

**Decision Research/Rutgers Smoking Survey
Narrative Responses to Open-ended Questions**

Q:Q3_1

**To the best of your knowledge, what illnesses if any, are caused by smoking cigarettes? [RECORD VERBATIM]
"Anything else?" [PROBE UNTIL NO MORE ILLNESSES ARE GENERATED. PROBE UNSPECIFIED
"CANCER" WITH]**

"What kind of cancer?"

TYPE EXACT RESPONSE BELOW

<p>A lot cancer, emphysema, all kinds of stuff, mouth cancer and stuff like that (p) lung cancer, esophagus, all of that (p) no</p> <p>A whole bunch bronchitis leads to lung cancer, throat cancer all kinds of things your heart and lungs</p> <p>A whole slew of kinds of cancers and I think heard related things and conditions and blood pressure are exacerbated by smoking</p> <p>Ah - well there's lung cancer, emphysema, heart-related problems, throat cancer, larynx, high blood pressure (p) yeah let's see - everything's kind of redundant. Stroke!</p> <p>Ah cancer, emphysema, heart disease. (p) lung cancer, mouth cancer</p> <p>Ah I would say lung cancer, emphysema, - throat cancer, and that's all I can think of right off-hand</p> <p>All kids of stuff lung cancer, emphysema - what else and asthma - bronchitis lung disease</p> <p>All of them lung cancer, heart disease emphysema</p> <p>All of them, tuberculosis heart disease</p> <p>All types. It affects your absorption of nutrients, it causes wrinkles that people aren't aware of. I am an herbalist, it affects your thinking. It slows down your responses. So the air we breathe in our homes. The air in our homes are causing more health probes than we know</p> <p>Alot</p> <p>Alot cancer, emphysema</p> <p>Alot cancer. (pr) not really</p> <p>Alot lung cancer emphysema I don't know</p> <p>Alot of things heart disease I guess</p> <p>Another question that I think some people are susceptible to illnesses. Smoking makes those people get the disease and others don't get it. These questions are just not answerable. When my dad dies they said he died of smoking related disease, he was 84. I asked the nurse why they did that and she said the more times they put tobacco of problem related to death, the more government grant money they get for the hospital. Some people are just dying anyway because they are old. I don't trust alot of government information because of this</p> <p>Any number of cancer heart disease lung disease of course, probably sore knees - the chemical effect the joints</p> <p>Asthma</p> <p>Asthma, bronchitis, heart disease, emphysema</p> <p>Asthma, emphysema, cancer (p) lung, throat, mouth, kidney cancer, lose your leg like granddaddy, heart trouble, circulation problems</p> <p>Bad heart, bad lungs</p> <p>Bad lungs cancer kidney</p> <p>Bad lungs I don't know what you call it. [P] probably bronchitis stuff like that</p> <p>Basically cancer and emphysema. Heart trouble</p> <p>Bronchitis ,lung cancer</p>	<p>Bronchitis, and I don't have neither (p) emphysema (p) asthma (p) that's all I know</p> <p>Bronchitis, cancer</p> <p>Bronchitis, cancer, emphysema</p> <p>Bronchitis, laryngitis, things of that nature, cancer obviously (p) throat, lung, gum, mouth cancer (p) nope</p> <p>Bronchitis, lung cancer and one other I can't remember/</p> <p>Bronchitis, lung cancer. Not that I can think of</p> <p>Bronchitis, sinusitis, sore throat, lung cancer, throat cancer, asthma, emphysema</p> <p>Cancer (13 answers)</p> <p>Cancer - (p)lung cancer (p) I can't think of anything right now</p> <p>Cancer - lung</p> <p>Cancer - Lung disease - bad breath</p> <p>Cancer (p) emphysema, lung cancer (p) those are the only two I'm aware of</p> <p>Cancer (p) I don't know, emphysema, (p) lung cancer (p) no</p> <p>Cancer (p) I think lung cancer (p)I have no clue (p) I think birth defects, and I think you can stunt male growth, and I'm not sure about any others</p> <p>Cancer (p) lung (p)</p> <p>Cancer (p) lung (p) any type of cancer probably, throat, anything that has to do with the respiratory system(p) not off the top of my head</p> <p>Cancer (p) lung (p) cancer of the throat (p) probably have a heart attack (p) I'm sure t here is, but I can't think of any</p> <p>Cancer (p) lung (p) emphysema (p) not that ;I know</p> <p>Cancer (p) lung (p) emphysema (p) not that I can think of</p> <p>Cancer (p) lung cancer (p) not that I can think of</p> <p>Cancer (p) lung cancer (p) not that I'm aware of, not offhand</p> <p>Cancer (p) lung cancer (p) that's it right now, that I can think of</p> <p>Cancer (p) lung cancer (p) tuberculosis, asthma (p) throat cancer, that's all that come to mind</p> <p>Cancer (p) lung cancer (p) um throat cancer (p) not that I know of</p> <p>Cancer (p) lung cancer and (p) no</p> <p>Cancer (p) lung cancer, emphysema. (p) oh, uh - heart problems. (p) let's stay with that</p> <p>Cancer (p) lung cancer, throat cancer, all kinds of cancer, like rectum cancer and stuff (p) emphysema, that's pretty much it that I can tell right now</p> <p>Cancer (p) lung cancer, throat cancer, heart cancer I think. (p) no</p> <p>Cancer (p) lung cancer, um - (p) emphysema - if you have asthma it can start an asthma attack. (p) um if you play sports it can hurt your sports because you won't be able to breath as strong as you would before</p> <p>Cancer (pr) lung cancer, throat cancer. Heart disease</p> <p>Cancer [P] lung cancer [P] that's all</p> <p>Cancer [P] lung cancer and throat cancer and brain cancer and cancer</p>
--	--

Cancer [P] lung cancer possibly mpout cancer tissue
cancer I think like heart disease I'm not sure about alot
of stuff

Cancer [P] lung cancer, emphysema

Cancer [P] lung cancer, I guess

Cancer [P] lung none that I know about emphysema

Cancer [P] lung or other stuff

Cancer [P] lung throat just mainly those kinds

Cancer [P] lung, mouth, throat, cancer that is it

Cancer [P] lung, throat, and mouth

Cancer [P] there's lung cancer. [P] that's all I can come
up with right now

Cancer [P] uh, I don't know [P] lung cancer, [P] not that I
know of

Cancer and all that stuff [P] mouth, lung cancer

Cancer and heart disease

Cancer bronchitis mouth cancer lung cancer rectal and
colon cancer

Cancer emphysema birth defects low birth weight lung
cancer

Cancer emphysema lung and stomach cancer

Cancer emphysema lung cancer high blood pressure

Cancer like lung cancer and mouth cancer a lot of
different cancers

Cancer lung cancer asthma emphysema

Cancer lung cancer breast cancer emphysema throat and
mouth cancer diabetes

Cancer lung cancer throat cancer emphysema

Cancer lung cancer tuberculosis

Cancer lung cancer, I don't know heart disease

Cancer lung emphysema

Cancer lung emphysema there's a lot

Cancer lung heart cancer

Cancer lung throat mouth

Cancer lung. emphysema

Cancer of lung, cancer of the throat, cancer of the mouth

Cancer of lungs, emphysema, stroke

Cancer of the lungs, cancer of the throat. (p) not at the
present

Cancer thou heart problems

Cancer, (p) lung cancer, emphysema. That's about all I
know to my knowledge

Cancer, [P] any as far as I'm concerned and emphysema

Cancer, [P] emphysema lung cancer

Cancer, [P] like lung cancer. not really sure

Cancer, [P] like lungs and in the mouth. [P] tooth loss
and stuff like that

Cancer, [P] lung, mouth, throat, high blood pressure,
heart diseases, emphysema

Cancer, [P] well lung cancer knots in the shoulder area
those for sure

Cancer, [what kind?] Leukemia

Cancer, asthma, lung cancer

Cancer, asthma, mouth, lung cancer, emphysema that is
all I know

Cancer, bronchitis, heart disease

Cancer, bronchitis, heart, stroke, circulation

Cancer, emphysema

Cancer, emphysema

Cancer, emphysema

Cancer, emphysema

Cancer, emphysema

Cancer, emphysema lung disease

Cancer, emphysema lung disease. I know this bronchitis
its bad. Its my new years resolution to quit

Cancer, emphysema those are 2 that come to mind hart
disease

Cancer, emphysema, [what kind of cancer?] Lung, heart,
I guess

Cancer, emphysema, asthma [what kind of cancer?]
Mouth, lung, throat

Cancer, emphysema, heart

Cancer, emphysema, heart failure, high blood pressure

Cancer, emphysema, heart problems

Cancer, emphysema, lung cancer

Cancer, emphysema, lung cancer and various other
cancer, asthma, and chronic obstructive pulmonary
disease and bronchitis

Cancer, emphysema, oral and esophageal cancer,
circulatory problems, Berger's disease

Cancer, emphysema, others

Cancer, emphysema, stuff like that (p) lung, throat,
mouth (p) I'm sure there is (p) no

Cancer, emphysema, that's all I can think of (p) lung
cancer

Cancer, emphysema,[what kind of cancer?] Lung, throat

Cancer, emphysema. (p) lung cancer, mouth cancer,
probably throat cancer, it aggravates asthma

Cancer, hear t disease

Cancer, heart and lungs

Cancer, heart disease and all sorts of stuff like that

Cancer, heart disease,

Cancer, heart disease, emphysema

Cancer, heart disease, impotence, (p) lung cancer
specifically, and also in the mouth and lips and stuff
(p) I understand that smoking would make it more
likely that you could get any type of cancer

Cancer, it makes your fingers turn yellow and your gums
gross

Cancer, it will mess up your stomach and your liver; it
will mess up your body a lot and its not good for you

Cancer, leukemia, asthma

Cancer, like lung cancer, and ah I don't really know, just
say lots of cancers

Cancer, lung

Cancer, lung

Cancer lung cancer

Cancer lung cancer

Cancer, lung cancer

Cancer, lung cancer

Cancer, lung cancer

Cancer, lung cancer

Cancer, lung cancer

Cancer, lung cancer

Cancer, lung cancer

Cancer, lung cancer any kind of cancer, heart disease

Cancer, lung cancer mouth cancer emphysema

Cancer, lung cancer that's all

Cancer, lung cancer throat cancer, emphysema

Cancer, lung cancer, addiction

Cancer, lung cancer, breast cancer, anything

Cancer, lung cancer, prostate cancer

Cancer, lung cancer, that all

Cancer, lung cancer, that's the only one I really know,
mouth cancer

Cancer, lung cancer, throat cancer, do you want me to
keep going. Esophagus, larynx cancer

