NOTICE OF ADOPTED AMENDMENT

07/06/2011

TO: Subscribers to Notice of Adopted Plan
or Land Use Regulation Amendments

FROM: Plan Amendment Program Specialist

SUBJECT: City of Gresham Plan Amendment
DLCD File Number 001-11

The Department of Land Conservation and Development (DLCD) received the attached notice of adoption. Due to the size of amended material submitted, a complete copy has not been attached. A Copy of the adopted plan amendment is available for review at the DLCD office in Salem and the local government office.

Appeal Procedures*

DLCD ACKNOWLEDGMENT or DEADLINE TO APPEAL: Tuesday, July 19, 2011

This amendment was submitted to DLCD for review prior to adoption pursuant to ORS 197.830(2)(b) only persons who participated in the local government proceedings leading to adoption of the amendment are eligible to appeal this decision to the Land Use Board of Appeals (LUBA).

If you wish to appeal, you must file a notice of intent to appeal with the Land Use Board of Appeals (LUBA) no later than 21 days from the date the decision was mailed to you by the local government. If you have questions, check with the local government to determine the appeal deadline. Copies of the notice of intent to appeal must be served upon the local government and others who received written notice of the final decision from the local government. The notice of intent to appeal must be served and filed in the form and manner prescribed by LUBA, (OAR Chapter 661, Division 10). Please call LUBA at 503-373-1265, if you have questions about appeal procedures.

*NOTE: The Acknowledgment or Appeal Deadline is based upon the date the decision was mailed by local government. A decision may have been mailed to you on a different date than it was mailed to DLCD. As a result, your appeal deadline may be earlier than the above date specified. NO LUBA Notification to the jurisdiction of an appeal by the deadline, this Plan Amendment is acknowledged.

Cc: Keren Caballos, City of Gresham
Gloria Gardiner, DLCD Urban Planning Specialist
Jennifer Donnelly, DLCD Regional Representative

ADOPTION SUBMITTAL REQUIREMENTS

This Form 2 must be received by DLCD no later than 5 working days after the ordinance has been signed by the public official designated by the jurisdiction to sign the approved ordinance(s) per ORS 197.615 and OAR Chapter 660, Division 18

1. This Form 2 must be submitted by local jurisdictions only (not by applicant).
2. When submitting the adopted amendment, please print a completed copy of Form 2 on **light green paper if available**.
3. Send this Form 2 and one complete paper copy (documents and maps) of the adopted amendment to the address below.
4. Submittal of this Notice of Adoption must include the final signed ordinance(s), all supporting finding(s), exhibit(s) and any other supplementary information (ORS 197.615).
5. Deadline to appeals to LUBA is calculated **twenty-one (21) days** from the receipt (postmark date) by DLCD of the adoption (ORS 197.830 to 197.845).
6. In addition to sending the Form 2 - Notice of Adoption to DLCD, please also remember to notify persons who participated in the local hearing and requested notice of the final decision. (ORS 197.615).
7. Submit **one complete paper copy** via United States Postal Service, Common Carrier or Hand Carried to the DLCD Salem Office and stamped with the incoming date stamp.
8. Please mail the adopted amendment packet to:

**ATTENTION: PLAN AMENDMENT SPECIALIST
DEPARTMENT OF LAND CONSERVATION AND DEVELOPMENT
635 CAPITOL STREET NE, SUITE 150
SALEM, OREGON 97301-2540**

9. **Need More Copies?** Please print forms on **8½ -1/2x11 green paper only if available**. If you have any questions or would like assistance, please contact your DLCD regional representative or contact the DLCD Salem Office at (503) 373-0050 x238 or e-mail plan.amendments@state.or.us.

ORDINANCE NO. 1705

AN ORDINANCE ADOPTING THE CITY'S 2011/12 - 2015/16 CAPITAL IMPROVEMENT PROGRAM AS VOLUME V OF THE GRESHAM COMMUNITY DEVELOPMENT PLAN

THE CITY OF GRESHAM DOES ORDAIN AS FOLLOWS:

The 2011/12-2015/16 Capital Improvement Program attached as Exhibit A is adopted as Volume V of the Gresham Community Development Plan. The 2010/11-2014/15 Capital Improvement Program, adopted by Ordinance No. 1691, shall remain in effect for those 2010/11-2014/15 programs that have not yet been completed.

First reading: June 7, 2011

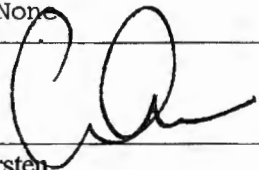

Second reading and passed: June 21, 2011

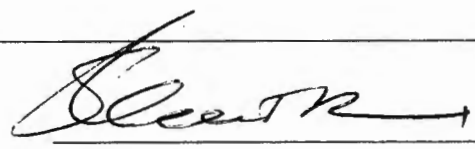

Yes: Bemis, Widmark, Fuhrer, Echols, Kilian, Stegmann

No: None

Absent: Warr-King

Abstain: None

Erik Kvarsten
City Manager

Shane T. Bemis
Mayor

Approved as to Form:

David R. Ris
City Attorney

**DLCD Notice of Adoption – Attachment 1
CPA 11-002**

Describe how the adopted amendment differs from the proposed amendment:

Transportation

523500A – Changed expense dollars to match Resource Dollars

Footpaths & Bikeways

608300 – Changed Funding Source

608300A – Changed Funding Source

611400 – Project timing was revised

611400A – Project timing was revised

Parks

716104 – Cost estimate was revised

716105 – Cost estimate was revised

723900 - Cost estimate was revised to reflect actual grant award

Summary Pages – Revised to show correct timing of projects

Urban Renewal

UR1030 – Details related to the cost estimate were revised

UR1052 – Cost estimate was revised to reflect actual grant award

All Sections

Project Numbers – Project numbers have now been assigned to all new projects.

Minor Formatting and Narratives – Minor updates have been made to several project descriptions to improve clarity and provide additional information.

Introduction

The Capital Improvement Program (CIP) is a 5 year forecasted estimate which identifies major projects requiring the expenditure of public funds over and above routine annual operating expenses. The City identifies capital improvement needs and allocates available funds for the installation or improvement of projects for each relevant program area. The eight program areas in the 2011/12 to 2015/16 CIP are:

1. Wastewater Collection and Treatment Plant
2. Water
3. Transportation
4. Footpaths and Bikeways
5. Parks, Trails and Open Spaces
6. General Development
7. Stormwater
8. Urban Renewal

City of Gresham CIP funding sources/revenues include utility rates, state gas tax, grants, System Development Charges (SDCs), developer fees, and donations. These revenues are projected on an annual basis, taking into account current and potential development activity, rate adjustments, and state assistance. Revenues are inadequate to fund all projects that are needed and can have constraints as to what projects they can and cannot be used on. Projects are prioritized based on the criteria in a following section.

Program Area Descriptions

1. Wastewater Collection and Treatment Plant - provides for the planning, design and construction of improvements to the City's wastewater collection, conveyance and treatment systems.
2. Water- provides for the planning, engineering, and construction of improvements to the City's drinking water system.
3. Transportation – provides for the planning, engineering and construction of improvements to the City's transportation systems that safely preserve existing infrastructure, increase roadway capacity, improve mobility and/or enhance neighborhood livability.
4. Footpaths and Bikeways – provides planning, engineering, and construction of improvements to the City's pedestrian and bicycle networks.
5. Parks – provides for the planning, design and construction of improvements to the City's open space and park site land acquisition and park, trail and greenway development.

6. General Development - provides coordinated infrastructure planning efforts related to the potential annexation areas of Pleasant Valley and Springwater.
7. Stormwater (Watershed Management) - is designed to promote and maintain the health and safety of the environment for all Gresham citizens through effective stormwater and natural resource management including: planning, designing, constructing, and maintaining all elements of the public stormwater system.
8. Urban Renewal - The Rockwood/West Gresham Urban Renewal Area (URA) was established in November 2003 through a city-wide election. It is a 20-year plan aimed at improving public infrastructure and attracting private investment to Rockwood/West Gresham.

CIP Development - Overall Plan

The Development of the five-year CIP includes opportunities for citizen involvement, coordination with citizen advisory groups and public agencies, and input from the Planning Commission and City Council to help ensure that projects meet community needs and mirror City Council adopted plans. These Council-adopted plans help prioritize areas of focus, and the CIP is a commitment toward implementation of the plans' goals and objectives.

CIP Development – Process

1. 20 Year Master Plans – Master Plans are created and updated every 5-10 years. This work is outsourced to specialized consultants who work directly with the individual Program Areas.
2. City Council Approval - City Council approves the adoption of Master Plans for each program area.
3. CIP – Program Areas then use the appropriate Master Plans as a blue print to develop CIP Projects accordingly. The CIP is created by Program Areas.
4. Planning Commission Approval – Planning Commission approves the adoption of the CIP
5. Budget Committee Approval – Budget Committee approves funding for year one of the 5 - Year CIP
6. City Council Approval – City Council approves the adoption of CIP

Specific Project Criteria and Community-Wide Standards

1. Prioritized criteria are used to select individual projects for the City's CIP. Criteria include:
 - a. Mandated projects
 - b. Projects necessary for health and safety
 - c. Projects already in process
 - d. Projects related to other funded projects
 - e. Projects necessary for maintenance
 - f. Projects identified in master plans
 - g. Citizen and neighborhood interest projects
 - h. Financially cost effective projects
 - i. Special interest projects; e.g., projects that meet new development needs or special projects

2. Community-wide "standards" are also important and are applied as part of the selection criteria.
 - a. Relationship to the City Council Goals and Workplan
 - b. Relationship to Community Goals
 - c. Relationship to Rockwood, West Gresham and Civic Neighborhood developments

Project Types

Several main types of projects are included in the document:

- System Repairs and Replacements – Projects needed to maintain existing infrastructure; typically needed to ensure service reliability

- System Improvements – Projects designed to increase the functionality, efficiency, and/or capability of the infrastructure

- Capacity Increasing Projects to Meet Growth – Projects needed in order to provide services to new customers

- Master Planning, Engineering and Other Analytical Studies

Document Structure

Each program area in the CIP includes:

1. *Program Area Summary sheets by Program Area* - This funding information is used for financial modeling by the City's Budget and Financial Planning Staff. In addition, this information assists CIP staff with strategic planning endeavors, such as coordinating infrastructure construction activities with other local public agencies.
2. *Individual project sheets* - Show details about each project within program area
3. *Numerical Order* - All Projects are listed in ascending numerical order

Program Area Summaries

For each funded program area, the CIP project summary shows:

1. Program Project Summary Lists
 - Project Number
 - Project Name
 - Project Dollars by year
 - 5 Year Total
2. Program Resource Summary Lists
 - Funding Resources by type for Program Area as a whole
 - Total Dollars of each Resource type by year
 - 5 Year Total.
3. Program Project Resource Detail Lists:
 - Project Number
 - Project Name
 - Project Dollars by year
 - Funding Resources for each Project by year
 - 5 Year Total

For each unfunded program area, the CIP project summary shows:

1. Program Project Summary Lists
 - Project Number
 - Project Name
 - Project Dollars by year
 - 5 Year Total

Individual Project Worksheets

Each funded and unfunded CIP project has its own worksheet that provides detailed information about the project. Where appropriate, worksheets include area maps to illustrate the location of the project. Information shown on each worksheet includes:

1. Project Number and Name: A unique project number and name are assigned to each project within a program. In some cases, a project may have both a funded and an unfunded component.
2. Description: This section lists the major elements of the project, including what purpose the project serves, the project location, and the neighborhood district designation.
3. Justification: This section justifies why money should be allocated to the project. The section may also describe the project's long and short-term benefits and costs, and adverse effects that may occur if the project is not completed.
4. Funding Resources: Shows the source and estimated amount of funds to be used for each project.
5. Project Costs: Shows the estimated type and amount of expenditures planned for each project.

Description of Funding Resources

1. Operating - Ongoing revenue such as utility rates or gas taxes.
2. Grant - Funds awarded from federal, state or local sources.
3. SDC - System Development Charges.
4. Developer - To be paid or constructed by a private party.
5. IGA - Intergovernmental agreement.
6. Other - Usually dedicated revenues or inter-fund transfers for shared projects.
7. Urban Renewal - Funds coming from the Urban Renewal Program Area.
8. Dev/SDC Credit - To be paid or constructed by a private party and then get reimbursed using SDC Credits.
9. Debt-SDC - Loans to be repaid by SDC funds. Used when the project is SDC eligible but SDC funds are not currently on hand.

10. Debt-Operating – Loans to be repaid by Operating funds. Used when the project is rate eligible.
11. Debt-Grant – Represents the principal forgiveness portion of debt proceeds secured through the State revolving fund and/or Federal Stimulus Program.
12. Repair/Replacement Reserves – Funds set aside for the repair and/or replacement of infrastructure.
13. Streetlight – Funds coming from the City’s Streetlight Fund

Description of Project Costs

1. Design and Construction Administration - Estimated costs for City staff design and project management.
2. Property Acquisition - Estimated property costs.
3. Construction - Estimated constructed costs.
4. Other - Usually reimbursement payments or consultant or other out-sourced services.
5. Administration - Percentage assessed to each project to cover overhead including City and Department Administration. This percentage is based on the federally approved indirect rate.
6. Construct/Reimburse – If project is funded entirely by “Developer/SDC Credits.

Synopsis

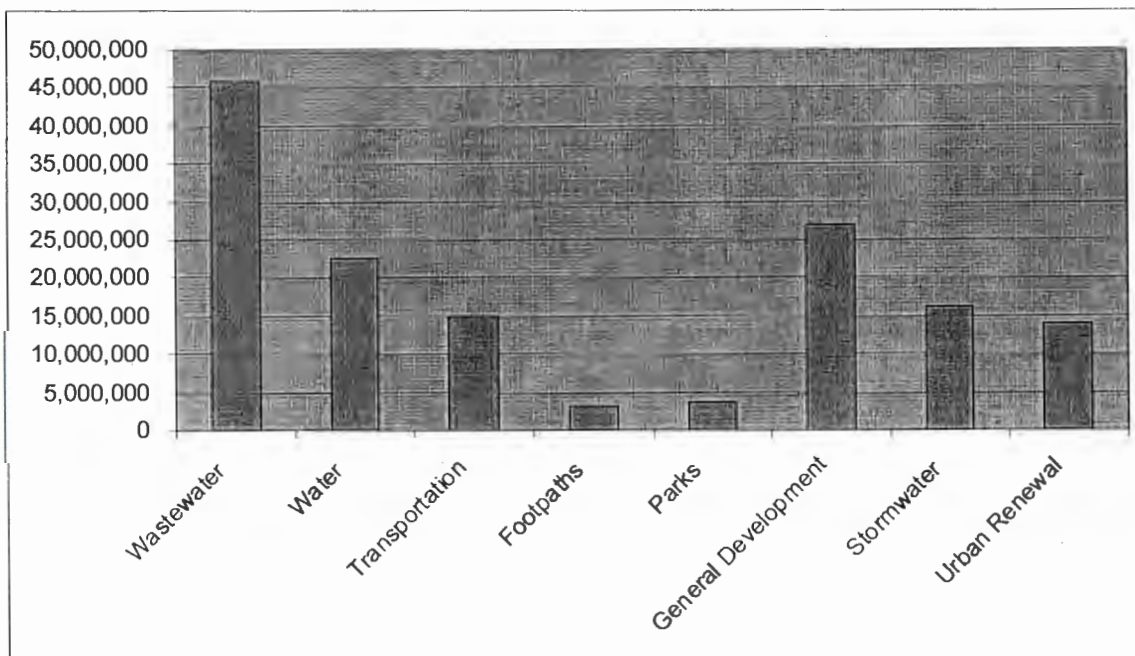

The Capital Improvement Program establishes, prioritizes, and ensures funding for projects to improve existing infrastructure or to pave the way for new development. Development of the Capital Improvement Program is a culmination of efforts detailed into one five-year program.

As adopted, the 2011/12 to 2015/16 CIP outlines the expenditure of \$147,147,075 in funded investments in the City of Gresham's future. Each project has been budgeted to provide consistent service levels and efficient use of City resources. Completion of the projects contained in this document lead the City closer to being Oregon's most livable city.

All Program Area Expenditure Summary – All Years

Program Area	Total Dollars
Wastewater	\$45,856,053
Water	\$22,534,870
Transportation	\$15,049,731
Footpaths	\$3,087,382
Parks	\$3,669,467
General Development	\$26,857,347
Stormwater	\$16,204,946
Urban Renewal	\$13,878,172
CIP Five Year Grand Total	\$147,137,968

All Program Area Expenditure Graph – All Years

The Project Recap Section explains changes in where a project is shown in the CIP. These include completions, deletions or additions from the previous Adopted CIP.

Project Recap - Completed Projects (draft list as FY not over yet)

Division	Project No.	Project Name
Wastewater	314900	Jenne Road - Pleasant Valley Interceptor
	316900	WWTP Administration Building Rehab
	317200	WWTP Storm System Improvements
	317500	WWTP SCADA System Master Plan
Water	418000	Pump Station #1 Mod.
	421000	NE Williams - SE Division to South
	422000	SW Blaine Waterline (Gresh Butte - Gabbert)
	422500	SCADA System Upgrades
	422600	Groundwater Supply System - Well 1
	422900	Kane Road Transportation Coordination Project
	423400	Residential Meter Replacement Program
	423500	Dowsett Lane Main Replacement
Transportation	424000	NE View Ave, east of NE Hogan Rd
	520400	Springwater Interchange on Hwy 26*
	522900	County Road Improvements
Footpaths	523600	Stoneridge Crossing Stabilization
	610900	Bicycle Wayfinding Signs
Parks	715700	Skate Parks
	722800	Vance Park Restroom
	723000	Palmquist Pathway Improvements
	723001	Sports Park Landscape Buffering
	723200	Hogan Butte Landslide Response
Stormwater	914800	Natural Resource Master Plan
Urban Renewal	UR1049	181st Corridor Signal Improvements

Project Recap – New Projects

Division	Draft #	New #	Project Name
Wastewater	3NEW01	318400	1950's Pipe Rehabilitation/Maint. Program
	3NEW02	318500	WWTP FOG Recycling Facility, Phase 2
	3NEW03	318600	WWTP Buildings HVAC Upgrades
	3NEW04	318700	WWTP Small Wind Project
	3NEW05	318800	WWTP Outfall Condition Assessment
	3NEW06	318900	Linneman Pump Station Parallel Force Main, Phase I
Water	4NEW01	426000	SE 5th - Spruce to Vista
	4NEW02	426100	Portland UV Treatment Buy-in
	4NEW03	426200	Large Meter Replacement Project Phase 2
	4NEW04	426300	Gabbert Reservoir Replacement – Phase 2 (Unfunded)

Project Recap – New Projects (Continued)

Transportation	5NEW01	524300	Citywide Streetlight Projects
	5NEW02	524400	Pole Replacement
Footpaths	6NEW01	611400	Gresham-Fairview Trail Crossing at Division Street

Wastewater Collection & Treatment Plant

Funded Projects

Overview

The Wastewater Services Capital Improvement Program (CIP) provides for the planning, design and construction of improvements to the City's wastewater collection, conveyance and treatment (WWTP) systems. The CIP is essential to help provide Gresham customers sustainable, reliable and affordable wastewater collection, conveyance and treatment services that are protective of the environment and public health. In addition, while preserving the existing infrastructure investment, the CIP provides capacity for future growth, as a catalyst for the economic viability of the community. One of the business strategies being employed and implemented by Wastewater Services is the application of a comprehensive asset management philosophy to the CIP as well as within the operations programs to achieve sustainable, lowest life-cycle costs to provide wastewater services.

Highlights

Key projects within the current CIP include:

1. Master planning update projects for the collection system (#317600) and the treatment plant (#317100);
2. Unanticipated (#317700) and planned (#313000 and #318400) repair and replacement projects for the collection system;
3. Unanticipated (#309700) and planned (#317400) repair and replacement projects for the treatment plant;
4. Collection system replacement projects which will also provide for capacity for growth (#315000 – McKinley Sewer – Pleasant Valley) , (#313700 – East Basin Trunk – Springwater); and (#313400 – SE Stark Trunk)

5. Treatment plant projects which provide energy conservation or production and a potential source of revenue (#315300 – Process Improvements; #317800 – Micro-hydro; and #318200 & #318500 – FOG recycling facility).

These projects will help address many ongoing and future operational and maintenance concerns as well as provide system capacity for growth.

FUNDED PROJECT
Wastewater Collection and Treatment Plant

300200: I & I Control Program

Description: This on-going analysis is to reduce the excessive stormwater inflow and infiltration (l&l) into the sanitary sewer system. The project includes flow monitoring, smoke and dye testing to identify illicit connections and high l&l areas, pipe repair, pressure grouting, and other methods to reduce l&l. The project is currently focused on the older service areas such as the downtown commercial district and will also fund the Sump Disconnect Program.

Justification: The project will reduce costs to service users by reducing l&l rather than processing it thorough the treatment plant or increasing the collection system capacity. The project ensures compliance with the National Pollutant Discharge Elimination System Permit.

Type of project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

309700: WWTP Maintenance Project

Description: This project funds unanticipated repair and replacement of Wastewater Treatment Plant and pump station equipment and processes that are not scheduled for replacement under the WWTP Asset R&R CIP 317400. It includes contractual reimbursement to Veolia for repair and replacement items over \$5,000. It also includes repairing air line leaks, replacing flow meters, replacing digester gas lances, repairing rolling stock and other unanticipated items as needed. The project is located in the North Gresham Neighborhood District.

Justification: This project allows the City to maintain current facilities at a level that will prevent additional future capital costs that could occur if the facilities are not maintained.

Type of project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

313000: Pipe Rehabilitation/Maint. Program

Description: This ongoing project completes systematic pipeline rehabilitation and maintenance projects as identified from the Sanitary Sewer Evaluation Study project, or subsequently as determined from ongoing collection system condition assessment. It addresses operational ongoing and anticipated operational concerns, primarily with the oldest sanitary sewerlines (circa 1935) in downtown Gresham, reducing long term operational and maintenance costs. It is estimated that the rehab of the oldest pipes will be completed by 2013 and then work on the 1950 pipes will begin in FY13/14. The majority of this work will take place in the downtown Gresham vicinity and will likely implement a combination of open trench, pipe bursting, and "cure-in-place" pipe lining methods. (CIP 317700 is in response to already deficient and localized sections of conveyance system).

Justification: This project allows the City to maintain current facilities at a level that will prevent additional future capital costs that would occur if the facilities are not maintained.

Type of Project: Repair and rehabilitation of pipeline facilities.

FUNDED PROJECT
Wastewater Collection and Treatment Plant

313400: SE Stark Trunk Upgrade

Description: This project will upsize the existing trunk line serving the Stark Street Basin to remedy the current capacity limitations.. The sewer line will be upsized from 12" to 18" using pipe bursting methods to reduce the likelihood of potential surcharges.

Justification: This project provides sewerage system capabilities for transmitting current and projected sewerage flows. The existing trunk line is running at capacity and currently experiences occasional surcharges thereby exposing the City to risk of a sewer overflow.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

313700: East Basin Trunk Upgrade

Description: This project will correct surcharged areas of sewer line upstream of Burnside just north of SE 3rd Street. Additional capacity should be provided by upsizing of sewerline from 10" to 12", 12" to 15", 15" to 18, and 18" to 21". The East Basin Trunk serves the Springwater area and is currently flowing at capacity. Using pipe bursting methods to increase the pipes will alleviate current flow and prepare the system for anticipated development in the Springwater area.

Justification: This project provides sewerage system capabilities for transmitting current and projected sewerage flows.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

315000: McKinley Sewer Extension

Description: This project will decommission the existing Hunter's Highland lift station by providing a gravity sewer to the existing Pleasant Valley Interceptor. It will provide 8" sewer service up McKinley Road into Gresham Pleasant Valley. This project will also be funded by the formation of a reimbursement district.

Justification: This project will eliminate a lift station, reducing operational and maintenance costs associated with sewerage lift stations and extend the current reach of sewer service in Gresham Pleasant Valley to promote development.

Type of Project: Design and construction of facilities and utilities for operational and cost efficiencies.:

Estimated Dollars:

315300: WWTP Process Improvements

Description: This project will repair and replace existing unit processes and equipment identified in the March 2004 WWTP Master Plan Update. These include solids processing improvements, anaerobic digester cleaning and inspection, disinfection automation, upper plant aeration basin improvements, and primary clarifier improvements.

Justification: These are repairs and replacements needed for process continuity and replacement of antiquated systems and equipment. These provide for continued compliance with NPDES permit conditions.

Type of Project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

317000: Park Facility Improvements

Description: This project will provide funding to construct restroom facilities in City parks, open-spaces or along trails, that benefits water quality, public health and the environment. This project benefits various neighborhood districts. The next restroom will be constructed at Main City Park.

Justification: This project will provide restrooms where current facilities don't exist improving surface water quality as well as convenience for our citizens and wastewater rate payers

Type of Project: Construction

Estimated Dollars:

317100: WWTP Master Plan Update

Description: This project will evaluate and update the 2004 WWTP Master Plan Update by evaluating revisions to the City's NPDES wastewater discharge permit (i.e. new and/or more stringent water quality discharge limits) and process capacities and use. The update will identify additional WWTP capital improvements necessary for compliance with permit conditions and the impact of growth. This project serves the Cities of Gresham, Fairview and Wood Village. Project is 95% complete.

Justification: This project is needed to ensure the WWTP will meet changing water quality permit conditions and growth as regulated by local and federal agencies (DEQ and EPA).

Type of project: Engineering or architectural studies related to city services

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

317300: Atherton Pump Station Removal/Replacement

Description: This project will serve to decommission and remove the Atherton Wastewater Pump Station by designing and installing a gravity sewer system. This pump station installed in the 1970's has become antiquated and will be removed per the pre-design analysis. The pre-design phase included a replace vs. abandon analysis that evaluated the economic and environmental impacts of each option. Project is complete.

Justification: This project is needed to ensure continued reliability and level of service to the Atherton pump station service area.

Type of project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

317400: WWTP Asset Replacement and Refurbishment (R&R) Project

Description: This is an ongoing project that will design and construct the R&R of assets at the WWTP and wastewater pumping stations that are scheduled per our asset management plan. The Wastewater Divisions newly completed Asset Management Program has developed a comprehensive asset inventory, asset condition and long range asset replacement planning methodology. This methodology will ensure that the City is appropriately planning, evaluating and replacing Assets to ensure the lowest life cycle cost at an appropriate level of service with adequate long range funding for the projects. (CIP# 309700 is in response to breaks, such as repairing air line leaks, replacing flow meters, replacing digester gas lances, repairing rolling stock and other unanticipated items as needed)

Justification: This project is needed to ensure continued reliability and level of service to the WWTP and wastewater pumping stations at the lowest lifecycle cost.

Type of project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

317600: Wastewater Collection & Conveyance System Master Plan Update

Description: This project will evaluate and update the 2005 Wastewater Collection & Conveyance System Master Plan. This Master Plan examined projected growth in the City, developed projections of anticipated flow from existing and future residents and businesses, and provided a roadmap for increasing capacity in the system over a 20 year period to meet anticipated demands.

Justification: This project is needed to ensure the wastewater system will meet conditions and growth as regulated by local and federal agencies (DEQ and EPA).

Type of project: Engineering or architectural studies related to city services.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Wastewater Collection and Treatment Plant

317700: Collection System Asset Refurbishment and Replacement Project

Description: This project replaces operationally deficient and localized sections of the collection and conveyance system as needed in response to breakdowns. This localized repair or replacement strategy extends the useful life of pipeline assets that typically wouldn't be replaced until the expected (i.e.75 year) useful life of the asset has been reached. (CIP #313000, Pipe Rehabilitation/Maintenance Program addresses the planned and systematic replacement of end-of-life pipeline assets.)

Justification: This project will improve the operational aspects of the system thereby reducing future or recurring maintenance costs.

Type of project: Construction.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

317800: WWTP Outfall MicroHydropower Project

Description: This project will design and install a small scale hydropower turbine in the City's WWTP outfall in partnership with the Energy Trust of Oregon and the Oregon Business Energy Tax Credit Program. It is anticipated that the project will be reimbursed approximately 50% by grants (Energy Trust of Oregon), and Oregon Business Energy Tax Credits. The feasibility study has been completed and the project will proceed once grant acquisition and permit evaluation are finalized.

Justification: This project will produce continuous clean hydropower for the City.

