An Index and Summary of Oregon Building Information in the Portland Daily Abstract (1906-1910)

INDEX/SUMMARY TWO (A) - BUILDINGS SORTED BY CITY AND BUILDING NAMES (Portland excluded)

Instructions:

This index/summary refers only to specific buildings in stated locations. Most records describe design and construction, but fires, demolition, the moving of buildings, a description of a building’s history, and other topics may also be included. Oregon cities are listed first, followed by cities in other states. The building may sometimes be near, but not within, the city named. This index/summary contains more complete information and references about each building than is found in the other index/summaries. Multiple references to a particular building are grouped so that all references to that building appear together, organized by date. To group this information, the name of a building had to be identical in all records in the database. To distinguish different buildings which otherwise would have had identical names, an address or other information was added in parenthesis following the name. Additions in brackets are alternate names reported for the building. Names and addresses of buildings were not always reported consistently from one reference to the next. In these cases, a "best" name and address had to be selected in order to link and group information about the same building. Some names and addresses are composites of information from different references that appear to refer to the same building. Decisions regarding these choices and linkages were made conservatively, but some errors may have resulted. If this is suspected, the individual references should be consulted for specific variations, since not all repetitive information was printed in the index/summary. Addresses listed in other references are available on-line in the computer's database. The one-line summary for each reference may include the addresses of contractors. These addresses appear as reported and were not converted to current addresses; see Appendix A. for conversions. The summary line is followed by a one word note [+ "much", "some", "minor", or "none" ] which indicates how much additional information is contained in the referenced documents. The cities included are:

Albany, Oregon
Albany [?] Oregon
Amity, Oregon
