3 Credits.

Introduction to statistics for practitioners and research consumers.

Includes descriptive statistics of samples and inferential statistics of populations, including chi-square tests, correlation and simple regression, t-tests, and one-way ANOVA. Sequence with EDUC 640.

Requisites: Prereq: EDUC 611 or EDUC 612.

EDUC 615. Qualitative Data and Coding Methods. 3 Credits.

Introduces basic methods of qualitative research, including data collection and thematic coding of interview and observation data.

EDUC 616. Philosophical Foundations of Social Science. 4 Credits.

This course examines the philosophical assumptions that underlie various research methodologies in the human and social sciences. It additionally introduces beginning doctoral students to the work of a variety of professors in the College of Education.

EDUC 620. Program Evaluation I. 3 Credits.

Focuses on small-scale evaluations, particularly in the field of education and human services. Students plan and design an evaluation.

Requisites: Prereq: EDUC 640 or EDUC 641.

EDUC 621. Program Evaluation II. 3 Credits.

Implementation and completion of the evaluation design defined in Program Evaluation I.

Requisites: Prereq: EDUC 620.

EDUC 630. Qualitative Methodology I: Interpretivist Inquiry. 4 Credits.

Examines the history of qualitative research in the study of human experience, emphasizing interpretive approaches to qualitative research that retain the regulative ideal of objectivity.

EDUC 632. Qualitative Methodology II: Postcritical Inquiry. 4 Credits.

Explores the epistemic limits of representing human experience, and the political and ethical implications for researchers beginning with Marx.

Requisites: Pre- or coreq: EDUC 630.

EDUC 634. Qualitative Methodology III: Posthumanist Inquiry. 4 Credits.

Examines theoretical influences on qualitative research beginning with those associated with the linguistic turn, then critiquing the linguistic turn, and ending with the ontological turn.

Requisites: Pre- or coreq: EDUC 630, EDUC 632.

EDUC 636. Advanced Qualitative Methodology: New Materialisms. 4 Credits.

Examines contemporary theoretical explorations prompted by "the new materialisms" and how questions of ontology and materiality produce considerations of agency, data, subjectivity, voice, and analysis.

Requisites: Pre- or coreq: EDUC 630, EDUC 632, EDUC 634

EDUC 640. Introductory Statistics for Practitioners II. 3 Credits.

Intermediate statistics for practitioners and research consumers. Includes multiple regression with continuous and categorical predictors and factorial ANOVA. Sequence with EDUC 614.

Requisites: Prereq: EDUC 614.

EDUC 641. Applied Statistics in Education and Human Services I. 3 Credits.

First course in a PhD and advanced master's degree three-course sequence intended to provide a toolkit of statistical concepts, methods and their implementation to producers of applied research in education and other social sciences. Course is organized around principles of research design. Sequence with EDUC 614, EDUC 640, EDUC 643.

EDUC 643. Applied Statistics in Education and Human Service II. 3 Credits.

Second course in a PhD and advanced master's degree level three-course sequence intended to provide a toolkit of statistical concepts, methods and their implementation to producers of applied research in education and other social sciences. Course is organized around the principle that research design. Sequence with EDUC 614, EDUC 640, EDUC 641.

Requisites: Prereq: EDUC 641.

EDUC 645. Applied Statistics in Education and Human Services III. 3 Credits.

Third course in a PhD and advanced master's degree level, three-course sequence to provide a toolkit of statistical concepts, methods, and their implementation to producers of applied research in education, human services, and other social sciences. Sequence with EDUC 641, EDUC 643.

Requisites: Prereq: EDUC 643.

EDUC 646. Advanced Research Design. 3 Credits.

Provides a deeper understanding of educational research with an emphasis on principles of research designs and their use in applied research. Offered alternate years.

Requisites: Prereq: EDUC 643.

EDUC 650. Single-Subject Research Methods I. 3 Credits.

Basic single-subject design strategies and general procedures as well as issues related to conducting and analyzing single-subject research in applied settings. Sequence with EDUC 652.

EDUC 652. Single-Subject Research Methods II. 3 Credits.

Critical evaluation of single-subject and group-analysis research designs; elaboration on critical topics in single-subject methodology. Sequence with EDUC 650.

Requisites: Prereq: EDUC 650.

EDUC 654. Advanced Applied Behavior Analysis. 3 Credits.

Doctoral-level seminar designed to provide skills, practice, and knowledge in advanced methods and theory of applied behavior analysis.

Requisites: Prereq: EDUC 652.

EDUC 656. Advanced Analysis of Single-Case Research. 3 Credits.

Focuses on application of statistical and meta-analytic strategies for analyzing single-case research. Sequence with EDUC 650, EDUC 652, EDUC 654. Offered alternate years.

Requisites: Prereq: EDUC 650. One course in structural equation modeling or hierarchical linear modeling is recommended preparation.

Education Studies (EDST)

Courses

EDST 111. Education and Social Change. 4 Credits.

Students will evaluate historical, philosophical, and social viewpoints related to the purposes and goals of American education. Additionally, students will compare/contrast multiple approaches to address a range of challenges and opportunities in American schools.

Additional Information:

Social Science Area

EDST 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

EDST 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDST 199. Special Studies: [Topic]. 1-5 Credits.

A recent topic is Exploring Educational Studies.

Repeatable 99 times

EDST 211. Childhood Studies. 4 Credits.

Examines child development from within the context of specific development and ecological theories.

EDST 225. School and Representation in Media. 4 Credits.

Examines popular culture's influence on schools and teachers along with the various mediating factors such as race, ethnicity, social class, gender, sexuality, religion, and nationality.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

EDST 331. Autobiography of Schooling. 4 Credits.

The purpose of this course is to engage students in a critical reflection on life in classrooms through recognizing and questioning the assumptions underlying the routine of school. Includes analysis of critical autobiographies, case studies, readings along with application activities. Sequence with EDST 332, EDST 333.

Requisites: Prereq: EDST 111, EDST 211.

EDST 332. Learning, Teaching, and Assessment I. 3 Credits.

Students move beyond their own critical autobiographies of life in classrooms into various disciplinary literatures on learning, teaching, and assessment.

Requisites: Prereq: EDST 331; coreq: EDST 338.

EDST 333. Learning, Teaching, and Assessment II. 3 Credits.

Focus on specific school subjects that provide a context for examining the basic assumptions underlying teaching, learning, and assessment.

Requisites: Prereq: EDST 332; coreq: EDST 339.

EDST 338. Observation: Learning, Teaching, Assessment I. 1 Credit.

Students focus on listening to children to better understand how they make sense of school subjects.

Requisites: Pre- or coreq: EDST 332.

EDST 339. Observation: Learning, Teaching, Assessment II. 1 Credit.

Focuses on developing skills in observation of learning, teaching, and assessments.

Requisites: Coreq: EDST 333.

EDST 342. Curriculum Studies I. 4 Credits.

This course will examine the development of curriculum theory through analysis of a collection of pivotal readings authored by influential scholars from the 18th and 19th centuries paired with contemporary writings that link historical developments with current policy and practice. Sequence with EDST 333.

Requisites: Prereq: EDST 333.

EDST 343. Curriculum Studies II. 4 Credits.

Examines basic assumptions underlying curriculum development in K-12 schools.

Requisites: Prereq: EDST 342.

EDST 399. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Exploring Educational Studies, IDEA Reading.

Repeatable 99 times

EDST 401. Research: [Topic]. 1-18 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

EDST 402. Supervised College Teaching. 1-6 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 99 times

EDST 404. Internship: [Topic]. 1-18 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

EDST 405. Reading and Conference: [Topic]. 1-18 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EDST 406. Practicum: [Topic]. 1-12 Credits.

Recent topics include Educational Foundations.

Repeatable 99 times

EDST 407. Seminar: [Topic]. 1-5 Credits.

Recent topics include Professional Practices, Education for Minority Students, Reading in the Upper Elementary Grades.

Repeatable 99 times

EDST 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDST 409. Terminal Project. 1-12 Credits.

Topics include Integrated Licensure I, II, III.

Repeatable 99 times

EDST 410. Experimental Course: [Topic]. 1-5 Credits.

Topics include Foundations of Education, Science and Health Methods, Social Studies and Language Arts Methods.

Repeatable 99 times

EDST 420. Living in a Stratified Society. 4 Credits.

Examines the role of public education in the social context of the United States. The purpose of the course is to develop critical ways of thinking about schools as institutions that both reproduce and challenge social inequality.

Requisites: Prereq: EDST 111, EDST 225.

EDST 422. Technology Education. 4 Credits.

Examines educational technology, including the theoretical, methodological, practical, and policy issues that influence the field.

EDST 440. Physical Education for Diverse Learners. 3 Credits.

Provides a variety of physical education and fitness activities appropriate for children with diverse abilities.

EDST 448. Integrating the Arts. 4 Credits.

This course introduces students to the foundational conceptions of art, learning, curriculum, culture and society that inform the integration of the arts across subjects in elementary classrooms.

EDST 449. Introduction to Adaptive Physical Education. 4 Credits.

This course is designed to introduce students to the knowledge, skills, and strategies necessary to teach adaptive physical education.

EDST 450. Food and Schools. 4 Credits.

This course focuses on a topic that has typically been omitted from education courses and programs: food. Through this course, we will be thinking about the ways that food intersects with schools, and the implications of this for formal and informal educators.

Requisites: Prereq: EDST 420.

EDST 451. Teaching for Climate Activism. 4 Credits.

Future teachers survey current research and synthesize best practices for teaching about climate change. The course will draw from research across the fields of climate change education and communication as well as current curricula, books, and materials to explore how best to teach climate change.

Requisites: Prereq: EDST 420.

EDST 452. Poverty and Education. 4 Credits.

Examines the way poverty structures and mediates educational experiences and influences the educational achievement of students.

Requisites: Prereq: EDST 420.

EDST 453. Racism and Education. 4 Credits.

Examines multiple ways institutionalized racism structures and mediates educational experience and multiple visions of anti-racist teaching.

Requisites: Prereq: EDST 420.

EDST 454. Patriarchy and Education. 4 Credits.

Examines the way gender affects educational experiences and influences the educational achievement of students.

Requisites: Prereq: EDST 420.

EDST 455. Heteronormativity and Education. 4 Credits.

Examines the way sexuality and sexual identity influence the educational experiences of students.

Requisites: Prereq: EDST 420.

EDST 456. Decolonization and Education. 4 Credits.

Examines educational institutions and their continuing part in larger social processes of colonization and cultural genocide.

Requisites: Prereq: EDST 420.

EDST 457. Immigration, Diaspora and Education. 4 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students specifically.

Requisites: Prereq: EDST 420.

EDST 463. Foundations of Literacy. 4 Credits.

Introduction to the various theoretical dimensions of reading and writing that form the foundation for understanding and teaching the complex texts children encounter today.

Requisites: Prereq: EDST 333.

EDST 464. Multicultural Literacy. 4 Credits.

Introduces preservice teachers to literature written from ethnic, linguistic, social, and cultural perspectives and draws connections to broader cultural, social, historical, economic, and political contexts.

Requisites: Prereq: EDST 420.

EDST 471. Foundations of Algebra Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of algebra. Sequence with EDST 472.

EDST 472. Foundations of Geometry Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of geometry. Sequence with EDST 471.

Requisites: Prereq: EDST 471.

EDST 507. Seminar: [Topic]. 1-5 Credits.

Recent topics include Professional Practices, Education for Minority Students, Reading in the Upper Elementary Grades.

Repeatable 99 times

EDST 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDST 510. Experimental Course: [Topic]. 1-5 Credits.

Topics include Foundations of Education, Science and Health Methods, Social Studies and Language Arts Methods.

Repeatable 99 times

EDST 548. Integrating the Arts. 4 Credits.

This course introduces students to the foundational conceptions of art, learning, curriculum, culture and society that inform the integration of the arts across subjects in elementary classrooms.

EDST 549. Introduction to Adaptive Physical Education. 4 Credits.

This course is designed to introduce students to the knowledge, skills, and strategies necessary to teach adaptive physical education.

EDST 550. Food and Schools. 4 Credits.

This course focuses on a topic that has typically been omitted from education courses and programs: food. Through this course, we will be thinking about the ways that food intersects with schools, and the implications of this for formal and informal educators.

EDST 551. Teaching for Climate Activism. 4 Credits.

Future teachers survey current research and synthesize best practices for teaching about climate change. The course will draw from research across the fields of climate change education and communication as well as current curricula, books, and materials to explore how best to teach climate change.

EDST 552. Poverty and Education. 4 Credits.

Examines the way poverty structures and mediates educational experiences and influences the educational achievement of students.

EDST 553. Racism and Education. 4 Credits.

Examines multiple ways institutionalized racism structures and mediates educational experience and multiple visions of anti-racist teaching.

EDST 555. Heteronormativity and Education. 4 Credits.

Examines the way sexuality and sexual identity influence the educational experiences of students.

EDST 556. Decolonization and Education. 4 Credits.

Examines educational institutions and their continuing part in larger social processes of colonization and cultural genocide.

EDST 557. Immigration, Diaspora and Education. 4 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students specifically.

EDST 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

EDST 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

EDST 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EDST 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

EDST 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EDST 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDST 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

EDST 610. Experimental Course. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EDST 612. Foundations of Teaching and Learning. 3 Credits.

Provides students with the psychological foundations of teaching and learning.

EDST 614. Cultural Context of Education. 4 Credits.

Examines the cultural foundations of educational practice through a critical review of four decades of ethnographic research on school and student culture.

EDST 616. Language, Power, and Education. 1-4 Credits.

Examines the politics, policies, and practical realities associated with language and literacy in educational settings and how these issues affect all students to some degree.

EDST 617. Sapsik'wala' Indigenous Education Seminar I. 1-2 Credits.

Students in the Sapsik'wala' (Teacher) Education Program study Indigenous teaching methods, including decolonizing, Indigenous feminist, and Elder pedagogies, and reflect on and analyze the importance of their own work as Indigenous educators who are contributing to Indigenous self-determination in education and Tribal Nation building.

Repeatable 2 times for a maximum of 4 credits

EDST 618. Methods ESOL: Teaching English Language Development, K–12. 3 Credits.

Examines best practices of delivering English-language development in light of federal and state standards, including teaching methods, technology, and parental involvement.

EDST 620. Curricular Controversies: Math and Literacy. 4 Credits.

Focuses on the debates that influence, and in some cases overshadow, the teaching of mathematics and literacy from kindergarten to grade 12. Sequence with EDST 621, EDST 640.

EDST 621. Methods: Representing Mathematical Concepts. 4 Credits.

Students deepen their content knowledge, widen their understanding of student conceptualizations of mathematics, and reflect on their own mathematics instructional practices. Sequence with EDST 620, EDST 622.

EDST 622. Methods: Mathematical Problem-Solving Curriculum. 4 Credits.

Prepares students to view mathematics as a problem-solving field rather than a set of discrete skills and operational rules. Sequence with EDST 620, EDST 621.

Requisites: Prereq: EDST 621.

EDST 623. Methods: Representing Science Concepts. 4 Credits.

Examines why science is taught, what science subjects need to be taught, and how science is learned. Sequence with EDST 620, EDST 624.

EDST 624. Methods: Scientific Problem-Solving Curriculum. 4 Credits.

Presents science as a problem-solving field rather than a set of discrete facts and concepts. Introduces scientific literacy as the aim of science teaching. Sequence with EDST 620, EDST 623.

Requisites: Prereq: EDST 623.

EDST 627. Mgmt: Introduction to Supportive Learning Communities. 1 Credit.

Introduces the teacher candidate to the necessary components for creating supportive and successful classroom communities, including interaction between motivation, "classroom management," and teacher-student relationships. Sequence with EDST 628.

EDST 628. Mgmt: Creating Supportive Classroom Communities. 3 Credits.

Builds on EDST 627 by providing specific research, experience, and strategies for developing classroom environments where student behaviors are focused on learning. Sequence with EDST 627.

Requisites: Prereq: EDST 627.

EDST 630. Curriculum Studies and the Profession of Teaching. 4 Credits.

Examines a variety of ways curriculum is conceptualized at the secondary level. Sequence with EDST 631, EDST 632 (or EDST 634 or EDST 635, EDST 636); EDST 638.

EDST 631. Methods ELA: Representing Literature to Young People. 4 Credits.

Examines why literature is taught and the way teachers represent literary works to students. Sequence with EDST 630, EDST 632, EDST 638.

EDST 632. Methods: Engaging Students in Writing. 4 Credits.

Overview of strategies and tools for engaging students in the writing process. Emphasis on genres of writing and use of technology to enhance student writing. Sequence with EDST 630, EDST 631, EDST 638.

Requisites: Prereq: EDST 631.

EDST 633. Methods: Representing Second-Language Concepts. 4 Credits.

Provides a research-based foundation for planning, teaching, assessing, and managing second-language learning for the great diversity of students encountered in middle and high school. Sequence with EDST 630, 634, 637, 638.

EDST 634. Methods: Second-Language Conversation and Composition. 4 Credits.

Advanced teaching methodologies, techniques, and skills to effectively promote proficiency and fluency in second languages. Sequence with EDST 630, EDST 638.

Requisites: Prereq: EDST 633.

EDST 635. Methods: Representing Social Studies Concepts. 4 Credits.

Examines why social studies is taught and the way teachers represent social studies concepts to students. Sequence with EDST 630, EDST 636, EDST 638.

EDST 636. Methods: Social Studies Inquiry and Analysis. 4 Credits.

Explores the theory and practice of teaching social studies as a specialized form of inquiry. Sequence with EDST 630, EDST 635, EDST 638.

Requisites: Prereq: EDST 635.

EDST 638. Methods ESOL: English Language Learners Pedagogy Humanities. 4 Credits.

Examines a variety of research-based instructional and assessment strategies that support English language learners in meeting the curricular mandates of mainstream language arts and social studies courses. Sequence with EDST 630; EDST 631, EDST 632 (or EDST 634 or EDST 635, EDST 636).

EDST 640. Methods: Constructing Meaning through Literacy. 4 Credits.

Provides concepts and strategies used in teaching children to read. Focuses in particular on instruction for beginning and intermediate readers and writers.

EDST 642. Methods: Humanities Pedagogy. 4 Credits.

Explores the application of language arts and social studies methods and strategies for future elementary school practitioners.

EDST 643. Methods: Teaching Mathematics-Facts and Inquiry. 4 Credits.

Focuses on four areas of instruction crucial to becoming a skillful beginning teacher of mathematics.

EDST 645. Methods: Teaching Science-Detail and Discovery. 4 Credits.

Emphasizes science as a process of contemplating, exploring, and raising questions about the world in elementary classrooms.

EDST 646. Methods ESOL: Eng Lang Learners Pedagogy Elementary Classrm. 4 Credits.

Examines a variety of research-based instructional and assessment strategies that support English language learners in meeting the mandates of elementary-level curriculum.

EDST 647. English Language Learner Methods. 3 Credits.

Application-based course to provide English for Speakers of Other Languages (ESOL) endorsement candidates with opportunities to apply research-based instructional and assessment strategies that support English language learners. Method course has strong connection to planning for and assessing emerging bilingual English learner strengths and needs.

EDST 649. Elementary Physical Education Methods. 4 Credits.

This course is designed to prepare future educators with the knowledge, skills, and strategies necessary to teach physical education effectively in elementary schools.

EDST 653. Secondary Physical Education Methods. 4 Credits.

This course is designed to prepare future educators with the knowledge, skills, and strategies necessary to teach physical education effectively in secondary schools.

EDST 654. Learning and Motivational Sciences. 4 Credits.

Survey of the learning and motivational sciences for advanced graduate students. Offered alternate years.

EDST 661. Sociology: From Reproduction to Resistance. 4 Credits.

Focuses on the ways schools reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Offered alternate years.

EDST 662. Curriculum Theory: Contesting Educational Content. 4 Credits.

Survey of the history of curriculum theory, the subfield that asks the fundamental question, what is worth teaching? Offered alternate years.

EDST 663. Education and Immigration. 4 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students, with an emphasis on bilingual education policy. Offered alternate years.

EDST 666. Thesis Writing. 4 Credits.

Seminar for doctoral students who have advanced to candidacy. Emphasis is on support through the dissertation proposal writing process.

Repeatable 2 times for a maximum of 12 credits

EDST 667. Grant Writing: Finding Funders. 4 Credits.

Provides graduate students with the knowledge and skills needed to write successful grant proposals for research, professional development, and curriculum development projects.

EDST 673. Advanced Qualitative Methodology: Arts-Based Approaches. 4 Credits.

Examines contemporary reflexive social science research writing, focusing on experimentations with the form used by researchers to communicate insights about human affairs.

Requisites: Pre- or coreq: EDUC 630, EDUC 632, EDUC 634.

EDST 675. Indigenous Methods. 4 Credits.

This seminar examines foundational questions and literatures that guide Indigenous methodologies, the purpose of which is to foster students' abilities and commitments to enact inquiries grounded in relationality, respect, and responsibility toward Indigenous peoples and Indigenous struggles for self-determination, sovereignty, and decolonization.

Requisites: Prereq: EDUC 630, EDUC 632.

EDST 681. Elementary Part-Time Teaching. 4 Credits.

Provides scope, structure, supervision oversight, and guidance to support students during the part-time student teaching practicum in an Elementary school setting. Is first of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission intensive and extensive field-based requirements.

Requisites: Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

Repeatable 1 time for a maximum of 8 credits

EDST 682. Elementary Teaching Performance Assessment. 2 Credits.

Provides scope, structure, supervision oversight, and guidance to support pre-service teachers during their fulltime student teaching (EDST 683) and together are the last of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission (TSPC) intensive and extensive field-based requirement.

Requisites: Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

EDST 683. Elementary Full-Time Student Teaching. 10 Credits.

The Elementary fulltime student teaching is designed to give candidates the opportunity to gradually take the lead in preparation, instruction, and assessment for the classroom. This experience helps develop knowledge, skills, and professional dispositions to make a positive impact on student learning.

Requisites: Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

Repeatable 1 time for a maximum of 20 credits

EDST 686. Secondary Part-Time Teaching. 4 Credits.

Provides scope, structure, supervision oversight, and guidance to support students in part-time pre-service student teaching practicum in an Mid-High School setting. The first of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission intensive and extensive field-based experience.

Requisites: Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience.

Repeatable 1 time for a maximum of 8 credits

EDST 687. Secondary Teaching Performance Assessment. 2 Credits.

Provides scope, structure, supervision oversight, and guidance to support students during the full-time student teaching practicum in Mid/ High School settings. Is the second of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission intensive and extensive field-based requirements.

Requisites: Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

Repeatable 2 times for a maximum of 4 credits

EDST 688. Secondary Full-Time Student Teaching. 10 Credits.

The Secondary full-time student teaching is designed to give candidate the opportunity to gradually take the lead in preparation, instruction, and assessment for the classroom. This experience helps develop knowledge, skills, and professional dispositions to make a positive impact on student learning.

Requisites: Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

Repeatable 1 time for a maximum of 20 credits

EDST 690. Writing for Education Policy Leaders. 3 Credits.

This course is designed to familiarize graduate students with the essential elements of effective, academically rigorous, and policy-relevant professional writing. Students will be challenged to demonstrate critical thinking by anticipating the needs of various education policy actors and understanding the perspectives of key stakeholders—including teachers, school and district leaders, policymakers, the public, and education policy researchers—all of whom play a role in shaping education policy.

EDST 691. Education Policy for Multilingual Students. 3 Credits.

This course critically interrogates historical and current approaches to meeting the needs of multilingual and immigrant origin students in the US. The focus is how schools structure education for these students, and the ways in which this enables or constrains educational equity and opportunity. We examine federal, state, and local policies related to core content access, labeling and classification, assessment, and language development, among others.

EDST 692. Educational Policy Analysis. 3 Credits.

The purpose of this course is to introduce graduate students to the craft of education policy analysis. In the course, students will learn frameworks and employ tools to conduct education policy analysis, as well as conduct an analysis of an education policy issue of their choosing. Further, students will develop policy analysis writing skills for key education policy stakeholders.

EDST 693. Educational Governance and Policy Process. 3 Credits.

This graduate level course introduces students to the education governance structures and policy- and law-making processes at the federal, state and local levels. The course is designed for students who seek to become more sophisticated in their ability to read critically about, understand, and interpret the roles of various educational bodies and actors as well as the policy process and policy environment.

EDST 694. Survey of United States Education Policy. 3 Credits.

This is a graduate-level class designed to facilitate students' understanding of the major policy areas and debates in contemporary U.S. public K-12 education systems. It is designed for graduate students who seek to become education policymakers, school and system leaders, policy analysts and researchers.

EDST 695. Foundations of Education Policy and Leadership. 3 Credits.

Required course for the Master of Science in Education Policy and Leadership (MS-EPL) to introduce students into the program, build community within the cohort, develop a shared sense of purpose and direction in the program, and learn foundational core concepts of education policy and leadership.

EDST 696. Educational Policy and Leadership Master's Capstone. 3 Credits.

The purpose of this course is to scaffold students through the development and completion of their Educational Policy and Leadership master's capstone project. The capstone project is a discrete empirical examination of a problem of practice. The course also covers career planning and presentation skills.

EDST 697. Higher Education Policy. 3 Credits.

This course provides a comprehensive introduction to the realm of public policy in higher education. It delves into relevant research, theoretical frameworks, and areas of debate within the field.

EDST 698. Education Law. 3 Credits.

Designed to increase students' understanding of the legal framework that governs schools and educational policy, focused primarily on US K-12 issues, though we will touch on some higher education issues as well. Examines the basics of the US legal system; the legal rights of students to a high quality education; educational equity (including desegregation and affirmative action); students' and faculty's rights of free expression; student discipline and school choice.

EDST 699. Higher Education Leadership. 3 Credits.

Analyze the structures and systems-level composition of higher education in the United States; deconstruct the concentric systems of higher education administration and the interrelated leadership roles within those systems; and, examine and classify the subdivisions of possible career paths in higher education administration.

Educational Leadership (EDLD)

Courses

EDLD 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

EDLD 507. Seminar: [Topic]. 1-4 Credits.

Topics include Human Services, Peer Health Education.

Repeatable 99 times

EDLD 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDLD 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

EDLD 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

EDLD 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

EDLD 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

EDLD 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EDLD 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

EDLD 607. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EDLD 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

EDLD 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

EDLD 610. Experimental Course: [Topic]. 1-7 Credits.

Experimental course - topic varies.

Repeatable 24 times for a maximum of 75 credits

EDLD 611. K-12 Education Policy for School Leaders. 2 Credits.

Introduction to the education policy process at the state and local levels, focusing on school leaders. Emphasis placed on examining policies that further marginalize students and staff that have been historically underserved and underrepresented.

EDLD 612. Communications and Community Relations. 4 Credits.

Principal Licensure candidates learn proactive systems, strategies, and protocols for communicating with staff, students, parents and community members. Students develop an overall communication plan for their school or district location for ensuring the effective two-way flow of communication.

EDLD 613. Ethical Leadership. 4 Credits.

Prepare Principal Licensure candidates to become ethical leaders that lead with an equity lens at the forefront of the leadership decisions they make. Examine the ethical implications of school board policies and how to apply an equity lens to these policies.

EDLD 614. School Improvement Through Curriculum and Assessment. 4 Credits.

Develop the knowledge and skills related to leading curriculum, assessment and instruction at the building level. Analyze curriculum frameworks, state and national standards, effective strategies and assessment practices and leading professional learning will be examined. Create a school improvement plan.

EDLD 615. Leading Educational Change Initiatives. 3 Credits.

Overview of current thought on how to lead successful organizational change initiatives. Readings come from the fields of business as well as education, and the focus is on leading change initiatives in educational settings.

EDLD 616. Supervision of Teaching and Learning. 4 Credits.

Explores the theory, research and practical applications of supervision and evaluation. Analysis of supervisory behaviors that lead to improvement of teaching and learning, that in turn lead to improved outcomes for all students, particularly those students who have been underserved or historically marginalized.

EDLD 617. Oregon School Management and Budget. 4 Credits.

Prepare future administrators for designing a system for developing, allocating and managing a school-based budget, including opportunities for staff input into the budget cycle and specific strategies for engaging the community, particularly those parts of the community that are underrepresented.

EDLD 624. Leading for Equity. 3 Credits.

This course is designed to provide advanced exposure to current research and practice in leading for equity and inclusion within professional educational settings and a strong conceptual foundation in leadership.

EDLD 625. Survey and Questionnaire Design. 3 Credits.

Students gain practical experience in the collection and analysis of social science information through the design of surveys and questionnaires.

EDLD 627. Leaders Serving Special Populations. 3 Credits.

School and district leaders' preparation for future work serving students and families of students receiving special education services, as well as dually-identified students (English language learners receiving special education services). Eligibility, placement, Individual Education Plans, and meaningful inclusion of student and family voice and choice.

EDLD 628. Hierarchical Linear Models I. 3 Credits.

Introduction to multilevel modeling and hierarchical data structures, random and fixed effects, intercepts and slopes as outcomes models, estimation, centering, and the use and interpretation of HLM statistical software. Sequence with EDLD 629.

Requisites: Prereq: EDUC 642.

EDLD 629. Hierarchical Linear Models II. 3 Credits.

This course will include advanced topics in multilevel modeling and hierarchical data structures, including longitudinal and categorical data analysis, estimation methods, missing data and multiple imputation, and the use and interpretation of different HLM statistical software packages, including HLM, R, and Mplus. Sequence with EDLD 628.

Requisites: Prereq: EDLD 628.

EDLD 633. Structural Equation Modeling I. 3 Credits.

Theory, application, and interpretation of structural equation modeling techniques. Includes covariance structures, path diagrams, path analysis, model identification, estimation, and testing. Sequence with EDLD 634.

Requisites: Prereq: EDUC 642; EDUC 644 recommended.

EDLD 634. Structural Equation Modeling II. 3 Credits.

Emphasis on structural and latent variable models, including cross-validation, mean structures, comparing groups and models, latent growth-curve analyses. Sequence with EDLD 633. Offered alternate years.

Requisites: Prereq: EDLD 633.

EDLD 635. Executive Leadership for Principals. 4 Credits.

Investigation of leadership theory and styles as they relate to equitable, ethical and instructionally inclusive criteria. Creating vision and execution for strategic systems and structures that lead to a positive culture infused with high expectations and accountability.

EDLD 636. School Ethics and Governance. 2 Credits.

Examination of how intentional school and district governance serves system transformation. Viewing ethics through an equity lens, leaders develop policies and practices that eliminate systems of advantage and disadvantage thereby closing the opportunity and achievement gaps present in their schools and system.

EDLD 638. Advanced Public School Law. 3 Credits.

Overview of legal issues in school board–superintendent relations, media relations, personnel evaluation practices, student and employee rights, collective bargaining, contract management, and official complaints.

EDLD 640. Educational Data Science Capstone Project. 4 Credits.

The final course of the Educational Data Science specialization, this course is an applied capstone where students tackle an applied data problem.

Requisites: Prereq: EDLD 651, EDLD 652, EDLD 653, EDLD 654.

EDLD 643. Evidence-Based Decision Making in Schools. 3 Credits.

Introduces basic concepts of evidence-based decision making applied to school settings. Focuses on the application of research-based practices for the improvement of academic and behavioral performance in schools.

EDLD 644. Learning Organization. 3 Credits.

Four theories of organizational learning are explored: structural frame, human resource, political, and symbolic.

EDLD 649. Ethical Governance for School District Leaders. 2 Credits.

Intentional school and district governance serves system transformation. Viewing ethics through an equity lens, leaders will develop policies and practices that eliminate systems of advantage and disadvantage thereby closing the opportunity and achievement gaps present in their public schools and system.

EDLD 650. Advanced Seminar Educational Research Methods. 3 Credits.

Examines special issues in the use and application of educational statistics and research design in a discussion-seminar format.

Requisites: Prereq: EDUC 612, EDUC 614, EDUC 640.

EDLD 651. Introductory Educational Data Science. 3 Credits.

Introduces students to the fundamentals of statistical computing for data science. Introductory programming, data wrangling, data visualization, reproducible research.

EDLD 652. Data Visualization for Educational Data Science. 3 Credits.

Best practices in data visualization for social data science communication. Visual perception, color, uncertainty, and communication mediums.

Requisites: Prereq: EDLD 651.

EDLD 653. Functional Programming for Educational Data Science. 3 Credits.

Foundations of functional programming for data science. Function writing and iteration emphasized.

Requisites: Prereq: EDLD 651.

EDLD 654. Machine Learning for Educational Data Science. 3 Credits.

Statistical models for prediction. Bias-variance tradeoff, cross-validation methods, model evaluation, and a variety of models used in data science.

Requisites: Prereq: EDLD 651.

EDLD 661. Item Response Theory I. 3 Credits.

Theory and application of item response measurement models. Participation outcomes include knowledge of IRT models, terminology, and resources. Emphasis on popular models and underlying assumptions.

EDLD 675. Oregon School and District Finance. 4 Credits.

Overview of school finance concepts, Oregon's school financing system, political and legal considerations, taxation, state distribution formulas, school finance reform, the federal role in education.

EDLD 677. PhD Research Seminar. 3 Credits.

The primary purpose of this course is to induct doctoral students into the practice of educational research and provide them a base for a career as a faculty member at an institution of higher education or a member of a research institute.

EDLD 686. Oregon Legal Issues in Public Education. 4 Credits.

Gain knowledge of the legal foundations and understanding of the legal responsibilities of Oregon Administrators in relationship to students and families served, their access to educational opportunities and to educational staff who support students, families, and programs.

ENG 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 4 times

ENG 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ENG 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ENG 404. Internship: [Topic]. 1-6 Credits.

On- or off-campus internship in a variety of writing or literacy-related settings in connection with designated courses.

Repeatable 99 times

ENG 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ENG 407. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year.

Repeatable 5 times

ENG 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 2 times

ENG 410. Experimental Course: [Topic]. 1-5 Credits.

Selected topics offered each year.

Repeatable 9 times

ENG 419. Contemporary Literary Theory. 4 Credits.

Developments in critical thinking after the New Criticism.

ENG 420. The Art of the Sentence. 4 Credits.

Analysis of English grammar and style in literary and academic contexts.

Offered alternate years.

ENG 423. The Age of Beowulf. 4 Credits.

A reading of Anglo-Saxon literature and culture as the intersection of Germanic, Celtic, and Christian traditions. Readings include Irish epic, Welsh romance, Norse mythology, and Icelandic saga.

ENG 425. Medieval Romance. 4 Credits.

Study of selected romances in the context of European intellectual and social history. May include elementary linguistic introduction to Middle English.

ENG 427. Chaucer. 4 Credits.

Close textual study of selected Canterbury Tales in Middle English; instruction in the grammar and pronunciation of Chaucer's language.

ENG 428. Old English I. 4 Credits.

Introduction to Old English language. Sequence with ENG 429, ENG 430.

ENG 429. Old English II: [Topic]. 4 Credits.

Study of Old English prose or poetry in the original language. Sequence with ENG 428, ENG 430.

Requisites: Prereq: ENG 428.

Repeatable 2 times for a maximum of 12 credits when topic changes

ENG 430. Old English III: [Topic]. 4 Credits.

Study of Beowulf or works by other major Old English authors in the original language. Sequence with ENG 428, ENG 429.

Requisites: Prereq: ENG 429

Repeatable 2 times for a maximum of 12 credits when topic changes

ENG 436. Advanced Shakespeare. 4 Credits.

Detailed study of selected plays, poetry, or both.

ENG 448. Restoration and 18th-Century Literature. 4 Credits.

Johnson and his circle; classic to romantic; relations between England and the Enlightenment in France.

ENG 455. English Romantic Writers. 4 Credits.

Romantic thought and expression. The second generation including Byron, Keats, Mary and Percy Shelley. Junior standing required.

In-depth study of various topics related to literature and the environment including Bioart/Bioethics, Biosemiotics, Critical Animal Studies, Food Culture, Ideas of Wilderness, Rhetoric of Nature Writing, Virtual Ecologies.

Repeatable 3 times for a maximum of 16 credits when topic changes

ENG 470. Technologies and Texts Capstone. 4 Credits.

This course examines the way humanities disciplines use digital technologies to forge a new role in the public sphere, exploring how digital and print cultures (re)shape forms of cultural expression and knowledge production. Students will create their own digital projects in this course.

Requisites: Prereq: ENG 250, LIB/DSCI 350M.

ENG 475. Modern Poetry. 4 Credits.

20th-century British and American poetry with emphasis on the modernist period, 1910–45. Representative authors include Yeats, Stein, Pound, Eliot, H. D., Williams, and Stevens.

ENG 479. Major Authors: [Topic]. 4 Credits.

In-depth study of one to three major authors from medieval through modern periods.

Repeatable 3 times

ENG 480. Modern American Superhero. 4 Credits.

Examination of the path of the American comic book superhero and an exploration of the ways in which that journey reflects large processes of social change.

ENG 485. Television Studies. 4 Credits.

Study of television's institutional contents and representational practices, including such television genres as serials, news, and reality TV. Offered alternate years.

ENG 486M. New Media and Digital Culture: [Topic]. 4 Credits.

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Multilisted with CINE 486M.

Repeatable 2 times for a maximum of 12 credits

Equivalent to: CINE 486M

ENG 488. Race and Representation in Film: [Topic]. 4 Credits.

Screening, interpretation, and analysis of films from developing non-European cultures and by people of color. Mechanisms of racism in dominant U.S. media.

Repeatable 2 times for a maximum of 12 credits

ENG 491. Rhetoric and Ethics. 4 Credits.

Investigation of historical and contemporary theories of ethical rhetoric in both written and oral arguments.

Requisites: Prereq: one from WR 122Z, WR 123, HC 221H.

ENG 492. History of Rhetoric and Composition. 4 Credits.

History of rhetoric as related to the theory and practice of writing, relations between rhetoric and poetics, and rhetorical criticism through the 19th century.

ENG 493. Modern Rhetorical Criticism. 4 Credits.

Theoretical topics addressed by 20th-century rhetorical critics. Varieties of rhetorical interpretation, from neo-Aristotelian to reader-response, postmodernist views of metaphor.

ENG 494. Reasoning, Speaking, Writing. 4 Credits.

Application of advanced study in argumentation theory, particularly procedural standards of rationality developed in recent argumentation studies, to selected public policy controversies.

ENG 496. Feminist Film Criticism: [Topic]. 4 Credits.

Analysis of US film and television texts from a feminist perspective.

Repeatable 99 times when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ENG 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ENG 507. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year.

Repeatable 7 times

ENG 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ENG 510. Experimental Course: [Topic]. 1-5 Credits.

Selected topics offered each year.

Repeatable 9 times

ENG 519. Contemporary Literary Theory. 4 Credits.

Developments in critical thinking after the New Criticism.

ENG 520. The Art of the Sentence. 4 Credits.

Analysis of English grammar and style in literary and academic contexts. Offered alternate years.

ENG 528. Old English I. 4 Credits.

Introduction to Old English language. Sequence with ENG 529, ENG 530.

ENG 529. Old English II: [Topic]. 4 Credits.

Study of Old English prose or poetry in the original language. Sequence with ENG 528, ENG 530.

Requisites: Prereq: ENG 528.

Repeatable 2 times for a maximum of 12 credits when topic changes

ENG 530. Old English III: [Topic]. 4 Credits.

Study of Beowulf or works by other major Old English authors in the original language. Sequence with ENG 528, ENG 529.

Requisites: Prereq: ENG 529.

Repeatable 2 times for a maximum of 12 credits when topic changes

ENG 536. Advanced Shakespeare. 4 Credits.

Detailed study of selected plays, poetry, or both.

ENG 548. Restoration and 18th-Century Literature. 4 Credits.

Johnson and his circle; classic to romantic; relations between England and the Enlightenment in France.

ENG 555. English Romantic Writers. 4 Credits.

Romantic thought and expression. The second generation including Byron, Keats, Mary and Percy Shelley.

ENG 557. Victorian Literature and Culture: [Topic]. 4 Credits.

Exploration of major works, figures, controversies, social and cultural issues. Readings in Victorian fiction, poetry, drama, and nonfictional prose; study of examples of the visual arts and popular culture.

Repeatable 1 time for a maximum of 8 credits when topic changes

ENG 561. American Literature to 1800. 4 Credits.

Readings in American poetry, nonfiction prose, drama, and fiction.

ENG 568. Ethnic Literature: [Topic]. 4 Credits.

Advanced study of one or more authors or literary genres related to ethnic literature including African, Native, Asian, or Chicano American.

Repeatable 2 times for a maximum of 12 credits when topic changes

ENG 569. Literature and the Environment: [Topic]. 4 Credits.

In-depth study of various topics related to literature and the environment including Bioart/Bioethics, Biosemiotics, Critical Animal Studies, Food Culture, Ideas of Wilderness, Rhetoric of Nature Writing, Virtual Ecologies.

Repeatable 3 times for a maximum of 16 credits when topic changes

This course examines the way humanities disciplines use digital technologies to forge a new role in the public sphere, exploring how digital and print cultures (re)shape forms of cultural expression and knowledge production. Students will create their own digital projects in this course.

ENG 575. Modern Poetry. 4 Credits.

20th-century British and American poetry with emphasis on the modernist period, 1910–45. Representative authors include Yeats, Stein, Pound, Eliot, H. D., Williams, and Stevens.

ENG 579. Major Authors. 4 Credits.

In depth study of one to three major authors from medieval through modern periods.

Repeatable 3 times

ENG 580. Modern American Superhero. 4 Credits.

Examination of the path of the American comic book superhero and an exploration of the ways in which that journey reflects large processes of social change.

ENG 585. Television Studies. 4 Credits.

Study of television's institutional contents and representational practices, including such television genres as serials, news, and reality TV. Offered alternate years.

ENG 586M. New Media and Digital Culture: [Topic]. 4 Credits.

Study of emerging media forms and techniques, such as digital cinema, video games, viral videos, and interactive media. Offered alternate years. Multilisted with CINE 586M.

Repeatable 2 times for a maximum of 12 credits

ENG 588. Race and Representation in Film: [Topic]. 4 Credits.

Screening, interpretation, and analysis of films from developing non-European cultures and by people of color. Mechanisms of racism in dominant U.S. media.

Repeatable 2 times for a maximum of 12 credits

ENG 591. Rhetoric and Ethics. 4 Credits.

Investigation of historical and contemporary theories of ethical rhetoric in both written and oral arguments.

Requisites: Prereq: WR 122Z or equivalent.

ENG 592. History of Rhetoric and Composition. 4 Credits.

History of rhetoric as related to the theory and practice of writing, relations between rhetoric and poetics, and rhetorical criticism through the 19th century.

ENG 593. Modern Rhetorical Criticism. 4 Credits.

Theoretical topics addressed by 20th-century rhetorical critics. Varieties of rhetorical interpretation, from neo-Aristotelian to reader-response, postmodernist views of metaphor.

ENG 596. Feminist Film Criticism: [Topic]. 4 Credits.

Critical analysis of film and television texts from a feminist perspective.

Repeatable 99 times when topic changes

ENG 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ENG 603. Dissertation. 1-21 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ENG 604. Internship: [Topic]. 1-6 Credits.

On- or off-campus internship in a variety of writing or literacy-related settings.

Repeatable 99 times

ENG 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ENG 607. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year.

Repeatable 7 times

ENG 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ENG 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ENG 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 9 times

ENG 612. Composition Graduate Teaching Fellow Seminar II. 1-3 Credits.

Discussions designed to increase the effectiveness of first-year graduate teaching fellows as teachers of courses that fulfill the university's writing requirement.

ENG 613. Graduate Teaching Fellow Composition Apprenticeship. 1-3 Credits.

Supervised practical experience in all aspects of teaching WR 121Z, WR 122Z.

ENG 614. Introduction to Literary and Cultural Theory. 5 Credits.

Introduces students to a number of the most important and influential developments in 20th-century literary and cultural theory. Graduate seminar.

ENG 615. Advanced Studies in Literary Theory: [Topic]. 5 Credits.

Intensive study of one to three major theorists or a significant theoretical problem.

Repeatable 4 times

ENG 620. Medieval Literature: [Topic]. 5 Credits.

Recent offerings include Chaucer's *Troilus and Criseyde*, *Humor and Vulgarly in Medieval Literature*.

Repeatable 99 times

ENG 630. Renaissance Literature: [Topic]. 5 Credits.

Recent offerings include *Hamlet*, *Jacobean Potboilers*, *Renaissance Irrationalities*.

Repeatable 99 times

ENG 645. 18th-Century Literature: [Topic]. 5 Credits.

Intensive study of one to three major authors or selected topics from the 18th century. Recent offerings include *Enlightenment and Revolution*.

Repeatable 99 times

ENG 660. American Literature: [Topic]. 5 Credits.

Recent offerings include *African American Women Writers*, *Evolutionary Theories and Narrative*, *Sentimental Novel*, *V. Deloria and Native American Cultural Values*.

Repeatable 99 times

ENG 670. Modern Literature: [Topic]. 5 Credits.

Recent offerings include *H. James*, *Modernist Politics*, *Environmental Humanities*, *Postmodernism*.

Repeatable 99 times

ENG 690. Introduction to Graduate Studies in English. 5 Credits.

Examination of selected professional, methodological, and theoretical issues.

ENG 691. Composition Theory: [Topic]. 5 Credits.

Intensive study of topics related to rhetorical theory and the teaching of writing.

Repeatable 99 times

ENG 695. Film Studies: [Topic]. 5 Credits.

Intensive study of selected topics related to film studies and literature. Recent topics include *Introduction to Film Theory*; *Feminism*, *Comedy*, and the *Carnavalesque*; *Melodrama*.

Repeatable 3 times

Environmental Design (ENVD)

Courses

ENVD 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVD 201. Environmental Design Careers. 2 Credits.

Developing skills in strategizing career options and mapping to degree plan. Overview of professional communication, resume and cover letter writing, interviewing and networking skills. Previously taught as LA 301.

Additional Information:

General Limitation applies: Applied, skills, career, or professional development course

ENVD 210. Foundations in Environmental Design. 2 Credits.

Foundations of Environmental Design introduces students to the breadth and different paths of the Environmental Design major. The course will explore Environmental Design as a multidisciplinary topic which focuses on visual and spatial design skills applied to the context of environmental sustainability. Concurrent registration in ENVD 289 required.

Requisites: Prereq: ENVD 201. Coreq: ENVD 289.

ENVD 289. Environmental Design Studio. 6 Credits.

Study of places, their use, and how they evolve. Fundamentals of environmental awareness, social factors, and small-scale site design; abstract design and elementary graphic techniques. Concurrent registration in ENVD 210 required.

Requisites: Prereq: ENVD 201. Coreq: ENVD 210.

ENVD 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVD 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVD 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVD 451. Environmental Design Media. 2 Credits.

Environmental Design Media is the first course in a yearlong foundational environmental media sequence. The course focuses on fundamental concepts of digital and environmental design. Students cannot receive credit for both ENVD 451 and LA 451. Sequence with LA 452, LA 453.

Requisites: Prereq: ENVD 201.

Equivalent to: LA 451

Additional Information:

General Limitation applies: Applied, skills, career, or professional development course

Environmental Studies (ENVS)

Courses

ENVS 196. Field Studies: [Topic]. 1-5 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 3 times for a maximum of 20 credits

ENVS 198. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

ENVS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVS 201. Introduction to Environmental Studies: Social Sciences. 4 Credits.

Contributions of the social sciences to analysis of environmental problems. Topics include human population, the relationship between social institutions and environmental problems, and appropriate political, policy, and economic processes.

Additional Information:

Social Science Area

ENVS 202. Introduction to Environmental Studies: Natural Sciences. 4 Credits.

Contributions of the natural sciences to analysis of environmental problems. Topics include biological processes, ecological principles, chemical cycling, ecosystem characteristics, and natural system vulnerability and recovery.

Additional Information:

Science Area

ENVS 203. Introduction to Environmental Studies: Humanities. 4 Credits.

Contributions of the humanities and arts to understandings of the environment. Emphasis on diverse ways of thinking, writing, creating, and engaging in environmental discourse.

Additional Information:

Arts Letters Area

ENVS 225. Introduction to Food Studies. 4 Credits.

An exploration of the field of "food studies" and examination of the role of food in historical and contemporary life in the US and around the world.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

ENVS 335. Allocating Scarce Environmental Resources. 4 Credits.

Considerations for the design of environmental and natural resources policies and regulations: balancing society's preferences and the costs of environmental protection and resource conservation.

Requisites: Prereq: MATH 105Z or higher.

Additional Information:

Social Science Area

ENVS 345. Environmental Ethics. 4 Credits.

Key concepts and various moral views surveyed; includes anthropocentrism, individualism, ecocentrism, deep ecology, and ecofeminism. Exploration includes case studies and theory.

Additional Information:

Arts Letters Area

ENVS 350. Ecological Footprint of Energy Generation. 4 Credits.

Detailed study of the ecological consequences of all forms of energy generation including fossil fuels and alternative energy sources. Open to environmental science, environmental studies, and planning, public policy and management majors only.

Requisites: Prereq: ENVS 201, MATH 112Z.

ENVS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVS 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ENVS 403. Thesis. 1-8 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 5 times

ENVS 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ENVS 405. Reading and Conference: [Topic]. 1-18 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ENVS 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ENVS 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ENVS 408. Workshop: [Topic]. 1-8 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ENVS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ENVS 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVS 411. Environmental Issues: [Topic]. 4 Credits.

In depth examination of a particular environmental topic such as global warming, ecosystem restoration, energy alternatives, geothermal development, public lands management, or environmental literature.

Repeatable 2 times for a maximum of 12 credits when topic changes

ENVS 425. Environmental Education Theory and Practice. 4 Credits.

Learning theories, environmental literacy, and the planning, implementation, and evaluation of environmental education programs. Development of teaching materials in collaboration with a community partner for group project.

ENVS 427. Environmental and Ecological Monitoring. 4 Credits.

Theory, design, and practice of monitoring sampling mapping, field techniques, data collection, management, analysis and presentation methods, local case studies.

ENVS 429. Environmental Leadership: [Topic]. 4 Credits.

Partnering with governmental agencies, nonprofit organizations, public schools and local businesses, students develop service learning projects.

Repeatable 2 times for a maximum of 12 credits when topic changes

ENVS 430. Nature in Popular Culture. 4 Credits.

This environmental humanities course examines the various ways that nature is represented in U.S. popular culture. What can advertisements, films, television, and video games teach us about the ways we imagine nature, the environment, and environmentalism?

ENVS 435. Environmental Justice. 4 Credits.

Environmental justice and its impact on current decisions. Focus on civil rights law, perception of risk, and relation of sustainability and equity.

Requisites: Prereq: ENVS 201.

ENVS 450. Political Ecology. 4 Credits.

Examines how social relations and economic, social, and cultural control of natural resources shape human interactions with the environment. Theory and case studies.

Requisites: Prereq: ENVS 201.

ENVS 455. Sustainability. 4 Credits.

Examines the evolution of the concept of sustainability and its complex and sometimes problematic uses among scholars, policymakers, environmentalists, and businesses.

Requisites: Pre- or coreq: ENVS 201.

ENVS 459. Water, Public Health, and the Environment. 4 Credits.

Water, Public Health, and the Environment examines the provision of water and sanitation services around the world with a particular focus on its impacts for public health and the environment in low- and middle-income communities.

ENVS 465. Wetland Ecology and Management. 4 Credits.

Examines management, law, and policies related to wetlands in an ecological framework; includes wetland type definitions, classification, distribution, formation and development, and restoration.

Requisites: Prereq: BI 307 or BI 370 or GEOG 360.

ENVS 467. Sustainable Agriculture. 4 Credits.

Examines sustainability issues in agricultural production and current food systems. Focuses on environmental aspects of seed, water, soil, energy, and pest management.

Requisites: Prereq: ENVS 201 or ENVS 202.

ENVS 477. Soil Science. 4 Credits.

Chemical and physical characteristics and classification of soils, field soil identification, soil degradation.

Requisites: Prereq: one from CH 111, CH 221Z, CH 224H.

ENVS 493M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ARCH 493M.

Requisites: Prereq: ARCH 491.

Equivalent to: ARCH 493M

ENVS 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 8 times

ENVS 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ENVS 508. Workshop: [Topic]. 1-8 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ENVS 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ENVS 525. Environmental Education Theory and Practice. 4 Credits.

Learning theories, environmental literacy, and the planning, implementation, and evaluation of environmental education programs. Development of teaching materials in collaboration with a community partner for group project.

ENVS 530. Nature in Popular Culture. 4 Credits.

This environmental humanities course examines the various ways that nature is represented in U.S. popular culture. What can advertisements, films, television, and video games teach us about the ways we imagine nature, the environment, and environmentalism?

ENVS 535. Environmental Justice. 4 Credits.

Environmental justice and its impact on current decisions. Focus on civil rights law, perception of risk, and relation of sustainability and equity.

ENVS 550. Political Ecology. 4 Credits.

Examines how social relations and economic, social, and cultural control of natural resources shape human interactions with the environment. Theory and case studies.

ENVS 555. Sustainability. 4 Credits.

Examines the evolution of the concept of sustainability and its complex and sometimes problematic uses among scholars, policymakers, environmentalists, and businesses.

ENVS 559. Water, Public Health, and the Environment. 4 Credits.

Water, Public Health, and the Environment examines the provision of water and sanitation services around the world with a particular focus on its impacts for public health and the environment in low- and middle-income communities.

ENVS 565. Wetland Ecology and Management. 4 Credits.

Examines management, law, and policies related to wetlands in an ecological framework; includes wetland type definitions, classification, distribution, formation and development, and restoration.

ENVS 567. Sustainable Agriculture. 4 Credits.

Examines sustainability issues in agricultural production and current food systems. Focuses on environmental aspects of seed, water, soil, energy, and pest management.

ENVS 577. Soil Science. 4 Credits.

Chemical and physical characteristics and classification of soils, field soil identification, soil degradation.

ENVS 593M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ARCH 593M.

Requisites: Prereq: ARCH 591.

ENVS 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ENVS 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ENVS 604. Internship: [Topic]. 1-5 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 9 times for a maximum of 10 credits

ENVS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ENVS 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 9 times

ENVS 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ENVS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ENVS 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 8 times

ENVS 610. Experimental Course: [Topic]. 1-5 Credits.

A recent topic is Interdisciplinary Capstone Project.

Repeatable 99 times

ENVS 631. Environmental Studies Theory and Practice. 4 Credits.

Introduction to various disciplinary perspectives that contribute to environmental studies, including their research methods, vocabularies, and core concepts.

ENVS 632. Environmental Studies Research Methodology. 2 Credits.

Identifying a clear and concise research problem, developing methodology to address that problem, and the process of developing a thorough knowledge of relevant literature.

ENVS 633. Environmental Studies Thesis Development. 3 Credits.

Interdisciplinary readings in environmental studies focused on topics chosen by each student in consultation with instructor. Preparation for presentations at the Joint Campus Conference.

Ethnic Studies (ES)

Courses

ES 101. Introduction to Ethnic Studies. 4 Credits.

This course is an introduction to the academic field of Ethnic Studies, the interdisciplinary, comparative and relational study of race, ethnicity and indigeneity in the United States. Special attention paid to how systems of domination and acts of resistance (re)create racial subjects.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 196. Field Studies: [Topic]. 1-5 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

ES 198. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ES 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 5 times

ES 250. Introduction to Black Studies. 4 Credits.

This course introduces students to the theoretical models used in the interdisciplinary study of African-America. Using a thematic approach, students will learn to critically engage the development of and dynamics between race, racism and blackness in the United States.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 252. Introduction to Asian American Studies. 4 Credits.

Focuses on historical, cultural, and social issues in Asian America and surveys scholarship in Asian American studies.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 254. Introduction to Chicanx and Latinx Studies. 4 Credits.

Focuses on historical, social, and cultural issues in Chicanx and Latinx communities and surveys scholarship in Chicanx and Latinx studies.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 256. Introduction to Native American Studies. 4 Credits.

Interdisciplinary approaches to understanding Native American lives, examining Native American identities, practices, histories, creative works, cultures, and political status in context.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 258. Introduction to Pacific Islander Studies. 4 Credits.

Focuses on historical, social, and cultural issues in Pacific Islander communities and surveys scholarship in Pacific Island Studies.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 301. Theoretical Perspectives in Ethnic Studies. 4 Credits.

Introduction to contemporary theoretical frameworks in the discipline of ethnic studies. Intended to be taken by junior year to introduce students to the second half of the Ethnic Studies major. Required for Ethnic Studies majors. Offered once per year.

Requisites: Prereq: ES 101; one from ES 250, ES 252, ES 254, ES 256, ES 258.

ES 310. Race and Popular Culture: [Topic]. 4 Credits.

Examines the interface between race and popular culture, surveying the historical development, political significance, and social influence of popular culture in the United States. Offered alternate years.

Repeatable 4 times for a maximum of 20 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 321. Indigenous Peoples of Oregon. 4 Credits.

This course examines the history, culture, social and political issues of the Indigenous peoples of Oregon through oral traditions, primary sources, and secondary sources, focused on the major themes of sovereignty, traditional knowledge, and decolonization.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 330. Women of Color Issues and Concerns. 4 Credits.

Contemporary social issues and feminism among women of color in the United States.

Requisites: Prereq: ES 101 recommended.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 350. Native Americans and the Environment. 4 Credits.

Critical issues in Native American environmentalism.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 352. Social Equity and Criminal Justice. 4 Credits.

Critical issues related to police, prisons, criminal justice, and racial and gender inequalities.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 354. Environmental Racism. 4 Credits.

Explores environmental justice as both a field of scholarship and organizing framework that links power, justice, and inequality to environmental issues. Special attention is given to the specific forms of racism which produce environmental injustice.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 360. Black Sexual Politics. 4 Credits.

Explores the gender and sexuality politics that influence the social, political, economic and cultural development of black communities in the diaspora, including the United States.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 370. Race, Ethnicity, and Cinema: [Topic]. 4 Credits.

Examines the history and politics of race, ethnicity, and indigeneity in relation to film, including questions of production, distribution, and reception, in the United States. Offered alternate years.

Repeatable 4 times for a maximum of 20 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 380. Race, Migration, and Rights. 4 Credits.

Examines historical and contemporary politics in race, immigration, and migration.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

ES 385. Critical Whiteness Studies: [Topic]. 4 Credits.

This course explores the social construction of race by investigating and historicizing "whiteness" as a racial category in the U.S.

Repeatable 1 time for a maximum of 8 credits

ES 399. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Caribbean Migrations; Asian American Women; Critical Whiteness Studies; Native Americans and Film; Asian Diasporas; Race and Resistance in United States History.

Repeatable 5 times

ES 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ES 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ES 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ES 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ES 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ES 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ES 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ES 440. Race, Literature, and Culture: [Topic]. 4 Credits.

Examines race, literature, and culture from an interdisciplinary perspective. Offered alternate years.

Repeatable 4 times for a maximum of 20 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 450. Race and Incarceration. 4 Credits.

Introduces several key questions necessary for understanding the crisis of prisons and incarceration in the United States, with an emphasis on race, gender, and class.

ES 452. Race and Ethnicity and the Law: [Topic]. 4 Credits.

Addresses issues of social justice and the participation of Asian Americans, African Americans, Chicanos and Latinos, and Native Americans in the legal system.

Repeatable 99 times when topic changes

ES 456. History of Native American Education. 4 Credits.

Examines the historical conflict between traditional culture and knowledge transmission among Native Americans and the assimilationist educational system and practices of Euro-American culture. Offered alternative years.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 460. Race, Culture, Empire: [Topic]. 4 Credits.

Examines how racial discourses have informed United States domestic and foreign policy, with special attention on cultural representations of U.S. colonialism and imperialism. Offered alternate years.

Repeatable 4 times for a maximum of 20 credits when topic changes

ES 464. Relational Studies of Indigeneity, Race and Culture: [Topic]. 4 Credits.

Seminar centers relation between Indigenous peoples and peoples of color instead of focusing on white/non-white line. Called comparative or relational studies, the approach yields unique insights into how race and settler-colonialism work in the United States and beyond.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 465. Feminist Theories of Race: [Topic]. 4 Credits.

This course focuses on the political and theoretical trajectory of feminist and race theories associated with particular groups, such as Asian American feminisms, or comparatively in relation to Women of Color and queer politics.

Repeatable 3 times for a maximum of 16 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 466. Native American Ethnohistory. 4 Credits.

In this seminar, we read, evaluate, analyze, and critique major texts in Native American ethnohistory (a combination of anthropological and historical methods) with a focus on perspectives and concerns of contemporary Indigenous peoples.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 468. Indigenous Research Methods and Ethics. 4 Credits.

This course addresses methodological and ethical issues related to conducting research about and with Indigenous peoples. The course introduces students to the principles of Indigenous research, including practices, collaboration, ethics, and Indigenous approaches to the construction of knowledge.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 470. Native American and Indigenous Feminisms. 4 Credits.

This class will acquaint students with critical issues in Native American and Indigenous feminisms. We will review past and present struggles, including gendered violence, cultural systems of gender and sexuality, successes and failures in efforts towards alliance, life stories, film, and literature, in comparative perspective.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

ES 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ES 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ES 540. Race, Literature, and Culture: [Topic]. 4 Credits.

Examines race, literature, and culture from an interdisciplinary perspective. Offered alternate years.

Repeatable 4 times for a maximum of 20 credits when topic changes

ES 552. Race and Ethnicity and the Law: [Topic]. 4 Credits.

Addresses issues of social justice and the participation of Asian Americans, African Americans, Chicanos and Latinos, and Native Americans in the legal system.

Repeatable 99 times when topic changes

ES 556. History of Native American Education. 4 Credits.

Examines the historical conflict between traditional culture and knowledge transmission among Native Americans and the assimilationist educational system and practices of Euro-American culture. Offered alternative years.

ES 560. Race, Culture, Empire: [Topic]. 4 Credits.

Examines how racial discourses have informed United States domestic and foreign policy, with special attention on cultural representations of U.S. colonialism and imperialism. Offered alternate years.

Repeatable 4 times for a maximum of 20 credits when topic changes

ES 564. Relational Studies of Indigeneity, Race and Culture: [Topic]. 4 Credits.

Seminar centers relation between Indigenous peoples and peoples of color instead of focusing on white/non-white line. Called comparative or relational studies, the approach yields unique insights into how race and settler-colonialism work in the United States and beyond.

ES 565. Feminist Theories of Race: [Topic]. 4 Credits.

This course focuses on the political and theoretical trajectory of feminist and race theories associated with particular groups, such as Asian American feminisms, or comparatively in relation to Women of Color and queer politics.

Repeatable 3 times for a maximum of 16 credits when topic changes

ES 566. Native American Ethnohistory. 4 Credits.

In this seminar, we read, evaluate, analyze, and critique major texts in Native American ethnohistory (a combination of anthropological and historical methods) with a focus on perspectives and concerns of contemporary Indigenous peoples.

ES 568. Indigenous Research Methods and Ethics. 4 Credits.

This course addresses methodological and ethical issues related to conducting research about and with Indigenous peoples. The course introduces students to the principles of Indigenous research, including practices, collaboration, ethics, and Indigenous approaches to the construction of knowledge.

ES 570. Native American and Indigenous Feminisms. 4 Credits.

This class will acquaint students with critical issues in Native American and Indigenous feminisms. We will review past and present struggles, including gendered violence, cultural systems of gender and sexuality, successes and failures in efforts towards alliance, life stories, film, and literature, in comparative perspective.

ES 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ES 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ES 604. Internship: [Topic]. 1-5 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 9 times for a maximum of 10 credits

ES 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

ES 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ES 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ES 614. Colloquium: Professional Development. 1 Credit.

Professional development, teaching skills, and mentorship for first year Ethnic Studies PhD students.

Repeatable 2 times for a maximum of 3 credits

ES 617. Genealogies of Ethnic Studies. 5 Credits.

Examines the emergence and evolution of the discipline of Ethnic Studies, including major intellectual shifts in the field, particularly as they relate to changes in the social science and humanities; and the state of the discipline today.

ES 618. Theoretical Foundations in Ethnic Studies. 5 Credits.

Introduction to the theoretical foundations and debates in Ethnic Studies scholarship.

ES 619. Interdisciplinary Research Methods in Ethnic Studies. 5 Credits.

Introduction to interdisciplinary methodologies in the various fields of ethnic studies, with an eye towards developing interdisciplinary competence and students applying it to their own work.

ES 620. Race, Space, and Power: [Topic]. 5 Credits.

This course questions the variety of ways that social constructions of race and space are inextricable from one another and constitute, as much as they are constituted by, modern power relations.

Repeatable 1 time for a maximum of 10 credits when topic changes

ES 621. Cultural Production: [Topic]. 5 Credits.

Graduate introduction to the theories and methods utilized within Cultural Studies scholarship with attention to race, gender, nation, sexuality and indigeneity.

Repeatable 2 times for a maximum of 15 credits when topic changes

ES 622. Resistance and Dissent: [Topic]. 5 Credits.

Surveys historical and contemporary methods people of color have used to subvert and challenge white power and privilege in the United States.

Repeatable 2 times for a maximum of 15 credits when topic changes

ES 623. Race, Gender and Sexuality Studies: [Topic]. 5 Credits.

This course closely examines the ways in which race is deeply intertwined with gender and sexuality in the production of racial, gender, and sexual violence since the inception of European settler colonialism in the Americas.

Repeatable 2 times for a maximum of 15 credits when topic changes

European Studies (EURO)

Courses

EURO 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

EURO 403. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

EURO 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

EURO 407. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

EURO 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

Family and Human Services (FHS)

Courses

FHS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FHS 213. Issues for Children and Families. 4 Credits.

Examines issues and problems confronting children and families in the United States. Issues such as disability, poverty, health care, addictions, racism, and violence are addressed.

Additional Information:

Social Science Area

FHS 215. Exploring Family and Human Services. 3 Credits.

Explores the historic basis and current design of family and human services. Emphasizes services to children, youth, adults, and families.

FHS 216. Diversity in Human Services. 4 Credits.

This course is designed to provide the foundational knowledge, awareness, and skills needed for working with diverse populations in the human services. This course will explore issues of equity and inclusion across the levels of the ecological model.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

FHS 228. Human Development in the Family Context. 3 Credits.

Examines human development within the context of the family from an evidence-based perspective. Integration of contemporary family issues experienced across the lifespan within the context of the human service profession. Previously taught as FHS 328.

Requisites: Prereq: FHS 215.

FHS 301. Writing for Human Services Professionals. 3 Credits.

This course prepares students with the knowledge and skills necessary for writing competently for professional/scientific audiences through a series of assigned readings, in- and out-of-class assignments, and quizzes. Students will practice iterative writing by giving and receiving peer reviews and incorporating peer and instructor feedback.

Requisites: Prereq: WR 121Z, FHS 215.

FHS 329. Youth Psychopathology in Context. 4 Credits.

Presents child and adolescent psychopathology and problems within a diagnostic framework. Topics address psychosocial issues for youth in family and cultural contexts. Students cannot receive credit for both BEHT 320 and FHS 329.

Requisites: Prereq: FHS 215.

Equivalent to: BEHT 320

FHS 330. Individual Interventions in Ecological Contexts. 4 Credits.

Introduces the concept of individual interventions within an ecological model. Provides knowledge and development of basic listening skills and how to apply these skills to individuals in diverse contexts.

Requisites: Prereq: FHS 215, FHS 216, FHS 301.

FHS 331. Group and Community Interventions. 3 Credits.

Introduces the concept of group intervention within the context of group theory and community development. Provides knowledge and development of group interventions, including group facilitation skills and curriculum development.

Requisites: Prereq: FHS 330.

FHS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FHS 401. Research: [Topic]. 1-5 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

FHS 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

FHS 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

FHS 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

FHS 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FHS 408. Workshop: [Topic]. 1-9 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FHS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

FHS 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FHS 420. Research in Human Services. 3 Credits.

This course provides a comprehensive introduction to research methods commonly used in human services, prevention science, and social work. Students will learn how to formulate research questions; identify, interpret, and evaluate empirical research articles; and engage in scientific writing by preparing research reports.

Requisites: Prereq: FHS 301.

FHS 471. Human Services Professional Ethics. 3 Credits.

This course focuses on professional ethics relevant to human services practitioners, with an emphasis on building skills required for ethical decision-making, including self-awareness, identification and integration of personal, professional, and legal values and standards, and evaluating scientific literature on prevention and intervention. Students cannot receive credit for both BEHT 412 and FHS 471.

Requisites: Prereq: FHS 420; pre or coreq: FHS 330.

Equivalent to: BEHT 412

FHS 472. Human Services in Practice. 2-5 Credits.

Supervised practicum (internship) within a local school or community agency. Co-enrollment in FHS 473 required.

Requisites: Prereq: FHS 471.

Repeatable 8 times for a maximum of 18 credits

FHS 473. Human Services in Practice Supervision. 1 Credit.

Seminar providing group supervision related to practicum (internship) participation within a local school or community agency.

Repeatable 11 times for a maximum of 12 credits

FHS 490. Scientific Analysis in Human Services. 3 Credits.

This course instills students with the knowledge and skills necessary to understand and perform basic quantitative and qualitative data analysis and to understand and demonstrate how data analysis is related to research design within the context of prevention science and the human services, broadly.

FHS 492. Contemporary Issues in Public Health. 3 Credits.

This course covers methods for assessing and addressing community health problems and promoting health equity.

Requisites: Prereq: FHS 213, FHS 216.

FHS 493. Child and Family Case Management. 3 Credits.

This class provides students skills in case management and human-service-focused direct practice with children, adolescents, and families, including needs assessments, case conceptualization, service plan development, and direct service intervention.

Requisites: Prereq: FHS 331, FHS 471.

FHS 494. Adolescent and Adult Case Management. 3 Credits.

This class provides students skills in case management and human service focused direct practice with adolescents and adults, including needs assessments, case conceptualization, service plan development, and direct service intervention.

Requisites: Prereq: FHS 331, FHS 471.

FHS 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FHS 508. Workshop: [Topic]. 1-9 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FHS 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Finance (FIN)

Courses

FIN 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

FIN 240. Survey of Real Estate. 4 Credits.

Basics of buying, selling, and leasing real estate. Overview of real estate law, commercial and residential brokerage, real estate financing, and real estate administration.

Requisites: Not open to LCB majors or prebusiness majors with junior standing or above.

FIN 281. Personal Finance. 4 Credits.

Overview of lifetime personal financial strategies. Topics include financial goals and building net worth, major purchasing decisions, credit use, tax planning, retirement, and estate planning.

Requisites: Not open to LCB majors, prebusiness majors with junior standing or above.

FIN 283. The Stock Market and Investing. 4 Credits.

Investments and the stock market, securities and approaches to security selection, portfolio composition and structure.

Requisites: Not open to LCB majors, prebusiness majors with junior standing or above, or students who have credit for FIN 380.

FIN 311. Economic Foundations of Competitive Analysis. 4 Credits.

Analysis of market competition and its relation to product cost and pricing decisions by the firm. Students may receive credit for only one of EC 311, FIN 311, or FIN 311H.

Requisites: Prereq: BA 101Z, BA 169Z, BA 213Z, EC 201Z, MATH 241.

Equivalent to: EC 311, FIN 311H

FIN 311H. Economic Foundations of Competitive Analysis. 4 Credits.

Analyzes the competitive structure of markets and industries. Focuses on the relationships among cost, pricing strategy and economic profit in competitive environments. Students may receive credit for only one of EC 311, FIN 311, or FIN 311H.

Requisites: Prereq: BA 101Z, BA 169Z, BA 213Z, EC 201Z, MATH 241.

Equivalent to: EC 311, FIN 311

FIN 316. Financial Management. 4 Credits.

Corporate financial planning, selection among alternative investment opportunities, analysis of risk, funds acquisition, and long-term financing. Students cannot receive credit for both FIN 316 and FIN 316H.

Requisites: Prereq: BA 101Z, BA 169Z, BA 213Z, EC 201Z, MATH 241.

Equivalent to: FIN 316H

FIN 316H. Financial Management. 4 Credits.

Covers the fundamental tools and concepts of finance, including the evaluation of investment opportunities and the relation between risk and return. Students cannot receive credit for both FIN 316 and FIN 316H.

Requisites: Prereq: BA 101Z, BA 169Z, BA 213Z, EC 201Z, MATH 241.

Equivalent to: FIN 316

FIN 380. Financial Markets and Investments. 4 Credits.

Financial markets and security investment decisions, analysis of risk and return, portfolio policies for individual and institutional investors, financial instruments.

Requisites: Prereq: FIN 316, OBA 312.

FIN 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

FIN 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

FIN 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

FIN 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

FIN 407. Seminar: [Topic]. 4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FIN 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

FIN 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Requisites: Prereq: FIN 316 or FIN 316H.

Repeatable 99 times when topic changes

FIN 462. Derivative Markets and Financial Institutions. 4 Credits.

Valuation of financial derivatives, methodologies for identifying firms' risk exposures, the role of risk management and financial derivatives in corporate strategy, and analysis of financial institutions.

Requisites: Prereq: FIN 316.

FIN 463. International Finance. 4 Credits.

Analysis of currency exchange rates, balance of payments; management of foreign exchange risk; risk and return in international investment.

Requisites: Prereq: FIN 316.

FIN 464. Commercial Banking. 4 Credits.

Operation and pricing policies of a commercial bank, concentrating on management of institutions that take deposits and make loans and investments through the use of computer-simulated banking operations.

Requisites: Prereq: FIN 316.

FIN 473. Financial Analysis and Valuation. 4 Credits.

Topics include working capital management, advanced capital budgeting, dividend policy, financing policy, business valuation, and corporate acquisitions.

Requisites: Prereq: FIN 380.

FIN 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

FIN 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

FIN 562. Derivative Markets and Financial Institutions. 4 Credits.

Valuation of financial derivatives, methodologies for identifying firms' risk exposures, the role of risk management and financial derivatives in corporate strategy, and analysis of financial institutions.

Requisites: Prereq: FIN 380 or FIN 612.

FIN 564. Commercial Banking. 4 Credits.

Operation and pricing policies of a commercial bank, concentrating on management of institutions that take deposits and make loans and investments through the use of computer-simulated banking operations.

FIN 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

FIN 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

FIN 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

FIN 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

FIN 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

FIN 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FIN 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FIN 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

FIN 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

FIN 612. Fundamentals of Finance. 3 Credits.

Covers the fundamental theories and tools of financial analysis. Topics include valuation, capital budgeting, risk and return, market efficiency, and financial policies. Sequence with FIN 613.

FIN 613. Managerial Economics. 3 Credits.

Covers the fundamental theories and tools of economic and strategic analysis. Topics include demand and supply, pricing strategies, and perfect and imperfect competition. Sequence with FIN 612.

Requisites: Prereq: FIN 612.

FIN 615. Quantitative Methods for Finance. 3 Credits.

Mathematical and statistical tools fundamental to financial analysis; measuring returns and risk, probability models, statistical inference, regression analysis, all with applications to finance.

FIN 617. Data Analysis in Finance. 3 Credits.

Programming for financial data analysis using popular languages; Back testing and developing algorithm trading strategies.

FIN 671. Corporate Finance and Valuation. 3 Credits.

Application of financial principles to problems of valuation, capital budgeting, and financial policy.

Requisites: Prereq: FIN 612.

FIN 673. Advanced Topics in Corporate Finance. 3 Credits.

Cases dealing with financial analysis, working-capital management, valuation, and firm investment and financing decisions.

Requisites: Prereq: completion of first-year M.B.A. core.

FIN 675. Fixed Income Securities. 3 Credits.

Theoretical, empirical, and institutional aspects of fixed-income securities and their derivatives; application of these tools to managerial decisions in other contexts.

Requisites: Prereq: completion of first-year MBA core.

FIN 683. Concepts of Investments. 3 Credits.

Securities markets; risk-return characteristics of investment media; concepts of security analysis; investment and portfolio strategies of individual and institutional investors.

Requisites: Prereq: completion of first-year M.B.A. core.

FIN 685. Alternative Investments. 3 Credits.

Covers alternative asset classes such as venture capital, private equity (LBO), commercial real estate, and cryptoassets. Focus on valuation methodologies, fund structures, and investment strategies.

Requisites: Prereq: FIN 612.

Folklore (FLR)

Courses

FLR 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FLR 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FLR 199L. Special Studies: [Topic]. 0 Credits.

Experimental course - topic varies.

FLR 225. Voices of Africa. 4 Credits.

Novels, music, dance, dress, paintings, films, and cartoons serve as a primary sources from which to learn about the diversity and vivacity of contemporary African peoples.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

FLR 235. Folklore and the Supernatural. 4 Credits.

Introduces the study of beliefs about the supernatural by examining diverse approaches to the description and analysis of belief traditions and religious culture.

Additional Information:

Arts Letters Area

FLR 236. Magic in the Middle Ages. 4 Credits.

Examines how medieval culture defined magic and how the exploration of magic led to the beginnings of science. Analyzes the practices of medieval western Europe, particularly Britain.

Additional Information:

Arts Letters Area

FLR 250. Introduction to Folklore. 4 Credits.

The process and genres of traditional (i.e., folk) patterning; the relations between these forms of expression and other arts, especially English and American literature.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

FLR 255. Folklore and United States Popular Culture. 4 Credits.

Explores the relationship between folklore and popular culture, with special emphasis on the analysis of legends, myths, icons, stereotypes, heroes, celebrities, rituals, and celebrations.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

FLR 320. Car Cultures. 4 Credits.

Examines car customizing and tuning as forms of vernacular art; studies the environmental impacts of automobiles, the history of the industry, and the peculiarities of drivers' behavior. Offered alternate years.

Additional Information:

Arts Letters Area

FLR 350. Folklore and the Bible. 4 Credits.

Studies readings of the Judeo-Christian Bible in connection with mythological and traditional contexts and meanings from ancient times to the present. Offered alternate years.

Additional Information:

Arts Letters Area

FLR 370. Folklore and Sexuality. 4 Credits.

Examines intersections of folklore and sexuality as entry points for discussing social issues of sexual and gender identity, intolerance, and resistance. Offered alternate years.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

FLR 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FLR 399L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

FLR 401. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

FLR 403. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

FLR 404. Internship: [Topic]. 1-8 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

FLR 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

FLR 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

FLR 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FLR 408. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FLR 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

FLR 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FLR 411. Folklore and Religion. 4 Credits.

Explores the role of folklore in people's religious lives with particular emphasis on narrative, beliefs, rituals, celebrations, pilgrimage, and ecstatic states.

Additional Information:

Cultural Literacy: Global Perspectives

FLR 415. Folklore and Foodways. 4 Credits.

Examines food traditions from a folkloristic perspective, looking at issues such as identity, performance, community, creativity, and innovation. Prereq: junior standing. Offered every second or third year.

FLR 495. Folklore Fieldwork. 4 Credits.

This course introduces students to the theory and practice of ethnographic fieldwork in folklore. Each student will have the opportunity to conceptualize and carry out a fieldwork project while developing skills in proposal writing, fieldwork and interviewing practices, documentation, analysis, and presentation of ethnographic research.

FLR 503. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

FLR 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FLR 508. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FLR 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FLR 511. Folklore and Religion. 4 Credits.

Explores the role of folklore in people's religious lives with particular emphasis on narrative, beliefs, rituals, celebrations, pilgrimage, and ecstatic states.

FLR 515. Folklore and Foodways. 4 Credits.

Examines food traditions from a folkloristic perspective, looking at issues such as identity, performance, community, creativity, and innovation. Prereq: junior standing. Offered every second or third year.

FLR 595. Folklore Fieldwork. 4 Credits.

This course introduces students to the theory and practice of ethnographic fieldwork in folklore. Each student will have the opportunity to conceptualize and carry out a fieldwork project while developing skills in proposal writing, fieldwork and interviewing practices, documentation, analysis, and presentation of ethnographic research.

FLR 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

FLR 604. Internship: [Topic]. 1-6 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

FLR 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

FLR 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

FLR 607. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FLR 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FLR 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

FLR 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FLR 681. History and Theory of Folklore Research. 5 Credits.