Type of project: Design and construction of facilities and utilities for power production.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Wastewater Collection and Treatment Plant

318000: Linneman Pump Station Force Main Project

Description: This project funds the design and construction of force main modifications, predesign of a parallel force main and acquisition of parallel force main property for the Linneman wastewater pumping station. The Linneman Pump Station was replaced in 2008 with a larger facility capable of conveying wastewater flows from the Pleasant Valley and Springwater areas. The project is located in the South Gresham Neighborhood District.

Justification: The Linneman pump station has an 18” force main that is required to have periodic cleaning in order to ensure ongoing hydraulic capacity. This project will provide the facilities to accomplish the needed maintenance. It also provides an effort to scope out the future parallel force main alignment and begin to identify and acquire the needed property as approved.

Type of Project: Upgrade of existing facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater Collection and Treatment Plant

318100: WWTP Administration Building Rehab – Phase II

Description: This project funds the design and construction of the second phase of the Administration Building Rehab project. This phase of the project will completely restore the interior and exterior of the building and double the existing floor space to approximately 8,000 square feet of space. The project is located in the North Gresham Neighborhood District.

Justification: As determined in the Phase I Feasibility Study, this phase of the project will construct cost effective office, training and storage space for the City. This project will eliminate the need for new construction of this type at the WWTP at an otherwise more expensive construction cost per square foot.

Type of Project: Repair and rehabilitation of facilities.

Estimated Dollars:

**FUNDED PROJECT
Wastewater**

318200: WWTP Grease Recycling Facility – Phase I

Description: This project will construct a grease trap and grease interceptor waste recycling facility at the WWTP.

Justification: The 2009 Feasibility Study of a WWTP Digester Grease and Food Waste Injection System concluded that there is a market and need for restaurant grease haulers to recycle their collected grease. The brown grease waste that the haulers are collecting from restaurant sewer lines could be transported locally to the Gresham WWTP, injected in the existing digesters and increase the biogas production that can be used to produce energy. Phase I of this project is to evaluate the tipping fees needed and construct the facilities that will accept the grease. Phase II of the project will evaluate the grease availability and market conditions, the increase in biogas production, and construct the appropriately sized power generating facilities. The feasibility study concluded that the WWTP could generate more power than it uses and become energy independent with the completion of both phases of this project. The anticipated power production would save the City approximately \$250,000 per year.

Type of Project: Design and construction of facilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater

318300: WWTP SCADA System Improvements

Description: This project will construct Control and Software System Improvements at the WWTP. These improvements will modernize the existing hardware and software that operates the equipment and processes. This hardware includes computers, servers, programmable Logic Controllers, Fiber Optic cables and software.

Justification: The 2009 WWTP Supervisory Control and Data Acquisition (SCADA) System Master Plan identified control system asset refurbishment and replacement needs at the WWTP. These needs will ensure long term control system reliability and risk reduction. The existing control system has an asset age averaging 10 years and will become antiquated and unreliable without a reinvestment in the system. This project will design and construct control system upgrades to the hardware and software systems at the WWTP.

Type of Project: Repair and replacement of facilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater

318400: 1950's Pipe Rehabilitation/Maint. Program

Description: This ongoing project completes systematic pipeline rehabilitation and maintenance projects as identified from the Sanitary Sewer Evaluation Study project, or subsequently as determined from ongoing collection system condition assessment. It addresses operational ongoing and anticipated operational concerns, primarily with the oldest sanitary sewer lines (circa 1950s) around downtown Gresham, reducing long term operational and maintenance costs. The majority of this work will likely implement a combination of open trench, pipe bursting, and "cure-in-place" pipe lining methods. (CIP 317700 is in response to already deficient and localized sections of conveyance system).

Justification: This project allows the City to maintain current facilities at a level that will prevent additional future capital costs that would occur if the facilities are not maintained.

Type of Project: Repair and rehabilitation of pipeline facilities.

Estimated Dollars:

**FUNDED PROJECT
Wastewater**

318500: FOG Recycling Facility, Phase 2

Description: This project will construct additional Fat's Oils and Grease (FOG) receiving facilities and additional power generation facilities at the Gresham WWTP.

Justification: The FOG waste that haulers are collecting from restaurant grease traps and grease interceptors could be transported locally to the Gresham WWTP, injected in the existing digesters and increase the biogas production that can be used to produce energy. This Phase II of the project will evaluate the grease availability and market conditions, the increase in biogas production, and construct the appropriately sized power generating facilities. The feasibility study concluded that the WWTP could generate more power than it uses and become energy independent with the completion of both phases of this project. The anticipated power production would save the City approximately \$250,000 per year in avoided power costs and the FOG tipping fess would generate approximately \$150,000 per year in revenue.

Type of Project: Design and construction of new facilities

Estimated Dollars:

FUNDED PROJECT
Wastewater

318600: WWTP Buildings HVAC Upgrades

Description: This project will design and construct heating, ventilation and air conditioning (HVAC) system upgrades for the WWTP.

Justification: The WWTP admin building was first constructed in the 1970's. The building has been expanded twice over the years and as it was expanded the existing HVAC system has been expanded or modified as needed. The original furnace, ductwork and controls are still in place and have been determined through condition assessment, to be antiquated and need to be replaced or refurbished. The new HVAC system will be more automated and provide a much more energy efficient system utilizing the WWTP hot water loop system that is heated from the WWTP cogeneration system. In addition, all the ancillary process buildings will be evaluated to determine the most cost effective HVAC and odor control system upgrades needed.

Type of Project: Repair and rehabilitation of facilities.

318700: WWTP Small Wind Project

Description: This project will design and construct a new small wind turbine project at the WWTP.

Justification: This project will design and construct a small scale wind turbine at the WWTP. It is anticipated that the project will produce enough energy to pay for the capital portion of the project within 7 years. A detailed feasibility analysis will be completed as part of this project to determine the project payback and potential siting and permitting issues. In addition, this project will document available wind data at the WWTP to be used for future projects.

Type of Project: Design and construction of new facilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater

318800: WWTP Outfalls Condition Assessment

Description: This project will design and implement an outfall condition assessment project to evaluate the condition and estimate the remaining life of the WWTP outfalls from the WWTP to the Columbia River.

Justification: The WWTP has 3 outfall pipelines that were installed between the WWTP and the Columbia River. They were installed between 1954 and 1997 and each is approximately 1 mile long. This project will conduct an assessment of the 3 outfalls to determine their existing condition and capacity. This will require sending a camera down each outfall and rating the pipe condition based on varying factors including, cracks, wear, infiltration, sediment accumulation and others. This project will ensure that the outfalls are in a known condition that will limit the risk of future failures of the pipes.

Type of Project: Repair and rehabilitation of facilities.

Estimated Dollars:

FUNDED PROJECT
Wastewater

318900: Linneman Pump Station Parallel Force Main, Phase 1.

Description: This project constructs the first phase of a parallel force main for the Linneman Pump Station as identified in the 2005 Linneman Pump Station Master Plan. The project consists of the first phase of construction consisting of approximately half of the new force main.

Justification: This project will ensure ongoing reliability requirements for the Linneman Pump Station.

Type of Project: Design and construction of new facilities.

Estimated Dollars:

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

312000: WWTP UV Disinfection

Description: This project constructs additional wastewater disinfection capacity at the Wastewater Treatment Plant (WWTP). Total cost for this project is estimated to be \$4.0M. The project is located in the North Gresham Neighborhood District.

Justification: The project will expand the current WWTP disinfection process to accommodate increased wastewater flows. The 1997 Wastewater Facilities Plan identified the need for additional disinfection capacity and it proposed installation of a UV disinfection process. Timing for this project is contingent upon several factors including State and Federal environmental regulations.

Type of Project: Construction of facilities and utilities for growth and new NPDES permit requirements.

Estimated Dollars:

Funds ▼	Description ▼	Total

	Admin (14%)	13,116
Expenses Total		106,800

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

314700: Upsize Johnson Creek Interceptor

Description: This project will upsize approximately 2100 feet of the existing Johnson Creek interceptor from 15" to 21" diameter pipe. The pipe segment is located between Regner Rd. and Hogan Rd. This will provide necessary wastewater conveyance capacity to serve the proposed SE Gresham UGB expansion.

Justification: This project is needed to ensure adequate wastewater conveyance capacity will be available to serve the proposed SE Gresham UGB expansion.

Type of Project: Design and construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	210,330
	SDC	630,990
Resources Total		841,320
Expenses	Design/Const Admin	73,000
	Construction	665,000
	Admin (14%)	103,320
Expenses Total		841,320

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

315200: 185th Ave. Lift Station & Force Main

Description: This project will expand the 185th Avenue Pump Station and forcemain to meet future growth requirements per the Wastewater Master Plan and pending development actions in the Columbia South Shore.

Justification: This project is needed to ensure the 185th Avenue Lift Station has the capacity (wet well, pumping and forcemain) to meet anticipated future wastewater flows.

Type of Project: Design and construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	867,567
Resources Total		867,567
Expenses	Design/Const Admin	285,960
	Construction	475,064
	Admin (14%)	106,543
Expenses Total		867,567

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

315400: Upper Plant Secondary Clarifier No. 5

Description: This project will design a new secondary clarifier No. 5 at the WWTP. As identified in the March 2004 WWTP Master Plan Update following construction, this project would provide increased WWTP capacity and redundancy as needed for projected growth and increased flows to the WWTP.

Justification: This project would provide increased WWTP capacity to provide treatment for projected growth and increased flows to the WWTP. In addition, the project is needed to provide a redundant secondary clarifier to the existing clarifier No. 4. Currently, failure of secondary No. 4 would result in not meeting NPDES permit requirements.

Type of Project: Design and construction of facilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	2,682,369
	Debt-SDC	10,729,476
Resources Total		13,411,845
Expenses	Design/Const Admin	11,216,771

Expenses Total		13,411,845

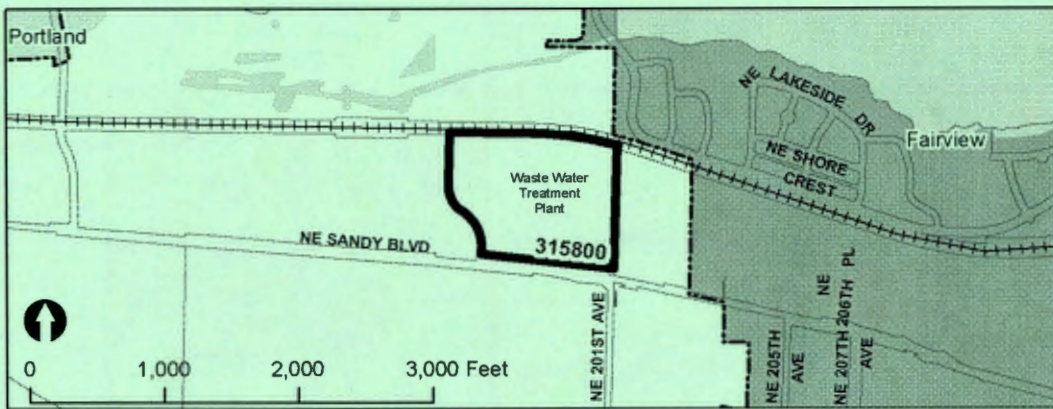

**UNFUNDED PROJECT
Wastewater Collection and Treatment Plant**

315800: Upper Plant Primary Clarifier No. 6

Description: This project will construct primary clarifier 6 in the upper plant, as identified in the 2004 WWTP Master Plan.

Justification: Additional primary clarification surface area is required to handle the projected worst case peak hour wet weather flow.

Type of Project: Construction of new WWTP Processes.

Estimated Dollars:

Funds ▼	Description ▼	Total
Resources	SDC	5,859,206
Resources Total		5,859,206
Expenses	Design/Const Admin	619,391
	Construction	4,520,264
	Admin (14%)	719,551
Expenses Total		5,859,206

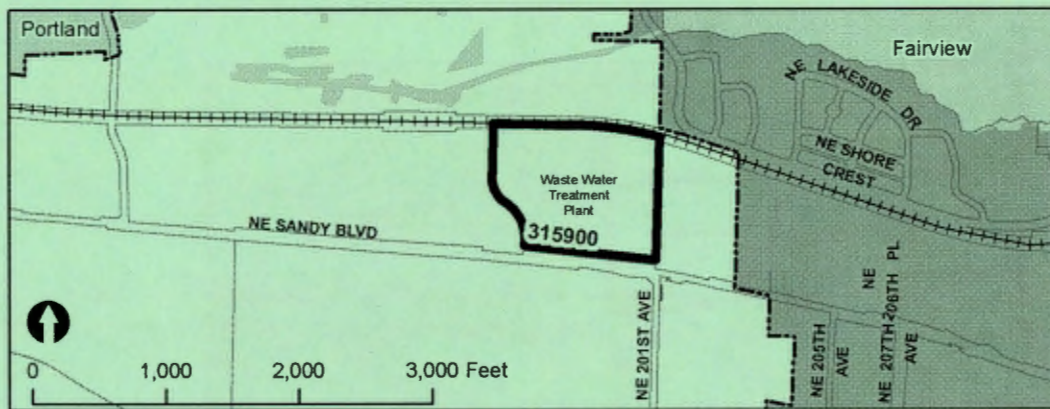

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

315900: Biosolids Storage Facility Expansion

Description: This project expands the biosolids storage facility by 3 new bays as identified in the March 2004 WWTP Master Plan Update as "WWTP Phase 3 Expansion". This project includes an additional \$1.2M in FY14/15.

Justification: It is anticipated that the biosolid storage capacity will be insufficient in order to meet regulatory requirements. An additional volume of biosolids storage capacity is needed to ensure that the required/recommended 60 days of biosolids storage is available. This project will expand facility, thereby meeting biosolid storage requirements.

Type of Project: Construction of new WWTP Processes.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	1,725,116
Resources Total		1,725,116
Expenses	Design/Const Admin	252,210
	Construction	1,261,050
	Admin (14%)	211,856
Expenses Total		1,725,116

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

316000: Upper Plant Aeration Basin No. 5

Description: This project will construct Upper Plant Aeration Basin No. 5 as identified in the March 2004 Master Plan Update. The new basin will be similar in size to the existing basin 4. New blowers will be added in the existing upper plant blower building.

Justification: The project will be required in anticipation of future ammonia nitrogen limits in the WWTP NPDES Permit. The new limit would require an approximate 7.3 day SRT in the aeration basins at projected future flows.

Type of Project: Construction of new WWTP Processes.

Estimated Dollars:

Funds ▼	Description ▼	Total
Resources	SDC	9,831,990
Resources Total		9,831,990
Expenses	Design/Const Admin	1,724,910
	Construction	6,899,642
	Admin (14%)	1,207,438
Expenses Total		9,831,990

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

316100: Anaerobic Digester No. 3

Description: This project constructs a new anaerobic digester and new belt filter press as identified in the March 2004 WWTP Master Plan Update as "WWTP Phase 5 Expansion".

Justification: The project is needed to ensure that a 20-day SRT at average daily flow is achieved. In addition, the increased digester treatment capacity will need to be complimented with one additional belt press for solids dewatering.

Type of Project: Construction of new WWTP Processes.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	18,485,803
Resources	Total	18,485,803
Expenses	Design/Const Admin	3,023,175
	Construction	13,192,441
	Admin (14%)	2,270,187
Expenses	Total	18,485,803

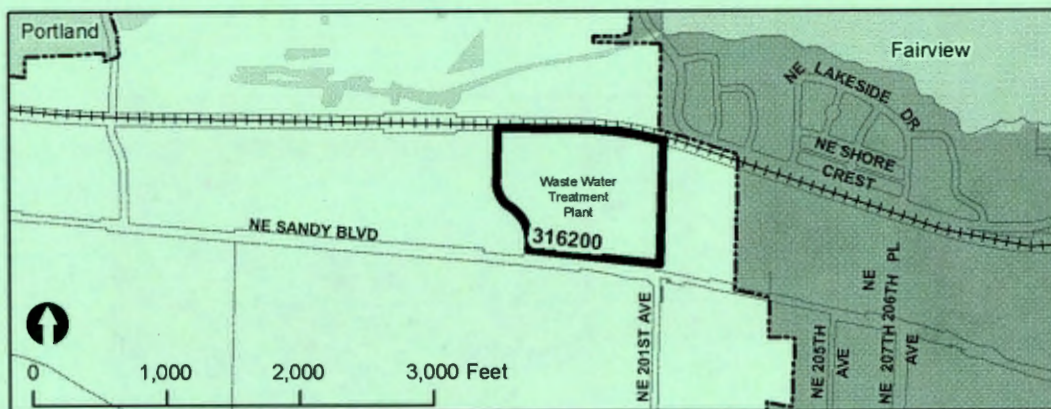

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

316200: Upper Plant Primary Clarifier No. 7

Description: This project will construct a new primary clarifier 7 and expands the biosolids storage facility as identified in the March 2004 WWTP Master Plan Update as "WWTP Phase 6 Expansion". The project will design and construct new facilities to accommodate growth and increased flows and loading to the WWTP.

Justification: This project will provide for continued 60 days of biosolids storage capacity at the WWTP for wet weather events during which the City cannot land-apply biosolids.

Type of Project: Construction of new WWTP facilities.

Estimated Dollars:

Funds ▼	Description ▼	Total
Resources	Operating	11,632,468
Resources Total		11,632,468
Expenses	Design/Const Admin	1,669,260
	Construction	8,534,659
	Admin (14%)	1,428,549
Expenses Total		11,632,468

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

316400: WWTP Solids Process Improvements

Description: This project will construct solids process improvements as identified in the 2004 WWTP Master Plan. These include improvements to allow co-thickening of the lower plant and to allow 24 hour belt press operation.

Justification: Co-thickening of the lower plant will reduce the volume required of the digesters and, as a result, will postpone the need for digester improvements.

Type of Project: Construction/retrofit of existing facilities.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	1,200,250
Resources Total		1,200,250
Expenses	Design/Const Admin	154,011
	Construction	898,840
	Admin (14%)	147,399

UNFUNDED PROJECT
Wastewater Collection and Treatment Plant

316500: Linneman Pump Station Parallel Force Main

Description: This project constructs additional capacity at the Linneman Pump Station as identified in the 2005 Linneman Pump Station Master Plan. The project consists of a parallel force main and additional pumps at the pump station.

Justification: This project will provide the needed capacity for additional growth in the Johnson Creek Basin, including the Pleasant Valley and Springwater areas.

Type of Project: Construction of new facilities.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	3,894,500

Funded Projects

Overview

The Water Capital Improvement Program provides for the planning, engineering, and construction of improvements to the City's drinking water system. The program includes projects for installing new distribution system water lines, replacing existing water lines, construction of new water reservoirs, major water reservoir maintenance and repair, as well as evaluation of adequate funding for all water system facilities. Other components of the Capital Improvement Program are security monitoring improvements and proactive safeguards for vital facilities, including the Cascade well field. All of these projects align with the latest Water System Master Plan, adopted by the City Council November 2005.

Highlights

One of the primary goals of the Water Program is to ensure that this community's drinking water supplies are protected, available, and affordable now and into the future. Another goal is to continually evaluate, and change when possible, business methods so that they align with the City's sustainability directives.

The following list provides examples of projects that support the Water Program's goals:

1. Water Service and Meter Upgrades #408700
2. Water System and Supply Studies #416000
3. Water Facility Security Systems #420300
4. Gabbert Reservoir Replacement #421500
5. Salquist Water Line West #422800
6. NE Hood Ave. – NE 22nd to Highland Elementary #425900
7. Large Meter Replacement Project, Phase 2 #426200

FUNDED PROJECT
Water

400300: Water System Improvements

Description: This project supports water system repair and rehabilitation through improvements such as waterline relocations and replacements and facilities protection as needed. This project is located in various neighborhood districts within the City.

Justification: This project serves existing customers by protecting facilities during construction by others, and by maintaining service continuity, system reliability and fire protection. Some of these project costs are recoverable from other public agencies, utilities or private developers. The desired outcome is to minimize service outages, protect the integrity of the system and maintain water quality. This project also replaces undersized facilities and relocates fire hydrants to meet ADA requirements as part of other small scale transportation related projects. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Water

400600: Waterline Oversizing

Description: This project represents City contributions to miscellaneous oversizing of waterlines designated in the Water Master Plan or system modeling. Gresham will consider cost reimbursements, as established by Council resolution, for waterline oversizing above 8" in size and updates for new hydrant installations, if required by the City. This project also supports construction of water facilities to provide additional fire flow to specific areas of the city. The project is located in various neighborhood districts.

Justification: These contributions allow the City to assist in or provide for the upgrade of inadequate facilities and improving fire flows that accommodate new development. Project funding will be drawn from the forward-looking SDCs collected from new service connections. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth.

Map: Refer to the City of Gresham Neighborhood Districts:

FUNDED PROJECT
Water

407500: Birdsdale Trans. Line (NW 1st – NW 3rd Street)

Description: This project installs approximately 400 feet of 12" .D.I. and 680 feet of 8" D.I., hydrants and services. It is located on NW Birdsdale Avenue between NW 1st and NW 3rd Street within the Intermediate service level. The project is located in the Northwest Neighborhood District. This project is currently in design and will be constructed in the spring of 2011.

Justification: This project will replace a 4" O.D. waterline which is undersized and deteriorating, located in the Intermediate service level waterline between NW 1st Street and NW 3rd. (Existing/Future Customer Benefit: 100% / 0%)

Type of Project: Construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

FUNDED PROJECT
Water

408700: Water Service and Meter Upgrades

Description: This project is to correct deficiencies by upgrading or replacing outdated and deteriorated water services and large meters (1 1/2" and above). These meters are located in underground vaults which are also in need of updating for safer entry or access. Where necessary, this project also includes the purchase of property or easements required to install new metering facilities as some of these meters are on private property and are difficult to access. This project also allows for the installation of Automated Metering Infrastructure (AMI) for all the large meters. The project is located in various neighborhood districts.

Justification: The project upgrades or replaces existing water service facilities including valves, service lines, meters, vaults, and other items required. Many large meters are currently near or past their design life, are no longer serviceable, or contain lead weight checks. Many vaults containing meters do not meet current OSHA standards and are inaccessible. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Construction of facilities and utilities to correct deficiencies.

FUNDED PROJECT
Water

410600: Water System Master Plan

Description: The Water System Master Plan must be updated every five years to account for changes in projected development, economic conditions, water system priorities and condition of existing assets. This project will incorporate the findings of the Capital Maintenance Plan into a comprehensive Master Plan which will identify CIP projects that are both maintenance and growth related. The project benefits all water service levels and neighborhood districts. This project will go out for an RFP in the spring of 2011.

Justification: This study will provide the necessary and effective direction to our long-range Water Capital Improvement Program, future growth, and financial requirements. (Existing/Future Customer Benefit: 50% / 50%)

Type of Project: Engineering study related to city services.

Estimated Dollars:

FUNDED PROJECT
Water

416000: Water System and Supply Studies

Description: This project funds studies that evaluate water supply options for meeting current and future water system reliability and demands that help ensure the City's compliance with state and federal water system mandates. Included in this project is funding for utility supply investigations, studies of urban growth boundaries, water supply option evaluations, and water treatment and water quality evaluations. The study includes infrastructure, financing and programming elements: e.g., reservoir storage capacity, wholesale rates, wellhead protection and water conservation program requirements. The project supports water service levels and various neighborhood districts. Grant has not been secured from the State of Oregon Infrastructure Finance Authority.

Justification: This project supports the evaluation of future impacts to Gresham from infrastructure improvements and expansions to the Portland Water Bureau source of supply or the improvements made to the groundwater source of supply as well as impacts due to state and federal drinking water regulations. (Existing / Future Customers Benefited: 50% / 50%)

Type of Project: Engineering Studies Related to City services.

FUNDED PROJECT
Water

416200: NW Wallula & Overlook Waterline Project

Description: This project installs 3,700 L.F. of 12" D.I. waterline in NW Wallula between SW Eastman Parkway and NW 1st Street, and between NW 4th Street and NW Division Street. The project is located in the Northwest and Hollybrook Neighborhood Districts. This project is currently in design and will be constructed in the spring of 2011.

Justification: The Wallula waterline project replaces a badly deteriorated waterline with a high record of needed repairs and greatly improves system flows and reliability to the Northwest Neighborhood District. The first phase of this project to replace roughly 400 LF of waterline between NW 1st and 4th Streets was completed in 2006. The final construction phase will complete the remainder of the project. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Construction of facilities and utilities to correct material and infrastructure deficiencies.

Estimated Dollars:

FUNDED PROJECT
Water

420300: Water Facility Security Systems

Description: This project provides security monitoring systems and other recommendations provided by the vulnerability assessment study and emergency response plan completed June 2004 by CH2M-Hill for Gresham's water infrastructure. An update to the vulnerability assessment is currently underway and should be completed by late spring 2011. Projects identified in the update will be constructed in this project. This project is located in various neighborhood districts.

Justification: This project will reduce the City's vulnerability to physical, water quality, and cyber attacks. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Construction to enhance security of facilities.

Estimated Dollars:

FUNDED PROJECT
Water

421500: Gabbert Reservoir Replacement – Phase 1

Description: The Gabbert Reservoir is currently undersized to meet the future growth demands of Pleasant Valley area specifically around the Persimmon Development and is seismically unstable. The Master Plan called for the construction of a one million gallon reservoir to replace the existing 200,000 gallon reservoir along with 1,320 feet of new 12-inch ductile iron water line to connect the reservoir to the Gabbert Pump Station. Most of the funding was to come from SDC's. However, growth to accommodate the expansion of the reservoir is likely many years out while the seismic threat remains. Therefore, this project has been split into two Phases. Phase 1 will replace the reservoir to accommodate the existing customers. Phase 2, an unfunded project, will construct another reservoir when and if demand deems the project necessary.

Justification: This reservoir will serve the Gabbert Service Level for domestic water service and fire flow protection. The Gabbert Reservoir is an aged facility which undersized and is not seismically secure as identified in the 2006 Water System Master Plan. When this reservoir and connecting water lines are constructed, the existing Gabbert Reservoir will be salvaged. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: New construction for new growth as well as replacement of aging infrastructure.

Map: Refer to the City of Gresham Neighborhood Districts Map.

FUNDED PROJECT
Water

422000: SW Blaine Waterline (Gresham Butte – Gabbert)

Description: This project installs 1,300 L.F. of 12" D.I. waterline and 600 L.F. of 8" D.I. waterline. The project is located in the Gresham Butte Neighborhood District.

Justification: The new 12" waterline has been installed in an existing unimproved right-of-way on SW Blaine and will provide an improved location for operation and maintenance. The new 8" waterline has been installed in the existing Parks trail. (Existing/Future Customers Benefited: 100% / 0%)

Type of Project: Construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Water

422100: SE Orient Waterline

Description: This project installs 1,100 LF of 12" DI on SE Orient between SE Anderson and Welch, and 3,500 LF of 12" DI between SE 31st and 282nd. This project is located in the Kelly Creek Neighborhood District.

Justification: The existing waterlines in SE Orient are currently undersized to support additional growth, and also require regular repair and maintenance. A major portion of the project will be waterline in a new area. This project will provide a crucial link between Lusted PS #2 and Wheeler Reservoir, improve system performance and fire flows to the surrounding areas, and reduce repair and maintenance activities. When completed, this project will serve as a major “backbone” waterline for water service into the Springwater Development Area. (Existing/Future Customers Benefited 20% / 80%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

FUNDED PROJECT
Water

422500: SCADA System Upgrades

Description: This project installs a new Supervisory Control and Data Acquisition (SCADA) system at the Water Operations Center, and to provide a real-time, read-only link to the water distribution system computer model at City Hall. This is the second phase which should complete the upgrades to our reservoirs and pump stations.

Justification: This project will benefit both Water Operations and Water Engineering through the use of new computer software and hardware to better control the distribution system and enhance the use of the Water Division’s hydraulic water model to determine flow, pressure, water age, and water quality conditions at any point in the distribution system at any time. (Existing/Future Customers Benefited: 100%/0%)

Type of Project: Upgrade and replace facilities and utility infrastructure.

Estimated Dollars:

**FUNDED PROJECT
Water**

422800: Salquist Water Line - West

Description: This project installs 1000 LF of 12-inch D.I. pipe on SE Salquist Road between SE Paloma and SE Douglas Streets. This is the first phase of a comprehensive pipeline replacement project on SE Salquist Road between SE Orient Drive and SE 282nd Avenue. This project serves the Lusted Service Level and is located in the Kelly Creek Neighborhood District.

Justification: Much of the existing waterline on SE Salquist Road is currently undersized and unable to provide an adequate level of service for the new development that is occurring in this area. Additionally, much of the older sections of the pipeline have proven to require more maintenance and repair work in recent years. This project when completed will provide a critical link between the Salquist Pump Station and the Wheeler Reservoir (as well as the rest of the Lusted Service Level).

