CG: LUDO AMEND ORDINANCE 2010.wpd
AMENDMENTS RESULTING FROM CHANGES TO MANUFACTURED DWELLING SPECIALTY CODE

1. Article 30, Floodplain Overlay: amend language to reflect Specialty Code changes. The Oregon Manufactured Dwelling and Park Specialty Code is the code used by the Douglas County Building Department for inspections pertaining to manufactured dwellings. In 2008, the Code changed to preclude the placement of new manufactured dwellings in the floodway; replacement was allowed if certain conditions were met. The April 1, 2010 version of the Code reflects three changes: 1) there is no longer a prohibition against the installation of manufactured dwellings in floodways; 2) there is no difference in elevation requirements for manufactured dwellings installed in pre-FIRM manufactured home parks (i.e., all new installations anywhere must conform to elevation requirements in the building code, and; 3) the definition of “lowest floor” for manufactured dwellings differs from stick-built homes. For a manufactured dwelling, the lowest floor means the bottom of the longitudinal chassis frame beam in A zones and the bottom of the lowest structural member supporting the home in V zones. ♦ ♦ Effect: Regulation & Deregulation

REVISE ARTICLE 30, §3.30.460 “MOBILE HOME STANDARDS,” (P. 3-191) AS FOLLOWS:

[no change to 1.]

REVERSE ORDER AND REVISE ITEMS 2. AND 3.:

3-2. As provided for in the Oregon Manufactured Dwelling and Park Specialty Code, manufactured dwellings located in a flood hazard zone (100 Year Flood District and Floodway District outside of an existing manufactured home park as provided in 2.d. above), are subject to the following:

a. The finished floor shall be elevated a minimum of 18 inches above the Base Flood Elevation (BFE) as identified on the Flood Insurance Rate Map.

b. The manufactured dwelling stand or foundation shall be a minimum of 12 inches above the BFE unless openings are provided per FEMA Technical Bulletin 1-93.

c. Placement of new manufactured dwellings in the floodway is prohibited.

d. Replacement of a manufactured dwelling in the floodway is allowed if placement complies with a. and b. above.
e. Accessory buildings designed for residential occupancy being replaced in a floodway shall have the finished floor elevated a minimum of 18 inches above BFE as identified on the Flood Insurance Rate Map.

2-3. For: 1) new manufactured home parks and manufactured home subdivisions; for 2) expansions to existing manufactured home parks and manufactured home subdivisions, and; for 3) existing manufactured home parks and manufactured home subdivisions where the repair, reconstruction or improvement of the streets, utilities and pads equals or exceeds 50 percent of value of the streets, utilities and pads before the repair, reconstruction or improvement has commenced and for manufactured homes not placed in a manufactured home park or manufactured home subdivision, it shall be required that, the following additional standards shall apply:

a. Stands or lots are elevated on compacted fill or on pilings so that the lowest floor of the manufactured home will be a minimum of 18 inches above the base flood elevation;

b. Adequate surface drainage and access for hauler are provided; and

c. In the instance of elevation on pilings, that;

(1) lots are large enough to permit steps;

(2) piling foundations are placed in stable soil no more than 10 feet apart; and

(3) reinforcement is provided for pilings more than six feet above the ground level.

d. Manufactured homes in existing manufactured home parks may be placed and elevated so that either;

(1) The lowest floor of the manufactured home is a minimum of 18 inches above the base flood elevation, or

(2) The manufactured home chassis is supported by reinforced piers or other foundation elements of at least equivalent strength that are no less than 36 inches in height above grade and be securely anchored to an adequately anchored foundation system to resist flotation, collapse, and lateral movement.

e. In an existing manufactured home park or subdivision on which a manufactured home has incurred "substantial damage" as a result of a flood, the manufactured home shall meet the standards a. through c. of this subsection.
4. Recreational vehicles placed on sites within the floodplain shall also meet the placement requirements 2-3 a. through c. of this section unless they either:

[no change to Item 4. a. or b. or Item 5.]

REVISE ARTICLE 30, §3.30.520 "FLOODWAY DISTRICT" (P. 3-194) AS FOLLOWS:

SECTION 3.30.520 Floodway District

In the Floodway District, the following restrictions shall apply:

[no change to 1. or 2. ]

3. Placement of new manufactured dwellings in the floodway is prohibited.

4-3. Any mobile homes placed, or additions thereto shall conform to standards of §3.30.460; and 3.30.270 and 3.30.529.

NOTE: The LUDO Article 30 definition of LOWEST FLOOR, which means the lowest enclosed area (including basement), is consistent with the Manufactured Dwelling Specialty Code definition which means "the bottom of the longitudinal chassis frame beam in A zones and the bottom of the lowest structural member supporting the home in V zones"; no revision is necessary.