Examines nature of scholarly inquiry, research questions, and techniques. Historic orientation with emphasis on ideological development of folkloristics from its beginnings to the present.

French (FR)

Courses

FR 101. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.

FR 102. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.

Requisites: Prereq: FR 101.

FR 103. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.

Requisites: Prereq: FR 102.

FR 111. Intensive Beginning French. 5 Credits.

Intensive study for experienced language learners; introduction to French culture. Sequence. Cannot be combined with FR 101, FR 102, FR 103 for more than 15 credits of first-year French.

Requisites: Prereq: previous study of French or competence in another Romance language.

FR 112. Intensive Beginning French. 5 Credits.

Intensive study for experienced language learners; introduction to French culture. Cannot be combined with FR 101, FR 102, FR 103 for more than 15 credits of first-year French.

Requisites: Prereq: FR 111.

FR 150. Cultural Legacies of France. 4 Credits.

This course explores and explodes cultural stereotypes while examining some of the social and cultural phenomena that many associate most strongly with France. Topics may include language and identity; love and romance; food and fashion; wars and revolutions; and cultural imperialism.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

FR 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

FR 201. Intermediate French I. 4 Credits.

Development of French language proficiency beyond beginning level through the study of the cultural products, practices, and perspectives of the Francophone world (France, Belgium, Switzerland, Canada, Caribbean, Lebanon, Magreb, Senegal, etc.). Topics include history, geography, demographics, foodways, social movements, art, politics, and other cultural phenomena. Sequence with FR 202, FR 203.

Requisites: Prereq: FR 103 or FR 112 recommended.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

FR 202. Intermediate French II. 4 Credits.

Development of French language proficiency beyond beginning level through the study of the cultural products, practices, and perspectives of the Francophone world (France, Belgium, Switzerland, Canada, Caribbean, Lebanon, Magreb, Senegal, etc.). Topics include history, geography, demographics, foodways, social movements, art, politics, and other cultural phenomena. Sequence with FR 201, FR 203.

Requisites: Prereq: FR 201 or equivalent proficiency.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

FR 301. La France contemporaine. 4 Credits.

Training in language and culture of modern France using newspapers, short stories, poetry and film. Vocabulary enrichment activities. Conducted in French.

Requisites: Prereq: FR 203.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

FR 302. Culture et langage Le monde francophone contemporain. 4 Credits.

Training in language and cultures of the French-speaking world using literary texts, newspapers, short stories, poetry, films, websites, videos. Grammar review and vocabulary enrichment. Conducted in French.

Requisites: Prereq: FR 203.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

FR 307. Oral Skills. 2 Credits.

Practice in improving oral, comprehension, and listening skills in French. Communicative activities in class in addition to language laboratory work.

Requisites: Prereq: FR 203 or equivalent.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

BA Language Satisfying Course

FR 312. French Survey of Francophone Literature. 4 Credits.

Introduction to major authors and texts of the French-speaking world outside of France. Exploration of history and culture of former French colonies.

Requisites: Prereq: FR 301 or FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

FR 317. Knights, Queens, and Rebels. 4 Credits.

Introduction to major themes and ideas in French cultural and textual production before the 17th century.

Requisites: Prereq: FR 301 or FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

FR 318. Monarchy, Liberty, Revolution. 4 Credits.

Introduction to major themes and ideas in French literature from the 17th and 18th centuries through the reading of representative texts.

Requisites: Prereq: FR 301 or FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course

FR 319. Modernity and Creativity. 4 Credits.

Representative literary works from the 19th-21st centuries with attention to textual analysis and connections to politics and society.

Requisites: Prereq: FR 301 or FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

FR 330. French Poetry. 4 Credits.

French and Francophone poems from the Middle Ages to the 21st century, literary movements, introduction to textual analysis and modern critical approaches.

Requisites: Prereq: FR 301, FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

FR 331. French Theater. 4 Credits.

Explores important aspects of French theater. Reading plays from different periods. Emphasizes formal aspects and critical reading.

Requisites: Prereq: FR 301, FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course

FR 333. French Narrative. 4 Credits.

Covers important aspects of French and Francophone narrative. Reading texts from different periods. Emphasis on formal aspects and critical reading.

Requisites: Prereq: FR 301, FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

FR 362. French Film. 4 Credits.

Focuses on the differences between American culture and French and Francophone cultures. Addresses a sensitive issue exemplified by the attitude of the international movie industry.

Requisites: Prereq: FR 301, FR 302.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

FR 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Requisites: Prereq: FR 301 or FR 302.

Repeatable 99 times**FR 403. Thesis. 3-6 Credits.**

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times**FR 405. Reading and Conference: [Topic]. 1-6 Credits.**

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times**FR 406. Practicum: [Topic]. 1-12 Credits.**

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times**FR 407. Seminar: [Topic]. 1-6 Credits.**

Recent topics include French Novel and World War II, Writers and Painters, Medievalism, Francophone Caribbean, Gide and Sartre.

Requisites: Prereq: two from FR 312, FR 317, FR 318, FR 319.

Repeatable 99 times**FR 408. Workshop: [Topic]. 1-12 Credits.**

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times**FR 409. Terminal Project. 1-12 Credits.**

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times**FR 410. Experimental Course: [Topic]. 1-4 Credits.**

Experimental course - topic varies.

Repeatable 99 times**FR 416. Advanced Writing in French. 4 Credits.**

Extended written production; writing for specific purposes and audiences. Advanced grammar review and composition; study of specialized vocabulary.

Requisites: Prereq: FR 301, FR 302.

Additional Information:

BA Language Satisfying Course

FR 425. French-English Translation. 4 Credits.

Offers an overview of translation theory and practice from English to French and French to English.

Requisites: Prereq: FR 301, FR 302.

FR 460. 18th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 18th-century French literature. A recent topic is Being Modern in the 18th century.

Requisites: Prereq: two from FR 312, FR 317, FR 318, FR 319.

Repeatable 99 times when topic changes

Additional Information:

BA Language Satisfying Course

FR 480. 19th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 19th-century French literature.

Requisites: Prereq: two from FR 312, FR 317, FR 318, FR 319.

Repeatable 99 times when topic changes

Additional Information:

BA Language Satisfying Course

FR 490. 20th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 20th-century French literature. Recent topics include African Identities, The French Novel in 2000, Postcolonial Africa.

Requisites: Prereq: two from FR 312, FR 317, FR 318, FR 319.

Repeatable 99 times when topic changes

Additional Information:

BA Language Satisfying Course

FR 507. Seminar: [Topic]. 1-6 Credits.

Recent topics include French Novel and World War II, Writers and Painters, Medievalism, Francophone Caribbean, Gide and Sartre.

Repeatable 99 times

FR 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

FR 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

FR 560. 18th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 18th-century French literature. A recent topic is Being Modern in the 18th century.

Repeatable 99 times when topic changes

FR 580. 19th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 19th-century French literature.

Repeatable 99 times when topic changes

FR 590. 20th-Century Literature: [Topic]. 4 Credits.

Changing topics concerning trends or particular authors representative of 20th-century French literature. Recent topics include African Identities, The French Novel in 2000, Postcolonial Africa.

Repeatable 99 times when topic changes

FR 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

FR 605. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

FR 606. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

FR 607. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

FR 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Geography (GEOG)

Courses

GEOG 141. The Natural Environment. 4 Credits.

The earth's physical landscapes, vegetation patterns, weather, and climate; emphasis on the dynamic interactions among climate, landforms, vegetation, and soils.

Additional Information:

Science Area

GEOG 142. The Human Planet. 4 Credits.

The spatial organization of humans and their activities on Earth's surface. Cultural, political, and economic influences shaping places and their interconnections.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

GEOG 181. Our Digital Earth. 4 Credits.

Explores the emergence and use of the geospatial technologies that are shaping contemporary society and are pervasive in our everyday lives.

Additional Information:

Social Science Area

GEOG 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

GEOG 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GEOG 201. World Regional Geography. 4 Credits.

Introduction to the world's cultural regions. Study of the cultural and environmental factors that make different parts of the world distinct.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

GEOG 202. Geography of Europe. 4 Credits.

Physical and cultural processes that have shaped the rural and urban landscapes of Europe.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

GEOG 208. Geography of the United States and Canada. 4 Credits.

Historical and geographical analysis of the physical and human geography of the U.S. and Canada. Topics include physical regions, settlement patterns, economic development, and urbanization. Offered alternate years.

Additional Information:

Social Science Area
Cultural Literacy: US: Difference, Inequality, Agency

GEOG 209. Geography of the Middle East and North Africa. 4 Credits.

Physical and cultural processes that have shaped the rural and urban landscapes of the Middle East and North Africa.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GEOG 250. Geographies of Outdoor Adventure. 4 Credits.

Introduces cultural geography by tracing the emergence and contemporary significance of outdoor adventure sports. Their global development since the late 1800s coincides with changing ideas about nature, wilderness, and the utility of play, and reflects modern social disparities and environmental challenges.

Additional Information:

Social Science Area

GEOG 281. The World and Big Data. 4 Credits.

Explores technical foundations and social and economic applications of big data along the "5V" dimensions of volume, variety, velocity, veracity, and visualization.

GEOG 321. Climatology. 4 Credits.

Energy and moisture in the atmosphere, atmospheric circulation, controls of regional and microclimates, applied climatology, climatic variations, past and future climates.

Requisites: Prereq: GEOG 141.

Additional Information:

Science Area

GEOG 322. Geomorphology. 4 Credits.

Landforming processes with emphasis on mass movements, rivers, eolian, glacial, and coastal processes. Special fee.

Requisites: Prereq: one from GEOG 141, EARTH 102, EARTH 202.

Additional Information:

Science Area

GEOG 323. Biogeography. 4 Credits.

The spatial patterns of biological diversity, and its causes, both in the present and in the past, and its relevance during a time of increasing human impact and climate change.

Requisites: Prereq: one from GEOG 141, EARTH 103, EARTH 203, BI 370.

Additional Information:

Science Area

GEOG 341. Population and Environment. 4 Credits.

Patterns of population growth over history and place, current policies and programs, and impacts and trends in United States and international contexts. Includes method and theory.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GEOG 342. Geography of Globalization. 4 Credits.

Historical and geographical dimensions of globalization; emphasizes economic and social factors. Topics include multinationals, trade agreements, sustainability, global inequalities, and racial and gender divisions of labor.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GEOG 343. Society, Culture, and Place. 4 Credits.

Examines ways in which geographical context reflects and shapes cultural and social processes. Importance of place and territory in human affairs.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GEOG 360. Watershed Science and Policy. 4 Credits.

Physical and biological processes of watersheds; problems of land use, water quality, riparian zones, aquatic ecology; scientific basis of watershed management and policy. Special fee.

Requisites: Prereq: one from GEOG 141, EARTH 102, EARTH 202, BI 130, BI 223Z.

Additional Information:

Science Area

GEOG 361. Global Environmental Change. 4 Credits.

Natural and human-induced changes in the Earth System and their impact on different environmental systems. Not available to those who have taken GEOG 143.

Requisites: Prereq: GEOG 141.

Additional Information:

Science Area

GEOG 391. Social Science Inquiry and Research. 4 Credits.

Understanding scientific inquiry, the scientific method and learning to critique social science research. Readings and discussion focus on the questions, methods, conclusions and outcomes of research.

Additional Information:

Social Science Area

GEOG 393. Data Driven Cartography. 4 Credits.

Introduction to concepts of cartography through representing, organizing, analyzing, and visually presenting geospatial information and data on maps. In this course we will explore different types of map design, how to represent different data types on maps, and how data impacts visual display. Sequence with GEOG 481, GEOG 492, GEOG 493.

Requisites: Prereq: GEOG 181 or GEOG 481.

GEOG 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GEOG 399L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

GEOG 400M. Temporary Multilisted Course. 4 Credits.

A single course that is listed under more than one subject code, which may be offered once without formal approval.

Repeatable 99 times

GEOG 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

GEOG 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

GEOG 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

GEOG 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

GEOG 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

GEOG 408. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GEOG 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

GEOG 410. Experimental Course: [Topic]. 1-4 Credits.

Topics are listed in the class schedule each term.

Repeatable 99 times

GEOG 410L. Experimental Course:[Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

GEOG 421. Advanced Climatology: [Topic]. 4 Credits.

Topics in climatology, including physical climatology, dynamic and synoptic climatology, and paleoclimatology.

Requisites: Prereq: GEOG 321.

Repeatable 99 times when topic changes

GEOG 423. Advanced Biogeography: [Topic]. 4 Credits.

Selected topics in biogeography including relation of plants and animals to their environment, historical changes in plant distribution, and palynological analysis. Special fee.

Requisites: Prereq: GEOG 323.

Repeatable 99 times when topic changes

GEOG 425. Hydrology and Water Resources. 4 Credits.

Emphasis on surface water including precipitation, evapotranspiration, surface runoff, and stream flow. Understanding and analysis of processes. Management for water supply and quality. Special fee.

Requisites: Prereq: GEOG 321 or GEOG 322; MATH 111Z.

GEOG 427. Fluvial Geomorphology. 4 Credits.

Hydraulics and hydrology of stream channels; channel morphology and processes; drainage network development; fluvial deposits and landforms; field and analytical methods. Required field trips. Special fee.

Requisites: Prereq: MATH 112Z; one from GEOG 322, GEOG 425, EARTH 334.

GEOG 430. Long-Term Environmental Change. 4 Credits.

Evolution of the physical landscape during the Quaternary period. Elements of paleoclimatology, paleoecology, and geomorphology. Required field trips. Special fee.

Requisites: Prereq: one from GEOG 321, GEOG 322, GEOG 323.

GEOG 433. Fire and Natural Disturbances. 4 Credits.

Wildfire and other landscape disturbance processes, historical and current patterns of fire, use and management of fire. Offered alternate years.

Requisites: Prereq: one from BI 307, GEOG 323, BI 370.

GEOG 441. Political Geography. 4 Credits.

Spatial perspectives on global political patterns and processes. Relationship of political territories to resources, ethnic patterns, and ideological communities. Impact of political arrangements on identity, conflict, and peace.

Additional Information:

Cultural Literacy: Global Perspectives

GEOG 442. Urban Geography. 4 Credits.

Urbanization throughout the world, the structure of urban settlements; cities as regional centers, physical places, and homes for people; geographic problems in major urban environments.

GEOG 444. Cultural Geography. 4 Credits.

Patterns of culture as a force in human affairs. Dynamics of identity, place, and power. The creation of culture at different scales.

Additional Information:

Cultural Literacy: Global Perspectives

GEOG 445. Culture, Ethnicity, and Nationalism. 4 Credits.

Relationship of ethnic groups and nationality to landscapes, perception, and cultural geographic phenomena. Distribution of ethnic and national groups. Junior standing required.

Additional Information:

Cultural Literacy: Global Perspectives

GEOG 448. Tourism and Development. 4 Credits.

Tourism-related concepts and practices associated with tourism planning, development, marketing, and impacts in different geographic contexts.

GEOG 465. Environment and Development. 4 Credits.

Critical analysis of development concepts. Economic activity and environmental impacts. Sustainable development. Development projects and landscapes in the industrializing world.

Additional Information:

Cultural Literacy: Global Perspectives

GEOG 468. Contemporary Food Systems. 4 Credits.

Explores contemporary food systems at local, national, and global scales. Emphasis on the political economy and sociocultural dynamics linking agriculture, food industries, and consumption.

GEOG 481. GIScience I. 4 Credits.

Introduction to geographic information science, geographic information systems (GIS), the current population survey (CPS), remote sensing, and cartography. Sequence with GEOG 482, GEOG 491.

GEOG 482. GIScience II. 4 Credits.

Spatial data collection, spatial data models, database design, data editing, geographic information system (GIS) project management, and advanced topics in geographic information science. Sequence with GEOG 481, GEOG 491, GEOG 493.

Requisites: Prereq: GEOG 481.

GEOG 485. Remote Sensing I. 4 Credits.

Introduction to remote sensing science including its physical basis, instruments, platforms, data, processing methods, and applications. Sequence with GEOG 486.

Requisites: Prereq: GEOG 481.

GEOG 486. Remote Sensing II. 4 Credits.

The use of digital electromagnetic data for classification, mapping, and monitoring biologic, hydrologic, atmospheric, geologic, and human processes and environmental change. Sequence with GEOG 485.

Requisites: Prereq: GEOG 485.

GEOG 489. Mapping with Drones. 4 Credits.

This course introduces students to the understanding and applying the technologies, theories, and skills needed to acquire drone photography and convert this into maps useful in many professions. Applications include such subjects as resource management, physical environments, topographic mapping, vegetation, and urban characterization.

Requisites: Prereq: GEOG 181, GEOG 485.

GEOG 490. GIScience: [Topic]. 4 Credits.

Advanced topics on geographic information systems science including spatial analysis and modeling, data visualization, cartography, volunteered geographic information, GIS programming.

Requisites: Prereq: GEOG 481.

Repeatable 5 times for a maximum of 24 credits

GEOG 491. Advanced Geographic Information Systems. 4 Credits.

Automated processing of geospatial data using Python scripting language. Programming for spatial analysis such as 3-D and network modeling; processing of big data (satellite imagery, climate data, demographic information). Sequence with GEOG 481, GEOG 482.

Requisites: Prereq: GEOG 482.

GEOG 492. Web Mapping. 4 Credits.

The web is full of maps, from providing context to local and international news to sharing research. We'll explore interactive web mapping, including theories and principles of web mapping, fundamentals of cartography, and user interaction. Students will gather spatial data, develop a story or theme from their data, and produce interactive maps using front-end development.

Requisites: Prereq: GEOG 481.

GEOG 493. Advanced Cartography and Geo-Visualization. 4 Credits.

This course explores advanced concepts in cartography, map design, geovisualization, and data visualization. Students will develop skills in GIS software and graphic design softwares to create a tailored final map design project with real-world data. Sequence with GEOG 393.

Requisites: Prereq: GEOG 393.

GEOG 494. Spatial Analysis. 4 Credits.

Introduction to a variety of spatial analysis techniques that can be used for understanding and modeling geographic phenomena.

Requisites: Prereq: GEOG 481.

GEOG 495. Geographic Data Analysis. 4 Credits.

Analysis and display of geographical data by traditional data-analytical methods and by scientific-visualization approaches.

Requisites: Prereq: GEOG 481.

GEOG 497. Qualitative Methods in Geography. 4 Credits.

Explores conceptual and practical dimensions of qualitative research. Includes linking theory and method; research question formulation; project design; ethics; data gathering, analysis, and presentation.

Requisites: Prereq: one from GEOG 341, GEOG 342, GEOG 343.

GEOG 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

GEOG 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

GEOG 508. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GEOG 510. Experimental Course: [Topic]. 1-4 Credits.

Topics are listed in the class schedule each term.

Repeatable 99 times

GEOG 510L. Experimental Course:[Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

GEOG 521. Advanced Climatology: [Topic]. 4 Credits.

Topics in climatology, including physical climatology, dynamic and synoptic climatology, and paleoclimatology.

Repeatable 99 times when topic changes

GEOG 523. Advanced Biogeography: [Topic]. 4 Credits.

Selected topics in biogeography including relation of plants and animals to their environment, historical changes in plant distribution, and palynological analysis. Special fee.

Repeatable 99 times when topic changes

GEOG 525. Hydrology and Water Resources. 4 Credits.

Emphasis on surface water including precipitation, evapotranspiration, surface runoff, and stream flow. Understanding and analysis of processes. Management for water supply and quality. Special fee.

GEOG 527. Fluvial Geomorphology. 4 Credits.

Hydraulics and hydrology of stream channels; channel morphology and processes; drainage network development; fluvial deposits and landforms; field and analytical methods. Required field trips. Special fee.

GEOG 530. Long-Term Environmental Change. 4 Credits.

Evolution of the physical landscape during the Quaternary period. Elements of paleoclimatology, paleoecology, and geomorphology. Required field trips. Special fee.

GEOG 533. Fire and Natural Disturbances. 4 Credits.

Wildfire and other landscape disturbance processes, historical and current patterns of fire, use and management of fire. Offered alternate years.

GEOG 541. Political Geography. 4 Credits.

Spatial perspectives on global political patterns and processes. Relationship of political territories to resources, ethnic patterns, and ideological communities. Impact of political arrangements on landscapes.

GEOG 542. Urban Geography. 4 Credits.

Urbanization throughout the world, the structure of urban settlements; cities as regional centers, physical places, and homes for people; geographic problems in major urban environments.

GEOG 544. Cultural Geography. 4 Credits.

Patterns of culture as a force in human affairs. Dynamics of identity, place, and power. The creation of culture at different scales.

GEOG 545. Culture, Ethnicity, and Nationalism. 4 Credits.

Relationship of ethnic groups and nationality to landscapes, perception, and cultural geographic phenomena. Distribution of ethnic and national groups.

GEOG 548. Tourism and Development. 4 Credits.

Tourism-related concepts and practices associated with tourism planning, development, marketing, and impacts in different geographic contexts.

GEOG 565. Environment and Development. 4 Credits.

Critical analysis of development concepts. Economic activity and environmental impacts. Sustainable development. Development projects and landscapes in the industrializing world.

GEOG 568. Contemporary Food Systems. 4 Credits.

Explores contemporary food systems at local, national, and global scales. Emphasis on the political economy and sociocultural dynamics linking agriculture, food industries, and consumption.

GEOG 581. GIScience I. 4 Credits.

Introduction to geographic information science, geographic information systems (GIS), the current population survey (CPS), remote sensing, and cartography. Sequence with GEOG 582, GEOG 591.

GEOG 582. GIScience II. 4 Credits.

Spatial data collection, spatial data models, database design, data editing, geographic information system (GIS) project management, and advanced topics in geographic information science. Sequence with GEOG 581, GEOG 591, GEOG 593.

Requisites: Prereq: GEOG 581.

GEOG 585. Remote Sensing I. 4 Credits.

Introduction to remote sensing science including its physical basis, instruments, platforms, data, processing methods, and applications. Sequence with GEOG 586.

Requisites: Prereq: GEOG 581.

GEOG 586. Remote Sensing II. 4 Credits.

The use of digital electromagnetic data for classification, mapping, and monitoring biologic, hydrologic, atmospheric, geologic, and human processes and environmental change. Sequence with GEOG 585.

Requisites: Prereq: GEOG 585.

GEOG 589. Mapping with Drones. 4 Credits.

This course introduces students to the understanding and applying the technologies, theories, and skills needed to acquire drone photography and convert this into maps useful in many professions. Applications include such subjects as resource management, physical environments, topographic mapping, vegetation, and urban characterization.

Requisites: Prereq: GEOG 585.

GEOG 590. GIScience: [Topic]. 4 Credits.

Advanced topics on geographic information systems science including spatial analysis and modeling, data visualization, cartography, volunteered geographic information, GIS programming.

Requisites: Prereq: GEOG 581.

Repeatable 5 times for a maximum of 24 credits

GEOG 591. Advanced Geographic Information Systems. 4 Credits.

Socioeconomic analysis with geographic information systems (GIS) and the U.S. census, network modeling, 3-D models of natural and urban landscapes, web-based GIS and programming. Sequence with GEOG 581, GEOG 582.

Requisites: Prereq: GEOG 582.

GEOG 592. Web Mapping. 4 Credits.

The web is full of maps, from providing context to local and international news to sharing research. We'll explore interactive web mapping, including theories and principles of web mapping, fundamentals of cartography, and user interaction. Students will gather spatial data, develop a story or theme from their data, and produce interactive maps using front-end development.

GEOG 593. Advanced Cartography and Geo-Visualization. 4 Credits.

This course explores advanced concepts in cartography, map design, geovisualization, and data visualization. Students will develop skills in GIS software and graphic design softwares to create a tailored final map design project with real-world data.

GEOG 594. Spatial Analysis. 4 Credits.

Introduction to a variety of spatial analysis techniques that can be used for understanding and modeling geographic phenomena.

Requisites: Prereq: GEOG 581.

GEOG 595. Geographic Data Analysis. 4 Credits.

Analysis and display of geographical data by traditional data-analytical methods and by scientific-visualization approaches.

Requisites: Prereq: GEOG 581.

GEOG 597. Qualitative Methods in Geography. 4 Credits.

Explores conceptual and practical dimensions of qualitative research. Includes linking theory and method; research question formulation; project design; ethics; data gathering, analysis, and presentation.

GEOG 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

GEOG 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

GEOG 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

GEOG 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

GEOG 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

GEOG 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GEOG 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

GEOG 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GEOG 611. Theory and Practice of Geography I. 4 Credits.

Introduction to professional practice in geography and the development of geographic concepts and theories from Ancient times through the mid-twentieth century. Sequence with GEOG 612, GEOG 613.

GEOG 612. Theory and Practice of Geography II. 4 Credits.

The development of geographic concepts and theories from the mid-20th century to the present. Students learn to refine effective geographic research questions. Sequence with GEOG 611 and GEOG 613.

Requisites: Prereq: GEOG 611.

GEOG 613. Research Design. 4 Credits.

Examines main components of research design, including research questions, methodological approach, institutional review boards, funding programs, proposal writing, and application. Sequence with GEOG 611 and GEOG 612.

Requisites: Prereq: GEOG 612.

GEOG 631. Progress in Physical Geography. 1 Credit.

Recent developments in climatology, geomorphology, hydrology, and biogeography. Lectures, readings, and presentation of faculty and student works in progress.

Repeatable 11 times for a maximum of 12 credits

GEOG 632. Progress in Human Geography. 1 Credit.

Recent developments in cultural, economic, environmental and political geography. Lectures, readings, and presentation of faculty and student works in progress.

Repeatable 11 times for a maximum of 12 credits

GEOG 633. Progress in Geographic Information Science. 1 Credit.

Recent developments in cartography, GIS, remote sensing, data analysis, and visualization. Lectures, readings, and presentation of faculty and student works in progress.

Repeatable 11 times for a maximum of 12 credits

German (GER)

Courses

GER 101. First-Year German. 5 Credits.

Provides a thorough grammatical foundation and an elementary reading knowledge of German as well as an understanding of the spoken language. Students cannot receive credit for both GER 101 and GER 141. Sequence.

Equivalent to: GER 141

GER 102. First-Year German. 5 Credits.

Provides a thorough grammatical foundation and an elementary reading knowledge of German as well as an understanding of the spoken language. Students cannot receive credit for both GER 102 and GER 142.

Requisites: Prereq: GER 101.

Equivalent to: GER 142

GER 103. First-Year German. 5 Credits.

Provides a thorough grammatical foundation and an elementary reading knowledge of German as well as an understanding of the spoken language.

Requisites: Prereq: GER 102.

GER 141. German for Business I. 4 Credits.

Introduction to German language and culture to start building meaningful relationships and personal connections with peers and potential business partners on different career paths. Coursework includes interpreting authentic German language sources (reading/listening/viewing) and producing language in presentational and interpersonal modes of communication (oral and written discussions, presentations) in familiar, everyday contexts. Students cannot receive credit for both GER 141 and GER 101. Sequence with GER 142.

Equivalent to: GER 101

GER 142. German for Business II. 4 Credits.

Introduction to German language and culture to start building meaningful relationships and personal connections with peers and potential business partners on different career paths. Coursework includes interpreting authentic German language sources (reading/listening/viewing) and producing language in presentational and interpersonal modes of communication (oral and written discussions, presentations) in familiar, everyday contexts. Students cannot receive credit for both GER 142 and GER 102. Sequence with GER 141.

Requisites: Prereq: GER 141 or GER 101.

Equivalent to: GER 102

GER 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

GER 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GER 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GER 201. Second-Year German I. 4 Credits.

Grammar and composition, reading selections from representative authors, conversation. Sequence.

Requisites: Prereq: GER 103 or GER 105.

Additional Information:

Arts Letters Area

GER 202. Second-Year German II. 4 Credits.

Grammar and composition, reading selections from representative authors, conversation.

Requisites: Prereq: GER 201.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

GER 203. Second-Year German III. 4 Credits.

Grammar and composition, reading selections from representative authors, conversation.

Requisites: Prereq: GER 202.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GER 510. Experimental Course: [Topic]. 1-5 Credits.

Recent topics are Doppelganger and Nietzsche.

Repeatable 99 times

GER 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

GER 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

GER 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

GER 606. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

GER 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

GER 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GER 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

GER 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GER 625. Translations-Transformations. 4 Credits.

Presents the theory and practice of translation and other transformation media (e.g., the sister arts, literature into film).

Repeatable 99 times when topic changes

GER 691. Gender, Class, Race, and Nation: [Topic]. 4 Credits.

Part of 3-course graduate core series "Paradigms of Interpretation."

Covers a range of socially embedded factors (gender, class, race, and/or nation) bearing on the interpretation of texts. Addresses ideas about identity and difference as they contribute to establishing nations, territories, borders, human hierarchies, and notions of the other. Students read texts in philosophy, literary theory, theories of race, gender, class, and/or nationality, in conjunction with German literary and artistic texts.

Repeatable 2 times for a maximum of 12 credits when topic changes

GER 692. Subject, Consciousness, Mind: [Topic]. 4 Credits.

Part of a three-term series: "Paradigms of Interpretation." Deals with questions of consciousness, subjectivity, and mind in modernist philosophy and criticism. Focus is both on philosophical method and on methodology in/for the humanities and arts in first half of 20th century. Students will read texts in philosophy, psychoanalysis, literary theory, and theory of race and gender, in conjunction with German literary and artistic texts.

Repeatable 2 times for a maximum of 12 credits when topic changes

GER 693. Photography, Film, Video, Electronic Media: [Topic]. 4 Credits.

Part of 3-term series "Mediations." With a focus on photography, film, video, and/or electronic media, this course traces the aesthetic and cultural significance of those media for understanding the ways that technologies of reproduction reconfigure the relation between media and literature, politics and aesthetics, mass culture and high art in German culture, aesthetics, and literature.

Repeatable 2 times for a maximum of 12 credits when topic changes

GER 694. Environment and Text: [Topic]. 4 Credits.

Part of 3-term series "Mediations." With a focus on literature, painting, philosophy and critical theory, this course will examine how German writers, artists, philosophers, and theorists have processed often dramatic changes in the conception of nature in relation to human life and thought.

Repeatable 2 times for a maximum of 12 credits when topic changes

GER 695. Translations Transformations: [Topic]. 4 Credits.

Already exists: Presents the theory and practice of translation and other transformation media (e.g., the sister arts, literature into film). Repeatable when topic changes. Part of 3-term series "Mediations."

Repeatable 2 times for a maximum of 12 credits when topic changes

Global Studies (GLBL)

Courses

GLBL 101. Introduction to Global Issues. 4 Credits.

Survey of major political, economic, and cultural themes in international studies through in-class debates on key contemporary issues.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

GLBL 102. Foundations for Intercultural Competence. 4 Credits.

This course teaches practical skills and analytic frameworks that support safe, respectful, enlightening experiences of intercultural engagement.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times**GLBL 198. Workshop: [Topic]. 1-12 Credits.**

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times**GLBL 199. Special Studies: [Topic]. 1-5 Credits.**

Experimental course - topic varies.

Repeatable 99 times**GLBL 230. Global Wellbeing. 4 Credits.**

Interdisciplinary introduction to human wellbeing, focusing on health, education, and the environment and the ways they impact wellbeing. Topics will be framed by the larger issue of whether or not something called "wellbeing" is a human universal, as well as how wellbeing can be improved.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 240. Perspectives on International Development. 4 Credits.

Introduction to major ideologies, theories, historical processes, and contemporary challenges in international development. Galvan.

Introduction to the study of globalization and the global economy, analyzing ways the global economy is structured and maintained through various political interventions and regimes. This course aims to provide tools for understanding and explaining these structures and their impacts.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times**GLBL 340. Global Health and Development. 4 Credits.**

Introduction to major issues in global health, their causes and possible solutions, with a focus on the poor in developing countries.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 345. African Contemporary Issues and Concerns. 4 Credits.

Introduces students to current challenges facing African peoples today. Extends survey of Africa courses, and prepares students for more advanced study regarding the African continent.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 350. Education and Development. 4 Credits.

This course will introduce students to the foundational ideas in the field of international and comparative education, and help build a theoretical toolkit of the major approaches scholars utilize when analyzing education from a global perspective.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 360. International Cooperation and Conflict. 4 Credits.

Utilizes case studies and selected themes to examine the root causes, stakeholder perspectives, and attempts to resolve international conflicts.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 370. International Human Rights. 4 Credits.

Survey of human rights, examining diverse perspectives on the concept, practice, and implementation of human rights and human rights regimes.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GLBL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times**GLBL 401. Research: [Topic]. 1-12 Credits.**

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times**GLBL 403. Thesis. 1-12 Credits.**

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times**GLBL 405. Reading and Conference: [Topic]. 1-12 Credits.**

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times**GLBL 406. Field Studies: [Topic]. 1-12 Credits.**

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times**GLBL 407. Seminar: [Topic]. 1-5 Credits.**

Special topics in international studies.

Repeatable 99 times**GLBL 408. Workshop: [Topic]. 1-12 Credits.**

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GLBL 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

GLBL 410. Experimental Course: [Topic]. 1-5 Credits.

Recent topics include Africa: Development and Social Change.

Repeatable 99 times when topic changes

GLBL 415. The Global Story of Race. 4 Credits.

Working from a historical and cultural perspective, this course uses global case studies to explore how race came to be a key principle of social organization around the world through colonialism and extractive capitalism, and how it manifests today.

Additional Information:

Cultural Literacy: Global Perspectives

GLBL 420. Global Community Development. 4 Credits.

Introduction to communitarian theory and local-level grass-roots development practices. Comparison across North-South divide of efforts to alleviate poverty, promote sustainability, and ensure mobilization and cohesion.

Requisites: Prereq: GBL 240.

GLBL 421. Gender and International Development. 4 Credits.

Analysis of gendered dynamics of changing roles, opportunities, and expectations as societies undergo social and environmental change associated with economic, social, cultural and political development.

Additional Information:

Cultural Literacy: Global Perspectives

GLBL 422. Aid to Developing Countries. 4 Credits.

Examines the history and current dynamics of international bilateral and multilateral development assistance, the possibilities and constraints of aid, and other related issues.

Requisites: Prereq: GBL 240.

GLBL 424. United Nations Intervention in Global Crises. 4 Credits.

Explores the theory and practice of humanitarian aid, peace-building, and development during or after violent conflict. Focuses on work of international organizations in conflict areas or on issues of conflict.

GLBL 425. Global Food Security. 4 Credits.

Explores explanations for, and solutions to, persistent inequities in food access. Considers the political, agricultural, economic and humanitarian aspects of the global food system.

GLBL 431. Cross-Cultural Communication. 4 Credits.

Focuses on skills and insights needed by everyone working in cross-cultural settings. Considers values, development, education, politics, and environment as central to cross-cultural understanding. Theoretical as well as applied approach, with lectures, discussions and hands-on activities.

Additional Information:

Cultural Literacy: Global Perspectives

GLBL 435. Global Perspectives on Disability. 2 Credits.

This class uses a human rights paradigm to examine issues facing people with disabilities throughout the world. Readings and discussions will emphasize cross-disability and cross-cultural approaches to gender and disability, international development and disability, inclusive educational models, and cross-cultural aspects of disability.

GLBL 442. South Asia: Development and Social Change. 4 Credits.

Introduction to the vast social changes and development issues confronting the South Asian subcontinent.

Additional Information:

Cultural Literacy: Global Perspectives

GLBL 443. Europe Development and Social Change. 4 Credits.

Through the lens of development studies, students (1) develop a fundamental knowledge and literacy regarding current European quality of life issues, (2) critically examine how these issues are viewed by various stakeholders, and (3) consider attempts to enhance human, national and regional development processes.

Additional Information:

Cultural Literacy: Global Perspectives

GLBL 444. Southeast Asia Today. 4 Credits.

Introduction to mainland and island Southeast Asia, with a special focus on social changes that are occurring across the region and how change is affecting peoples and societies.

Additional Information:

Cultural Literacy: Global Perspectives

GLBL 445. Development and Social Change in Sub-Saharan Africa. 4 Credits.

Introduces theoretical and practical aspects of development and social change in sub-Saharan Africa, with focus on key issues in African development during the post-colonial era.

Additional Information:

Cultural Literacy: Global Perspectives

GLBL 446. Development and Social Change in Latin America. 4 Credits.

Explores development challenges, debt cycles, urban growth, neoliberalism, populism, socialism, gender, the environment, U.S.–Latin American relations, ecotourism, and drug geographies in the region.

GLBL 448. Bollywood's Lens on Indian Society. 4 Credits.

Explores Indian society through film, focusing on critical social issues; depicted vs. the historical reality; and ongoing transformations of social orientations and values.

GLBL 463. Population Displacement and Global Health. 4 Credits.

Explores health and mental health problems affecting displaced (migrant and refugee) communities and considers underdevelopment as a fundamental cause of displacement and health problems. Offered once per academic year.

GLBL 465. Global Reproductive Health. 4 Credits.

Overview of issues in global reproductive health, including politics, economics, historical and cultural factors. Implications for international health and development programs reviewed. Offered alternate years.

GLBL 503. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

GLBL 507. Seminar: [Topic]. 1-5 Credits.

Special topics in international studies.

Repeatable 99 times

GLBL 520. Global Community Development. 4 Credits.

Introduction to communitarian theory and local-level grass-roots development practices. Comparison across North-South divide of efforts to alleviate poverty, promote sustainability, and ensure mobilization and cohesion.

GLBL 521. Gender and International Development. 4 Credits.

Analysis of gendered dynamics of changing roles, opportunities, and expectations as societies undergo social and environmental change associated with economic, social, cultural and political development.

GLBL 522. Aid to Developing Countries. 4 Credits.

Examines the history and current dynamics of international bilateral and multilateral development assistance, the possibilities and constraints of aid, and other related issues.

GLBL 524. United Nations Intervention in Global Crises. 4 Credits.

Explores the theory and practice of humanitarian aid, peace-building, and development during or after violent conflict. Focuses on work of international organizations in conflict areas or on issues of conflict.

GLBL 525. Global Food Security. 4 Credits.

Explores explanations for, and solutions to, persistent inequities in food access. Considers the political, agricultural, economic and humanitarian aspects of the global food system.

GLBL 531. Cross-Cultural Communication. 4 Credits.

Focuses on skills and insights needed by everyone working in cross-cultural settings. Considers values, development, education, politics, and environment as central to cross-cultural understanding. Theoretical as well as applied approach, with lectures, discussions and hands-on activities.

GLBL 535. Global Perspectives on Disability. 2 Credits.

This class uses a human rights paradigm to examine issues facing people with disabilities throughout the world. Readings and discussions will emphasize cross-disability and cross-cultural approaches to gender and disability, international development and disability, inclusive educational models, and cross-cultural aspects of disability.

GLBL 542. South Asia: Development and Social Change. 4 Credits.

Introduction to the vast social changes and development issues confronting the South Asian subcontinent.

GLBL 543. Europe Development and Social Change. 4 Credits.

Through the lens of development studies, students (1) develop a fundamental knowledge and literacy regarding current European quality of life issues, (2) critically examine how these issues are viewed by various stakeholders, and (3) consider attempts to enhance human, national and regional development processes.

GLBL 544. Southeast Asia Today. 4 Credits.

Introduction to mainland and island Southeast Asia, with a special focus on social changes that are occurring across the region and how change is affecting peoples and societies.

GLBL 545. Development and Social Change in Sub-Saharan Africa. 4 Credits.

Introduces theoretical and practical aspects of development and social change in sub-Saharan Africa, with focus on key issues in African development during the post-colonial era.

GLBL 546. Development and Social Change in Latin America. 4 Credits.

Explores development challenges, debt cycles, urban growth, neoliberalism, populism, socialism, gender, the environment, U.S.–Latin American relations, ecotourism, and drug geographies in the region.

GLBL 548. Bollywood's Lens on Indian Society. 4 Credits.

Explores Indian society through film, focusing on critical social issues; depicted vs. the historical reality; and ongoing transformations of social orientations and values.

GLBL 563. Population Displacement and Global Health. 4 Credits.

Explores health and mental health problems affecting displaced (migrant and refugee) communities and considers underdevelopment as a fundamental cause of displacement and health problems. Offered once per academic year.

GLBL 565. Global Reproductive Health. 4 Credits.

Overview of issues in global reproductive health, including politics, economics, historical and cultural factors. Implications for international health and development programs reviewed. Offered alternate years.

GLBL 601. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

GLBL 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

GLBL 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

GLBL 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

GLBL 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GLBL 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

GLBL 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GLBL 655. International Studies Graduate Core Seminar. 4 Credits.

Graduate introduction to the field of International Studies, including exploration of development, culture, communication, and research methods, design, and ethics.

GLBL 657. Proseminar: Proposal Writing. 2 Credits.

An introduction to thesis proposal writing for first-year graduate students in international studies.

Global Studies and Languages (GSL)

Courses

GSL 111. Food and Culture in the Middle East. 4 Credits.

Getting to know Middle Eastern countries through food is one of the marvelous ways to provide a peerless connection with these unique cultures.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

GSL 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GSL 290. Introduction to Epidemiology. 4 Credits.

This course provides an introduction to the basic principles and methods of epidemiology. Epidemiology is the study of the distribution and determinants of health and disease in populations, and it is considered a cornerstone of public health. Topics covered include study designs, infectious disease epidemiology and pandemics, and chronic disease, environmental, and social epidemiology. This course will strengthen your ability to think critically about population health, with an eye toward health equity and justice.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

GSL 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GSL 335. Global Perspectives in Food and Film. 4 Credits.

In this class we will highlight the power of documentary films to disseminate information about food systems, sustainability, and health in our media-saturated world. Using food as a lens, we will critically examine films within their social, cultural, and global contexts.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

GSL 345. History and Ethics of Global Health. 4 Credits.

This course examines the ethics of global health from an interdisciplinary liberal arts perspective, with a particular attention to the history of this field. It is broad in geographic and chronological scope, beginning with ancient medical codes such as the Hippocratic Oath. A bulk of our time will be spent from 1900 to the present when the antecedents of global health (tropical medicine, colonial medicine, international medicine) emerged.

Additional Information:

Social Science Area

GSL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GSL 401. Research: [Topic]. 1-5 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

GSL 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

GSL 405. Reading and Conference: [Topic]. 1-12 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

GSL 406. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

GSL 407. Seminar: [Topic]. 1-5 Credits.

Special topics in international studies.

Repeatable 99 times

GSL 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GSL 410. Experimental Course: [Topic]. 1-5 Credits.

Recent topics include Africa: Development and Social Change.

Repeatable 99 times when topic changes

GSL 440. Methods in Food Systems Studies. 4 Credits.

This course provides a hands-on introduction to the social scientific, linguistic, and humanistic study of food, foodways, and food systems. Each class session will combine a theoretical discussion of a particular methodology, a survey of its usage through diverse case studies, and a chance to experiment with the methodology in individual and small groups.

Additional Information:

Cultural Literacy: Global Perspectives

GSL 507. Seminar: [Topic]. 1-5 Credits.

Special topics in international studies.

Repeatable 99 times

GSL 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

GRST 610. Experimental Course. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GRST 628. Scholarly and Professional Texts. 4 Credits.

Students will acquire skills and apply strategies to improve graduate-level reading effectiveness and comprehension by identifying the type of text, purpose for reading, rhetorical structures and features, and active vocabulary building. Field research into the types of rhetorical styles encountered in academic disciplines and matching appropriate reading strategies per style will be included. While this class targets international and non-native English-speaking students, any graduate student is welcome to join.

GRST 635. Reading for the Legal Profession. 4 Credits.

This course is designed to assist international students in the LLM program to understand the structure and cultural and institutional expectations of graduate-level law degree programs. It will also assist students in acquiring specialized legal vocabulary, recognizing and comprehending legal rhetorical styles and texts, and developing reading skills specific to the legal profession. Concurrent enrollment in the LLM Fundamentals of American Legal Systems course required.

GRST 636. Writing for the Legal Profession. 4 Credits.

This course is designed to support international LLM students in comprehending legal rhetorical styles and formats, and in acquiring the skills required to write a variety of legal texts that are accurate and which adhere to specialized legal writing conventions. Target texts include various types of briefs, motions, and memoranda. Concurrent enrollment in the LLM Comparative Legal Systems course required.

GRST 637. Master of Laws Reading. 2 Credits.

This course is focused on increasing international students' comprehension and retention of key course concepts, essential terms, and reading assignments in the LLM course Fundamentals of American Legal Systems. Students will use reading and vocabulary acquisition strategies and be provided opportunities to ask questions and clarify meaning of course concepts and terms in order to improve their ability to participate successfully in the LLM companion course.

GRST 638. Master of Laws Writing. 2 Credits.

This course is focused on increasing international students' ability to complete writing assignments successfully in the LLM course Comparative Legal Systems. Multiple drafts, grammar instruction, and peer and instructor feedback and student self-assessment help students gain the knowledge and skills they need to produce the high-quality writing required in the companion law course.

Greek (GRK)

Courses

GRK 101. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

GRK 102. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

Requisites: Prereq: GRK 101 or equivalent.

GRK 103. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

Requisites: Prereq: GRK 102 or equivalent.

GRK 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

GRK 301. Authors: [Topic]. 4 Credits.

Second-year Greek: selections from major Greek authors, either Plato or Lysias, with focus on reading and syntax. Sequence with GRK 302, GRK 303.

Repeatable 99 times when topic changes

Additional Information:

Hebrew (HBRW)

Courses

HBRW 101. First-Year Modern Hebrew I. 4 Credits.

This is the first course in the Hebrew courses sequence. This course is designed for students with no previous knowledge of the language. In this class, you will engage in readings and writing using Modern Hebrew script, vocabulary related to the immediate environment, basic grammar, and basic morphological structure. Only Verbs in the present tense (First Pattern) will be taught in this course. Conducted in Hebrew. Sequence with HBRW 102, HBRW 103.

HBRW 102. First-Year Modern Hebrew II. 4 Credits.

This is the second course in the Hebrew courses sequence. This course is designed for students who successfully passed (HBRW 101) or have been placed in (HBRW 102) after completing the Hebrew placement test. In this class, you will continue developing your communication skills, expanding your vocabulary in Hebrew, and gaining more understanding of Israeli culture. You will read, write, and speak about everyday topics, using different verbs, identifying roots, and recognizing a few Hebrew verb patterns. Conducted in Hebrew. Sequence with HBRW 101, HBRW 103.

Requisites: Prereq: HBRW 101.

HBRW 103. First-Year Modern Hebrew III. 4 Credits.

This is the third course in the Hebrew courses sequence. This course is designed for students who successfully passed (HBRW 102) or have been placed in (HBRW 103) after completing the Hebrew placement test. In this class, you will continue developing your communication skills, expanding your vocabulary in Hebrew, and gaining more understanding of Israeli culture. You will read, write, and speak by practicing present tense from different patterns and using the imperative. Conducted in Hebrew. Sequence with HBRW 101, HBRW 102.

Requisites: Prereq: HBRW 102.

HBRW 199. Special Studies: [Topic]. 1-12 Credits.

Experimental course - topic varies.

Repeatable 99 times

HBRW 301. Second-Year Modern Hebrew I. 4 Credits.

This is the fourth course in the Hebrew courses sequence. This course is designed for students who successfully passed (HBRW 103) or have been placed in (HBRW 301) after completing the Hebrew placement test. In this class, you will continue developing your communication skills, expanding your grammatical knowledge, and gaining more understanding of Israeli culture. You will discover the past tense from the first pattern and more verb forms in the present tense. You will also learn essential subordinating conjunctions, along with the morphological structures of verbs. Conducted in Hebrew. Sequence with HBRW 302, HBRW 303.

Requisites: Prereq: HBRW 103.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

HBRW 302. Second-Year Modern Hebrew II. 4 Credits.

This is the fifth course in the Hebrew Courses sequence. This course is designed for students who successfully passed (HBRW 301) or have been placed in (HBRW 302) after completing the Hebrew placement test. In this course, you will learn more about the different verbal patterns in the past tense and more complex grammatical structures such as the construct state. This course will also be focused on significantly improving your speaking and comprehension skills. Conducted in Hebrew. Sequence with HBRW 301, HBRW 303.

Requisites: Prereq: HBRW 301.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

HBRW 303. Second-Year Modern Hebrew III. 4 Credits.

This is the sixth course in the Hebrew Courses sequence. This course is designed for students who successfully passed (HBRW 302) or have been placed in (HBRW 303) after completing the Hebrew placement test. In the course, you will complete learning the present tense Past tense conjugations. You will learn more complex grammatical structures such as advanced construct states and superlatives. Conducted in Hebrew. Sequence with HBRW 301, HBRW 302.

Requisites: Prereq: HBRW 302.

Historic Preservation (AAAP)

Courses

AAAP 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

AAAP 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

AAAP 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times when topic changes

AAAP 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

AAAP 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

AAAP 408. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 5 times

AAAP 410. Experimental Course: [Topic]. 1-5 Credits.

Current topics are American Building Construction, American Architecture from a Preservation Perspective, Research Methods.

Repeatable 99 times

AAAP 411. Introduction to Historic Preservation. 3 Credits.

History, evolution, modern concepts, and professional techniques of historic preservation.

AAAP 415. Transportation and Preservation. 3 Credits.

Addresses compliance issues with preservation laws relating to transportation development. Includes understanding processes and negotiating needs of the resource with the needs of transportation authorities.

AAAP 421. American Architecture from a Preservation Perspective I. 4 Credits.

American built environment from the colonial era to the federal period. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 422. American Architecture from a Preservation Perspective II. 4 Credits.

American built environment from the federal period to 1893. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 423. American Architecture from a Preservation Perspective III. 4 Credits.

American built environment from 1893 to the present. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 424. Vernacular Architecture. 3 Credits.

Examines the characteristics and origins of vernacular building types and explores the cultural meanings of these sites, particularly in light of contemporary ideas about socioeconomic issues.

AAAP 431. National Register Nomination. 4 Credits.

Provides an overview of the National Register of Historic Places (NRHP) and the processes for documenting, evaluating, and nominating properties to the register.

Requisites: Prereq: AAAP 411.

AAAP 438. Building Pathology: [Topic]. 4 Credits.

Examines the scientific fundamentals of material properties in building construction and the application of that knowledge to the preservation of historic buildings.

Repeatable 2 times for a maximum of 12 credits when topic changes

AAAP 441. Legal Issues in Historic Preservation. 4 Credits.

Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory "takings," and aesthetic zoning.

AAAP 442. Preservation Ethics. 3 Credits.

Examines professional ethics in the field of historic preservation based on theories of public policy.

AAAP 445. Preservation Economics. 3 Credits.

Introduces economics of historic preservation projects and the financial techniques and incentives used to rehabilitate historic properties in the United States.

AAAP 451. Historic Survey and Inventory Methodology. 4 Credits.

Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 503. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

AAAP 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

AAAP 508. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 5 times

AAAP 510. Experimental Course: [Topic]. 1-5 Credits.

Examines the scientific fundamentals of material properties in building construction and the application of that knowledge to the preservation of historic buildings.

Repeatable 2 times for a maximum of 12 credits when topic changes

AAAP 541. Legal Issues in Historic Preservation. 4 Credits.

Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory "takings," and aesthetic zoning.

AAAP 542. Preservation Ethics. 3 Credits.

Examines professional ethics in the field of historic preservation based on theories of public policy.

AAAP 545. Preservation Economics. 3 Credits.

Introduces economics of historic preservation projects and the financial techniques and incentives used to rehabilitate historic properties in the United States.

AAAP 551. Historic Survey and Inventory Methodology. 4 Credits.

Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

AAAP 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

AAAP 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

AAAP 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

AAAP 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

AAAP 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

AAAP 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

AAAP 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

AAAP 611. Terminal Project. 1-12 Credits.

Repeatable 99 times

History (HIST)

Courses

HIST 102. Making Modern Europe. 4 Credits.

Historical development of Europe; major changes in value systems, ideas, social structures, economic institutions, and forms of political life. From the Renaissance to Napoleon.

Examination of the image of Japan's warrior class, the most prominent social group in Japan for over seven centuries. Combines films, readings, and lectures.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

HIST 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HIST 401. Research: [Topic]. 1-9 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

HIST 402. Supervised Tutoring. 1-4 Credits.

A student, under faculty supervision, accepts responsibility for tutoring other students within the discipline.

Repeatable 4 times for a maximum of 8 credits

HIST 403. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

HIST 404. Internship: [Topic]. 1-3 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 1 time for a maximum of 6 credits

HIST 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

HIST 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

HIST 407. Seminar: [Topic]. 5 Credits.

Recent topics include History of Los Angeles, Modern Japanese Culture, Rethinking America in the 1960s, and Stalinism.

Repeatable 99 times

HIST 408. Workshop: [Topic]. 1-12 Credits.

Current topics include Southeast Asia Interpretations.

Repeatable 99 times

HIST 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

HIST 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

HIST 411. Advanced Reacting to the Past: [Topic]. 4 Credits.

Intensive exploration of historical events through interactive games. Possible topics include U.S. Constitutional Convention, French Revolution, Democracy in Athens, India 1947.

Repeatable 1 time for a maximum of 8 credits when topic changes

HIST 412. Ancient Greece: [Topic]. 4 Credits.

Political, cultural, and intellectual history of ancient Greece; emphasis on urban culture. I: Classical Greece. II: Hellenistic World. III: Greek Science.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 414. Ancient Rome: [Topic]. 4 Credits.

Political, social, cultural, and intellectual history of ancient Rome from its foundation to late antiquity; emphasis on urban culture. I: Roman Republic. II: Roman Empire. III: Roman Society.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

HIST 415. Advanced World History: [Topic]. 4 Credits.

Advanced intensive study of selected issues in world history. Possible topics include biology and ecology, ancient empires, or intercultural encounters.

Repeatable 3 times for a maximum of 16 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

HIST 416. Advanced Women's History: [Topic]. 4 Credits.

Intensive study of select issues in women's history. Emphasis on the construction of their diverse identities; the framework for political, social, and economic empowerment; the historical development of gendered categories. Offered alternate years.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

HIST 417. Society and Culture in Modern Africa: [Topic]. 4 Credits.

Explorations in various topics with attention to class, gender, and generational and political struggles. Repeatable twice when topic changes for maximum of 12 credits.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

HIST 419. African Regional Histories: [Topic]. 4 Credits.

Examines the historiography of specific nations or regions.

Repeatable 2 times for a maximum of 12 credits

HIST 427. Intellectual History of Modern Europe: [Topic]. 4 Credits.

Major thinkers and movements include classical liberalism, utopian socialism, political economy, Marxism, aestheticism, Nietzsche, classical sociology, psychoanalysis, radical conservatism, Keynesian economics, intellectuals and political engagement, and Western Marxism. I: German Intellectual History. II: Ideas and Society, 19th Century. III: Ideas and Society, 20th Century.

Repeatable 2 times for a maximum of 12 credits when topic changes

Topics include peasant society, the foundations of absolutism, the German Enlightenment, protoindustrialization.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 443. Modern Germany: [Topic]. 4 Credits.

Topics include class formation, revolutionary movements, the socialist tradition, the Third Reich.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 444. The Holocaust. 4 Credits.

Surveys history of Nazi genocide, focusing on terror and complicity in formation of racial policy; and on perceptions of Nazi anti-Semitism as the Holocaust was occurring.

Additional Information:

Cultural Literacy: Global Perspectives

HIST 446. Modern Russia: [Topic]. 4 Credits.

Explores topics such as the intellectual and cultural history of Russia from the revolution to recent times.

Repeatable 2 times for a maximum of 12 credits

Additional Information:

Cultural Literacy: Global Perspectives

HIST 450. The Iraq War. 4 Credits.

A history of the Iraq War including the US decision to invade, the subsequent civil war, the rise and fall of the Islamic State in Iraq and Syria (ISIS), and beyond.

HIST 455. Colonial American History. 4 Credits.

Native Americans; motives, methods, implications of European colonization; origins of American slavery; interaction of diverse peoples in shaping colonial North American societies, economies, landscapes, politics.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

HIST 457. 19th-Century United States: [Topic]. 4 Credits.

Political, social, economic, and cultural history. I: Jacksonian Era. II: Civil War. III: Reconstruction. IV: Gilded Age.

Repeatable 3 times for a maximum of 16 credits when topic changes

HIST 463. American Economic History: [Topic]. 4 Credits.

Varying topics on the economic development of the United States as a preindustrial, industrial, and postindustrial society. I: The Great Depression. II: Industrialization.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 466. The American West. 4 Credits.

Social, political, and cultural history. Peoples of the American West and the expansion of the United States in the 19th century.

HIST 467. The American West. 4 Credits.

Social, political, and cultural history. 20th-century immigration, urban growth, economic development; social and political institutions; politics of race, ethnicity, and gender in a multicultural region.

HIST 468. The Pacific Northwest. 4 Credits.

Regional history to the mid-20th century. How the Pacific Northwest mirrors the national experience and how the region has a distinctive history and culture.

HIST 469. American Indian History: [Topic]. 4 Credits.

Variable chronological, thematic, and regional topics, including Indian history to 1860; 1860 to the present; Indians and colonialism; Indians and environments; Indians and gender; regional histories.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

HIST 470. African American History to 1877: [Topic]. 4 Credits.

Explores aspects of the African American experience in the era of slavery and Reconstruction.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 471. African American History since 1877: [Topic]. 4 Credits.

In-depth exploration of specific topics in African American history from the late 19th century to the present.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 473. American Environmental History: [Topic]. 4 Credits.

Variable topics examine the social, cultural, economic, and political history of the American landscape; how Americans have understood, transformed, degraded, conserved, and preserved their environments. I: To 1800. II: 19th Century. III: 20th-Century Environment and Environmentalism. IV: Environment and the West.

Repeatable 3 times for a maximum of 16 credits when topic changes

HIST 480. Mexico. 4 Credits.

Mexican history from pre-Hispanic times to the present. Special attention to nationhood, economic development, church-state relations, the Mexican identity, and the Revolution of 1910.

Additional Information:

Cultural Literacy: Global Perspectives

HIST 483. Latin America: [Topic]. 4 Credits.

Aspects of social history through 1800—social change, hierarchy and power, interrelationship of society and religion, medieval transformations, warrior class. I: Buddhism and Society in Medieval Japan. II: Samurai and War. III: Medieval Japan.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

HIST 503. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

HIST 507. Seminar: [Topic]. 5 Credits.

Recent topics include History of Los Angeles, Modern Japanese Culture, Rethinking America in the 1960s, and Stalinism.

Repeatable 99 times

HIST 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

HIST 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

HIST 512. Ancient Greece: [Topic]. 4 Credits.

Political, cultural, and intellectual history of ancient Greece; emphasis on urban culture. I: Classical Greece. II: Hellenistic World. III: Greek Science.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 514. Ancient Rome: [Topic]. 4 Credits.

Political, social, cultural, and intellectual history of ancient Rome from its foundation to late antiquity; emphasis on urban culture. I: Roman Republic. II: Roman Empire. III: Roman Society.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 515. Advanced World History: [Topic]. 4 Credits.

Advanced intensive study of selected issues in world history. Possible topics include biology and ecology, ancient empires, or intercultural encounters.

Repeatable 3 times for a maximum of 16 credits when topic changes

HIST 516. Advanced Women's History: [Topic]. 4 Credits.

Intensive study of select issues in women's history. Emphasis on the construction of their diverse identities; the framework for political, social, and economic empowerment; the historical development of gendered categories. Offered alternate years.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 528. Europe in the 20th Century: [Topic]. 4 Credits.

War, revolution, social change, political transformation, and related intellectual and cultural developments in Europe from the Great War of 1914-18 through the present. I: European Fascism. II: Jews in Modern Europe. III: Eastern Europe since World War I. IV: Europe since 1945.

Repeatable 99 times when topic changes

HIST 540. History of the Book. 4 Credits.

Books are the interface of materials, bodies, and ideas. Our global survey of the history of the book, from cuneiform inscription to scroll to codex to computer, will study books as agents of historical change, engage hands-on with rare materials, and introduce book-related careers.

HIST 542. Early Modern German History: [Topic]. 4 Credits.

Topics include peasant society, the foundations of absolutism, the German Enlightenment, protoindustrialization.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 543. Modern Germany: [Topic]. 4 Credits.

Topics include class formation, revolutionary movements, the socialist tradition, the Third Reich.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 544. The Holocaust. 4 Credits.

Surveys history of Nazi genocide, focusing on terror and complicity in formation of racial policy; and on perceptions of Nazi anti-Semitism as the Holocaust was occurring.

HIST 546. Modern Russia: [Topic]. 4 Credits.

Explores topics such as the intellectual and cultural history of Russia from the revolution to recent times.

Repeatable 2 times for a maximum of 12 credits

HIST 563. American Economic History: [Topic]. 4 Credits.

Varying topics on the economic development of the United States as a preindustrial, industrial, and postindustrial society. I: The Great Depression. II: Industrialization.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 566. The American West. 4 Credits.

Social, political, and cultural history. Peoples of the American West and the expansion of the United States in the 19th century.

HIST 567. The American West. 4 Credits.

Social, political, and cultural history. 20th-century immigration, urban growth, economic development; social and political institutions; politics of race, ethnicity, and gender in a multicultural region.

HIST 569. American Indian History: [Topic]. 4 Credits.

Variable chronological, thematic, and regional topics, including Indian history to 1860; 1860 to the present; Indians and colonialism; Indians and environments; Indians and gender; regional histories.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 571. African American History since 1877: [Topic]. 4 Credits.

In-depth exploration of specific topics in African American history from the late 19th century to the present.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 583. Latin America: [Topic]. 4 Credits.

Variable topics include the experience of blacks and Indians; the struggle for land, reform, and revolution.

Repeatable 3 times for a maximum of 16 credits when topic changes

HIST 590. Japan: [Topic]. 4 Credits.

Political, social, and cultural history from ancient through contemporary. Origins, aristocratic society, medieval age, Zen, warrior class, urban growth, modernization, imperialism, Pacific war, postwar society. I: Classical Age. II: Shogun's Japan, 1550–1800. III: Modern Age.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 591. Medicine and Society in Premodern Japan. 4 Credits.

Examines the interweaving of folk, Buddhist, Chinese, and Dutch influences. Diseases, knowledge, sexual hygiene, and medical challenges in social context.

HIST 597. Culture, Modernity, and Revolution in China: [Topic]. 4 Credits.

I: Modernity and Gender. II: Cultural Revolution and Memory. III: Historiography of the Communist Revolution.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 598. Early Japanese Culture and Society: [Topic]. 4 Credits.

Aspects of social history through 1800—social change, hierarchy and power, interrelationship of society and religion, medieval transformations, warrior class. I: Buddhism and Society in Medieval Japan. II: Samurai and War. III: Medieval Japan.

Requisites: Prereq: Courses on Japanese or medieval history recommended.

Repeatable 2 times for a maximum of 12 credits when topic changes

HIST 601. Research: [Topic]. 1-9 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

HIST 603. Dissertation. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

HIST 604. Internship: [Topic]. 1-3 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 1 time for a maximum of 6 credits

HIST 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

HIST 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

HIST 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

HIST 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

HIST 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

HIST 610. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

HIST 611. Field Readings. 5 Credits.

Independent study designed to ground students in major works and issues of their chosen field. Intensive study, based on a substantial reading list, requiring substantial written work.

HIST 612. Historical Methods and Writings. 5 Credits.

Introduction to the historical profession; includes historical questions, methods, and theories, and historiographic debates. Sequence.

HIST 615. Professional Development. 1 Credit.

Promotes understanding of the history profession and development of professional skills through a variety of activities—workshops on research and writing, critiques of scholarly presentations, discussion of the academic job market. Offered once per academic year.

HIST 616. Graduate Student Conference. 1 Credit.

Designed to build on work from HIST 612 and HIST 615 courses. Promotes understanding of history profession, standards, protocols; plan and host conference. Offered once per academic year.

HIST 618. Comprehensive Exam Preparation. 5 Credits.

Independent readings with faculty members to discuss a predetermined reading list in preparation for PhD comprehensive examination.

HIST 619. Dissertation Prospectus. 5 Credits.

Independent research under the direction of student's adviser with the specific aim of producing a defensible dissertation prospectus.

Honors College (HC)

Courses

HC 101H. Liberal Arts: [Topic]. 4 Credits.

This course will introduce students to the intellectual culture of liberal arts scholarship and provide a foundation in academic reading, analysis, and writing.

HC 199H. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HC 221H. Arts and Letters Inquiry: [Topic]. 4 Credits.

Introduction to critical inquiry in Arts and Letters fields such as literature, philosophy, language, religion, and the visual and performing arts. In this writing-intensive course students will use disciplinary methodologies to develop skills in evidence-based argument.

Additional Information:

Arts Letters Area

HC 231H. Social Science Inquiry: [Topic]. 4 Credits.

Introduction to critical inquiry in Social Science fields such as history, economics, anthropology, sociology, political science, law, business, geography, communication, and education. In this writing-intensive course students will use disciplinary methodologies to develop skills in evidence-based argument.

Additional Information:

Social Science Area

HC 241H. Scientific Inquiry: [Topic]. 4 Credits.

Introduction to critical inquiry in science fields such as chemistry, earth science, biology, mathematics, physics, engineering, neuroscience, biological anthropology, data science, and human physiology. In this writing-intensive course students will use disciplinary methodologies to develop skills in evidence-based argument.

Additional Information:

Science Area

HC 277H. Thesis Orientation. 2 Credits.

Introduction to the Clark Honors College thesis process; provides an overview of early steps and preparatory activities for the thesis.

HC 301H. Research and Writing: [Topic]. 4 Credits.

An introduction to research including development of research questions, methodology, analysis, and presentation of results.

Requisites: Prereq: HC 221H, HC 231H, HC 241H.

HC 399H. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HC 401H. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

HC 403H. Thesis. 1-21 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

HC 404H. Internship: [Topic]. 1-16 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 2 times for a maximum of 16 credits

HC 405H. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

HC 406H. Practicum: [Topic]. 1-21 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

HC 407H. Seminar: [Topic]. 1-5 Credits.

The 2-credit thesis seminar supports early work on the honors thesis.

Repeatable 99 times

HC 408H. Workshop: [Topic]. 1-12 Credits.

Topics include Thesis Orientation.

Repeatable 99 times

HC 409H. Terminal Project. 1-21 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

HC 410H. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HC 421H. Honors College Arts and Letters Colloquium: [Topic]. 4 Credits.

Offered in a range of topics with an emphasis on arts and letters.

Repeatable 3 times for a maximum of 16 credits when topic changes

HC 431H. Honors College Social Science Colloquium: [Topic]. 4 Credits.

Offered in a range of topics with an emphasis on social science.

Repeatable 3 times for a maximum of 16 credits when topic changes

HC 434H. Honors College Global Perspectives Colloquium: [Topic]. 4 Credits.

Topics center encountering and critically reflecting upon cultures, identities, and ways of being in global contexts beyond the United States. Each course will include substantial scholarship, cultural production, perspectives, and voices from members of communities under study, as sources permit.

Repeatable 3 times for a maximum of 16 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

HC 441H. Honors College Science Colloquium: [Topic]. 4 Credits.

Offered in a range of topics with an emphasis on science.

Repeatable 3 times for a maximum of 16 credits when topic changes

HC 444H. HC US: Difference, Inequality, Agency Colloquium: [Topic]. 4 Credits.

Topics develop students' analytical and reflective capacities to help them understand and ethically engage with the ongoing (cultural, economic, political, social, etc.) power imbalances that have shaped and continue to shape the United States.

Repeatable 3 times for a maximum of 16 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

HC 477H. Thesis Prospectus. 2 Credits.

Students create prospectus, exchange critiques and ideas, and present research in mock defenses with thesis advisor present.

Human Physiology (HPHY)

Courses

HPHY 105. Principles of Nutrition. 4 Credits.

Explores the fundamentals of nutrition and its application to culture, lifestyle, and health as they relate to humans across the lifespan. Course will be taught once or more per academic year.

Additional Information:

Science Area

HPHY 199. Special Studies: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

HPHY 211. Medical Terminology. 3 Credits.

Explore and develop skills in language and terminology specific to the medical sciences with an emphasis on derivation, meaning, and pronunciation.

HPHY 212. Scientific Investigation in Physiology. 4 Credits.

Explores the process of conducting and communicating scientific research, and how data and statistics help us build and understand scientific knowledge about physiology and medicine.

Additional Information:

Science Area

HPHY 321. Human Anatomy I. 5 Credits.

Introduction to the human body and histology; nerves; central, autonomic, and peripheral nervous systems; cranial nerves; regional anatomy of the head; special senses. Includes cadaver laboratory.

Requisites: Prereq: HPHY 211; BI 222Z or BI 282H; CH 223Z or CH 226H.

HPHY 322. Human Physiology I. 5 Credits.

Neuro- and muscular physiology: action potentials; synapses and receptors; skeletal muscle; central, peripheral, and autonomic nervous systems; special senses. Includes human-based laboratory. Sequence with HPHY 321, HPHY 323, HPHY 324, HPHY 325.

Requisites: Prereq: HPHY 212; BI 222Z or BI 282H; CH 223Z or CH 226H.

HPHY 323. Human Anatomy II. 5 Credits.

Heart, lungs, and vasculature in addition to regional exploration of the musculoskeletal system. Includes cadaver laboratory. Sequence with HPHY 321, HPHY 322, HPHY 324, HPHY 325.

Requisites: Prereq: HPHY 321.

HPHY 324. Human Physiology II. 5 Credits.

Cardiovascular system; respiratory system; immunology. Includes human-based laboratory. Sequence with HPHY 321, HPHY 322, HPHY 323, HPHY 325.

Requisites: Prereq: HPHY 322.

HPHY 325. Human Anatomy and Physiology III. 5 Credits.

Anatomy and physiology of the digestive, reproductive, and renal systems; endocrinology. Includes combination of cadaver laboratory and human-based laboratory. Sequence with HPHY 321, HPHY 322, HPHY 323, HPHY 324.

Requisites: Prereq: HPHY 323, HPHY 324.

HPHY 333. Motor Control. 4 Credits.

Introduction to the processes of control and coordination in the performance of motor skills. Neurophysiological, mechanical, and cognitive bases of motor skill acquisition.

Requisites: Prereq: [HPHY 321, HPHY 322] or PSY 304.

HPHY 362. Tissue Injury and Repair. 4 Credits.

Exploration of the physiology of injury and trauma. Emphasis on inflammation and healing of connective tissue injury, tissue biomechanics, mechanisms of injury, and clinical orthopedic evaluation techniques.

Requisites: Prereq: HPHY 323, HPHY 324.

HPHY 371. Physiology of Exercise. 4 Credits.

Physiology of exercise, physical conditioning, and training; mechanisms and significance of these effects for health and performance.

Requisites: Prereq: HPHY 323, HPHY 324.

HPHY 374. Clinical Electrocardiography and Exercise. 4 Credits.

Overview of pathophysiology, diagnostic testing, exercise prescription and rehabilitation of cardiovascular diseases. Incorporated throughout the course, students will learn the fundamentals of electrocardiography and how this tool is applied in both the diagnostic and rehabilitative settings.

Requisites: Prereq: HPHY 371.

HPHY 375. Metabolism and Nutrition. 4 Credits.

Exploration of cellular, tissue, and whole body integrated metabolic processes as the basis of physiologic function. Integrating the metabolism of macronutrients at the cellular, tissue, and whole body systems level in the context of human growth, function, and disease.

Requisites: Prereq: HPHY 325, HPHY 371.

HPHY 381. Biomechanics. 4 Credits.

Fundamental principles of physics applied to the analysis of human movement. Emphasis on developing abilities to analyze human movement quantitatively.

Requisites: Prereq: HPHY 323, PHYS 201.

HPHY 399. Special Studies: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

HPHY 401. Research: [Topic]. 1-15 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

HPHY 403. Thesis. 1-4 Credits.

For honors students during the terms in which they conduct research or write a thesis.

Repeatable 99 times

HPHY 404. Internship: [Topic]. 1-16 Credits.

Field experience in an agency, institution, or business. Practice knowledge from courses: planning, organizing, directing, evaluating, and developing professional competence.

Repeatable 99 times

HPHY 405. Special Problems: [Topic]. 1-12 Credits.

Reading and assignments in connection with other courses for extra credit. Honors readings.

Repeatable 99 times

HPHY 406. Practicum: [Topic]. 1-12 Credits.

Assist students learning anatomy or physiology in either the lecture or lab courses.

Repeatable 99 times

HPHY 407. Seminar: [Topic]. 1-5 Credits.

Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

Repeatable 99 times

HPHY 408. Workshop: [Topic]. 1-15 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

HPHY 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

HPHY 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HPHY 411. Scientific Teaching. 1 Credit.

For students currently completing the human anatomy and physiology core sequence; focuses on how people learn, evidence-based teaching practices, and strategies to improve student inclusion and representation.

Requisites: Prereq: HPHY 211, HPHY 212.

Additional Information:

General Limitation applies: Applied, skills, career, or professional development course

HPHY 412. Sleep Physiology. 4 Credits.

Fundamental principles of sleep and how physiology is affected by sleep.

Requisites: Prereq: HPHY 325.

HPHY 413. Muscle Structure, Function, and Plasticity. 4 Credits.

Physiologic basis for skeletal muscle adaptation to increased and decreased use and injury. Emphasizes how structure dictates function relevant to rehabilitation.

Requisites: Prereq: HPHY 323, HPHY 324.

HPHY 414. Muscle Metabolism. 4 Credits.

Metabolic basis for skeletal muscle adaptation to increased and decreased use, and injury models. Emphasizes interorgan communication; uses clinical models.

Requisites: Prereq: HPHY 371.

HPHY 420. Human Anatomy Dissection. 2 Credits.

Dissection of one region of a preserved donated human cadaver and preparation of the specimen for the HPHY 321/HPHY 323/HPHY 325 laboratory experience. Students are accepted by application, which are due early February.

Requisites: Prereq: HPHY 323.

HPHY 422. Physiology of Obesity. 4 Credits.

Explores potential causes of the obesity epidemic, cellular mechanisms linking obesity to insulin resistance and metabolic diseases, and interventions in treatment of metabolic disease and obesity.

Requisites: Prereq: HPHY 325, HPHY 371.

HPHY 423. Physiology of Aging. 4 Credits.

Examines changes that occur to cells and organs in old age and the causes of age-related disease and dysfunction (cardiovascular disease, diabetes, osteoporosis, Alzheimer's); interventions to increase longevity.

Requisites: Prereq: HPHY 325.

HPHY 432. Neural Development. 4 Credits.

Exploration of development of the cells in the nervous system. We will discuss the importance of "critical periods" in development and how interventions or dysfunction during critical periods can lead to neurodevelopmental disorders using the respiratory system as a model system.

Requisites: Prereq: HPHY 321, HPHY 322.

HPHY 433. Neurophysiology of Concussion. 4 Credits.

Investigate diagnosis, deficits, and treatment of mild traumatic brain injury and neurophysiological effects.

Requisites: Prereq: HPHY 325, HPHY 333.

HPHY 434. Movement Disorders. 4 Credits.

Discusses the clinical manifestations and underlying physiological mechanisms of selected movement disorders. Emphasizes the role of scientific experiment in diagnosis and treatment.

Requisites: Prereq: HPHY 321, HPHY 322.

HPHY 436. Clinical Neuroscience. 4 Credits.

This course covers neurological diseases and disorders from a neuroscience perspective. The focus will be on applying basic neuroscience principles to better understand clinical practices including patient diagnosis and treatments.

Requisites: Prereq: HPHY 321, HPHY 322.

HPHY 462. Therapeutic Techniques. 4 Credits.

Clinical application of therapeutic techniques including modalities and rehabilitation for soft-tissue orthopedic injuries. Offered alternate years.

Requisites: Prereq: HPHY 362.

HPHY 470. Environmental Physiology. 4 Credits.

Examination of physiological adaptations to acute and chronic exposure to extreme heat, cold, and high altitude.

Requisites: Prereq: HPHY 371.

HPHY 473. High Altitude Physiology and Medicine. 4 Credits.

Explores major physiologic responses to high altitude (hypoxia), both adaptive and maladaptive, from systems to molecular level, as well as pathophysiologic conditions at high altitude. Offered alternate years.

Requisites: Prereq: HPHY 325, HPHY 371.

HPHY 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

HPHY 507. Seminar: [Topic]. 1-5 Credits.

Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

Repeatable 99 times

HPHY 508. Workshop: [Topic]. 1-15 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

HPHY 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HPHY 512. Sleep Physiology. 4 Credits.

Fundamental principles of sleep and how physiology is affected by sleep.

HPHY 513. Muscle Structure, Function, and Plasticity. 4 Credits.

Physiologic basis for skeletal muscle adaptation to increased and decreased use and injury. Emphasizes how structure dictates function relevant to rehabilitation.

HPHY 514. Muscle Metabolism. 4 Credits.

Metabolic basis for skeletal muscle adaptation to increased and decreased use, and injury models. Emphasizes interorgan communication; uses clinical models.

HPHY 520. Human Anatomy Dissection. 2 Credits.

Dissection of one region of a preserved donated human cadaver and preparation of the specimen for the HPHY 321/HPHY 323/HPHY 325 laboratory experience. Students are accepted by application, which are due early February.

HPHY 522. Physiology of Obesity. 4 Credits.

Explores potential causes of the obesity epidemic, cellular mechanisms linking obesity to insulin resistance and metabolic diseases, and interventions in treatment of metabolic disease and obesity.

HPHY 523. Physiology of Aging. 4 Credits.

Examines changes that occur to cells and organs in old age and the causes of age-related disease and dysfunction (cardiovascular disease, diabetes, osteoporosis, Alzheimer's); interventions to increase longevity.

HPHY 532. Neural Development. 4 Credits.

Exploration of development of the cells in the nervous system. We will discuss the importance of "critical periods" in development and how interventions or dysfunction during critical periods can lead to neurodevelopmental disorders using the respiratory system as a model system.

HPHY 533. Neurophysiology of Concussion. 4 Credits.

Investigate diagnosis, deficits, and treatment of mild traumatic brain injury and neurophysiological effects.

HPHY 534. Movement Disorders. 4 Credits.

Discusses the clinical manifestations and underlying physiological mechanisms of selected movement disorders. Emphasizes the role of scientific experiment in diagnosis and treatment.

HPHY 536. Clinical Neuroscience. 4 Credits.

This course covers neurological diseases and disorders from a neuroscience perspective. The focus will be on applying basic neuroscience principles to better understand clinical practices including patient diagnosis and treatments.

HPHY 570. Environmental Physiology. 4 Credits.

Examination of physiological adaptations to acute and chronic exposure to extreme heat, cold, and high altitude.

HPHY 573. High Altitude Physiology and Medicine. 4 Credits.

Explores major physiologic responses to high altitude (hypoxia), both adaptive and maladaptive, from systems to molecular level, as well as pathophysiologic conditions at high altitude. Offered alternate years.

HPHY 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

HPHY 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

HPHY 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

HPHY 606. Practicum: [Topic]. 1-16 Credits.

Selected problems in the field of human physiology.

Repeatable 99 times

HPHY 607. Seminar: [Topic]. 1-9 Credits.

Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

Repeatable 99 times

HPHY 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

HPHY 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

HPHY 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HPHY 611. Professional Skills I: Effective Teaching. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 612, HPHY 613.

HPHY 612. Professional Skills II: Responsible Research. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 611, HPHY 613.

HPHY 613. Professional Skills III: Career Development. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 611, HPHY 612.

HPHY 621. Systems Physiology I. 4 Credits.

Advanced overview of neural physiology, neural control of human movement, and the biomechanical constraints underlying that control. Sequence with HPHY 622, HPHY 623.

HPHY 622. Systems Physiology II. 4 Credits.

Advanced overview of cardiovascular physiology and skeletal muscle cell physiology and metabolism.

HPHY 623. Systems Physiology III. 4 Credits.

Advanced overview of renal and respiratory physiology.

HPHY 631. Human Performance and Sports Products. 3 Credits.

