GENERAL DYNAMICS

DIVISIONS

To and From

As a reader of "To and From" for many years, it came as a considerable surprise when I was asked to write it. But in putting the finishing touches on this issue, his last as editor, Les Anderson asked if I wouldn't like to pass along a few random thoughts as his successor.

I welcomed the opportunity. However, when it came time to put some of my thoughts onto paper, I found myself in somewhat of a dilemma because I suddenly realized that alumni support for any University can be as vital as buildings and budgets.

The opportunities for service by alumni to the University are unlimited. And regardless of age or means, there is one way each of us can assist the University in its effort to maintain high quality and to improve its position as a leading institution in American higher education.

Most persons presume that the program of a university is to prepare the individual to maintain and improve his economic position. A few visualize a program of study which gives meaning to life, and which provides an understanding of the responsibilities of each to his fellow man.

We all enjoy the pleasure of being part of anything successful. The ever increasing reputation of the University of Oregon as an educational institution is a source of great pride to us and when the University is praised we are pleased to acknowledge that we attended Oregon.

The stature of the University will be enhanced if we continue to have more fine young students to benefit from the educational menu laid before them and who can, after graduation, successfully take their places in the business and social world.

Wouldn't it be fine if we would each encourage just one high school student to attend our school so that they too might gain the knowledge and experiences which are the key to successful personal life, a success which is a direct indication of the quality of the purpose of the University.

My hope is to motivate the alumni to encourage the real students and leaders in high school to attend Oregon, to help in arranging an Alumni program which will prove of interest to the alumni and to gain their support of the University. Further, I hope to prompt the alumni to put the Alumni Association to its intended use as a vehicle of the graduates.

The future of the University is limited by the faith of the alumni and by the imagination and industry of those who have been and who are now a part of its program. It is my objective to contribute my utmost effort to assure an outstanding future for Oregon. The suggestions, criticisms, and support of the Alumni will be a necessity for the accomplishment of the objective. Please consider this an invitation to make your thoughts known.

COVER

When Bernie Freemesser was appointed director of the University's Photographic Bureau to succeed Art French, we asked him if he wouldn't shoot some random scenes of the campus. Bernie kindly obliged. Among the two score pictures he produced was this shot of Johnson Hall reposing in a frame of rich foliage, and typifying the tranquil atmosphere that surrounds the summer campus. Incidentally one of Bernie's first field assignments was to take pictures of the anthropology department's dig for a story appearing on page 6.

FORMER BEND HIGH GRIDDER Chuck Austin teams with other heavyweights to give the Oregon line heft at the tackle spot.

Oregon's

OUTSTANDING BASEBALLER Johnny Keller looms as a leading candidate for the quarterback slot this fall. Good speed, accurate passing and astute play calling are among his attributes.

NUMBER 14 WILL BE MISSING in the Oregon backfield this year. Here Shaw smiles as he gains a first down in the WSC game last year.

JERRY NELSON, left, a senior guard and another product of Marshfield high school and HARRY JOHNSON, right, huge tackle, will team up on the right side of Oregon's line to give opponents plenty of tough opposition. Both have two years varsity experience to their credit.

FABULOUS PHIL McHUGH will prove this year that he was one of the very best ends on the coast last year. A fine receiver, Phil improved his blocking technique during the spring.

Untested sophomores and an indomitable spirit hold the key to a successful season as one analyzes

Gridiron Hopes

By Art Litchman

Director, Athletic News Bureau

OREGON'S FOOTBALL FANS have a job ahead of them early this fall familiarizing themselves with the personnel who will make up Coach Len Casanova's squad.

The four-year men who started with Coach Casanova in 1951, like George Shaw, Harold Reeve, Ron Pheister, Jack Patera, Chuck Greenley, Dean Van Leuven and Lloyd Powell, are gone. There are also other familiar names like Walt Gaffney, Keith Tucker, Leroy Campbell, Dave Lowe, and Larry Rose which won't be heard this season.

It all adds up to quite a list and while the job of learning the new names might prove troublesome for the fan, the task of filling places on the Duck squad is even a bit harder.

When Coach Casanova meets his squad on September 1, 18 of his players will have played in prior seasons, 24 are brand new and two are returning from the service.

It will be a young team, too, for there are only six seniors reporting, with the remainder of the club made up of 18 sophomores and 20 juniors.

Two positions, end and fullback, best exemplify the "new names" theme in the Oregon football picture for this fall. There are eight ends listed and only one of them, Phil McHugh, was a varsity Duck in 1954. At fullback, none of the four listed now were on the 1954 varsity.

And there is a brand new face on the coaching staff, too, with Jerry Frei joining Cas. Jack Roche, Johnny McKay and Bill Hammer. Vern Sterling left in the summer and Hammer moved from the job as freshman coach to line coach. Frei, a former University of Wisconsin lineman who started his coaching career in Portland and then moved to Willamette University was added to handle the frosh as well as help with the varsity.

While the line of veterans is thin, it is a

very important one in the Webfoot scheme of things for the fall. Experience is one of winning football's most important ingredients and the "old-timers" are going to be very important in putting together the strongest possible club in the fall.

Dick James at left half certainly ranks with the PCC's best, for he tied for the scoring championship last fall and was among the conference leaders in every offensive and defensive department except passing.

Capt. Lon Stiner and Reanous Cochrane are the two regulars in the 1954 line who are returning and their performances at left tackle and left guard will be even more important this fall.

Earlier McHugh was named as the only returning end, and the coaches think he'll be one of the best to play for Oregon in some time. He had a brilliant sophomore year after switching from his prep position at fullback and his future appears extremely bright.

NEW FRESHMAN COACH and newcomer to the Oregon staff Jerry Frei will work with the varsity squad until the freshmen turn out. Frei comes to Oregon from Willamette university.

There are others, too, like Harry Johnson at tackle, Spike Hillstrom at guard, Art Weber at center and Tom Crabtree and John Keller at quarterback who will be stepping into jobs as starters for the first time and finding the lessons learned as reserves well worth the effort.

Not many observers think much of the Oregon chances in the PCC race and some relegate the Ducks to eighth while others won't go any higher than sixth or seventh.

Coach Casanova and his staff are not quite so gloomy. They think their 1955 Webfoots might well surprise more than one team along the 10-game schedule. They will get their first answer at Salt Lake City on Sept. 17 and then will play Southern California, Washington, Colorado, California, Arizona, Idaho, Washington State, Stanford, and Oregon State on successive weekends.

Cas said in mid-summer, "It's pretty hard to tell how many we'll win and how many we'll lose. We had a good spring practice and the team worked awfully hard. We think our spirit will make up for some of the inexperience and it looks like we'll have a lot of fun playing. Nobody thinks we can do very much, so we might shock them a time or two before the year is over."

Several rookies are going to play important roles in the plans for the surprises. George Slender of Santa Rosa JC and Bruce Brenn of Boise JC (if he recovers from injuries suffered in a summer truck accident) demonstrated in spring practice they are

capable ends and the same is true of two sophomores, J. C. Wheeler and Milt Blevens.

Jack Morris, a 1950 freshman, and Fred Miklancic of Boise JC both gave ample evidence of their ability to play fullback with Morris rating as one of the fastest men on the squad.

The new halfbacks include Jim Shanley of North Bend and Leroy Phelps of San Bernardino, both sophomores, as well as Jack Brown of East Contra Costa JC and Chuck Osborne of Menlo JC. All four are fast and give evidence of providing the Webfoots with their fastest backfield in years.

The service returnees are led by Harry Mondale, a 1951 guard, Jim Jacques, a 1952

guard and Terry Picknell, a tackle with Morris on the 1950 frosh squad.

