Greater Memphis Area

COMMUNITY HARVEST

not accepted at the neighborhood market. Low-income populations living on tight budgets that either simply lack healthy food options or the lack or absence of grocery stores that sell fresh produce and vegetables have no choice but to buy their food at vending machines placed in school zones, detention centers, and on street corners. Most food deserts are defined by a lack of access to fresh produce for the area, bringing people together through commerce, education, and culture.

In our country, unlike the rest of the world, food is a privilege, not a basic human right as established by the United Nations. Food as a human right is something that has been recognized by the United Nations but the majority of the American population is not aware of this right. This is because of the way in which food is distributed within the United States, as well as the lack of access to healthy food options for those who live in food deserts.

As of 2019, 23 million people lack access to a place where they can buy fresh, healthy food. This is an increase from 2006 when 21 million people lacked access to a place where they could buy fresh, healthy food. In addition, the majority of these people live in urban areas as well as rural areas. As Ellen Holtzman puts it, "Food deserts are not something that only happens in the rural areas. These are also happening in the urban areas as well as rural areas."

Tennessee is that almost 13 percent of the population has access to a place where they can buy fresh, healthy food. This means that almost 23 million people lack access to a place where they can buy fresh, healthy food. This is a staggering number, and it is something that needs to be addressed.

The overall price of fruits and vegetables in the US has increased by more than 25% since 1990, while the price of fatty foods has decreased by 40%. This means that it is more expensive to buy healthy food options than it is to buy unhealthy food options. This is a problem that needs to be addressed.

In rural areas, the lack of access to fresh produce is an issue. In urban areas, the lack of access to fresh produce is a problem. In both cases, the lack of access to fresh produce is a problem that needs to be addressed.

In the United States, 40% of children do not have access to fresh produce. This is a problem that needs to be addressed.

Food deserts are not something that only happens in the rural areas. These are also happening in the urban areas as well as rural areas.