Type of Project: Construction of facilities and utilities to correct existing deficiencies and provide for future growth.

Estimated Dollars:

FUNDED PROJECT
Water

422900: Kane Road Transportation Coordination Project

Description: This project constructed a new 10” ductile iron water line that replaced the existing 8-inch cast iron water line under Kane Road. This project is located within the Lusted Service Level and is in conjunction with Transportation (522700) and Stormwater (918000). Project is complete.

Justification: The Transportation Division is planning large-scale improvements on Kane Road south of Division Street. Since the alignment, width and grade of the road will be modified, the Water Division will make the necessary improvements and upgrades to the water line in Kane Road which includes upgraded materials, relocation of services and fire hydrants, and an upgrade in the pipe material from cast to ductile iron. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Repair and rehabilitation of existing facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Water

423400: Residential Meter Replacement Program

Description: The City of Gresham has over 16,000 residential water meters. In 2009, the City of Gresham was awarded an American Recovery and Reinvestment Act (ARRA) loan/debt forgiveness to replace all of the residential meters with an Advanced Metering Infrastructure (AMI). The AMI system will allow meters to be read from the City Hall, eliminating the need to manually read the meters. The loan/debt forgiveness was awarded through the Drinking Water State Revolving Fund (SRF) and will be administered through the Oregon Business Development Department (OBDD, formerly Oregon Economic Development Department). This project was deemed a “green” project by OBDD. The award consists of 2,000,000 in a low interest 20 year loan and 2,000,000 in “debt forgiveness” which is essentially a grant.

Justification: Water meters as they age become less accurate in the measurement and delivery of domestic water. The industry standard for the replacement of residential water meters is 15 – 20 years. Residential water meters in Gresham have been installed over the years with no established program of replacement. This project will replace all of the residential meters by spring 2011. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Replacement of aging infrastructure.

This project is funded with federal funds from the American Recovery and Reinvestment Act through the Safe Drinking Water Revolving Loan Fund

FUNDED PROJECT
Water

423600: NE Juniper Court Waterline Replacement

Description: This project installs 460 L.F. of 6" D.I. waterline on Juniper Court from NE 19th Street to the end of the cul-de-sac. The project is located in the Northeast Neighborhood District. This project is ready for construction in spring 2011.

Justification: The NE Juniper Court waterline project replaces severely deteriorated 4" water service line installing a 6" waterline to the end for improved service and fire flows that will be corrected with this project. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Construction of facilities and utilities to correct material and infrastructure deficiencies. Replacement of aging infrastructure.

Estimated Dollars:

FUNDED PROJECT
Water

425000: Intermediate Service Level Pump Station Installation

Description: This project constructs a pump station to support the Intermediate Service Level. The project includes consultant services, property acquisition and construction of a pump station and associated infrastructure.

Justification: This pump station will support both the existing system with redundancy and operational flexibility as well as support future growth. The pump station will be designed to meet the capacity if the Division Street Pump Station were to fail. The pump station will also be sized to accommodate future growth of the Pleasant Valley area.. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth.

FUNDED PROJECT
Water

425300 : Capital Maintenance Plan

Description: This project develops a 20 year Capital Maintenance Plan (CMP). The CMP will identify operating and maintenance projects such as replacing aged and deteriorating infrastructure including waterlines, valves, pump stations, etc. which were not identified in the 2006 Master Plan Update. The projects identified in the CMP will supplement the list of projects identified in the 2006 Water System Master Plan.

Justification: The COG Water Master Plan was updated in June 2006. The Master Plan identified projects which are generally growth related but did not address operational and maintenance projects that are capital projects. In order to identify those projects, this study will examine the replacement and upgrade needs for waterlines, pump stations, reservoirs, valves, hydrants and meters. This new list of operational and maintenance projects can then be added to the list of projects identified in the Master Plan to give a complete list of capital improvement projects.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

Water

425600 : Capital Maintenance Projects

Description: This project anticipates the projects which will be identified in the Capital Maintenance Plan (CMP). Projects will include replacement of aging infrastructure which could include waterlines, pump stations, valves, and hydrants.

Justification: It is anticipated that the Capital Maintenance Plan (CMP) will be completed in June of 2011. The plan will examine system deficiencies within the existing water system. This plan will also be used in the Master Plan Update scheduled for 2010/2011 as well as a starting point for an Asset Management Plan. The projects identified in the plan will be funded through the Repair/Replacement Reserves fund. (Existing/Future Customer Benefit: 100%/ 0%)

Type of Project: Repair and rehabilitation of facilities and utilities to correct deficiencies.

Estimated Dollars:

FUNDED PROJECT
Water

425700 : Reservoir Security

Description: This project enhances security at all of our reservoirs by installing a second locked entry hatch to cover the existing entry hatch. This will allow for a response time in the event of the new hatch opening and tripping the alarm. The intruder would still need to open the existing locked hatch. This project is currently under design and should be completed by spring 2011.

Justification: The Vulnerability Assessment (VA) completed in 2004 examined the existing water system security and identified projects to improve security throughout the water system including our reservoirs. One of the recommendations of the VA was to install a secondary steel hatch to allow a response time in the case of an intruder. This project will add a second hatch to all the reservoirs and will be paid for by a grant. (Existing/Future Customer Benefit: 100%/ 0%)

Type of Project: Security of existing facilities.

Estimated Dollars:

FUNDED PROJECT
Water

425800 :NE 8th – NE Kane to NE Hacienda

Description: This project installs approximately 950 of 8” DI on NE 8th between NE Kane and NE Hacienda. The project will allow an area which historically had low pressure served on the Grant Butte pressure system to be switched to the Intermediate service level.

Justification: Recent water line improvements completed on the NE Kane transportation project have looped the Intermediate service line on SE Kane into SE Division. This looping has presented an opportunity to convert an area that has historically had less than ideal pressure to a service level that would provide a pressure allowing for an increased fire flow capacity. (Existing/Future Customer Benefit: 100%/ 0%)

Type of Project: Repair and rehabilitation of facilities and utilities to correct deficiencies.

FUNDED PROJECT
Water

426100: Portland UV Treatment Buy-in

Description: The City of Portland is currently in the design phase to install an ultraviolet (UV) treatment system to comply with the Long Term 2 Enhanced Surface Water Treatment Rule (LT2). The estimated cost for construction is \$100 million with the City of Gresham’s portion estimated at \$5 million.

Justification: In January 2006 the EPA issued the LT2 rule in accordance with the Safe Drinking Water Act. The purpose of the rule is to reduce illness linked with Cryptosporidium. This rule requires water systems to install treatment which will inactivate or remove Cryptosporidium. The City of Portland has chosen to install UV treatment to meet this rule. Completion of the project is scheduled for 2014-15. The City of Gresham wishes to pay Gresham’s share, \$5 million, up front to avoid paying long term depreciation and rate of return. (Existing/Future Customer Benefit 100%/0%).

FUNDED PROJECT
Water

426200: Large Meter Replacement Phase 2

Description: The City of Gresham replaced 16,000 residential water meters in 2010 through an American Recovery and Reinvestment Act (ARRA) loan/debt forgiveness with an Advanced Metering Infrastructure (AMI). The AMI system will allow meters to be read from the City Hall, eliminating the need to manually read the meters. The City is applying loan/debt forgiveness through the Drinking Water State Revolving Fund (SRF) for the replacement of approximately 410 1.5 and 2.0 inch meters through the Oregon Infrastructure Finance Authority, formerly the Business Development Department (OBDD). This project is deemed a “green” project and an award will consist of \$750,000 in a low interest 20 year loan and approximately \$500,000 in “debt forgiveness” which is essentially a grant. Replacement of these meters will leave approximately 135 3.0 inch and larger water meters to replace in the future.

Justification: Water meters as they age become less accurate in the measurement and delivery of domestic water. The industry standard for the replacement of residential water meters is 15 – 20 years. Domestic water meters in Gresham have been installed over the years with no established program of replacement. This project will replace all of the 1.5 and 2.0 inch meters in Fiscal Year 2011/12. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Replacement of aging infrastructure.

UNFUNDED PROJECT
Water

402400: New Grant Butte Reservoir

Description: This project constructs a second reservoir on Grant Butte. The project includes consultant services and construction of a 2.2 MG prestressed concrete tank and associated facilities. The project is located in the Centennial Neighborhood District.

Justification: With the increase in system demand due to industrial growth, additional storage capacity will be needed. This project will be initiated when system demands are expected to exceed existing storage capacity. This project was identified as a 15 MG reservoir in the 1998 Water Master Study Plan to serve demand from Fujitsu. However, the 2005 Master Plan states much less service capacity is needed. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

	Admin (14%)	532,249
Expenses Total		4,334,024

UNFUNDED PROJECT
Water

406600: Public Water System Inter-ties

Description: This project provides emergency inter-ties between neighboring water suppliers and Gresham. Funding will upgrade the existing waterline inter-ties, facilities and equipment and establish new connections between the agencies as deemed necessary by both entities. Possible inter-ties with neighboring water suppliers include the City of Portland, Rockwood PUD, Lusted Water District, Wood Village and the City of Troutdale. The project is located along the common boundaries of our existing distribution system and in various neighborhood districts.

Justification: This project will allow emergency and water quality issues to be minimized and resolved without affecting customers of the participating water agencies. It funds emergency work to Gresham's public water system in cooperation with neighboring utility activities, and it will enhance the working relationship and partnerships between all water agencies. (Existing / Future Customers Benefited: 50% / 50%)

Type of Project: Construction and reconstruction of facilities and utilities for maintenance and growth.

Estimated Dollars:

UNFUNDED PROJECT
Water

406700: SW. 8th to 10th St. Waterline (Intertie)

Description: This project installs 1,000 L.F. of 8" or 10" D.I. waterline across a specific water easement between SW 8th and SW 10th. The project is located in Gresham Butte Neighborhood District.

Justification: When the 20" waterline running north of the Springwater Corridor Trail is shut down, adequate service is not provided to residents in the southwest part of the community. The existing 8" waterline that currently provides looping is undersized to fully support the demands of this area. During peak demand days and during repairs or emergency shutdowns, system reliability in this area will improve. This project is identified in the 1998 and 2005 Water System Master Plan.
(Existing/Future Customer Benefit: 0%/100%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies

UNFUNDED PROJECT
Water

407200: Birdsdales Avenue Waterline Project

Description: This project installs 1300 L.F. of 12" D.I. waterline on Birdsdales Avenue from Division Street to NW 12th Street. The project is located in the Northwest Neighborhood District.

Justification: Installation of a new water main on Birdsdales Avenue to NW 12th Street will provide capacity for development in the area as well as improved fire flow line capacity within this northwest neighborhood. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of new utilities to improve infrastructure looping and water transmission deficiency..

Type of Project: Installation of new infrastructure.

Map: Refer to the City of Gresham Neighborhood Districts Map.

UNFUNDED PROJECT
Water

408200: NE Division (Hogan Place to NE Hogan Drive)

Description: This installs 360 LF of 16" D.I., replacing an undersized waterline on Division Street from Hogan Place to NE Hogan Drive, and installs new services and fire hydrants. This project is located in the Grant Butte Service Level and in the North Central Neighborhood District, and benefits other water service levels as well.

Justification: This project replaces an undersized waterline, allowing large quantities of water to be moved from the Grant Butte service level to Intermediate service level through the Division Street Pump Station. This operational flexibility will enhance the widespread use of groundwater throughout the City's distribution system as the groundwater can be pumped out of the Grant Butte Service Level and into the Intermediate, Gabbert, Lusted, and South Hills Service Levels. The project also allows the Grant Butte service level to be fed directly from the Portland Water Bureau conduit tap at the Division Street Pump Station, providing greater capacity and flexibility in serving existing and future customers. (Existing / Future Customer Benefited: 50% / 50%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	88,921
	SDC	88,922
Resources Total		177,843

	Admin (14%)	21,840
Expenses Total		177,843

UNFUNDED PROJECT
Water

411400: Powell Blvd. -Marie Street Looping

Description: This project installs 350 L.F. of 8" D.I. waterline from SE Marie Street at house number 17830 south across Tax Lot 134 where it connects to the 8" line at the northeast corner of Highland View Apartments site (Tax Lot 88) for looping purposes. It also includes an inter-tie on Marie Street with the City of Portland. The project is located in the Centennial Neighborhood District.

Justification: This project provides system looping at the western boundary of Gresham's service area, improving flows and system performance. Currently, no facilities exist in the project area. This area was transferred to Gresham from Powell Valley Water in July 1991. Existing dead-ended lines create limited fire flows. (Existing / Future Customers Benefited: 70% / 30%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	60,516
	SDC	25,936
Resources Total		86,452
Expenses	Design/Const Admin	20,395
	Construction	55,440
	Admin (14%)	10,617
Expenses Total		86,452

UNFUNDED PROJECT
Water

413400: NW Bella Vista Park between NW. 3rd – 4th

Description: This project installs 420 L.F. of 8" D.I. waterline and hydrants. There is no existing waterline in NW Bella Vista Park (east side) between NW 3rd and NW 4th Streets. The new waterline will loop existing dead-end waterlines. The project is located in the Northwest Neighborhood District.

Justification: The project loops existing dead-end waterlines, improves water movement through the higher portion of the Intermediate Service Level, and retires an undersized and deteriorating waterline. It will upgrade the size to meet current needs of the surrounding residents and fire flows. (Existing/Future Customer Benefit: 90% / 10%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	93,367
	Debt-SDC	10,374
Resources Total		103,741
Expenses	Design/Const Admin	24,473
	Construction	66,528

Expenses Total		103,741

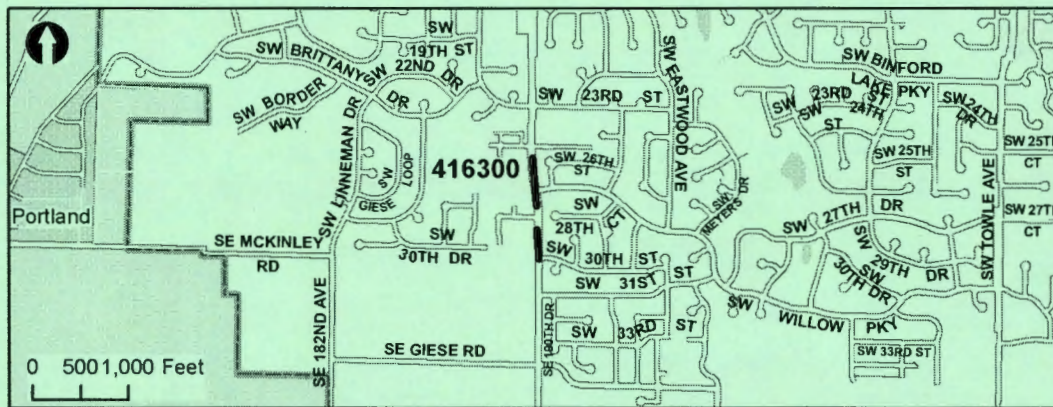

**UNFUNDED PROJECT
Water**

416300: SW 190th Ave. (Pleasant View) SW 26th to SW 30th

Description: This project installs 850 L.F. of 12" D.I. waterline on SW 190th Avenue, between SW 26th and SW 30th Street. The project is located in the Southwest Neighborhood District in the Hunters Highland Service Level.

Justification: There are segments of a 12-inch diameter "backbone" waterline in SW 190th Avenue. This project would connect and extend the segments in this area to complete a transmission line to the edge of the current City limit boundary and serve as a starting point for bringing South Hills/Hunters Highland water service into the Pleasant Valley area. In addition, there are a number of dead-end waterlines in the Hunters Highland service level. This project will provide a second loop to eliminate the dead-ends. Elimination of the dead-ends will improve fire flows and water quality.
(Existing/Future Customer Benefit: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total

	Admin (14%)	40,041
Expenses Total		326,046

UNFUNDED PROJECT
Water

417000: SW Viewcrest Dr. (East of Blaine)

Description: This project replaces approximately 600 L.F. of 2" PVC waterline with 600 L.F. of 8" D.I. waterline and services. The project is located in the Gresham Butte Neighborhood District.

Justification: The existing waterline is undersized and in poor condition, and fire flows for the area are inadequate. The project provides for needed domestic and fire flows to meet the needs of current and future development, and it will reduce repairs and maintenance activities. (Existing / Future Customers Benefited: 50% / 50%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	74,101
	Debt-SDC	74,101
Resources Total		148,202
Expenses	Design/Const Admin	34,962

	Admin (14%)	18,200
Expenses Total		148,202

UNFUNDED PROJECT
Water

417100: Hillyard (Water line crossing @ US HWY 26)

Description: This project replaces 750 L.F. of 6" D.I. on SE Hillyard Road under Highway 26 with 12" D.I. The project is located in the Mt. Hood and Kelly Creek Neighborhood Districts and serving the Intermediate Service Level.

Justification: The existing waterlines in this area that were undersized and deteriorating have been replaced with previous CIP projects and development projects. What remains is the last segment of 12" DI main which will link both sides of the water line along US Hwy 26 together. When the final segment under the highway is completed, not only will fire flow capabilities be improved, but the City will have another west-to-east "backbone" water line to move groundwater across the Intermediate Service Level so it can be made available for the Lusted Service Level and the new development in the Springwater Urban Reserve Area. (Existing/Future Customer Benefit: 25% / 75%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	143,421
	SDC	430,264
Resources Total		573,685
Expenses	Design/Const Admin	151,929
	Construction	351,303
	Admin (14%)	70,453
Expenses Total		573,685

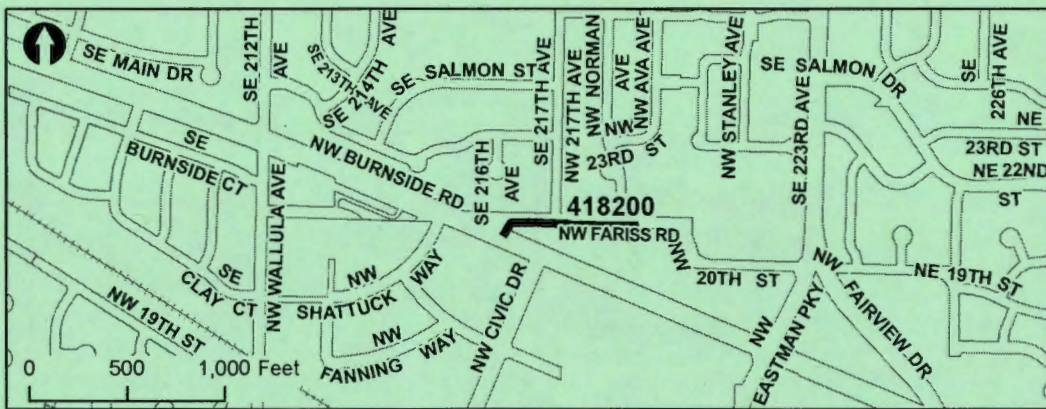

UNFUNDED PROJECT
Water

418200: NW Fariss Road

Description: The project installs 870 L.F. of 12" D.I. to replace deteriorating water mains in the area. This project is located in the Grant Butte Service Level and in the North Central Neighborhood District, and benefits other water service levels as well.

Justification: This project replaces an undersized and deteriorated waterline, allowing large quantities of water to be moved within the Grant Butte service level. This improvement will enhance the flow of water within Grant Butte service area, allow for increased development in the area, and enhance water reliability and fire flows. Existing / Future Customers Benefited: 50% / 50%)

Type of Project: Repair and rehabilitation of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	340,290
	SDC	340,290
Resources Total		680,580

	Admin (14%)	83,581
Expenses Total		680,580

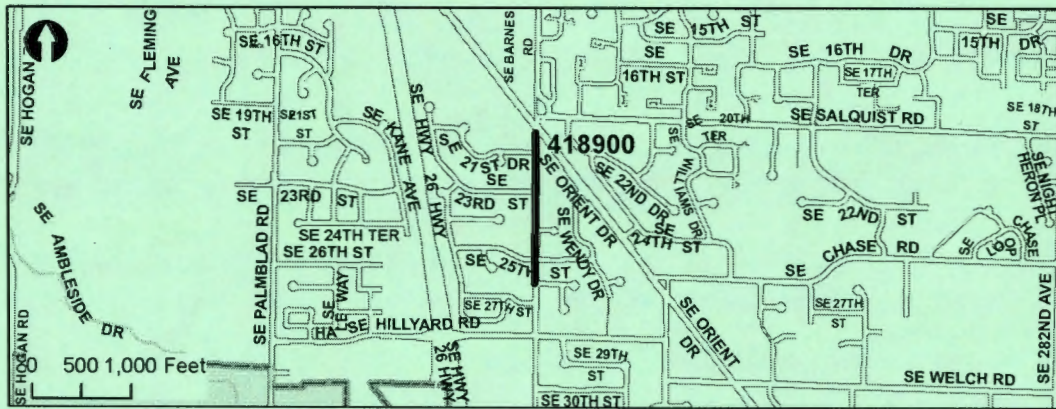

UNFUNDED PROJECT
Water

418900: SE Barnes Rd. Waterline (Orient – SE 26th Ct)

Description: This project replaces 1,550 L.F. of 8" cast iron waterline with 12" ductile iron waterline for the Intermediate Service Level, replaces services and installs fire hydrants. The project is located in the Kelly Creek Neighborhood District.

Justification: The project will provide transmission capacity and looping on the eastern Intermediate Service Level boundary to support future development and to maintain fire flow capacities for existing customers. When constructed, this water line will serve as part of the "backbone" system to bring water from the Intermediate Service Level into the Springwater Development Area. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth and to provide better service to existing customers.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	574,284
Resources Total		574,284
Expenses	Design/Const Admin	135,478
	Construction	368,280
	Admin (14%)	70,526
Expenses Total		574,284

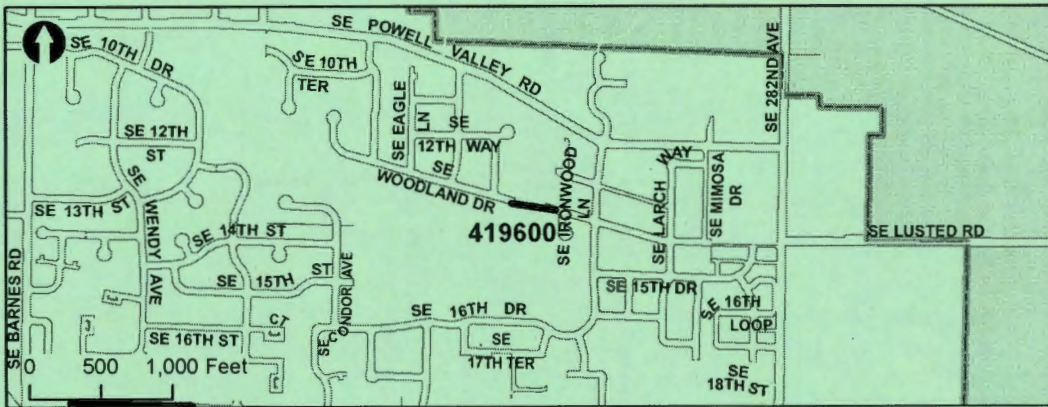

**UNFUNDED PROJECT
Water**

419600: SE Woodland Waterline

Description: This project installs 250 L.F. of 12" D.I. waterline across City property along the SE Woodland Way alignment between Sun Meadows and Eagle Terrace Subdivisions. The project is located in the Kelly Creek Neighborhood District and will serve the Lusted Service Level.

Justification: This project will provide water system looping in the Lusted Water Service Level, providing this area with increased storage capacity, fire flows and service continuity. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Debt-SDC	92,626
Resources Total		92,626
Expenses	Design/Const Admin	21,851
	Construction	59,400
	Admin (14%)	11,375
Expenses Total		92,626

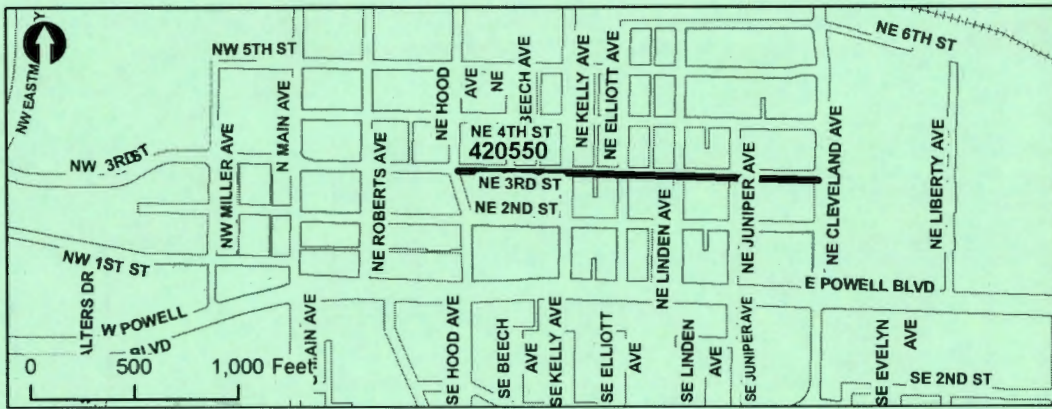

UNFUNDED PROJECT
Water

420550: NE 3rd Street (NE Hood to NE Cleveland)

Description: This project constructs 1,700 L.F. of 12" D.I. Waterline in the Grant Butte Service Level. In 2008/2009 part of this project was completed to accommodate the construction of the new Center for the Arts Plaza project. The first phase of replacement was between NE Hood and NE Kelly. The remaining section between NE Kelly and NE Cleveland will be constructed in 2012-2013. This project is located in the Central City Neighborhood District.

Justification: The adopted Water Master plan calls for the installation of an upsized water main along 3rd Street in front of the future Center for the Arts Plaza renovation. Fire flows in this area are not adequate for the current zoning designations. The Gresham City Council has adopted as a goal the accelerated development for the Center for the Arts Plaza adjacent to NE 3rd Street. The CIP improvement for 3rd Street shall be phased to allow for the Arts Plaza to be completed without future interruptions of service by the water main projects. By phasing in the water project, the needed water main improvements can be included within the same timing of the Center's renovation. Such a project will eliminate future conflicts from water main improvements in the future to the operation of the Center. (Existing / Future Customers Benefited: 25% / 75%)

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	159,317

Expenses Total		2,628,122

UNFUNDED PROJECT
Water

421100: Fire Hydrant Security

Description: This project funds the purchase and installation of tamper proof devices for existing public fire hydrants. This project may also fund the installation of water fill stations.

Justification: The City of Gresham does not currently require the installation of tamper proof fire hydrants in its development code. Installation of tamper-proof devices would eliminate the potential theft of water and reduce potential vulnerability to the water system. The tampering of water infrastructure can generate unaccounted-for water, causes potential contamination of the system and damage to facilities. The Division will be investigating the implementation of a security initiative to evaluate areas of concern and the development of a program to address this potential occurrence. Along with the assessment will include designated water fill stations to provide specific, approved locations for contractors to obtain construction water. (Existing / Future Customers Benefited: 100% / 0%)

Type of Project: Construction of facilities and utilities to correct deficiencies.

Map: Refer to the City of Gresham Neighborhood Districts Map.

Estimated Dollars:

Expenses Total		179,638

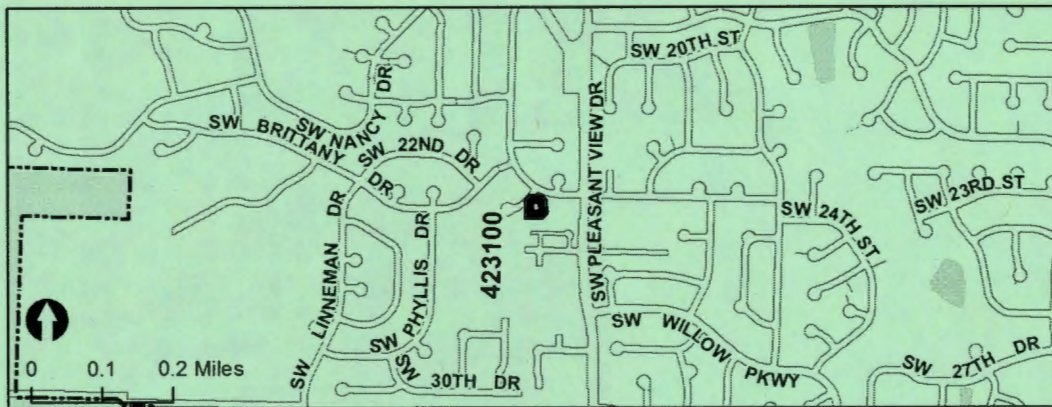

FUNDED PROJECT
Water

423100: Hunters Highland Pump Station Modifications

Description: The Hunters Highland Reservoir is limited on the amount of water available to meet the domestic or fire fighting needs of residential communities. The connection of the South Hills and Butler Reservoirs into Pleasant Valley will result in the need to rebalance reservoir supplies in the area through the installation of strategically placed control valves.

