Education with a Purpose

Medical care and the education of future physicians and health workers in the United States are undergoing rapid change and expansion. Strikingly new surgical techniques and therapeutic advances are being employed by the profession in the care of the sick; fresh new ideas in the approach to the teaching of physicians and those in the allied health professions are being employed; new medical facilities are being built and others are in the design stages.

This is being done to meet the challenge brought about by the enormous expansion of medical knowledge in the past few decades and the demands placed on doctors and educators alike to cope with the emerging needs in Oregon and the nation to provide adequate health care to all citizens.

Since 1887, the University of Oregon Medical School has had as its primary responsibility the teaching of qualified young men and women the art and science of medicine. Its clinical facilities, in addition to serving as teaching laboratories, provide the community with needed-medical services. Investigations into the causes and treatment of disease are a natural adjunct to the teaching programs and today the University of Oregon Medical School conducts a vast and important program of medical research.

Although its major function remains that of providing a standard undergraduate curriculum leading to the degree of doctor of medicine, an equally important area of instruction involving the training of young doctors in specialized areas of medicine has assumed major proportions. The institution also has the added responsibilities of providing instructional programs to nursing students, medical technologists, radiologic technologists, dietetic interns, cytotechnologists, and offers a clinical affiliation in occupational therapy. In addition, a program of graduate studies leading to master of science and doctor of philosophy degrees in the sciences basic to medicine is available. Medical knowledge has and is expanding at a rapid rate, and in order to communicate this new information to practicing physicians this Medical School sponsors an ex-

The opportunities for improving medical knowledge and applying it to human welfare in the years to come will continue to mount. Today—and tomorrow—the average resident in Oregon and in the United States can look forward confidently to a level of health and a life span beyond the highest expectations of his parents and grandparents.

tensive program of continuing medical education.

OREGON STATE SYSTEM OF HIGHER EDUCATION

An Overview

The Oregon State System of Higher Education, organized in 1932, provides educational opportunities to young people and adults throughout the State of Oregon. Member institutions are elements of an articulated system, parts of an integrated whole.

Opportunities for general education are distributed as widely as possible throughout the state, while specialized professional and technical programs are centered at specific institutions.

The institutions of the State System of Higher Education are Oregon State University at Corvallis, the University of Oregon at Eugene, Portland State College at Portland, Oregon College of Education at Monmouth, Southern Oregon College at Ashland, Eastern Oregon College at La Grande, and Oregon Technical Institute at Klamath Falls. The University of Oregon Medical School and the University of Oregon Dental School are located in Portland. The Division of Continuing Education represents all the institutions in making college level courses and special programs available to all citizens. The Division has offices in Salem as well as on most OSSHE campuses.

An interinstitutional booklet, "Your Education," lists fields of study at all State System institutions, and gives other important information-for prospective students. For a free copy, write "Your Education," State Board of Higher Education, P.O. Box 3175, Eugene, Oregon 97403.

State Board of Higher Education

MEMBERS OF THE BOARD

Board members are appointed to six-year terms by the Governor of Oregon with confirmation by the State Senate.

MEMBERS OF THE BOTHE	Expires
J. W. Forrester, Jr., Pendleton	1969
John W. Snider, Medford	1969
Philip A. Joss, Portland	
George Layman, Newberg	1970

GENERAL INFORMATION FOR STUDENTS

The University of Oregon Medical School is located in Portland (population 384,000), the largest city in the state of Oregon. Situated on the Willamette Rivernear its junction with the Columbia River, Portland is a city of diverse business and industrial activities and, although 85 miles from the Pacific Ocean, an important seaport. The city is well-known for its beautiful homes, parks, and boulevards and for its mild climate. The foothills of the Cascade Mountains rise on the outskirts of Portland; Mount Hood, one of the major peaks in the range, towers on the southeastern horizon.

History

Medical education in the Pacific Northwest had its beginning in 1867 when courses and lectures were offered to medical students by the medical department of Willamette University in Salem. After ten years of operation it was decided that the medical department should move to Portland, where the metropolitan advantages of greater population and more hospitals would aid in providing a more complete teaching program.

During this period a group of Portland physicians petitioned the Board of Regents of the University of Oregon to grant a charter for a medical school to be located in Portland. In 1887 the charter was granted and the University of Oregon Medical School became a reality—in a two-room building in northwest Portland.

In 1895 the Willamette University medical department returned to Salem. Because of the limited facilities in that city and the lack of funds to continue operation, it merged with the University of Oregon Medical School in 1913. Under terms of the merger, the students of Willamette's medical department were transferred to the University of Oregon Medical School and received diplomas indicating the consolidation. At the same time the alumni groups also merged.

In 1919 the Medical School moved to its present campus, on a 101-acre tract in Sam Jackson Park overlooking the city of Portland—away from the congested area but within one and one-half miles of the business district. The original tract included 20 acres donated in 1917 by the Oregon-Washington Railroad and Navigation Company and 88 acres given by the late Mrs. C. S. Jackson and the late Philip Jackson in memory of C. S. Jackson, publisher of the *Oregon Journal*. In 1958, the Oregon State Board of Higher Education accepted the gift of an additional 27 acres from the Journal Publishing Company.

Because the location provided an ideal setting for medical center buildings and affiliated units, the University of Oregon Medical School in 1920 conveyed to Multnomah County 9 acres of the campus for the construction of a general charity hospital; in 1926 a 25-acre tract was deeded to the United States government as the site of the U. S. Veterans Hospital.

From 1919 to the present, great advances have been made in the development of the Medical School. The depth and scope of its various programs have continued to expand until today the School has a beautiful campus, fine hospitals, clinics and an excellent faculty.

Physical Facilities

The physical facilities of the University of Oregon Medical School are valued at approximately \$27,500,000, and are keeping pace with the School's expanding programs of education, research and public service.

The First Medical Science Unit (1919), a three-story structure, was financed through an appropriation of \$110,000 by the 1917 State Legislature and by cash donations amounting to \$25,000 from Portland citizens. Mackenzie Hall (1922), the second unit of the Medical Science Building, was financed through an appropriation of \$113,000 by the 1921 State Legislature, matched by an equal appropriation from the General Education Board of New York. Named in honor of the late Dean Kenneth A. J. Mackenzie, the building is four stories high, similar in construction to the first unit, but has twice its capacity. An additional \$50,000 was appropriated by the General Education Board for equipment. A three-story laboratory wing was added in 1939.

The Outpatient Clinic (1931), open to patients throughout the state of Oregon who are without funds to provide for their medical care or who are referred by their physician for consultation and treatment, affords teaching facilities for the clinical branches of the Medical School. Approximately 200,000 patient visits are recorded annually. Funds for the construction of the building were provided through a gift of \$400,000 from the General Education Board of New York. The Outpatient Clinic had its origin in the Portland Free Dispensary founded in 1907 by the People's Institute, a private philanthropic institution. The dispensary affiliated with the Medical School in 1909 and moved to the campus in 1931. A

\$2.5 million, seven-story addition to the Clinic was completed in 1968.

nomah County, has a capacity of 295 beds with facilities for general, medical, surgical, and obstetrical patients. The Multnomah Hospital group includes the *Heating Plant* (1923) and the *Emma Jones Nurses' Dormitory* (1927). Under terms of a contractual arrangement between the commissioners of Multnomah County and the Oregon State Board of Higher Education, the Medical School has access to the hospital for teaching purposes, and the professional staff of the hospital is appointed by the Medical School. This arrangement provides a most successful affiliation for teaching, research and care of the sick.

Multnomah Hospital (1923, 1950), constructed through funds supplied by Mult-

a large outpatient unit, the Julius L. Meier Memorial Clinic. The hospital has medical and surgical facilities for teaching medical students, interns, residents, and nurses. Funds for the hospital were provided through a state appropriation of \$110,000, a Public Works Administration grant of \$130,900 and a gift from Mrs. Grace R. Meier, Mrs. Jack Meier, Mrs. Joseph Ehrman, Jr., and Mrs. Frederick Ganz, in memory of Julius L. Meier.

The University State Tuberculosis Hospital (1939) has an 80-bed capacity and

The Library and Auditorium (1939) was erected through a gift of \$100,000 from Dr. John E. Weeks, a gift of \$100,000 from the Rockefeller Foundation, and a grant of \$163,500 from the Public Works Administration. The Auditorium, with a seating capacity of 600, affords facilities for lectures and scientific meetings.

Renovation and expansion of Library facilities was completed in 1967 at a cost of \$305,000. As a result, one large and six small study rooms were added as were typing, work and duplicating rooms and additional stack tiers.

Gaines Hall (1943), formerly the Portland Medical Hospital, was purchased in 1943 to provide needed housing facilities for students in the School of Nursing. This residence was converted to a general medical services building in 1965.

The Laboratory and Administration Building (1949) was financed through a state appropriation of \$663,000. The building houses facilities for the basic science departments, together with administrative offices for the Medical School.

The Physical Plant Shop and Warehouse (1953), provides shop facilities and a central warehouse for the Physical Plant Department and houses the central

services unit—printing, personnel, instructional aids, and the Medical School's planning office. The building was financed by a state appropriation of \$71,000. A \$48,000 addition to the structure was added in 1958 and a second addition to the building, costing \$200,000, was completed in June 1960.

The Crippled Children's Division Building (1954) has modern office space and clinical facilities for the statewide crippled children's service administered by the Medical School. It was financed through a \$280,000 appropriation approved by the 1953 Legislature.

The University of Oregon Medical School Hospital (1955), a 268-bed teaching and research hospital, was completed in the fall of 1955 at a cost of approximately \$6,300,000. Funds for the construction of the hospital were provided principally from state appropriations, supplemented by several gifts and grants. The hospital contains 127 beds for general, medical, and surgical patients, 28 beds for psychiatric care, and 113 beds for pediatrics (Doernbecher Memorial Hospital for Children).

The original Doernbecher Memorial Hospital for Children was built in 1926. Its was financed through a gift of \$200,000 by Mrs. E. W. Morse and Edward Doernbecher, in memory of their father, the late F. S. Doernbecher, and by other gifts totaling \$120,000. The original hospital building was remodeled in 1957 at a cost of \$366,779 for clinical laboratory facilities, departmental offices, clinic facilities, and student teaching laboratories.

The Student Activities Building (1960), built at a cost of \$358,000, is a two-story structure providing recreational facilities for all student groups on the campus.

The Medical Research Laboratories Building (1962), built at a cost of \$2,611,955, was financed through a state appropriation and matching funds from the National Institutes of Health, U. S. Public Health Service. The entire nine-story building is used for medical research.

The Women's Residence Hall (1964), a modern, \$855,000 structure, houses 170-women students from the Medical, Nursing, and Dental Schools.

The Medical School Farm, on 180 acres southwest of Portland was purchased in 1961 to house and breed animals for teaching and investigative programs. The farm is ideally suited to the raising and breeding of animals in their natural environments.

Although not a part of the physical facilities of the University of Oregon Medical School proper, the U. S. Veterans Administration Hospital, located adjacent to the campus, serves as one of the teaching units of the Medical School. Established in 1928, this government-owned facility has 555 beds. The teaching program includes clinical experience for medical students as well as advanced residency programs. Coordinating the residency program is the Dean's Committee for the Portland Veterans Administration Hospital.

Construction of two additional buildings on the Medical School campus was completed in 1962: new headquarters for the Portland Center for Hearing and Speech, adjacent to the Crippled Children's Division Building, and a fire station, erected by the city of Portland on a site near the Veterans Hospital.

Accreditation

The University of Oregon Medical School is one of 88 accredited schools of medicine in the United States. It is approved by the American Medical Association

and by the Association of American Medical Colleges. Its residency programs have been approved by the Council on Medical Education and Hospitals of the American Medical Association and by the respective American boards (see page 86). In addition, special programs are approved by the American Dietetic Association, the Council on Medical Education and Hospitals of the American Medical Association, and the American Registry of Radiologic Technologists.

Administration and Faculty

Although the Medical School, chartered by the Board of Regents of the University of Oregon in 1887, has administrative and faculty autonomy, the academic position of the School as an integral part of the University of Oregon is established in its charter and is recognized under the organizational plan of the Oregon State System of Higher Education. A legislative act more than thirty years ago combined all of Oregon's state-operated institutions of higher education into the Oregon State System of Higher Education, which is administered by a nine-member lay board appointed by the Governor. The Chancellor is the chief executive officer.

The Medical School has approximately 220 full-time faculty members serving in its basic and clinical science departments and nearly 650 part-time and volunteer faculty members who practice medicine in Portland and the surrounding area and who donate a portion of their time to the teaching and research programs of the Medical School.

Instruction

Medicine is such a broad and extensive field that it is difficult in four years for the faculty of the medical school to teach the student all that is required for the practice of medicine. The objective of a medical education is to enable the student to acquire the requisite amount of basic factual material, a desire to continue his education as long as he remains active or interested in medicine, the ability to evaluate objectively current trends and new advances in medicine, and the attitudes and ideals that are implied in accepting medicine as a "way of life" rather than merely a way of earning a living. The student must understand that high ethical standards are required in both his personal and professional conduct. The over-all education of a physician should not only make him proficient in the science and art of medicine, but should also fit him to assume effectively the civic and social responsibilities associated with his position in the community.

The student is not expected to learn all the skills of any specialty in medical school, but should acquire the fundamentals which will enable him, with further training, to enter any field of general or specialty practice, research, or teaching.

The University of Oregon Medical School provides a standard undergraduate curriculum leading to the degree of Doctor of Medicine. This program begins with an introduction to the normal structure and function of the human body, and continues in the second year with a study of the effects of disease and the methods of diagnosis of disease. The clinical portion of the student's program is largely concentrated in the third and fourth years; much of this training is taken in the wards of the School's hospitals and in the Outpatient Clinic, where students learn under careful supervision and guidance how to apply their scientific knowledge to the care of patients and the prevention of disease.

The Medical School also offers a special five-year program of study for outstanding students leading to both the medical degree and the Master of Science degree.

This program, offered through the basic science departments of the Medica School—anatomy, biochemistry, microbiology, pathology, pharmacology, physiology, and medical psychology—is open to a few selected students each year. A student enters the five-year program after completing the first two years of medicine, and then pursues a combined course of medical and graduate studies. Such students spend three summers and a part of the regular academic years in graduate study. This program affords an unparalleled opportunity for review and consolidation of basic science concepts at a time when the student has had sufficient clinical training to enable him better to appreciate the importance of the basic sciences in relation to clinical medicine. It provides research experience and advanced basic science training desirable for students expecting to enter medical research and teaching as a career and a superior scientific background for clinical medicine.

Five-year medical students assist with teaching in medical laboratory courses during the school year, and with research. In recognition of the value of such students to the departments concerned, and of the necessity of postponing the acquisition of the M.D. degree, such "student assistantships" are accompanied by remunerations.

The Medical School also offers regular programs of graduate work leading to the Master of Science and Doctor of Philosophy degrees, in the basic sciences (see Graduate Studies Catalog), and conducts training programs for residents and interns in the School's hospitals and clinics.

The University of Oregon School of Nursing provides an important instructional program on the Medical School campus. Courses in medical technology and radiologic technology, and a one-year internship in dietetics also are offered. Each year the Medical School conducts an extensive postgraduate program for physicians of the states of the Pacific Northwest, British Columbia, and Alaska (see also page 86).

Research

Although the primary purpose of the University of Oregon Medical School is teaching medical students the science and art of medicine, another and equally important function is medical investigation into the causes and treatment of disease.

In the world-wide struggle to improve the health and thappiness of mankind, millions of research dollars are expended annually in the nation's medical schools. Oregon is no exception. Investigations under way at the Medical School are supported by gifts and grants amounting to approximately \$6,000,000 annually. These funds are made available by private individuals and industry, by foundations and societies, and by the state and Federal governments.

Currently, over 300 research projects are being conducted at the School in virtually every area of the bio-medical sciences. Contributions made by University of Oregon Medical School investigators to medical knowledge have been numerous and have received world-wide recognition.

Library

The Medical School Library, with stacks providing shelving space for 100,000 volumes, which may be expanded to accommodate an additional 100,000 volumes, contains more than 130,000 volumes of books and bound and unbound periodicals. Approximately 1,800 current serial publications are received. Through the privileges of interlibrary loan and microfilm service, it is possible to obtain within a few

days materials not contained in this collection. The Library has a copying machine for the duplication of material in the Library collection.

