Colvin Oil – Areas of Comprehensive Plan & Zone Map Changes

Exhibit A
COLVIN OIL – URBAN EXCEPTION AREA – COMMITTED

Exhibit B
1. PLES-1 Tax Lot 300 (main), Tax Lot 304 (all) and Tax Lot 2500 (main)
   This Proposed Limited Exception Site (PLES-1) is to be limited to Colvin Oil
   Company operations, including the CFN automatic card fuel station, as well as the
   overnight trailer drop-off as a part of the fueling operation, the UPS leased area,
   and Ham’s Body Shop, as well as those other RI uses similar in nature and
   intensity of use to the existing uses.

2. PLES-2 Tax Lot 300 (portion north of Tokay Canal)
   This Proposed Limited Exception Site (PLES-2) is to be limited to Colvin Oil
   Company operation vehicle and employee vehicle parking.

3. PLES-3 Tax Lot 100/Tax Lot 2500 (portion east of Jones Creek Road)
   This Proposed Limited Exception Site (PLES-3) shall be limited to truck parking
   and incidental office and support uses similar to the existing Colvin Oil operation,
   including overnight truck parking for those vehicles utilizing the Colvin Oil fuel
   center and Colvin lease operations (such as United Parcel Service center).

   It is proposed further that PLES-3 shall be limited to an intensity of use which
   will:
   
   - Have an impact on the PLES-3 less than or equal to the existing
     Colvin tract uses described above and itemized below, on a pro-rata, per-
     acre basis as measured by similar use, density, site coverage, traffic
     generation and development character;
   
   - Utilize only rural levels of basic services, such as water, septic,
     access streets, and fire and police protection, all services to be within the
     carrying capacity of the land, as defined by RLDC Section 11.030;
   
   - Mitigate impacts on the adjoining residential portion of Josephine
     County Exception Area No. 114-1 with appropriate setbacks, screening
     and vegetative buffers; and
   
   - Mitigate any traffic impacts with appropriate ingress, egress and
     public street improvements as may be required by traffic increases
     resulting from the future development of PLES-3, as determined by the

Current levels of intensity of use include the following:

- Colvin Oil Operations - Tax Lot 300/304/2500 (PLES-1)
  - 11 office staff
  - 16 truckers in two shifts
  - 11 tanker trucks in single or double tractor-trailer configurations
  - 9 additional trucks and company vehicles

Colvin
Board of County Commissioners Findings 9/22/04
Colvin Oil trucks on the coast (2-3 trucks) and in Medford (4-5 trucks) are not daily operational at the site.

The Central Fueling Network (CFN) fuel pavilion.

Active site area for Tax Lot 300 is 4.15 acres (Colvin Oil, overnight trailer drop-off, and UPS), and including septic drain fields is 5.90 acres.

- UPS Operations - Tax Lot 300/2500 (PLES-1)
  - 20 daily delivery vehicles
  - Pickup and delivery by up to 3 double or triple trailer rigs, on a once per 24 hour basis
  - 2-5 trailers remaining on property at any given time
  - Active site area for UPS operations is included in the Colvin Oil active site area.

- Ham's Body Shop Operations - Tax Lot 304 (PLES-1)
  - Daily entry and exit of up to 10 employees
  - Entry and exit of up to 5-7 customers per day, including vehicles to be repaired.
  - This traffic activity is included in the Traffic Impact Study.

- Colvin Office Building area is 1,080 square feet, or 0.42% of the active site area.
- UPS Building area is 1,130 square feet, or 0.44% of the active site area.
- Colvin Accessory Building area is 3,360 square feet, or 1.3% of the active site area.
- Total building area is 5,570 square feet, or 2.17% of the active site area, including septic fields. Therefore, up to 2.17% of the active site area of PLES-3 (2.17% x 3.54 Ac = 3,346 square feet) could be developed as building under this proposal.

- No Body Shop use is proposed for PLES-3.

- Traffic generation rates per acre of 9.5 trips/Ac for the AM peak hour and 7.5 trips/Ac in the PM peak hour. For conservative traffic impact computation purposes, all traffic from PLES-3 shall be deemed truck traffic. (See Colvin Oil Company Traffic Impact Study Revised, Table 2, p. 4, and Discussion, p. 5.) The above employee levels and vehicle use were utilized in the Traffic Impact Study. Development of PLES-3 shall be limited to these intensities of traffic generation. Any further expansion of activities on PLES-1 or PLES-3 must demonstrate adequate traffic capacity, including mitigation measures if required by traffic study.

- The area of Tax Lot 300 west of Tax Lot 304 contains an approved septic field and reserve field, slopes down to Jones Creek and then back up to the Tokay Canal, is developed in more rural fashion with barn, sheds and mobile home, and is therefore unsuitable for expansion of uses that are “urban in character and intensity.” Improvements to existing structures or
expansion under 10% of existing building area could be accommodated under this proposal. (Source: Record 1.C, pp. 6-8, emphasis added by Applicant)