Justification: The Hunters Highland Reservoir provides a limited amount of domestic water due to the need to maintain system pressure in the areas of service. With the development of Pleasant Valley, the area will receive the introduction of water from two larger supply sources: South Hills and Butler Reservoirs. With these new connections being achieved, the Hunters Highland service area can have control valves installed which will reduce the demand currently placed on the reservoir, allow for greater accounting of water flow from one service zone to another and balance supply needs across the newly developing area. (Existing / Future Customers Benefited: 50% / 50%)

Type of Project: New construction for new growth as well as replacement of aging infrastructure.

Estimated Dollars:

UNFUNDED PROJECT
Water

424300: SE 19th Street, between SE Palmland and SE Cochran Drive

Description: This project replaces approximately 210 L.F. of 6" C.I. waterline and 340 L.F. of 6" C.I. Waterline with 550 L.F. of 10" D.I. waterline and services. The project is located in the Mt. Hood Neighborhood District.

Justification: Existing waterline is undersized to serve the existing zoning . This project provides the needed domestic service for current customers and it will provide the necessary supply to the Springwater area. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	169,815
Resources Total		169,815
Expenses	Design/Const Admin	40,061
	Construction	108,900

UNFUNDED PROJECT
Water

424400: SE Elliott Ave (end), north of SE 13th Ct

Description: This project installs 340 L.F. of 8" D.I. waterline. There is no existing waterline in SE Elliott Ave between SE 13 Ct and SE Dowsett Ln. The new waterline will loop existing dead-end waterlines. The project is located in the Gresham Butte Neighborhood District.

Justification: The project loops existing dead-end waterlines, improves water movement and increases available fire flows through the Intermediate Service Level. (Existing/Future Customer Benefit: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	83,982
Resources Total		83,982
Expenses	Design/Const Admin	19,812
	Construction	53,856
	Admin (14%)	10,314

UNFUNDED PROJECT
Water

424900: South Hills Service Level Pump Station Installation

Description: This project constructs a pump station located on the Butler Reservoir site to support the South Hills Service Level. The project includes consultant services, and construction of a pump station and associated infrastructure.

Justification: With the increase in system demand due to growth in the Pleasant Valley and Sprinwater areas, additional pumping capacity will be needed. This project will be initiated when system demands are expected to exceed existing storage capacity. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	1,984,510
Resources Total		1,984,510
Expenses	Design/Const Admin	554,860

	Construction	3,300,000
	Admin (14%)	664,155
Expenses Total		5,408,116

UNFUNDED PROJECT
Water

425400 : New Billing System

Description: The purpose of this project is to replace the City's existing utility billing system with a new system that can interface with the City's H.T.E. financial system, improve system performance and flexibility, provide meaningful business data and reports, and ensure reliability into the future.

Justification: The existing system was created in-house using a now antiquated operating Open VMS system in 1993. It was installed in 1995. There is limited staff knowledge and experience with this system, and it is difficult to extract data that can be utilized for reliable, accurate business reporting. Replacement of the billing system would be accomplished over a transition period of time in order to allow for installation, testing and validating, and staff training. The amount shown below is an estimate for the total system replacement and would be shared by the stormwater, wastewater and water utilities. Each funding share would be dependent upon the complexity of the rate structure and also the number of customers.

Type of Project: Replacement of an aging billing system.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	1,500,000
Resources Total		1,500,000
Expenses	Design/Const Admin	1,315,789
	Admin (14%)	184,211
Expenses Total		1,500,000

UNFUNDED PROJECT
Water

425500: Salquist Water Line - East

Description: This project installs 1500 LF of 12-inch D.I. pipe on SE Salquist Road between SE Glacier Ave. and SE Night Heron Way. This is the second phase of a comprehensive pipeline replacement project on SE Salquist Road between SE Orient Drive and SE 282nd Avenue. This project serves the Lusted Service Level and is located in the Kelly Creek Neighborhood District.

Justification: Much of the existing waterline on SE Salquist Road is currently undersized and unable to provide an adequate level of service for the new development that is occurring in this area. Additionally, much of the older sections of the pipeline have proven to require more maintenance and repair work in recent years. This project when completed will provide a critical link between the Salquist Pump Station and the Wheeler Reservoir (as well as the rest of the Lusted Service Level). To fully utilized the new groundwater supply resource, the City needs to have larger diameter distribution mains as a backbone to move water west to east from the Grant Butte Service Level (where the groundwater is introduced into the distribution system) to the Lusted Service Level through the Salquist Pump Station. (Existing/Future Customers Benefited 20% / 80%)

Type of Project: Construction of facilities and utilities to correct existing deficiencies and provide for future growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	148,202
	SDC	592,810
Resources Total		741,012
Expenses	Design/Const Admin	174,810
	Construction	475,200
	Admin (14%)	91,002
Expenses Total		741,012

**UNFUNDED PROJECT
Water**

426300: Gabbert Reservoir Replacement – Phase 2

Description: The Gabbert Reservoir is currently undersized to meet the future growth demands of Pleasant Valley area specifically around the Persimmon Development and is seismically unstable. The Master Plan called for the construction of a one million gallon reservoir to replace the existing 200,000 gallon reservoir along with 1,320 feet of new 12-inch ductile iron water line to connect the reservoir to the Gabbert Pump Station. Most of the funding was to come from SDC's. However, growth to accommodate the expansion of the reservoir is likely many years out while the seismic threat remains. Therefore, this project has been split into two Phases. Phase 1 will replace the reservoir to accommodate the existing customers. Phase 2, an unfunded project, will construct another reservoir when and if demand deems the project necessary.

Justification: This reservoir will serve the Gabbert Service Level and the Pleasant Valley area for domestic water service and fire flow protection. The Phase 2 project will install a second reservoir to specifically meet future growth demands.(Existing / Future Customers Benefited: 0% / 100%)

Type of Project: New construction for new growth as well as replacement of aging infrastructure.

Map: Refer to the City of Gresham Neighborhood Districts Map.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	500,000
Resources Total		500,000
Expenses	Design/Const Admin	87,718
	Construction	350,878
	Admin (14%)	61,404
Expenses Total		500,000

Funded Projects

Overview

The Transportation Capital Improvement Program provides for the planning, engineering and construction of improvements to the City's transportation systems that safely preserve existing infrastructure, increase roadway capacity, improve mobility and/or enhance neighborhood livability.

Highlights

Specific significant projects:

1. The Hood Street project will construct missing sections of sidewalk, add street trees and decorative street lighting to enhance an important pedestrian connection from the MAX line to downtown Gresham #523700
2. Project 502000 Street Surfacing Improvements will provide funding for city-wide pavement preservation projects meant to extend the life of the transportation network through investments in a variety of innovative preservation treatments.
3. SE 190th (Highland to 23rd) #523500 will construct safety and capacity improvements on SE 190th between Highland Dr. and Willow Parkway to insure the initial phases of growth in Pleasant Valley can begin while supporting the ultimate build out of the area.
4. Projects 519800 Intersection Improvements & 523800 Signal Maintenance and Upgrade together will insure the city is protecting its investment in the existing traffic signal system by providing crucial maintenance funds for aging signal infrastructure and provide for the construction of key capacity improvements and upgrades at critical intersections throughout Gresham.

These projects, as well as the remainder of the capital program, are intended to enhance the livability of the City, facilitate positive growth, increase safety, encourage access by all modes of transportation, and stimulate economic development of existing as well as new businesses.

FUNDED PROJECT
Transportation

City Funded and Federal Funded Projects

Several Transportation Projects are funded by a variety of funding sources, some of which are included in the City's Budget, and some of which are handled separately. The projects without the A show only those dollars that are included in the City's Budget. Projects ending in A show the entire project, including those funds that are not directly budgeted by the City.

Project	Project Name	Funding

FUNDED PROJECT
Transportation

502000: Street Surfacing Improvements

Description: This project funds asphalt overlays, slurry seals and other surface preservation treatments. The project also includes deflection testing, preparatory patching, crack sealing and microsurfacing of city streets that have been identified in the Pavement Management System (PMS). A percentage of the 502000 budget will complete full street reconstruction or provide match should local residents wish to cost share for street repairs not otherwise identified through the PMS. The project is located in various neighborhood districts.

Justification: These improvements are necessary to protect the investment in the transportation system through capital maintenance rehabilitation. The City through its pavement management system identifies the most cost effective treatments and locations for maintenance projects. Ratings continue to decline so the focus of these projects is to extend the life of the system through preservation treatments and not on total reconstructions.

Type of Project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

FUNDED PROJECT
Transportation

503600: Neighborhood Traffic Control

Description: This project installs neighborhood traffic control devices such as speed bumps, traffic circles, intersection improvements and other traffic-calming features. The project is located in various neighborhood districts. Project selection is based on an established rating system.

Justification: These improvements will help control speeding and other residential traffic problems that have become more apparent as the city grows and traffic volumes increase. The traffic control devices will help pedestrian and bicycle concerns, as well as area-wide speeding. Project selection will be based on traffic volumes, speed, accident history and presence of schools and other significant generators of pedestrian traffic.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

**FUNDED PROJECT
Transportation**

506300: Substandard Streets Upgrading

Description: This project will upgrade substandard local streets with paving, curbs, sidewalks, streetlights and storm drainage. Projects are dependent on grant funding such as Community Development Block Grants. The projects are located in various neighborhood districts. (No application was submitted for FY 11/12)

Justification: There are currently local streets which do not meet the current City standards. These streets were never approved by the City and consequently receive only minimal maintenance, typically requiring adjacent property owners to partially fund the maintenance activity.

Type of Project: Construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

FUNDED PROJECT
Transportation

510300: Development Coordination Projects

Description: This project funding will be used to leverage transportation revenue with new development projects or other projects within the Right-of-Way, resulting in transportation improvements beyond what either the new development or City resources could have accomplished alone.

Justification: Development projects often trigger a need for certain improvements that are not within the scope of the project, but need to be done to accommodate the off-site traffic impacts. This project creates a funding base to complement the developer's contribution and to accomplish needed off-site improvements.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

**FUNDED PROJECT
Transportation**

511700: NE Cleveland (Powell – Stark)

Description: This Project redesigns the road from Powell to Stark and a Phase 1 project improves the road from Powell to Division, acquires right-of-way, and installs new curb and gutter, sidewalks, storm drains, and streetlights. The project is located in the North Central and Central City Neighborhood Districts. This sheet reflects City expenses only. (See also 511700A.)

Justification: The existing roadway lacks adequate pavement width, sidewalks and lighting, which reduces its ability to provide safe and efficient transportation connections. This project supports the Regional 2040 Plan and will help connectivity between Powell and Stark.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

514100: Civic Neighborhood T.O.D.

Description: This project supports street infrastructure improvements that meet the adopted Gresham Civic Neighborhood Plan. The plan calls for increased street connectivity, and enhanced pedestrian streetscape amenities such as street furniture, wide sidewalks, textured crosswalks, and decorative streetlights.

Justification: The project supports development of the Gresham Civic Neighborhood, which is a model for future transit oriented development in the region.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

**FUNDED PROJECT
Transportation**

516000: 185th & Sandy

Description: This project builds the traffic signal and Boeing driveway to 185th.

Justification: This project will help decrease traffic congestion, it will improve motorist and non-motorist safety, and it will minimize delays to area transportation system users on major arterials. As Gresham continues to grow, it is necessary to increase the capacity at selected intersection locations to alleviate excessive vehicle delay and fuel waste. Project dependant on new development.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

517100: Stark St. Arterial Blvd. Project

Description: This project reconstructs the 190th to 197th segment of Stark. Street enhancements to be considered include: landscaped medians, pedestrian refuge islands, wide sidewalks, planter strips with street trees, utility undergrounding, pedestrian-scale lighting, bike lanes, transit enhancements, pervious pavements and other boulevard and green street treatments. This sheet reflects Transportation Program Area expenses only and does not include Rockwood Urban Renewal funding or grant payments made directly to private contractors by ODOT. Construction on this project began in Spring 2013 and with the exception of the plant establishment phase, is substantially complete. (Also see 517100A)

Justification: This project supports the Rockwood Region 2040 Plans, and it will improve the safety of transportation system users.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

**FUNDED PROJECT
Transportation**

519800: Intersection Improvements

Description: This project will construct needed capacity improvements to key intersections within the signal system furthering implementation of the Signal System and Communications Master Plan. Improvements include conversion of pedestrian traffic signals to full vehicular traffic signals, conversion of protected left turn phases to protected/permmissive left turn phases, traffic controller upgrades, adding right turn overlap phasing and adding additional travel lanes at intersections. Proposed projects include Burnside & Division Overlap Head, and Flashing Yellow Arrow Installations (approximately 48 approaches).

Justification: The 2001 Traffic Impact Fee Update Study identified the need for area-wide traffic signal system improvements. Overall system capacity can be improved at relatively low cost by employing a verity of individualized capacity improvements at key locations. Through this approach, life to the existing signal system can be extended and more extensive improvements will be avoided.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

**FUNDED PROJECT
Transportation**

519900: Project ROW Coordination TIF

Description: This project will coordinate early design, appraisal, and acquisition of right-of-way for Traffic Impact Fee projects that are scheduled in future years of the CIP. This facilitates timely project development by providing flexibility in project activities and taking advantage of lower right-of-way costs associated with undeveloped or underdeveloped properties.

Justification: The 2001 Traffic Impact Fee Update Study identified 40 needed transportation projects to be constructed over a 20 year period. Many of these projects need additional right-of-way. This project provides flexibility to acquire right-of-way in the next five years for projects that may not be built for 10 to 15 years from now. This will save project costs as it takes advantage of lower land values associated with undeveloped or underdeveloped properties.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

522600: Study Update TIF

Description: This project updates the previous 2001 Traffic Impact Fee (TIF) Study.

Justification: An updated TIF Study is necessary to assure equitable cost-sharing for infrastructure improvements between the public and private sectors. The overall project objective is to increase transportation system capacity, decrease congestion and improve safety for all transportation system users. This project will be complete FY 11/12.

Type of Project: Engineering study related to city services.

Estimated Dollars:

FUNDED PROJECT
Transportation

522700: Kane Road (Division to Powell Valley)

Description: This project realigns and reconstructs Kane Road from Division Street to Powell Valley Road. Improvements to Kane Road include widening the existing two-lane section to a five lane section (4 travel lanes plus left turn lane), adding bike lanes and new curbs and sidewalks to both sides, and signal improvements at SE 1st. Project is in conjunction with Water (422900) and Stormwater (918000). Project is substantially complete, with the exception of plant establishment.

Justification: This project will help decrease traffic congestion, improve motorist and non-motorist safety, and minimize delays to area transportation system users on major arterials. As Gresham continues to grow, it is necessary to increase the capacity at selected intersection locations to alleviate excessive vehicle delay and fuel waste.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

FUNDED PROJECT
Transportation

522800: Hogan Road (Glisan to Stark)

Description: This project will upgrade Hogan road to an arterial street standard, including curbs, sidewalks, bike lanes, median islands, and storm drainage. The project is located in the North Central Neighborhood District. Grant funding for this project is being provided through the 2009 American Recovery and Reinvestment Act. This sheet reflects City expenses only, and does not include grant payments made directly to private contractors by ODOT. This project is substantially complete with the exception of plant establishment. (See 522800A.)

Justification: The west side of Hogan Road between Glisan and Stark lacks sidewalks, drainage, and other urban street improvements that are necessary for pedestrian and bikeway needs, as well as traffic needs for a growing community. Hogan Road is one of the streets transferred from Multnomah County.

Type of Project: Construction of facilities and utilities to correct deficiencies.

This project is funded with federal funds from the American Recovery and Reinvestment Act through the Safe Drinking Water Revolving Loan Fund

Estimated Dollars:

522800A: Hogan Road (Glisan to Stark)

Description: This project will upgrade Hogan road to an arterial street standard, including curbs, sidewalks, bike lanes, median islands and storm drainage. The project is located in the North Central Neighborhood District. Grant funding for this project is being provided through the 2009 American Recovery and Reinvestment Act (ARRA). This sheet also includes grant payments made directly to private contractors by ODOT. (See 522800.) It should be noted that the grant amount shown below includes the full award that was made to this project under the ARRA allocation process, however, because not all grant funds are required to complete this project, excess ARRA funding not used for Hogan widening were utilized for pavement overlays on portions of Eastman, Burnside, and Kane. This project is substantially complete with the exception of plant establishment.

Justification: The west side of Hogan Road between Glisan and Stark lacks sidewalks, drainage, and other urban street improvements that are necessary for pedestrian and bikeway needs, as well as traffic needs for a growing community. Hogan Road is one of the streets transferred from Multnomah County.

Type of Project: Construction of facilities and utilities to correct deficiencies.

This project is funded with federal funds from the American Recovery and Reinvestment Act through the Safe Drinking Water Revolving Loan Fund

Estimated Dollars:

523500: SE 190th (Highland to 23rd)

Description: Install signal at the intersection of Pleasant View Drive and Highland Drive. Construct continuous left-turn lane on Pleasant View Drive (SW 190th) between SW 23rd St. and SW Willow Parkway. There will be a minimum width paved shoulder / bike lane on both sides of Pleasant View Dr. This is an interim project. Widening to the full 5-lane arterial cross section is included in the Pleasant Valley off-site SDC project list. This sheet reflects city funds only (Also See 523500A).

Justification: This project supports the first phase of development in Pleasant Valley.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

FUNDED PROJECT
Transportation

523700: Hood Street (Division to Powell)

Description: Grant funded project to complete 1000 feet of streetscape improvements on Hood Street, between Division and Powell. Project includes acquiring right-of-way; and constructing new curbs, sidewalks, street trees, and decorative streetlighting. This sheet reflects city expenses only. (See 523700A).

Justification: The existing street lacks continuous sidewalks and lighting, which reduces its ability to provide safe and efficient transportation connections between downtown Gresham and transit. This project supports the Regional 2040 Plan.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

FUNDED PROJECT
Transportation

523800: Signal Maintenance and Upgrade

Description: This project provides major maintenance to traffic signals, such as upgrading traffic signal controllers and replacing major infrastructure components such as poles, span wires, loops and signal assemblies. Currently identified intersections needing major maintenance are Division at 182nd, Powell and Hood and Powell and Cleveland.

Justification: Many components of our traffic signals have a limited lifespan, requiring the hiring of outside contractors to perform repairs or replace those components. Several of our traffic signals are near their end of life and need major maintenance

Type of Project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

524000: Sandy Blvd. TIF Coordination

Description: This project funding will be used to credit local development for TIF improvements constructed on Sandy Blvd. as part of development.

Justification: Development projects that construct identified TIF projects as part of their frontage improvements are allowed to be credited for the cost of this construction up to the amount of their TIF assessment. This project funding will allow such a credit at the proposed Gateway Corporate Center development

Type of Project: Construction of facilities and utilities for growth.

524300: City-Wide Streetlight Projects

Description: This projects provides budget for ongoing streetlighting maintenance and installation throughout the city. Projects will include additional streetlights where existing lighting is found to be inadequate and streetlight enhancements such as light shields and other minor adjustments.

Justification: Adequate lighting levels are an essential component of the transportation system to insure safe operation for all users in urbanized environments.

Type of Project: Repair and rehabilitation of facilities and utilities

Estimated Dollars:

FUNDED PROJECT
Transportation

524400: Pole Replacement

Description: This project replaces wood street light poles and lights, primarily in the residential neighborhoods of the City. A majority of the poles were installed in the late 1970s and 1980s. The light fixtures will be replaced at the same time as the light poles. LED street light fixtures will be used, when LED fixtures become available in the PGE street lighting program. This will reduce the energy usage and power bill for street lights in Gresham.

Justification: Individual wood street light poles have been replaced as wood rot is discovered. Due to the age of the poles this problem is increasing. The expected life of a wood pole and the light fixture on the pole is 30 to 40 years. A majority of these poles and fixtures will need replaced in the next ten years. A cost savings is anticipated from replacing the poles as larger capital project compared to individual pole replacements in response to failures.

Estimated Dollars:

UNFUNDED PROJECT

Transportation

502000X: Street Surfacing Improvements

Description: This project funds treatments necessary to maintain a Pavement Condition Index (PCI) of 75. These treatments include asphalt overlays, slurry seals and other surface preservation treatments. The project also includes deflection testing, preparatory patching, crack sealing and microsurfacing of city streets that have been identified in the Pavement Management System. The project is located in various neighborhood districts.

Justification: These improvements are necessary to protect the investment in the transportation system through capital maintenance rehabilitation. The City through its' pavement management system identifies the most cost effective treatments and locations for maintenance projects. Ratings continue to decline so the focus of these projects is to extend the life of the system through preservation treatments and not on total reconstructions. Projects this year will be on both what was the old County system and on the City local street system.

Type of Project: Repair and rehabilitation of facilities and utilities.

Estimated Dollars:

Funds	Description	Total

UNFUNDED PROJECT
Transportation

503900: NE 5th (Hood to Cleveland)

Description: This project reconstructs 1,700 L.F. of roadway and installs 250 L.F. of storm drainage. Pedestrian enhancements such as curb extensions, bomanite crosswalks, street trees, utility undergrounding, streetlights and street furniture will also be incorporated with this project. The project is located in the Central City Neighborhood District.

Justification: The existing street section is structurally inadequate and has exceeded its useful life. Extensive maintenance will soon be required to maintain minimal standards. Pedestrian improvements to this section of 5th will improve pedestrian safety and access, leading to increased transit and pedestrian travel. The project will enhance business opportunities in the downtown area, and it will improve motorist ride quality.

Type of Project: Repair and rehabilitation of facilities and utilities; Construction of facilities and utilities for growth.

Estimated Dollars:

UNFUNDED PROJECT
Transportation

506300X: Substandard Streets Upgrading

Description: This project will upgrade substandard local streets with paving, curbs, sidewalks, streetlights, storm drainage, and utility undergrounding. The project is located in various neighborhood districts.

Justification: There are currently 53 local streets which do not meet the minimum City standards. These streets were never approved by the City and consequently receive only minimal maintenance, typically requiring adjacent property owners to partially fund the maintenance activity.

Type of Project: Construction of facilities and utilities to correct deficiencies.

Map: Refer to the City of Gresham Neighborhood Districts Map.

Estimated Dollars:

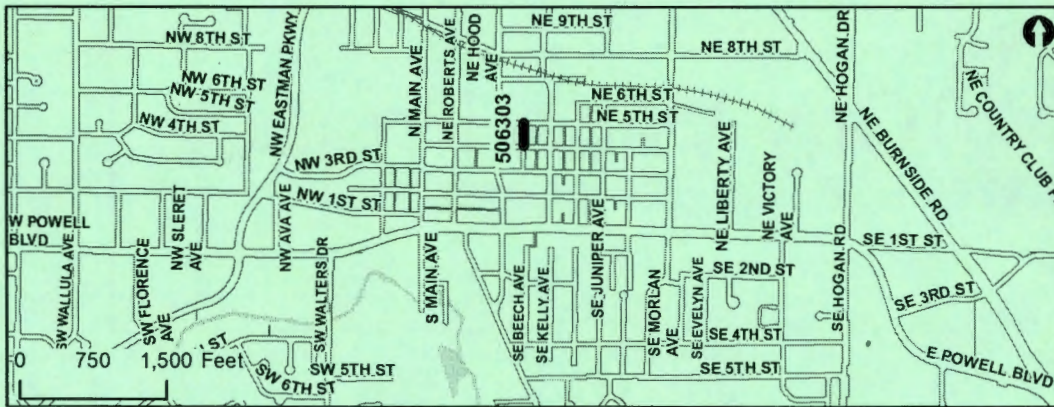

Funds	Description	Total
Resources	Operating	6,739,806
	Other	4,436,000
Resources Total		11,175,806
Expenses	Design/Const Admin	980,334

UNFUNDED PROJECT
Transportation

506303: Substandard Streets Upgrading – Beech Street Phase II

Description: This project will construct a “Shared Street” on Beech Street from 4th to 5th Street. The cross section will enhance safety and accessibility for all modes of traffic. Vehicular traffic will be restricted to southbound travel. Street lighting, landscaping, benches, and other amenities will be added. The project will connect with a portion of Beech that was constructed to similar “Shared Street” standards by Gresham in 2008. (CDBG grant not awarded yet.)

Justification: This project will facilitate redevelopment of the downtown area by improving streets to accommodate all modes of transportation.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	290,859
Resources Total		290,859
Expenses	Design/Const Admin	85,046
	Construction	170,093
	Admin (14%)	35,720
Expenses Total		290,859

UNFUNDED PROJECT
Transportation

510400: SE 1st Street (SE 3rd to Kane Road)

Description: This project will upgrade SE 1st Street to a collector street standard, including curbs, sidewalk, bike lanes, utility undergrounding, streetlighting and storm drainage. The project is located in the Powell Valley Neighborhood District.

Justification: SE 1st Street serves as a major collector street carrying a significant level of traffic between two major arterials: Burnside and Kane. It currently is narrow in width and lacks sidewalks, drainage, and other urban street improvements that are necessary for pedestrian and bikeway needs, as well as traffic needs for a growing community. SE 1st Street is one of the streets transferred from Multnomah County. The County has completed the design of the project and will provide construction administration services for the project.

Type of Project: Construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	1,663,500
Resources Total		1,663,500

UNFUNDED PROJECT
Transportation

510800: SW Pleasant view (Powell Loop - Highland)

Description: This project widens the roadway and bridge from 22' to 36', and it constructs a traffic signal, curb and gutter, sidewalk, bike lanes, utility undergrounding, streetlights, and storm drains. The project is located in the Southwest Neighborhood District and a small portion of the Centennial Neighborhood District.

Justification: The existing roadway lacks adequate pavement width, sidewalks and bike lanes, which reduces its ability to provide safe and efficient transportation connections. This project supports the Region 2040 Plan for traffic safety and mobility, and it improves connectivity to the Springwater Trail and Powell Blvd.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

UNFUNDED PROJECT

Transportation

511000: SE Regner Rd (Cleveland – North of Gabbert) TIF

Description: This project consists of widening the roadway from 24' to 40' from Cleveland to 1400' north of Gabbert; acquiring right-of-way; undergrounding utilities; installing streetlights; and constructing new curb and gutter, sidewalks, bike lanes, storm drains, and intersection improvements. The project is located in the Gresham Butte Neighborhood District.

Justification: This project corrects an existing deficiency and supports the Region 2040 Plan by encouraging multi-modal transportation usage. The project improves traffic safety and mobility, and it improves connectivity between Butler Road, Roberts Road, and the Springwater Trail.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	2,995,871

UNFUNDED PROJECT
Transportation

511100: SE Roberts Rd (Maple – Regner)

Description: This project widens 500' of roadway from 22' to 40', acquires right-of-way, undergrounds utilities, installs streetlights, and constructs new curb and gutter, sidewalk, bike lanes and storm drains. Sidewalks, streetlights, and bike lanes will be added to 800' of the roadway. The project is located in the ASERT Neighborhood District.

Justification: The existing roadway lacks adequate pavement width, sidewalks, bike lanes and lighting, which reduces its ability to provide safe and efficient transportation connections. This project improves traffic safety and mobility, and it will help provide connectivity between Roberts and Hogan Roads.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

UNFUNDED PROJECT
Transportation

511400: Signal Optimization Phase III

Description: This project implements the remaining elements of the Signal System and Communications Master Plan update of July, 2000. It consists of installing closed circuit televisions, variable message signs, highway advisory radio capabilities, adaptive signal control, and communications to remote intersections. The project is located in various neighborhood districts.

Justification: This project will improve traffic management in East Multnomah County through implementation of a comprehensive, advanced traffic management and information system. The system will minimize delays to area transportation system users on major arterials in East Multnomah County by providing real-time traffic monitoring and information to the traffic manager and the public.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	3,566,748
	SDC	2,218,000
Resources Total		5,784,748

**UNFUNDED PROJECT
Transportation**

516200: 257th at Stark TIF

Description: This project adds a second left turn lane on the south leg to provide 200 ft. of northbound, double left turn lanes, and it adds a 250 ft. eastbound exclusive right turn lane.