Cancer, lung cancer. [P] I'm not sure

Cancer, lung disease	Emphysema
Cancer, lung disease, emphysema	Emphysema
Cancer, lung disease, emphysema	Emphysema
Cancer, lung diseases lung cancer and emphysema	Emphysema
Cancer, lung problems	Emphysema - (p) lung cancer - (p) no that's all I can think of right off my head
Cancer, lung, lung cancer; heart attacks, heart disease, skin cancer	Emphysema - I guess asthma
Cancer, lung, mouth and emphysema	Emphysema - lung cancer
Cancer, lung; throat [cancer]	Emphysema (p) lung cancer (p) nope
Cancer, main one, lung disease, high blood pressure, every type of cancer	Emphysema (p) lung cancer, and throat cancer (p) not that I can think of
Cancer, other respiratory illnesses	Emphysema and lung cancer
Cancer, respiratory diseases	Emphysema and lung cancer
Cancer, tuberculosis, don't know what ,else - birth defects	Emphysema and lung cancer that is all I know of
Cancer, tuberculosis, emphysema	Emphysema asthma
Cancer, tuberculosis, emphysema; [what kind of cancer] lung cancer	Emphysema bronchitis heart problems fetus in unborn babies lung cancer throat cancer mouth cancer
Cancer, tumors, not sure of any others [what kind of cancer] lung cancer, any kind of cancer	Emphysema bronchitis lung cancer colon cancer
Cancer, uh respiratory infections and that all can think of	Emphysema cancer
Cancer, when you do it for 45 years would you quit. I quit once for 7	Emphysema cancer I don't know anything else
Cancer,, lungs - cancer of mouth	Emphysema cancer, lung cancer strokes
Cancer. (pr) lung cancer. Emphysema	Emphysema chronic bronchitis, and lung cancer and throat
Cancer. Emphysema. Lung problems of other types	Emphysema heart conditions lung problems
Cancer., Emphysema. (pr) lung	Emphysema high blood pressure lung cancer numerous
Cancer--lung; emphysema	Emphysema I know, bronchitis; what else, like heart diseases, I don't know specific names. (p) high blood pressure
Cancers	Emphysema lung cancer [P] not that I can think of off the top of my head
Cancers (p) lung cancer (p) that's all I'm familiar with	Emphysema lung cancer heart disease
Cancers many types	Emphysema lung cancer heart disease
Cancers, emphysema, couple others	Emphysema lung cancer heart problems
Cancers, lung cancers [P] not right off the bat, I could believe any disease to be somewhat connected, emphysema and lung cancer being the ones I know of	Emphysema lung cancer heart problems tumors
Cancer-your lungs [P] they clog your breathing	Emphysema lung cancer mouth cancer
Cardiovascular diseases lung, throat, mouth cancer, heart disease	Emphysema lung cancer mouth cancer asthma
Cigarettes increase the likelihood that you will get a variety of illness including cancer, emphysema and heart disease. Contributes to all sorts of lung problems and high blood pressure	Emphysema lung cancer mouth cancer heart disease complicates pregnancies
Cigarettes, emphysema, heart disease, lung cancer, throat cancer	Emphysema lung cancer those are all I can think of throat cancer and cancer of the gums that is all I can think of
Congestive heart failure. Lung cancer. Emphysema. I don't know. Pretty much anything to do with heart or lungs	Emphysema lung cancer throat cancer
Cough, [chronic obstructive pulmonary disease] bronchitis, any kind of lung diseases, my mom just passed away with that, cancer, that sort of thing (p) lung cancer, I don't know	Emphysema lung cancer throat cancer heart problems
Cough. Lung cancer, emphysema, birth defects	Emphysema lung cancer, cancer of the throat, cancer of the lips that's all I know
Coughing	Emphysema lung cancer, cough
Coughing and hard time breathing things like that	Emphysema usually cancer
Diabetic, high pressure that's all	Emphysema would be the most popular, not popular [P] not that I c an think of, lung disease, and it probably contributes to heart trouble
Don't know	Emphysema, - cancer too, throat (p) - heart disease I guess
Either emphysema, either heart attacks, strokes, cancer (p) like tuberculosis, like cancer that goes all over your body, like skin cancer (p) you also can have throat cancer too	Emphysema, (p) not sure, I'm sure there's plenty more (p) no
Emphysema	Emphysema, and I know there's a lot more
Emphysema	Emphysema, and lung cancer
Emphysema	Emphysema, and that's pretty much all I know
Emphysema	Emphysema, anything that has to do with respiratory system lung cancer
Emphysema	Emphysema, asthma, cancer
Emphysema	Emphysema, asthma, heart disease, wrinkles and cancer of course, lung cancer would be the top one
	Emphysema, birth defects, -
	Emphysema, birth defects, low birth weight

Emphysema, bronchitis, lung cancer, asthma
 Emphysema, bronchitis, lung cancer, mouth cancer, throat cancer
 Emphysema, cancer (p) lung (p) ah - I don't know the names of any more of them
 Emphysema, cancer (p) lung cancer, mouth cancer - (p) that's all I could think of
 Emphysema, cancer (p) lung cancer, tongue cancer, mouth cancer, that's all I know (p) heart disease, high blood pressure, that's all I know
 Emphysema, cancer [P] lung, throat, larynx, tongue anything in the mouth or airway
 Emphysema, cancer heart disease
 Emphysema, cancer, [P] lung and heart disease
 Emphysema, cancer, asthma
 Emphysema, cancer, heart disease
 Emphysema, cancer, lung cancer, teeth turn yellow
 Emphysema, cancer. (p) lung cancer
 Emphysema, cough, heart disease in general, diabetes, lung cancer, oral and esophageal cancer, gastric cancer
 Emphysema, heart disease, lung cancer,
 Emphysema, heart disease, lung cancer, that's all I can think of off hand
 Emphysema, heart disease, lung disease
 Emphysema, heart disease, lung disease just to mention a few
 Emphysema, heart trouble
 Emphysema, heat, weakened heart
 Emphysema, high blood pressure, lung cancer, blood clots
 Emphysema, I don't know I can't think right now
 Emphysema, I don't know, I can't think of anything else off the top of my head
 Emphysema, like throat cancer lung cancer stuff like that
 Emphysema lung cancer (23 answers)
 Emphysema, lung cancer - (p) uh, - no
 Emphysema, lung cancer (p) no, not that I can think of
 Emphysema, lung cancer (p) probably heart diseases (p) maybe cancer of the mouth, that's all I can think of
 Emphysema, lung cancer (pr) asthma
 Emphysema, lung cancer throat cancer mouth cancer I think that is all I know
 Emphysema, lung cancer uh, heart disease bout all I know [P] no
 Emphysema, lung cancer, all that kind of stuff
 Emphysema, lung cancer, and I believe brain damage, that's as much as I can think of (p) not that I can think of
 Emphysema, lung cancer, asthma, I think there are couple
 Emphysema, lung cancer, asthma. (pr) nothing else
 Emphysema, lung cancer, bronchitis, cancer of the mouth, yellow teeth
 Emphysema, lung cancer, cancer from secondary smoke that the only ones I know it can be related to eye disease too
 Emphysema, lung cancer, contributes to heart disease, you can get oral cancer, throat cancer, any kind of lung disease (p) I don't know
 Emphysema, lung cancer, esophagus cancer. You name it
 Emphysema, lung cancer, gum cancer, a couple more
 Emphysema, lung cancer, heart disease
 Emphysema, lung cancer, heart disease (p) not that I can think of
 Emphysema, lung cancer, heart disease, (p) that's it
 Emphysema, lung cancer, heart disease, that's all I can name right now
 Emphysema, lung cancer, heart problems (p) heart attacks, smoking contributes to all of these (p) possibly pneumonia, I think smoking can compound any illness, but I need to clarify, but I don't think smoking is the sole cause of any of those diseases, I think it is a combination of environment, genetics, and habits like smoking
 Emphysema, lung cancer, heart trouble, circulatory trouble, - same as taking poison
 Emphysema, lung cancer, I don't know (p) no
 Emphysema, lung cancer, I think reproductive sometimes, just respiratory in general, asthma. (p) no
 Emphysema, lung cancer, mouth cancers heart problems, asthma
 Emphysema, lung cancer, not sure
 Emphysema, lung cancer, sinus infections. I used to have a roommate who was a chain smoker and I had health problems because of it. I tried to be nice about it and didn't say anything, but she would get anxious about something and light up in the middle of the night. So it was like 24 hour smoke
 Emphysema, lung cancer, that's all I can think of off the top of my head
 Emphysema, lung cancer, throat cancer mouth cancer
 Emphysema, lung cancer, throat cancer othe3rs
 Emphysema, lung cancer, throat cancer, and that's all I can think of off hand. And there is pregnancy stuff, but I'm a guy so I don't worry about that
 Emphysema, lung cancer, throat cancer, emphysema [P] that's it
 Emphysema, lung cancer, throat cancer, heart disease, and that's all that I can think of right now
 Emphysema, lung cancer, throat cancer, that's about all I can think of
 Emphysema, lung cancer, throat cancer. Gee I wouldn't know
 Emphysema, lung cancer, throat ulcers, mouth tumors
 Emphysema, lung cancer. God smoking cigarettes can mess you up in all kinds of ways
 Emphysema, lung disease (p) I'm not even sure of the name (p) it causes heart failure too (p) asthma
 Emphysema, lung disease, cancer
 Emphysema, lung disease, cancer, etc. (p) lung cancer, throat and mouth cancer (p) can't think of any right now
 Emphysema, lung smoking
 Emphysema, mouth cancer and all that kind of stuff
 Emphysema, smokers lung
 Emphysema, something to do with your esophagus, lung cancer
 Emphysema, throat cancer. It's not good for the heart that's about all I can say
 Emphysema, throat lip, lung cancer, lots of stuff, just about everything
 Emphysema, where you get that hole in your throat. [P] not that I know of
 Emphysema. Lung cancer - I don't know
 Emphysema. Lung cancer, hear disease, hypertension, heart attacks - Other that I not sure
 Emphysema. Throat, lung and mouth cancer - Weakens immune systems - yellows teeth

Emphysema. Uh. Trying to think I know emphysema is one of them. Cancer. (pr) lung cancer. Arteriosclerosis Everything, heart cancer, lung diseases, it affects other people around you, it the worst thing you can do to yourself

Everything, respiratory illness cancer etc, Hardening of the arteries heart disease. A lot of things Hear t disease, lung cancer, emphysema, can aggravate asthma

Heart and lung disease, emphysema, lung cancer, you name it

Heart and lung problems

Heart cancer, lung disease, emphysema, birth defects (p) not to my knowledge, no

Heart conditions, cancer, probably others (p) lung cancer, (p) heart attack, congestive heart failure, anything to do with the heart

Heart disease

Heart disease - lung cancer - um stroke

Heart disease (p) cancer, I guess, (p) I don't know, they say everything is caused by smoking nowadays

Heart disease lung cancer

Heart disease, all types of cancer, emphysema (p) well, lung, brain, lip, mouth cancer, I believe most types of cancer are increased by smoking cigarettes

