THE GROUND IS NOW BEING CLEARED FOR THE NEW DOERNBECHER MEMORIAL CHILDREN'S HOSPITAL ON MARQUAM HILL. THIS GIFT ADDS AN IMPORTANT UNIT TO THE UNIVERSITY OF OREGON SCHOOL OF MEDICINE

One of Our Late Model Red Top Safety Coaches Operating Between Portland and Medford

Now you should travel by Motor Stage!

—It Is Comfortable—

Our new red top stages have been designed and constructed for comfort in all weather.

—It Is Frequent—

They are so frequent that if you haven't time to catch the leaving stage, you have just sufficient time to conveniently make the next.

—It Is Safe—

We employ only courteous, reliable, experienced drivers.

SPECIAL RATES

Round Trip Week End, Eugene to Portland, \$5.30
Similar Deductions to Way Points

EXTRA LOW RATES

Especially low rates are given from Portland, Salem, Albany, Corvallis and Eugene to Coos Bay and Southern Oregon points. Phone Stage Terminal in your city. Information given gladly.

COMMUTATION TICKETS

A book of commutation tickets offers you the privilege of thirty rides between any two points along the line between Portland and Roseburg for the regular charge on twenty-two one-way fares. This book is good for six months and tickets may be used by any members of the same household.

Thomas A. Edison and Charles P. Steinmetz in the Schenectady laboratories of the General Electric Company, where Dr. Steinmetz did his great work

Steinmetz

Emerson tells how the mass of men worry themselves into nameless graves, while now and then a great, unselfish soul forgets himself into immortality. One of the most inspiring influences in the life of a modern corporation is the selfless work of the scientists in the laboratories which it provides for their research.

If you are interested to learn more about what electricity is doing, write for Reprint No. AR391 containing a complete set of these advertisements.

The spirit of Dr. Steinmetz kept his frail body alive. It clothed him with surpassing power; he tamed the lightning and discharged the first artificial thunderbolt.

Great honors came to him, yet he will be remembered not for what he received, but for what he gave. Humanity will share forever in the profit of his research. This is the reward of the scientist, this is enduring glory.

Report of Medical School to the Regents of the University of Oregon

By RICHARD B. DILLEHUNT,
Dean of the University of Oregon School of Medicine

EDITOR'S NOTE: This report of Dean Dillehunt, which was presented to the Regents at a special meeting of the Board called January tenth for Medical School business, is so good a statement of the present situation at the Medical School that it is reprinted entire except for details of recommendations on routine matters.

ANTICIPATING a meeting of the Board of Regents of the University in the near future, we believe that a brief report dealing with the progress and proposed developments in the Medical School might be presented for your consideration.

The past year has been one of unusual attainment in the Medical School with reference to all its activities. The enrollment exceeds any previous record, having the entire quota of sixty matriculants in the first year and all upper classmen having returned to continue their studies. In the past it has been common for students upon the completion of the first or second year to transfer to eastern medical schools for the final clinical years. One reason for this has been the somewhat limited clinical facilities, but the greatest reason has been inadequate control of the clinical facilities by the Medical School enabling their utilization to the maximum degree. This defect has, in a measure, been met by the opening of the Multnomah County Hospital upon the campus and an improved relationship to it for teaching purposes. As a result, the total enrollment this year numbers 210 against 193 last year. Applicants for admission continue to exceed the limited registration, but not to such a degree as immediately after the war, and no eligible and well qualified Oregon applicant has been rejected.

In addition to the maintenance of the usual high standards of scholarship and instruction, research has been prosecuted more vigorously than before. Every department of the pre-clinical years has contributed substantially to the literature of investigation and the departments of medicine, surgery, and dermatology have carried on research problems in the laboratories. Pursuant to the plan commenced in 1923, the bound volume of "Collected Reprints for 1924"

will be published shortly. It will contain the published reports of progress in twenty separate problems.

There has been a great increase in the service to the state during 1924 in the point of numbers of sick and disabled cared for by the Medical School and in quality of service rendered. This has been the result of increased demand upon clinics, hospitals and the Children's Hospital Service Law and of amplification of room and equipment at the Portland Free Dispensary and the completion of the Multnomah County Hospital.

Approximately 13,000 separate individuals have been ministered to at the Portland Free Dispensary representing ambulatory cases not only from Multnomah county but from all parts of the state. The space has been increased thirty per cent and numerous clinics have been added. The dispensary is operated jointly by the Medical School, the Oregon Tuberculosis Association, State Board of Health, Visiting Nurses' Association, People's Institute, Community Chest, City of Portland and County of Multnomah. It is open from 8 a. m. to 3 p. m. six days a week and from 7 a. m. to 9 p. m. two days a week. The staff of eighty physicians and surgeons of Portland serves in behalf of the Medical School without salary and is to be commended for its loyalty and faithful service. The dispensary constitutes a most important teaching facility and is utilized to the maximum degree for the purpose.

About 4,000 have been cared for at the Multnomah Hospital by the Medical School staff during the year and more than forty have been committed under the Children's Hospital Service Law.

Two extension clinics were held by the Medical School in 1924 for sick and disabled children: one at Pendleton, Oregon, at which forty-eight children were examined and treatment outlined; the other at Medford, at which sixty-six were brought in from the surrounding country. Examinations were made by specialists in tuberculosis, nervous diseases and orthopedic surgery, and the patients advised as

to treatment. In several instances the children were committed to the Medical School for treatment.

Early in the year there was organized the Medical History Club at the Medical School, composed of those staff members who are interested in the historical evolution of medical science. Numerous historical sketches have been presented and the club has done much to promote the salutary effect of an historical background in teaching.

Many of the valuable contributions to research have been presented at the monthly meetings of the "Research Club," at which the exchange of opinion and constructive criticism have stimulated research and materially enhanced the esprit de corps.

In December the annual meeting of the Interurban Internists' Society was held at the Medical School and members of the staff presented a program of scientific papers.

During the same month the North Pacific Surgical Association held its annual meeting and a feature of its program was the unveiling of a bronze memorial tablet to the late Dean K. A. J. Mackenzie, who was first president of the association. The bronze was accepted in behalf of the Board of Regents by Mr. C. C. Colt, chairman of the Medical School Committee.

Another feature of the year was the completion, in the summer, of the road to the campus. The former steep grades were leveled, the road widened and sharp curves eliminated. It has done much to increase the accessibility.

The Medical School has been the recipient of two large benefactions during the year. Mrs. E. W. Morse and Mr. Edward Doernbecher, daughter and son of the late F. S. Doernbecher, made a gift of \$200,000 in the memory of the latter for the establishment of the Hospital for Children as part of the Medical School. The gift was accepted by the board and designated as the Doernbecher Memorial Hospital for Children of the University of Oregon Medical School.

Hospital to Fulfill Three-Fold Purpose

The gift marks an epoch in Oregon in point of munificence and in its stipulations as to functions, namely, care of sick children, teaching of future doctors, and research into the causes and methods of prevention of diseases of children—a three-fold function as embodied in the great hospitals of Europe and the East, acknowledged by citizens of Oregon to a degree sufficient to impel them to invest a large sum and with sufficient faith in the University to enable them to make it the trustee to carry on.

The hospital is sorely needed for all three purposes; it can be built and equipped with seventy beds for the sum available. It now becomes the obligation of the University to enable its operation. The cost of maintenance will be about \$70,000 per year, to be derived from patients able to pay, from gifts and endowments and from state support. Efforts are being made with success to secure the former. To enable the opening of the hospital January 1, 1926, assured funds must be forthcoming at that time. Hence, an appropriation of \$60,000 is requested from the legislature for this purpose, in the belief that it will maintain the hospital for the first year, at the end of which time funds from the other sources will be available. However, annual state appropriations will be requested thereafter to support free beds for state wards. Much effort will be required to urge upon the legislature the necessity of this new appropriation.

The second large gift has been just received in the deed of a tract of eighty-eight acres of land adjacent to the Medical School campus to the University by Mrs. Maria Jackson and Mr. Philip Jackson, widow and son of the late C. S. Jackson of Portland. This generous benefaction to be known as Sam

C. S. Jackson, whose gift to the state of the 88-acre tract, to be known as Sam Jackson Park, given just before his death, adds a marvelous stretch of wooded hill and valley to the Medical School campus on Marquam Hill.

Jackson Park, allays the fear of commercial exploitation of the property to its disadvantage as a hospital and educational site, and it gives to the University property for the expansion of the medical center and for affiliated or beneficial institutions. The campus is thus made into a natural park unsurpassed for scenic and utilitarian qualities.

The deed and its accompanying letter are presented herewith, with the request that the Board of Regents accept the gift officially and express to the generous donors the gratitude that their public spirit merits.

A third gift has come from a physician in Portland, Dr. N. W. Jones, in a fund of \$5,000 for the establishment of a fellowship in the department of pathology, the income from which is to be used to aid deserving and diligent students carrying on special work in that department. Dr. Jones has already provided such an income annually for five years, and now desires to perpetuate the annuity. In addition to this, he has given a sum of \$300 annually to enable the bringing of some distinguished scientist to the Medical School for a series of lectures. Moreover, he has given freely of his time and self in the development of the department of medicine. It is requested that the board accept the gift with suitable acknowledgement.

During the year the Junior League of Portland has appropriated a sum of \$5,000 for the equipment of the out-patient
(Continued on page thirty-four)

Scholarship at the Oregon Medical School

By CHARLES N. REYNOLDS
Secretary University of Oregon Medical School

STANDARDS of scholarship at the Medical School have risen along with those of the entire University, although the evidences of this are slightly different, due to the type of subject matter in the curriculum and the selective process in making up the Freshman class. During the past two-year period, the Medical School has maintained its class "A" rating along with the higher standards imposed by the American Medical Association; has been honored by the granting of a charter in Alpha Omega Alpha, honorary medical fraternity, and has revised and improved its clinical teaching facilities throughout.