The book and periodical stacks are open to the public. For the convenience of readers, individual study desks and tables are located in the stacks.

A special feature of the Library is the Historical Book Room housing historical

books on medicine and allied subjects and the Pacific Northwest collection. Most of this literature has been received by direct gift from individuals and organizations or purchased with monetary gifts presented for this purpose. A noteworthy gift of \$2,500 for historical medical books has been given by the Portland Academy of Medicine. In recognition of this gift, the room is reserved for historical reading, research and seminars.

The Library has been enriched through many valuable gifts of books and periodicals. Members of the Women's Auxiliary of the Oregon Medical Association and other friends of the Medical School aid in assembling books and objects of medical-historical interest. The Oregon State Board of Medical Examiners, the Portland Academy of Medicine and the Multnomah County Medical Society contribute to the annual operating fund. Public acknowledgment of gifts to the Library is made annually in the Medical School's gift list.

Students are given a survey of the resources of the Library, and instruction in their uses in four lectures delivered by the librarian during the first and second years of their medical course.

Medical Research Foundation

foundation's scientific review committee.

profit organization to engage in and support educational, research, and related activities. It is administered by a board of 20 trustees selected from the executive faculty and alumni of the University of Oregon Medical School, the Portland Academy of Medicine, the Oregon Medical Association, and private citizens. The foundation's funds are derived principally from gifts, grants, and bequests which are administered by the foundation in accordance with the terms under which they are received. Unrestricted income is used by the foundation to meet critical needs and develop educational and research opportunities as they arise. Grants are awarded by the Board of Trustees on the basis of recommendations from the

The Medical Research Foundation of Oregon was incorporated in 1942 as a non-

Alumni Association

Founded in 1913, the Alumni Association of the University of Oregon Medical School also includes graduates of the Willamette University department of medicine. The association is devoted to the interests of students and graduates and to the encouragement of scientific and professional progress among members of the medical profession generally. Its membership numbers more than 2,700. In the spring of each year, the Alumni Association sponsors a three-day scientific meeting on the Medical School campus with about 400 registrations. Alumni Association officers for 1968-1969 are:

Lendon H. Smith, M.D., '46, Portland President
Robert P. Burns, M.D., '47, Portland Vice President
Glenn H. Brokaw, M.D., '52, Tacoma Vice President
Richard D. Brust, M.D., '59, Independence Vice President

Raymond D. Grondahl, M.D., '44, Butte, Mo

Willis J. Irvine, M.D., '48, Portland	Treasurer

Student Organizations

character.

to join the Student American Medical Association (SAMA), a national medical student organization. The purpose of SAMA is to represent medical student interests on a national scale. Membership is voluntary and on an individual basis. Locally, SAMA, in addition to planning student activities, sponsors scientific noon hour programs and a part-time employment file for medical students and their wives. It also makes available to students life and hospital insurance programs.

Annual dues include a subscription to the SAMA publication, the New Physician

Student American Medical Association. Medical students have an opportunity

Alpha Omega Alpha. Alpha of Oregon chapter of Alpha Omega Alpha, medical college honor society for both men and women, was installed at the University of Oregon Medical School in 1923. The aims of the society are the promotion of scholyarship among medical students and the encouragement of high standards of characenter and conduct. Selection for AOA is made by the active members each spring from the junior and senior classes on the basis of scholastic achievement and

Fraternities. There are three medical fraternities for men at the University of Oregon Medical School—Alpha Kappa Kappa, Nu Sigma Nu, and Phi Beta Pi.

Women students are members of the Oregon section of the American Medical Women's Association.

Alumni of these groups take an active interest in their affairs, and the association of alumni, faculty, and student members constitutes an important benefit of memabership.

Christian Medical Society. The Christian Medical Society (CMS), a nondenominational organization, holds discussion meetings every other week and social gatherings once a month. Students of any religious persuasion are invited to attend these meetings.

Women's Auxiliary to the Student American Medical Association (WASA-1, MA). During the school year wives of medical students meet twice each monthly for social activities and welfare projects. A program of interest to all members is scheduled for each of the monthly business meetings. Small groups, "social clubs,"

also meet once a month. Membership in the auxiliary is about 150.

Interns and Residents Auxiliary of Portland. Wives of interns and residents in Portland hospitals meet each month for a program, social activities, and the planning of service projects. Meeting place is rotated among the Portland hospitals.

Social Activities and Athletics

General invitations are extended to all students to attend special lectures and meetings in the Medical School Auditorium. Notices of these events are posted on student bulletin boards. Several traditional dances and fraternity get-togethers are planned each year by medical student organizations. An annual luncheon for freshmen given by the Alumni Association and the dean's reception for new students

are included in the fall social calendar; a reception for graduates following commencement ceremonies is given by the Faculty Wives' Club. And, of course, all students have access to Portland's metropolitan cultural advantages.

Because of enrollment limitations each year and the highly specialized and concentrated nature of medical subjects, the Medical School is unable to sponsor athletics officially. However, basketball, tennis and squash teams represent the Medical School, and students may participate in an active intramural sports program.

The Student Activities Building, providing recreational and athletic facilities for

the use of all students on the campus, was opened in the summer of 1960.

Housing

While no facilities for housing male students are provided by the Medical School, nany apartments and boarding houses are located close to the campus. An up-to-late list of vacancies in apartments and board houses is maintained on the student pulletin board in the Administration Building.

Under regulations of the Oregon State Board of Higher Education, unmarried women students under the age of 21 who are not residents of Portland or who are of living with relatives must live in institution residences. This applies to students in the School of Nursing as well as those in the medical technology and adiologic technology programs at the Medical School and in the dental hygiene program at the Dental School.

Student Health Service

The Student Health Service operates from fees paid by students. It provides outbatient care during the school day within the limits of the facility. The usual services of the Outpatient Clinic are available, as well as the Clinic Laboratory and the X-ray Department. The Multnomah Hospital Emergency Room is available when acute illness occurs out of hours. Fifteen days of hospitalization for acute medical or surgical disease are available.

Coverage by the Health Service is available if the student is registered for 7 hours or more credit in the current term and has paid the Health Service fee. Students' dependents are eligible for the Outpatient Clinic service. Accessory insurance for all students is designed to give relatively complete coverage in and out of the city and during vacation periods. Married students are especially advised to buy this coverage for their dependents.

Detailed information is provided in the Health Service pamphlet and at the Registrar's Office. All students should obtain copies when they register.

Fees and Expenses

Fees and deposits paid by students at the University of Oregon Medical School are as follows:

Regular Fees

Medical students,	Oregon residents,	per term	\$248.00
Medical students,	nonresidents, per	term	404.00

or less\$15.50 per term hour (minimum, \$31.00 Graduate students employed as research assistants or fellows, per term
Deposits
¹ Deposit to reserve place in entering class (applied on tuition)\$50.0 ² Breakage deposit, per year—first and second years\$15.0 ² Breakage deposit, per year—graduate students\$50.0
Special Fees
Registration and laboratory fee for special students registered for 7 term hours of work or less—\$21.00 per term hours (minimum \$42.00 per term)
Auditor's fee for lectures, per term hour
Transcript fee\$ 1.6 One transcript is issued free; a fee of \$1.00 is charged for each additional transcript.
Evaluation fee
Late-registration fee, per day (no maximum) after an initial charge of \$5.00 for the first day
Graduate qualifying examination fee\$1.00 to \$15.0
16: mg - mg -

Graduate students (candidates for M.A., M.S., Ph.D.), per term...... 143.0

Microscopes

Medical students are expected to provide themselves with microscopes. Microscopes are available for students who wish to rent them, for a fee of \$30.00 a yea

Estimate of Yearly Expenses

The following table represents only estimates based on current fees and results student surveys:

Tuition and fees, full-time nonresident students	1,212.0
Breakage deposit	15.0
Microscope fee	
Books and supplies	135.

Books and supplies 135.0
Board and room 1,000.0
Personal expenses 200.0

See page 29.
 The cost of any damage done by a student to Medical School property is deducted from t deposit; in case the identity of the one responsible cannot be established, a pro-rata charge made against the entire class of which he is a member.

Fee Refunds

Students who withdraw from the Medical School and who have complied with the regulations governing withdrawals are entitled to certain refunds of fees paid, depending on the time of withdrawal. The refund schedule has been established by the Oregon State Board of Higher Education and is on file in the Business Office of the Medical School. Refunds are subject to the following regulations:

- (1) Any claim for refund must be made in writing before the close of the term in which the claim originated.
- (2) Refunds in all cases are calculated from the date of application for refund and not from the date when the student ceased attending classes, except in unusual cases when formal withdrawal has been delayed through causes largely beyond the control of the student.

Regulations Governing Nonresident Fees

Under the regulations of the Oregon State Board of Higher Education, a minor student whose parent or guardian is a bona fide resident of Oregon qualifies for enrollment under the resident fee; a student whose domicile is independent of his parent or guardian qualifies for enrollment under the resident fee if he presents convincing evidence that he established his domicile in Oregon six months prior to his first registration.

All other students are required to pay the nonresident fee, with the following exceptions: (1) a student who holds a degree from an accredited college or university (however, a nonresident student with a bachelor's degree enrolled in a curriculum at the University of Oregon Medical or Dental School leading to the degree of Doctor of Medicine or Doctor of Dental Medicine is required to pay the nonresident fees); (2) a student attending a summer session; (3) a student paying parttime fees.

A student who has been classified as a nonresident may be reclassified as a resident:

- (1) In the case of a minor, if his parent or guardian has moved to Oregon and has established a bona fide residence in the state, or
- (2) In the case of a student whose domicile is independent of that of his parent or guardian, if the student present convincing evidence that he has established his domicile in Oregon and that he has resided in the state for at least twelve consecutive months immediately prior to the term for which reclassification is sought, and that he has no intention of moving out of the state after completion of his school work.

A student whose official record shows a domicile outside of Oregon is prima facie a nonresident and the burden is upon the student to prove that he is a resident of Oregon. If his scholastic record shows attendance at a school outside of Oregon, he may be required to furnish further proof of Oregon domicile.

If any applicant has questions concerning the rules governing the administration

of these policies, he should consult the Registrar's Office.

Part-Time Employment

The academic responsibilities in medical school are such that it is usually impossible for a student to undertake outside employment during the school year without causing academic work to suffer. This is particularly true in the first and second years. Under special circumstances students may find employment in various departments of the University of Oregon Medical School and hospitals during their second, third, and fourth years and during summer vacations.

Veterans' Information

The student must present a Certificate of Eligibility to the Registrar effective prior to the opening day of the course in order to take advantage of veteran's benefits. Questions concerning benefits should be directed to the Registrar's Office.

Fellowships, Scholarships, Grants-in-Aid, Awards

The Medical School has available a limited number of scholarships and fellowship funds for deserving medical students. Applications for scholarships should be filed in the Registrar's Office by March 1 of each year. Scholarships are awarded by the Dean upon the recommendation of the Committee on Scholarships of the faculty of the Medical School.

Noble Wiley Jones Pathology Research Fellowship. This fellowship, established in 1919, consisting of the interest on \$5,000 held in trust, is the gift of Dr. Noble Wiley Jones of Portland. It is awarded annually to a medical student or resident on the basis of scholastic ability, training in pathology, and interest in research in this field.

Summer Student Research Fellowships. A number of fellowships are available to selected medical students for summer research in both basic science and clinical departments. These fellowships provide the opportunity to gain first-hand experience in medical research under the supervision of experienced investigators. Application must be made to the chairman of the department concerned prior to April 1 preceding the summer for which the fellowship is to be awarded. Most of the funds for the summer fellowships are provided through grants from the National Institutes of Health.

Frank Ralston Research Student Assistantship. This assistantship was established in 1946 through a gift of \$5,000 from Dr. Frank Ralston. Since that time additional gifts have increased the principal of the fund to approximately \$13,000. The funds are devoted to research in glaucoma under the direction of the chairman of the Department of Ophthalmology.

Dr. Laurence Selling Research Fund. The Selling Research Fund was established in 1957 through a gift of approximately \$200,000 from an anonymous donor. For several years part of the income has been used for student research scholarships. Students are recommended for the award by a committee of the faculty, and the awards are based on scholastic ability and research promise. Awards are limited to students participating in the five-year program. (See page 83, Five-Year Program.)

Kenneth A. J. Mackenzie Memorial Scholarships. Five \$200 scholarships are awarded annually for the study of medicine, in accordance with the following plan: one \$200 scholarship is awarded each year to the outstanding premedical student at the University of Oregon in the last year of his premedical studies; if the student enters the University of Oregon Medical School and continues to maintain a high scholastic record the scholarship is renewable for each of his four years of medical training; if the student does not maintain a high scholastic record at the Medical School, his scholarship is transferred to the outstanding member of his Medical School class who has taken his premedical work at the University of Oregon. The scholarships are a memorial to Dr. Kenneth A. J. Mackenzie, former dean of the Medical School; they are endowed through a bequest from the late Mrs. Mildred Anna Williams.

Pohl Memorial Scholarships. These scholarships were endowed in 1936 by a gift of \$5,000 from the late Dr. Esther Pohl Lovejoy, in memory of her husband

Dr. Emil Pohl, and her son, Frederick Clayson Pohl. The original gift was supplemented by additional annual donations from Dr. Lovejoy, which increased the endowment to about \$37,000. Awards are made to students of promise in the field of medicine. Two-thirds of the scholarships are given to men students, one-third to women students.

James P. Griffin Scholarships. Three \$500 scholarships are awarded each year from a fund established in 1959 through a bequest from Mrs. James P. Griffin in memory of her husband. Awards are made to worthy and promising medical students on the basis of need and scholastic attainment.

State Scholarships. In accordance with special authorization from the Legislature, the State Board of Higher Education awards annually a limited number of scholarships to students in the institutions of the State System who are residents of Oregon, who rank high in scholastic attainment, and who need financial assistance. These scholarships cover tuition. Recipients must pay the building fee, the incidental fee, and special fees.

George H. Strowbridge Memorial Scholarship. This scholarship consists of the income from a bequest of \$5,000 from Mary S. Muellhaupt in memory of Dr. George H. Strowbridge, a graduate of the University of Oregon Medical School in the Class of 1897. Award is made to a student of the second-, third-, or fourth-year class on the basis of scholastic attainment and need.

Alumni Scholars. The Alumni Association of the University of Oregon Medical School makes awards annually to provide scholarships in the amount of \$500 for selected medical students who have demonstrated superior academic perfomance. Recipients are designated "Alumni Scholars."

Pfizer Laboratories Medical Scholarship. This \$1,000 scholarship, established in 1962, is awarded to a deserving student on the basis of scholastic record and financial need.

- Jackson Foundation Scholarship. An award of \$1,000 is made to a medical student who graduated from an Oregon secondary school, who has the ability to do high quality work in the Medical School, and who is in need of financial assistance. The scholarship was established in 1962.

Emily F. Edson Scholarships. Scholarships are awarded to both medical and nursing students, on the basis of scholastic achievement and need, from a fund established through a bequest under the will of the late Emily F. Edson, administered through The Oregon Bank. The initial bequest, in 1962, was approximately \$54,000.

Surgical Sales Scholarship. The Surgical Sales Company of Portland has for several years provided funds for a scholarship of approximately \$250 per year to a deserving medical student.

Henry Waldo Coe Prize. This prize, established in 1929, is awarded to a second-third-, or fourth-year student in the Medical School who presents an essay on a medical subject exhibiting superiority and originality in composition. The prize consists of the interest on a gift of \$1,000 from the late Dr. Henry Waldo Coe.

Walter J. Rosenfeld Scholarship Fund. This is a perpetual fund established under the will of Walter J. Rosenfeld of Portland. The income from the fund is used annually for two scholarships for selected medical students.

Harold F. Wendel Memorial Fund. The income from an endowment fund established in memory of the late Harold F. Wendel by his wife, Elise F. Wendel, is presented annually to the outstanding resident or fellow in cardiology.

Health Professions Scholarship Fund. This Federal scholarship program was authorized by the Health Professions Educational Assistance Amendments Act passed by Congress in 1965. The Act specifies that these scholarships are available only to students who, without the amount of the scholarship award, could not pursue the required course of study during the year for which the award is made. For the academic year 1968-69 scholarships will be available at the University of Oregon Medical School for students in the first- and second-year classes.