In the middle of the line Hal Duffy, Jerry Kerschner and John Raventos of the frosh must help fulfill the important job of backing up Stiner and Johnson while Steve Bigelow of Coos Bay and Jack Hillicker of Santa Rosa JC are considered excellent additions at guard. At center, Norm Chapman of Medford and Jack Pocock of Boise JC will give Weber a rugged fight for the starter's job.

And so it goes, veteran and rookie, combining to hold the key to the success of the Oregon team this fall. A full roster is listed here so you may better learn of these newcomers who will be prominent in the coming months.

Eugene Public Library
Eugene, Oregon

Named in honor of Virgil D. Earl, former dean of men, the new men's dormitory will be ready for incoming freshmen this fall. The modern new building is located just east of Straub Hall.

A New Home for Oregon Freshmen

THREE HUNDRED and thirty members of the Class of 1959 will embark on a new adventure in dormitory living when Virgil D. Earl Hall opens this fall.

Named in honor of the University's late and long-time dean of men, the new structure will be reserved exclusively for freshmen. It is comprised of five separate units, each containing thirty double rooms, a lounge and dining hall. The dining halls are located immediately adjacent to a central kitchen which serves the entire building.

The building was designed to permit the

efficient operation of the freshman counseling program. In addition to specially-designed quarters for counselors, space is provided for a housemother who will serve all five units.

Each study room contains two desks, bookshelves, wardrobes, and beds which are easily converted to studio couches during the day, plus ample storage space.

The building faces Emerald Street between John Straub Hall and the tennis courts. Built at a cost of \$1,250,000, it was designed by Church, Newberry, and Roehr.

Room interiors feature built-in closets, chests, desks and beds. Broad windows will give plenty of light for studying comfort. Natural wood finish and light colors lend to the cheerful atmosphere of the spacious study rooms.

The hot and arid Oregon desert reveals the bony remains of mammals of another age.

THE CLARNO "DIG" SITE, on the saddle of Iron Mountain in the fringe of the Ochocos, is a barren spot, but is rich in fossilized remains of mammals of the eocene period, beginning of the age of mammals. From this dig the University of Oregon field crew is removing what they hope will be the complete fossil of a *Brontothere* (thunder beast), one of the big mammals. The herbivorous beast roamed the earth with the dinosaur.

The "Dig" at Clarno

By Josephine Moore

SOME EIGHT OR NINE hours away from this campus, time steps backward around fifty million years. On a mountain top, close to the Eastern Oregon mail stop of Clarno, University of Oregon scientists today are digging up the bones of the world's earliest mammals—big boned creatures who walked the earth in the eocene period. For them the clock stopped in that long ago period—around fifty million years back.

It was in the dawn of the age of mammals that a herd of assorted animals—mastodons, hyrachyus (small running sheep-size rhinoceros), metamyndons (aquatic rhinos), titanotheres, brontotheres, and probably some dinosaurs—were settled into a swamp area to form this record that today the scientist reads.

It was a tropic land in Oregon then.

Jungle trees shedding fruit and nuts, and leaves that agatized during the long centuries, added to the picture of the hot and humid land.

The eocene period slid into the oligocene, then to miocene, and then into pliocene. More milenia passed—many of them. The surface of the earth was twisted and tortured and mountains were upthrust where once the swamplands had been. The rain clouds moved to the west and hot dry winds swept over the land, making an arid desert waste.

In the summer of 1954, a very professional amateur paleontologist from Portland, a man who had spent more than 20 years prospecting the Clarno for fossils, made a find up on top of Iron Mountain. Alonzo W. Hancock, who knows the area as perhaps no other man, found evidence that

aroused his curiosity. He started digging. What he uncovered was the start of a fascinating dig that is producing rich rewards for paleontologists.

Hancock was well aware of the importance of his find. He, with many other amateur and professional collectors, had been garnering nuts and fruits from the "nut beds of Clarno" over a period of several years. Until he opened the mammal bed, about a mile distant from the nut beds, no major animal life had been discovered.

Immediate contact was made with Dr. J. Arnold Shotwell, curator of the University of Oregon's museum of natural history and also a veteran of Eastern Oregon field work. Shotwell now directs the dig for the University and under him a crew is at work.

The importance of the mammal bed find is that it is the first of the eocene period discovered west of the Rockies.

The crew, which is opening up new developments daily in the dig, includes Bert Coombs, senior in zoology from the University of California; Ray Harris, Enterprise high school student who has indicated unusual interest in paleontology; and Hancock, who works steadily with the younger men in spite of his more than seventy years.

A number of fine specimens have already been removed. Hytachyus and titanotheres are among the animals found in the dig. Currently the crew is carefully removing what they hope will be the complete skeleton of a brontothere, the thunder beast. They have until September to complete the job. And they'll keep on with the dig as long as it holds "pay." Looks like it might be for a number of years. Test digs some 300 feet away have shown an abundance of bones.

Shotwell is actively at work in another part of the state. He visits the Clarno dig periodically and keeps close track of what the boys are getting, but he spends most of his time at a series of digs near Juntura.

A different type of research is being carried on by Shotwell and his crew in Southeastern Oregon. The digs are of more recent beds—only eight to ten million years old. And the boys are trying to find out something about the effects of environmental change on community organization over a long period of time.

This is Shotwell's personal project—a type of study called paleo-ecology. No successful study like it has ever been made. But the Oregon man has a new method—one that is based on a quantitative study of animal life from a particular place and the

"DIG" DIRECTOR is Dr. J. Arnold Shotwell, whose field crews know as Army. Shotwell is curator of the University's museum of natural history. During the field expeditions, he spends most of his time around Juntura working on a special project, under a grant from the National Science Foundation.

RIBS AND BACKBONE OF A THUNDER BEAST—These bones, fossilized remains of a Brontothere, once one of the biggest mammals to roam the earth, have been uncovered in the University's dig near Clarno. They date back to the eocene period, the dawn of the mammal age.

IMPORTANT FINDS taken from the "mammal beds" at Clarno are these bones held by members of the field crew working the dig. These bones are representative of the animal forms of the eocene period, fifty millions of years ago. Shown in the right hand of Alonzo W. Hancock, Portland paleontologist who discovered the dig last summer is the tooth of a metamyodon (aquatic rhinoceros), and in his left hand is the jawbone of an Hytachyus (small running rhino), and the tusk of a Brontothere (thunder beast). Ray Harris, Enterprise high school student, shows tooth of Brontothere in his right hand and tusk of a Titanothere in his left.

July-August 1955

JUNTURA CAMP, where the crew working out in the paleontological quarries on the edge of Stinking Water Mountains had comfortable quarters. Cooking at this camp was done by Jenny Shotwell, Arnold's wife, who spent the summer there with her two tiny daughters. The crew, four men in addition to Shotwell, drove from this camp to their "dig" sites every morning.

plant life present at the time. The Oregon area around Juntura is particularly good for the job because of the superimposed geological strata giving continuity over a period of time from the upper miocene through the lower, middle and later pliocene.

The Shotwell method demands quarries. That's what the crew over in Juntura is busy opening. They have already opened one representing the aquatic life of the lower pliocene. They have opened others and have found camel bones, fossils of three-toed horses and parts of other animals. A particularly important find was that of a "shovel-tusked" mastodon, not known before in western North America.

From all this research Shotwell hopes to find out what happens to organizations of animals and plants in a community during climatic changes. Take a particular area and time and ascertain what the associated plant and animal life was and then determine the change in associated life forms that came with the change in period.

What happens to the animals? Do they survive? Are they replaced by others? How and when do they change habitat? For instance—how and when does the beaver become aquatic?

Shotwell's method and the area he is working show such promise that the project was financed last year by the American Philosophical Society and this summer and next is being underwritten by the Natural Science Foundation.

