ATTEST:
SUE NELSON, City Recorder

APPROVED:
ROB DRAKE, Mayor
Section 1: The Comprehensive Plan, Ordinance No. 4187, effective through Ordinance 4375, Chapter 3 – Land Use Element, Section 3.2 Planning Context, will be amended to read as follows:

3.2 Planning Context

Within the Portland Metropolitan Area, local governments must comply with both state and regional land use laws. Consistency with the Statewide Planning Goals (referenced in Appendix A), Transportation Planning Rule and other Oregon Administrative Rules (OAR) and Oregon Revised Statutes (ORS) is required. Metro, the elected regional government serving the tri-county area, has adopted a number of planning documents for guiding the region's future growth. In 1996 Metro adopted a future vision titled "Regional Urban Growth Goals and Objectives" and a map titled "2040 Growth Concept". Compiling data from within the region and using the context of the future vision and the map, Metro formulated the Regional Framework Plan (Framework Plan). The Framework Plan highlights programs and provides the basic concepts adopted as directives in the Urban Growth Management Functional Plan (Functional Plan). The city must comply or substantially comply with the directives found within the Functional Plan or justify an exception to the directives. The 2040 Growth Concept provided a general approach to approximately where and how much the urban growth boundary should expand, the mix of uses and range of densities to accommodate projected growth within the boundary.

Specifically, section 3.07.130 of the Functional Plan requires the following:

"For each of the following 2040 Growth Concept design types, city and county comprehensive plans shall be amended to include the boundaries of each area, determined by the city or county consistent with the general locations shown on the 2040 Growth Concept Map:

Regional Centers – Nine regional centers will become the focus of compact development, redevelopment and high-quality transit service and multimodal street networks.

Station Communities – Nodes of development centered approximately one-half mile around a light rail or high capacity transit station that feature a high-quality pedestrian environment."
**Town Centers** – Local retail and services will be provided in town centers with compact development and transit service.

**Main Streets** – Neighborhoods will be served by main streets with retail and service developments served by transit.

**Corridors** – Along good quality transit lines, corridors feature a high-quality pedestrian environment, convenient access to transit, and somewhat higher than current densities.

**Employment Areas** – Various types of employment and some residential development are encouraged in employment areas with limited commercial uses.

**Inner Neighborhood** – Residential areas accessible to jobs and neighborhood businesses with smaller lot sizes are inner neighborhoods."

Beaverton’s Downtown is designated a Regional Center on the 2040 Growth Concept Map. A portion of southeast Beaverton, adjacent to Highway 217, is part of the Washington Square Regional Center. Generally, the zoning districts allowed within the Beaverton Regional Center Comprehensive Plan designation include Regional Center – East, Regional Center – Old Town, and Regional Center – Transit Oriented. Other zoning districts consistent with the City’s goals within the Washington Square Regional Center will be developed. The developments known as Koll Business Center, Marathon Industrial Park and Nimbus Industrial Park are located within the Washington Square Regional Center. Generally, densities in the Regional Center are intended to meet Metro’s target of 60 persons per acre.

Station Communities in Beaverton include Beaverton Transit, Beaverton Central, South Tektronix, Beaverton Creeks and Merlo. The Sunset and 170th/Elmonica Station Communities are located within Beaverton’s urban service area, as is the eastern portion of the Willow Creek Station Community. Beaverton’s zoning districts focus on the immediate station, within ½ mile, and the outer perimeter, ½ to 1 mile. These zoning district categories are labeled Station Community and Station Area, respectively. The Development Code specifies two three Station Community zoning districts: Station Community – Employment, Station Community – High Density Residential and Station Community – Multiple Use. Two Station Area zoning districts are identified as follows: Station Area – Medium Density Residential and Station Area – Multiple Use. Metro’s target density is 45 persons per acre for the Station Community design type.
