GENERAL EXTENSION DIVISION
OREGON STATE SYSTEM OF HIGHER EDUCATION

The General Extension Division of the Oregon State System of Higher Education is that agency of the University of Oregon, Oregon State College and the three Oregon Normal Schools which serves the people of the state with formal instruction in extension classes, correspondence study and adult education, and through visual instruction, municipal service, radio, and social welfare. Its work is organized into the following departments: At Eugene—Correspondence Study, Social Welfare, State-Wide Extension Classes, Municipal Service. At Corvallis—Visual Instruction, Radio. At Portland—Portland Extension Center.

Through the General Extension Division the curricula, personnel, and facilities of all the state institutions of higher education are made available in some degree to every citizen, group and community in Oregon. The activities of the General Extension Division are carried on in close cooperation with those of the Federal Cooperative Extension Service and all other organized agencies in the state.
General Information

The Oregon State System of Higher Education makes available a wide range of instruction for those who are unable to attend classes on the campus of any one of its institutions, and drawing on its educational facilities, also offers to send instruction courses in a wide variety of subjects into any home in the state.

 Correspondence-study is carefully organized instruction by means of lesson outlines, prepared by members of the faculties of the institutions. These take the place of lectures and class exercises given to students in residence.

Using these lesson outlines as guides, the student studies the text books and reference materials in each particular course, prepares papers and makes reports. These are mailed to the General Extension Division at Eugene for correction and comment by instructors.

The courses are designed to meet the requirements of the following groups:

(1) Persons not in residence at any one of the institutions in the Oregon State System of Higher Education who desire to take courses entitling them to credits toward an academic degree.

(2) Persons who desire to take courses necessary to satisfy entrance requirements of higher educational institutions.

(3) Persons who for any reason desire to pursue studies under competent supervision, without reference to academic credit or entrance requirements.

ADVANTAGES OF CORRESPONDENCE-STUDY

Correspondence-study is in no sense recommended as a substitute for resident study at an educational institution. Nevertheless, instruction by correspondence has many decided advantages for those who, for the time being at least, cannot avail themselves of the opportunities offered by actual presence on a campus. Some of these advantages may be enumerated as follows:

1. Work may be done at any time.

2. Studying may be done at a time and under conditions of the student’s own choosing.

3. Studying may be done in leisure hours, without in any way interfering with the breadwinning activities of the student.

4. The student is encouraged to do original thinking in the preparation of his lesson reports. Because he does his work alone, for the most part, there is not the temptation to be guided in his thinking by his classmates. This method of study thus develops the student’s resourcefulness and independence.

5. Progress toward the completion of courses may be practically as rapid as the ability and application of the student will permit. Thus the student who grasps ideas quickly is not held back by less brilliant classmates, while, on the other hand, the slower and more methodical student is enabled to choose his own rate of study.

6. Credits earned in correspondence-study may be counted toward a college or university degree or toward a normal diploma.

7. Correspondence-study is inexpensive, both because the fees are small and because the work can be done at home.

[7]
ELIGIBILITY TO CORRESPONDENCE-STUDY

Residents of the State. The correspondence courses offered by the General Extension Division are intended primarily for residents of the state. Exceptions are sometimes made in the case of students who are bona fide residents of Oregon but who are out of the state temporarily. Special fees are required of non-resident students.

Correspondence courses and work in residence may not be carried at the same time. No student is permitted to carry correspondence work while in actual attendance at any college or high school, except by special permission of the institution in which he is a resident student and by consultation with the General Extension Division. All such arrangements must be made through the head of correspondence-study in the General Extension Division. Correspondence students who register for resident work in an educational institution before completing their course must confer with the General Extension Division to secure an extension of time on the correspondence course.

Special rules govern the carrying of work by correspondence during the short vacation periods between terms. In general, students are not permitted to submit correspondence lessons unless the vacation period is one week or longer. Any resident student desiring to do correspondence work during the Christmas or spring vacations must first consult the General Extension Division in regard to procedure. These regulations apply to students in residence at any educational institution.

No entrance examinations to correspondence-study are required, but any person of sufficient maturity to carry courses with profit may register for them. The General Extension Division reserves the right, however, to advise students regarding the courses that are best suited to their preparation and needs.

GENERAL RULES GOVERNING CORRESPONDENCE-STUDY

Application. A student should select the course he wishes to take, fill out an application blank, a copy of which is found on the last page of this catalog, giving all information requested, and return it to the General Extension Division, with the fee.

The Lessons. If a student’s application is accepted, the first lessons are sent to him at once with directions for the preparation of written reports, which he is to send in for correction. Additional lessons are sent as needed, so that the students always has a lesson or two on hand.

Lesson Reports. Reports are prepared by the student on each lesson and sent to the department of extension teaching for correction by the instructor. Reports should be sent in one at a time as soon as completed in order that the benefit of corrections and suggestions may be had in the preparation of subsequent lessons.

Corrected Reports. Students are asked to accept criticism in the helpful spirit in which it is intended, as it is only in this way that an instructor can guide the student in the correction of his mistakes and lead him to do constructive work. At no time should a student permit himself to pass by portions of lessons that he does not understand. Questions should be asked freely whenever there is any difficulty.

EXPENSES FOR CORRESPONDENCE-STUDY

Fee. The amount of the fee for each course is stated in the description of the course on a later page of this catalog. A special fee is charged for out-of-state students. (See page 10).

When Payable. Fees are payable in advance and should accompany the application for courses. Fees will be returned to the student if his application is not accepted, but cannot be returned after the student has been registered longer than three months. When the fee is returned after a student has been enrolled, $1.00 is deducted to cover costs of registration.

No course fee will be returned after a student has begun work.

A student may transfer from one course to another by the payment of $1.00 in addition to any necessary adjustment in fees between the two courses and 50 cents for each assignment completed in the original course. The date of expiration of the new course will be the same as the date of expiration of the original course.

Money should be sent in the form of postal order, express order, or bank draft made payable to the General Extension Division.

Duration of Course Registration. One year from the beginning of the quarter following the date of enrollment is allowed a student for the completion
of a course. On application to the General Extension Division, extension of time may be granted equivalent to the time lost on a course by reason of serious illness or by attendance at an educational institution, provided application for such extension of time is made when active work is discontinued.

Renewal Fee. A course registration which has expired may be renewed for an additional year by the payment of a renewal fee of $2.00. A student will not be permitted more than two renewals on any one course or section of a course.

Out-of-State Students. Registration in correspondence courses is confined largely to Oregon students but so many requests for courses are coming from students from other states that the Division permits these students to receive instruction upon the payment of its approximate cost.

Accordingly, a student whose home is not in Oregon may register for a correspondence course by the payment of a special fee of $5.00 for each course or section of a course, in addition to the regular fee for resident students. The out-of-state fee for any course may be determined by adding $5.00 to the fee for each course or section of a course announced in this catalog.

Regulations Covering Non-Resident Tuition. The Oregon State Board of Higher Education has defined a non-resident student as a person who comes into Oregon from another state for the purpose of attending one of the institutions under the control of the Board.

In order to draw a clear line between resident and non-resident students the Board has ordered that all students in the institutions under its control who have not been domiciled in Oregon for more than one year immediately preceding the day of their first enrollment in the institution shall be termed non-resident students, with the following exceptions:

1. Students whose fathers (or mothers, if the father is not living) are domiciled, as defined under (1) below, in the State of Oregon.
3. *Students holding bachelor's or higher degrees from higher educational institutions whose work is acceptable as preparation for graduate work.
4. *Students in summer sessions.

The Board established the following rules to be observed in determining the resident status of students:

1. Residence and domicile are synonymous and domicile shall be considered to be a fixed permanent residence to which, when absent, one has the intention of returning.
2. A student entering from another state or country is prima facie a non-resident, and to change this residence the burden of proof is upon the student.
3. Residence cannot be changed by mere declaration of intention to change, and in addition to declaration of intention to change residence, there must be supporting fact sufficiently strong to satisfy the authorities that the intention has actually been effected.
4. In case of minors, change of residence of parents or legal guardians will be closely examined.
5. In case of persons of legal age, such things as residence of parents, or nearest relatives, or wife, or children, or intimate friends to whom one would naturally go in case of illness or other distress, will be considered as factors entering into the matter of intent.

* These exceptions to the payment of non-resident fees do not apply to correspondence courses.

EXAMINATIONS IN CORRESPONDENCE-STUDY

Optional. Final examinations are optional with the student, but are recommended by the General Extension Division and are required when credit is desired. The General Extension Division urges students to take final examinations in courses in which the lessons have been completed, because it has happened frequently that students who believed they would never use the credit have later changed their plans and have wanted it.

Time. To secure credit for a correspondence course, the final examination must be taken within six weeks from the time work on the lessons is completed. Otherwise, special arrangements must be made with the General Extension Division.

Final Examinations must be Supervised. Examinations may be taken at the General Extension Division, or under the supervision of a school superintendent or principal, or some other competent person who is approved by the General Extension Division. Students living in or near Portland may take their examinations at the Portland Center office of the General Extension Division, 814 Oregon building. A student should make arrangements for his examination some time before the date on which he expects to write his paper.

CREDIT FOR CORRESPONDENCE-STUDY

Undergraduate. Sixty term hours is the maximum amount of credit that may be earned in correspondence courses and counted toward graduation.

Graduate. No graduate credit is allowed regularly for correspondence work.

Entrance. Students who are deficient in entrance credits may, under certain conditions, make up such deficiencies through correspondence courses. The entrance courses described toward the end of the catalog are for this purpose, although mature students may also enroll in certain college courses for entrance credit. For this purpose, nine term hours of college credit may be counted the equivalent of one entrance unit.

Non-Matriculated Students. Students who have not matriculated at an educational institution may have credit for courses recorded provisionally only. After matriculation requirements have been met, correspondence credit may be counted toward graduation.
Transfer of Credit. Credits earned in correspondence courses with the General Extension Division may be transferred to other institutions of higher education in the state. There is also an exchange of credits permitted between colleges and universities having membership in the National University Extension Association. The General Extension Division is a member of this Association.

To prevent mistakes in the selection of correspondence courses, any student who expects to have credits transferred should, before his enrollment, secure approval from the school to which the credits are to be transferred.

Admission

In order to be admitted to any of the state higher educational institutions of Oregon a student must be of good moral character and must present evidence of acceptable preparation for work at the college level. Not only is character a requisite for admission, but its development is regarded as a primary aim in education and is emphasized at all the state institutions of higher education.

ADMISSION TO FIRST-YEAR STANDING

The requirements for admission to first-year or freshman standing conform to the uniform entrance requirements adopted by all the higher educational institutions of Oregon. Applicants who are not residents of Oregon may be held for additional requirements demonstrating superior ability.

Evidence of acceptable scholastic preparation may consist of either (1) certificate of preparatory school record, or (2) statement of standing on College Entrance Board examinations.

Admission by Certificate. Application for admission by certificate is made on the official form, Uniform Certificate of Secondary School Record, prepared by the State Department of Education. The applicant's scholastic record must be certified by the principal or superintendent of his school. This official certificate should be filed with the Registrar at least two weeks before the applicant expects to enroll.

Admission by Examination. Students seeking admission by examination should obtain information from the Secretary of the College Entrance Examination Board, 431 West 117th Street, New York City.

Entrance Credit by Examination. Students who lack only a unit or two of entrance credit may arrange with the General Extension Division to remove such deficiencies by special examinations. The fee for such examinations is $5.00 for each unit of credit or fraction thereof.

Use of College Credit for Removal of Deficiencies. Mature students who prefer to remove entrance deficiencies by credit earned in college courses may count nine term hours of credit earned in correspondence courses of college grade as the equivalent of one entrance unit.

Preparation Required. For admission to first-year standing, the student's preparation must conform to one of three plans, under each of which a proportion of his preparation must be in certain specified fields. In listing the requirements under the three plans, the following terms are used:

- **Major**, three units in one field.
- **Minor**, two units in one field.
- **Specified Fields**: English, languages other than English, mathematics, natural science, social science.

Under Plan A, part of the entrance units must be grouped into majors and minors. Under Plan B, more freedom is allowed in distribution of units. Under Plan C, still greater freedom in distribution is allowed a student of exceptional ability as demonstrated by classification in the highest quartile of his high school graduating class and by the unserved recommendation of his high school principal; a high rating in a college mental test may also be required.

No credit under any of the plans is granted for penmanship, spelling, physical education, group music work, or any subject commonly classified as a student activity.

Students from a four-year high school must present 15 units, including under the three plans—

- **Plan A**. 2 majors and 3 minors: 3 of these 5 groups in Specified Fields, including 1 major in English.
- **Plan B**. 10 units in Specified Fields: 3 of these units in English.
- **Plan C**. 8 units in Specified Fields: 3 of these units in English; exceptional ability as explained above.