The crew at Juntura includes two graduate geology majors from the university—Dick Bowen and Will Gray; Dave Keudell, high school student from St. Helens; and Don Russell, graduate student in vertebrate paleontology from the University of Cali-

fornia who is Shotwell's research assistant.

The camp at Juntura is a pleasant spot, under big cottonwood trees and close to stores and washing facilities. So Shotwell has his family with him during the summer. His family includes Genevieve, his wife who cooks for the crew, and two very small daughters.

To get to the digs each morning the crew starts in an assortment of cars. Those who are not to go in the expedition truck must chart their courses with Shotwell before they leave camp. That's rattlesnake country and the sun gets blistering. Arnold is mighty careful to keep track of his boys. While most of the digs are not too far from main roads, those hills in the sun can be steep and treacherous and he wants a complete tally of men every night.

The camp at Clarno is not so "civilized," but the crew gets a kick out of it. The road through Clarno is off the beaten track and the camp is on a rolling pair of ruts about a mile in from the road. The only shade comes from the tents and from a big canvas over the mess tables, where the crew eats with Hancock Camp—a youth organization maintained for the past five years for kids interested in science.

Clarno has running water—if you turn the spigot of a barrel. They do have a well in a nearby gully, but the water is brought down and stored in the barrels.

The dig is around two miles from the camp up over steep ash-padded Iron Mountain. Up in the saddle of the mountain the crew spends long hard hours under a sun that sometimes reaches 114 degrees and the scrawny old Juniper trees are few and far between. And besides—you avoid the shady side of things because snakes like shade too.

The work? Watching those boys on the

sites gives one a mighty healthy respect for the hard labor and zeal going into such research.

Field work means using such refined tools as a mattock hoe—sometimes known as a man-killer. The mattock loosens the top layer. A pick comes in handy too. That is followed by a shovel to remove loose clods. Close to pay dirt the boys use geologist's picks, small pointed tools about the size of a hammer. Very close to a specimen, they chip away sediment with a small pick and complete the job with whisk broom and soft brush.

Each bone removed must be mounted in a plaster cast. This not only prevents breakage, but also helps assemble pieces. For the castings the boys have to pack in water and plaster—a nasty job. And then they have to figure ways to get the castings back to camp. The latter job often entails ropings and sled riggings for heavy pieces. Some of the castings weigh 300 pounds or more.

At Clarno they have a truck route of a sort—up over a steep-pitched mountain that is anything but easy on the nerves and not to be compared to a feather-bed for smoothness.

The boys take pictures of their finds and then must develop the film in camp. The glaring sun can spoil film in a hurry and it's necessary for them to know that they have the complete pictorial record.

It is hard work but the crews are producing and some day these bones will be mounted in the University's museum—an exciting record of the life that roamed the Oregon hills centuries before the development of man.

A well-balanced athletic program, successful teams, and good management pave the way to another profitable year

The Financial Side of Sports

A STEPPED-UP PROGRAM which saw approximately one-third more students receiving aid failed to produce a deficit report for the athletic department for the past year.

The fifth annual financial report of the athletic department lists a gross operating profit of \$120,483.74 out of a total income of \$497,943.30. Capital improvements of \$54,000 reduced the net operating profit to \$66,483.74. Capital improvements were bleacher seats for Howe Field, McArthur court scoreboard, and other miscellaneous items. The basic cost of \$285,000 for new balcony seats at McArthur court was taken from surplus funds of the athletic department and was not charged against operating expenses for the year.

Modern and spacious offices for coaches and athletic staff were completed during the year and offer a more fitting headquarters for a well-balanced athletic program.

Busy turnstiles were the order of the season for football and proved that an interesting and winning team will bring out the fans. Football income was about twenty percent higher last year. Even the nationally televised game with OSC saw a large crowd in Portland.

The new balcony at McArthur court enabled many spectators to gain admittance who might otherwise have been forced to remain at home. Basketball receipts jumped almost \$32,000 and proved the wisdom of the expenditure for the fine new seats. Another reason for the increase was the income from the trip to the Orient which the team made during the summer.

Workmen are busy at Howe field this summer leveling the outfield and installing fences. The baseball diamond is recognized as the finest on the coast and one of the best collegiate fields in the nation.

Wrestling, appearing for the second year on the department budget, accounted for \$4,586.50 of the expense total but saw a

fine success story written into Oregon's athletic history. Oregon had one individual coast champion and placed fourth in the Pacific Coast conference meet to prove the quality of the program. The future is even brighter and is a solid indication of the well-rounded program of the university.

This year the Pacific Coast conference returned a net income of \$80,832.87 which was an increase of \$46,553.74 over 1953-54.

Television contributed to this gain and with the stepped up TV schedule for the coming year the return should be even greater.

This report lends written assurance that the athletic department operates its budget with the purpose of providing the finest equipment and accommodations for both the player and the spectator and to assist as many athletes as possible to take part in sports activity.

UNIVERSITY OF OREGON Athletic Department Financial Statement Fiscal Year Ending June 30, 1955

New Secretary Takes Over

Bass Dyer '45 of Portland has been appointed to the position of alumni director, replacing Les Anderson '43, according to a joint announcement by the University and the executive committee of the Association.

Dyer, born in Tennessee, lived in Portland where he attended Grant High school. He entered the University in 1941, but did not graduate until 1947 due to an interruption for service during World War II as a pilot-instructor in the Naval air corps.

As an undergraduate he was a member of Skull and Dagger, Druids, and Friars. He is also a baseball letterman, and a member of Phi Delta Theta fraternity. As an alumnus he has served as treasurer of the Portland Alumni association, and vice-president of the Portland Duck club.

Dyer was married to Marion Harris '45 in 1945. They have four children, two boys and two girls. Until his appointment, he was associated with Durham and Bates, Portland insurance firm. He assumed his new duties July 1.

Anderson now becomes director of public services in the President's office. He will be in charge of public relations for the University and serve as director for the University of Oregon Development Fund. Anderson served as alumni director for the past nine years.

In transferring to his new position Anderson stated, "It is with regret that I leave a professional role in the University's alumni work. It has been a great experience. I treasure the many friendships it has brought me, and appreciate the assistance so generously rendered by Oregon alumni everywhere. We are fortunate to obtain the

Les Anderson '43 right, passes along a guide book of successful alumni activities to his replacement as alumni secretary, Bass Dyer '45. Anderson assumes new post as Director of Public Services.

services of Bass Dyer. He is enthusiastic, capable, and sincere. Under his guidance, the University of Oregon Alumni Association will grow and prosper."

A statement by Dyer appears in "To and From" on page 1.

Dean Circles World

Dr. Paul B. Jacobson, dean of the school of education, has returned from Nepal where he traveled to observe the results of a contract which the University has with

the Foreign Operations administration. The contract provides for the establishment of a training program for 1500 teachers.

A four-year degree-granting teacher's college in the mountainous Asiatic country is now being set up. Dr. Hugh B. Wood, professor of education, has served as field representative for the project during the past year.

Jacobson's trip consisted of an around-the-world journey with stops in Washington, D.C., Europe, the Middle East, India, and the Southwest Pacific. In Manila, Dean Jacobson was feted by the Manila alumni club. (See picture).

Anderson Elected

Les Anderson '43 was chosen president-elect of the American Alumni Council at the 40th annual meeting of the national organization in Bretton Woods, N. H. in July.

The Council is composed of more than 700 institutions which have active alumni organizations. For the past two years, he has served as a member of the Board as director for offices. Anderson will assume his presidential duties in July 1956.

The Bretton Woods conference also brought two awards to the Alumni Association. For the third straight year, the letters used in membership renewal promotion were recognized with a first place award in the direct mail competition. For the second consecutive year OLD OREGON placed as the best alumni magazine in the Pacific Northwest district.