The Roche Laboratories provide an annual award to an outstanding member of the senior class. The award consists of a watch and an engraved scroll. The Up-john Company makes an annual monetary award to an outstanding senior student; Lange Medical Publications awards books to two outstanding students in each class; The Merck Manual Award, a copy of The Merck Manual is made to two outstanding students at the completion of their junior year; and The C. V. Mosby. Company awards a book to five students at the completion of their second year.

Loan Funds

The Medical School has loan funds available for students. In general, loans fall into two classifications—emergency and long-term loans. Long-term loans are generally limited to \$500 a year or to a maximum of \$1,000 to any one student. Emergency funds are available for small, short-term loans. Interest rates vary with the fund used and application should be made to the Medical School Business Office.

Ben Selling Loan Fund. This fund, a bequest from the late Mr. Ben Selling, is administered by the Trust Department of the First National Bank of Oregon.

W. K. Kellogg Loan Fund. In May 1942, the W. K. Kellogg Foundation established a \$10,000 loan fund at the University of Oregon Medical School for the financial assistance of medical students. Preference is given to first-, and second-year students who have demonstrated scholastic ability, character, and need. The usual loan is \$250. Loans are administered through the office of the dean.

F. E. Jacobs Memorial Loan Fund. This loan fund was established in 1950 through gifts from relatives and friends of the late Dr. F. E. Jacobs, a 1929 graduate of the University of Oregon Medical School. Loans are made to senior medical students. The fund at present totals approximately \$1,000.

Dr. Francis Ortschild Memorial Fund. This loan fund, approximately \$65,000, was established in 1960 through a bequest under the will of Viola Ortschild of Portland. It is to be used for loans to needy and worthy medical students.

Joan Balise Memorial Loan Fund. This fund was established in 1960 in memory of the late Joan Balise by her husband, to provide emergency loans to medical students. The fund at present totals approximately \$1,150.

So Chee Sue Scholarship Loan Fund. This fund was established in 1959 by Dr. Julius F. Sue in memory of his father, So Chee Sue, as a perpetual loan fund for senior medical students. The fund now amounts to approximately \$1,050.

M. B. Taylor Loan Fund. A bequest of \$10,000 from the late Millard B. Taylor is used for student loan funds in essentially the same manner as other loan funds at the Medical School. This fund was established in 1967.

Rita Simmons Graduate Scholarship Loan Fund. This fund of approximately \$425 was established in 1967. It is available to medical and graduate students for loans not to exceed \$150 per year.

University of Oregon Loan Funds. Medical technology and graduate students are eligible for loans from the National Defense Education Act Loan Fund on the same basis as students on the campus at Eugene.

Health Professions Student Loan Program. Under the provisions of the Health Professions Educational Assistance Act of 1963, funds have been provided by the Federal government for loans to medical students. The maximum loan available is \$2,500 per year. Preference is given to applicants entering medical school after June 30, 1963.

American Medical Association Loan Fund. The American Medical Association has established a loan fund which provides substantial loans to medical students, interns, and residents, with provision for repayment over a period of several years. Information regarding the fund is available in the Medical School Business Office.

ADMISSIONS
AND
SCHOLASTIC
REGULATIONS

ADMISSIONS AND SCHOLASTIC REGULATIONS

Admission Requirements

High School Preparation. The applicant must have satisfactorily completed a four-year course in an accredited high school or its equivalent.

Premedical Requirements. Because there is no single course of study which best prepares a person for medicine, the student planning to enter medical school should obtain a thorough, sound general education and emphasize in college those fields in which he has the greatest personal interest, whether they be in the sciences or in the liberal arts. It is essential that a good basic preparation in the fundamentals of chemistry, physics, and biology be obtained; but, with this training, a student whose major undergraduate interest lies outside the biological or physical sciences should have adequate scientific preparation for medicine. Intensive scientific specialization will come soon enough, when the student enters the Medical School. While this specialization is necessary in medical school, it is exceedingly important that the future physician in training remain constantly aware of the fact that the practice of medicine involves working with all kinds of people in many and complex social relations. For this reason, preparation for a career in medicine is inadequate if limited largely to scientific subjects. Because of their eventual responsibilities in human relationships, students have need for a broad liberal education. As we learn more of man and his reactions, it becomes obvious that social, economic, and other environmental factors have much to do with his physical and mental health.

Certainly, a student with a primary interest in biology, chemistry, or physics should not be discouraged from pursuing such studies as a major course in his undergraduate career. It is not desirable, however, to take courses in college which will be duplicated in medical school (human anatomy, biochemistry, human physiology, medical bacteriology, etc.) A student is better prepared for medicine if he takes more basic science courses or work in other fields such as mathematics and the social and behavioral sciences. Premedical education, then, should be planned to include not only adequate scientific preparation, but also the type of broad education which leads to an understanding of the world in which we live. The three or four years in college should be looked upon as an opportunity to gain a good general

Admission to the Medical School is based upon two types of qualifications. The applicant must present evidence of good character, proper attitude, and sincere interest in the study of medicine. He must also have demonstrated sufficient intellectual ability to undertake satisfactorily the study of medicine, as judged by his premedical scholastic record and scores on the Medical College Admission Test. Admission is on a competitive basis.

education and not merely as a stepping stone to medical school,

Applicants for admission are required to complete satisfactorily not less than three years of full-schedule work in an accredited college or university, that is, 138 term hours (92 semester hours) of college work, exclusive of military science, before entering the Medical School.

The following subjects and credits are prescribed as the minimum acceptable for admission.

Term Hours 24

hemistry	
General inorganic, which may include qualitative analysis	
Quantitative analysis, emphasis on volumetric analysis	4
Organic (with laboratory)	8

Biology		15
General biology or zoology	9	
Genetics	3	
Cellular physiology or embryology	3	
Physics (with laboratory)		12
Mathematics		12**
English		9
Psychology		9
Electives		57
Total Prescribed Credits		138
Total Trescribed Credits		100

Foreign language is not specifically required for admission to the Medical School, but some knowledge of a major modern foreign language (German, French, Russian, Spanish) is highly recommended as a part of the cultural training of the physician. Students anticipating research in the medical sciences should have a basic knowledge of German and French or Russian. The premedical student should keep in mind that some medical schools require credit in foreign language for admission.

The work in organic chemistry must include the chemistry of both aliphatic and aromatic compounds. Biochemistry will not be accepted toward meeting the requirements. At least 25 per cent of all chemistry credit must be for laboratory work. Human anatomy is not accepted toward meeting the minimum requirements in biology.

The work in physics must include the divisions of mechanics, heat and sound, light and electricity, with standard laboratroy work.

The work in mathematics should be of standard college grade, and should include subjects such as algeba, elementary analysis, trigonometry, or calculus.

Recommended Elective Subjects. The student preparing to study medicine is advised to plan a balance in elective courses between those in liberal arts and courses beyond the minimum requirements in subjects prescribed for admission to the Medical School. Subjects suggested are: history, economics, sociology, social anthropology, psychology, English, public speaking, foreign language, general or cellular physiology, physical chemistry, and mathematics.

Medical College Admission Test

Applicants for admission are expected to have taken the Medical College Admission Test, given for the Association of American Medical Colleges at the various institutions offering premedical curricula. Exceptions to this rule may be allowed in the case of applicants who, because of legitimate reasons approved by the Committee on Admissions, have been unable to take the test. If admitted, however, the student is required to take the test before entering the Medical School.

Applicants should take the test during the calendar year immediately preceding the year of their admission to the Medical School. The test is given twice each year—in the early fall and mid-spring. Information as to exact time and place of the test and registration deadlines can be obtained from college premedical advisers.

^{*}Students expecting to receive the bachelor's degree from the University of Oregon should include 9 hours of English composition, 9 hours of lower division English literature in a one-year sequence course, and 12 hours of lower division mathematics (a one-year sequence course), 5 terms of physical education and 1 term of health education in their premedical programs. See the University of Oregon Catalog for specific courses that meet the literature and mathematics requirements.

requirements.

** The increase from the previous requirements of 6 term hours of mathematics to 12 term hours will become effective for the class entering in September, 1969.

ADMISSIONS AND SCHOLASTIC REGULATIONS

Bachelor's Degree

A student entering the University of Oregon Medical School without a Bachelo of Arts or Bachelor of Science degree must complete the work required for one c these degrees in the Oregon State System of Higher Education or in the institutio at which he received his premedical preparation, before entering upon the work c the third year in the Medical School.*

The University of Oregon, Oregon State University, and most of the colleges an universities of the Pacific Northwest recognize credit earned by a student during his first year at the Medical School as credit earned in residence toward the bachelor's degree.

Application Procedure

Application forms may be obtained from the Medical School Registrar, and al credentials should be sent to the Registrar. Because the Committee on Admission begins examining applications a year in advance of entrance to the Medical School early application is advisable. Applications are accepted between July 1 and November 15. A place in the first-year class is not granted to an applicant more than one year before the beginning of instruction for that class.

The University of Oregon Medical School gives primary consideration to well-qualified applicants who are residents of Oregon. Preference is also given to residents of neighboring western states which do not have medical schools and which are members of the Western Interstate Commission on Higher Education (WICHE). Occasionally exceptional applicants from other regions are admitted

Applicants who are residents of Alaska, Idaho, Montana, Nevada, or Wyoming should request certification for medical training under WICHE from their state certifying officer or agency at the time application is made for admission to the University of Oregon Medical School. In addition to preferential consideration for admission given WICHE certified applicants over other nonresident applicants the WICHE-supported applicant pays the Oregon resident tuition fee.

On or before November 15 the applicant must submit the following:

Formal application for admission on the form furnished by the Medical School Registrar.

Official transcripts of all previous college records (sent directly to the University of Oregon Medical School Registrar by the institution or institutions where preprofessional training was taken), showing the complete college record with grades and credits.

A fee of \$10.00 which is charged for the evaluation of transcripts. This fee should be enclosed with the application for admission. (Make checks or money orders payable to the University of Oregon Medical School.)

Two unmounted recent glossy photographs size $2\frac{1}{4} \times 2\frac{1}{4}$ " of the applicant in conventional dress, front view.

Scores received on the Medical College Admission Test (when the student takes

requirements.

^{*} Students expecting to receive the bachelor's degree from the University of Oregon should include 9 hours of English composition, 9 hours of lower division English literature in a one-year sequence course, and 12 hours of lower division mathematics (a one-year sequence course), 5 terms of physical education and 1 term of health education in their premedical programs. See the University of Oregon Catalog for specific courses that meet the literature and mathematics

the test he should request that his scores be sent to the University of Oregon Medical School Registrar).

After the initial screening, well-qualified applicants will be required to submit a physical examination sheet, completed by the student's physician.

Processing of Applications

Evaluation of Credentials

The Committee on Admissions examines each applicant's credentials and bases its preliminary decision on the objective evaluation of the following factors: preprofessional training, evidence of scholarship, Medical College Admission Test scores, personal evaluation of the student by premedical instructors, and evidence of good moral character.

Personal Interview

After examination of credentials, residents of Oregon generally are requested to appear for a personal interview with the Committee on Admissions. A personal interview is not requested of nonresidents whose credentials indicate that they cannot meet the competition for admission, or who would be subjected to excessive travel expense. The committee schedules interviews in Portland, Eugene, and Corvallis.

Physical Examination

Just as the Medical School's Committee on Admissions may refuse admission to a student on the basis of academic record, it also may reject an applicant on the grounds of lack of physical or mental suitability. Applicants who appear well qualified on the basis of the initial screening by the committee are required to submit reports of complete examinations by their own physicians, which are reviewed by the student health physician before registration.

Notification of Acceptance or Rejection

All candidates are given written notification of acceptance or rejection as soon as possible after the Committee on Admissions has reached its final decision; notification is generally given by April 15. Sometimes, however, decisions on applications are delayed until grades in the more advanced science and mathematics courses, such as organic chemistry, quantitative analysis, physics, genetics, embryology, cell physiology and mathematics, are made available to the Admissions Committee. Acknowledgement of notification of acceptance should be made promptly in writing by the successful applicant.

Acceptance of Appointment

When an applicant is offered admission to the Medical School and wishes to accept this admission, a deposit of \$50.00 must be paid not later than two weeks following notice of acceptance in order to reserve a place in the entering class. If the deposit is made prior to December 15, it is not refundable after January 15 should the student release his place in the class. If the deposit is made after December 15 it is not refundable after a period of thirty days following notice of acceptance.

ADMISSIONS AND SCHOLASTIC REGULATIONS

Special (Non-degree) Students

Special (Non-degree) students are admitted to the University of Oregon Medica School under certain special conditions. The reasons for admission, qualification for entrance, and the courses to be taken as a special student must be passed upo by the chairman of the department concerned and the graduate council.

Graduates in medicine may be admitted as special students, but graduates in medicine from other medical schools may not be candidates for the degree of Docto of Medicine at the University of Oregon Medical School.

Students holding only academic degrees may be admitted as special students in certain courses in the Medical School. Such students may not receive academic credit for work in clinical subjects and may not audit clinical courses.

Undergraduates may not be admitted to courses in the Medical School as specia students.

A person who has failed a course as a medical student in another medical schoo may not repeat the course as a special student at the University of Oregon Medica School unless the course is given at some time other than during the regular academic year.

Special students are charged fees according to the credit hours of work taken

Application forms for admission as a special student may be obtained from the Registrar. Those seeking admission as special (Non-degree) students need furnish only the basic application form and original transcripts of college work. The application must be approved by the chairman of the department offering the desired courses and by the Graduate Council. The complete application must be if the hands of the Registrar ten days before registration for the term in which the course is offered. Non-degree students will not be permitted to take full course loads (8 hours or more) nor will they be entitled to student benefits. They will pay course fees on an hourly basis as indicated in the fee schedule.

Advanced Standing

A student may be considered for admission with advanced standing provided his official credentials are accompanied by a statement from the registrar of the institution from which he is transferring to the effect that the applicant's scholarship in medical school work ranks him in the upper fifty per cent of his class. An honorable dismissal and premedical preparation meeting the regular requirements for admission are also required. In general, only transfer to the third-year class is feasible. Only a very limited number of students can be admitted with advanced

Registration Procedure

standing.

Medical students register only once each year (see Calendar, page 8), at the beginning of the fall term. Students report to the Registrar's Office on the day of registration to complete registration and receive class schedules. Fees are to be paid at the Cashier's Office within the first two days of each term.

Schedules of classes for each term are available at 8:00 a.m. on the first day of the term.

Scholastic Regulations

Grading System and Grades

A grading system of A to D is used at the Medical School. A is the highest and D is the lowest passing grade. If a course is not completed within the time alloted, the work must be finished satisfactorily within one year. Failure in a course requires repetition of the course. In most courses the student will be given frequent written and practical tests, marked with percentage grades. The student may be given these percentage grades by his instructors, but final grades are issued only by the Registrar's Office. Final grades are given for each term's work, but are issued only at the end of the school year.

If at any time during the school year the student feels his work is not satisfactory, he should consult his instructor. Should special problems arise that threaten to interfere with study, the student should consult a faculty member for advice before his scholarship has been seriously affected.

Promotion

In order to be promoted unconditionally from the first to the second year and from the second to the third year in Medical School, the student must receive a passing grade in all subjects and a weighted grade-point average as established by the executive faculty. At the completion of the second year all students must achieve a grade of 70 in all subjects of the Part I examination of the National Board of Medical Examiners in order to be promoted to the third year. Failure to obtain a grade of 70 necessitates re-evaluation of the student by the departments in which he has failed. For promotion from the third to the fourth year, students must satisfactorily complete all subjects. The status of students failing to meet these requirements is determined by the promotion boards.

The Preclinical Promotion Board, which considers only students in the first and second years of medicine, consists of all faculty members giving instruction during the first and second years. The Clinical Promotion Board is concerned with the performance of third- and fourth-year students; this board is composed of representatives from all the clinical departments. The boards meet after the end of each term to consider incomplete work, conditions, and failures.

Specific problems are referred to the Review Board for subsequent action. The Review Board, composed of chairmen of departments, considers primarily requests from students arising from actions taken by the Preclinical and Clinical Promotion Boards.