It is usually a high type of student who survives the competitive process of the three or more years of college pre-medic work and who knocks at the doors of the Medical School. When the personnel of the Freshman class is determined and the four-year course commences, the weeding out process is likely to follow along the lines of greater or less ability due to individual differences. The men and women studying medicine are being fitted for one or more of these functions: the practice of medicine, preventive medicine, further research into the nature, cause, prevention and cure of disease, the teaching of medical sciences. It beomes the duty, then, of the instructors of the Freshman and Sophomore medical students, especially, to discover and eliminate types of men and women who, in spite of a general fitness in scholarship which brought them into the entering classes, are, nevertheless, unfit for the heavy, special duties which should follow the granting of the medical degree.

A few checks on the success of the students of Oregon who survive are easily applied. They take the State Board examinations with men and women from other class "A" schools. They take the National Board examinations in competition, in considerable numbers despite the fact that legislative action in Oregon is still wanting for legalizing license to practice based on this examination. Over ninety-five per cent of them apply for and accept internships in hospitals where a selective process is used in choosing interns. A fair percentage of them choose to devote a goodly proportion of their time to research and the result in printed articles in Scientific Journals is encouraging. In all of these tests, as well as in the general one of competitive practice of medicine, the graduates of the University of Oregon Medical School receive a high rating.

During the first and second quarters of 1923-1924, Mr. Adna M. Boyd received the first position in the Freshman class with a straight card of "ones" for the fall quarter in a total of 18 hours. His record for the entire year was 44 hours of "ones" and 10 hours of "twos."

For the spring quarter in the Freshman class, Mrs. Vida Povey Sherwood of 692 Hancock Street, Portland, obtained the best record, receiving a straight card of "ones" for 17 hours. Her record for the year is remarkable, since she earned 43 credits of "ones," nine of "twos," and one hour of "three." Mrs. Sherwood took her pre-medic work in the University of Oregon at Eugene. She married Dr. Robert A. Sherwood, who was also a student from Oregon, where he received the degree of Doctor of Medicine in 1916. Dr. Sherwood died in the service during the World War.

In the fall quarter of 1924-25, with the same students competing, Walter E. Nichol ranked in first place with 8

hours of one grade and ten hours of two. Mr. Nichol received the degree of Bachelor of Science from the University of Oregon in 1920 and acted for a period as assistant in the Department of Zoology. He returned to the Medical School to complete his medical course in October, 1925.

For the fall quarter, Mr. Boyd lost first place by a small fraction of a point with 8 hours of "ones" and 11 hours of "twos." Marvin R. Eby, B.A., University of Oregon, 1923; Rudolph A. Bissett, B.S., University of Washington, 1921; and Mrs. Vida Povey Sherwood, University of Oregon, were the other "runners-up" in the order named.

Bas Relief of Dr. Kenneth A. J. Mackenzie, which was presented by the North Pacific Surgical Association and the faculty of the Medical School. The bronze memorial is the work of A. Plimister Proctor.

University's Growth Outruns Support; Enrollment Attests Service

(EDITOR'S NOTE: This statement was prepared for use in connection with the legislature. It was printed in the Oregon Voter and parts of it have appeared at various times in the press. Alumni will be interested in having the full statement in order to be able to utilize the facts presented as occasion offers).

THE University of Oregon Alumni, with justifiable pride in their school, present for the information of the legislature and people of the state, certain facts pertinent to the University's service to the state, and the consequent remarkable growth it has experienced.

The following table shows the relationship between increase of enrollment in the University and the millage tax income for the years 1921 to 1925. The year 1920 is taken as a base:

Year	STUDENT ENROLLMENT.....	MILLAGE TAX RECEIPTS.....	% increase over 1920
1920	1,725	\$806,497	
1921	1,842	\$847,540	5.9
1922	2,160	\$831,227	25.5
1923	2,400	\$822,203	34.1
1924	2,443	\$848,820	1.9
1925	2,800	\$862,231	36.8

NOTE: Enrollment figures are for regular full time enrollment in classes on the Eugene campus and do not include School of Medicine, or any part-time University courses such as those in the Extension Division, Summer Sessions, etc., all of which (except approximately 200 students in the School of Medicine) are financed from the millage tax. The total enrollment of students earning credit in the University last year was 7,120 and has been increasing at about the same rate as the regular campus enrollment.

Oregon Leads Educationally

Oregon justly prides itself in its high literacy and in the unusually large proportion of its children in school and college. It knows that education is the best investment it can make economically and socially and that the success of Oregon's progressive system of popular government depends on the educated intelligence of its citizens.

When in 1920 the state voted by a large majority additional funds to the University, the vote amounted to instructions to the University to use its new millage to strengthen itself so that it could, as a servant of the state, do its part in providing Oregon young people with as good educational opportunities as are available to the youth of other states. This the University has been doing.

The University is now in the foremost rank of American higher educational institutions. It is gratifying to see how Oregon young people are responding to their educational opportunities. It is obvious that increased use of educational institutions is, unlike increased need for corrective and charitable institutions a blessing rather than a calamity.

The following statements are supported by authoritative figures:

1. The cost to the state per student is low. Oregon ranks 34th among 41 state universities as to receipts per student and 37th as to property investment per student. The state contribution for teaching per student is now actually less than it was before the war, notwithstanding the greatly diminished value of the dollar.
2. Salaries are low. The pay of every rank of officer and instructor is not only below that of the stronger universities, but it is actually below the average of all state universities.

Student Body Outgrows Buildings

In 1920 there was a considerable margin above the charges for teaching service and other maintenance expense. This was utilized for new buildings most urgently needed toward making up the great shortage in building space. As the number of students increased, more teachers were needed and other expenses went up. Maintenance charges have grown less than half as fast as the enrollment, but with an increase in the number of students of 56 per cent since 1920, the margin for building is now practically exhausted. The budget submitted to the State Budget Commission shows enough margin of millage money in 1925 to complete the Science Building, now under way, but none for new buildings after that.

In 1920 the University was at the bottom of the list of state universities as to value of building per student. It has put approximately a million dollars of millage money into building since then, but is still at the bottom of the list because of its growth in students being more rapid than its construction of new buildings.

Facing this situation, the University could do one of three things. It could turn away qualified students coming from Oregon homes. (It has already turned away nearly all from out of the state by a non-resident fee so high that few can afford to pay it). It could "wholesale education" by throwing students together in large classes taught by poorly paid

Clearing the site for the new Doernbecher Memorial Children's Hospital. This picture was taken from a window in the Medical School.

instructors. It could try to find funds for meeting the new needs. The University authorities adopted the last alternative as the only right and forward looking course.

But where was the money? The state could be asked for little if any more and large amounts are needed to care for the present and provide for the future. The only immediate hope seemed to be in gifts. A campaign was organized and to date gifts and pledges of gifts amounting to more than a million and a half dollars have been received toward a goal of five million dollars, mainly for new buildings. The greater part of this amount is in pledges, payable over a period of years, and is not immediately available. Meanwhile, in thousands of Oregon homes, parents are planning to send children to the University. The number of students is bound to increase steadily. How these students are to be assured the equality of educational opportunity to which as future citizens of Oregon they are entitled is a challenge to the constructive statesmanship and educational leadership of Oregon.

The Medical School

The Medical School in Portland, although under the administration of the regents of the University, has from the beginning been separately financed. In 1913 and again in 1920 it was made clear before the Ways and Means Committee and in the campaign before the people that the budget presented as the basis for the millage tax did not provide for the Medical School. The legislature at each session made a separate appropriation for the Medical School.

The request for 1925-26 is for \$239,000. This is \$39,000 more than was appropriated in 1923. The increase is needed mainly to complete the equipment of the building and to bring the clinical work up to the standard of the rest of the school by providing technical assistance which will make possible a fuller utilization of the excellent services as clinical teachers which Portland physicians are giving free of charge.

The Medical School has received gifts of buildings and land valued at approximately half a million dollars in the past few years. Portland people have contributed this year more than the state is asked to appropriate for the biennium.

The University has received in the name and for the benefit of the State of Oregon, the gift of the Doernbecher

Dr. Burget demonstrating the metabolic machine, a respiration calorimeter. This machine is used to determine the rate at which oxygen is burned in the body and is frequently necessary in determining the severity of goiter.

Hospital for Children costing \$200,000. This is soon to be erected on the Medical School campus (also a gift to the state) as a "teaching hospital" where doctors in training may learn under best conditions how to cure the ills of our little ones.

A large part of the operating expense of this hospital will come from the fees of those who can pay all or part of the regular charges for such service and from gifts and endowments, of which some have already been received and large amounts are in prospect from bequests and otherwise. An appropriation of \$60,000 is necessary to help with the initial expense of putting this hospital into operation. The amount needed in the future from the legislature will doubtless decrease as other income increases.

The state of Oregon has recognized by the passage in 1917 of the Crippled Children's Act the necessity of making over into normal, self-supporting citizens its sick and crippled children who are unable, for financial reasons, to secure proper surgical and hospital care. The operation of this law has not been wholly satisfactory, due in part to the necessity of scattering the children among many hospitals. The gift to the Medical School of the Doernbecher hospital offers to the state the opportunity to help the crippled children in the best and cheapest way, since here the children would get specialized attention, and the free service of the Medical School physicians could be most effectively utilized.

To Summarize

The University has grown until the millage leaves no margin for buildings.

It has been and is making every possible effort to carry on without lowering standards or refusing admission to qualified Oregon students.

It is the one state institution that has voluntarily undertaken a campaign for gifts to prevent, if possible, the necessity for asking the tax payers for the large sum needed to maintain the present service to the state.

The Medical School asks for the support of its regular work \$239,000 and for the Doernbecher Hospital for Children \$60,000. These amounts are already more than equalled by private gifts.

The facts briefly stated above show that the University serves the state with efficiency and economy and that the appropriations asked are not only amply justified, but are modest compared with the large amounts urgently needed.

Walter E. Nichol, who was first in scholarship at the Medical School for the fall term.

The Value of Kale as a Food

By JESSIE LAIRD BRODIE

OREGON parents should be much interested in several of the problems that are being investigated at the University of Oregon Medical School by a worker supported by the Collins' Research Fund.