Students from a senior high school must present 12 units, including under the three plans—

- **Plan A**. 2 majors and 2 minors: 3 of these 4 groups in Specified Fields, including either a major or a minor in English.
- **Plan B**. 8 units in Specified Fields: 2 of these units in English.
- **Plan C**. 7 units in Specified Fields: 2 of these units in English; exceptional ability as explained above.

Special Requirements. In addition to the foregoing entrance requirements, which must be met by all applicants for admission to the first-year or freshman class, certain special subjects are necessary for admission to some of the professional and technical schools. Students planning to major in any phase of Engineering should if possible take a full year of physics in high school. In order to be admitted to any of the Engineering curricula a student must have one unit in elementary algebra, one-half unit in higher algebra, and one unit in plane geometry. Students planning to major in Architecture are advised to take preparatory units in solid geometry, trigonometry, advanced algebra, and mechanical drawing. Students planning to major in Music are required to have completed a satisfactory preparatory course in music.

ADMISSION WITH ADVANCED STANDING

Advanced standing is granted to students transferring from other institutions of collegiate rank. All applications for advanced standing must be submitted to the Registrar, and must be accompanied by official transcripts of high school and college records and by statements of honorable dismissal.
The amount of credit granted upon transfer from an accredited institution depends upon the nature and quality of the applicant's previous work, evaluated according to the academic requirements of the institution. Final determination of the amount of credit to be granted may be deferred until after the student has been in attendance for at least three terms.

A student wishing credit for work done elsewhere than at an accredited educational institution must petition the Committee on Academic Requirements for permission to take examinations to specific courses listed in the catalog. In general, credit by examination is allowed only for work taken in regularly organized courses in non-accredited institutions of collegiate rank.

ADMISSION AS SPECIAL STUDENTS

Two classes of special students are admitted: (1) those not qualified for admission as regular students but qualified by maturity and experience to work along special lines, and (2) those qualified for admission as regular students who are not working toward a degree and do not care to follow any of the degree curricula.

An applicant for admission as a special student must be not less than 21 years of age, and must file with the Registrar documentary evidence sufficient to prove his special fitness to pursue the subjects desired. Credits earned by special students shall not subsequently be counted toward a degree until the student has completed at least two years of work (93 term hours) as a regular student. In case a regular student changes to special status, work done while classified as a special student will not count toward a degree.

ADMISSION WITH GRADUATE STANDING

Graduates of accredited colleges and universities are admitted to graduate classification by the dean of the Graduate Division and the Registrar on presentation of an official transcript of their undergraduate work. But admission to candidacy for an advanced degree is determined only after a preliminary examination, given when a student has completed approximately fifteen term hours of graduate work.

Graduates of non-accredited universities and colleges are expected to obtain the bachelor's degree from an accredited institution before proceeding to graduate work.

REQUIREMENTS FOR DEGREES AND CERTIFICATES

The Junior Certificate admits to upper division standing and the opportunity to pursue a major curriculum leading to a degree. A student is expected to fulfill the requirements for the Junior Certificate during his first two years at an institution. The requirements are as follows:

(1) Term Hours: Minimum, 93.
(2) Grade Point Average: Minimum, 2.00.
(3) English:
   (a) A general examination in English is required upon entrance. If this examination is not passed, the course designated as Corrective English (Eng K) must be taken and passed.
   (b) English Composition: 9 term hours unless excused.
(4) Physical Education: 6 terms, unless excused.
(5) Military Science: 6 terms for men, unless excused.
(6) General Hygiene: 3 terms for women.
(7) Group requirements: A prescribed amount of work selected from three "groups" representing comprehensive fields of knowledge.

The three groups are: Language and Literature, Science, Social Science. Courses that satisfy requirements are numbered from 100 to 110 and from 200 to 210. The group requirements are as follows:

(a) For students in liberal arts and sciences—The completion of at least 9 approved term hours in each of the three groups and at least 9 additional approved term hours in courses numbered 200-210 in any one of the same three groups.
(b) For students in the University professional schools—The completion of at least 9 term hours in each of two of the three groups.
(c) For students in the State College professional and technical schools—The completion of at least 9 term hours in each of two of the three groups.

The Lower Division Certificate recognizes the successful completion of two years of Lower Division work. This certificate is granted upon request to students whose desire has been only to round out their general education. It does not require the scholastic average specified for the Junior Certificate, and does not admit to upper division standing.

The State Normal School Diploma. For graduation each of the three State Normal Schools requires completion of a standard normal school curriculum, comprising a total of 96 term hours of academic and professional subjects—the equivalent of 16 term hours each term for two years.

The legislature of 1935 so amended the teacher training law that after the first of January, 1937, an additional quarter of work in the normal schools will be required for graduation. Those students entering in the fall of 1935 will be required to complete seven quarters for graduation instead of six as heretofore. After January 1, 1939, two additional quarters will be required, and after 1941 it will be necessary to complete three years of work for graduation and certification in Oregon.

The Bachelor's Degree. When a student has fulfilled all the requirements for a Junior Certificate, he is classified as an upper division student and may become a candidate for a bachelor's degree in the college or school of his choice. The requirements for a bachelor's degree (including both lower and upper division work) are as follows:

(1) Term Hours: Minimum, 186, including—
   (a) Hours in upper division courses: Minimum for students majoring in College of Arts and Letters or College of Social Science, 62; for students in professional schools, 45.
   (b) Hours in the major: Minimum, 36, including at least 24 in upper division courses.
   (c) Hours after receipt of Junior Certificate: Minimum, 45.
(2) Required distribution of hours for different bachelor's degrees:
   (a) Bachelor of Arts: 36 hours in arts and letters, including two years (normally 24 term hours) of college work in a foreign language.
A CURRICULUM is an organized program of study arranged to provide
definite cultural or professional preparation.

A TERM HOUR represents three hours of the student's time each week for
one term. This time may be assigned to work in classroom or laboratory or
to outside preparation. The number of lecture, recitation, laboratory, or other
periods per week for any course may be found in the course descriptions in this
Catalog, or in the printed schedule of classes.

Enrollment in correspondence courses is not confined to terms. Students may
register for courses at any time during the year.

REGULATIONS AND REQUIREMENTS

Examination in English. All students entering as freshmen are required
to take a preliminary examination for the purpose of demonstrating their
preparation in English. The examination covers the fundamental principles of grammar
and requires evidence of the student's ability to apply these principles in writing.
Students failing to obtain a satisfactory grade in this examination are required
to take and pass Corrective English (English K) before registering for work
in English Composition.
Courses marked with the (*) are suitable for freshmen

### UNIVERSITY OF OREGON

#### College of Arts and Letters

**Majors in English Literature and Pre-Library**

- English Literature Survey .................................................. 9 hours
- French or German (2 years) .................................................. 24 hours
- English History ........................................................................ 8 hours

- *Botany (Plant Biology and Systematic Botany)* ......................... 6 hours
- *English Composition* .......................................................... 9 hours
- *Unified Mathematics* ........................................................... 12 hours
- *Principles of Economics* ..................................................... 9 hours
- *National Government* ......................................................... 4 hours
- *Business Law* ...................................................................... 4 hours

**Electives recommended:** Principles of dietetics, money and banking, American literature, commercial English, calculus.

#### School of Home Economics

- *English Composition* .......................................................... 9 hours
- *Elementary Newswriting* ..................................................... 5 hours
- *Principles of Economics* ..................................................... 9 hours
- *English Literature Survey* .................................................. 9 hours
- *Psychology* .......................................................................... 9 hours
- *Principles of Dietetics* ......................................................... 5 hours
- *Food Purchasing* .................................................................. 3 hours
- *House Furnishing* ............................................................... 3 hours

**Electives in such subjects as:** English, literature, history, sociology, economics.

#### School of Pharmacy

- *English Composition* .......................................................... 9 hours
- *German or French* .............................................................. 12 hours
- *Constructive Accounting* ..................................................... 12 hours

**Other suitable courses are:** English, literature, physics, history, economics.
School of Science

*English Composition ................................................. 9 hours
Other courses may be selected in line with the student's major interest; for example:
- Botany:
  - Plant Biology
  - Systematic Botany
  - Advanced Systematic Botany
- Eubrue and Trees
- Chemistry:
  - Unified Mathematics ........................................ 12 hours
  - College Physics (correspondence course should be supplemented with a three hour laboratory course).
  - German
  - Physics:
    - College Physics
    - Meteorology
- Mathematics:
  - Unified Mathematics ........................................ 12 hours
  - Differential and Integral Calculus ........................ 12 hours
  - Differential Equations ...................................... 6 hours
  - Algebra (a course in intermediate algebra is available for students who have not had three semesters of algebra in high school).

Degree Curricula in Secretarial Science

*English Composition ................................................. 9 hours
*Biological Science Survey ......................................... 12 hours
Principles of Economics .......................................... 8 hours
Constructive Accounting .......................................... 12 hours
Business English
- General Advertising ............................................ 3 hours
- Money and Banking ............................................. 4 hours
Suggested electives: mental hygiene, history, literature and modern governments.

PRE-MEDICAL WORK
( Offered at both University and College )

*English Composition ................................................. 6 to 9 hours
*German or French .................................................. 20 hours
College Physics (with laboratory) ............................ 12 hours
Electives: These may include such courses as beginners' psychology, introduction to sociology, unified mathematics, and principles of economics.

STATE NORMAL SCHOOLS

For Normal School Credit. The State Normal Schools in Oregon permit students to apply toward graduation a limited number of credits earned in correspondence courses. Correspondence courses which may be substituted for required courses at the Normal Schools are:

- Advanced Writing, Part I, for Essay Writing, 3 credits.
- Elementary Psychology for Elementary Psychology, 3 credits.
- History of Oregon for Oregon History, 2 credits.
- Introduction to Sociology for Elementary Sociology, 2 credits.

Any one of the following may be substituted for the courses in literature required, 3 credits being allowed.

- Contemporary American Novel
- Contemporary English Novella
- Early American Literature
- Recent American Literature

The following courses may be substituted for entrance examinations:

- Review Course in Arithmetic
- Review Course in Grammar
- Entrance Course in American History

State Requirement in Education. Nine of the 15 semester hours or 13 of the 23 term hours required in education for a teacher's certificate may be taken by correspondence, but at least six semester hours (nine term hours) should be completed in a regular session at a standard institution of higher education or in summer sessions. This applies to teachers whose college work has been done at some place other than the University of Oregon or the Oregon State College.

Education Majors. Students who are working for a degree from the University or the State College with a major in education or who expect to secure a recommendation for teaching from the School of Education are expected to complete requirements in education in residence. This rule applies especially to students who have had no practical teaching experience. Exceptions to the rule are sometimes made for experienced teachers who are working toward a degree but who must fulfill a portion of the requirements through extension courses. Such exceptions are always made with the approval of the Dean of the School of Education.

Students who expect to teach are advised to make specific preparation in the subjects which they prefer to teach, by taking the suggested minimum of work in at least one or two departments in accordance with special lists of courses prepared by the School of Education in consultation with the departments concerned.

Courses may sometimes be selected to meet definite requirements; for example, students who expect to teach English must take a certain group of courses in English and literature, known as an English "norm." Of the required courses in the English "norm" Shakespeare, American Literature Survey, and English Survey may be taken by correspondence. In a similar manner, students are often able to select correspondence courses along other lines that will help to meet requirements.

College Correspondence Courses*

ARCHITECTURE AND ALLIED ARTS

The first course in this group, Design I, is for persons interested in art. The other courses are for students who wish to prepare for professional work in drafting, architecture, and engineering. The work is planned for beginners, and for those who have had some practical experience, but who need instruction that will systematize and coordinate their knowledge.

AA C 166. Design I. A creative approach to design for individual expression with a study of two and three dimensional form in painting, sculpture, textiles, advertising, etc.

Credit: Three term hours; 16 assignments. Fee, $10.00.

Text: The text is included in the assignments, but supplementary reading will be required from a list of books sent with the assignments. These books may be borrowed from a local library or from the State Library. A list of paints and other supplies needed for the course will be sent with the first assignments or may be had on request by students interested in the course. Two sets of material are available: Set I, $7.95 to $9.40; Set II, $10.10 to $11.55. Variations in price in each set are due to the different prices for which some of the articles included may be purchased. A greater variety of problems

*The number before the title of a course indicates whether the course carries upper or lower division credit. Numbers from 1 to 299 indicate lower division; numbers 300 and above indicate upper division. No credit earned in correspondence courses is accepted toward a graduate degree.
can be attempted with Set II, which is more complete; but excellent work may be done with Set I.

