## INSTRUCTIONS FOR CONTRIBUTORS TO DISSOCIATION: PROGRESS IN THE DISSOCIATIVE DISORDERS

DISSOCIATION has established guidelines consistent with the *Publication Manual of the American Psychological Association, Third Edition, 1983*. For more refined questions of usage and grammar, DISSOCIATION relies upon *The Chicago Manual of Style, Thirteenth Edition, 1982*.

Please submit four complete and clearly legible double-spaced typewritten sets of the entire manuscript. If the manuscript is computer-generated, please also submit manuscripts in one of the following manners:

- 1) **Apple Macintosh 3.5" floppy disk.** Compatible word processing programs are *Word* or *MacWrite*. Also include one hard copy set for reference.
- 2) **IBM MS-DOS floppy disk.** Compatible word processing program is *Word Perfect*. If you use an MS-DOS program other than *Word Perfect*, also save file as an ASCII or text-only file. Also include one hard copy set for reference.

The title page, abstract, reference list, footnotes, tables, and figures must be clearly labeled and on separate pages. Please do not place author identifications anywhere besides the title page. Last minute copy corrections need to be made with a "non-repro" blue pen or pencil. Single space after end-of-sentence periods. Mail disks and/or hard copy manuscripts to: **Richard P. Kluft, M.D., 111 N. 49th Street, Philadelphia, PA 19139.**

All authors must sign a letter assigning the copyright ownership of the article to DISSOCIATIVE DISORDERS RESEARCH PUBLICATIONS LIMITED, contingent upon its acceptance.

The following guidelines apply to all submissions.

1. The title page should include the title of the article, the name(s) of the author(s), the academic or institutional affiliation of the author(s), the running head (or abbreviated title), and the name and address for reprints. Authors without academic or institutional affiliations should list instead the city and state in which they practice.
2. The abstract should be a brief summary of the article. It should be accurate, succinct, quickly comprehensible, and informative. It must not exceed 150 words.
3. The text should introduce the article's purpose and include a brief review of the relevant literature, describe its methods and subjects, indicate its results, and offer a discussion in which its conclusions are stated. An author who would like to submit an article (other than a case study) that differs considerably from this structure should contact the Editor-in-Chief to discuss the proposed submission. The text may require several levels of headings. All should be typed in upper and lower case letters (e.g., *The Neuropsychophysiology of Dissociations*). The first level of headings should be centered, but not underlined. The second level should begin at the left margin and be underlined. The third level should be indented from the left margin and underlined. For more complex sub-heading formats, consult the *Publication Manual of the American Psychological Association*.
4. References within the text should be made in the author-date format. Use the names of either one or two authors on each occasion. When there are more than two authors, use all in the first citations, and the surname of the first author followed by "et al" subsequently. When there are six or more authors, use the surname of the first author followed by "et al" on all occasions. For citations in parentheses, use an ampersand (&) before the name of the last author listed. All quotations cited must include page numbers.
5. References within the reference list are restricted to those cited in the text. They should be listed in alphabetical order on a separate page, headed References. The authors' names are given surname first, followed by the initials. Place an ampersand (&) before the last author's name. The names are followed by the publication date in parentheses, followed by a period. The title (and the volume number, when relevant) is italicized (underlined, if italics unavailable), then list the page numbers. Use "pp." before the page numbers of publications other than scientific journal articles.
6. Sample references: (The italicized words should be underlined in submitted manuscripts.)