We are all familiar with the wide use of kale as a green winter fodder for cattle, especially in the Willamette valley, where the mild winters make it possible to keep it growing practically all the year. Its fodder value has been tested upon dairy cows and the returns were so favorable as to sug-

Effect of kale feeding upon the growth of Albino rats from the same litter. Above: Male 89 (left) after four weeks on a vitamin B free diet. Initial weight, 38 grams; weight when photographed, 32.4 grams. Male 90 (right) after four weeks on the same vitamin B free diet to which 15 per cent of kale was added. Initial weight, 35 grams; weight when photographed, 60 grams. Below: Male 89 (left) after five weeks with 15 per cent kale added to his former diet. Weight, 72 grams. Male 90 (right) after five weeks more on the vitamin B free diet plus kale. Weight, 106 grams.

gest some more work which is not yet complete. What most of us do not realize, however, is that there is a variety of kale, known as curly kale (and probably many other strains as well) which has a very delicate flavor and makes tasty greens for human consumption. It is inexpensive and for a given number of pounds contains 10 per cent less water content and 10 per cent more food value than does the same amount of spinach. If, therefore, it contains an adequate amount of vitamins (those food substances which have so much influence in keeping us healthy and bringing about a normal growth in children) kale offers a delightful variety to the spinach which most of us try so hard to feed to our families in the most varied of guises.

Fifty-seven baby white rats, or about six families, are being used at present in an attempt to find out what the vitamin content of kale may be. Vitamin B is first being investigated, but the same procedure will later be followed with vitamin A. The young albino rat develops very quickly, reaching maturity in about three months and showing during this time a growth comparable to that of a human child during the first 10 years of its life. It eats any food or

mixtures of foods that people eat and react to the lack of vitamins in much the same way that we do.

One-half of the white rats were placed on what is known as a vitamin B deficient diet, which contains enough of protein (or meat-like substance), enough of fat in the form of butter, which contains an abundance of vitamin A, and enough starchy food to give maximum growth. All they lacked was a source of vitamin B. During the four weeks of the experiment so far, the animals on this diet have either stayed at their weight when first weaned or have lost a few grams. This amount of time is practically equivalent to three years of a child's life. During the last few days a few of this group on the vitamin B free diet have shown signs of paralysis of the hind limbs and to the diet of the whole group 15 per cent of dried kale was added. They are now being closely watched to see if the kale contains enough vitamin to restore them to health and vigor.

The remaining half of each family of rats was placed on the vitamin B free diet immediately after weaning, but 15 per cent of dry kale or its equivalent in raw or cooked kale was added. These groups at the end of four weeks are in a sleek, healthy condition and have almost doubled their average original weight.

In the diet of another group spinach is being substituted for kale and a comparison of their growth on both of these substances will be made.

By comparable technique the solving of two other problems is being attempted. First: Do white flour and whole wheat flour give equal value as the main source of our starchy foods? Second: What effect does boiling for one minute have upon the value of milk? Is the curd softened in the process and thus made more digestible?

This work is being carried on at the Medical School under the supervision of Dr. C. Ulysses Moore.

Bas Relief of Dr. Mackenzie Presented

ON THE 12th of December in the presence of the members of the North Pacific Surgical Association and the faculty of the Medical School, the beautiful bronze bas relief of the late Dr. Kenneth A. J. Mackenzie was unveiled and presented to the school.

The part taken in the ceremony by the North Pacific Surgical Association was an appreciation of the work of Dr. Mackenzie, who, in addition to his long period of service as dean of the Medical School, had been the first president of the association.

The bronze memorial is a beautiful piece of work executed by A. Phimister Proctor, who is well known in Portland through his Roosevelt statue and other memorials. The Mackenzie relief is a profile bust and is accompanied by an inscription which dedicates the bronze to the doctor's memory.

At the ceremony, Dr. Ernest F. Tucker presented the gift on behalf of Dr. Mackenzie's friends to the Medical School, and Mr. C. C. Colt, of the Medical School Committee of the Board of Regents, made the address of acceptance.

Faculty of the Oregon School of Medicine

Harold Bunce Myers, A.B., M.D., Professor of Pharmacology and Head of the Department. Member of Society for Pharmacology and Experimental Therapeutics, Sigma Xi, Alpha Omega Alpha. Oberlin, Ohio, July 31, '88. A.B., Wisconsin, '68; M.D., Western Reserve, '11. Instructor in Pharmacology, University and Bellevue Hospital Medical College, '12-'15; Professor, Oregon, '15-; Assistant Dean, Medical School, '17-; Tolerance of Drugs; Uranium Glycosuria; Dinitrochlorobenzene Toxicity.

Harry Johnson Sears, M.A., Ph.D., Professor of Bacteriology and Hygiene and Head of the Department. Member of Sigma Xi, Phi Beta Kappa, Society of American Bacteriologists, Daviess Co., Mo., Feb. 18, '85. A.B., Stanford, '11. A.M., '12. Ph.D., '16. Instructor in Chemistry, Stanford, '11-'12. Bacteriology, '13-'16; City Bacteriologist and Chemist, Berkeley, Cal., '16-'18; Professor of Bacteriology and Hygiene, Medical School, Oregon, '18-; Bacterial Symbiosis; Epidemiology of Streptococci; Metabolism of Bacteria.

George Emmanuel Burget, A.B., Ph.D., Professor of Physiology and Head of the Department. Member of Sigma Xi, American Physiological Society, Kempton, Ind., May 18, '89. A.B., Ph.D., Chicago, '16. Associate in Physiology, Chicago, '16-'17; Professor of Physiology, Oregon, '17-; Glands of Internal Secretion.

Robert Louis Benson, M.A., M.D., Professor of Pathology and Head of the Department. Member of Sigma Xi and Alpha Omega Alpha. Flint, Mich., May 20, '80. A.B., Michigan, '02. A.M., '04; M.D., Rush Medical College, '10. Bacteriologist, Florida State Board of Health, '10-'12; Professor of Pathology, Oregon, '13-; City Bacteriologist, Portland, Oregon. Relationship of Arteriosclerosis, Syphilis and Coronary Obstruction.

Howard D. Haskins, A.B., M.D., Professor of Biochemistry and Head of the Department. Member of Sigma Xi, the American Chemical Society, American Biochemical Society. Springfield, Mass., April 25, '71. A.B., Michigan, '92; M.D., Western Reserve, '95. Assistant Professor in Organic Chemistry and Biochemistry, Medical Department, Western Reserve, '07-'11; Associate Professor, '11-'15; Professor of Biochemistry, Medical School, Oregon, '15-; Solvent Power of Urine; Hydrogenion Concentration of Urine and Blood. New Methods of Estimating Haemoglobin, Sugar and Uric Acid in Blood.

Frank R. Menne, Sc.B., M.D., Professor of Pathology. Member of Sigma Xi, American Society of Bacteriologists, American Society of Pathologists and Bacteriologists. Fond du Lac, Wisconsin, March 20, '88. University of Wisconsin, '09-'12. Sc.B., '12; Rush Medical College, '15-'16. M.D., '15. Assistant in Pathology, Rush, '15-'16; Assistant Professor of Pathology, University of Oregon, '16; Professor of Pathology, '18-; Bacteriology and Pathology of Syphilis; Congenital Anomalies of the Heart—Reptilian; Spontaneous Rupture of Oesophagus in an Infant; Immunologic Experiments with Platelets of Human Blood; Specific Precipitin Reaction of Leukocytes; Hemolysin Production in Roosters.

Richard B. Dillehunt, M.D., Dean of the University of Oregon Medical School. Decatur, Ill., July 12, '88. Member of Alpha Omega Alpha, North Pacific Surgical Society and other professional associations. University of Illinois, '04-'06; M.D., Rush Medical College, '10. Professor of Anatomy and Associate Dean, Oregon, '12-'20; Dean of the University of Oregon School of Medicine, '20-; Orthopedic Surgery.

Captain James D. Edgar, M.D., Professor of Military Science and Tactics, and in charge of that department at the Medical School. Captain Edgar comes to the school from Denver and takes the place of Colonel William Aden Powell, who left last summer to take charge of similar work with the Medical Department of the University of California at Berkeley.

William Fitch Allen, M.A., Ph.D., Professor of Anatomy and Head of Department. Member of Anatomischen Gesellschaft, Washington Academic of Science, American Association of Anatomists, Oneonta, N. Y., '75. A.B., Stanford, '06. A.M., '02; Ph.D., Minnesota, '15. Assistant to Dr. E. P. Allis, '01-'06; Physiologist, California, '08-'10; Instructor of Embryology and Comparative Anatomy, Illinois, '10-'11; Histology and Embryology, Minnesota, '11-'16; Professor of Anatomy and Head of the Department, Oregon, '16-; Anthropology; Microscopical Technique; Morphological and Experimental Neurology; Blood Vessels and Lymphatics in Fishes.

Wilmot C. Foster, M.A., M.D., Assistant Professor of Anatomy, Member of Sigma Xi, Association of American Anatomists, Sheridan, Oregon, June 21, '21. University of Oregon, '12-'16; University of Minnesota, '17; University of Chicago, '18; University of Oregon Medical School, '18-'20. Assistant in Zoology, University of Oregon, '15-'18; Instructor in Anatomy, University of Oregon Medical School, '17-'20; Assistant Professor of Anatomy, '20-; Ties of Intestinal Obstruction; Cause and Treatment of Strangulation of Bowel; Acute Simple Intestinal Occlusion; Thyroid Studies.

John J. Putnam, M.A., Ph.D., Assistant Professor of Bacteriology, Member of Sigma Xi, Society of American Bacteriologists, Gibbon, Neb., Feb. 20, '78. B.S., Denver, '04. A.M., '05; Fellow, Chicago, '06-'08; Ph.D., Nebraska, '14. Assistant in Bacteriology, Nebraska, '10-'11, Instructor, '11-'12, Adj. Professor, '13-'14; Associate Professor, Idaho, '14-'15, Professor and Head of Department, '15-'19; Assistant Professor of Bacteriology, Medical School, Oregon, '21-; Bacteria of Soil; Bacterial Symbiosis.