Justification: This project will help decrease traffic congestion, it will improve motorist and non-motorist safety, and it will minimize delays to area transportation system users on major arterials. As Gresham continues to grow, it is necessary to increase the capacity at selected intersection locations to alleviate excessive vehicle delay and fuel waste.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	852,542
Resources Total		852,542
Expenses	Design/Const Admin	74,784
	Construction	673,059
	Admin (14%)	104,698
Expenses Total		852,542

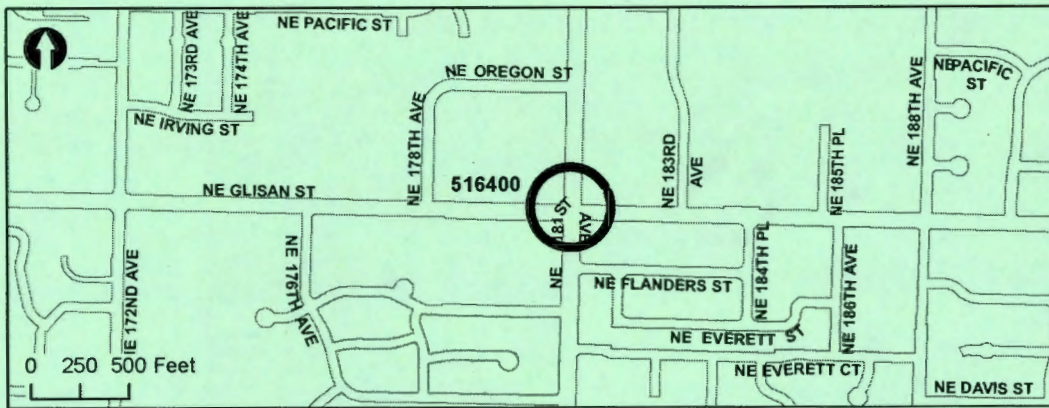

UNFUNDED PROJECT
Transportation

516400: 181st and Glisan St TIF

Description: This project adds a second left turn lane on the north and south legs to provide 150 ft. double left turn lanes, and this project adds 150 ft. exclusive right turn lanes to the northbound and southbound approaches.

Justification: This project will help decrease traffic congestion, it will improve motorist and non-motorist safety, and it will minimize delays to area transportation system users on major arterials. As Gresham continues to grow, it is necessary to increase the capacity at selected intersection locations to alleviate excessive vehicle delay and fuel waste.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Expenses Total		823,077

**UNFUNDED PROJECT
Transportation**

516500: 162nd and Stark St. TIF

Description: This project adds a 100 ft. exclusive southbound right turn lane and a 100 ft. exclusive eastbound right turn lane.

Justification: This project will help decrease traffic congestion, it will improve motorist and non-motorist safety, and it will minimize delays to area transportation system users on major arterials. As Gresham continues to grow, it is necessary to increase the capacity at selected intersection locations to alleviate excessive vehicle delay and fuel waste.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	544,675
Resources Total		544,675
Expenses	Design/Const Admin	35,026
	Construction	315,225
	Property Acq	127,535
	Admin (14%)	66,890
Expenses Total		544,676

UNFUNDED PROJECT
Transportation

516600: 181st at I-84

Description: This project provides a standard, partial cloverleaf in the southwest quadrant, re-stripes the curb lane on southbound 181st as an exclusive right turn lane (400'), and re-stripes the center lane as a southbound through lane (300').

Justification: With the growth that Gresham has experienced in the vicinity of this intersection and the expected growth, it is necessary to increase the capacity at selected locations to alleviate excessive vehicle delays. This project will help decrease traffic congestion, improve motorist and non-motorist safety, and it will minimize delays to area transportation system users on major arterials.

Type of Project: Construction of facilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	5,818,003
	SDC	554,500
Resources Total		6,372,503
Expenses	Design/Const Admin	536,811
	Construction	4,831,303
	Property Acq	221,800

UNFUNDED PROJECT
Transportation

516700: Banfield Ind. Park Truck Turn - Around

Description: This project provides a truck turn-around in the Banfield Industrial Park. The project is located in the Wilkes East Neighborhood District.

Justification: NE Sacramento Street terminates at NE 169th, a neighborhood collector street. Wilkes school is located at the intersection. Trucks are inappropriately using 169th for ingress and egress to the industrial park. This project will help decrease truck traffic through the neighborhood, thereby improving motorist and non-motorist safety.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	214,566
Resources Total		214,566
Expenses	Design/Const Admin	12,168
	Construction	109,508
	Property Acq	66,540
	Admin (14%)	26,350
Expenses Total		214,566

UNFUNDED PROJECT
Transportation

516900: Regner Road (Butler to 1400 North of Gabbert)

Description: This project realigns and widens the roadway from 24' to 40'; acquires right-of-way; undergrounds utilities and installs streetlights; and constructs new curb and gutter, sidewalks, bike lanes, storm drains, and intersection improvements. The project is located in the Gresham Butte Neighborhood District.

Justification: The project corrects existing deficiencies and supports the Regional 2040 Plan by encouraging multi-modal transportation usage. The project also improves traffic safety and mobility, and it improves connectivity between Butler Road, Roberts Ave., and the Springwater Trail.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	4,201,779
Resources Total		4,201,779
Expenses	Design/Const Admin	290,947
	Construction	2,618,524

Expenses Total		4,201,779

**UNFUNDED PROJECT
Transportation**

517600: SW Walters Dr (7th – 1000' South)

Description: This project realigns SW Walters Drive from 7th Street to 1000' south; widens the roadway from 24' to 32'; constructs new curb, sidewalks, bike lanes, and storm drains; undergrounds utilities and installs streetlights.

Justification: The existing roadway lacks adequate pavement width and geometry, sidewalks and bike lanes, reducing its ability to provide safe and efficient transportation connections.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	2,702,054
	Other	221,800
Resources Total		2,923,854
Expenses	Design/Const Admin	239,843

**UNFUNDED PROJECT
Transportation**

523300: 181st Regional Blvd.

Description: This project will add boulevard improvements from Glisan to Yamhill in support of the Rockwood Town Center. Boulevard improvements may include wide sidewalks, street trees, and street lighting as well as pedestrian refuges and raised center medians.

Justification: This project will increase the livability of the Rockwood Town Center by improving the safety and aesthetics of the street as well as encouraging pedestrian, bike, and transit use.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total

	Admin (14%)	272,386
Expenses Total		2,218,000

**UNFUNDED PROJECT
Transportation**

523400: Palmquist at Fleming

Description: This project constructs a modern, single-lane roundabout at the intersection of Palmquist and Fleming. The yield-on-entry roundabout will include raised diverter islands, crosswalks, pedestrian refuge islands, and a landscaped central island.

Justification: This project will increase the capacity of the intersection, decrease traffic congestion, improve motorist and non-motorist safety, and minimize delays to area transportation system users. As Gresham continues to grow, it is necessary to increase the capacity at selected intersection locations to alleviate excessive vehicle delay and fuel waste.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	46,721
	SDC	204,197
Resources Total		250,918
Expenses	Design/Const Admin	66,540

Expenses Total		250,918

UNFUNDED PROJECT
Transportation

523900: Powell @ 182nd

Description: This project increases capacity of the intersection by installing dual left turn lanes on all approaches. The northbound and southbound dual left turn lanes are Pleasant Valley TIF eligible improvements. The eastbound and westbound dual left turn improvements are necessary to accommodate new development and are developer funded.

Justification: This project will help decrease traffic congestion, improve motorist and non-motorist safety, and minimize delays to area transportation system users on major arterials. As Gresham continues to grow, it is necessary to increase the capacity at selected intersection locations to alleviate excessive vehicle delay and fuel waste.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

UNFUNDED PROJECT
Transportation

524100: NE 3rd Festival Street

Description: This project constructs a raised intersection at NW 3rd and Beech Street with paving stones, patterned to match the Central Plaza. It also rebuilds 260' of Plaza frontage and constructs new sidewalk, decorative street lights, street trees, and undergrounds overhead utilities on the north side.

Justification: The raised intersection is an essential element in transforming NW 3rd as a "Festival Street". The raised intersection will "connect" the Plaza to the Beech Shared Street, which will then connect north to the Max station.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	665,464
Resources Total		665,464
Expenses	Design/Const Admin	99,810

Expenses Total		665,464

**UNFUNDED PROJECT
Transportation**

524200: Sandy Blvd Widening – South Side, in the Vicinity of 185th

Description: This project provides for the widening of Sandy Boulevard in the vicinity of 185th, in order to add an eastbound left turn bay. The project includes removal of the existing shoulder and asphalt section, and widens the street section to include an additional lane and bike lane.

Justification: Widening is needed to accommodate a new eastbound left-turn bay at the intersection of Sandy and NE 185th. The additional lane is required to maintain performance standards at the intersection and to meet development needs.

Estimated Dollars:

Funded Projects

Overview

The Footpaths & Bikeways Capital Improvement Program provides for the planning, engineering and construction of improvements to both the City's pedestrian and bicycle networks.

Highlights

Projects range from installation of new sidewalks, pedestrian safety devices at mid-block crossings, bike racks and bike lanes, to the redesign of arterial streets into more community-friendly boulevards. This program strives to implement multifaceted infrastructure improvements, complemented by safety and education programs. Both components are necessary to provide safe and convenient travel choices in Gresham.

Key projects include:

1. The construction of a multi-use trail along the Max light rail line, #608300
2. Pedestrian Enhancements, #610600. This project includes the implementation of missing sidewalk links, promoting safe routes to schools, wayfinding signs, new pedestrian-activated crossing signals where pedestrian volumes are high (locations to be determined), and new or enhanced crosswalks at intersections or mid-block.

FUNDED PROJECT
Footpaths & Bikeways

605000: American with Disabilities Curb Ramp

Description: This ongoing program identifies, designs, and modifies concrete sidewalk ramps citywide.

Justification: This project will increase pedestrian safety, provide transportation facilities for all users, and comply with the Federal Americans with Disabilities Act.

Type of Project: Construction of facilities and utilities to correct deficiencies.

Map: Refer to the City of Gresham Neighborhood Districts Map.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Footpaths & Bikeways

608300: Max Trail

Description: This project entails design and construction of a multi-use asphalt trail that connects Rockwood Town Center to the Gresham Regional Center. The trail is aligned parallel to Max light rail tracks and will intersect with the Gresham-Fairview Trail.

Current funding levels will support design of the full scope of this project. The potential need for a bridge overcrossing and enhancements at streets crossings have added to construction cost estimates and therefore it is anticipated that there will be funding shortfalls for construction of the entire length of the Trail. This sheet reflects City expenses as well as grant funds from ODOT. (See also 608300A).

Justification: The project supports multi-modal travel in Gresham by providing an off-street link between the Gresham Regional Center and Rockwood.

Type of Project: Design and construction of facilities.

Estimated Dollars:

FUNDED PROJECT
Footpaths & Bikeways

610300: Division and 190th Improvements

Description: This project was passed on to the City of Gresham when the City took over the roads from Multnomah County. Improvements will provide ADA ramps at all four corners of Division and 190th.

Justification: Monies were transferred to the City of Gresham from the county and we are obligated to complete this project. In addition, this project will increase pedestrian safety, provide transportation facilities for all users, and comply with the Federal Americans with Disabilities Act.

Type of project: Construction of facilities and utilities to correct deficiencies.

Footpaths & Bikeways

610600: Pedestrian Enhancements

Description: This program will enhance pedestrian safety and accessibility within the City of Gresham. Projects include the implementation of missing sidewalk segments within the public right-of-way, educational programs to promote safe walking routes to schools and to major activity centers, new wayfinding signage, pedestrian activated crossing signals, and new or enhanced crosswalk markings at intersections or mid-block.

Pedestrian related improvements outlined in the City’s Transportation System Plan, as well as additional projects subsequently identified, are incorporated in this program. Project selection is based on criteria developed in coordination with the City’s Transportation Subcommittee and prioritized according to need and cost-benefit analysis.

Justification: The City of Gresham is committed to enhancing the safety, accessibility, and volume of pedestrian facilities.

Type of Project: Implementation of facilities and utilities, and educational outreach.

Estimated Dollars:

610700: Bicycle Projects

Description: This program will enhance bicycle safety and accessibility in the City of Gresham. Projects include the implementation of missing bicycle lanes or shared-use facilities within the public right-of-way, bicycle racks, wayfinding signs, and pavement markings. Additional projects include educational programs to promote safety for bicyclists, and efforts to achieve a “platinum” certification as a “Bike Friendly Community” through the League of American Bicyclists.

Bicycle related improvements outlined in the City’s Transportation System Plan, as well as additional projects subsequently identified, are incorporated in this program. Selection of projects is based on criteria developed in coordination with the City’s Transportation Subcommittee, Transportation Management Association, and Neighborhood Associations.

Justification: The City of Gresham is committed to enhancing the safety, accessibility, and volume of bicycle facilities.

Type of Project: Implementation of facilities and utilities, and educational outreach.

Estimated Dollars:

FUNDED PROJECT
Footpaths & Bikeways

610800: Individualized Marketing for Transportation Options

Description: The City of Gresham Transportation Planning Division has been awarded a \$100,000 grant through Metro's Regional Travel Options (RTO) program. Grant funds will be used to implement an *Individualized Marketing Program* to educate residents about various transportation options and promote the use of alternative modes. Outreach efforts will focus on the Civic Neighborhood adjacent to and surrounding the new Civic Neighborhood Lightrail Station, planned to open in 2010.

The project will be a collaborative effort between the City of Gresham, the Gresham Regional Center Transportation Management Association (TMA), and TriMet. Brochures and promotional items will be created and distributed, transit subsidies will be offered, and data collection and analysis will be conducted.

Justification: The purpose of this project is to achieve an overall increase in the use of alternative modes of transportation rather than driving alone. These grant funds support the City's efforts to achieve a modal split of 50 percent vehicles / 50 percent other modes by 2040, a goal stated in the City's Transportation Systems Plan.

Estimated Dollars:

611000: Halsey Street Bike and Pedestrian Improvements

Description: The City has been awarded a \$337,671 grant through the Oregon Department of Transportation’s Pedestrian and Bicycle Program. Grant funds will be used to implement bicycle lanes and missing sidewalk on both sides of Halsey Street between 162nd and 182nd Avenues. The project also includes implementation of an enhanced crosswalk to H.B. Lee Middle School at the intersection of Halsey Street and 172nd.

Justification: The purpose of this project is to provide new bicycle and pedestrian facilities along Halsey Street, and to enhance the safety of those modes.

Type of Project: Implementation of facilities.

Estimated Dollars:

Footpaths & Bikeways**

611100: CDBG Pedestrian Mid Block Crossing Enhancements

Description: This project consists of new pedestrian refuge islands, signage, pedestrian-activated rapidly flashing beacons, and pavement markings at mid-block crosswalks. Locations identified for these types of improvements include 179th St. at Stark St., Division St. at Roberts Ave., and/or other mid-block crossing locations that warrant these types of enhancements.

Justification: Motorists need to see pedestrians standing waiting to cross and those who are crossing. Either direct or backlit lighting is effective. Some overhead signs such as in Portland, Oregon and Seattle, Washington use overhead lights that identify the pedestrian crossing and also shine down the actual crosswalk. This project will improve pedestrians safety and improve walking throughout Gresham.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

**FUNDED PROJECT
Footpaths & Bikeways**

611200: CDBG – Sidewalk Infill Through Code Enforcement

Description: Gresham residents are required to maintain public sidewalks in the public right-of-way adjacent to their property. This project will provide supplemental funding for the City to repair damaged sidewalks in situations where a Notice of Violation has been issued but the property owner is unable or unwilling to affect the repairs, in which case the City's only recourse is to lien the cost of that work to the property. The City has secured on-call contractors to provide sidewalk repairs at a lower rate than if residents were to hire contractors privately. Residents may contact the Code Enforcement Division to obtain this list of contractors

Justification: This project will increase pedestrian safety and bring sidewalks to standards adopted in City code and in the Federal Americans with Disabilities Act.

Type of Project: Construction of facilities to correct deficiencies.

Map: Refer to the CDBG Qualified Areas map.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Footpaths & Bikeways

611400: Gresham-Fairview Trail Crossing at Division Street

Description: Grant has been applied for, if successful, this project will fund planning, design, and construction to raise the Division Street roadbed at its point of intersection with the Gresham-Fairview Multi-Use Trail ("Trail"). Elevating the roadbed will create a continuous, unobstructed crossing for Trail users under Division Street and thereby eliminate conflict points inherent in an at-grade intersection on this major arterial that connects Gresham and Portland. (See 611400A)

Justification: It is anticipated that completion of phase II of the Gresham-Fairview Trail at this intersection will increase recreational and commuting use of the facility and that this increase in use could result in increased conflicts between pedestrian and bicyclists at its crossing at Division Street without grade separation. This project to plan and design the Division Street roadbed elevation will help move this project forward and make it shovel ready for future grant or other funding opportunities.

Type of Project: Construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

611500: Safe Routes to School – Hall Elementary School

Description: Grant funds have been applied for through the ODOT Safe Routes to School program to construct a sidewalk on the south side of 23rd Street, as well as related improvements such as a sidewalk extension on the north side of 23rd, school-zone flashers, curb bulb outs, and ADA-compliant cross-walks. (See also 611500A)

Justification: This project will remedy the deficiencies in the sidewalk network on 23rd Street in order to make it a safe route to Hall Elementary School. This project will also complement the City’s ongoing efforts to complete missing links in the City’s neighborhood Sidewalk network, as described in TSP Project #190.

Type of Project: Construction of facilities.

FUNDED PROJECT
Footpaths & Bikeways

611600: Safe Routes to School – H.B. Lee Middle School

Description: Grant funds have been applied for through the ODOT Safe Routes to School program provide pedestrian improvements, bicycle lanes, and related ADA improvements to NE 172nd Avenue, directly in front of this Gresham school. The project also will provide sheltered bicycle parking on school property, and lighting for access on a shared use path that crosses a city park adjacent to the school and connects to Hassalo Street. The H.B. Lee Safe Routes to School Action Plan has identified these improvements—including traffic calming on 172nd-- as a top priority. (See also 611600A)

Justification: This project will remedy the current configuration of 172nd Avenue in order to make it a safe route to H.B. Lee Middle School. This project will also complement the City’s ongoing efforts to encourage safe bicycle and pedestrian use near H.B. Lee such as new bicycle wayfinding signs in the vicinity as well as sidewalk enhancements at 172nd and Halsey Street.

Type of Project: Construction of facilities.

UNFUNDED PROJECT
Footpaths & Bikeways

605500: Bike and Ride Routes

Description: This project will improve the link between transit and bicycle travel by improving bicycle facilities leading to transit stations, particularly the Central Station where the City administers a free, secure storage room for bicycles. Bike lanes will be improved at critical points and a new bike and ride logo will mark recommended commuter routes.

Justification: This project will improve safety and increase bicycling as a travel choice. It will also encourage more multi-modal travel.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	332,700
Resources Total		332,700
Expenses	Design/Const Admin	58,369
	Construction	233,473
	Admin (14%)	40,858
Expenses Total		332,700

UNFUNDED PROJECT
Footpaths & Bikeways

606100: Priority Bicycle Corridors

Description: This project will infill missing segments of the bicycle network to increase safety for bicyclists. Signal looping for bicyclists will be the primary focus, as well as striping bike lanes and improving safety at intersections. Priority corridors include 181st, Division, Burnside, Eastman and 242nd.

Justification: This project will increase bicyclist safety and encourage bicycling as a travel choice.

Type of Project: Construction of facilities and utilities for growth.

Map: Refer to the City of Gresham Neighborhood Districts Map.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	787,634
Resources Total		787,634
Expenses	Design/Const Admin	138,181
	Construction	552,726
	Admin (14%)	96,727
Expenses Total		787,634

UNFUNDED PROJECT
Footpaths & Bikeways

606500: Bicycle Signage Program

Description: The City will plan, in coordination with Multnomah County and the City of Portland, to provide greater informational signage to bicyclists which indicate routes and destinations.

Justification: This project will enhance the existing "bike route" signs, increase safety, and encourage bicycling as a travel choice in Gresham.

Type of Project: Construction of facilities and utilities for growth.

City Wide Project

Estimated Dollars:

Funds	Description	Total
Resources	Operating	1,109,000
Resources Total		1,109,000
Expenses	Design/Const Admin	291,842
	Construction	680,965
	Admin (14%)	136,193
Expenses Total		1,109,000

UNFUNDED PROJECT
Footpaths & Bikeways

607000: SW Walters Road Springwater Trail Access

Description: This project designs and constructs improved bicycle and pedestrian access onto the Springwater Trail from Walters Road, Eastman, and Roberts.

Justification: Improvements to bicyclist and pedestrian facilities are essential to assure safe and convenient bike and pedestrian access to the trail system. Forty-one percent of all Gresham trail-users access the trail from the inadequate, unsafe routes. Sidewalks and bike lanes are needed as well as street-crossing improvements and street grate improvements.

Type of Project: Construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	995,106
	SDC	113,894
Resources Total		1,109,000
Expenses	Design/Const Admin	194,562
	Construction	778,245
	Admin (14%)	136,193
Expenses Total		1,109,000

**UNFUNDED PROJECT
Footpaths & Bikeways**

607100: 162nd Street Ped to MAX

Description: Ped to MAX is an ongoing program to improve pedestrian access to transit. The 162nd Street project will include improved pedestrian street crossings, improved lighting, wider sidewalks, and street trees.

Justification: This project will increase pedestrian and transit user safety, and it will encourage transit use in Gresham.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	302,890
	SDC	34,667
Resources Total		337,557
Expenses	Design/Const Admin	59,221
	Construction	236,882
	Admin (14%)	41,454
Expenses Total		337,557

**UNFUNDED PROJECT
Footpaths & Bikeways**

607200: 181st Street Ped to Max TIF

Description: Ped to MAX is an ongoing program to improve pedestrian access to transit. The 181st Street project will improve the intersection with Burnside for safe pedestrian crossing.

Justification: This project will increase pedestrian and transit user safety, and it will encourage transit use in Gresham.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	706,744
	SDC	80,890
Resources Total		787,634

	Admin (14%)	55,273
Expenses Total		450,077

UNFUNDED PROJECT
Footpaths & Bikeways

607500: City Hall Ped to MAX TIF

Description: Ped to MAX is an ongoing program to improve pedestrian access to transit. Improvements to the crosswalk on Eastman as well as sidewalks on Eastman will be constructed. A pedestrian plaza is also proposed at 12th and Eastman.

Justification: This project will increase pedestrian and transit user safety, and it will encourage transit use in Gresham.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	330,414
	SDC	37,817
Resources Total		368,231
Expenses	Design/Const Admin	64,601
	Construction	258,408
	Admin (14%)	45,222
Expenses Total		368,231

UNFUNDED PROJECT
Footpaths & Bikeways

607600: Hood Street Ped to MAX

Description: Ped to MAX is an ongoing program to improve pedestrian access to transit. Improvements to Hood Street and Division south to 4th are complete. This project will extend improvements to Powell Boulevard.

Justification: This project will increase pedestrian and transit user safety, and it will encourage transit use in Gresham.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	733,076
	SDC	83,904
Resources Total		816,979
Expenses	Design/Const Admin	143,329
	Construction	573,319
	Admin (14%)	100,331
Expenses Total		816,979

**UNFUNDED PROJECT
Footpaths & Bikeways**

607900: Cleveland Station PED to MAX TIF

Description: Ped to MAX is an ongoing program to improve pedestrian access to transit. The Cleveland Station project would improve the most easterly light rail station for pedestrians as well as construct better pedestrian access from the major arterials and surrounding neighborhoods.

Justification: This project will increase pedestrian and transit user safety, and it will encourage transit use in Gresham.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	550,689
	SDC	63,029
Resources Total		613,718
Expenses	Design/Const Admin	107,671
	Construction	430,679
	Admin (14%)	75,369
Expenses Total		613,718

**UNFUNDED PROJECT
Footpaths & Bikeways**

608000: Central Station Ped to MAX TIF

Description: Ped to MAX is an on-going program to improve pedestrian access to transit. The Central Station project will include improved pedestrian street crossings, improved lighting, wider sidewalks, and street trees.

Justification: This project will increase pedestrian and transit user safety, and it will encourage transit use in Gresham.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	497,553
	SDC	56,947
Resources Total		554,500
Expenses	Design/Const Admin	97,280

UNFUNDED PROJECT
Footpaths & Bikeways

608800: Missing Bicycle Lanes

Description: This program will complete the bicycle lane network on major routes through the city. Projects include: 257th (Powell to Orient), 282nd (Troutdale to Orient), Division (257th to City Limits), Hogan (Glisan to Stark), Orient (Palmquist to Welch), and Burnside (181st to 197th).

Justification: This project will improve safety and increase bicycling as a travel choice. It will also encourage more multi-modal travel.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	1,109,000
Resources Total		1,109,000
Expenses	Design/Const Admin	194,562
	Construction	778,245

Parks, Trails, & Open Space

Funded Projects

Overview

The Parks, Trails & Natural Areas Capital Improvement Program provides for the planning, design and construction of projects that include open space and park site land acquisition and park, trail and greenway development.

Highlights

Projects currently under construction include:

Main City Park Improvements #709700 (To be completed FY 11/12)

Springwater Trailhead #715200 (To be completed FY 11/12)

Gresham Fairview Trail 2 & 3 #716102

Funding for capital projects is currently extremely limited. Discussions regarding funding have been underway and are expected to continue in the future and should provide guidance and direction regarding priorities and next steps for the Parks CIP in upcoming years.

Parks, Trails, and Open Space Expenditure Graph by Fiscal Year

FUNDED PROJECT
Parks, Trails, & Open Space

City Funded and Federal Funded Projects

Several Parks Projects, Springwater Trailhead and Gresham Fairview Trails (GFT), are funded by a variety of funding sources, some of which are included in the City's Budget, and some of which are handled separately. The projects without the A show only those dollars that are included in the City's Budget. Projects ending in A show the entire project, including those funds that are not directly budgeted by the City.

Project	Project Name	Funding
715200	Springwater Trailhead	City Budgeted Funds Only
715200A	Springwater Trailhead	All Funds
716102	GFT- Phase 2 & 3	City Budgeted Funds Only
716102A	GFT- Phase 2 & 3	All Funds
716104	GFT- Phase 4	City Budgeted Funds Only
716105	GFT- Phase 5	City Budgeted Funds Only

FUNDED PROJECT
Parks, Trails, & Open Space

709700: Main City Park Improvements

Description: This project, in conjunction with projects 317000 and 715200, will enhance Main City Park by providing more positive recreational activities within the park facility. This project includes the Springwater Trail Spur which is a bicycle and pedestrian trail through the park. The trail spur's purpose is to connect the Springwater Trail to Downtown Gresham. The trail spur will also serve as a walking promenade through the center of the park visually joining its east and west segments. This project includes funding from the Metro Local Share Funds, ODOT Urban Trails and Parks and Rec Local Gov Funds. The project is located in the Central City and Gresham Butte Neighborhood Districts.

Justification: Development is needed to provide a wide range of recreation opportunities for all Gresham residents.

Estimated Dollars:

FUNDED PROJECT
Parks, Trails, & Open Space

714700: Civic Neighborhood Development

Description: This project reimburses the developer for a portion of the infrastructure costs related to the Civic Neighborhood Project. The project is located in the Northwest Neighborhood District.

Justification: City financial support is needed to support the innovative objectives of the Civic Neighborhood Development Plan.

Type of Project: Construction of utilities and facilities for growth.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Parks, Trails, & Open Space

715200: Springwater Trailhead*

Description: This project will construct public amenities including a 24-vehicle parking lot, benches and bike racks. A restroom will be funded by the Wastewater Division, see CIP 317000. This project will utilize a Metropolitan Transportation Improvement Program grant as well as funds from Federal Aid Surface Transportation Program and Parks SDC revenue. This sheet reflects City expenses only and does not include grant payments made directly to private contractors by ODOT. (Also see 715200A.)

Justification: The project will construct parking spaces and trail facilities at Main City Park.

Type of Project: Construction of utilities and facilities for growth.

Estimated Dollars:

FUNDED PROJECT
Parks, Trails, & Open Space

716102: Gresham Fairview Trail 2 and 3*

Description: This project will acquire trail easement and construct facilities along the 2 mile long Phase 2 and 3 segments of the 5.2 mile, partially developed trail. The project is located in the Rockwood, Centennial, Hollybrook, and Northwest Neighborhood Districts. Remaining funding required for the under-crossing as Parks portion of the Division Street improvements is identified in Unfunded CIP 716106. This sheet reflects City, Metro, and ORT grant expenses only and does not include SAFETEA-LU grant payments made directly to private contractors by ODOT. (Also see 716102A)

Justification: This project provides opportunities for trail-related recreation and education; connects to the future MAX Trail and the Springwater Trail; improves the environmental health and education of the community by being adjacent to Fairview Creek, Grant Butte, and Johnson Creek; reduces auto-dependency by providing safe off-street, non-motorized neighborhood transportation connections; improves public access to business, industry, and the MAX Transit Station at Ruby Junction; and connects community open space and parkland.