Heart disease, attacks, uh hardening of the arteries

Heart disease, cancer mouth throat lung, emphysema

Heart disease, emphysema

Heart disease, emphysema, lung cancer, probably other sorts of cancers as well

Heart disease, lung cancer (p) I don't know (p) nope

Heart disease, lung cancer and emphysema

Heart disease, lung cancer, emphysema, low birth weight

Heart disease, lung cancer, only two that come to mind

Heart disease, lung disease

Heart disease, lung disease

Heart disease, lung disease, strokes (p) no

Heart disease, lung prob

Heart disease, um - (p) hardening of the arteries, let me see what else, shortness of breath - also indigestion. Irregular heartbeat - also um, it affects your skin, the pores of the skin clog. And hypertension and um cholesterol, high cholesterol

Heart disease. Cancer, emphysema

Heart disease. Lung cancer. High blood pressure. Stroke

Heart problems - lung cancer

Heart problems, emphysema, - I don't know any other

Heart problems, lung cancer

Heart trouble and lungs (p) no, it just damages the lungs, it causes lung cancer (p) no, not right offhand

Heart trouble, stroke, lung trouble

Heart, cancer, bronchitis

High blood pressure maybe (p) that's it, I guess

High blood pressure, emphysema. Low birth weight in babies, cancer, periodontal disease, um lets see what else, lung disease of other kinds

High blood pressure, lung cancer, heart disease, general bad health

Hmm lung cancer, emphysema, I've heard throat cancer (p) not off the top of my head

Hundreds, heart disease, digestive things, increases your cholesterol, etc

I believe like, it cause like cancer and other different complaints, [what kind?] The worst kind, lung cancer

I can name them all. Emphysema, lung cancer, um bronchitis, um, throat-mouth cancer. There's more but I can't remember

I can't think of any

I couldn't tell you right off (p) nothing comes to mind, I'm just not thinking in that territory (p) oh, I'm sure there is

I do have a respiratory right now that is I'm - The doctor is taking car of. I use an inhaler

I don't know - I'm seventy one and have been smoking for fifty years - I don't know

I don't have any illnesses so I don't know

I don't know (p) lung cancer, emphysema, that's all I know

I don't know [7 answers]

I don't know any

I don't know nothing about that

I don't know some kind of lung disease. Emphysema

I don't know what it's called but lung cancer and I don't remember

I don't know what it's called with you r lungs getting al damaged I don't know any other diseases

I don't know, um, lung cancer and liver disease, that's all I know

I get wheezed out, it causes me to get fatigued when I exercise

I guess cancer [P] throat, lung, I don't know anything else

I guess lung cancer

I guess lung disease

I had cancer (p) cancer of the mouth (p) no, the cancer is dormant (p) can't think of anybody offhand

I have no idea, alot of lung cancer, emphysema, heart problems, hardening of the arteries, premature aging, and poverty (p) I consider poverty a big problem because they take from their households because they are addicted

I have plenty of hem and I know smoking is for them but I don't know it caused them

I haven't encountered any

I know cancer is, I believe (p) well - so many kinds I just say cancer period. I know lung cancer is one. It can cause stomach cancer too, I believe. I wouldn't say it causes colon cancer. (p) no

I know definitely emphysema because I got it. That isn't a very good answer, is it? (p) well they say cancer but I don't know about that, I don't have that. (p) lung cancer, that's what I heard

I know that smoking causes lung cancer and mouth cancer and asthma I think and that's all I know

I know what people say they cause. I know 2 people who were close to me who died of emphysema and they never smoked. I know many people who have died on cancer who have never smoked. They blame cancer on smoking and they could have had it anyway. It is difficult to prove that smoking is the cause of the disease that people dies from. I am a nurse

I suppose lung cancer, emphysema [P] um I don't know, I don't know if smoking is related to throat cancer or not, chewing tobacco is, but I'm not sure about smoking [P] no

I think lung cancer (p) - I don't know

I think there is a wide variety that smoking contributes to. [P] lung cancer, heart attacks, stroke, emphysema

I would have to say cancers are caused by smoking, emphysema, that type of thing (p) lung cancer, throat cancer, mouth cancer, that's probably about it (p) let me see, I guess you can contribute respiratory illnesses, possibly sinuses, that type of thing

I would imagine lung cancer, if its a heavy smoker. And I also think they should know it does and shouldn't get millions of dollars, its been on the packages for years

I would say cancer [P] lung [P] I'm not real familiar with it, that's all I can think of

I'd say cancer, lung disease, heart disease, liver problems (p) lung cancer, colon cancer (p) throat, mouth, tongue cancer (p) no, that's it

Influenza, aggravated asthma
It affects different people different ways
It causes lung trouble, breathing conditions, (p: what else?) Your whole system, it breaks down, even your brain

It would be lung cancer
I've been operated on for cancer, I had a bladder was removed. I have no lung problems yet

Just cancer
Like emphysema, asthma other stuff
Like um, lung disease, lung cancer, mouth cancer, emphysema
Lung cancer my dad died from it that and diabetes
Lung cancer, emphe bronchial infections
Lots cardiovascular, lung, and gosh there's lots, high blood pressure
Lots of cancers, emphysema
Lung and throat cancer
Lung can and respiratory problems
Lung cancer - a lot of other things too - which you
Lung cancer - colon cancer, I think; that's all I can think of right now
Lung cancer - disease heart failure
Lung cancer - I guess that all
Lung cancer - mouth cancer
Lung cancer (**42 answers**)
Lung cancer (p) bronchitis, stuff like that. Any kind of lung damage. (p) no
Lung cancer (p) emphysema (p) heart disease (p) no, that's about it
Lung cancer (p) emphysema (p) heart trouble (p) that's all I can think of right now
Lung cancer (p) emphysema (p) I don't know
Lung cancer (p) emphysema (p) I don't know
Lung cancer (p) emphysema (p) not off the top of my head
Lung cancer (p) emphysema (p) that's it
Lung cancer (p) hard to breathe
Lung cancer (p) heart disease (p) birth defects (p) throat cancer (p) stroke (p) I can't think of anything else
Lung cancer (p) no
Lung cancer (p) no
Lung cancer (p) no, I can't think of them
Lung cancer (p) nope
Lung cancer, emphysema, mouth cancer(or something - I think that's all
Lung cancer [P] emphysema that's all I can think of
Lung cancer [P] I think you can get prostrate cancer too, I think that's about it [P] no, I say more teenagers smoke marijuana than cigarettes
Lung cancer [P] lung cancer mainly cuse m and asthma/

Lung cancer [P] not that I cant think of right now that the only one that comes to mind right now
Lung cancer and bronchial problems (p) no
Lung cancer and heart disease
Lung cancer and heart diseases (p) emphysema, and bronchitis and all that good stuff (p) that's all
Lung cancer and other cancers [P] stroke high blood pressure, heart disease
Lung cancer and that's all I can think of (p) no
Lung cancer and throat cancer. (p) no
Lung cancer degenerative skin tissue
Lung cancer emphysema and some others I can't remember
Lung cancer emphysema birth defects that's all I can think of right now
Lung cancer emphysema blood clots
Lung cancer emphysema heart attack
Lung cancer emphysema heart disease
Lung cancer emphysema larynx cancer
Lung cancer emphysema that's all I can think of right now
Lung cancer emphysema throat cancer sinus cancer
Lung cancer emphysema, can't think of anything else
Lung cancer emphysema, heart disease
Lung cancer emphysema, mouth cancer -
Lung cancer for one, and I can't think right now (p) no, I had a sister in law die from lung cancer and she smoked all the time
Lung cancer gum disease
Lung cancer heart disease
Lung cancer heart disease breast cancer throat cancer
Lung cancer heart disease, that's all I know off the top of my head
Lung cancer I'm sure there's others I just don't know
Lung cancer lip and tongue gum cancer emphysema
Lung cancer mouth cancers
Lung cancer mouth, throat, heart disease emphysema
Lung cancer -nope
Lung cancer that is all I know
Lung cancer that's it
Lung cancer throat cancer
Lung cancer throat cancer,
Lung cancer tooth decay
Lung cancer tuberculosis
Lung cancer, (p) uh - no as far as I know just lung cancer
Lung cancer, all kinds, emphysema, (p) yeah, probably, heart disease (p) no
Lung cancer, and, I don't know. That's about it
Lung cancer, any kind of cancer except for female cancer, cirrhosis of the liver (p) liver cancer, heart attack, (p) that's enough
Lung cancer, asthma, [P] um, yeah, um, well, I don't remember
Lung cancer, asthma, and bronchitis, and chest infections, and I don't know (p) no
Lung cancer, asthma, death emphysema
Lung cancer, bladder cancer
Lung cancer, brain cancer, all types of cancer
Lung cancer, bronchitis and I think you can get mouth cancer, but I thinks that's just from chewing tobacco [P] all I know
Lung cancer, bronchitis, asthma, stupidity
Lung cancer, bronchitis, emphysema, what is there, mouth cancer
Lung cancer, cancer all kinds