Olof Larsell, M.A., Ph.D., Professor of Anatomy, member of Sigma Xi, Association of American Anatomists, History of Science Society, Rättvik, Sweden, March 13, '86. B.S., McMinnville, '10; Fellow, Northwestern, '13-'14. A.M., '14, Ph.D., '18. Professor of Biology, McMinnville, '10-'15; Instructor in Zoology, Northwestern, '15-'19; Assistant Professor of Anatomy, Wisconsin, '18-'20; Associate Professor of Zoology, Northwestern, '20-'21; Professor of Anatomy, Oregon, '21-; Embryology and Anatomy of the Avian Lung; the Nervous Terminalis in Vertebrates; Comparative Anatomy of the Cerebellum; Innervation of the Lung; Medical Biography.

Oregon Man Wins Rhodes Scholarship

Clinton N. Howard,
Rhodes Scholar.

ON THE morning of December 13, four professors gathered in the committee room at the University Club in Portland, with serious business afoot. Out in the big rotunda on the second floor of the University Club stood seven men, for the most part making first acquaintance, and talking earnestly, but not lightly — for sometime during the day each of those men was to appear more than once before the committee within.

The newspapers have many times given the names of the candidates and of the committee but it will be proper here to give some account of the winning candidate, who, for the second consecutive year, is a University of Oregon man, in the person of Clinton N. Howard.

Young Howard is son of the man whom many folk in Portland knew and greatly respected, during his chaplaincy days at the Good Samaritan Hospital. The father of Clinton Howard is worthy of more of a story than his boy, even though the boy has just become a Rhodes Scholar. The Reverend Frederic K. Howard is of English and Anglican heritage, and throughout his clerical life has preferred to live in comparative obscurity, and never to tell of his deeds. He has never sought nor accepted any of the important pulpits which he might have had. From the Good Samaritan, two or three years ago, he went to Berkeley to live, and his mission now is to minister to the crowds of seamen who sail into San Francisco Bay. The men who know of his great works in that field sail out again into the seven seas and are heard from no more; but the memory of a good chaplain must live with them.

When young Howard came to the University, he had as much knowledge of literature and history, probably, as any freshman entering, and far more than most. Yet it took him a full two years, and part of the third to get "squared around" so that he could meet the conventions of University study and make grades. Good grades, indeed, he did not make for a long time; nor has he ever been a "grade-getter," in the sense in which students use the term. It is very unusual in fact that a man whose scholastic average has been so low is selected as a Rhodes Scholar.

But for the last two years in particular, Howard has been applying himself assiduously to reading for the examination in December. In the first of those years he appeared for the preliminary "sifting examination," which is given by a faculty committee to determine who shall represent the University. In this, Howard was eliminated, and the committee's good judgment was confirmed when one of its selections, William Arthur Rosebraugh, won the Rhodes Scholarship last year.

However, Howard went back to reading more assiduously than ever. When other students were wandering in the moonlight or dancing, Howard was reading in some remote corner of the Library; when the Library was closed he went home to read. As a rule, this reading had little to do with his course of study as such, and often his course of study suffered.

Nevertheless, when the nine candidates to represent the University in the Rhodes competition this year had appeared before the faculty committee, the committee unanimously felt, "Let's send Howard and whom else." So it sent Howard and two other fine young men, Donald Woodward, the editor of the Emerald, and Henry Sheldon, a senior in the department of history.

Over these three men and over the two fine ones from Reed, and the two splendid, upstanding men from Willamette, the committee put in a long and grueling day, at the end of which it also felt compelled to say, "Let's send Howard."

Mary Spiller Scholarship Fund Increased

THE MARY SPILLER scholarship fund was increased \$100 recently when Reuben P. Boise, of Salem, and Whitney L. Boise, '80, of Portland, gave \$50 each to the fund. The two men are nephews of the late Mary Spiller, first woman professor at the University of Oregon, in whose memory the scholarship was established by the State Alumnae Association in June, 1908.

The scholarship was originally financed from year to year by the \$1 membership fees paid by members of the State Alumnae Association, to which all graduates are eligible for membership, but two years ago the plan was changed and the association decided to raise a permanent fund of \$5,000, from which the income can be used each year. The scholarship provides for room and board in Hendricks Hall for one year for some worthy freshman girl, a graduate of an Oregon high school.

The officers of the State Alumnae Association are: President, Marguerite Rohse Clarke, '13, of Springfield; vice-presidents, Edith Kerns Chambers, '95, of Eugene, and Hilda Brant Carruth, '13, of Portland; secretary, Susie Bannard Holt, of Eugene; and treasurer, Jennie Beatie Harris, '96, of

Eugene. The officers are elected at the breakfast meeting of the association, which is held on the Saturday preceding commencement each year.

According to the latest figures from Mrs. Harris, treasurer of the association, \$1,000 has purchased bonds bearing from 6 to 7 per cent interest; and the first of January this year, \$124 was invested in a Lane county warrant, bearing 6 per cent interest. A few dollars remain in the treasury, making a total of almost \$1,130, which has already been raised toward the \$5,000 goal.

The officers of the Alumnae Association and the members who have been supporting the fund since its establishment 16 years ago are particularly anxious to have every alumna of the University a member of the association and a supporter of the \$5,000 scholarship fund, a worthy monument to the memory of Mary Spiller. A check for \$1 (or more) mailed to Mrs. Harris (Mrs. Lawrence T. Harris, Osburn Apartments, Eugene, Oregon) carries with it membership in the association and adds one more dollar to those already given toward the necessary \$5,000.

Research in the Medical School

ONE NEED not search the Medical School for evidences of original investigation. Every laboratory speaks for itself and that in no uncertain terms. Indeed, the spirit of research pervades the entire institution. This is a good omen. Some one has said that technical education without original investigation will lose all force and growth, all power of reproduction, just as surely as a stream dwindles when the spring dries out. Tyndall, the great physicist, once said while lecturing in America, "The original investigator constitutes the fountain head of knowledge. It belongs to the teacher to give this knowledge the requisite form; an honorable and often difficult task. But it is a task which receives its final sanctification when the teacher himself honestly tries to add a rill to the great stream of scientific discovery. Indeed, it may be doubted whether the real life of science can be really felt and communicated by the man who has not himself been taught by direct communion with nature."

Instructors at the Medical School are adding their rills to the great stream. Volume II, 1924, "Collected Reprints from the University of Oregon Medical School" is now on its way to the bindery. Eighteen instructors contributed the twenty scientific papers making a volume of approximately three hundred pages—nearly twice the number of pages in the volume of 1923. The scope of this work is broad: nearly every branch of the medical sciences is included. Excellent contributions to the study of the nervous system have been made. New light has been thrown upon intestinal obstruction. A contribution to the early recognition of heart disease demands the attention of physicians. A probable relation of infection of the gall bladder to pernicious anemia has been pointed out. New data toward the early recognition of rickets has been added. An interesting report of a milk-borne epidemic of typhoid fever traced to a urinary carrier is included in the volume along with several other contributions to modern medicine.

The projected research at the Medical School is huge in quantity. The quality of the work inspires confidence for the future. A satisfactory treatment for the dermatitis common among fruit handlers is being worked out and the organism producing the lesion studied. Autopsy studies

Dr. Ira Manville in a room devoted to laboratory work on diet and nutrition. The cages back of Dr. Manville house the rats that are being used in testing the nutritive value of certain food fats (vitamine A). The nutritive value is gauged by the growth and reproduction it permits. Dr. Manville is here weighing a rat—a series of such weights form a graphic growth curve.

point toward a much greater frequency of coronary obstruction than has hitherto been imagined. Salmon poisoning in dogs is being studied with respect to its specific cause and treatment. The increasing predominance of goitre among the people of the Pacific Northwest is receiving due attention as to etiology, prevention and treatment. A thorough study of the haemoglobin index and its estimation is being made. Problems of diet with reference to vitamins and acid-base balance are being investigated by several individuals in the laboratories. But the problems under investigation are too numerous to give here. A survey shows approximately fifty well defined studies well in hand by half as many investigators.

The school may well be proud of the progress being made in research. There are no "icons of the saints of science" (Continued on page thirty-four)

Pictures Featured in 1925 Oregana

THE 1925 Oregana has begun to take shape and promises to contain news and pictures that will interest everyone, says Augusta DeWitt, editor of the annual. Greater emphasis is being placed this year on personal interest in the book and to this end a great deal of the so-called "cut and dried" reading matter has been eliminated and pictures substituted.

Campus subscriptions for the year-book were taken on January 14 and 15, and alumni are asked to send in orders as soon as possible in order that an estimate may be made of the number of books to be published.

All checks and business matters relating to the Oregana should be sent to Gibson Wright, manager of the Oregana, care of the A. S. U. O., campus. The price of the book is \$4.50, plus postage.

The Oregana staff, appointed last term by August DeWitt, is: Mary Clerin and James Case, both of Portland, associate editors; Sol Abramson, Portland, administration section;

Clifford Zehring, Portland, drama; Dorothy Meyers, Medford, events; Larry Riddle and Jimmy Leake, Portland, feature; Eugenia Strickland, Memphis, Tenn., forensics; Margaret Skavlan, Eugene, literary; Ned French, Medford, military; Hilton Rose, Portland, medical; Josephine Ulrich, Portland, music; Jeanne Gay, Portland, publications; Lillian Luders, Portland, underclass; Norma Wilson, Portland, women's athletics; Harold Wynd, Eugene, pictures; George Godfrey, Eugene, sports; Elizabeth Cady, Portland, women's organizations; Rolf Klep, Astoria, art; Lillian Baker, Portland, honor organizations; Margaret Vincent, Oswego, senior section; Helen Cantine, Portland, junior section; Dorothy Akin and Seigrid Martinson, picture mounting.

The business staff, appointed by Gibson Wright, manager, is: Kenneth Stephenson, circulation; James Manning, assistant; Virgil Wiley, assistant; George Ross, advertising manager.

MEDICAL SCHOOL GOSSIP

It may be of interest to readers of OLD OREGON to know something of the whereabouts of the members of some recent Medical School classes. Many of the 1924 grads are serving internships in hospitals.

Dr. E. H. Barendrick, '24, and George A. Bendshadler, B.A. '20, M.D. '24, are at St. Vincent's Hospital, Portland.

Dr. W. F. Hollenbeck, '24, is at the Presbyterian Hospital, Chicago.

Dr. Wayne A. Hunt, '24, is at Fresno County Hospital, Fresno, California.