AA C 150. Mechanical Drawing. The use and care of drafting instruments, geometric drawing, practical applications of the principles of orthographic projection to drafting-room practice, etc., are taught the student. Next, plain lettering, shop drawings, tracings and isometric drawing receive special emphasis.

Credit: Six term hours; 30 assignments. Fee, $14.00 or $7.00 for either half; credit for entire course only.

Materials, including text and drawing paper, cost from about $19.45 to $24.45, depending on the number and quality of instruments purchased. A list of materials will be sent on request.

AA C 319. Advanced Graphic Statics. Graphic methods are deduced and used for determining the bending moment, shear and deflection in beams; center of gravity and movement of inertia of a plane area; stresses in voussoir arches; deflection of trusses. No outside textbook is required.

Credit: Two term hours. Fee, $5.00.

AA C 320, 321. Stresses. Principles involved and methods used in determining the tensile and compressive stresses in the various members of framed structures, such as roof trusses, highway and railway bridges, cantilever trusses, three hinged arches, etc. Both dead and live loads are analyzed by algebraic and graphic methods. A knowledge of mathematics through trigonometry is essential. The course may be taken in two sections of two term hours each. Section I covers lessons 1-14; section 2, lessons 15-24.

Credit: Four term hours; 24 assignments. Fee, $10.00 or $5.00 for each section.

AA C 420, 421, 422. Elementary, Structural Design. The principles that enable one to compute the proper sizes to use in the various parts of trusses, machines, steel framework or other objects under stress are explained and applied to practical problems. The course is divided into three sections as follows:

Section I, assignments 1-15—Discussion of tensile, compressive and bending stresses; use of beam and column formulas; application to wooden design. Section II, assignments 16-27—Steel riveting; steel truss design; plate girder design. Section III, assignments 28-36—Principles and formulas used in the design of reinforced concrete; applications to simple beams, columns, floor slabs.

Credit: Six term hours, or two for each section. Fee, $15.00 or $5.00 for each section.

Text: Steel Construction, published by American Institute of Steel Construction, 200 Madison Avenue, New York City, (nineth printing) 1932. Much of the text is included in the mimeographed lessons, but the steel handbook will be needed for reference.

ASTRONOMY

Ph C 101. Astronomy. This course is for those who desire to gain information concerning the laws governing the stars, planets, sun, moon, comets, and nebulae; to become familiar with the appearance and names of the constella-

tions and the mythology connected with them; and to study the lives of the great astronomers of all times. The aim is to make the course cultural as well as scientific. Observations are required with practically every lesson. No optical aid is necessary, although a pair of opera or field glasses will be found helpful. Assigned readings outside the texts are often made, depending upon the library facilities at the command of the student.

Prerequisites: elementary algebra and plane and solid geometry. A knowledge of elementary physics will be helpful but is not required.

Credit: Six term hours; 32 assignments. Fee, $14.00.

Ph C 1 X. Astronomy (Short Course). No prerequisites. No credit. In preparation. Write for information.

BIOLOGY

Z C 150. Bird Study. These lessons constitute a combined reading and laboratory course, the aim of which is to acquaint the student with some of the interesting facts connected with the biology of the bird. Its habits, powers of adaptation, economic value, and to assist the student in training his own powers of observation to the end that he may become acquainted first hand with the common western birds. Most people find familiarity with birds to be highly pleasurable; thus a knowledge of birds adds both to cultural attainment and to the joy of living. The out-of-doors will provide the necessary laboratory. The lessons are illustrated with drawings and photographs showing important characteristics of bird physiology or habits.

Credit: Three term hours; 19 assignments. Fee, $8.50.

Text: At least one good book on western birds is needed for identification purposes. Students are advised to purchase either W. A. Eliot, Birds of the Pacific Coast, Putnam’s Sons, or Florence M. Bailey, Handbook of Birds of the United States, (revised), 1916, Houghton Mifflin Co. The first book, illustrated with plates, is small enough to be carried in the pocket. The latter is much larger but also much more complete. It contains a large number of illustrations in black and white.

BOTANY

Bot C 150. Elementary Botany, Plant Biology. A study of life and the life processes as shown in the plant. The lessons include structure, physiology, reproduction and dissemination of plants, and require the observation of specimens of typical plants both flowering and non-flowering, with only as much textbook work as is necessary to coordinate and unify the work. A good magnifying glass is absolutely essential.

Credit: Three term hours; 16 assignments. Fee, $8.00.

Text: Holman and Robbins, Elements of Botany, John Wiley and Sons.

Bot C 151. Systematic Botany. This course consists of 16 lessons dealing with some of the typical flowers and leads up to an understanding of the use and meaning of the common descriptive terms, and the description, naming,
and pressing of ten Oregon plants representing at least five families, and the
ability to classify plants from written descriptions.
Credit: Three term hours; 16 assignments. Fee, $7.00.
Book Co. For those desiring more extensive descriptions, and planning to
continue plant classification, the following are recommended: For students
residing in the valley or on the coast, Piper and Beattie, *Flora of the North­
west Coast*, Washington State College; Pullman; for students living in
Eastern Oregon, Piper and Beattie, *Flora of Southeast Washington, and
Adjacent Idaho.*

**Bot C 152. Advanced Systematic Botany.** This is a continuation of the
previous course, and is intended for those who desire to make a more ex­
tended classification of plants. The course comprises: (a) The description,
naming, and pressing of 30 plants other than those described in course 2, and
representing not less than 20 families. (b) The ability to distinguish fifteen
families without the aid of the text. (c) A paper on the history of American
botany and botanists with special reference to the Northwest.
Credit: Three term hours. Fee, $7.00.

**Bot C 350. Shrubs and Trees.** This course comprises: (a) The description
and naming, together with the specimens, of 30 shrubs and trees, including
evergreen and deciduous. (b) An account of the economic uses of these or
30 other trees and shrubs. (c) A paper on the government forests, their
care and value to the country.
Credit: Three term hours; 16 assignments. Fee, $7.00.
Text: Sudworth, *Trees of the Pacific Slope.* To be obtained from Super­
intendent of Public Documents, Washington, D. C.

**BUSINESS ADMINISTRATION**

**BA C 111, 112, 113. Constructive Accounting.** This course may be taken
by students to clear the prerequisite in accounting required of all students
who enroll in advanced courses in business administration. It is also designed
to be of service to those who are interested in accounting from an im­
mEDIATELY practical point of view, either as a profession or as a valuable aid in other
lines of business endeavor. The course goes much farther than the ordinary
course in bookkeeping. While training in bookkeeping is not prerequisite, the
student who completes the course will experience little difficulty in following
out the routine of almost any bookkeeping system, and will also have a
knowledge of the way in which accounting records are designed to assist
the manager of a business. It should enable him to keep a set of books with
more than ordinary intelligence, for he is taught to think of the facts he is
recording as picturing business relationships instead of mere automatic re­
cording of more or less meaningless figures.
Credit: Twelve term hours; 22 assignments in each of three sections. Fee,
$9.00 for each section, or $27.00 for the entire course.
Text: Folts and Stillman, *Interpretive Accounting*, Longmans, Green and
Co.

**BA C 416. Business Law.** A general course in business law correlating
fundamental principles with selected cases illustrating their application to
typical business situations. Formation of interpretation and discharge of con­
tracts. The law of bankruptcy, insurance, and suretyship.

**EC C 150. Economic History.** A study of primitive stages of industry, the
origin and growth of institutions and property, the rise of the modern in­
dustrial system, the development of foreign trade, the epoch of the great
inventions, and the chief characteristics of modern industry. While the main
emphasis is upon the economic and industrial development of England and
the United States, the course is sufficiently general to furnish a broad view
of economic movements throughout the world. A bibliography of books on
various phases of economic history, which may prove interesting and helpful
to the student, is included in the first lesson of the course.

*This course is a condensation of the six term hour course given at the University of
Oregon under the same title and numbers.*
Credit: Six term hours; Fee, $14.00.

Ec C 201, 202, 203. Principles of Economics. For convenience, the work of the course is arranged under the following main topics: introduction—preliminary survey of the field; wealth—productive factors and organization; value and exchange—market price; money and the mechanism of exchange; foreign exchange and the tariff question; distribution—theory of interest, rent and wages; problems of labor and protective legislation; railways and trust problems; socialism. The aim of the instruction given in the lessons is to cultivate the critical faculties of the student and develop ability to apply economic theory to the solution of practical problems. The course is in three sections of three term hours each, so arranged as to permit any of them to be substituted for the corresponding term of the resident course.

Credit: Nine term hours, or three for each section; 16 assignments in each section. Fee, $21.00, or $7.00 for each section.

Ec C 323. Economics of Business Organization. This course deals with such topics as the nature of business organization, the classification and test of efficiency of business organizations, individuals in business, partnerships, joint stock companies, corporations, and the simple business trust. Principles of Economics is a prerequisite course.
Credit: Four term hours; 23 assignments. Fee, $9.00.
Texts: The number of text-books which must be purchased for this course depends to some extent upon the library facilities available to the student. Before enrolling therefore, students should write to the General Extension Division for information in regard to texts.

Ec C 413. Money, Banking and Economic Crises. This course aims, as nearly as possible by correspondence, to duplicate the course in Money, Banking and Economic Crises (Economics 413) as given at the University of Oregon. The theory of money, nature and use of credit and its relation to prices, the importance of a stable standard bimetallism in theory and practice, the monetary history of the U. S., nature and function of banks, relation of banks to stock exchange, the defects of our currency system and suggestions for reform are examined and discussed in the reading. Finally, the theory and remedies for crises are treated.
Credit: Five term hours; 33 assignments. Fee, $11.00.
(This admirable book is now out of print, but a limited number of copies may be loaned by the University of Oregon Library. In case a student is unable to obtain a copy from the library, the Extension Division will supply a compilation of the essential chapters in Jones' work, which the publisher has kindly allowed the instructor to reprint for use in his classes.)

The student should also provide himself with some up-to-date com-

pendium of statistics like the World Almanac and should have at hand some of the recent numbers of the Monthly Labor Review published by the United States Labor Department. This latter publication can be had at a nominal price from the Superintendent of Public Documents, Washington, D. C.

Ec C 435. Railway Economics. An idea of the contents of this course may be gained from the lesson headings, which read: The scope of transportation; the beginnings of the railroad; the growth of American railroads; the mechanics of the railroad; the present railroad system in the United States; the railroad corporation and railroad capital; construction finance; capitalization and valuation; physical valuation; earnings, expenses and dividends; freight service; passenger service; express and mail service; competition and combination; consolidation and monopoly; the theory of rates and fares; rate making in practice; railroad regulation in France and Italy; regulation of railroads in the United States; the courts and railroad regulation; government ownership and operation. Principles of Economics a prerequisite.
Credit: Four term hours; 22 assignments. Fee, $9.00.

Ec C 436. Principles of Ocean Transportation. The history of the ocean carrier is studied as an introduction to the underlying principles of the present problems of the merchant marine and ocean traffic. The ocean transportation service, the organization of ocean carriers with their relation to one another and to the public, and government aid and regulation of ocean commerce and transportation are especially studied. The courses in economic history and the principles of economics, or their equivalent, are prerequisites.
Credit: Four term hours; 22 assignments. Fee, $9.00.

Ec C 437. Regulation of Carriers. This course attempts to answer the following questions which press forward continually into public discussion: Who are common carriers? Why should they be regulated? Who should regulate them? How should they be regulated? For Western students, emphasis is properly placed on railroads as objects of, and problems for, regulation. At the same time the new and important problems of the regulation of motor trucks and busses and the regulation of carriers by water, whether on inland waterways, coastwise, or on the ocean, are not forgotten. Principles of Economics is a prerequisite, and courses in railway economics and ocean transportation would be helpful.
Credit: Four term hours; 23 assignments. Fee, $9.00.
Text: Vanderblue and Burgess, Railroads: Rates, Service, Management, Macmillan, 1923. Mimeographed supplements dealing with the regulation of water traffic will be furnished by the General Extension Division in connection with a number of the lessons.

EDUCATION

The School of Education offers courses for the benefit of teachers who wish to increase their professional training, and for inexperienced teachers who have not had the advantages of normal or collegiate instruction. Students whose major subject is education or who expect to secure a recommendation for teaching from the School of Education should
consult the Dean of the school before enrolling for correspondence courses. The following courses are especially valuable to teachers in service, not only keeping them abreast with new developments in educational philosophy and general practice, but also furnishing stimulation to effective solution of the immediate problems of the classroom.