Elective Courses

Elective courses are offered in both clinical and basic science departments. Registration for elective courses must be arranged at the Registrar's Office during the first week of the term in which the course is given.

If the student withdraws from an elective course for any reason, this must be done at the Registrar's Office within two weeks after the beginning of the course. Otherwise he will be held responsible for the course and the grade will be incorporated into his record.

ADMISSIONS AND SCHOLASTIC REGULATIONS

Dismissal

The faculty has the right to sever, at any time, the connection with the Medica School of any student who it considers to be unfit for a career in medicine. The usual procedure for dropping a student comes from a recommendation by one of the Promotion Boards which are composed of the members of the faculty. Ordinarily, a student may be on probation status for two terms before a Promotion Board may recommend his dismissal. However, for adequate cause, a student may be dropped without previous warning.

CURRICULUM
IN MEDICINE

CURRICULUM IN MEDICINE

The curriculum in medicine requires a total of seven years' work beyond hig school. The first three years must be satisfactorily completed before admissio to the Medical School in Portland. Since facilities for instruction provide for th

acceptance of only a limited number of applicants, completion of premedical studie

The four years spent in the Medical School in Portland are devoted to the subject of the regular four-year curriculum in medicine required by law.

does not guarantee admission to the Medical School.

The prescribed and recommended subjects for the three premedical years ar described under Admissions and Scholastic Regulations. In the first, second, third and fourth years at the Medical School there are 5,436 class hours of required work Descriptions of courses are to be found under the several departmental headings

Requirements for the Degree of Doctor of Medicine

A candidate for the degree of Doctor of Medicine must complete satisfactorily the curriculum and all other requirements prescribed by the faculty of the Medica School. Members of the senior class are required to pass the Part II examination of the National Board of Medical Examiners which is given in April. Any studen failing to pass this examination will be referred to the Review Board of the Medical School for reevaluation of his status. All candidates for degrees are required to be present at the Commencement Exercises to receive their diplomas in person The Doctor of Medicine degree is conferred by the University of Oregon upon the recommendation of the faculty of the Medical School.

Licensure

Admission to the practice of medicine in any state is conditioned upon the requirements of a state board of medical examiners. Admission to practice in the state of Oregon is dependent upon the candidate's having an M.D. degree, completing a one-year straight or rotating internship, and passing the basic science and licensing examinations. For candidates who are already licensed to practice in another state, the licensing examination may be waived by reciprocity with that state, if such a reciprocal agreement is in force. In some instances completion of

Further information about licensure requirements may be obtained from the Ore gon State Board of Medical Examiners, 609 Failing Building, Portland.

the basic science requirements may be arranged by reciprocity also.

Students are urged to take the Oregon basic science examination at the end of their sophomore year. This examination is given by the Basic Science Examining Committee of the Oregon State Board of Higher Education and is required for licensure in Oregon. Information concerning this examination may be obtained by writing the Basic Science Examining Committee, Oregon State Board of Higher

Course Numbering System

Education, Eugene.

Medical School courses are numbered in accordance with the uniform course numbering system of the Oregon State System of Higher Education. This numbering system, as it applies to the Medical School courses, is as follows:

- 400-499. Upper-division courses primarily for first-year students in medicine, bu to which graduate students may be admitted on approval of the graduate adviser and department chairman concerned.
- 500-599. Courses primarily for students in basic medical science, but to whicl graduate students may be admitted on approval of graduate adviser an department chairman concerned.

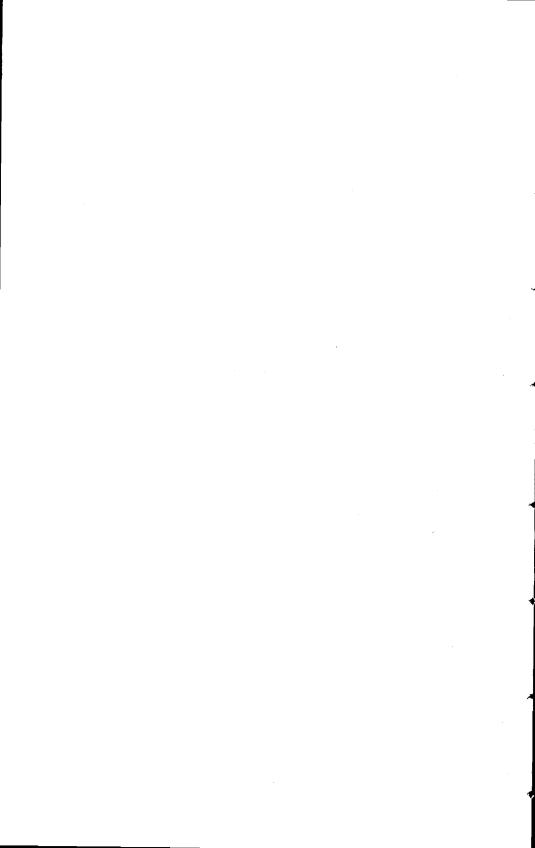

COURSE NUMBERING SYSTEM

600-699. Courses that are highly professional in nature may count toward a professional degree, but cannot apply toward an advanced academic degree (M.A., M.S., or Ph.D.).

Certain numbers are reserved for courses that may be taken through successive terms under the same course number, credit being granted according to the amount of acceptable work done. These course numbers are as follows:

501. Research 503. Thesis

505. Reading and Conference 507. Seminar

Basic Sciences

CONJOINT COURSE—BASIC MEDICAL SCIENCE

Basic Medical Science 511, 512, 513. **Cell Biology.** 5 hours each term, fall, winter and spring.

An integrated course presenting fundamental concepts, processes, and methods in the following areas of cell biology: macromolecules, cell structure, transport, biochemical functions, genetics, immunology, development and differentiation, organ physiology, inflammation neoplasia, and conditioning and learning. 4 lectures and 1 laboratory period. Conjoint course presented by the faculty of the basic medical science departments. Open to all graduate students.

DEPARTMENT OF ANATOMY

Anthony A. Pearson, Chairman of Department

Professors: Robert L. Bacon, David L. Gunberg, Anthony A. Pearson, William A. Stotler

Associate Professor: Archie R. Tunturi
Assistant Professor: Richard B. Lyons*

Instructors: Reid S. Connell, Jr., Howard W. Davis

Research Assistants: M. Barbara Leighton, Patricia Luckerby, Ronald W. Sauter

Required Courses

First Year

An 411, 412, 413. Gross and Developmental Anatomy. 7 hours fall, 9 hours winter, 3 hours spring.

Regional dissection of the human body. Each pair of students dissects the lateral half of a body. The student is furnished with a loan collection of disarticulated bones for the study of osteology. Demonstrations include surface and radiological anatomy. Lectures, demonstrations, and laboratories include the reproductive cycle, fertilization, normal and abnormal human embryological development. Fall: lectures, demonstrations, and quizzes, 3 hours a week; laboratory, 12 hours a week. Winter: lectures, demonstrations, and quizzes, and

hours a week; laboratory, 15 hours a week. Spring: lectures, demonstrations,

and quizzes, 2 hours a week; laboratory, 3 hours a week. 468 hours. An 415. **Histology and Organology.** 6 hours fall.

Systematic study of the microscopic anatomy of normal human tissues and organs. Lectures and laboratory exercises furnish an introduction to how cells contribute to tissue and organ function and to how the organs are assembled from tissues. Lectures and quizzes. 3 hours a week; laboratory, 9 hours a week, 144 hours.

An 511. Neurology and Organs of Special Senses. 4 hours spring.

Study of the structure and functions of the organs of special senses and of the central nervous system. This is accomplished by gross dissections and stained sections of the human brain, spinal cord, and organs of special senses. Patho-

^{*} Leave of absence, July 1, 1966 to July 1, 1969.

logical conditions illustrating lesions of the nervous system are demonstrated. Prerequisites: An 411, 412, 413, and 415. Lectures, 2 hours a week; laboratory, 6 hours a week, 96 hours.

Elective Courses

An 416. Microscopic Technique. 2 hours spring.

The theory and practice of preparing animal tissue for histological study. Limited to 4 students, registration only after consultation with instructor. Laboratory, 6 hours a week: 72 hours.

An 501. Research. Any term, hours to be arranged.

An 505. Reading and Conference. Any term, hours to be arranged.

Journal Club.

History of Medicine.

An 512. Analytical Embryology. 4 hours spring.

An 507. Seminar. Any term, hours to be arranged.

Lectures and assigned readings on cytology and physiology of gametes, gamete transport, fertilization, cleavage and cell division, and on cell tissue, and organ interaction in embryonic systems. The laboratory work is designed to introduce the advanced student to both classical and new techniques for the investigation of embryonic processes. Prerequisites: An 414, 415, BCh 411, 412, or equivalent. Lectures, 2 hours a week; laboratory, 6 hours a week: 96 hours.

An 513. Analytical Histology. 4 hours spring.

Lectures on the theory of fixation and staining; survey of physical and chemical techniques employed in modern histology. Practical experience with some of these techniques provided by laboratory exercises. Lectures and quizzes, 2 hours a week; laboratory, 6 hours a week: 96 hours. Prerequisites:

An 415, 416, BCh 411, 412, or the equivalent. Limited to 10 students.

An 514. Special Dissections. Term and hours to be arranged.

Human anatomical material dissected and certain parts of the body studied more thoroughly. Conferences and quizzes arranged with the instructor. Registration limited by available material. Prerequisites: An 411, 412, 413.

An 515. Advanced Neuroanatomy and Computer Techniques. Any term, hours to be arranged.

Neuroanatomy as an advanced quantitative science. Introduction to the use of the stationary time series, probability theory, and information theory in the investigation of the nervous system. Variables in the nervous system which can be measured; and statistical procedures on these variables. Methods for data acquisition and computer solution of problems.

An 516. Computer Programming. Any term, hours to be arranged.

An introduction to what a computer can do. The characteristics of the IBM 1410: uses of Fortran (formula translation) and Autocoder; elements of programming and examples of programs.

An 517. Embryology. 4 hours spring.

Lectures on reproductive cycle, fertilization, normal and abnormal human development, correlated with detailed laboratory study of pig, mouse, and human embryos and fetuses. Primarily for graduate students. Lectures, 2 hours a week; laboratory, 6 hours a week: 96 hours. Limited to 10 students.

An 518. Mammalian and Human Cytogenetics. 3 hours winter.

Methods of chromosomal study; chromosomal structure; chromosomal func-

tion in meiosis and mitosis; genetic activity and inactivity; use of chromosomes in the study of genetics: gene mapping, sex determination; spontaneous and induced chromosome aberrations; chromosomal evolution. Student recitations will be required relating to special topics such as the X-chromosome somatic cell genetics, chromosomal variation, and cytogenetic studies in leuteric

DEPARTMENT OF BIOCHEMISTRY

Richard T. Jones, Chairman of Department

Professor Emeritus: Edward S. West

T. Jones, George W. Kittinger (Primate Center), Howard S. Mason, Oscar W. Portman (Primate Center), Demetrios A. Rigas, Wilbert R. Todd, John T. Van Bruggen

Professors: Antonio E. Colas, Jack H. Fellman, A. Wesley Horton, Richard

Associate Professors: Clarissa H. Beatty (Primate Center), Marvin C. Hines, Michael Litt, Geoffrey V. F. Seaman

Assistant Professors: J. Peter Bentley, John L. Black, Rose Mary Bocek (Primate Center), Dale D. Hoskins (Primate Center), Charles F. Howard, Jr. (Primate Center), Anne M. Perley (Primate Center)

Instructors: Thomas Fujita, Russell L. Jolley

Research Associates: Bernadine Brimhall, Marie Duerst, K. Ganapathy, Yoshio Imai, Paul MacMahill, Susan Oldham, Esther Roth, Milon Tichy, Virginal Tisdale

Research Assistants: Nancy Ann Avedovich, Charlotte Head, Kazuko Imai, Lester Laaestuen, Rita Nelson, James Robinson, James Salyards, Jean Scott, Joanne Van Dolah

Required Courses

First Year

BCh 411, 412. General Medical Biochemistry. 6 hours fall, 7 hours winter.

Organic and physical chemistry pertaining to biochemistry; the composition of tissues; enzymes, digestion, and absorption; detoxication; the chemistry of blood and respiration; hormones; metabolism; nutrition; the excretions. Fall: lectures, 4 hours a week; laboratory, 6 hours a week. Winter: lectures, 4 hours a week; laboratory, 9 hours a week. 276 hours.

Elective Courses

BCh 501. Biochemistry Research. Any term, hours to be arranged.

BCh 505. Reading and Conference. Any term, hours to be arranged,

BCh 507. Seminar. Any term, hours to be arranged.

BCh 511. Biological Information Transfer. 2 hours.

The biochemistry of heredity, growth, aging, and differentiation, and its relationship to disease. The biochemistry and biosynthesis of nucleic acids and their components; protein biosynthesis.

BCh 512. Biological Energy Transformation. 2 hours.

Bioenergetics, energy transductions: oxidative phosphorylation, biological oxidation-reduction, active transport, muscle contraction, nerve conduction, biosynthesis from the energy viewpoint.

BCh 513. Advanced Intermediary Metabolism. 2 hours.

Nutrition, advanced aspects of the metabolism of lipids, sterols, carbohydrates, amino acids and proteins, tissues.

BCh 514. Enzymology. 3 hours.

The physical and chemical properties of enzymes and the reactions they catalyze.

BCh 515. Biophysical Chemistry of Macromolecules. 2 hours.

The principles and methods employed in determining the size, shape, charge, and thermodynamic properties of biological macromolecules; physical aspects of their interaction, and of the relationship of structure to function.

BCh 516. Biochemical Techniques and Instrumentation. 4 hours.

Preparation and characterization of substances of biochemical importance; the study of biochemical processes; theory and use of radioisotopes as tracers; instrumentation theory and practice. Lectures and laboratory.

DIVISION OF EXPERIMENTAL BIOLOGY

William Montagna, Head of Division

Professor: William Montagna

Associate Professors: J. Peter Bentley, Robert M. Brenner (Primate Center), Wolf H. Fahrenbach (Primate Center)

sistant Professor: Mary Bell (Primate Center)

lective Courses

B 501. Research. Any term, hours to be arranged.

B 505. Reading and Conference. Any term, hours to be arranged.

y EB 50**7. Seminar.** Any term, hours to be arranged.

EB 510. **Biological Ultrastructure.** 2 hours, term to be arranged.

A detailed presentation of the fine structure of cells, their organelles and inclusions with emphasis on the correlation of ultra-structural specialization and function, Lectures, 2 hours a week: 24 hours.

EB 511. Comparative Neuroendocrinology. 2 hours, term to be arranged.

A course in comparative endocrinology with emphasis on neuroendocrine control systems in both vertebrates and invertebrates. The various lines of physiological, biochemical and morphological evidence including electron microscopy which support the neurohemal theory will be presented in detail. Metamorphosis in insects, ovulation in mammals, lactation in mammals and adrenocortical secretion in vertebrates will be covered.

EB 512. Connective Tissue. 2 hours, term to be arranged.

This course will cover the structure, function and metabolism of connective tissues in general. Their major constituents, collagen, elastin, and mucopolysaccharides, will be covered in detail. The structure of these constituents will

be discussed at various levels of organization with emphasis placed upon their molecular architecture, cellular origin, biosynthetic mechanisms. Specialize areas, such as bone formation and mineralization, and wound healing will be analyzed also.

DIVISION OF MEDICAL GENETICS

Robert D. Koler, Head of Division

Professors: Robert D. Koler, Demetrios A. Rigas

Associate Professors: Robert H. Bigley, Frederick Hecht, Michael Litt

Visiting Associate Professor: James V. Higgins

Assistant Professors: John L. Black, Everett W. Lovrein, Richard B. Lyons, Joe W. Templeton

Research Associates: Virginia Tisdale, Patrician Vanbellinghen

Research Assistants: Milton Case, Marlene Delay, Charlotte Head, James

Fellows: William Kimberling, Ellen Magenis

Robinson, James Salyards, Zelma Stocklen

DEPARTMENT OF MEDICAL PSYCHOLOGY

Joseph D. Matarazzo, Chairman of Department

Professors: Robert D. Boyd, F. Robert Brush, Ann M. Garner, Robert W. Goy (Primate Center), Joseph D. Matarazzo, Ruth G. Matarazzo, Charle H. Phoenix (Primate Center), Jack A. Vernon, Arthur N. Wiens

Associate Professors: Robert D. Fitzgerald, Constance Hanf, Norman Helderson, James E. Lindemann, David S. Phillips

Assistant Professors: Bruce K. Alexander (Primate Center), Bruce V. Butle Steven G. Goldstein, Russell Jackson, James H. O'Brien, Leif G. Terd Lecturers: Jeanne A. Goldstein, Wallace D. Joslyn (Primate Center), Matin S. Levine, Frank B. Strange

Resident: Marvin L. Kumler

Required Courses

First Year

Med Ps 411, 412. Introduction to Medical Psychology. 2 hours each terwinter and spring.