Dr. Norris Jones, B.A. '22, M.D. '24, is at the San Francisco City and County Hospital.

Dr. R. W. Hausler, M.A. '23, M.D. Iowa '21 has been appointed to an internship at the Shriners' Hospital for Crippled Children, Portland.

Dr. Marion LeCocq, '24, and Richard Thompson, B.A. '20, M.D. '24, are at Multnomah County Hospital, Portland.

Dr. R. Mast, '24, Dr. J. R. Mizner, '24, Dr. Max Simons, '24, and Dr. M. E. Wilson, '24, are all at Good Samaritan Hospital, Portland.

Dr. Clarence Moffatt '24, and Dr. Floyd South, B.A. '17, M.D. '24, who are at St. Anne's Hospital, Chicago, say that they like the work very much but find the weather too cold for the pleasure of Oregonians.

Dr. Rieta C. Hough, B.A. '19, M.D. '23, has finished her internship at the Children's Hospital in San Francisco and is located with Dr. Helen Lee in Los Angeles, California.

Dr. E. P. Steinmetz, '18, and clinical instructor in gynecology at the Medical School, was married recently to Frances Jones.

Dr. M. L. Margason, B.A. '20, M.D. '23, is with the Medical Hospital Clinic in Portland.

Mrs. Martha Westwood Wyatt, B.S. '23, is technician in the department of anatomy at the Medical School.

Dr. Carl Phetteplace, B.A. '20, M.D. '24, is at Powers, Oregon.

Dr. and Mrs. C. H. Thienes left recently for San Francisco, where Dr. Thienes has a research fellowship of the National Research Council at Stanford University. Dr. Thienes, M.A. '23, M.D. '23, has been instructor in pharmacology at the Medical School. They expect to remain in San Francisco for a year.

Hobart Belknap, a senior at the Medical School, and Lucile Snyder were married in Portland on December 30, 1924.

Marjorie Mulheron, who received her Oregon Public Health Nursing Certificate in '23, has announced her engagement to Rowan Whealdon. Mr. Whealdon is with the Oregon Tuberculosis Association.

Joy Gross, who was acting librarian at the Medical School, 1923-24, is now branch librarian for the Los Angeles public library.

Dr. J. S. Backstrand visited the Medical School recently. "Jerry," who was on the campus, 1917-19, took his first two years of medical work at the Medical School and then went East to the University of Pennsylvania, where he took his M.D. degree in 1923. Since that he has been interning in the East and in California and specializing in pediatrics. He now plans to locate in Oregon.

S. Glenn Morgan, B.A. Pacific University '19; M.D. '23, has located in Astoria and is limiting his practice to gynecology and obstetrics.

Dr. Clinton H. Thienes, who received a research fellowship.

Miss Velma Watson was appointed October 1st to act as assistant in the Medical School Library. With two full time staff members, it is now possible to have the library open from eight to five daily and to give increased service.

The Interurban Medical Society, consisting of internists from San Francisco, Los Angeles, Seattle, Tacoma, Spokane, and Portland, met at the Medical School, December 19 and 20.

Dr. W. K. Livingstone, B.A. '13, who was University physician on the Eugene campus during 1923-24, is now practicing in Portland and is a member of the teaching staff of the Medical School.

The present officers of the Alumni Association of the University of Oregon Medical School are: Dr. I. M. Lupton, M.D. '15, president; Dr. Dorwin Palmer, M.D. '15, vice-president; Dr. R. R. Staub, M.D. '20, secretary; Dr. Kittie P. Gray, M.D. '00, treasurer. The association is planning to offer a typical short post-graduate course in connection with the annual meeting to be held in the early summer.

Dr. Anna Mumby, M.D. '22, and J. Wesley Mendenhall of Spokane, Washington, were married in November. Dr. Mumby took her pre-medical work at Whitman, where she belonged to the Delta Gamma sorority. Mr. Mendenhall is a Phi Delta Theta from Whitman. After her graduation from the Medical School, Dr. Mumby was health supervisor in the Portland public schools.

French R. Moore, Oregon 1918-22, and a junior at the Medical School, and Juanita Jackson, ex-'24, were married in Portland during the Christmas vacation. Mr. Moore is a Sigma Nu and Miss Jackson a member of Alpha Omicron Pi.

Dean Seabrook, M.D. '23, is with the Medical Hospital Clinic in Portland.

Dr. Wilmot C. Foster (center), assisted by Mrs. Vida Sherwood and Arthur Jones, is demonstrating in one of the Medical School laboratories. All of the best equipment and most approved methods of surgery are brought into play in these demonstrations.

Kenneth Smith, junior in medicine, who has received the 1924-25 fellowship in pathology provided for by the gift of Dr. Noble Wiley Jones.

Medical School Location Bureau

THE Medical School has established a department which has for its function, first, the discovery of physicians in the Northwest area who are interested in changing their place of practice; second, the securing of information concerning communities not served by physicians or desirable locations in larger centers; and finally, the passing on of this information to the doctors interested.

This department is a part of the University's plan to be of state-wide service and the School of Medicine is attempting to keep pace with the other departments in extension work. It is a sign of the times in the field of medical practice that there is a dearth of physicians for the small towns and rural communities. This shortage will not be so acute, however, if accurate information is available for those who may be interested. The yearly improvement of highways, moreover, is breaking loose from isolation district after district which before was undesirable as a place for the practice of medicine.

In the operation of the bureau a description of the community in need of a doctor is forwarded to all those who are listed as interested in such information and this description is also sent to the full list of former students who have just completed one or more years hospital internship. During the past two years the attractions of more than two hundred locations were distributed

Gifts to the Medical School Library

By BERTHA HALLAM, *Librarian*

THE past year has seen some fine gifts of books and periodicals sent to the Medical School Library by the physicians of the state. In many cases these were given by men who formerly were students here. The library is very different now than in the past when it occupied one small dark storeroom and contained only a score of medical journals and a few texts. Now our space is much more adequate and we are well started on the road toward a good usable library. Needless to say, our wants are many and varied. We need both books and journals—the latter especially to fill in gaps in our sets. The gifts that have been received have been fully appreciated and have been placed where they can be most advantageously used.

Those who have sent us material during 1924 are: Dr. C. M. Barbee, Stevens Building, Portland; Dr. M. C. Barber, Palm Building, Medford; Dr. E. T. Beeson, Myrtle Creek; Dr. I. C. Brill, Journal Building, Portland; Dr. W. H. Byrd, Salem; Dr. R. C. Coffey, Stevens Building, Portland; Dr. J. F. Dickson, Selling Building, Portland; Dr. O. D. Doane, The Dalles; Dr. R. H. Ellis, Corbett Building, Portland; Dr. K. P. Gray, Park Building, Portland; Dr. H. W. Howard, Journal Building, Portland; Dr. F. P. Johnson, Park Building, Portland; Dr. C. U. Moore, Corbett Building, Portland; Dr. A. E. Rockey, Stevens Building, Portland; Dr. Laurence Selling, Stevens Building, Portland; Dr. O. B. Wight, Stevens Building, Portland; Dr. Ella M. Wickstrom, Park Building, Portland.

Medical School Graduate Students Meet

THE graduate and research students of the Medical School met at dinner on January 15th and were addressed by Dean Sheldon, representing the University of Oregon.

Nine students are at present working toward advanced degrees, and a number of others are doing research under the direction of various members of the teaching staff, in connection with their medical studies.

The variety and interest of the problems under investigation by different members of this group may be gathered from the following list of topics on which work is now in progress:

1. Studies on the bone-marrow and spleen.
2. The innervation of the human lung.
3. The epidemiology of mild respiratory infections.
4. Uric acid estimation in blood.
5. Color-index of blood relation of hemoglobin to number and volume of red blood cells.
6. The innervation of the uterus and oviducts.
7. The superior colliculus and its connections.
8. Salmon-poisoning in dogs.
9. Experimental production of arteriosclerosis.
10. Statistical study of the thymus from autopsies.
11. Coronary obstruction.
12. Ochronosis.
13. Statistical study of nephritis.
14. Immunity studies on *Streptococcus viridans*.
15. The deep cerebellar nuclei in the opossum.
16. Nerve terminations in the viscera.
17. Thyroxin.

A glimpse of Sam Jackson Park, with the city of Portland in the background. The gift of this 88-acre tract of wooded hill and valley provides for the expansion of the Medical School on Marquam Hill.

Dr. Parsons' Book Chosen

"An Introduction to Modern Social Problems," a book written by Dr. Philip A. Parsons, director of the Portland school of social work, has been adopted as a text book for a course in sociology at the National summer school, Logan, Utah. Dr. Parsons' book, which has recently come from the press, was chosen by Dr. Charles A. Ellwood, president of the American Sociological Society, who will offer the course next summer.

To Search for Special Aptitudes

Dr. B. W. DeBusk, of the school of education, has been hired by the Portland school board to spend a part of each week in Portland as head of a department of research and guidance. The function of the department will be to discover boys and girls with special aptitudes and to give them particular attention.

Portland Extension Grows

Last term 1,684 students were enrolled for the courses offered by the University Extension Division in Portland.

Married During Holidays

Luceil Morrow, '20, was married during the Christmas holidays to Ralph Martin Osvoid, who is in the collections department of the United States National Bank of Portland. Mrs. Osvoid is a teaching fellow in the English department of the University, and will take her master's degree in June.

Sophs Adopt Blue Jeans as Official Garb

The sophomore men initiated the custom of wearing blue jeans as the official class garb on the campus early this term. These trousers are made of ordinary blue denim, but are equipped with the latest style in wide cuffs and wide belt straps.

Dr. Wood Publishes Book

Dr. Louis Aubrey Wood, a new member of the faculty of the economics department, has recently published a book, "History of the Farmers' Movement in Canada." The book was edited by the Ryerson Press of Toronto, and deals with the development of the farmers' movement in Canada.

Eighty-Four on Honor Roll

Eighty-four students were named on the Honor Roll for the fall term. These students, of which 52 were women and 32 men, received no grade less than a B in their academic work. Grades received in required physical education, personal hygiene, and military were not counted in compiling the list.

