

“Increasing Pace, Scale, and Quality”

FEDERAL FOREST RESTORATION PROGRAM USE OF THE GOOD NEIGHBOR AUTHORITY

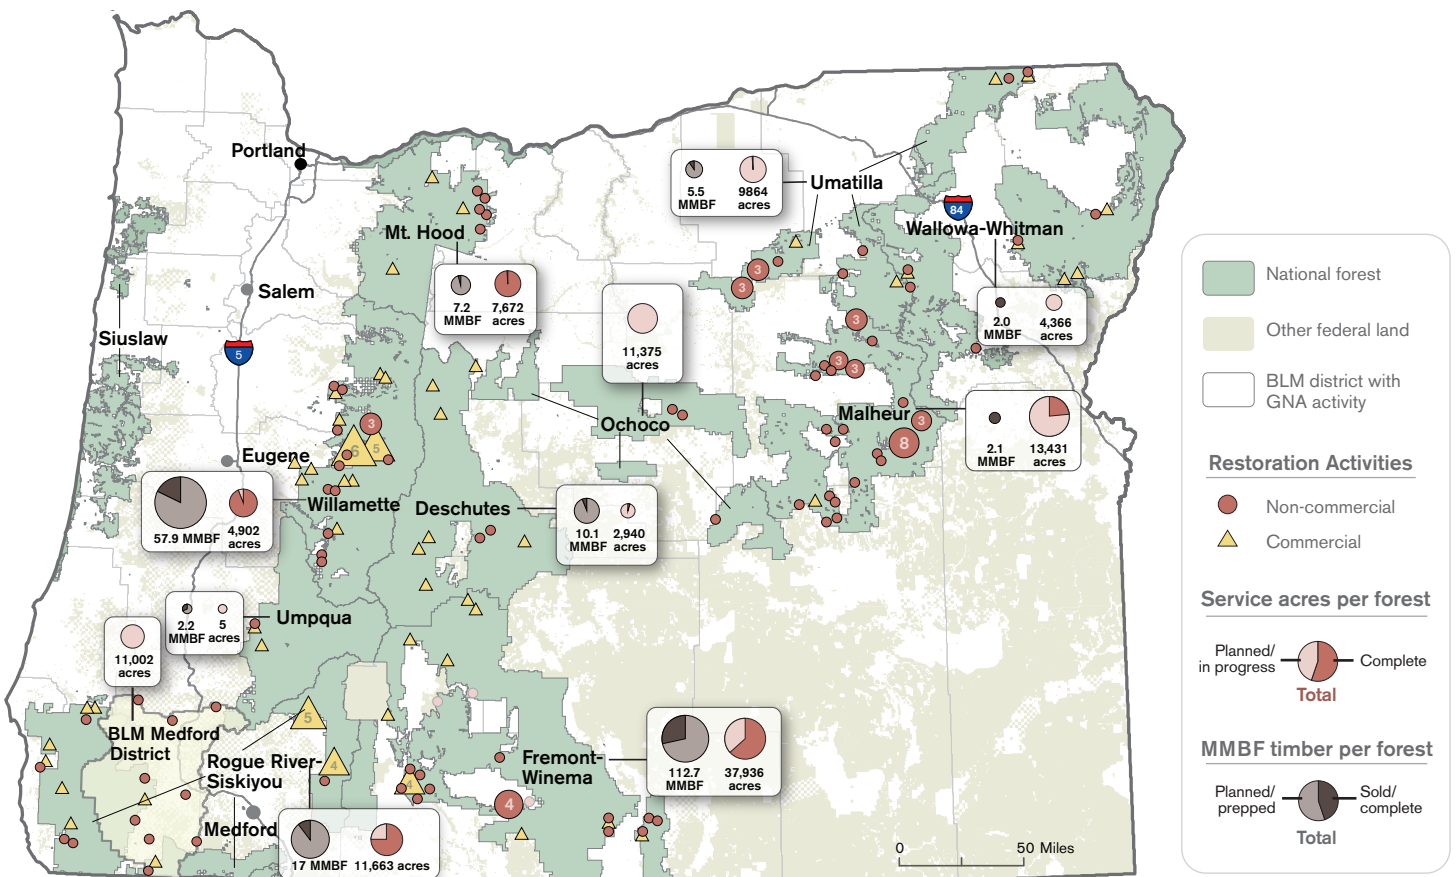

2016–2021 ACTIVITIES AND OUTCOMES

FACT SHEET 25 • January 2022

Restoration is a pressing need across Oregon’s forests—over 7 million acres¹ are experiencing declining forest health and are at elevated risk of large and destructive wildfires. Oregon Department of Forestry’s (ODF) Federal Forest Restoration Program partners with federal agencies to restore and steward these important lands to enhance and protect the valuable benefits they provide for Oregonians. ODF supports three key elements of restoration: Planning – Implementation – Monitoring, all integral to restoring land in an ecologically sound, scientific manner. This fact sheet summarizes the results of ODF’s efforts to increase the pace, scale and quality of restoration on federal lands in Oregon.

Good Neighbor Authority activities administered by Oregon Department of Forestry, 2016–2021

ODF's GNA work on federal lands in Oregon:

31 agreements — with — **10** national forests (23 agreements) — — — **2** BLM district (6 agreements) — — — **Forest Service PNW Regional Office** (2 agreements)

Results:

Non-Commercial Projects

Activities — on — **10** national forests, **1** BLM districts

covering

115,156 acres

including

- 3,903** planned
- 47,387** in progress
- 63,866** complete

Planning surveys & project preparation work:

- Wildlife, botany, heritage, or other resource surveys
- Remote sensing, stand exams, or other forest inventory work
- Cruising, tree marking, unit layout, or other project preparation

Implementation work:

- Non-commercial fuels reduction, thinning, or forest health treatments
- Prescribed fire
- Wildlife habitat restoration or improvement
- Stream enhancement or fish passage
- Invasive/noxious weed treatments

Monitoring work:

- Post-implementation vegetation management and stream restoration monitoring

75,160 acres

- 550** planned
- 22,217** in progress
- 52,393** complete

39,346 acres

- 3,353** planned
- 24,960** in progress
- 11,033** complete

650 acres

- 210** in progress
- 440** complete

Commercial Projects

65 Sales — on — **9** national forests

7 completed, 17 sold, 7 prepped, 34 planned

over an anticipated

50,299 acres

- 6,217** prepped
- 12,666** sold
- 29,840** planned
- 1,576** complete

and

215.2 MMBF (million board feet)

- 19.7** prepped
- 43** sold
- 145.1** planned
- 7.5** complete

Contract NEPA projects

10 Projects — on — **6** national forests

7 complete, 3 in progress

over an anticipated

72,060 acres

- 40,781** Planned / In Progress
- 31,279** acres complete

during

- 2019:** 3 completed
- 2020:** 3 completed
- 2021:** 1 completed
- 2022:** 3 anticipated