Alumni of the University of Oregon gave a dinner in honor of Dr. Paul B. Jacobson, Dean of the School of Education, University of Oregon, who was in Manila on an educational world tour. Those who attended were, first row, left to right; Maria C. Beringuel, Celia Olivar, Demetria Puante, Dean Jacobson, Jesusa Padilla, Lourdes Padilla and Natividad Malolos. Second rows Manuel V. Alcid, Anastacio Bartolome, Remigio B. Ronquillo, Sinforoso Padilla, George Olivar and Benito Padilla.

Judges Appointed

From neophyte attorney in 1932 to Federal district judge in 1955 is the professional success story of Judge William G. East '32. In between those two dates is a story of law practice, family, military service, law practice, city attorney in Eugene, and most recently Lane county circuit judge. Guided always by an attitude of perspective and faith in the ability of the government "to control the governed, yet also oblige it to control itself," Judge East has gained the respect and confidence of attorneys throughout the state.

As Oregon's third federal district judge, East replaces James Alger Fee who is now Federal circuit court judge. Judge East in turn has been replaced as Lane county circuit judge by A. T. Goodwin '47 continuing a long line of U. of O. graduates as jurists.

Goodwin was in the law firm of Darling, Vonderheit & Goodwin until his recent appointment. He has been very active in alumni affairs, currently serving on the executive committee of the alumni association. In 1953 Goodwin was a member of the alumni association deferred living committee.

Pallett Moves Up

The State board of higher education has named Dr. Earl M. Pallett as secretary of the state board. Dr. Pallett has been a member of the staff of the university since 1927. He succeeds Dr. John R. Richards who is now chancellor of the state system of higher education.

Administration of the board's program of high school relations will require about half of Pallett's time. This work was formerly handled by Dr. E. Dean Anderson who is now on the staff of Portland State college.

Other matters involving the university which were considered by the state board were the acceptance of grants totaling \$80,000 for the medical school and \$26,700 for the university, and approval of a one year agreement between the university and the Eugene school district to provide ele-

mentary critic teachers for the elementary teacher education program.

Dr. R. E. Kleinsorge, Silverton, was re-elected to his third one-year term as president of the board. Henry F. Cabell was re-elected vice-president, and Leif Finseth, Dallas, was named chairman of the board's building committee.

McCarty Travels

A 1943 graduate of the university's school of business administration, Frances J. McCarty, as director of the produce division of the Norm-Lee Co., a San Francisco import-export firm, has just completed a round-the-world sales trip. Her itinerary included Australia, Tasmania, the Philippines, China, Italy, France, Sweden, Holland, Germany, Denmark, England and New York.

Immediately after her graduation Miss McCarty was named buyer for the Fidelity Tarding company's export department and in 1951 joined the Norm-Lee Company as a buyer; she was named a director shortly before leaving on her globe covering trip.

Eugene, Oregon

Heads Anaconda

Roy H. Glover '15 has been elected president of the Anaconda Copper company. Glover first joined the giant industrial concern as a member of the legal staff in 1943 and in 1945 was named western general counsel for the company. Two years later he was named vice-president and general counsel and a director of Anaconda.

Recently he has been concerned with the company's operations in Chile and President of Chile, Carlos Ibanez Del Campo awarded him the Chilean government's Order of Merit. This is one of that nation's highest honors and has been awarded to but few foreigners.

Glover started as a law clerk and became one of Montana's leading attorneys. For many years he was interested in stock raising. He is a director of the First Bank Stock corporation of Minneapolis, Montana Power Co., First National City Bank of New York, Metals Bank and Trust Co. of Butte, First National Bank of Great Falls, Heisey Co. of Great Falls and others.

LOOKING UPON NINETEEN TEN IN NINETEEN FIFTY-FIVE

By Dean Collins '10

How changed the face of Nineteen Ten appears
Through the deep waters of the rising years
Whose ripples, by the circling seasons stirred,
Make every outline softer and more blurred!

Yet through the depths of time, I see forsooth
All of those faces bright with endless youth;
And this strange campus, broader and more vast—
A dream beside that small one of the past.

There was a day when, with bright hopes unfurled,
We sallied forth to conquer this old world.
How fast can all these hurried seasons flit!
The world's unconquered—We've made friends with it!

We have found Life a teller of one tale
Over and over, yet it grows not stale,
And always there's an ending, tinged with laughter,
Of somewhere, somehow, "happy ever after."

We have been threads within a weaving vast
That stretches through the future from the past,
And newer threads, from our pattern drawn,
Repeat the pattern stretching on and on.

And the great loom of Time still throbs with thunder,
Weaving the robe of Life, aflame with wonder,
And we are given this day to trace again
The figure that is wrought by Nineteen Ten.

Each one a thread, each thread a colored bit
Of the bright fabric that is wrought by it.
And all together, it can still be claimed—
'Tis a good pattern! We are not ashamed!

Dalzell Retires

Reverend Harold Dalzell '10 retired August 1 as vice-president of Wooster College, Wooster, Ohio. Dr. Dalzell was highly commended for the devoted and valuable service he had rendered the college.

A native of Iowa and a graduate of Oregon, Dr. Dalzell has had much experience in promotion work and has served the Y.M.C.A., the Fourth Presbyterian Church of Chicago, and the Shadyside Presbyterian church in Pittsburgh.

September 1 Dalzell will join the firm of Marts and Lundy to conduct individual church promotion campaigns with headquarters in Wooster.

The Reverend Joseph Harris will replace Dr. Dalzell. Mr. Harris was, at one time, director of the Westminster Foundation and pastor of the Presbyterian students at the University of Oregon.

Ken Youel '23 is now Director of divisional relations for General Motors Corporation.

Youell Promoted

Former director of press and radio relations for General Motors, Kenneth Youel '23 has been named director of divisional relations in the General Motors department of public relations. Youel will coordinate the public relations work of the corporation and the various GM divisions.

A graduate of the school of journalism at the university, Youel has worked for the *Portland Oregonian*, *Brooklyn, N. Y., Eagle* and the *New York Evening Post*. He is a director of the Detroit chapter of the Public Relations society of America.

Wimpress Elected

G. Duncan Wimpress '46, assistant to the president of the Colorado School of Mines, was recently elected vice-president of the American College public relations

association. Last year he was the director of research for the association.

Wimpress holds a B.A. in journalism and an M.A. in journalism and political science from Oregon and was a member of Druids and Friars.

Miller Free Lances

The Freedoms Foundation at Valley Forge, Pennsylvania, has awarded Joe Miller '43 second prize in its national magazine competition. As a successful freelance writer, Miller received his medal for an article "that contributed to a better understanding of the American way of life." He had submitted two essays on the dangers of censorship.

Other articles and stories have been published in *The Reporter*, *Fortune*, *Sports Illustrated*, *Catholic Digest*, *Science Digest*,

The Progressive, the *Lions and Eagles* and *Kiwanis* magazines. Miller does special correspondence work for such newspapers as the *New York Times*, *St. Louis Post-Dispatch*, *New York News* and *Toronto Star*.

While on the campus, Miller was on the staffs of the *Emerald*, *Oregana* and *Old Oregon*.

Buchwach Advances

Buck Buchwach '42 has been named city editor of the *Honolulu Advertiser*.

Buchwach served as wartime city editor of the army newspaper *Stars and Stripes* in Honolulu. For four years after his military discharge, he was on the staff of the *Advertiser* and then for two years was in public relations work for the Hawaiian Pineapple Co.

For a time Buchwach had his own public relations firm. He has served on the Citizen's Advisory committee on Statehood for Hawaii and is a former president of the Honolulu Press club.

Emerald editorials to Jupe Pluvius to withhold his liquid downpour during Oregon football games, gained him much fame.