Dean Allen at Chicago

Dean Eric W. Allen, of the school of journalism, attended the annual meeting of the American Association of Schools and Departments of Journalism and the American Association of Teachers of Journalism, held in Chicago December 29, 30, and 31.

Fred Lockley Offers Prizes

A set of Dickens and five dollars as first and second prizes for the two students doing the best work in Dean Allen's editing class has been offered by Fred Lockley, of the Oregon Journal.

A glimpse of one of the children's clinics of the Portland Free Dispensary. The People's Institute and Dispensary gives free medical aid to people of Portland and the state and at the same time is a laboratory of practical experience for the students of the Medical School. Juniors and seniors in medicine meet there each day for supervised work under the physicians in charge of the clinics. Last year 6,384 treatments were given to children in the dispensary clinics, and the number increases each year.

Grace Edgington and Leonard Jordan Are Married

OF GENERAL surprise was the marriage of Grace Edgington to Leonard Beck Jordan on December 31 at Bend, Oregon.

As alumni secretary and editor of OLD OREGON, Grace Edgington was in touch with most of the alumni family. She was the first editor of OLD OREGON to remain on the job for more than two consecutive issues and under her guidance the magazine was changed from an erratic, intermittent fledgling to a permanent publication with a printing schedule calling for nine issues a year.

As an undergraduate, Mrs. Jordan majored in journalism and was a member of Theta Sigma Phi and Mortar Board. She is an honorary member of Pi Beta Phi. Both Mr. and Mrs. Jordan were charter members of the Oregon chapter of Phi Beta Kappa.

After graduation she was secretary of the school of journalism of the University of Washington for three years. She returned to the campus as a member of the English department faculty and as alumni secretary. She also acted as dean of women to fill out the term of Mrs. E. E. DeCou. For several years she has been national organizer of Theta Sigma Phi, national women's journalistic fraternity.

It was at the close of the last spring term that Mrs. Jordan resigned to go to her ranch in Central Oregon for a much needed rest and change.

"Len" Jordan won his laurels on the campus as a member of the football squad. He is one of the few men who belong to both the Order of the "O" and Phi Beta Kappa. Previous to his matriculation at the University, Jordan attended Utah Agricultural College, where his course was interrupted by the World War. He holds the commission of second lieutenant in the United States Infantry. At Oregon, Jordan was a member of Alpha Tau Omega, Beta Gamma Sigma (commerce), Beta Alpha Psi (accounting), Friars, Order of the "O," Agora, and Phi Beta Kappa. He majored in the school of business administration and after receiving his B.A. took some work toward an advanced degree in economics. He is at present office manager of the Thurlow Glove Company in Portland.

Mrs. Jordan will stay on her ranch at Sisters, Oregon, for the remainder of the winter and will move to Portland in the spring.

Helen Dennis, M.D., Instructor in Pediatrics. Dr. Dennis will be remembered by old Oregon grads of the '10, '11, and '12 classes as Helen George, who thrived on hard assignments under Dr. Boward. As Dr. Helen Dennis, she is now prospering as one of Portland's specialists in diseases of children, and at present has the distinction of being the only woman giving instruction to the students of the Medical School. Dr. Dennis' clinic is at the Portland Free Dispensary on Friday afternoons and is known as the Infant Feeding Clinic. On these afternoons her wing of the dispensary swarms with babies and anxious mothers. Some of the babies cry, but that is because they haven't attended the clinic long enough.

Play Nets 2-6-0 For Gift Campaign

TO EUGENE theatre goers, whose love of real art in the drama, is so seldom gratified because of the rarity with which such things come, the performance of "You and I," by the Moroni Olsen Players with Janet Young, '14, in one of the leading roles, provided one of the most delightful evenings of the year for the appreciative audience. Every member of the company was a star, and each carried the audience with him, through chuckles of mirth and gales of laughter to a few tears in the more serious parts of the play.

The presentation of "You and I" in Eugene was for the benefit of the Art Museum fund of the University. Miss Young bought out her company for the night and gave all the proceeds to the Gift Campaign. The Eugene Branch of the American Association of University Women, who handled local details, report that after local expenses are paid, such as newspaper advertising and theatre rental, the net proceeds will be about \$260.

The company is playing this year in some 24 or 25 towns of the northwest in a series of three plays. They are planning to carry out much the same program next year with a new series of plays.

Dr. Hugh A. Dowd and Dr. Marion LeCocq are the two most recent students of the Medical School to be honored with membership in Alpha Omega Alpha, national honorary medical fraternity. Dr. Dowd came to the Medical School from McMinnville College, while Dr. LeCocq completed his pre-medic work at the University of Oregon. Both men received the degree of Doctor of Medicine

THE MASTER-WORD

THE following excerpt from an address delivered to the Medical School of the University of Toronto by Sir William Osler, Bt., M.D., F.R.S., seems particularly fitting for the annual medical number of OLD OREGON.

"It seems a bounden duty on such an occasion to be honest and frank, so I propose to tell you the secret of life as I have seen the game played, and as I have tried to play it myself. You remember in one of the Jungle Stories that when Mowgli wished to be avenged on the villagers he could only get the help of Hathi and his sons by sending them the master-word. This I propose to give you in the hope, yes, in the full assurance, that some of you at least will lay hold upon it to your profit. Though a little one, the master-word looms large in meaning. It is the open sesame to every portal, the great equalizer in the world, the true philosopher's stone, which transmutes all the base metal of humanity into gold. The stupid man among you it will make bright, the bright man brilliant, and the brilliant student steady. With the magic word in your heart all things are possible, and without it all study is vanity and vexation. The miracles of life are with it; the blind see by touch, the deaf hear with eyes, the dumb speak with fingers. To the youth it brings hope, to the middle-aged confidence, to the aged repose. True balm of hurt minds, in its presence the heart of the sorrowful is lightened and consoled. It is directly responsible for all advances in medicine during the past twenty-five centuries. Laying hold upon it Hippocrates made observation and science the warp and woof of our art. Galen so read its meaning that fifteen centuries stopped thinking, and slept until awakened by the De Fabrica of Vesalius, which is the very incarnation of the master-word. With its inspiration,

Harvey gave an impulse to a larger circulation than he wot of, an impulse which we feel today. Hunter sounded all its heights and depths, and stands out in our history as one of the great exemplars of its virtue. With it Virchow smote the rock, and the waters of progress gushed out; while in the hands of Pasteur it proved a very talisman to open to us a new heaven in medicine and a new earth in surgery. Not only has it been the touchstone of progress, but it is the measure of success in every-day life. Not a man before you but is beholden to it for his position here, while he who addresses you has that honour directly in consequence of having had it graven on his heart when he was as you are today. And the master-word is *Work*, a little one, as I have said, but fraught with momentous sequences if you can but write it on the tablets of your hearts, and bind it upon your foreheads . . ."

SIR WILLIAM OSLER, Bt., M.D., F.R.S.

Late Regius Professor of Medicine, Oxford

Honorary Professor of Medicine, Johns Hopkins University

SUCH HIGH STANDARDS

STUDENTS must make three hours in a term to be allowed to stay in college. Students who

make three hours but not more than eight in one term are placed upon probation and are required to make seventeen hours in two terms.

Forty-six students were dropped at the end of the fall term under the three-hour rule. One hundred and ten achieved probation.

The faculty is to vote in February upon a motion to raise the three-hour requirement to five hours for freshmen and seven hours for other students. Gymnasium, military, and personal hygiene are counted in as hours made.

Truly, a flunker has distinction: he achieves the apparently impossible.

THE BEST ADVICE

"THE Cornell Club of Cleveland, on an invitation to a luncheon, hands out the best piece of advice that we have seen in a coon's age. It is a little motto that ought to be emblazoned on the walls of the office and of the library and of the living room of every college graduate. Yet it is a very simple little that we have done so; whereas, if we tried to 'keep educated,'

That points to the trouble. We come to college to 'get educated,' and afterward rest content in the erroneous belief that we have done so; whereas, if we tried to 'keep educated,' we might eventually get the real thing."

—The Michigan Alumnus.

And that reminds us to wonder again what Dr. Meiklejohn meant last spring when he told us on the campus that probably the first duty of a university is to educate its alumni.

Multnomah County Hospital and the Medical School on Marquam Hill.

OREGON POETRY

EDITED BY MARGARET SKAVLAN, '25

A delightful French pastry of a poem, which should properly be saved for dessert, but which we, like the naughty little boy, insist on eating first, is "Suppose," by Helen L. Schuppel, '25.

Suppose

Suppose the world were apple pie,
And that the sea were ink;
That little girls who never cry
Should always dress in pink—

And all of life were play-pretend
With summer all year through—
I can't see but we'd want to end
The stupid bore, can you?

—Helen L. Schuppel, '25

With reminiscences of the snow, and all its chilliness and charm, we offer this:

After the Storm

Snow has painted all with White.
White.
Unclothed trees shiver
Coldly.
Shovels rasp on pavings,
Where good citizens live.
But for that,
The world is muffled dead.

What is so still as a
Winter morning,
After the snow?

—Hope

From another man (yes, we will reveal the fact that "Hope" is a "Mr.") we have, with much difficulty, extracted the following poem. Mr. Byers knows the winds and tides, the sea and its moods, and his poem has the dignity of being true as well as graceful. The poetic figure is perfectly carried out.

One Breath

Life is but a wind
A breath of air—
Strong, vibrant
In youth
As a gale at sea
Or whipping through
Straggling oaks on an upland terrace.
Sterner in maturity—
A land breeze
Greeting a ship in the offing
Or waving discontented marsh grass
In its watery abode.
Gentle in senility—
Moaning sweetly through the forest
Whispering softly in the pine cones
Lapping water on a pebbly beach.

--Monte Byers, '24

Restraint, coupled with a pictorial quality, ever an interesting characteristic of Miss Oliver's poetry, is noteworthy in the following:

In Silence

You who have never felt the cutting glow of a mountain wind
Will never strive for breath in lowland calm.

You who have never seen the shining chastity of a moonlit
magnolia blossom
Will shed no tear that careless hands have touched it black.

You who have never heard the lonely howl of a desert coyote
Will feel no dull revolt at the shrill, relentless clanging of a
city.

