ORDINANCE NO. 4470

AN ORDINANCE AMENDING ORDINANCE NO. 4187,
THE COMPREHENSIVE PLAN,
CPA 2007-0018, DOWNTOWN PARKING POLICY AMENDMENT

WHEREAS, in April 2007, the City of Beaverton completed a parking study within the Downtown area of the City as defined by the boundary of Regional Center - Old Town zoning district; and

WHEREAS, the April 2007 Beaverton Downtown Parking Solutions report contains a number of recommendations concerning parking within the subject area including an amendment to the Beaverton Comprehensive Plan regarding parking policies; and

WHEREAS, the City Council embraced the recommendations of the Beaverton Downtown Parking Solutions report in June 2007 with adoption of Resolution 3901; and

WHEREAS, on December 19, 2007, the Planning Commission conducted a public hearing to consider a City initiated application to amend Ordinance No. 4187, the Comprehensive Plan, to adopt additional parking management policies for the Beaverton Regional Center Old Town zone previously adopted by Council in Resolution No. 3901; and

WHEREAS, the Planning Commission received and considered the submitted staff report, exhibits, and staff recommended approval of this Comprehensive Plan text amendment; and

WHEREAS, at the December 19, 2007, Planning Commission public hearing, the Planning Commission reached a determination to recommend to the Beaverton City Council adoption of the proposed amendments to the Comprehensive Plan as summarized in Planning Commission Land Use Order No. 2035; and

WHEREAS, no appeal of the Planning Commission recommendation was filed with the City; and

WHEREAS, the Council adopts as to criteria applicable to this request and findings thereon the Public Works Staff Report dated November 30, 2007, and Planning Commission Land Use Order No. 2035, all of which the Council incorporates by their reference herein, and finds that they constitute an adequate factual basis for this ordinance. Now, therefore,
THE CITY OF BEAVERTON ORDAINS AS FOLLOWS:

Section 1. Ordinance 4187, the Comprehensive Plan Volume I Chapter Six – Transportation Element is amended by amending existing text and adding new text relating to the provision of parking and parking management to read:

6.2.4.b) Limit the provision of parking to meet regional and State standards.

Actions: Work to reduce parking per capita in accordance with Metro and State requirements, while minimizing impacts to neighborhoods. Work to reduce parking in habitat benefit areas, where parking can be provided in other locations including off-site, on the street, through shared uses, or in parking structures. Continue to implement the motor vehicle and bicycle parking ratios in new development. Continue to develop and implement a Regional Center parking plan. Implement residential parking permit districts in neighborhoods as requested and approved by City Council. Work toward implementing other parking-based transportation demand management strategies, such as metered and structured parking, to help achieve Metro’s 2040 Non-Single Occupant Vehicle mode split targets.

6.2.4.c) Manage parking in the Regional Center Old Town area by applying the following principles from the Beaverton Downtown Parking Solutions study.

- Make the Old Town area accessible to all users through multiple modes.
- Provide sufficient and convenient parking.
- Recognize that on-street parking is a finite resource that needs to be managed to assure maximum access for customers.
- Make the Old Town area conveniently accessible for the priority user of the public parking system – the customer.
- Provide adequate employee parking and encourage implementation of meaningful public and private sector programs that encourage employee use of modes other than the single-occupant vehicle.
- Make parking user-friendly – easy to access, easy to understand.
- Provide clear and strategic direction to new development to assure that new growth improves the overall system of access.
- Manage the public parking supply using the 85% Rule\(^1\) to inform and guide decision-making.

\(^1\)The 85% Rule is a measure of parking utilization that acts as a benchmark against which parking management decisions are based. Within the parking industry, it is assumed that when an inventory of parking shows more than 85 percent occupancy in the peak hour, the supply becomes constrained and may not provide full and convenient access to its intended user. Once a supply of parking routinely exceeds 85 percent occupancy in the peak hour, the 85% Rule would require that parking management strategies be evaluated and/or implemented to bring peak hour occupancies to a level below 85 percent to assure intended uses are conveniently accommodated.

60.30. OFF-STREET PARKING

60.30.05. Off-Street Parking Requirements. Parking spaces shall be provided and satisfactorily maintained by the owner of the property for each building or use which is erected, enlarged, altered, or maintained in accordance with the requirements of Sections 60.30.05 to 60.30.20.

60.30.10 Number of Required Parking Spaces. Except as otherwise provided under Section 60.30.10.140., off-street vehicle, bicycle, or both parking spaces shall be provided as follows:

1. Parking Calculation. Parking ratios are based on spaces per 1,000 square feet of gross floor area, unless otherwise noted.

2. Parking Categories.

A. Vehicle Categories. Contained in the table at Section 60.30.10.5. are vehicle parking ratios for minimum required parking spaces and maximum permitted number of vehicle parking spaces to be provided for each land use, except for those uses which are located in the RC-OT zoning district which are governed by Section 60.30.10.6. These requirements reflect the parking requirements of Title 2 of Metro's Urban Growth Management Functional Plan.

1. Minimum Number of Required Parking Spaces. For each listed land use, the City shall not require more than the minimum number of parking spaces calculated for each use.

2. Parking Zone A. Parking Zone A reflects the maximum number of permitted vehicle parking spaces allowed for each listed land use. Parking Zone A areas include those parcels that are located within one-quarter mile walking distance of bus transit stops that have 20 minute peak hour transit service or one-half mile walking distance of light rail station platforms that have 20 minute peak hour transit service.

4. **Dual Parking Zones.** If a parcel is partially located within Parking Zone A, then the use(s) located on the entire parcel shall observe the Parking Zone A parking ratios. Specifically exempted from this requirement are parcels located within the Regional Center - East zoning district. In the cases in the Regional Center - East zoning district where parcels are bisected by the boundary of Parking Zones A and B, the applicable maximum parking ratios may be averaged, and that average may be applied over the whole parcel. [ORD 4107; May 2000]

5. **Old Town Parking Zones 1 and 2.** Located within the boundary of the Regional Center - Old Town zoning district are two (2) parking zones. Within these two parking zones, the parking requirements of Section 60.30.10.5 do not apply.