Ed C 102. Mental Hygiene. This course deals with the habits, attitudes, and proper functioning of a normal mind. The point of view of the entire course is that nothing else in life is of such consequence as the “acquisition of habits of healthful activity, physical and mental.” Training counts then, not merely instruction. The aim of such a course as this is positive rather than merely the prevention of mental disorder. It looks toward the acquisition of proper “conditioned reflexes,” and so is in line with the last word in modern psychology.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Ed C 103. Introduction to Education. In this course is found a brief outline of the main plans for the organization of public education; the place and importance of education in our national life; the important present-day problems of education as they relate to the pupil, the teacher, and the parent; the general nature of learning; the scope of the public school system; the problems of rural education; the problems of educational finance; and the outstanding present-day problems of educational work.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Ed C 150. Modern Methods of Teaching in the Upper Grades and High School. This course is thoroughly practical. It deals with problems that confront the teacher every day in the class-room, such as, questioning, assignment, and review procedure; supervised study; visual instruction; socialized class procedure; project teaching; measuring the progress of pupils by means of standard tests and scales; adjustments of instruction to individual differences; and technique of controlled class-room experimentation.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Text: Horii R. Douglass, Modern Methods of High School Teaching, Houghton, Mifflin Company. Other books are required, but they may be borrowed from a public library.

Ed C 351. Problems of the Classroom. The purpose of this course is, first to guide the teacher into an elementary knowledge of methods of research, and then to the selection and actual working out of a class-room problem. The problems suggested deal with character education. However, other problems may be selected if first definitely approved by the General Extension Division. Research on the problem must be carried over a period of twelve weeks.

Credit: Two term hours; 10 assignments. Fee, $5.00.

Ed C 352. Child Study. An inquiry into the behavior of infancy and childhood. This course is designed, first of all, for parents; second for teachers, to whom falls the task of supplementing and often correcting earlier influences in the process of socializing the child. Such subjects as learning to eat, walk, talk, sleep, etc., are given especial attention because of the psychological significance of these activities in the building of the personality. Throughout the course emphasis is put on the harmonious development of the emotional life of the child.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Ed C 416. Measurement in Secondary Education. A study of the construction and desirable uses of various standard tests and scales for measuring achievement in secondary school subjects. Such elements of statistical method will be given as are necessary for intelligent use of the tests. It is hoped that all students who take this course will enter the study of standardized tests with an open mind, willing to give to tests, both mental and achievement, all that is due them.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Ed C 420. Psychology of Adolescence. Though technically of a psychological nature this course includes a study of the important physical, mental, and moral changes natural to adolescence. Attention is given to the laying of the foundation for the pedagogy of secondary instruction and to the elements of character education.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Ed C 455. History of Modern Education. The history of those educators whose practices and philosophies function today in our educational system. Cause and effect relations are indicated, problems are suggested, and independent thinking by the student is encouraged.

Credit: Three term hours; 16 assignments. Fee, 7.00.

NOTE: Students may earn credit in only one course in the History of Education.

Ed C 465. The Child and His Learning. A course dealing with the laws and the nature of learning of the child—what constitutes learning and how
it is brought about. Special attention is given to the psychological factors involved and to the treatment of the instincts and the emotions insofar as they affect motive or prevent adequate learning. This course may not be substituted for any part of the course in educational psychology, which must now be taken in residence in some standard college or university.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Ed C 475. The Supervision of Instruction. A course covering the need for supervision; the aims, principles, organization and techniques of supervision; directing observation, demonstration teaching, classroom visitations, conferences, training of teachers, and evaluating teaching efficiency.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Ed C 476. Educational Sociology. This course deals with the sociological aspects of education. It attempts a somewhat critical examination of education in terms of its function as a factor in the socialization process. Special attention will be paid to the educational demands created by a highly industrialized and increasingly complex society. The whole course is developed around what is conceived to be the social purpose of education.

Credit: Three term hours; 16 assignments. Fee, 7.00.

Ed C 489. Civic Education. A study of the school as an instrument of society for transmitting its social inheritance; analysis of school organization, administration, school subjects, methods of instruction, extra-school activities, and methods of discipline with reference to their contribution to training for citizenship. This course is in preparation.

Ed C 490. Character Education. The place of character in the social purposes of education; distinction between training and instruction; the dynamic function of the feelings; the conditioning of interests; the function of ideas; the formation of habits, the integration of habits and attitudes. Analysis of typical procedure.

Credit: Three term hours; 16 assignments. Fee, $7.00.

ENGLISH AND LITERATURE

WRITTEN ENGLISH

Eng C 111, 112, 113. Principles of Good Writing. A year course in the fundamentals of composition and rhetoric, with frequent themes in exposition and description. Special attention is paid to correctness in fundamentals and to the organization of papers of types frequently required in other college courses. This course is for students who wish to fulfill the nine term hour written English requirement of the University and State College.

Credit: Nine term hours, or three for each section; 16 assignments in each section. Fee, $21.00 or $7 for each section.

NOTE: Students who take this course for credit may not also have credit for Eng C 111, 112, 113.

Eng C 114, 115, 116. Exposition, Narration, and Argument. To enable the student to express himself in a clear and correct way is the end sought. A book of selections, grouped according to type, from good prose writers, is used. In each lesson the student will read one or more selections of a definite type, and will write an article of his own upon a similar subject, using the reading material as a model. Constructive criticism is offered by the instructor, based on content and form. The individual problem of each student is pointed out, and ways for solving it suggested. Drill is given in grammatical construction. The course is outlined in three sections of 12 lessons each. Section 1 has to do with exposition; section 2 with narration; section 3 with argument. Any section may be taken separately.

Credit: Six term hours, or two in each section; 12 assignments in each section. Fee, $15.00, or $5.00 for each section.

Eng C 213. Introduction to Short Story Writing. This course is designed for students who wish to take "Short Story Writing," but who feel that they are not trained in the fundamentals, or perhaps may not have the special qualifications for this sort of writing. After a few lessons showing how to read a story critically and explaining the elements of a short story, descriptions of people, places, and states of mind are studied; and finally, simple plot construction, with some attention to introductions, conclusions, and dialogue, complete the 16 lessons.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Text: Campbell and Rice, A Book of Narratives, Heath & Company.

Eng C 214. Short Story Writing. There are two things for a person to do who desires to learn to write well. The first and most important is to write and write and write and, after that, read; the second is to read and read and, after that, read. Of course, his writings should always be the best of which he is capable and his readings should be the best he can obtain. To guide students in the doing of these two things is the aim of this course. The work is designed to enable students to try out their abilities in creative writing.

Exposition and Narration (Eng C 114, 115) and Introduction to Short Story Writing, or their equivalent are prerequisites.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Eng C 320. Advanced Short Story Writing. Students eligible are those who have completed the preliminary course with proficiency; also other persons who submit short story manuscripts of merit. Twenty-five thousand words of manuscript of satisfactory grade are required for credit. Except where weaknesses requiring special discipline are concerned, the student submits manuscript as if for market rather than "lessons." Work is returned with suggestions for improvement and marketing.

Credit: Three term hours; no regular assignments. Fee, $11.00.

Eng C 325. Prose Manuscript. A course for students who have finished Advanced Short Story Writing with better than average grade. Twenty-five thousand words required before credit is granted. The course is conducted to meet the individual student's needs, as in Advanced Short Story, with emphasis on selling.

Credit: Three term hours; no assignments. Fee, $11.00.

Text: No regular text is required, but reference to reading may be given by the instructor to suit individual needs of the student.

Eng C 217. Business English. A complete review and study of modern practices in business correspondence, organized primarily for students of Business Administration. Attention is paid to the analysis and to the writing of all types of correspondence. Prerequisite: Eng C 111, 112, 113 or equivalent.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Eng C 218, 219, 220. Advanced Writing. This course is for the study and practice of general magazine writing—sketches, essays, narratives, criticisms and so on. It is assumed that all students enrolling for this course are reasonably well-informed on such matters as paragraphing, punctuation, sentence structure, and the organization of their material; that they have an interest in writing beyond the composition of a business letter; and that they are capable of self-expression. Principles of Good Writing, or Exposition, Narration, and Argument, or equivalent is prerequisite.

Credit: Nine term hours, or three for each section; 16 assignments in each section. Fee, $21.00 or $7.00 for each section.

Text: Cunliffe and Lomer, Writings of Today, (fourth edition), 1925, Century Company. Some good handbook on English, such as The Century Handbook of English (Century Company); Manual of Good English (Macmillan); Wooley, Handbook of Composition (Heath and Company); or Wood's College Handbook of Writing (Doubleday, Page and Company), is necessary for reference on questions of grammar, punctuation and sentence structure.
Eng C 326. Methods in Grammar School English. Experience among students of the grammar grades shows that there are certain particular needs and lacks in their English preparation. The purpose of this course is to assist teachers in a discovery of these needs and to suggest practical methods of presenting English to their classes that will meet these needs effectively.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Text: Potter, Jeschke and Gillett, Oral and Written English, Books 1 and 2, Ginn and Co.

Eng C 13 X. Review Course in English Grammar. This is strictly a review course in which the purpose is to organize and present material that will aid teachers preparing to take the state examination for a certificate.

Credit: No credit is given for this course; 16 assignments. Fee, $5.00.

Text: Potter, Jeschke and Gillett, Oral and Written English, Book 2; State Course of Study for the Elementary Grades (free from state superintendent or county superintendent.)

LITERATURE

For students who wish to make their summer's reading count toward graduation, for those who wish to learn to read understandingly, and for those who desire to form systematic habits of reading for purely cultural purposes, these lessons have been prepared. Clubs will find the lessons well suited for study outlines, and the questions stimulating for group discussions. Clubs using the outlines have different members participate in the preparation of a paper based upon the lesson questions. This paper is sent in to the General Extension Division for criticism and suggestions. The instructor's comments are found helpful and add interest to the work.

Courses numbered from 101 to 203 are comparatively simple and may be carried with pleasure and satisfaction by any adult person who reads carefully and critically, but none the less the higher courses are more difficult and should be undertaken only by those who have had class-room training in the study of literature, or are especially well prepared by wide reading for advanced work.

Eng C 101, 102, 103. Survey of English Literature. Designed especially to acquaint students with significant features in the development of English literature from Beowulf to the present time. Each epoch is studied by reading representative authors, supplemented by prepared lectures containing historical and biographical backgrounds. The three sections of the course are given in sequence, but any one may be taken separately. Section I (101): from Beowulf to Milton; Section II (102): Milton to Byron; Section III (103): Byron to Hardy. The successful completion of the three sections of this course, or the completion of any section, will be credited as an entire or a partial fulfillment of the group requirement of the College of Arts and Letters.

Credit: Nine term hours, or three for each section; 18 assignments in each section. Fee, $21.00, or $7.00 for each section.

Eng C 161. Survey of American Literature. Especially designed for those who must fulfill the norm in English (Education majors taking an English norm). It provides a brief survey of American literature from the beginning to the present.

Credit: Four term hours; 16 assignments. Fee, $9.00.

Supplementary: Hawthorne, The Scarlet Letter; or Melville, Moby Dick.

Eng C 170. Early American Literature. Beginning with Franklin—the first American to write what is today considered a classic—this course follows the development of American literature down to the contemporary period. In this and the following courses are found not only the literary history of America, but the books chosen are also representative of certain conditions of American life or of the opinions of our leading writers on questions of general interest. The Puritan, the idealist in public life, the practical man of affairs, the idle rich, the self-made man, and the educated man in politics, as well as other phenomena of American life are portrayed in the books used.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Texts: Franklin, Autobiography; Woolman, Journal; Crevecoeur, Letters from an American Farmer; Thoreau, Walden; Emerson, American Scholar; Lowell, Democracy; Hawthorne, Scarlet Letter; Poe, Tales of Mystery and Imagination. Nearly all of these are available in inexpensive editions or cheap reprints. Any edition may be used.

Eng C 171. Recent American Literature. This course is a continuation of the course in Early American Literature.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Texts: Howells, The Rise of Silas Lapham; Deland, The Iron Woman; Herrick, The Common Lot; Wharton, The House of Mirth; James, The American; Wilkins, A New England Nun and other Stories; Mark Twain, A Connecticut Yankee in King Arthur's Court; Glasgow, Life and Gabriella. Any edition of these books may be used.

Eng C 201, 202, 203. Shakespeare. Designed to meet the requirements of both English majors and those who wish to fulfill a norm in English. A brief introduction points out the importance of the Folio and the Quarto editions of Shakespeare, and makes the student acquainted with the Variorum edition. A bibliography (critical) on Shakespeare is given, as well as a bibliography of biography. The student is required to read one biography of Shakespeare. The growth of Elizabethan drama from native and classical elements, and the importance of Seneca as source material are stressed, and the temper of the times is traced in other Shakespeare sources. Twenty plays are studied in detail by the students, and several plays will be assigned as extra reading. These plays will include four of Shakespeare's own: Two Gentlemen of Verona, Richard III, Henry V, and Measure for Measure; also, Marlowe's Jew of Malta; Lodge's Rosalind; Kyd's Spanish Tragedy; Beaumont and Fletcher's Philaster; and Shaw's Caesar and Cleopatra.