Type of Project: Acquisition of land and other real property for growth; and Construction of utilities and facilities for growth.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Parks, Trails, & Open Space

716104: Gresham Fairview Trail 4

Description: This project will acquire trail rights-of-way and easements along the 0.75 mile long Phase 4 segment of the 5.2 mile, partially developed trail. The project is located in the North Gresham Neighborhood District. The amount required for Phase 4 trail construction is identified in Unfunded CIP 716100.

Justification: This project provides opportunities for trail-related recreation, connects to the I-84 Multi-Use Bike/Pedestrian Path; reduces auto-dependency by providing safe off-street, non-motorized school and neighborhood transportation connections; improves public access to business, industry, and the MAX Transit Station at Ruby Junction; and connects to community open space.

Type of Project: Acquisition of land and other real property for growth.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Parks, Trails, & Open Space

716105: Gresham Fairview Trail 5

Description: This project will acquire trail rights-of-way and easements along the 1.17 mile long Phase 5 segment of the Gresham Fairview Trail and Columbia Slough Trail. This project is located in the North Gresham Neighborhood District. Remaining funding required for Phase 5 trail construction is identified in Unfunded CIP 716100.

Justification: This project provides opportunities for trail-related recreation and environmental education; connects to the 40-Mile Loop at Marine Drive, Metro’s Blue Lake Regional Park, and the future Columbia Slough Trail; reduces auto-dependency by providing safe off-street, non-motorized neighborhood transportation connections; improves public access to business and industry; and connects community open space and parkland.

Type of Project: Acquisition of land and other real property for growth.

Estimated Dollars:

FUNDED PROJECT
Parks, Trails, & Open Space

721000: Civic Neighborhood Station Plaza

Description: This project will finish constructing the Civic Neighborhood light-rail station and will help build the adjacent one-acre plaza to serve as the major gathering place for the station. The project is located in the Northwest Neighborhood District. This sheet reflects the City's potential contribution as described in the 1996 Gresham Civic Neighborhood financing agreement.

Justification: This project will encourage greater transit use.

Type of Project: Construction of utilities and facilities for growth.

Estimated Dollars:

FUNDED PROJECT
Parks, Trails, & Open Space

723000: Palmquist Pathway Improvements

Description: A CDBG grant provided funding for construction of a 10'-wide ADA multi-purpose Perimeter Pathway along the SE Palmquist Road frontage of the new sports park. This project is complete.

Justification: This project provides pedestrian, ADA and Bicycle access across the front of the sports park. The project fulfills some of the permit requirements for street frontage improvements and landscape buffer. This section of pathway will be part of an eventual path looping around the park.

Estimated Dollars:

FUNDED PROJECT
Parks, Trails, & Open Space

723900: Rockwood Central Park Playground Equipment

Description: This project will replace outdated and worn playground equipment. Proposed improvements will feature one new playground set for children ages 3-5 and another for older children ages 5-12. Separate play sets will cater to the heights and motor skills of different age groups. Funding has not been awarded. Funds would come as a CDBG Grant. This project is located in the Rockwood Neighborhood District.

Justification: Existing playground equipment is worn, outdated and near the end of its useful shelf-life.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

**UNFUNDED PROJECT
Parks, Trails, & Open Space**

703200: SE Community Park Master Plan

Description: This project will prepare an individual park master plan for the 16.1-acre, undeveloped community park site in southeast Gresham. The project is located in the Kelly Creek Neighborhood District.

Justification: The master plan will identify the costs and funding required for the development of a wide range of active and passive recreation opportunities for all Gresham residents. If the master plan is not prepared, funding for construction cannot be determined and appropriated.

Type of project: Engineering or architectural studies related to city services for growth.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	75,000
Resources Total		75,000
Expenses	Design/Const Admin	65,789
	Admin (14%)	9,211

**UNFUNDED PROJECT
Parks, Trails, & Open Space**

705000: SW Community Park Phase I Development

Description: This project will construct recreation facilities identified in the master plan for the 37.18-acre undeveloped community park in southwest Gresham. The project is located in the Centennial Neighborhood District.

Justification: Development is needed to provide a wide range of active and passive recreation opportunities for all Gresham residents, such as natural areas, performance spaces, playing fields for organized sports, trails, and group picnic areas.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

710900: Southwest Neighborhood Park Acquisition

Description: This project will acquire land, prepare the master plan, and develop approximately 8-acres for a neighborhood park in south Gresham. The project is located in the Gresham Butte Neighborhood District.

Justification: Acquisition and development are needed to provide a wide range of active and passive recreation opportunities for citizens at their nearby neighborhood park.

Type of Project: Acquisition of land and other real property for growth; Engineering or architectural studies related to city services for growth; and Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total

FUNDED PROJECT
Parks, Trails, & Open Space

711200: ADA Accessibility Rehabilitation

Description: This project will renovate existing park, trail and open space facilities to meet the federally mandated Americans with Disabilities Act of 1992 (ADA) requirements. The required access route, curb, ramp, handrail, signage, parking, playground, drinking fountain, and picnic table improvements will be constructed to provide the community with accessible recreation opportunities for all age groups. Renovations to meet ADA requirements will occur at the following parks: Aspen Highlands, Bella Vista, Butler Creek, Columbia View, Davis, Hall, Kane Road, Kirk, North Gresham, Pat Pfeifer, Rockwood Central and Thom Park. Renovations will also occur along the Butler Creek Greenway trail and the Springwater Trail. ADA upgrades were completed in 1998 at Main City Park and Red Sunset Park. Grant funding not yet secured.

Justification: The City has been mandated to provide accessible recreation opportunities for people with disabilities.

Type of Project: Repair and rehabilitation of facilities in various parks.

Estimated Dollars:

Funds	Description	Total
Resources	Grant	100,000

UNFUNDED PROJECT
Parks, Trails, & Open Space

711900: Zimmerman Heritage Farm Community Park

Description: This project will finish construction of facilities and utilities at the partially developed Zimmerman Heritage Farm in northwest Gresham. Interpretive trails through the historic botanical gardens, picnic area, restroom and parking will be constructed. The project is located in the Wilkes East Neighborhood District.

Justification: The project will provide passive recreation facilities and educational opportunities for the community to learn about Gresham's history of agriculture.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Other	2,587,492
	SDC	1,688,993
Resources Total		4,276,485

**UNFUNDED PROJECT
Parks, Trails, & Open Space**

716106: Gresham/ Fairview Trail

Description: This \$4,490,000 project will provide \$750,000 for the undercrossing at the Division Street improvements, \$500,000 for Phase 4 trail construction Halsey to Sandy, and \$3,240,000 for Phase 5 trail construction Sandy to Marine Drive. This project is located in the Centennial, Northwest, and North Gresham Neighborhood Districts.

Justification: The undercrossing at Division and the overcrossing at Powell are the best solutions to eliminate potential conflicts between motorists using the arterial streets and regional trail users who are walking or bicycling. Phase 4 and 5 trail construction provides opportunities for trail-related recreation; connects to the 40-Mile Loop at Marine Drive, Metro's Blue Lake Regional Park, and the future Columbia Slough Trail; reduces auto-dependency by providing safe off-street, non-motorized neighborhood transportation connections; improves public access to business, industry; and connects community open space and parkland.

Type of Project: Construction of facilities and utilities for growth.

Map: See maps for Gresham/Fairview Trail Funded CIP Projects 716102,716103,716104, and 716105.

Estimated Dollars:

Funds	Description	Total
Resources	IGA	3,740,000

Parks, Trails, & Open Space**

723500: Center for the Arts

Description: This project will enhance the Center for the Arts Plaza to provide more positive recreational activities, visual interest and increase park usage. The Center for the Arts site is evolving into a destination for Downtown Gresham. The inter-active fountain has been designed for safety, aesthetics, sustainability, cost and theme. The fountain compliments the existing colored pavement lights and recent art pillar installations. The project is located in the Central City Neighborhood District.

Justification: The center will provide customer service by helping meet the program needs of seniors, adults, teens, school-age, pre-school, families with disabilities, and diverse cultural groups. The center will also help direct the city's youth toward positive activities. Development is needed to provide a wide range of recreation opportunities for all Gresham residents.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Other	16,480,000
Resources Total		16,480,000
Expenses	Design/Const Admin	1,648,000

UNFUNDED PROJECT
Parks, Trails, & Open Space

723600: SE Community Park Development

Description: This project will construct recreation facilities identified in the master plan for the 16.1-acre undeveloped community park in southeast Gresham. The project is located in the Kelly Creek Neighborhood District.

Justification: Development is needed to provide a wide range of active and passive recreation opportunities for all Gresham residents, such as natural areas, performance spaces, playing fields for organized sports, trails, and group picnic areas.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Parks, Trails, & Open Space**

723700: Main City Park Improvements Future

Description: This project, in conjunction with projects 709700 and 715200, will renovate and enhance Main City Park to accommodate community-wide events and to better connect the park with Downtown Gresham and the Springwater Trail. Due to the park location as a designated regional town center and relationship with the regional Springwater Trail; Main City Park is being repositioned to become the flagship community park of Gresham. The central core of the park will be reconfigured, removing parking with replacement of a focal-point Destination Playground. The playground will be designed for safety, aesthetics, cost and theme. The Destination Playground will include play elements for children 2-5, 5- 12 and a decorative, inter-active water feature. There is an additional resource need of \$x to complete the plan improvements that will also include an improved group picnic area; renovated ball fields, basketball courts, and horseshoe pits; bocche and croquet fields; entry plaza; off-lease dog park; amphitheater; meadows and environmental enhancement of Johnson Creek. Main City Park is located in the Central City and Gresham Butte Neighborhood Districts.

Justification: Development is needed to provide a wide range of recreation opportunities for all Gresham residents.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total

**UNFUNDED PROJECT
Parks, Trails, & Open Space**

723800: Hogan Butte Nature Park Development

Description: This project will construct facilities to begin developing the 41-acre nature park and viewpoint in south Gresham. The project is located in the Gresham Butte Neighborhood District

Justification: The project provides passive recreation facilities for the community to view five Cascade Mountains and to learn why park and open space land needs to be acquired and preserved/protected or developed to provide recreation opportunities for the community.

Type of Project: Construction of utilities and facilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Other	950,000
	SDC	650,000
Resources Total		1,600,000
Expenses	Design/Const Admin	151,053

Expenses Total		1,600,000

UNFUNDED PROJECT
Parks, Trails, & Open Space

724000: Nelson Property Neighborhood Park @ Nadaka

Description: This project will prepare engineering drawings and construction of park and recreation facilities for this undeveloped 2-acre park site in west Gresham. Work will be based on the 2010 Nelson Property Neighborhood Park Master Plan. Park features include a community garden, restroom, meadows, walking paths, rain gardens, native plantings, benches and picnic tables. This project is located in the Wilkes-East Neighborhood District.

Justification: The Nelson Property is adjacent to the existing 10-acre Nadaka Nature Park. Development of the Nelson Property will compliment Nadaka and is also needed to provide a wide range of recreation opportunities for all Gresham residents.

Type of Project: Engineering or architectural studies related to City services for growth. Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total

General Development

Funded Projects

Overview

This program was created a few years ago in order to coordinate infrastructure planning related to Pleasant Valley and Springwater. The initial planning has been completed, and many discussions are underway regarding a Phase I development for Pleasant Valley and creation of a shovel-ready industrial site for Springwater. Infrastructure construction for Pleasant Valley and Springwater must be closely coordinated across all program areas (i.e., wastewater, water, transportation, parks and stormwater) in order to ensure needed services are available.

Highlights

Pleasant Valley Projects shown as funded are included in a financing agreement between developers and the City, however, no activity is anticipated for FY11/12.

FUNDED PROJECT
General Development
Pleasant Valley-Wastewater

PV3000: Kelley Creek Trunk

Description: This project will construct the sanitary sewer interceptor from Jenne & Foster Road to the Pleasant Valley Grade School. This location will serve as the point of discharge for the identified “Phase I” development area within new Pleasant Valley urban growth area.

Justification: This project is needed to provide the new Pleasant Valley urban area with wastewater conveyance infrastructure to allow for growth.

Type of project: Design and construction of facilities and utilities for growth.

Estimated Dollars:

DEVELOPER FUNDED PROJECT

**General Development
Pleasant Valley-Water**

PV4000: Pleasant Valley Water Infrastructure Backbone

Description: This project installs a new water system backbone to meet the residential development of Pleasant Valley. This project is located in the new Pleasant Valley Neighborhood district within the City.

Justification: The Pleasant Valley area of Gresham is slated for considerable residential development in the future. Gresham has entered into an Infrastructure Agreement with several developers interested in proceeding with development in the area. Through the Agreement, developers will install an infrastructure backbone and receive defined system development charge credits towards the installation of improvements within adopted utility master plans. The desired outcome is the installation of improvements which will allow the orderly and planned development of this important residential area of the community. This project will construct a supply backbone served by the South Hills and Butler Reservoirs. (Existing / Future Customers Benefited: 0% / 100%)

Type of Project: New construction of utilities.

Map: Refer to the City of Gresham Neighborhood Districts Map.

Estimated Dollars:

FUNDED PROJECT
General Development
Pleasant Valley -Transportation

PV5000: Giese Rd (182nd to 190th)

Description: This project will improve Giese to a Green Street Minor Arterial Standard. The profile of the road will be adjusted to improve sight distance and existing roadway reconstructed to support the anticipated traffic loading. Project includes pavement widening, curb, sidewalks, street trees, rain gardens, and street lighting. This sheet shows City funding only. The project is dependent on funding from adjacent development.

Justification: This project supports development of Pleasant Valley.

Type of Project: Construction of facilities and utilities for growth.

Springwater Plan District

FUNDED PROJECT
General Development
Springwater -Transportation

SW5001: SE 267th (US 26 to 33rd)

Description: This project improves SE 267th to a green street collector standard. Project includes pavement widening, curb, sidewalks, street trees, rain gardens and street lighting. A traffic signal at 267th and US 26 will be constructed as a phase 1 access for the Springwater area. The signal will be removed upon construction of the full interchange as identified in the Springwater Plan. This project is dependant on State funding for a majority of the project costs.

Justification: This project will provide the transportation infrastructure needed for the first phase of development in the Springwater area.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

UNFUNDED PROJECT
General Development – Pleasant Valley
Parks, Trails, & Open Space

PV7006: Kelley Creek Greenway-Pleasant Valley

Description: The Pleasant Valley Concept Plan calls for 135 acres to be preserved for passive recreation use, natural resource protection and community enjoyment. The concept plan will determine the locations and funding required for the development of trail-related capital improvements in addition to the land acquisition necessary to meet the concept plan goals and the Park Design Standards. There will be an ongoing annual maintenance requirement of \$67,000 for this new park.

Justification: As Gresham’s population continues to grow, environmentally sensitive natural resource areas need to be acquired, preserved and protected and developed for community. If natural areas are not acquired, natural resources may not be protected from private development and residents needs for passive nature oriented recreation will not be met.

Type of Project: Acquisition of land and other real property for growth.

UNFUNDED PROJECT
 General Development – Springwater
 Water

SW4000: Springwater Water Infrastructure Backbone

Description: This project installs a new water system supply backbone in the Springwater area of Gresham. The improvement will allow for additional commercial/industrial property for community growth and development. In addition to these costs, funded project 422100 will also serve SW Development.

Justification: The Springwater area of Gresham is largely underserved by water utilities. The Springwater plan will result in the installation of water supply backbones to the area to meet the needs of an increased commercial/industrial customer base. Future infrastructure agreements are anticipated to allow for the installation of improvements by developer (s) with the application of system development charge credits for qualified master plan improvements. The desired outcome is the installation of improvements which will allow the orderly and planned development of this important residential area of the community. (Existing / Future Customers Benefited: 0%/ 100%)

Type of Project: New construction of utilities.

Map: Refer to the City of Gresham Neighborhood Districts Map.

UNFUNDED PROJECT
General Development – Springwater
Parks, Trails, & Open Space

SW7003: Springwater Greenways

Description: The Springwater Concept Plan calls for 121 acres to be preserved for passive recreation use, natural resource protection and community enjoyment. The concept plan will determine the locations and funding required for the development of trail-related capital improvements in addition to the land acquisition necessary to meet the concept plan goals. There will be an ongoing annual maintenance requirement of \$62,000 for this new park.

Justification: As Gresham’s population continues to grow, environmentally sensitive natural resource areas need to be acquired, preserved and protected and developed for community. If natural areas are not acquired, natural resources may not be protected from private development and residents needs for passive nature oriented recreation will not be met.

Type of Project: Acquisition of land and other real property for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Other	1,404,173
	Dev/SDC Credit	8,867,762

UNFUNDED PROJECT
General Development – Springwater
Stormwater

SW9000 : Springwater “Shovel Ready” Infrastructure – Stormwater Facilities

Description: The stormwater collection/conveyance system (swales) is designed to collect and convey the runoff from the future roadway and adjacent property surfaces. Collected stormwater will be conveyed to regional stormwater facilities to provide storage for flood control, stream stability, and water quality. These facilities will limit the post-development 2-yr runoff peak flows to half of the existing condition, Nuisance storm post-development runoff peak flows to existing conditions, and be able to pass the 100-yr runoff peak and volume through the facility via an overflow structure. All green street swales, regardless of roadway classification, were designed to convey the nuisance storm event in accordance with the Springwater planning criteria. Street trees will be installed within the future roadway right-of-ways in accordance with the Metro's Green Streets approach.

Justification: This project is required to provide the new Springwater urban area with stormwater conveyance and management infrastructure to allow for growth.

Type of Project: Design and construction of facilities and utilities for growth.

Stormwater (Watershed Management)

Funded Projects

Overview

The Stormwater (Watershed) Capital Program is designed to promote and maintain the health and safety of the environment for all Gresham citizens through effective stormwater and natural resource management including: planning, designing, constructing, and maintaining all elements of the public stormwater system. The 5-year CIP program is a vital component to meeting these stated goals, along with meeting the requirements of our regulators and expectations of our residents. Through careful planning and capital project implementation, most historical challenges associated with flood management are now being addressed. While additional flood control projects are still needed, the CIP efforts can start focusing on needed improvements in the areas of water quality, stream health, natural resources, and maintenance of existing infrastructure. Properly functioning storm water infrastructure and healthy streams and wetlands are an important part of the economic engine for sustaining and improving the livability and quality of life in Gresham. Drivers to the CIP program include:

1. Projects directly related to meeting State storm water discharge permit requirements to protect surface and groundwater resources
2. Projects needed to reduce flooding (future build out) and ‘prevent’ property damage
3. Projects needed to improve the quality of our waterways

Highlights

Significant projects during the coming fiscal years include:

1. Major system improvements associated with the City’s drywells #908900
2. Numerous riparian and streamside restoration projects
3. Burnside to Civic Drive Storm Drain #905200

Project funding comes from a combination of stormwater utility rates, system development charges, grants, low/zero interest loans and private-public partnerships.

Stormwater (Watershed Management) Expenditure Graph by Fiscal Year

FUNDED PROJECT
Stormwater

902400: Minor Drainage Problems

Description: This project repairs the storm drainage system to correct drainage problems identified by staff and the public. These repairs are located in various neighborhood districts. The top five projects listed by priority include: 10th & Wallula, NE 38th Dr., SE 192nd, SE 182nd, NW 20th & Birdsdale and SW 10th Drive. The priority of the projects shown are subject to change.
(Estimation of benefits: Growth related 0%; Existing System related 100%)

Justification: The project corrects drainage problems that result in damage to private properties or that cause localized flooding

Type of project: Repair and rehabilitation of facilities and utilities, and to connect deficiencies

Estimated Dollars:

902800: Low Impact Development Practices Retrofit Program

Description: This project replaces conventional systems by integrating Low Impact Development practices such as rain gardens, porous pavement & pavers. The project is located in various neighborhood districts. (Estimation of benefits: Growth related 0%; Existing System related 100%)

Justification: This project addresses water quality and water quantity issues through implementing sustainable best management practices that mimic natural hydrologic functions.

Type of project: Construction of facilities and utilities to correct deficiencies.

FUNDED PROJECT
Stormwater

905200: Burnside to Civic Drive Storm Drain

Description: This project constructs 36” and 60” diameter storm drain pipe to provide additional system capacity. This project drains approximately 600 acres. The project is located in the Northwest Neighborhood District. (Estimation of Benefits; Growth related 30%; Existing System related 70%).

Justification: Eliminates surcharging in local storm drain system and localized street flooding/manhole surcharging upstream.

Type of project: Construction of facilities to correct deficiencies and for future growth

Estimated Dollars:

FUNDED PROJECT
Stormwater

906100: Fairview Creek Channel Restoration

Description: This project repairs a section of Fairview Creek’s channel to eliminate existing bank erosion and reduce future erosion and down-cutting. Riparian vegetation will be installed the entire reach. Multiple benefits include an increase in conveyance capacity and flood storage stormwater discharges, as well as improving fish habitat, and addressing regulatory requirements for water quality. The project is located in the Rockwood and Northwest neighborhood districts. (Estimation of benefits: Growth related 40%; Existing System related 60%)

Justification: Fairview Creek provides stormwater conveyance for the City of Gresham. Stream bank erosion, sediment accumulation and debris blockages exist. Native riparian vegetation is completely lacking. Natural stream channels and vegetation are an essential element in the improvement of conveyance and improve water quality and habitat functions. This project is part of the City’s response to Clean Water Act requirements to improve water quality parameters (such as temperature, nutrients, and sediment) within the Fairview Creek system. The project is also part of an existing wetland mitigation project the City is required to implement, maintain, and monitor between 2004 and 2011.

Estimated Dollars:

FUNDED PROJECT
Stormwater

906101: Johnson & Kelly Creek Channel Restoration

Description: This project repairs stream channels to prevent and eliminate bank erosion. Typical problem sources have been identified as direct outfall pipes to the creek. Multiple benefits include an increase in conveyance capacity and flood storage stormwater discharges, as well as improving fish habitat, and addressing regulatory requirements for water quality. The project is located in various neighborhood districts. Specific project locations are identified in the Johnson & Kelly Creek Master Plans and by City Staff. High priority areas include: SW Royal Ct & SE 16th Drive (Ironwood @ Kelly Creek). (Estimation of benefits: Growth related 40%; Existing System related 60%)

Justification: Johnson Creek, Kelly Creek, and their tributaries provide stormwater conveyance for the City of Gresham. Severe scour (erosion) of the bed and banks, sediment accumulation, and debris blockages exist at project locations (pipe outfalls and adjacent creek bed and bank areas). Surrounding channel conditions frequently worsen after severe rainfall events. Additional development will exacerbate the problem. Natural stream channels are an essential element in the conveyance of stormwater discharges within the City of Gresham. This program will employ bioengineering techniques to assure the improvement of conveyance, water quality, and habitat functions.

FUNDED PROJECT
Stormwater

908800: Rehab & Repair of Pipe System

Description: This project provides for design and re-construction of stormwater facilities that are in poor physical conditional and in need of rehabilitation. The projects involve repairs and new construction to replace deficient stormwater systems. The specific projects will be identified in the Stormwater Rehabilitation Management Plan, prepared during the initial stage of this program. Located in various neighborhood districts. Current known rehabilitation projects include: Culvert Crossing @ Cleveland, and Barnes Rd. (Estimation of Benefits: Growth related 0%; Existing System related 100%)

Justification: This project will ensure that our existing stormwater infrastructure, estimated to have a fixed asset value in excess of \$27M, remains useful and effective.

Type of project: Repair and rehabilitation of facilities.

908900: UIC Implementation

Description: A Stormwater Management Plan will be designed and implemented to respond to newly promulgated Underground Injection Control (UIC) rules designed to afford strict water quality protection measures for groundwater supplies impacted by injected stormwater runoff. The City is securing a zero-interest loan from the DEQ that will provide for \$5M in resources.

Justification: Gresham currently has over 1090 drywell or sump facilities that discharge stormwater into the ground. With the adoption of the new UIC rules in June 2001, stormwater entering any of these drywell facilities will now have to be treated using Best Management Practices (BMP's) prior to being injected. Phase I includes upgrading existing sumps to Public Works Standards; Phase II developing a Management Plan & Risk Model, Phase III modifying UIC's to conform to permit requirements.

Type of Project: Performance of engineering services; construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

909000: Fish Passage Improvements

Description: Increase native anadromous and resident fish populations by replacing culverts that are barriers to fish passage, and reestablishing access to quality spawning and rearing habitat. Additional inventories need to be completed for City-Owned roads to identify potential fish passage problems that may result in projects. Culverts will be prioritized in terms of miles of fish passage opened, and according to upstream habitat conditions.

Justification: Recent legislation requires fish passage in all waters of the state in which native migratory fish are currently or have historically been present. Review of potential fish passage barriers in Gresham resulted in the listing of our culverts on regional priority schedules for the replacement of these barriers. The state will cost share with jurisdictions to resolve fish passage problems. Of the 14 known fish-impassable culverts within Gresham, sites within salmon-populated areas of the Johnson Creek mainstem will be addressed as high priority. These are located at: SW Pleasant View Dr., SW Towle, SE Regner, and SE Roberts. Grant funding has not yet been secured.

Type of Project: Planning & construction of facilities to correct existing deficiencies.

Estimated Dollars:

FUNDED PROJECT
Stormwater

910200: Kelly Creek Water Quality Facility

Description: This project provides for the design and construction of a stormwater quality treatment facility at the existing Kelly Creek detention facility. The facility will treat the stormwater runoff from the upstream area of the Kelly Creek Drainage basin. Potential projects include a retrofit to existing ponds to incorporate a sedimentation basin and/or constructed wetland. The project is located in the Kelly Creek Neighborhood District. (Estimation of benefits: Growth related 30%; Existing system related 70%)

Justification: This project will improve the water quality of Kelly Creek.

Type of project: Construction of utilities and facilities for growth and to improve existing water quality.

Map: See Drainage Basin Map

Estimated Dollars:

FUNDED PROJECT
Stormwater

910300: Boeing Area Water Quality Facility

Description: Creates a water quality facility, such as a pond and/or constructed wetland, north of Sandy Boulevard and the Boeing of Portland facility. Based on impervious percentages for existing and future conditions, 25% of the project would benefit flows associated with future development. This project is in the North Gresham Neighborhood District. This project is identified as GWQ-4a and 4B in the West Gresham Master Plan.

Justification: Facilities would provide water quality treatment for a drainage area of approximately 800 acres.

Type of project: Construction of facilities related to growth and to correct deficiencies.

Estimated Dollars:

Stormwater

910600: Fairview Cr. Improvements – Burnside - Glisan

Description: This project is a re-vegetation and public awareness project. Project elements include (1) removing invasive plants, channel encroachments and locations of overly dense vegetation; and (2) working with homeowners and volunteer organizations for re-establishing native plantings. Sections of the creek reach are also experiencing bank under-cutting. Vegetative methods are to be used for bank stabilization. Public awareness items include the impacts that maintenance, animal waste and debris dumping, encroachments have on water quality, wildlife habitat and conveyance. Homeowner involvement is critical for long-term success of this project. Existing 30' easement use must be verified. This project is in the North Central Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits; Growth related 13%; Existing System Related 87%)

Justification: Water quality improvement and flood control

Type of project: Channel improvements (revegetation).

Estimated Dollars:

913000: Flood Plain Re-Mapping

Description: This project will provide for Engineering services to identify current areas inundated by flood events. This project will identify the remaining flood storage available for detention throughout the Johnson Creek, Fairview Creek and Kelly Creek Basins. FEMA Flood Insurance Rate Maps will then be updated. (Estimation of Benefits: Growth related 30%; Existing System related 70%)

Justification: Identification and documentation is needed of the areas that are or will be within the 100-year flood plain with future development. The project will reflect the city's flood control improvements in the Fairview Creek Basin, as well as provide for base flood elevations in the Johnson Creek Basin. There are areas in the upper Kelly Creek basin that have yet to be mapped.

Type of Project: Identify deficiencies and make recommendations for future facilities & growth.