Exploration of sciences of human performance: physiology and kinesiology, which inform the Sports Product Industry at the level of product development, product design and marketing. Available to non-majors only.

Equivalent to: HPHY 631M, SPM 631M

HPHY 631M. Human Performance and Sports Products. 3 Credits.

Exploration of sciences of human performance: physiology and kinesiology, which inform the Sports Product Industry at the level of product development, product design and marketing. Multilisted with SPM 631M.

Equivalent to: HPHY 631, SPM 631M

HPHY 632. Human Biomechanics and Sports Product Design. 2 Credits.

Exploration of sciences of human biomechanics, which inform the Sports Product Industry at the level of product development, product design and marketing. Sequence with HPHY 631.

Requisites: Prereq: HPHY 631.

HPHY 662. Manual Therapy: Spine, Lower Quadrant. 2 Credits.

Advanced skills in muscle energy, mobilization, and trigger-point release techniques for the spine and lower quadrant. For certified athletic trainers. Offered alternate years.

HPHY 670. Advanced Respiratory Physiology. 4 Credits.

Explores advanced concepts in respiratory physiology; includes exercise adaptations and examples of pathophysiology. Offered alternate years.

Requisites: Prereq: HPHY 623.

HPHY 676. Human Cardiovascular Control. 4 Credits.

Cardiovascular physiology, including central control of blood pressure and flow regulation. An integrative approach toward how the cardiovascular system is coordinated with overall body function. Offered alternate years.

Requisites: Prereq: HPHY 623.

HPHY 684. Kinematics of Human Movement. 4 Credits.

Theory and application of kinematic analysis of human motion. Emphasis on 2D and 3D kinematics, including data collection, analysis and modeling. Offered alternate years.

Requisites: Prereq: HPHY 621.

HPHY 685. Kinetics of Human Movement. 4 Credits.

Experimental methods and mechanical theories associated with the analysis of joint forces and movements during human motion. Offered alternate years.

Requisites: Prereq: HPHY 621.

Humanities (HUM)

Courses

HUM 101. Introduction to the Humanities I. 4 Credits.

Ideas and modes of vision Western culture has inherited from the classical period. Readings and discussions focus on literature, philosophy, history, the arts, and religion.

Additional Information:

Arts Letters Area

HUM 102. Introduction to the Humanities II. 4 Credits.

Ideas and modes of vision Western culture has inherited from the medieval to the Renaissance periods. Readings and discussions focus on literature, philosophy, history, the arts, and religion.

Additional Information:

Arts Letters Area

HUM 103. Introduction to the Humanities III. 4 Credits.

An interdisciplinary introduction to the global humanities in the modern period.

Additional Information:

Arts Letters Area

HUM 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 4 times

HUM 240. Medical Humanities. 4 Credits.

Examines the intersection of literature, philosophy, history, and the arts with medical theory and practice.

Additional Information:

Arts Letters Area

HUM 300. Themes in the Humanities. 4 Credits.

Interdisciplinary and multimedia introduction to the study of the humanities. Analysis of such themes as tragedy in music, literature, and art.

Additional Information:

Arts Letters Area

HUM 399. Special Studies: [Topic]. 1-5 Credits.

Problem-oriented course designed to explore new topics or approaches to studies in the humanities.

Repeatable 99 times

HUM 403. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

HUM 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

HUM 406. Practicum: [Topic]. 1-5 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.. Repeatable with consent of instructor and program head.

Repeatable 99 times

HUM 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

HUM 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

HUM 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

HUM 510. Experimental Course: [Topic]. 1-5 Credits.

BA Language Satisfying Course

ICH 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

Interdisciplinary Studies (IST)

Courses

IST 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

IST 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

IST 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

IST 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

IST 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

IST 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

IST 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

IST 610. Experimental Course: [Topic]. 1-5 Credits.

Interior Architecture (IARC)

Courses

IARC 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

IARC 204. Understanding Contemporary Interiors. 4 Credits.

Introduction to the theory of interior architecture. Design criteria explored through illustrated lectures and projects involving analysis of space.

IARC 401. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

IARC 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

IARC 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

IARC 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

IARC 407. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

IARC 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

IARC 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

IARC 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

IARC 444. Furniture: Theory and Analysis. 3 Credits.

Analysis of furniture and cabinetry from a theoretical and practical standpoint. Emphasis on use within architectural space as well as free standing elements. Introduction to structure, construction, and construction installation drawings.

Requisites: Prereq: one from PD 323, ARCH 484, IARC 484.

IARC 445. Comprehensive Project Preparation. 3 Credits.

Formulation of individual design projects for IARC 488/588, 489/589. Development of project issues and documentation of context, site, and building information; includes research, case studies, and programming.

Requisites: Prereq: IARC 473, IARC 484.

IARC 447. Color Theory and Application for the Built Environment. 3 Credits.

Use of color in the built environment including principal color systems, methods of color harmony, effects of visual phenomena, and various psychological, cultural, and historic implications.

Requisites: Prereq: PD 350 or ARCH 484 or IARC 484 or interior architecture minor status.

IARC 471. Interior Construction Elements. 3 Credits.

The properties and detailing of materials used in interior design construction. Code issues that affect interior construction field trips to supply sources and projects.

Requisites: ARCH 470.

IARC 472. Interior Finishes and Design Application. 3 Credits.

The properties, manufacture, application, and code issues, and ecological considerations of interior finish materials. Field trips to supply sources.

Requisites: ARCH 470

IARC 473. Working Drawings in Interior Architecture. 4 Credits.

Preparation of working drawings for a small, sustainable interior architecture design project.

Requisites: Prereq: [ARCH 462, ARCH 484] or [IARC 471, IARC 472, IARC 484].

IARC 474. History of Interior Architecture I. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 475. History of Interior Architecture II. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 476. History of Interior Architecture III. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 484. Interior Design. 6 Credits.

A series of creative projects in interior design; intensive analysis of design; methods of problem solving; individual criticism, review of design projects; group discussion and field trips.

Requisites: Prereq: ARCH 383.

Repeatable 99 times

IARC 486. Furniture Design. 6 Credits.

Projects in design and construction of custom furniture, preparation of detailed shop drawings, shop procedure.

Requisites: Prereq: IARC 444; IARC 484 or ARCH 484.

IARC 487. Working Drawings. 6 Credits.

Focuses on the design of a small, sustainable interior architecture design project and the production of a set of working drawings.

Requisites: Prereq: [ARCH 462, ARCH 484] or [IARC 471, IARC 472, IARC 484]; coreq: IARC 473.

IARC 488. Interior Design Comprehensive Project I. 8 Credits.

Student-initiated studies in interior design for the terminal project. Emphasis on comprehensive and integrative study.

Requisites: Prereq: IARC 445.

IARC 489. Interior Design Comprehensive Project II. 8 Credits.

Student-initiated studies in interior design for the terminal project. Emphasis on comprehensive and integrative study.

Requisites: Prereq: IARC 488

IARC 492. Electric Lighting. 3 Credits.

Principles of lighting with focus on integration of electric illumination and space. Design for lighting, calculations, and available systems and sources tested through models and drawings.

Requisites: Prereq: ARCH 484 or IARC 484; ARCH 492.

IARC 503. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

IARC 507. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

IARC 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

IARC 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

IARC 544. Furniture: Theory and Analysis. 3 Credits.

Analysis of furniture and cabinetry from a theoretical and practical standpoint. Emphasis on use within architectural space as well as free standing elements. Introduction to structure, construction, and construction installation drawings.

Requisites: Prereq: ARCH 584 or IARC 584.

IARC 545. Comprehensive Project Preparation. 3 Credits.

Formulation of individual design projects for IARC 488/588, 489/589. Development of project issues and documentation of context, site, and building information; includes research, case studies, and programming.

Requisites: Prereq: IARC 573, IARC 584.

IARC 547. Color Theory and Application for the Built Environment. 3 Credits.

Use of color in the built environment including principal color systems, methods of color harmony, effects of visual phenomena, and various psychological, cultural, and historic implications.

Requisites: Prereq: ARCH 584 or IARC 584.

IARC 571. Interior Construction Elements. 3 Credits.

The properties and detailing of materials used in interior design construction. Code issues that affect interior construction field trips to supply sources and projects.

Requisites: Prereq: ARCH 570.

IARC 572. Interior Finishes and Design Application. 3 Credits.

The properties, manufacture, application, and code issues, and ecological considerations of interior finish materials. Field trips to supply sources.

Requisites: Prereq: ARCH 570.

IARC 573. Working Drawings in Interior Architecture. 4 Credits.

Preparation of working drawings for a small, sustainable interior architecture design project.

Requisites: Prereq: [ARCH 562, ARCH 584] or [IARC 571, IARC 572, IARC 584].

IARC 574. History of Interior Architecture I. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 575. History of Interior Architecture II. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 576. History of Interior Architecture III. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 584. Interior Design. 6 Credits.

A series of creative projects in interior design; intensive analysis of design; methods of problem solving; individual criticism, review of design projects; group discussion and field trips.

Requisites: Prereq: ARCH 681.

Repeatable 99 times

IARC 586. Furniture Design. 6 Credits.

Projects in design and construction of custom furniture, preparation of detailed shop drawings, shop procedure.

Requisites: Prereq: IARC 544; ARCH 584 or IARC 584.

IARC 587. Working Drawings. 6 Credits.

Focuses on the design of a small, sustainable interior architecture design project and the production of a set of working drawings.

Requisites: Prereq: ARCH 562, ARCH 584 or IARC 571, IARC 572, IARC 584; coreq: IARC 573.

IARC 588. Interior Design Comprehensive Project I. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Requisites: Prereq: 36 credits in IARC design studios.

IARC 589. Interior Design Comprehensive Project II. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Requisites: Prereq: IARC 588.

IARC 592. Electric Lighting. 3 Credits.

Principles of lighting with focus on integration of electric illumination and space. Design for lighting, calculations, and available systems and sources tested through models and drawings.

Requisites: Prereq: ARCH 584 or IARC 584; ARCH 592.

IARC 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

IARC 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

IARC 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

IARC 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

IARC 607. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

IARC 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

IARC 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

IARC 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

IARC 611. Terminal Project. 1-9 Credits.

Repeatable.

Repeatable 99 times

IARC 684. Graduate Interior Design Studio. 6 Credits.

Students refine their abilities to undertake adaptive reuse interior design projects requiring comprehensive and integrative design study over a wide range of project types in an advanced studio environment.

Requisites: Prereq: ARCH 681.

Repeatable 1 time for a maximum of 12 credits

Italian (ITAL)

Courses

ITAL 101. First-Year Italian. 5 Credits.

Introduction to Italian stressing speaking, reading, writing, and comprehension skills. Students cannot receive credit for more than one of ITAL 101, ITAL 104, ITAL 121. Sequence.

Equivalent to: ITAL 104, ITAL 121

ITAL 102. First-Year Italian. 5 Credits.

Introduction to Italian stressing speaking, reading, writing, and comprehension skills. Sequence.

Requisites: Prereq: One from ITAL 101, ITAL 104, ITAL 121.

ITAL 103. First-Year Italian. 5 Credits.

Introduction to Italian stressing speaking, reading, writing, and comprehension skills. Students cannot receive credit for more than one of ITAL 103, ITAL 105, ITAL 122. Sequence.

Requisites: Prereq: ITAL 102.

Equivalent to: ITAL 105, ITAL 122

ITAL 104. Intensive First-Year Italian. 5 Credits.

Covers in two terms the work of ITAL 101, ITAL 102, ITAL 103. Students cannot receive credit for more than one of ITAL 101, ITAL 104, ITAL 121. Sequence.

Equivalent to: ITAL 101, ITAL 121

ITAL 105. Intensive First-Year Italian. 5 Credits.

Covers in two terms the work of ITAL 101, ITAL 102, ITAL 103. Students cannot receive credit for more than one of ITAL 103, ITAL 105, ITAL 122. Sequence.

Requisites: Prereq: ITAL 104.

Equivalent to: ITAL 103, ITAL 122

ITAL 121. Italian for Careers I. 5 Credits.

Introduction to Italian language and culture to start building meaningful relationships and personal connections with peers and potential business partners on different career paths. Coursework includes interpreting authentic Italian language sources (reading/listening/viewing) and producing language in presentational and interpersonal modes of communication (oral and written discussions, presentations) in familiar, everyday contexts. Students cannot receive credit for more than one of ITAL 101, ITAL 104, ITAL 121. Sequence with ITAL 122.

Equivalent to: ITAL 101, ITAL 104

ITAL 122. Italian for Careers II. 5 Credits.

Introduction to Italian language and culture to start building meaningful relationships and personal connections with peers and potential business partners on different career paths. Coursework includes interpreting authentic Italian language sources (reading/listening/viewing) and producing language in presentational and interpersonal modes of communication (oral and written discussions, presentations) in familiar, everyday contexts. Students cannot receive credit for more than one of ITAL 103, ITAL 105, ITAL 122. Sequence with ITAL 121.

Requisites: Prereq: One from ITAL 121, ITAL 102, ITAL 104.

Equivalent to: ITAL 103, ITAL 105

ITAL 152. Desire and Resistance: Italian Cinema. 4 Credits.

The theories and works of the major Italian filmmakers; topics in Italian history and culture; introduction to film analysis.

Arts Letters Area

JPN 203. Second-Year Japanese III. 5 Credits.

Additional training in oral-aural skills designed to build listening comprehension and fluency. Development of basic proficiency in reading and writing Japanese.

Requisites: Prereq: JPN 202.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

JPN 250. Manga Millennium. 4 Credits.

Surveys the 1,000-year history of visual-verbal narratives—comics—in Japan, ranging from medieval picture to modern manga.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

JPN 260. Workplace Communication in Japan I. 4 Credits.

Students will acquire essential linguistic skills, social etiquette, and practical knowledge to effectively perform basic business tasks in a Japanese context. This course covers fundamental aspects of Japanese business culture and its perception, alongside an exploration of cultural differences and potential communication and business challenges with Japanese counterparts. Key topics include first-time meetings, building business relationships, and understanding workplace hierarchies. JPN 260 and JPN 261 don't replace JPN 201/202/203, and won't count towards the BA 2nd Language requirement. JPN 260 and JPN 261 do not need to be taken in order.

Requisites: Prereq: JPN 103.

Additional Information:

Cultural Literacy: Global Perspectives

JPN 261. Workplace Communication in Japan II. 4 Credits.

Students will acquire essential linguistic skills, social etiquette, and practical knowledge to effectively perform basic business tasks in a Japanese context. This course covers fundamental aspects of Japanese business culture and its perception, alongside an exploration of cultural differences and potential communication and business challenges with Japanese counterparts. Key topics include entertaining business partners, promoting inclusiveness in the workplace, understanding company benefits, and effective workplace communication. JPN 260 and JPN 261 don't replace JPN 201/202/203, and won't count towards the BA 2nd Language requirement. JPN 260 and JPN 261 do not have to be taken in order.

Requisites: Prereq: JPN 103.

JPN 320. Japanese in Music. 3 Credits.

Study of a variety of Japanese music since the 1970s. The goal is to help students develop Japanese language skills as well as cultural understanding through music.

Requisites: Prereq: JPN 102.

JPN 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

JPN 401. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 11 times for a maximum of 12 credits

JPN 403. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 5 times for a maximum of 6 credits

JPN 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

JPN 406. Field Studies: [Topic]. 1-21 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

JPN 407. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Japanese literature or linguistics. Sources are in Japanese, English, or both.

Repeatable 99 times when topic changes

JPN 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

JPN 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

JPN 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

JPN 411. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Journalism and Communication (JCOM)

Courses

JCOM 101. Media Professions. 4 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well media literacy. The course serves as the introduction to majors in the School of Journalism and Communication.

JCOM 102. Story Craft Audio. 2 Credits.

Prepares majors for basic audio production classes, projects, and opportunities in their program of work. With this knowledge comes a respect for the resources and people of the School Of Journalism Communications and Allen Hall. Emphasizes the basics of recording and using sound.

JCOM 103. Story Craft Visual. 2 Credits.

Introduces fundamentals of how to create professional visual media and will lay a foundation of technical knowledge and creative capacities which will be further developed in future classes. Successful students will demonstrate a basic understanding and confidence in properly using production camera equipment, lighting equipment, production studios, editing software, and equipment checkout systems.

JCOM 185M. Science and Popular Media. 4 Credits.

By evaluating how science stories are told, reflecting on their impact, and taking some first steps in creating science stories, we will explore a powerful approach to critical thinking about scientific information and its role in popular media. Multilisted with BI 185M.

Additional Information:

Science Area

JCOM 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

JCOM 198. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

JCOM 199L. Special Studies: [Topic]. 2 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 201. Making Sense of Media. 4 Credits.

This course explores the social, cultural, economic, and political implications of media consumption in an age of misinformation and disinformation. Over the course of the term, students will explore key transformations in the media landscape, paying close attention to the interplay of media and power.

Additional Information:

Social Science Area

JCOM 202. How Stories Work. 4 Credits.

This class will ground students in the basics of story: the components, the structure, the conceptual framework with consideration as to how story is understood in SOJC majors and coursework. Throughout the term, students will explore how stories unfold for different audiences, in different channels, and with different purpose in mind.

JCOM 203. Writing as Practice. 4 Credits.

Writing as Practice is designed to help students develop a professional voice and identity through consistent writing and feedback. Practice is ritual and routine. The focus is strictly on improvement, which is why this class isn't graded. It's Pass/NoPass, meaning that everyone will need to meet a basic minimum standard and, because of that, everyone will leave this class as a better writer. Everyone has room for improvement; this class is built to make that happen.

JCOM 220. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema Studies and SOJC majors only.

JCOM 221. Media Studies Production. 2 Credits.

This course complements an understanding of production skills and practice from Gateway to Media by adding critical and cultural theory. By examining the relationship between theory and practice, students gain deeper knowledge of how production practices impact cultural and society.

Requisites: Prereq: [JCOM 102, JCOM 103, JCOM 202] or J 211.

JCOM 241. Principles of Multimedia Techniques. 4 Credits.

This class will ground students in the principles of shooting, recording, and editing photos, videos, and audio. Students will learn how to operate professional-level cameras and audio recorders and edit digital content using software. Students will learn about media aesthetics and how to create compelling photos, videos, and audio pieces for publication.

Requisites: Prereq: [JCOM 102, JCOM 103] or J 211.

JCOM 280. Introduction to Studying Games. 4 Credits.

Introduction to the fundamentals of game studies, including the game industry, history, culture, and critical topics from industrial labor and globalization to identity representations.

JCOM 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 299L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 301. Gender, Media and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change become the focus for analysis.

Requisites: Prereq: JCOM 201 or J 201.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

JCOM 302. Communication Law. 4 Credits.

This course emphasizes legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Requisites: Prereq: JCOM 201 or J 201.

Additional Information:

Social Science Area

JCOM 303. Media Ethics. 4 Credits.

This course focuses on ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Requisites: Prereq: JCOM 201 or J 201.

Additional Information:

Arts Letters Area

JCOM 304. The Media Business. 4 Credits.

Emphasizes the changing landscape of media channels and systems, how they are adapting to transformational technology, and how innovation and entrepreneurship are requisites for successful careers.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 305. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Requisites: Prereq: JCOM 201 or J 201.

Additional Information:

Social Science Area

JCOM 306. Global Communications. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Requisites: Prereq: JCOM 201 or J 201.

Additional Information:

Cultural Literacy: Global Perspectives

JCOM 311. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 312. Media Studies Research Methods. 4 Credits.

This course provides the core skills necessary to critically evaluate scientific and analytic studies and conduct research in the media studies tradition. Students learn basic principles of media studies research methods, such as experiments, surveys, naturalistic observations, and interviews.

Requisites: Prereq: [JCOM 102, JCOM 103, JCOM 201, JCOM 202] or J201 and [JCOM 311 or J314].

JCOM 314. Understanding Disney. 4 Credits.

The course will explore the Walt Disney Company and its products using a variety of approaches and methodologies. It will consider different versions of Disney's history, present a political economic analysis of the Disney empire, and present textual analyses of Disney products, as well as discussing a wide array of audience responses.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 315. Indigenous Media. 4 Credits.

In this course, students will explore diverse forms of communication adopted by indigenous societies, with a specific focus on the rich tapestry of non-Western cultures. These societies are characterized by profound cultural connections to their territories and a profound influence from non-Western traditions.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 316. Black American Media. 4 Credits.

This class surveys the history of Black American's involvement in media production, representation, and reception since the late 19th century. Throughout the course, students will analyze media, including Black newspapers and magazines, films, television shows, music, etc.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 317. Media and Religion. 4 Credits.

Modernist views predict declining religious influence due to factors like rational-legal authority, science, technology, and modern institutions. This course challenges that "secularization theory" by examining how media tech promotes religion in today's world. To understand religion's role in politics and culture, we'll explore ideas from Durkheim and Weber, pioneers in religious studies. Discussions on religion, modernization, and secularization will follow, including an analysis of Bercovitch's "The Puritan Origins of the American Self" for insights into Christian roots in American culture.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 318. Documenting International Human Rights. 4 Credits.

This class, using close studies of the documentary films that have greatly influenced our understanding of human rights, will take up the advanced requirements of storytelling, tracing the parallel developments of an art that can reveal both horror and the progress toward real defenses against it—that can tell the truth but also distort it into lies. What are human rights and how can documentaries convey the realities of human experience—the worldwide crisis we are in—so that we can understand the situation of ourselves and others in our world?

Requisites: Prereq: JCOM 201 or J 201.

JCOM 319. Documenting Civil Rights. 4 Credits.

This class takes up one of the important topics for documentary film—what kind of impact does it have on cultural history? In this course students investigate a central issue for American history: Civil Rights. The course uses documentary cinema not just to help tell the stories with an added sense of realism and involvement, but also to demonstrate and critically understand the nature of interventions by documentary film into the ongoing, changing struggles and the people involved in them.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 320. Survey of the Documentary. 4 Credits.

This class will ground students in documentary film history and theory as art, journalism, and impactful statement. Documentary cinema is, as described, one of the greatest and most important mass media forms in society, media, and culture. Throughout the term, students will view, research, study, and write about Documentary as an essential part of media history and social history. For it is the documentary film that changed the cinema non-fiction documentary form itself and informed the world about every important event in history through that form.

JCOM 321. Documentary Filmmaking Aesthetics. 4 Credits.

This course is designed to understand and analyze the aesthetics of moving images, focusing on documentary film/video. The class will cover aesthetic fundamentals of image/framing and composition, light, color, sound, editing. It will provide students with an educated creative approach for solving creative problems, and giving their vision as filmmakers a significant form.

Requisites: Prereq: JCOM 220 or J 208.

JCOM 322. Documentary Screening and Guests. 4 Credits.

Doc Screening + Guests will screen, discuss, and analyze the current Academy of Motion Picture Arts and Sciences (Oscar) short listed feature and short documentaries and other films of merit. When possible, we will provide a “free” link to view it. We will be able to do close analysis of the films and discuss the visual style, editing approach, the writing and the producing, marketing, and distribution of the works.

Requisites: Prereq: [JCOM 101, JCOM 102, JCOM 103, JCOM 201, JCOM 202, JCOM 203, JCOM 311] or J 201.

JCOM 329H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

JCOM 330. Journalism and Democracy. 4 Credits.

Journalism and Democracy focuses on the journalistic process of producing work that is fair, accurate, and community-focused. This is a journalism class where no journalism is created. Instead, students will build a strong base regarding how to work in the public interest.

Requisites: Prereq: [JCOM 101 or J 100] and [JCOM 201 or J 201] and [JCOM 202 or J 211].

JCOM 331. Fundamentals of Reporting and Interviewing. 8 Credits.

Journalism requires four essential skills: research, interviewing, analysis and writing. This course provides students with the foundation to gain mastery of those skills.

Requisites: Prereq: [JCOM 101 or J 100] and [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 201 or J 201] and [JCOM 203 and JCOM 330 or J 212].

JCOM 332. Public Affairs Journalism. 4 Credits.

In this course, you will meet the real-world, professional demands of reporting publication-ready news in a timely, consequential and ethical way. You will broaden your reporting experiences, strengthen your news gathering skills and sharpen your proficiency with writing and revision. We will think critically about the role of community journalism and how your stories can have a meaningful impact.

Requisites: Prereq: JCOM 331 or J 361.

JCOM 333. Audiences. 4 Credits.

This course teaches students in the Reporting and Writing track of the Journalism major how to make news work for audiences. Students will learn how to understand one's current and potential audiences via digital metrics and listening, and grasp how to meet people where they are across various digital platforms, apps, services, and future possibilities. This course trains students to craft news in a multi-platform way with polish, professionalism, and ethical standards, and with maximum public engagement and impact in mind.

Requisites: Prereq: JCOM 331 or J 361.

JCOM 341. Audio Journalism I. 4 Credits.

This class will elevate the student's understanding of engaging audio narratives, technical skills for audio production, and professional competencies in real-world journalistic settings. It emphasizes the course's applicability to podcasting, radio journalism, and enhancing storytelling skills for a variety of media careers.

Requisites: Prereq: JCOM 331 or J 361.

JCOM 342. Video Journalism I. 4 Credits.

This course teaches professional on-camera video storytelling with an emphasis on journalism that is designed to work across multiple platforms, including social and mobile. It teaches students how to craft audio/video news stories and how to deliver them.

Requisites: Prereq: [JCOM 241 and JCOM 331] or J 361.

JCOM 343. Video Reporting II Live Broadcast. 4 Credits.

This course teaches students the basics of television newscast reporting, performance, and production. Students will work in a team environment and assume leadership roles necessary to produce a live weekly newscast, including anchor/host, reporter, producer, videographer, plus other technical production roles.

Requisites: Prereq: [JCOM 341 and JCOM 342] or J 331.

JCOM 345. Photojournalism I. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.

Requisites: Prereq: [(JCOM 102, JCOM 103, JCOM 202) or J 211] and [JCOM 203 or J 212].

JCOM 347. Social Media Journalism. 4 Credits.

This class grounds students to develop their understanding of social media's role as a leading source for news consumption, story gathering and distribution. By creating their own social media content and critiquing others' work, students will develop their digital skillsets and their ability to analyze journalistic content on different social media channels. In doing this, students will be equipped with the foundational social media skills and knowledge that are fundamental to their future success as journalists and communication professionals.

JCOM 348. Media Entrepreneurship. 4 Credits.

This class is designed to lay the foundational knowledge of media entrepreneurship, focusing on understanding, and addressing audience needs, pinpointing market gaps, and crafting a compelling media startup proposal. Over the term, students will delve into case studies of successful media startups, gaining insights into how these ventures identify their niche in the market and develop strategies for long-term sustainability. Through this practical exploration, the course equips students with the essential tools and frameworks needed to conceptualize and propose viable media business solutions.

JCOM 349. Project Management. 4 Credits.

This class offers a unique blend of project management principles and journalistic integrity, designed to equip students with the skills to lead impactful editorial projects. This course is pivotal for those looking to excel in the fast-paced media industry, teaching essential techniques for effective project execution and team leadership. Perfect for aspiring journalists and editors, it bridges academic learning with professional preparation, ensuring students are ready to manage innovative projects from the classroom to the newsroom.

JCOM 350. Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising industry specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends.

Requisites: Prereq: [JCOM 101 or J 100] and [JCOM 201 or J 201] and [JCOM 202 or J 211].

JCOM 351. Advertising and Culture. 4 Credits.

Introduces the concepts of cultural communication, empathy and respect for audiences, and building strategy that resonates with subcultures. The course emphasizes team collaboration, research skills, and practices of equity and inclusion in creative messaging.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212].

JCOM 352. Writing Design Concepts. 4 Credits.

The process of conceptual problem-solving for brand campaigns in traditional and emerging media. Emphasis: conceptual development of advertising writing, design, campaigns, and presentation of developed work. Critical feedback on creative work and portfolios is an essential part of the course.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 353. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 354. Understanding Brands. 4 Credits.

This course explores historical and cultural influences on good advertising and brands that define categories. Emphasis on creative leaders, brand categories, and creating advertising that adheres to best practices around cultural influence, collaboration, and critical feedback.

Requisites: Prereq: [JCOM 101, JCOM 102, JCOM 103, JCOM 201, JCOM 202, JCOM 203, JCOM 350] or J 342.

JCOM 355. Brand Responsibility. 4 Credits.

This course becomes an important component of career readiness for graduates entering the advertising industry. Emphasis on creating effective strategies for responsible brands and arming students with vital tools for creating and managing ethical work.

Requisites: Prereq: [JCOM 101, JCOM 102, JCOM 103, JCOM 201, JCOM 202, JCOM 203, JCOM 350] or J 342.

JCOM 356. Psychology of Advertising. 4 Credits.

This course provides an overview of psychology as it pertains to advertising particularly in the domain of persuasion, messaging, and more generally, marketing communications.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 357. Understanding Strategy. 4 Credits.

This course explores the broad discipline of strategy in advertising and strategic communication, considering the many types of professional strategic fields and what skills build a career in the industry. Emphasis is placed on understanding the wide range of careers as a strategist, the basic tenets of creative briefs, how to build strategic POV, and the process of strategic thinking that underlies good creative work.

Requisites: Prereq: [JCOM 101 or J 100] and [JCOM 201 or J 201] and [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212].

JCOM 358. Copywriting Craft. 4 Credits.

Emphasize strategy and creativity in advertising writing. The course explores approaches to craft in advertising to make award-winning and noteworthy work.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 359. Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies exploring brand management, agency organization, and relationship building in agencies.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 360. Advertising Creative Studio I. 4 Credits.

This course is a collaborative studio course emphasizing teamwork with strategists, writers, and art directors. Career readiness for creative teams is emphasized.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 361. Advertising Media Planning. 4 Credits.

Focus on building communications and media objectives via strategy and creative thinking to determine effective methods of reaching a designated target audience. Use of media measurement tools, industry trends analysis, media channel innovation.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 365. Introduction to Media Design. 4 Credits.

This course introduces students to theories and creative practice focusing on design for media content. Basic graphic design for print, digital, and video applications are explored, as well as professional tools for the creative industry.

Requisites: Prereq: [JCOM 101 or J 100] and [JCOM 201 or J 201] and [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212].

JCOM 366. Introduction to User Experience Design. 4 Credits.

This course emphasizes usability, accessibility, and overall user experience of a media product or service. User Experience Design focuses on user research, creating wireframes of potential solutions, and testing those solutions.

Requisites: Prereq: JCOM 365.

JCOM 370. Public Relations Fundamentals. 4 Credits.

This course offers an overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and ethical concerns.

JCOM 371. Writing for Influence. 4 Credits.

This writing-intensive class focuses on teaching students how to develop effective, strategic, theory-based content for multiple media platforms using journalistic style and storytelling. Students will learn proper methods of information gathering and how to write clearly and concisely, incorporating ethical media relations practices.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 370 or J 350].

JCOM 372. Writing for Digital Audiences. 4 Credits.

This is a writing-intensive lab that focuses on teaching students how to produce strategic content for various digital audiences using appropriate journalistic style. Students learn critical strategic skills intended to help them think, research, and write digital content like public relations professionals.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 370 or J 350].

JCOM 373. Advanced Media Relations. 4 Credits.

This class teaches students best practices in strategic media relations, and how to build quality relationships that will help practitioners get their organization's and client's news places in targeted news outlets. Students will enhance their ability to strategize, pitch, plan and deliver content on behalf of an organization; tailor communications based on audience and objective; and prepare "client-ready" materials.

Requisites: Prereq: JCOM 371 or J 352.

JCOM 374. Introduction to Sports Communication. 4 Credits.

This course provides an introduction to the rapidly growing sports domain of communication and the sports brand industry. It explores two areas of interest: communication of sport and communication through sport.

JCOM 380. The Games Industry. 4 Credits.

Covers the shape and structure of the global games industry—its producers, value chains, sales, and industrial logics—and its key critical questions

Requisites: Prereq: JCOM 280 or JCOM 311 or J 249.

JCOM 381. Theories of Play in Media and Communication. 4 Credits.

Explores play and its relationship to culture and media. Covers the role of play in history, psychology, game design, and modern media and internet cultures.

Requisites: Prereq: JCOM 280 or JCOM 311 or J 249.

JCOM 382. Game Design and Critique. 4 Credits.

Guides students through the elements, steps, and processes of creating a game to cultivate in-depth knowledge of design and game development.

Requisites: Prereq: JCOM 280 or JCOM 311 or J 249.

JCOM 383. Understanding E-Sports. 4 Credits.

Explores and analyzes esports, (organized competitive video gaming,) addressing key issues around players and teams, business structures and management, diversity and inclusion, and media and communication.

JCOM 385. Science of Science Communication. 4 Credits.

This class is designed to introduce students to the theoretical foundations of science communication as a discipline. The class will provide an overview of the theoretical landscape, with an understanding of how the discipline of science communication has largely moved from deficit to dialogue in the past 30 years. Students will spend the majority of their time in this course exploring the different models of science communication, when and why they work, and how we know they work.

JCOM 399. Special Studies: [Topic]. 1-8 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 399L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 400M. Temporary Multilisted Course. 4 Credits.

A single course that is listed under more than one subject code, which may be offered once without formal approval.

Repeatable 99 times

JCOM 401. Research: [Topic]. 1-9 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

JCOM 403. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

JCOM 404. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 8 times for a maximum of 9 credits

JCOM 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

JCOM 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

JCOM 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

JCOM 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

JCOM 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

JCOM 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry, examining key moments in the development of Hollywood, including the consolidation and restructuring of the major movie studios, the film industry's relationship to TV and the Internet. Journalism Majors and MEST minor. Multilisted with CINE 411M.

Requisites: Prereq: JCOM 201 or J 201.

Equivalent to: CINE 411M

JCOM 412. Internet Law and Regulation. 4 Credits.

This is a survey course on Internet Law and Regulation. It is designed to ground students in a variety of internet-related laws and policies they will likely confront in their professional careers and personal lives, including an overview of the legal and regulatory frameworks governing communication and commercial activities conducted via the internet and explorations into topics such as online platforms, free speech online, privacy and surveillance, electronic contracts, domain names, copyrights, trademarks, and computer crime.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 413. Data, Media, Surveillance. 4 Credits.

Data/Media/Surveillance is a discussion-intensive and project-based course designed to expose students to a range of issues at the intersections of data, information, media, and surveillance in society and culture. Students will develop the analytical tools to explore (through conducting research and/or producing creative projects and developing normative arguments) how surveillance, commercial and government data processing practices, and media platforms and technologies are at play in our modern world.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 414. Media Technologies and Structures: [Topic]. 4 Credits.

Examine how emerging communication technologies and contemporary media shape and produce new forms of social organization, behavior, and cultural production. Explore how media infrastructures and regulatory environments influence discourse, democracy, and public life.

Requisites: Prereq: JCOM 201 or J 201.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 415. Culture, Power, Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Requisites: Prereq: JCOM 201 or J 201.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 416. Black American Television. 4 Credits.

This upper-level course explores the social, cultural, political, and industrial conditions that contextualize Black Americans' presence in U.S. television both on-screen and behind the scenes from the 1950s to the present. Students will discuss research and television criticism and watch and analyze television episodes using an intersectional framework. The course culminates in an original research paper where students showcase their knowledge of the varied conditions that shaped the production of one television show and offer an engaged analysis of the shows' representations of Black Americans.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 417. Cross Cultural Monster Narratives. 4 Credits.

This course explores the cross-cultural narratives surrounding dominant monster archetypes. To identify the similarities and differences between monster stories and traditions, students will consider how each unit's monster has been embraced, remixed, or subverted by different groups through different media at different moments in time, with a particular focus on the dynamics of race, gender, sex, and power that manifest through/as the monster.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 418. Global Television. 4 Credits.

This class will introduce television content from various parts of the globe – Asia, Africa, Europe and the Middle East to demonstrate how social and political conditions shape the formation of popular culture. Throughout the term, students will analyze specific shows from each region to come to a better understanding of global television as a whole.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 419. Reality Television. 4 Credits.

This course focuses on a popular television genre – reality television – and uses it as a means to explore key issues in contemporary culture and society.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 420. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments. Sequence with JCOM 421, JCOM 422.

Requisites: Prereq: JCOM 220 or J 208.

JCOM 421. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue. Sequence with JCOM 420, JCOM 422.

Requisites: Prereq: JCOM 420.

JCOM 422. Documentary Post-Production. 4 Credits.

Trains students to edit and do post-production work on their documentary film projects. Sequence with JCOM 421, JCOM 422.

Requisites: Prereq: JCOM 421 or J 421.

JCOM 424. Latin American Cinema. 4 Credits.

This is a survey course, exploring the film industry of various regions of Latin America (North, Central and South America, including the Caribbean). The course will expose students to classic and contemporary films, including Latin American Golden Age cinema, cinema movements like Brazilian Cinema Novo, the militant film era of the 1960s through 1980s, and films created for global distribution at the end of the 20th century to the present.

Requisites: Prereq: JCOM 201 or J 201.

JCOM 426. Media Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Requisites: Prereq: [JCOM 311 or J 314] and [JCOM 312 or J 415].

JCOM 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M. Sequence with JCOM 428M. Offered alternate years.

Equivalent to: ANTH 427M

JCOM 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M. Sequence with JCOM 427M. Offered alternate years.

Requisites: Prereq: ANTH 427M or JCOM 427M.

Equivalent to: ANTH 428M

JCOM 429H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications. Acceptance into School of Journalism and Communication honors program required for enrollment.

Repeatable 1 time for a maximum of 8 credits when topic changes

JCOM 430. In-Depth Reporting: [Topic]. 4 Credits.

In-Depth Reporting courses offer experience in deeper exploration of timely themes important to the journalist.

Requisites: Prereq: JCOM 333 or J 361.

JCOM 431. Data Journalism. 4 Credits.

This course underscores and advances the power to identify, locate, obtain and analyze data is central to journalism's public service role and the capacity of journalism to engage a wider audience.

Requisites: Prereq: JCOM 333 or J 361.

JCOM 432. Solutions Journalism. 4 Credits.

What is the role of journalism and the journalist in a democratic society? It's a provocative question at a time when the journalism field is taking a hard look at how best to incorporate its past into its future. This course seeks to answer this by doing journalism that includes offering well-researched solution possibilities to social problems.

Requisites: Prereq: JCOM 333 or J 361.

JCOM 433. Catalyst Journalism. 4 Credits.

This course teaches a pioneering approach to journalism developed here at the SOJC, one that seeks impact by combining investigative reporting with solutions journalism, an emerging evidence-based reporting strategy that highlights social progress and innovation.

Requisites: Prereq: JCOM 333 or J 361.

JCOM 434. Investigative Journalism. 4 Credits.

This class challenges students to do the important work through thorough investigative journalism using in-depth interviews, public records, and mastery of story. Students are expected to publish their vetted work at the end of the term.

Requisites: Prereq: JCOM 333 or J 361.

JCOM 435. Profiles and Narrative. 4 Credits.

This course provides you with the essential skills, methods and mindset to produce compelling narratives and in-depth, insightful profiles that will engage with compelling stories about the human experience.

Requisites: Prereq: JCOM 331 or J 361.

JCOM 436. Magazine Production: [Topic]. 4 Credits.

In JCOM 436, Topics in Magazine, you will use skills developed in other journalism courses, such as interviewing, reporting and photography, to produce feature stories of the highest quality so that they can be published in print and digitally. Your work will tell the stories of individuals and issues relevant to local and regional audiences.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 438. Science Story. 4 Credits.

This class will ground students in a systematic and rigorous pitching, reporting, and editing process to create work for professional publication. Students work independently and collaboratively to create a publication and develop advanced portfolio work. Throughout, students will constantly justify their decisions based on how to best present environmental, scientific, and policy information in ways that are accurate, clear and accessible to a general audience.

Repeatable 1 time for a maximum of 8 credits

JCOM 439. Sports Story. 4 Credits.

This class will instruct students in the fundamentals of sports reporting, including how to interview athletes and sports executives; cover sporting events; and develop sourcing for investigative and enterprise sports feature writing. Students will attend live events, honing their skills as breaking news reporters. They will also work on longer-form pieces that will allow them to practice skills in profile, narrative, trend and enterprise reporting.

Requisites: Prereq: JCOM 333 or J 361.

Repeatable 3 times for a maximum of 16 credits

JCOM 441. Audio Journalism II Narrative and Podcasting Capstone. 4 Credits.

This class will enhance students' scriptwriting and narrative structuring skills, manage complex audio projects, understand podcast monetization, and master performance and sound design. They will also innovate in audio storytelling formats and gain expertise in producing QA style podcasts. Assignments include developing a multi-episode podcast or documentary, creating a chatcast, and devising a business and advertising plan for a podcast series, focusing on narrative impact, technical proficiency, and market viability.

Requisites: Prereq: JCOM 341 or J 361.

JCOM 442. Video Journalism III Broadcast Capstone. 4 Credits.

Students will work as a team to produce a live broadcast each week and master what it takes to be a professional broadcaster. Students will also build a portfolio. Shows will be varied in type (including but not limited to traditional newscast, sportscast, morning show, longform news magazine) so that students have a wide-ranging experience base.

Requisites: Prereq: JCOM 343 or J 432.

JCOM 445. Photojournalism II Photo Story. 4 Credits.

Photojournalism II Photo Story, you will develop the skills to tell complex stories using the still image, using the framework of best journalistic practices. The course emphasizes photo skills to tell compelling stories found in the community.

Requisites: Prereq: JCOM 345 or J 365.

JCOM 446. Photojournalism III Multimedia Storytelling. 4 Credits.

A hands-on class in audio and video storytelling that will expand the toolkit and mastery of photojournalism students.

Requisites: Prereq: JCOM 345 or J 365.

JCOM 448. Visual Production: [Topic]. 4 Credits.

This topics course offers revolving and timely themes in photojournalism, photography, and visual production. Courses will build mastery skills and portfolio-driven projects.

Requisites: Prereq: JCOM 345 or J 365.

Repeatable 2 times for a maximum of 12 credits when topic changes

JCOM 454. Digital Ads and Analytics. 4 Credits.

Introduces students to the dynamic world of digital metrics and analytics, emphasizing its significance within the advertising industry.

Requisites: Prereq: [JCOM 101 or J 100] and [JCOM 201 or J 201] and [JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 455. Brand Strategy. 4 Credits.

This course emphasizes the importance and challenge of compelling creative brand strategy, including how strategy impacts creative work, internal agency partnerships, and, importantly, business success.

Requisites: Prereq: JCOM 311 or JCOM 330 or JCOM 350 or JCOM 370 or J 342.

JCOM 456. Brands and Sustainability. 4 Credits.

This course explores the positioning and actionable strategies for building and maintaining sustainable brands.

Requisites: Prereq: [JCOM 101 or J 100] and [JCOM 201 or J 201] and [JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

JCOM 457. Sports Brand Strategy. 4 Credits.

Bridges concepts of business and creative strategy to understand the process of building compelling brands in the context of sport. Representing a multi-billion-dollar industry, sport provides a unique platform to study how strong brands are developed, positioned, and brought to life in creative ways.

Requisites: Prereq: JCOM 311 or JCOM 330 or JCOM 350 or JCOM 370 or J 342.

JCOM 459. Advertising Trends: [Topic]. 4 Credits.

This course is a topics course exploring trends and timely themes regarding advertising and the creative industry.

Requisites: Prereq: [JCOM 102 and JCOM 103 and JCOM 202 or J 211] and [JCOM 203 or J 212] and [JCOM 350 or J 342].

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 461. Advertising Campaigns. 4 Credits.

Seniors work in teams to produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. The collaborative teamwork is based on expertise and practice in industry. Journalism: advertising majors only.

Requisites: Prereq: Recommended - JCOM 350; two courses from JCOM 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361; two courses from JCOM 454, 455, 456, 457, 458, 459, 460; one course from either list.

JCOM 462. National Student Advertising Competition Campaigns. 5 Credits.

Dedicated teamwork focusing on the annual American Advertising Federation National Student Advertising Competition (NSAC). Entrance is by portfolio and interview application. Students work a full year on the competition and resulting campaign book. This course is the focal point of that work.

JCOM 465. Art Direction and Design Studio. 4 Credits.

This course emphasizes the professional act of designing media content for audience understanding and best experience. It requires advanced students to consider themselves communicators rather than decorators.

Requisites: Prereq: JCOM 365 or J 342.

JCOM 468. Web and Digital Design. 4 Credits.

This course focuses on the designer's role in developing interesting and accessible website design.

Requisites: Prereq: JCOM 365 or J 342.

JCOM 470. Strategic Communications Research Methods. 4 Credits.

This course is designed to provide you with an understanding of common research methods used in public relations and advertising when developing, implementing, and evaluating a strategic campaign. The class emphasizes real world applications.

Requisites: Prereq: JCOM 311 or JCOM 330 or JCOM 350 or JCOM 370 or J 342 or J 350.

JCOM 471. The Public Relations Planning Process. 4 Credits.

In this course, students will learn public relations campaign planning and administration, crisis communication and issues management, applied research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. While students do not execute a campaign in this class, it equips them with the process to be able to execute effectively in the capstone PR Campaigns class (JCOM 472).

Requisites: Prereq: JCOM 371 or J 352.

JCOM 472. Public Relations Campaigns. 4 Credits.

Public Relations Campaigns is the capstone course in the sequence of instruction offered in public relations. It provides students with an opportunity to apply the fundamentals of what they have learned over their course of study to actual client work and business problems. The course is designed to build professional experience and prepare you for the world that awaits you after graduation.

Requisites: Prereq: [JCOM 372 or J 452] and [JCOM 471 or J 453] and [JCOM 470 or J 494].

JCOM 473. Public Relations Strategies: [Topic]. 4 Credits.

This 4-credit course will cover various topics in public relations, and topics will rotate based on faculty expertise. Students can expect to engage in discussions and assignments about current Public Relations trends, career preparation, and Public Relations case studies. Example topics include professional development, strategic health communication, and strategic non-profit communication.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 474. Crisis Communication. 4 Credits.

Covers crisis planning, communications and issues management with an emphasis on real-world application and case study analysis of sudden events and crisis. Classes will include lecture, online and in-class discussion and student presentations. Students will also participate in media training for crisis situations and a real-time online scenario.

JCOM 475. New Technology and Public Relations. 4 Credits.

New and emerging technology for Public Relations and communications professionals provides an overview of the latest technologies communicators are using to reach their audiences. Participants will have the opportunity to experience and study PR use cases for Augmented Reality (AR), Virtual Reality (VR), Extended Reality (XR), Mixed Reality (MR) and Artificial Intelligence (AI).

JCOM 476. Social Media Strategies. 4 Credits.

This course focuses on social media research, analysis and planning. It is designed to build on students' existing foundation of the "how to" of specific tools (how to publish content) and to help students understand the why and when of social media for the purpose of building relationships and creating conversations with stakeholders and key audiences. This is accomplished through a focus on external and internal research, culminating in a strategic social plan for a client organization.

JCOM 477. Sports Public Relations. 4 Credits.

Provides students with an overview of the rapidly developing sport industry from a public relations and strategic communications perspective.

JCOM 478. Sustainability Public Relations. 4 Credits.

All future communication positions will involve sustainability-related activities, tasks, and challenges. In this course, we will discuss fundamental sustainability concepts and perspectives necessary to understand to effectively engage in sustainability communication and to help facilitating and communicating sustainability transformations.

JCOM 480. Gamification and the Media. 4 Credits.

Studies gamification (the use of game elements in non-game contexts) to help students analyze, critique, and make use of game elements in their own media production.

Requisites: Prereq: JCOM 280 or JCOM 311 or J 249.

JCOM 481. Making the Virtual a Reality. 4 Credits.

Introduces students to immersive media's rich foundational scholarship and arms students with theoretical and practical tools to assess trends like platformization, digital surveillance and algorithmic bias.

Requisites: Prereq: One from JCOM 280, JCOM 311, J 201, J 249.

JCOM 482. Analog Games. 4 Credits.

Analyzes analog games through genre-based modules (e.g., cards, dice, board games, etc.) that evaluate key issues in game history, mechanics and design, and social impacts.

Requisites: Prereq: One from JCOM 280, JCOM 311, J 249.

JCOM 485. Science Communication and Decision Making. 4 Credits.

This course explores the specific areas of research that inform strategic communication to the public about science, health, and the environment and the public's engagement with those fields. Building on readings in areas such as decision science, numeracy, and health and environmental communication, students will be asked to think carefully about decisions and judgments that they and others make, and how strategic communication can harness decision making so that complex science is useful in improving individual and societal well-being for a variety of audiences.

JCOM 486. Environmental Communication Strategies. 4 Credits.

Environmental Communication Strategies explores how public relations and advertising have played a role in the public understanding of major environmental issues. In addition, a portion of this course will be focused on interpersonal communication and developing approaches to constructive climate conversations.

JCOM 487. Eco and Social Justice Communication. 4 Credits.

This class is designed to introduce students to environmental justice and social change communications. Students will spend time understanding how environmental and social justice has been communicated and strategies for achieving a more justice-oriented world through improved and accessible communications. Students will learn to evaluate environmental justice communication strategies and develop their own communications for various media platforms.

JCOM 503. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

JCOM 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

JCOM 508. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

JCOM 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

JCOM 512. Internet Law and Regulation. 4 Credits.

This is a survey course on Internet Law and Regulation. It is designed to ground students in a variety of internet-related laws and policies they will likely confront in their professional careers and personal lives, including an overview of the legal and regulatory frameworks governing communication and commercial activities conducted via the internet and explorations into topics such as online platforms, free speech online, privacy and surveillance, electronic contracts, domain names, copyrights, trademarks, and computer crime.

JCOM 513. Data, Media, Surveillance. 4 Credits.

Data/Media/Surveillance is a discussion-intensive and project-based course designed to expose students to a range of issues at the intersections of data, information, media, and surveillance in society and culture. Students will develop the analytical tools to explore (through conducting research and/or producing creative projects and developing normative arguments) how surveillance, commercial and government data processing practices, and media platforms and technologies are at play in our modern world.

JCOM 514. Media Technologies and Structures: [Topic]. 4 Credits.

Examine how emerging communication technologies and contemporary media shape and produce new forms of social organization, behavior, and cultural production. Explore how media infrastructures and regulatory environments influence discourse, democracy, and public life.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 515. Culture, Power, Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 517. Cross Cultural Monster Narratives. 4 Credits.

This course explores the cross-cultural narratives surrounding dominant monster archetypes. To identify the similarities and differences between monster stories and traditions, students will consider how each unit's monster has been embraced, remixed, or subverted by different groups through different media at different moments in time, with a particular focus on the dynamics of race, gender, sex, and power that manifest through/as the monster.

JCOM 518. Global Television. 4 Credits.

This class will introduce television content from various parts of the globe – Asia, Africa, Europe and the Middle East to demonstrate how social and political conditions shape the formation of popular culture. Throughout the term, students will analyze specific shows from each region to come to a better understanding of global television as a whole.

JCOM 519. Reality Television. 4 Credits.

This course focuses on a popular television genre – reality television – and uses it as a means to explore key issues in contemporary culture and society.

JCOM 520. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

JCOM 521. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

Requisites: Prereq: JCOM 520.

JCOM 522. Documentary Post-Production. 4 Credits.

Trains students to edit and do post-production work on their documentary film projects.

Requisites: Prereq: JCOM 521 or J 521.

JCOM 524. Latin American Cinema. 4 Credits.

This is a survey course, exploring the film industry of various regions of Latin America (North, Central and South America, including the Caribbean). The course will expose students to classic and contemporary films, including Latin American Golden Age cinema, cinema movements like Brazilian Cinema Novo, the militant film era of the 1960s through 1980s, and films created for global distribution at the end of the 20th century to the present.

JCOM 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 527M. Sequence with JCOM 528M. Offered alternate years.

JCOM 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 528M. Sequence with JCOM 527M. Offered alternate years.

Requisites: Prereq: ANTH 527M or JCOM 527M.

JCOM 530. In-Depth Reporting: [Topic]. 4 Credits.

In-Depth Reporting courses offer experience in deeper exploration of timely themes important to the journalist.

JCOM 531. Data Journalism. 4 Credits.

This course underscores and advances the power to identify, locate, obtain and analyze data is central to journalism's public service role and the capacity of journalism to engage a wider audience.

JCOM 532. Solutions Journalism. 4 Credits.

What is the role of journalism and the journalist in a democratic society? It's a provocative question at a time when the journalism field is taking a hard look at how best to incorporate its past into its future. This course seeks to answer this by doing journalism that includes offering well-researched solution possibilities to social problems.

JCOM 533. Catalyst Journalism. 4 Credits.

This course teaches a pioneering approach to journalism developed here at the SOJC, one that seeks impact by combining investigative reporting with solutions journalism, an emerging evidence-based reporting strategy that highlights social progress and innovation.

JCOM 534. Investigative Journalism. 4 Credits.

This class challenges students to do the important work through thorough investigative journalism using in-depth interviews, public records, and mastery of story. Students are expected to publish their vetted work at the end of the term.

JCOM 535. Profiles and Narrative. 4 Credits.

This course provides you with the essential skills, methods and mindset to produce compelling narratives and in-depth, insightful profiles that will engage with compelling stories about the human experience.

JCOM 536. Magazine Production: [Topic]. 4 Credits.

In JCOM 436, Topics in Magazine, you will use skills developed in other journalism courses, such as interviewing, reporting and photography, to produce feature stories of the highest quality so that they can be published in print and digitally. Your work will tell the stories of individuals and issues relevant to local and regional audiences.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 538. Science Story. 4 Credits.

This class will ground students in a systematic and rigorous pitching, reporting, and editing process to create work for professional publication. Students work independently and collaboratively to create a publication and develop advanced portfolio work. Throughout, students will constantly justify their decisions based on how to best present environmental, scientific, and policy information in ways that are accurate, clear and accessible to a general audience.

Repeatable 1 time for a maximum of 8 credits

JCOM 539. Sports Story. 4 Credits.

This class will instruct students in the fundamentals of sports reporting, including how to interview athletes and sports executives; cover sporting events; and develop sourcing for investigative and enterprise sports feature writing. Students will attend live events, honing their skills as breaking news reporters. They will also work on longer-form pieces that will allow them to practice skills in profile, narrative, trend and enterprise reporting. Repeatable three times for a maximum of 16 credits.

Repeatable 3 times for a maximum of 16 credits

JCOM 541. Audio Journalism II Narrative and Podcasting Capstone. 4 Credits.

This class will enhance students' scriptwriting and narrative structuring skills, manage complex audio projects, understand podcast monetization, and master performance and sound design. They will also innovate in audio storytelling formats and gain expertise in producing QA style podcasts. Assignments include developing a multi-episode podcast or documentary, creating a chatcast, and devising a business and advertising plan for a podcast series, focusing on narrative impact, technical proficiency, and market viability.

JCOM 542. Video Journalism III Broadcast Capstone. 4 Credits.

Students will work as a team to produce a live broadcast each week and master what it takes to be a professional broadcaster. Students will also build a portfolio. Shows will be varied in type (including but not limited to traditional newscast, sportscast, morning show, longform news magazine) so that students have a wide-ranging experience base.

JCOM 545. Photojournalism II Photo Story. 4 Credits.

Photojournalism II Photo Story, you will develop the skills to tell complex stories using the still image, using the framework of best journalistic practices. The course emphasizes photo skills to tell compelling stories found in the community.

JCOM 546. Photojournalism III Multimedia Storytelling. 4 Credits.

A hands-on class in audio and video storytelling that will expand the toolkit and mastery of photojournalism students.

JCOM 548. Visual Production: [Topic]. 4 Credits.

This topics course offers revolving and timely themes in photojournalism, photography, and visual production. Courses will build mastery skills and portfolio-driven projects.

Repeatable 2 times for a maximum of 12 credits when topic changes

JCOM 554. Digital Ads and Analytics. 4 Credits.

Introduces students to the dynamic world of digital metrics and analytics, emphasizing its significance within the advertising industry.

JCOM 555. Brand Strategy. 4 Credits.

This course emphasizes the importance and challenge of compelling creative brand strategy, including how strategy impacts creative work, internal agency partnerships, and, importantly, business success.

JCOM 556. Brands and Sustainability. 4 Credits.

This course explores the positioning and actionable strategies for building and maintaining sustainable brands.

JCOM 557. Sports Brand Strategy. 4 Credits.

Bridges concepts of business and creative strategy to understand the process of building compelling brands in the context of sport. Representing a multi-billion-dollar industry, sport provides a unique platform to study how strong brands are developed, positioned, and brought to life in creative ways.

JCOM 559. Advertising Trends: [Topic]. 4 Credits.

This course is a topics course exploring trends and timely themes regarding advertising and the creative industry.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 561. Advertising Campaigns. 4 Credits.

Seniors work in teams to produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. The collaborative teamwork is based on expertise and practice in industry. Journalism: advertising majors only.

JCOM 562. National Student Advertising Competition Campaigns. 5 Credits.

Dedicated teamwork focusing on the annual American Advertising Federation National Student Advertising Competition (NSAC). Entrance is by portfolio and interview application. Students work a full year on the competition and resulting campaign book. This course is the focal point of that work.

JCOM 565. Art Direction and Design Studio. 4 Credits.

This course emphasizes the professional act of designing media content for audience understanding and best experience. It requires advanced students to consider themselves communicators rather than decorators.

JCOM 568. Web and Digital Design. 4 Credits.

This course focuses on the designer's role in developing interesting and accessible website design.

JCOM 570. Strategic Communications Research Methods. 4 Credits.

This course is designed to provide you with an understanding of common research methods used in public relations and advertising when developing, implementing, and evaluating a strategic campaign. The class emphasizes real world applications.

JCOM 571. The Public Relations Planning Process. 4 Credits.

In this course, students will learn public relations campaign planning and administration, crisis communication and issues management, applied research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. While students do not execute a campaign in this class, it equips them with the process to be able to execute effectively in the capstone PR Campaigns class (JCOM 572).

JCOM 572. Public Relations Campaigns. 4 Credits.

Public Relations Campaigns is the capstone course in the sequence of instruction offered in public relations. It provides students with an opportunity to apply the fundamentals of what they have learned over their course of study to actual client work and business problems. The course is designed to build professional experience and prepare you for the world that awaits you after graduation.

JCOM 573. Public Relations Strategies: [Topic]. 4 Credits.

This 4-credit course will cover various topics in public relations, and topics will rotate based on faculty expertise. Students can expect to engage in discussions and assignments about current Public Relations trends, career preparation, and Public Relations case studies. Example topics include professional development, strategic health communication, and strategic non-profit communication.

Repeatable 3 times for a maximum of 16 credits when topic changes

JCOM 574. Crisis Communication. 4 Credits.

Covers crisis planning, communications and issues management with an emphasis on real-world application and case study analysis of sudden events and crisis. Classes will include lecture, online and in-class discussion and student presentations. Students will also participate in media training for crisis situations and a real-time online scenario.

JCOM 575. New Technology and Public Relations. 4 Credits.

New and emerging technology for Public Relations and communications professionals provides an overview of the latest technologies communicators are using to reach their audiences. Participants will have the opportunity to experience and study PR use cases for Augmented Reality (AR), Virtual Reality (VR), Extended Reality (XR), Mixed Reality (MR) and Artificial Intelligence (AI).

JCOM 576. Social Media Strategies. 4 Credits.

This course focuses on social media research, analysis and planning. It is designed to build on students' existing foundation of the "how to" of specifics tools (how to publish content) and to help students understand the why and when of social media for the purpose of building relationships and creating conversations with stakeholders and key audiences. This is accomplished through a focus on external and internal research, culminating in a strategic social plan for a client organization.

JCOM 577. Sports Public Relations. 4 Credits.

Provides students with an overview of the rapidly developing sport industry from a public relations and strategic communications perspective.

JCOM 578. Sustainability Public Relations. 4 Credits.

All future communication positions will involve sustainability-related activities, tasks, and challenges. In this course, we will discuss fundamental sustainability concepts and perspectives necessary to understand to effectively engage in sustainability communication and to help facilitating and communicating sustainability transformations.

JCOM 580. Gamification and the Media. 4 Credits.

Studies gamification (the use of game elements in non-game contexts) to help students analyze, critique, and make use of game elements in their own media production.

JCOM 581. Making the Virtual a Reality. 4 Credits.

Introduces students to immersive media's rich foundational scholarship and arms students with theoretical and practical tools to assess trends like platformization, digital surveillance and algorithmic bias.

JCOM 582. Analog Games. 4 Credits.

Analyzes analog games through genre-based modules (e.g., cards, dice, board games, etc.) that evaluate key issues in game history, mechanics and design, and social impacts.

JCOM 585. Science Communication and Decision Making. 4 Credits.

This course explores the specific areas of research that inform strategic communication to the public about science, health, and the environment and the public's engagement with those fields. Building on readings in areas such as decision science, numeracy, and health and environmental communication, students will be asked to think carefully about decisions and judgments that they and others make, and how strategic communication can harness decision making so that complex science is useful in improving individual and societal well-being for a variety of audiences.

JCOM 586. Environmental Communication Strategies. 4 Credits.

Environmental Communication Strategies explores how public relations and advertising have played a role in the public understanding of major environmental issues. In addition, a portion of this course will be focused on interpersonal communication and developing approaches to constructive climate conversations.

JCOM 587. Eco and Social Justice Communication. 4 Credits.

This class is designed to introduce students to environmental justice and social change communications. Students will spend time understanding how environmental and social justice has been communicated and strategies for achieving a more justice-oriented world through improved and accessible communications. Students will learn to evaluate environmental justice communication strategies and develop their own communications for various media platforms.

JCOM 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 15 times for a maximum of 16 credits

JCOM 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

JCOM 604. Internship: [Topic]. 1-6 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 3 times for a maximum of 12 credits

JCOM 605. Reading and Conference. 1-12 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

JCOM 606. Practicum: [Topic]. 1-6 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 15 times for a maximum of 16 credits

JCOM 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

JCOM 608. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 15 times for a maximum of 16 credits

JCOM 609. Terminal Project. 1-6 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 5 times for a maximum of 6 credits

JCOM 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

JCOM 611. Media and Society. 4 Credits.

Overview of the features of the contemporary media environment, its historical development, and the impacts of media on culture and society.

JCOM 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with JCOM 613, JCOM 614.

JCOM 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with JCOM 612, JCOM 614.

Requisites: Prereq: JCOM 612.

JCOM 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Sequence with JCOM 612, JCOM 613.

Requisites: Prereq: JCOM 613.

JCOM 615. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

JCOM 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

JCOM 617. Communication Theory and Practice: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory.

Repeatable 4 times for a maximum of 20 credits

JCOM 618. Strategic Communication Leadership. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

JCOM 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

JCOM 622. Campaign Planning and Management. 4 Credits.

Explores strategic tools and creativity to develop effective communications campaigns that address real-world challenges. Sequence with JCOM 623.

JCOM 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns, culminating with student teams focused on a client project. Sequence with JCOM 622.

JCOM 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility.

Repeatable 5 times for a maximum of 12 credits when topic changes

JCOM 625. Finance for Strategic Communication. 2 Credits.

This course focuses on the core basics of the Income Statement for professionals working in public relations, advertising, marketing, corporate communication or other related fields.

JCOM 627. Video Production I. 2 Credits.

This is an introductory video storytelling course for incoming Multimedia Journalism master's students who enter the program with little or no hands-on video production experience. This course will serve as a foundation of theory and technique, with an emphasis on the technical aspects of video production and editing. Production techniques will be introduced through a series of content production exercises. We will also explore video production through the examination of outstanding web-based media. We will learn the vocabulary specific to multimedia production that we will incorporate into class discussions and written analysis.

JCOM 628. Video Production II. 2 Credits.

This is the video production course for incoming Multimedia Journalism master's students. Students learn basics in telling a cohesive visual story that combines interview with storytelling cinema vérité footage (B-roll).

JCOM 629. Media and Communication Ethics: [Topic]. 4 Credits.

This course explores ethical issues facing media workers and media users in culture and society today. Topics may include digital ethics, strategic communication ethics, visual ethics and global media ethics.

Repeatable 1 time for a maximum of 8 credits

JCOM 630. Multimedia Production: [Topic]. 2 Credits.

2-credit technical workshops that focus on foundational, up-to-date multimedia production skills. Examples include: video production, audio production, still photography, studio lighting, animation, drone cinematography. Each workshop typically includes lessons in related software such as Adobe Premiere, Audition, After Effects, Photoshop and DaVinci Resolve.

Repeatable 4 times for a maximum of 10 credits when topic changes

JCOM 631. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

JCOM 632. Story Production. 4 Credits.

Building upon the lessons from Thinking Story and Video II, students refine production skills, elevate their storytelling, and enhance their proficiency working with the visual language. Students strive to create a short documentary video project worthy of inclusion in their professional portfolio. Distribution and approaches to social media are also covered.

Requisites: Prereq: JCOM 628, JCOM 635.

JCOM 633. Storytelling Capstone. 4 Credits.

This is the capstone project class for the Multimedia Journalism program. Students work collaboratively to create a high-impact project that combines lessons from Thinking Story, Community Listening and all previous production courses.

JCOM 634. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, co-designing processes and solutions to keep them engaged.

JCOM 635. Thinking Story. 4 Credits.

Recognize and use fundamental approaches to narrative storytelling to create dynamic and engaging multimedia projects.

JCOM 636. Pitching and Treatment. 2 Credits.

This 5-week workshop is designed to help students successfully launch their Terminal Project. Drawing on story research skills from previous classes, students learn how to create professional pitch decks, treatments and budgets in order to market their projects. These tools are applicable for terminal projects involving documentary video, podcasting, books, articles, photography or Virtual Reality.

Requisites: Prereq: JCOM 632, JCOM 656.

JCOM 637. Community Listening. 2 Credits.

This interdisciplinary course invites students to delve into community listening as a foundational approach to effective storytelling, journalism, and public engagement. The course emphasizes the importance of values, ethics, and participatory methods in creating and disseminating community narratives. Students will learn to apply these principles to enhance public engagement, foster community trust, and support local civic information ecosystems through empathetic listening and inclusive storytelling.

JCOM 638. Community Voices. 4 Credits.

"Community Voices: Harnessing Local Stories into a Podcast" is a four-credit course where students learn to listen deeply, facilitate meaningful community discussions, and create a participatory-based audio episode. The course focuses on developing skills in community listening, understanding diverse perspectives, and fostering dialogues that build trust and civic cohesion. By the end of the course, students will produce a podcast story that embodies the voices and stories of the community they engage with.

JCOM 639. Foundations of Explanatory Video Journalism. 4 Credits.

Students explore and practice concepts in visual explanation and explanatory video.

JCOM 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods, including traditional historical inquiry, oral history, ethnography, and participant observation.

JCOM 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

JCOM 643. Advanced Doctoral Research. 5 Credits.

This course prepares students to develop, write, and propose research, with attention to integrating theory and method in the preparation of a dissertation proposal for the Communication and Media Studies Doctoral Program.

Requisites: Prereq: JCOM 641, JCOM 642.

JCOM 644. Philosophy of Communication. 4 Credits.

Explores the philosophical foundations of communication in the United States, including political philosophies that range from Milton to McLuhan.

JCOM 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

JCOM 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

JCOM 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

JCOM 651. Fundamentals of Reporting and Writing. 8 Credits.

Journalism requires strong writing, and strong writing begins with strong reporting. This is the foundational class for success in the Journalism Master's Program. This class is designed to teach the fundamental skills required to be a journalist: research, interviewing, analysis and writing and will provide the foundation for success in the Journalism Master's program. An intensive boot-camp experience that will immediately immerse you in the world of journalism. Very much a hands-on experience, students will practice the skills they learn and discuss in class including interviewing, writing and rewriting.

JCOM 652. Multimedia Fundamentals. 4 Credits.

Journalism requires skills beyond writing. This class will give students basic skills in audio, photography and video reporting through lectures and hands-on assignments. This is a foundational class for success in the Journalism Master's Program. An intensive boot-camp experience that will provide you with a basic understanding of skills beyond writing. You will learn to tell stories using tools beyond the written word and gain a basic understanding of video and audio production.

JCOM 653. Public Affairs Journalism. 4 Credits.

This course will elevate the quality of your journalism by broadening your reporting experiences, strengthening your news-gathering skills and giving you tools to sharpen your writing. In this course, you will pursue journalism's ideal of public service while meeting the real-world demands of reporting timely, consequential and ethical stories. You'll tackle issues in our community beyond campus to gain experience on par with professional journalists.

Requisites: Prereq: JCOM 651.

JCOM 654. Journalism Rights and Responsibilities. 4 Credits.

Journalists need to understand their rights to report, which starts in the U.S. with the First Amendment, and their responsibilities as ethical journalists and human beings. This course explores the ethical and legal considerations that shape the field of professional journalism in the United States.

Requisites: Prereq: JCOM 653.

JCOM 656. Law and Business for Media. 4 Credits.

This course introduces students to the fundamentals of producing independent documentary film and multimedia journalism, from story development to distribution. Along the way, you'll learn concepts that will help you run a business either as a documentary filmmaker or journalist, including pitching and budgeting a project, securing legal rights, building the right team for the story and finding a distributor or publisher. All of this in service of supporting and making excellent nonfiction media that can help shape the world.

JCOM 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable 99 times when topic changes

JCOM 663. Foundations of Strategic Sport Communication. 4 Credits.

Presents and reviews major theories, models, and practices in sports communication. Theoretical topics include sports media effects and persuasion as applied to broadcast, public relations, advertising, and other strategic communication. Cultural, societal and industry relevance also discussed.

JCOM 664. Foundations in Immersive Media. 4 Credits.

In this course, students will explore the uses of social virtual worlds as well as augmented and virtual reality through the strategic lens of communications (marketing, advertising, branding) and community building. Students will investigate the attributes of the technologies that create both opportunities and barriers to successful communication. Students will critically examine current case examples to determine possible use cases. Ultimately, students will develop a proposal for an issue or organization that uses mediated reality to engage audiences for strategic outcomes, recognizing limitations with recommendations to overcome those limitations.

JCOM 665. Immersive Media Psychology. 4 Credits.

This course offers an overview of media psychology with an emphasis on emerging media platforms. Students learn why humans consume certain types of media content and gain an understanding of the affective, behavioral, and cognitive implications of media messages in order to better understand audiences.

JCOM 667. User Experience Design. 4 Credits.

This 10-week course is designed to teach fundamental principles of user experience (UX) and human-centered design (HCD) in the context of strategic communication. By design, this course is heavily interdisciplinary in nature, relying on various theoretical and applied approaches drawn from fields of human-computer interaction (HCI), media psychology, and many others. UX is also context-specific, and we will be highlighting UX design in various domains, including mobile apps, traditional web, service and customer experience, gaming, and product design, among others.

JCOM 668. Immersive Marketing in Communication. 4 Credits.

This course was created to help students begin to put immersive media in the context of marketing communications. It helps them begin to put strategy into the framework of immersive media as platforms for advertising, events, sales, and community building. Learn to develop a framework for building immersive media marketing strategies. Specific topics include leveraging augmented reality (AR), virtual reality (VR), extended reality (XR), or mixed reality (MR) to meet branding and marketing objectives.

JCOM 669. Creating for Immersive Platforms. 4 Credits.

In this course, students gain a comprehensive overview of the production pipeline and CG software used in the creation of virtual reality (VR) and augmented reality (AR) experiences, as well as their broader application in the metaverse. Students will explore readily available resources and develop a solid grasp of the terminology and processes involved in creating content for immersive environments.

JCOM 671. Advanced Curiosity for Strategists. 4 Credits.

Drawing from a variety of fields, including art, anthropology, psychology, and marketing, and utilizing various techniques such as mind-mapping, this course will explore the building of intellectual curiosity as a problem-solving technique within the context of advertising and brand responsibility.

JCOM 672. Design, Technology, and Culture. 4 Credits.

Through a variety of guest speakers, workshops, and modern design processes, students will examine different perspectives on how technology and advertising has evolved, why it has evolved, how it affects us personally, how these shifts affect us globally, how innovation affects policy, and how these all shape our communities.

Judaic Studies (JDST)

Courses

JDST 199. Special Studies: [Topic]. 1-12 Credits.

Experimental course - topic varies.

Repeatable 99 times

JDST 212. Medieval and Early Modern Judaism. 4 Credits.

Interdisciplinary introduction to Jewish life, literature, religion, culture, and thought in the Middle Ages and early modern times in both Muslim and Christian environments.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

JDST 213. The Jewish Encounter with Modernity. 4 Credits.

The course investigates contemporary American Jewish Culture by focusing on the shifting cultural transformation from European Jewry.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

JDST 330. American Jewish Cultures. 4 Credits.

American Jewish culture, ritual, identity, institutions from 1880s to the present. Examines pluralism within American Jewish community and relationships with other religious and ethnic groups.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

JDST 352. Jewish Literature and Culture. 4 Credits.

Focuses on Jewish literature, the figure of the Jew in literature, and Jewish culture. Possible topics include but are not limited to the writings of Franz Kafka, the Shtetl, the Jewish memoir, etc.

Additional Information:

Arts Letters Area

JDST 353. Jewish Image and Media. 4 Credits.

Focuses on visual and intermedialities through a Jewish lens. Possible topics include but are not limited to Jewish Hollywood, Jewish Graphic Novels, Jewish Humor on TV, etc. Student discussion, oral presentations, and written papers. Readings and discussions in English.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

JDST 354. Jewish Thought and History. 4 Credits.

Focuses on Jewish philosophy, critical theory, and history. Possible topics included but are not limited to: Contemporary Jewish Philosophy, the writings of Emanuel Levinas, Spinoza, Modern Jewish History, etc.

Additional Information:

Arts Letters Area

JDST 399. Special Studies: [Topic]. 1-12 Credits.

Experimental course - topic varies.

Repeatable 99 times

JDST 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

JDST 402. Supervised College Teaching. 1-12 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 99 times

JDST 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

JDST 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

JDST 405. Reading and Conference: [Topic]. 1-12 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

JDST 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

JDST 407. Seminar: [Topic]. 1-16 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

JDST 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

JDST 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

JDST 410. Experimental Course: [Topic]. 1-16 Credits.

Experimental course - topic varies.

Repeatable 99 times

JDST 510. Experimental Course: [Topic]. 1-16 Credits.

Experimental course - topic varies.

Repeatable 99 times

JDST 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

Korean (KRN)

Courses

KRN 101. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters. Offered annually with KRN 201, KRN 202, KRN 203.

KRN 102. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters.

Requisites: Prereq: KRN 101.

KRN 103. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters.

Requisites: Prereq: KRN 102.

KRN 151M. Introduction to Korean Cinema. 4 Credits.

Surveys Korean national cinema, from the earliest days of the medium to the present. Multilisted with CINE 151M.

Equivalent to: CINE 151M

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

KRN 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

KRN 201. Second-Year Korean I. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean. Introduction of additional characters. Offered annually with KRN 101, KRN 102, KRN 103. This is a Core Ed Arts Letter course.

Requisites: Prereq: KRN 103.

Additional Information:

Arts Letters Area

KRN 202. Second-Year Korean II. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean. Introduction of additional characters. This is a Core Ed Arts Letter course.

Requisites: Prereq: KRN 201.

Additional Information:

Arts Letters Area

KRN 203. Second-Year Korean III. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean. Introduction of additional characters. This is a Core Ed Arts Letter course.

Requisites: Prereq: KRN 202.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

KRN 301. Third-Year Korean I. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. This is a Core Ed Arts Letter course. Sequence with KRN 302, KRN 303.

Requisites: Prereq: KRN 203.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

KRN 302. Third-Year Korean II. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. This is a Core Ed Arts Letter course. Sequence with KRN 301, KRN 303.

Requisites: Prereq: KRN 301.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

KRN 303. Third-Year Korean III. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. This is a Core Ed Arts Letter course. Sequence with KRN 301, KRN 302.

Requisites: Prereq: KRN 302.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

KRN 309. Languages and Cultural Formation in Korea. 4 Credits.

This course examines how cultural formation, social organization, and historical influences shape the Korean language, and how it evolves over time.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

KRN 315. Introduction to Korean Linguistics. 4 Credits.

Surveys general characteristics of the Korean language and places them in their cultural and historical context.

Requisites: Prereq: KRN 103.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

KRN 361. Korean Popular Culture and Transnationalism. 4 Credits.

Explores contemporary South Korean popular culture in a global frame and key issues in cultural transnationalization.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

KRN 362M. Contemporary Korean Film. 4 Credits.

Introduction to contemporary South Korean film. Explores changes in film culture, practice, and industry in relation to social changes since the early 1990s. Offered alternate years. Multilisted with CINE 362M.

Equivalent to: CINE 362M

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

KRN 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

KRN 403. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 5 times for a maximum of 6 credits

KRN 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

KRN 503. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

KRN 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

KRN 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

KRN 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Labor Education and Research Center (LERC)

Courses

LERC 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LERC 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LERC 406. Field Studies: [Topic]. 1-12 Credits.

Supervised activity related to areas such as labor education, local union administration, and job safety and health.

Repeatable 99 times

LERC 407. Seminar: [Topic]. 1-5 Credits.

Only a few seminars can be offered each year. Recent topics are Arbitration, Contemporary Labor Problems, Occupational Safety and Health Issues, The Role of Unions in the United States, Selected Issues in Public Employment Relations, Unions and Workforce Development, Workers' Compensation.

Repeatable 99 times

LERC 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LERC 410. Experimental Course: [Topic]. 1-5 Credits.

Topics include Bargaining Simulations, Techniques of Labor Education, Unions and Technology.

Repeatable 99 times

LERC 507. Seminar: [Topic]. 1-5 Credits.

Only a few seminars can be offered each year. Recent topics are Arbitration, Contemporary Labor Problems, Occupational Safety and Health Issues, The Role of Unions in the United States, Selected Issues in Public Employment Relations, Unions and Workforce Development, Workers' Compensation.

Repeatable 99 times

LERC 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LERC 510. Experimental Course: [Topic]. 1-5 Credits.

Topics include Bargaining Simulations, Techniques of Labor Education, Unions and Technology.

Repeatable 99 times

LERC 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LERC 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LERC 606. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

LERC 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

Landscape Architecture (LA)

Courses

LA 196. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 2 times for a maximum of 6 credits

LA 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LA 227. Introduction to Landscape Architecture. 2 Credits.

Exploring the background and scope of the profession: its history, ethics, goals, skills, topics, achievements, and evolving challenges in making healthy, functional, and beautiful places.

LA 260. Understanding Landscapes. 4 Credits.

The goal of this course is to expand your understanding, perception, and knowledge of landscapes as cultural artifacts and the physical form of invisible processes, histories, culture, people, animals, politics, and events.

Additional Information:

Arts Letters Area

LA 289. Landscape Architectural Design. 6 Credits.

Study of places, their use, and how they evolve. Fundamentals of environmental awareness, social factors, and small-scale site design; abstract design and elementary graphic techniques.

Repeatable 99 times

LA 326. Plants: Fall. 4 Credits.

Characteristics, identification, and design uses of deciduous trees, shrubs, vines, and ground covers. Emphasis on identification and appropriate use in landscape design.

LA 327. Winter Plants. 4 Credits.

The course will cover characteristics, identification, and design uses of ornamental conifers and broad-leaved evergreen trees, shrubs, and ground covers.

LA 328. Spring Plants. 4 Credits.

Focuses on flowering plants, their identification, design use, and ecosystem services they provide. Plant identification focuses on flowering trees and shrubs, groundcovers and perennials, with the intention of understanding how flowering plants may be used in design to support both human needs and ecosystem functions.

LA 337. Landscape Field Work: [Topic]. 1-4 Credits.

Direct examination and appraisal of the function, form, content, and composition of example landscapes in relation to ecological, cultural, legal, technical, aesthetic, and economic objectives.

Repeatable 2 times for a maximum of 12 credits

LA 350. Landscape Media. 2-4 Credits.

Development of freehand drawing and visualization skills; exercises on line, tone, texture, and color for plan, section, and perspective drawings.

Repeatable 2 times

LA 352. Digital Landscape Media. 2-4 Credits.