Credit: Nine term hours, or three for each section; 16 assignments in each section. Fee, $21.00, or $7.00 for each section.

Texts: Shakespeare's Principal Plays, edited by Brooke, Cunliffe and MacCracken, published by the Century Company. If the student prefers he may use the Tudor edition of Shakespeare. The Tudor is a scholarly edition, and each play is edited separately, with adequate and illuminating notes. The total cost of the Tudor Shakespeare will be little more than the price of the one-volume edition.

Eng C 360. Contemporary English Novelists. The eight novelists here studied form a varied, impressive, and representative selection. Mr. Wells and Arnold Bennett are English of the English. Mr. Wells was born and has lived his life through in Kent, the oldest England, the land of the hoast and hopyard. Arnold Bennett was from the English "Midlands," from manu-
facturing England, from Staffordshire, where, in his “Five Towns,” the English pottery is made. Chesterton was as typical a Londoner as Charles Dickens. W. J. Locke is from the island of Barbados. Rudyard Kipling was born in India, educated in Devon, and has now for many years been at home in Sussex.

The life, work and one typical book of each will be studied as follows: Rudyard Kipling, The Light That Failed; George Moore, The Lake; Arnold Bennett, Buried Alive; May Sinclair, Three Sisters; Gilbert Keith Chesterton, Manalive; William J. Locke, Septimus; John Galsworthy, The Free­lands; H. G. Wells, Mr. Britling Sees It Through.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Eng C 361, 362, 363. Socially Significant Literature. Density of population, with all its problems of slums, overcrowding, unemployment, strikes and suffering, has moved from Europe, through the eastern portion of the United States, toward Oregon. Consequently, the great writers of the eastern hemisphere have seen, analyzed and discussed these problems for us, and in our efforts to solve our own political and social difficulties, we should make use of their experience. This course has been outlined with the idea of giving students a clue to the problems discussed and the light afforded by great writers in England and on the continent of Europe. The course aims to guide the attention effectively to the value for Oregon citizenship in each book rather than to appraise these writers as artists.

Credit: Nine term hours; 14 assignments. Fee, $21.00.

Texts: Ibsen, An Enemy of the People, and The Wild Duck; Galsworthy, The Island Pharisees; Tolstoi, Anna Karenina; Gorky, Mother; Andreiev, Anathema; Wells, Tono-Bungay; Chesterton, The Ball and the Cross; Bennett, A Great Man; Morris, News from Nowhere; Shaw, Three Plays for Puritans; Zola, Labor; Maeterlinck, The Blind. Any edition available may be used.

This is a course for students who have had thorough preparation in the department of English Literature, or its equivalent.

Eng C 385, 386. Twentieth Century Literature. This course surveys the leading American and English writers and traces the main literary currents since the turn of the century. The Celtic revival, problem plays, psychological novel, and philosophical trends are discussed. The lessons make a cross section study of the twentieth century mind, showing its main trends of thought as reflected in the literature.

Eng C 385, Section I. The Novel in England. It is the aim of the assignment outlines to give the necessary backgrounds for the reading and to trace the connections between the various movements and tendencies.

Credit: Four term hours; 21 assignments. Fee, $9.00.

Texts: The required reading is as follows: G. K. Chesterton, The Victorian Age in Literature; Holbrook Jackson, The Eighteen Nineties; George Moore, Esther Waters and at least one from the following memoirs: Confessions of a Young Man, Memoirs of My Dead Life, and Hail and Farewell: Ave, Salve, Vale; George Gissing, New Grub Street; Samuel Butler, The Way of All Flesh; H. G. Wells, When the Sleeper Wakes and Joan and Peter; Arnold Bennett, The Old Wives; John Galsworthy, The Forsyte Saga; G. K. Chesterton, The Ball and the Cross and The Innocence of Father Brown; Joseph Conrad, The Nigger of the Narcissus and The Arrow of Gold; Sheila Kaye-Smith, Susse Gorre; May Sinclair, Mary Oliver; Somerset Maugham, Of Human Bondage; Norman Douglas, South Wind; D. H. Lawrence, Sons and Lovers; Aldous Huxley, Point Counter Point; Chevalley, The Modern English Novel.

Eng C 386, Section II. American Imaginative Literature Since 1900. How is the reader and student to become oriented in our contemporary literature? Most readers begin with the literature of their own day. This course is a guide in sifting the best novels, poems, and plays which American writers have produced in the last three decades. It shows the renaissance in American poetry which began about 1912, and the great developments in the novel beginning with Mrs. Wharton and coming on through Dreiser, Lewis, Sherwood Anderson, and Miss Cather. The drama of Eugene O'Neill and the other Expressionists is explained and evaluated. Such western writers as Robinson Jeffers are included. This course is suited to study groups, as well as individual students who wish to prepare themselves for newspaper reviewing in the current field.

Credit: Four term hours; 21 assignments. Fee, $9.00.

Texts: The required reading is as follows: Edith Wharton, The Age of Innocence; Ellen Glasgow, The Romantic Comedians; Theodore Dreiser, The American Tragedy; Sherwood Anderson, A Story Teller’s Story and Winesburg, Ohio; James Branch Cabell, The Cream of the Jest and Jup­ren; Elinor Wylie, The Orphan Angel; Joseph Hergesheimer, The Three Black Pennys and Java Head; Sinclair Lewis, Arrowsmith; Upton Sinclair, Oil; Willa Cather, Death Comes for the Archbishop; Under­meyer, Modern American Poetry; Edgar Lee Masters, The Spoon River Anthology; T. S. Eliot, Poems, 1920; The Waste Land, 1922; Robinson Jeffers, Roan Stallion and Tamar; Eugene O'Neill, Moon of the Caribbees and Emperor Jones; John Colton, The Shanghajai Gesture; Elmer Rice, Street Scene; Ben Hecht and Charles MacArthur, The Front Page; H. L. Mencken, Prejudices (one volume of the first four series); George Jean Nathan, anyone of his books; The Education of Henry Adams, an autobiography; Mencken’s essay on The National Letters in Mallory’s Backgrounds of Book Reviewing and C. E. Bechofer (Roberts) The Literary Renaissance in America.

Eng C 387, 388. English and American Poetry, 1910-1920. A critical study of representative works of Alan Seeger, Rupert Brooke, Sara Teasdale, John Masefield, Vachel Lindsay, Arthur Giovanni­tti, C. E. S. Wood, Carl Sandburg, Edgar Lee Masters, Robert Frost, Amy Lowell, and others. The purpose of this course is to provide an opportunity for the study of those poets who made the years of 1910 to 1920 important in the field of letters.

Credit: Six term hours, or three for each section; 16 assignments in each section. Fee, $14.00 or $7.00 for each section.

Eng C 414. Nineteenth Century American Novel. This course and the one following, Contemporary American Novel, are separate units of a single study of some of the foremost American novelists and of the historical and aesthetic forces which influence their work. The purpose of the two courses
is to stimulate interest in the American novel as an expression of rational thought. Early and Recent American Literature, or their equivalent are prerequisites.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Texts: Carl Van Doren, The American Novel, used throughout the course; Cooper, The Pioneers; Hawthorne, The Marble Faun; Howells, A Traveller from Altruria; Mark Twain, The Mysterious Stranger; James, Portrait of a Lady; Churchill, The Crisis; Garland, Main Travelled Roads; Norris, The Octopus.

Eng C 415. Contemporary American Novel. This is a continuation of Eng C 414 and will be much better understood if the student has completed the study of the Nineteenth Century Novel before beginning it. Eng C 414 is a prerequisite unless the student can show equivalent preparation.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Texts: Carl Van Doren, Contemporary American Novelists, used throughout the course; Wharton, The Custom of the Country; Tarkington, The Turmoil; Dreiser, Jennie Gerhardt; Willa Cather, Song of the Lark; Sinclair Lewis, Main Street; Dorothy Canfield Fisher, The Brimming Cup; James Branch Cabell, Cream of the Jest; Hergesheimer, Java Head.

Eng C 441, 442, 443. English Novel of the Nineteenth Century. This course is offered for advanced undergraduate students, and is open only to those who have had good foundation training in literature, or its equivalent in wide reading. Twelve of the greatest novelists of the nineteenth century, the classic age of the English novel, have been selected for study, with the aim of presenting to the student the novels of this period, with which every cultured person should be familiar.

Credit: Nine term hours; 12 assignments. Fee, $21.00.

Texts: The first book mentioned after the name of each author is to be studied; the others mentioned are to be used as supplementary reading; Sir Walter Scott, Rob Roy, The Antiquary, The Heart of Midlothian, and the Bride of Lammermoor; Jane Austen, Pride and Prejudice, Northanger Abbey, Mansfield Park and Persuasion; Bulwer Lytton, The Last Days of Pompeii, The Last of the Barons; Charles Kingsley, Hypatia, Alton Locke, Westward Ho and Water Babies; Charles Dickens, David Copperfield, Pickwick Papers, Oliver Twist and Nicholas Nickleby; Charles Reade, The Cloister and the Hearth, Put Yourself in His Place, and It is Never Too Late to Mend; William Makepeace Thackeray, Vanity Fair, Pendennis, and The Newcomes; Charles Bronte, Jane Eyre, Shirley; George Eliot, Adam Bede, The Mill on the Floss, Romola, and Middlemarch; Anthony Trollope, Last Chronicles of Barset, The Warden, Dr. Thorne and Barchester Towers; George Meredith, The Egoist, The Ordeal of Richard Feveral, and Diana of the Crossways; Thomas Hardy, Tess of the D'Urbervilles, The Mayor of Casterbridge, The Return of the Native, and Jude the Obscure.

GEOGRAPHY

Geo C 250, 251, 252. General Geography. This course is in three sections. Section I includes (a) Mathematical Geography, and (b) Physiography. Mathematical Geography deals with the making of map projections and divisions of the earth's surface for convenience in location of places, and their relationship to each other. Physiography deals with the surface expression of the earth's structure and its interpretation. This includes interaction of the lithosphere, hydrosphere and atmosphere.

Section II deals with human, industrial and regional geography. Human geography is a study of man's relation to his physical environment. Industrial geography treats of the general principles involved in the location and importance of the various industries, with a closer study of some individual type industries. Regional geography is a study of the geographical factors applied to a region or regions.

Section III deals with political geography. The content of this part is concerned with the activities of man and groups of men in their relation with one another.

Credit: Nine term hours or three for each section; 16 assignments in each section, Fee, $21.00 or $7.00 for each section.

Texts: Students are allowed some option in the choice of texts for Section I. A full list of possible texts will be sent with the first assignment.

The text for Section II is Whitbeck and Finch, Economic Geography, McGraw-Hill Book Company. Each student should also be provided with a good atlas; Goode's School Atlas, by Rand McNally & Company, 1923, is recommended.

The text for Section III is Isaiah Bowman, The New-World-Problems of Political Geography, World Book Company.

Geo C 1 X. Physical Geography. The assignments in the course cover the principal topics found in any elementary textbook on the subject of physical geography. High school teachers will find it helpful as an outline for class work.

Credit: No credit is given for this course; 16 assignments. Fee, $5.00.

Text: Arey, Bryant, Glendenin, and Morrey, Physical Geography, D. C. Heath & Company. Salisbury's Physical Geography, Briefer Course, is also highly recommended.

GEOLOGY

Geo C 250. Geology I. The purpose of this course is to introduce the student to the study of geology, which is the science of the earth, and as such embraces all the sciences and studies concerned directly with the earth. The subject is both extensive and inclusive, and becomes more so with each addition of knowledge. This course will familiarize the student with some of the most common technical terms, and acquaint him with the general divisions of the subject with the hope that an interest in its broader aspects and possibilities will be stimulated.

Credit: Three term hours; 24 assignments. Fee, $7.00.

Text: Pirsson and Schuchert, Introductory Geology (1924), John Wiley and Sons. Every student should also have access to at least one supplementary text. A list of these will be included in the introduction to the first lesson.

Geo C 251. Historical Geology. A course for students who have had the introductory work of general geology.

Credit: One and one-half term hours; 9 assignments. Fee, $5.00.

HEALTH EDUCATION

Ed C 150. Health Education I. This course and Health Education II are designed for mature students who are interested in health for themselves as well as for others, and who are not only seeking knowledge in the health field, but who are also interested in methods of health education. Section I is a survey of factual material that forms a basis of health education.

Credit: Two term hours; 11 assignments. Fee, $5.00.

Ed C 151. Health Education II. Since health is recognized as one of the important objectives of education, it is necessary for those of us who are concerned with the process of educating, to develop sound standards and methods of teaching health and to obtain scientific background to safeguard our choice of materials, methods and information. The purpose of this course is to help establish standards and practices in health education that are consistent with modern educational methods.