Map: See Drainage Basin Map for Johnson Creek and Fairview Creek

Estimated Dollars:

FUNDED PROJECT
Stormwater

913200: SW 7th St: Johnson Creek Riparian Corridor Improvements

Description: Improve natural resource functions along 16.8 riparian acres of public property located between SW Eastman Parkway and SW Overlook Ct. by: stabilizing stream banks, improving the stream bed conditions through installation of bio-engineered bendway weirs, reconnecting Johnson Creek mainstem with its floodplain, and replacing aggressive invasive plant species with native tree and shrub species. (JC-NR01)

Justification: Assists City in: (1) addressing habitat needs for ESA-listed salmon, and (2) responding to water quality (NPDES and Temperature TMDL) requirements by decreasing amount of bank soil eroding into creek, improving floodplain storage, reducing stream temperature through tree shade, and providing a vegetated buffer to capture nutrient and pesticide runoff.

Type of project: Stream restoration/enhancement.

913800: SW 14th Stabilization: Johnson Creek Riparian Corridor Improvements

Description: Address massive slumping and adjacent areas of bank erosion along 1.55 riparian acres between Johnson Creek and SW 14th Dr., east of SW Pleasant View. Geotechnical analysis, landowner involvement, and significant agency input will be needed, in addition to placement of in-stream structures, and dense re-vegetation of banks and surrounding floodplain areas with native plants. (JC-NR07)

Justification: Needed to prevent further additional bank slumping which is a significant source of sediment in the Johnson Creek system. Also assists City in complying with ESA and water quality (NPDES and Temperature TMDL) requirements by, reducing stream temperatures and pollutant levels in the creek, and improving aquatic habitat.

Type of project: Stream restoration/enhancement

Estimated Dollars:

914100: Stormwater Facility Improvements

Description: This project evaluates existing local ineffective stormwater systems for improvements in design, maintenance access, increase of flood storage, added water quality benefits & riparian planting.

Justification: This project will bring facilities up to current Public Works Flood Control and Water Quality Treatment Standards. Assists the City in meeting state and federal permit requirements for water quality improvement, pollutant removal, and annual reporting.

Type of project: Design and construction of facilities to correct existing system deficiencies and improve water quantity and quality.

914600: Development Coordination

Description: This project funding will be used to leverage stormwater revenue with new development projects, resulting in stormwater improvements beyond what either the new development of City resources could have accomplished alone.

Justification: Development projects often trigger a need for certain improvements that are not within the scope of the project, but need to be done accommodate potential stormwater impacts. This project creates a funding base to complement the developer’s contribution and to accomplish needed off-site improvements.

Type of project: Construction of facilities and utilities for growth.

Estimated Dollars:

915100: Riparian and Wetland Improvement Projects

Description: Implementation of Natural Resources Improvement Projects identified through master planning, watershed action planning, and regulatory response plans. This fund provides funding for on-the-ground improvements conducted by AmeriCorps, EnviroCorps, Friends of Trees, Portland's Watershed Revegetation Team, and other contracted project partners. The highest priority area includes: Removal of 8 acres of invasive Holly and Hawthorn trees, including the bioengineering and restoration. The "Watershed Enhancement Plan" is a significant document that identifies stream and wetland mitigation opportunities throughout the City.

Justification: Assists the City in meeting water quality, habitat, flood control, and anti-degradation goals by implementing projects that reduce or prevent soil erosion, improve wetland function, provide native tree canopy to decrease stream temperatures, improve stream channel stability and flood plain function, and increase aquatic habitat.

Type of project: Riparian/Wetland Improvements.

FUNDED PROJECT
Stormwater

919600: Fairview Creek Wetland and Stream Enhancement

Description: Improve and restore natural resource conditions for the Fairview Creek & Columbia Slough Watershed within a 59-acre parcel. Two large quarry ponds will be partially filled to create a diverse wetland complex.

Justification: The project will provide multiple benefits: increased flood storage, water quality improvements, habitat diversity, reduction in ongoing vandalism and fire hazards (by altering lands now used for camping, dumping, etc.). Mitigation credits may result from the project, offering wetland and stream mitigation options for development over the long term. The project will remedy localized street flooding on Glisan routinely seen during significant rain events. Resulting conditions from this project will serve as part of the City’s response to Clean Water Act requirements for temperature, nutrients, toxics, bacteria, heavy metals, and sediment.

Estimated Dollars:

919800: Pond Management Plan

Description: Develop a plan to better manage existing ponds such that they conform to 303d list water quality regulations. Evaluate existing dam/impoundment flow control mechanisms for modifications; including the impacts to hydrology & hydraulics, channel geomorphology & sediment transport. The Plan requires water quality sampling, analysis & monitoring.

Justification: City responsibilities for meeting TMDL/303(d) list temperature requirements, protecting essential fish habitat, and decreasing pollutant entry into Johnson, Kelly and Fairview Creek.

Type of Project: Stream corridor enhancement, water quality improvement, floodplain management.

UNFUNDED PROJECT
Stormwater

900300: Linden Avenue Storm Drain

Description: This project constructs 1,200 L.F. of 30" storm drain in NE Linden Avenue from NE 6th Ave. to NE 2nd Ave. The project is located in the downtown area and is in the Johnson Creek Basin.

Justification: It appears that there may be a high potential for flooding near N.E. 6th and N.E. Linden Ave. This project would eliminate the need to install replacement pipe in N.E. Elliot Ave. The project enhances business opportunities in the downtown area and responds to customer complaints. A precondition of this project is problem definition and the Johnson Creek Master Plan update.

Type of Project: Repair and rehabilitation of facilities and construction of facilities for future growth.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	405,069
Resources Total		405,069
Expenses	Design/Const Admin	81,998
	Construction	273,326
	Admin (14%)	49,745
Expenses Total		405,069

UNFUNDED PROJECT
Stormwater

900800: Fairview Creek Water Quality Pond

Description: This project provides for the design and construction of a stormwater quality treatment facility. The facility will treat the stormwater runoff from a 1.3 square mile area of the Fairview Creek Drainage basin. The project is located in the Northwest Neighborhood District. (Estimation of Benefits: Growth related 30%; Existing System related 70%). Estimated completion date 08/09.

Justification: This project is a critical component of the 1988 and 2002 Fairview Creek Drainage Master Plans and will improve the water quality of Fairview Creek

Type of project: Construction of utilities and facilities for growth and to improve existing water quality

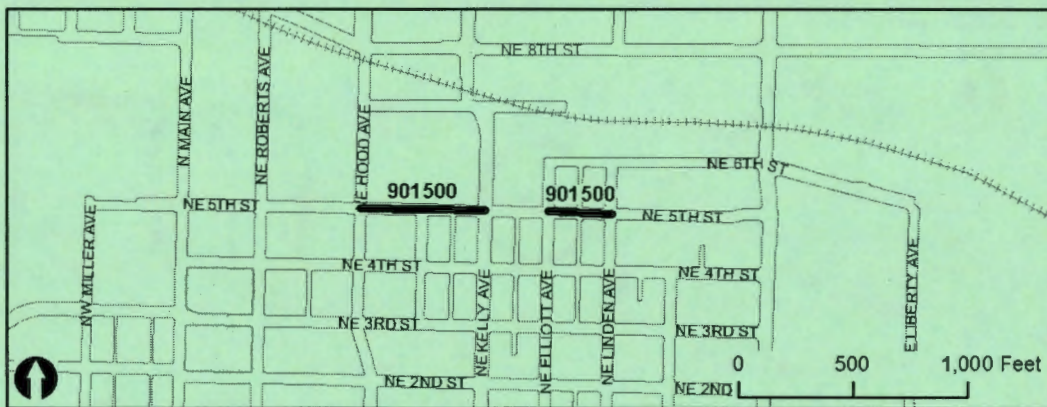

**UNFUNDED PROJECT
Stormwater**

901500: NE 5th Street Storm Drain

Description: This project consists of 900 L.F. of 15" and 18" storm drain in NE 5th Street from Roberts Street to NE Elliott. The project is located in the Central City Neighborhood District.

Justification: The existing storm system is under capacity for the existing level of development in the basin.

Type of Project: Construction of facilities and utilities for growth and to correct deficiencies

Estimated Dollars:

Funds	Description	Total
Resources	Bond	145,201
Resources Total		145,201
Expenses	Design/Const Admin	29,393
	Construction	97,976
	Admin (14%)	17,832
Expenses Total		145,201

UNFUNDED PROJECT
Stormwater

901700: SE Elliott-Regner Outfall

Description: This project constructs a project related to the regional Johnson Creek Resource Management Plan (JCRMP), the 2003 Draft Johnson Creek Master Plan. The project extends a collapsed outfall pipe east of Regner Road. The outfall improvements will address the failed pipe sections and the resulting poor water quality. The existing hand formed channel from the outfall pipe requires regrading and bio-engineering techniques to create a more natural outlet to Johnson Creek

Justification: The outfall improvement will address an existing drainage problem that impacts private property, erosion, water quality and system deficiencies

Type of project: Construction of facilities and utilities to correct deficiencies

Estimated Dollars:

Funds	Description	Total
Resources	Operating	39,900
Resources Total		39,900
Expenses	Design/Const Admin	5,000
	Construction	30,000
	Admin (14%)	4,900
Expenses Total		39,900

UNFUNDED PROJECT
Stormwater

903700: Willow Parkway Storm Drain

Description: This project constructs approximately 400 L.F. of 18" storm drain to replace an existing 12" pipe between SW Eastwood Avenue and SW Meyers Place. The project is located in the Southwest Neighborhood District and is in the Johnson Creek Basin.

Justification: The existing undersized pipe is unable to convey the 10-year storm flows. The project will provide the increased capacity required to convey 10-year flows from existing development to prevent local flooding.

Type of Project: Construction of facilities and utilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	99,818
Resources Total		99,818
Expenses	Design/Const Admin	20,206
	Construction	67,354
	Admin (14%)	12,258
Expenses Total		99,818

**UNFUNDED PROJECT
Stormwater**

907400:194th Avenue Pipe Enlargement at I-84

Description: This project installs a 36" stormwater pipe through the existing transportation corridor occupied by I-84 and a railroad. This project is located in the North Gresham Neighborhood District and the West Gresham Basin.

Justification: The existing storm pipe crossing I-84 and adjacent to the railroad is 24". Enlargement of this storm pipe to 36" is required to convey runoff from future development. A pre-requisite to this project is the West Gresham Master Plan, currently underway.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	307,800
Resources Total		307,800
Expenses	Design/Const Admin	60,000
	Construction	200,000
	Property Acq	10,000
	Admin (14%)	37,800
Expenses Total		307,800

UNFUNDED PROJECT
Stormwater

909200: Hogan Place Storm Drain

Description: This project replaces 2,750 ft. of storm drain pipe of various diameters. This project is located in the North Central and Powell Valley Neighborhood Districts.

Justification: This section of storm pipe is not adequate to accommodate stormwater runoff from the area upstream. If improvements are not made, flooding in the project area may occur. Increasing capacity will permit continued growth in SE Gresham. This project is identified as element B4, B6 and B8-B10 in the 1988 Kelly Creek Basin Master Plan.

Type of Project: Design and construction of facilities to meet growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	370,728
	SDC	370,728
Resources Total		741,456
Expenses	Design/Const Admin	150,100
	Construction	500,300
	Admin (14%)	91,056
Expenses Total		741,456

UNFUNDED PROJECT
Stormwater

909300: E. Burnside Parallel Pipe

Description: This project adds stormwater conveyance capacity consisting of 2350 linear feet of up to 60" parallel storm drain pipe in E. Burnside, SE 1st St to Powell Blvd. This project is located in the Powell Valley Neighborhood.

Justification: Increase pipe size to handle peak flows and reduce potential flood damage. This project is identified as element B15-B19 in the 1988 Kelly Creek Basin Master Plan.

Type of Project: Design and construction of facilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	901,056
Resources Total		901,056
Expenses	Design/Const Admin	182,400
	Construction	608,000
	Admin (14%)	110,656
Expenses Total		901,056

UNFUNDED PROJECT
Stormwater

909400: Salquist/Barnes Pipe Enlargement

Description: This project adds stormwater conveyance capacity consisting of 500 linear feet of 42" storm drain pipe, from SE 22nd and Salquist to Orient Dr. This project is located in the Southeast Neighborhood.

Justification: This project is required to handle existing flows and to reduce the potential of flood damage. This project is identified as element B30 in the 1988 Kelly Creek Basin Master Plan.

Type of Project: Design and construction of facilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	185,452
Resources Total		185,452
Expenses	Design/Const Admin	37,541

Expenses Total		185,452

UNFUNDED PROJECT
Stormwater

909600: Burlingame Cr. South of Powell valley Road

Description: This project adds stormwater conveyance capacity consisting of 2300 linear feet of improvements. This project is located in the Mt Hood Neighborhood.

Justification: Increase channel size to handle peak flows and reduce potential flood damage. This project is identified as element B21 in the 1988 Kelly Creek Basin Master Plan.

Type of Project: Design and construction of facilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	298,575
Resources Total		298,575
Expenses	Design/Const Admin	60,440
	Construction	201,468
	Admin (14%)	36,667

UNFUNDED PROJECT
Stormwater

909800: Kelly Creek, South of SE Salquist Road

Description: This project adds stormwater conveyance capacity consisting of channel improvements in Kelly Creek, south of SE Salquist. This project is located in the Kelly Creek Neighborhood.

Justification: An increased channel size is required to handle peak flows and reduce potential flood damage. This project is identified as element A19 in the 1988 Kelly Creek Basin Master Plan.

Type of Project: Design and construction of facilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	348,033
Resources Total		348,033
Expenses	Design/Const Admin	70,452
	Construction	234,840
	Admin (14%)	42,741
Expenses Total		348,033

UNFUNDED PROJECT
Stormwater

909900: Burnside Diversion to Kelly Creek

Description: This project adds stormwater conveyance capacity consisting of 2920 linear feet of up to 72" parallel storm drain pipe from E Burnside to Kelly Creek. This project is located in the Northeast Neighborhood.

Justification: Increase pipe size to handle peak flows and reduce potential flood damage. This project is identified as element A12.1-A12.5 in the 1988 Kelly Creek Basin Master Plan.

Type of Project: Design and construction of facilities to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	1,379,683
Resources Total		1,379,683
Expenses	Design/Const Admin	279,288
	Construction	930,960
	Admin (14%)	169,435
Expenses Total		1,379,683

UNFUNDED PROJECT
Stormwater

910400: Stark Street Culvert

Description: This CIP would eliminate the fish barrier the currently exists downstream from the culvert under Stark. This is accomplished by placing a fish ladder downstream from Stark. Invasive plant species are to be removed and replaced with native plant species to provide shade. This project is in the North Central Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits: Growth related 30%; Existing System related 70%).

Justification: Provides passage for fish (Meets ODF&W requirements for fish passage) and in conjunction with FC01a, increases flood protection along this section of the creek.

Type of Project: Culvert and channel improvements.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	170,134
	SDC	72,914
Resources Total		243,048
Expenses	Design/Const Admin	49,200
	Construction	164,000
	Admin (14%)	29,848
Expenses Total		243,048

UNFUNDED PROJECT
Stormwater

910700: Division to Kelly Stormdrain

Description: Upsize the main trunk line on Division. Existing pipe size is 12-inch in diameter. Suggested replacement pipe size is 24-inch. This project is located in the Central City Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits: Growth related 32%; Existing System related 68%).

Justification: Eliminates local storm drain system flooding.

Type of Project: Storm drain improvements.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	185,428
	SDC	87,260
Resources Total		272,688
Expenses	Design/Const Admin	55,200
	Construction	184,000
	Admin (14%)	33,488
Expenses Total		272,688

**UNFUNDED PROJECT
Stormwater**

910800: Division Street Diversion

Description: This project will construct a diversion structure to divert the flows from the area south of Division Street into the proposed Birdsdale water quality facility. This 18 acre area drains a developed residential area constructed from the 1950-1970s, as well as a portion of Division Street. This project is in the Northwest Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits: Growth related 7%; Existing System related 93%).

Justification: There is no existing water quality treatment in this area and flows can be accommodated in the Birdsdale Facility.

Type of Project: Water quality treatment

Estimated Dollars:

Funds	Description	Total
Resources	Operating	66,156
	SDC	4,980
Resources Total		71,136
Expenses	Design/Const Admin	14,400
	Construction	48,000
	Admin (14%)	8,736
Expenses Total		71,136

UNFUNDED PROJECT
Stormwater

911000: Stark Street (East) Swale

Description: This project would install a diversion manhole to divert storm flows to a pollution reduction facility (PRF) or sediment manhole and then to a vegetated swale located along the north side of SE Stark St. The PRF would remove pollutants while the vegetated facility would remove fine sediments and soluble nutrients and metals. The swale will be located in a piece of land to be purchased. This project is in the North Central Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits: Growth related 0%; Existing System related 100%).

Justification: There is no existing water quality treatment in this area and this facility would improve stormwater quality flowing to Fairview Creek.

Type of Project: Stormwater quality improvements

Estimated Dollars:

Funds	Description	Total
Resources	Operating	176,586
Resources Total		176,586
Expenses	Design/Const Admin	21,900
	Construction	73,000
	Property Acq	60,000
	Admin (14%)	21,686
Expenses Total		176,586

UNFUNDED PROJECT
Stormwater

911100: Stark Street (West) PRF

Description: Install a pollution reduction facility at the intersection of SE Stark St. and SE 205th. This project is in the North Central Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits: Growth related 70%; Existing System related 30%).

Justification: There is no existing water quality treatment in this area. This facility would improve stormwater quality flowing to Fairview Creek.

Type of Project: Stormwater quality treatment

Estimated Dollars:

Funds	Description	Total
Resources	Operating	20,007
	SDC	46,683
Resources Total		66,690
Expenses	Design/Const Admin	13,500
	Construction	45,000
	Admin (14%)	8,190
Expenses Total		66,690

UNFUNDED PROJECT
Stormwater

911200: Burnside (West) PRF

Description: This project would install a pollution reduction facility at Burnside Street prior to discharging to Fairview Creek. The 9 acre area drains a fully developed area dominated by commercial and residential properties. A portion of Burnside Street is also located within the drainage area served by this project. This project is in the North Central Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits: Growth related 0%; Existing System related 100%).

Justification: There is no water quality treatment in this area and this facility would improve the quality of stormwater flowing to Fairview Creek.

Type of Project: Structural pollutant reduction facility.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	53,352
Resources Total		53,352
Expenses	Design/Const Admin	10,800
	Construction	36,000
	Admin (14%)	6,552
Expenses Total		53,352

UNFUNDED PROJECT
Stormwater

911300: Burnside (East) PRF

Description: Install a pollution reduction facility (PRF) at Burnside Street, just east of Fairview Creek. This water quality area drains a 19 acre residential area constructed from 1960-1970. This project is in the North Central Neighborhood and in the Fairview Creek Drainage Basin. (Estimation of benefits: Growth related 10%; Existing System related 90%).

Justification: There is no existing water quality treatment in this area and this facility would improve the quality of stormwater flowing into Fairview Creek.

Type of Project: Stormwater quality treatment.:

Estimated Dollars:

Expenses Total		53,352

**UNFUNDED PROJECT
Stormwater**

911400: Water Quality Facility @ 194th Ave

Description: Create a 2.1 - acre-feet water quality facility at the north-eastern corner of the cul-de-sac at the north end of 194th Avenue south of I-84. Based on impervious percentages for existing and future conditions, 62% of the project would benefit flows associated with future development. This project is located in the North Gresham neighborhood district and the West Gresham Drainage Basin. (WGWQ-4C)

Justification: This facility would provide water quality treatment for a drainage area of approximately 102 acres.

Type of Project: Construction of facilities related to growth and to correct deficiencies.

Estimated Dollars:

Stormwater

911600: Water Quality Facility @ 181st & Halsey

Description: Create a 3.3 - acre-foot water quality facility at the north-western corner of the intersection of 181st Avenue and Halsey Street. Based on impervious percentages for existing and future conditions, 22% of the project would benefit flows associated with future development. This project is located in the Wilkes East neighborhood district and the West Gresham Drainage Basin. (WGWQ-3A)

Justification: This facility would provide water quality treatment for a drainage area of approximately 84 acres.

Type of Project: Construction of facilities related to growth and to correct deficiencies.:

Estimated Dollars:

UNFUNDED PROJECT
Stormwater

913200X: SE 7th St: Johnson Creek Riparian Corridor Improvements

Description: Improve natural resource functions along 16.8 riparian acres of public property located between SW Eastman Parkway and SW Overlook Ct. by: stabilizing stream banks, improving the stream bed conditions through installation of bio-engineered bendway weirs, reconnecting Johnson Creek mainstem with its floodplain, and replacing aggressive invasive plant species with native tree and shrub species. (JC-NR01)

Justification: Assists City in: (1) addressing habitat needs for ESA-listed salmon, and (2) responding to water quality (NPDES and Temperature TMDL) requirements by decreasing amount of bank soil eroding into creek, improving floodplain storage, reducing stream temperature through tree shade, and providing a vegetated buffer to capture nutrient and pesticide runoff.

Type of project: Stream restoration/enhancement.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	399,000
Resources Total		399,000
Expenses	Design/Const Admin	15,000

UNFUNDED PROJECT

Stormwater

913700: West Gresham Grade School: Johnson Creek Riparian Corridor Improvements

Description: Improve natural resource functions along 2.5 riparian acres along Johnson Creek, south and east of West Gresham Grade School, by: improving side channel conditions, installing a bendway weir to reduce bank erosion caused by the Walters Rd. bridge, stabilizing areas of slope instability, and replacing aggressive invasive plant species with native tree and shrub species. (JC-NR06)

Justification: Assists City in complying with water quality (NPDES and Temperature TMDL) and ESA requirements by decreasing amount of bank eroding into creek, reducing stream temperature (through tree shade), and improving wetland function, base flow support, and aquatic habitat. This will also reduce bank slumping at the upstream edge of the south bridge abutment.

Type of project: Stream restoration/enhancement

Estimated Dollars:

Funds	Description	Total
Resources	Operating	125,400
Resources Total		125,400
Expenses	Design/Const Admin	26,500

Stormwater

913800X: SW 14th Stabilization: Johnson Creek Riparian Corridor Improvements

Description: Address massive slumping and adjacent areas of bank erosion along 1.55 riparian acres between Johnson Creek and SW 14th Dr., east of SW Pleasant View. Geotechnical analysis, landowner involvement, and significant agency input will be needed, in addition to placement of in-stream structures, and dense re-vegetation of banks and surrounding floodplain areas with native plants. (JC-NR07)

Justification: Needed to prevent further additional bank slumping which is a significant source of sediment in the Johnson Creek system. Also assists City in complying with ESA and water quality (NPDES and Temperature TMDL) requirements by, reducing stream temperatures and pollutant levels in the creek, and improving aquatic habitat.

Type of project: Stream restoration/enhancement

Estimated Dollars:

**UNFUNDED PROJECT
Stormwater**

917300: Hogan Place Regional PRF

Description: Construct a regional water quality treatment system (structural pollution reduction facility) in the vacant land between Hogan Drive and Hogan Place. This facility will treat both the dual 36" pipes draining north from Burnside Ave as well as the 30" pipe draining Division St. via a new diversion manhole and pipe. This facility will treat nearly the entire upper Burlingame basin, approximately 1000 acres of mainly residential and commercial lands. (KC-2)

Justification: There is very little water quality treatment being provided in the Burlingame Creek watershed and this facility would remove TSS and associated pollutants from the water quality flow event.

Type of Project: Structural pollutant reduction facility.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	783,938
Resources Total		783,938
Expenses	Design/Const Admin	138,370
	Construction	461,233
	Other	23,062

**UNFUNDED PROJECT
Stormwater**

917600: NE Hale Place Bank Stabilization

Description: Remove ineffective bank stabilization project. Re-establish channel geometry (bank, in particular) and multi-story vegetated riparian community. Relocate stormwater outfall below outside meander bank. Obtain necessary authorization(s) for in-stream work from regulatory agencies (i.e., US Army Corp of Engineers, Oregon Department of State Lands). (KCN-1)

Justification: A private party installed a stormwater outfall and rip-rip apron on an outside meander bank. The outfall was installed higher than accepted engineering standards. Adverse bank erosion processes are affecting down stream properties. This project is just downstream of the proposed SE 17th Street project, which includes similar implementation elements. As such, if the City pursues this and the NE 17th Street projects, early coordination is recommended to maximize cost efficiencies such as mobilization, equipment operation, material hauling,

Type of Project: Creek bank, channel geometry and riparian vegetation corridor improvement

Estimated Dollars:

Funds	Description	Total
Resources	Operating	132,904
	SDC	25,315
Resources Total		158,219
Expenses	Design/Const Admin	6,812
	Construction	22,706

	Admin (14%)	19,430
Expenses Total		158,219

UNFUNDED PROJECT
Stormwater

917700: NE 17th St. Concrete Flume Removal

Description: Remove instream concrete flume-like structure: Re-establish channel geometry and multi-story vegetated riparian community. Obtain necessary authorization(s) for in-stream work from regulatory agencies (i.e., US Army Corp of Engineers, Oregon Department of State Lands). (KCN-2)

Justification: The concrete flume-like structure eliminated approximately 100 linear feet of natural channel and has adversely affected upstream and downstream channel integrity for undetermined distances. It appears the structure was constructed for flow control and/or flood attenuation. Currently, base and seasonally low flows fall beneath the horizontal concrete floor and reemerge at the structure's downstream terminus, while winter and storm event flows are adversely increased by the flume's geometry. This project could be implemented in conjunction with the proposed NE Hale Place project directly downstream to maximize cost efficiencies.

Type of Project: Channel geometry and riparian vegetation corridor re-establishment.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	261,986
	SDC	49,902
Resources Total		311,888
Expenses	Design/Const Admin	15,768

	Admin (14%)	38,302
Expenses Total		311,888

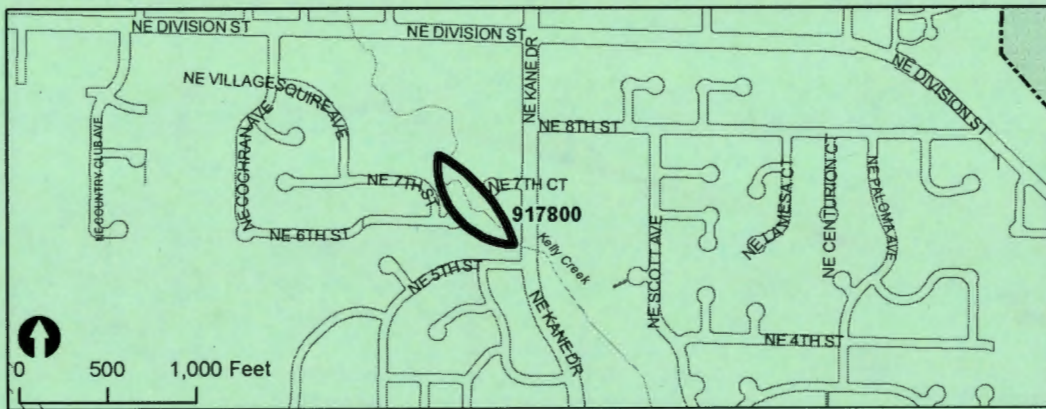

UNFUNDED PROJECT
Stormwater

917800: NE 7th Ct. Channel Modification

Description: Relocate Kelly Creek's channel to alleviate the persistent bank instability point to upstream basin-wide land use changes. Establish multi-story vegetated riparian community. Obtain necessary authorization(s) for in-stream work from regulatory agencies (i.e., USACE, DSL). (KCN-5)

Justification: Private party constructed an inadequate retaining wall on city- and privately owned property to address localized bank instability associated with a multi-unit residence constructed near an outside meander bank. Said wall partially failed during Spring 2005. Current channel location, in conjunction with seasonal and storm event flows, will continue to compromise the wall's stability and residence's long-term structural integrity. The retaining wall was repaired in fall 2005; however, said efforts are temporary. The city-owned parcel adjacent to the west provides sufficient acreage to re-route the channel towards and undeveloped, blackberry dominated reach and alleviate current and future channel instability points.

Type of Project: Channel geometry and riparian vegetation corridor improvement.

Estimated Dollars:

Expenses Total		129,717

UNFUNDED PROJECT
Stormwater

917900: Riparian Enhancements near Gr. Golf Course

Description: Improve riparian corridor's structural diversity to increase stream bank shading and reduce Burlingame Creek temperatures. (KCN-7)

Justification: Burlingame Creek is water quality limited for temperature and E. coli per the Department of Environmental Quality's (DEQ) 303(d) list. This portion of Burlingame Creek supports limited woody riparian vegetation and typically slow-moving flows. Although base flow data is not currently available, velocities observed during late summer indicate that established riparian plantings (particularly along the south bank) would significantly reduce water temperatures before its confluence with Kelly Creek. Additional, per conversations with City staff, course owners are supportive of a riparian enhancement project, as long as the course's playable areas are not affected. As such Burlingame Creek's location within the course layout should provide sufficient acreage for project implementation. The plantings would also contribute to long-term bank stability. Additionally, this project directly addresses the DEQ temperature mandate.