Introductory survey and skill development in a range of basic computer graphic tools used in landscape architecture. Includes image processing, computer drawing, modeling, and drafting.

Repeatable 1 time for a maximum of 8 credits

LA 375. Contemporary American Landscape. 4 Credits.

The course examines ideas, places, and experiences of particular contemporary significance, symbolism or iconic value in the contemporary American landscape, and studies the landscape as an expression of American culture.

Additional Information:

Arts Letters Area

LA 390. Urban Farm. 2-4 Credits.

Experimentation with food production in the city; rebuilding urban soils; farm animal-plant relationships; nutrient cycles. Cooperative food production and distribution; use of appropriate technologies.

Repeatable 99 times

LA 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LA 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LA 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

LA 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

LA 406. Practicum: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 2 times

LA 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 1 time

LA 408. Workshop: [Topic]. 1-21 Credits.

Concentrated programs of study on special topics. Regular offerings include Fire Ecology and Management, Landscape Design.

Repeatable 99 times

LA 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LA 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LA 413. Analyzing Landscape Systems. 4 Credits.

Develops skills for collecting data and understanding how landscapes function in space and time to inform good decision-making in planning and design.

Requisites: Prereq: one course in geography or biology or environmental studies.

LA 415. Computers in Landscape Architecture. 4 Credits.

Development, application, and evaluation of computer systems for land use and site planning (e.g., geographic information systems); encoding of data, cell storage, and analysis systems.

Repeatable 99 times

LA 429. Civic Agriculture. 4 Credits.

Exploring the impact and subsequent reversal of industrialized food systems through community driven production, distribution and equity methods, foodshed resiliency creation and ecologically literate agriculture practice.

LA 439. Landscape Architectural Design and Process. 6 Credits.

Intermediate problems in landscape architecture design. Relations among problem concepts, goals, design theory, communication media, and technical analysis.

Requisites: Prereq: LA 289.

Repeatable 4 times for a maximum of 30 credits

LA 440. Introduction to Landscape Planning Analysis. 4 Credits.

Principles of designing land- and waterscapes for human use and settlement. Ecological, social, and economic analyses of landscapes, resources, and patterns of occupancy in the Eugene-Springfield area.

Requisites: Prereq: LA 413.

LA 441. Principles of Applied Ecology. 2-6 Credits.

Application of ecological concepts to landscape design, planning, and management. Emphasis on spatially explicit problem-solving over a range of spatial and temporal scales.

Requisites: Prereq: one course in ecology.

LA 450. Advanced Landscape Media: [Topic]. 2-4 Credits.

Advanced landscape media skills in a variety of media, including 2D and 3D digital skills, visual data representation, and remote data sensing.

Repeatable 3 times for a maximum of 12 credits when topic changes

LA 451. Landscape Media I. 2 Credits.

Landscape Media I is the first course in a yearlong foundational landscape media sequence. The course focuses on fundamental concepts of cartography, diagramming movement and change, and conceptually representing design ideas, and introduces students to graphic design fundamentals. Students cannot receive credit for both LA 451 and ENVD 451.

Equivalent to: ENVD 451

LA 452. Landscape Media II. 2 Credits.

Landscape Media II is the second course in a yearlong foundational landscape media sequence. The course explores a variety of media, computer applications, analog approaches, workflows, and theoretical ideas in the context of landform, topography, and grading as both a design process and representation product.

LA 453. Landscape Media III. 2 Credits.

Landscape Media III is the third course in a yearlong foundational landscape media sequence. The course focuses on the visual communication of constructing the landscape, from sketching materials and assemblies, to preparing construction documentation drawings.

LA 459. Landscape Technology Topics. 2-4 Credits.

Intensive study of topics in landscape construction and maintenance. Topics include irrigation, lighting, special structures, water management, and road design.

Repeatable 3 times for a maximum of 10 credits

LA 462. Professional Practice Landscape Architecture. 2 Credits.

Introduces students to key aspects of professional practice, fundamental professional skills, and professional career planning. Includes licensure, legal aspects of landscape architecture, career options, business management, and project management.

LA 464. Landscape Materials and Construction I. 4 Credits.

Landscape Materials and Construction I is the first course in a three-term sequence, with a primary focus on plants as a medium of landscape architectural design. It is an introduction to plants from the point of view of the landscape architect or architectural designer.

LA 465. Landscape Materials and Construction II. 4 Credits.

Landscape Materials and Construction II is the second of the three-term long Landscape Materials and Construction sequence, with a primary focus on landform as a medium of landscape architectural design and landscape engineering for accessibility, safety, and sustainability.

Requisites: Prereq: LA 464.

LA 466. Landscape Materials and Construction III. 4 Credits.

Landscape Materials and Construction III is the third of the three-term long Landscape Materials and Construction sequence, with a primary focus on structures, material assemblies, and vegetation on and in buildings as media of landscape architectural design.

Requisites: Prereq: LA 465.

LA 472. Landscape Architectural Theory: [Topic]. 4 Credits.

This course examines theories and the role of theory in landscape architecture. Each offering explores landscape theory through a different lens, including the analysis and design of landscapes, the creation of built works, and the discussion and critique of projects.

Repeatable 3 times for a maximum of 16 credits

LA 474. History of Landscape Architecture I. 4 Credits.

First in a sequence covering the history of landscape architecture. Explores the history and theory of the designed landscape from the beginnings of human settlement to the 19th century.

LA 475. History of Landscape Architecture II. 4 Credits.

The second in a sequence of two classes covering the history of landscape architecture, from the 19th century to the late 20th century.

Requisites: Prereq: LA 474.

LA 480. Cultural Landscapes. 4 Credits.

This course examines cultural landscapes: how we define them, how we develop a deeper understanding of them, how they are recognized and incorporated into the historic preservation and design fields, and methodologies for treating and managing their dynamic character. Understanding cultural landscapes bridges many disciplines including history, geography, ecology, landscape architecture, architecture, archaeology, and ethnography.

LA 489. Site Planning and Design. 6 Credits.

Advanced problems in landscape architecture, cultural determinants of site planning and design, design development and natural systems and processes as indicators of carrying capacity.

Requisites: Prereq: LA 362, LA 366, LA 439.

Repeatable 3 times

LA 494. Land Planning and Design. 6 Credits.

Problems in landscape architecture of increased cultural complexity. Land use planning, computer-aided ecological analysis of land, environmental impact, urban and new community design.

Requisites: Prereq: LA 489; fifth-year standing for undergraduates.

LA 498. Comprehensive Project I. 6 Credits.

Advanced planning and design projects in landscape architecture. Studio development of individually selected projects. Sequence with LA 499.

Requisites: Prereq: LA 489.

LA 499. Comprehensive Project II. 8 Credits.

Advanced planning and design projects in landscape architecture. Studio development of individually selected projects.

Requisites: Prereq: LA 498.

LA 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LA 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 1 time

LA 508. Workshop: [Topic]. 1-21 Credits.

Concentrated programs of study on special topics. Regular offerings include Fire Ecology and Management, Landscape Design.

Repeatable 99 times

LA 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LA 513. Analyzing Landscape Systems. 4 Credits.

Develops skills for collecting data and understanding how landscapes function in space and time to inform good decision-making in planning and design.

LA 515. Computers in Landscape Architecture. 4 Credits.

Development, application, and evaluation of computer systems for land use and site planning (e.g., geographic information systems); encoding of data, cell storage, and analysis systems.

Repeatable 99 times

LA 529. Civic Agriculture. 4 Credits.

Exploring the impact and subsequent reversal of industrialized food systems through community driven production, distribution and equity methods, foodshed resiliency creation and ecologically literate agriculture practice.

LA 540. Introduction to Landscape Planning Analysis. 4 Credits.

Principles of designing land- and waterscapes for human use and settlement. Ecological, social, and economic analyses of landscapes, resources, and patterns of occupancy in the Eugene-Springfield area.

Requisites: Prereq: LA 513.

LA 541. Principles of Applied Ecology. 2-6 Credits.

Application of ecological concepts to landscape design, planning, and management. Emphasis on spatially explicit problem-solving over a range of spatial and temporal scales.

Requisites: Prereq: one course in the natural sciences.

LA 550. Advanced Landscape Media: [Topic]. 2-4 Credits.

Advanced landscape media skills in a variety of media, including 2D and 3D digital skills, visual data representation, and remote data sensing.

Repeatable 3 times for a maximum of 12 credits when topic changes

LA 551. Landscape Media I. 2 Credits.

Landscape Media I is the first course in a yearlong foundational landscape media sequence. The course focuses on fundamental concepts of cartography, diagramming movement and change, and conceptually representing design ideas, and introduces students to graphic design fundamentals.

LA 552. Landscape Media II. 2 Credits.

Landscape Media II is the second course in a yearlong foundational landscape media sequence. The course explores a variety of media, computer applications, analog approaches, workflows, and theoretical ideas in the context of landform, topography, and grading as both a design process and representation product.

LA 553. Landscape Media III. 2 Credits.

Landscape Media III is the third course in a yearlong foundational landscape media sequence. The course focuses on the visual communication of constructing the landscape, from sketching materials and assemblies, to preparing construction documentation drawings.

LA 559. Landscape Technology Topics. 2-4 Credits.

Intensive study of topics in landscape construction and maintenance. Topics include irrigation, lighting, special structures, water management, and road design.

Repeatable 3 times for a maximum of 10 credits

LA 562. Professional Practice of Landscape Architecture. 2 Credits.

Introduces students to key aspects of professional practice, fundamental professional skills, and professional career planning. Includes licensure, legal aspects of landscape architecture, career options, business management, and project management.

LA 564. Landscape Materials and Construction I. 4 Credits.

Landscape Materials and Construction I is the first course in a three-term sequence, with a primary focus on plants as a medium of landscape architectural design. It is an introduction to plants from the point of view of the landscape architect or architectural designer.

LA 565. Landscape Materials and Construction II. 4 Credits.

Landscape Materials and Construction II is the second of the three-term long Landscape Materials and Construction sequence, with a primary focus on landform as a medium of landscape architectural design and landscape engineering for accessibility, safety, and sustainability.

LA 566. Landscape Materials and Construction III. 4 Credits.

Landscape Materials and Construction III is the third of the three-term long Landscape Materials and Construction sequence, with a primary focus on structures, material assemblies, and vegetation on and in buildings as media of landscape architectural design.

LA 572. Landscape Architectural Theory: [Topic]. 4 Credits.

This course examines theories and the role of theory in landscape architecture. Each offering explores landscape theory through a different lens, including the analysis and design of landscapes, the creation of built works, and the discussion and critique of projects.

Repeatable 3 times for a maximum of 16 credits

LA 574. History of Landscape Architecture I. 4 Credits.

First in a sequence covering the history of landscape architecture. Explores the history and theory of the designed landscape from the beginnings of human settlement to the 19th century.

LA 575. History of Landscape Architecture II. 4 Credits.

The second in a sequence of two classes covering the history of landscape architecture, from the 19th century to the late 20th century.

LA 580. Cultural Landscapes. 4 Credits.

This course examines cultural landscapes: how we define them, how we develop a deeper understanding of them, how they are recognized and incorporated into the historic preservation and design fields, and methodologies for treating and managing their dynamic character. Understanding cultural landscapes bridges many disciplines including history, geography, ecology, landscape architecture, architecture, archaeology, and ethnography.

LA 589. Site Planning and Design. 6 Credits.

Advanced problems in landscape architecture, cultural determinants of site planning and design, design development and natural systems and processes as indicators of carrying capacity.

Requisites: Prereq: LA 539.

Repeatable 3 times

LA 594. Land Planning and Design. 6 Credits.

Problems in landscape architecture of increased cultural complexity. Land-use planning, computer-aided ecological analysis of land, environmental impact, urban and new community design.

Requisites: Prereq: LA 589.

LA 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LA 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LA 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

LA 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

LA 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 2 times

LA 607. Seminar: [Topic]. 1-5 Credits.

A recent topic is Introduction to Landscape Literature.

Repeatable 99 times

LA 608. Workshop: [Topic]. 1-16 Credits.

Intensive study combining practical projects with instruction on special topics related to landscape problems.

Repeatable 99 times

LA 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LA 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

LA 620. Landscape Research Methods I. 2-4 Credits.

Contemporary research issues and strategies. Theories, approaches, and techniques applicable to topics and problems in landscape architecture. Sequence with LA 621.

LA 621. Landscape Research Methods II. 2-4 Credits.

Contemporary research issues and strategies. Theories, approaches, and techniques applicable to topics and problems in landscape architecture. Sequence with LA 620.

Requisites: Prereq: LA 620.

LA 639. Landscape Architecture Foundations. 6 Credits.

Landscape architecture foundations for all MLA students. Includes analysis of Oregon ecoregions, landscapes, and sites, their use, and evolution. Fundamentals of contemporary landscape architectural theory and issues, site documentation, site design, and graphic techniques.

LA 694. Exploratory Land Design. 6 Credits.

Complex problems in landscape architecture that integrate research from environmental and social sciences with the humanities to employ novel decision-making processes, models, guidelines or theories.

Requisites: Prereq: LA 589.

LA 699. Master's Project. 2-10 Credits.

Student-directed and executed performance and communication of original research or project work to demonstrate advanced mastery of landscape architecture.

Repeatable 9 times for a maximum of 20 credits

Language Teaching (LT)

Courses

LT 199. Special Studies: [Topic]. 1-5 Credits.

Various languages offered through the Yamada Language Center.

Repeatable 99 times

LT 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LT 402. Supervised College Teaching. 1-12 Credits.

A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Repeatable 99 times

LT 405. Reading and Conference: [Topic]. 1-12 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 4 times for a maximum of 16 credits

LT 406. Supervised Tutoring. 1-4 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 2 times for a maximum of 8 credits

LT 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 2 times for a maximum of 8 credits

LT 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LT 410. Experimental Course: [Topic]. 1-8 Credits.

Experimental course - topic varies.

Repeatable 2 times for a maximum of 8 credits

LT 428. Teaching English Culture and Literature. 4 Credits.

The interaction between language and culture as it relates to second-language teaching. Application to the teaching of literature.

LT 434. Language Learning in Context. 4 Credits.

This course is designed to sensitize future language professionals to the complex global and local dynamics in language use and vitality, and to enable them to make informed decisions about choosing appropriate approaches to instructional design for particular populations, including classroom and non-classroom instruction.

LT 435. Language Learning Design. 4 Credits.

Theoretical and research-based approaches to designing second language learning experiences.

LT 436. Design for Learning Language Systems. 4 Credits.

Application of language learning design to word, sentence, and discourse-level systems in listening, speaking, reading, and writing second languages.

Requisites: Prereq: LING 444, LT 435.

LT 437. Second-Language Teaching Practice. 4 Credits.

Intensive workshop and practice in language instruction. Team-teaching of weekly English as a spoken language course including designing activities and creating materials. Sequence with LT 435, LT 436.

Requisites: Prereq: LT 435. Pre- or coreq: LT 436.

LT 438. Design for Language Learning Pragmatics. 4 Credits.

Designed to engage students in the teaching and learning of pragmatics using theoretical and empirical inquiry to examine first language and second language pragmatic behaviors, intercultural communication, and classroom practice. Special topics to be addressed include research methodology, and pragmatic competence and language learning.

LT 439. Design for Language Learning Pronunciation. 4 Credits.

Approaches to supporting the learning of pronunciation for any second language, including lesson plan development and practice teaching.

LT 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 2 times for a maximum of 8 credits

LT 510. Experimental Course: [Topic]. 1-8 Credits.

Experimental course - topic varies.

Repeatable 2 times for a maximum of 8 credits

LT 528. Teaching English Culture and Literature. 4 Credits.

The interaction between language and culture as it relates to second-language teaching. Application to the teaching of literature.

LT 534. Language Learning in Context. 4 Credits.

This course is designed to sensitize future language professionals to the complex global and local dynamics in language use and vitality, and to enable them to make informed decisions about choosing appropriate approaches to instructional design for particular populations, including classroom and non-classroom instruction.

LT 535. Language Learning Design. 4 Credits.

Theoretical and research-based approaches to designing second language learning experiences.

LT 536. Design for Learning Language Systems. 4 Credits.

Application of language learning design to word, sentence, and discourse-level systems in listening, speaking, reading, and writing second languages.

Requisites: Prereq: LING 544, LT 535.

LT 537. Second-Language Teaching Practice. 4 Credits.

Intensive workshop and practice in language instruction. Team-teaching of weekly English as a spoken language course including designing activities and creating materials. Sequence with LT 535, LT 536.

Requisites: Prereq: LT 535. Pre- or coreq: LT 536

LT 538. Design for Language Learning Pragmatics. 4 Credits.

Designed to engage students in the teaching and learning of pragmatics using theoretical and empirical inquiry to examine first language and second language pragmatic behaviors, intercultural communication, and classroom practice. Special topics to be addressed include research methodology, and pragmatic competence and language learning.

LT 539. Design for Language Learning Pronunciation. 4 Credits.

Approaches to supporting the learning of pronunciation for any second language, including lesson plan development and practice teaching.

LT 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

LT 605. Reading and Conference: [Topic]. 1-9 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 5 times for a maximum of 21 credits

LT 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

LT 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 5 times for a maximum of 16 credits

LT 608. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 5 times for a maximum of 16 credits

LT 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LT 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 2 times for a maximum of 8 credits

LT 611. Terminal Project. 1-7 Credits.

Two-term course required to complete an MA in language teaching specialization. Individual projects. Weekly group sessions provide guidance.

Requisites: Prereq: LT 536.

Repeatable 1 time for a maximum of 7 credits

LT 630. Curriculum and Materials Development. 5 Credits.

Introduction to curriculum design processes and related materials development. Students design and develop a curriculum of their choice throughout the course in a project-based format.

LT 631. Measuring Language Ability. 5 Credits.

Principles and types of language testing; focuses on how to assess language learners' abilities in a variety of contexts.

Latin (LAT)

Courses

LAT 101. First-Year Latin. 5 Credits.

Fundamentals of Latin grammar; selected readings from classical and medieval authors.

LAT 102. First-Year Latin. 5 Credits.

Fundamentals of Latin grammar; selected readings from classical and medieval authors.

Requisites: Prereq: LAT 101.

LAT 103. First-Year Latin. 5 Credits.

Fundamentals of Latin grammar; selected readings from classical and medieval authors.

Requisites: Prereq: LAT 102 or equivalent.

LAT 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAT 301. Authors: [Topic]. 4 Credits.

Second-year Latin: selections from Caesar or Cicero, with focus on reading and syntax. Sequence with LAT 302, LAT 303.

Repeatable 99 times when topic changes

Additional Information:

Arts Letters Area

LAT 302. Vergil: [Topic]. 4 Credits.

Second-year Latin: selections from Virgil's Aeneid, with focus on reading and syntax. Sequence with LAT 301, LAT 303.

Requisites: Prereq: LAT 301.

Repeatable 99 times when topic changes

Additional Information:

Arts Letters Area

LAT 303. Authors: [Topic]. 4 Credits.

Second-year Latin: selections from major Roman authors with focus on reading and syntax. Recent authors are Cicero, Terence, Tibullus. Sequence with LAT 301, LAT 302.

Requisites: Prereq: LAT 302.

Repeatable 99 times when topic changes

Additional Information:

Arts Letters Area

BA Language Satisfying Course

LAT 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAT 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LAT 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LAT 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LAT 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

LAT 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LAT 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LAT 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAT 411. Authors: [Topic]. 4 Credits.

Each term devoted to a different author or literary genre: Catullus, Tacitus, Juvenal, Pliny, Ovid, Lucretius, comedy, philosophy, elegy, epic, satire.

Repeatable 99 times when topic changes

Additional Information:

BA Language Satisfying Course

LAT 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LAT 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

LAT 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LAT 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAT 511. Authors: [Topic]. 4 Credits.

Each term devoted to a different author or literary genre: Catullus, Tacitus, Juvenal, Pliny, Ovid, Lucretius, comedy, philosophy, elegy, epic, satire.

Repeatable 99 times when topic changes

LAT 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LAT 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LAT 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

LAT 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

LAT 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LAT 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LAT 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Latin American Studies (LAS)

Courses

LAS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 2 times for a maximum of 15 credits when topic changes

LAS 200. Introduction to Latin American Studies. 4 Credits.

Introduction to the history, peoples, and cultures of Latin America and of the Latino population in the United States.

Additional Information:

Cultural Literacy: Global Perspectives

LAS 211. Latin American Humanities: [Topic]. 4 Credits.

Focuses on the comparative study of Latin American cultural and intellectual traditions. Introduces scholarship in the humanities about Latin American and U.S. Latinos.

Repeatable 1 time for a maximum of 8 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

LAS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 2 times for a maximum of 15 credits when topic changes

LAS 401. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LAS 403. Thesis. 1-4 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LAS 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

LAS 405. Reading and Conference: [Topic]. 1-4 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LAS 407. Seminar: [Topic]. 4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

LAS 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 2 times for a maximum of 15 credits when topic changes

LAS 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 2 times for a maximum of 15 credits when topic changes

Law (LAW)

Courses

LAW 001. Non-credit Law Section. 0 Credits.

Used for non-credit LAW program requirements.

LAW 101. Introduction to United States law. 4 Credits.

Surveys United States legal system: presents structure and methods of the legal system and fundamentals of several substantive areas of law.

Additional Information:

Social Science Area

LAW 102. Introduction to Criminal Law. 4 Credits.

Explores criminal law and statutes using primary and secondary sources.

Additional Information:

Social Science Area

LAW 103. Introduction to Criminal Investigation. 4 Credits.

Examines the constitutional limitations on police officers' authority to detain suspects, search them and their property, and interrogate them.

LAW 104. Introduction to Business Law. 4 Credits.

Examines the context of everyday commerce, shaped by contract, tort, business entity, and securities law, to uncover how the law both affects and is affected by business.

Additional Information:

Social Science Area

LAW 196. Field Studies: [Topic]. 1-6 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

LAW 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAW 201. Introduction to Environmental Law and Policy. 4 Credits.

An introduction to environmental policy and law, with an overview of major themes and the regulatory framework. Focuses on community resilience.

Additional Information:

Social Science Area

LAW 202. Introduction to Public International Law. 4 Credits.

An introduction to the origins, application, and main actors in international law, international institutions, and international legal processes.

Additional Information:

Social Science Area

LAW 203. Controversies in Constitutional Law. 4 Credits.

This course introduces students to civil rights and liberties issues arising from federal constitutional law across a variety of areas.

Additional Information:

Social Science Area

LAW 204. Immigration and Citizenship. 4 Credits.

Interdisciplinary study of the way in which the American legal order has constituted citizenship.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

LAW 250. Introduction to Legal Research. 2 Credits.

Students investigate sources of law and sharpen analytical skills using issues arising in everyday life and scenarios requiring legal information to develop critical legal information literacy skills.

LAW 301. Youth and Social Change. 4 Credits.

Explore how adults act on youth through law, mass media, policy, and social science, while investigating youth as agents of change, acting on their own perspective of law and justice.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

LAW 304. American Law and Families. 4 Credits.

Examines the family through a legal lens: the rules that affect legal relationships among family members and laws related to family property.

LAW 310. Environmental Regulation. 4 Credits.

Provides students with an understanding of laws regulating activities that affect the environment as well as the skills to analyze and apply these laws to current issues.

LAW 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAW 401. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LAW 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LAW 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

LAW 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LAW 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

LAW 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LAW 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAW 415. Human Rights, Law, and Culture. 4 Credits.

The history, theory, and practice of human rights from a global perspective.

LAW 416. Law, Justice and Accountability After Conflict. 4 Credits.

Historical and theoretical overview of the conflicts and international mechanisms, with a focus on cultural, historical, and legal forces that shape postconflict peace-building efforts.

LAW 417. The Death Penalty. 4 Credits.

Explores the use of capital punishment in the United States, focusing on the law governing the death penalty, in the context of the criminal justice system, social science and policy.

LAW 418. Race and the Courts. 4 Credits.

This course examines intersections of race and the law. Students will explore historical and contemporary contexts to understand how institutional frameworks can promote and hinder social reform.

LAW 419. Legal Secrets. 4 Credits.

This course examines certain types of information – typically produced and owned by institutions – which are given elevated protection under the law as “secret.” Legal secrets examined in this course are distinct from notions of individual privacy, which refers to an individual’s “right to be let alone,” to protect their personal information from government intrusion, and to be free from unreasonable search and seizure.

LAW 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAW 600. Law Courses for Nonlaw Students. 1-15 Credits.

Generic course number for translating 600-level School of Law semester credits to term credits on academic records for nonlaw students.

Repeatable 6 times

LAW 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 6 times

LAW 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 6 times

LAW 607. Seminar: [Topic]. 1-5 Credits.

Recent topics include Accounting for Lawyers, Alternative Dispute Resolution, American Legal Biography, Immigration Law, Litigation Practice and Procedure, Mediation, Negotiation, Nonprofit Organizations, Postconviction Remedies, White-Collar Crime.

Repeatable 99 times

LAW 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LAW 611. Contracts. 4 Credits.

Examines contractual relationships from formation through interpretation and breach to remedies and potential third-party rights. Covers the common law of contracts and Uniform Commercial Code, Article 2, which governs contracts for the sale of goods.

LAW 613. Torts. 4 Credits.

Liability for intentional and negligently caused injuries to person and property, strict liability, vicarious liability, abnormally dangerous activities, products liability, nuisance, invasion of privacy, defamation, defenses and immunities, the impact of insurance and risk distribution upon liability, accident compensation plans, damages, losses.

LAW 614. Advanced Torts. 3 Credits.

Students study and discuss the economic and dignitary torts (for example, defamation, misrepresentation, invasion of privacy, malpractice); they are able to analyze and apply this knowledge in a classroom environment.

Requisites: Prereq: LAW 613.

LAW 615. Civil Procedure. 4 Credits.

Survey of federal court organization and jurisdiction and of systems of civil procedure.

LAW 617. Property. 4 Credits.

Nature and function of private property rights. Topics may include the common law classification of estates in land; forms of concurrent ownership; landlord and tenant; adverse possession; incorporeal interests in land, easements, covenants, and servitudes; title; introduction to land use issues and judicial legislative developments in law.

LAW 618. Criminal Law. 4 Credits.

Administration of criminal law and the definition of crimes as a technique of social order with primary basic elements of criminal liability. Emphasis on sources of definitions, limitations of culpability, and defenses.

LAW 619. White-Collar Crime. 2 Credits.

For students interested in the practice of criminal law. Assists business lawyers who advise clients on the business practices that constitute criminal activity.

LAW 620. Business Associations. 3-4 Credits.

This is the introductory course on business law and a prerequisite for most upper-level business law courses. It introduces the governance structure of agency, partnerships, corporations and LLCs.

LAW 622. Legal Research and Writing I. 3 Credits.

Integrated instruction in legal research, analysis, and writing of legal memoranda emphasizes research strategies, problem solving, and the relationship between research strategies and analysis. Writing assignments, each progressively more difficult, are evaluated by faculty members. Offered in small sections. Includes library workshops and individual conferences.

LAW 623. Legal Research and Writing II. 3 Credits.

Building on the research, writing, and analytical skills of Legal Research and Writing I, students focus on persuasive writing as they produce trial memoranda and appellate briefs. Students present final oral arguments in a courtroom setting before a panel of three judges.

LAW 624. Advanced Legal Research. 2 Credits.

Development of skills in formulating efficient research strategies online and in print; exposure to research methods in particular areas of law.

LAW 625. Business Bankruptcy. 3 Credits.

Explores the law governing business bankruptcy; examines tools for restructuring and rehabilitating a business under Chapter 11 of the Bankruptcy Code. Topics include operating a business in bankruptcy, reshaping the estate, and negotiating and confirming a plan of reorganization.

Requisites: Prereq: LAW 648.

LAW 626. Mergers and Acquisitions. 2-3 Credits.

Participants develop an understanding of how to analyze a potential acquiree and how that analysis informs and governs the drafting of the acquisition agreement and the disclosure document. Presents the germination of a transaction from financial need to executed documentation.

Requisites: Prereq: LAW 620.

LAW 627. Accounting for Lawyers. 3 Credits.

Covers the accounting cycle, generally accepted accounting principles, financial statements, and common legal and accounting topics.

LAW 628. Nonprofit Organizations. 3 Credits.

Provides an overview of the theory, purposes, and regulation of nonprofit organizations. Practical skills are developed through drafting assignments.

LAW 629. Fundamentals of Loans. 1 Credit.

Covers the rights of borrowers and lenders in unsecured and secured loans in less depth than the Secured Transactions course.

LAW 630. Tax Policy. 2-3 Credits.

Explores tax policy issues including how taxes are used to create social equality. Evaluates the current tax system using the three classic goals: equity, efficiency, and simplification.

LAW 632. Sales. 2-3 Credits.

Covers contracts for the sale of goods as codified in Uniform Commercial Code Article 2; international contracts, regulation of consumer warranties, leases of goods under Article 2A.

LAW 633. Business Planning. 2,3 Credits.

Study of business life cycle from its initial organization and operation to its eventual sale and dissolution. Students draft documents for use in hypothetical transactions, compare the way partnerships and corporations deal with similar problems, and analyze the impact taxes have on business decisions.

Requisites: Prereq: LAW 620, LAW 680.

LAW 634. Contract Drafting. 2 Credits.

The principles of contemporary commercial drafting, introduction to documents typically used in a variety of transactions.

LAW 636. Secured Transactions. 3-4 Credits.

Examines the rules that govern borrowing and lending with collateral; buying and selling promissory notes and other debt; and related transactions that are essential to large and small transactions.

LAW 637. Trusts and Estates I. 3 Credits.

Basics of estate planning law--intestate succession, wills, will substitutes, and trusts.

Requisites: Prereq: LAW 617.

LAW 638. Workers' Compensation Law. 2 Credits.

Fundamentals of workers' compensation law in Oregon and other states.

LAW 641. Legislation and Statutory Interpretation. 3 Credits.

Covers theories of the legislative process, normative theories of statutory interpretation, and the main judicial doctrines of statutory interpretation.

LAW 642. International Business Transactions. 3 Credits.

Examines legal issues affecting international business activity; includes forms of doing business, trading of goods, commercial terms, the UN Convention on Contracts for the International Sale of Goods, financing, technology, transfers, foreign investment, and dispute resolution.

LAW 643. Constitutional Law I. 3 Credits.

Government structure and individual rights are examined in the context of the authority of courts to declare legislative acts unconstitutional. Includes congressional regulatory power under the Commerce Clause, implied limits on state regulatory power, and the substantive dimensions of due process.

LAW 644. Constitutional Law II. 3 Credits.

Guarantees of individual rights against government, especially freedom of expression and equal protection of the law.

Requisites: Prereq: LAW 643.

LAW 645. Oregon Practice and Procedure. 3 Credits.

Intensive study of civil procedure in Oregon courts, and the critical evaluation of Oregon civil procedure in light of the purposes and values of a procedural system and in comparison with federal rules.

LAW 646. Federal Jurisdiction. 3 Credits.

Addresses the role of federal courts in the operation of the federal system. Includes analysis of constitutional and legislative foundations of the judicial power of the United States; jurisdiction--diversity of citizenship, federal question, jurisdictional amount, and removal; venue; federal and state court relationships; the law applied to federal courts; procedure in the federal district courts; appellate jurisdiction and procedure in courts of appeals and the Supreme Court.

LAW 648. Bankruptcy. 3 Credits.

Introduction to bankruptcy law; focuses on consumer bankruptcy and contrasting creditor's rights and debtor's protections under the federal Bankruptcy Code with those under state collection law. Recommended preparation: Commercial Law (LAW 636).

LAW 649. Legal Profession. 3 Credits.

Addresses the Model Code of Professional Responsibility, the Code of Judicial Ethics, roles and functions of lawyers in society, organization and functions of the bar, provision of legal service, responsibilities in representing clients, and the future of the legal profession. It may include the review and analysis of videotaped ethical problems.

LAW 651. Trial Practice. 3 Credits.

Introduces the essential techniques and theory necessary to conduct a trial in court.

Requisites: Prereq: LAW 652.

LAW 652. Evidence. 3 Credits.

Covers the structure of the adversary system; roles of judge, jury, and attorney in the fact-finding process; sufficiency of evidence; order of proof; presumptions; relevancy; judicial notice; real and documentary evidence; form and elicitation of oral testimony; impeachment and rehabilitation of witnesses; the hearsay rule and its exceptions; privileges. Addresses practical problems in the introduction of evidence and trial tactics and methods. Courtroom observations, movies, and videotapes of effective trial techniques present realistic situations.

LAW 653. Climate Change Law and Policy. 3 Credits.

This course examines laws and policies in the United States over the last half century related to climate change, including international agreements that the nation has joined or considered joining.

LAW 655. Family Law. 3 Credits.

Marriage and its legal consequences, divorce and its financial consequences; establishing the parent-child relationship; child custody and child support; jurisdiction and choice of law issues at divorce; legal regulation of marriage; rights of unmarried cohabitants.

LAW 656. Elder Law. 3 Credits.

Topics include social security and pensions; health care decision-making, including the right to die, living wills, and durable powers of attorney for health care; planning for health care financing, including alternate living arrangements and financing through private resources, Medicare and Medicaid; regulation of retirement facilities and nursing homes; and protection of disabled adults through guardianships, conservator-ships, and related mechanisms. Covers the basic and comprehensive writing requirements.

LAW 658. Local Government Law. 3 Credits.

Uses DeTocqueville and Madison to frame the issue of decentralization versus centralization in governmental structure. Course materials are divided into three sections: 1) vertical governmental organization--the relationships between cities and state governments and the relation of both to the federal government; 2) horizontal governmental relations--how neighboring cities deal with one another on public school funding, exclusionary zoning, regional planning, and other areas; 3) internal relationship between cities and their citizens--voting systems, when citizens can sue a city, referenda, and initiatives.

LAW 659. Labor Law. 3 Credits.

Analysis of the National Labor Relations Act and the Oregon Labor Relations Act; the right of self-organization; selection of the representative by election and by other means; unit determination; bargaining in good faith; remedies for unfair labor practices; judicial review; strikes, boycotts, and lockouts under various labor relations acts; concerted activities; and roles of courts and labor agencies.

LAW 660. Employment Law. 3 Credits.

Examines individual rights in the workplace, including federal and state statutes. Use of questionnaires, polygraph legislation, drug and other medical tests; employment discrimination (Title 7); disability discrimination; family leave statutes; and a variety of working conditions are covered, including harassment, workplace privacy, and free speech as well as the Occupational Safety and Health Act. The doctrine of at-will discharge and whistle-blower legislation are included.

LAW 661. Remedies. 3 Credits.

Remedies available for prevention of redress of civil wrongs; includes monetary damages; restitutionary remedies such as tracing, constructive trusts, equitable liens, and injunctions.

LAW 662. Jurisprudence. 3 Credits.

Topics may include examination of important conceptual theories of law--legal positivism, natural law, legal realism; the relation of law and morality; theories of justice: economic, Kantian, utilitarian; the Critical Legal Studies movement; philosophical aspects of legal issues; abortion and punishment; feminist theories of law; and moral constraints of the practice of law.

LAW 664. Administrative Law. 3 Credits.

Analysis of judicial review of administrative action, including presumptions, standing, ripeness, exhaustion, and questions of fact and law; the process of proof in adjudicatory hearings, including official notice, evidentiary considerations, and investigation; the process of decision in adjudicatory hearings, including separation of function, bias, and ex parte communication; procedural distinctions between rule making and adjudication.

LAW 665. Securities Regulation. 2-3 Credits.

Examines the federal statutes and regulations that affect the initial and secondary distribution of securities. Emphasis is placed on the Securities Act of 1933, the Securities Exchange Act of 1934, and the integrated disclosure system now largely in place.

LAW 667. Copyrights. 3 Credits.

Virtually any creative product (other than inventions) that originates with the author can be protected by copyright. Comprehensive federal copyright statute is built upon extensive judicial interpretations through case law. Considers creations, ownership, and transfer of copyright interests and the rights accorded to copyright owners to make copies and derivative works and to distribute, perform, and display the work. Addresses the basic principles of trademark law.

LAW 668. Land Use Law. 2-3 Credits.

Surveys the function, operation, and legal impact of state and local public planning and land-use control laws, ordinances, and administrative growth-control techniques; transfer of developmental rights; zoning; variances; conditional-use permits; and nonconforming uses. Considers newer state-level land-use control devices, such as state environmental impact assessment acts (e.g., in California) and statewide land-use planning laws (e.g., in Oregon).

LAW 669. Water Resources Law. 2,3 Credits.

Reparian and appropriation water law systems, federal and state power over water resources, transfer of water rights, groundwater management, public water rights, including the public trust doctrine, and environmental constraints on water use.

LAW 671. International Law. 2-3 Credits.

Justification for state actions labeled rules of law; sources and evidence of a law between states; statehood; treaties; state responsibility and authority; individuals in transnational situations; international cooperation; protection of human rights; and use of military force.

LAW 673. Patent Law and Policy. 2,3 Credits.

Developments in patent law including patentable subject matter; requirements for patentability and infringement; the process of obtaining and enforcing a patent; and contemporary controversies in patent law, such as ethical and economic objections to biotechnology and software patents.

LAW 674. Intellectual Property Licensing. 3 Credits.

Course explores business, legal, and negotiating issues in intellectual property licensing agreements. Students gain an overview of intellectual property law, pertinent areas of contract law, business factors, and evaluation issues.

LAW 675. Legal Writing. 1-3 Credits.

Research and writing supervised by a faculty member. Typically 2 credits, but never more than 3, are awarded for a writing project in one semester.

Repeatable 99 times

LAW 678. Indian Law. 2-3 Credits.

Provides students with an understanding and overview of the fundamental principles of American Indian law.

LAW 679. Ocean and Coastal Law. 3 Credits.

Surveys federal, state, and international laws governing the use and protection of ocean and coastal resources including relevant judicial decisions, administrative regulations, and management plans.

LAW 680. Federal Income Tax I. 3 Credits.

Statutory, judicial, and administrative material related to individual income tax—concepts of income, deductions, credits, tax accounting, basis, and capital gains and losses.

LAW 681. Federal Income Tax II. 3 Credits.

Tax treatment of partners and partnerships, corporations, and shareholders.

Requisites: Prereq: LAW 680.

LAW 683. Estate Planning. 3 Credits.

Presents problems in estate analysis, planning, and execution; planning an estate from the interview stage to the drafting of wills and trusts to implement the estate plan.

Requisites: Prereq: LAW 637.

LAW 684. Criminal Investigation. 3 Credits.

Examines the regulation of law enforcement investigatory practices-- searches and seizures, the eliciting of confessions, and lineups and other identification procedures. Course materials analyze various constitutional and statutory constraints on law enforcement practices, and deal extensively with landmark federal constitutional cases such as *Miranda v. Arizona*.

LAW 685. Criminal Adjudication. 3 Credits.

Examines the adjudicative part of criminal procedure; covers the decision to charge, bail and pretrial release, grand juries and preliminary hearings, discovery, pretrial motions, plea bargaining, jury trials, appeals, and former jeopardy.

LAW 690. International Environmental Law. 2,3 Credits.

Investigates treaty and customary principles of international law regarding environmental protection. Covers problems of protecting the international environmental commons, transboundary pollution, and international interest in national environmental resources.

LAW 693. Human Rights and Environment. 3 Credits.

Environmental rights, increasingly recognized as a new category of human rights as well as an application of existing rights, are both substantive and procedural. Presents recent developments in international law and national law in various countries in Europe, Africa, Asia, and the Americas. Examines international instruments, national constitutions, and legislation. Discussion includes novel international court cases that interpret and apply these rights.

LAW 694. Professional Sports Law. 2-3 Credits.

Is the NFL an illegal cartel? What rights do players and unions have? Explores the regulation of professional leagues, players, teams, coaches, and agents.

LAW 695. Amateur Sports Law. 2-3 Credits.

Are student athletes pampered or victimized? What has Title IX accomplished? What's next for the National Collegiate Athletic Association? Explores the regulation of intercollegiate and interscholastic sports.

LAW 696. Sports Licensing. 1 Credit.

A practical look into the world of sports licensing. The focus will be on examining real-world contracts and the contexts in which they were negotiated.

LAW 697. Consumer Law. 3 Credits.

Overview of major consumer protection laws and concepts, including false advertising, consumer privacy, identity theft, credit reporting, home purchases, credit disclosures, and loan regulations.

LAW 698. Trademark Law. 3 Credits.

Introduces trademark law, focusing on U.S. federal trademark law, and examines common law trademarks and unfair competition as well as international dimensions of trademark law.

LAW 704. Internship: [Topic]. 1-12 Credits.

Hollywood Externship, Federal Judicial Internship.

Repeatable 99 times

LAW 707. Seminar: [Topic]. 1-6 Credits.

Recent topics are Advanced Appellate Advocacy; Interviewing and Counseling; Journal of Environmental Law and Litigation; Legislative Issues Workshop; Moot Court Board; Moot Court Competition; Law Review; Oregon Review of International Law, Trial Practice.

Repeatable 99 times

LAW 712. Business Law Clinic. 3 Credits.

Students represent companies who need legal assistance in forming and operating their businesses under the supervision of an attorney. Includes a weekly seminar.

Requisites: Pre- or coreq: LAW 620.

LAW 714. Judicial Externship [Topic]. 1-12 Credits.

Externship at the Lane County Circuit Court. Students conduct research, write legal memoranda, draft opinions and generally participate in the daily operation of the court.

Repeatable 99 times

LAW 715. Gender-Based Violence and the Law. 2 Credits.

This class focuses on domestic abuse, sexual assault, and stalking and the diverse array of laws that addresses those topics.

LAW 716. Advocacy Oral Argument. 1 Credit.

This course provides advanced instruction on oral appellate advocacy. Oral argument offers an advocate the only opportunity to hear a court's concerns and provide persuasive response. Over the course of one week, students will develop and present components of an oral argument. At the end of the week, students will present a final oral argument to a three-judge moot court panel.

Requisites: Prereq: LAW 622, LAW 623.

LAW 717. Civil Rights Law. 3 Credits.

This course explores the evolution of civil rights laws in the United States, with a focus on race, gender, and sexuality. Students will analyze landmark cases, legislation, and policy debates, while examining contemporary issues related to civil rights litigation and its impact on society.

LAW 718. Legal Reasoning and Analysis. 3 Credits.

This course is designed to allow you to practice with fundamental lawyering skills in a variety of different practice situations and on the bar exam.

LAW 719. Plea Bargaining. 2 Credits.

This seminar explores plea bargaining and its role within criminal justice, with special focus on debates over the utility, coercive aspects, ethics, constitutionality of the practice, and possibilities of reform.

LAW 722. Alternative Dispute Resolution Litigation Strategy. 2 Credits.

Provides knowledge, tools and skills for lawyers to settle cases, help clients make an informed decision about settlement, and identify appropriate processes.

LAW 724. Arbitration. 2-3 Credits.

This course introduces students to the theory and practice of arbitration. Students will learn the statutory framework and caselaw for arbitration in domestic and international contexts.

LAW 725. Mediation. 3 Credits.

This course introduces students to the theory and practice of mediation. In an experiential format, students will learn how to manage the stages of a mediation process.

LAW 726. International Sports Law I. 1 Credit.

An overview of the law and structure of the organizations that govern international sports, including FIFA, the International Olympic Committee, World Anti-Doping Association, and Court of Arbitration for Sport.

LAW 727. International Sports Law II. 1 Credit.

A trip to Europe during J-Term to meet with and learn from foreign sports lawyers at the International Olympic Committee, World Anti-Doping Association, Court of Arbitration for Sport, and others.

Requisites: Prereq: LAW 726.

Repeatable 1 time for a maximum of 2 credits

LAW 728. Advanced Appellate Advocacy. 3 Credits.

This simulation course teaches students practical skills for engaging in appellate advocacy. Students focus on structuring arguments, writing and editing appellate briefs, and doing oral argument.

LAW 730. Intensive Writing. 2 Credits.

Introduces students to ways in which lawyers communicate and gives students the opportunity to more extensively study the mechanics of effectively communicating legal analysis.

LAW 731. Writing in Law Practice. 2 Credits.

Provides students with opportunities to develop practice-oriented writing skills in a variety of contexts.

LAW 732. Intensive Legal Writing. 3 Credits.

Students produce documents in a wide variety of practice settings, including office memoranda, contracts, and client letters. Students receive extensive feedback and opportunities to revise their work.

LAW 733. Advanced Uniform Commercial Code. 3 Credits.

Covers property-based aspects of business transactions including secured loans, set-off, and ownership and transfer of investments, from advanced U.S., international, and comparative standpoints.

Requisites: Prereq: Secured Transactions or Fundamentals of Loans or equivalent.

LAW 734. Start-Up Businesses. 2 Credits.

This course familiarizes students with common issues arising in day-to-day representation of startup businesses, ranging from entity choice, commercial issues, key policies to financings, exits and crisis management.

Requisites: Prereq: LAW 620.

LAW 735. Sustainable Business. 3 Credits.

This course reviews the impact of laws and social norms on the sustainability of businesses. Students will learn how business leaders, investors, legislators, regulators and other stakeholders can use legal mechanisms—regulations, fines or fees, tax incentives, tax penalties, and corporate governance rules and structures, as well as social norms—to encourage businesses to operate more sustainably.

LAW 739. Writing Colloquium. 1-2 Credits.

Students give and receive feedback on writing in a workshop setting with participants discussing each others' work. Student will explore theme, structure, and style as they learn to critique writing.

LAW 740. Innovations in Criminal Justice. 1 Credit.

Focuses on advanced approaches to the reduction of recidivism in the federal criminal justice system. Discussion centers on the use of therapeutic jurisprudence grounded in evidence-based practice.

LAW 742. Leadership Practices for Professional Success. 1 Credit.

Examines leadership theories and models. Through intensive readings, exercises, introspection, and open discussion, participants develop workable insights into their own leadership styles and how to improve them.

LAW 746. Law and Development. 2-3 Credits.

This course explores the relationship between theories of development and legal knowledge. Students tease out the legal theory inherent in development proposals and socio-economic theories informing law development proposals.

LAW 747. Human Rights. 3 Credits.

The class leads students through a thorough discussion of foundational issues in international human rights law and activism.

LAW 749. Immigration Law and Policy. 3 Credits.

Covers statutory, constitutional, and administrative law and policy issues relating to foreign nationals and their relationship with the U.S. government.

LAW 760. Negotiation. 3 Credits.

Explores how negotiations work, what makes negotiators effective, and why negotiations fail. Focuses on analyzing and improving negotiation skills.

LAW 761. Law Journals: [Topic]. 1-3 Credits.

Welcome to law review! As you already know, working on a law review/journal is very demanding. It is also a unique opportunity in law school to develop your project management skills and work with others.

Repeatable 4 times for a maximum of 10 credits

LAW 762. Criminal Defense Clinic. 3 Credits.

You will represent Defendants in Misdemeanor Criminal Cases, under supervision, including meeting clients, reviewing police reports, discussing alternatives and appearing in Circuit Court for Motions, Hearings and possible Jury Trials.

Requisites: Prereq: law Students must be Court Certified so they may appear in Court. Evidence, Professional Responsibility and Constitutional Law are strongly suggested.

LAW 764. Criminal Prosecution Clinic. 3 Credits.

Students appear in court on behalf of the state; they prepare and argue legal motions and try cases; and they learn Oregon criminal law and procedure.

Requisites: Prereq: Evidence and Legal Profession are required; Trial Practice is recommended.

LAW 765. Advanced Criminal Prosecution Clinic. 2 Credits.

Students appear in court on behalf of the state; they prepare and argue legal motions and try cases; and they learn Oregon criminal law and procedure.

Requisites: Prereq: LAW 764.

LAW 766. Domestic Violence Civil Clinic I. 3 Credits.

Students provide necessary legal services to survivors of domestic violence, with an emphasis on family law.

LAW 767. Domestic Violence Civil Clinic II. 2 Credits.

Students provide necessary legal services to survivors of domestic violence, with an emphasis on family law.

Requisites: Prereq: LAW 766.

LAW 768. Domestic Violence Protective Order Clinic I. 3 Credits.

Provides students with the opportunity to effectively serve survivors of domestic violence in protective-order litigation through mock exercises and real-world client representation.

LAW 769. Domestic Violence Protective Order Clinic II. 2 Credits.

Provides students who have completed the basic clinic with additional opportunities to represent survivors of domestic violence in more complex protective-order proceedings.

Requisites: Prereq: LAW 768.

LAW 770. Environmental Law Clinic. 3 Credits.

Under the supervision of an attorney, students work with non-profit clients in the prosecution of primarily federal environmental cases. Students will join new or existing cases, and conduct legal research and writing to develop memoranda, draft sections of complaints or briefs, and review evidence.

LAW 771. Advanced Environmental Law Clinic. 2 Credits.

In the Advanced Environmental Law Clinic, students work one-on-one with attorneys on aspects of an ongoing or prospective case (or cases), with emphasis on research and writing.

Requisites: Prereq: LAW 770.

LAW 773. Nonprofit Clinic. 4 Credits.

In this course students, working in interdisciplinary teams, perform as consultants to several Oregon nonprofit boards of directors. Students will engage with expert consultants, executive directors, and client boards of directors and work to formulate and deliver a meaningful governance assessment to two 501(c)(3) organizations.

LAW 780. LLM Seminar: Writing. 2 Credits.

Master of laws students will explore the United States legal system and legal profession through in-class workshops, legal research and writing, and oral presentations.

LAW 781. LLM Seminar: In Practice. 2 Credits.

Students studying for a master of laws (LLM) degree explore professional development topics and develop practice skills through in-class workshops, legal writing, a simulated symposium, and negotiation exercises.

LAW 782. Introduction to American Law and Practice. 2-3 Credits.

This class is an introduction to the legal system and the law of the US. Planned specifically for students in the LLM program who are lawyers and legal scholars from countries other than the US, the class aims to provide the context and background knowledge necessary to fully participate in graduate legal education.

LAW 783. LLM Advanced and Persuasive Legal Writing. 2 Credits.

This course is specifically designed for international LLM students. The course provides skills in legal writing and research necessary to participate in graduate legal education in the US.

LAW 784. Comparative Law. 2 Credits.

Comparative Law offers an introduction to Global Comparative Law, which aims at comparing legal solutions adopted on a regional, international, and transnational level.

LAW 785. American Legal System. 2 Credits.

American Legal System strives to provide perspective and understanding of the U.S. legal system's basic legal concepts and mechanics. This class will cover topics including, but not limited to, government structure, the judicial system, civil procedure, constitutional law, torts, contracts, criminal law, and procedure.

LAW 791. Contemporary Issues in American Indian Law. 2 Credits.

Provides in-depth study of current issues in American Indian law and US public policy regarding Native Americans.

LAW 792. Comparative Law of Indigenous Peoples. 2 Credits.

Examines the historical and contemporary legal and policy treatment of indigenous peoples in select countries with significant indigenous populations.

LAW 793. Environmental Law. 3 Credits.

Overview of environmental law and policy, common-law doctrines, administrative rulemaking, environmental federalism, National Environmental Policy Act, Endangered Species Act, the regulation of hazardous waste, air and water pollution.

LAW 794. Natural Resources Law. 3 Credits.

Provides a foundation in environmental law. Spans international, federal, state, and local jurisdiction, interfacing with classic environmental law (pollution statutes).

LAW 795. Public Trust Law. 2 Credits.

Explores public trust law, which originated as judge-made law and has been enshrined in many statutes and constitutions in the United States and abroad.

LAW 796. Food, Farming, and Sustainability. 3 Credits.

Examines how laws structure processes of food production, distribution, and consumption; surveys food and agricultural laws in review of broader questions of ecological sustainability and commerce.

LAW 797. Energy and the Law Seminar. 2 Credits.

Introduces students to the policies and laws governing energy in the United States. The class covers federal and state jurisdiction, renewable energy laws and policies, regulation of investor-owned utilities, public power, transmission, and the laws that govern the resources used to generate electricity.

Library (LIB)

Courses

LIB 199. Special Studies: [Topic]. 1-5 Credits.

Introduction to general library resources and to subject-related library resources.

Repeatable 99 times when topic changes

LIB 350M. Humanities Research Data Management. 4 Credits.

This course provides students with theoretical and practical experience in collecting, processing, archiving, and publishing humanities data (images, video, sound, text, maps, etc.) gathered from galleries, libraries, archives, and museums (GLAMs). Multilisted with DSCI 350M.

Equivalent to: DSCI 350M

LIB 399. Special Studies: [Topic]. 1-5 Credits.

Introduction to general library resources and to subject-related library resources.

Repeatable 99 times when topic changes

LIB 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 6 times

LIB 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

LIB 407. Seminar: [Topic]. 1-5 Credits.

Topics are Library Resources, Bibliography.

Repeatable 6 times

LIB 408. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LIB 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LIB 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 6 times

LIB 507. Seminar: [Topic]. 1-5 Credits.

Topics are Library Resources, Bibliography.

Repeatable 6 times

LIB 508. Workshop [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LIB 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 6 times

LIB 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 6 times

LIB 607. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

LIB 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 6 times

Equivalent to: LIB 410

Linguistics (LING)

Courses

LING 101. Introduction to Language. 4 Credits.

Nontechnical introduction to language. Issues of general concern such as language attitudes; language and legislation, nationalism, gender; language learning; and human language versus animal communication.

Additional Information:

Social Science Area

LING 144. Learning How To Learn Languages. 4 Credits.

The course will focus on how to learn languages, empowering students to become more self-directed and effective learners. Topics will include psycholinguistics, sociolinguistics, diversity in linguistic structures and learning situations (heritage vs. second languages), plus cognitive and metacognitive strategies for learning languages and in general.

Additional Information:

Social Science Area

LING 150. Structure of English Words. 4 Credits.

Word structure and derivation in English Greek- and Latin-derived vocabulary; Germanic- and Romance-derived derivational rules. Understanding the dynamic structure of the English lexicon; prefixes, suffixes, and morphology.

Additional Information:

Arts Letters Area

LING 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

LING 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LING 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LING 199L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

LING 201. Language and Power in the United States. 4 Credits.

Explores the nature of language, dialects, accents, and multilingualism, and relates these to issues of political, educational, and other forms of social power in the United States.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

LING 211. Languages of the World. 4 Credits.

Survey of the variability and distribution of the languages of the world in terms of linguistic typology, genetic relationships, and geographic location.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

LING 225. Writing Systems. 4 Credits.

Surveys historical and current systems for encoding languages through writing. Examines the different systems and the advantages and disadvantages of these systems, evaluating them in their historical development.

Additional Information:

Arts Letters Area

LING 294. Child Language. 4 Credits.

Systematic survey of language structure and representation presented through the lens of language acquisition. Sounds, words, phrases, discourse, and pragmatics in typically and atypically developing children.

Additional Information:

Social Science Area

LING 296. Language and Society in the United States. 4 Credits.

English and non-English language diversity in the U.S., including regional varieties, African American English, Latino English. Explores language and social structure, policy, and educational issues.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

LING 297. Introduction to Bilingualism in the United States. 4 Credits.

The linguistic, cognitive, cultural, and social dimensions of individual and societal bilingualism, which dispel common myths about the way bilinguals develop and use their two or more languages in the United States.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

LING 301. Introduction to Linguistics Analysis. 4 Credits.

Study of human language and linguistics as a scientific and humanistic discipline. Lexicon, phonology, syntax, semantics, language change. Basic analytic techniques for drawing linguistic generalizations.

Additional Information:

Social Science Area

LING 302. Introduction to Linguistic Behavior. 4 Credits.

Study of language as a human behavior, focusing on developmental, cognitive, and social aspects of language use. Theories and methods involved in empirical, quantitative linguistics.

Additional Information:

Social Science Area

LING 311. Phonetics and Phonology. 4 Credits.

The purpose of this class is to introduce students to basic concepts of sounds and sound structure in language. Students will learn to describe sounds of the world's languages in terms of their articulatory and acoustic properties.

Requisites: Prereq: LING 301.

LING 312. Morphosyntax. 4 Credits.

This course will introduce you to the building blocks that every language uses to produce an infinite number of possible utterances. Topics include: how words are formed, how they're combined, and how they relate to each other in phrases and sentences.

Requisites: Prereq: LING 301.

Additional Information:

Social Science Area

LING 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LING 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LING 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LING 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

LING 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LING 406. Field Studies: [Topic]. 1-21 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

LING 407. Seminar: [Topic]. 1-5 Credits.

Topics include history of linguistics, language contact, morphology, discourse pragmatics, conversational analysis, acoustic phonetics, psycholinguistics, language acquisition, applied linguistics..

Repeatable 99 times

LING 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LING 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LING 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LING 411. Phonetics. 4 Credits.

Explore how speech sounds are produced and perceived through the analysis of physiological, articulatory, and acoustic features. Learn about how sounds are acquired and change through time. Skills will be applied to clinical, educational, professional, and social settings.

Requisites: Prereq: LING 311.

LING 415. Semantics. 4 Credits.

Survey of the fundamentals of semantic theory from traditional formal logic to modern cognitive approaches. Additional coverage of fundamental notions in pragmatics.

Requisites: Prereq: LING 301.

LING 416. Language and Cognition. 4 Credits.

How human thought is coded by language. Topics include meaning, categorization; linguistic units and speech behavior; language use and memory; language comprehension and production.

Requisites: Prereq: LING 301 or LING 302.

LING 420. Language, Mind and Society. 4 Credits.

Exploration of the relationship between language, human cognition, and social dynamics.

LING 430. Research Methods for Applied Linguistics. 4 Credits.

Introduces students to a number of common research practices in the field of applied linguistics, including research design, ethics, and collecting and analyzing quantitative and qualitative data. Students will gain hands-on experience with analysis software to assist their research.

Requisites: Prereq: LING 301.

LING 431. Statistical Methods in Linguistics. 4 Credits.

This course serves as a hands-on introduction to the state of the art in statistical analysis of linguistic data. Common pitfalls in statistical analysis and the challenges posed by linguistic data are reviewed. Topics covered are mixed-effects regression models, conditional inference trees and model averaging.

LING 432. Interdisciplinary Cognitive Sciences. 4 Credits.

This course emphasizes the interdisciplinary study of the human mind through psychology, linguistics, neuroscience, philosophy, and computer science. Students will gain a comprehensive view of cognitive science, practice critical thinking, question theories, and analyze research ideas and assumptions. This course is required for all students completing the Interdisciplinary Cognitive Sciences (ICS) minor.

LING 435. Advanced Morphology. 4 Credits.

Learn how words are put together in the world's languages. This course teaches about the basic building blocks for creating meaning in the languages of the world. It covers topics like prefixes, suffixes, compounding, the profoundly different kinds of grammatical meaning that different languages mark, and how words agree with each other.

Requisites: Prereq: LING 312.

LING 444. Second-Language Acquisition. 4 Credits.

Introduction to cognitive and social processes of acquiring second languages.

LING 450. Introduction to Phonology. 4 Credits.

Study of sound systems in language. Phonemic contrasts, allophonic variation, and complementary distribution in relation to lexical coding of words, phonological processes operating at the segmental and suprasegmental levels.

Requisites: Prereq: LING 311.

LING 451. Advanced Syntax. 4 Credits.

Learn how sentences are put together in the world's languages. This course explores the wide variety of human syntactic systems, and how people use those systems to create meaning. Topics include the grammar of word order, simple and complex clauses, tense systems, and discourse.

Requisites: Prereq: LING 312.

LING 455. Linguistic Research: [Topic]. 4 Credits.

This is a seminar course where faculty center the topic based on their research area of specialization. Students will read and discuss primary literature (research articles and book chapters from edited books and monographs), present them in class, and write a research paper as the requirements.

Repeatable 4 times for a maximum of 20 credits when topic changes

LING 460. Historical Linguistics. 4 Credits.

Explore how language changes over time. Discover how all levels of linguistic structure—like phonology, morphology, syntax, and semantics—evolve and interact. Learn methods for reconstructing proto-languages, and explore what they can teach us about human history.

Requisites: Prereq: LING 311.

LING 491. Sociolinguistics. 4 Credits.

Major approaches and frameworks to the study of sociolinguistics; social-cultural variation in language use and its relationship to change; attitudes about variations, multilingualism.

Requisites: Prereq: LING 301 or LING 302.

Additional Information:

Cultural Literacy: Global Perspectives

LING 493. Corpus Linguistics. 4 Credits.

Corpus-based approaches to the study of natural, human language, focusing on the use of computer-based methods to conduct empirical analyses of written and spoken language. Developing skills in computer programming for linguistic analysis.

Requisites: Prereq: LING 301 or LING 302.

LING 494. English Grammar. 4 Credits.

Survey of grammatical, syntactic, and morphological structures of English in terms of semantic and functional criteria. Students cannot receive credit for both ENG 209 and LING 494.

Equivalent to: ENG 209

LING 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LING 507. Seminar: [Topic]. 1-5 Credits.

Topics include history of linguistics, language contact, morphology, discourse pragmatics, conversational analysis.

Repeatable 99 times

LING 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LING 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LING 511. Phonetics. 4 Credits.

Explore how speech sounds are produced and perceived through the analysis of physiological, articulatory, and acoustic features. Learn about how sounds are acquired and change through time. Skills will be applied to clinical, educational, professional, and social settings.

LING 515. Semantics. 4 Credits.

Survey of the fundamentals of semantic theory from traditional formal logic to modern cognitive approaches. Additional coverage of fundamental notions in pragmatics.

LING 516. Language and Cognition. 4 Credits.

How human thought is coded by language. Topics include meaning, categorization; linguistic units and speech behavior; language use and memory; language comprehension and production.

LING 520. Language, Mind and Society. 4 Credits.

Exploration of the relationship between language, human cognition, and social dynamics.

LING 530. Research Methods for Applied Linguistics. 4 Credits.

Introduces students to a number of common research practices in the field of applied linguistics, including research design, ethics, and collecting and analyzing quantitative and qualitative data. Students will gain hands-on experience with analysis software to assist their research.

LING 531. Statistical Methods in Linguistics. 4 Credits.

This course serves as a hands-on introduction to the state of the art in statistical analysis of linguistic data. Common pitfalls in statistical analysis and the challenges posed by linguistic data are reviewed. Topics covered are mixed-effects regression models, conditional inference trees and model averaging.

LING 532. Interdisciplinary Cognitive Sciences. 4 Credits.

This course emphasizes the interdisciplinary study of the human mind through psychology, linguistics, neuroscience, philosophy, and computer science. Students will gain a comprehensive view of cognitive science, practice critical thinking, question theories, and analyze research ideas and assumptions. This course is required for all students completing the Interdisciplinary Cognitive Sciences (ICS) minor.

LING 535. Advanced Morphology. 4 Credits.

Learn how words are put together in the world's languages. This course teaches about the basic building blocks for creating meaning in the languages of the world. It covers topics like prefixes, suffixes, compounding, the profoundly different kinds of grammatical meaning that different languages mark, and how words agree with each other.

LING 544. Second-Language Acquisition. 4 Credits.

Introduction to cognitive and social processes of acquiring second languages.

LING 550. Introduction to Phonology. 4 Credits.

Study of sound systems in language. Phonemic contrasts, allophonic variation, and complementary distribution in relation to lexical coding of processes operating at the segmental and suprasegmental levels.

LING 551. Advanced Syntax. 4 Credits.

Learn how sentences are put together in the world's languages. This course explores the wide variety of human syntactic systems, and how people use those systems to create meaning. Topics include the grammar of word order, simple and complex clauses, tense systems, and discourse.

LING 555. Linguistic Research: [Topic]. 4 Credits.

This is a seminar course where faculty center the topic based on their research area of specialization. Students will read and discuss primary literature (research articles and book chapters from edited books and monographs), present them in class, and write a research paper as the requirements.

Repeatable 4 times for a maximum of 20 credits when topic changes

LING 560. Historical Linguistics. 4 Credits.

Explore how language changes over time. Discover how all levels of linguistic structure—like phonology, morphology, syntax, and semantics—evolve and interact. Learn methods for reconstructing proto-languages, and explore what they can teach us about human history.

LING 591. Sociolinguistics. 4 Credits.

Major approaches and frameworks to the study of sociolinguistics; social-cultural variation in language use and its relationship to change; attitudes about variations, multilingualism.

LING 593. Corpus Linguistics. 4 Credits.

Corpus-based approaches to the study of natural, human language, focusing on the use of computer-based methods to conduct empirical analyses of written and spoken language. Developing skills in computer programming for linguistic analysis.

LING 594. English Grammar. 4 Credits.

Survey of grammatical, syntactic, and morphological structures of English in terms of semantic and functional criteria.

LING 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

LING 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

LING 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

LING 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

LING 606. Practicum: [Topic]. 1-8 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 3 times for a maximum of 9 credits

LING 607. Seminar: [Topic]. 1-5 Credits.

Topics include syntax, semantics, discourse pragmatics, stylistics, psycholinguistics, neurolinguistics.

Requisites: Prereq: LING 550, LING 552.

Repeatable 99 times

LING 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

LING 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

LING 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

LING 614. Linguistic Theory: Phonology. 4 Credits.

Detailed investigation of phonological theory with emphasis on experimental evidence. Topics may include sound systems and their typology, morphophonology, and the acquisition of phonological structures.

Requisites: Prereq: LING 550.

LING 615. Linguistic Theory: Syntax. 4 Credits.

Issues in syntactic theory. Topics may include universals of semantic, pragmatic, and discourse function and their relation to syntax, syntactic typology and universals, formal models in syntactic description.

Requisites: Prereq: LING 452/552.

LING 616. Linguistic Theory: Semantics. 4 Credits.

Detailed investigation of issues in semantic and pragmatic theory. Topics may include universals of lexical semantics and discourse pragmatics and their interaction.

Requisites: Prereq: LING 515.

LING 660. Historical Syntax. 4 Credits.

Topics in the study of syntactic change.

Requisites: Prereq: LING 452/552, 460/560 or equivalent.

Management (MGMT)

Courses

MGMT 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

MGMT 225. Introduction to Entrepreneurship. 4 Credits.

Understanding of the historical and socio-economic context of entrepreneurship and how entrepreneurial ecosystems function and grow; fundamentals of entrepreneurship and business model development.

MGMT 250. Introduction to Sustainable Business. 4 Credits.

Examination of the challenges and opportunities that the sustainability imperative presents to business. Focus on discussion of specific cases and pertinent issues to promote learning.

MGMT 311. Managing People in Organizations. 4 Credits.

Students learn the theories, empirical evidence, and best practices for managing people at work. Students cannot receive credit for both MGMT 311 and MGMT 311H.

Requisites: Prereq: MATH 241 and BA 308 or BA 308H.

Equivalent to: MGMT 311H

MGMT 311H. Managing People in Organizations. 4 Credits.

Students learn the theories, empirical evidence, and best practices for managing people at work. Students cannot receive credit for both MGMT 311 and MGMT 311H. Sophomore standing required.

Requisites: Prereq: MATH 241 and BA 308 or BA 308H.

Equivalent to: MGMT 311

MGMT 335. Launching New Ventures. 4 Credits.

Skills, behaviors, and knowledge necessary for creating and growing new ventures. Evaluating opportunities, developing growth strategies, obtaining venture financing, intellectual property, and building a management team.

Requisites: Prereq: BA 101Z.

MGMT 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MGMT 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

MGMT 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

MGMT 407. Seminar: [Topic]. 4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MGMT 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

MGMT 410. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Strategic Environmental Management, Technology and Innovation Management.

Repeatable 99 times when topic changes

MGMT 415. Human Resources Management. 4 Credits.

Management of employee relations by an organization. Hiring and developing a productive work force in the context of the legal and competitive environment.

Requisites: Prereq: MGMT 311.

MGMT 416. Organizational Development and Change Management. 4 Credits.

Organizational leaders face an accelerating pace of change in information technology, markets, and consumers. Focuses on how leaders create and sustain these organizational changes.

Requisites: Prereq: MGMT 311.

MGMT 417. Negotiation Strategies. 4 Credits.

Introduction to negotiation theory, distributive and integrative bargaining techniques, and alternative dispute resolution. Uses workshop format for in-class negotiation simulations.

Requisites: Prereq: MGMT 311.

MGMT 420. Managing in a Global Economy. 4 Credits.

Economic, political and cultural challenges facing international managers. Topics include developing competitive global strategies and organizations, international negotiations, building strategic alliances, cross-cultural teams, and international staffing.

Requisites: Prereq: MGMT 311.

MGMT 422. Sustainable Business Strategy and Implementation. 4 Credits.

Focus on strategic choice and implementation of initiatives to promote sustainability in business organizations. Exposure to approaches for both established companies and new ventures.

Requisites: Prereq: BA 101Z; MGMT 250 or MGMT 311.

MGMT 443. Life Cycle Assessment. 4 Credits.

Build foundations in technical sustainability analysis serving business strategy and operations. Learn tools and skills for firm- and product-level analysis.

Requisites: Prereq: BA 101Z, MGMT 250.

MGMT 455. Implementing Entrepreneurial Strategies. 4 Credits.

Fundamentals of entrepreneurship are applied to solve actual problems for real companies. Students will gain a thorough understanding of project management processes (agile, lean six sigma, sprints, etc.) and learn how to effectively execute a project from inception to final deliverable.

Requisites: Prereq: ACTG 340, MGMT 335, MKTG 445.

MGMT 460. Lean Launchpad Entrepreneurship. 4 Credits.

The overall goal of the Lean Launchpad Entrepreneurship class is to support students as they learn a methodology for scalable startups in two main areas: customer discovery and customer validation. This means learning not only how to discover and build out your original idea, but also to discover that this initial idea is only a small part of what makes a company successful. This "lean entrepreneurship" methodology will be valuable for the rest of your careers.

Requisites: Prereq: MGMT 335.

MGMT 461. Business of Food. 4 Credits.

The Business of Food provides a critical examination of the food industry, with a focus on how consolidation, power, innovation, sustainability, supply chain issues, and consumer/social trends play a role in what ends up on our plates.

Requisites: Prereq: MGMT 311 or BA 316.

MGMT 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MGMT 510. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Strategic Environmental Management, Technology and Innovation Management.

Repeatable 99 times when topic changes

MGMT 543. Life Cycle Assessment. 4 Credits.

Build foundations in technical sustainability analysis serving business strategy and operations. Learn tools and skills for firm- and product-level analysis.

MGMT 560. Lean Launchpad Entrepreneurship. 4 Credits.

The overall goal of the Lean Launchpad Entrepreneurship class is to support students as they learn a methodology for scalable startups in two main areas: customer discovery and customer validation. This means learning not only how to discover and build out your original idea, but also to discover that this initial idea is only a small part of what makes a company successful. This "lean entrepreneurship" methodology will be valuable for the rest of your careers.

MGMT 561. Business of Food. 4 Credits.

The Business of Food provides a critical examination of the food industry, with a focus on how consolidation, power, innovation, sustainability, supply chain issues, and consumer/social trends play a role in what ends up on our plates.

MGMT 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MGMT 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MGMT 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MGMT 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

MGMT 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MGMT 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MGMT 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

MGMT 610. Experimental Course: [Topic]. 1-5 Credits.

A recent topic is Sustainable Business Development.

Repeatable 99 times when topic changes

MGMT 612. Managing Individuals and Organizations. 3 Credits.

Design of high-performance organizations and internal systems. Analysis of team dynamics and group decision-making. Study of individual cognitive and leadership styles.

MGMT 614. Strategic Management. 3 Credits.

Analysis of industries and companies, development of competitive and cooperative strategies, analysis of the special demands of alternative social, technological, and international contexts.

MGMT 615. Leadership. 3 Credits.

Development of skills managers need to be effective leaders in organizations, including communicating, problem-solving, influencing, motivating, delegating, and resolving conflict.

MGMT 620. Managing Global Business. 3 Credits.

Focuses on the problems of operating across multiple political and cultural boundaries. Possible topics include corporate strategy, the role of multinational corporations, and international joint ventures.

MGMT 623. Negotiation. 3 Credits.

Negotiation theory including distributive and integrative bargaining techniques, economic complements, game theory, and alternative dispute resolution. Extensive in-class negotiation simulations.

MGMT 625. New Venture Planning. 3 Credits.

Students identify and research a business opportunity; develop and present a professional start-up business plan that includes market, competitor, cash flow, and financial analyses.

Requisites: Prereq: MGMT 635.

MGMT 635. Opportunity Recognition. 3 Credits.

Introduces the fundamentals of entrepreneurship, providing the tools necessary to successfully identify a true opportunity and to start and develop a new organization. Open only to MBA and MACTG majors.

MGMT 640. Sustainable Business Development. 3 Credits.

Focuses on corporate environmental management, drawing on economic and policy models, strategic analysis, and use of business cases. Issues facing small and mid-sized companies stressed.

MGMT 641. Industrial Ecology. 3 Credits.

Takes a systems approach to the design and manufacture of products and delivery of services with minimized ecological impact.

MGMT 645. New Venture Scaling. 3 Credits.

New Venture Scaling covers concepts and systems related to financial and operational challenges of scaling staff, activities, and sales and marketing efforts for rapid growth.

Requisites: Prereq: MGMT 625, MGMT 635.

MGMT 655. New Venture Execution. 4 Credits.

This course guides students as they build and execute on their entrepreneurial ideas.

Requisites: Prereq: MGMT 645.

Repeatable 1 time for a maximum of 8 credits

MGMT 690. Management Proseminar. 1 Credit.

Contemporary issues in management research. Includes visiting speakers, resident faculty members, and doctoral students discussing their research.

Marketing (MKTG)

Courses

MKTG 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

MKTG 311. Marketing Management. 4 Credits.

Product, price, promotion, and distribution decisions in consumer and industrial markets. Market segmentation, product positioning for goods and services. Marketing strategy and management. Product life cycles. Students cannot receive credit for both MKTG 311 and MKTG 311H.

Requisites: Prereq: BA 169Z, BA 308.

Equivalent to: MKTG 311H

MKTG 311H. Marketing Management. 4 Credits.

Explores marketing strategy and tactics for profit and nonprofit organizations including start-ups and global firms. Uses cases and projects; requires intense student participation. Students cannot receive credit for both MKTG 311 and MKTG 311H.

Requisites: Prereq: BA 169Z, BA 308.

Equivalent to: MKTG 311

MKTG 390. Marketing Research. 4 Credits.

Design, implementation, analysis, interpretation, and reporting of research for marketing decisions. Hands-on experience with techniques for data collection, statistical data analysis, and communication of results.

Requisites: Prereq: MKTG 311.

MKTG 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MKTG 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

MKTG 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

MKTG 407. Seminar: [Topic]. 4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MKTG 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

MKTG 410. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Marketing and Sustainability, Sales Management and Personal Selling.

Repeatable 99 times when topic changes

MKTG 415. Marketing Analytics. 4 Credits.

Covers three pillars of analytics—descriptive, predictive, prescriptive—within the marketing context. Linear and logistic regression, clustering, customer choice, conjoint, natural language processing, and machine learning methods to drive marketing decisions.

Requisites: Prereq: MKTG 311 or BA 317.

MKTG 420. Marketing Communications. 4 Credits.

Advertising, sales promotions, public relations, and personal selling. Emerging communication media. Legal regulations and ethical considerations in mass media advertising. Media planning and promotional budgets.

Requisites: Prereq: MKTG 311.

MKTG 435. Consumer Behavior. 4 Credits.

Applications of social science concepts to the understanding of consumers and to the optimal delivery of products and services.

Requisites: Prereq: MKTG 311.

MKTG 445. Entrepreneurial Marketing. 4 Credits.

Techniques for analyzing and developing new markets. Pricing, communicating, and distributing new products or services with limited resources. Developing marketing plans for new ventures.

Requisites: Prereq: MKTG 311 or BA 317, MGMT 335.

MKTG 465. Digital Marketing. 4 Credits.

This course provides a theoretical and practical understanding of digital marketing. Students will learn various digital marketing practices such as managing and executing search engine optimization campaigns, building an effective website, email marketing, social media strategies, online advertising, and converting clicks into purchases through an experiential learning approach.

Requisites: Prereq: MKTG 311 or BA 317.

MKTG 468. Marketing, Sustainability, and Ethics. 4 Credits.

This course focuses on sustainable marketing, broadly defined. We will define sustainability as any Environmental, Societal, or Governance (ESG) issue that affects the long-term outcomes of consumers, employees, the planet, and/or society. Students in this course will learn to develop sustainable marketing strategies in the process of evaluating firm behavior and predicting consumer and company behaviors that may serve as barrier to sustainable consumption.

Requisites: Prereq: one from MGMT 250, BA 317, MKTG 311.

MKTG 470. International Marketing. 4 Credits.

Analysis and development of marketing strategy and tactics for multinational and global markets.

Requisites: Prereq: one from BA 317, MKTG 311, MKTG 311H.

MKTG 490. Marketing Strategy. 4 Credits.

Capstone marketing course. Primary focus on developing and implementing marketing strategies and determining their impact on customer satisfaction and profitability.

Requisites: Prereq: MKTG 390 or MKTG 415.

MKTG 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MKTG 510. Experimental Course: [Topic]. 1-4 Credits.

A recent topic includes Marketing and Sustainability.

Repeatable 99 times when topic changes

MKTG 515. Marketing Analytics. 4 Credits.

Covers three pillars of analytics—descriptive, predictive, prescriptive—within the marketing context. Linear and logistic regression, clustering, customer choice, conjoint, natural language processing, and machine learning methods to drive marketing decisions.

MKTG 565. Digital Marketing. 4 Credits.

This course provides a theoretical and practical understanding of digital marketing. Students will learn various digital marketing practices such as managing and executing search engine optimization campaigns, building an effective website, email marketing, social media strategies, online advertising, and converting clicks into purchases through an experiential learning approach.

MKTG 568. Marketing, Sustainability, and Ethics. 4 Credits.

This course focuses on sustainable marketing, broadly defined. We will define sustainability as any Environmental, Societal, or Governance (ESG) issue that affects the long-term outcomes of consumers, employees, the planet, and/or society. Students in this course will learn to develop sustainable marketing strategies in the process of evaluating firm behavior and predicting consumer and company behaviors that may serve as barrier to sustainable consumption.

MKTG 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MKTG 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MKTG 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MKTG 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

MKTG 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MKTG 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MKTG 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

MKTG 610. Experimental Course: [Topic]. 1-5 Credits.

Recent topics include New Product Development, Brand Strategy.

Repeatable 99 times when topic changes

MKTG 612. Marketing Management. 3 Credits.

Marketing Management addresses market analysis and segmentation, targeting, and positioning. Emphasis is on marketing strategies designed to deliver superior customer value and achieve organizational objectives.

MKTG 660. Marketing Research. 3 Credits.

Marketing research as a tool for decision-making. Planning research projects; design, measurement, experimental and nonexperimental techniques, analysis and interpretation of data; reporting research results.

Requisites: Prereq: completion of first-year MBA core.

MKTG 665. Marketing Strategy. 3 Credits.

Relationship between marketing and other functional areas of a business. Emphasis on case analysis as a means of acquiring both planning and operational skills.

Requisites: Prereq: completion of first-year MBA core.

MKTG 668. Strategic Brand Management. 3 Credits.

This course will explore a range of issues related to the strategic management of brands. After building a fundamental understanding of the importance of brands and their core characteristics, we will focus on four key aspects of brand management – building/managing brands, leveraging brands, identifying brands / measuring their equity, and protecting brands.

MKTG 687. Theory and Research in Marketing Management. 3 Credits.

Application of marketing concepts and of economics, management science, and behavioral science to the management of the product, price, promotion, and distribution variables.

Requisites: Prereq: doctoral standing.

MKTG 689. Theory and Research in Consumer Behavior. 3 Credits.

The applicability of behavioral theories and methodologies to the understanding of the consumption process.

Requisites: Prereq: doctoral standing.

Materials Science and Technology (MSTC)

Courses

MSTC 231. Fundamentals of Materials in Technology I. 4 Credits.

