Data Management: Consulting and Outreach

Data Management Plans Include:
• Type of Data to be collected
• Policies around said data
• What practices are to be used on data (storage, backup, etc.)
• What facilities and equipment are required
• Who owns and has access to the data
• Who is responsible for the data
• How will it be shared for reuse?
• How will it be preserved for the long-term?

Initial Contact
• Via EPCS System
• Email
• Via ORSA
• Via Other Faculty

Initial Review

Feedback
• Comments are recorded on document and sent back to researcher

Final DMP
• Review by Science Data Services Librarian
• Research and Instructional Technologist
• MetaData Specialist
• University Archivist
