**INSTRUCTIONS FOR CONTRIBUTORS TO  
DISSOCIATION: PROGRESS IN THE DISSOCIATIVE DISORDERS**

*DISSOCIATION* has established guidelines consistent with the Fourth Edition of the *Publication Manual of the American Psychological Association*, 1994. For more refined questions of usage and grammar, *DISSOCIATION* relies upon *The Chicago Manual of Style*, Thirteenth Edition, 1982. Note: With the first issue of 1995, Volume 8, Number 1, *DISSOCIATION* changed from its previous reliance on the *Publication Manual of the American Psychological Association*, Third Edition, 1983, to the Fourth Edition, 1994.

**Please submit four complete and clearly legible double-spaced printouts of the entire manuscript. In addition, please submit the manuscript on an IBM-compatible 3.5" or Apple Macintosh 3.5" computer diskette.**

The title page, abstract, reference list, footnotes, tables and figures must be clearly labeled and on separate pages. Please do not place author identifications anywhere besides the title page. Last minute copy corrections need to be made with a "non-repro" blue pen or pencil. Leave a SINGLE space after end-of-sentence periods. Mail disks and hard copy manuscripts to: **Richard P. Kluft, M.D., 111 Presidential Boulevard, Suite 231, Bala Cynwyd, PA 19004.**

All authors must sign a letter assigning the copyright ownership of the article to DISSOCIATION DISORDERS RESEARCH PUBLICATIONS, LIMITED, contingent upon its acceptance.

The following guidelines apply to all submissions:

1. The title page should include the title of the article, the name(s) of the author(s), degree(s) of author(s), the academic or institution affiliation of the author(s), a running head (or abbreviated title), and the name and address for reprints. Authors without academic or institution affiliations should list instead the city and state in which they practice.
2. The abstract should be a brief summary of the article. It should be accurate, succinct, quickly comprehensible, and informative. It must not exceed 150 words. It should be formatted in italics.
3. The text should introduce the article's purpose and include a brief review of the relevant literature, describe its methods and subjects, indicate its results, and offer a discussion in which its conclusions are stated. An author who would like to submit an article (other than a case study) that differs considerably from this structure should contact the Editor-in-Chief to discuss the proposed submission. The text may require several levels of headings. Main heads should be typed in all caps, formatted in bold face (e.g., **THE NEUROPSYCHOPHYSIOLOGY OF DISSOCIATION.**) The second level should be typed in upper/lower case formatted in bold face (e.g., ***The Neuropsychophysiology of Dissociation.***) For more complex sub-heading formats, consult the *Publication Manual of the American Psychological Association*.
4. References within the text should be made in the author-date format. Use the names of either one or two authors on each occasion. When there are more than two but fewer than six authors, use all in the first citations, and the surname of the first author followed by "et al." subsequently. When there are six or more authors, use the surname of the first author followed by "et al." on all occasions. For citations in parentheses, use an ampersand (&) before the name of the last author listed. All quotations cited must include page numbers.
5. References within the reference list are restricted to those cited in the text. They should be listed in alphabetical order on a separate page, headed REFERENCES. The authors' names are given surname first, followed by initials. Place an ampersand (&) before the last author's name. The names are followed by the publication date in parentheses, followed by a period. The title is italicized (underlined, if italic script is unavailable), then volume and issue number, if relevant, follow in roman text. And finally, list the page numbers. Use "pp." before the page numbers of publications other than scientific journal articles.
6. Sample references: (If italic script is unavailable, you may underline titles in submitted manuscripts.)  
**Book:** Ellenberger, H.F. (1970). *The discovery of the unconscious*. New York: Basic Books.  
**Article:** Putnam, F.W. (1984). The study of multiple personality disorder: General strategies and practical considerations, *Psychiatric Annals*, 14, 58-61.  
**Article or chapter in an edited book:** Goodwin, J. (1985). Credibility problems in multiple personality disorder patients and abused children. In R.P. Kluft (Ed.), *Childhood antecedents of multiple personality* (pp. 1-19). Washington, DC: American Psychiatric Press.  
**Journal:** Braun, B.G. (1988). The BASK (Behavior, Affect, Sensation, Knowledge) model of dissociation. *DISSOCIATION*, 1(1), 4-23.  
For references other than those shown above, consult the *Publication Manual of the American Psychological Association*.
7. All artwork (photographs, illustrations, graphs or charts) accompanying articles must be approved by the editor. If the artwork is accepted for publication, camera-ready artwork must then be submitted to the editor. All artwork will be returned to the author immediately following publication of the journal.