Fundamental principles necessary to understand structure-property relations in materials. Key concepts from physics, general chemistry, and mathematics are covered to instill core materials science subject matter and introduce knowledge of challenges in technology requiring innovation in modern materials. Included are thermodynamic concepts of structure from bonding to microstructure, and how to apply these interrelationships between structure and properties in technology relevant materials, diffusion processes, and gain competency in modern programming languages for data analysis. Sequence with MSTC 232.

Requisites: Coreq: CH 224H, MATH 251Z.

MSTC 232. Fundamentals of Materials in Technology II. 4 Credits.

Continuation of fundamental principles necessary to understand structure-property relations in materials. In this second course (of the two-course sequence), the student will develop a fundamental understanding of defects in solids and how those, along with structure and bonding, govern, mechanical, thermal, electrical, optical, magnetic, and chemical properties of materials used in key technological applications such as computing, energy, and communications, and those used in structural and mechanical engineering. Sequence with MSTC 231.

Requisites: Prereq: CH 224H, MATH 251Z, MSTC 231.

MSTC 431. Thermal Physics of Advanced Materials. 4 Credits.

This course is the first one in a two-course sequence that teaches and applies a foundational understanding of thermodynamics, kinetics, and transport to understand how materials are formed and what governs the time evolution of materials processes. This course focuses on the thermodynamic properties of materials, i.e. how concepts of energy minimization determine the equilibrium phases and properties.

Requisites: Prereq: MATH 256; MATH 281; MSTC 232; [PHYS 351, PHYS 352] or [CH 411, CH 412].

MSTC 432. Kinetics and Transport in Advanced Materials. 4 Credits.

This course is the first one in a two-course sequence that teaches and applies a foundational understanding of thermodynamics, kinetics, and transport to understand how materials are formed and what governs the time evolution of materials processes. Begins with concepts of thermodynamically reversible and irreversible process and how those relate to entropy and entropy production. Transport by diffusion, rates of chemical reactions, and materials processes nucleation and growth and morphological evolution in solids are covered.

Requisites: Prereq: MSTC 431.

MSTC 441. Electronic, Optical and Magnetic Properties of Materials I. 4 Credits.

In the first part of this two-course sequence, the student will study the significant role played by geometry and chemical composition in determining general material properties and explore how this structure conspires with quantum physics to govern the mechanical, thermal, and electrical properties of condensed matter, including the emergence of semiconducting behavior and superconductivity.

Requisites: Prereq: PHYS 253, MATH 256, MATH 282, MSTC 431; pre- or coreq: MATH 341.

MSTC 442. Electronic, Optical and Magnetic Properties of Materials II. 4 Credits.

In this course, the second part of a sequence, the student will extend their knowledge to magnetic, dielectric, and optical properties, and apply this knowledge to understand semiconductor devices (transistors, photovoltaics, diode lasers, etc.), nuclear magnetic resonance (NMR), spin-based quantum bits, and nanomaterials.

Requisites: Prereq: MSTC 441; pre- or coreq: MATH 341.

Mathematics (MATH)

Courses

MATH 101. Foundations of Algebra and Mathematical Modeling. 4 Credits.

Critical elements of pre-college algebra, topics including equation solving; rational, radical, and polynomial expression evaluation and simplification; lines, linear equations, and quadratic equations. Focus on mathematical modeling and preparation for additional college level mathematics.

Requisites: Prereq: UO Math Placement Exam with a score of 35-48.

MATH 105Z. Math in Society. 4 Credits.

An exploration of present-day applications of mathematics focused on developing numeracy. Major topics include quantitative reasoning and problem-solving strategies, probability and statistics, and financial mathematics; these topics are to be weighted approximately equally. This course emphasizes mathematical literacy and communication, relevant everyday applications, and the appropriate use of current technology. Previously MATH 105.

Requisites: Prereq: MATH 101 or satisfactory placement test score.

Equivalent to: MATH 105

Additional Information:

Science Area
BS Math

MATH 106. University Mathematics II. 4 Credits.

Topics include mathematics of finance, applied geometry, exponential growth and decay, and a nontechnical introduction to the concepts of calculus.

Requisites: Prereq: MATH 101 or satisfactory placement test score.

Additional Information:

Science Area
BS Math

MATH 107. University Mathematics III. 4 Credits.

Topics chosen from modular arithmetic and coding, tilings and symmetry, voting methods, apportionment, fair division, introductory graph theory, or scheduling.

Requisites: Prereq: MATH 101 or satisfactory placement test score.

Additional Information:

Science Area
BS Math

MATH 111Z. Precalculus I: Functions. 4 Credits.

A course primarily designed for students preparing for trigonometry or calculus. This course focuses on functions and their properties, including polynomial, rational, exponential, logarithmic, piecewise-defined, and inverse functions. These topics will be explored symbolically, numerically, and graphically in real-life applications and interpreted in context. This course emphasizes skill building, problem solving, modeling, reasoning, communication, connections with other disciplines, and the appropriate use of present-day technology. Previously MATH 111.

Requisites: Prereq: MATH 101 or satisfactory placement test score.

Equivalent to: MATH 111

Additional Information:

BS Math

MATH 112Z. Precalculus II: Trigonometry. 4 Credits.

A course primarily designed for students preparing for calculus and related disciplines. This course explores trigonometric functions and their applications as well as the language and measurement of angles, triangles, circles, and vectors. These topics will be explored symbolically, numerically, and graphically in real-life applications and interpreted in context. This course emphasizes skill building, problem solving, modeling, reasoning, communication, connections with other disciplines, and the appropriate use of present-day technology. Previously MATH 112.

Requisites: Prereq: MATH 111Z or satisfactory placement test score.

Equivalent to: MATH 112

Additional Information:

BS Math

MATH 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MATH 201. Algebra Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from algebra.

MATH 202. Geometry Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from geometry.

MATH 203. Analysis and Number Theory Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from analysis and the theory of numbers.

MATH 204. Probability and Statistics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from probability and statistics.

MATH 205. Foundations Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from the foundations of mathematics.

MATH 206. Combinatorics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from combinatorics.

MATH 211. Fundamentals of Elementary Mathematics I. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence.

Requisites: Prereq: MATH 101, MATH 111Z, or satisfactory placement score.

Additional Information:

Science Area

BS Math

MATH 212. Fundamentals of Elementary Mathematics II. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence.

Requisites: Prereq: MATH 211.

Additional Information:

Science Area

BS Math

MATH 213. Fundamentals of Elementary Mathematics III. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence.

Requisites: Prereq: MATH 212.

Additional Information:

Science Area

BS Math

MATH 231. Elements of Discrete Mathematics I. 4 Credits.

Sets, mathematical logic, induction, sequences, and functions. Sequence.

Requisites: Prereq: MATH 251Z.

Additional Information:

Science Area

BS Math

MATH 232. Elements of Discrete Mathematics II. 4 Credits.

Relations, theory of graphs and trees with applications, permutations and combinations.

Requisites: Prereq: MATH 231.

Additional Information:

Science Area

BS Math

MATH 241. Calculus for Business and Social Science I. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251Z.

Requisites: Prereq: MATH 111Z or satisfactory placement test score; a programmable calculator capable of displaying function graphs.

Equivalent to: MATH 246, MATH 251Z

Additional Information:

Science Area

BS Math

MATH 242. Calculus for Business and Social Science II. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252Z.

Requisites: Prereq: MATH 241.

Equivalent to: MATH 247, MATH 252Z

Additional Information:

Science Area
BS Math

MATH 246. Calculus for the Biological Sciences I. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251Z.

Requisites: Prereq: MATH 112Z or satisfactory placement test score.

Equivalent to: MATH 241, MATH 251Z

Additional Information:

Science Area
BS Math

MATH 247. Calculus for the Biological Sciences II. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Integral calculus and applications. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252Z.

Requisites: Prereq: MATH 246.

Equivalent to: MATH 242, MATH 252Z

Additional Information:

Science Area
BS Math

MATH 251Z. Differential Calculus. 4 Credits.

This course explores limits, continuity, derivatives, and their applications for real-valued functions of a single variable. These topics will be explored graphically, numerically, and symbolically in real-life applications. This course emphasizes abstraction, problem-solving, modeling, reasoning, communication, connections with other disciplines, and the appropriate use of technology. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251Z. Sequence with MATH 252Z, MATH 253Z.

Requisites: Prereq: MATH 112Z or satisfactory placement test score.

Equivalent to: MATH 241, MATH 246, MATH 251

Additional Information:

Science Area
BS Math

MATH 252Z. Integral Calculus. 4 Credits.

This course explores Riemann sums, definite integrals, and indefinite integrals for real-valued functions of a single variable. These topics will be explored graphically, numerically, and symbolically in real-life applications. This course emphasizes abstraction, problem-solving, modeling, reasoning, communication, connections with other disciplines, and the appropriate use of technology. Students cannot receive credit for more than one of MATH 242, 247, 252Z. Sequence with MATH 251Z, MATH 253Z.

Requisites: Prereq: MATH 251Z.

Equivalent to: MATH 242, MATH 247, MATH 252

Additional Information:

Science Area
BS Math

MATH 253Z. Calculus: Sequences and Series. 4 Credits.

This course explores real-valued sequences and series, including power and Taylor series. Topics include convergence and divergence tests and applications. These topics will be explored graphically, numerically, and symbolically. This course emphasizes abstraction, problem-solving, reasoning, communication, connections with other disciplines, and the appropriate use of technology.

Requisites: Prereq: MATH 252Z.

Equivalent to: MATH 253

Additional Information:

Science Area
BS Math

MATH 256. Introduction to Differential Equations. 4 Credits.

Introduction to differential equations and applications. Linear algebra is introduced as needed.

Requisites: Prereq: MATH 253Z.

Additional Information:

BS Math

MATH 281. Several-Variable Calculus I. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed. Sequence.

Requisites: Prereq: MATH 253Z.

Additional Information:

BS Math

MATH 282. Several-Variable Calculus II. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed.

Requisites: Prereq: MATH 281.

Additional Information:

BS Math

MATH 307. Introduction to Proof. 4 Credits.

Proof is how mathematics establishes truth and communicates ideas. Introduces students to proof in the context of interesting mathematical problems.

Requisites: Prereq: MATH 247 or MATH 252Z.

Additional Information:

Science Area
BS Math

MATH 316. Fundamentals of Analysis I. 4 Credits.

Rigorous treatment of topics introduced in calculus such as limits, sequences, series, the Cauchy condition, and continuity. Development of mathematical proof in these contexts. Sequence with MATH 317.

Requisites: Prereq: MATH 253Z; MATH 232 or MATH 307.

MATH 317. Fundamentals of Analysis II. 4 Credits.

Rigorous treatment of topics introduced in calculus such as continuity, uniform convergence, power series, differentiation, and integration. Development of mathematical proof in these contexts. Sequence with MATH 316.

Requisites: Prereq: MATH 316.

MATH 341. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n-dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation. Sequence.

Requisites: Prereq: MATH 252Z. MATH 253Z is recommended.

MATH 342. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n -dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation.

Requisites: Prereq: MATH 341.

MATH 343. Statistical Models and Methods. 4 Credits.

Review of theory and applications of mathematical statistics including estimation and hypothesis testing. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Requisites: Prereq: MATH 252Z.

Equivalent to: DSCI 345M, MATH 345M

Additional Information:

Science Area

BS Math

MATH 345M. Probability and Statistics for Data Science. 4 Credits.

Introduction to probability and statistics, with an emphasis upon topics relevant for data science. Multilisted with DSCI 345M. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Requisites: Prereq: MATH 342, CS 211.

Equivalent to: DSCI 345M, MATH 343

MATH 347. Fundamentals of Number Theory I. 4 Credits.

A study of congruences, the Chinese remainder theorem, the theory of prime numbers and divisors, Diophantine equations, and quadratic reciprocity. Development of mathematical proof in these contexts. Sequence with MATH 348.

Requisites: Prereq: MATH 253Z; MATH 232 or MATH 307.

MATH 348. Fundamentals of Number Theory II. 4 Credits.

Study of nonlinear Diophantine equations, sums of squares, the theory of partitions, geometric number theory, and the distribution of prime numbers. Development of mathematical proof in these contexts. Sequence with MATH 347.

Requisites: Prereq: MATH 347.

MATH 351. Elementary Numerical Analysis I. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations. Sequence.

Requisites: Prereq: MATH 253Z; MATH 232 or MATH 307.

MATH 352. Elementary Numerical Analysis II. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations.

Requisites: Prereq: MATH 351.

MATH 391. Fundamentals of Abstract Algebra I. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings. Sequence.

Requisites: Prereq: MATH 341; one from MATH 232, MATH 262, MATH 307.

MATH 392. Fundamentals of Abstract Algebra II. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings.

Requisites: Prereq: MATH 391.

MATH 394. Geometries from an Advanced Viewpoint I. 4 Credits.

Topics in Euclidean geometry in two and three dimensions including constructions. Emphasizes investigations, proofs, and challenging problems. For prospective secondary and middle school teachers.

Requisites: Prereq: MATH 253Z; MATH 232 or MATH 307.

MATH 395. Geometries from an Advanced Viewpoint II. 4 Credits.

Analysis of problems in Euclidean geometry using coordinates, vectors, and the synthetic approach. Transformations in the plane and space and their groups. Introduction to non-Euclidean geometries. For prospective secondary teachers.

Requisites: Prereq: MATH 394.

MATH 397. History and Applications of Calculus. 4 Credits.

Historical applications of calculus. Topics may include volumes by the method of exhaustion, Archimedean spiral, Kepler problem, calculus of variations, brachistochrone problem, spread of infectious disease, analysis of savings.

Requisites: Prereq: MATH 253Z; MATH 232 or MATH 307.

MATH 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MATH 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MATH 403. Thesis. 1-4 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MATH 405. Reading and Conference: [Topic]. 1-4 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MATH 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MATH 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MATH 411. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

Requisites: Prereq: MATH 281; one from MATH 232, MATH 262, MATH 307.

MATH 413. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Requisites: Prereq: MATH 282, MATH 317.

MATH 414. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms.

Requisites: Prereq: MATH 413.

MATH 415. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Requisites: Prereq: MATH 414.

MATH 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 421M.

Requisites: Prereq: MATH 253Z; MATH 256 or MATH 281.

Equivalent to: PHYS 421M

MATH 422. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Requisites: Prereq: MATH 421M or PHYS 421M.

MATH 425. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors and nonminors may receive upper-division credit. Students cannot receive credit for both STAT 243Z and MATH 425.

Requisites: Prereq: MATH 111Z or satisfactory placement test score.

Equivalent to: MATH 243, STAT 243Z

Additional Information:

BS Math

MATH 431. Introduction to Topology I. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence with MATH 432, MATH 434.

Requisites: Prereq: MATH 317.

MATH 432. Introduction to Topology II. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence with MATH 431, MATH 434.

Requisites: Prereq: MATH 281, MATH 341, MATH 431.

MATH 433. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

Requisites: Prereq: MATH 282, MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 434. Introduction to Topology III. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence.

Requisites: Prereq: MATH 432.

MATH 441. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

Requisites: Prereq: MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 444. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

Requisites: Prereq: MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 445. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Requisites: Prereq: MATH 444.

MATH 446. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Requisites: Prereq: MATH 445.

MATH 458. Introduction to Mathematical Cryptography. 4 Credits.

Mathematical theory of public key cryptography. Finite field arithmetic, RSA and Diffie-Hellman algorithms, elliptic curves, generation of primes, factorization techniques. Offered alternate years.

Requisites: Prereq: MATH 341.

Additional Information:

BS Math

MATH 461. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

Requisites: Prereq: MATH 253Z; MATH 232 or MATH 307.

MATH 462. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Requisites: Prereq: MATH 461.

MATH 463. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Requisites: Prereq: MATH 342, MATH 462.

MATH 467. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Requisites: Prereq: MATH 341, MATH 461.

MATH 497M. Deterministic Dynamical Modeling in Biology. 4 Credits.

This course covers deterministic dynamical models in biology, i.e., models that describe the behavior of a biological system over time as a result of internal feedback loops and external forcings. The focus will be on differential equations, discrete-time models and related computational (programming) tools. Multilisted with BI 497M.

Requisites: Prereq: One from MATH 242, MATH 247, MATH 252Z, MATH 320; one from STAT 243Z, DSCI 345M, MATH 345M, MATH 461, MATH 467.

Equivalent to: BI 497M

MATH 499M. Stochastic Dynamical Modeling in Biology. 4 Credits.

This course covers stochastic dynamical models in biology, i.e., mathematical models that describe the behavior of non-deterministic biological systems as a result of internal feedback loops, external forcings and random processes. Topics include stochastic iterative maps, Markov chains, vector autoregression models, and time series analysis. Multilisted with BI 499M.

Requisites: Prereq: One from MATH 242, MATH 247, MATH 252Z, MATH 320; one from STAT 243Z, DSCI 345M, MATH 345M, MATH 461, MATH 467. Basic programming skills recommended.

Equivalent to: BI 499M

MATH 503. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MATH 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MATH 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MATH 511. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

MATH 513. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

MATH 514. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Requisites: Prereq: MATH 513.

MATH 515. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Requisites: Prereq: MATH 514.

MATH 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 521M.

Equivalent to: PHYS 521M

MATH 522. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Requisites: Prereq: MATH 521.

MATH 525. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive graduate credit.

MATH 531. Introduction to Topology I. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence with MATH 532, MATH 534.

MATH 532. Introduction to Topology II. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence with MATH 531, MATH 534.

Requisites: Prereq: MATH 531.

MATH 533. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

MATH 534. Introduction to Topology III. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence with MATH 531, MATH 532.

Requisites: Prereq: MATH 532.

MATH 541. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

MATH 544. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

MATH 545. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Requisites: Prereq: MATH 544.

MATH 546. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Requisites: Prereq: MATH 545.

MATH 561. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

MATH 562. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Requisites: Prereq: MATH 561.

MATH 563. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Requisites: Prereq: MATH 562.

MATH 567. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Requisites: Prereq: MATH 561.

MATH 597M. Deterministic Dynamical Modeling in Biology. 4 Credits.

This course covers deterministic dynamical models in biology, i.e., models that describe the behavior of a biological system over time as a result of internal feedback loops and external forcings. The focus will be on differential equations, discrete-time models and related computational (programming) tools. Multilisted with BI 597M.

MATH 599M. Stochastic Dynamical Modeling in Biology. 4 Credits.

This course covers stochastic dynamical models in biology, i.e., mathematical models that describe the behavior of non-deterministic biological systems as a result of internal feedback loops, external forcings and random processes. Topics include stochastic iterative maps, Markov chains, vector autoregression models, and time series analysis. Multilisted with BI 599M.

MATH 601. Research: [Topic]. 1-9 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MATH 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MATH 604. Internship: [Topic]. 1-9 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

MATH 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MATH 607. Seminar: [Topic]. 1-5 Credits.

Topics include Advanced Topics in Geometry, Ring Theory, Teaching Mathematics.

Repeatable 99 times

MATH 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MATH 616. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

MATH 617. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Requisites: Prereq: MATH 616.

MATH 618. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Requisites: Prereq: MATH 617.

MATH 634. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

MATH 635. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Requisites: Prereq: MATH 634.

MATH 636. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Requisites: Prereq: MATH 635.

MATH 637. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 638. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

Requisites: Prereq: MATH 637.

MATH 639. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 647. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

MATH 648. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Requisites: Prereq: MATH 647.

MATH 649. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Requisites: Prereq: MATH 648.

MATH 672. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.

Requisites: Prereq: MATH 671.

MATH 673. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.

Requisites: Prereq: MATH 672.

MATH 681. Advanced Algebra: [Topic]. 4-5 Credits.

Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

Repeatable 99 times

MATH 682. Advanced Algebra: [Topic]. 4-5 Credits.

Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

Repeatable 99 times

MATH 683. Advanced Algebra: [Topic]. 4-5 Credits.

Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

Repeatable 99 times

MATH 684. Advanced Analysis: [Topic]. 4-5 Credits.

Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

Repeatable 99 times

MATH 685. Advanced Analysis: [Topic]. 4-5 Credits.

Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

Repeatable 99 times

MATH 686. Advanced Analysis: [Topic]. 4-5 Credits.

Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

Repeatable 99 times

MATH 690. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

Repeatable 99 times

MATH 691. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

Repeatable 99 times

MATH 692. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

Repeatable 99 times

Medieval Studies (MDVL)

Courses

MDVL 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MDVL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MDVL 403. Thesis. 1-8 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MDVL 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MDVL 406. Field Studies: [Topic]. 1-4 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

MDVL 408. Workshop: [Topic]. 1-4 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MDVL 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MDVL 503. Thesis. 1-8 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MDVL 508. Workshop: [Topic]. 1-4 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MDVL 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Middle East and North African Studies (MENA)

Courses

MENA 111. Media Coverage of the Middle East. 4 Credits.

This course deals with how the Middle East has been portrayed in the U.S. through news reports, films, graphic novels, Web pages, and other media. It examines the construction of "the Middle East" as a category of inquiry, and explores ethical issues surrounding this construction.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

MENA 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MENA 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MENA 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MENA 401. Research: [Topic]. 1-5 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MENA 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

MENA 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MENA 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MENA 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

MENA 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Military Science (MIL)

Courses

MIL 121. Military Science I. 2 Credits.

Constitutional beginnings, organization, and role of today's army; physical fitness; introduction to equipment and small-unit operations.

MIL 122. Military Science I. 2 Credits.

Operational and survival skills, topographic map reading and land navigation, first-aid, small-unit tactics, and practical exercises with Army weapons and equipment.

MIL 123. Military Science I. 2 Credits.

Characteristics and methods of successful leadership--building trust, understanding, cooperation, and communication; responsibilities of leadership including personal motivation and ethics.

MIL 131. Physical Training. 1 Credit.

Participatory physical training program that follows the U.S. Army's physical fitness program. Prepares students for the rigors of military activities through a systematic physical conditioning process.

Repeatable 5 times for a maximum of 6 credits

Additional Information:

General Limitation applies: Activity Course

MIL 191. Leadership Laboratory. 1 Credit.

Laboratory for practical experience. Assesses cadet leadership potential, communication, problem-solving, and decision-making skills. One field-training exercise a term.

Repeatable 5 times for a maximum of 6 credits

MIL 199. Special Studies: [Topic]. 1-5 Credits.

A current topic is Physical Fitness Training.

Repeatable 5 times for a maximum of 6 credits

MIL 221. Military Science II. 2 Credits.

Basic leadership and technical military skills--map reading, first aid, and communication skills. Focus is individual abilities and building effective teams.

MIL 222. Military Science II. 2 Credits.

Purpose, roles, and obligations of commissioned officers; organizational values and their application to the decision-making process; military tactics in small-unit operations.

MIL 223. Military Science II. 2 Credits.

Self and team development in Army operations; comprehension and use of the five-paragraph Operations Order; tactics; land navigation.

MIL 321. Military Science III. 4 Credits.

Teaches the sixteen leadership dimensions and application to infantry tactics, operation orders, and orienteering. Lectures, laboratory, field training exercises.

Requisites: Pre- or coreq: MIL 223.

MIL 322. Military Science III. 4 Credits.

Strengthens individual abilities with experience in marksmanship, drill, and tactics. Lectures, laboratory, field training exercises.

Requisites: Prereq: MIL 223

MIL 323. Military Science III. 4 Credits.

Evaluates leadership abilities in tactical and nontactical settings.

Lectures, laboratory, field training exercises.

Requisites: Prereq: MIL 223

MIL 331. Physical Training. 1 Credit.

Emphasizes physical fitness and overall good health. Focus is on the intensity, duration, and frequency of fitness training, resulting in improved health and physical fitness.

Repeatable 5 times for a maximum of 6 credits

Additional Information:

General Limitation applies: Activity Course

MIL 405. Reading and Conference: [Topic]. 1-3 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MIL 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

MIL 421. Military Science IV. 4 Credits.

Planning, evaluating, and conducting unit training and practical exercises. Lectures, laboratory, and field training exercises.

Requisites: Prereq: MIL 323.

MIL 422. Military Science IV. 4 Credits.

Study of judicial and nonjudicial proceedings and administrative actions available to commanders. Lectures, laboratory, and field training exercises.

Requisites: Prereq: MIL 323.

MIL 423. Military Science IV. 4 Credits.

Duties and responsibilities of a lieutenant; ethical decision making, counseling subordinates, evaluation reports, transition to active duty. Lectures, laboratory, and field training exercises.

Requisites: Prereq: MIL 323.

Museum of Natural and Cultural History (ANTM)

Courses

ANTM 196. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

ANTM 198. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

ANTM 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ANTM 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ANTM 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ANTM 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ANTM 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ANTM 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

ANTM 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ANTM 406. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

ANTM 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

ANTM 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ANTM 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

ANTM 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ANTM 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ANTM 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

ANTM 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

ANTM 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

ANTM 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

ANTM 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

ANTM 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

ANTM 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Music (MUS)

Courses

MUS 125. Understanding Music. 4 Credits.

Presents the basic elements of music, historical style periods of Western art music, development of jazz and popular music.

Additional Information:

Arts Letters Area

MUS 126. Music Theory Fundamentals. 3 Credits.

Introduction to musical notation and basic musical elements, such as staves, clefs, rhythmic values, scales, and chords. Requires no musical background.

MUS 131. Music Theory I. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Requisites: Prereq: MUS 134 is prereq or co-req.

MUS 132. Music Theory II. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Requisites: Prereq: MUS 131, MUS 134, MUS 137, or satisfactory placement test score.

MUS 133. Music Theory III. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Requisites: Prereq: MUS 132, MUS 135, MUS 138, or satisfactory placement test score.

MUS 134. Aural Skills I. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence with MUS 135, MUS 136, MUS 234, MUS 235.

Requisites: Prereq: MUS 131 is prereq or co-req.

MUS 135. Aural Skills II. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence.

Requisites: Prereq: MUS 131, MUS 134, MUS 137 or satisfactory placement test score.

MUS 136. Aural Skills III. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence.

Requisites: Prereq: MUS 132, MUS 135, MUS 138 or satisfactory placement test score.

MUS 137. Keyboard Skills I. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

MUS 138. Keyboard Skills II. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Requisites: Prereq: MUS 131, MUS 134, MUS 137 or satisfactory placement test score.

MUS 139. Keyboard Skills III. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee.

Requisites: Prereq: MUS 132, MUS 135, MUS 138 or satisfactory placement test score.

MUS 141. Popular Piano and Musicianship I. 4 Credits.

Understanding general musicianship—what it is and how it relates to genre and culture—in popular music. Sequence with MUS 142, MUS 143.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

MUS 142. Popular Piano and Musicianship II. 4 Credits.

Continuing study of musicianship—integrated music theory, ear training, and piano—through piano instruction in popular music styles. Sequence with MUS 141, MUS 143.

Requisites: Prereq: MUS 141.

MUS 143. Popular Piano and Musicianship III. 4 Credits.

Continuing study of musicianship—integrated music theory, ear training, and piano—through piano instruction in popular music styles. Sequence with MUS 141, MUS 142.

Requisites: Prereq: MUS 142.

MUS 151. Popular Songwriting. 4 Credits.

Composing and producing songs using software applications and studying historical examples to understand how musical techniques reflect societal trends and express ideas. Music background optional. Laboratory fee.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUS 155. Introduction to Lyric Diction. 2 Credits.

Introduction to pronunciation of standard languages for students pursuing careers related to singing. The International Phonetic Alphabet is applied to the texts of simple repertoire. English, Italian, Spanish.

MUS 156. Introduction to Lyric Diction. 2 Credits.

Introduction to pronunciation of standard languages for students pursuing careers related to singing. The International Phonetic Alphabet is applied to the texts of simple repertoire. German, French.

Requisites: Prereq: MUS 155.

MUS 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MUS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUS 227. Elements of Electronic Music. 4 Credits.

Introduction to experimental and popular electronic music. Topics include fundamental elements of musical construction, history, technology, composers, musicians, copyright law, sampling, styles, and aesthetics.

Additional Information:

Arts Letters Area

MUS 231. Music Theory IV. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Requisites: Prereq: MUS 133, MUS 136, MUS 139 or satisfactory placement test score.

MUS 232. Music Theory V. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Requisites: Prereq: MUS 231 or satisfactory placement test score.

MUS 233. Music Theory VI. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence.

Requisites: Prereq: MUS 232 or satisfactory placement test score.

MUS 234. Aural Skills IV. 2 Credits.

Ear training through sight singing, dictation, and related activities. Sequence.

Requisites: Prereq: MUS 133, MUS 136, MUS 139 or satisfactory placement test score.

MUS 235. Aural Skills V. 2 Credits.

Ear training through sight singing, dictation, and related activities. Sequence.

Requisites: Prereq: MUS 234 or satisfactory placement test score.

MUS 240. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.

Requisites: Prereq: MUS 133, MUS 136, MUS 139 or equivalent.

MUS 241. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.

Requisites: Prereq: MUS 240.

MUS 242. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.

Requisites: Prereq: MUS 241.

MUS 249. Popular Music Analysis. 3 Credits.

Analysis of popular songs in diverse styles, focusing on form, harmony, timbre, rhythm, and lyrics.

Requisites: Prereq: MUS 131, MUS 134; one from MUS 132, MUS 151.

MUS 250. Popular Musics in Global Context. 4 Credits.

Surveys the global popular music landscape of the 20th and 21st centuries, with an emphasis on identity and cultural mixture.

Additional Information:

Cultural Literacy: Global Perspectives

MUS 263. US Popular Music 1800 to 1930. 4 Credits.

This class examines the origins and development of popular music in the USA from its roots in the 19th century through the 1920s.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUS 264. US Popular Music 1930 to 1965. 4 Credits.

This class examines the development of popular music in the USA from 1930 to 1965, including swing, blues, and the rise of rock 'n' roll.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUS 265. US Popular Music 1965 to 2000. 4 Credits.

This class examines the development of popular music in the USA from 1965-2000 by contrasting mainstream rock with various "alternative" genres.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUS 267. History of Music 800 to 1600. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages through the Renaissance.

Requisites: Prereq: MUS 133, WR 121Z.

MUS 268. Survey of Music History 1600 to 1800. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages to the present.

Requisites: Prereq: WR 121Z.

MUS 269. Survey of Music History 1800 to Present. 4 Credits.

Key themes in the history, culture, aesthetics, and social context of Western art music from 1800 to the present.

Requisites: Prereq: WR 121Z.

MUS 270. History of the Blues. 4 Credits.

Traces blues music from its African and African American roots through its 20th-century history and its influence on the values of jazz, rhythm and blues, and country music.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUS 281. Music of the Woodstock Generation. 4 Credits.

Examines the relationship between popular music and social upheavals in the United States during the 1960s.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

MUS 327. Analysis: [Topic]. 3 Credits.

Techniques of analysis in various types of music.

Requisites: Prereq: MUS 233.

Repeatable 5 times for a maximum of 18 credits when topic changes

MUS 340. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.

Requisites: Prereq: MUS 242.

MUS 341. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.

Requisites: Prereq: MUS 340.

MUS 342. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.

Requisites: Prereq: MUS 341.

MUS 346. Music, Money, and the Law. 4 Credits.

Explores theory and history of relationship between money and music, and corresponding laws that govern and shape that relationship.

Topics include copyright, contract rights, media distribution technology, marketing, unions.

MUS 351. The Music of Bach and Handel. 4 Credits.

Compositions by Bach and Handel such as organ chorales, cantatas, oratorios, operas, and masses; cultural context in Germany, France, Italy, and England for the development of their styles.

Additional Information:

Arts Letters Area

MUS 358. Music in World Cultures. 4 Credits.

Explores the music of three world regions in their sociocultural context. Emphasis on listening skills, relationships between music and culture, aesthetics, styles, genres, music structures and forms, and participatory music making.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

MUS 359. Music of the Americas. 4 Credits.

African American, Latin American, and Native American music in sociocultural context. Includes listening skills, music-culture relationship, aesthetics, styles, genres, music structures and forms, and participatory music making.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUS 360. Hip-Hop History, Culture, Aesthetics. 4 Credits.

Examines the history and evolution of hip-hop and rap music in the late 20th and early 21st centuries.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUS 363. The Beatles and Their Times. 4 Credits.

Presents and examines the music of the Beatles in the context of post-World War II English and United States cultures and 1960s Western youth cultures.

Additional Information:

Arts Letters Area

MUS 367. Survey of African Music. 4 Credits.

Students analyze musical expression—including traditional, neotraditional, and contemporary mass mediated popular music (Afro-pop)—in Africa and the diaspora.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

MUS 374. Campus Small Ensemble: [Topic]. 1-2 Credits.

Participation in a campus small music ensemble. Examples include Hip-Hop Ensemble and Popular Music Ensemble.

Requisites: Prereq: Audition.

Repeatable 11 times for a maximum of 24 credits

MUS 375. Campus Band: [Topic]. 1-2 Credits.

Participation in Campus Band. No audition needed. Ensemble fee.

Repeatable 11 times for a maximum of 24 credits

MUS 376. Campus Orchestra. 1-2 Credits.

Participation in an orchestra. No audition needed. Ensemble fee.

Repeatable 11 times for a maximum of 24 credits

MUS 377. Campus Chorus: [Topic]. 2 Credits.

Participation in a choral ensemble. Gospel Choir, Gospel Singers, Gospel Ensemble. Audition required for Gospel Singers and Gospel Ensemble. Ensemble fee.

Requisites: Prereq: Audition or voice screening (except Gospel Choir).

Repeatable 11 times for a maximum of 24 credits

MUS 380. Film Music. 4 Credits.

Film is one of the most culturally significant art forms of the 20th–21st centuries, and music has always played a crucial role in its production and experience. This class introduces students to the history and analysis of film music from silent cinema to the present.

Additional Information:

Arts Letters Area

MUS 384. Introduction to Conducting. 2 Credits.

Introduction to conducting with emphasis on the art and study of conducting, baton and left-hand technique, nonverbal (facial and body) communication, leadership, terminology, transpositions, and score reading.

Requisites: Prereq: MUS 233.

MUS 391. Collegium Musicum. 1-3 Credits.

Study of music repertoire of the medieval, Renaissance, and baroque periods through rehearsals and extensive sight-reading; vocal and instrumental repertoire. Ensemble fee.

Requisites: Prereq: audition.

Repeatable 6 times

MUS 393. Oregon Electronic Device Orchestra. 2 Credits.

Performance ensemble that uses data-driven musical instruments in combination with software and hardware to perform music and intermedia compositions.

Requisites: Prereq: MUS 447 or MUS 448.

Repeatable 11 times for a maximum of 24 credits

MUS 394. Chamber Ensemble: [Topic]. 1-2 Credits.

Participation in a chamber music ensemble. Accompanying, Brass, Chamber Ensemble, Hip-Hop Ensemble, Popular Music Ensemble, Jazz Guitar Ensemble, Oregon Percussion Ensemble, String Chamber Ensemble, Studio Guitar Ensemble, Trombone Ensemble, Tuba and Euphonium Ensemble, Woodwind Chamber Ensemble.

Requisites: Prereq: Audition for certain of the chamber ensembles listed above, per instructor. No audition for Brass Chamber Ensemble, String Chamber Ensemble, or Woodwind Chamber Ensemble.

Repeatable 11 times for a maximum of 24 credits

MUS 395. Band: [Topic]. 1-2 Credits.

Participation in a band. Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Oregon Wind Ensemble, UO Campus Band, Oregon Wind Symphony, Yellow Garter Band. Ensemble fee for Oregon Wind Ensemble, Oregon Wind Symphony, UO Campus Band.

Requisites: Prereq: audition (except UO Campus Band and Oregon Marching Band).

Repeatable 11 times for a maximum of 24 credits

MUS 396. Orchestra: [Topic]. 1-2 Credits.

Participation in an orchestra. University Symphony Orchestra, Campus Orchestra. Ensemble fee.

Requisites: Prereq: audition (except Campus Orchestra).

Repeatable 11 times for a maximum of 24 credits

MUS 397. Chorus: [Topic]. 2 Credits.

Participation in a choral ensemble. Chamber Choir, Concert Choir, Gospel Singers, Repertoire Singers, University Gospel Choir, University Gospel Ensemble, University Singers, Women's Choir. Ensemble fee.

Requisites: Prereq: audition or voice screening (except Concert Choir and Gospel Choir).

Repeatable 11 times for a maximum of 24 credits

MUS 398. Opera Workshop. 2 Credits.

Traditional and contemporary repertory for musical theater through analysis, rehearsal, and performance of complete and excerpted works; training in stage movement, diction, and rehearsal techniques.

Requisites: Prereq: audition.

Repeatable 11 times for a maximum of 24 credits

MUS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUS 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MUS 402. Supervised Tutoring. 1-12 Credits.

A student, under faculty supervision, accepts responsibility for tutoring other students within the discipline.

Repeatable 99 times

MUS 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MUS 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

MUS 405. Reading and Conference: [Topic]. 1-5 Credits.

Individual study of topics agreed upon by the student and faculty adviser.

Requisites: Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

Repeatable 99 times

MUS 407. Seminar: [Topic]. 1-5 Credits.

Various topics at an advanced level, offered periodically according to student and faculty interest and availability.

Repeatable 99 times

MUS 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MUS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

MUS 410. Experimental Course: [Topic]. 1-5 Credits.

Recent courses include Meditation for Performers and Andean Music Ensemble.

Repeatable 99 times

MUS 410L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUS 416. Post-Tonal Theory I. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Requisites: Prereq: MUS 327.

MUS 417. Post-Tonal Theory II. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Requisites: Prereq: MUS 416.

MUS 421. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence.

Requisites: Prereq: MUP 271 or above.

Repeatable 1 time for a maximum of 4 credits

MUS 422. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence.

Requisites: Prereq: MUS 421.

Repeatable 1 time for a maximum of 4 credits

MUS 423. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence.

Requisites: Prereq: MUS 422.

Repeatable 1 time for a maximum of 4 credits

MUS 428. Cultures of Musical Celebrity. 4 Credits.

Examines the cultural phenomenon of celebrity among musicians, composers, and audiences from antiquity to the present. Topics include cults, crowds, branding, shrines, and charisma.

Requisites: Prereq: one from WR 122Z, WR 123, HC 221H.

MUS 430. Tonal Analysis: Linear Prolongational Analysis. 3 Credits.

Introduction to techniques of linear/prolongational analysis; exploration of connections between contrapuntal structures and small musical forms.

Requisites: Prereq: MUS 327.

MUS 431. Tonal Analysis: Form in Tonal Music. 3 Credits.

Exploration of the analysis of form in music from the Baroque, Classical, and Romantic eras; covers Sonata Theory, form-functional theory, processual approaches to form, and the relationship between formal types and linear structures.

Requisites: Prereq: MUS 327.

MUS 432. Tonal Analysis: Analysis of Popular Music. 3 Credits.

Exploration of the analysis of popular music, with repertoire from the 1960s to the present; discussion of methodologies adapted from traditional music theory, including form, harmony, meter, and rhythm, as well as more repertoire-specific topics, such as timbre, texture, and lyrics.

Requisites: Prereq: MUS 327.

MUS 433. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: 16th-century sacred polyphony.

Requisites: Prereq: MUS 233.

MUS 434. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: baroque imitative counterpoint.

Requisites: Prereq: MUS 433.

MUS 435. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: varies—typically devoted to more advanced fugal writing, 20th-century counterpoint, or other modal composition.

Requisites: Prereq: MUS 434.

MUS 436. World Music Ensemble: [Topic]. 2 Credits.

Students engage the embodied practices and sociocultural contexts of diverse music-dance practices associated with the world music categories specified in the topic.

Repeatable 4 times for a maximum of 10 credits when topic changes

Additional Information:

Cultural Literacy: Global Perspectives

MUS 438. Composers Forum. 1 Credit.

Formulation of a two- or three-concert series of student compositions; sessions with visiting composers and UO performers and listening projects related to these residencies.

Repeatable 11 times for a maximum of 12 credits

MUS 440. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital.

Requisites: Prereq: MUS 342.

Repeatable 2 times for a maximum of 9 credits

MUS 441. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital.

Requisites: Prereq: MUS 440.

Repeatable 1 time for a maximum of 6 credits

MUS 442. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital.

Requisites: Prereq: MUS 441.

Repeatable 1 time for a maximum of 6 credits

MUS 445. Electronic Composition. 3 Credits.

Develops an elementary understanding about how computers and software are used to process digital audio and create musical compositions. Laboratory fee.

Requisites: Prereq: MUS 447, MUS 448, MUS 476.

Repeatable 24 times for a maximum of 75 credits

MUS 447. Digital Audio and Sound Design. 4 Credits.

Examines concepts of digital audio representation, sampling, and processing; considers audio mixing, basic synthesis, and sound modification techniques and fundamentals of electroacoustic composition. Laboratory fee.

Repeatable 1 time for a maximum of 8 credits

MUS 448. Interactive Media Performance. 3 Credits.

Examines concepts of interactive performance using MIDI, digital audio, and video processing, and considers issues related to designing performance algorithms in software. Laboratory fee.

Repeatable 1 time for a maximum of 6 credits

MUS 450. Sensor Music. 3 Credits.

Examines the fundamental principles for microprocessors and sensor interface design within the context of musical performance, composition, and improvisation.

Requisites: Prereq: MUS 448.

Repeatable 3 times for a maximum of 12 credits

MUS 451. Introduction to Ethnomusicology. 4 Credits.

World musics studied in their social and cultural contexts. Compares the varied approaches, ideas, and methods of selected American and European researchers since 1980.

Additional Information:

Cultural Literacy: Global Perspectives

MUS 452. Musical Instruments of the World. 4 Credits.

Examines instruments of the world in their cultural contexts. Covers cross-cultural issues and focuses on particular geographic areas. Includes films, recordings, live demonstrations.

Additional Information:

Cultural Literacy: Global Perspectives

MUS 455. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

Requisites: Prereq: MUS 156.

MUS 456. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

Requisites: Prereq: MUS 156.

MUS 462. Popular Musics in the African Diaspora. 4 Credits.

Examines social and historical contexts of popular musics in the African diaspora from the 20th century forward. Geographic focus is North America, the Caribbean, and Africa.

Additional Information:

Cultural Literacy: Global Perspectives

MUS 463. Popular Music Studies. 4 Credits.

This seminar explores current research and foundational texts in the interdisciplinary field of popular music studies.

Requisites: Prereq: Two from MUS 263, MUS 264, MUS 265.

MUS 467. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

Requisites: Prereq: MUS 269 or equivalent.

MUS 468. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

Requisites: Prereq: MUS 269 or equivalent.

MUS 470. History of Electroacoustic Music. 3 Credits.

Examines the development of aesthetic movements, styles, media, instruments, and performance practice related to electroacoustic music.

Requisites: Prereq: Standing as a music technology major or meeting the prerequisites for history survey courses.

Repeatable 1 time for a maximum of 6 credits

MUS 471. Musical Performance Networks. 3 Credits.

Examines various types of network architectures and data-processing and mapping strategies that can be applied to real-time musical outcomes.

Repeatable 3 times for a maximum of 12 credits

MUS 474. History of Opera I: 1600-1800. 4 Credits.

A study of the history of opera from 1600-1800. The course focuses on four thematic pillars: intellectual movements that spurred the early development of opera; critical debates about the relationship between music, text, spoken drama, and dance; opera as a medium for politics; and opera's patrons, audiences, and developing industry as it moved between courts and public opera houses.

Requisites: Prereq: MUS 268; MUS 133 recommended.

MUS 475. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Mozart to the present.

Requisites: Prereq: MUS 269 or equivalent.

MUS 476. Digital Audio Workstation Techniques I. 3 Credits.

Explores the sequencing, editing, and routing of MIDI and digital audio using a computer. Basic Mac skills recommended. Series with MUS 477 and MUS 478. Laboratory fee.

Repeatable 1 time for a maximum of 6 credits

MUS 477. Digital Audio Workstation Techniques II. 3 Credits.

Explores the principles and techniques of audio mixing, sound design, and music production using a computer. Series with MUS 476 and MUS 478. Laboratory fee.

Requisites: Prereq: MUS 476.

Repeatable 1 time for a maximum of 6 credits

MUS 478. Digital Audio Workstation Techniques III. 3 Credits.

Explores advanced techniques of mixing, the principles of mastering, and digital distribution using a computer. Series with MUS 476 and MUS 477. Laboratory fee.

Requisites: Prereq: MUS 476.

Repeatable 1 time for a maximum of 6 credits

MUS 479. Data Sonification. 4 Credits.

Sonification uses non-speech sound to reveal new insights about data, insights that may be missed using visualizations and other graphic representations of data. The course explores developing audio applications for discovery and research and covers work in the fields of data sonification and auditory display.

MUS 480. Audio Production Techniques I. 3 Credits.

Hardware and software techniques for use in a music recording studio environment, including microphone usage, recording techniques, and digital production. Sequence with MUS 481, MUS 482. Laboratory fee.

MUS 481. Audio Recording Techniques II. 3 Credits.

Application of advanced recording techniques. Sequence with MUS 480, MUS 482. Laboratory fee.

Requisites: Pre- or coreq: MUS 480.

MUS 482. Audio Recording Techniques III. 3 Credits.

Focuses on the production concepts and techniques necessary to produce a full-length, professional-quality compact disc. Sequence with MUS 480, MUS 481. Laboratory fee.

Requisites: Prereq: MUS 481.

MUS 483. Audio Effects Theory and Design. 4 Credits.

Audio effects are common and useful tools used in the recording, mixing, and mastering of music and other sound, as well as in sound design. This course focuses on understanding, designing, and implementing audio effects, and using them for musical projects.

MUS 484. Choral Conducting and Literature. 3 Credits.

Choral conducting, gesture and communication, rehearsal technique, and choral literature appropriate for secondary school choral music programs (grades 6–12), community youth choirs, and collegiate ensembles.

Requisites: Prereq: MUP 140 or higher. Coreq: MUE 387, MUE 406 Fld Prac Public School.

Repeatable 1 time for a maximum of 6 credits

MUS 486. Instrumental Conducting. 3 Credits.

Conducting techniques as applied to band and orchestral music with emphasis on various styles and periods of music; study of 20th-century rhythms and related conducting problems.

Requisites: Coreq: MUE 387.

Repeatable 1 time for a maximum of 6 credits

MUS 487. Music and Emotion. 4 Credits.

Introduction to the psychological and philosophical study of music and the emotions, with emphasis on cognitive, evolutionary, behavioral, and socio-cultural perspectives.

MUS 488. Analog Recording Techniques. 3 Credits.

Analog Recording using reel to reel tape machines provides students with a unique experience in not only sonic quality, but also artistic and technical decision-making due to the mechanical limitations presented by the analog format.

MUS 489. Analysis of Rhythm and Meter. 3 Credits.

This course focuses on theories and analytical methodologies for studying rhythm and meter, with focal repertoire drawn from European classical music, English-language popular music, and global vernacular and traditional repertoires. Topics covered include hypermeter and metrical levels, rhythmic consonance and dissonance, Afro-Cuban rhythmic patterns, and groove.

Requisites: Prereq: MUS 232, MUS 235.

MUS 490. Balinese Gamelan. 2 Credits.

Pacific Rim Gamelan ensemble. Performance of original compositions and traditional music for gamelan. Limited to twelve performers. Three public performances a year.

Repeatable 99 times

MUS 499. Senior Project. 3 Credits.

Projects in music history, analysis, theory, composition, performance, or related disciplines designed by the student in consultation with the instructor.

Repeatable 2 times for a maximum of 9 credits

MUS 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MUS 507. Seminar: [Topic]. 1-5 Credits.

Various topics at an advanced level, offered periodically according to student and faculty interest and availability.

Repeatable 99 times

MUS 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MUS 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUS 516. Post-Tonal Theory I. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

MUS 517. Post-Tonal Theory II. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Requisites: Prereq: MUS 416/MUS 516.

MUS 521. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence.

Repeatable 1 time for a maximum of 4 credits

MUS 522. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence.

Requisites: Prereq: MUS 421/MUS 521.

Repeatable 1 time for a maximum of 4 credits

MUS 523. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence.

Requisites: Prereq: MUS 422/MUS 522.

Repeatable 1 time for a maximum of 4 credits

MUS 528. Cultures of Musical Celebrity. 4 Credits.

Examines the cultural phenomenon of celebrity among musicians, composers, and audiences from antiquity to the present. Topics include cults, crowds, branding, shrines, and charisma.

MUS 530. Tonal Analysis: Linear Prolongational Analysis. 3 Credits.

Introduction to techniques of linear/prolongational analysis; exploration of connections between contrapuntal structures and small musical forms.

MUS 531. Tonal Analysis: Form in Tonal Music. 3 Credits.

Exploration of the analysis of form in music from the Baroque, Classical, and Romantic eras; covers Sonata Theory, form-functional theory, processual approaches to form, and the relationship between formal types and linear structures.

MUS 532. Tonal Analysis: Analysis of Popular Music. 3 Credits.

Exploration of the analysis of popular music, with repertoire from the 1960s to the present; discussion of methodologies adapted from traditional music theory, including form, harmony, meter, and rhythm, as well as more repertoire-specific topics, such as timbre, texture, and lyrics.

MUS 533. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: 16th-century sacred polyphony.

MUS 534. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: baroque imitative counterpoint.

Requisites: Prereq: MUS 433/MUS 533.

MUS 535. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: focus varies—typically devoted to more advanced fugal writing, 20th-century counterpoint, or other modal composition.

Requisites: Prereq: MUS 434/MUS 534.

MUS 536. World Music Ensemble: [Topic]. 2 Credits.

Students engage the embodied practices and sociocultural contexts of diverse music-dance practices associated with the world music categories specified in the topic.

Repeatable 1 time for a maximum of 4 credits

MUS 538. Composers Forum. 1 Credit.

Formulation of a two- or three-concert series of student compositions; sessions with visiting composers and UO performers and listening projects related to these residencies.

Repeatable 11 times for a maximum of 12 credits

MUS 540. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital.

Repeatable 2 times for a maximum of 9 credits

MUS 541. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital.

Repeatable 1 time for a maximum of 6 credits

MUS 542. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital.

Repeatable 1 time for a maximum of 6 credits

MUS 548. Interactive Media Performance. 3 Credits.

Examines concepts of interactive performance using MIDI, digital audio, and video processing, and considers issues related to designing performance algorithms in software. Laboratory fee.

Repeatable 1 time for a maximum of 6 credits

MUS 550. Sensor Music. 3 Credits.

Examines the fundamental principles for microprocessors and sensor interface design within the context of musical performance, composition, and improvisation.

Requisites: Prereq: MUS 448/MUS 558.

Repeatable 3 times for a maximum of 12 credits

MUS 551. Introduction to Ethnomusicology. 4 Credits.

World musics studied in their social and cultural contexts. Compares the varied approaches, ideas, and methods of selected American and European researchers since 1980.

MUS 552. Musical Instruments of the World. 4 Credits.

Examines instruments of the world in their cultural contexts. Covers cross-cultural issues and focuses on particular geographic areas. Includes films, recordings, live demonstrations.

MUS 555. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

MUS 556. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

MUS 562. Popular Musics in the African Diaspora. 4 Credits.

Examines social and historical contexts of popular musics in the African diaspora from the 20th century on. Geographic focus is North America, the Caribbean, and Africa.

MUS 563. Popular Music Studies. 4 Credits.

This seminar explores current research and foundational texts in the interdisciplinary field of popular music studies.

MUS 567. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

MUS 568. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

MUS 570. History of Electroacoustic Music. 3 Credits.

Examines the development of aesthetic movements, styles, media, instruments, and performance practice related to electroacoustic music.

Requisites: Prereq: Standing as a music technology major or meeting the prerequisites for history survey courses.

Repeatable 1 time for a maximum of 6 credits

MUS 571. Musical Performance Networks. 3 Credits.

Examines various types of network architectures and data-processing and mapping strategies that can be applied to real-time musical outcomes.

Repeatable 3 times for a maximum of 12 credits

MUS 574. History of Opera I: 1600-1800. 4 Credits.

A study of the history of opera from 1600-1800. The course focuses on four thematic pillars: intellectual movements that spurred the early development of opera; critical debates about the relationship between music, text, spoken drama, and dance; opera as a medium for politics; and opera's patrons, audiences, and developing industry as it moved between courts and public opera houses.

MUS 575. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Mozart to the present. Sequence.

MUS 576. Digital Audio Workstation Techniques I. 3 Credits.

Explores the sequencing, editing, and routing of MIDI and digital audio using a computer. Basic Mac skills recommended. Series with MUS 477 and MUS 478. Laboratory fee.

Repeatable 1 time for a maximum of 6 credits

MUS 577. Digital Audio Workstation Techniques II. 3 Credits.

Explores the principles and techniques of audio mixing, sound design, and music production using a computer. Sequence with MUS 576, MUS 578. Laboratory fee.

Requisites: Prereq: MUS 576.

Repeatable 1 time for a maximum of 6 credits

MUS 578. Digital Audio Workstation Techniques III. 3 Credits.

Explores advanced techniques of mixing, the principles of mastering, and digital distribution using a computer. Series with MUS 476 and MUS 477. Laboratory fee.

Repeatable 1 time for a maximum of 6 credits

MUS 579. Data Sonification. 4 Credits.

Sonification uses non-speech sound to reveal new insights about data, insights that may be missed using visualizations and other graphic representations of data. The course explores developing audio applications for discovery and research and covers work in the fields of data sonification and auditory display.

MUS 580. Audio Production Techniques I. 3 Credits.

Hardware and software techniques for use in a music recording studio environment, including microphone usage, music recording techniques, and digital production. Sequence with MUS 581, MUS 582. Laboratory fee.

MUS 581. Audio Recording Techniques II. 3 Credits.

Application of advanced recording techniques. Sequence with MUS 580, MUS 582. Laboratory fee.

Requisites: Pre- or coreq: MUS 580.

MUS 582. Audio Recording Techniques III. 3 Credits.

Focuses on the production concepts and techniques necessary to produce a full-length, professional-quality compact disc. Sequence with MUS 580, MUS 581. Laboratory fee.

Requisites: Prereq: MUS 581.

MUS 583. Audio Effects Theory and Design. 4 Credits.

Audio effects are common and useful tools used in the recording, mixing, and mastering of music and other sound, as well as in sound design. This course focuses on understanding, designing, and implementing audio effects, and using them for musical projects.

MUS 584. Choral Conducting and Literature. 3 Credits.

Choral conducting, gesture and communication, rehearsal technique, and choral literature appropriate for secondary school choral music programs (grades 6–12), community youth choirs, and collegiate ensembles.

Requisites: Prereq: MUP 140 or higher. Coreq: MUE 387, MUE 606 Fld Prac Public School.

Repeatable 1 time for a maximum of 6 credits

MUS 587. Music and Emotion. 4 Credits.

Introduction to the psychological and philosophical study of music and the emotions, with emphasis on cognitive, evolutionary, behavioral, and socio-cultural perspectives.

MUS 588. Analog Recording Techniques. 3 Credits.

Analog Recording using reel to reel tape machines provides students with a unique experience in not only sonic quality, but also artistic and technical decision-making due to the mechanical limitations presented by the analog format.

MUS 589. Analysis of Rhythm and Meter. 3 Credits.

This course focuses on theories and analytical methodologies for studying rhythm and meter, with focal repertoire drawn from European classical music, English- language popular music, and global vernacular and traditional repertoires. Topics covered include hypermeter and metrical levels, rhythmic consonance and dissonance, Afro-Cuban rhythmic patterns, and groove.

MUS 590. Balinese Gamelan. 2 Credits.

Pacific Rim Gamelan ensemble. Performance of original compositions and traditional music for gamelan. Limited to twelve performers. Three public performances a year.

Repeatable 99 times

MUS 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MUS 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MUS 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

MUS 605. Reading and Conference: [Topic]. 1-16 Credits.

Individual study of topics beyond the availability of the standard curriculum.

Requisites: Prereq: completion of all regularly scheduled courses related to the topic.

Repeatable 99 times

MUS 607. Seminar: [Topic]. 1-5 Credits.

Studies of various topics at an advanced level offered periodically according to student and faculty interest and availability. Extra fee for Oregon Bach Festival seminars.

Repeatable 99 times

MUS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MUS 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

MUS 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUS 611. Research Methods in Music. 3 Credits.

Use of reference, research, and bibliographical sources in music. Sequence.

MUS 614. Introduction to Musicology. 4 Credits.

Introduces musicology and several of its subfields; includes current and recent arguments.

MUS 615. Current Trends in Music Theory. 3 Credits.

Surveys recent and developing trends in the discipline of music theory; includes discussion of writing and research methods.

MUS 620. Bibliography in Instrumental Conducting. 3 Credits.

Survey of research in conducting. Discussion of rehearsal strategies and psychology.

MUS 621. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

MUS 622. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

MUS 623. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

Requisites: Prereq: MUS 622.

MUS 624. Instrumental Conducting Laboratory. 2 Credits.

Study, preparation, and conducting of works for instrumental ensembles in rehearsals and performances.

Repeatable 2 times for a maximum of 6 credits

MUS 625. Orchestral Music: Bach to Beethoven. 2 Credits.

Survey of orchestral music from Bach to Beethoven. Sequence with MUS 626. Offered alternate years.

MUS 626. Orchestral Music: 1825 to Modern. 2 Credits.

Survey of orchestral music from 1825 to the modern era. Sequence with MUS 625. Offered alternate years.

MUS 627. Survey of Choral Literature I. 3 Credits.

Survey and analysis of choral repertoire from the Renaissance to the modern era with an emphasis on genres and text settings

MUS 628. Survey of Choral Literature II. 3 Credits.

Survey of sacred and secular choral music from 1450 to the present with an emphasis on an expanded view beyond the traditional canon

MUS 629. Repertoire and Analysis. 3 Credits.

Analytical interpretations of musical works in a context that focuses on repertoire rather than on particular analytical methodologies. The pieces studied vary each time the course is offered.

Repeatable 2 times for a maximum of 9 credits

MUS 630. History of Theory I. 3 Credits.

Examination and evaluation of theories of music from ancient times to the 16th century, including Aristides Quintilianus, Boethius, Hucbald, Guido, Franco, Tinctoris, Ramis, and Aron. Offered alternate years.

MUS 631. History of Theory II. 3 Credits.

Examination and evaluation of theories of music from the 16th to 19th centuries, including Glarean, Zarlino, Descartes, Rameau, Tartini, Kirnberger, C. P. E. Bach, Fétis, Sechter, and Helmholtz. Offered alternate years.

MUS 632. History of Theory III. 3 Credits.

Theories of harmony and structure ranging from the mid-19th century to the present, including Hauptmann, Riemann, Schenker, Schoenberg, Hindemith, Babbitt, Forte, Lewin, Straus, and Lerdaahl. Offered alternate years.

MUS 634. Advanced Post-Tonal Theory. 3 Credits.

Analytic approaches to twelve-tone music.

MUS 640. Advanced Composition Studies. 3 Credits.

Studio instruction in composition.

Requisites: Prereq: MUS 442/MUS 542; coreq: MUS 538.

Repeatable 2 times for a maximum of 9 credits

MUS 641. Advanced Composition Studies. 3 Credits.

Studio instruction in composition.

Requisites: Prereq: MUS 640; coreq: MUS 538.

Repeatable 2 times for a maximum of 9 credits

MUS 642. Advanced Composition Studies. 3 Credits.

Studio instruction in composition.

Requisites: Prereq: MUS 641; coreq MUS 538.

Repeatable 2 times for a maximum of 9 credits

MUS 643. Notation of Medieval and Renaissance Music. 3 Credits.

Representative examples of notational systems and practices in Western European polyphony from 900 to 1600. Offered alternate years.

MUS 645. Advanced Electronic Composition. 3 Credits.

Develops an advanced understanding of computers and software and how they are used to process digital audio and create musical and mediacompositions. Repeatable with instructor's consent. Laboratory fee.

Requisites: Prereq: MUS 547, MUS 548, MUS 576; or equivalent.

Repeatable 5 times for a maximum of 18 credits

MUS 650. Piano Literature. 3 Credits.

Advanced study of solo piano literature from Bach to the present. Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

MUS 651. Piano Literature. 3 Credits.

Advanced study of solo piano literature from Bach to the present. Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

Requisites: Prereq: MUS 650.

MUS 652. Piano Literature. 1-3 Credits.

Advanced study of solo piano literature from Bach to the present. Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

Requisites: Prereq: MUS 651.

MUS 660. Music in the Middle Ages. 3 Credits.

Sources of Western European music in classical antiquity and the Near East; sacred monophony, secular monophony; development of polyphony. Offered alternate years.

MUS 661. Music in the Renaissance. 3 Credits.

The central Renaissance style in 15th-century France and Italy; high Renaissance music; late Renaissance music; developments in England and Germany; instrumental music; Renaissance music theory. Offered alternate years.

MUS 662. Music in the Baroque Era. 3 Credits.

Musical genres in Italy, France, Germany, Austria, Britain, the Netherlands, Spain, Mexico, and South America in historical, social, political, and cultural contexts—early 17th century through Bach and Handel. Offered alternate years.

MUS 663. Music in the Classical Period. 3 Credits.

Study of galant, Empfindsamer, and classical styles from c. 1730 to Boccherini, Haydn, and Mozart. Focus on instrumental and sacred music, and on opera before Mozart. Offered alternate years.

MUS 664. Music in the Romantic Era. 3 Credits.

Virtuosic and lyric extremes in instrumental and vocal styles. Literary romanticism, descriptive music, and the Lied; opera in France and Italy; Wagner's music drama as Gesamtkunstwerk. Offered alternate years.

MUS 665. Music in the 20th Century. 3 Credits.

Crisis of romanticism and tonality: transition of Debussy, Mahler, and others; new styles of Stravinsky, Schoenberg, Bartok; developments in the United States; implications of recent trends. Offered alternate years.

MUS 670. Graduate Seminar in Musicology: [Topic]. 4 Credits.

Advanced graduate seminars that revolve around a rotating selection of topics in musicology, emphasizing prominent research and approaches in the field.

Repeatable 9 times for a maximum of 40 credits when topic changes

MUS 671. Seminar in Ethnomusicology: [Topic]. 4 Credits.

Discussion-based seminar focused on history, methods, and emerging issues related to the discipline of ethnomusicology (the study of music in/as culture).

Requisites: Prereq: MUS 551 recommended.

Repeatable 9 times for a maximum of 40 credits

MUS 672. Seminar: Music Theory: [Topic]. 4 Credits.

Advanced graduate seminars that revolve around a rotating selection of topics in music theory, emphasizing prominent research and approaches in the field.

Repeatable 9 times for a maximum of 40 credits

MUS 675. Campus Band: [Topic]. 1-2 Credits.

Participation in Campus Band. No audition needed. Ensemble fee.

Repeatable 11 times for a maximum of 24 credits

MUS 676. Campus Orchestra. 1-2 Credits.

Participation in an orchestra. No audition needed. Ensemble fee.

Repeatable 11 times for a maximum of 24 credits

MUS 677. Campus Chorus: [Topic]. 2 Credits.

Participation in a choral ensemble. Gospel Choir, Gospel Singers, Gospel Ensemble. Audition required for Gospel Singers and Gospel Ensemble. Ensemble fee.

Requisites: Prereq: Audition or voice screening (except Gospel Choir).

Repeatable 11 times for a maximum of 24 credits

MUS 680. Historical Performance Practices I. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music, from the 12th through 16th centuries. Offered once every third year.

MUS 681. Historical Performance Practices II. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music in the 17th and early 18th centuries. Offered once every third year.

MUS 682. Historical Performance Practices III. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music in the late 18th and 19th centuries. Offered once every third year.

MUS 683. Rhetoric and Music. 4 Credits.

This class is designed as an in-depth study seminar of some important aspects of rhetoric as it applies to pre-World-War-One music.

MUS 684. Musical Iconography. 4 Credits.

In-depth study seminar of the interdisciplinary field that deals with visual representations (iconography) of all themes musical, from musical instruments, to musical notation, portraits of musicians, allegories, instruments as symbols and attributes, and concerts, from the late Middle Ages to the nineteenth century.

MUS 691. Collegium Musicum. 1-3 Credits.

Study of music repertoire of the medieval, Renaissance, and baroque periods through rehearsals and extensive sight-reading; vocal and instrumental repertoire. Ensemble fee.

Requisites: Prereq: audition.

Repeatable 6 times

MUS 693. Oregon Electronic Device Orchestra. 2 Credits.

Performance ensemble that uses data-driven musical instruments in combination with software and hardware to perform music and intermedia compositions.

Requisites: Prereq: MUS 547, MUS 548.

Repeatable 11 times for a maximum of 24 credits

MUS 694. Chamber Ensemble: [Topic]. 1-2 Credits.

Accompanying, Brass Choir, Brass Ensemble, Chamber Ensemble, Trombone Ensemble, Tuba and Euphonium Ensemble, Studio Guitar Ensemble, Jazz Guitar Ensemble, Latin Jazz Ensemble, Oregon Percussion Ensemble.

Requisites: Prereq: audition (except chamber ensemble).

Repeatable 11 times for a maximum of 12 credits

MUS 695. Band: [Topic]. 1-2 Credits.

Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Oregon Wind Ensemble, UO Campus Band, UO Symphonic Band, Yellow Garter Band. Ensemble fee for Oregon Wind Ensemble, UO Symphonic Band, UO Campus Band.

Requisites: Prereq: audition (except UO Campus Band and Oregon Marching Band).

Repeatable 11 times for a maximum of 24 credits

MUS 696. Orchestra: [Topic]. 1-2 Credits.

University Symphony Orchestra, Campus Orchestra. Ensemble fee.

Requisites: Prereq: audition (except Campus Orchestra).

Repeatable 11 times for a maximum of 24 credits

MUS 697. Chorus: [Topic]. 2 Credits.

Chamber Choir, Concert Choir, Gospel Singers, Repertoire Singers, University Gospel Choir, University Gospel Ensemble, University Singers, Women's Choir. Ensemble fee.

Requisites: Prereq: audition or voice screening (except Concert Choir and Gospel Choir).

Repeatable 11 times for a maximum of 24 credits

MUS 698. Opera Workshop. 2 Credits.

Traditional and contemporary repertory for musical theater through analysis, rehearsal, and performance of complete and excerpted works; training in stage movement, diction, and rehearsal techniques.

Requisites: Prereq: audition.

Repeatable 11 times for a maximum of 24 credits

Music Education (MUE)

Courses

MUE 126. Orientation to Music Education. 1 Credit.

An orientation for first year music education majors, including an overview of music education philosophy and contemporary issues in music education. In addition, an exploration of career opportunities in music education and other fields will be covered.

MUE 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUE 326. Foundations of Music Education. 3 Credits.

Professional orientation for prospective school music teachers; curricular, historical, philosophical, and social foundation of music education; ethical, professional, and social aspects of teaching; comprehensive field experience. Extra fee.

MUE 375. Athletic Band: [Topic]. 1-2 Credits.

Participation in an athletic band. Examples are Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Yellow Garter Band.

Requisites: Prereq: Audition.

Repeatable 11 times for a maximum of 24 credits

MUE 386. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Requisites: Coreq: MUE 442.

MUE 387. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Requisites: Coreq: MUS 484 or MUS 486.

MUE 388. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Requisites: Coreq: MUE 411 or MUE 413.

MUE 392. Instrumental Techniques: [Topic]. 1 Credit.

Elementary instruction in pedagogy and performance of various instruments. Sections in violin and cello, low brass, high brass, percussion, flute and clarinet, saxophone, oboe and bassoon, and voice. Instrument rental fee.

Repeatable 12 times

MUE 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MUE 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MUE 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

MUE 405. Reading and Conference: [Topic]. 1-4 Credits.

Individual study of topics at a level above that available in the standard curriculum.

Requisites: Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

Repeatable 99 times

MUE 406. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

MUE 407. Seminar: [Topic]. 1-5 Credits.

Various advanced topics offered periodically according to student and faculty interest and availability.

Repeatable 99 times

MUE 408. Workshop: [Topic]. 1-21 Credits.

Various topics at a level above that available in the standard curriculum.

Repeatable 99 times

MUE 409. Terminal Project. 1-12 Credits.

Practical experience in guiding learning activities.

Repeatable 99 times

MUE 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUE 411. Band Methods. 3 Credits.

Concerns of band teachers in secondary and elementary schools. Observations, procedures, and instructional materials; planning and teaching lessons for analysis and criticism. Admission to the MUP 300 level in primary instrument required.

Requisites: Prereq: admission to music education major; admission to the MUP 300 level on primary instrument; MUE 392, MUS 486; coreq: MUE 388 or MUE 406.

Repeatable 1 time for a maximum of 6 credits

MUE 412. Elementary Music Methods. 3 Credits.

This course is designed to prepare upper-division music education majors to teach elementary music in public schools. Students will become familiar with basic common pedagogical techniques used in the general music classroom. Lab fee.

Requisites: Prereq: Admission to the MUP 300 level.

MUE 413. Secondary Choral Methods. 3 Credits.

Secondary choral music curriculum, teaching methods, sight singing and music literacy, developing independent musicianship, philosophical and social foundation of vocal music education in the public schools.

Requisites: Prereq: admission to music education major; admission to the MUP 300 level in voice or piano; MUS 484; coreq: MUE 388 or MUE 488.

MUE 420. Contemporary Methods in Music Education. 3 Credits.

This course is designed to assist upper-level and graduate music education students develop an understanding of Contemporary methods as commonly used in American public school general music K-9 grade classrooms and to apply these techniques to in-class and virtual teaching assignments.

Requisites: Prereq: MUE 412.

MUE 429. Music in Special Education. 3 Credits.

Designed to assist senior and graduate music education majors and pedagogy majors in their awareness of the physical, intellectual, emotional, and social conditions of students with exceptionalities, so that they may be included and accommodated in music activities in the classroom.

MUE 430. Music Classroom Management. 3 Credits.

Techniques in classroom management; crises prevention and intervention; techniques for providing a safe and positive classroom environment; professional ethics and legal expectations.

Repeatable 2 times for a maximum of 9 credits

MUE 432. Music in School and Society. 3 Credits.

Elementary and secondary school music programs, past and present, and their relationships to the communities they serve.

MUE 438. Curricular Strategies in Music Education. 3 Credits.

Procedures for developing music courses for today's schools; determination of goals, content, instructional materials, and evaluative criteria; exploration of significant curriculum development projects in music education.

MUE 442. Teaching Singing in the Classroom. 3 Credits.

Methods for teaching group vocal technique in the classroom with emphasis on elementary, mid-level, and emerging adult voices. Concentration on development of the adolescent changing voice.

Requisites: Prereq: admission to music education; coreq: MUE 387.

MUE 450. Practicum in Music Education. 2 Credits.

MUE 450/550 provides scope, structure, supervision, and guidance to support Music Education students during two terms of Music Education practica in accordance with the Oregon Teacher Standards.

Repeatable 1 time for a maximum of 4 credits

MUE 455. Marching Band Methods. 3 Credits.

Teaching methods for secondary school marching bands.

MUE 456. String Methods. 3 Credits.

Teaching methods for the beginning string class in elementary and middle schools. Development of technique sequences for string groups in secondary schools.

MUE 459. Fundamentals of Violin and Viola Teaching. 2 Credits.

Development of technique for instruction of beginning violin students, including philosophy, practice habits for young students, parent education, and pedagogical skills.

MUE 460. Early-Intermediate Violin Repertoire and Technique. 2 Credits.

This course provides an overview of early and intermediate repertoire, focusing specifically on sequentially-organized pieces that teachers can use to logically build violin technique.

Requisites: Prereq: MUE 459.

MUE 463. Pedagogy Methods: Violin and Viola. 2 Credits.

Principles and techniques of violin and viola teaching selected from the pedagogical approaches of Flesch, Galamian, Dounis, Rolland.

MUE 464. Advanced Violin/Viola Pedagogy. 2 Credits.

This course will examine the major violin pedagogy schools with their pertinent somatic counterparts. Teaching practicums will be included.

MUE 465. Somatics for String Players. 1 Credit.

This course will examine somatic (body awareness) in string playing. Human anatomy, performance anxiety, proper breathing, and playing alignment will be addressed. Teaching practicums will be included.

MUE 466. Community Music Institute Practicum. 1 Credit.

This course serves as a repeatable teaching lab with students enrolled in the University of Oregon's Community Music Institute. Initial term includes observation of master teachers. Subsequent terms include guided teaching assignments commensurate with the university student's level of experience and expertise.

Requisites: Prereq: MUE 459.

Repeatable 8 times for a maximum of 9 credits

MUE 471. Piano Pedagogy I: Teaching Beginners. 3 Credits.

In-depth study of beginning methods and materials for children and adults. Individual teaching experience. Offered alternating years.

MUE 472. Piano Pedagogy II Teaching Groups. 3 Credits.

Methods and materials for group instruction of all ages and levels. Survey of learning theories and new technologies. Individual and group teaching experience. Offered alternating years.

Requisites: Prereq: MUE 471.

MUE 473. Piano Pedagogy III Teaching Intermediate Levels. 3 Credits.

Study of repertoire, technique, and teaching methods appropriate for intermediate-level piano students. Individual and master-class teaching experience. Offered alternating years.

Requisites: Prereq: MUE 471.

MUE 486. Teaching Laboratory II. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Requisites: Prereq: admission to music education.

MUE 491. Advanced Pedagogy: [Topic]. 3 Credits.

Sections in piano and other topics.

Repeatable 2 times for a maximum of 9 credits when topic changes

MUE 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MUE 507. Seminar: [Topic]. 1-5 Credits.

Various advanced topics offered periodically according to student and faculty interest and availability.

Repeatable 99 times

MUE 508. Workshop: [Topic]. 1-21 Credits.

Various topics at a level above that available in the standard curriculum.

Repeatable 99 times

MUE 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUE 511. Band Methods. 3 Credits.

Concerns of band teachers in secondary and elementary schools.

Observations, procedures, and instructional materials; planning and teaching lessons for analysis and criticism. Admission to the MUP 300 level in primary instrument or voice required.

Requisites: Prereq: admission to the MUP 300 level on primary instrument; MUE 392, MUS 486; coreq: MUE 388 or MUE 488.

Repeatable 1 time for a maximum of 6 credits

MUE 512. Elementary Music Methods. 3 Credits.

This course is designed to prepare upper-division music education majors to teach elementary music in public schools. Students will become familiar with basic common pedagogical techniques used in the general music classroom. Lab fee.

Requisites: Prereq: admission to music education

MUE 513. Secondary Choral Methods. 3 Credits.

Secondary choral music curriculum, teaching methods, sight singing and music literacy, developing independent musicianship, philosophical and social foundation of vocal music education in the public schools.

Requisites: Prereq: admission to the MUP 300 level in voice or piano; MUS 484/MUS 584; coreq: MUE 388 or MUE 488.

MUE 520. Contemporary Methods in Music Education. 3 Credits.

This course is designed to assist upper-level and graduate music education students develop an understanding of Contemporary methods as commonly used in American public school general music K-9 grade classrooms and to apply these techniques to in-class and virtual teaching assignments.

MUE 529. Music in Special Education. 3 Credits.

Designed to assist senior and graduate music education majors and pedagogy majors in their awareness of the physical, intellectual, emotional, and social conditions of students with exceptionalities, so that they may be included and accommodated in music activities in the classroom.

MUE 530. Music Classroom Management. 3 Credits.

Techniques in classroom management; crises prevention and intervention; techniques for providing a safe and positive classroom environment; professional ethics and legal expectations.

Repeatable 2 times for a maximum of 9 credits

MUE 532. Music in School and Society. 3 Credits.

Elementary and secondary school music programs, past and present, and their relationships to the communities they serve.

MUE 538. Curricular Strategies in Music Education. 3 Credits.

Procedures for developing music courses for today's schools; determination of goals, content, instructional materials, and evaluative criteria; exploration of significant curriculum development projects in music education.

MUE 542. Teaching Singing in the Classroom. 3 Credits.

Methods for teaching group vocal technique in the classroom with emphasis on elementary, mid-level, and emerging adult voices. Concentration on development of the adolescent changing voice.

Requisites: Prereq: admission to music education; coreq: MUE 386.

MUE 550. Practicum in Music Education. 2 Credits.

MUE 450/550 provides scope, structure, supervision, and guidance to support Music Education students during two terms of Music Education practica in accordance with the Oregon Teacher Standards.

Repeatable 1 time for a maximum of 4 credits

MUE 555. Marching Band Methods. 3 Credits.

Teaching methods for secondary school marching bands.

MUE 556. String Methods. 3 Credits.

Teaching methods for the beginning string class in elementary and middle schools. Development of technique sequences for string groups in secondary schools.

MUE 559. Fundamentals of Violin and Viola Teaching. 2 Credits.

Development of technique for instruction of beginning violin students, including philosophy, practice habits for young students, parent education, and pedagogical skills.

MUE 560. Early-Intermediate Violin Repertoire and Technique. 2 Credits.

This course provides an overview of early and intermediate repertoire, focusing specifically on sequentially-organized pieces that teachers can use to logically build violin technique.

Requisites: Prereq: MUE 559.

MUE 563. Pedagogy Methods: Violin and Viola. 2 Credits.

Principles and techniques of violin and viola teaching selected from the pedagogical approaches of Flesch, Galamian, Dounis, Rolland.

MUE 564. Advanced Violin/Viola Pedagogy. 2 Credits.

This course will examine the major violin pedagogy schools with their pertinent somatic counterparts. Teaching practicums will be included.

MUE 565. Somatics for String Players. 1 Credit.

This course will examine somatic (body awareness) in string playing. Human anatomy, performance anxiety, proper breathing, and playing alignment will be addressed. Teaching practicums will be included.

MUE 566. Community Music Institute Practicum. 1 Credit.

This course serves as a repeatable teaching lab with students enrolled in the University of Oregon's Community Music Institute. Initial term includes observation of master teachers. Subsequent terms include guided teaching assignments commensurate with the university student's level of experience and expertise.

Requisites: Prereq: MUE 559.

Repeatable 8 times for a maximum of 9 credits

MUE 571. Piano Pedagogy I: Teaching Beginners. 3 Credits.

In-depth study of beginning methods and materials for children and adults. Individual teaching experience. Offered alternate years.

MUE 572. Piano Pedagogy II Teaching Groups. 3 Credits.

Methods and materials for group instruction of all ages and levels. Survey of learning theories and new technologies. Individual and group teaching experience. Offered alternate years.

Requisites: Prereq: MUE 571.

MUE 573. Piano Pedagogy III Teaching Intermediate Levels. 3 Credits.

Study of repertoire, technique, and teaching methods appropriate for intermediate-level piano students. Individual and master-class teaching experience. Offered alternate years.

Requisites: Prereq: MUE 571.

MUE 591. Advanced Pedagogy. 3 Credits.

Sections in piano and other topics.

Repeatable 2 times for a maximum of 9 credits when topic changes

MUE 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

MUE 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MUE 604. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

MUE 605. Reading and Conference: [Topic]. 1-16 Credits.

Individual study of topics beyond regularly scheduled courses.

Requisites: Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

Repeatable 99 times

MUE 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

MUE 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MUE 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MUE 609. Terminal Project. 1-12 Credits.

Professionally related experience, on campus or elsewhere, supervised by a qualified expert both in planning and in carrying out the project.

Requisites: Prereq: knowledge and competence in the substance of the activity and in curricular planning.

Repeatable 99 times

MUE 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUE 612. Quantitative Research in Music Education. 3 Credits.

A focus on quantitative methodology and research in music education, including an introduction to descriptive and inferential statistics.

Terminology, methods, and concepts relating to peer-reviewed research will be explored. Students will also have the opportunity to carry out a study using quantitative methods.

MUE 615. Jazz Practicum. 1 Credit.

Students will complete observations of experienced teachers in academic, ensemble, and studio settings, and will receive qualitative feedback from cooperating teachers through short, supervised teaching demonstrations.

Repeatable 2 times for a maximum of 3 credits

MUE 639. Pedagogy and Practicum: [Topic]. 3 Credits.

Teaching strategies and practical application. Topics include composition, conducting, ethnomusicology, jazz studies, music education, music history, music technology, music theory, performance practice, instrumental conducting, voice, keyboard, strings, woodwinds, brass, and percussion.