Lung cancer, cancer in the mouth
Lung cancer, cancer of the mouth
Lung cancer, can't run too well cost too much money
Lung cancer, cardiovascular disease it negatively affects everything in your health
Lung cancer, chronic gastritis, cancer of the tongue and mouth, heart disease, probably everything (p) just overall health it wears you down, it really affects your whole body actually
Lung cancer emphysema (22 answers)
Lung cancer, emphysema (p) none that I can think of right now
Lung cancer, emphysema heart disease stroke
Lung cancer, emphysema that's all I can think of
Lung cancer, emphysema, and - I'm sure there's more but I don't know
Lung cancer, emphysema, and for ladies birth defects, that's about it (p) no
Lung cancer, emphysema, and that's it
Lung cancer, emphysema, asthma
Lung cancer, emphysema, birth defects
Lung cancer, emphysema, buying another pack
Lung cancer, emphysema, destroys immune system
Lung cancer, emphysema, heart cancer, clogged arteries. (p) off the top of my head that's about it
Lung cancer, emphysema, heart disease,
Lung cancer, emphysema, heart problems, that's all I know of
Lung cancer, emphysema, I can just, all types of cancers, the main one is lung cancer, cancer of the mouth and tongue, you can get those whites spots on your tongue from chewing tobacco, there's others, but those are the main ones that I can think of off the top of my head [P] no
Lung cancer, emphysema, I can't really think of anything else
Lung cancer, emphysema, I don't know any other ones, shortness of breath, (p) no
Lung cancer, emphysema, let me think, chronic coughing
Lung cancer, emphysema, mouth cancer
Lung cancer, emphysema, mouth cancer, and that's all I can think of right now
Lung cancer, emphysema, that all I think of
Lung cancer, emphysema, that's about all that I know of
Lung cancer, emphysema, throat cancer,
Lung cancer, emphysema, throat cancer, circulation in the hands
Lung cancer, emphysema, throat diseases
Lung cancer, emphysema, uh
Lung cancer, emphysema, uh gum cancer (p) um no
Lung cancer, emphysema. Asthma,
Lung cancer, emphysema. Other lung diseases
Lung cancer, emphysema. That's it
Lung cancer, emphysema. That's it
Lung cancer, esophagus cancer, so its all cancer, anyway
Lung cancer, gum disease
Lung cancer, gum disease, that it
Lung cancer, heart attack
Lung cancer, heart attacks
Lung cancer, heart attacks I don't know what all
Lung cancer, heart disease
Lung cancer, heart disease
Lung cancer, heart disease
Lung cancer, heart disease
Lung cancer, heart disease (p) not that I know of or that I can think of
Lung cancer, heart disease is that good enough? There are others bladder cancer, mouth cancer, throat cancer, and emphysema
Lung cancer, heart disease, anything having to do with the cardiovascular system pulmonary disease chronic obstructive pulmonary disease
Lung cancer, heart disease, circulatory problems
Lung cancer, heart disease, emphysema
Lung cancer, heart disease, emphysema
Lung cancer, heart disease, emphysema (p) that's enough
Lung cancer, heart disease, emphysema, and so forth, there's a lot of them
Lung cancer, heart problems (p) heart attacks sometimes (p) emphysema (p) offhand no
Lung cancer, high blood pressure, anxiety that's about all/
Lung cancer, I don't know
Lung cancer, I guess that's it
Lung cancer, I think. (p) um - I don't know, it makes your breath smell bad
Lung cancer, its so nasty
Lung cancer, just like breathing problems, like if you have asthma or something
Lung cancer, larynx cancer, throat cancer that's about all I can think of right now
Lung cancer, like heart diseases. Nothing I can think of right now
Lung cancer, mouth cancer
Lung cancer, mouth cancer
Lung cancer, mouth cancer throat cancer and emphysema that all I can think of at this time
Lung cancer, mouth cancer, emphysema
Lung cancer, mouth cancer, throat cancer, that's it
Lung cancer, sinus problems, goodness, guess that's pretty much it
Lung cancer, skin cancer, emphysema those are the ones I have names for
Lung cancer, something in your throat can go wrong, I guess
Lung cancer, that' all I know
Lung cancer, that's all I can think of off hand [ae] um, I guess respiratory problems, hard to breathe, harder to play sports, stamina [ae] not that I can think of
Lung cancer, there's throat cancer, high blood pressure and high cholesterol
Lung cancer, throat " asthma, emphysema
Lung cancer, throat c. Emphysema
Lung cancer, throat cancer
Lung cancer, throat cancer
Lung cancer, throat cancer, emphysema, congestive heart failure
Lung cancer, throat cancer, heart disease contributes to pregnancy complications
Lung cancer, throat cancer, mouth cancer, emphysema, there's another one that you cough up blood, but I don't know what it's called (p) no
Lung cancer, throat liver, mouth cancer, emphysema
Lung cancer, throat, mouth various cancers
Lung cancer, tuberculosis
Lung cancer, uh mouth cancer, uh (p) dead cells.
Sicknesses from clogging your lungs up with that green gook, breathing problems
Lung cancer, um, heart disease - and - bronchitis

Lung cancer, umm cancer of the mouth. Not that I can think of

Lung cancer, un I can't think now emphysema

Lung cancer, weight gain, browning of the teeth

Lung cancer, whole bunches of cancer your throat falls out

Lung cancer. [P] probably heart failure. That's all I can think of right now

Lung cancer. Asthma

Lung cancer. Cancer. That's it

Lung cancer. Heart disease. Cancer (pr) don't know

Lung cancer. Throat cancer, mouth cancer, tongue, heart, liver there is a lot - I know there is more

Lung cancer. Throat cancer. Emphysema

Lung damage

Lung damage, gum infections, emphysema

Lung disease - (p) - disease of the lung - I don't smoke I never smoke

Lung disease - heart problems

Lung disease (p) you can get emphysema (p) I'm not sure (p) diseases of the throat, (p) no

Lung disease and heart disease

Lung disease cancer all kinds of things

Lung disease emphysema

Lung disease heart problems mouth cancer

Lung disease, (p) I know a couple that lost their throat, they have no voice box (p) mostly that lung diseases, like tuberculosis

Lung disease, cancer,

Lung disease, cardiovascular disease, those are the two main ones, oh and cancer, [what kind] cancer of the lungs and the throat

Lung diseases from tar and psychosomatic diseases, the brain and damages the liver

Lung diseases, emphysema

Lung problem, emphysema

Lung problems

Lung problems

Lung throat tongue cancer heart disease - that's all

Lung trouble

Lung, heart, I guess lung and heart is it. Cancer and emphysema

Mm lung cancer I would say. (p) uh I think that's it yeah

Mm lung cancer, it's easier to get sick. (p) anything that has to do with lungs

Mouth cancer lung cancer heart disease emphysema

Mouth cancer, lung cancer, emphysema. (p) I don't know, uh - probably, but not that I can think of

My god bronchitis, throat cancer, emphysema, it helps with heart attacks. Also lung cancer. Not right off hand

No idea

No idea

None

None

None

None

None

None in particular (p) no, because I don't believe it

None that I know of (p) that's it

Not sure

Nothing

Nothing I know of by smoking cigarettes

Numerous, lung cancer, hardening of the art3eriew, stroke heart disease that's just off the top of my head

Numerous. Emphysema and many cancers

Of course cancer, emphysema, (p) lung cancer, if it gets into the lymph nodes it can get into the brain, but primarily lung cancer (p) those are the ones that come to mind

Oh cancer (p) lung cancer, mouth cancer, throat cancer (p) emphysema, heart attacks (p) that's about it

Oh gosh, I guess cancer and emphysema [what kind of cancer] I don't know just cancer I guess

Oh it's not a list? Okay, cancer (p) lung and others, I think it causes all kinds of cancer, emphysema and other lung disorders, and gum disease and tooth disease. I think it probably affects certain kinds of cancer of the lower bowl, it may in fact exacerbate other illnesses, vascular diseases. I think that covers a lot. I believe it causes stomach cancers and causes chemical and physiological changed in the brain and nerve pathways

Oh probably emphysema,(p) lung disease, lung cancer I guess

Oh, cardiovascular disease is number one (I'm in nursing school) and cancer [what kind] lung cancer

Oh, lung disease, I know that. (p) uh - cancer (p) uh - I don't know

Ok lung cancer, emphysema, bronchitis, throat cancer, heart problems, arteries (p: what about the arteries?)

Oh it's hardening of the veins and plaque that blocks the arteries, and gum disease

Ok lung cancer, several types of cancer, heart disease, emphysema, asthma is aggravated by it. Right off the top of my head I can't think of anymore

One with foienids

Possibly lung cancer

Probably cancer

Probably lung cancer (p) no

Problems breathing, you could die, lung cancer that's the gist of it really

Pulmonary diseases and cancer

Quite a few lung cancer, throat, liver and everything else in between

Quite a few, respiratory, depression, digestive, also nerves, that's about all I can think of right now, it affected every sense in their body when I watched him die, the depression, respiratory, nerves, anxiety, temper

Respiratory illnesses

Second hand smoke, my mother died from emphysema. And I have emphysema because my brother smokes. That's why I hate it. (p) well I don't know exactly, cancer is related to smoking? Maybe the mouth

Several, coronary heart diseases, lung cancer, and probably colon cancer, throat cancer, mouth cancer (p) nose cancers, that's about it

Shortness of breath, heart disease, bronchitis

Smoking is not harmful to your health

Stroke, heart problems. Respiratory problems lung cancer

Strokes, cancer, emphysema, heart attacks, (p) lung cancer (p) no

Supposed heart problems and lungs that all

That emphysema

That's hard hardening of the arteries and stroke related

The one I hear about most is lung cancer. [P] asthma and emphysema

There are so many, all kinds of respiratory illnesses like cancer and emphysema, there are too many to name

There's a buildup in your lungs, it turns them all black then you can't breathe anymore, it gives you bad breath and it turns your teeth yellow (p) believe it's lung cancer and then you can get throat cancer, just in general you have a better chance of getting different types of cancer

There's uh others lung disease, there's mm others a lot of different cancers I just can't think of them all, there's heart disease, that's all I know [P] others cancer of the mouth, throat [P] not that I can think of

Throat cancer, emphysema, lung cancer

Throat cancer, lung cancer heart disease

Too many to list, emphysema, heart disease, lung cancer (p) I can't think of anything else, I know there's a lot more than that

Trying to quit for 3 weeks. This is the first cigarette in 3 weeks. Now it's all good. Besides the fact I'm not spending the money on cigarettes

Tuberculosis, lung cancer those are the ones I just think of emphysema, pneumonia

Uh - cancer is the only thing I can think of--- oh, emphysema. (p) lung cancer

Uh emphysema, lung cancer, throat cancer (p) uh none that I can- uh asthma, mouth cancer

Uh lung cancer (p) um nope

Uh lung cancer, (p) uh high blood pressure, heart attack and stroke

Uh lung cancer, throat cancer, uh, what else? I don't know, bronchitis maybe

Uh, lung cancer, that's it, that's the only one I can think of

Uhh - lung cancer, emphysema, oh for women birth defects and low birth weight. (p) no

Uhm emphysema, lung cancer, mouth and throat cancer. (p) that's all I know

Um - any kind of lung cancer, heart disease, smoking can raise your blood pressure. I mean there's a number of things. (p) is that sufficient? That's about it. Any kind of heart problems

Um - cancer (p) lung cancer (p) emphysema, - that's pretty much all I can think of

Um - cancer, diseases of the heart, it might promote common illnesses like pneumonia or the common cold, I'm really not sure. (p) lung cancer mainly. (p) uh, nope

Um - emphysema - (p) and cancer (p) lung cancer (p) - well I guess it's an addiction, I know it's an addiction, and that is the biggest reason people smoke

Um - I can't think of it - STDs? (p) I can't think of them

Um - I don't know any names of them, all kinds of lung disease, and that would be all I could think of, mouth cancer

Um - lung cancer, and um - probably cancers of the mouth from tobacco. (p) I'm not really sure

Um - lung cancer, emphysema, heart disease, osteoporosis I think, - what else? High blood pressure (p) um - I think other cancers too besides lung cancer (p) um I think throat cancer, neck cancer, mouth cancer

Um - lung cancer, lip cancer, throat cancer, and I think skin cancer but I'm not positive on that one. (p) no

Um - lung cancer, uh throat cancer, mouth cancer, um - shortness of breath. (p) emphysema

Um - lung diseases, I don't know. (p) lack of breath, lack of wind. Um high blood pressure

Um - what is that, emphysema? Lung cancer, - um sometimes people easily get bronchitis. (p) no, just more occasions of the common cold

Um cancer (laughter)(p) I don't know the different kinds. (p) um - smoking cough, I don't know is that an illness?