An introductory course, including lectures, student discussion, and clinical and experimental demonstrations designed to familiarize the student with psychology as one of the behavioral sciences. 2 hours a week: 48 hours.

Elective Courses

Med Ps 501, Research. Any term, hours to be arranged.

Med Ps 505. Reading and Conference. Any term, hours to be arranged.

personality, aptitudes, interests, and other traits; characteristics of good tests and their uses and limitations.

Med Ps 521. Theories of Learning. 3 hours winter.

Analysis and comparison of the major theories of learning, covering their logical and systematic properties as well as their empirical foundations.

DEPARTMENT OF MICROBIOLOGY

Arthur W. Frisch, Chairman of Department

Professors: Arthur W. Frisch, Evelyn L. Oginsky, Lyle Veazie (Parasitology)

Associate Professor: Ernest A. Meyer
Assistant Professors: Wallace Iglewski, Terence M. Joys, Arthur Malley

(Primate Center), Marvin B. Rittenberg

Instructors: Nancy B. Gerhardt, Barbara Iglewski

Research Assistant: Linda Klote

Required Courses

Second Year

Mb 413, 414. Medical Microbiology and Immunology. 5 hours each term, fall

and winter.

The material covered includes basic bacteriology, immunology, and pathogenic microbiology. Bacterial viral rickettial and fungal disease presented during

microbiology. Bacterial, viral, rickettsial, and fungal disease presented during the first 19 weeks. The last five weeks are devoted to the study of protozoan and helminthic parasites of man. Lectures and recitations, 3 hours a week; laboratory, 6 hours a week: 216 hours.

Elective Courses

Mb 501. Research. Any term, hours to be arranged.

Mb 505. Reading and Conference. Any term, hours to be arranged.

Mb 507. Seminar. 1 hour any term.

Mb 508. Advanced Virology. 4 hours, term to be arranged.

Biochemical and biophysical nature of viruses, mechanisms of viral infection, enumeration and statistical interpretation of the infectious unit, virus, antibody reactions, biochemical consequences of infection, viral genetics, and interference phenomena. The major emphasis is on animal viruses. Lectures and

laboratories. Open to a limited number of students with consent of instructor.

of degradation and synthesis, energy mechanisms, genetic controls and their

Prerequisites: either BCh 411, 412 or BMS 511, 512, 513, and Mb 413.

Mb 509. **Bacterial Physiology.** 4 hours, term to be arranged. Cytochemistry and ultrastructure, patterns of growth, metabolic pathways

regulation, physiological mechanisms for environmental adaptation. Lectures and laboratories. Open to a limited number of students with consent of instructor. Prerequisites: Mb 413, 414 and BCh 411, 412, or BMS 511, 512, 513.

Mb 510. **Microbial Genetics.** 4 hours, term to be arranged.

The molecular basis of heredity. The genetic control of biochemical activities in bacteria. Systems of recombination in bacteria, bacteriophage, actinomycetes, and fungi. The theory and practice of genetic mapping and fine structure analysis. Population genetics as applied to micro-organisms. Lecture and laboratories. Prerequisites: either BMS 511, 512, and 513, or consent of instructor.

Mb 511. Immunology. 4 hours, term to be arranged.

Nature and current concepts of immune mechanisms: antibody formation, antigenicity, tolerance, hypersensitivity, transplantation immunity. Lectures and laboratories. Prerequisites: either BCh 411, 412 or BMS 511, 512, 513, and Mb 413, 414.

Mb 512. Immunochemistry. 4 hours, term to be arranged.

Chemical and physical nature of antigen, antibody, antigen-antibody complexes; physical and kinetic measurements of antigen-antibody interaction; current methods of antibody isolation. Immunochemical techniques; quantitative precipitation, gel-diffusion, immunoelectrophoresis, ultracentrifugation, equilibrium dialysis, and column chromatography. Lectures and laboratories. Open to a limited number of students with consent of instructor. Prerequisites: elementary physical chemistry and biochemistry.

Mb 513. Advanced Microbiology and Immunology. Term and hours to be arranged.

Study of selected areas of microbiology with emphasis on contemporary concepts of the basic nature of microbial and host systems and their interactions. Open to a limited number of students with consent of instructor. Prerequisites: Mb 413, 414.

DEPARTMENT OF PATHOLOGY

Sefton R. Wellings, Chairman of Department

Professors Emeriti: Warren C. Hunter, Frank R. Menne

Professors: Robert A. Cooper, Jr., Peter J. Dawson, Nelson R. Niles, Benjamin V. Siegel, Sefton R. Wellings

Clinical Professor: Vinton D. Sneeden

Associate Professors: George C. Buchan, Thelma N. Fisher, Adam Lis, Wilbur P. McNulty (Primate Center), Virginia Weimar

Associate Clinical Professors: Russell C. Henry, Sheldon A. Jacobson, E. Colton Meek, Joseph E. Nohlgren, James L. Palotay

Assistant Professors: Patricia C. Baker, Robert E. Brooks, Richard T. Gourley, James R. Orendurff (Veterans Hospital)

Assistant Clinical Professors: Clarence L. Chester, Terence H. Cochran, Otto R. Emig, John W. Hoffman, William L. Lidbeck, Albert A. Oyama, John C. Smith, II, Grier F. Starr

Senior Clinical Instructor: Norman H. Rickles

Instructors: Virginia L. Jentoft, James deWitt Rankin (Cytology), Florence E. Woodworth (Cytology)

Lecturers: Laurence M. Ashley, John E. Halver

Residents: Thomas J. McNamara, David A. Maurer, Harold C. Sexton, John L. Wallin

Required Courses

Second Year

Pth 511. General and Systemic Pathology. 5 hours fall, 5 hours winter, 3 hours spring.

experiments and study of selected autopsies by all students; fresh and museum specimens; Kodachrome slides and Scopicon orientation. Winter and spring continuation of the study of disease states of the various body systems. Fall lectures and recitations, 3 hours a week; laboratory, 6 hours a week. Winter lectures, 3 hours a week; laboratory, 6 hours a week. Spring: lectures, 2 hours a week; laboratory, 4 hours a week: 288 hours.

Fall: General principles of disease; study of prepared slides supplemented by

Third Year

Pth 655. Surgical Pathology. 1½ hours, one section each term.

Applications of pathology to immediate study of operatively removed tissues correlating the clinical aspects of individual cases with pathologic findings occasional comprehensive demonstrations, 6 hours a week for six weeks: 36 hours.

Fourth Year

Pth 650. Clinical Pathological Conference. ½ hour winter.

Discussions of the clinical and pathological features of selected cases. 1 hour a week: 12 hours.

Pth 653. Forensic Medicine. 2 hours fall.

Lectures and demonstrations of medicolegal and allied subjects. 2 hours a week: 24 hours.

Elective Courses

Pth 501. **Research.** Any term, hours to be arranged.

Pth 505. Reading and Conference. Any term, hours to be arranged.

Pth 507. Seminar. Any term, hours to be arranged.

Pth 516. Advanced Systemic Pathology. Any term, hours to be arranged.

Study of the detached pathology of one system.

Pth 517. Advanced Pathological Histology. Any term, hours to be arranged.

Systematic study of microscopic sections of autopsy tissues. Open to students who have had at least one term's work in pathology.

Pth 518. Special Pathology of Heart and Circulation. Hours to be arranged Systematic and inclusive study of the pathologic states affecting the circulatory system, illustrated by sections and gross materials.

Pth 519. Introduction to Electron Microscopy. 2 hours fall.

An introductory course including illustrated lectures and demonstration dealing with the electron microscope, its technical operations, and broad applications in biological studies and research. Offered alternate years.

Pth 520. Principles and Techniques of Tissue Culture. 2 hours fall.

Lectures, demonstrations, and conferences dealing with techniques of cell and tissue culture; designed to provide a background of general information of cultured cells and instruction in application of the method to problems in current areas of research in cell biology. Offered alternate years.

'th 521. Biology of Cancer. 1 hour spring.

Lectures and discussions on the natural history of cancer, geographic and ethnologic aspects, tumor genetics, and etiologic concepts and mechanisms of carcinogenesis.

'th 522. Viral Oncology. 2 hours, term to be arranged.

Systematic study of viruses in relation to cancer in animals and man. Biological aspects of tumor induction by viruses, intracellular and extracellular factors in neoplasia; biochemical and biophysical properties of tumor viruses.

'th 523. Biochemical Pathology. 2 hours, term to be arranged.

This course deals with the biochemical abnormalities characteristic of selected examples of both genetic and nongenetic diseases. Particular emphasis is placed on the role of nucleic acids in the processes involved. A short series of introductory lectures reviews nucleic acid biochemistry and metabolism, and is followed by a group of lectures dealing with our current knowledge of biochemical abnormalities related to chromosomal diseases, blood proteins, urinary products, storage diseases, viral infections, neoplasia, irradiation, and aging.

'th 524. Special Research Problems in Experimental and Comparative Pathology. Term and hours to be arranged.

The purpose of this course is to acquaint new graduate students with the research work of various departmental members. The student is assigned a limited research problem, working in the research laboratories of the staff members concerned.

th 525. Modern Trends in Pathologic Biology. 2 hours spring.

Recent progress in the study of inflammation and degeneration, neoplasia, differentiation, and nucleic acid chemistry in disease states.

th 614. Attendance at Autopsies. Hours to be arranged.

Opportunity offered to students to elect autopsy attendance with instruction. Such students are required to assist and make detailed suggestions. Limited to 20 students.

DEPARTMENT OF PHARMACOLOGY

Iorman A. David, Chairman of Department

rofessors: Norman A. David, Elton L. McCawley

Issociate Professor: John D. Gabourel

Issociate Clinical Professor: H. Lenox H. Dick

ssistant Professors: Robert E. Brummett, Kaye E. Fox, David Gowing, John C. Roth

Issistant Clinical Professor: Anton C. Kirchhof

linical Instructors: William A. Fisher, Michael Henry, Melvin M. Reeves

Required Courses

econd Year

The 511, 512. **Systematic Pharmacology.** 5 hours each term, winter and spring. A series of lectures and laboratory exercises on the basic principles of pharmacology, mechanism of drug action and therapeutic use of drugs. Emphasis is

placed on the important therapeutic drugs listed in the U.S. Pharmacopoeia and those newer drugs described in *New Drugs*. Lectures are correlated with the latest editions of the several most widely used textbooks of pharmacology Classic experiments in pharmacology are performed by groups of students following prior demonstration of techniques and procedures. Several experiments are of the volunteer human-trial-of-drug types. Four laboratory sessions are of drugs in hospitalized and clinic patients. Prescription writing, pharmacy and toxicology considered in both the lecture and laboratory work. Lectures 4 hours a week; laboratory, 3 hours a week: 168 hours.

Elective Courses

Phc 501. Research. Any term, hours to be arranged.

Students who are properly qualified and who can devote an adequate amoun of time to the work are encouraged to pursue original investigations.

Phc 505. Reading and Conference. Any term, hours to be arranged.

General Principles of Pharmacology. Drug Metabolism.

Molecular Pharmacology.

Pharmacogenetics.

Advanced Cardiovascular Pharmacology.

Phc 507. Seminar. 2 hours.

Phc 514. Factors Modifying Drug Action. 2 hours, term to be arranged.

Lectures on drug metabolism, distribution and excretion, drug protein interaction, pharmacogenetics, and drug allergy and idiosyncrasy. Prerequisite: Con

sent of instructor.

Phc 515. Pharmacological Control of Biological Information Transfer.

2 hours, term to be arranged.

Lectures on the basic mechanisms for nucleic acid and protein biosynthesis mechanisms of repression and depression, and the effect of hormones and othe drugs on these systems. Applications to chemotherapy will also be discussed Prerequisite: Consent of instructor.

Phc 516. Receptor Theory and Conformational Analysis. 2 hours, term to be arranged.

Lectures on modern receptor theory, kinetics of drug receptor interactions.

Lectures on modern receptor theory, kinetics of drug receptor interactions drug antagonism, allosteric receptor concept, and conformational analysis o receptor sites. Prerequisite: Consent of instructor.

DEPARTMENT OF PHYSIOLOGY

John M. Brookhart, Chairman of Department

Professors: John M. Brookhart, Benjamin B. Ross

Associate Professors: Alfred J. Rampone,* Robert E. Swanson, Joseph B. Trainer

Assistant Professors: J. Job Faber, John A. Resko (Primate Center)

Instructor: Donald A. McAfee

^{*} Leave of absence, July 1, 1968 to June 30, 1969.

Research Associates: Frederick M. Hart, Shigemi Mori

linical Research Associates: J. David Bristow, Miles J. Edwards, Monte Greer, Donald G. Kassebaum, James Metcalfe, William A. Neill, George A. Porter

Required Courses

irst Year

hy 411. Human Physiology. 8 hours spring. Lectures, laboratory exercises, and conferences devoted to mammalian physi-

ology, with special application to the human. Consideration given to the basic elements of effector control; basic information essential to the understanding of the functions of the respiratory, cardiovascular, and renal systems; discussion of gastrointestinal, liver, and endocrine functions. Lectures, 5 hours a week: laboratory, 9 hours a week: 168 hours.

econd Year

'hy 412. Human Physiology. 6 hours fall. Continuation of Phy 411. Special attention given to the functional interrela-

tionships between respiratory, cardiovascular, and renal systems. The general and special senses and the regional physiology of the central nervous systems discussed. Appropriate laboratory exercises and conferences related to lecture material. Lectures, 4 hours a week; laboratory, 6 hours a week, 120 hours.

Elective Courses

'hy 501. **Research.** Any term, hours to be arranged.

Prerequisites: Phy 411, 412.

'hy 505. **Reading and Conference.** Any term, hours to be arranged. Prerequisites: Phy 411, 412.

'hy 507. Seminar. Any term, hours to be arranged.

'hy 514. History of Physiology. 1 hour winter.

One hour a week: 12 hours.

Prerequisites: Phy 411, 412.

'hy 515, 516. Physiological Instrumentation and Techniques. 4 hours, terms

to be arranged.

Lectures and laboratory work covering basic principles of measurements, transducers, physiological signals, signal processing and display, and applications to specific problems of physiological measurements. Basic lectures and laboratory work in electronics are included. Lectures and conferences, 2 hours a week; laboratory, 6 hours a week: 96 hours.

'hy 517. Advanced Cardiovascular Physiology. 4 hours, term to be arranged. Emphasis of this course is on the physics of the cardiovascular system. Tech-

niques of measurement and current views on cardiac performance, aortic and local blood flows, hydrostatic pressures, and the micro circulation. Origin and conduction of heart sounds. Regulatory mechanisms. Conference, 2 hours a week; laboratory 6 hours a week: 96 hours. Prerequisites: Phy 411, 412, BCh

411, 412. by 518. Biological Transport Processes with Special Reference to the Kidney. 4 hours, term to be arranged.

Topics include: Fick's law of diffusion; membrane effects (diffusion of ions

through an electrical field, molecular sieving, carrier-mediated diffusion, a tive transport, osmosis through "leaky" membranes); irreversible thermod namic treatment of diffusion processes. Pertinent examples from the literatu on artificial membranes, frog skin, muscle capillaries, and the renal tubu

Reading from monographs and original literature. Conference, 3 hours a wee laboratory, 6-hour periods on alternate weeks: 72 hours. Prerequisites: P. 411, 412, calculus, physical chemistry.

Phy 519. Advanced Neurophysiology. 4 hours, term to be arranged. A study of principles of investigation, observation, and inference and an e tensive review in depth of the integrative functions of the central nervo system. Conference, 2 hours a week; laboratory, 6 hours a week: 96 hour

Prerequisites: Phy 411, 412, Phy 520, 521, An 511. Phy 520. Energy Exchange. 3 hours, term to be arranged.