Washington Meeting

The Evans coffee shop, a colonial inn in Arlington, Virginia, though many miles from the Oregon campus, was the meeting place for eighty-seven university patriots on May 3rd. President Wilson and Alumni association president Ray Vester were University's emissaries to the charter meeting of the Washington, D.C. alumni club. An informal dinner preceded messages from both President Wilson and Ray Vester.

Oregon's congressional delegation was well represented by Senator Wayne L. Morse, Senator Richard L. Neuberger, and Representative Harris Ellsworth.

Carleton Savage, now on the Policy planning staff of the department of state, was master of ceremonies for the occasion and headed arrangements.

MacGregor Travels

To commemorate the birth date of poet Robert Burns and to attend the Burns International Festival, John M. MacGregor '13 traveled to Edinburgh, Scotland early this year.

Mr. MacGregor is president of the St. Andrews society of New York. He proposed a toast to the "City of Edinburgh" and Lord Provost John Banks offered the response.

The loyalty and interest in the university which MacGregor has displayed during the years since his graduation have established an outstanding example for all alumni. He is a past president of the New York alumni club.

President O. Meredith Wilson and alumni association president Ray E. Vester, seated with Carleton Savage, who was master of ceremonies, at a meeting of the Washington, D.C. alumni club. Eighty-seven persons including Senators Wayne Morse and Richard Neuberger and Representative Harris Ellsworth were in attendance.

A PROPOSED SKETCH of the new wing on the School of Art and Architecture shows a small portion of the present building between the two trees at the center of the picture. The Science building is at left. The new structure will cost \$550,000 with construction to begin in November.

Art School Awards

Numerous awards and scholarships, recently presented, reflect the outstanding work of students and staff of the school of architecture and allied arts.

Artists from the state of Oregon contributed nine pieces of pottery to the sixth annual exhibit of northwest ceramics sponsored by the board of directors of the Oregon Ceramic studio. Of the nine pieces, six were by U of O students. Bonnie Butler, Ken Shores, Bob Koutek and Eric Norstad each gained two awards. Norstad also received awards in the 1954 exhibit.

Willard K. Martin and George Schultz, Jr., have received scholarships to study this summer at Fontainebleau in France.

Dean Sidney W. Little of the school of architecture and allied arts has been named a member of the National committee on education for the American institute of architects, and chairman of the northwest regional committee on education for the same organization. This group published a two-volume book relating to the findings on educational problems in the area of professional architectural education and Dean Little has traveled this summer to Washington, D.C. and Minneapolis to implement the report of the book.

Libe Selected

The American Forest History foundation has designated the University of Oregon library as an approved repository of manuscript and other material relating to forest history.

University librarian C. W. Hintz received

the charter at a meeting of the Northwest history conference on May 6 at which time the library was pledged to enlarge its forest history resources and to alert all interested parties and groups to the value of the library records as a primary source of forest history.

The University was selected as the area repository for its previous work in relation to the North American forest industries history. Local chairman of the northwest committee is Dale Fischer '35 of the Fischer Lumber Co. of Eugene.

Summer Session

Unlike many college campuses in summer when several hundred students attend a few scattered classes, the University of Oregon is a pretty busy place. This summer was no exception.

More than 1700 students from all parts of the United States signed up for courses and participated in a series of educational workshops. But not all the summer session activity was centered in the classroom.

A program of cultural and recreational attractions was available for leisure hours. On the cultural side, well known lecturers like Pitirim Sorokin, Harvard sociologist, and artists like Arthur Loesser, famed pianist, could be heard. Members of the University faculty were featured in the weekly Browsing Room series.

Full-length movies such as "The Laverder Hill Mob" and "The Snows of Kilimanjaro" were shown weekly free of charge. The University Theatre's stage and arena shows drew large crowds. The popular "Club Intime" in the Union's Fishbowl pro-

vided top-flight acts in a nightclub atmosphere.

Students and faculty vied in a baseball game at the annual picnic at nearby Armistage Park. (The score was never announced for lack of computation equipment.) Swimming parties, terrace dances, recitals, and a trip to Crater Lake were also featured.

And there were also final examinations.

Advertising Awards

The Advertising association of the west, presented one of its eight top awards to the University of Oregon at its 52nd annual convention in Portland recently.

Jack Brown accepted the trophy in behalf of the University's W. F. D. Thatcher chapter of Alpha Delta Sigma. The advertising achievement award was for the best work by a college advertising group.

GM Scholarship

The largest scholarship ever offered through the University of Oregon has been provided by the General Motors corporation. It will be awarded for the first time to a student entering in Fall 1955.

The award is open to both men and women and is renewable for all four of the undergraduate years. Established on a flexible basis, the scholarship may be for as much as \$2,000 annually, depending on the need of the recipient.

The University will be given one scholarship each year until there will be four scholarships outstanding, one for each class.

University Dean Elected New Hampshire Prexy

In June the University of New Hampshire announced the election of a new president. With that announcement, the University of Oregon lost a dean. Selected as the 12th president of the New England institution was Dr. Eldon L. Johnson, dean of the college of liberal arts and the graduate school since 1947.

Johnson arrived on the Oregon campus in 1945 as head of the political science department. As dean of the college, he guided through a period of unprecedented growth and was instrumental in making significant curricula changes.

Born and reared in Indiana, he attended Indiana State Teachers college from which he received his bachelor's degree. Later he obtained a master's and doctor's degree from the University of Wisconsin. During World War II he was national academic director of the Pre-Meteorology College Training program of the Army Air forces and director of the graduate school of the Army Air forces.

Johnson's ability as an administrator and educator gained him much recognition in Oregon higher education. Remarking on the appointment of their new president, Frank W. Randall, president of the New Hampshire board of regents, described Johnson as "a man of vigor, experience, and great competence. He is admirably fitted to guide us in this important time."

The Johnsons, with their two daughters, motored to Durham, N. H., where they will make their home. Johnson assumed his presidential duties August 1.

Sabine Resigns

Dean Gordon A. Sabine, dean of the University of Oregon's school of journalism since 1950, resigned in June to become dean of the school of communication arts at Michigan State university.

A member of the University staff since 1948, he has been dean since 1950. He assumed this title at the age of 33, making him one of the youngest in the profession.

During Sabine's tenure the University's school of journalism moved from small and somewhat shabby quarters to the modern Eric W. Allen Hall, the only journalism

NEWLY ELECTED PRESIDENT JOHNSON and Mrs. Johnson study a map to find their new home in Durham, New Hampshire where he will head the state university. Johnson assumed his presidential duties at the New England institution after ten years at the University, eight of them as dean of the college of liberal arts and graduate school.

structure in the nation constructed especially for journalism instruction.

Although not an Oregon graduate, he took an unusual interest in Oregon alumni activities, and served as faculty representative on the Association's executive committee for two years.

Charles T. Duncan, professor of journalism, is now serving as acting dean until a permanent successor is appointed.

Physics Grants

Grants have been awarded to two members of the physics department staff for advanced study and research in special fields.

Research corporation, a non-profit group whose funds go toward supporting research, has named P. A. Goldberg, assistant professor of physics, for a one year \$2000 grant. He will study fast fluctuations in the earth's magnetic field. He is now making a study entitled "Extra Low Frequency Geo-Magnetic Phenomena" which is concerned with ionospherics, atmospherics, and solar activity.

A renewal on a National Science foundation grant has been received by S. Y. Ch'en, professor of physics. His research is concerned with the "Broadening of Spectra Lines in the Presence of Fluorine Gases."

Dr. Bernd Crasemann, assistant professor of physics, has also received a research grant from the National Science foundation for special work on radio isotopes.

Ford Grants

Grants from the Ford foundation have been awarded to four University professors for 1955-56. This is the maximum number the foundation allots to any one institution.

Two of the award winners will study at Harvard. Dr. Perry J. Powers will take courses in Greek and comparative literature. Dr. Howard E. Dean, associate professor of political science, will study constitutional law and political theory.