Credit: Two term hours; 11 assignments. Fee, $5.00.

HISTORY

The study of history provides an important foundational training for students whose major interests lie in subjects like law, commerce, economics, education, social service and literature. History also furnishes “cultural courses” for those who wish a broad and liberal education. Students expecting to enter any institution of higher education may be sure that the effective college in history will be accepted toward a degree in liberal arts.

High school teachers will often find in the outline suggestions that will assist them in presenting the subjects to their classes. Particularly this is true of the course dealing with the history of Oregon. Those who wish to teach this subject, those who desire to write articles and stories about Oregon, and those who are eager to be more intelligent citizens of their state will find the course in the History of Oregon especially helpful.

Hst C 207. English History I. This course constitutes the first section of a general survey of English history from the earliest times to the present. Section I takes the student to the beginning of the seventeenth century.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Hst C 208. English History II. This is Section II in a general survey of English history, and covers the period from the beginning of the seventeenth century to the end of the Napoleonic Wars in 1815.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Hst C 209. English History III. This is Section III in a general survey of English history, and covers the period from 1815 to modern times.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Texts: Same as for Sections I and II.

Hst C 341. History of Modern Europe I. The period included in the three sections of the History of Modern Europe is from 1789 to modern times. This first section is concerned with the history of the chief nations of the European continent from 1789 to 1815. Primary emphasis is on the history of France during the revolutionary and Napoleonic periods, showing the social structure of the old regime, the ideology of the revolution, and the methods whereby revolutionary nationalism was spread over Europe.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Hst C 342. History of Modern Europe II. This is a continuation of Hst C 341. Its subject matter is concerned with the international relations of European states from the Congress of Vienna (1815) to the close of the Franco-Prussian War (1871); and the internal history of the major European countries down to 1914. Considerable emphasis is placed on the relation between nineteenth century economic problems and historical development.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Hst C 343. History of Modern Europe III. This is a continuation of Hst C 342. It is concerned primarily with the historical development of the relations between European states from the Franco-Prussian War to the World War. Consideration is given to attempts at imperialistic expansion before 1914; the course of the Great War of 1914-1918; and the attempts at new methods of international organization since 1918. The course includes a rapid review of the rise of post-war states, of Fascist Italy, and of Soviet Russia.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Hst C 371. History of the United States I. Sections I to III constitute a general survey of the United States from 1750 to the present time. Section I covers the period from the American revolution to 1850.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Hst C 372. History of the United States II. This section covers the period of American history from 1850 to 1898.
Credit: Three term hours; 16 assignments. Fee, $7.00.

Hst C 373. History of the United States III. This section covers the period from 1898 to the present.
Credit: Three term hours; 16 assignments. Fee, $7.00.
Texts: The same as for Hst C 372.

Hst C 378. History of Oregon. In many particulars the history of Oregon is a repetition of the story of other states, but in many outstanding features the history of Oregon is unique. This state played its part in the great drama of international competition; within its boundaries were enacted events whose significance in the march of free and democratic institutions is only recently being appreciated. The history of Oregon is a splendid American epic. The possibilities in its stirring past for the writer of literature are coming to be realized. The background of Oregon scenery and history for short stories and novels is almost untouched. While the two texts used in this course are extensive and comprehensive in their field, there is also indicated optional supplementary reading which will give the student an enriched knowledge of various aspects of the history of Oregon and the Northwest, should he desire to make his study extend far beyond the specified credit hours.
Credit: Two term hours; 12 assignments. Fee, $5.00.

Hst C 1 X. Twentieth Century Europe. This is an outline course designed to meet the needs of women, girls, club workers and individuals desiring a rapid survey of the main features of European history during the present century. It does not call for the intensive study required in a regular correspondence course and it does not lead to credit. The outline is planned as an aid to anyone interested in studying recent European developments with a view to gaining a better understanding of the problems of the day. The outline is divided into 16 major topics.
Credit: None. Fee, $5.00.

HOME ECONOMICS

The School of Home Economics offers courses for students who wish to continue their work toward a degree while unable to be in residence, for teachers who wish guidance in the study of material which is based upon recent research and investigation, and for homemakers and others interested in acquiring an understanding of the principles underlying food selection, clothing selection, management as related to the home, house furnishing and parent-child relations. In as far as possible courses are equivalent to those of the same number given on the campus. The following courses are offered under the supervision of Ava B. Milam, Dean of the School of Home Economics, and Claribel Nye, State Leader of Home Economics Extension, Oregon State Agricultural College.

FOODS AND NUTRITION

FN C 225. Principles of Dietetics. Study of the constituents in the normal well-balanced diet and the part each plays in maintaining the functions of the body for optimum health. The energy, protein, mineral and vitamin requirements of the normal individual are considered and practical applications are made in the construction of diets and daily menus to meet these requirements. Control of weight and the basic principles involved, the building up of body resistance to infections, the guarding of digestion and proper elimination through diet are included. This course aims to present the fundamental facts of nutrition in a non-technical manner to those who have not had a background of bio-chemistry and physiological chemistry.
This course is required for graduation in Curricula B and C in Home Economics. It may serve also as an elective for other college students. It is recommended for teachers who are interested in developing desirable food habits in children through the school lunch or who wish to include nutrition as a part of their health program.
Credit: Three term hours; 16 assignments. Fee, $7.00.

FN C 411. Food Purchasing. A study of the factors involved in purchasing food for the home. The course includes a consideration of the factors influencing cost and quality of such foods as meats, fruits, vegetables, dairy products, cereals, and canned and frozen products; the basis for grading and selection of the various types of food; food laws and regulations. Topics of special interest to the student are assigned for more intensive study. It is assumed that the student will be able to make observations in her local markets and secure a limited number of products to illustrate points in grading.
Prequisites: This course may be taken without prerequisites if the credit is applied as a general elective. To meet the requirements for students in the School of Home Economics this course must be preceded by a course in Food Preparation and in Elementary Economics.
Credit: Three term hours; 16 assignments. Fee, $7.00.

HOUSEHOLD ADMINISTRATION

HAd C 320. Child Development. This elementary course aims to familiarize the student with present day knowledge of the development of the young child. Practical applications of the principles involved are included or suggested. The student should plan to observe young children while taking the course to substitute for the laboratory work in the nursery school required of students registered for the course on the college campus. Topics included are: the importance of child study; heredity and environment; pre-natal and post-natal hygiene; physical growth and development, children's diseases; child nutrition; the psychology of feeding; mental growth; habit formation; habits of sleep and elimination; play and play equipment, books and reading; discipline and punishment; imagination, truth and falsehood, stealing; emotions and attitudes, fear; anger and jealousy; social attitudes and personality development; the family.
A C 340. Household Management. This course considers not only efficiency in the organization and direction of household processes and policies, but it also stresses the principles that are basic in developing a satisfying home. Lesson topics include the following: the meaning and value of household management; household management and the standard of living; management of time and energy; management of family finances; budgets; accounts and home records; savings; shelter; food; clothing; operating expenses; personal advancement expenditures; family relationships; children and their relation to family incomes. Homemakers will find the course of value since it stresses the practical aspects of management. Required of all Home Economics majors. Credits earned by correspondence will be accepted toward graduation in fulfillment of this requirement provided it has been preceded by FN 218 or 213 or 222 and CT 219 or 212 or the equivalent; that is, one year each of college foods and clothing.

Credit: Three term hours; 16 assignments. Fee, $7.00.

CLOTHING, TEXTILES, AND RELATED ARTS

CT C 217. Clothing Selection. The course aims to give the student an understanding of the principles of clothing from the standpoint of art, health, and economy. Topics include a consideration of clothing standards and consumer responsibility, art principles applied to clothing, personality and clothing selection, application of color to dress, material and accessories, textile fibers, their properties and use, selection of fabrics and ready-to-wears, care of clothing and clothing expenditures. This course if followed by CT 218 and CT 219 may be substituted for one year of clothing for students majoring in Home Economics.

Credit: Three term hours; 16 assignments. Fee, $7.00.

CT C 331. House Furnishing. A course for those who wish to buy and to use household furnishings to the best advantage. It does not concern itself with historic periods of interior decoration, but rather with those elements which must be considered in the average house. This course takes up fundamental art principles, harmonious relationships of form and color and decorative materials and processes. Topics included are: selection and arrangement of furniture; how to build a color scheme; floor and wall treatments; curtains and how to make them; selection and use of pictures; decorative accessories and how to judge them.

To meet the requirements for students in the school of Home Economics, this course must be preceded by a year of art.

Credit: Three term hours; 16 assignments. Fee, $7.00.

JOURNALISM

Many useful and profitable careers are open to trained journalists, but for every person who is making some form of journalism his profession, there are numbers of persons who would find some knowledge of the fundamental principles of news gathering and news writing of great practical value. Those who have the responsibility of writing copy for advertising bulletins, church bulletins, house organs, or who serve as publicity chairmen for clubs, lodges, granges, parent-teacher associations, or other organizations, or who wish to write interpretative stories, experience and personality interviews and other specialized articles, will find one or more of the following courses helpful.

J C 101. Elementary Newswriting. An introduction to the fundamentals of general reporting, interviewing, news analysis and a study of what constitutes news. As much practice as possible is given in writing news stories.

Credit: Three term hours; 16 assignments. Fee, $7.00.

Text: Bleyer, Newspaper Writing and Editing, Houghton Mifflin Co.

J C 400. Feature Writing. This course deals with a type of newspaper and magazine article distinct from the straight, factual news story. Interpretative stories, explanations, statistical treatment of a series of individual stories, "human interest" material, how-to-do articles, experience and personality interviews, sketches, etc., all are included in what is for convenience called feature writing. Fundamentals of this type of writing will be considered, examples analyzed, and practice work assigned. Contrasts in aim and method between straight news and feature material will be considered.

Credit: Three term hours; 16 assignments. Fee, $7.00.

J C 1X. Newswriting for Publicity Chairmen. With the increasing importance of work carried on by parent-teacher associations, business and professional women's clubs, civic organizations, study clubs, men's service clubs, and the many other organizations of prominence, proper representation to the public in general is essential to the carrying out of programs of work. This course has been planned to be of immediate, practical service to publicity chairmen. No previous training is necessary.

Credit: This is a non-credit course; 8 assignments. Fee, $5.00.

LATIN

Latin C 1, 2, 3. Beginning Latin and Caesar. The course begins with the first year book and closes with the reading of two books of Caesar's Gallic Wars. While the work must be concerned largely with grammar, supplementary material has been added, which gives students interesting information on the daily life and character of the Latin people. The course is in
three sections, so arranged as to permit any one or all of them to be substituted for the corresponding term of the resident course. First Year Latin and Caesar, Lat I, 2, 3. The three sections of the course must be completed, either by correspondence or in residence, before credit will be given.

Credit: Twelve term hours or four for each section; 32 assignments in each section. Fee, $27.00, or $9.00 for each section.

Texts: Walters and Conway, *Limen*, published by John Murray, Albermarle Street, West London; Caesar's Gallic Wars, edited by Gunnison and Harley, Silver, Burdett & Co.; Allen and Greenough, *New Latin Grammar*, Ginn and Co. (*Limen* is the only text used in the first section. As it is an imported text, students will save time by ordering it from the University Co-operative Store, Eugene.)

Prerequisites: Cicero and Virgil.

Credit: Three term hours; 16 assignments. Fee, $7.00.

LITERATURE

See English and Literature, pages 30 to 38.

MATHEMATICS

Instruction in mathematics is designed to serve four particular groups of students: (1) Those who wish to secure the mental discipline that comes from the study of an exact science; (2) those who want fundamental courses for natural and applied sciences, such as physics, architecture and engineering; (3) teachers of mathematics who wish a more thorough preparation for their work; and (4) men in military service, or expecting to be, who aspire to officers' positions, for whom college algebra and plane geometry are fundamental, and analytic geometry and calculus of great value. All courses include full directions and helps for the student working by himself.

Mth C 100. Intermediate Algebra. The course is built about the essential technique of algebra, the functional core of algebra, comprising the formula, the equation and the graph, and problem solving.

Prerequisite: One year of high school algebra.

Credit: Four term hours; 24 assignments. Fee, $9.00.

Mth C 101. College Algebra. The emphasis upon the function concept demanded by higher mathematics is the unifying principle of this course. Graphical methods and the use of an abundance of problems from physical science help make the subject matter concrete and interesting.

Prerequisites: One year of high school algebra and intermediate algebra are the minimum preparation necessary.

Credit: Four term hours; 24 assignments. Fee, $9.00.

Mth C 102. Plane Trigonometry. Prerequisites to this course are: one year of high school algebra, intermediate algebra, and plane geometry.

Credit: Four term hours; 24 assignments. Fee, $9.00.