Um cancer (p) lung (p) no

Um cancer [P] lung cancer, mouth or lip cancer that's probably it [P] no, emphysema [P] not that I know of

Um cancer (p) ah lung (p) uh I'm not sure

Um cancer, respiratory diseases. Lots of cancers [P] lung cancer, throat, mouth, tongue cancer [P] I don't know

Um emphysema, - (p) and lung cancer. (p) no

Um emphysema, lung cancer, that's all I can think of off the top of my head [P] no

Um like illnesses like lung cancer heart problems

Um lung cancer [P] not that I can think of right now

Um lung cancer, mouth cancer, emphysema, um - (p) uh - I can't think of any others

Um lung cancer, um - (p) no

Um lung cancer, um let's see - I'm not sure what else but definitely that one

Um probably colds (p) um and pneumonia bronchial problems, all respiratory problems, and asthma

Um skin cancer, I don't know [P] um your throat, you know that girl on TV she was model and she can't speak anymore, she has to speak through a tube, that kind of thing, emphysema [P] no I can't think of it right now

Um, basically I think the main one is emphysema. Cancer (pr) lung. Throat

Um, bronchitis, I guess. Lung cancer

Um, cancer [P] lung cancer, [P] I can't think of anything right now

Um, heart disease, lung cancer, different things like that

Um, I don't know

Um, lung disease, I know there's a lot, but I can't think of them

Um, pretty much everything considering there are over 100 carcinogens in them; and that disease that starts with "e" all kinds of cancer, [what kind] lung cancer

Um. Lung cancer. Emphysema. Let's see here. Oh. (pr)

Um. Various types cancer. Damage to your organs. (pr) lung cancer. Gum cancer

Umm lung cancer - smokers disease I can't remember what it is called

Usually cancer in the lungs, cancer in the throat, cancer in the chest, (p) that's the only thing I can think of

Usually emphysema, lung cancer and a lot of other things too, kidney and heart problems. I have been remarkably healthy

Various cancers-p lung, nose, throat. Heart disease probably

Very numerous the one that comes to mind is lung cancer and mouth cancer. Heart disease also would be in there

Well emphysema oh dear uh asthma and that lung disease pleurisy and all kinds of stuff, heart problems too

Well the obvious lung and throat problems

Well there's lung cancer that's for sure and emphysema that's the only thing I can think

Well there's quite a few, chronic lung disease, lung cancer, emphysema, vascular disease, (p) we'll leave it at that
 Well um heart disease and lung cancer (p) not that I can think of right now
 Well you can get, cancer, lung cancer
 Well, emphysema, lung cancer, heart disease
 Well, lung disease I'm sure, emphysema (p) oh probably lung cancer (p) not that I know of

Where do I begin, all types of cancers ,emphysema, asthma, heart failure, heart attack [P] lung cancer, higher risk for breast cancer, mouth cancer [P] um, not that I can think of
 Who knows
 You can get cold very easily I suppose it can affect your heart they say they can blame everything on smoking
 You got chronic lung disease, cancer of the lung, other organs such as the mouth, bladder, and esophagus

Q:q3a

[IF SMOKER] Do you consider yourself a smoker? [IF NO]

Q:q3b

Why not? [RECORD VERBATIM] TYPE EXACT RESPONSE BELOW

Because I do it socially, not as an everyday basis
 Because I do it very rarely
 Because I don't smoke daily
 Because I don't smoke on a regular basis
 Because I don't smoke very often it is very occasional
 Because I don't carry packs around like you used to. I don't smoke one every day
 Because I don't do it often at all
 Because I don't do it that often
 Because I don't have many, only a couple every once in a while, not like every day
 Because I don't regularly
 Because I don't smoke every day
 Because I don't smoke that often and I don't feel the need to have a cigarette
 Because I don't smoke, I've had one cigarette in the last month
 Because I just quit (p) a week ago tomorrow
 Because I just tried it recently and I think it's very disgusting. (p) no
 Because I only had like one
 Because I only smoked once (p: you mean you only smoked once in the last thirty days?) And it's not like I smoke everyday. (p) no
 Because I really do it, just like when I'm out drinking or something
 Because I'm hardly ever smoke
 Because I'm not addicted. I don't buy them. I don't need them. Just socially
 Because like sometimes when I'm out with my friends maybe I'll have a cigarette or two on the weekend and that's about it. Sometimes I don't even smoke at all on the weekends
 Because that is the only one I have ever smoked and I don't intend to smoke again
 Cause I don't buy any cigarettes and I only smoke on the weekends
 Cause I don't do it like normally, and I never have my own, and I never actually want to do it, I don't need to
 Cause I don't do it often
 Cause I don't smoke all the time, once in a while
 Cause I don't smoke very often
 Cause I quit
 Cause I quit 10 years ago I just had one the other night at the bar
 Cause I quit a couple of days ago, trying to
 Cause it's not every day, like it's maybe once or twice a week (p) nope, I've never bought cigarettes
 Cause it's pretty gross, nasty habit (p)I smoke occasionally, but it's not something that I'm addicted to

Cuz
 Cuz I don't buy them I go 2 or 3 days without smoking. I only smoke 4 o5 a day when I do
 Cuz I don't do it regularly
 Cuz I don't that often
 Cuz I don't waste all my money on something that is dumb I don't do it very much
 Cuz I quit. I've quit I've tried. I've had one I the last 30 days
 Cuz it was one of the first ones I had a week a ago
 Cuz its only occasionally
 For the fun of it
 Go on trips and don't smoke for two months
 Haven't smoked enough
 I am quitting
 I do it occasionally, that is socially, not everyday
 I do it once in awhile
 I don't buy I just smoke sometimes in school
 I don't buy it I just smoke with friends
 I don't consider myself a smoker because I don't smoke
 I don't do a pack a day just once in a while
 I don't do it all that much
 I don't do it all the time and I don't feel like I need it./
 I don't do it enough
 I don't do it often
 I don't do it often enough to make myself that (p) a smoker
 I don't do it often enough. (p: how often do you smoke?) Maybe like a cigarette a week maybe, not even
 I don't do it very often
 I don't smoke often
 I don't smoke ver often
 I don't that often
 I don't think I'm addicted
 I don't want to be a smoker. I smoke, but I'm not a smoker. I don't want to be long term on it
 I just quit
 I just quit a week ago! (p) I'm doing okay, and thank god I'm doing it
 I just smoke about a pack a week
 I just smoke when I go out
 I never have until just a couple of weeks ago. (p) smoked a cigarette before
 I only do it when I drink I never buy packs
 I only smoke for an oral fixation I quit when I thought I was getting addicted
 I only smoke two
 I quit last week and I haven't smoked since
 I smoke 1 a day
 I smoke about probably 3-4 a day - that why

I smoke black and miles (p) it's a cigar. (p) well I just - I'm a smoker	It's more of a social thing not usually once or twice a month
I smoke maybe twice a week	Just because I don't tat much
I smoke once in a great great while	Just quit
I smoke only 3 a day	Mmm social. (p) At social gatherings, or while drinking,
I think 'cuz my both grandparents on one died from in and I	entertainment, extra curricular activities
don't want to have the same thing happen to me	No not necessarily. (p) cause it's not a consistent thing
I'm very. I moderation I guess	No very often
It is not a habit	Not my hobby
It was just a one time thing. I don't do it regular	Not often enough
It was only one and it was a long time between the last	Not on a regular basis. [P] uh
one	Not very often
It's just a rare occasion	Occasional thing-smoking
It's just a social thing I guess	Recreational maybe, maybe two or three a month

Q:q43

[IF SMOKER] If you had it to do over again, would you start smoking?

[IF NO] Why not? [RECORD VERBATIM]

(sigh) 'cause I don't like it, it's not good for me. (p) it causes too many health problems	cancer, she went through chemo and is stabilized but she also has emphysema and she always gotta be hooked up to oxygen and stuff, she can't breathe
A lot	Because I know its not good for you and I feel better when I don't smoke
Addiction risk	Because I know that it's not healthy to do, but it's a habit, I don't need one before classes or in the dorm room, but when I'm out drinking I need to have one in my hand
After a while you cant quit I usually chew	Because I know the dangers and what it can do to me
Ah - cause it really hurts others around me	Because I know what it does - al the illnesses - There's nothing good out of it
All the things that can happen	Because I know what it leads to and everything like this, and it's addictive, and if I know what I know now I never would have started
Aw man think of all the extra money I could have had. I can't even breathe as easy any more	Because I might die (p) no
Bad choice	Because I saw what it did to my mom (p) it was a lung disease and they told her that if she quit smoking she would live a while, but she didn't quit and she passed away when she was 50, and she was in a lot of pain and couldn't do nothing for herself
Bad for you	Because I would have this problem today, the smoking Because I'd be better off now as far as my wind. I'm getting out of breath real fast
Bad habit, me personally I was a pretty good athlete, and I picked up smoking, and now I can barely run a mile without stopping and taking a breath, people say it doesn't affect you, but in the long run it gets you	Because I'm loosing all my money
Because I'd rather not feel dependent on it anymore	Because I'm really into sports and stuff and I don't want to get messed up
Because cigarettes are really really bad for you, mental and physical (p) cause you know what it's doing to you, everybody knows what happens, but you still keep smoking because you want to, and when you do try to quit you just get kind of whacked out mentally	Because it affected me a lot in sports, school and stuff, spending money away, that's about it. I spent a lot of money on it and it really wasn't worth it
Because I can feel serious impacts on my health from it and I can't stop	Because it costs money
Because I can't quit. Back when I was 10 or 11 it was the thing to do and now I can't quit	Because it dangerous, costly
Because I did it according to what my friends were doing. And if I knew then what I know now, I *wouldn't*	Because it hurts (p) mood swings, it gives you chest pains, does all kind s of thing with your sinuses, it clogs up your throat
Because I don't even know why I do it (p) no	Because it is a bad health risk and very addictive
Because I don't like the long term effects and it is an expensive habit that is hard to break. I don't know how true it is but if there were additives to make people more addicted, but that is just one more reason to not smoke	Because it is bad for your health it is something bad to start and it hard to stop
Because I don't need it (p) I'd be doing better if I didn't smoke (p) health and it costs money	Because it is costly, a nasty habit and life threatening
Because I got a lot more addicted than I thought I would and it is expensive	Because it is definitely unhealthy
Because I have asthma and it hurts me (p) just the health reasons	Because it is expensive and it is bad for you and tastes bad
Because I have health problems	Because it is hard to quit
Because I know how hard it is to quit	
Because I know it's bad for my health, and one of my grandmothers died from it (p) from smoking (p) um - lung cancer (p) and my other grandmother has lung	

Because it is so addictive. It is not something you can do just do a few times. Its just like any other drug people have trouble getting off of like cocaine and heroin

Because it is straining of the lungs

Because it is too expensive

Because it is very difficult to stop and it is emotionally, psychologically, and physically addicting

