Executive Summary

The University of Oregon Survey Research Laboratory (OSRL) conducted a national survey entitled “American Opinions on Global Warming” between November 2002 and February 2003 (n=673).

This research found that of those Americans who have heard of global warming (92%):

- Over 90% think the United States should reduce its greenhouse gas emissions.
- A strong majority (77%) support government regulation of carbon dioxide as a pollutant and investment in renewable energy (71%).
- A strong majority (88%) support the Kyoto Protocol and (76%) want the United States to reduce greenhouse gas emissions regardless of what other countries do.
- While a majority favor a tax on "gas guzzlers" (54%), strong majorities oppose a gasoline tax (78%) or a business energy tax (60%) to reduce greenhouse gas emissions.
- Americans divide evenly (40%) regarding a market-based emissions trading system, while 18% are uncertain.
- Majorities of Republicans and Conservatives support most climate change policies.
- Democrats and Liberals express stronger support for climate change policies than Republicans and Conservatives.
- Independents and Moderates show levels of support more similar to Democrats and Liberals than to Republicans and Conservatives.

Methodology

These results come from a national survey entitled “American Opinions on Global Warming,” which examined American risk perceptions, knowledge, policy preferences and behaviors regarding global climate change. From November 2002 to February 2003, 673 adults (18 and older) completed a mail-out, mail-back questionnaire, for a response rate of 55%. The results represent a random sample of residential addresses from all 50 states and are weighted to bring them in line with actual population proportions. All policy results derive from the subset of Americans who have heard of global warming (92%). For results based on the total sample of national adults, one can say with 95% confidence that the maximum margin of sampling error is +/- 4%. The study was conducted by the University of Oregon Survey Research Laboratory and funded by the National Science Foundation.

Simplified Results

PUBLIC AWARENESS AND CONCERN ABOUT GLOBAL WARMING

Table 1: Awareness

“Have you ever heard of global warming?”

	%
Yes	92
No	8
Total	100

Table 2: Concern

“How concerned are you about global warming?”

	%
Somewhat/Very concerned	75
Not very/Not at all concerned	24
No response	1
Total	100

NATIONAL POLICIES

Table 3: U.S. Reduce Emissions

“Do you think the United States should reduce its emissions of the greenhouse gases (carbon dioxide, methane, etc.) that are said to cause global warming?”

	%
Probably/Definitely Yes	90
Probably/Definitely No	7
No response	3
Total	100

Table 4: Regulate CO₂

“Carbon dioxide is the primary greenhouse gas said to be causing global warming and is produced by electric power plants and motor vehicles (e.g., cars, trucks and sport utility vehicles). Currently, carbon dioxide is not regulated as a pollutant. How much do you support or oppose the regulation of carbon dioxide as a pollutant?”

	%
Somewhat/Strongly Support	77
Somewhat/Strongly Oppose	20
No response	3
Total	100

Table 5: Subsidize Renewable Energy

“The United States government provides approximately \$5 billion a year in subsidies to the fossil fuel industry (coal, oil, natural gas). Some people have proposed transferring these subsidies to the renewable energy industry (wind, solar, biomass, etc.) to develop cleaner forms of energy. This would make fossil fuels more expensive and renewable energy less expensive. How much do you support or oppose this proposal?”

	%
Somewhat/Strongly Support	71
Somewhat/Strongly Oppose	17
Don't know	9
No response	3
Total	100

Table 6: Gas Guzzler Tax

“In order to encourage people to use more fuel-efficient vehicles, some people have proposed a 5 percent "gas guzzler" tax on cars, trucks and sport utility vehicles that get less than 25 miles per gallon. This would add approximately \$1,000 to the price of a \$20,000 car. How much do you support or oppose this proposal?”

	%
Somewhat/Strongly Support	54
Somewhat/Strongly Oppose	40
Don't know	3
No response	3
Total	100

Table 7: Business Energy Tax

“To encourage industry to be more fuel efficient, some people have proposed a business energy tax. This tax would raise the average price of most things you buy, including food and clothing, by 3 percent, or approximately \$380 per person per year. How much do you support or oppose this proposal?”

	%
Somewhat/Strongly Support	31
Somewhat/Strongly Oppose	60
Don't know	6
No response	3
Total	100

Table 8: Gas Tax

“How much do you support or oppose a 60-cent per gallon gasoline tax, over and above existing gas taxes, to encourage people to drive less and thus reduce carbon dioxide emissions?”

	%
Somewhat/Strongly Support	17
Somewhat/Strongly Oppose	78
Don't know	2
No response	3
Total	100

INTERNATIONAL POLICIES

Table 9: Kyoto Protocol

“In 1997, the United States and other developed countries made an agreement called the Kyoto Protocol to collectively reduce their emissions of greenhouse gases. The United States agreed to reduce its emissions by 7% by the year 2010. How much do you favor or oppose this agreement?”

	%
Somewhat/Strongly Favor	88
Somewhat/Strongly Oppose	10
No response	2
Total	100

Table 10: U.S. Act Regardless

“The United States currently emits about 20% of the world's total greenhouse gases. People disagree whether the U.S. should reduce greenhouse gas emissions on its own, or make reductions only if other countries do too. Which of the following statements comes closest to your own point of view? The United States should reduce its emissions...

	%
...regardless of what other countries do.	76
...only if all other industrialized countries reduce their emissions.	7
...only if all other industrialized and all less-developed countries reduce their emissions.	8
The United States should not reduce its emissions.	2
Don't know.	5
No response	2
Total	100

Table 11: International Emissions Market

“One controversial proposal to solve global warming is to create an international market in greenhouse gases. In this system, all countries agree to a global cap on emissions. Each country then gets the right to emit a portion of this global amount. If a country emits more than its portion, it must buy more emission rights from other countries or else pay stiff fines. In principle, how much do you support or oppose an international market that allows countries to buy and sell greenhouse gases?”

	%
Somewhat/Strongly Support	40
Somewhat/Strongly Oppose	40
Don't know	18
No response	2
Total	100

**Americans' Support for National and International Policies
January, 2003**

Detailed Results

PUBLIC AWARENESS AND CONCERN ABOUT GLOBAL WARMING

How to Interpret Detailed Results (for the above table)

Reading across: For **Political ID**, 86% of Democrats, 80% of Independents, and 62% of Republicans are concerned (total) about global warming. For **Political Ideology**, 90% of Liberals, 79% of Moderates and 55% of Conservatives are concerned (total). For **Region**, 80% of respondents in the Northeast, 70% in the South, 75% in the Midwest, and 76% in the West are concerned (total) about global warming.

Reading down: A **Total** of 75% of all respondents said they were very (26%) to somewhat (49%) concerned, while 24% said they were not very (18%) to not at all (7%) concerned about global warming. Among **Republicans**, a total of 62% said they were very (13%) to somewhat (49%) concerned, while a total of 38% said they were not very (29%) to not at all concerned (9%).

*Note: Results are rounded to the nearest whole number. Columns do not always total 100% due to a small percentage of respondents who did not answer every question.
