2. a Zoning Map Amendment from Institutional Residential with a Design Overlay (IRd) to General Employment with a Design Overlay (EXd).

   A. As part of the building permit application submittal, the following development-related conditions (B through E) must be noted on each of the 4 required site plans or included as a sheet in the numbered set of plans. The sheet on which this information appears must be labeled "ZONING COMPLIANCE PAGE - Case File LU 11-138415 CP ZC." All requirements must be graphically represented on the site plan, landscape, or other required plan and must be labeled "REQUIRED."

   B. To ensure that future development will not over-burden the downstream sanitary sewer system, it must be shown that one of the following is achieved:

      1. All future development is restricted such that the peak daily sanitary flows coming off of the site to the public system will not exceed 2.5 cfs peak daily flow to the piped system or 3 cfs peak daily flow to the Cherry Park Pump Station (or numbers updated by BES staff to reflect changes to factors such as the public system itself or modeling assumptions); or

      2. The applicant or owner improves the overall public sanitary system such that available capacity exists for the development. This could include changes such as upsizing downstream pipes or modifying the Cherry Park Pump Station such that it has increased pumping capabilities.

   C. To ensure that future development will not over-burden the localized sewer system immediately adjacent to the site, it must be shown that one of the following is achieved:

      1. All development discharges its sanitary flows to the 15" sanitary sewer in 100th (or the largest sanitary sewer available to it at the time), provided all applicable BES and plumbing code standards and requirements can be met; or

      2. BES finds that available capacity exists in the sewer in Main; or
3. The applicant or owner improves the local public sanitary system such that the connection point has available capacity, to the satisfaction of BES.

D. Allowed land uses in the EX zone shall be limited to 998 equivalent PM peak hour trips. Equivalencies shall be applied per those presented in Table 1 below. To ensure the trip cap is not exceeded, applicants shall submit a written verification at the time of building permit, identifying all site uses, both existing and proposed, and showing a maximum equivalent PM peak hour trip generation of 998 trips.