Repeatable 2 times for a maximum of 9 credits when topic changes

MUE 641. College Music Teaching. 3 Credits.

Developing knowledge, skills, and attitudes useful for teaching music; current principles of educational psychology at the college level, instructional techniques, tests and measurements.

MUE 647. Psychology of Music. 3 Credits.

Study of psychological, physiological, and neurological aspects of musical behavior and experience, including acoustics, human hearing, perception and cognition, development and expertise, affective response and preference, unusual abilities.

MUE 649. History of Western Music Education. 3 Credits.

A comprehensive overview of philosophical and historical foundations in music education from antiquity to the present day. It involves not only the study of music education from these perspectives, but general education and policy as well.

MUE 675. Campus Athletic Band: [Topic]. 1-2 Credits.

Participation in an athletic band. Examples are Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Yellow Garter Band.

Requisites: Prereq: Audition.

Repeatable 11 times for a maximum of 24 credits

Music Jazz Studies (MUJ)

Courses

MUJ 180. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

MUJ 181. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

Requisites: Prereq: MUJ 180.

MUJ 182. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

Requisites: Prereq: MUJ 181.

MUJ 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUJ 270. Jazz Theory. 2 Credits.

Introduction to jazz harmony: chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines.

MUJ 271. Functional Jazz Piano I. 2 Credits.

Performance of one- and two-handed comping style including common voice-leading practices, scales, and harmonic formulas. Reading from chord symbols and lead sheets. Sequence.

Requisites: Prereq: MUJ 270.

MUJ 272. Functional Jazz Piano II. 2 Credits.

Performance of one- and two-handed comping style including common voice-leading practices, scales, and harmonic formulas. Reading from chord symbols and lead sheets. Sequence.

Requisites: Prereq: MUJ 271.

MUJ 273. Jazz Improvisation I. 2 Credits.

Task-oriented performance of selected standard jazz repertoire. Chord and scale study, solo transcription, analysis, pattern practice, simple compositional forms.

Requisites: Prereq: MUJ 270.

MUJ 274. Jazz Improvisation II. 2 Credits.

Task-oriented performance of selected standard jazz repertoire. Chord alteration, chord substitution, reharmonization and chromaticism.

Requisites: Prereq: MUJ 273.

MUJ 275. Jazz Composition I. 2 Credits.

Examination and application of contemporary compositional techniques utilized in jazz and commercial music idioms through the study of blues and simple song forms.

Requisites: Prereq: MUJ 180, MUJ 181, MUJ 182.

MUJ 276. Jazz Composition II. 2 Credits.

The examination and application of contemporary compositional techniques utilized in jazz and commercial music idioms through the study and composition of simple song forms.

Requisites: Prereq: MUJ 180, MUJ 181, MUJ 182.

MUJ 350. History of Jazz, 1900 to 1950. 4 Credits.

History, biography, multiculturalism, and racism in early jazz and swing through modern jazz. Includes Louis Armstrong, Duke Ellington, Charlie Parker, Dizzy Gillespie, Miles Davis.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUJ 351. History of Jazz, 1940 to Present. 4 Credits.

History, biography, multiculturalism, and racism in modern jazz and free jazz to present. Includes Charlie Parker, Dizzy Gillespie, Miles Davis, John Coltrane, Ornette Coleman.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

MUJ 374. Campus Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Ensemble fee.

Requisites: Prereq: Audition.

Repeatable 11 times for a maximum of 24 credits

MUJ 390. Jazz Laboratory Band III. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee.

Repeatable 6 times

MUJ 391. Jazz Laboratory Band II. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee.

Repeatable 6 times

MUJ 392. Oregon Jazz Ensemble. 1-2 Credits.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee.

Requisites: Prereq: audition.

Repeatable 6 times

MUJ 395. Small Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Ensemble fee.

Requisites: Prereq: audition.

Repeatable 11 times for a maximum of 24 credits

MUJ 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUJ 405. Reading and Conference: [Topic]. 1-4 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MUJ 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MUJ 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MUJ 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUJ 440. Jazz Pedagogy Practicum. 3 Credits.

Study of jazz pedagogy through discussion, observation, reading, listening, and practice. Topics include curriculum, rhythm section fundamentals, ensemble rehearsal strategies, and improvisation methods.

Requisites: Prereq: MUJ 182 or MUJ 270.

MUJ 477. Advanced Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Requisites: Prereq: MUJ 274.

MUJ 478. Advanced Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Requisites: Prereq: MUJ 477.

MUJ 479. Advanced Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Requisites: Prereq: MUJ 478.

MUJ 480. Jazz Arranging I. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Requisites: Prereq: MUJ 272.

MUJ 481. Jazz Arranging II. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Requisites: Prereq: MUJ 480.

MUJ 483. Advanced Jazz Arranging I. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Requisites: Prereq: MUJ 481.

MUJ 484. Advanced Jazz Arranging II. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Requisites: Prereq: MUJ 483.

MUJ 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

MUJ 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

MUJ 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

MUJ 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

MUJ 540. Jazz Pedagogy Practicum. 3 Credits.

Study of jazz pedagogy through discussion, observation, reading, listening, and practice. Topics include curriculum, rhythm section fundamentals, ensemble rehearsal strategies, and improvisation methods.

Requisites: Prereq: For graduates: Admission to MM Jazz Studies Degree or to Graduate Specialization in Jazz Pedagogy - or - Instructor's Permission.

MUJ 577. Advanced Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Requisites: Prereq: MUJ 476/MUJ 576.

MUJ 578. Advanced Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Requisites: Prereq: MUJ 477/MUJ 577.

MUJ 579. Advanced Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Requisites: Prereq: MUJ 478/MUJ 578.

MUJ 580. Jazz Arranging I. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

MUJ 581. Jazz Arranging II. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Requisites: Prereq: MUJ 480/MUJ 580.

MUJ 583. Advanced Jazz Arranging I. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Requisites: Prereq: MUJ 482/MUJ 582.

MUJ 584. Advanced Jazz Arranging II. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Requisites: Prereq: MUJ 483/MUJ 583.

MUJ 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

MUJ 660. Survey of Jazz Composition. 3 Credits.

Overview of important developments and historically significant figures in jazz composition and arranging. Analysis of their music and stylistic traits.

MUJ 661. Jazz Program Planning and Development. 3 Credits.

Designing and nurturing a successful jazz program. Jazz curriculum, grant writing, budgets, resources, organizing student support, setting and reaching program goals.

MUJ 674. Campus Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Ensemble fee.

Requisites: Prereq: Audition.

Repeatable 11 times for a maximum of 24 credits

MUJ 690. Jazz Laboratory Band III. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee.

Repeatable 6 times

MUJ 691. Jazz Laboratory Band II. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times. Ensemble fee.

Repeatable 6 times

MUJ 692. Oregon Jazz Ensemble. 1-2 Credits.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee.

Repeatable 6 times

MUJ 695. Small Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Ensemble fee.

Repeatable 6 times

Music Performance (MUP)

General Limitations (p. 27)

- Non-Music majors: a maximum of 12 credits of Performance in music (in subject MUP).

- BA/BS degree in Music: a maximum of 24 credits of Performance in music (in subject MUP).
- BMus and BMME degrees: no limit of Performance in Music (in subject MUP); a course limit will apply.

MUP 114. Fundamentals of Music Performance Studies I: [Topic]. 2 Credits.

Beginning-level group instruction for students with little or no previous applied music studies.

Repeatable 11 times for a maximum of 24 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 115. Fundamentals of Music Performance Studies II: [Topic]. 2 Credits.

Intermediate-level group instruction for students with only a basic applied music studies background.

Repeatable 11 times for a maximum of 24 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 163. Functional Piano. 2 Credits.

Group instruction in functional keyboard skills.

Requisites: Prereq: MUS 138.

Repeatable 2 times for a maximum of 6 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 165. Music Performance Studies: [Topic]. 2 Credits.

Half-hour lessons of studio instruction in music performance.

Requisites: Prereq: Successful audition for studio instructor demonstrating proficiency.

Repeatable 17 times for a maximum of 36 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 199. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Breathing Technique and Tuba-Euphonium Routine.

Repeatable 99 times

Additional Information:

General Limitation applies: Music Lessons Course

MUP 265. Music Performance Studies: [Topic]. 2 Credits.

One-hour lessons of studio instruction in music performance. Required for BMME freshman and sophomore students.

Requisites: Prereq: Successful audition for studio instructor to demonstrate proficiency.

Repeatable 8 times for a maximum of 18 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 270. Music Performance Studies: [Topic]. 4 Credits.

One-hour lessons of studio instruction in music performance. Required for BM-Perf. freshman and sophomore students.

Requisites: Prereq: Successful audition for studio instructor to demonstrate proficiency.

Repeatable 8 times for a maximum of 36 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 365. Music Performance Studies. 2 Credits.

One-hour lessons of studio instruction in music performance. Required for BMME juniors and seniors.

Requisites: Prereq: Audition for studio instructor to demonstrate proficiency.

Repeatable 8 times for a maximum of 18 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 465. Music Performance Studies: [Topic]. 4 Credits.

One-hour lessons of studio instruction in music performance focusing on degree recital and other significant performance preparation throughout the year. Required for BM-Performance juniors and seniors.

Requisites: Prereq: Successful completion of end of sophomore year checkpoint level-up jury.

Repeatable 8 times for a maximum of 36 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Music Lessons Course

MUP 635. Music Performance Studies: [Topic]. 2 Credits.

Half-hour lessons of studio instruction in music performance. Intended for graduate-level non-performance, or secondary instrument master's students.

Requisites: Prereq: Audition for studio instructor to demonstrate proficiency.

Repeatable 9 times for a maximum of 20 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 650. Music Performance Studies. 2 Credits.

Hour-long lessons of studio instruction in music performance. Open to Jazz Studies master's students.

Requisites: Prereq: Audition for studio instructor to demonstrate proficiency.

Repeatable 9 times for a maximum of 20 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 665. Music Performance Studies. 4 Credits.

Hour-long lessons of studio instruction in music performance. Required for performance major master's students.

Requisites: Prereq: Audition for studio instructor to demonstrate proficiency.

Repeatable 9 times for a maximum of 40 credits

Additional Information:

General Limitation applies: Music Lessons Course

MUP 765. Music Performance Studies: [Topic]. 4 Credits.

Hour-long lessons of studio instruction in music performance. Required for DMA Performance students.

Requisites: Prereq: Audition for studio instructor to demonstrate proficiency.

Repeatable 12 times for a maximum of 52 credits

Additional Information:

General Limitation applies: Music Lessons Course

Operations and Business Analytics (OBA)

Courses

OBA 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

OBA 311. Business Analytics I. 4 Credits.

Explores standard protocols for describing and modeling business information and processes; techniques for designing management information systems; criteria for analyzing firms' implementations of information technology. Students cannot receive credit for both OBA 311 and OBA 311H. Sophomore standing required.

Requisites: Prereq: BA 101Z, BA 169Z, EC 201Z, MATH 241, STAT 243Z.

Equivalent to: OBA 311H

OBA 312. Business Analytics II. 4 Credits.

Computer-aided business applications of hypothesis testing, simple linear regression. Introduction to multiple regression and nonparametric techniques. Blocked and completely randomized one- and two-factor experimental designs. Students cannot receive credit for both OBA 312 and OBA 312H. Sophomore standing required.

Requisites: Prereq: OBA 311.

Equivalent to: OBA 312H

OBA 312H. Business Analytics II. 4 Credits.

Computer-aided business applications of hypothesis testing, simple linear regression. Introduction to multiple regression and nonparametric techniques. Blocked and completely randomized one- and two-factor experimental designs. Students cannot receive credit for both OBA 312 and OBA 312H.

Requisites: Prereq: OBA 311 or OBA 311H.

Equivalent to: OBA 312

OBA 335. Operations Management. 4 Credits.

Concepts and applications of operations management. Use of information technology in operations. Topics include forecasting, quality, supply chain management, information systems in operations management, and planning and scheduling. Students cannot receive credit for both OBA 335 and OBA 335H. Sophomore standing required.

Requisites: Prereq: BA 101Z, BA 169Z, EC 201Z, MATH 241, STAT 243Z.

Equivalent to: OBA 335H

OBA 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

OBA 403. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

OBA 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

OBA 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

OBA 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

OBA 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

OBA 410. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Service Operations, Business Analytics, Analyzing Big Data.

Repeatable 99 times when topic changes

OBA 444. Business Database Management Systems. 4 Credits.

Techniques for structuring and storing business data; primary focus on relational database theory, with applied skills for business users, including data warehouses, reporting, and normalization.

Requisites: Prereq: OBA 340 or OBA 340H.

OBA 455. Data Driven Predictive Modeling. 4 Credits.

Introduction to basics of programming and fundamentals of predictive modeling.

Requisites: Prereq: one from OBA 312, OBA 312H, DSCI 345M, MATH 345M.

OBA 465. Sports Analytics. 4 Credits.

The course is intended for students interested in general management, operations, marketing or consulting in sports. The course leverages students' core-course data management skills relating to spreadsheets and databases. Students will work on integrating those data management skills with statistics-based sports data-analytics methods, and thus be able to make rigorous data-driven decisions, as well as effectively communicate the rationale supporting those decisions.

Requisites: Prereq: one from OBA 312, OBA 312H, DSCI 102, DSCI 345M, MATH 345M.

OBA 466. Project and Operations Management Models. 4 Credits.

Frameworks and solutions for managing complex projects and operations; implementing optimal strategies for producing profitable new products and services in the competitive global business environment.

Requisites: Prereq: OBA 335 or 335H.

OBA 477. Supply-Chain Operations and Information. 4 Credits.

Strategic and tactical issues pertaining to the distribution and delivery of products and services. Methodologies and systems for designing, tracking, and managing complex global operations.

Requisites: Prereq: OBA 335 or 335H.

OBA 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

OBA 510. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Service Operations, Business Analytics, Analyzing Big Data.

Repeatable 99 times when topic changes

OBA 544. Business Database Management Systems. 4 Credits.

Techniques for structuring and storing business data; primary focus on relational database theory, with applied skills for business users, including data warehouses, reporting, and normalization.

Requisites: Prereq: all MBA core courses.

OBA 555. Data Driven Predictive Modeling. 4 Credits.

Introduction to basics of programming and fundamentals of predictive modeling.

OBA 565. Sports Analytics. 4 Credits.

The course is intended for students interested in general management, operations, marketing or consulting in sports. The course leverages students' core-course data management skills relating to spreadsheets and databases. Students will work on integrating those data management skills with statistics-based sports data-analytics methods, and thus be able to make rigorous data-driven decisions, as well as effectively communicate the rationale supporting those decisions.

OBA 566. Project and Operations Management Models. 4 Credits.

Frameworks and solutions for managing complex projects and operations; implementing optimal strategies for producing profitable new products and services in the competitive global business environment.

Requisites: Prereq: all MBA core courses.

OBA 577. Supply-Chain Operations and Information. 4 Credits.

Strategic and tactical issues pertaining to the distribution and delivery of products and services. Methodologies and systems for designing, tracking, and managing complex global operations.

Requisites: Prereq: all MBA core courses.

OBA 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

OBA 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

OBA 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

OBA 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

OBA 607. Seminar: [Topic]. 1-3 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

OBA 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

OBA 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

OBA 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

OBA 612. Quantitative Methods for Managers. 3 Credits.

Concepts and techniques of analytic decision making, sampling and statistical inference, and regression analysis.

OBA 613. Operations Management. 3 Credits.

Overview of the managerial issues associated with production and delivery of goods and services. Includes the use of quantitative modeling and several case studies in operations.

Physical Education Courses

General Limitations (p. 27)

A maximum of 12 credits of physical education activity, military science activity, and dance activity (DANC) courses may be applied to the total number of credits required for a bachelor's degree. Limitation information will appear in Additional Information heading for each course.

-
- PE: Aquatics (p. 923) (PEAQ)
 - PE: Aquatics-Scuba (p. 924) (PEAS)
 - PE: Certification (p. 924) (PEC)
 - PE: Fitness (p. 924) (PEF)
 - PE: Individual Activities (p. 926) (PEI)
 - PE: Intercollegiate Athletics (p. 926) (PEIA)
 - PE: Leadership (p. 928) (PEL)
 - PE: Martial Arts (p. 928) (PEMA)
 - PE: Mind-Body (p. 929) (PEMB)
 - PE: Outdoor Pursuits (p. 930) (PEO)
 - PE: Racquet Sports (p. 931) (PERS)
 - PE: Running (p. 932) (PERU)
 - PE: Team Sports (p. 932) (PETS)
 - PE: Weight Training (p. 933) (PEW)

Physical Education: Aquatics (PEAQ)

Courses

PEAQ 111. Learn to Swim. 1 Credit.

Learn to swim and gain confidence/comfort in shallow and deep water. A beginning course for the non-swimmer to learn how to float, submerge comfortably, and move through the water.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAQ 121. Aqua Strength and Fitness I. 1 Credit.

A fitness program based on speed, power, and strength that uses the properties of water to bring intensity with minimal impact on joints. Offers core training and improves cardiovascular endurance, balance, flexibility, and strength using buoyancy and resistance equipment. This course is accessible for all fitness levels.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAQ 122. Aqua Strength and Fitness II. 1 Credit.

A fitness program based on speed, power, and strength that uses the properties of water to bring intensity with minimal impact on joints. Offers core training and improves cardiovascular endurance and strength using buoyancy and resistance equipment. This course is accessible for all fitness levels.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAQ 140. Paddleboard Yoga. 1 Credit.

All the benefits of yoga delivered on top of the water. The standup paddleboard (SUP) provides a balance challenge to strengthen and tone your core while gaining strength, awareness and range of motion from head to toes. A playful and unique experience for all levels.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAQ 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEAQ 201. Swimming I. 1 Credit.

A beginning swim course for those who need to learn breathing and fundamental stroke work in freestyle and backstroke. Must be able to swim one length of the pool and be comfortable in deep water.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAQ 202. Swimming II. 1 Credit.

An intermediate-level swim course for those who want to master freestyle and breathing; improve technique in backstroke, breaststroke, and butterfly; and improve stroke efficiency and endurance.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAQ 203. Swimming III. 1 Credit.

An advanced-level swim course emphasizing endurance, sprint, and stroke work. Must be proficient in all four strokes: butterfly, backstroke, breaststroke, and freestyle.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAQ 351. Lifeguard Certification. 1 Credit.

StarGuard Lifeguard, First Aid and CPR for the Professional Rescuer certification course.

Requisites: Prereq: Pass swimming test.

Repeatable 1 time for a maximum of 2 credits

PEAQ 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Aquatics-Scuba (PEAS)

Courses

PEAS 199. Special Studies: [Topic]. 1 Credit.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEAS 368. Scuba: Basic. 2 Credits.

Open water certification. Techniques and equipment used in underwater diving. Water safety, diving physics, medical aspects of diving, and decompression. Leads to basic scuba certification. Equipment provided.

Requisites: Prereq: Beginning swim experience

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEAS 369. Scuba: Advanced. 1 Credit.

Advanced open water diver certification. Navigation, deep diving, night diving and other topics. Develop underwater skills and learn speciality diving activities. Equipment provided.

Requisites: Prereq: PEAS 368 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAS 370. Scuba: Rescue Diver. 1 Credit.

Rescue Diver certification. Concepts of self rescue, psychological and physical stress, tows, assists, in-water resuscitation and rescue techniques. Equipment provided.

Requisites: Prereq: PEAS 369 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAS 375. Scuba: Deep Diver. 1 Credit.

Learn to dive to greater depths and develop special skills for deep dive planning, organization, procedures, techniques and hazards.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAS 378. Scuba: Nitrox. 1 Credit.

Instruction in diving with enriched air to extend 'no decompression' limits, increasing time spent underwater.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEAS 381. Scuba: Dive Master I. 1-2 Credits.

Dive master certification. Preparation toward becoming a diving instructor. In-depth knowledge of general diving theory and watermanship skills. Assist a PADI instructor with the supervision of underwater diving students, dive planning and organization. Equipment provided.

Requisites: Prereq: PEAS 370; 18 years old, 20 logged dives.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEAS 382. Scuba: Dive Master II. 1-2 Credits.

Advanced watermanship skills, leading to certification as a Dive Master. Responsible for demonstrating techniques and skills, class management, and assist students with common problems. Construct an underwater map.

Requisites: Prereq: PEAS 381 or equivalent.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEAS 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Certification (PEC)

Courses

PEC 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEC 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEC 408. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Fitness (PEF)

Courses

PEF 131. Body Sculpting I. 1 Credit.

Emphasizes muscular endurance training for the upper body, lower body, and abdominals. Dumbbells, soft weights, tubing, steps, small medicine balls, and body resistance challenge every major muscle group in the body.

Repeatable 1 time

Additional Information:

General Limitation applies: Activity Course

PEF 132. Body Sculpting II. 1 Credit.

Intermediate level emphasis on muscular endurance training for the upper body, lower body, and abdominals. Dumbbells, soft weights, tubing, steps, small medicine balls, and body resistance challenge every major muscle group in the body.

Requisites: Prereq: PEF 131 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 145. F45 Functional Fitness. 1-2 Credits.

All levels introduction to functional fitness. Learn F45 methodology by combining functional movements, agility, diverse strength and cardiovascular training stimuli ranging from heavier, shorter weight training intervals to light weight endurance sets, allowing the body to constantly grow in functional capacity. All exercises are adaptable.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEF 205. Pilates Yoga Fusion. 1 Credit.

This course combines Pilates and Yoga techniques to improve balance and flexibility while building a strong muscular core.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 208. Fitness Barre. 1 Credit.

A fusion of Pilates, yoga and elements of aerobics to deliver a total body workout. Focus on posture, body awareness, strength, flexibility, and balance through low-impact, isometric and dynamic movements using a barre for a prop. All fitness levels, no dance experience necessary.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 221. CrossFit I. 1 Credit.

Introduction to highly functional cross-training movements, constantly varied and performed with intensity. Strength, endurance, power, and agility are built in a supportive, team-oriented environment.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 222. CrossFit II. 1 Credit.

Intermediate and advanced dynamic exercises and training progressions. Technique, strength, endurance, power and agility are enhanced. Sequence with PEF 221.

Requisites: Pre-requisite: PEF 221 or equivalent experience.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 241. Group Cycling I. 1 Credit.

A high intensity workout on a specialized stationary cycle (Startrac V-bike). Designed for beginning to intermediate fitness levels, students exercise to music using a variety of riding techniques. Equipment care, muscular activation and endurance, and cardiorespiratory fitness, are covered.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 251. Fitness Kickboxing. 1 Credit.

Practice jabs, punches, footwork, and kick patterns adapted from martial arts for the aerobics participant. Features a warm-up, more than 30 minutes of skills training and combinations, a cool-down, and stretching.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 301. Core and Stretch. 1 Credit.

Gain physical strength, flexibility, and muscular endurance while learning about physiology and anatomy. Develop personalized training program.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 321. Zumba. 1 Credit.

Fitness and dance moves to Latin rhythm and music: salsa, merengue, cumbia, and others. Simple enough for beginners yet can challenge the fitness of advanced exercisers.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 323. Line Dancing. 1 Credit.

Fundamentals of non-partner line dancing routines in country western style, including steps, vocabulary, wall changes, tags, restarts, dances in contra, dances in phrase, musical interpretation, footwork, and sequencing of approximately 20 different routines.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 326. Fitness Dance. 1 Credit.

Cardiovascular workout, dance moves and routines to Top Forty hits, music videos, and hip-hop. Typical class features warm-up, 30 minutes of dance, and cool-down.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEF 340. Personal Trainer. 3 Credits.

Lecture and lab experiences for administering fitness assessments in individual and group settings. Prepares the student for the American Council on Exercise Personal Trainer Certification Exam.

PEF 342. Group Fitness Instructor Training. 3 Credits.

Sessions on anatomy, physiology, exercise technique, choreography, cuing, safety, training principles, and legal and ethical issues. Students prepare to take a national certification exam. Practicum experience may follow.

PEF 343. Wellbeing Coach Training. 2 Credits.

This course will prepare students to sit for a national Health Wellness Coaching Certification Exam (American Council on Exercise). Practical experience will be provided as a regular portion of the course.

PEF 344. Eat, Move, and Be Well. 2 Credits.

For students in need of lifestyle behavior change and guidance who are motivated to use a holistic wellness approach (nutrition, exercise, stress management) to initiate healthy habits. Class includes twice a week 50-minute movement sessions.

PEF 347. Nutrition Daily. 1 Credit.

Learn the foundations of nutrition and how it applies to you, the individual, based on goals, physical make-up, lifestyle and activity. Learn the importance and identification of macronutrients, efficient meal planning and preparation, grocery shopping and navigating nutrition labels.

PEF 350. Sleep and Stress Strategies for Wellbeing. 1 Credit.

Learn about your sleep, stress and recovery including basic physiology, psychology and practices you can put into action to improve your overall health and wellbeing.

PEF 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEF 408. Workshop: [Topic]. 1-5 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Individual Activities (PEI)

Courses

PEI 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEI 201. Juggling I. 1 Credit.

Introduces and develops juggling skills with balls, rings, clubs and other props. Emphasis on creative exploration, relaxation and fun.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEI 202. Juggling II. 1 Credit.

Advanced development of juggling skills with balls, rings, clubs and other props. Visual independence and imagination, relaxation and breath awareness.

Requisites: Prereq: PEI 201 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEI 241. Golf I. 1 Credit.

Introduction to the game. The majority of class time is at the driving range learning swing techniques for distance, pitching, chipping and putting, rules, etiquette, and golf vocabulary. Students must provide their own transportation.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEI 242. Golf II. 1 Credit.

For the experienced golfer who wants to refine their skills. Includes review of swing techniques for all situations, rules, etiquette, and golf vocabulary. Students must provide their own transportation.

Requisites: Prereq: PEI 241 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEI 243. Golf III. 1 Credit.

Emphasis on course play for the advanced golfer to hone basic skills. Includes time on the driving range and putting green. Students must provide their own transportation.

Requisites: Prereq: PEI 242 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEI 244. Golf Swing Exercise. 1 Credit.

Improve your golf swing in the off-season via swing specific exercises. Sequence with Golf I, Golf II, Golf III.

Requisites: Prereq: PEI 243 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEI 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Intercollegiate Athletics (PEIA)

Courses

PEIA 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEIA 301. Lacrosse. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 305. Acrobatics and Tumbling. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Requisites: Prereq: Must be a varsity team member.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 311. Women's Golf. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 312. Men's Golf. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 317. Women's Tennis. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 318. Men's Tennis. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 323. Women's Cross-Country. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 324. Men's Cross-Country. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 329. Women's Track. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 330. Men's Track. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 341. Softball. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 342. Baseball. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Requisites: Prereq: Must be a varsity team member.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 346. Sand Volleyball. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Requisites: Prereq: varsity athletes only.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 347. Volleyball. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 350. Soccer. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 353. Women's Basketball. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 354. Men's Basketball. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 360. Football. 1 Credit.

Varsity athletes may earn a PE credit for their team workouts during their competitive season.

Repeatable 3 times for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 371. Sport Conditioning I. 1 Credit.

A strength and conditioning training opportunity for varsity and club sport student-athletes. Sequence with PEIA 372, PEIA 373.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 372. Sport Conditioning II. 1 Credit.

A strength and conditioning training experience for varsity and club sports student-athletes. Sequence with PEIA 371, PEIA 373.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 373. Sport Conditioning III. 1 Credit.

A strength and conditioning training experience for varsity and club sport student-athletes. Sequence with PEIA 371, PEIA 372.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEIA 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Leadership (PEL)

Courses

PEL 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEL 310. Coaching. 2 Credits.

Addresses all aspects of coaching from kindergarten through college.

Topics include philosophy, objectives and outcomes, communication styles, writing workouts, discipline, and age-appropriate skills, drills and strategies. Sequence with PEL 406 is possible with successful completion of the course.

PEL 311. Coaching II. 2 Credits.

Practical application of knowledge and skills from PEL 310 Coaching I, by implementing strategies and techniques in teaching or coaching situation. Students will write a practice plan and teach a technical and tactical skill to the class. Sequence with PEL 310.

Requisites: Prereq: PEL 310 or equivalent experience.

PEL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEL 406. Practicum: [Topic]. 1-4 Credits.

Practical experiences in equipment and facilities management service, outdoor pursuits, recreation and intramurals, and physical education.

Repeatable 5 times for a maximum of 6 credits

Additional Information:

General Limitation applies: Activity Course

PEL 408. Workshop: [Topic]. 1-5 Credits.

Professional topics in physical education.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEL 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Martial Arts (PEMA)

Courses

PEMA 115. Self-Defense. 1 Credit.

Fundamental concepts of self defense. Mental and physical strategies, awareness and reaction training. Class theme is prevention, covering the "Three As": Awareness, Assessment, Action.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 116. Women, Trans, and Non-Binary Self Defense. 2 Credits.

Women, Trans, and Non-Binary Self Defense is a supportive, empowering class focusing on verbal and physical skills for avoiding and resisting assault. Includes boundary-setting, de-escalation, assertiveness, healthy relationship skills, and effective fighting techniques.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEMA 255. Kickboxing. 1 Credit.

This dynamic martial art includes punching and kicking skills, techniques and the rules of competitive kickboxing. Develops balance, flexibility and strength.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 311. Jeet Kune Do I. 1 Credit.

Basic concepts of Jeet Kune Do and the Filipino Martial Arts. Basic movements, including strikes, kicks, grappling, and defensive weaponry. Develop individualized training methods.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 312. Jeet Kune Do II. 1 Credit.

Intermediate concepts of Jeet Kune Do and the Filipino Martial Arts. Demonstrate movements, immobilization techniques, and practical self defense skills.

Requisites: Prereq: PEMA 311 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 321. Jiu-Jitsu I. 1 Credit.

Introduction to concepts of Brazilian Jiu-Jitsu. Combative activity incorporating throwing, falling, grappline, holds, and safe positioning. Development of practical self-defense knowledge and skills.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 322. Jiu-Jitsu II. 1 Credit.

Basic and intermediate motions of Brazilian Jiu-Jitsu. History, rules and scoring system for sport, escape movements, submission holds.

Requisites: Prereq: PEMA 321 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 331. Mixed Martial Arts I. 1 Credit.

Introductory techniques from boxing, wrestling, jiu-jitsu and muay thai. Rules and scoring system of competitive mixed martial arts. Sequence with PEMA 332.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 332. Mixed Martial Arts II. 1 Credit.

Intermediate techniques; building on skills learned in PEMA 331. Develops strategy, game-plan skills, training methods; increases physical strength and skills. Sequence with PEMA 331.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMA 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Mind-Body (PEMB)

Courses

PEMB 101. Meditation I. 1 Credit.

Fundamentals of body alignment, breathing, mental focus, and relaxation. Philosophy of yoga as it applies to the different styles and methods of meditation, the nature of thought, awareness, and management of thought processes.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 103. Mindful Meditation. 1 Credit.

Learn and apply mindfulness practices, including mindful movement, breath work, and body scans, that enhance overall well-being by calming the mind, concentrating fully, releasing stress, and being more attentive in the present moment. Improves focus, mood and relieves stress.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 110. Beginning Yoga. 1 Credit.

All levels introduction to yoga practices. Learn to perform and recognize benefits of commonly used yoga postures. Great for beginners or people who do not have a strong sense of what type of yoga is best for them.

Class will explore a variety of styles.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEMB 201. Gentle Yoga. 1 Credit.

Beginning hatha yoga postures to reduce stress, discomfort or pain. Techniques for relaxation and mental focus, breathing patterns, and personal energy. Modify positions to accommodate injury or physical limitations. Increase strength, body alignment, comfort, balance, and flexibility.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 203. Restorative Yoga. 1 Credit.

Restorative Yoga offers an opportunity to center your mind and body at a slower pace. Yoga postures (asanas) are held for longer periods of time, encouraging deep focus and relaxation. Props such as bolsters, blankets, and blocks provide support and comfort.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 210. Intermediate Yoga. 1 Credit.

Solidify your understanding of a variety of styles of yoga and master the art of personalizing your practice. Follow up to PEMB 110 Beginning Yoga. Develop a strong foundation and confidence to take with you into any type of yoga, anywhere.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 211. Hatha Yoga I. 1-2 Credits.

Beginning hatha yoga postures and meditation techniques. Increase strength, balance and flexibility. Improve mental concentration and relaxation with yoga poses and breathing awareness. Relieve tension and fatigue.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 212. Hatha Yoga II. 1-2 Credits.

Intermediate hatha yoga poses and meditation techniques to improve mental concentration and relaxation. Breathing awareness exercises, mind and body flexibility.

Requisites: Prereq: PEMB 211 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 216. Vinyasa Flow Yoga. 1 Credit.

Based on a specialized and dynamic sequence of postures and focused breathing techniques. Participation aids in development of postural strength, stability, and muscular flexibility.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 221. Sports Yoga I. 1 Credit.

Covers important yogic concepts and practices for athletes. Improve your flexibility and strength as you learn yoga techniques, practice, and philosophy. Sequence with PEMB 222.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 305. Aerial Silks Yoga I. 1 Credit.

Yoga postures and breathing techniques are taught using a silk hammock. The silk can make some postures more relaxing and accessible but others more intense and challenging. Strength and balance will be explored at a new level to build on your current yoga practice.

Requisites: Prereq: one from PEMB 210, PEMB 211, PEMB 212, PEMB 213, PEMB 216, PEMB 221, PEMB 222, PEMB 234, PEF 205.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 306. Aerial Silks Yoga II. 1 Credit.

Continue to refine your yoga practice and breathing techniques with more complex use of a silk hammock, making some postures more relaxing and accessible but others more intense and challenging. Strength, balance, and inversions will be explored at a new level to encourage a more intentional connection between mind, body, and breath. Sequence with PEMB 305.

Requisites: Prereq: PEMB 305 or PEMB 310.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 310. Yoga Lifelong Practices. 1 Credit.

Advanced studies for students who enjoy the wide variety of styles introduced in other yoga classes and are looking for a deeper more focused practice.

Requisites: Prereq: At least 2 credits of PEMB coursework.

Additional Information:

General Limitation applies: Activity Course

PEMB 320. Yoga Wellness Techniques. 1 Credit.

Learn and apply effective techniques for managing stress and increasing well-being. In a fun, supportive and calming atmosphere, students will gain lifelong tools for coping with stress. The material will include safe, strengthening asana (poses), breathing, active relaxation, and meditation techniques.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEMB 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Outdoor Pursuits (PEO)

Courses

PEO 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEO 242. Bouldering I. 1 Credit.

Techniques for rock climbing without the security of a rope. Emphasis is on safety, skill development and conditioning.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEO 251. Rock Climbing I. 1 Credit.

Basics of safe and responsible rock climbing. Equipment, knots, belaying, rappelling and a range of other climbing techniques. Conducted on the indoor rock climbing wall.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEO 252. Rock-Climbing Fitness. 1 Credit.

Continued development of basic climbing skills, with emphasis on improving flexibility and injury prevention. Refine face and crack climbing techniques. Conducted on the indoor climbing wall.

Requisites: Prereq: PEO 251 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEO 285. Wilderness Survival. 1 Credit.

Our gateway course must be passed (C- or better) prior to participating in our backcountry-oriented courses. Emphasizes navigation, safety and survival.

Repeatable 1 time for a maximum of 2 credits

PEO 325. Swift-Water Safety. 1 Credit.

Covers methods of crossing shallow and deep swift-water streams. Includes hazard assessment, swimming techniques, knots, rope work, technical systems, pendulum and Tyrolean traverse crossings.

Requisites: Prereq: PEO 285 and basic swimming ability.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEO 331. Outdoor Rock Climbing. 2 Credits.

Introduction to anchor building, basic rescue techniques, and outdoor climbing in the context of classroom sessions and a 3-day outing to Smith Rock. Sequence: PEO 251 or equiv experience.

Requisites: Prereq: PEO 251.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEO 351. Backpacking. 2 Credits.

For those with little or no backpacking experience. Introduces the basics of backpacking in the context of classroom sessions and a three-day outing to the Oregon Coast.

Requisites: Prereq: PEO 285

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEO 353. Backcountry Cuisine. 1 Credit.

Students learn how to plan menus, package food, and implement "leave no trace" cooking and baking techniques utilizing backcountry stoves and cooking systems.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEO 356. Backcountry Navigation. 2 Credits.

Provides an opportunity to master efficient on- and off-trail navigation techniques on a three-day trip in rugged subalpine terrain.

Requisites: Prereq: PEO 285 and 351 or equivalent experience.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEO 362. Mountaineering. 2 Credits.

Covers basic mountaineering skills during classroom sessions and an intensive three-day mountain outing. Emphasis on hazards, rigging, roped travel, ice ax arrests, belays, and rescue.

Requisites: Prereq: PEO 285, PEO 351.

Additional Information:

General Limitation applies: Activity Course

PEO 366. Vertical Rescue Techniques. 2 Credits.

Introduces vertical rescue techniques including belay escapes, passing a knot, rope ascension, counterbalance, lowering and raising rescues. Held at the rescue facility and rock wall.

Requisites: Prereq: PEO 315 or PEO 331.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEO 371. Snow Camping. 2 Credits.

Emphasis on winter camping skills, campsite selection, construction of snow shelters, winter route finding, and survival techniques.

Requisites: Prereq: PEO 285 and 351 or equivalent experience.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEO 391. Winter Navigation. 2 Credits.

Topics include cold weather clothing and equipment requirements, thermoregulation, cold injuries, route finding, Leave No Trace travel and camping ethics, and winter navigation and survival techniques. Skills applied on a three-day outing.

Requisites: Prereq: PEO 285, PEO 351.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PEO 392. Backcountry Survival. 1 Credit.

Basic survival skills for cool, wet, and windy Pacific Northwest environment. Topics/techniques include survival gear and techniques, emergency shelters, and fire building.

Requisites: Prereq: PEO 285 and 351 or equivalent experience

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEO 399. Special Studies: [Topic]. 1-3 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEO 411. Leadership Dynamics. 2 Credits.

Discover how leadership, group dynamics, risk management, and other factors play an integral role in shaping the character, productivity, and safety of teams.

Requisites: Prereq: PEO 285.

PEO 412. Leading in Nature. 2 Credits.

Focuses on the natural history of the regions explored on field outings and on developing outdoor teaching skills.

PEO 413. Field Leadership. 2 Credits.

Focuses on campcraft, field leadership, navigation, and safety skills. Includes a three-day outing and van driver training.

Requisites: Prereq: PEO 285, PEO 351.

Physical Education: Racquet Sports (PERS)

Courses

PERS 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PERS 211. Table Tennis I. 1 Credit.

Introduction to table tennis, including rules, scoring, and etiquette.

Service, strokes, and game strategy.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 212. Table Tennis II. 1 Credit.

Intermediate game strategies and skills.

Requisites: Prereq: PERS 211 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 221. Pickleball. 1 Credit.

Introduction to basic strokes, the serve, basic strategy, and beginning level positioning. Rules, scoring and etiquette will also be taught.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 231. Badminton I. 1 Credit.

Basic strokes, court positioning and strategies. Introduction to equipment, rules, scoring, and etiquette.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 232. Badminton II. 1 Credit.

Intermediate shots, positioning and strategy through drills, match play, and class tournaments.

Requisites: Prereq: PERS 231 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 271. Tennis I. 1 Credit.

Introduction to basic strokes, the serve, basic strategy, and beginning level positioning. Rules, scoring and etiquette will also be taught.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 272. Tennis II. 1 Credit.

Refinement of basic strokes and introduction to advanced strokes and positioning. Drills, game play, and a class tournament.

Requisites: Prereq: PERS 271 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 273. Tennis III. 1 Credit.

Advanced level singles and doubles positioning, strategies and skills.

Requisites: Prereq: PERS 272 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERS 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Running (PERU)

Courses

PERU 131. Jog-Run. 1 Credit.

Instruction in running mechanics including intervals and pacing. Various running surfaces and courses, injury prevention, and cardiovascular endurance are emphasized.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PERU 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PERU 331. 5K Training I. 1-2 Credits.

Techniques for increasing speed and preparation for road racing.

Requisites: Prereq: PERU 131 or equivalent.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

General Limitation applies: Activity Course

PERU 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Team Sports (PETS)

Courses

PETS 111. Flag Football. 1 Credit.

Throwing, catching, running, cutting, pulling flags; strategies and techniques; offense, defense, game rules, and ground rules that create a safe and fun playing experience.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PETS 232. Volleyball II. 1 Credit.

Designed for students with previous volleyball experience and want to continue play. Skill-building, rules, offensive and defensive strategies.

Requisites: Prereq: beginning volleyball experience.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 233. Volleyball III. 1 Credit.

Advanced play in a friendly atmosphere. Skills, drills, big hits, occasional blocks, aces.

Requisites: Prereq: PETS 232 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 242. Basketball II. 1 Credit.

Designed for students with previous basketball experience and want to continue play. Shooting, ball handling, defense, give go, and the back door.

Requisites: Prereq: beginning basketball experience.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 243. Basketball III. 1 Credit.

Advanced play, including offenses, defenses, drills, and full-court action.

Requisites: Prereq: PETS 242 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 261. Soccer I. 1 Credit.

Introduction to the basic skills of passing, dribbling, heading, tackling, and shielding. Game strategies and rules are taught through drills and team play.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 262. Soccer II. 1 Credit.

Develop proficiency in soccer skills through drills and games. Group and team tactics as well as official soccer rules.

Requisites: Prereq: PETS 261 or equivalent preferred.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 263. Soccer III. 1 Credit.

Advanced techniques, principles of attack and defense, and kicks--corner, free, and penalty.

Requisites: Prereq: PETS 262 or equivalent preferred.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 265. Indoor Soccer II. 1 Credit.

Intermediate and advanced play, using the walls of a court as an additional dimension to play.

Requisites: Prereq: beginning soccer experience.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PETS 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Physical Education: Weight Training (PEW)

Courses

PEW 199. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

PEW 211. Weight Training I. 1 Credit.

Technique for basic lifts in a variety of workout formats. Develop strength and muscular endurance. Weight training principles and physical fitness evaluation.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEW 212. Weight Training II. 1 Credit.

Advanced weight training exercises are introduced. Students can expect to work more independently. Intermediate program design, exercise science, and evaluation of strength and muscular endurance.

Requisites: Prereq: PEW 211 or equivalent.

Repeatable 1 time for a maximum of 2 credits

Additional Information:

General Limitation applies: Activity Course

PEW 399. Special Studies: [Topic]. 1-2 Credits.

Experimental course - topic varies.

Repeatable 99 times

Additional Information:

General Limitation applies: Activity Course

Philosophy (PHIL)

Courses

PHIL 101. Philosophical Problems. 4 Credits.

Introduction to philosophy based on classical and modern texts from Plato through the 21st century. Sample topics include free will, the mind-body problem, the existence of an external world.

Additional Information:

Arts Letters Area

PHIL 102. Ethics. 4 Credits.

Study of moral theories and issues central to moral theory (such as justification of moral judgments and concepts of duty, goodness, and virtue) as well as theoretical engagement with pressing contemporary moral debates.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

PHIL 103. Critical Reasoning. 4 Credits.

Introduction to thinking and reasoning critically. How to recognize, analyze, criticize, and construct arguments.

Additional Information:

Arts Letters Area

PHIL 104. History of Western Philosophy. 4 Credits.

The course is an introduction to some currents, seminal thinkers, and texts of the Western philosophical tradition from the Ancient Greeks to Medieval, Modern, and 19th and 20th Century Philosophy. The course includes both classical text and readings traditionally excluded from the canon.

Additional Information:

Arts Letters Area

PHIL 110. Human Nature. 4 Credits.

Consideration of various physiological, cultural, psychological, and personal forces that characterize human beings, taking into account issues of class, gender, race, and sexual orientation.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

PHIL 120. Ethics of Enterprise and Exchange. 4 Credits.

Moral examination of business by considering the nature of enterprise and exchange. Topics include corporate and consumer responsibility, meaningful work, and leadership.

Additional Information:

Arts Letters Area

PHIL 123. Internet, Society, and Philosophy. 4 Credits.

Introduction to philosophical problems of the Internet. Primary focus on social, political, and ethical issues with discussion of epistemological and metaphysical topics.

Additional Information:

Social Science Area

PHIL 130. Philosophy and Popular Culture. 4 Credits.

Engages in critical philosophical reflection about and through popular culture, including movies, music, graphic novels, and sports.

Additional Information:

Arts Letters Area

PHIL 135. Ethics in the Life Sciences. 4 Credits.

Focused on complex ethical issues in the life sciences, ranging from debates over human enhancement, the use of human cells in research, non-human animals in research, synthetic biology, genetically-modified organisms, and recent research in microbial biology.

Additional Information:

Arts Letters Area

PHIL 170. Love and Sex. 4 Credits.

Philosophical study of love, relationships, marriage, sex, sexuality, sexual identity, and sexual representation.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

PHIL 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 199L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 211. Existentialism. 4 Credits.

Basic ideas of the Christian and atheistic divisions of the existentialist movement; some attention to the philosophical situation that generated the existentialist rebellion.

Additional Information:

Arts Letters Area

PHIL 216. Philosophy and Cultural Diversity. 4 Credits.

Philosophical investigation of the implications of cultural diversity for identity, knowledge, and community, from the perspectives of several American cultures.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

PHIL 219. Sports Ethics. 4 Credits.

Introduction to the nature of sport within the framework of the philosophical study of ethics and its implication for the athlete and spectator.

Additional Information:

Arts Letters Area

PHIL 220. Food Ethics. 4 Credits.

Examination of a variety of issues relating to food production and consumption in light of virtue, utilitarian, deontological, pragmatist, and care ethics.

Additional Information:

Arts Letters Area

PHIL 223. Data Ethics. 4 Credits.

This course explores central ethical challenges in data science and related fields of computational analysis. Offers both an overview of the major theoretical commitments of data ethics as well as engagement with applied contexts such as computer engineering, behavioral sciences, marketing, and surveillance.

Additional Information:

Social Science Area

PHIL 225. Introduction to Formal Logic. 4 Credits.

Introduces formal logic, including both propositional (sentence) and predicate logic, including the use of truth trees.

Additional Information:

Arts Letters Area

PHIL 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 299L. Special Studies: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 307. Social and Political Philosophy I. 4 Credits.

Survey of major political theorists (historical or contemporary) as well as central concepts of political philosophy such as justice, rights, liberalism, democracy, and equality.

Additional Information:

Social Science Area

PHIL 308. Social and Political Philosophy: [Topic]. 4 Credits.

Focused study of particular theorists and contemporary debates central to the fields of social and political philosophy.

Repeatable 1 time for a maximum of 8 credits when topic changes

PHIL 309. Global Justice. 4 Credits.

Introduction to philosophical problems of globalization and justice related to global poverty, citizenship, human rights, and issues of identity, multiculturalism, war, terrorism, environmentalism and health care.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

PHIL 310. History of Ancient Philosophy. 4 Credits.

Focuses primarily on Plato and Aristotle. Examines their roots in pre-Socratic philosophy and considers their relation to the Greek political and poetic traditions.

Requisites: Prereq: one lower-division philosophy course.

Additional Information:

Arts Letters Area

PHIL 311. History of Philosophy: Modern. 4 Credits.

Survey of European philosophy through Hume, including the work of Descartes, Locke, and Spinoza.

Requisites: Prereq: one course from Philosophy.

Additional Information:

Arts Letters Area

PHIL 312. History of Philosophy: 19th Century. 4 Credits.

Traces Kant's influence on such philosophers as Hegel, Nietzsche, and Marx.

Requisites: Prereq: one philosophy course.

Additional Information:

Arts Letters Area

PHIL 315. Introduction to Feminist Philosophy. 4 Credits.

Introduces basic questions of philosophy through topics central to feminism.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

PHIL 320. Philosophy of Religion. 4 Credits.

Philosophical investigation of the nature of "religion" (e.g., the nature of the sacred, spirituality, and transcendence).

Requisites: Prereq: one philosophy course.

PHIL 322. Philosophy of the Arts. 4 Credits.

Survey of classical and contemporary theories of art and aesthetic experience, with examples from various arts.

Requisites: Prereq: one philosophy course.

Additional Information:

Arts Letters Area

PHIL 323. Moral Theory. 4 Credits.

Study of the most important traditional ethical theories; modern philosophical analysis of moral terms and statements.

Requisites: Prereq: one philosophy course.

PHIL 331. Philosophy in Literature. 4 Credits.

Selective study of major philosophical ideas and attitudes expressed in the literature of Europe and America.

Requisites: Prereq: one philosophy course.

PHIL 332. Philosophy of Film. 4 Credits.

Explores questions about the aesthetic dimensions of film, its relation to the other arts, and the treatment of philosophical questions in films.

Additional Information:

Arts Letters Area

PHIL 335. Medical Ethics. 4 Credits.

Introduces theoretical tools and concrete case studies for formulating, analyzing, and evaluating ethical judgments raised by contemporary biomedical practice.

Additional Information:

Arts Letters Area

PHIL 339. Introduction to Philosophy of Science. 4 Credits.

Examines theories of scientific practice, rationality, objectivity, values in science, and the role of science in society.

Additional Information:

Social Science Area

PHIL 340. Environmental Philosophy. 4 Credits.

Considers the nature and morality of human relationships with the environment (e.g., the nature of value, the moral standing of nonhuman life).

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

PHIL 341. African Philosophy. 4 Credits.

Survey of contemporary African philosophy with a focus on current debates (for example, critique of ethnophilosophy; relation between orality and writing; decolonization of knowledge).

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

PHIL 342. Introduction to Latin American Philosophy. 4 Credits.

History of Latin American philosophy through the study of ideas, issues, problems, and forms of thinking in the work of key periods, movements, and authors.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

PHIL 343. Critical Theory. 4 Credits.

Examines the methodological, epistemological, moral, and political dimensions of critical theory. Prereq: one philosophy course. Offered alternate years.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

PHIL 344. Introduction to Philosophy of Law. 4 Credits.

Introduces central problems in the law; examines the nature of legal reasoning.

Additional Information:

Social Science Area

PHIL 345. Place in the Cosmos. 4 Credits.

Explores the relation between humans and the cosmos as a matter of place by comparing seminal texts in the history of philosophy. Offered alternate years.

Additional Information:

Arts Letters Area

PHIL 350. Metaphysics. 4 Credits.

Traditional issues in metaphysics selected from among such topics as substance, existence, time, causation, God, the nature of individuals, and the meaningfulness of metaphysics.

Requisites: Prereq: one philosophy course.

PHIL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PHIL 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PHIL 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PHIL 407. Seminar: [Topic]. 1-5 Credits.

Recent topics include Eastern Philosophy, Feminist Theory, Nonviolence.

Requisites: Prereq: one 300-level philosophy course.

Repeatable 99 times

PHIL 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 415. Continental Philosophy: [Topic]. 4 Credits.

Survey of significant areas in the Continental tradition, e.g. phenomenology, critical social theory, deconstruction, feminism, and hermeneutics.

Repeatable 99 times when topic changes

PHIL 420. American Philosophy: [Topic]. 4 Credits.

Survey of significant areas of the American tradition, e.g. 19th-, 20th-, and 21st-century thought, African and Native American thought, feminism, recent pragmatism, the self, and pluralism.

Repeatable 99 times when topic changes

PHIL 421. Ancient Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher, typically Plato or Aristotle.

Requisites: Prereq: PHIL 310.

Repeatable 99 times when topic changes

PHIL 423. Technology Ethics: [Topic]. 4 Credits.

Advanced inquiry in ethics with a focus on technology. Addresses moral, political, and cultural issues raised by socio-technical systems for everyday living and democratic citizenship.

Repeatable 1 time for a maximum of 8 credits when topic changes

PHIL 425. Philosophy of Language. 4 Credits.

Philosophical theories of language and meaning, with special attention to the nature of concepts and reasoning.

PHIL 426. Advanced Logic. 4 Credits.

This course covers classical and non-classical logics. A review of propositional and predicate logic will be followed by a consideration of "non-normal" logics of strict implication, conditional logics, many-valued logics, and first degree entailment. The course will consider philosophical issues raised by these diverse logics.

Requisites: Prereq: PHIL 225.

PHIL 433. 17th- and 18th-Century Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher, typically Descartes, Locke, Hume, Leibniz, Berkeley, or Kant.

Requisites: Prereq: PHIL 310, PHIL 311.

Repeatable 99 times when topic changes

PHIL 443. Feminist Philosophy: [Topic]. 4 Credits.

Examines contemporary feminist contributions to philosophy.

Requisites: Prereq: one 300-level PHIL course

Repeatable 1 time for a maximum of 8 credits

PHIL 451. Native American Philosophy. 4 Credits.

Survey of Native American philosophy focusing on philosophical perspectives in historical traditions and contemporary Native American philosophy. Offered alternate years.

PHIL 452. Philosophy and Race. 4 Credits.

Surveys the philosophical contribution to studies of race including intellectual history, philosophy of science, racism and its remedies, media studies, and cultural criticism with a focus on the US.

Requisites: Prereq: one philosophy course at the 300 level.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

PHIL 453. 19th-Century Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher, typically Hegel, Nietzsche, Marx, or Kierkegaard.

Requisites: Prereq: PHIL 312.

Repeatable 99 times when topic changes

PHIL 463. 20th-Century Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher (e.g., Wittgenstein, Dewey, Quine, Merleau-Ponty, C.I. Lewis, or Foucault).

Repeatable 99 times when topic changes

PHIL 471. Advanced Introduction to American Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in American Philosophy.

Requisites: Prereq: one from PHIL 401, PHIL 403, PHIL 405, PHIL 407, PHIL 410, PHIL 415, PHIL 420, PHIL 421, PHIL 423, PHIL 425, PHIL 426, PHIL 433, PHIL 443, PHIL 451, PHIL 452, PHIL 453, PHIL 463.

PHIL 472. Advanced Introduction to Analytic Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Analytic philosophy.

Requisites: Prereq: One 400 level philosophy course.

PHIL 473. Advanced Introduction to Continental Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Continental Philosophy.

Requisites: Prereq: One 400 level philosophy course.

PHIL 474. Advanced Introduction to Feminist Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Feminist Philosophy.

Requisites: Prereq: One 400 level philosophy course.

PHIL 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PHIL 507. Seminar: [Topic]. 1-5 Credits.

Recent topics include Eastern Philosophy, Feminist Theory, Nonviolence, Philosophy and Race, Philosophy and Tragedy, Philosophy of Education, Philosophy of Nature.

Repeatable 99 times

PHIL 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 521. Ancient Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher, typically Plato or Aristotle.

Repeatable 99 times when topic changes

PHIL 526. Advanced Logic. 4 Credits.

This course covers classical and non-classical logics. A review of propositional and predicate logic will be followed by a consideration of "non-normal" logics of strict implication, conditional logics, many-valued logics, and first degree entailment. The course will consider philosophical issues raised by these diverse logics.

PHIL 533. 17th- and 18th-Century Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher, typically Descartes, Locke, Hume, Leibniz, Berkeley, or Kant.

Repeatable 99 times when topic changes

PHIL 551. Native American Philosophy. 4 Credits.

Survey of Native American philosophy focusing on philosophical perspectives in historical traditions and contemporary Native American philosophy. Offered alternate years.

PHIL 553. 19th-Century Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher, typically Hegel, Nietzsche, Marx, or Kierkegaard.

Repeatable 99 times when topic changes

PHIL 563. 20th-Century Philosophers: [Topic]. 4 Credits.

Concentrates on the work of a single philosopher (e.g., Wittgenstein, Dewey, Quine, Merleau-Ponty, C.I. Lewis, or Foucault).

Repeatable 99 times when topic changes

PHIL 571. Advanced Introduction to American Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in American Philosophy.

PHIL 572. Advanced Introduction to Analytic Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Analytic philosophy.

PHIL 573. Advanced Introduction to Continental Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Continental Philosophy.

PHIL 574. Advanced Introduction to Feminist Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Feminist Philosophy.

PHIL 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PHIL 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PHIL 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PHIL 607. Seminar: [Topic]. 1-5 Credits.

Recent topics include Emerson, Philosophy of Race, Recent Moral Theory, Schelling.

Repeatable 99 times

PHIL 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHIL 614. Issues in Ethics. 4 Credits.

Examination of ethical theory.

PHIL 615. Continental Philosophy: [Topic]. 4 Credits.

Explores philosophical problems and traditions in contemporary European philosophy.

Repeatable 3 times for a maximum of 16 credits when topic changes

PHIL 620. American Philosophy: [Topic]. 4 Credits.

Treats issues in classical and contemporary American philosophy.

Repeatable 3 times for a maximum of 16 credits when topic changes

PHIL 623. Data Ethics. 4 Credits.

This course offers an advanced exploration of central ethical challenges in data science and related fields of computational analysis.

PHIL 641. Social and Political Philosophy: [Topic]. 4 Credits.

Examination of classical and current problems in social and political philosophy including the nature of justice, legitimacy of the state, conditions of war and peace.

Repeatable 3 times for a maximum of 16 credits when topic changes

PHIL 643. Feminist Philosophy: [Topic]. 4 Credits.

Explores contemporary feminist philosophy.

Repeatable 3 times for a maximum of 16 credits when topic changes

PHIL 645. Environmental Philosophy: [Topic]. 4 Credits.

Pursues advanced questions in environmental philosophy regarding a particular tradition or problem area.

Repeatable 3 times for a maximum of 16 credits when topic changes

PHIL 657. Philosophy and Race: Contemporary Issues. 4 Credits.

Examination of contemporary discussions regarding race including biology and race, race in medicine, reparations, perspectives on race in Continental and American philosophy.

PHIL 670. Issues in Metaphysics. 4 Credits.

Discussion of current controversies in metaphysics (e.g., essentialism, identity, future contingency).

Physics (PHYS)

Courses

PHYS 101. Essentials of Physics. 4 Credits.

Fundamental physical principles. Mechanics.

Additional Information:

Science Area

PHYS 152. Physics of Sound and Music. 4 Credits.

Introduction to the wave nature of sound; hearing; musical instruments and scales; auditorium acoustics; and the transmission, storage, and reproduction of sound.

Additional Information:

Science Area

PHYS 153. Physics of Light, Color, and Vision. 4 Credits.

Light and color, their nature, how they are produced, and how they are perceived and interpreted.

Additional Information:

Science Area

PHYS 155. Physics Behind the Internet. 4 Credits.

How discoveries in 20th-century physics mesh to drive modern telecommunications. Topics include electron mobility in matter, the development of transistors and semiconductors, lasers, and optical fibers.

Additional Information:

Science Area

PHYS 156M. Scientific Revolutions. 4 Credits.

Surveys several major revolutions in our views of the natural and technological world, focusing on scientific concepts and methodological aspects. For nonscience majors. Multilisted with EARTH 156M.

Equivalent to: GEOL 156M

Additional Information:

Science Area

PHYS 161. Physics of Energy and Environment. 4 Credits.

Practical study of energy generation and environmental impact, including energy fundamentals, fossil fuel use, global warming, nuclear energy, and energy conservation.

Additional Information:

Science Area

PHYS 162. Solar and Other Renewable Energies. 4 Credits.

Topics include photovoltaic cells, solar thermal power, passive solar heating, energy storage, geothermal energy, and wind energy.

Additional Information:

Science Area

PHYS 171. The Physics of Life. 4 Credits.

Explores how physical laws guide the structure, function, and behavior of living organisms, and examines the physical properties of biological materials. Topics span microscopic and macroscopic scales.

Additional Information:

Science Area

PHYS 181. Quantum Mechanics for Everyone. 4 Credits.

Introduction to quantum mechanics, a set of sometimes counterintuitive scientific principles describing atoms and light, along with the modern technologies it makes possible.

Additional Information:

Science Area

PHYS 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

PHYS 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PHYS 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 201. General Physics. 4 Credits.

Introductory series. Mechanics and fluids.

Requisites: Prereq: MATH 112Z or equivalent.

Additional Information:

Science Area

PHYS 202. General Physics. 4 Credits.

Introductory series. Thermodynamics, waves, optics.

Requisites: Prereq: PHYS 201.

Additional Information:

Science Area

PHYS 203. General Physics. 4 Credits.

Introductory series. Electricity, magnetism, modern physics.

Requisites: Prereq: PHYS 201.

Additional Information:

Science Area

PHYS 204. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics. Sequence.

Requisites: Pre- or coreq: PHYS 201.

PHYS 205. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics.

Requisites: Pre- or coreq: PHYS 202.

PHYS 206. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics.

Requisites: Pre- or coreq: PHYS 203.

PHYS 251. Foundations of Physics I. 4 Credits.

Newtonian mechanics; units and vectors; one-dimensional motion; Newton's laws; work and energy; momentum and collisions. Sequence.

Requisites: Prereq: MATH 112Z or equivalent. Coreq: MATH 251Z.

Additional Information:

Science Area

PHYS 252. Foundations of Physics I. 4 Credits.

Vibrations and waves; oscillations; wave mechanics; dispersion; modes; introductory optics.

Requisites: Prereq: PHYS 251; coreq: MATH 252Z or equivalent.

Additional Information:

Science Area

PHYS 253. Foundations of Physics I. 4 Credits.

Electricity and magnetism; charge and electric field; electric potential; circuits; magnetic field; inductance.

Requisites: Prereq: PHYS 252; coreq: MATH 253Z or equivalent.

Additional Information:

Science Area

PHYS 290. Foundations of Physics Laboratory. 1 Credit.

Repeatable. Introduction to laboratory measurements, reports, instrumentation, and experimental techniques.

Requisites: Coreq: PHYS 251, PHYS 252 or PHYS 253.

Repeatable 2 times for a maximum of 3 credits

PHYS 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 351. Foundations of Physics II. 4 Credits.

Introduction to relativity and quantum physics with applications to atomic, solid-state, nuclear, and astro-particle systems

Requisites: Coreq: MATH 253Z.

PHYS 352. Thermal Physics and Statistical Mechanics I. 4 Credits.

Thermodynamic systems; first and second laws; kinetic theory of gases; entropy. Sequence.

Requisites: Prereq: PHYS 351; coreq: MATH 281.

PHYS 353. Thermal Physics and Statistical Mechanics II. 4 Credits.

Thermal radiation; Maxwell-Boltzmann statistics; Fermi and Bose gases; phase transitions. Sequence.

Requisites: Prereq: PHYS 352; coreq: MATH 282.

PHYS 389. Mathematical Methods. 4 Credits.

Essential mathematical background for 400-level physics courses in classical mechanics, electricity and magnetism, and quantum mechanics. The emphasis is on the conceptual basis of the following topics and their connections, with an emphasis on physical applications, vector algebra and calculus. Dirac delta function, partial differential equations, linear algebra of function spaces, orthonormal bases, Dirac notation, special functions, standard and general Fourier analysis, matrices, eigenvalue equations, Fourier transforms.

Requisites: Prereq: MATH 281.

PHYS 391. Physics Experimentation Data Analysis Laboratory. 4 Credits.

Practical aspects of physics experimentation, including data acquisition, statistical analysis, and introduction to scientific programming, and use of Fourier methods for data analysis.

Requisites: Prereq: PHYS 253.

PHYS 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 401. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PHYS 402. Supervised Tutoring. 1-12 Credits.

A student, under faculty supervision, accepts responsibility for tutoring other students within the discipline.

Repeatable 99 times

PHYS 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PHYS 405. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PHYS 406. Practicum: [Topic]. 1-21 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

PHYS 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PHYS 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PHYS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PHYS 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 410L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 411. Mechanics. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena. Only nonmajors may earn graduate credit.

Requisites: Prereq: MATH 282.

PHYS 412. Electricity and Magnetism I. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena.

Requisites: Prereq: MATH 281.

PHYS 413. Electricity and Magnetism II. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena.

Requisites: Prereq: PHYS 412.

PHYS 414. Quantum Physics. 4 Credits.

Planck's and de Broglie's postulates, the uncertainty principle, Bohr's model of the atom, the Schrodinger equation in one dimension, the harmonic oscillator, the hydrogen atom, molecules and solids, nuclei and elementary particles. Sequence.

Requisites: Prereq: PHYS 413.

PHYS 415. Quantum Physics. 4 Credits.

Planck's and de Broglie's postulates, the uncertainty principle, Bohr's model of the atom, the Schrodinger equation in one dimension, the harmonic oscillator, the hydrogen atom, molecules and solids, nuclei and elementary particles. Sequence.

Requisites: Prereq: PHYS 414.

PHYS 417. Topics in Quantum Physics. 4 Credits.

Perturbation theory, variational principle, time-dependent perturbation theory, elementary scattering theory.

Requisites: Prereq: PHYS 415.

PHYS 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with MATH 421M.

Requisites: Prereq: MATH 253Z; MATH 256 or MATH 281.

Equivalent to: MATH 421M

PHYS 422. Electromagnetism. 4 Credits.

Study of electromagnetic waves. Topics include Maxwell's equations, wave equation, plane waves, guided waves, antennas, and other related phenomena.

Requisites: Prereq: PHYS 413.

PHYS 423M. Introduction to Space Physics. 4 Credits.

Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.

Requisites: Prereq: PHYS 253, MATH 282.

Equivalent to: EARTH 423M

PHYS 424. Classical Optics. 4 Credits.

Geometrical optics, polarization, interference, Fraunhofer and Fresnel diffraction.

Requisites: Prereq: PHYS 353.

PHYS 425. Modern Optics. 4 Credits.

Special topics in modern applied optics such as Fourier optics, coherence theory, resonators and lasers, holography, and image processing.

Requisites: Prereq: PHYS 424.

PHYS 431. Analog Electronics. 4 Credits.

Passive and active discrete components and circuits. General circuit concepts and theorems. Equivalent circuits and black box models. Integrated circuit operational amplifiers.

Requisites: Prereq: PHYS 203 or PHYS 253; MATH 256.

PHYS 432. Digital Electronics. 4 Credits.

Digital electronics including digital logic, measurement, signal processing and control. Introduction to computer interfacing.

Requisites: Prereq: PHYS 203 or PHYS 253; MATH 253Z.

PHYS 433. Radiofrequency and Low-noise Measurements. 4 Credits.

This course provides a hands-on introduction to radio-frequency technology, essential in communications, physics labs, and quantum computing. Students will learn radio-frequency device design, test equipment, and quantum measurement techniques through lectures and structured labs. In the second half, they will set up and program advanced radio-frequency test instruments used in quantum research, performing real-world measurements.

Requisites: Prereq: PHYS 413.

PHYS 444. Introduction to Biological Physics. 4 Credits.

The application of physical principles to the study of the living world, especially at molecular and cellular scales. Topics include the mechanical properties of biomaterials, the sensory abilities of cells and organisms, and the dynamical properties of information processing networks.

Requisites: Prereq: PHYS 353, MATH 281, basic computer programming skills.

PHYS 445. Computational Physics. 4 Credits.

The goal of this course is to build a strong foundation in computational physics. With a particular emphasis on topics in modeling and data analysis for drawing physical insights from data in physics and astronomy, we will cover tools and techniques useful for conducting computationally demanding science.

Requisites: Prereq: PHYS 391.

PHYS 481. Design of Experiments. 4 Credits.

Applies statistics to practical data analysis, data-based decision making, model building, and the design of experiments. Emphasizes factorial designs.

PHYS 483. General Relativity I. 4 Credits.

This course will serve as an introduction to the concept of gravity as geometry. The course begins by motivating the need for General Relativity and culminate in the presentation of the Einstein equation, presenting some of the simplest solutions to the Einstein equation.

Requisites: Prereq: PHYS 411, PHYS 413.

PHYS 489. The Physics Behind Quantum Computers. 4 Credits.

Quantum computing is a new way of computing based on the rules of Quantum mechanics. We study what sort of computations can be performed by atoms, ions, and superconducting electric circuits.

Requisites: Prereq: PHYS 414 is co-req.

PHYS 491. Research Project I. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.

Requisites: Prereq: PHYS 253.

PHYS 492. Research Project II. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.

Requisites: Prereq: PHYS 491.

PHYS 493. Research Project III. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.

Requisites: Prereq: PHYS 492.

PHYS 495. Nanofabrication. 4 Credits.

This course introduces students to the design and fabrication of micro- and nanoscale devices. The course will cover fundamental fabrication principles, including optical and electron-beam lithography, thin-film deposition, etching, and characterization. This framework will aid in understanding the processes used in manufacturing chip-based devices in semiconductor electronics, photonics, micro/nano-electromechanical systems, microwave electronics, microfluidics, and superconducting quantum circuits. In the hands-on lab component of this course, students will learn build, optimize and better understand these systems and fabrication processes through the statistical design and analysis of experiments (i.e. Design of Experiments, DOE).

PHYS 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PHYS 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PHYS 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PHYS 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 510L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with MATH 521M.

Equivalent to: MATH 521M

PHYS 523M. Introduction to Space Physics. 4 Credits.

Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.

Equivalent to: EARTH 523M

PHYS 525. Modern Optics. 4 Credits.

Special topics in modern applied optics such as Fourier optics, coherence theory, resonators and lasers, holography, and image processing.

PHYS 533. Radiofrequency and Low-noise Measurements. 4 Credits.

This course provides a hands-on introduction to radio-frequency technology, essential in communications, physics labs, and quantum computing. Students will learn radio-frequency device design, test equipment, and quantum measurement techniques through lectures and structured labs. In the second half, they will set up and program advanced radio-frequency test instruments used in quantum research, performing real-world measurements.

PHYS 544. Introduction to Biological Physics. 4 Credits.

The application of physical principles to the study of the living world, especially at molecular and cellular scales. Topics include the mechanical properties of biomaterials, the sensory abilities of cells and organisms, and the dynamical properties of information processing networks.

Requisites: Prereq: Basic computer programming skills.

PHYS 545. Computational Physics. 4 Credits.

The goal of this course is to build a strong foundation in computational physics. With a particular emphasis on topics in modeling and data analysis for drawing physical insights from data in physics and astronomy, we will cover tools and techniques useful for conducting computationally demanding science.

PHYS 581. Design of Experiments. 4 Credits.

Applies statistics to practical data analysis, data-based decision making, model building, and the design of experiments. Emphasizes factorial designs.

PHYS 583. General Relativity I. 4 Credits.

This course will serve as an introduction to the concept of gravity as geometry. The course begins by motivating the need for General Relativity and culminate in the presentation of the Einstein equation, presenting some of the simplest solutions to the Einstein equation.

PHYS 589. The Physics Behind Quantum Computers. 4 Credits.

Quantum computing is a new way of computing based on the rules of Quantum mechanics. We study what sort of computations can be performed by atoms, ions, and superconducting electric circuits.

PHYS 595. Nanofabrication. 4 Credits.

This course introduces students to the design and fabrication of micro- and nanoscale devices. The course will cover fundamental fabrication principles, including optical and electron-beam lithography, thin-film deposition, etching, and characterization. This framework will aid in understanding the processes used in manufacturing chip-based devices in semiconductor electronics, photonics, micro/nano-electromechanical systems, microwave electronics, microfluidics, and superconducting quantum circuits. In the hands-on lab component of this course, students will learn build, optimize and better understand these systems and fabrication processes through the statistical design and analysis of experiments (i.e. Design of Experiments, DOE).

PHYS 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PHYS 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PHYS 604. Internship: [Topic]. 1-16 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Requisites: Coreq: good standing in applied physics master's degree program.

Repeatable 99 times

PHYS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PHYS 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

PHYS 607. Seminar: [Topic]. 1-4 Credits.

Recent topics include Astrophysics and Gravitation, Biophysics, Condensed Matter, High Energy Physics, Physics Colloquium, Theoretical Physics.

Repeatable 99 times

PHYS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PHYS 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PHYS 610. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 610L. Experimental Course: [Topic]. 4 Credits.

Experimental course - topic varies.

Repeatable 99 times

PHYS 611. Theoretical Mechanics. 4 Credits.

Lagrangian and Hamiltonian mechanics, small oscillations, rigid bodies. Sequence.

PHYS 612. Theoretical Mechanics. 2 Credits.

Lagrangian and Hamiltonian mechanics, small oscillations, rigid bodies. Sequence.

Requisites: Prereq: PHYS 611.

PHYS 613. Statistical Physics. 4 Credits.

Thermodynamics, statistical mechanics, kinetic theory, application to gases, liquids, solids, atoms, molecules, and the structure of matter. Sequence.

PHYS 614. Statistical Physics. 4 Credits.

Thermodynamics, statistical mechanics, kinetic theory, application to gases, liquids, solids, atoms, molecules, and the structure of matter. Sequence.

Requisites: Prereq: PHYS 613.

PHYS 622. Electromagnetic Theory. 4 Credits.

Microscopic form of Maxwell's equations, derivation and solution of the wave equation, Lorentz covariant formulation, motion of charges in given fields, propagation and diffraction, radiation by given sources, coupled motion of sources and fields, the electromagnetic field in dense media.

PHYS 623. Electromagnetic Theory. 4 Credits.

Microscopic form of Maxwell's equations, derivation and solution of the wave equation, Lorentz covariant formulation, motion of charges in given fields, propagation and diffraction, radiation by given sources, coupled motion of sources and fields, the electromagnetic field in dense media. Sequence.

Requisites: Prereq: PHYS 622.

PHYS 626. Physical Optics with Labs. 4 Credits.

Fundamentals of applied geometric and wave optics theory, reinforced through homework assignments, and explored in experiments conducted with lasers and optical components. Sequence with PHYS 627, PHYS 628.

PHYS 627. Optical Materials and Devices. 4 Credits.

Principles of quantum mechanics and solid-state physics relating to material properties of optoelectronic devices with corresponding laboratories teaching how to operate and characterize these devices. Sequence with PHYS 626, PHYS 628.

Requisites: Prereq: PHYS 626.

PHYS 631. Quantum Mechanics. 4 Credits.

Review of fundamentals, central force problems, matrix mechanics. Sequence.

PHYS 632. Quantum Mechanics. 4 Credits.

Approximation methods, scattering. Sequence.

Requisites: Prereq: PHYS 631.

PHYS 633. Quantum Mechanics. 4 Credits.

Rotation symmetry, spin, identical particles. Sequence.

Requisites: Prereq: PHYS 632.

PHYS 661. Particle Physics I. 4 Credits.

Theory, phenomenology, and experimental basis of the standard model of particle physics: fundamentals; symmetries; quantum electrodynamics; R; quarks and leptons; chirality; flavor symmetry; mesons; baryons; form factors; deep inelastic scattering. Sequence.

PHYS 662. Particle Physics II. 4 Credits.

Theory, phenomenology, and experimental basis of the standard model of particle physics: quantum chromodynamics; parton distribution functions; hadron-hadron collisions; particle interactions in matter; collider detectors; experimental methodologies to analyze data; statistical thresholds and significance. Sequence with PHYS 661, PHYS 663.

Requisites: Prereq: PHYS 661.

PHYS 663. Particle Physics III. 4 Credits.

Theory, phenomenology, and experimental basis of the standard model of particle physics: electroweak symmetry breaking; CKM mixing; Higgs couplings; early universe cosmology; Friedmann expansion; entropy; freeze-out; impact of neutrinos on cosmology; dark matter evidence and candidates. Sequence with PHYS 661, PHYS 662.

Requisites: Prereq: PHYS 662.

PHYS 664. Quantum Field Theory. 4 Credits.

Canonical quantization, path integral formulation of quantum field theory, Feynman rules for perturbation theory, quantum electrodynamics, renormalization, gauge theory of the strong and electroweak interactions. Sequence with PHYS 665, PHYS 666.

PHYS 665. Quantum Field Theory II. 4 Credits.

The purpose of this course is to apply the methodology established in QFT I to theories of charged fermions coupled to a photon. Then we will begin to explore QFT beyond leading order. Sequence with PHYS 664, PHYS 666.

Requisites: Prereq: PHYS 664.

PHYS 666. Quantum Field Theory III. 4 Credits.

The purpose of this course is to understand QFT at loop level, and to extend the formalism to non-Abelian gauge bosons. In addition, we will cover a variety of special topics. This course is designed to be the last quarter of a full year sequence. Sequence with PHYS 664, PHYS 665.

Requisites: Prereq: PHYS 665.

PHYS 671. Solid State Physics. 4 Credits.

Crystallography; thermal, electrical, optical, and magnetic properties of solids; band theory; metals, semiconductors, and insulators; defects in solids. Sequence.

Requisites: Prereq: PHYS 633.

PHYS 672. Solid State Physics. 4 Credits.

Crystallography; thermal, electrical, optical, and magnetic properties of solids; band theory; metals, semiconductors, and insulators; defects in solids. Sequence.

Requisites: Prereq: PHYS 671.

PHYS 674. Theory of Condensed Matter. 4 Credits.

Advanced topics include quantum and statistical description of many-particle systems, electronic structure, elementary excitations in solids and fluids, critical phenomena, statics and dynamics of soft condensed matter. Topics and emphasis vary.

Requisites: Prereq: PHYS 673.

PHYS 677M. Semiconductor Device Physics. 4 Credits.

Introduction to the theory behind semiconductors. Elementary theory of inorganic solids; electronic structures and transport properties. Basic theory of devices including diodes, transistors, mosfets, and optoelectronic devices. Offered only in summer. Sequence with PHYS 678M, PHYS 679M. Multilisted with CH 677M.

PHYS 678M. Semiconductor Processing and Characterization Technology. 4 Credits.

Introduction to the techniques required to make semiconductors and test their properties. Solid-state and surface chemistry of inorganic semiconductors as it pertains to microelectronic devices. Offered only in summer. Multilisted with CH 678M. Sequence with PHYS 677M, PHYS 679M.

Requisites: Prereq: PHYS 677M.

PHYS 679M. Device Processing and Characterization Laboratory. 4 Credits.

Students use theory and techniques learned to design, fabricate, and test a device that performs a specific function, with an emphasis on wafer processing and device realization. Offered only in summer. Sequence with PHYS 677M, PHYS 678M. Multilisted with CH 679M.

Requisites: Prereq: CH 678M.

PHYS 681. Cryogenic and Quantum Measurements. 4 Credits.

This course introduces cryogenic and quantum measurements, emphasizing ultra-low-temperature physics and superconducting qubit characterization. Students gain hands-on experience with dilution cryostats, learning their operation, control, and measurement hardware. Through practical lab sessions, they conduct experiments on superconducting qubits, bridging theory with real-world quantum computing applications. Ideal for those in quantum technologies, condensed matter physics, or cryogenic engineering. Concurrent registration in PHYS 682 and PHYS 691 required.

Requisites: Prereq: PHYS 533, PHYS 595. Coreq: PHYS 682, PHYS 691.

PHYS 682. Optical Quantum Lab. 4 Credits.

This hands-on laboratory course trains students in optical physics and experimental techniques central to quantum information science. Covering optical alignment, fiber optics, and acousto-optic modulation, students build a confocal microscope to image single spin qubits, such as atomic defects in diamond. They implement quantum state preparation, optical spin readout, single-qubit gates, and antibunching measurements. Advanced topics include Ramsey interferometry to study qubit dynamics. The course equips students with practical skills for careers in quantum engineering, photonics, and computing, providing a strong foundation for research or industry roles in the rapidly advancing quantum technology sector.

Requisites: Prereq: PHYS 533, PHYS 595. Coreq: PHYS 681, PHYS 691.

PHYS 684. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Requisites: Prereq: PHYS 354 or equivalent.

PHYS 685. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Requisites: Prereq: PHYS 684; coreq PHYS 631.

PHYS 686. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Requisites: Prereq: PHYS 685; coreq: PHYS 632.

PHYS 691. Industry Projects in Quantum and Nanotechnology. 4 Credits.

This hands-on course trains students in designing, building, and testing integrated quantum and nanotechnology devices. Working in teams, students take projects from concept to completion, developing plug-and-play systems through design and fabrication. Projects involve nanofabricating mechanical, photonic, electronic, or superconducting micro- and nanodevices using advanced tools like e-beam lithography, scanning electron microscopy, and atomic force microscopy. Students gain skills in technical communication, design, fabrication, measurement, simulation, analysis, and industry collaboration. By course end, they will have built a functional system, developed industry-relevant expertise, and gained experience in teamwork, innovation, and advanced nanofabrication techniques.