Because it ruins your health, it smells, it burns holes in furniture your car. And if you're athletic you can't. You're out of breath

Because it slows me down, but there's nothing I can do about it because I've been smoking so long it's already taken its affect

Because it slows me down, it makes me feel icky on the inside, and my friends they don't want me to and I am concerned about them

Because it sucks

Because it to habit forming and it is too hard to stop

Because it's a bad habit

Because its a strong addiction, and the taste is kinda yucky but I still do it

Because it's addicting and it's not good for me, I've had heart surgery and quit for 4 months and started up again

Because it's an addictive problem

Because it's bad for my health. It's expensive and a lot of people don't like it that I hang around with

Because it's bad for you (p) no

Because its bad for you and addicting and it make your throat sore

Because its bad for you and gives you those diseases and later in life its hard to breathe and my mom has emphysema

Because its bad, addictive

Because it's become a major problem with athletics (p) yeah, it has hindered my ability for endurance (p) no

Because it's causing my asthma to get worse and I can't run because I can't breathe, and it's just a really bad habit

Because it's expensive

Because it's gross and it's bad for you and you smell

Because it's messed me up physically (p) coughing, shortness of breath when I run, and not much energy, and always smelling of cigarettes

Because it's not good for my health, I know that. That's the only way I can answer that

Because it's not good for you (p) it can kill you and no females would like you if you smoke, because it gets on your clothes and stuff like that

Because it's not worth it - it doesn't do anything for me

Because it's really gross

Because it's unhealthy (p) no

Because it's very addicting, it's expensive, the health problems, it smells and it's almost impossible to quit

Because I've already had a heart attack from cigarettes, I know it is ruining my health, it's killing me

Because I've seen what happens, and I wouldn't go through it again

Because knowing what I know now that it is so addicting and I know about the health problems. I knew before but now I really know. Can I start over. Knowing now about how addictive they would be. I did not think it would be this addicting

Because my parents smoke and that is reason I got hooked but I see its stupid

Because of all the health hazards that it has and what I am going through now trying to quit

Because of health and sciences

Because of the addiction and I think it's an awful habit (p) health reasons

Because of the addiction

Because of the different things it can do to you and affect your life

Because of the expense, health risk, and just general (p) I don't know

Because of the health risk and the cost

Because of the health risks and everything (p) the price of them, that's about it

Because of the health risks and stuff, and because of the money (p) no, the health reason is the big one

Because of the health risks and they cost too much money

Because of the health risks involved, first reason, second reason it's gross the way it turns your teeth and your body and your clothes, and breath, the third reason is the money, what it costs

Because of the health risks

Because of the level of addiction

Because of the shortness of breath (p) no

Because of the way my health has gone no energy there's a hundred different things. My voice changed, my addiction. P. I get a headache when I stop, it is so hard to quit-the craving never goes away

Because of they are really addictive and I don't want to keep smoking

Because of this survey

Because right now I am paying the consequences I am very ill with lung disease and a heart condition. My lungs are bleeding

Because see how healthy I would be, my lungs were and stuff (p) how healthy my lungs would be right now if I didn't smoke (p) my grampa's been smoking since he was 6 or 7, and he's like 65 and he has a very bad cough right now

Because the effect it has had have been negative

Because the mm they don't tell you that you get cough and the flue a lot worse than if you didn't smoke. I play sports and its not good for sports. But if you party a lot of male teenagers do it

Because the side effects it can cause like cancer (p) it makes you tired quicker (p) uh uh

Because there's really no point (p) well, if I'm not addicted then it's pointless to do it then (p) so I can stay healthy

Because they are not good for your health (p) mainly health reasons, plus it's a nasty habit

Because when I did smoke, I just, everything I did, when I played sports I ran out of breath easily, I coughed up phlegm in the morning and I never felt good. Now I feel good inside, I'm healthier, and I'm not sick as much

Because you are never rid of it no matter how long you live even if you do quit they still die for a cigarette

Because - Its awful not one good thing about them

Cause the stuff I do if I run a lot I can feel the lack of performance

Cause I cough too much and I can't breath now, and it costs a fortune, and it's addicting

Cause I don't feel good I know it's unhealthy but its a real addictive habit	I don't like being addicted to something I don't know
Cause I don't like smoking. (p) uh it costs too much money and it's hard on the lungs, and it makes you cough a lot and cough up phlegm. (p) no	I don't know it is dumb and pointless I don't know too costly I don't know, it's stupid (p) no
Cause it harms your body	I don't like what it does to my lungs, and I have had pneumonia twice in the last year. And bronchitis once and I have a daughter with asthma
Cause it is not very healthy	I don't think its good for you, dear
Cause it was stupid for me to start, there are too many health problems and risks involved, just because I'm healthy doesn't mean I'm going to stay like that	I don't want to smoke
Cause its addicting, I don't like what it does to my health and it costs a ton of money	I find what it can do to you I didn't think it was that its bad
Cause its to expensive and not worth it	I get tired of running to the store to buy them pain in but I guess not because of my health. (p) the inconvenience and it's not healthy
Cuz I know its not good for me	I had no idea how hard it would be to quit, how expensive and about the health problems
Cuz I can't run from here to the other side of my house without being out of breath	I had to give up sports
Cuz I know if I keep on smoking I will get addicted to it	I have suffered a lot trying to quit
Cuz I watched my father suffer from it	I just am getting older and am feeling the effects of this stuff when I go to do any kind of sports activity, when I get up in the morning I just feel congested
Cuz it does gives you shortness of breath I feel like I need more air in the morning when I run - little stuff like it	I just wouldn't
Cuz it messes with my breathing. I have trouble breathing at night and when I wake up and stuff	I know it's not good to do but I don't do it enough for it to be a problem
Cuz it sucks - the money. its nasty and its unhealthy and there are a million reasons	I know what hoe it makes you get hooked I man it takes time and money
Cuz its bad for you and expensive	I notice a difference. I was in sports always however now slowly but surely I have effects of it
Cuz its expensive and the health effects that you can't control if you smoke	I realize it's not good for you
Cuz its not the same. I am always out of shape its cost so much money	I saw my dad dying. My oldest son can't stand cigarettes I wish sometimes I didn't smoke
Cuz its not worth it the risk the health hazard	I started because my teeth were - bad and my dads teeth were fine and he chewed
Cuz it was cool when I was young now its now cool and its not healthy now when something goes wrong I am dependent on it, I do enjoy a cigarette in the morning I do enjoy it I wish I could only smoke when I enjoy it, I am afraid I am going to weight a lot gain a alot of weight if I stop. My kids hate it	I started thinking it was cool now I don't think it is cool I think it's. People say it's social, but I think it's anti-social, it's a bad habit to have, and it hurts people in the long run and they don't realize it
Cuz of the health risk	I was in the service. Stress causes some smoking. In a stressful situation people tend to use cigarettes as a crux. When I go a long drive I have cigarette when I get done
Cuz of the health risk. Its burning money so many reasons	I would be a better athlete and I have asthma I would be driving Cadillac now the money thing I would be saving a lot of money I would just choose not to, I feel better if I didn't I would like to stop but I can't. I didn't know it was dangerous I would live longer
Cuz you feel the effects in throat in, lungs short on breath	I wouldn't smoke. They are a waste of money and bad for your health
Did it for no apparent reason	I wouldn't want the addiction anymore
Dumb habit	1) it stinks up car and house. 2)I don't know
Dumb there is no point I will drink something if I want to satisfy my oral fixation	I'm an addict and I would rather not be an addict and I don't want to quit because I am addicted. If I had it to do all over again I would choose not to be an addict
Expensive - I could the money for other things	It doesn't have many complications, if I do smoke I might have one to two a day and then there would be weeks where I don't smoke at all. (p) I guess health issues - maybe a type of cancer prevention
For health reasons	It has disadvantages to your health
For one I get a wheeze and run out of breath and the diseases and all that	It has-- I don't smoke much, but it has made me short of breath when I do
Health	It is a nasty habit
Health reasons, and money (p) hell, it costs too much, it's just like burning your money up	
Health, [P] so that I can be there for my kids when they get older and do things with them now without getting short of breath. And the smell	
Heath issues	
Hell no, look at me I', showing the scars on me	
I am addicted can't give it up	
I am short of breath, its hard for me to breathe	
I cant run or anything any more	
I'd be more guaranteed to see my kids grow up. I don't know if I will see my kids grow up	
I didn't know about al of the negative stuff that comes up later on	
I don't know	

It is a terrible habit
 It is a very nasty habit
 It is just something you don't want to do
 It is too expensive, I feel that the choice to smoke should be your own choice. I feel that the government should not have no control. I still would not choose to smoke if I had the choice
 It is very dangerous and smells and taste nasty
 It kills
 It makes the colds last longer
 It stinks in more ways than one
 Its a bad habit it bad for your health
 Its a disgusting thing
 It's a nasty habit
 It's bad for you and it is an expensive habit
 Its bad for you
 Its bad habit to get into
 It's bad. It was a stupid move
 Its cost too much it is something that you have to have. It is not fun to be addicted to anything, I went to our Christmas party where there was no smoking and - It was hard
 Its costly
 Its dangerous to you health. It makes your breath stinks. It hurts the people around you too. But I'm gonna do what I want to so and I'm stupid - I do it now day by day - each day and a time
 Its disgusting, it makes causes a lot of danger like incurable disease, disgusting habit
 Its dumb
 It's expensive it's not good for my health
 Its gross
 Its hurts your lungs and besides and it stings. Teeth turns yellow
 It's just a dirty filthy habit with heath risk
 It's just a hassle and a waste of money, and the smell is unbearable (p) trying to get them [is a hassle] and trying to get away for it
 It's just a hassle
 Its kind of stupid
 It's not beneficial (p) it causes serious health problems that could be prevented
 It's not worth it (p) causes problems with coughing and health, I didn't realize it when I started
 Its not worth it. I look back on it. I don't know how people start it in the first place. Its' nasty and not very pleasant at the time. It's little bit crazy. It's a little hard to explain or guess why. Peer pressure or something like
 It's really bad. Just immaturity I guess
 Its really hypocritical. I hate the smell of cigarettes .they stink and its really unattractive. It makes your teeth yellow and you can't breathe its awful
 Its stupid it doesn't amount to anything. I put my health at risk
 Its taken atoll. I can feel the toll on my health no one wants me around them
 It's too addictive, it's too hard to quit. (p) that's it
 Its too expensive and the health risks are -, When I started smoking they didn't have the information we have now
 Its too hard to get over, I can quit other things
 Its too hard to quit
 It's too hard to quit, it's too expensive, it's too dirty, all of them (p) no
 Its unhealthy and expensive and I don't think it is a wise choice
 Its unhealthy, its stinks, it makes you feel bad. I don't like the fact I am addicted to something
 It's unhealthy
 It's unhealthy. (p) it's not good for you. (p) no
 It's useless. It gets you sick. It takes your money. There's nothing positive about smoking. I was trapped
 I've been educated since then
 Just a stupid habit
 Just because a lot of people think they won't get addicted but they do. And it's a dirty habit. It makes you smell
 Just because it was basically because most of my friends did. And now that I know the dangers of smoking it is not worth it
 Just cause of the health risks involved
 Just potentially could become a very bad habit
 Just so I could have that extra breath
 Just the constant feeling of needing something. I know it's bad for me
 Knowing what I know now
 Mainly it how much money it costs and the living with the fear that if I don't quit I might end up with lung cancer or something where I couldn't breathe
 Mainly just the money factor
 More of a pain than its worth
 My biggest reason is it's a dirty habit: ashtrays, nicotine on the walls and windows. I can imagine what is in my lungs
 My health reasons. It's not politically correct, you can't really do it any more. Health for the family. That's about it
 No I'd quit. I wouldn't even start it. It's not good for you, I'm finding that out. (p) I have trouble breathing at night
 No! (laughter) all of the money I spent I could have been using on other things. (p) I would have saved money on clothing, probably had better dental hygiene; I think it's taken more than it's given
 Nothing good comes from it (p) not really, basically there is no pluses, it is expensive and it just kills you
 Now I have kids and I know the problems that can happen. I would be rich if I had all the money I spent on cigarettes
 Oh the consequences of smoking
 Oh um - well besides knowing it can be harmful to you, I'd say I just wished I didn't have the habit, I don't know. Because they are offensive to people
 Oh, it's a dirty habit (p) it's expensive (p) no
 One for the health reasons, and two for the expense, those would be the two major factors, but health would be the most important one
 People told me when I was bumming a cigarette friends said don't do it you don't want to start but I did
 Pointless [P] no
 Probably because the financial impact involved, a change in how I feel about exercise and health. Things like that
 Save the myself trouble
 Seen too many people die
 Shortness of breath, blood pressure raised up and down constantly, bad breath stained teeth. I think I could be taller, I think it stunted my growth
 Smoking is just a pleasure, having a drink at night