You who have never loved—so never suffered—
Will neither feel nor see nor hear the slow, deep breaking of
my heart.

Merle Oliver, '25

Impressionistic, but very effective, is "Desire," by Eleanor L. Buley:

Desire

The shimmering depths
Of a liquid pool
Reflect the glories
Of a world
Unknown.
I see
But cannot feel—
Only reflections.

A bird's song.
My ear catches
That last refrain,
Lost on the winds—
Never to be found.
The futility of effort
Stabs my heart.
I feel—so small.

Eleanor L. Buley, ex-'25

Oriental in form and mood, startlingly simple and consequently significant, is the little three-line poem by Marion Lay. Miss Lay is now in New England, where she is engaged in newspaper work.

A Hokku

The brown garden worm
Thinks of God perhaps, while I
Think only of you.

—Marion D. Lay, '24

EDITED BY WEBSTER A. JONES

Tiny Shields Benefit Game

The \$5,000 which sixty men battled for on Multnomah Field, Christmas Day, in sawdust and pulverized ice before the 2,500 people who braved the chilly weather to watch the football game between the Oregon Alumni and Mike Moran's all-stars will help a long way toward the recovery of Tiny Shields, Oregon's former football star. Unique was the game itself, for never before in the history of football in Oregon has such a spirit of comradeship been shown between football players. There was also a unique gathering of stars back in suits again with all their old fight to put forth for the benefit of Tiny Shields.

The score was immaterial. The game ended 6 to 0 in favor of the Oregon Alumni after a fumble by the all-stars on the 25-yard line near the opening of the second half. Lynn Jones, powerful Oregon half, bucked the fall over for a touchdown in five plays after the alumni received it. The game was replete with thrills and spectacular playing which the years had not dulled in the old stars. Long passes, long runs and line bucks featured. The alumni used up their bag of tricks—chief of which was the famous "dead man" play, that was executed again by Shy Huntington and Bill Steers—the same play which beat Pennsylvania back in 1916.

Never before has such a group of football heroes been brought together. Sixty football players with football history back of them gave their time willingly for the cause.

Played on a slippery field with a penetrating cold, the success of the plays was unusual. Not a man was hurt in spite of the lack of conditioning, the hard tackling of the old heroes, and the dangerous condition of the field.

For the Alumni, Shy Huntington, pilot of the 1916 team, barked the signals with all his old snap. Moe Sax and George Mimnaugh relieved him in the last periods. There was a group of bril-

Basketball Schedule, 1925

Jan. 10.—Willamette at Eugene.
 Jan. 16.—Pacific at Eugene.
 Jan. 22.—M. A. A. C. at Portland
 Jan. 23.—Pacific at Forest Grove.
 Jan. 24.—Willamette at Salem.
 Jan. 27.—Whitman at Eugene.
 Jan. 29.—Montana at Eugene.
 Jan. 31.—U. of Wash. at Eugene.
 Feb. 7.—O. A. C. at Corvallis.
 Feb. 9.—W. S. C. at Eugene
 Feb. 13.—Idaho at Eugene.
 Feb. 20.—O. A. C. at Eugene.
 Feb. 23.—Whitman at Walla Walla
 Feb. 24.—W. S. C. at Pullman.
 Feb. 26.—Idaho at Moscow.
 Feb. 28.—U. of Wash. at Seattle.

liant halves, Vine Jacobberger, Dutch Gram, Francis Jacobberger, Skeet Manerud, Hal Chapman, Nish Chapman, Bill Steers, Bill Spear, Bill Reinhart, and Jens Terjeson. At full were Hollis Huntington and Lynn Jones. In the line was Tegart and Bob Mautz at ends, with Mart Howard, Stan Anderson alternating. Tackles were Bob Earl, Lloyd Tegart, Ken Bartlett, Dick Reed, Fred Carlberg and Hill. Guards were Carl Mautz, Gilbert, Keyes, Strowbridge, Spike Leslie, Acres, Gene Shields and Dunsmore. At center were Bark Loughlin and Jake Risley. That's a list of Oregon's most famous players, almost.

For Mike Moran's All-Stars there was another galaxy of shining lights, another list of famous names. They came from almost all the schools of the coast.

Cac Hubbard and Pelouze started at ends, with Rose and Carpenter relieving them. Faville, Nix, Teratrovich, Ashmore, Luce and Tallas held down the tackle positions. F. Busch, Marsh, Schneiderman at the guards. At center were Berry and Palette. Quarterbacks were Eldon Jenne and Clipper Smith. Halves were Hughie McKenna, Houston Stockton, McIvor and Borleske. Fullbacks were Workman and King.

Varsity Basketball

If a start means anything, the 1925 varsity basketball team ought to accomplish big things this season, for in the initial game of the season the squad crushed Willamette University by the overwhelming score of 65 to 31. It was a game full of surprises, for the Bearcat five came to Eugene with all the dope stacked up in their favor. The varsity had only two veterans in the lineup and before the game Willamette was expected to be the winner.

One thing the game showed, and that was the calibre of the new men on the squad. They had showed up reasonably well in a pre-season game, but the first game of the season was a test of their metal and they came out well. It was the new men on the team who came through with the surprises, for the old ones were veterans and reliable.

With a schedule which is the most ideal that the Lemon-Yellow squad has had for years, there is time left for Coach Bill Reinhart to whip the team into better shape for the conference contests. It is so arranged that six games are played before the regular conference season starts. These six games are with Pacific, Multnomah Athletic Club, and Willamette—two games with each of the first and third and one game with Multnomah. By no means are they set up, for they will give the varsity some stiff workouts. On January 27, the first conference contest occurs with Whitman at Eugene. From then on until February 28 the season will be in full swing. This year there will be no confusing "kings X" games or two games played with a team and only one of them counting on the conference rating. Oregon plays the University of Washington, Idaho, Washington State College, Oregon Agricultural College, and Whitman two games each during the entire season. The other conference game is with Montana in Eugene on January 29.

The three veterans on the team makes a strong foundation. Gowans and Hobson, forwards, are both stellar men.

Gowans can be shifted to the center if need be. Gillenwaters, the big find of last year, will be back to hold down his regular guard berth. He is stocky and a demon when it comes to fight.

The rest of the team will probably include Okerberg at center. Okerberg, playing center, in the first game of the season was the high point man on the team with his uncanny knack of looping the basket from sneak shot positions. He appears to be the big find of this year. Westergren came up from the frosh squad of last year with a reputation for fight and it will be that fight which will make him one of the most dependable guards on the team this season. Jost, tall and rangy, another guard, is expected to hit his stride this season. He has the height and is only lacking in experience. Other men who are showing promise are Gunther and Stoddard from last year's benchmen; Hughes, James Reinhart, Childs, Lewellen and Carter. Louie Anderson is also out and fighting for a position on the squad.

With an ideal schedule, a good start, and a group of promising men out, the season bids to be a successful one.

The combination is fast developing team work. Although this was ragged at times in the first game, it will undoubtedly improve with the intensive practice ahead of the team. Reinhart has cut the squad down to thirteen men—a workable number. Fundamentals—and Bill Reinhart insists on the value of fundamentals—have been drilled into the team for two months. Team play is being organized on this ground work of fundamentals.

The two veterans have played together before—Russ Gowans and Hobby Hobson. They will be depended on for the scoring of the Oregon team. Hobson is fast on floor work and is getting his shooting down better. Gowans, rangy and tall, is playing his third and last year. He has reached the height of his form. He is a fast worker on the floor as well as a good shooter. The guard berth filled by Gillenwaters is well taken care of by him. This is his second year on the varsity.

Freshman Basketball

The first call for frosh basketball brought out over seventy-five men in suits. Coach Dave Evans will start weeding out the group until he has a workable squad within the first three weeks of practice. From the number of men turning out, the season's prospects are good. It will be a big job for Evans to pick a team out of the group. He is assisted this year by Eddie Edlunds, former varsity letterman in basketball.

The likely looking men have not had a chance to show their wares, for the drill has been on fundamentals of the Reinhart style of play. Fundamentals will be drilled into the recruits for some time before any attempt at team play will be made. Dave Evans, freshman coach last year, succeeded in turning out a creditable team last year which went through a successful season.

Richard Shore Smith, '01, who was elected Advisory Coach of the University of Oregon football eleven to succeed Joseph H. Maddock. "Dick" Smith was twice chosen All-American fullback and during his playing days was captain of two collegiate elevens, Oregon and Columbia University, New York, where he took his law degree in 1903. He played on Oregon teams from 1896 to 1901. The February issue of OLD OREGON will contain a complete account of the election of Mr. Smith and the retirement of Joe Maddock. At the time OLD OREGON goes to press, the executive council has not yet announced the details of the contract.

This auto truck carries medical students to the top of Marquam Hill.

Varsity Track

Seven lettermen are back in school this year in preparation for the hard track season. Intensive work has begun on the oval on Hayward field and will continue till the end of the season. Bill Hayward has planned competition for the men turning out every Saturday with a big inter-fraternity track meet at the end of the term. The lettermen back are Rosenbergs, captain of the squad; Cleaver, Kelsey, Carruthers, Ager, Kinney, and Eby. This will give Hayward a strong foundation upon which to build his 1925 track team. The season's schedule is the hardest faced in years, but the outlook is decidedly good. Ninety men have signed up for either varsity or freshman track.

NEWS OF THE CLASSES

1879

Dr. William Henry Parrish, is a practicing physician and surgeon in Vallejo, California. He lives at 136 Tennessee street.

1880

Whitney L. Boise, 412 Railway Exchange building, Portland, is a lawyer by profession. Recently he and his brother Reuben P. Boise, of Salem, contributed \$50 each to the Mary Spiller Scholarship fund.

Adolphus Fielding McClaine lives at 1212 Summit boulevard, Spokane. Mr. McClaine is a banker.

1883

Mr. and Mrs. Jos. W. Howell (Emma Cornelius, '83) live at 408 East Eighth street, Portland. Their daughter, Ruth Howell Morgan, is a member of the class of 1912.

Hannibal Blair is in the poultry business, at Puyallup, Washington. His address is 804 Main avenue, S. E.