Intestinal absorption processes with emphasis on nutrient materials. Mode methods and techniques of investigation, dynamics of intestinal transport, t specialized functions of the gastrointestinal system in the assimilation dietary nutrients. Conference, 2 hours a week; laboratory, 3 hours a weel 60 hours. Prerequisites: Phy 411, 412, BCh 411, 412.

Phy 521. Respiratory Gas Transport. 3 hours, term to be arranged.

Dynamics of transport of respiratory gases, with emphasis on graphical anal sis of pulmonary and circulatory phases of transport. Ventilation-perfusic relationships, unsteady state, gas stores of the body, and exchange and equili rium of inert gases. Conference, 2 hours a week; laboratory, 3 hours a weel 60 hours. Prerequisites: Phy 411, 412.

Phy 522. Fetal and Neonatal Physiology. 3 hours, spring term.

Special physiology of the *in utero* state and of the transition to an independent existence. Placental gas exchange; acid-base homeostasis; fetal and neonat circulation, anoxia tolerance, thermal homeostasis, and renal functions. Cor ference, 2 hours a week; laboratory, 3 hours a week: 60 hours. Prerequisite: Phy 411, 412, BCh 411, 412.

Clinical Sciences

DEPARTMENT OF CLINICAL PATHOLOGY

Tyra T. Hutchens, Chairman of Department

Professors: Clifford V. Allen (Radioisotopes), Tyra T. Hutchens

Clinical Professor: Richard Thompson Associate Professors: James L. Bramhall, Martha Hamilton, Victor C. Mai

quardt, C. Evans Roberts* Associate Clinical Professors: Homer H. Harris, James H. Lium

Assistant Professors: Margaret E. Berroth, Charles E. Gardner, James E Haines

Assistant Clinical Professors: Eugene W. Landreth, Albert Oyama, Nigel A Pickering

Senior Instructors: Mary E. Baptist (Medical Technology), John D. Koontz Instructors: Patricia A. Chadwick (Medical Technology), Rose M. Parke (Medical Technology), James A. Wilkinson (Medical Technology)

^{*} Leave of absence, June 1, 1968 to May 30, 1970.

Clinical Instructors: Daniel M. Baer, William J. Brady, David J. Brown, Mary C. Campbell (Medical Technology), Archie Y. Hamilton

Residents: Richard V. Crisera, Larry K. Hatch, Darwin C. Lehfeldt, K. David Perkins, James B. Sawyer, Brij B. Sharma, Frank H. Watson

Required Courses

Second Year

CP 511. Introduction to Clinical Pathology. 5 hours spring.

Lectures, demonstrations, and laboratory work dealing with the application of laboratory measurements to the practice of medicine. Lectures, 3 hours a week; laboratory, 6 hours a week: 108 hours.

Fourth Year

CU 650. Clinical Pathology. 1 hour spring.

Lectures and demonstrations dealing with recent developments in laboratory methods applicable to the practice of medicine. 1 hour a week: 12 hours.

Elective Courses

CP 501. Research. Any term, hours to be arranged.

CP 520, 521. Radioisotope Techniques. 1 hour each term, fall and winter.

Lectures and demonstrations concerning the theoretical and practical application of radioisotope techniques to medicine, 1 hour a week: 24 hours.

CP 522. Radioisotope Laboratory. Any term, hours to be arranged.

Laboratory experience with instruments used in radioisotope work.

DEPARTMENT OF DIAGNOSTIC RADIOLOGY

Charles T. Dotter, Chairman of Department

Professors: Charles T. Dotter, Louis H. Frische, Vincent C. Hinck

Clinical Professors: William Y. Burton, E. Dale Trout

Associate Professors: Marcia K. Bilbao, Melvin P. Judkins

Associate Professor of Radiologic Technology: Hilda E. Drum

Associate Clinical Professors: James B. Haworth, Kurt R. Straube
Assistant Clinical Professors: Wayne G. Ericksen, Arthur F. Hunter, John
Wayne Loomis, Robert S. Miller, Arthur L. Ovregaard, James R.

Raines, George F. Satterwhite, Fred C. Shipps, Hans G. Wandel, Gerald Warnock

Clinical Instructors: Raymond F. Friedman, Robert L. Mueller, Gregory B. Nichols, Ronald W. Philips, William E. Purnell, Gordon A. Stoney, Cameron J. Wiley

Research Associate: Thomas B. Hutchens, IV

Fellow: Lyle E. Crecelius

Residents: Ruza Antonovic, George Burgermeister, Gilbert M. Cordova, Gerald S. Green, William L. Hebard, Leslie W. Inman, Gerald E. Johnson, C. Malcolm McKinnon, Jr., John P. Phelan, Robert W. Rose, William A. Smullen, William E. Spies, David L. Wishart

Required Course

Third Year

Diag Rad 615. Radiographic Diagnosis. 1 hour each term, fall, winter, spring Broad experience in the interpretation and reporting of X-rays through week film reading assignments followed by small-group case presentation exercise Lectures on diagnostic principles, radiotherapy, radiation hazard and prote tion. I hour a week: 36 hours.

Elective Course

Diag Rad 690. Radiographic Diagnosis. Any term, hours to be arranged.

Practical experience derived from interpretation of cases from the currentles; correction and discussion of student's reports at weekly seminar, findictation by members of staff. Enrollment limited.

DEPARTMENT OF MEDICINE

Howard P. Lewis, Chairman of Department

- Professors Emeriti: Isidor C. Brill, Blair Holcomb, Noble Wiley Jones, Lyl B. Kingery, Merl L. Margason, Homer P. Rush
- Professors: David W. E. Baird, John A. Benson, Jr., Richard L. Dobson, Jac H. Fellman (Neurochemistry), Monte A. Greer, Herbert E. Griswold Hance F. Haney, Charles N. Holman, Funan Hu (Primate Center), Rob ert D. Koler, Danel H. Labby, Howard P. Lewis, Walter C. Lobitz, Jr James Metcalfe, Edwin E. Osgood, Bernard Pirofsky, Donald M. Pit cairn, Demetrios A. Internal Medicine—Required Courses

Second Year

Med 612. Physical Diagnosis. 3 hours each term, fall, winter, and spring.

Systematic lectures, demonstrations, practice sessions and ward rounds dealin with the principles of history taking, physical examination, and the pathophysiological basis for physical signs. Lectures, 2 hours a week; demonstrations, 2 hours a week: 144 hours.

Third Year

Med 630. Third-Year Medicine. 21½ hours, one section each term.

Third-year medicine introduces the student to the study of the broad field of internal medicine by means of lectures, hospital clerkship work, clinic an conference sessions.

Lectures throughout the year present the basic principles of medical disease and guide the student in his further study of the subject. Hospital clerkship provide opportunity for the intensive study of patients with medical disease and active participation, under supervision, in ward rounds, and all other exercises and procedures connected with medical ward activity. Particular

emphasis is given to the development of skill in history taking, physical examination, and differential diagnosis.

ference, a ten-day Neurological clerkship, a weekly one-hour Dermatolog clerkship, and studies selected psychiatric problems with the Department of Psychiatry. Lectures, 2 hours a week each term, fall, winter, and spring; 7 hours. Clerkships, conferences, and clinics, 31 hours a week, one section each term; 372 hours: 444 hours.

The student attends Medicine Staff Conferences, a Medicine mortality cor

Fourth Year

of clinic patients.

Tuberculosis.

Med 657. Toxicology and Occupational Medicine. 1 hour fall.

Lectures and demonstrations dealing with important industrial health hazard and diseases. 1 hour a week: 12 hours.

Med 658. Medical Economics. 1 hour spring.

Series of lectures concerning the economic, sociological, legal and other problems connected with the practice of medicine. Lectures, 1 hour a week 12 hours.

Med 670. Fourth-Year Medicine. 15 hours, one section each term.

Students continue their study of patients in the broad field of internal medicir in the setting of the Outpatient Clinic, where, under the supervision of the staff, they apply the knowledge gained in the third year to the study and car

Part of the time is spent in the General Internal Medicine Outpatient Clini the remainder in clinics of the subspecialty divisions of internal medicine, an in electives. The student spends 2 hours a week for 6 weeks in each of the following subspecialty clinics: Immunology, Allergy, and Infectious Diseases Cardiovascular Renal; Chest Diseases; Diabetes and Metabolism; Endo

crinology; Gastroenterology; Hematology; Neurology; Rheumatology, ar

60

All fourth-year students attend a Conference on Medical Therapy once weekly throughout the year, a General Clinical Conference, held by the departments of medicine and surgery, once weekly during their fourth-year medicine, surgery, and obstetrics and gynecology assignments, and a six week period in the Dermatology Outpatient Clinic. Students also study selected psychiatric cases with the Department of Psychiatry.

Conference on Medical Therapy (lecture), 1 hour a week, fall, winter, and spring: 36 hours. General Clinical Conference, 2 hours a week, in sections: 24 hours. General Internal Medicine Outpatient Clinic, 15 hours a week for 6 weeks: 144 hours. (In addition, each student spends 6 hours a week for 6 weeks: 144 hours.) Clinic: 36 hours.) Subspecialty clinics, 10 hours a week: 120 hours. Lectures, 36 hours; clinics and conferences, 288 hours: 324 hours.

Internal Medicine—Elective Courses

Med 501. Research in Hematology. Any term, hours to be arranged. Med 505. Reading and Conference. Any term, hours to be arranged.

For third- and fourth-year students. Arrangements may be made with the head of a division of internal medicine.

Med 601. Research. Any term, hours to be arranged.

Students may elect to conduct research in the various divisions of medicine by arrangement with the head of the division.

Med 605. Reading and Conference: Chest Diseases. Any term, hours to be arranged.

Conference with the medical resident and staff for the presentation of cases of special interest in the hospital and Chest Outpatient Service, supplemented by cases from private practice which present current difficult problems in diagnosis and treatment.

Med 605. Reading and Conference: Cardiology. Any term, hours to be arranged.

Med 607. Seminar in Medicine. Any term, hours to be arranged.

Med 681, 682. Marital and Premarital Counseling in Medical Practice. 1 hour winter and spring.

Lectures and discussions on the psychophysiological background of human sexuality and the medical and ethical problems encountered in this area of medical practice. 1 hour a week: 24 hours.

Med 690. Medical Outpatient Clinic. Any term, hours to be arranged.

In the fourth year elective credit is given for completion of clinical work in the department in addition to that required in the regular Outpatient Clinic course.

Med 691. Electrocardiography. 1 hour, any term.

Conferences, demonstrations and laboratory exercises devoted to the techniques, physiological basis and interpretation of electrocardiography and vectorcardiography. Limited to students on the Medicine block. 2 hours a week for 12 weeks: 24 hours.

Med 692. Ward Rounds in Endocrinology. 1 hour, any term.

Examination and discussion of hospitalized patients with endocrine disease in Multnomah Hospital and Medical School Hospital. Limited to 6 students. 2 hours a week for 12 weeks: 24 hours.

Aed 693. Human Genetics. 1 hour spring term.

Clinical presentation and lectures designed to introduce students to genetic mechanisms in human disease. Material covered will include mechanism of

gene action, population genetics and chromosomal abnormalities resulting is clinical disease. Lectures and demonstrations. 1 hour a week: 12 hours. (Fo second-year students.)

Med 694. Fluid and Electrolyte Management. 1 hour, one section each term Intensive study of selected problems in fluid and electrolyte management in the Multnomah and Medical School Hospitals. Students work in pairs an study assigned patients. Conferences and discussion on rounds concerning the diagnosis, treatment, and basic mechanisms of these disorders in patients Patient study 2 hours a week at any convenient time; rounds 2 hours a week 48 hours.

Med 695. Fundamental Aspects of Disease. 1 hour winter.

Lectures and discussions presenting concepts of disease that have developed from advances in basic and clinical research; principles upon which contemporary research in medical science is based; discussions of current investigation of major disease processes. This course is conducted jointly by the Departments of Medicine and Biochemistry. I hour a week: 12 hours.

Med 696. Special Case Studies in Medicine. Any term, hours to be arranged Students may elect to make detailed studies and reports of selected cases in the fields of cardiovascular, pulmonary, endocrinological and metabolic diseases

Med 697. Hematological Cell Identification. ½ hour any term.

Students are taught cell identification by actual study of slides under super vision. Maximum of 5 students for three weekly sessions. Given four time each term. 1 hour a week for 3 weeks: 3 hours.

Med 698. Case Conference. 1 hour any term.

Analysis of selected case material utilizing new and selected techniques in th study of pulmonary disease. 2 hours a week: 24 hours.

Dental and Oral Medicine—Required Courses

Third Year

DM 650. Dental Facial Growth and Oral Pathology. 1 hour spring.

Designed to give the medical student a survey of facial growth and oral disease with discussion of specific diagnostic criteria and treatment of the more common lesions. Coordinated lectures and textbook reading on: disturbances or oral and facial growth; oral and facial pain; dental caries; pulpitis an periapical pathology; differential diagnosis of radioluscencies in the jawbones diagnosis and management of common oral conditions. Lectures, 1 hour

Dermatology—Required Courses

Third Year

week: 12 hours.

Derm 615, 616. Lectures and Demonstrations in Dermatology. 1 hour eac term, winter and spring.

Discussion of common disease entities and their basic mechanisms is based of assigned bibliographies in student-directed seminars. Each student group of ten has two dermatology staff members present as consultants. I hour a week 24 hours.

Fourth Year

Derm 670. Dermatology Outpatient Clinic. 1½ hours, one section each term Utilization of outpatient material, clinical and microscopic diagnostic procedures; general therapy. 6 hours a week for 6 weeks: 36 hours.

Jeurology—Elective Courses

Yeu 691. **Neurology Conference.** 1 hour any term.

Combined conference including neurology, neurosurgery, neuro-ophthalmology, and neuroradiology. Limited to 10 students. 2 hours a week: 24 hours.

Ieu 692. Experimental Neurology. Any term, hours to be arranged.

Research techniques in neurology, neurochemistry, and electroencephalography. Open to third- and fourth-year students.

Yeu 693. Clinical Clerkship in Advanced Neurology. 1 hour any term.

Selected neurological cases studied and presented for discussion. Participation in combined neurological, neuroradiological and neurosurgical conferences. Selected studies in clinical neurology or in electroencephalography.

Required Courses

Third Year

Ped 630. Third-Year Pediatrics. 11 hours, one section each term.

Third-year pediatrics instruction includes lectures and clerkship. The lectures provide a survey of pediatrics from a correlative standpoint, supplemented by pertinent demonstrations. The clerkship provides the opportunity for the student to study and examine a wide spectrum of pediatric patients and learn to assume ward responsibility under direct supervision of the staff. Individual and group discussions are included as a regular part of the work. Lectures, one hour a week, each term, fall, winter, and spring: 36 hours. Ward Clerkship, 32 hours a week for 6 weeks, in sections: 192 hours: 228 hours.

Fourth Year

Ped 670. Fourth-Year Pediatrics. 9 hours, one section each term.

The student continues his study of pediatrics in an outpatient clinic setting and participates actively, under staff supervision, in the study and care of pediatric patients in the various pediatric clinics. Part of his time is spent in the general

Leave of absence, August 1, 1968 to July 31, 1969.

pediatric outpatient clinic, and the remainder in the specialty clinics of ped atrics, each of which meets 2 hours each week for 6 weeks. The specialty clinic are Allergy, Cardiology, Endocrinology, Hematology, Mental Health, Metal olism, Neurology, Renal, and Well Baby. Individual and group discussions at held in all clinics. General Pediatric Outpatient Clinic, 16 hours a week for 6 weeks, in sections: 96 hours. Specialty Clinics, 20 hours a week for 6 week in sections: 120 hours: 216 hours.

Elective Courses

Ped 607. Research. Any term, hours to be arranged.

Ped 640. Fetal Neonatal Death Conference. ½ hour, any term.

Review of the pathology of predelivery and postnatal period. Discussion of the likely causes of death from the clinical, gross, and microscopic review of each case, 1 hour a week: 12 hours.

Ped 641. Congenital Heart Disease. 1 hour, one section each term.