Dr. William A. Williams, assistant professor of history, will participate in historical talks at various universities and re-read major works in the social sciences. Dr. Donald S. Willis, assistant professor of oriental languages, who has been awarded a foreign research fellowship, will travel to Kyoto university in Japan.

Clark Authors Book

The Macmillan company has accepted for publication the biography of Matthew Simpson, Bishop of the Methodist Episcopal church from 1852 to 1884. Author of the biography is Dr. Robert D. Clark, head of the speech department and acting dean of the college of liberal arts.

Part of the 10 to 12 years which Dr. Clark required to complete the work, was spent during 1950-51 on a Guggenheim fellowship, studying the bishop's life.

Reunion Roundup

Five classes—1905, 1910, 1915, 1925, and 1930—and the Half Century Club gathered on the campus Alumni Day, June 11 to celebrate their anniversaries. The sun shone brightly and the campus, enshrouded in green foliage, was never more beautiful.

All returning alumni assembled in the Ballroom of the Erb Memorial Union to hear members of their respective classes bring greetings at the annual University luncheon. Speaking for the classes were: Walter Whittlesey, Half Century Club; Alice Benson Allen '05; Earl Nott '10; Herbert Lombard '15; Gordon Wilson '25; and Paul Hunt '30.

University President O. Meredith Wilson spoke briefly and presented Silver and Golden "O" certificates to the classes of 1930 and 1905 respectively.

Following the luncheon, official class pictures were taken. These appear on the following pages. A campus tour and a reception in Gerlinger Hall rounded out the afternoon's activities.

The classes gathered in the Erb Memorial Union and downtown hotels for their individual dinners. Members of the class of 1905 were formally inducted into the Half Century Club at its banquet in the Union.

Plans are now underway for next year's reunions which will again include the Half Century Club's annual meeting, and anniversary celebrations for the classes of 1906, 1911, 1916, 1921, 1926, and 1931.

'93

Judge Lawrence T. Harris was honored at a public ceremony in Lane county circuit court May 2. The Lane County Bar association presented the county with a large portrait photograph of the former circuit court judge and Oregon Supreme Court justice. The photograph was placed in the courtroom where Harris served as judge from 1905 to 1915.

'03

Dr. Ralph Fenton was an honored guest at the 39th annual meeting of the Pacific Coast Oto-Ophthalmological society which met in Portland. Dr. Fenton has been in practice in Portland as an eye, ear, nose, and throat surgeon since 1907. He joined the University medical school faculty in 1911 and was professor and head of its department of otolaryngology from 1927 to 1946.

'15

Roy H. Glover, vice president and general counsel of the Anaconda copper mining company, was personally presented the Order of Merit by the president of Chile, Carlos Ibanez. This order of merit is awarded for valuable services to Chile. Mr. Glover has been very active in Chile's copper industry. Mr. Glover is one of Montana's most distinguished lawyers, became vice president and general counsel of the company in 1951. He is a director of numerous corporations. Among them are First Bank Stock Corp. of Minneapolis, the Montana Power company, the Metals Bank and Trust company of

A response for the class of '05 was said by Mrs. Alice Benson Allen left. Left to right, Mrs. Mabel Eaton McClain, Arthur R. Stringer, and Mary A. Gray were others present to receive their "Golden O," indicative of their fifty years as alumni.

Butte, the First National Bank of Great Falls and the Heisey Co. of Great Falls. Mr. and Mrs. Glover (Helen Allmanda) live at 915 West Galena, Butte, Mont.

'16

Federal Judge Eugene Soloman presided in the U. S. circuit court in Portland on March 7 when 49 Oregon lawyers were admitted to practice. Among those lawyers were Donald F. Bach '52 and Thelma Chapman Fowler '49.

'18

Major General and Mrs. Harold G. Maisson (Zoe Cornett '22) left by plane for Kansas

E. E. MAYO
SP Pipe Line vice president

and Mississippi in May. They are visiting their son and family in Mississippi and Fort Leavenworth.

'22

Dr. Edwin E. Osgood was one of the members of a panel on "The Diagnosis and Treatment of the Hemolytic Anemias" at the June American Medical association convention in Atlantic City, N. J. Dr. Osgood is with experimental medicine division at the University medical school in Portland.

Dr. Matthew C. Riddle, associate clinical professor of internal medicine at the University medical school, was among ten U.S. physicians to attend a postgraduate course in radioisotopes at Cook County Hospital in Chicago during April.

'23

Kenneth Youel has been appointed director of divisional relations in the General Motors department of public relations. Before joining General Motors in 1931 he worked for several Oregon newspapers.

Bernice Rise was featured in an article in the *Eugene Register-Guard* recently. She was recognized for the many outstanding things she has done to promote more reading among campus students. Outstanding among her projects are the annual student library contest which she originated in 1939 to find the best private libraries owned by students, and the Josephine Evans Harpham silver cup award that is presented to the campus living organization with the best recreational reading program for the year. Miss Rise is the librarian of the browsing room in the Erb Memorial Union.

'24

The following members of the class of 1924 appear as "lost" in the alumni records. Class members who know of their whereabouts are asked to send their addresses to: Oregon Alumni association, 110-M Erb Memorial Union, Eugene, Oregon. Elmer Hardenbergh, Eloise Harris, Betty Garrett Haselton, Carolyn Fish

Hawkins, Claude Hendricks, Clinton Hill, Gladys Thompson Holland, Ted Hollinsworth, Gertrude A. Hopson, Mabel Maude Howard, Nita Howard, Bess Huff, Alice McCurdy Jacobson, Arthur Johnson, Lt. Col. John Johnson, Lyle Johnson, George Johnston, Frank Jue, Melvin Kaegi, Doris Hoefler Keelberg, Edward Keller, Edwin Hall Kelly, Lucy D. Kent, Charles Kenyon, Olive Merry Kersher, Frances Kierman, Earl Kingsley, Ruth Kneeland, Bernard Knipe, Tetsuichi Kurashige.

Dr. Warren C. Hunter, a pathologist at the University medical school, was in New York April 27-29 for a meeting of the executive committee of the American Cancer society. Also in April during a session of the Pacific Northwest society of pathologists at Harrison Hot Springs, B.C., Dr. Hunter presented a report on "Stromal endometriosis."

'25

Among passengers saved from the Pan-American Airways plane that crashed near Coos Bay were **Mr. and Mrs. Claude N. Hollister** (Florence E. Hartman '24). They give their address as care of The American Embassy, Djakarta, Indonesia.

'26

Dr. Arthur C. Jones of the UO medical school gave a series of lectures on physical therapy and rehabilitation at UCLA medical school Feb. 19-26.

Dr. George W. Kidder, Stone Professor of Biology at Amherst College, was in San Francisco April 11-20 attending the American Society of Biological Chemists. Dr. Kidder received national recognition a few years ago for his biological experiments with the compound, azaguanine. Before teaching at Amherst, he taught biology at the College of the City of New York and at Brown university. He is the author of many scientific papers.

'27

Lt. Col. John B. White and family give their address as Rengensburg, Germany. Mr. White is with the 26th Station hospital there. His wife joined him in Europe in February.

DR. GEORGE WALLACE KIDDER '26
Amherst college scientist

'30

Dr. and Mrs. Edward N. Dunn attended the American Academy of General Practice convention in Los Angeles and Honolulu. Dr. Dunn is the president of the Idaho chapter.

Harriet Casey Kuckenberg of Portland was appointed chaperon of the 1955 Rose Festival court.

N. Thomas Stoddard, last year's Portland realty board president, resigned July 1 as vice president of Commonwealth, Inc., Portland. He has purchased the long established real estate firm of Cooley-Rhinehart.