So I wouldn't get addicted. (p) no
Takes up too much time. It's a hassle
That's how I lost my husband
The addiction, I never thought it would be as addictive as it is, but now that I do smoke I find that it's a lot harder to quit because of being the lifestyle of a college student (p) that's about it
The cost and the diseases I can get [P] um, probably the second hand smoke for other people around me when I'm smoking
The damage that I've probably done to my own body, and the addiction, I never knew the addiction would be this serious
The damage it has done now to my - Health issues
The funny smell the bad breath
The health issues
The health and money involved in doing a socially unacceptable thing
The health effects and the money I could have been saving
The same reasons I gave before
Then I wouldn't have to face the rigors of quitting (p) lower health risks
Then I wouldn't have to quit
There is no reason to smoke
There is serious risk to health - cost alot - Its gross - its stinks and its disgusting - And its not legal I'm a minor
There's not really a pointing it, it's bad for your health, it's a bad habit
They stink. They cost a lot of money and my boyfriend doesn't smoke and I probably never would have started if brother had not pushed them on me
Too expensive
Too many health risks
Too expensive
Too expensive (p) can't breathe when you run (p) not very socially acceptable, that's about it
Uh because of the addiction
Uh health reasons, shortness of breath, it's expensive, now you hear more about the diseases that are caused by it-- moroso than twenty years ago when I started smoking
Uh I think it's a degrading habit. (p) um I think it's a substitution for lacking of something else. (p) I think you can become addicted a lot quicker than you think you can
Uh I was just trying it. (p) uh - I guess I just wanted to experience it? I'm not really sure
Uh slows you down not good for sports
Uh the money and the health issues
Uhm - because of the knowledge that I have now about it. (p) um because at twelve I didn't know about the effect smoking could have on me, so I wouldn't do it over again if I had that knowledge
Uhm - I don't know. (p) no. Well for one, it's expensive. (p)
Um I just wouldn't [P] um my grandpa died from emphysema, both of them did, one of them had lung cancer

Um it's a very addicting substance and it's completely unhealthy and it was unfortunately completely promoted at that time. If that hadn't happened, then maybe I wouldn't be smoking
Um it's dangerous, the health risks that come with it. (p) just mainly people around you don't like it, people you know
Um money and health reasons
Um way too much money, money factor. (p) I'm spending pretty much a pack a day and then it went up, I'm spending way too much money on cigarettes
Um, because now I know the consequences
Um, been smoking for about 21 years and I can just now feel that it is bothering me - its very tough to quit
Um, I don't know
Um, it would save money
Um, too much money
Um - because it's easier to say that you don't smoke rather than "I do sometimes" when someone asks you
Um - cause I realize that - smoking is bad for you and stuff which I didn't then and it costs too much money. (p) oh - when I was about eleven and a half
Um - well I am young and I want to raise my child, I look forward to watching him grow up. I don't want my son to not have a mother
Well because they are bad for you they control you cigarettes are like a drug I have let them do that to me- I have a Cadillac and every time I show a house I have to spray my car
Well I don't it has much of an effect on you as a youngster, but when you start to get a few years on you, you start to notice the effects of smoking: what it does to your clothes, your home, and its disturbing to realize you have just 2 cigarettes to last the night and that won't be enough
Well its, its not really, I don't do it with friends, its like my get away. When I'm really stressed out, its my way of getting away and thinking about things
Well, because it's bad for you, and when I was young, they laughed at you if you didn't smoke (p) this was a long time ago, it was a fashionable thing to do, if you didn't you weren't in the in crowd, and in the movies everyone smoked, so that's what influenced people at that time
Well - I wish I had not started - its too expensive
What I know now I didn't know then - The health problems I know now
When I started smoking, I graduated from h.s. in 1945 and we didn't know the dangers of nicotine and tobacco and smoking, I was 19 when I started smoking, we didn't know the dangers, probably if I did, I wouldn't have started
Why ? Because I understand the risks now more so than when I started
Why not? Uh - because of the health reasons, because of the odors, because of the expense - (p) I guess that covers just about it doesn't it
With the health problems that is coming out now from smoking

Q:e1

Thank you very much for talking with me. You've really helped our survey. Have a good day/evening
INTERVIEWERS: PLEASE TYPE RELEVANT COMMENTS BELOW

"I think that the questions are not well thought out, unless what you are looking for is a negative gut reaction, but I am more analytical; any intelligent person is going to question the questions, and I don't think race should be in any survey at all, I see no point in separating surveys by demographics. (p) age is a true delineation, but race is not (p) no" for the about how safe different smoking behaviors are, she sd. It depends on your definition of "safe" for the how curable emphysema is, it depends on if smoker quits

#32 there should be no advertising in mag

#39: I'm addicted to nicotine not cigarettes

81 year old, refusal conversion, complete, does not consider herself a smoker, because she "only smokes 5 cig. A day with her cocktail and can stop whenever I want"

Asian-American r

At q19, respondent asked if we were sponsored by a tobacco company. I repeated that we were sponsored by researchers at Rutgers university. (she is a smoker.) At q20 respondent asked if we were anti-smoking. I explained that I am trying to be unbiased because I didn't want to bias her answers, and then I read to her from the answers to questions from respondents, that the "results will be used by scientists who are studying smoking and non-smoking behaviors."

Cigarettes should not be allowed to be advertised anywhere not in magazines. Also the woman gave me a phone number of someone she wanted us to interview who is also strongly against smoking and works on anti-smoking campaigns (415) 586-3711

Clarification on q32: they should not be allowed to advertise anywhere

Difficult r, because he sd. He couldn't answer many questions, because of the way they were worded. E.g. He had no idea what the average smoker did, so he couldn't compare himself. I tried to tell him that it is his opinion of the average, etc. But he couldn't say. He was sincere, not like he was just making it difficult for me

Doesn't think cigarette companies should be allowed to advertise at all

Everyone always smokes around me so I think I have as high a risk as they do

Filipina/Spanish

For q14_1 respondent said that emphysema is 1 "more a nagging problem", but for q14_2 she said that emphysema is 4 "not curable". On q25 respondent answered 2 "no" she didn't think taxes on cigarettes should be raised, and she offered that she didn't believe it was spent on health care costs. (regarding q44_2) repeating an answer, respondent said she had a stroke and sometimes cannot say words right

For q43 respondent mentioned health problems and shortness of breath as reasons she wished she never started smoking, yet on q44_2 respondent answered a "no" she has not had any health problems from her smoking for twenty years. (by the way, her voice sounded a bit rough.)

For q44_1 respondent answered "no" then she told me that her "grandfather has been smoking since he was twelve, and he's eighty-three now, and he's had a heart attack, and triple bypass surgery, and a stroke."

For q49 respondent said she got her GED, but there was no answer category for that. The last grade she completed was the ninth grade. For q44_2 respondent offered that she has had bronchitis and emphysema from smoking. She also has heart disease but she thinks that was hereditary

For race question, r said "black and Asian" so I repeated all the categories, & she said "black I guess"

For the questions about do you tend to agree or disagree with statements about smoking, r sd. He had a hard time answering them, because they were too vague (basically) because they mention smoking but not how long someone smokes for, etc. He was different because he only smoked occasionally at parties

French national

He mentioned both his parents died of emphysema

He really hoped this would help, because there are so many people out there that shouldn't be smoking. His dad smokes

His old lady has smoked most of her life and she has been very healthy all her life. She kept saying she was going to mess up your statistics because she is atypical. She has a strong opinion on q8e that advertising does not make smokers - peer pressure does

Hispanic

I am not affected by cigarette ads

I am pacific islander

I don't think they should be allowed to advertise

I don't think cigarettes should be allowed to be sold

I don't think they should allow them to advertise in any magazine, it is a travesty in this country that it is still allowed

I don't think they should be able to advertise at all. I already quit smoking

I don't think they should be allowed to advertise cigarettes at all. I am not affected by cigarette ads

I don't think tobacco companies should be allowed to advertise at all

I have a higher risk because I have asthma

I wish they would not advertise at all

Italian ethnic group. R. Had comment on 32. "there should be no advertising anywhere"

Italian heritage. Very wordy herbalist

Jewish white

Latin

Man has emphysema but won't quit smoking now because he says it won't change anything now it's too late and he enjoys smoking

Many comments made on data correction sheets

My baby died and it was probably from second hand smoke

No advertising in any magazines

Noticed that her British friends smoke a lot and are very moody - mood and smoking seemed to have a correlation to her. Regarding the increasing law penalties on providing minors with cigarettes - admission or the raising of fines is admitted (defeat) and keeping the same law and enforcing it better is optimal

On q 25 "I think the tax should be raised to prevent people from smoking not to cover the cost of treatment."