Students have an opportunity to examine patients with congenital heart diseas in the Crippled Children's Division under the guidance of consultants from the Departments of Medicine, Diagnostic Radiology, Surgery, and Pediatric 2 hours a week: 24 hours.

Ped 690. Pediatric Outpatient Clinic. Any term, hours to be arranged.

Elective credit is given for completion of clinical work in the department i addition to that required in the regular Outpatient Clinic course.

Residents: Jerald E. Albrich, Arlen B. Burns, Walter A. Derrick, Thomas W Friedland, David A. Kimball, Harper D. Pearse, Robert W. Ruggeri Dayton R. Seabaugh, Jr., Clifford O. Stranburg, Don A. Udall, Jay H Winemiller

General Surgery—Required Courses

Second Year

Sur 610. **Introduction to Surgery.** 1 hour winter, 2 hours spring.

Designed to introduce the student to the history and broad principles of surgery. Application of the basic sciences to surgical practices, with particular reference to such topics as asepsis, shock, wound healing, cancer, infection the metabolic response to injury, etc. Lectures, 1 hour a week, 12 hours, winter; 2 hours a week, 24 hours, spring, 36 hours.

Third Year

Sur 630. Third-Year Surgery. 20½ hours, one section each term.

The third-year course in surgery gives the student a broad perspective built around concepts of injury and disease. In the second year he learned the principles of wound healing. The third year focuses on the problems of wound healing in relation to surgery of the gastrointestinal tract. The student is also introduced to the techniques of physical examination, asepsis, and operating

room conduct. Emphasis is placed primarily on small-group teaching with ward rounds, seminars, and case-analysis clinics. Patient study and experience in general surgery is provided in the General Surgery Outpatient Clinic. In orthopedics and urology the student works both in a hospital clerkship and in the Outpatient Clinic.

Experience in the Outpatient Clinic and in the wards is supplemented by case analysis clinics and seminars. A systematic series of lectures covering the diag nosis and treatment of orthopedic, urological, and general surgical condition supplements clinical experience and serves as a guide for student reading. In anesthesiology, an integrated series of lectures and demonstrations covers the

with the major problems of neurological surgery. Conferences, clinics, patien

history of anesthesia, applied physiology, anesthetic techniques, and the use of anesthetic agents. Neurosurgical lectures are designed to acquaint the student with the manner of diagnosis and the types of treatment available to patient

studies, and demonstrations are held in physical medicine and clinical pathology.

Students spend six weeks on general surgery, three weeks on orthopedic surgery, and three weeks on urology.

Lectures in General Surgery (winter and spring), Urology (fall), Orthopedic Surgery (winter), and Anesthesiology (spring): 60 hours. General Surgery Clerkship Clinic, 60 hours; General Surgery Outpatient Clinic, 36 hours; Urology Clerkship, 69 hours; Urology Outpatient Clinic, 24 hours; Orthopedic Surgery Clerkship, 72 hours; Orthopedic Surgery Outpatient Clinic, 21 hours; Neursosurgery Seminar, 12 hours; Regional Anesthesia, 12 hours; Fractures and Joint Injuries Conference, 24 hours; Physical Medicine, 24 hours; Clinical Pathology, 12 hours; 336 hours; 426 hours.

ourth Year

ur 670. Four-Year Surgery. 16 hours, one section each term.

The fourth-year course is designed to give the student close continuous contact in the hospital with surgical patients. In the second year the student was shown the broad principles of surgery. In the third year the application of these principles to specific disease areas was demonstrated and learned. In the fourth year the student sees the practical application of these principles to individual patients and becomes, for the first time, an active member of the surgical team and participates in diagnosis, preoperative preparation, operations, and postoperative care. By continuous contact with the patient, he learns the total responsibilities of surgery and the surgeon.

Clerkship experience in neurosurgery is included. Lectures in urology and surgery round out the student's knowledge. The student attends the weekly General Clinical Conference.

Students spend six weeks on General Surgery including animal surgery experience and two weeks on Neurosurgery. Lectures in Urology (fall) and General Surgery (winter), 24 hours. General Clinical Conference, 24 hours; General Surgery Clerkship, 192 hours; Experimental Surgery, 24 hours; Neurosurgery Clerkship, 72 hours; 336 hours:

eneral Surgery—Elective Courses

ur 601. Research. Any term, hours to be arranged.

ur 690. Surgery Outpatient Clinic. Any term, hours to be arranged.

Elective credit is given for completion of clinical work in the department in addition to that required in the regular Outpatient Clinic course.

nesthesiology—Elective Course

nes 601 **Research.** Any term, hours to be arranged.

leurosurgery—Elective Courses

eu Sur 601. **Research.** Any term, hours to be arranged.

Clinical and basic research projects in neurosurgery. Intended for students primarily interested in careers in neurology and neurological surgery.

DESCRIPTION OF COURSES

Neu Sur 640. Differential and Regional Neurosurgical Diagnosis and Therpeutics. ½ hour.

Discussions and demonstrations of the altered neurophysiologic backgroun and anatomy encountered in patients with neurosurgical problems. Emphas on student interest and participation in discussion of the basic concepts is volved. Lectures and demonstrations. 1 hour a week: 12 hours.

Orthopedics—Elective Courses

Orth 601. Research. Any term, hours to be arranged.

Orth 690. Orthopedic Outpatient Clinic. Any term, hours to be arranged.

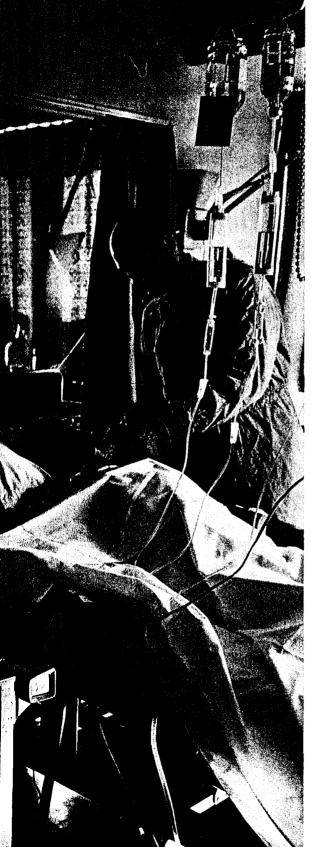

Elective credit is given for completion of clinical work in the division in a dition to that required in the regular Outpatient Clinic course.

Urology-Elective Courses

Ur 601. Research. Any term, hours to be arranged.

Ur 690. Urology Outpatient Clinic. Any term, hours to be arranged.

Elective credit is given for completion of clinical work in the division in addition to that required in the regular Outpatient Clinic course.

Training in medical technology is offered in the clinical laboratories of the Un versity of Oregon Medical School. The twelve-month program, established : 1933, is approved by the Council on Medical Education and Hospitals of the American Medical Association.

The minimum admission requirements are three years of college work, including 24 term hours of biology; 24 term hours of chemistry, including one full academ year of a general college chemistry course, with lectures and laboratory; and or term of college mathematics. It is strongly recommended that a course in physic be included in the student's college preparation. The three years of prerequisity work may be done in any accredited college; the applicant's credentials must lapproved by the Registry of Medical Technologists of the American Society Clinical Pathologists prior to admission.

Textbooks and uniforms are supplied by the student. There are a limited number dormitory rooms for women; application may be made through the Women's Res dence Director, 707 S.W. Campus Drive, Portland 97201.

Classes begin with the fall term and academic credit is granted for the work of the fall, winter, and spring terms. No credit is given for the summer term, which is required for certification by the Registry. Upon satisfactory completion of the twelventinuous months' training period, a certificate is issued to the student by the University of Oregon Medical School. The student is then eligible to take the National Registry Examination which is given twice a year. Upon passing the examination, the student is qualified as a registered medical technologist with the American Society of Clinical Pathologists.

Credits earned in the medical technology program may be applied toward a bach lor's degree. The student who intends to apply for a bachelor's degree must corplete the work required for the degree in the Oregon State System of Higher Ed cation, or in the institution at which he obtained his college preparation, beforenering upon the fourth year in medical technology at the University of Orego Medical School.**

^{*} Leave of absence, June 1, 1968 to May 30, 1970.

^{**} Students expecting to receive the bachelor's degree from the University of Oregon shou include 9 hours of English composition and 9 hours of English literature in their preparate programs. See the University of Oregon Catalog for specific courses that meet the literature requirements.

A graduate program leading to the Master of Science degree is offered for qualified students.

Application for admission forms may be obtained from the Registrar of the Medical School, Applications are accepted between December 1 and May 15.

Fees

Students in medical technology who are residents of Oregon pay a fee of \$127.00 a term; nonresident students pay a fee of \$237.00 a term.

Medical technology students pay the "special fees" listed on page 18 under the conditions indicated.

Grading System and Grades

A grading system of A to D is used at the Medical School. A is the highest and D is the lowest passing grade. If a course is not completed within the time allotted, the work must be finished satisfactorily within one year. Failure in a course requires repetition of the course. In most courses, the student will be given frequent written and practical tests, marked with percentage grades. The student may be given these percentage grades by his instructors, but final grades are issued only by the Registrar's office. Final grades are given for each term's work, but are ssued only at the end of the Winter and Spring quarters.

If at any time during the school year the student feels his work is not satisfactory, ne should consult his instructor. Should special problems arise that threaten to nterfere with study, the student should consult a faculty member for advice before his scholarship has been seriously affected.

Dismissal

The faculty has the right to sever, at any time, the connection with the Medical School of any student who is considered to be physically, morally, or mentally unfit or a career in Medical Technology. A student may be dropped upon the recomnendation of the faculty.

A student ordinarily may be on probation status for one term before the faculty ecommends his dismissal; however, the faculty, for adequate cause, may drop a tudent without previous warning.

Laboratory instruction continue

† See page 53.

IT 410, 411. Clinical Bacteriology. 4 hours fall, 6 hours winter.

The bacteria pathogenic for man. Study of the culture, the morphological characteristics, and the means of isolation and identification of these organisms. Fall: lectures, 4 hours a week. Winter: lectures, 3 hours a week; laboratory, 9 hours a week: 176 hours.

IT 413. Laboratory Orientation. 2 hours fall.

A study of the collection, preservation, and care of the various types of clinical specimens. Lectures, 1 hour a week; laboratory, 3 hours a week: 44 hours.

IT 414. **Urinalysis.** 4 hours spring.

A study of the mechanisms of formation and identification of the normal and abnormal components of urine. Lectures, 2 hours a week; laboratory, 6 hours a week: 88 hours.

IT 420. Histological Technique. 2 hours spring.

Principles of tissue fixation, dehydration, and staining, with special emphasis upon the methods used in histopathological technique: Lecture, 1 hour a week; laboratory, 3 hours a week: 44 hours.

IT 424, 425. Clinical Biochemistry. 5 hours fall, 6 hours winter.

The principles of biochemistry and the applications of colorimetry; gastrometric analysis, and quantitative chemistry in the determination of the substances in blood and body fluids. Fall: lectures, 3 hours a week; laboratory, 6 hours a week. Winter: lectures, 3 hours a week; laboratory, 9 hours a week: 231

IT 430. Principles of Hematology. 5 hours fall.

The normal function and development of blood cells, red blood counts, white blood counts, differential cell counts, platelet counts, sedimentation rate, coagulation, bleeding time, and red blood cell fragility. Lectures, 3 hours a week; laboratory, 6 hours a week: 99 hours.

IT 431. Special Hematology. 3 hours winter.

Blood dyscrasias, bone marrow, and blood studies relative to the anemias, leukemia, and other pathological conditions of the blood. Lectures, 2 hours a week: laboratory, 3 hours a week: 55 hours.

[T 432. Immunohematology. 3 hours spring.

The principles of immunohematology as applied to blood banking with special emphasis upon blood groups and types, and techniques demonstrating antigenantibody reactions; donor collection, processing and storage, and hazards of transfusions; blood components; medical-legal aspects. Lectures, 2 hours a week; laboratory, 3 hours a week: 55 hours.

[T 436. Applied Serology. 4 hours spring.

The principles of serological phenomena in the laboratory. The factors influencing precipitin, flocculation, and complement fixation tests as applied to serum diagnosis of disease. Special consideration of flocculation and complement fixation tests as they apply to the diagnosis of syphilis. Lectures, 2 hours a week; laboratory, 6 hours a week: 88 hours.

[T 437. Clinical Parasitology. 3 hours spring.

The life cycles, modes of transmission and diagnostic features of the more common parasites of man. Lectures, 2 hours a week; laboratory, 3 hours a week: 55 hours.

Graduate Studies

nedical sciences, leading to the Master of Science and Doctor of Philosophy egrees; the degrees are conferred by the University of Oregon upon recommenation of the faculty of the Medical School. A combined program leading to both nedical and basic science graduate degrees is also available for selected medical tudents. Work leading to the Master of Science or Doctor of Philosophy degree is offered in anatomy, biochemistry, medical psychology, microbiology, pathology, harmacology, and physiology. The master's degree is offered in medical techology also. A Ph.D. degree in speech pathology and audiology is offered jointly by the speech department of the University of Oregon and the Medical School's Crippled Children's Division. Students meet admission requirements and follow raduate school regulations of the University of Oregon.

The University of Oregon Medical School offers graduate programs in the basic

Complete details concerning study toward the degrees of Master of Science and Doctor of Philosophy are incorporated into a separate bulletin entitled Graduate studies Programs. This bulletin is available from the Office of the Registrar and hould be consulted by persons interested in graduate study.

Combined Program Leading to the M.D. and a Graduate Degree

The Medical School offers a special five-year program of study for students wishing to work toward the Master of Science degree while completing the regular urriculum in medicine. This combined program of graduate-medical study is open nly to students who plan to spend five years in residence at the Medical School. Required graduate major credit is earned in a major department of graduate tudy. Minor credits are granted for basic science courses in the medical curriculum. Medical students wishing to enter this program must be accepted as graduate tudents by the Graduate Council and the Dean.

To provide training for those medical students who wish to prepare themselves here completely for careers as physician-scientists, a program leading to the ombined M.D. and Ph.D. degrees has recently been approved and activated. This ourse of training may require a total time span of seven years of post-baccalaurete study. It affords opportunity for advanced coursework in the fundamental ciences of mathematics, physics and chemistry, and for advanced coursework in the basic medical sciences that cannot be incorporated into the M.D.-M.S. program.

andidates for the Doctor of Philosophy degree who have already earned the Doctor of Medicine degree may apply a maximum of 45 term hours of credit (one cademic year) in the basic medical sciences toward the advanced degree.

OTHER INSTRUCTIONAL PROGRAMS

School of Nursing

The University of Oregon School of Nursing, located on the campus of the University of Oregon Medical School, Portland, offers two programs:

- (1) The Bachelor of Science degree is designed for two types of students: one is the student with no previous preparation in nursing; the other is the student whis a graduate of a hospital or community college school of nursing.
- (a) The student with no previous preparation in nursing enrolls for the prograr that prepares her to become a professional nurse who gives total patient care i hospitals, public health agencies, and in the community, who assumes leadershi of other nursing personnel, and who possesses the foundations for advanced stud in teaching supervision, administration, and consultation. This program is fou academic years and one summer term in length.

For the freshman year, the student enrolls in an accredited college or universit for study in liberal arts and basic sciences.

For the sophomore year, the student nurse transfers to the School of Nursing Portland, where she continues her liberal arts studies along with professiona nursing courses. Student nurses receive their clinical experience in the teaching hospitals and clinics of the Medical School—the Medical School Hospital, Mult nomah Hospital, and the Outpatient Clinic. Psychiatric and public health nursing experience is secured in off-campus facilities—in the Oregon State Hospital Salem, and in selected health departments and agencies. Medical-surgical nursing experience is also provided at Physicians and Surgeons Hospital, Portland.

(b) The registered nurse student enrolling in this program must be a graduate of an approved community college or hospital school of nursing. This program differ in specific content and sequence from the program for students with no preparation in nursing but is designed to attain the same goals.

The student in this program may be allowed some credits in nursing for previous work, either in the form of transfer credits from an associate degree program or the hospital school graduate is allowed credit in nursing on the basis of result of comprehensive examinations on selected nursing courses administered at the University of Oregon School of Nursing. The comprehensive examination is required of all graduates of associate degree and hospital programs. The student who does not elect to challenge course content through equivalency examinations will take the same courses as the student without previous nursing preparation.