1885

Mrs. J. Franklin Taylor (Mattie Thompson) who attended the University in the year '81-'82, is deputy county treasurer at Montesano, Washington.

Dr. Charles Hines, a physician of Forest Grove, attended the University one year. He received his M.D. from Bellevue Hospital Medical college.

Mrs. Mollie Brattain Scott, ex-'85, lives at East Main street, Springfield, Oregon. Her three children, Paul L., Randall B., and Mrs. Ruth Scott Byrne are all Oregon alumni.

1887

Dr. Otis Dole Butler is a physician and surgeon at Independence.

George G. Brown, who attended the University for three years and later received the bachelor of laws degree from Willamette, is clerk of the State Land Board. He lives at 605 N. Sumner street, Salem.

Edwin O. Potter represents Lane County in the State Legislature now in session at Salem.

1888

Mrs. John L. Taft (Minnie Taylor), who attended the University for a year with the class of '88 lives at 537 N. Clay avenue, Kirkwood, Missouri.

Mary Bolinger Rutherford, ex-'88, lives at 1505 Broadway, Salem.

Charles A. Moore, who attended the University from 1884 to 1887, is a lawyer at Baker.

J. F. Boothe, a Portland lawyer and graduate of the class of '88, has his office in the Board of Trade building. He lives at 697 East 22nd St. N.

1890

Mr. and Mrs. Frederick C. Nolf (Clara Condon), live at 5236 17th, N. E., Seattle. Mrs. Nolf received her B.A. degree in 1890, and M.A. degree in 1893.

Louis K. Brooks is an orchardist, living on Route 4, Yakima, Washington.

Mahlon C. Harrison, who spent the year 1886-87 on the campus at Eugene and 1891-92 in the law school in Portland, has retired from active business and is living at the Fairmount hotel, 940 Mason street, San Francisco.

Dr. Charles E. Hill, is a physician with offices in the Oregonian building, Portland.

1892

Mr. and Mrs. John S. McClure live at 505 Malden avenue, Seattle, where Mr. McClure is assistant manager of the safety deposit department, Peoples Savings bank.

The classes of '92 and '96 claim Mr. and Mrs. Herbert T. Condon (Maude Wilkins), of 4718 Twenty-first avenue, N. E., Seattle. Mr. Condon is comptroller of the University of Washington.

1893

Fred W. Davis lives at Reedley, California, where he is a builder by occupation and a "farmer for recreation."

Mr. and Mrs. Ernest Seaborg (Mabel Hunter, ex-'93), lives at 626 Thirteenth avenue, N., Seattle, Washington.

1894

Mrs. Estella Miller Painter lives at Shedd, Oregon. Her address is R. F. D. 1, Box 32.

1895

John R. Oatman, LL.B., '95, is an attorney at law in Portland. His address is 462 N. E. Ninth street.

Lewis Denham is a lawyer at Elgin. Two of his three daughters, Helen and Louise Denham, are attending the University this year.

Herman A. Calef is in the retail furniture business in Portland.

1896

Mr. and Mrs. Walter Biam Hurlbut (Emma Roberts, ex-'96), are living on a ranch at Marshall, Saskatchewan, Canada. Mrs. Hurlbut gives her occupation as "farmerette."

Dr. H. R. Biersdorf, M. D., '96, is a physician and surgeon in Portland.

Mrs. Ella Pringle Brown (Dr. Ella Pringle Brown), has retired from active practice and is living at 420 Thirty-seventh street, Oakland, California.

Byron C. Spencer, who attended the University one year with the class of '96, is a farmer at Route 3, Palouse, Washington.

Dr. Thomas I. Marks is a physician at Halsey.

1897

Beulah Bowman Stalker (Mrs. William Hyde Stalker), lives at 913 Prospect avenue, Toledo, Ohio.

Dr. Alfred H. Ruedy is a practicing physician and surgeon at 705-6 Wakefield building, Oakland, California.

Dr. and Mrs. John Henry Rosenberg, of Prineville, sent their son John Wistar, familiarly known as "Chick" to the University where he is majoring in pre-medics and has made quite a name for himself as an athlete.

Dr. E. E. Cable is a practicing physician in Portland. He lives at 695 E. Burnside.

1898

Clinton P. Haight is publisher of the Blue Mountain Eagle, the weekly paper at Canyon City.

Dr. James Dillon Plamondon is assistant superintendent of the Eastern Oregon State Hospital, at Pendleton.

John E. Nash is in the railway mail service. He lives at Milwaukie.

Mahon H. Day is state manager of the Northwest National Life Insurance company, in Portland. Mrs. Day was Mary E. Marsh, of the class of '99. The Days, including three children, ages fifteen, eleven and eight, live at 591 E. Fifty-first street, N., Portland.

1899

Dr. James H. Carrico, who received his A.B. from Oregon in 1899 and later his M.D. from the University of Illinois, is practicing in Portland. His office is in the Oregonian building.

Mr. and Mrs. H. F. Evans (Grace Murray, '99), live at Route 2, Baker.

Is he a hard taskmaster or a loved leader?

IF you are a good soldier, you take orders from the major. But there is a great deal of difference whether you find the training an irksome routine or an enjoyable development.

When you follow the right major in your course, the work can become vitally interesting, and your college career will be more worthwhile.

“But what is my right line of work?,” may be a puzzling question. All the thought you can give to finding the answer will be fully repaid. Analyze yourself and you will surely discover your natural aptitude.

And when you’ve found what line you feel you ought to follow, stick to it. Stand by your major and your major will stand by you.

A Strong Bank

is essential to your peace of mind, in connection with your finances.

A strong mercantile house is equally essential to your peace of mind in connection with your purchases of expensive surgical and medical equipment. It is worth while to experience that sense of security which comes with the knowledge that a substantial business house stands ready to protect you against loss in connection with your purchases of expensive X-Ray and surgical equipment.

It is a singular fact that the successful men of affairs today always try to conduct their business with strong, successful institutions. They consider "where they buy" almost as important as "what they buy."

This house enjoys the confidence and the patronage of the successful men in the Surgical and Medical professions of the Northwest. For twenty years we have served them.

Mr. and Mrs. David Lloyd Stearns (Natrude Larsen, ex-'23) live at 1007 East Hoyt street, Portland.

Mrs. Ray Minor Rogers (Gwendolyn Darbee, ex-'24) lives at Redmond. Mrs. Rogers majored in music.

Research in the Medical School

(Continued from page fifteen)

in its halls today but who knows? There may be some there to inspire the next generation. Its instructors are no longer like "geese wandering in the fog" in science; the light has dawned and disclosed some swans with their feet on the ground and their heads high, searching the horizon for new truths.

This work is being carried on without any special funds for research--without endowment of the library. These obstacles must not prove stumbling blocks. Research cannot grow and thrive without adequate library facilities. A good library is to research workers what the telescope is to the astronomer--without it, the horizon is limited and dim.

The enthusiasm and spirit that comes with original investigation is already showing itself among the students. Many of them are sensing the buoyancy of research and are postponing their medical degree in order to satisfy a hunger for first-hand knowledge. Such spirit and enthusiasm properly guided and nourished can build an institution.

Report of the Medical School to the Regents of the University of Oregon

(Continued from page eight)

department of the Doernbecher Hospital. It is respectfully requested that acknowledgement be made thereof.

The sum of the gifts in one year, it should be noted, exceeds by far the appropriation for the Medical School for the biennium.

Immediate Needs of the Future

The biennial budget of the Medical School has been prepared and submitted to the Budget Commission, supported by personal appearance before the commission by Regents Geringer and Gilbert and the dean. The appropriation for the previous biennium was \$200,000 for maintenance and operation. That requested for 1925-26 is \$239,000. The increase is represented by several sorely needed features. The clinical departments have, up until the present, received practically no appropriation, all work being carried on by practitioners. It is necessary to enable better supervision of patients and students, to employ upon a part time basis three or four physicians at modest salaries. Moreover, the equipment for teaching, both in hospital and dispensary, is quite inadequate. Of the \$39,000 increase, \$27,000 is for the above purpose. The balance of \$12,000 is required for an elevator, an ice machine, an automobile for the transportation of students from the car line to the Medical School, replacing a car now nearly worn out, the employment of a gardener, and for an increase in library equipment and books. The items are explained in detail in the budget.

Attention should be called to the fact that the request of the board to the General Education Board for an appropriation of \$1,000,000 to match a like sum to be raised locally, including state appropriations, is still under consideration and action thereon was deferred at the last meeting of the General Education Board until its next meeting. Including all items acquired since the request was made, we have already secured in gifts \$300,000, and if the requested appropriation from the legislature is granted, it will bring our portion to about \$600,000. A recent visit by the president of the General Education Board was most encouraging.

The Class Endowment

And How It Can Be Done Through Life Insurance

THE JOHN HANCOCK MUTUAL LIFE INSURANCE COMPANY worked out this problem for the 1923 graduating class of the Massachusetts Institute of Technology, and is ready to do it for others.

Many graduating classes, wishing to benefit their Alma Mater have turned to the insurance idea since it allows the participation of a large number of students.

This plan provides for the payment of a certain specified sum to the University at the end of 20 or 25 years, the members of the graduating class paying a nominal sum each year to create an endowment. In case of the death of a graduate before the endowment matures his full share is paid into the fund.

Every student is given a chance to put his John Hancock on the dotted line and become a continuing contributor to the future welfare of his Alma Mater. It has been successfully carried through in a number of cases, and it can be done with your institution.

The John Hancock organization will be glad to render any service it can, to college classes and individuals; also to interest ambitious college men in life insurance work.

ALBERT F. KAHN, Architect

Drawn by Hugh Ferriss

*“In Terms of
the Colossal”*

THE co-ordination of commercial strength, architectural vision and engineering skill which created this titanic quadruple office building represents the motive and creative force which has turned the eyes of the world toward this type of American architecture.

This, the largest office building in the world, possesses fundamentally magnificent largeness in its conception, and a clean-cut directness in its execution which place it among the most significant of American buildings.

With such existing structural achievements no architectural future is impossible, no project too vast or too complex to come readily to our imagination.

Certainly modern invention—modern engineering skill and organization, will prove more than equal to the demands of the architecture of the future.