Paul Wagner has been connected with the Floor Division's San Francisco office of Armstrong Cork since 1938, and currently is assistant district manager of that office.

Youthful spirit predominated the reunion of the Half Century club. Nineteen members were on hand to offer a challenge to all others to attempt to remain as young and faithful to school and classmate.

'32

Myron Blackwell of Powell Butte, Oregon, will begin serving next Sept. as principal of Central Oregon Christian high school. Mr. Blackwell has been a farmer for several years in the Powell Butte community but has had 15 years of teaching experience in Oregon. He has been a music director in a number of churches. Mr. Blackwell is a past secretary of the Oregon Bandmasters' association, and past secretary of the music department, Oregon Education association. He is a member of Phi Delta Kappa.

Eva Davis is spending 2½ months with the Jackson county health department in Medford, Oregon, to secure additional experience in public health nursing. She is a member of the school of nursing faculty, UO medical school.

Circuit Judge William G. East of Eugene has been nominated as U. S. district judge for Oregon. Mr. East has been circuit judge in Lane County since 1949. He came to Eugene in 1927 from Kansas, practiced law in Eugene from 1932 to 1949 with the exception of the war years when he served in Europe as a regimental military government officer. Mr. East was a speaker at the April Oregon Broadcasting conference on the University campus.

Kathryn Brigham Walton was elected president of the University of Oregon Mothers club May 14. Mr. and Mrs. **James Walton** live in Salem.

'33

Lt. Col. and Mrs. Laurence E. Fischer (Ruth Staton) moved back to Eugene last fall from Washington, D.C. He was promoted from Major to Lt. Col. last March and is now assistant professor of air science at the University.

Harvey Welch is the new president of the Pacific Northwest chapter, American Institute of Decorators. Welch resides in Portland.

April 1 was the date of the installation of **Ralph Walstrom** as president for 1955 of the Oregon Association of Real Estate boards.

'34

Dr. John P. Keizer, ophthalmologist at the University of Oregon Medical school in Portland, visited departments of ophthalmology at University of Illinois, Northwestern university, New York university, Columbia university and at the University of Pennsylvania. Dr. Keizer returned to the campus May 31.

Francis J. Pallister left Korea in April where he has been chief of the 8th Army G2 air division to serve at Sandia Base in Albuquerque, New Mexico, in the armed forces special weapons project.

'35

Felicitations on the birth of a daughter, Lee, go to **Mr. and Mrs. Victor Jorgensen Jr.** (Barbara Price '38). The baby, born May 19, lives with her parents at 302 E. 41st, New York city.

'36

Dr. Norman Hampton of Eugene is the new president of Lane County dental society. He will serve for the 1955-56 year.

Mr. and Mrs. Gerald D. Blair are parents of twin sons born April 29. The family lives at 2265 Garfield, Eugene.

William James was born April 25 to **Mr. and Mrs. Robert E. Avison** of Portland. The baby has a brother and two sisters.

"WHAT! NO KITCHEN TELEPHONE?"

Of all things, Mr. Bridegroom! Surely you don't expect that lovely new bride to get along without a telephone in the kitchen!

Maybe there was a time when one telephone seemed enough, just as one radio and one bathroom and one car seemed enough.

But everybody is used to more comfort and convenience these days. And there's nothing that makes life so much easier as telephones around the home.

In the living room, of course. In the kitchen, conveniently hung on the wall. In the bedroom, to save steps and for added peace of mind both day and night. For the son and daughter who'd like telephones of their own, with separate listings.

Would you like to know more about complete telephone service and how surprisingly little it costs? Just call the business office of your local Bell telephone company.

Bell Telephone System Complete telephone service for home and business

8 of these 10 cars get smooth knock-free mileage—yet save money!

Entirely new grade Mobilgas* — sold within the price range of regular — is especially made for the 3,200,000 Ford, Chevrolet, Plymouth, Dodge, Studebaker, Nash, and many other pre-1955 cars whose owners want mileage and are tired of having their cars knock and run rough on ordinary regular gasoline.

BIG DOLLAR BENEFITS TO OWNERS— Ferndale refining gives fast starts and knock-free power. Mobil Power Compound keeps engines healthy longer by freeing plugs, valves, and carburetor of harmful, gas-wasting deposits. The combination gives an efficient engine that produces smooth, knock-free mileage.

New grade Mobilgas is made by an entirely new process—comes from the West's newest refinery, the Ferndale Mobilgas Refinery. When

precisely blended with Mobil Power Compound, the Ferndale product becomes new grade Mobilgas.

***THIS IS ONE OF THE 2 WITH BEST OCTANE FOR YOU.** The other is improved Mobilgas Special—especially made to give smooth, knock-free mileage in all 1955 cars and recent models of Buick, Cadillac, Chrysler, DeSoto, Lincoln, Mercury, Oldsmobile, Packard, and Pontiac.

An Entirely New Grade — in the price range of regular!

Mobilgas

now with Mobil Power Compound.

The Class of '10 in their traditional pose from the comforts of their own bench. Mr. and Mrs. Stephen Szender (Florence Jackson) are parents of a third child, a daughter, born March 24 in Seattle.

Twelve members of the class of '15 returned to the campus for their fortieth annual reunion.

"The day
my son's future
began"

"Ken knocked around quite a bit after college. Tried several jobs and did well. But he was never really satisfied. He'd either get bored with the work or frustrated with routine advancement. I didn't worry though. He's bright, sensible, and I knew he'd establish himself soon enough.

"Then, about a month ago Ken breezed into my study and somewhat breathlessly announced that he'd decided to go into the life insurance business. Before I could even look surprised, he explained that he had always been interested in people and that this would give him an opportunity to work more closely with them. And his eyes brightened

when he pointed out how, as an agent, he'd be his own boss—running a business all his own.

"He went on at a mile-a-minute explaining how he'd be thoroughly trained by New York Life experts—with a good salary while learning. How he figured that once he was on his own he'd be able to give his future family the same kind of comfort and security he had always known at home. And he wound up telling me how, someday, he hoped to retire with a good income—just as I will soon myself.

"Then, quick as he came, Ken up and left without even asking what I thought. But of course he already knew. How could another New York Life agent possibly disagree?"

The class of '25 posed on the Student Union steps for this picture of their thirtieth anniversary.

the money a man can earn selling life insurance

FIVE YEARS AGO, Bob Yackels was a senior at Michigan State College. Today, he's the New England Mutual agency manager in Davenport, Iowa — an impressive example of the opportunities a career with New England Mutual can offer a man. There are more than 900 other college trained New England Mutual agents. Their careers also prove that, in life insurance, income is in direct proportion to industry and ability.

How much income can a new agent expect to make?

"I'll give you an example of five new men who were trained as a group in one of our eastern agencies. They were between 24 to 31 years old. Only one had any previous experience in life insurance. By the end of the first year their incomes ranged from \$3532 to \$5645. With renewal commissions, first year earnings would be from \$5824 to \$9702. The average: \$7409."

How does the Company help the agent get started?

"First — a generous financing arrangement which enables the agent to earn while learning. Second — a comprehensive training program, including Home Office courses and field supervision, which develops the professional ability typical of the New England Mutual representative. Third — a continuing service which keeps him posted on economic factors involving life insurance, and outlines fresh sales techniques and new avenues of opportunity. Then there is the support afforded by the Company's advertising campaign in leading national publications. You see, it's not only a matter of helping the agent get started. He's given practical support and service throughout his career."

What would my income prospects be as I gain experience?

"One of our Company associations, 'The Leaders', has a membership of nearly 350 successful agents, most of them veterans. Take the average Leader. He's 46 years old, married, with two children. He's a college man, owns his own home, and earns \$16,000 a year. But there's no ceiling on earnings or waiting for opportunity. Your own efforts and ability pay off directly."

How can I tell if life insurance is for me?