Courses in this program contribute to the broadening and strengthening of previous preparation and assist the student in developing increased professional competency. They do not lead to specialization but serve as a foundation for further professional education. The program provides a balance of general and professional education and includes at least 45 credits in the nursing major.

The baccalaureate program includes preparation in public health nursing.

(2) The Master of Science in Nursing Education is for collegiate nurses who have graduated from an accredited college or university and desire advance professional preparation. A major in medical-surgical nursing is offered. The program is planned to prepare nurses for faculty positions.

A catalog containing detailed information about the programs of the School o Nursing may be obtained by writing to the Director, University of Oregon Schoo of Nursing, Portland 97201.

Radiologic Technology

The Department of Radiology of the University of Oregon Medical School offers two-year course of training for radiologic technologists. The course, which was established in 1930, is approved by the Council on Medical Education and Hospitals of the American Medical Association and by the American Registry of Radiologic Technologists.

The minimum admission requirement is graduation from an accredited high school with a high scholastic rating; however, preference is given to applicants who have college training with credits in mathematics and physics.

No tuition is charged during the period of training; however, the student must provide his own books, supplies, uniforms, and incidental fees. During the second year the student receives a stipend of \$50.00 per month.

The course includes lectures in anatomy, physiology, physics, and X-ray equipnent, and lectures and clinical experience in darkroom chemistry and procedures, X-ray techniques, positioning of patients, hospital ethics, record keeping, departnent operation, radiation therapy. Students receive clinical experience in special X-ray procedures during their second year of training. All instruction is under the direction of the chairman of the Department of Radiology of the University of Oregon Medical School.

Eighteen to 20 students are admitted annually on July 5. Applications should be submitted to the Director of the course in Radiologic Technology, Department of Radiology, University of Oregon Medical School Hospitals and Clinics.

The students are required to take the examination given nationally by the American Registry of Radiologic Technologists before completion of the two-year course.

Cytotechnology

A twelve-month course in cytotechnology leading to A.S.C.P certification as a cytotechnologist, is offered by the Medical School's department of pathology to students with a minimum of two years (60 semester or 90 quarter hours) of credit from an accredited college or university. Twelve semester or 18 quarter hours in biology must be included. Six students are accepted into the program, which is conducted in the cytology laboratories of the University of Oregon Medical School, on July 1 of each year. No tuition is charged. Each trainee receives uniforms, aundry and a stipend of \$200 per month during the twelve months of formal training. The program in cytotechnology is approved by the Council on Medical Education of the American Medical Association.

Hospital Dietetics

The course in hospital dietetics offered in the University of Oregon Medical School Hospitals and Clinics was approved by the American Dietetic Association in 1943. The course provides the one year's internship in a hospital necessary to complete requirements for membership in the association.

The minimum admission requirement is graduation with a B.S. degree, including the academic requirements of the American Dietetic Association.

OTHER INSTRUCTIONAL PROGRAMS

During the twelve-month training period at the Medical School, the student pay no tuition but provides her own supplies, including uniforms. Students receiv complete maintenance and an allowance of \$100 per month.

Appointments are made once a year; applications should be submitted to the Director of Dietetics, University of Oregon Medical School Hospitals and Clinic not later than March 1.

Internship and Residency Programs

The internship programs of the University of Oregon Medical School Hospital and Clinics are approved by the Council on Medical Education and Hospitals of the American Medical Association. Appointments are made through the Nationa Internship Matching Program. All internship programs are twelve months i length and include a rotating internship with 36 positions, a straight internshi in medicine with eight positions and a straight internship in pathology with on position. All patients in the hospitals and clinics are house cases and are under the personal care of an intern, who is responsible to the resident and attending facult member responsible for the service. Internship appointments are effective June 26

One of the important functions of a medical school is the training of physician in the medical specialties. The demand for such training has greatly increased is recent years. In response, the Medical School residency program has been expanded to provide approximately 170 appointments. Residency training follows one year of internship and consists of two to five years of study devoted entirely to one specialized field of medicine. Instruction is given both in clinical departments and in related basic science departments of the School.

All residencies have received the approval of the Council on Medical Education and Hospitals of the American Medical Association and of the respective American boards. Residencies are offered in anesthesiology, cardiopulmonary surgery, der matology, hematology, internal medicine, medical psychology, neurological surgery neurology, obstetrics and gynecology, ophthalmology, orthopedics, otolaryngology pathology (both clinical and anatomical), pediatrics, psychiatry, diagnostic radi

The following Portland hospitals cooperate with the Medical School in the residency programs: Emanuel Hospital, St. Vincent Hospital, Shriner's Hospital fo Crippled Children, and Veterans Hospital.

Applications should be made to the chairman of the department concerned. Appointments are made six to eight months in advance of the beginning of the residency period, July 15.

Continuing Medical Education

ology, radiation therapy, general surgery and urology.

The physician is motivated to pursue the scholarly habit of life-long learning because of his desire to provide the best possible care for his patients. There are five basic ways to achieve this goal:

- a. The daily acquisition of new knowledge by reading carefully selected text books and periodicals in a home library sanctuary.
- b. Frequent consultation with peers.

- Active participation in community hospital medical staff programs such as medical record audits and clinical pathologic conferences.
- d. Attending educational programs sponsored by learned professional societies such as the American Academy of General Practice and the American College of Physicians.
- e. Finally, attending short postgraduate courses produced by medical schools, voluntary health agencies and hospitals.

1 order to help the physician achieve this last objective, the Medical School makes s teaching and clinical facilities available for continued postgraduate study. An ctensive postgraduate program has been arranged, consisting of a series of short tensive courses, usually of three to five days' duration. These courses are devoted special subjects and are scheduled throughout the year. Instruction is by lectures, emonstrations, conferences, discussion groups, and patient presentations, the ethod of presentation depending upon the subject. In addition, several circuit sychiatry and general medicine courses are held in various parts of Oregon.

nrollment is open to any graduate of an approved medical school who is licensed practice in his state of residence. The fee for each course is usually \$20.00 per ay.

ny physician meeting the eligibility requirements stated above may attend any f the regularly scheduled clinical teaching activities in the hospitals and clinics ithout official enrollment and without payment of fees.

MEDICAL SCHOOL FACULTY

Executive Faculty

David W. E. Baird, Dean of the Medical School; Joseph J. Adams, Clifford V. Allen, Ralph C. Benson, John M. Brookhart, Norman A. David, David D. DeWeese, Charles T. Dotter, Arthur W. Frisch, Jarvis Gould, Hance F. Haney, Frederick P. Haugen, Charles N. Holman, Tyra T. Hutchens Richard T. Jones, Robert D. Koler, William W. Krippaehne, Howard P. Lewis, Walter C. Lobitz, Jr., Joseph D. Matarazzo, Richard W. Olmsted Edwin E. Osgood, Harold T. Osterud, Anthony A. Pearson, George Saslow Richard L. Sleeter, Kenneth C. Swan, Sefton R. Wellings, William A Zimmerman

STANDING COMMITTEES OF THE FACULTY

- Admissions and Advanced Standing—Hance F. Haney (Chairman), Robert L Bacon, Michael D. Baird, Joseph D. Matarazzo, Robert J. Meechan Joseph B. Trainer, Caroline H. Pommarane (ex officio)
- Animal Care—James Metcalfe (Chairman), William S. Fletcher, M. Ronak Parelius, Alfred J. Rampone, Allan L. Rogers, Roy L. Swank, Wilber R. Todd, Sefton R. Wellings, William A. Zimmerman
- Clinical Review and Investigational Drug-Norman A. David (Chairman)
 Robert H. Bigley, George W. Dana, Arthur W. Frisch, Stanley W
 Jacob, M. Ronald Parelius, Ira B. Pauly
- Curriculum and Schedule—William W. Krippaehne (Chairman), Joseph J Adams, John A. Benson, Jr., Paul H. Blachly, Robert A. Cooper, Jr. Richard L. Dobson, Raphael B. Durfee, Richard T. Jones, Harold T Osterud, Anthony A. Pearson, Richard L. Sleeter, William E. Snel Joseph D. Matarazzo (ad hoc)
- Graduate Council—John M. Brookhart (Chairman), Robert L. Bacon, John D. Gabourel, Howard S. Mason, Joseph D. Matarazzo, Evelyn I Oginsky, Sefton R. Wellings, Joseph J. Adams (ex officio)
- Henry Waldo Coe Prize-Hance F. Haney (Chairman), Clarence V. Hodge
- Instructional Aids Advisory—Kenneth A. Niehans (Chairman), Robert I Bacon, Ralph C. Benson, Margaret Berroth, J. David Bristow, Richar Herren, Alan L. Morgenstern, Ralph E. Tuomi
- Internship Advisory—John A. Benson, Jr. (Chairman), William S. Fletcher Robert D. Koler
- Jones Lectureship—Herbert E. Griswold (Chairman), Tyra T. Hutchen Anthony A. Pearson
- Library—Norman A. David (Chairman), J. David Bristow, Morton Good man, Noble Wiley Jones, George H. Lage, Nelson R. Niles, Wilber R. Todd, Archie R. Tunturi
- Patent—William A. Zimmerman (Chairman), George I. Johnston, M. Ronal Parelius, Bernard Pirofsky, Benjamin B. Ross, Roy L. Swank, John 'I Van Bruggen
- Planning Council—Joseph J. Adams (Chairman), Jean E. Boyle, John M. Brookhart, A. J. Clemons, M. Roberts Grover, Jr., Tyra T. Hutchen William W. Krippaehne, Donald C. Lowe, Harold T. Osterud, Richar L. Sleeter, William A. Zimmerman

- *Cadioisotope—Tyra T. Hutchens (Chairman), Clifford V. Allen, Edwin E. Osgood, Demetrios A. Rigas, Harry Shaich
- Research—Walter C. Lobitz, Jr. (Chairman), J. Peter Bentley, William S. Fletcher, Robert D. Koler, James Metcalfe, Alfred J. Rampone, Jack A. Vernon, M. Ronald Parelius (ex officio)
- desearch Instrument Service-Benjamin B. Ross (Chairman), John D. Gabourel, David Gowing, Daniel L. Dennis, Demetrios A. Rigas
- cholarships—William A. Zimmerman (Chairman), Clarence V. Hodges, Caroline H. Pommarane, William A. Stotler, Wilbert R. Todd
- tudent Faculty—Faculty Members: Frederick P. Haugen (Chairman), Clifford V. Allen, Robert L. Bacon, Howard P. Lewis, Robert J. Meechan, Ernest A. Meyer, Kenneth A. Niehans, Harold D. Paxton, Clare G. Peterson
 - Student members are elected for one- or two-year terms.
- dean's Advisory Committee for the Veterans Hospital—D. W. E. Baird (Chairman), Jarvis Gould (Vice-chairman and Secretary), Donald E. Forster, Charles N. Holman, Tyra T. Hutchens, William W. Krippaehne, Howard P. Lewis, Louis G. Terkla, George Saslow, Kenneth C. Swan

Emeritus Faculty

- oderick E. Begg, M.D., Associate Professor Emeritus of Orthopedics.
 - B.S. (1924), Oregon State; M.D. (1937), Oregon.
 - M.D. (1915), Oregon.
- sidor C. Brill, M.D., Professor Emeritus of Medicine.

larry C. Blair, M.D., Professor Emeritus of Orthopedics.

- B.A. (1912); M.D. (1914), Columbia.
- . Elmer Carlson, M.D., Professor Emeritus of Orthopedics.
 - A.B. (1917), Reed; M.D. (1920), Oregon.
- obert S. Dow, M.D., Ph.D., Associate Professor Emeritus of Neurology. B.S. (1929), Linfield; M.A. (1934), Ph.D. (1935), Oregon.
- ugustus B. Dykman, M.D., Professor Emeritus of Ophthalmology.
- M.D. (1914), New York University.

 ertha B. Hallam, B.A., Professor Emeritus, Library.
 - B.A. (1931), Oregon.
- lair Holcomb, M.D., Professor Emeritus of Medicine.
 - M.D. (1919), Rush (University of Chicago).
- Yarren C. Hunter, M.D., Professor Emeritus of Pathology.
 - B.A. (1920), Albany College (Lewis and Clark); M.D. (1924), Oregon; M.A. (1927), Michigan.
- oble Wiley Jones, M.D., Professor Emeritus of Medicine.
 - A.B. (1895), Stanford; M.D. (1901), Rush (University of Chicago).
- yle B. Kingery, M.D., Professor Emeritus of Medicine.
 - B.S. (1912), M.D. (1916), Michigan.
- erl L. Margason, M.D., Professor Emeritus of Medicine.
 - A.B. (1920), M.D. (1923), Oregon.
- rank R. Menne, M.D., Professor Emeritus of Pathology.
 - B.S. (1913), Wisconsin; M.D. (1915), Rush (University of Chicago).
- erle W. Moore, M.D., Associate Professor Emeritus of Medicine. B.S. (1920), Oregon; M.D. (1924) Jefferson.

MEDICAL SCHOOL FACULTY

- Harold J. Noyes, D.D.S., M.D., Professor Emeritus of Dental and Oral Medicin Ph.B. (1923), University of Chicago; B.S., D.D.S. (1928), Illinois; M.D. (1933), Rt (University of Chicago).
- Eugene W. Rockey, M.D., Professor Emeritus of Surgery. B.A. (1908), Stanford; M.D. (1912), Harvard.
- Homer P. Rush, M.D., Professor Emeritus of Medicine. M.A., M.D. (1921), Oregon.
- E. Merle Taylor, M.D., Professor Emeritus of Ophthalmology. M.D. (1925), Iowa.
- Edward S. West. Ph.D., Professor Emeritus of Biochemistry.

 A.B. (1917), Randolph-Macon; M.S. (1920), Kansas State; Ph.D. (1923), University Chicago.

Faculty*

- †John F. Abele, M.D. Assistant Clinical Professor of Orthopedics (1946).
 B.A. (1930), M.D. (1934), Oregon.
- † John C. Adams, M.D., Clinical Professor of Surgery (1932). B.S. (1922), University of Washington; M.D. (1926), Oregon.
- Joseph J. Adams, B.B.A., Assistant Dean; Professor (1951). B.B.A. (1949), Gonzaga.
- †H. Victor Adix, M.D., Senior Clinical Instructor in Otolaryngology (1934). B.A. (1928), M.D. (1930), Oregon; M. Med. Sc. (1933), Pennsylvania.
- †Phillip S. Alberts, M.D., Clinical Instructor in Obstetrics and Gynecolog (1964).
- **‡Bruce K. Alexander**, Ph.D., Assistant Professor of Medical Psycholog (Primate Center) (1967).

B.A. (1953), M.D. (1958), Nebraska.

M.D. (1933), Iowa.

- A.B. (1961), Miami; M.S., Ph.D. (1966), Wisconsin. **‡Barrington T. Allen,** Ph.D., Assistant Clinical Professor of Environment Medicine (1966).
- B.Sc. (1958), Ph.D. (1961), University of Southampton (England).

 Clifford V. Allen, M.D., Professor of Clinical Pathology (Radioisotopes) ar Radiation Therapy; Chairman, Department of Radiation Therapy (1955).
- Daphne Allen, M.Libr., Serials Librarian; Assistant Professor (1965). B.A. (1964), Portland State; M.Libr. (1965), University of Washington.
- †Richard P. Andrews, M.D., Senior Clinical Instructor in Surgery (1963).
 B.S. (1949), Denison; M.D. (1953), Harvard.
- †Laurence M. Ashley, Ph.D., Lecturer in Pathology (1966). B.S. (1930), Michigan State; M.A. (1932), Michigan; Ph.D. (1945), Southern Californi
- †Carl G. Ashley, M.D., Assistant Clinical Professor of Pediatrics (1936). B.A. (1927), M.D. (1931), Oregon.
- †Kurt W. Aumann, M.D., Associate Clinical Professor of Medicine (1948). B.S. (1936), Washington State; M.A. (1940), M.D. (1942), Oregon.

^{*} The year in parentheses following the name of each faculty member indicates the date original appointment to the faculty.

^{2 †} Volunteer. ‡ Part-time.

- Villiam C. Awe, M.D., Assistant Professor of Surgery (1966).
 - B.S. (1955), M.D. (1958), Baylor,