Requisites: Prereq: PHYS 533, PHYS 595. Coreq: PHYS 681, PHYS 682.

Planning, Public Policy and Management (PPPM)

Courses

PPPM 101. Advocacy and Social Change. 4 Credits.

Explorations of how policy change occurs, how people and organizations create social and policy change, and how individuals can make a difference in their communities.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PPPM 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PPPM 201. Introduction to Public Policy. 4 Credits.

Overview of professional public service and the planning and management of public issues. Focuses on the goals of public services within their economic, social, and political contexts.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PPPM 202. Healthy Communities. 4 Credits.

Historical relationships of public policy, planning, and public health; how public policies can promote health; relationship of planning and policies to inequalities in health outcomes.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PPPM 205. Introduction to City Planning. 4 Credits.

Introduction to planning, using urban issues as lenses to explore transportation, housing, environment, and social equity as critical elements shaping where and how people live.

Additional Information:

Social Science Area

PPPM 242. Global Sustainable Cities and Landscapes. 4 Credits.

The course focuses on Sustainable Cities and Landscapes (SCL), a key approach to achieving the Sustainable Development Goals (SDGs)—internationally recognized benchmarks for advancing global sustainability. It explores urbanization, with a particular emphasis on the Non-US Pacific Rim, and examines practices for creating sustainable cities worldwide. Topics include addressing the impacts of climate change on vulnerable communities, transforming water and energy systems, promoting biodiversity, enhancing placemaking, and fostering rural-urban co-development. Through hybrid teaching and methods such as case studies and peer learning, the course builds competencies in systems thinking, strategic action, collaboration, and integrated problem-solving, equipping students to critically evaluate sustainability.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

PPPM 250. Arts and Human Values. 4 Credits.

Addresses fundamental aesthetic theory and practice questions resulting from viewing art as a powerful communicator of social and cultural values. Values, rights, and responsibilities of the contemporary visual environment. Institutional structures advancing the arts and culture in society will be examined.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

PPPM 280. Introduction to the Nonprofit Sector. 4 Credits.

Overview of the nonprofit sector includes its origin, growth, oversight, and varied elements. Examines theory and research into the effectiveness of nonprofit strategies and structures.

Additional Information:

Social Science Area

PPPM 321. Inclusive Urbanism. 4 Credits.

Investigates the relationship between social-economic inclusion and the physical form of cities.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PPPM 325. Community Leadership and Change. 4 Credits.

Explores sustainable change at the community level by examining local systems and institutions: transportation, social influences, environment, housing, and the economy.

PPPM 331. Environmental Management. 4 Credits.

Introduction to environmental management. Focuses on solutions to problems in managing population, pollution, and resources.

PPPM 337. Urban Transportation. 4 Credits.

Presents a survey of transportation planning issues. Assignments use Oregon as a transportation laboratory and challenge students to synthesize planning and policy recommendations.

PPPM 340. Climate Change Policy. 4 Credits.

Overview of climate-change policy; topics include cap and trade, carbon tax, fuel efficiency standards, biofuel standards, and renewable portfolio standards.

Additional Information:

Social Science Area

PPPM 356. Visual Design for Applied Practice. 4 Credits.

Fundamentals of visual communications for the public and nonprofit organizations. Professional practice in creating effective visual media, and conveying qualitative and quantitative data.

PPPM 360. International Public Policy. 4 Credits.

Introduces international dimensions of public policy making by comparing national systems and institutions of governance, public policy making processes, and public policy decisions. Investigates concepts, theories, and approaches to compare public policies in economic, welfare, educational, health, and environmental sectors.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

PPPM 370. Global Sustainable Development and Policy. 4 Credits.

Sustainable Development seeks to reconcile the economic, social, and environmental problems we face in a world with constrained resources. To have a broader perspective of what sustainability means, we examine problems through an interdisciplinary lens and investigate how these issues form and possible policy solutions.

Additional Information:

Cultural Literacy: Global Perspectives

PPPM 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PPPM 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PPPM 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PPPM 404. Internship: [Topic]. 1-12 Credits.

Supervised work experience that offers students opportunities to explore and clarify career goals, apply academic learning, enhance and learn new skills, gain experience, and network with professionals.

Requisites: Prereq: PPPM 412.

Repeatable 99 times

PPPM 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

PPPM 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

PPPM 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PPPM 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PPPM 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PPPM 410. Experimental Course: [Topic]. 1-5 Credits.

Trial courses are taught under these numbers. See the online class schedule for current titles.

Repeatable 99 times

PPPM 410L. Experimental Course: [Topic]. 4 Credits.

Trial courses are taught under these numbers. See the online class schedule for current titles.

Repeatable 99 times

PPPM 412. Internship and Professional Development. 2 Credits.

Introduction to department's internship program and career development. Overview of professionalism and effective communication, resume and cover letter writing, and interviewing and networking skills.

PPPM 413. Quantitative Methods. 4 Credits.

Introduction to the use of quantitative techniques to answer planning, public policy and management related questions.

PPPM 415. Policy and Planning Analysis. 4 Credits.

Applied problem-solving in the public policy and planning process. Examines the theoretical and methodological underpinnings of policy and planning analysis.

Requisites: Prereq: EC 201Z.

PPPM 418. Introduction to Public Law. 4 Credits.

Administrative law, including introduction to legal research, for public administrators. Administrative procedures, implementation of policy through administrative law, judicial review, and practical applications in public agencies.

PPPM 422. Grant Proposal Writing. 1 Credit.

Introduction to the process of preparing grant applications and material for funded research.

PPPM 425. Project Management. 4 Credits.

Application of specific techniques that lead to projects being completed on time, within budget, and with appropriate quality.

PPPM 426. Strategic Planning for Management. 4 Credits.

Process of strategic planning for communities, government agencies, and nonprofit organizations.

PPPM 430. Public Health Policy. 4 Credits.

This course explores public health policies and how they intersect with social and environmental justice, including topics on cultural competency, natural disasters, criminal justice, and international cooperation.

Requisites: Prereq: PPPM 202 is recommended.

PPPM 434. Urban Geographic Information Systems. 4 Credits.

Introduction to geographic information systems in areas of environmental, demographic, suitability, and transportation-related research.

PPPM 438. Transportation Issues in Planning: [Topic]. 4 Credits.

Introduction to the social implications of various transportation-related policies and practices.

Repeatable 1 time for a maximum of 8 credits

PPPM 439. Transportation Policy. 4 Credits.

Provides a foundation in transportation policy and covers topics related local, state, and federal transportation policy. Course assignments challenge students to synthesize policy recommendations.

PPPM 440. Land-Use Planning and Policy. 4 Credits.

Land use planning processes and policy tools that US governments employ to manage and control land development, especially those considered to support a community's efforts to pursue sustainable urbanization.

PPPM 442. Sustainable Urban Development. 4 Credits.

Introduces issues revolving around cities as the nexus for environmental challenges, including land-use planning, transportation planning, community and neighborhood design, and green buildings.

PPPM 443. Natural Resource Policy. 4 Credits.

Aspects of population and resource systems. Poses questions about population trends, policy, and optimum size; analyzes methods for determining resource availability and flows.

PPPM 444. Environmental Policy. 4 Credits.

Overview of policies related to the environment: examines the design and effectiveness of specific policies.

PPPM 445. Green Cities. 4 Credits.

Examines the history and future of the interface between urban growth and environmental concerns, and the technological, social, and political forces that continue to shape it.

PPPM 446. Socioeconomic Development Planning. 4 Credits.

Planning for responsible economic and social development. Policy problems and issues in providing a stable economic base and social and economic well-being while avoiding environmental degradation.

PPPM 448. Collaboration. 4 Credits.

Explores theory and practice of collaboration in public and nonprofit settings, including the role of organizations, agencies, and the public. Focuses in particular on developing and practicing collaboration skills and strategies.

PPPM 452. Public Participation in Diverse Communities. 4 Credits.

Review of community engagement strategies and tools for encouraging public participation in low income and ethnically diverse communities.

Requisites: Prereq: PPPM 432.

PPPM 457. Nonprofit and Government Communications. 4 Credits.

This course is designed to help students understand and learn the tools to implement intentional strategic communications that propel an organization forward in its quest to achieve its mission.

PPPM 460. Health Policy. 4 Credits.

Introduction to the key health policy issues of access, cost, quality, and racial and ethnic disparities.

PPPM 465. Program Evaluation. 4 Credits.

Introduction to the design and implementation of program evaluations.

PPPM 468. Lobbying and the Legislative Process. 2 Credits.

This course introduces students to the legislative process and the role of lobbyists in legislative advocacy and policymaking.

PPPM 470. The Arts in Society. 4 Credits.

Course examines the arts as they function in society. Anthropological, philosophical, sociological, and art educational orientations to art are examined. Implications for arts and cultural management are addressed.

PPPM 471. Cultural Policy. 4 Credits.

Cultural Policy investigates political choice processes, governmental institutions, and the public policy cycle that shape the arts and culture sector.

PPPM 472. Creative Placemaking. 4 Credits.

This course provides an overview of the relationship between the arts and community development.

PPPM 473. Cultural Programming. 4 Credits.

Explore theory and practice related to arts and cultural programming in the public sector. Emphasis on inclusive and equitable cultural programming.

PPPM 480. Nonprofit Management. 4 Credits.

How to manage nonprofit organizations for superior performance in a humane, responsive, and responsible manner. Distinctive characteristics of nonprofit organizations.

Requisites: Prereq: PPPM 280.

PPPM 481. Fundraising for Nonprofit Organizations. 4 Credits.

Introduction to fundraising for nonprofit organizations. Annual giving, major gifts, planned giving, and campaigns.

PPPM 483. Volunteer Resource Management. 2 Credits.

This course provides an overview of the role of volunteers in community organizations and serves as a comprehensive introduction to effective practices in volunteer resource management.

PPPM 484. Public and Nonprofit Financial Management. 4 Credits.

Introduction to financial management for public agencies and nonprofit organizations. Topics include budget processes, financial statements, financial resource management (taxes, donations, grants), expenditure systems, and capital project analysis.

PPPM 486. Philanthropy and Grant Making. 2 Credits.

History, economics, and practice of philanthropy and grant making in the United States. Students study philanthropy from a multidisciplinary perspective and finish the quarter by awarding a \$15,000 grant to a nonprofit organization of their choice.

PPPM 487. Impact Philanthropy. 4 Credits.

Introduction to impact philanthropy and related topics. Evidence-based philanthropy, venture philanthropy, impact investing, social impact bonds, impact measurement, and policy environment.

PPPM 488. Nonprofit Legal Issues. 4 Credits.

This course introduces legal issues for administration of nonprofit organizations. Topics include formation and types of organizations, board of directors duties, regulation of nonprofits, risk management, employee and volunteer law, lobbying, charitable solicitation, and laws on discrimination and accommodation.

PPPM 494. Practice of Leadership and Change. 4 Credits.

Examines the principles and practices of leadership and change in communities and organizations through discussions with community leaders and personal reflection.

PPPM 495. Advanced Urban Geographic Information Systems. 4 Credits.

Acquiring advanced skills of using Geographic Information Systems (GIS) for community mapping and spatial analysis.

Requisites: Prereq: PPPM 434 or other intro GIS class.

PPPM 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PPPM 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PPPM 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PPPM 510. Experimental Course: [Topic]. 1-5 Credits.

Trial courses are taught under these numbers. See the online class schedule for current titles.

Repeatable 99 times

PPPM 518. Introduction to Public Law. 4 Credits.

Administrative law, including introduction to legal research, for public administrators. Administrative procedures, implementation of policy through administrative law, judicial review, and practical applications in public agencies.

PPPM 522. Grant Proposal Writing. 1 Credit.

Introduction to the process of preparing grant applications and material for funded research.

PPPM 525. Project Management. 4 Credits.

Application of specific techniques that lead to projects being completed on time, within budget, and with appropriate quality.

PPPM 526. Strategic Planning for Management. 4 Credits.

Process of strategic planning for communities, government agencies, and nonprofit organizations.

PPPM 530. Public Health Policy. 4 Credits.

This course explores public health policies and how they intersect with social and environmental justice, including topics on cultural competency, natural disasters, criminal justice, and international cooperation.

PPPM 534. Urban Geographic Information Systems. 4 Credits.

Introduction to geographic information systems in areas of environmental, demographic, suitability, and transportation-related research.

PPPM 538. Transportation Issues in Planning: [Topic]. 4 Credits.

Introduction to the social implications of various transportation-related policies and practices.

Repeatable 1 time for a maximum of 8 credits

PPPM 539. Transportation Policy. 4 Credits.

Provides a foundation in transportation policy and covers topics related local, state, and federal transportation policy. Course assignments challenge students to synthesize policy recommendations.

PPPM 542. Sustainable Urban Development. 4 Credits.

Introduces issues evolving around cities as the nexus for environmental challenges, including land-use planning, transportation planning, community and neighborhood design, and green buildings.

PPPM 543. Natural Resource Policy. 4 Credits.

Aspects of population and resource systems. Poses questions about population trends, policy, and optimum size; analyzes methods for determining resource availability and flows.

PPPM 544. Environmental Policy. 4 Credits.

Overview of policies related to the environment: examines the design and effectiveness of specific policies.

PPPM 546. Socioeconomic Development Planning. 4 Credits.

Planning for responsible economic and social development. Policy problems and issues in providing a stable economic base and social and economic well-being while avoiding environmental degradation.

PPPM 548. Collaboration. 4 Credits.

Explores theory and practice of collaboration in public and nonprofit settings, including the role of organizations, agencies, and the public. Focuses in particular on developing and practicing collaboration skills and strategies.

PPPM 552. Public Participation in Diverse Communities. 4 Credits.

Review of community engagement strategies and tools for encouraging public participation in low income and ethnically diverse communities.

Requisites: Prereq: PPPM 532.

PPPM 557. Nonprofit and Government Communications. 4 Credits.

This course is designed to help students understand and learn the tools to implement intentional strategic communications that propel an organization forward in its quest to achieve its mission.

PPPM 560. Health Policy. 4 Credits.

Introduction to the key health policy issues of access, cost, quality, and racial and ethnic disparities.

PPPM 565. Program Evaluation. 4 Credits.

Introduction to the design and implementation of program evaluations.

PPPM 568. Lobbying and the Legislative Process. 2 Credits.

This course introduces students to the legislative process and the role of lobbyists in legislative advocacy and policymaking.

PPPM 570. The Arts in Society. 4 Credits.

Course examines the arts as they function in society. Anthropological, philosophical, sociological, and art educational orientations to art are examined. Implications for arts and cultural management are addressed.

PPPM 571. Cultural Policy. 4 Credits.

Cultural Policy investigates political choice processes, governmental institutions, and the public policy cycle that shape the arts and culture sector.

PPPM 572. Creative Placemaking. 4 Credits.

This course provides an overview of the relationship between the arts and community development.

PPPM 573. Cultural Programming. 4 Credits.

Explore theory and practice related to arts and cultural programming in the public sector. Emphasis on inclusive and equitable cultural programming.

PPPM 581. Fundraising for Nonprofit Organizations. 4 Credits.

Introduction to fundraising for nonprofit organizations. Annual giving, major gifts, planned giving, and campaigns.

PPPM 583. Volunteer Resource Management. 2 Credits.

This course provides an overview of the role of volunteers in community organizations and serves as a comprehensive introduction to effective practices in volunteer resource management.

PPPM 586. Philanthropy and Grant Making. 2 Credits.

History, economics, and practice of philanthropy and grant making in the United States. Students study philanthropy from a multidisciplinary perspective and finish the quarter by awarding a \$15,000 grant to a nonprofit organization of their choice.

PPPM 587. Impact Philanthropy. 4 Credits.

Introduction to impact philanthropy and related topics. Evidence-based philanthropy, venture philanthropy, impact investing, social impact bonds, impact measurement, and policy environment.

PPPM 588. Nonprofit Legal Issues. 4 Credits.

This course introduces legal issues for administration of nonprofit organizations. Topics include formation and types of organizations, board of directors duties, regulation of nonprofits, risk management, employee and volunteer law, lobbying, charitable solicitation, and laws on discrimination and accommodation.

PPPM 595. Advanced Urban Geographic Information Systems. 4 Credits.

Acquiring advanced skills of using Geographic Information Systems (GIS) for community mapping and spatial analysis.

Requisites: Prereq: PPPM 434 or other intro GIS class

PPPM 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PPPM 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PPPM 604. Internship: [Topic]. 1-10 Credits.

Supervised work experience that offers students opportunities to explore and clarify career goals, apply academic learning, enhance and learn new skills, gain experience, and network with professionals.

Repeatable 99 times

PPPM 605. Special Problems: [Topic]. 1-16 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

PPPM 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

PPPM 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PPPM 608. Workshop: [Topic]. 1-16 Credits.

A recent topic is Community Planning.

Repeatable 99 times

PPPM 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PPPM 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PPPM 611. Introduction to Planning Practice. 4 Credits.

Explores the concepts and functions of the planning process as they relate to the social, economic, political, and environmental aspects of communities and regions.

PPPM 612. Legal Issues in Planning. 4 Credits.

Federal and state legal relationships, the role of the courts in reviewing public sector decision-making, sources of the law, issues in land-use regulation, and basic legal research skills.

PPPM 613. Planning Analysis I. 5 Credits.

Data sources and methods of data collection including surveys; descriptive and multivariate analysis; computer applications; selected analytic models, population projections, cost-benefit analysis.

PPPM 616. Planning Theory and Ethics. 4 Credits.

Logic of the planning process; the relationship of planning to the political process and to rational decision making in governance.

PPPM 617. Human Settlements. 4 Credits.

Historical development of cities and the ways in which city and regional contexts influence economic, social, and political processes.

PPPM 618. Public Sector Theory. 4 Credits.

Overview of the core concepts, theories, and practices that provide the foundation for the field of public policy and management.

PPPM 620. Planning and Management Research Skills. 2 Credits.

Surveys research skills in planning and public administration. Applies research skills to applied projects in Community Planning Workshop and Nonprofit Consultancy.

PPPM 623. Professional Development. 1 Credit.

Articulating preliminary career goals and mapping the necessary steps to accomplish these goals.

PPPM 625. Community Planning Workshop. 5 Credits.

First in a two-term sequence of planning and problem-solving courses. Students working in teams conduct research and develop solutions to planning problems for a client community. Sequence with PPPM 626.

PPPM 626. Community Planning Workshop. 5 Credits.

Last in a two-term sequence of planning and problem-solving courses. Students working in teams conduct research and develop solutions to planning problems for a client community. Sequence with PPPM 625.

Requisites: Prereq: PPPM 625.

PPPM 628. Public Sector Economics. 4 Credits.

Reasons for governmental intervention and analysis of revenue sources available to governments. Includes discussion of various taxes, intergovernmental transfer policies, and user fees.

PPPM 629. Public Budget Administration. 4 Credits.

Resource allocation through the budget process. Analysis of budget systems, service costing, and citizen participation in the budget process.

PPPM 630. Visual Design for Applied Practice. 4 Credits.

Fosters skills including graphic representation of ideas, design software knowledge, and supportive critique of others' work. Provides a strong graphic design software foundation.

PPPM 633. Public Management. 4 Credits.

Theory and practice of public service management; leadership and organizational capacity building, including key management activities for developing effective public service organizations.

PPPM 636. Public Policy Analysis. 4 Credits.

Techniques in the policymaking process. Determining the impact of policies, comparing alternatives, determining the likelihood that a policy will be adopted and effectively implemented.

Requisites: Prereq: PPPM 628.

PPPM 637. MPA Policy Analysis Project. 1 Credit.

Students team to produce a professionally oriented policy analysis memorandum and presentation on an assigned topic in a 48-hour period.

Requisites: Prereq: PPPM 636.

PPPM 638. MPA Capstone Applied Research Project I. 5 Credits.

Team prepare applied research projects for client organizations using analytical and managerial skills to solve problems in public policy analysis or public management. Sequence with PPPM 639.

Requisites: Prereq: PPPM 618, 629, 633, 636, 657, 684.

PPPM 639. MPA Capstone Applied Research Project II. 5 Credits.

Teams prepare applied research projects for client organizations using analytical and management skills to solve problems in public policy analysis or public management. Sequence with PPPM 638.

Requisites: Prereq: PPPM 638.

PPPM 640. Land Use Planning and Policy. 4 Credits.

Study spatial planning tools and processes that control and manage land developments in order to enhance the well-being of human societies and natural systems.

PPPM 656. Quantitative Methods. 5 Credits.

Develops skills in quantitative analysis. Emphasizes selecting appropriate analysis procedures and properly interpreting and reporting results.

PPPM 657. Research Methods in Public Policy and Management. 4 Credits.

Survey of research methods used in the analysis of public policy issues. Emphasis is on determining the appropriate methodology for a given research question.

Requisites: Prereq: PPPM 656.

PPPM 663. Professional Development II. 1 Credit.

Pre-professional students practice the habits of professionals in the field. Build skills in metacognition and reflection, inclusion and diversity, and personal investment in life long learning and inquiry. Sequence with PPPM 623.

Repeatable 1 time for a maximum of 2 credits

PPPM 680. Managing Nonprofit Organizations. 4 Credits.

Principles of effective management of nonprofit organizations. Governance, strategy, legal structure and standards, and volunteer administration.

PPPM 684. Public and Nonprofit Financial Management. 4 Credits.

Financial management overview for public agencies and nonprofits, including budget processes, financial statements, resource management, expenditure systems, capital project analysis, and internal management control processes.

PPPM 686. Nonprofit 48-Hour Charrette. 1 Credit.

Requires students to complete a management memo on an assigned topic. Work is completed within a 48-hour period, mimicking the high-stakes, deadline-intensive schedule characterizing professional work in the nonprofit sector.

PPPM 687. Nonprofit Board Governance. 1 Credit.

Students serve on governing boards of nonprofit organizations for one year: fall, winter, and spring terms.

Repeatable 2 times for a maximum of 3 credits

PPPM 688. Nonprofit Consultancy. 4 Credits.

Student teams complete projects for nonprofit organizations, assessing organizational needs and capacity, evaluating alternative strategies, and recommending solutions for organizational success.

Political Science (PS)

Courses

PS 102. Thinking Like a Social Scientist. 4 Credits.

Illustrates how the ways social scientists think—using quantitative, qualitative, and interpretive methods—help to sharpen thinking for many contexts and careers.

Additional Information:

Social Science Area

PS 106. Power, Politics, and Inequality. 4 Credits.

Examines power and politics through the lens of inequality, focusing on the constant struggle between the haves and the have-nots.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PS 111. Introduction to Political Science. 4 Credits.

Offers students the tools to think for themselves about politics: multiple ideological and analytical viewpoints on varying political arrangements around the world.

Additional Information:

Social Science Area

PS 199. Special Studies: [Topic]. 1-5 Credits.

Topics vary from year to year.

Repeatable 1 time when topic changes

PS 201. United States Politics. 4 Credits.

Theoretical introduction to American institutions, political doctrines, and ideology as these affect the course of politics and public policy in the United States.

Additional Information:

Social Science Area

PS 205. Introduction to International Relations. 4 Credits.

Introduction to theoretical and methodological tools for the analysis of world politics.

Additional Information:

Social Science Area

PS 206. Ethics, Identity, and Power. 4 Credits.

This course is a gateway for those considering the "Ethics, Identity, and Society" track in the Political Science major. The course examines political power and ethical ideas about its use, with a focus on race, gender, religion, class, and other forms of social differentiation.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PS 210. Politics of Business. 4 Credits.

Introduces the political science subfield of political economy, which studies the relationship between concepts like the market and the state, capitalism and democracy, politics and the economy. The American political economy is examined from both a historical and an international perspective.

Additional Information:

Social Science Area

PS 275. Legal Process An Introduction to the American Judiciary. 4 Credits.

Overview of the United States legal system. Covers a range of sociolegal writing and provides a context for the legal system under which the U.S. operates.

Additional Information:

Social Science Area

PS 297. Introduction to Environmental Politics. 4 Credits.

United States environmental policy and alternative environmental political futures.

PS 302. States' Rights and Wrongs. 4 Credits.

Explores the division between U.S. federal, state and municipal power through the lens of our nation's most contentious and most critical political and policy debates. Examines how elected officials, judges and activists influence fights over federalism.

Additional Information:

Social Science Area

PS 304. Democracy, Dictators, and Development. 4 Credits.

Examines key questions in political science like why some countries are rich while others are poor, why some countries are democratic and others are authoritarian, how these different political systems work, and which are best equipped to address ethno-nationalist conflict and economic development.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

PS 308. United States Political Thought. 4 Credits.

Development of United States political thought from the Revolution through the 20th century. Includes writings of Jefferson, Paine, Madison, Tocqueville.

PS 309. Political Ideologies. 4 Credits.

Ideology is a more-or-less coherent lens through which a person views the world in order to process information and direct action. The course examines how the world looks different for those holding liberal, conservative, communist, fascist, or anarchist world views.

Additional Information:

Social Science Area

PS 310. Roots of Democracy. 4 Credits.

Examines modern conceptions of democracy, citizenship, legality, virtue, equality, and political order, which grew out of ideas initially developed in ancient Greek city-states. Special attention given to ideas of active citizenship.

Additional Information:

Social Science Area

PS 311. Sovereignty and Revolution. 4 Credits.

Examines contemporary conceptions of politics springing from European debates about the power of kings, law, and the people. Considers key textual moments in the process by which modern conceptions of democracy emerged.

Additional Information:

Social Science Area

PS 312. Shadows of Modernity. 4 Credits.

Explores the distinct critiques of modernity offered by John Stuart Mill, Karl Marx, Friedrich Nietzsche, Michel Foucault, and Sigmund Freud. Concepts explored include liberalism, capitalism, power, morality, and the unconscious.

Additional Information:

Social Science Area

PS 316. Black Lives Matter and American Democracy. 4 Credits.

Explores the ideological origins and contemporary politics of the Black Lives Matter movement. Modules include the demands of/on democracy, race and the criminal justice system, and the politics of protest.

Additional Information:

Social Science Area
Cultural Literacy: US: Difference, Inequality, Agency

PS 319. The Politics of the Body. 4 Credits.

This course examines the politics of the body in the US. It will focus on scientific and biological definitions of identity and how that affects policies.

Additional Information:

Social Science Area
Cultural Literacy: US: Difference, Inequality, Agency

PS 320. International Organization. 4 Credits.

Studies efforts by states to cooperate in an effort to avoid or resolve conflict in the realms of security, trade, human rights, and the environment.

PS 324. European Politics. 4 Credits.

Overview of the formation and current dynamics of national politics in Western Europe.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

PS 326. United States Foreign Policy I. 4 Credits.

Basic concepts underlying the formulation and implementation of United States foreign policy; relationships between American society and foreign policy; the relationship of the U.S. to its international environment.

Additional Information:

Social Science Area

PS 330. Governments and Politics in Latin America. 4 Credits.

Social, political, and economic developments in Latin America; causes and consequences of revolutions, democratization, economic politics; examples from Mexico, Brazil, Chile, Argentina, Guatemala, Venezuela. Offered alternate years.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

PS 337. The Politics of Development. 4 Credits.

Presents alternative perspectives on key north-south issues: trade, aid, foreign investment, debt, and the environment. Includes such institutions as the International Monetary Fund, World Bank, and World Trade Organization.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

PS 340. International Political Economy. 4 Credits.

Links between economics and politics in the international system. Basic concepts include power, dependence, inequality, imperialism, and development. EC 201Z, EC 202Z, or PS 205 recommended preparation.

PS 342. Politics of China. 4 Credits.

Survey of the politics of the People's Republic of China. Emphasis on political sociology and group conflict: elites, ideology, social change, and organization.

Additional Information:

Cultural Literacy: Global Perspectives

PS 345. Southeast Asian Politics. 4 Credits.

Surveys major themes in contemporary Southeast Asian politics, including nation-state building, economic development, democratization, and religious and ethnic politics.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

PS 346. Terrorism and Weapons Proliferation. 4 Credits.

Examines causes and control of terrorism, especially preventing terrorist use of weapons of mass destruction; theories and policies of nonproliferation and arms control.

PS 348. Women and Politics. 4 Credits.

Examines the political role of women and questions of equality in the U.S. from historical and contemporary perspectives. Topics may include voting, welfare, reproductive rights, and representation.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

PS 349. Mass Media and American Politics. 4 Credits.

The role of the mass media in contemporary American politics; the effect of the media on such institutions as political parties, elections, and the presidency.

Additional Information:

Social Science Area

PS 350. Politics and Film. 4 Credits.

Examines the political relevance of films and their role as a medium for illustrating, defending, and challenging political ideas.

PS 351. Democratic Dilemmas. 4 Credits.

Core course for the Wayne Morse Scholars Program, exploring significant political and policy challenges confronting our representative democracy.

PS 352. Political Parties and Elections. 4 Credits.

Overview of current developments in political parties and interest groups in the United States.

Additional Information:

Social Science Area

PS 355. Oregon Government and Politics. 4 Credits.

Current political issues in Oregon with particular attention to political races and ballot measures before the Oregon electorate as well as the state's major political institutions.

PS 367. Politics, Science, and Climate Change. 4 Credits.

How politics influences our understanding of the causes and impacts of climate change and the policies we adopt to address the global climate crisis.

Additional Information:

Social Science Area

PS 368. Gender in the Law. 4 Credits.

Examines the role courts have played in framing and shaping policies where gender is a central feature with a focus on reproductive rights, pregnancy and abortion, domestic violence, rape, family issues, prostitution, and sexual harassment. Offered alternate years.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

PS 371. United States Congress. 4 Credits.

Study of Congress as an institution: congressional elections, the committee system, and the internal distribution of influence; relations with the president and the Supreme Court.

Additional Information:

Social Science Area

PS 372. Music and Politics. 4 Credits.

In this class we will be asking questions about what is political about music of various musical styles and from diverse historical periods, exploring issues of cultural appropriation, issues of race, gender, and sexuality in music, and the politics of technology and music.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

PS 378. Games in Politics. 4 Credits.

Politics viewed as strategic interactions among politicians, voters, and countries; focuses on how to model these interactions using tools of game theory.

PS 380. Gender and Politics in Developing Countries. 4 Credits.

Examines gender politics in the developing world and efforts to help women. Topics include female genital cutting, violence against women, economic development, microfinance, migration, trafficking. Offered alternate years.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

PS 384. Nuclear Politics of the Middle East. 4 Credits.

History and current nuclear capabilities of all major Middle East states are evaluated. Nuclear strategy, arms control and important technological developments are examined. Theoretical models of proliferation, and debates of a nuclear "taboo" discussed. U.S. foreign policy options toward the Middle East critiqued.

Additional Information:

Social Science Area

PS 386. United States Social Movements and Political Change. 4 Credits.

Causes and consequences of American social movements. Considers theoretical perspectives. Topics may include agrarian populism, labor movement, civil rights movement, the women's movement, and identity politics.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PS 387. Russian Politics. 4 Credits.

The course traces Russian politics from a communist regime to its current state, investigates contemporary aspects of Russian politics, and examines Russia's vision of the world and its foreign policy.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

PS 390. American Indian Politics. 4 Credits.

Examination of the political and constitutional status of American Indian tribes in the United States, with some comparison to Canada. Focus on history, current policy, and potential futures.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PS 391. Non-Western Political Theory. 4 Credits.

This course examines political ideas from outside of the "Western" tradition. It begins by comparing political ideas in classical China and India, and then turns to 19th and 20th century colonial experiences in China, India, and North Africa.

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

PS 399. Special Studies: [Topic]. 1-5 Credits.

Topics vary from year to year.

Repeatable 99 times when topic changes

PS 401. Research: [Topic]. 1-15 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PS 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PS 404. Internship: [Topic]. 1-4 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 1 time for a maximum of 4 credits

PS 405. Reading and Conference: [Topic]. 1-15 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PS 406. Field Studies: [Topic]. 1-5 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 9 times for a maximum of 10 credits

PS 407. Seminar: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student need and faculty interests.

Repeatable 99 times when topic changes

PS 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times when topic changes

PS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PS 410. Experimental Course: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student need and faculty interests.

Repeatable 99 times when topic changes

PS 411. Honors Thesis Prospectus. 1 Credit.

Prepares students for writing the senior honors thesis in political science. Provides guidance in framing a suitable topic, conducting preliminary research, and writing a prospectus.

PS 433. Marxism and Radical Thought. 4 Credits.

Surveys utopian socialist thought, anarchism, Marxism, and Leninism. Central themes include the nature of radical theory, the role of the state, human nature and the new society.

PS 440. Causes and Prevention of War. 4 Credits.

Surveys theories of causes of war; focuses on major theories of prevention; case studies from World War I, World War II, and other wars.

PS 445. Methods for Politics and Policy Analysis I. 4 Credits.

Introduction to quantitative analysis, concepts and methods of empirical research, applied statistical data analysis in political science. Methods include descriptive statistics, bivariate correlation, and regression techniques.

PS 446. Methods for Politics and Policy Analysis II. 4 Credits.

Survey of multivariate model building for political analysis. Multiple regression, discrete-variable techniques, recursive systems, and cross-level analysis. Application of these techniques to concrete political problems.

Requisites: Prereq: PS 445/545.

PS 449. Racial Politics in the United States. 4 Credits.

Considers how race has interacted with political development in the U.S. from the New Deal to the present.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

PS 455. Theories of International Politics. 4 Credits.

Competing theories of international relations and strategies for testing the theories.

PS 458. Feminist Political Theories. 4 Credits.

Examines the relationship between feminism, gender, and the state. Offered alternate years.

PS 460. Political Economy of East Asia. 4 Credits.

Examines the political economy of East Asia, with a focus on states, markets, and social classes during economic transformation. Offered alternate years.

PS 465. LGBT Rights in the Courts. 4 Credits.

Analyzes the role of legal advocates and the courts in advancing and curtailing lesbian, gay, bisexual, and transgender rights with a focus on relationship recognition, parenting, employment, housing, military, education, and health care. Offered alternate years.

PS 466. Civil Rights in Post-Warren Era. 4 Credits.

Analyzes development in civil rights advocacy in the United States since the heyday of the Warren Court. Focuses primarily on developments in race, gender, disability, and sexuality. Offered alternate years.

PS 467. The United States Presidency. 4 Credits.

An ambivalent view of the presidency as the key institution in the United States political system: source of great good but also of great harm.

PS 470. Constitutional Law. 4 Credits.

Surveys how the U.S. Constitution works as a structure for government. Addresses how the federal courts interact within the U.S. system of government.

PS 472. Matters of Life and Death. 4 Credits.

Examines the right to life from political, legal, and philosophical perspectives. Considers abortion, capital punishment, assisted suicide, just-war theory, and animal rights.

PS 475. Politics of the European Union. 4 Credits.

Surveys the historical development and current workings of the European Union's major institutions and policies. Offered alternate years.

PS 477. International Environmental Politics. 4 Credits.

How nations solve international environmental problems. Explores major problems, processes, and current debates. Evaluates existing treaties through case studies.

PS 478. Globalization and Development. 4 Credits.

What is globalization? What is development? Do forces of globalization impede or enable development? How do the changing rules and institutions of globalization affect efforts by developing countries to grow their economies? This course is designed to help students think through these questions systematically.

Additional Information:

Cultural Literacy: Global Perspectives

PS 479. U.S. Interventions in Developing Nations. 4 Credits.

Examines theories of intervention: security, economic imperialism, humanitarian intervention, spreading democracy, domestic politics; over thirty-seven U.S. interventions since 1898 are surveyed.

PS 480. Introduction to Rational Choice. 4 Credits.

Introduces the paradigm of rational choice and game theory that is of special significance to politics.

PS 484. United States Supreme Court. 4 Credits.

The Supreme Court as a political body; the judicial role in the context of the economic, political, social, and psychological factors that influence the court's decisions.

PS 485. Civil Rights and Civil Liberties. 4 Credits.

Overview of the role of rights in the United States legal system. Particular emphasis on the role of freedom and equality in a federal system.

PS 491. Politics of Everyday Life. 4 Credits.

Examines how we try to influence each other's behaviors in the course of everyday life. Readings from several disciplines.

PS 495. United States Political Economy. 4 Credits.

Examines United States political-economic institutions from a comparative and historical perspective. Topics include rise and fall of mass production, labor and the law, and regional development.

PS 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PS 507. Seminar: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student needs and faculty interests.

Repeatable 99 times

PS 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PS 510. Experimental Course: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student needs and faculty interests.

Repeatable 99 times when topic changes

PS 533. Marxism and Radical Thought. 4 Credits.

Surveys utopian socialist thought, anarchism, Marxism, and Leninism. Central themes include the nature of radical theory, the role of the state, human nature and the new society.

PS 540. Causes and Prevention of War. 4 Credits.

Surveys theories of causes of war; focuses on major theories of prevention; case studies from World War I, World War II, and other wars.

PS 545. Methods for Politics and Policy Analysis I. 4 Credits.

Introduction to quantitative analysis, concepts and methods of empirical research, applied statistical data analysis in political science. Methods include descriptive statistics, bivariate correlation, and regression techniques.

PS 546. Methods for Politics and Policy Analysis II. 4 Credits.

Survey of multivariate model building for political analysis. Multiple regression, discrete-variable techniques, recursive systems, and cross-level analysis. Application of these techniques to concrete political problems.

PS 549. Racial Politics in the United States. 4 Credits.

Considers how race has interacted with political development in the U.S. from the New Deal to the present.

PS 555. Theories of International Politics. 4 Credits.

Competing theories of international relations and strategies for testing the theories.

PS 558. Feminist Political Theories. 4 Credits.

Examines the relationship between feminism, gender, and the state. Offered alternate years.

PS 560. Political Economy of East Asia. 4 Credits.

Examines the political economy of East Asia, with a focus on states, markets, and social classes during economic transformation. Offered alternate years.

PS 566. Civil Rights in Post-Warren Era. 4 Credits.

Analyzes development in civil rights advocacy in the United States since the heyday of the Warren Court. Focuses primarily on developments in race, gender, disability, and sexuality. Offered alternate years.

PS 567. The United States Presidency. 4 Credits.

An ambivalent view of the presidency as the key institution in the United States political system: source of great good but also of great harm.

PS 570. Constitutional Law. 4 Credits.

Surveys how the U.S. Constitution works as a structure for government. Addresses how the federal courts interact within the U.S. system of government.

PS 572. Matters of Life and Death. 4 Credits.

Examines the right to life from political, legal, and philosophical perspectives. Considers abortion, capital punishment, assisted suicide, just-war theory, and animal rights.

PS 575. Politics of the European Union. 4 Credits.

Surveys the historical development and current workings of the European Union's major institutions and policies. Offered alternate years.

PS 577. International Environmental Politics. 4 Credits.

How nations solve international environmental problems. Explores major problems, processes, and current debates. Evaluates existing treaties through case studies.

PS 578. Globalization and Development. 4 Credits.

What is globalization? What is development? Do forces of globalization impede or enable development? How do the changing rules and institutions of globalization affect efforts by developing countries to grow their economies? This course is designed to help students think through these questions systematically.

PS 579. U.S. Interventions in Developing Nations. 4 Credits.

Examines theories of intervention: security, economic imperialism, humanitarian intervention, spreading democracy, domestic politics; over thirty-seven U.S. interventions since 1898 are surveyed.

PS 580. Introduction to Rational Choice I. 4 Credits.

Introduces the paradigm of rational choice and game theory that is of special significance to politics. Myagkov.

PS 585. Civil Rights and Civil Liberties. 4 Credits.

Overview of the role of rights in the United States legal system. Particular emphasis on the role of freedom and equality in a federal system.

PS 595. United States Political Economy. 4 Credits.

Examines United States political-economic institutions from a comparative and historical perspective. Topics include rise and fall of mass production, labor and the law, and regional development.

PS 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PS 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PS 606. Field Studies: [Topic]. 1-16 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

PS 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PS 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PS 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PS 612. Qualitative Methods. 5 Credits.

Survey of rationales for qualitative methods in the social sciences and the main conceptual and practical issues raised in qualitative research. Offered alternate years.

PS 613. Interpretive Methods in Political Science. 5 Credits.

This seminar trains graduate students in the philosophy, theory and practice of interpretive methods by engaging five methods: discourse analysis, genealogy, political ethnography, interpretive interviewing, and decoloniality. We will take some time with each approach, devoting a week or more to theory method

PS 614. Research Design. 5 Credits.

This course is designed to give students the practical skills necessary to craft a well-designed research project for any type of political science research question. In this way, it prepares students for writing a successful dissertation prospectus, as well as design a second-year paper.

PS 615. Teaching and Learning in Politics and Policy. 1 Credit.

This course for beginning PhD students in Political Science and the School of Planning, Public Policy, and Management provides a forum to discuss teaching as Graduate Employee and fundamental learning skills for new graduate students.

PS 616. Professionalization in Politics and Policy: [Topic]. 1 Credit.

This course for graduate students in Political Science and PhD students the School of Planning, Public Policy, and Management develops skills necessary for future academic professionals. The specific skills taught are indicated by the course subtitle.

Repeatable 3 times for a maximum of 4 credits

PS 618. American Political Institutions. 5 Credits.

This is one of three required core seminars for PhD students who plan to take a comprehensive examination in American politics. We explore how political science approaches the study of institutional contributions to political and policy developments.

PS 619. United States Political Culture. 5 Credits.

In this course we examine the different ways that scholars study the relationship between politics and culture, and then focus on the United States as our case.

PS 620. State of the Discipline. 5 Credits.

Introduction to trends in the political science profession and to the faculty at the University of Oregon.

PS 621. Dissertation Prospectus. 5 Credits.

This course is required for third-year Political Science doctoral students and will help them develop a detailed plan (prospectus) for researching and writing an acceptable dissertation in order to satisfy PhD requirements.

PS 622. Political Theory. 5 Credits.

Survey of major works in the field of classical and contemporary political theory.

PS 624. International Relations. 5 Credits.

Survey of major works in the field of international relations.

PS 625. Public Policy. 5 Credits.

Survey of major works in the field of public policy.

PS 626. International Political Economy. 5 Credits.

One of two required seminars for PhD students planning to take a comprehensive examination in international relations. Explores how politics and economics interact in shaping economic relations among states.

PS 628. States and State-Society Relations. 5 Credits.

Examines how scholars have studied the state and its relationship to society. Students develop a comparative perspective of contentious politics ranging from peasant rebellions to revolutions to transnational social movements.

PS 629. Comparative Political Economy. 5 Credits.

Doctoral-level survey of how political factors explain variations in national or regional trajectories of economic development, including industrialization, wealth, growth, and inequality.

PS 630. States and Regimes. 5 Credits.

Introduction to the major issues, theories, concepts, and arguments about states and regimes in comparative politics. Offered alternate years.

Portuguese (PORT)

Courses

PORT 101. First-Year Portuguese. 5 Credits.

Introduction to Brazilian Portuguese language and culture, with emphasis on speaking, reading, writing, and listening comprehension skills. Sequence with PORT 102, PORT 103.

PORT 102. First-Year Portuguese. 5 Credits.

Introduction to Brazilian Portuguese language and culture, with emphasis on speaking, reading, writing, and listening comprehension skills. Sequence with PORT 101, PORT 103.

Requisites: Prereq: PORT 101.

PORT 103. First Year Portuguese. 5 Credits.

Introduction to Brazilian Portuguese language and culture, with emphasis on speaking, reading, writing and listening comprehension skills. Sequence with PORT 101, PORT 102.

Requisites: Prereq: PORT 102.

PORT 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PORT 201. Second Year Portuguese. 4 Credits.

Development of Brazilian Portuguese speaking, reading, writing and comprehension; study of short literary and cultural materials. Sequence with PORT 202, PORT 203.

Requisites: Prereq: PORT 103

Additional Information:

Arts Letters Area

PORT 202. Second-Year Portuguese. 4 Credits.

Development of Brazilian Portuguese speaking, reading, writing, and comprehension; study of short literary and cultural materials. Sequence with PORT 201, PORT 203.

Requisites: Prereq: PORT 201.

Additional Information:

Arts Letters Area

PORT 203. Second-Year Portuguese. 4 Credits.

Development of Brazilian Portuguese speaking, reading, writing, and comprehension; study of short literary and cultural materials. Sequence with PORT 201, PORT 202.

Requisites: Prereq: PORT 202.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

PORT 301. Cultura e Lingua: Expressoes Artisticas. 4 Credits.

Develops advanced language skills through the study of key representations in Brazilian art, literature, film, and music. Taught in Portuguese. Prereq: PORT 203 or equivalent. Offered alternate years.

Requisites: Prereq: PORT 203.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

PORT 305. Cultura e lingua: Brasil ontem e hoje. 4 Credits.

Introduction to Brazilian history and culture. Topics include geography; indigenous, European, and African presence; trends of authoritarianism and democratization; issues in migration and urbanization; racial and ethnic identities; women's roles. Taught in Portuguese.

Requisites: Prereq: PORT 203.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

PORT 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Requisites: Prereq: PORT 203.

Repeatable 99 times

PORT 405. Reading and Conference: [Topic]. 1-6 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

Prevention Science (PREV)

Courses

PREV 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated.

Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PREV 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 15 times for a maximum of 16 credits

PREV 604. Internship: [Topic]. 1-16 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

PREV 605. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 4 times for a maximum of 5 credits

PREV 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 15 times for a maximum of 16 credits

PREV 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PREV 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 15 times for a maximum of 16 credits

PREV 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PREV 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 4 times for a maximum of 5 credits

PREV 611. Capstone Seminar I. 3 Credits.

This is the first of a 3-course sequence to help students learn about prevention science and progress through the MEd/MS Prevention Science program and completion of their Capstone project. Students attend scientific presentations, complete prevention science readings, and write and present on course material.

PREV 612. Capstone Seminar II. 2 Credits.

This is the second of a 3-course sequence to help students learn about prevention science and progress through the MEd/MS Prevention Science program and Capstone project. Students conduct a literature review and develop analytical and writing skills required for their Capstone and other scientific manuscripts.

PREV 613. Capstone Seminar III. 2 Credits.

This is the third of a 3-course sequence to help students learn about prevention science and progress through the MEd/MS Prevention Science program and complete their Capstone project. Students complete an original empirical study and corresponding APA formatted 8 to 12-page scientific manuscript and presentation.

PREV 631. Introduction to Prevention Science. 3 Credits.

Overview of theory, research, and practice in prevention science and health promotion, including foundational concepts, translation of theory into intervention, methodology, and implementation.

PREV 633. Contemporary Issues in Public Health. 3 Credits.

This course introduces approaches, concepts, methods, and perspectives of epidemiology as applied to current public health issues and prevention science research and practice.

PREV 634. Implementation Science. 3 Credits.

Provides a framework for examining implementation science and its application to clinical and community-based research.

PREV 635. Prevention and Policy. 3 Credits.

Provide students with an understanding of how basic science is translated into evidence-based prevention programs and policy.

PREV 640. Meta-Analysis I. 3 Credits.

This course provides an introduction to systematic reviewing and meta-analysis methods for synthesizing results from multiple primary research studies in educational research. During this course, students will learn how to formulate research questions for a meta-analysis; conduct systematic literature searches; and synthesize effect sizes using basic meta-analytic techniques. Sequence with PREV 641.

Requisites: Prereq: EDUC 643.

Product Design (PD)

Courses

PD 101. Introduction to Product Design. 4 Credits.

This course is an introduction to the Product Design profession and its cultural relevance. Lectures, reading and projects convey theory (critical thinking), designers (history), design methods (CAD, drawing, building), and storytelling (documentation / presentation) to give a foundation in product innovation, creation, and portfolio generation.

PD 198. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PD 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PD 223. Beginning Design Drawing. 4 Credits.

Focuses on perspective, line weight, construction with primary shapes, and shading in the creation of three-dimensional objects.

PD 240. Designers' Tools. 4 Credits.

Fundamental construction methods for design. Develop and understanding material properties and the use of specific tools through the design, development and construction of two projects.

PD 301. Introduction to Design Studio. 4 Credits.

Introduction to a studio based design course that combines theory and practice with a series of assignments and projects.

Requisites: Prereq: PD 223, PD 240, PD 330.

PD 302. Introduction to Design Studio II. 4 Credits.

Integrate 2D and 3D communication and presentation skills to develop project-based design solutions.

Requisites: Prereq: PD 301; coreq: PD 323.

PD 323. Design Drawing. 4 Credits.

Introduces specific techniques in drawing and modeling objects and their spatial context; the demonstration and implementation of various media and types of drawing.

Requisites: Prereq: ART 115, PD 223.

Repeatable 1 time for a maximum of 8 credits

PD 330. Introduction to Computer Aided Design. 4 Credits.

Introduction to computer-assisted design (CAD) in which students learn virtual design and physical manufacturing relationships and techniques.

PD 340. Design for Use. 4 Credits.

Provides the basic theoretical underpinnings for considering the socio-cultural background and design of products. Lectures and readings present main issues; discussions complete conceptual principals.

Requisites: Prereq: PD 350.

PD 350. Objects and Impacts. 4 Credits.

Explores how design influences and is influenced by materials and manufacturing processes. Lectures, readings, and discussions present sustainability, aesthetic, and functional aspects of product design.

Requisites: Prereq: PD 370.

PD 370. Design Process. 4 Credits.

Introduces design processes, from theoretical to professional, using readings, guest lectures, and experimental new structures.

PD 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PD 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PD 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 2 times for a maximum of 12 credits

PD 405. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

PD 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

PD 407. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PD 408. Workshop: [Topic]. 1-6 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times when topic changes

PD 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

PD 430. Computer-Assisted Design and Production. 4 Credits.

Meshes virtual design and physical design as students work on projects using shop tools and computer-aided design and manufacturing software and equipment.

Requisites: Prereq: ART 115, ART 116, PD 223.

PD 460. Interaction Design. 4 Credits.

This course will provide students with an understanding of the fundamentals of User Experience/User Interface design, including the design thinking process, interaction design, design principles, and prototyping. As part of this course, students will be immersed in user research, learning to identify and meet the needs of the users. Additionally, students will gain hands-on experience designing interfaces and prototyping through available digital design tool. After completing this course, students will be ready to create user-centric digital products with full understanding of User Experience/User Interface design

Requisites: Prereq: PD 340, PD 370.

PD 483. Advanced Studio I. 4 Credits.

Design studio focuses on personal questions that are explored through active design development. Questions may relate to issues of user interface, sustainability, or societal problems.

Requisites: Prereq: PD 302, PD 340.

Repeatable 2 times for a maximum of 12 credits

PD 484. Advanced Studio II. 4 Credits.

Design studio focuses on global questions explored through active development. Questions may relate to issues of user interface, sustainability, or societal problems.

Requisites: Prereq: PD 302, PD 340.

Repeatable 2 times for a maximum of 12 credits

PD 485. Advanced Studio III. 4 Credits.

Design studio focuses on corporate questions that are explored through active design development. Questions may relate to issues of user interface, sustainability, or societal problems.

Requisites: Prereq: PD 302, PD 340.

Repeatable 2 times for a maximum of 12 credits

PD 486. BFA Studio I. 6 Credits.

Explores problems that stress design development through innovation and the responsibility to solve complex societal, functional, and aesthetic issues. Seminar component fosters theoretical, professional, and creative discussion.

PD 487. BFA Studio II. 6 Credits.

Second course in series of interactive studios in which students engage in independent project-based learning. Sequence with PD 486, PD 488.

Requisites: Prereq: PD 486.

PD 488. BFA Studio III. 6 Credits.

Third course in series of interactive studio in which students engage in independent project-based learning. Sequence with PD 486, PD 487.

Requisites: Prereq: PD 487.

PD 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times

PD 560. Interaction Design. 4 Credits.

This course will provide students with an understanding of the fundamentals of User Experience/User Interface design, including the design thinking process, interaction design, design principles, and prototyping. As part of this course, students will be immersed in user research, learning to identify and meet the needs of the users. Additionally, students will gain hands-on experience designing interfaces and prototyping through available digital design tool. After completing this course, students will be ready to create user-centric digital products with full understanding of User Experience/User Interface design

Psychology (PSY)

Courses

PSY 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PSY 201Z. Introduction to Psychology I. 4 Credits.

Introduction to the science and application of psychology. Emphasis will be placed on psychological concepts, theories, and principles related to: Research Methods, Behavioral Neuroscience, Consciousness, Sensation/Perception, Learning, Memory, Thinking and Intelligence, and related topics.

Equivalent to: PSY 201

Additional Information:

Science Area

PSY 202Z. Introduction to Psychology II. 4 Credits.

Introduction to the science and application of psychology. Emphasis will be placed on psychological concepts, theories, and principles related to: Personality, Social Psychology, Health and Well-Being, Motivation and Emotion, Disorders, Therapies, Lifespan Development, and related topics

Equivalent to: PSY 202

Additional Information:

Social Science Area

PSY 301. Scientific Thinking in Psychology. 4 Credits.

Fundamentals in the empirical study of human behavior, including hypothesis formation, experiment design, behavioral data basics, and critical evaluation of scientific claims. Sequence with PSY 302, PSY 303. Students may not register for PSY 301 after completing PSY 303.

Additional Information:

Science Area

PSY 302. Statistical Methods in Psychology. 4 Credits.

Probability and statistics applied in psychological research. Topics include descriptive statistics, hypothesis testing, correlation, regression, and design of experiments. With laboratory. Sequence with PSY 301, PSY 303.

Requisites: Prereq: one from STAT 243Z, MATH 241, MATH 246, MATH 251Z; PSY 301; WR 121Z or HC 101H; Pre- or coreq: PSY 201Z, PSY 202Z.

PSY 303. Research Methods in Psychology. 4 Credits.

Practical experience formulating a research question, conducting literature review, analyzing data, and communicating original research about human behavior. Sequence with PSY 301, PSY 302.

Requisites: Prereq: PSY 201Z; PSY 202Z; PSY 302; one from WR 122Z, WR 123, HC 221H.

PSY 304. Biopsychology. 4 Credits.

Relationships between brain and endocrine activity and behavior. Topics include sensation, perception, sexual behavior, drug effects, eating, drinking, sleeping, dreaming, and learning.

Requisites: Prereq: PSY 201Z.

PSY 305. Cognition. 4 Credits.

Major topics addressed in this class include perception, attention, memory, language, reasoning, and decision-making.

Requisites: Prereq: PSY 201Z.

PSY 306. Social Psychology. 4 Credits.

Processes underlying social perception and social interaction. Topics include aggression, the self-concept, stereotyping and prejudice, conformity, persuasion, attraction, and helping.

Requisites: Prereq: PSY 202Z.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

PSY 307. Personality. 4 Credits.

Theory and methods for studying human traits, including personality tests and measures. Current research in personality. Studies of age, gender, culture, and relation to emotion and motivation.

Requisites: Prereq: PSY 202Z.

PSY 308. Developmental Psychology. 4 Credits.

Survey of cognitive, social-emotional, and personality development in infancy, childhood, adolescence, adulthood.

Requisites: Prereq: PSY 202Z.

PSY 309. Psychopathology. 4 Credits.

Major descriptive and theoretical approaches to etiological, developmental, and social factors in emotion and personality disorders. Includes assessment, diagnosis, treatment, and special topics.

Requisites: Prereq: PSY 202Z.

PSY 348. Music and the Brain. 4 Credits.

Explores the neural correlates of our perception of tonality, harmony, melody, and rhythm and how these relate to neurobiology, brain damage, and cognitive neuroscience.

Additional Information:

Science Area

PSY 366. Culture and Mental Health. 4 Credits.

Role of culture in the definition and maintenance of mental health and the definition and treatment of mental illness.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PSY 380. Psychology of Gender. 4 Credits.

Critical analysis of evidence for sex differences, gender roles, and the effect of gender on traditional issues in psychology. Topics include parenthood, violence, and sexual orientation.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

PSY 383. Psychoactive Drugs. 4 Credits.

Physiological and behavioral effects of psychoactive drugs such as alcohol, opiates, barbiturates, and excitants. The psychology of use and overuse; therapies for correcting drug problems.

PSY 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PSY 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PSY 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PSY 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PSY 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

PSY 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PSY 408. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Repeatable 99 times

PSY 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PSY 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PSY 412. Applied Data Analysis. 4 Credits.

Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use. Honors only.

Requisites: Prereq: PSY 303.

PSY 420. Psychology and Law. 4 Credits.

Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental-health law.

Requisites: Prereq: PSY 303.

PSY 422. Forensic Psychology. 4 Credits.

This class focuses on the involvement of clinical psychologists with the legal system. The class will discuss the approaches, ethics, considerations, and measures utilized when clinical psychologists examine psycho-legal issues such as risk, custody, therapist-client confidentiality, and competency.

Requisites: Prereq: PSY 303.

PSY 433. Learning and Memory. 4 Credits.

Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information.

Requisites: Prereq: PSY 303; one course from PSY 304, PSY 305.

PSY 436. Human Performance. 4 Credits.

Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems.

Requisites: Prereq: PSY 303, PSY 305.

PSY 438. Perception. 4 Credits.

Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception.

Requisites: Prereq: PSY 303, PSY 304.

PSY 439. Psychology and Evolution. 4 Credits.

Evolutionary Psychology is the application of evolutionary theory to human cognition. Topics include: survival, mating, parenting, cooperation, aggression, status, and comparative cognition. We ground theory and criticism using empirical data from many levels of analysis.

Requisites: Prereq: PSY 304 or PSY 306.

PSY 445. Brain Mechanisms of Behavior. 4 Credits.

Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders.

Requisites: Prereq: PSY 303, PSY 304.

PSY 449. Cognitive Neuroscience. 4 Credits.

Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion).

Requisites: Prereq: PSY 303; one from PSY 304, PSY 305.

PSY 450. Hormones and Behavior. 4 Credits.

Relationships among the brain, endocrine systems, and behavior. Developmental effects of hormones on the brain, puberty, sexuality, aggression, stress.

Requisites: Prereq: PSY 303, PSY 304.

PSY 457. Group Dynamics. 4 Credits.

Topics in small-group dynamics, including decision-making, conflict, and changes over time in group structure and behavior.

Requisites: Prereq: PSY 303.

PSY 458. Decision-Making. 4 Credits.

Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior.

Requisites: Prereq: PSY 303.

PSY 459. Cultural Psychology. 4 Credits.

Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered.

Requisites: Prereq: PSY 303.

PSY 460. Stereotyping and Prejudice. 4 Credits.

This course examines contemporary issues in stereotyping, prejudice, and discrimination, both from the perceiver's and the target's perspective. We will cover the phenomena and processes associated with one's beliefs about members of social groups (stereotypes), attitudes and evaluative responses toward group members (prejudice), and behaviors toward members of a social group based on their group membership (discrimination).

Requisites: Prereq: PSY 306.

PSY 468. Motivation and Emotion. 4 Credits.

Adaptive human behavior; considers biological processes involved in emotions, how emotions interact with cognition, and social influences.

Requisites: Prereq: PSY 303.

PSY 472. Psychology of Trauma. 4 Credits.

Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.

Requisites: Prereq: PSY 303.

PSY 473. Intimate Relationships. 4 Credits.

Adult intimacy and love relationships. Clinical-counseling approaches: assessment, couple and family therapies, and evaluation. Models of relationship functioning and the empirical study of interpersonal relationships.

Requisites: Prereq: PSY 303.

PSY 475. Cognitive Development. 4 Credits.

Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.

Requisites: Prereq: PSY 303; one course from PSY 305, PSY 308.

PSY 478. Social Development. 4 Credits.

Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.

Requisites: Prereq: PSY 303; one course from PSY 306, PSY 307, PSY 308.

PSY 479. Infancy. 4 Credits.

Mechanisms and processes that underlie and promote rapid changes in physical, cognitive, and linguistic capabilities, from birth to 24 months. Covers innovative methodologies and cultural attitudes toward infants.

Requisites: Prereq: PSY 303, PSY 308.

PSY 480. Development and Psychopathology. 4 Credits.

Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.

Requisites: Prereq: PSY 303; one course from PSY 308, PSY 309.

PSY 490. Honors in Psychology. 1 Credit.

Reading and conference.

Repeatable 2 times for a maximum of 3 credits

PSY 491. Honors in Psychology. 1 Credit.

Reading and conference.

Repeatable 2 times for a maximum of 3 credits

PSY 492. Honors in Psychology. 1 Credit.

Reading and conference.

Repeatable 2 times for a maximum of 3 credits

PSY 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PSY 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PSY 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

PSY 512. Applied Data Analysis. 4 Credits.

Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use.

PSY 520. Psychology and Law. 4 Credits.

Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental-health law.

PSY 522. Forensic Psychology. 4 Credits.

This class focuses on the involvement of clinical psychologists with the legal system. The class will discuss the approaches, ethics, considerations, and measures utilized when clinical psychologists examine psycho-legal issues such as risk, custody, therapist-client confidentiality, and competency.

PSY 533. Learning and Memory. 4 Credits.

Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information.

PSY 536. Human Performance. 4 Credits.

Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems.

PSY 538. Perception. 4 Credits.

Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception.

PSY 539. Psychology and Evolution. 4 Credits.

Evolutionary Psychology is the application of evolutionary theory to human cognition. Topics include: survival, mating, parenting, cooperation, aggression, status, and comparative cognition. We ground theory and criticism using empirical data from many levels of analysis.

PSY 545. Brain Mechanisms of Behavior. 4 Credits.

Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders.

PSY 549. Cognitive Neuroscience. 4 Credits.

Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion).

PSY 550. Hormones and Behavior. 4 Credits.

Relationships among the brain, endocrine systems, and behavior. Developmental effects of hormones on the brain, puberty, sexuality, aggression, stress.

PSY 557. Group Dynamics. 4 Credits.

Topics in small-group dynamics, including decision-making, conflict, and changes over time in group structure and behavior.

PSY 558. Decision-Making. 4 Credits.

Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior.

PSY 559. Cultural Psychology. 4 Credits.

Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered.

PSY 560. Stereotyping and Prejudice. 4 Credits.

This course examines contemporary issues in stereotyping, prejudice, and discrimination, both from the perceiver's and the target's perspective. We will cover the phenomena and processes associated with one's beliefs about members of social groups (stereotypes), attitudes and evaluative responses toward group members (prejudice), and behaviors toward members of a social group based on their group membership (discrimination).

PSY 572. Psychology of Trauma. 4 Credits.

Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.

PSY 573. Intimate Relationships. 4 Credits.

Adult intimacy and love relationships. Clinical-counseling approaches: assessment, couple and family therapies, and evaluation. Models of relationship functioning and the empirical study of interpersonal relationships.

PSY 575. Cognitive Development. 4 Credits.

Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.

PSY 578. Social Development. 4 Credits.

Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.

PSY 579. Infancy. 4 Credits.

Mechanisms and processes that underlie and promote rapid changes in physical, cognitive, and linguistic capabilities, from birth to 24 months. Covers innovative methodologies and cultural attitudes toward infants.

PSY 580. Development and Psychopathology. 4 Credits.

Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.

PSY 601. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

PSY 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

PSY 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

PSY 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

PSY 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

PSY 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

PSY 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

PSY 610. Experimental Course: [Topic]. 1-21 Credits.

Experimental course - topic varies.

Repeatable 99 times

PSY 611. Data Analysis I. 4 Credits.

Introduction to probability, hypothesis testing, and analysis of variance with applications. Includes training in the statistical analysis of data by computer. With laboratory.

PSY 612. Data Analysis II. 4 Credits.

Multiple regression and advanced topics in analysis of variance. Includes training in the statistical analysis of data by computer. With laboratory.

Requisites: Prereq: PSY 611.

PSY 613. Data Analysis III. 4 Credits.

Multivariate techniques including MANOVA, factor analysis, principal components. Includes training in the statistical analysis of data by computer. With laboratory.

Requisites: Prereq: PSY 612.

PSY 615. Community Needs Assessments. 4 Credits.

Explores the formative steps in intervention design and implementation. Introduces key concepts and methods for needs assessments with agencies and individuals serving at-risk communities. Topics include building community partnership and using qualitative research methodology to empirically assess barriers to and facilitators of access to interventions.

PSY 616. Implementation with Community and Cultural Perspectives. 3 Credits.

This course explores essential tools for implementing effective (or evidence-based) programs with fidelity in community settings. Topics include community outreach, diversity science, partnership and co-creation, team science, and models of change.

PSY 618. Substance Use and Addiction. 3 Credits.

Exploration of brain mechanisms underlying motivated behaviors and dysfunctions that lead to addictive behaviors. Topics include neurobiological and psychological effects of addictive drugs, factors that contribute to addiction, societal impacts, the link between addiction and habits, and how this relates to behaviors like pathological gambling.

PSY 619. Intervention Science. 4 Credits.

Exploration of the development and evaluation of evidence-based treatments, the field of implementation science, and culturally competent intervention approaches. Students develop clinical intervention and case conceptualization skills while learning about infant, child, adolescent, adult, and couple focused evidence-based treatments for a variety of disorders.

PSY 621. Clinical Psychobiology. 3 Credits.

Research and theory from the neurosciences applied to clinical problems and biological therapies.

PSY 628. Methods of Program Evaluation. 4 Credits.

This course provides full-spectrum coverage of program evaluation. We will cover theory, model testing, experimental design and basic statistical theory and methods. Designed to provide students with tools and techniques they can apply to program development and evaluation within their home organizations.

PSY 630. Translational Neuroscience in Early Childhood. 3 Credits.

Introduction to key concepts and methods of translational neuroscience. Uses a multidisciplinary lens to examine environmental influences on early human development, from the prenatal period through early childhood. Reviews the evidence base for interventions that aim to mitigate risk factors in these critical developmental periods.

PSY 631. Translational Neuroscience in Adolescence. 3 Credits.

Examines neuroscience research on brain structure, function and neuroplasticity specific to adolescent development. Relates principles of adolescent brain development to evidence-based treatments. Topics include the effects of hormones on brain development, increased sensitivity to dopamine in reward seeking, and the neural basis of social cognition.

PSY 632. Translational Neuroscience in Adulthood. 3 Credits.

Examines neuroscience research on brain development and neuroplasticity in adulthood. Emphasizes bidirectional links between neurobiology and behavior and connections to evidence based psychosocial treatment common to aging adult populations. Topics include stress neurobiology, anxiety and depression, substance use, and cognitive function over the adult lifespan.

PSY 672. Trauma Informed Interventions. 3 Credits.

Seminar on the effects of adverse childhood experiences (ACES) and trauma on physical and mental health. Topics include stress-related psychopathology, culture- and trauma-informed clinical intervention, and socio-demographic and cultural factors related to adversity and stress.

PSY 690. Capstone Research. 2-9 Credits.

Faculty-supervised research credits for each quarter in which students conduct their capstone research project, which is individualized based on student interests, context and academic or career goals (minimum 6 terms; credits per term vary from 2-9 based on the term in the program; minimum 17 total credits). Project may be embedded in a community-based agency or organization. Small group advising allows for faculty-student advising on project enhanced by peer-to-peer advising/mentoring.

Repeatable 8 times for a maximum of 21 credits

PSY 704. Internship: [Topic]. 1-15 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

Religious Studies (REL)

Courses

REL 101. World Religions: Asian Traditions. 4 Credits.

Introduction to related religious traditions of Asia, including Hinduism, Buddhism, Daoism, Confucianism and Shinto. Readings in sacred texts and scholarly literature. Lecture, discussion.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

REL 102. World Religions: Near Eastern Traditions. 4 Credits.

Introduction to the Abrahamic religions of Judaism, Christianity, Islam and to related traditions such as the Zoroastrian, Manichaeism, Mandaean, Baha'i. Lecture, discussion.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

REL 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

REL 211. Early Judaism. 4 Credits.

In this course we will study the history, literature, and cultural and religious development of Judaism from the biblical period to the early rabbinic period (roughly until 500 CE). We will survey the foundational biblical heritage, with an emphasis on how Jews reinterpreted these traditions and lived among other cultures.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 222. Introduction to the Bible I. 4 Credits.

The focus of this course is on the content and organization of the Hebrew scriptures (Old Testament)--highlighting the themes, streams of tradition, literary genres, etc., in the development of its ideas, ideals, and religious expression. This course provides an introduction to the scholarly methods and research tools used in biblical studies, specifically, and in religious studies as a whole.

Additional Information:

Arts Letters Area

REL 223. Introduction to the Bible II. 4 Credits.

Examination of the written traditions of early Christianity with an emphasis on the New Testament.

Additional Information:

Arts Letters Area

REL 233. Introduction to Islam. 4 Credits.

Islamic religious tradition, beginnings to present. Pre-Islamic Arabia, Prophet Muhammed, pillars of Islam, ethics and piety, Sunni-Shiite divide, reform and renewal movements.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

REL 302. Chinese Religions. 4 Credits.

Prehistoric roots of Chinese religion, Confucius and his followers, philosophical Taoism, Han Confucianism, religious Taoism, Chinese Buddhism, Neo-Confucianism, religion in China today.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 303. Japanese Religions. 4 Credits.

Early Shinto and its developments, Japanese Buddhism, transformation of Taoism and Confucianism, medieval Shinto, religion in the Tokugawa period, Nationalistic Shinto, folk religion, new religions.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 304. Religions of India. 4 Credits.

An introduction to the major religious traditions of the Indian subcontinent: Hinduism and Buddhism, and more briefly Sikhism and Jainism.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 317. Jesus and the Gospels. 4 Credits.

This course focuses on the historical figure Jesus of Nazareth and the stories people have told about him in ancient literature and modern scholarship.

Additional Information:

Arts Letters Area

REL 321. History of Christianity I. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers the ancient period, from the Apostolic Fathers to the Islamic conquests (90–650).

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 322. History of Christianity II. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers medieval Western Christianity, from the Germanic invasions to the Reformation (400–1500).

Additional Information:

Social Science Area

REL 323. History of Christianity III. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers modern Western Christianity, from the Reformation to the present (1500 to the present).

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 324. History of Eastern Christianity I. 4 Credits.

Byzantine Christianity from the founding of the Christian Roman Empire to the Fall of Constantinople in the 15th century.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 325. History of Eastern Christianity II. 4 Credits.

The Eastern churches from the 15th century to the present.

Additional Information:

Social Science Area
Cultural Literacy: Global Perspectives

REL 335. Introduction to the Qur'an. 4 Credits.

An introduction to the nature of the Qur'an and the various ways it has been interpreted throughout history by both Muslims and non-Muslims.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

REL 353. Dark Self, East and West. 4 Credits.

Comparative examination of selfhood in Eastern and Western religious thought and cultural contexts. Focus on dark side or problematic dimensions of Buddhist, Christian, Daoist, Jewish, and other thought.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

REL 355. Mysticism. 4 Credits.

The experiential or mystical dimensions of the three major Abrahamic faiths. Exploration of the original writings of men and women from each spiritual tradition.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

REL 357. War, Terrorism, and Religion. 4 Credits.

Offers an examination of the theme of war, terrorism, and religion, focusing on cases of religiously motivated acts of violence in the contemporary era.

Additional Information:

Cultural Literacy: Global Perspectives

REL 359. Religion After Atheism. 4 Credits.

Atheist critiques of religion, analyses of secularism from multiple disciplinary perspectives, and responses to atheism and secularism by modernist Christian, Muslim, and Buddhist writers.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

REL 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times**REL 401. Research: [Topic]. 1-4 Credits.**

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times**REL 403. Thesis. 1-4 Credits.**

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times**REL 405. Reading and Conference: [Topic]. 1-4 Credits.**

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times**REL 407. Seminar: [Topic]. 1-4 Credits.**

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times**REL 408. Workshop: [Topic]. 1-12 Credits.**

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times**REL 409. Terminal Project. 1-12 Credits.**

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times**REL 410. Experimental Course: [Topic]. 1-4 Credits.**

Experimental course - topic varies.

Repeatable 99 times**REL 411. Making Sense of Religion. 4 Credits.**

History of the study of religion, from the late 19th century to the present, as an expression of society, agent of oppression, psychological experience, symbolic system, and Western concept. Junior standing required.

REL 414. Biblical Book: [Topic]. 4 Credits.

Close reading of one or more books of the Judeo-Christian Bible in literary, historical, and cultural contexts; history of interpretation; and critical scholarship.

Repeatable 2 times for a maximum of 12 credits when topic changes**REL 432. Islamic Mysticism: [Topic]. 4 Credits.**

Inner dimensions of Islamic piety and righteousness, from the Koranic and prophetic foundations to principal thinkers in the medieval Arabic and Persian Sufi traditions.

Repeatable 2 times for a maximum of 12 credits**REL 440. Readings in Buddhist Scriptures. 4 Credits.**

Readings in representative scriptures in English translation. Selection based on their import in development of Indian Buddhist philosophy and their impact on evolution of East Asian forms of Buddhism.

Additional Information:

Cultural Literacy: Global Perspectives

REL 444. Medieval Japanese Buddhism. 4 Credits.

Medieval Japanese Buddhism of the 12th and 13th centuries. Examination of religious thought and cultural history including Zen and Pure Land.

Additional Information:

Cultural Literacy: Global Perspectives

REL 507. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times**REL 508. Workshop: [Topic]. 1-12 Credits.**

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times**REL 510. Experimental Course: [Topic]. 1-4 Credits.**

Experimental course - topic varies.

Repeatable 99 times**REL 511. Making Sense of Religion. 4 Credits.**

History of the study of religion, from the late 19th century to the present, as an expression of society, agent of oppression, psychological experience, symbolic system, and Western concept.

REL 514. Biblical Book: [Topic]. 4 Credits.

Close reading of one or more books of the Judeo-Christian Bible in literary, historical, and cultural contexts; history of interpretation; and critical scholarship.

Repeatable 2 times for a maximum of 12 credits when topic changes

REL 532. Islamic Mysticism: [Topic]. 4 Credits.

Inner dimensions of Islamic piety and righteousness, from the Koranic and prophetic foundations to principal thinkers in the medieval Arabic and Persian Sufi traditions.

Repeatable 2 times for a maximum of 12 credits

Repeatable 99 times

SPSY 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

SPSY 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPSY 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

SPSY 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPSY 626. Final Supervised Field Experience. 1-15 Credits.

Limited to students in school psychology program for basic endorsement for an Oregon license.

Repeatable 99 times

SPSY 630. Introduction to Consultation. 3-4 Credits.

Provides students with basic knowledge and skills in the area of school-based consultation.

SPSY 631. Academic and Behavioral Interventions. 4 Credits.

The overall goal for this course is for students to demonstrate a solid understanding of the conceptual, theoretical, and empirical bases for school-based, multi-tiered systems of academic and behavior support.

SPSY 632. Advanced Consultation. 4 Credits.

Develops and refines competencies in school-based consultation, and provides opportunities for students to practice consultation skills.

SPSY 650. Developmental Psychopathology. 4 Credits.

Overview of developmental psychopathology, with emphasis on childhood, adolescence, and early adulthood. Covers phenomenology, etiology, development, classification systems, and prognosis of major psychological disorders.

SPSY 651. Cognitive-Affective Aspects of Behavior. 4-5 Credits.

Examination of cognitive and affective foundations of human behavior. Emphasis on reciprocal influences of cognition and emotion. Selected topics in attention, language, memory, thinking, reasoning. Offered alternate years.

SPSY 652. Biological Aspects of Behavior. 4-5 Credits.

Provides the appropriate background for students to meet biological psychology course work requirement for board licensure as a psychologist.

SPSY 661. Principles and Practices in School Psychology. 4 Credits.

Theory, role, and function of school psychology in its relation to learning and the school setting.

SPSY 662. Foundations of Clinical Supervision. 3 Credits.

Introduction to theory and practice of clinical supervision. Overview of supervision models, factors affecting the supervision relationship, supervision and evaluation techniques, legal and ethical considerations.

SPSY 663. Professional Ethics. 3 Credits.

Focuses on the study of current ethical standards of professional practice for school psychologists and behavior analysts.

SPSY 671. Behavioral Assessment. 4 Credits.

Principles, techniques, and conceptual and practical issues in behavioral assessment; applied aspects include data gathering and interpretation as well as report writing.

SPSY 672. Intellectual Assessment. 4 Credits.

Covers individual assessment of learning aptitude. Includes administering, scoring, and interpreting intelligence tests as well as report writing. Reviews theories of intelligence.

SPSY 673. Measurement and Assessment. 3 Credits.

Covers applied knowledge in educational measurement and assessment with an emphasis on use of educational measures for research purposes.

SPSY 674. Educational Assessment. 4 Credits.

Methods of educational assessment designed to develop and evaluate instructional interventions; topics include systematic observations, curriculum-based assessment, and teacher interviews.

SPSY 690. School Psychology Research Seminar: [Topic]. 1-4 Credits.

Students develop foundational knowledge and applied research skills through participation in a faculty-led research team. The focus of research activities will draw upon faculty expertise and current research.

Repeatable 17 times for a maximum of 72 credits

SPSY 691. Supervised College Teaching. 2 Credits.

Students develop school psychology teaching and clinical supervision competencies through a faculty-supervised college teaching experience.

Requisites: Prereq: SPSY 662 Foundations of Clinical Supervision is a prerequisite course for any supervised college teaching experience involving the provision of clinical supervision to others. Students must apply for supervised college teaching experiences following procedures outlined in the current SPSY Program Handbook.

Repeatable 3 times for a maximum of 8 credits

SPSY 692. Professional Competencies Portfolio. 1 Credit.

Students develop a professional competencies portfolio documenting the knowledge and skills needed for school psychologist licensure. The portfolio is the SPSY Master's Program capstone project, and reflects competencies acquired by the student across program coursework, field experiences, research teams, professional leadership and service activities.

SPSY 698. School-Based Practicum. 3 Credits.

Students complete a supervised practicum in which they deliver comprehensive school psychological services in PreK-12 school settings. Students develop the knowledge and skill competencies required to progress to internship.

Requisites: Prereq: SPED 528, SPED 540, SPSY 630, SPSY 661, SPSY 663, SPSY 671, SPSY 672, SPSY 674, SPSY 695.

Repeatable 2 times for a maximum of 9 credits

SPSY 699. Internship. 3 Credits.

Students complete a supervised internship, in which they deliver comprehensive school psychological services in PreK-12 schools and/or clinical settings. Students develop the knowledge and skill competencies required for professional licensure.

Requisites: Prereq: SPSY 698.

Repeatable 3 times for a maximum of 12 credits

SPSY 704. Internship: [Topic]. 1-15 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

SPSY 706. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SPSY 709. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Sociology (SOC)

Courses

SOC 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

SOC 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SOC 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SOC 204Z. Introduction to Sociology. 4 Credits.

Introduces the central concepts, theories, and methods that define the sociological approach to investigating the social forces that shape our lives. Topics may include social structure, culture, socialization, race, class, gender, sexuality, and inequality.

Equivalent to: SOC 204

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

SOC 207. Social Inequality. 4 Credits.

Overview of social inequality, cross-culturally and within the United States. Examines relationship of social inequality based on social class, race, and gender to social change, social institutions, and self-identity.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

SOC 280. Introduction to Criminology. 4 Credits.

This course is designed to give you a broad introduction to criminology as a discipline, including measurements and definitions of crime, the myriad societal personal factors that explain crime, and criminal justice system processes and responses. We'll also consider how criminology is woven into a range of careers in research, education, government, law, and non-profit organizations.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

SOC 301. American Society. 4 Credits.

Selected aspects of American culture and institutions and the ways in which they are changing.

Requisites: Prereq: SOC 204Z recommended.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

SOC 304. Community, Environment, and Society. 4 Credits.

Interrelationship of social and environmental factors in human communities, processes of community change, impact of environmental change on human communities.

Additional Information:

Social Science Area

SOC 310. Social Theory. 4 Credits.

Analysis of the major writers and ideas that have shaped contemporary sociology. Focus on recurrent concepts and issues that continue to challenge sociological inquiry.

SOC 311. Research Methods. 4 Credits.

The development of social research; the nature of scientific inquiry and basic methods and techniques; examination of representative sociological studies from the standpoint of methodology.

Requisites: Prereq: SOC 204Z or SOC 207.