"The Company has a proved selection process for determining your aptitude and will tell you frankly what your chances are for success. If you're interested, write Vice President L. M. Huppeler, 501 Boylston Street, Boston, Massachusetts. No obligation will be implied, either way. Or if you want, send first for the booklet below. It tells why 17 men chose a business career in life insurance selling."

Your health will be better since doctors can now use
the voice of the atom

DOCTORS have long wanted to learn more about the human bloodstream—how it supplies nourishment . . . defends against disease . . . becomes diseased, itself.

THAT WISH IS REALITY today, because atomic energy has given a voice to certain of nature's elements. When these elements are exposed to the powerful radiation of splitting atoms, they become radioactive, themselves, and are called *radioisotopes*. The radiation they give off can be detected and heard with special instruments.

Now doctors introduce isotopes of iodine, iron, sodium, or other elements into the bloodstream. Their course can then be followed to determine the location and nature of the trouble. Isotopes are also becoming increasingly important in actually treating ailments.

ISOTOPES are being used in similar fashion by industry and agriculture to analyze materials, measure wear,

control processes, and to help answer mysteries of how plants absorb nourishment from the soil and how it affects their growth and health.

THE PEOPLE OF UNION CARBIDE operate, under Government contract, the Oak Ridge National Laboratory, the Nation's chief source of radioisotopes, as well as the huge atomic materials plants at Oak Ridge and Paducah.

STUDENTS AND STUDENT ADVISERS: Learn more about career opportunities with Union Carbide in *ALLOYS, CARBONS, CHEMICALS, GASES, and PLASTICS*. Write for booklet 5E-2.

Necrology

Dr. Frederick A. Lieuallen '05, a native of Oregon and a resident of Bend for more than 30 years, died April 2 at a Newport Beach, Calif. hospital. Dr. Lieuallen was the holder of the distinguished service cross and the purple heart. He served with the 91st division of a medical unit in France during World War I. He is survived by his wife, Myrtle, a daughter, Mrs. Barbara Lieuallen Steinhauer '32 and a son, Frederick Lieuallen '36.

Carl D. Christensen '09 died May 5. He had been a member of the law firm of Seitz & Christensen since 1914. Also a member of the Portland Golf club for many years, Christensen was twice holder of the Oregon senior golf championship in the middle 1930s. He was a member of the Oregon state bar, the Multnomah County Bar association, Unity Center church, and many other city activities. Christensen was born in Denmark and came to Portland 50 years ago, serving as a deputy county clerk several years before being admitted to the practice of law. Surviving him are his wife, Boneita, and a son Robert C. '32.

Norwood Ross Charman '10, a well-known retired lumber broker, died May 22 in Aberdeen, Wash. While a student at the University, Charman was a member of the Oregon basketball team and Kappa Sigma fraternity. He has been very prominent in Northwest logging operations and the pulpwood industry. Surviving are his wife, Elsie Baechtel, whom he married in 1916; a daughter, Mrs. J. Michel; and a son, Richard.

Dr. William J. Miller '10 died at the Portland hospital April 29. Dr. Miller was born in Camden, Mich. and came to Oregon in 1900. After his internship in Portland he moved to Condon where he practiced medicine until 1920. He has practiced in Hoquiam, Wash., The Dalles, Oregon City, as well as in Portland hospitals. Survivors are his wife, Martha, and a daughter, Mrs. Isabelle Miller Sleeter '38.

Charles W. Robison '11, one of the state's foremost defense attorneys and a former deputy district attorney of Multnomah county, died March 3. In January, 1954, he retired from his post as deputy district attorney of Multnomah county. He was named to that position in 1951. A native of Oregon, Robison was a defense attorney in some of the state's most widely known criminal cases. He also was a participant in several trials involving labor organizations. Leaving his birthplace at Baker, Robison attended school at Oregon City and Portland before enrolling in the University. In 1913 he was admitted to the state bar. He also was a member of Phi Delta Phi. Robison's first wife, Birdie Wise '12, a civic and educational leader in the state, died in 1949. He and his present wife, Maude, who survives, were married in 1952.

Louis A. Recken '13 died May 21 in Portland. After graduating from the University law school, he entered practice with Frank Senn and Judge William Ekwall. Later, Mr. Recken specialized in trial work. He was a member of the Multnomah County Bar association and the Oregon State Bar. Recently, Recken had been practicing law with his son, Robert L. Recken '39. Survivors are his widow, Lucrece Wood, and a son.

Ella Ellice Shearer Robinson '14, died April 14 in a Portland hospital. She had lived in Yakima, Washington, 39 years. Mrs. Robinson was past president of the Yakima Women's club and was also a member of the Yakima Red

Cross Canteen corps. She is survived by her husband, Earl Robinson '13; a daughter, Mrs. Barbara Becker; three sons, George, Kenneth, and James. Mrs. Robinson was a member of Delta Delta Delta.

Mrs. Gretchen Colton Ruedy '20, passed away in December. She worked as an office secretary for Electrical Workers union, Local 125, AFL for 5 years before her death. Mrs. Ruedy attended Portland academy. While a student at the University she was active in Kwama and Alpha Phi sorority. Surviving her death are her husband, Verner Ruedy, MD '25, and a son, Alfred G. '49.

Eugene L. Crosthwait '27 died Jan. 18 in New York, N. Y. While attending the University he majored in mathematics. In 1934 he married Mabel E. Biddle and was the father of two daughters. Mr. Crosthwait was office manager for the Johns-Manville sales corporation.

Herbert L. Deal '28 died recently in Summit, N. J. He was assistant vice president for personnel of American Telephone & Telegraph company. Mr. Deal began his career with the telephone company in Portland, Oregon. He had attended Willamette university and was a member of Phi Beta Kappa. Mr. Deal is survived by Mrs. Kathryn Kirk '28, and a young daughter, Barbara.

Earl Fox McGuire '33 died during the latter part of March. He and his family had lived several years around Eugene and Marshfield where he was auditor for the Public Utilities commission, owner of Eugene-Reedsport Freight line, and connected with the Coos Bay Lumber Co. McGuire was recently employed with the Cannon Ball Lumber Co. at Arcata, Calif. Surviving him are his wife, Esther Hayden '33, two sons, Earl and Timothy. While attending the University, McGuire was a member of Alpha Tau Omega.

Leslie Whitehouse '36, a former Eugene businessman was recently killed in a highway accident in Texas. Mr. Whitehouse moved to Kerrville, Texas, six years ago and had been operating a motel there. While living in Eugene he was manager of the Smeed Hotel and active in the lumber industry. Whitehouse is survived by his wife, the former Mary Lou Dodds '34.

George W. Stephenson '39, died May 13. Dr. Stephenson, a dermatologist, was graduated from the University medical school and served six years with the 34th armored division. He has lived in Coos Bay, Oregon, since July, 1954. Dr. Stephenson is survived by his wife, Doris, a son, James.

Laurence C. Moffitt '40, assistant superintendent of schools in Springfield, died May 5. He came to Springfield from Grants Pass where he was a superintendent of Josephine county schools from 1945 to 1953. From 1930 to 1945 he was Lane county school superintendent and was one of the youngest superintendents in the country. He is survived by his wife, Mildred, and two sons, Robert and Richard.

Waldemar D. Updike '41, was killed Feb. 24 in a car accident. In 1940 he was employed with the accounting operations division of the Social Security board in Maryland and later served in the United States Coast Guard. At the time of his death he was associated with the Federal Security agency in Portland.

Oliver Kermit Smith '42, a Portland attorney, was killed April 21. Smith was an infantry veteran of World War II and was the wearer of the purple heart and the bronze star. In 1950 he was a candidate for the state senate. He is survived by his wife, Margaret. Mr. Smith was a member of Alpha Tau Omega.
