

ACKNOWLEDGEMENT
OF REVIEWERS
FOR 1988

In many ways the reviewers are the backbone of a successful journal. Through their knowledge, erudition, and expertise the Editor-in-Chief has the benefit of their judgement in selecting articles for publication and the authors have the benefit of their insights in order to further improve their submissions. They are first and foremost educators, of both the Editorial staff and the contributors. We would like to both thank and acknowledge those who have participated in the review process for Volume 1 of DISSOCIATION.