Mth C 103. Analytical Geometry. This course is a necessary foundation for calculus, and is needed by students in architecture, engineering, and science. This course together with college algebra and plane trigonometry may be substituted for unified mathematics.

Prerequisites: One year elementary algebra, plane and solid geometry, college algebra, and plane trigonometry.

Credit: Four term hours; 21 assignments. Fee, $9.00.

Mth C 105, 106, 107. Unified Mathematics. This is the equivalent of the freshman survey course in the mathematics and physical science group. It gives a unified treatment of those portions of advanced algebra, plane trigonometry, and analytic geometry, together with a brief introduction to the simple portions of the differential and integral calculus, which are essential to students in the physical and social sciences who can give but one year to college mathematics. Its content and method are especially valuable to students in science, teachers of high school mathematics and science, and students of education or other statistics.

Prerequisite: Three semesters of high school algebra, and one year of plane geometry.

Credit: 12 term hours or four for each section; 22 assignments in each section. Fee, $27, or $9.00 for each section.

Mth C 108. Mathematics of Finance. During the past fifty years the tremendous development of private, corporate and governmental business has made business a professional calling for the best trained men. The college can send forth, and has led to the founding of strong schools of commerce in most large universities. The present course is a standard course in many of the strongest schools of commerce. Not only the business man but the average citizen also needs a clear-cut knowledge of the principles of investment in order to handle his finances safely and profitably. Everyone should understand interest, discount, annuities, amortization, the valuation of bonds, sinking funds and depreciation, building and loan association, and the principles of life insurance.

Prerequisites: College or advanced algebra.

Credit: Four term hours; 22 assignments. Fee, $9.00.

Mth C 203, 204, 205. Differential and Integral Calculus. A fundamental course, designed to lay a thorough foundation for all future work in mathematics and its applications. This is essentially the same course as that given under the same numbers in the State College and in the University. It is in three sections, so arranged as to permit any of them to be substituted for the corresponding term of the resident course. Division of lessons for the sections is as follows: Section I, 24 lessons, pages 1-185 in the text; Section II, 24 lessons, pages 187-333; Section III, 20 lessons, pages 335-487.

Credit: Twelve term hours, or four for each section. Fee, $27.00 or $9.00 for each section.

Mth C 421, 422. Differential Equations. A practical course in the solution of ordinary and partial differential equations. This course is recommended for students in engineering, mathematics, physics and chemistry. A knowledge of differential equations is essential for advanced work in all of these fields.

Prerequisite: Differential and integral calculus.
Credit: Six term hours, or three for each section; 20 assignments in Section 1 and 16 assignments in Section II. Fee, $14.00 or $7.00 for each section.

Mth C 1 X. Review Course in Arithmetic. This course is intended to serve as a rapid review, primarily for persons who are planning to take the state examination for a teacher's certificate. Questions used in examinations have been carefully analyzed in order to determine the general nature of certificate requirements in arithmetic.
Credit: No credit is given for this course; 16 assignments. Fee, $5.00.
Texts: Hamilton's *Essentials of Arithmetic, Second Book*; *State Course of Study for the Elementary Grades* (free from state superintendent or county superintendent).
(Courses in elementary mathematics are listed among the entrance courses on pages 59 and 60.

**MODERN LANGUAGES**

**FRENCH**

The learning of a foreign language should not be thought of as composed of a great many memory tasks. In fact, the memory work may be reduced to a minimum if the student will study the language scientifically, remembering that its structure and life depend upon certain definite principles and laws just as does botany or chemistry. An understanding of those principles under which the language functions not only makes the mastery of the language far easier, but makes the study of it far more interesting, and the knowledge gained far more abiding. The aim in the following courses in first and second year French will be to give the student familiarity with the underlying principles of the grammar and a working vocabulary of words and idioms.

RL C 1. First Year, First Term French.
Credit: Four term hours; 24 assignments. Fee, $9.00.

RL C 2. First Year, Second Term French.
Credit: Four term hours; 24 assignments. Fee, $9.00.

RL C 3. First Year, Third Term French.
Credit: Four term hours; 24 assignments. Fee, $9.00.

RL C 4. Second Year, First Term French.
Credit: Four term hours; 24 assignments. Fee, $9.00.

RL C 5. Second Year, Second Term French.
Credit: Four term hours; 24 assignments. Fee, $9.00.

RL C 6. Second Year, Third Term French.
Credit: Four term hours; 24 assignments. Fee, $9.00.

**GERMAN**

These courses cover the first two years of German. Careful attention is given to drills in grammar and pronunciation. A correct pronunciation is difficult to acquire from written directions; if the student can arrange to have a few lessons on pronunciation from a high school teacher of German, or from some friend who speaks the language, progress will be greatly facilitated.

Ger C 1. First Year, First Term German.
Credit: Four term hours; 24 assignments. Fee, $9.00.

Ger C 2. First Year, Second Term German.
Credit: Four term hours; 24 assignments. Fee, $9.00.

Ger C 3. First Year, Third Term German.
Credit: Four term hours; 24 assignments. Fee, $9.00.

Ger C 4. Second Year, First Term German.
Credit: Four term hours; 23 assignments. Fee, $9.00.
SPANISH

The principal aim in the following courses in Spanish is reading knowledge, the study of literature, the meeting of college requirements, and the reading of scientific publications. The courses also have in mind the needs of a large number of students who may wish to a knowledge of Spanish for purposes of travel and for business correspondence. Spanish is a not a difficult language; it is logical and consistent in its grammar. Students who are industrious and interested will find it easy.

Ger C 5. Second Year, Second Term German.
Credit: Four term hours; 23 assignments. Fee, $9.00.

Ger C 6. Second Year, Third Term German.
Credit: Four term hours; 23 assignments. Fee, $9.00.
Credit: Three term hours. Fee, $7.00.
Will be given if there is sufficient demand.

NOTE: A third year course is contemplated. In addition to the required reading with exercises, either in classics (selected works of Lessing, Goethe, Schiller), or in modern fiction, such as Hauptmann, Sudermann, Freiwald, etc., an outline of the history of German literature will be offered.

PHYSICS

Correspondence courses in sciences must be largely concerned with theory, rather than with practical demonstration of principles, as is possible when laboratories are available. Students who have access to the laboratory can carry science courses almost as satisfactorily by correspondence as in the class-room. It is difficult to present all phases of the subject adequately by correspondence, and only such simple experiments as can be performed by students at home with apparatus of their own construction are included in the lessons. Students who take these courses are urged to undertake experimental work in laboratories during a summer session.

Ph C 250, 251, 252. College Physics. A general course covering mechanics, sound, heat, light, electricity and magnetism, and an introduction to the modern physics. The work is similar to that given in Physics 201, 202, 203 General Physics, at the University and the State College, to students in architecture, to those in courses preparatory to medicine and dentistry and to those preparing to teach physics in the high school. The usual prerequisites for this course are elementary algebra, elementary geometry, elementary physics, and, preferably trigonometry. The course may be taken, however, without a previous knowledge of elementary physics and trigonometry.
Credit: Nine term hours, or three for each section; 16 assignments in each of three sections. Fee, $7.00 for each section. An additional three term hours' credit may be earned by laboratory work done in a summer session or by special arrangement during a regular term.

Ph C 350. History and Teaching of Physics. This course is for teachers primarily, and presupposes a reasonable familiarity with the more elementary facts and ideas of general physics. A course in at least elementary physics is a necessary prerequisite.
Credit: Three term hours; 16 assignments. Fee, $7.00.
Texts: Cajori, History of Physics, (1929 edition), Macmillan; Rusk, How to Teach Physics, (1923 edition), Lippincott Company; Mann, The Teaching of Physics, Macmillan.

Ph C 360. Meteorology. This course is designed for those who wish to enter the service of the U. S. Weather Bureau. Knowledge of the material covered in this course will fit the student for the Civil Service examination for the lower ranks of the Government positions. Prerequisites for the course are elementary algebra, plane geometry, and elementary physics. A knowledge of trigonometry will be helpful, but it is not necessary.
Credit: Three term hours; 12 assignments. Fee, $7.00.
Texts: Millham, Meteorology, Macmillan; Classification of Clouds for the Guidance of Observers, by the U. S. Weather Bureau, Washington, D. C.

PHYSIOLOGY

Z C 250. Elementary Physiology. An introduction to human physiology. The aim throughout has been to make the course as practical as possible. It appeals especially to parents and teachers, but will prove interesting and valuable to anyone who appreciates the importance of a proper understanding of the functions of the various organs of the human body.
Credit: Three term hours; 15 assignments. Fee, $7.00.

**POLITICAL SCIENCE**

PS C 201. American Government and Politics. A study of the national government, with special attention to practical operation and contemporary reforms.

Credit: Four term hours; 20 assignments. Fee, $9.00.

Texts: Beard, *American Government and Politics*, (sixth edition), Macmillan; *The Federalist*, Everyman's Library. For required reading to supplement the two texts one of the following books should be bought or borrowed: Mathews and Berdahl, *Documents and Readings in American Government*, Macmillan; Crawford, *Readings in American Government*, Alfred Knopf; *Readings in American Government and Politics*, Macmillan.

PS C 202. American State and Local Governments. A study of the state and local governments, with special attention to practical operation and contemporary reforms in Oregon.

Credit: Four term hours; 20 assignments. Fee, $9.00.

**PSYCHOLOGY**

Psychology is a required subject for students in education and journalism, and is especially recommended to students of law, economics, business administration, medicine and literature. Persons engaged in business or in any occupation that calls for contact with many varied groups or classes of people will find the study of psychology interesting and illuminating.

Psy C 101, 102. Elementary General Psychology. This course includes a study of the fundamental principles of general psychology, but in a less thorough manner than Course 201, 202, 203. Some simple experimental work is included. Students who expect to correlate their correspondence work in psychology with work in residence should take Beginners' Psychology 201, 202, 203.

Credit: Six term hours, or three for each section; 32 assignments. Fee, $15.50, or $7.75 for each section. (This includes a laboratory fee of $1.50, which is charged to cover the cost of extra supplies needed for experiments.)

Psy C 201, 202, 203. Beginner's Psychology. A course designed to duplicate Elementary Psychology 201, 202, 203 given at the University and the State College. The same subject matter is covered as in Elementary General Psychology 101, 102, with the addition of more intensive treatment of such aspects of behavior as the conditioned reflex, learning and intelligence. The course is of general interest to all who want a solid foundation for advanced study in psychology.

Credit: Nine term hours, or three for each section; 16 assignments in each section. Fee, $22.50, or $7.50 for each section. (This includes a laboratory fee of $1.50, which is charged to cover the cost of extra supplies needed for experiments.)

Psy C 418. Abnormal and Borderline Psychology. A study of the better known types of abnormal and borderline mental phenomena from the standpoint of scientific interpretation. Dreams, automatic activity, phobias, hysteria, mediumship, Freudian mechanisms, theories of the subconscious, etc.

Prerequisite: Any good course in the principles of general psychology.

Credit: Four term hours; 22 assignments. Fee, $9.00.

In addition to the regular texts, the following should be borrowed from the State Library in Salem, or from the University of Oregon Library: Blanchard and Sands, *Abnormal Behavior*, Moffat, Yard & Company; Fox, *Psychopathology of Hysteria*, Richard G. Badger, Gorham Press, Boston.

**SOCILOGY**

Soc C 201, 202, 203. Introduction to Sociology. A survey of the development of society and its institutions, and the analysis of the more significant current social problems. The following topics are included: primitive man and his society; influences of geographical, biological, and psychological factors upon human behavior, human nature and its formation; problems of the family, crime, race contacts, poverty, and recreation.

Credit: Nine term hours, or three for each section; 16 assignments in each section. Fee, $21.00, or $7.00 for each section.

Soc C 211, 212. Introduction to Modern Social Problems. This course is designed to acquaint the student with the nature and significance of the many social problems with which he and his associates are contending in modern society. The first 16 assignments concern themselves with the nature of the social problem in former civilizations and the phases of it which are peculiar to our own situation. The second division of the course surveys the ways in which the problem shows itself in the social problems all about us.
Credit: Six term hours for the entire course, or three for each section; 16 assignments in each section. Fee, $14.00, or $7.00 for each section.

Soc C 315. *Criminology*. The problems of crime and criminals will be taken up from three angles. Consideration will be given first to the criminal, our traditional and present day notions about him and the extent to which the causes of crime lie within him. Attention will then be given to the factors in the physical and social environment which contribute to the production of crime. Finally, consideration will be given to the nature of the criminal act and the reactions of society to criminal behavior in punishment, reformation, and the more recent developments looking toward the scientific treatment of the criminal, including the extent to which the adoption of a program would modify traditional procedure and treatment.

Credit: Three term hours; 16 assignments. Fee, $7.00.