On q2 respondent answered 4 "smoking" but he already knew the survey was about smoking, after asking for more information about "health issues". He agreed to do the interview because he's in the process of quitting (q40). On q20 respondent said it would be 3 "very hard and I might not be able to do it" indicating his present attempt to quit. He answered 1 "yes" on q22 he craves them, and explained later he is using nicotine gum. On q32 he said an ad change would be a double-standard. On q34 he smoked a pack and a half daily before quitting

On q25 respondent answered 2 "no" she wouldn't support an increase in cigarette taxes to cover healthcare costs and she volunteered that her reason was that "it's not being spent on that, anyway." On q27 she answered 5 "all" of the tobacco settlement money should be spent by states to help reduce smoking. Before answering she asked me "and we're only talking about the settlement money from tobacco companies, right?" Maybe distinguishing from cigarette tax q25

On q25 respondent said "no" then offered "I don't think it would help." He may have thought we meant raising taxes as a deterrent, rather than to fund healthcare. On q39 respondent said "no" he doesn't consider himself addicted although on q37 he said he tried quitting three times. Also in the first open-end he describes that he doesn't consider himself a smoker, as he currently only smokes on weekends occasionally. On q43 respondent wishes he never started, due to health problems, yet on q44_2 he answers "no" health problems

On q29 respondent answered "I don't know, because I haven't seen Canada's warning labels". On q43 respondent had difficulty giving a reason why he wouldn't start smoking if he had it to do over again. The only reason he gave, after probing, was the cost. Yet on q44_2 respondent said he has had health problems from smoking (didn't say what)

On q32 respondent first said she didn't think tobacco companies should advertise to any teens then she changed her answer to 2, magazines that "almost no teens" read. On q32-1 and 32-1 respondent said that she couldn't answer them; both were 7 "refused" because she didn't think it would make any difference whether merchants were penalized for selling to minors or if we raised the selling age to twenty one; she said if teens want to get cigarettes then they will find a way to get them, especially if they are addicted to them

On q43 respondent describes health problems such as coughing and shortness of breath. However, on q44_2 respondent answered 2 "no" he did not have any health problems from his smoking

On q44_2 respondent said "it just makes me sicker, you know, because it lowers your immune system, I just get the flu more and stuff." She is a seventeen year old female who has smoked regularly since she was fifteen

On q48 respondent said that he is currently completing his GED. Respondent offered that it is difficult for him to quit because his friends and girlfriend smoke, and their smoking "bugs" him while he is trying to quit, so he ends up smoking with them

On race she said she was "a little of this and a little of that"

Q 32: they shouldn't advertise smoking anywhere. It's America and a free country so I think smoking is allowed because it is free choice but the choice is killing us. If people stop smoking it will make me proud

Q14-15 and others: respondent is a seventy-six year old female who currently smokes and has emphysema from smoking. Her husband died of lung cancer, he lived sixteen months after he was diagnosed. She said the doctor said he got it from smoking but she says she doesn't know that. Her answers reflect her condition

Q29 regarding Canada's labels and us warning labels, respondent is from Germany, giving her a different point of view. Respondent answered q44_2 with "no, I wouldn't say so, nothing medical, just shortness of breath."

Q5-05 respondent currently has the flu

Question 25: woman says she would support this tax only if we created a health care program like the ones they have in Canada or Europe. She also says she has been a drug addict in the past and has emphysema and wants to quit but can't because she doesn't want the weight gain

Question 27 r said he is against the lawsuits of tobacco co

R felt that putting pictures on packs(Canada labels) would not do any good. She said if people can read, they understand the dangers of smoking

R felt that the advertising of smoking should not be allowed in magazines at all

R from south America

R had a comment to make. Her comment: seeing that I am addicted to cigarettes, I find it ironic having lived in other countries that the us will give tax breaks to addicts and yet the entire health system of this country is shocking. There are so many young people who do not have health insurance. My greatest bane is the health system of the

united states. I used to live in Canada and they have a decent health system. We will probably never have a decent health system or good race relations

R had comment on q. 8f. Said his smoking was influenced by his drinking. And if his family had more influence he would smoke less

R had comment on question #7c: there are exceptions to the general rule that the longer you smoke the harder it is to quit. My grandpa smoked for 50 years then quit cold turkey

R had comments on question 26: charge 2 dollars a pack after I quit. Question 32: no advertising anywhere

R had comments. On #25: "the tax burden should fall on the tobacco companies. They should pay a percentage of their profits to health costs. The smoker should not have to pay. And on ques.#25: no advertising allowed anywhere except where the cigarettes are sold

R has emphysema. R. Had comment on question 27: "the tobacco co. Didn't make anybody smoke."

R is a dental hygienist

R is a police officer

R is autistic, so her mother asked her the questions, r typed the answers on a computer, and her mother told me her answers

R opposes using tobacco settlement money for prevention because programs like the dare program just made he want to smoke more; does not believe there should be any restrictions on magazine advertising because she does not believe teens are influenced by ads

R said she had tried everything to quit smoking from hypnosis to zyban and nothing works for her

R said: question #29:"heck no" question" #38 not a regular smoker just smokes a little with friends. Question # ?: Referring to the price of cigarettes. "raise it to the sky but lower the price of nicorette patches

R sd he had smoked in the past, but considered himself a nonsmoker

R sd her family has had many deaths from smoking illnesses

R sd she quit once for 18 years

R sd. "thank you for your time"

R sd. At the school down the block, youngsters not even 12 are smoking cigarettes; also that in the province of Quebec, he sd. You can't even buy cigarettes. [that's hard to believe]

R sd. 'Don't know' for a few of the questions comparing himself to the average smoker. He commented that he doesn't know what the average smoker does

R sd. She had emphysema, and her husband had died of lung cancer

R smokes cigars and has heart disease in the family; also parents both smoked -- mother died of breast cancer & father of heart disease but he doesn't know what role smoking played in either. Father also had fatty diet

R wanted to know what magazine survey will be published in, so I gave him OSRL web address

R. Had a comment. She said, "I have been here a long time on this earth. I've seen many people who get lung cancer who didn't smoke, as well as those who did. It's a terrible, painful thing to die from smoking should be banned. My mother smoked while she was pregnant and while I was an infant. I hope we don't get it. All my children have tried it and quit."

R. Had comment on question 32: they should not advertise anywhere

R. Had comment on question 27: "I disagree with the lawsuits. Nobody made us smoke. No one twisted their arm to smoke

R. Had comment on question 27: 'with the surgeon generals warning on the cigarette packages, its common sense that smoking is bad for you and you can't blame the companies

R. Had comment on question 32: "they should be no advertising anywhere because it doesn't really affect us"

R. Had comments on 2 questions: #17: r. Said, "I don't believe in the nicotine addiction, I believe in the hand-mouth addiction." And on #27: r. Said "I don't believe there should be any lawsuits - None of the money should be spent on that."

R. Had comments: question 5: depends on age of person exposed to 2nd hand smoke. My brother and I were exposed as babies and he has asthma and I have bronchitis. I think that when you expose an adult to 2nd hand smoke the risks are not as bad. Question 41: I already quit

R. Wanted to share this comment with researchers. I think that smoking is a good thing. It is good because it helps population control. I think its bad for us but its good because of the increases in the long lives we live. I think its good to try to help kids to stop smoking but I don't think smoking should be illegal. (the boy said his grandma just died of emphysema. And he has had pneumonia many times

Respondent Had difficulty understanding and speaking clear English

Respondent did not volunteer it for q40_1 (which she answered I not sure she wants to quit), but earlier in the interview she said she doesn't consider herself to be a smoker and also said that she had previously quit. She contradicted herself somewhat by saying in the open end at the start of the interview that she'd recently tried it and stopped (she thought it was "disgusting"), but she may have said that because her mother may have still been nearby (even if she meant what she said)

Respondent had to stop for a coughing spell as he is a smoker and also has an illness right now

Respondent has emphysema

Respondent has heart trouble and emphysema

Respondent is currently trying to quit smoking, which is reflected in his answers to q20 (2) and q22 (1). On q34 respondent first said (3) that he smoked six to ten cigarettes a day in the past month, but then clarified that he is

currently trying to quit (9), and that he initiated that during the past month. On q40_1 respondent said he does want to quit (3) and then added that he is currently attempting to quit (4)

Respondent refused to answer q32, stating that he didn't think the tobacco companies need to advertise at all.

Respondent started smoking at age five. Yet he said that he did think he would have the strong cravings when he started. He said he never wants to quit and never tried. He doesn't think smoking affects his health. Respondent said the grades in school in his country only go to the sixth grade

Respondent said she is mixed white and native American. Respondent first said she doesn't consider herself to be a smoker because she only tried them in the last thirty days and later her answers began to reveal that she actually smokes more regularly, has cravings, in fact for q34 she answered that she smoked about a pack a day in the past month and for q39 she admitted that she is addicted to cigarettes

Respondent said that 'no' he doesn't consider himself to be a smoker in q3a, but after answering many questions he changed his answer to 'yes' for q39

Respondent said: "my mother died five years ago with a very serious case of emphysema. My brother smokes tobacco and he lived with her. I also was exposed and now I have it, the beginnings of it. I have a type of bronchitis and it's terrible, this morning I have a cold and I am suffering a lot because I can't breathe very well, it's very hard for me to breathe. I suffocate a little bit because my lungs are not in very good shape. Do you have any medicine to get rid of this cold? I have had it for a month and can't get rid of it

Respondent wanted to change her answer to q2 to "smoking" after we began asking questions about smoking, but I did not back up and do it because I figured she was influenced by those questions that followed q2. On q48 respondent said she is currently both a senior in high school and a freshman at the community college

R's grandfathers both died of lung cancer

She says smoking sucks (she is exposed to 2nd hand smoke)

She sd. Smoking is a very bad topic for me and my family; she initially refused to do survey, because she had lost her husband and brothers to smoking related illnesses

Should not allow advertising in any magazine

Sixteen year old male respondent said he has tried smoking cigars a couple of times but not cigarettes

Teen male respondent says his race is Inuit

The boy's grandmother wanted to listen in on this call. I do not know if she did or not

The female respondent said she was a junior in college

The man said he was Indian, Irish and English

The r said I'm from India

The r was not pleased with the wording of a lot of the questions. He took issue with about 60 % of them

The r. Asked at the end of the survey, can I change my first answer to smoking?

They should not advertise at all. I am not influenced by cigarette ads

They should not advertise at all. My husband died of lung cancer. He didn't smoke

They should not be allowed to advertise at all

They should not be allowed to advertise at all. Cigarette ads do not affect me

This older woman restated a number of time that the only thing she regretted about smoking cigarettes was the current demonization of smokers by society

This respondent had a very strong accent and did not seem to understand the questions but gave answers anyway. She also referred to herself as a former smoker various times

When asked for the first open-ended question, why he doesn't consider himself a smoker respondent answered that he smokes cigars (cigarillos?) But he previously indicated that he also smokes cigarettes sometimes. For q50 respondent said "that's a hard one" and when I asked why he said "because I'm two of them" (races) then when I offered to make a note about both races he answered "I guess I'm black" and didn't say what other race he is