SOC 312. Statistical Analysis in Sociology. 4 Credits.

Construction and interpretation of tables and graphs, descriptive statistics, measures of association and contingency relationships, basic ideas of probability, and elementary statistical inference applied to nonexperimental research.

SOC 313. Social Issues and Movements. 4 Credits.

Contemporary social issues viewed in relation to the social structure of American society. Social movements and ideologies related to these issues.

Additional Information:

Social Science Area

SOC 317. Sociology of the Mass Media. 4 Credits.

Analysis of media events: advertisements, news broadcasts, documentaries, popular music, and television. Perspectives include content analysis, semiotics, functionalist and structuralist paradigms, and power system analysis.

Additional Information:

Social Science Area

SOC 328. Self and Society. 4 Credits.

How the thought, feeling, and behavior of individuals influence and are influenced by the actual, imagined, or implied presence of others.

Additional Information:

Social Science Area

SOC 330. Sociology of the Family. 4 Credits.

Introduction to and historical perspective of the family as a social institution and small-group association.

Requisites: Prereq: SOC 204Z or SOC 207.

SOC 345. Race and Ethnicity. 4 Credits.

Examines the major racial and ethnic groups in the United States with special attention to social interactions and inequalities.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

SOC 346. Work and Occupations. 4 Credits.

Characteristics of work and occupational careers in modern societies; relationships of those to family, the economy, bureaucracy, technology, and alienation.

Additional Information:

Social Science Area

SOC 355. Sociology of Gender. 4 Credits.

Position of women in contemporary society; women and work, politics, families, the economy; intersection of gender, race, and class; women's movements.

Additional Information:

Social Science Area

Cultural Literacy: US: Difference, Inequality, Agency

SOC 370. Urban Sociology. 4 Credits.

Examines the growth of cities; urban inequalities, politics, and social movements; built environment, ecology, and sustainability of cities and identity; global cities and immigration.

SOC 380. Deviance, Social Control, and Crime. 4 Credits.

Introduces the sociological concept of deviance, its relationship to the creation and violation of rules, laws, and other forms of social order with special attention to crime and the criminal justice system.

Additional Information:

Social Science Area

SOC 385. Medical Sociology. 4 Credits.

This course is designed as an introduction to the broad field of medical sociology and the sociology of health and illness.

SOC 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SOC 401. Research: [Topic]. 1-21 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SOC 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

SOC 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

SOC 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

SOC 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SOC 407. Seminar: [Topic]. 1-5 Credits.

Offerings vary from year to year depending on student needs and faculty interests.

Requisites: Prereq: SOC 204Z or SOC 207.

Repeatable 99 times

SOC 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SOC 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

SOC 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SOC 412. Sociological Research Methods. 4 Credits.

Descriptive and inferential statistics, including multiple regression.

SOC 413. Sociological Research Methods. 4 Credits.

Advanced statistical techniques focusing on generalized linear models.

Requisites: Prereq: SOC 412.

SOC 416. Issues in Environmental Sociology: [Topic]. 4 Credits.

Analysis of selected topics in environmental sociology. Topics include environmental movement, impacts of technological change, environmental policy and the state, environmental values, attitudes, and behaviors.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 442. Issues in Urban Sociology: [Topic]. 4 Credits.

Determinants and consequences of urbanization under different conditions; the city as a social and ecological system.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 445. Sociology of Race and Ethnicity: [Topic]. 4 Credits.

Advanced analysis of selected topics in sociology of race/ethnicity. Topics vary. Examples include Asian Americans, Latinos, mixed race, racial oppression, residential segregation, and the post-civil rights era.

Requisites: Prereq: SOC 310, SOC 311.

Repeatable 2 times for a maximum of 12 credits

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

SOC 446. Issues in Sociology of Work: [Topic]. 4 Credits.

Selected topics in sociology of work: occupational structures and careers, industrial democracy; technological change and work reform, politics of work.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 447. Issues in Sociology of Organizations: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of organizations. Topics include industrial sociology, organizational change; organizational democracy; corporate deviance; bureaucracy, power, and society.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 451. Social Stratification. 4 Credits.

The interrelations among class, race, and sex. Historical origins and development of class and class systems including slavery.

Requisites: Prereq: SOC 310, SOC 311, SOC 312.

SOC 452. Issues of Migration: [Topic]. 4 Credits.

Sociological analysis of migration, including dynamics of race and ethnicity, social structure, and social policy. Examines assimilation, marginalization, multiculturalism, postcolonialism, and social cohesion. Offered alternate years.

Requisites: Prereq: SOC 310.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 455. Issues in Sociology of Gender: [Topic]. 4 Credits.

Advanced analysis of gender and social relations of power in contemporary society. Variable topics include Women and Health; Violence against Women.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

SOC 456. Feminist Theory. 4 Credits.

Examines major sociological theories that elucidate the position of women and gender as part of the configuration of social relations of power in contemporary societies.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

SOC 457. Sex and Society. 4 Credits.

Examines alternative sociological perspectives on sexual behavior, the social construction and regulation of sexuality, contemporary social and political issues pertaining to sexuality.

Requisites: Prereq: SOC 310.

SOC 458. Issues in Cultural Sociology: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of important themes core to cultural sociology, including production and consumption of culture, semiotics, community and networks, and popular culture.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 459. Issues in Science, Technology & Society: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of themes core to understanding science, technology and society, including the public understanding of science, science and social movements, and social inequalities in science.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 465. Political Sociology. 4 Credits.

Analysis of political theory and behavior, social bases of power and policy determination, institutional interrelationships, intellectuals and ideologies, political trends and change, political participation and membership.

SOC 467. Economic Sociology. 4 Credits.

Applies the sociological perspective to basic economic phenomena such as markets, exchange, prices, money and rationality.

Requisites: Prereq: SOC 310.

SOC 475. Marxist Sociological Theory. 4 Credits.

Basic concepts, theory, and social analysis in the works of Marx and Engels. Topics include dialectical and historical materialism, class, historical development, political economy, and imperialism.

SOC 484. Issues in Deviance, Control, and Crime: [Topic]. 4 Credits.

Topics vary. Examples are modern policing, juvenile delinquency, correction, emerging forms of social control.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

SOC 507. Seminar: [Topic]. 1-5 Credits.

Offerings vary from year to year depending on student needs and faculty interests.

Repeatable 99 times

SOC 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SOC 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SOC 512. Sociological Research Methods. 4 Credits.

Descriptive and inferential statistics, including multiple regression.

SOC 513. Sociological Research Methods. 4 Credits.

Advanced statistical techniques focusing on generalized linear models.

Requisites: Prereq: SOC 512.

SOC 516. Issues in Environmental Sociology: [Topic]. 4 Credits.

Analysis of selected topics in environmental sociology. Topics include environmental movement, impacts of technological change, environmental policy and the state, environmental values, attitudes, and behaviors.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 545. Sociology of Race and Ethnicity: [Topic]. 4 Credits.

Advanced analysis of selected topics in sociology of race/ethnicity. Topics vary. Examples include Asian Americans, Latinos, mixed race, racial oppression, residential segregation, and the post-civil rights era.

Repeatable 2 times for a maximum of 12 credits

SOC 547. Issues in Sociology of Organizations: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of organizations. Topics include industrial sociology, organizational change; organizational democracy; corporate deviance; bureaucracy, power, and society.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 551. Social Stratification. 4 Credits.

The interrelations among class, race, and sex. Historical origins and development of class and class systems including slavery.

SOC 552. Issues of Migration: [Topic]. 4 Credits.

Sociological analysis of migration, including dynamics of race and ethnicity, social structure, and social policy. Examines assimilation, marginalization, multiculturalism, postcolonialism, and social cohesion. Offered alternate years.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 555. Issues in Sociology of Gender: [Topic]. 4 Credits.

Advanced analysis of gender and social relations of power in contemporary society. Variable topics include Women and Health; Violence against Women.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 557. Sex and Society. 4 Credits.

Examines alternative sociological perspectives on sexual behavior, the social construction and regulation of sexuality, contemporary social and political issues pertaining to sexuality.

SOC 558. Issues in Cultural Sociology: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of important themes core to cultural sociology, including production and consumption of culture, semiotics, community and networks, and popular culture.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 559. Issues in Science, Technology & Society: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of themes core to understanding science, technology and society, including the public understanding of science, science and social movements, and social inequalities in science.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 565. Political Sociology. 4 Credits.

Analysis of political theory and behavior, social bases of power and policy determination, institutional interrelationships, intellectuals and ideologies, political trends and change, political participation and membership.

SOC 567. Economic Sociology. 4 Credits.

Applies the sociological perspective to basic economic phenomena such as markets, exchange, prices, money and rationality.

SOC 575. Marxist Sociological Theory. 4 Credits.

Basic concepts, theory, and social analysis in the works of Marx and Engels. Topics include dialectical and historical materialism, class, historical development, political economy, and imperialism.

SOC 584. Issues in Deviance, Control, and Crime: [Topic]. 4 Credits.

Topics vary. Examples are modern policing, juvenile delinquency, correction, emerging forms of social control.

Repeatable 2 times for a maximum of 12 credits when topic changes

SOC 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SOC 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

SOC 604. Internship: [Topic]. 1-6 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

SOC 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

SOC 606. Field Studies: [Topic]. 1-12 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

SOC 607. Seminar: [Topic]. 1-5 Credits.

Proseminar required for all incoming Sociology graduate students. Professional socialization and preparation for the discipline.

Repeatable 99 times

SOC 608. Workshop: [Topic]. 1-16 Credits.

A current topic is Master's Project.

Repeatable 99 times

SOC 609. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

SOC 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SOC 612. Overview of Sociological Methods. 5 Credits.

Examines the research process--framing research questions, qualitative and quantitative design, relationships between methods and theory, deductive and inductive investigation logic, research ethics, sampling procedures, explanatory power.

SOC 613. Advanced Sociological Methods: [Topic]. 5 Credits.

Major methodological topics such as comparative, demographic, experimental, field, historical, and survey methods. Other possible topics include time-series analysis.

Requisites: Prereq: SOC 612 or equivalent.

Repeatable 2 times for a maximum of 15 credits when topic changes

SOC 615. Advanced Sociological Theory: [Topic]. 5 Credits.

Major sociological theories such as modern functionalism, contemporary Marxism, phenomenology, postmodernism, feminist and organizational theory.

Repeatable 2 times for a maximum of 15 credits when topic changes

SOC 616. Environment and Resource Issues: [Topic]. 5 Credits.

Explores issues of environmental sociology and resource policy, including ecological crisis; environmental justice as it pertains to race, gender, class, and international inequality.

Repeatable 2 times for a maximum of 15 credits when topic changes

SOC 617. Sociological Theory I. 5 Credits.

Sociological theories of the 19th century (especially Marx, Weber, and Durkheim) and 20th century (e.g., modern functionalism, feminist, neo-Marxism, neo-Weberian, poststructuralist theories).

SOC 618. Sociological Theory II. 5 Credits.

Major themes and historical foundation of contemporary sociological theory.

Requisites: Prereq: SOC 617.

SOC 621. Teaching in the Social Sciences. 4 Credits.

Prepares graduate students to teach their own classes. Covers pedagogy and develops practical skills. Offered alternate years.

SOC 644. Race and Ethnicity Issues: [Topic]. 5 Credits.

Explores current research and theoretical debates, such as Chicano-Chicana and Latino-Latina studies, in the sociology of race and ethnicity.

Repeatable 2 times for a maximum of 15 credits when topic changes

SOC 656. Issues in Sociology of Gender: [Topic]. 5 Credits.

Examines sociological theories of gender, focusing on a particular substantive area such as health, work, family, or sexuality. Explores gender in relation to race, ethnicity, and class.

Repeatable 2 times for a maximum of 15 credits when topic changes

SOC 664. Political and Economic Sociology Issues: [Topic]. 5 Credits.

Examines the relationship between economic institutions and political processes. Sample topics include theories of modern capitalism, corporations and the state, development and underdevelopment, war and peace.

Repeatable 2 times for a maximum of 15 credits when topic changes

Spanish (SPAN)

Courses

SPAN 101. First-Year Spanish. 5 Credits.

Emphasis on the development of speaking, reading, and writing skills; introduction to Hispanic culture. Sequence. Conducted in Spanish.

SPAN 102. First-Year Spanish. 5 Credits.

Emphasis on the development of speaking, reading, and writing skills; introduction to Hispanic culture. Sequence. Conducted in Spanish.

Requisites: Prereq: SPAN 101.

SPAN 103. First-Year Spanish. 5 Credits.

Emphasis on the development of speaking, reading, and writing skills; introduction to Hispanic culture. Sequence. Conducted in Spanish.

Requisites: Prereq: SPAN 102.

SPAN 111. Intensive Beginning Spanish. 5 Credits.

Intensive study for experienced language learners; introduction to Hispanic culture. Prereq: evidence of placement. Sequence. Conducted in Spanish. Cannot be combined with SPAN 101, SPAN 102, SPAN 103 for more than 15 credits of first-year Spanish.

Requisites: Prereq: previous study in Spanish or competence in another Romance language.

SPAN 112. Intensive Beginning Spanish. 5 Credits.

Intensive study for experienced language learners; introduction to Hispanic culture. Prereq: evidence of placement. Sequence. Conducted in Spanish. Cannot be combined with SPAN 101, SPAN 102, SPAN 103 for more than 15 credits of first-year Spanish.

Requisites: Prereq: SPAN 111.

SPAN 150. Hispanic and Latinx Cultures. 4 Credits.

This course provides students with an overview of the cultures of the Hispanic/Latinx world (Spain, Latin America, US)

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

SPAN 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPAN 201. Intermediate Spanish I. 4 Credits.

Development of Spanish language proficiency beyond beginning level through the study of the cultural products, practices, and perspectives of the Spanish-speaking world. Topics include history, geography, demographics, foodways, social movements, art, politics, and other cultural phenomena.

Requisites: Prereq: SPAN 103 or SPAN 112 recommended.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

SPAN 202. Intermediate Spanish II. 4 Credits.

Development of Spanish language proficiency beyond beginning level through the study of the cultural products, practices, and perspectives of the Spanish-speaking world. Topics include history, geography, demographics, foodways, social movements, art, politics, and other cultural phenomena. Sequence with SPAN 201, SPAN 203.

Requisites: Prereq: SPAN 201 or equivalent.

Additional Information:

Arts Letters Area

Cultural Literacy: Global Perspectives

SPAN 203. Intermediate Spanish III. 4 Credits.

Development of Spanish language proficiency beyond beginning level through the study of the cultural products, practices, and perspectives of the Spanish-speaking world. Topics include history, geography, demographics, foodways, social movements, art, politics, and other cultural phenomena. Sequence with SPAN 201, SPAN 202.

Requisites: Prereq: SPAN 202.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

SPAN 218. Latino Heritage I. 5 Credits.

Designed for heritage learners—students who grew up with Spanish in their community and want to build communication skills in Spanish. Content focuses on personal experiences in U.S. Latinx communities. Cannot be combined with SPAN 201, SPAN 202, SPAN 203 for more than 15 credits of second-year Spanish. Sequence with SPAN 228.

Requisites: Prereq: Placement through Spanish heritage language placement survey.

Additional Information:

Arts Letters Area

Cultural Literacy: US: Difference, Inequality, Agency

SPAN 228. Latino Heritage II. 5 Credits.

Designed for heritage learners—students who grew up with Spanish in their community and want to continue developing communication skills in Spanish. Content focuses on personal experiences in U.S. Latinx communities. Cannot be combined with SPAN 201, SPAN 202, SPAN 203 for more than 15 credits of second-year Spanish. Sequence with SPAN 218.

Requisites: Prereq: SPAN 218 or placement by Spanish heritage language placement survey.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

SPAN 299. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPAN 301. Cultura y lengua: Identidades hispanas. 4 Credits.

Develops advanced language skills through analysis of major historical influences in the cultures of Spanish-speaking regions: Spain, Latin America, and the United States. Taught in Spanish.

Requisites: Prereq: SPAN 203 or SPAN 228.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

SPAN 303. Cultura y lengua: Expresiones artísticas. 4 Credits.

Develops advanced language skills through the study of cultural products (e.g., art, literature, film, music) in Spanish-speaking societies. Taught in Spanish.

Requisites: Prereq: SPAN 203 or SPAN 228.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

SPAN 305. Cultura y lengua Cambio social. 4 Credits.

Develops advanced language skills through the investigation of major currents of change in modern Spanish-speaking societies; gender issues, technology, revolution and counter-revolution. Taught in Spanish.

Requisites: Prereq: SPAN 203 or SPAN 228.

Additional Information:

Arts Letters Area

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

SPAN 307. Oral Skills. 2 Credits.

Practice in improving listening, comprehension, and oral skills in Spanish. Communicative activities in class in addition to language laboratory work.

Requisites: Prereq: SPAN 203 or SPAN 228.

Repeatable 1 time for a maximum of 4 credits

Additional Information:

BA Language Satisfying Course

SPAN 308. Culture and Language Bilingual Communities. 4 Credits.

Designed for heritage learners—students who grew up with Spanish in their community and want to continue developing communication skills in Spanish. Explores socio-linguistic dynamics of communities in which Spanish is in contact with another language. Open to all students. Taught in Spanish.

Requisites: Prereq: SPAN 203, SPAN 228, by SHL Placement Survey, or equivalent.

Additional Information:

Cultural Literacy: Global Perspectives

SPAN 311. Advanced Writing in Spanish. 4 Credits.

This requirement for the Spanish major provides additional language development for students early on in the major, emphasizing academic writing skills in Spanish.

Requisites: Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

Equivalent to: SPAN 312

Additional Information:

BA Language Satisfying Course

SPAN 312. Spanish in the Media. 4 Credits.

Designed for heritage learners. Examines the role of Spanish in various forms of media such as television, Internet, and literature. Students practice advanced writing skills necessary to participate in argumentative writing and close textual readings.

Requisites: Prereq: SPAN 308 or any two from SPAN 301, SPAN 303, SPAN 305; SPAN 308 is recommended.

Equivalent to: SPAN 311

Additional Information:

BA Language Satisfying Course

SPAN 320. Grammars of Spanish. 4 Credits.

This course introduces students to the central themes of the linguistic structure of Spanish. We will use Critical Language Awareness (CLA) to study and practice elements of both the privileged normative varieties and minoritized varieties of Spanish. We also reflect on the social meaning of the variations we use in our daily lives.

Requisites: Prereq: SPAN 203 or SPAN 228.

Additional Information:

BA Language Satisfying Course

SPAN 322. Introduction to Hispanic Linguistics. 4 Credits.

Linguistic description of the Spanish language, including phonetics and phonology, morphology, syntax, history, and social and geographical variation.

Requisites: Prereq: SPAN 308; one course from SPAN 301, SPAN 303, SPAN 305, SPAN 311, SPAN 312.

Additional Information:

BA Language Satisfying Course

SPAN 323. Languages in Contact. 4 Credits.

An overview of languages in contact in the Spanish-speaking world. Students will learn theories of languages in contact, and how these languages behave in contact in their linguistic, social, political, and literary contexts. The language of instruction of this course is Spanish. All written work is completed in Spanish.

Requisites: Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

Additional Information:

Cultural Literacy: Global Perspectives

SPAN 355. Creative Writing in Spanish. 4 Credits.

This course aims to expand the students' creative capabilities in Spanish through writing exercises in poetry and fiction. Students will develop their literary sensitivity as well as their critical judgment and interpretative skills. Writing creatively diversifies the students' experience with the Spanish language.

Requisites: Prereq: SPAN 311 or SPAN 312; one course from SPAN 341, SPAN 342, SPAN 343, SPAN 344, SPAN 350, SPAN 351, SPAN 353.

Additional Information:

Cultural Literacy: Global Perspectives

SPAN 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times**SPAN 403. Thesis. 3-6 Credits.**

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times**SPAN 405. Reading and Conference: [Topic]. 1-6 Credits.**

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times**SPAN 406. Practicum: [Topic]. 1-12 Credits.**

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times**SPAN 407. Seminar: [Topic]. 1-6 Credits.**

Recent topics include Latin American Film, Indigenismo, Caribbean Crossings, Latin American Dictator Novels, Postwar Spain, Testimonial Literature, Early Modern Identities.

Requisites: Prereq: two courses from SPAN 320, SPAN 324, SPAN 328, SPAN 339, SPAN 341, SPAN 342, SPAN 343, SPAN 344, SPAN 350, SPAN 351, SPAN 353.

Repeatable 99 times when topic changes**SPAN 408. Workshop: [Topic]. 1-12 Credits.**

Special on-campus activities in Spanish.

Repeatable 99 times**SPAN 409. Terminal Project. 1-12 Credits.**

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times**SPAN 410. Experimental Course: [Topic]. 1-4 Credits.**

Recent topics include Literature and Democratic Transition, Race in Modern Los Angeles, Social Roots of Creativity.

Repeatable 99 times**SPAN 420. Spanish Linguistics: [Topic]. 4 Credits.**

Variable topics in Spanish linguistics, including advanced grammar, history of the Spanish language, the language of Iberia, Spanish sociolinguistics.

Requisites: Prereq: Two from SPAN 320, SPAN 322, SPAN 324.

Repeatable 99 times when topic changes**Additional Information:**

SPAN 424. History of the Spanish Language. 4 Credits.

Linguistic changes and social-historical influences on the development of Spanish from its roots in Latin to the diversity of modern dialects. Offered alternate years.

Requisites: Prereq: Two from SPAN 320, SPAN 322, SPAN 324.

Additional Information:

BA Language Satisfying Course

SPAN 425. Literary Translation. 4 Credits.

Variable topics include con textos, first issues, and cultural translation-transculturation in practice.

Requisites: Prereq: SPAN 311 or SPAN 312; one course from SPAN 320, SPAN 322, SPAN 324, SPAN 341, SPAN 342, SPAN 343, SPAN 344.

SPAN 428. Spanish in the United States. 4 Credits.

The history and description of the linguistic characteristics of and narratives about the use of Spanish within the United States. Offered alternate years.

Requisites: Prereq: two from SPAN 320, SPAN 322, SPAN 324.

Additional Information:

BA Language Satisfying Course

SPAN 448. National Identities and Border Cultures in the Americas. 4 Credits.

Examines 19th and 21st century national formation and alternative forms of collective identity in the Americas through literary texts, historical documents and film. Offered alternate years.

Requisites: Prereq: SPAN 311 or SPAN 312; two from SPAN 320, SPAN 322, SPAN 324, SPAN 341, SPAN 342, SPAN 343, SPAN 344, SPAN 348.

Additional Information:

BA Language Satisfying Course

SPAN 475. Comparative Spanish Speaking World: [Topic]. 4 Credits.

Examines cultures from the Spanish-speaking world in contact. Topics address multiple historical periods and/ or geographies through literary and cultural texts, historical documents, and film.

Requisites: Prereq: two from SPAN 311, SPAN 312, SPAN 322, SPAN 323, SPAN 324, SPAN 334, SPAN 336, SPAN 338, SPAN 339, SPAN 341, SPAN 342, SPAN 343, SPAN 344, SPAN 348, SPAN 350, SPAN 351, SPAN 353, SPAN 355.

Repeatable 3 times for a maximum of 16 credits when topic changes**Additional Information:**

Cultural Literacy: Global Perspectives

SPAN 480. 19th-Century Spanish American Literature: [Topic]. 4 Credits.

Topics include issue of literary periods, authors, narrative and nation, genres, and indigenismo.

Requisites: Prereq: two from SPAN 341, SPAN 342, SPAN 343, SPAN 344.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

SPAN 490. 20th-Century Latin American Literature: [Topic]. 4 Credits.

Explores major literary trends, authors, and works. Recent topics are Avant-garde in the Mexican Revolution, Testimonial Literature, Latin American Theater.

Requisites: Prereq: SPAN 311 or SPAN 312; and two from SPAN 341, SPAN 342, SPAN 343, SPAN 344.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

BA Language Satisfying Course

Cultural Literacy: Global Perspectives

SPAN 507. Seminar: [Topic]. 1-6 Credits.

Recent topics include Golden Age Theater, Latin American Film, Medieval Iberian, Mexican Literature and Culture, 19th-Century Spanish Decadence, Postwar Spain, Testimonial Literature.

Repeatable 99 times when topic changes

SPAN 508. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPAN 510. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Literature and Democratic Transition, Race in Modern Los Angeles, Social Roots of Creativity.

Repeatable 99 times

SPAN 520. Spanish Linguistics: [Topic]. 4 Credits.

Variable topics in Spanish linguistics. Recent topics include Spanish Phonology, History of the Spanish Language.

Repeatable 99 times when topic changes

SPAN 524. History of the Spanish Language. 4 Credits.

Linguistic changes and social-historical influences on the development of Spanish from its roots in Latin to the diversity of modern dialects. Offered alternate years.

SPAN 525. Literary Translation. 4 Credits.

Variable topics include con textos, first issues, and cultural translation-transculturation in practice.

Requisites: Prereq: SPAN 520 recommended.

SPAN 548. National Identities and Border Cultures in the Americas. 4 Credits.

Examines 19th and 21st century national formation and alternative forms of collective identity in the Americas through literary texts, historical documents and film. Offered alternate years.

SPAN 575. Comparative Spanish Speaking World: [Topic]. 4 Credits.

Examines cultures from the Spanish-speaking world in contact. Topics address multiple historical periods and/ or geographies through literary and cultural texts, historical documents, and film.

Repeatable 3 times for a maximum of 16 credits when topic changes

SPAN 580. 19th-Century Spanish American Literature: [Topic]. 4 Credits.

Topics include issue of literary periods, authors, narrative and nation, genres, and indigenismo.

Repeatable 2 times for a maximum of 12 credits when topic changes

SPAN 590. 20th-Century Latin American Literature: [Topic]. 4 Credits.

Explores major literary trends, authors, and works. Recent topics are Avant-garde in the Mexican Revolution, Latin American Theater.

Repeatable 2 times for a maximum of 12 credits when topic changes

SPAN 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SPAN 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

SPAN 606. Practicum: [Topic]. 1-4 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SPAN 607. Seminar: [Topic]. 1-6 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

SPAN 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

SPAN 690. Advanced 20th-Century Latin American Literature: [Topic]. 4 Credits.

Selected topics from literary periods, authors, genres, and aesthetic trends.

Repeatable 2 times for a maximum of 12 credits when topic changes

Special Education (SPED)

Courses

SPED 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPED 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPED 401. Research: [Topic]. 1-12 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SPED 405. Reading and Conference: [Topic]. 1-21 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

SPED 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SPED 407. Seminar: [Topic]. 1-5 Credits.

Topics include Collaborative Team, Introduction to Talented and Gifted, Introduction to Developmental Disabilities.

Repeatable 99 times

SPED 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPED 409. Terminal Project. 1-12 Credits.

Recent topics include Special Education, Talented and Gifted.

Repeatable 99 times

SPED 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPED 411. Foundations of Disability I. 3 Credits.

Categorical and cross-categorical survey of information about exceptional children and youths. Topics include history, etiology, identification, classification, legislation, alternate program delivery systems.

SPED 415. Diversity and Special Education. 3 Credits.

Provides an overview of issues pertaining to diversity in special education. Topics include race, ethnicity, culture, and disability in a sociopolitical and historical context.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

SPED 418. Disrupting the School to Prison Pipeline. 3 Credits.

Grounded in critical race theory and relying on research across different aspects of schooling and human development, students in this course will engage in rich discussions around practices that empower educators to disrupt the school-to-prison pipeline and bolster protective factors for youth, families, and communities.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

SPED 420. Applied Experience in Special Education. 1-6 Credits.

This course is designed to provide practical experiences for students enrolled in the special education minor. Students engage with individuals with disabilities in early childhood settings, general or special education classrooms, or through community organizations.

Repeatable 5 times for a maximum of 6 credits

SPED 422. Special Education Mathematics Instruction. 4 Credits.

Systematic instruction of mathematics skills for students with disabilities: assessment, planning, curriculum modification, diagnosis and remediation of persistent error patterns, evaluation.

SPED 426. Behavior and Classroom Management. 4 Credits.

Provides behavior management procedures for a variety of educational environments. Emphasizes functional assessment-based behavior support planning, classroom management, and principles of applied behavior analysis.

SPED 428. Special Education Law. 3 Credits.

This course provides students with knowledge of standards and ethics for professional practice, historical and current case law and legislation, and application of legal principles related to special education services in school settings.

SPED 432. Introduction to Behavioral Disorders. 3 Credits.

Introduces the characteristics and education of children and youth who have emotional and behavioral disorders.

Requisites: Prereq: SPED 411.

SPED 436. Advanced Behavior and Classroom Management. 3 Credits.

Emphasizes functional assessment-based behavior support planning, individual education plans (IEPs), and effective behavior support systems for a variety of educational environments.

Requisites: Prereq: SPED 426.

SPED 440. Early Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for preschool- to early elementary-aged students with disabilities. Sequence with SPED 441, SPED 442, SPED 443.

SPED 441. Intermediate Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for late elementary- to middle school-aged students with disabilities. Sequence with SPED 440, SPED 442, SPED 443.

Requisites: Prereq: SPED 440.

SPED 442. Adolescent Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for middle school- and high school-aged students with disabilities. Sequence with SPED 440, SPED 441, SPED 443.

Requisites: Prereq: SPED 441.

SPED 443. Supporting Students with Low-Incidence Disability. 4 Credits.

Provides skills on how to plan, coordinate, deliver, and evaluate evidence-based instruction for students with low-incidence disabilities. Sequence with SPED 440, SPED 441, SPED 442.

Requisites: Prereq: SPED 442.

SPED 470. Principles of Applied Behavior Analysis. 5 Credits.

The purpose of this course is to provide students with opportunities to learn and master basic behavior principles as a foundation to subsequent advanced courses. Students will master and build fluency with the basic principles of applied behavior analysis.

SPED 471. Applied Behavior Analysis Assessment. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to conduct functional behavior assessments including experimental functional analyses to determine the maintaining reinforcers for behavior and to plan for behavior change interventions. Students may enroll in either SPSY 671 or SPED 471/SPED 571, but cannot take both for credit.

SPED 472. Behavior Change Group Settings. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to develop, implement, and evaluate programs of behavior change in educational settings with a focus on positive behavior interventions and supports.

Requisites: Prereq: SPED 470.

SPED 473. Behavior Change Procedures 1. 3 Credits.

The purpose of this course is to provide students with an overview of applied behavior analysis based behavior change systems and procedures that will include designing and implementing interventions based on fundamental elements of behavior change.

Requisites: Prereq: SPED 470, SPED 471.

SPED 488. Professional Practices: [Topic]. 1-3 Credits.

Helps students critically assess their fieldwork and integrate fieldwork and course work in the wider context of the school experience.

Requisites: Coreq: SPED 406 or SPED 409.

Repeatable 2 times

SPED 503. Thesis. 1-9 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

SPED 507. Seminar: [Topic]. 1-5 Credits.

Topics include Collaborative Team, Introduction to Talented and Gifted, Introduction to Developmental Disabilities.

Repeatable 99 times

SPED 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPED 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPED 511. Foundations of Disability I. 3 Credits.

Categorical and cross-categorical survey of information about exceptional children and youths. Topics include history, etiology, identification, classification, legislation, alternate program delivery systems.

SPED 515. Diversity and Special Education. 3 Credits.

Provides an overview of issues pertaining to diversity in special education. Topics include race, ethnicity, culture, and disability in a sociopolitical and historical context.

SPED 518. Disrupting the School to Prison Pipeline. 3 Credits.

Grounded in critical race theory and relying on research across different aspects of schooling and human development, students in this course will engage in rich discussions around practices that empower educators to disrupt the school-to-prison pipeline and bolster protective factors for youth, families, and communities.

SPED 522. Special Education Mathematics Instruction. 4 Credits.

Systematic instruction of mathematics skills for students with disabilities: assessment, planning, curriculum modification, diagnosis and remediation of persistent error patterns, evaluation.

SPED 526. Behavior and Classroom Management. 4 Credits.

Provides behavior management procedures for a variety of educational environments. Emphasizes functional assessment-based behavior support planning, classroom management, and principles of applied behavior analysis.

SPED 528. Special Education Law. 3 Credits.

This course provides students with knowledge of standards and ethics for professional practice, historical and current case law and legislation, and application of legal principles related to special education services in school settings.

SPED 532. Introduction to Behavioral Disorders. 3 Credits.

Introduces the characteristics and education of children and youth who have emotional and behavioral disorders.

Requisites: Prereq: SPED 511.

SPED 536. Advanced Behavior and Classroom Management. 3 Credits.

Emphasizes functional assessment-based behavior support planning, individual education plans (IEPs), and effective behavior support systems for a variety of educational environments.

Requisites: Prereq: SPED 526.

SPED 540. Early Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for preschool- to early elementary-aged students with disabilities. Sequence with SPED 541, SPED 542, SPED 543.

The purpose of this course is to provide students with opportunities to learn and master basic behavior principles as a foundation to subsequent advanced courses. Students will master and build fluency with the basic principles of applied behavior analysis.

SPED 571. Applied Behavior Analysis Assessment. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to conduct functional behavior assessments including experimental functional analyses to determine the maintaining reinforcers for behavior and to plan for behavior change interventions. Students may enroll in either SPSY 671 or SPED 471/SPED 571, but cannot take both for credit.

SPED 572. Behavior Change Group Settings. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to develop, implement, and evaluate programs of behavior change in educational settings with a focus on positive behavior interventions and supports.

Requisites: Prereq: SPED 570.

SPED 573. Behavior Change Procedures 1. 3 Credits.

The purpose of this course is to provide students with an overview of applied behavior analysis based behavior change systems and procedures that will include designing and implementing interventions based on fundamental elements of behavior change.

Requisites: Prereq: SPED 570, SPED 571.

SPED 588. Professional Practices: [Topic]. 1-3 Credits.

Helps students critically assess their fieldwork and integrate fieldwork and course work in the wider context of the school experience.

Requisites: Coreq: SPED 606 or SPED 609.

Repeatable 2 times

SPED 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SPED 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

SPED 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

SPED 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SPED 607. Seminar: [Topic]. 1-5 Credits.

Recent topics include Advanced Applied Behavioral Analysis, Doctoral Orientation, Program Evaluation, Project Aim.

Repeatable 99 times

SPED 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPED 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

SPED 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPED 611. Early Intervention Practicum I. 3 Credits.

Supervised field experience activities provide the experiential counterpart to instructive coursework and are a special emphasis of the Early Intervention/Early Childhood Special Education training program.

SPED 612. Early Intervention Practicum II. 3 Credits.

Supervised field experience activities provide the experiential counterpart to instructive coursework and are a special emphasis of the Early Intervention/Early Childhood Special Education (EI/ECSE) training program.

Requisites: Prereq: SPED 611.

SPED 620. Assessment in Special Education. 3 Credits.

This course covers current concepts and issues related to assessment in special education and includes instruction and practice in administering standardized and curriculum-based assessments. Current issues in assessment such as assessing students from diverse backgrounds and response to intervention (RTI) will be covered.

SPED 622. History of Special Education and Disability. 3 Credits.

Historical context for contemporary issues in understanding and supporting the lives of people with disabilities and their families.

SPED 625. Final Supervised Field Experience. 1-15 Credits.

Repeatable.

Repeatable 99 times

SPED 626. Grant Writing. 1-3 Credits.

Provides structure and guidance in developing a grant proposal.

SPED 633. Transition Planning and Instruction I. 3 Credits.

Focuses on preparing youth for postsecondary education and training. Development of skills for using assessment-planning and content-instruction strategies to assist students with disabilities. Sequence with SPED 634.

SPED 634. Transition Planning and Instruction II. 3 Credits.

Focuses on strategies for improving employment and independent-living skills; using individualized assessment and planning strategies, curriculum and instructional strategies, and program delivery to assist students with disabilities. Sequence with SPED 633.

SPED 653. Student Teaching I K-12. 3 Credits.

This course provides teacher candidates opportunities to apply evidence-based practices in Special Education and reading instruction. This course meets the requirements outlined by Teacher Standards and Practices Commission for the Reading Intervention endorsement. SPED 588 is taken concurrently.

SPED 654. Student Teaching II K-12. 4 Credits.

This course provides teacher candidates opportunities to apply knowledge of evidence-based practices in Special Education while teaching children/adults with disabilities. Teacher candidates are expected to independently generalize and apply foundational skills practiced during Student Teaching I and incorporate new skills. SPED 588 is taken concurrently.

Requisites: Prereq: SPED 653.

SPED 655. Student Teaching III K-12. 3-9 Credits.

Provides practical experience in teaching students with disabilities in a public-school setting under the direction of cooperating teachers and university supervisors.

Repeatable 7 times for a maximum of 24 credits

SPED 656. Student Teaching K-12 Endorsement. 3 Credits.

This course provides field-based practice for licensed teachers adding a Special Education endorsement, giving them opportunities to apply knowledge of evidence-based practices in Special Education while teaching children/adults with disabilities. Students take SPED 588 concurrently.

SPED 657. Student Teaching Reading Endorsement. 3 Credits.

This course provides field-based practice in reading instruction for licensed teachers adding a Reading Intervention endorsement. It provides opportunities to apply evidence-based practices in reading to design, deliver, and improve reading instruction for all students, including English learners and those with reading difficulties and dyslexia.

SPED 660. Design of Instruction. 4 Credits.

Design, development, and evaluation of instructional materials for children with disabilities. Emphasis on analysis and construction of instructional sequences for various learning tasks.

SPED 670. Philosophy of Applied Behavior Analysis. 3 Credits.

Introduces students to the philosophical foundations of radical behaviorism, classic and contemporary readings in behavior analysis. Students will be prepared to understand theoretical approaches to understanding behavior, and to interpret behavior in terms of the concepts and principles of behavior analysis.

SPED 671. Experimental Research in Applied Behavior Analysis. 3 Credits.

This online graduate level course introduces students to the experimental analysis of behavior. This course will cover basic research with humans and non-human animals that explores behavior analytic principles and mechanisms of learning and behavior.

SPED 672. Experimental Research Behavior Analysis Lab. 2 Credits.

This online graduate level course provides students who have taken the experimental analysis of behavior course opportunities to apply knowledge and interpret the results of simulated experiments. This course will model and then have students engage in their own simulated experiments.

Requisites: Prereq: SPED 570, SPED 670, SPED 671.

SPED 676. Ethics in Applied Behavior Analysis. 5 Credits.

This course focuses on the Behavioral Analyst Certification Board Professional and Ethical Compliance Code. It provides a basic knowledge of the Ethical Code as well as different problem-solving frameworks to evaluate difficult situations that may arise during their practice.

Requisites: Prereq: SPED 573.

SPED 677. Single Case Research Design. 5 Credits.

This course focuses on basic and complex single-case experimental design strategies and general procedures, as well as on issues related to clinician-researchers conducting and analyzing single-case research in applied settings.

SPED 678. Behavior Change Procedures II. 3 Credits.

This course provides students with an overview of applied behavior analysis based behavior change systems and procedures that will include designing and implementing interventions based on fundamental elements of behavior change. Emphasis is on decreasing, eliminating, and replacing behavior that is challenging to the context.

Requisites: Prereq: SPED 570, SPED 571, SPED 572, SPED 573.

SPED 679. Personnel Management. 3 Credits.

This course focuses on the Behavioral Analyst Certification Board (BACB) Professional and Ethical Compliance Code related to personnel management. Emphasis is consultation strategies that board certified behavior analysts use to liaison with medical professionals, parents and other family members, and trainees in applied behavior analysis.

SPED 680. Foundations in Early Childhood and Early Intervention. 3 Credits.

Conceptual underpinnings and practical application of an approach to early intervention that links assessment, intervention, and evaluation.

SPED 681. Early Intervention for Diverse Families. 3 Credits.

Covers procedures for family assessment, intervention, and evaluation. Addresses adult communication and management strategies.

SPED 682. Assessment and Evaluation. 3 Credits.

Presents assessment and evaluation materials used in early intervention programs and provides methods for using these materials.

SPED 683. Curriculum in Early Childhood and Early Intervention. 3 Credits.

Presents curricular materials covering development from birth to six years. Discusses procedures for use and modification.

SPED 686. Autism in Early Intervention. 2-3 Credits.

Information is given regarding the etiology of autism, diagnostic/evaluation procedures and current evidence-based strategies for supporting young children with autism spectrum disorder and their families.

SPED 687. Early Intervention Methods I. 3 Credits.

Provide a foundation for understanding the components of a linked system of intervention in Early Intervention/Early Childhood Special Education, where practitioners conduct assessments, plan and implement intervention, assess their intervention, and monitor student progress. Sequence with SPED 688, SPED 689.

SPED 688. Early Intervention Methods II. 3 Credits.

The Early Intervention/Early Childhood Special Education Individualized Family Service Plan, Individualized Education Program Methods II course is the second of three Methods courses to be taken by EI/ECSE students across the year. Sequence with SPED 687, SPED 689.

Requisites: Prereq: SPED 687.

SPED 689. Early Intervention Methods III. 3 Credits.

Early Intervention/Early Childhood Special Education (EI/ECSE) Methods III is the final course in the EI/ECSE Methods series. It is designed to address specific practices that students will use as professionals in EI/ECSE settings. Sequence with SPED 687, SPED 688.

Requisites: Prereq: SPED 688.

SPED 691. Professional Practices in Early Intervention I. 1 Credit.

During this seminar students will focus on the structure and process of teaming within Early Intervention/Early Childhood Special Education systems. Additionally, students will participate in team meetings alongside their peers to reflect on and discuss issues related to their practicum experiences.

Requisites: Prereq: Coreq: SPED 611.

SPED 692. Professional Practices in Early Intervention II. 1 Credit.

During this seminar students will focus on Early Intervention/Early Childhood Special Education practices related to transition, intervention planning, implementation of interventions, self-assessment and reflection of practices, and monitoring child progress.

Requisites: Prereq: SPED 691; coreq: SPED 612.

SPED 693. Professional Practices in Early Intervention III. 1 Credit.

During this seminar students will focus on Early Intervention/Early Childhood Special Education practices related to student teaching. The purpose of Professional Practices III is to support students in having a positive and productive student teaching experience.

Requisites: Prereq: SPED 692; coreq: SPED 625.

SPED 706. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SPED 707. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

SPED 708. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPED 709. Terminal Project. 1-16 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Sports Business (SBUS)

Courses

SBUS 199. Special Studies: [Topic]. 1-4 Credits.

Recent topics include Sports, Business, and Society.

Repeatable 3 times for a maximum of 16 credits

SBUS 250. Sports Business and Society. 4 Credits.

This course provides an interdisciplinary treatment of the intersection of sports business and society. It reviews the broader sociology of sport and the critical role sport has played on issues of gender and race both domestically and globally.

Requisites: Prereq: BA 101Z.

Equivalent to: SBUS 250N

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

SBUS 250N. Sports Business and Society. 4 Credits.

This course provides an interdisciplinary treatment of the intersection of sports business and society. It reviews the broader sociology of sport and the critical role sport has played on issues of gender and race both domestically and globally.

Requisites: Prereq: BA 101Z.

Equivalent to: SBUS 250

Additional Information:

Social Science Area

Cultural Literacy: Global Perspectives

SBUS 255. The Business of the Olympic Games. 4 Credits.

An introduction to the contemporary global business model of the Olympic Games including finance economic impact, sales, sponsorship, media technology, government relations, sustainability regional impact, socio-political context, diversity inclusion.

SBUS 401. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated.

Often pursued in relation to a dissertation or thesis.

Repeatable 3 times for a maximum of 16 credits

SBUS 405. Special Problems: [Topic]. 4 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 3 times for a maximum of 16 credits

SBUS 406. Practicum: [Topic]. 1-4 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 3 times for a maximum of 16 credits

SBUS 407. Seminar: [Topic]. 4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 3 times for a maximum of 16 credits

SBUS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

SBUS 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 3 times for a maximum of 16 credits

SBUS 450. Sports Marketing. 4 Credits.

Essentials of effective sports marketing. Includes research, segmentation, product development, pricing, licensing, and communication channels such as advertising, sales promotion, and publicity.

Requisites: Prereq: MKTG 311.

SBUS 452. Sports Sponsorship. 4 Credits.

Detailed consideration of the relationship between sports and corporate sponsorship programs. Focuses on alignment marketing, sponsor value, and sponsorship evaluation.

Requisites: Prereq: MKTG 311 or MKTG 311H.

SBUS 453. Law and Sports Business. 4 Credits.

Core legal principles across the sports business spectrum to improve risk and strategic management capabilities, competitive advantage, and critical negotiations.

Requisites: Prereq: MKTG 311 or MKTG 311H.

SBUS 455. Financing Sports Business. 4 Credits.

Revenue sources for sports organizations. Includes conventional sources (e.g., tax support, bonds, ticket, media, concession sales) and innovations (e.g., initial public offerings, seat licenses, naming rights).

Requisites: Prereq: MKTG 311 or MKTG 311H.

SBUS 456. Sports Brand Management. 4 Credits.

An integrative course that supports skills development for success in managing sports-related businesses and brands. It utilizes critical thinking, creative imagining and professional writing in developing capabilities used in businesses aligned with or in sports.

Requisites: Prereq: BA 101Z.

SBUS 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 3 times for a maximum of 16 credits

SBUS 601. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 3 times for a maximum of 16 credits

SBUS 605. Reading and Conference: [Topic]. 1-4 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 3 times for a maximum of 16 credits

SBUS 606. Practicum: [Topic]. 1-9 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 3 times for a maximum of 16 credits

SBUS 607. Seminar: [Topic]. 1-4 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 5 times for a maximum of 24 credits

SBUS 608. Workshop: [Topic]. 1-4 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 3 times for a maximum of 16 credits

SBUS 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

SBUS 610. Experimental Course: [Topic]. 3 Credits.

A recent topic is Sports Product Branding, Product Line Management.

Repeatable 99 times

SBUS 645. Sports Product. 3 Credits.

Examines the companies and organizations of the international sports product industry: manufacturing innovation, company management, branding, retail and wholesale.

SBUS 650. Marketing Sports Properties. 3 Credits.

Examines essentials of effective sports marketing. Includes product or property development, legal aspects, segmentation, pricing, and communication channels (e.g., broadcast media).

Requisites: Prereq: completion of first-year M.B.A. core.

SBUS 652. Sports Sponsorship Alliances. 3 Credits.

Detailed consideration of the relation between sports, law, and corporate sponsorship programs. Focuses on alignment marketing issues, strategic communication through sponsorship, sponsor value, and sponsorship valuation.

Requisites: Prereq: completion of first-year MBA core.

SBUS 653. Legal Aspects of Sports Business. 3 Credits.

Examines social responsibility and legal concepts in sports management including constitutional regulatory powers, individual participation rights, drug testing, antitrust, labor rights, intellectual property rights, sponsorships, product and event liability.

SBUS 655. Economic Aspects of Sports. 3 Credits.

Comprehensive coverage of traditional and innovative revenue methods available to sports organizations from public and private sources. Detailed consideration of venue-based income sources (e.g., premium seating, permanent seat licenses).

Requisites: Prereq: completion of first-year MBA core.

Sports Product Design (SPD)

Courses

SPD 410. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 10 times

SPD 410L. Experimental Course: [Topic]. 3 Credits.

Experimental course - topic varies.

Repeatable 10 times

SPD 415. Soft Goods Technologies. 4 Credits.

An intensive, hands-on exploration of the technologies required to innovate soft good products in the sports product design industry.

SPD 425. Digital Creation Technologies. 4 Credits.

A fundamental course to learn the technologies used to define digital blueprints of sports products.

SPD 503. Thesis. 1-6 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

SPD 510. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 10 times

SPD 510L. Experimental Course: [Topic]. 3 Credits.

Experimental course - topic varies.

Repeatable 10 times

SPD 515. Soft Goods Technologies. 4 Credits.

An intensive, hands-on exploration of the technologies required to innovate soft good products in the sports product design industry.

SPD 525. Digital Creation Technologies. 4 Credits.

A fundamental course to learn the technologies used to define digital blueprints of sports products.

SPD 601. Research: [Topic]. 1-6 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SPD 604. Internship: [Topic]. 1-6 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 99 times

SPD 605. Special Problems: [Topic]. 1-12 Credits.

Specialized inquiry into a particular topic by a student and discussed with a faculty member.

Repeatable 99 times

SPD 606. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SPD 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPD 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SPD 645. Sports Product Design and Business. 4 Credits.

SPD 645 focuses on the fundamental business theories used to create, market, and sell sports products.

SPD 650. Sports Product Materials and Manufacturing. 4 Credits.

Explores the materials science, manufacturing, and sustainability theories applied in sports product design.

Requisites: Prereq: SPD 684.

SPD 684. Research Methodology and Innovation Process Studio. 6 Credits.

Focuses on the design theories and methodologies used to design innovative sports products.

SPD 685. Sports Product Design Studio I. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports soft goods. Theories of human thermoregulation, hydroprotection, support, aerodynamics, wearable technology, and kinematics.

Requisites: Prereq: SPD 684.

SPD 686. Sports Product Design Studio II. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports footwear. Mechanical theories of cushioning, stability, support, traction, and slipping-sliding.

Requisites: Prereq: SPD 650, SPD 685.

SPD 687. Sports Product Design Studio III. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports hard goods. Performance theories are considered to generate creative solutions.

Requisites: Prereq: SPD 650, SPD 686.

SPD 688. Innovative Project Strategy Development Studio. 9 Credits.

First of a two-term capstone studio that examines the alignment of research, science, materials, and business theories to create an innovative sports product design opportunity.

Requisites: Prereq: SPD 650, SPD 687.

SPD 689. Collaborative Creation and Launch Studio. 9 Credits.

Second of a two-term capstone studio that critically examines the alignment of design, materials, science, research, and business theories to create an innovative sports product design opportunity.

Requisites: Prereq: SPD 688.

Sports Product Management (SPM)

Courses

SPM 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SPM 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SPM 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

SPM 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

SPM 609. Capstone. 1-16 Credits.

A culminating academic project that demonstrates a student's mastery of their field of study.

Repeatable 99 times

SPM 610. Experimental Course: [Topic]. 1-6 Credits.

Experimental course - topic varies.

Repeatable 99 times when topic changes

SPM 624. Sports Product Branding. 3 Credits.

Create profitable brand strategies by focusing on how to plan and evaluate brand strategies that create value in the long run.

SPM 627. Sports Product Management and Merchandising. 3 Credits.

Core principles of product creation and merchandising from concept and ideation to delivery of product to retail and consumer. Translate athlete and consumer insights into solutions.

SPM 631M. Human Performance and Sports Products. 3 Credits.

Exploration of sciences of human performance: physiology and kinesiology, which inform the Sports Product Industry at the level of product development, product design and marketing. Multilisted with HPHY 631M.

Equivalent to: HPHY 631, HPHY 631M

SPM 637. Sports Product Development. 3 Credits.

Principles of product development process including new materials research, costing, product prototyping, testing, commercialization, and manufacturing. Identify issues related to product planning and strategy execution.

SPM 640. Sports Marketing Strategy. 3 Credits.

Develop the skills to think like a seasoned marketer. Learn factors to consider in the creation and execution of a strategic marketing plan.

SPM 641. Product Creation Lab I. 2 Credits.

Students will be introduced to the SPM LAB and start to learn the making process for products. The Product Creation Project is built across the complete first year and threads through other program courses. The main objective of the fall term is to practice the fundamentals of product making and develop individual apparel and footwear projects to demonstrate their knowledge. The student's Capstone project is developed in the Product Creation Lab courses across the complete first year and threads through SPM program courses, resulting in prototypes and sales samples. Sequence with SPM 642, SPM 643.

SPM 642. Product Creation Lab II. 2 Credits.

In this course, the second of a 3-course sequence, teams will develop a product design and product development strategy for the team's integrative project. This will include refining product briefs, defining product priorities, building a 3D prototype, and building a product tech pack. This course will continue to build on the UO SPM Technical Swatch Kit from Fall term. The student's Capstone project is developed in the Product Creation Lab courses across the complete first year and threads through SPM program courses, resulting in prototypes and sales samples. Sequence with SPM 641, SPM 643.

SPM 643. Product Creation Lab III. 2 Credits.

In this final term of a 3 course sequence, teams will continue product design and product development strategy for the team's integrative project. This will include re#ning physical products and tech pack revisions to produce actual samples of their products. Sequence with SPM 641, SPM 642.

SPM 653. Law and Ethics in Sports Product Management. 3 Credits.

Examines social responsibility and legal concepts in sports management including constitutional regulatory powers, individual participation rights, drug testing, antitrust, labor rights, intellectual property rights, sponsorships, product and event liability. Students may not get credit for both SPM 653 and SBUS 653.

SPM 661. Design Thinking. 3 Credits.

This course focuses on the transformative power of Design Thinking, a human-centered innovation methodology, for Sports Product Management. Learn to integrate people's needs, technology, and business requirements in problem-solving. Explore its history, philosophy, and hands-on application to various challenges. Gain a valuable skill for future career success.

SPM 662. Consumer Insights. 3 Credits.

This course offers a methodological overview of consumer research, equipping students with essential skills for effective decision-making in sports product companies and other industries. Learn to define research goals, create measurement instruments, conduct research, analyze data, and present insights for informed business decisions.

SPM 663. Sustainability in Sports Products. 3 Credits.

In this course, students will gain a grasp of sustainability in the apparel and footwear sectors. They'll explore global sustainability definitions, industry standards, and environmental and social impacts. Experts in circularity, materials, and production will offer insights. By course end, students will craft a life cycle analysis framework to predict group product sustainability impacts.

SPM 664. Sourcing and Costing Strategies. 3 Credits.

This course will focus on the theory and management of sourcing and costing decisions under uncertainty in the complex sport and outdoor industry and business environments. Through case studies and real-world applications, students will develop the skills needed to optimize sourcing strategies in a rapidly changing global market.

SPM 665. Digital Connections. 3 Credits.

This course focuses on the digital landscape of connecting with consumers and covers a range of topics including omni-channel marketing, Artificial Intelligence, and the metaverse. We'll look at their applications in sports product business and marketing, and workshop how to leverage them effectively to drive growth and innovation. Through three phases - Strategy, Channels, and Future Tech - you'll gain insights into the evolving digital landscape, empowering growth and innovation in sports product business and marketing.

SPM 667. Sustainable Supply Chain. 3 Credits.

Sustainable Supply Chain encompasses two important distinct – but ultimately intertwined disciplines: Sustainability and Supply Chain. Students will understand not only how our decisions impact the environment and people involved in making and delivering our products, but also how we can ultimately improve both while still making and delivering amazing products to our consumer. In the end, supply chain is a key part of any business and as such must align to and be in service of our business strategies – consumers, markets, channels, and principles.

SPM 668. Go To Market. 3 Credits.

This course focuses on the Go-To-Market (GTM) process in the Outdoor Sporting Goods industries. Special attention will be paid to the current future Go-To-Market requirements to be an industry leading brand. We will set a foundation of current Go-To-Market models to understand which components remain relevant and what changes are essential.

SPM 670. Sports Product Management Global Trip. 1 Credit.

The Global Trip is a transformative immersion experience that provides our students with the skill that helps them develop as leaders in a complex and global business world. This global study provides students with the opportunity to visit footwear and apparel manufacturing facilities, brands, and retail marketplaces, and participate in cultural experiences. The primary goals are to understand the cultural and business differences and derive best practices from them. Via this exposure, students can begin to create differentiation. By the end of this trip, students will have a better understanding of the product lifecycle and how global brands operate.

SPM 690. Leadership I. 3 Credits.

This course serves as the first step in the Leadership Journey, providing a foundation for leadership development that spans the academic and professional preparation of students in the Sports Product Management (SPM) program. The course introduces essential leadership principles, industry-specific insights, and tools to help students build personalized plans for becoming confident, effective leaders in the dynamic sports and outdoor product industry. Sequence with SPM 695.

SPM 691. Professional Development I. 1 Credit.

Sports Product Management Professional Development I is the first course in a three-part series designed to cultivate self-leadership as a foundation for effectively leading and developing others. This course offers opportunities for targeted technical skill enhancement, leadership and teamwork development, and exploration of timely, industry-relevant topics. Through a combination of practical exercises and reflective learning, students will build essential skills to advance their professional growth and impact. Sequence with SPM 692, SPM 693.

SPM 692. Professional Development II. 1 Credit.

Sports Product Management Professional Development II is the second course in a three-part series designed to support your growth throughout the program and into your career. This course emphasizes developing industry knowledge, cultivating and expanding your professional network, and honing public speaking skills. Students will also continue to enhance technical, leadership, and teamwork abilities while engaging with timely, industry-relevant topics to build a competitive edge. Sequence with SPM 691, SPM 693.

SPM 693. Professional Development III. 1 Credit.

Sports Product Management Professional Development III is the final course in a three-part series designed to advance your professional growth and prepare you for leadership roles in the sports and outdoor product industry. This 1-credit, advanced-level independent study builds on the knowledge and skills developed in earlier courses, offering a unique opportunity to explore emerging topics and produce impactful, industry-relevant work. Sequence with SPM 691, SPM 692.

SPM 695. Leadership II. 3 Credits.

As the capstone to the Leadership Journey in the Sport Product Management (SPM) program, this course builds on the foundations of Leadership I and prepares students to lead confidently at all organizational levels. Focused on self-leadership, team leadership, and business leadership, the course equips students with a personalized leadership toolkit through the study of academic and industry best practices, current events, and practical tools. Students will reflect on their leadership behaviors and skills, align their values and motivations with their aspirations, and apply these insights to teamwork experiences. Sequence with SPM 690.

Statistics (STAT)

Courses

STAT 243Z. Elementary Statistics I. 4 Credits.

A first course in statistics focusing on the interpretation and communication of statistical concepts. Introduces exploratory data analysis, descriptive statistics, sampling methods and distributions, point and interval estimates, hypothesis tests for means and proportions, and elements of probability and correlation. Technology will be used when appropriate. Previously MATH 243. Students cannot receive credit for both STAT 243Z and MATH 425.

Requisites: Prereq: MATH 101 or satisfactory placement test score; MATH 111Z recommended; a programmable calculator capable of displaying function graphs.

Equivalent to: MATH 243, MATH 425

Additional Information:

Science Area
BS Math

Swahili (SWAH)

Courses

SWAH 101. First Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing and comprehension. Sequence with SWAH 102, SWAH 103.

SWAH 102. First-Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing, and comprehension. Sequence with SWAH 101, SWAH 103.

Requisites: Prereq: SWAH 101.

SWAH 103. First-Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing, and comprehension. Sequence with SWAH 101, SWAH 102.

Requisites: Prereq: SWAH 102.

SWAH 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SWAH 201. Second-Year Swahili I. 5 Credits.

Continued development of Swahili language skills to an intermediate/low-level with emphasis on African culture. Sequence with SWAH 202, SWAH 203.

Requisites: Prereq: SWAH 103.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

SWAH 202. Second-Year Swahili II. 5 Credits.

Continued development of Swahili language skills to an intermediate/mid-level with emphasis on African culture. Sequence with SWAH 201, SWAH 203.

Requisites: Prereq: SWAH 201.

Additional Information:

Arts Letters Area
Cultural Literacy: Global Perspectives

SWAH 203. Second Year Swahili III. 5 Credits.

Continued development of Swahili language skills to an intermediate/high level with emphasis on African culture. Sequence with SWAH 201, SWAH 202.

Requisites: Prereq: SWAH 202.

Additional Information:

Arts Letters Area
BA Language Satisfying Course
Cultural Literacy: Global Perspectives

SWAH 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SWAH 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

Swedish (SWED)

Courses

SWED 101. First-Year Swedish. 5 Credits.

Thorough grammatical foundation in idiomatic Swedish with emphasis on both reading and speaking. Sequence.

SWED 102. First-Year Swedish. 5 Credits.

Thorough grammatical foundation in idiomatic Swedish with emphasis on both reading and speaking.

Requisites: Prereq: SWED 101.

SWED 103. First-Year Swedish. 5 Credits.

Thorough grammatical foundation in idiomatic Swedish with emphasis on both reading and speaking.

Requisites: Prereq: SWED 102.

SWED 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SWED 201. Second-Year Swedish. 4 Credits.

Review of grammar; composition, conversation. Readings from contemporary texts in Swedish. Sequence.

Requisites: Prereq: SWED 103.

Additional Information:

BA Language Satisfying Course

SWED 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

SWED 401. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

SWED 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

SWED 405. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

SWED 406. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

SWED 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

Theater Arts (TA)

Courses

TA 121. Scenery and Lighting Laboratory. 1-2 Credits.

Building and painting scenery, hanging lights for productions.

Repeatable 3 times for a maximum of 8 credits

TA 122. Costume Laboratory. 1-2 Credits.

Building costumes for productions.

Repeatable 3 times for a maximum of 8 credits

TA 124. Production. 1-2 Credits.

Working backstage for productions.

Repeatable 3 times for a maximum of 8 credits

TA 196. Field Studies: [Topic]. 1-2 Credits.

A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Repeatable 99 times

TA 198. Workshop: [Topic]. 1-2 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

TA 199. Special Studies: [Topic]. 1-5 Credits.

Freshman seminars.

Repeatable 99 times

TA 210. Introduction to Design. 4 Credits.

Introduction to the principles of design as applied to the arts of theater design, scenery, costumes, and lighting. Creative projects to develop concepts of visual imagery. Includes laboratory.

TA 211. Theater Production I. 4 Credits.

Introduction to the mechanics of mounting a theatrical production including basic construction of scenery and props and use of lighting equipment. Includes laboratory.

Equivalent to: DAN 255

TA 212. Theater Production II. 4 Credits.

Introduction to costumes and makeup. Costume construction includes basic hand and machine sewing techniques. Beginning makeup covers ingenue, beards, wounds, and fantasy. Includes laboratory.

Equivalent to: DAN 255

TA 250. Introduction to Acting. 4 Credits.

Principles of warm-ups, individual inventory, Stanislavski system, character analysis, and rehearsal procedure.

TA 251. Acting Scene Study. 4 Credits.

Continuation of performance principles for contemporary realistic theater with addition of dramaturgical scene study.

Requisites: Prereq: TA 250.

TA 252. Acting Auditions. 4 Credits.

Development of improvisational skills while establishing a working file of monologue material.

Requisites: Prereq: TA 250.

TA 271. Introduction to Theater Arts. 4 Credits.

Play and script structure, contemporary aesthetic attitudes, and the value of theater arts to society and the individual.

Additional Information:

Arts Letters Area

TA 321. Scenery Production. 1-3 Credits.

Production or performance crew head for scenery.

Requisites: Prereq: TA 211

Repeatable 3 times for a maximum of 12 credits

Equivalent to: DAN 255

TA 322. Costume Production. 1-3 Credits.

Production or performance crew head for costumes.

Requisites: Prereq: TA 212

Repeatable 3 times for a maximum of 12 credits

Equivalent to: DAN 255

TA 323. Lighting Production. 1-3 Credits.

Production or performance crew head for lighting.

Requisites: Prereq: TA 211

Repeatable 3 times for a maximum of 12 credits

Equivalent to: DAN 255

TA 324. Production. 1-3 Credits.

Stage manager, assistant director, or dramaturgy position.

Repeatable 3 times for a maximum of 12 credits

Equivalent to: DAN 255

TA 325. Performance. 1-3 Credits.

Preparation, rehearsal, and performance of an acting role.

Repeatable 3 times for a maximum of 12 credits

TA 367. History of the Theater I. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

Additional Information:

Arts Letters Area

TA 368. History of the Theater II. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

TA 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

TA 401. Research: [Topic]. 1-4 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 9 times for a maximum of 40 credits

TA 404. Internship: [Topic]. 1-12 Credits.

Professional practice in an organization that integrates concepts studied at the university with career-related work experience.

Repeatable 11 times for a maximum of 12 credits

TA 405. Reading and Conference: [Topic]. 1-4 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 9 times for a maximum of 40 credits

TA 406. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

TA 407. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

TA 408. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

TA 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

TA 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

TA 411. Costume History I. 4 Credits.

History of Western clothing in cultural context. Egyptian to Renaissance.

TA 412. Costume History II. 4 Credits.

History of Western clothing in cultural context. Mid-Renaissance to romanticism.

TA 416. Costume Design. 4 Credits.

Beginning design concepts and various artistic media as applicable to costume design and rendering techniques.

Requisites: Prereq: TA 210.

TA 418. Costume Pattern Drafting. 4 Credits.

Designing patterns through flat patterning and draping techniques. Practical experience in pattern development and execution.

Requisites: Prereq: TA 212.

TA 419. Costume Construction. 4 Credits.

Practical problems encountered in building and decorating costumes for the stage.

Requisites: Prereq: TA 212.

TA 441. Scene Design: Single Set. 4 Credits.

Elements of scene design; the scene designer's role. Creating a ground plan, measured perspective techniques, elevations, design styles. Design process and procedures related to the proscenium stage only.

Requisites: Prereq: TA 210.

TA 445. Advanced Projects in Theater Technology: [Topic]. 4 Credits.

Specialized areas of theater technology, one topic per term. Topics include scene painting, stage management, props, and computer drafting.

Repeatable 7 times for a maximum of 32 credits when topic changes

TA 452. Advanced Acting: [Topic]. 4 Credits.

Topics in the performance of a specific genre or authors, or in specific performance technique, including voice, movement, and musical skills.

Requisites: Prereq: TA 251, TA 252, TA 271; one from TA 210, TA 211, TA 212.

Repeatable 99 times when topic changes

TA 467. Lighting for the Stage. 4 Credits.

Designing lighting for the stage; technical and aesthetic problems.

Equivalent to: DAN 255

TA 470. Majors Seminar. 4 Credits.

Capstone seminar for junior theater majors; readings and research in new theater trends, aesthetics, professional and higher academic opportunities.

TA 471. Studies in Theater and Culture: [Topic]. 4 Credits.

Dramatic literature and historical cultural concepts. Establishes a cultural context for periods of drama, using arts materials and socioeconomic factors to clarify aesthetic attitudes and practices of theater.

Repeatable 3 times for a maximum of 16 credits when topic changes

TA 472. Multicultural Theatre: [Topic]. 4 Credits.

Origins and development of contributions in theater and drama by diverse cultural sectors of the United States, including Latino, Chicano, African American, Asian American, and Native American.

Repeatable 4 times for a maximum of 20 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

TA 490. Theater Capstone: [Topic]. 4 Credits.

Required for the major and may be fulfilled by successful completion of any one of four topics: Play Direction, Playwriting, Dramaturgy, Devising.

Requisites: Prereq: TA 210, TA 211, TA 212, TA 250, TA 271; one from TA 367, TA 368, TA 369.

Repeatable 3 times for a maximum of 16 credits

TA 503. Thesis. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

TA 507. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member.

Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

TA 508. Workshop: [Topic]. 1-21 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

TA 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

TA 511. Costume History I. 4 Credits.

History of Western clothing in cultural context. Egyptian to Renaissance.

TA 512. Costume History II. 4 Credits.

History of Western clothing in cultural context. Mid-Renaissance to romanticism.

TA 516. Costume Design. 4 Credits.

Beginning design concepts and various artistic media as applicable to costume design and rendering techniques.

TA 518. Costume Pattern Drafting. 4 Credits.

Designing patterns through flat patterning and draping techniques. Practical experience in pattern development and execution.

TA 519. Costume Construction. 4 Credits.

Practical problems encountered in building and decorating costumes for the stage.

TA 541. Scene Design: Single Set. 4 Credits.

Elements of scene design; the scene designer's role. Creating a ground plan, measured perspective techniques, elevations, design styles. Design process and procedures related to the proscenium stage only.

TA 545. Advanced Projects in Theater Technology: [Topic]. 4 Credits.

Specialized areas of theater technology, one topic per term. Topics include scene painting, stage management, props, and computer drafting.

Repeatable 7 times for a maximum of 32 credits when topic changes

TA 552. Advanced Acting: [Topic]. 4 Credits.

Topics in the performance of a specific genre or authors, or in specific performance technique, including voice, movement, and musical skills.

Repeatable 99 times when topic changes

TA 567. Lighting for the Stage. 4 Credits.

Designing lighting for the stage; technical and aesthetic problems.

TA 571. Studies in Theater and Culture: [Topic]. 4 Credits.

Dramatic literature and historical cultural concepts. Establishes a cultural context for periods of drama, using arts materials and socioeconomic factors to clarify aesthetic attitudes and practices of theater.

Origins and development of contributions in theater and drama by diverse cultural sectors of the United States, including Latino, Chicano, African American, Asian American, and Native American.

Repeatable 4 times for a maximum of 20 credits when topic changes

TA 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

TA 603. Dissertation. 1-16 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree.

Repeatable 99 times

TA 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

TA 606. Practicum: [Topic]. 1-12 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

TA 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

TA 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

TA 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

TA 610. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Undergraduate Studies (UGST)

Courses

UGST 101. Introduction to University Study. 3 Credits.

Helps students learn, adapt, and apply effective study skills, including strategies for time management, note taking, critical reading, writing, and test preparation.

UGST 109. First Year Experience: [Topic]. 1 Credit.

Repeatable.

Repeatable 2 times for a maximum of 3 credits

UGST 111. Academic Residential Community—Arts and Letters: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Arts and Letters with a small group environment with Arts and Letters faculty.

Repeatable 2 times for a maximum of 4 credits

UGST 112. Academic Residential Community—Social Science: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Social Sciences with a small group environment with Social Sciences faculty.

Repeatable 2 times for a maximum of 4 credits

UGST 113. Academic Residential Community—Science: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Science with a small group environment with Sciences faculty.

Repeatable 2 times for a maximum of 4 credits

UGST 198. Workshop: [Topic]. 1-12 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

UGST 199. Special Studies: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

UGST 211. Reacting to the Past. 4 Credits.

Centers on complex, exciting role-playing simulations of decisive historical events and the development of key analytical skills in close readings of classic texts.

Additional Information:

Social Science Area

UGST 399. Special Studies: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 5 times

WGS 401. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated.

Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

WGS 403. Thesis. 1-12 Credits.

A written document resulting from study or research and submitted as a major requirement for a degree. Repeatable with program director's and thesis adviser's consent.

Repeatable 11 times for a maximum of 12 credits

WGS 405. Reading and Conference: [Topic]. 1-5 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

WGS 406. Practicum: [Topic]. 1-5 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

WGS 407. Seminar: [Topic]. 1-5 Credits.

A current topic is Feminist Research Issues.

Repeatable 99 times when topic changes

WGS 408. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

WGS 409. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

WGS 410. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

WGS 411. Feminist Praxis. 4 Credits.

Combined internship and seminar explores the history and politics of community agencies and the relationship of feminist theory to practice.

Requisites: Prereq: one course WGS or equivalent.

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

WGS 421. Bodies and Embodiment. 4 Credits.

Focuses on the complex relationships between gender, bodies, and society from theoretical and empirical perspectives. Theories examine the body through an intersectional lens to understand social construction, cultural symbolism, and political struggles, especially within institutional contexts like the media, medicine, and the market.

Requisites: Prereq: one 300-level WGS course.

WGS 422. Sexuality Studies: [Topic]. 4 Credits.

Various topics in sexuality studies, including the relationship between gender and sexuality and between queer studies and women's and gender studies in the United States.

Requisites: Prereq: WGS 101 or WGS 201.

Repeatable 2 times for a maximum of 12 credits when topic changes

Additional Information:

Cultural Literacy: US: Difference, Inequality, Agency

WGS 432. Gender, Environment, and Development. 4 Credits.

Surveys gender and political, economic, and cultural strategies for development and environmental change around the world.

Requisites: Pre- or coreq: WGS 101.

WGS 450. Literature and Feminist World-Making. 4 Credits.

Examines feminist world-making in literary texts as a form of political theory, a strategy for thinking critically about the present, imagining the world under different circumstances, and building an alternative world from a feminist perspective.

Requisites: Prereq: one 300-level WGS course.

WGS 451. Global Perspectives on Gender: [Topic]. 4 Credits.

Designed to deepen understanding of diverse global issues and perspectives related to women's and gender studies.

Repeatable 2 times for a maximum of 12 credits when topic changes

WGS 507. Seminar: [Topic]. 1-5 Credits.

A current topic is Feminist Research Issues.

Repeatable 99 times when topic changes

WGS 508. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

WGS 510. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

WGS 511. Feminist Praxis. 4 Credits.

Combined internship and seminar explores the history and politics of community agencies and the relationship of feminist theory to practice.

Requisites: Prereq: one course WGS or equivalent.

WGS 521. Bodies and Embodiment. 4 Credits.

Focuses on the complex relationships between gender, bodies, and society from theoretical and empirical perspectives. Theories examine the body through an intersectional lens to understand social construction, cultural symbolism, and political struggles, especially within institutional contexts like the media, medicine, and the market.

WGS 522. Sexuality Studies: [Topic]. 4 Credits.

Various topics in sexuality studies, including the relationship between gender and sexuality and between queer studies and women's and gender studies.

Repeatable 2 times for a maximum of 12 credits when topic changes

WGS 532. Gender, Environment, and Development. 4 Credits.

Surveys gender and political, economic, and cultural strategies for development and environmental change around the world.

WGS 550. Literature and Feminist World-Making. 4 Credits.

Examines feminist world-making in literary texts as a form of political theory, a strategy for thinking critically about the present, imagining the world under different circumstances, and building an alternative world from a feminist perspective.

WGS 551. Global Perspectives on Gender: [Topic]. 4 Credits.

Designed to deepen understanding of diverse global issues and perspectives related to women's and gender studies.

Repeatable 2 times for a maximum of 12 credits when topic changes

WGS 601. Research: [Topic]. 1-16 Credits.

Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Repeatable 99 times

WGS 605. Reading and Conference: [Topic]. 1-16 Credits.

A particular selection of material read by a student and discussed in conference with a faculty member.

Repeatable 99 times

WGS 606. Practicum: [Topic]. 1-16 Credits.

A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Repeatable 99 times

WGS 607. Seminar: [Topic]. 1-5 Credits.

A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Repeatable 99 times

WGS 608. Workshop: [Topic]. 1-16 Credits.

An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Repeatable 99 times

WGS 609. Terminal Project. 1-12 Credits.

A presentation incorporating the knowledge and skills acquired from course work completed for a degree.

Repeatable 99 times

WGS 610. Experimental Course: [Topic]. 1-4 Credits.

Experimental course - topic varies.

Repeatable 99 times

WGS 615. Contemporary Feminist Theory. 5 Credits.

This interdisciplinary graduate seminar covers foundational texts as well as critical cutting-edge developments in feminist theory. The course centers intersectional, transnational, and de-colonial theoretical frameworks.

Writing (WR)

Courses

WR 121Z. Composition I. 4 Credits.

WR 121Z engages students in the study and practice of critical thinking, reading, and writing. The course focuses on analyzing and composing across varied rhetorical situations and in multiple genres. Students will apply key rhetorical concepts flexibly and collaboratively throughout their writing and inquiry processes. Previously WR 121.

Requisites: Prereq: SAT Reading or SAT Writing score below 37, or ACT verbal score below 32, or equivalent.

Equivalent to: WR 121

WR 122Z. Composition II. 4 Credits.

WR 122Z builds on concepts and processes emphasized in WR 121Z, engaging with inquiry, research, and argumentation in support of students' development as writers. The course focuses on composing and revising in research-based genres through the intentional use of rhetorical strategies. Students will find, evaluate, and interpret complex material, including lived experience; use this to frame and pursue their own research questions; and integrate material purposefully into their own compositions. Previously WR 122.

Requisites: Prereq: WR 121Z or HC 101H.

Equivalent to: WR 122

WR 123. College Composition III. 4 Credits.

Written reasoning in the context of research. Practice in writing documented essays based on the use of sources. Continuing focus on revising and editing.

Requisites: Prereq: WR 121Z or equivalent.

WR 195. Writing Tutorial. 1 Credit.

Provides students concurrently enrolled in WR 121Z with one-on-one tutoring. Enrollment priority based on entrance exam (SAT or ACT) scores.

Requisites: Coreq: WR 121Z.

Repeatable 1 time for a maximum of 2 credits

WR 198. Laboratory Projects: [Topic]. 1-12 Credits.

An experience in a lab setting in which a group of students focus on skills development rather than content master.

Requisites: Prereq: WR 122Z or equivalent.

Repeatable 99 times

WR 199. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 5 times

WR 312. Principles of Tutoring Writing. 4 Credits.

The practice and ethics of tutoring writing in the context of writing in various academic disciplines. Theories of teaching, tutoring techniques, and assessment of writing.

WR 320. Scientific and Technical Writing. 4 Credits.

Emphasis on form, function, and style of scientific, professional, and technical writing; weekly writing assignments include proposals, reports, definitions, instructions, summaries. Use of documentation in publication.

Requisites: Prereq: completion of university writing requirement.

WR 321. Business Communications. 4 Credits.

Practice in writing and analyzing internal and external messages common to business, industry, and professions. Suggested for business and management students.

Requisites: Prereq: completion of university writing requirement.

WR 399. Special Studies: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

WR 408. Laboratory Projects: [Topic]. 1-3 Credits.

Supervised writing projects in nonfiction prose.

Repeatable 5 times

WR 410. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

WR 423. Advanced Composition. 4 Credits.

Emphasis on critical thinking skills and rhetorical strategies for advanced written reasoning in different academic disciplines.

Requisites: Prereq: Completion of University Writing Requirement.

WR 508. Independent Writing Projects. 1-12 Credits.

Supervised writing projects in nonfiction prose.

Repeatable 5 times

WR 510. Experimental Course: [Topic]. 1-5 Credits.

Experimental course - topic varies.

Repeatable 99 times

Academic Calendar

Term-Based Academic Calendar

Fall Term 2025

Initial registration: May 19 - 29

Classes begin: September 29

Last day to drop courses without recorded "W": October 4

Last day to register or add courses: October 6

Veterans Day holiday: November 11

Thanksgiving vacation: November 27 - 28

Fall term final examinations: December 8 - 12

Winter vacation: December 13 - January 4

Winter 2026

Initial registration: November 17 - 26

Classes begin: January 5

Last day to drop courses without recorded "W": January 10

Last day to register or add courses: January 12

Martin Luther King Jr. Day holiday: January 19

Winter term final examinations: March 16 - 20

Spring vacation: March 21 - 29

Spring 2026

Initial registration: February 23 - March 4

Classes begin: March 30

Last day to drop courses without recorded "W": April 4

Last day to register or add courses: April 6

Memorial Day holiday: May 25

Spring term final examinations: June 8 - 12

Commencement ceremony: June 15

Juneteenth holiday: June 19

Summer Session 2026

Initial registration: May 4 - 8

Juneteenth holiday: June 19

Classes begin: June 22

Independence Day holiday: July 3

Eight-week session ends: August 14

Labor Day holiday: September 7

Twelve-week session ends: September 11

Fall Term 2026

Initial registration: May 18 - 28

Classes begin: September 28

Last day to drop courses without recorded "W": October 3

Last day to register or add courses: October 5

Veterans Day holiday: November 11

Thanksgiving vacation: November 26 - 27

Fall term final examinations: December 7 - 11

Winter vacation: December 12 - January 3

Semester-Based Law School Academic Calendar

Fall 2025 & Spring 2026 Semester Registration: April 16, 2025

Fall 2026 & Spring 2027 Semester Registration: April 15, 2026

Fall Semester 2025

Classes Begin: August 25

Last day to drop courses without recorded "W": September 2

Last day to register or add courses: September 4

Veterans Day holiday: November 11

Thanksgiving vacation: November 27 - 28

Semester examinations: December 9 - 18

Spring Semester 2026

Classes begin: January 12

Martin Luther King Jr. Day holiday: January 19

Last day to drop courses without recorded "W": January 20

Last day to register or add courses: January 22

Spring Vacation: March 21 - 29

Semester examinations: April 30 - May 11

Commencement: May 16

Summer Semester 2026

Registration: April 8

Classes begin: May 26

Juneteenth holiday: June 19

Independence Day holiday: July 3

First 5-Week Final Exams: June 29 - July 2

Second 5-Week/10-Week Final Exams: August 3 - 7