**Entrance Courses**

Admission to the freshman class in any of the institutions in the Oregon State System of Higher Education is conditioned upon the completion of a four-year high school course, or its equivalent, requiring 15 units of work. The outline of this required work is given in full on pages 12 and 13 of this catalog.

The following courses have been prepared to enable students who expect to enter an institution of higher education to make up entrance deficiencies or to prepare some of them helpful in presenting the subjects to their classes.

College credit will not be given for any of these courses, but entrance credit will be granted for the satisfactory completion of any of them.

A unit, when applied to entrance credit, means the equivalent of five recitations per week of not less than 40 minutes each, in one branch of study, for the school year of not less than 36 weeks.

**ACCOUNTING**

BA C 1E. *Introduction to Accounting*. The aim of this course is to give the student instruction in practical methods of bookkeeping and information concerning the principles underlying all accounting records. The course includes a study of business relationships as affecting the accounting records, recording of transactions in the more simple forms of books of original entry, posting to ledgers, and preparation of financial statements. The study includes lessons on budgeting and recording of an individual’s personal expenses as well as the usual records for such commercial enterprises as the individual proprietorship and partnership.

Credit: One-half entrance unit; 24 assignments. Fee, $7.00.

Mariner (Academy Classics or any other good high school edition); Scott, Ivanhoe and Quentin Durward; Booker T. Washington, Up From Slavery.

Eng C 4 E. Entrance English IV. In this course renewed emphasis is placed upon the definite fixing of the elementary facts of grammar, punctuation, and spelling, in order that the student may cultivate habits of accuracy in expression. The study of literature is also a part of the course, so that the student may learn to enjoy and appreciate good books.

Credit: One-half entrance unit; 24 assignments. Fee, $7.00.

Texts: Clippinger, Written and Spoken English, Silver, Burdett and Company; Tennyson, Idylls of the King; Sidney Lanier, The Boys' King Arthur; Dickens, A Tale of Two Cities and David Copperfield; Washington's Farewell Address (Epoch Making Papers, Macmillan edition preferred); Blackmore, Lorna Doone (Academy Classics preferred).

Eng C 5 E. Entrance English V. This course has three aims: (1) To form standards of judgment, (2) to understand the construction of the newspaper, and (3) to practice the forms of expression involved, such as the editorial and the various types of news reports. The lessons in literature are planned to give a comprehensive view of the development of the English drama from the period of the Renaissance to the present day. In all the lessons correct grammatical usage is still as much a part of the required work as in the first term.

Credit: One-half entrance unit; 24 assignments. Fee, $7.00.

Eng C 6 E. Entrance English VI. A rather intensive study of three forms of modern literature is undertaken in this course—periodicals, the essay, and the novel—for the purpose of helping the student to develop taste and discriminate in his choice of current reading, to express in effective form his own point of view upon various subjects of personal interest, and to enable him to establish standards of judgment and increase his powers of appreciation in his reading of fiction. Grammatical accuracy of expression is still a requirement in all written work.

Credit: One-half entrance unit; 24 assignments. Fee, $7.00.

Texts: Clippinger, Written and Spoken English, Silver, Burdett and Co.; Addison and Steele, Sir Roger de Coverley Papers; Lamb, Essays of Elia (Standard English Classics, Ginn and Co., preferred); Carlyle, Essay on Burns (Representative poems of Burns with Carlyle's Essay, Ginn and Co., preferred); Burns, Poems (Selected Lyrics, The Cotter's Saturday Night, Tam o' Shanter); Goldsmith, The Vicar of Wakefield; Thackeray, Henry Esmond.

Eng C 7 E. Entrance English VII. A study of American literature, particularly as it reflects in its continuity the development of our national life and ideals. This course aims (1) to present our literature as the expression of our political, social and industrial life, of our ideas of beauty and art, and our interpretation of nature, and (2) to establish certain standards which will enable the student to form habits of judgment and to increase his powers of appreciation in reading. Grammatical accuracy of expression is still a requirement in all written work. If any need for special drill in this connection is evidenced, the instructor is expected to assign work to fit the individual needs of the student.

Credit: One-half entrance unit; 24 assignments. Fee, $7.00.

Texts: DeMille, American Poetry, Allyn & Bacon; Rittenhouse, Second Book of Modern Verse; Edwin Markham, Lincoln, The Man of the People; Walt Whitman, When Lilacs Last in the Dooryard Bloomed; Lincoln's Cooper Union Speech; Franklin's Autobiography; Hawthorne, House of Seven Gables; Howells, Rise of Silas Lapham.

Eng C 8 E. Entrance English VIII. Three of the most popular forms of modern literature are emphasized in this course: the lyric is studied as a type of literature and in its relation to the development of modern English poetry. Seven lessons are devoted to a study of the essay, while the last five lessons are intended to help the student form habits of judgment and of discrimination in his reading of the novel.

Credit: One-half entrance unit; 24 assignments. Fee, $7.00.

Eng C 9 E, 10 E. Entrance English Composition. This course is designed to help the student correct bad habits in written and spoken English; acquire facility in the use of the right forms in words, sentences and paragraphs; and learn how to apply important rules of punctuation and paragraphing in the preparation of composition. Each lesson requires from the student some piece of writing and generally the completion of an exercise of some sort of grammar, usage, or punctuation. The course is must better adapted to senior high school students than to those less advanced. May be taken in two sections of one-half unit each.

Credit: One entrance unit, or one-half unit for each section; 25 assignments in each section. Fee, $14.00 or $7.00 for each section.

Text: Clippinger, Written and Spoken English, Silver, Burdett and Company.

Eng C 11 E. Fundamentals of Written English. This course is planned to aid the student in acquiring clearness and accuracy in the expression of thought and feeling. Writing assignments will vary in length from the single paragraph to the longer composition, and subjects may be chosen from the student's own field of interest or experience. Attention will be given to logical organization of subject matter in themes, improvement of vocabulary, and effective sentence structure. Throughout the course drill in spelling, capitalization, punctuation, and the fundamentals of grammar will be provided for students whose writing indicates the need of it.
Exercises
Algebra. This course and A2 correspond to
Andent
1'934.

Eng C12 E. English Grammar and Usage. The purpose of the eight lessons in this course is to give a simple outline of English grammar and to connect with it such questions of usage as may come under each of the parts of speech. By calling attention to some of the more common errors, the student will be helped to fix correct forms in his mind.

HISTORY

Hst C1 E. Civics I. Deals with the framework of American government, state, local and federal, and with the powers and duties of executive, legislative and judicial officers in all units of government.

Hst C2 E. Civics II. A study of political parties and elections and of the functions of American government in all its branches, including such subjects as foreign relations, crime and its prevention, public morals, education, public health, conservation of natural resources, money and banking, regulation of corporations, public utilities, labor, immigration, and taxation. Course I or its equivalent is a prerequisite.

Hst C3 E. American History I. The aim in this course and the one following is to give the student a general understanding of the subject, and to present the equivalent of a one-year course in American history in a standard high school. This section is concerned with American history from its beginning to 1850.

Hst C4 E. American History II. This course is a continuation of American History I and covers American history from 1850 to the present.

LATIN

Lat C1 E. Beginning Latin. This course is the equivalent of the regular high school course in first year Latin. It consists of exercises in pronunciation, drills in grammar, and the study of supplementary material, which is aimed to give the student an understanding of the daily life and character of the Latin people.

Lat C2 E. Caesar. This course is the equivalent of the regular second year work in Latin in high school. In addition to the reading in Caesar there will be drills and reviews in grammar. Supplementary material is included.

MATHEMATICS

Courses in mathematics all contain abundant illustrations and help especially designed to aid the student working without a teacher. All difficult matters are carefully explained, thus making the work more interesting and successful.
Extension and Correspondence Services

CORRESPONDENCE-STUDY GROUPS

When several, or even two or three, correspondence students in a town or rural community can be found who are interested in the same course, a study group or club may be formed. By meeting together at regular intervals to talk over their work much interest can be added to the usual correspondence-study procedure. Members of the group who meet all requirements of the course may earn credit.

Correspondence courses may also be used as the basis for club study by groups not in any way interested in earning credit, but who wish to study for their own improvement and enjoyment. Each member of the group enrolls regularly for the course and thus is entitled to full instruction on the lessons. When as many as 12 or 15 are enrolled in such a group, it will sometimes be possible for the General Extension Division to send an instructor to meet with the members occasionally during the period of their enrollment.

Study groups may be formed for any course, but are likely to be more successful in such subjects as English, literature, history, and psychology.

Persons wishing to organize a study group are invited to write to the General Extension Division.

EXTENSION CLASSES

Classes that combine direct methods of instruction with the correspondence method will be organized whenever there is a sufficient group desiring such instruction, and the necessary arrangements can be made by the General Extension Division to provide an instructor.

Requirements. Usually a class cannot be organized when the initial membership is less than twenty. A group wishing to organize should decide upon the course of study it wishes to pursue, with an alternative course in case an instructor for the first cannot be secured and should put some responsible person in charge of all necessary arrangements such as room, membership, publicity and any other details that arise in connection with such a class. A reasonable degree of permanency in membership will be expected by the General Extension Division in organizing classes, as satisfactory work cannot be done when the personnel of the group is constantly changing.

Credit. Credit will be given for work done in classes meeting regularly and following a definite course of study under the direction of an instructor provided by the General Extension Division.

Applications. Application for extension classes outside of Portland, Oregon, should be made to the General Extension Division, Oregon State System of Higher Education, Eugene, Oregon. Applications for classes in or near Portland should be made to the Portland office of the General Extension Division, 814 Oregon Building, Portland, Oregon.
STUDY COURSES FOR CLUBS

The General Extension Division invites women's clubs, teachers' study clubs, granges and other groups of persons whose common interest in some subject makes group study desirable, to ask for assistance in the preparation of study outlines. Frequently the subject on which an outline is desired is one that is especially familiar to some member of the faculty, who can suggest methods of study and bibliographies.

Correspondence courses also furnish excellent outlines for group study. Enrollment with the General Extension Division has the added advantage of giving the individual regular instruction and the opportunity to confer with the instructor regarding the work of the course.

HOME READING COURSES

Many persons who do not care to undertake a regular correspondence course are desirous of securing help in planning systematic home reading. To such persons the General Extension Division is prepared to offer a number of reading lists on widely varied topics. Also, assistance is offered to those who wish reading lists on special topics.

One series of reading lists is announced under the heading, PURPOSEFUL READING COURSES, and contains book lists grouped under the following topics:

1. Reading for Enjoyment
2. Our Heritage
3. The Wonders of Modern Science
4. How to Appreciate the Beautiful
5. Seeing the Orient Through Books
6. Seeing Europe Through Books
7. Seeing South America Through Books
8. Europe Since the Great War
9. The Work of the World
10. Earth's Gifts to Man
11. Inventions and Inventors
12. As a Man Thinketh
13. Books That Have Been Talked About
14. Books That Are Being Talked About

A second series of reading lists has been prepared in cooperation with the Oregon Federation of Women's Clubs. These lists are used by women who are members of federated clubs for the purpose of securing membership in the honor society known as Epsilon Sigma Omicron. The use of these reading lists, however, is not limited to club women, but anyone who is interested in the topics included may apply for a list. The topics are:

1. Current Problems and Ways of Thinking
2. As a Man Thinketh—Philosophy, Ethics, and Religion
3. Contemporary Trends in English Literature
4. American Literature
5. Foreign Literature
6. Our Heritage
7. Biography
8. Seeing the World Through Books—Travel and Discovery
9. Learning to Appreciate the Beautiful—Fine Arts
10. New Viewpoints in History
11. Psychology
12. Books That Are Being Talked About
13. Who and What in Modern Business
14. The United States Faces the Pacific
15. Oregon History

TEACHERS' READING CIRCLE

The state superintendent of public instruction offers six ways in which reading circle requirements may be met. The two plans in which the General Extension Division of the Oregon State System of Higher Education may serve are given here.

"Plan Number I. Reading and reporting upon one of the reading circle books under the direction of the General Extension Division."
Make postal orders, express orders and bank drafts payable to the General Extension Division, and send application to the General Extension Division, Oregon State System of Higher Education, Eugene

Application for CORRESPONDENCE COURSES

Name in full ........................................ (Mr., Mrs., or Miss)
Address ..................................................

Have you ever before registered for a correspondence course with this Extension Division? ..........................................................

Age ................ years. Occupation ..................

Amount of high school work completed and where ..................................

Amount of college, university, or normal work completed and where ..................................

What degree, if any, do you hold? ........................................

What institution of higher education in Oregon do you expect to enter? .................................

What subject do you expect to make your major? ........................................

What is your object in taking this course? ........................................

Do you desire credit? ........................................

To what libraries do you have access? ........................................