Type of Project: Riparian vegetation corridor and water quality improvement.

Estimated Dollars:

UNFUNDED PROJECT
Stormwater

919500: Johnson Creek Restoration at Main City Park

Description: This project addresses degraded stream bank and channel conditions along the stretch of Johnson Creek that meanders through Main City Park. Channel dredging in the side channel, removal of a grade control structure, and installation of bendway weirs/large wood will provide fish habitat and reduce velocities in the main channel during storm events. Bank erosion will be addressed by installation of bio-engineered structures, removal of invasive weeds, and installation of native vegetation throughout the entire stretch.

Justification: Johnson Creek provides stormwater conveyance for the City of Gresham, and is designated critical habitat for ESA-listed salmon. Stream bank erosion and sediment accumulation have changed the nature of this reach, leading to continuing loss of: bank, riparian trees, and fish habitat. This project is also part of the City's response to the Clean Water Act requirements to improve water quality parameters (such as temperature, nutrients, and sediment). It will be conducted in conjunction with implementation of Phase II of the Main City Park master plan.

Funded Projects

Overview

The Rockwood/West Gresham Urban Renewal Area (URA) was established in November 2003 through a city-wide election. It is a 20-year plan aimed at improving public infrastructure and attracting private investment to Rockwood/West Gresham. The urban renewal program is implemented by the Gresham Redevelopment Commission. The Commission is made up of members of Gresham's City council and serves as the final decision-making body. An 11-member citizen advisory committee also reviews proposed projects and policies and makes recommendations to the Commission.

The initial set of capital improvement projects were derived from the Rockwood/West Gresham Urban Renewal Plan. To carry out the capital projects the Commission entered into an agreement with the City of Gresham. This is why the URA projects are included in the City's CIP and are subject to the same review process as all other City CIP projects.

Highlights

Capital improvement project highlights in FY 2011/12 include:

1. Completion of several transportation related improvements in and around the Rockwood Triangle. Collectively, these projects have been called the Rockwood in Motion (UR1014, UR1015, UR1020, UR1021 & UR1034)
2. Design and begin construction of a public safety facility in Rockwood (UR1030)
3. Leverage industrial development through upgrades to Sandy Boulevard and other public improvements in the industrial area (UR1044 & UR1047)
4. Plan for street improvements along 181st/182nd Avenue to increase safety and attract private investment (UR1051 & UR1052)

FUNDED PROJECT
Urban Renewal

UR1002: Rockwood Triangle Implementation

Description: The projects will be located primarily within the Rockwood Triangle (181st, Burnside, Stark) and be aimed at improving the overall appearance and economic development potential of the area. Projects include landscaping and other public amenities.

Justification: This project will help renew and revitalize the Rockwood Town Center, making it more appealing to private investment.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

FUNDED PROJECT
Urban Renewal

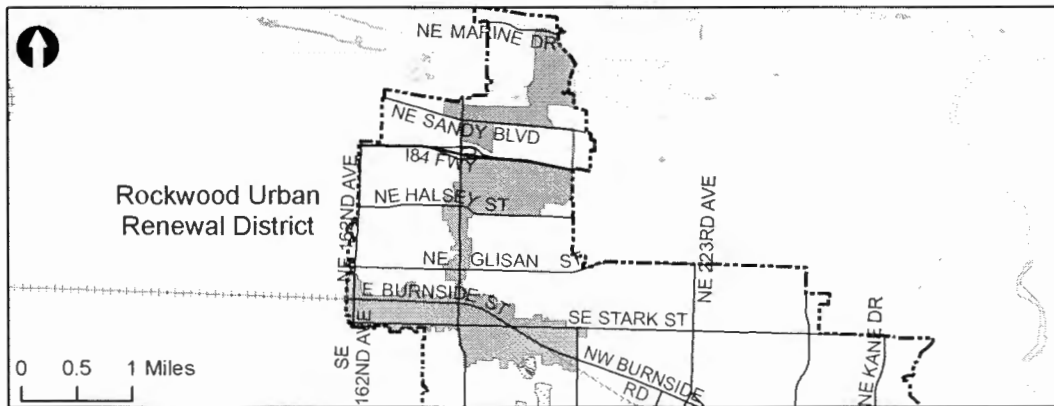

UR1004: Property Acquisition Fund

Description: The Property Acquisition Fund was created to better position the Gresham Redevelopment Commission to respond to development opportunities within the Urban Renewal Area (URA). Its purpose is to provide a financial means for the Gresham Redevelopment Commission to implement the Rockwood West Gresham Renewal Plan Goals.

Justification: This project will help renew and revitalize the Rockwood/West Gresham Urban Renewal Area, making it more appealing to private investment.

Type of Project: Property Acquisition

Partners: Typical partners will be from the private sector interested in selling property or teaming on a development project.

Estimated Dollars:

FUNDED PROJECT
Urban Renewal

UR1014: Burnside Road Boulevard Phase I

Description: This project will construct boulevard improvements from 181st to 197th in the Rockwood Town Center. In FY 2010/11, a segment of this project will be constructed from 185th – 190th. Boulevard improvements include, widening sidewalks, pedestrian-oriented street lighting, street trees, bike lanes, and on-street parking, among other enhancements.

Justification: Improve the public infrastructure to increase neighborhood safety and attract private investment.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

**FUNDED PROJECT
Urban Renewal**

UR1015: Stark Street Boulevard (190th to 197th)

Description: This project will complete boulevard improvements on Stark Street through the Rockwood Town Center. Boulevard improvements may include undergrounding of utilities, wide sidewalks, street trees, pedestrian-scale street lighting, bike lanes, pedestrian refuges, medians, and on-street parking. This project shows only the urban renewal contribution. The full project is programmed in Transportation CIP#517100A.

Justification: Improve the public infrastructure to increase neighborhood safety and attract private investment.

Type of Project: Construction of facilities and utilities for growth.

Partners: A federal earmark was awarded to this project for construction. Along with Transportation TIF money, Urban Renewal funds will enhance the project and fund ineligible grant elements such as undergrounding the utilities.

Estimated Dollars:

FUNDED PROJECT
Urban Renewal

UR1020: 188th Avenue at Burnside Road

Description: This project will improve the intersection of Burnside and 188th in conjunction with the 188th Avenue light rail station improvements, noted in #UR1034. To improve pedestrian safety and encourage transit use, this project will focus on the pedestrian conditions, such as enhancing the marked crosswalks and increasing pedestrian-oriented street lighting .

Justification: This project will help renew and revitalize the Rockwood/West Gresham Urban Renewal Area, making it more appealing to private investment.

Type of Project: Construction of facilities and utilities for growth

Estimated Dollars:

**FUNDED PROJECT
Urban Renewal**

UR1021: 187th/188th Realignment at Stark

Description: This project will realign the 187/188th intersection to increase safety to all users and improving the pedestrian conditions within the Rockwood Town Center. This project is noted in the Transportation System Plan.

Justification: This project will increase safety to pedestrians in a transit-dependent neighborhood.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

**FUNDED PROJECT
Urban Renewal**

UR1034: 188th Ave. Light Rail Station Improvements

Description: This project will make significant capital improvements to the 188th Street light rail station. Improvements including replacement of the light rail shelters, improved station lighting, landscaping, and public art. All will increase safe access to transit and create more appealing transit facilities. The GDRC received a Connect Oregon and MTIP grant to fund the project. The GRDC is providing a match to these grant funds. This sheet reflects City expenses only. (See also UR1034A.)

Justification: This project will increase safety for a transit dependent neighborhood and help renew and revitalize the Rockwood Town Center, making it a more appealing to private investment.

Type of Project: Construction of facilities and utilities for growth.

Partners: In partnership with TriMet and ODOT.

Estimated Dollars:

Funds	Description	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	Total

**FUNDED PROJECT
Urban Renewal**

UR1034A: 188th Ave. Light Rail Station Improvements

Description: This project will make significant capital improvements to the 188th Street light rail station. Improvements including replacement of the light rail shelters, improved station lighting, landscaping, and public art. All will increase safe access to transit and create more appealing transit facilities. The GDRC received a Connect Oregon and MTIP grant to fund the project. The GRDC is providing a match to these grant funds. This sheet reflects grant, intergovernmental agreement (IGA) and Urban Renewal Expenses. (See also UR1034)

Justification: This project will increase safety for a transit dependent neighborhood and help renew and revitalize the Rockwood Town Center, making it a more appealing to private investment.

Type of Project: Construction of facilities and utilities for growth.

Partners: In partnership with TriMet and ODOT.

Estimated Dollars:

**FUNDED PROJECT
Urban Renewal**

UR1043: Catalyst Site

Description: Located in the heart of the Rockwood Town Center, the Gresham Redevelopment Commission purchased this 6.5 acre site for redevelopment. Formerly the home of Rockwood Fred Meyer, the site is now called the Catalyst Site. This project will cover capital costs associated with site redevelopment. Funds were used in FY 09/10 and FY 10/11 to construct interim improvements on the site, "Plaza del Sol".

Justification: This project will help renew and revitalize the Rockwood Town Center, making it more appealing to private investment.

Type of project: Construction of facilities and utilities for growth.

Partners: Private development

Estimated Dollars:

**FUNDED PROJECT
Urban Renewal**

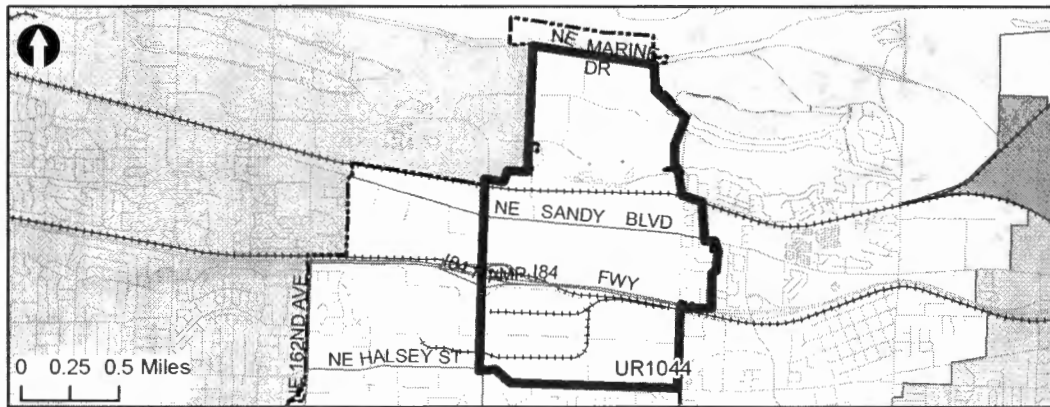

UR1044: Industrial Area Implementation

Description: A study evaluating the development opportunities of the industrial area within the urban renewal area was adopted by the Gresham Redevelopment Commission in 2007. The study includes an action plan with capital projects to help attract new capital intensive industrial development. The intent of the action plan is to better position the GRDC to respond to new industrial development as it occurs. Projects will be implemented as needed. Early projects included signal upgrades at intersections along 181st to increase existing street capacity and support new industrial businesses within the URA.

Justification: Improve public infrastructure to attract capital intensive, industrial uses.

Type of project: Construction of facilities and utilities for growth.

Partners: Union Pacific will be involved in any railroad spur line projects. Private investors.as properties develop.

Estimated Dollars:

**FUNDED PROJECT
Urban Renewal**

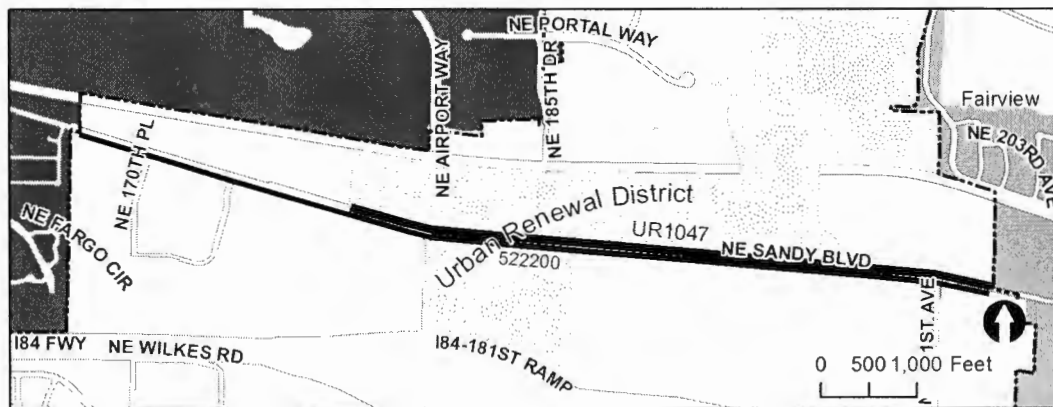

UR1047: Sandy Boulevard Street Improvements*

Description: Sandy Boulevard is the major arterial through the prime industrial lands in the urban renewal area. It's function and appearance are important to future industrial development. The Transportation CIP #522200 will update the road to current arterial standards. Urban Renewal funding will enhance the project within the urban renewal area as needed. This sheet reflects City expenses only and does not include grant payments made directly to private contractors by ODOT. (See UR1047A)

Justification: Attract new capital intensive industrial development to the urban renewal area

Type of Project: Construction of facilities and utilities for growth

Partners: City of Gresham Transportation Division, future industrial development

Estimated Dollars:

**FUNDED PROJECT
Urban Renewal**

UR1052: Pedestrian Crossing Enhancements (CDBG)

Description: This project will enhance pedestrian safety and accessibility at a key location to be determined within the Urban Renewal District. Citizens have identified needs along the 181st and 182nd corridor. This project will construct enhanced crosswalk features including signing, striping and pedestrian activated rectangular rapid flashing beacons meant to warn vehicles that pedestrians are seeking to cross.

The need for enhanced pedestrian features was discussed at Urban Renewal citizen advisory meetings. Gresham's Transportation Division will proceed with investigations to determine appropriate locations for such treatments.

Justification: Enhancing pedestrian safety and accessibility is necessary to assure a vibrant community.

Partner: City Community Development Block Grant Program.

UNFUNDED PROJECT
Urban Renewal

UR1001: Riverside Drive (to Sandy Boulevard)

Description: This project includes preliminary engineering of alternatives for a street network that extends Riverside and Portal Way to the east. Identifying development constraints in this area and strategizing solutions will also occur. Project construction is contingent on a public/private partnership.

Justification: Once constructed, this project will provide a needed street connection, which, in turn will open underutilized land to new industrial development and bring new jobs to the urban renewal area.

Type of Project: Construction of facilities and utilities for growth.

Partners: Team with property owner to attract capital intensive industrial uses.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	2,930,000
Resources Total		2,930,000
Expenses	Design/Const Admin	2,570,175
	Admin (14%)	359,825
Expenses Total		2,930,000

**UNFUNDED PROJECT
Urban Renewal**

UR1005: San Rafael Street (181st to 201st)

Description: San Rafael Street currently does not meet City street standards, especially, east of 181st. This project will improve the portion of San Rafael that is located in the Urban Renewal Area to meet Collector Street Standards. It will also improve the intersection of 181st and San Rafael to meet current standards.

Justification: This project will help renew and revitalize the Rockwood/West Gresham Urban Renewal Area, making it more appealing to private investment.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	2,280,000
Resources Total		2,280,000
Expenses	Design/Const Admin	414,527
	Construction	1,585,474
	Admin (14%)	279,999
Expenses Total		2,280,000

**UNFUNDED PROJECT
Urban Renewal**

UR1006: Wilkes Street (181st to 192nd)

Description: Wilkes is a substandard street with an inverted crown and no structured drainage, which doesn't support the existing truck traffic in this prime industrial area. Pella Corporation, one of Gresham's top ten employers, is located on Wilkes.

This project will improve Wilkes Street to a collector standard. It will also evaluate the potential for opening Wilkes to 181st, which currently allows right in only. Because the Oregon Department of Transportation (ODOT) has jurisdiction over the freeway interchange, this portion of the project is subject to ODOT approval.

Justification: This project will help renew and revitalize the Rockwood/West Gresham Urban Renewal Area, making it more appealing to private investment.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	3,000,000
Resources Total		3,000,000
Expenses	Design/Const Admin	789,474
	Construction	1,842,105
	Admin (14%)	368,421
Expenses Total		3,000,000

**UNFUNDED PROJECT
Urban Renewal**

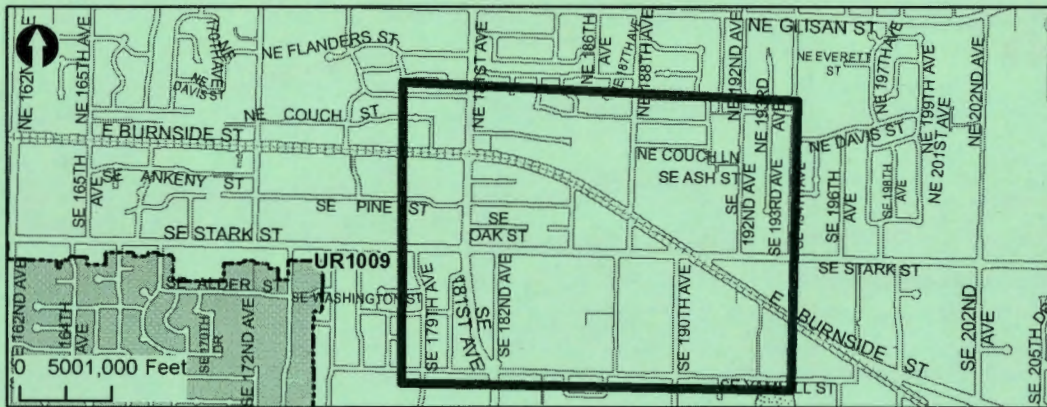

UR1009: Rockwood Town Center Future Streets

Description: This project will fund acquisition of needed right-of-way, design, and construction of new local streets within the Rockwood Town Center. The street or streets to be built will be most likely be adopted future streets on the City's future street plans.

Justification: Improve the public infrastructure to increase neighborhood safety and attract private investment.

Type of Project: Construction of facilities and utilities for growth.

Partners: Future permitted development will assist with acquisition and construction of local streets.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	1,000,000
Resources Total		1,000,000
Expenses	Design/Const Admin	60,000
	Construction	717,193
	Property Acq	100,000
	Admin (14%)	122,807
Expenses Total		1,000,000

**UNFUNDED PROJECT
Urban Renewal**

UR1013: 192nd Avenue (Wilkes to Halsey)

Description: This project will improve 192nd Avenue to a collector standard by adding sidewalk, bike lanes and improved street lighting.

Justification: Improve the public infrastructure to increase neighborhood safety and attract private investment.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	2,400,000
Resources Total		2,400,000
Expenses	Design/Const Admin	631,579
	Construction	1,473,684
	Admin (14%)	294,737
Expenses Total		2,400,000

**UNFUNDED PROJECT
Urban Renewal**

UR1017: Halsey Street (181st to 195th)

Description: This project will standardize Halsey Street within the urban renewal area. Improvements may include sidewalk, street lighting, and storm drains.

Justification: This project will help decrease traffic congestion, improve motorist and nonmotorist safety, and minimize delays on the city's major arterials.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Developer	600,000
	Urban Renewal	1,800,000
Resources Total		2,400,000
Expenses	Design/Const Admin	240,000
	Construction	1,745,263
	Property Acq	120,000
	Admin (14%)	294,737
Expenses Total		2,400,000

**UNFUNDED PROJECT
Urban Renewal**

UR1018: 201st Avenue (Stark to Burnside)

Description: This project will standardize 201st Avenue within the urban renewal area. Improvements may include sidewalk, street lighting, and storm drains.

Justification: This project will help decrease traffic congestion, improve motorist and nonmotorist safety, and minimize delays on the city's major arterials.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	960,000
Resources Total		960,000
Expenses	Design/Const Admin	96,000
	Construction	746,106
	Admin (14%)	117,894
Expenses Total		960,000

**UNFUNDED PROJECT
Urban Renewal**

UR1023: 197th Avenue at Burnside

Description: This project will construct pedestrian improvements to increase safety to light rail and MAX Path users..

Justification: This project will improve pedestrian safety as well as encourage walking and biking in Gresham.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	1,800,000
Resources Total		1,800,000
Expenses	Design/Const Admin	180,000
	Construction	1,278,948
	Property Acq	120,000
	Admin (14%)	221,052
Expenses Total		1,800,000

**UNFUNDED PROJECT
Urban Renewal**

UR1026: Rockwood Town Center Parks

Description: This project will locate, design, and construct a minimum of two new neighborhood parks in the Rockwood Town Center. The parks will serve as needed green space in what is anticipated to be a highly developed area. Any work will coordinate with the City of Gresham's Parks Division.

Justification: This project will improve livability and appeal of the Rockwood neighborhood.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Developer	600,000
	Grant	600,000
	Urban Renewal	1,200,000
Resources Total		2,400,000
Expenses	Design/Const Admin	36,000
	Construction	1,949,263
	Property Acq	120,000
	Admin (14%)	294,737
Expenses Total		2,400,000

UNFUNDED PROJECT
Urban Renewal

UR1035: Transit Shelters and Amenities

Description: In coordination with TriMet, this project will improve existing bus shelters and add more shelters to the network, improve network signage, and improve overall conditions for bus riders. Areas to be addressed include Sandy Boulevard, 181st Avenue, Stark Street, San Rafael Street, Wilkes Street, 192nd Avenue, and others as required by future routes.

Justification: Improving the transit facilities will increase the safety to transit riders and encourage greater transit use.

Type of Project: Construction of facilities and utilities for growth.

Partners: TriMet

Estimated Dollars:

Funds	Description	Total
Resources	TriMet	960,000
	Urban Renewal	240,000
Resources Total		1,200,000
Expenses	Design/Const Admin	12,000
	Construction	1,040,632
	Admin (14%)	147,368
Expenses Total		1,200,000

UNFUNDED PROJECT
Urban Renewal

UR1037: Pipe Replacements Along 181st South of I-84

Description: Partner with the City's Stormwater Division to replace pipe segments along 181st Avenue starting just south of Glisan Street and extending to I-84. Based on impervious percentages for existing and future conditions, 10% of the project would be funded by SDCs. This project is noted in Stormwater CIP#912500.

Justification: This capital project will provide increased capacity to alleviate expected flooding problems on 181st Ave. south of I-84.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	223,176
	Urban Renewal	2,008,579
Resources Total		2,231,755
Expenses	Design/Const Admin	451,800
	Construction	1,505,880
	Admin (14%)	274,075
Expenses Total		2,231,755

UNFUNDED PROJECT

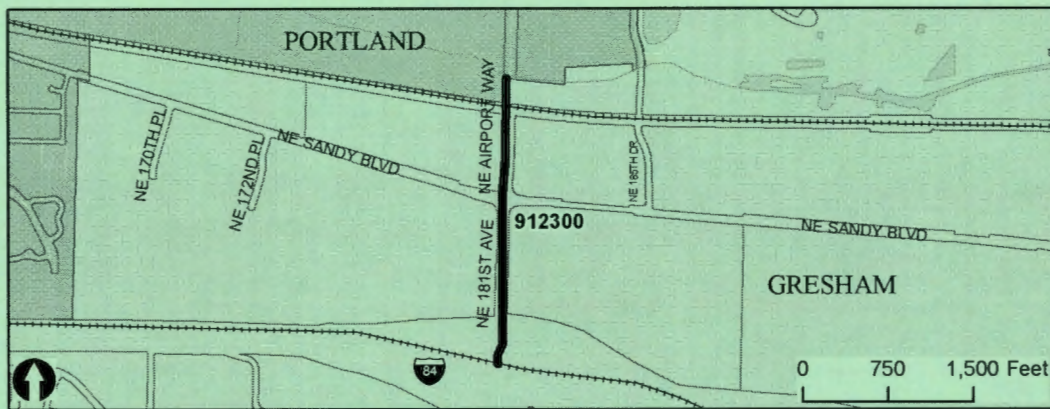

Urban Renewal

UR1038: Pipe Replacements Along 181st North of I-84

Description: Partner with the City's Stormwater Division to replace pipe segments along 181st Avenue starting north of I-84 and extending to the outfall of the 181st Avenue pipe system. Based on impervious percentages for existing and future conditions, 23% of the project would be funded by SDCs. This project is noted in Stormwater CIP #912300.

Justification: This capital project will provide increased capacity to alleviate expected flooding problems on 181st Ave. north of I-84.

Type of Project: Construction of facilities related to growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	SDC	352,306
	Urban Renewal	1,179,444
Resources Total		1,531,750
Expenses	Design/Const Admin	310,080
	Construction	1,033,560
	Admin (14%)	188,110
Expenses Total		1,531,750

**UNFUNDED PROJECT
Urban Renewal**

UR1039: Pipe Replacements- Barr Road & Halsey Street

Description: Partner with the City's Stormwater Division to replace pipe segments starting at the intersection of Halsey and Barr. Segments within the urban renewal area will funded through tax increment financing. Based on impervious percentages for existing and future conditions, 31% of the project would be funded by SDCs. This project is noted in Stormwater CIP #912200.

Justification: This capital project will provide increased capacity to alleviate expected flooding problems in 192nd Ave system.

Type of Project: Construction of facilities related to growth and to correct deficiencies.

Estimated Dollars:

Funds	Description	Total
Resources	Operating	1,368,509
	SDC	1,207,829
	Urban Renewal	1,320,000
Resources Total		3,896,338
Expenses	Design/Const Admin	788,760
	Construction	2,629,080
	Admin (14%)	478,498
Expenses Total		3,896,338

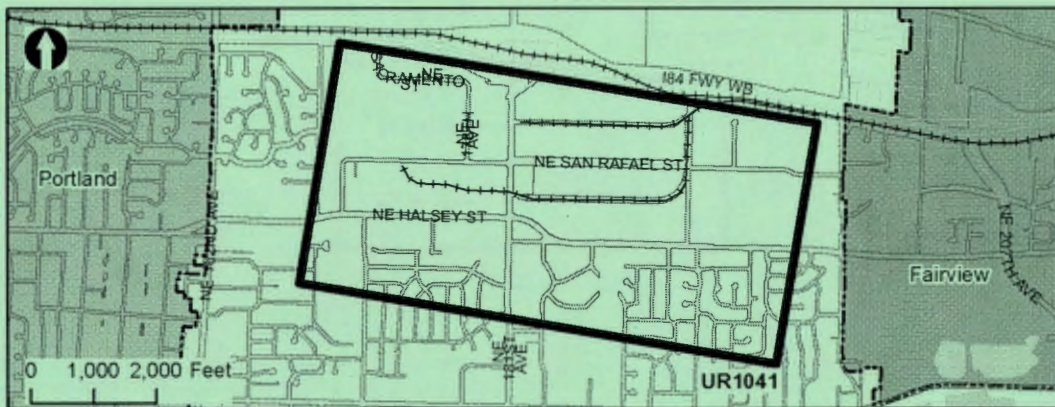

**UNFUNDED PROJECT
Urban Renewal**

UR1041: Team Track

Description: Access to rail is becoming more appealing to industrial businesses as fuel costs increase. The industrial area south of I-84 has two spur lines that connect to Union Pacific's rail road tracks. For businesses not located directly adjacent to the spur lines, but want access to freight rail, a shared loading dock, or team track, can be used. This project will build the team track to support long term industrial growth in the urban renewal area.

Justification: Improve the public infrastructure to attract private investment.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	1,200,000
Resources Total		1,200,000
Expenses	Design/Const Admin	120,000
	Construction	794,632
	Property Acq	138,000
	Admin (14%)	147,368
Expenses Total		1,200,000

**UNFUNDED PROJECT
Urban Renewal**

UR1042: Rail Spur Upgrade

Description: Industrial businesses are becoming more interested in access to freight rail. The industrial area south of I-84 has two spur lines with access to Union Pacific's main freight line. Currently the spur lines are in disrepair and need significant upgrading. This project will contribute to improve those spur lines in coordination with Union Pacific.

Justification: Improve the public infrastructure to attract private investment.

Type of Project: Construction of facilities and utilities for growth.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	1,200,000
Resources Total		1,200,000
Expenses	Construction	1,052,632
	Admin (14%)	147,368
Expenses Total		1,200,000

**UNFUNDED PROJECT
Urban Renewal**

UR1048: 181st Ave Street Improvements

Description: 181st Avenue the north/south link between the industrial and commercial uses within the urban renewal area. It's function and appearance is key to attracting new development. This project will fund boulevard-related improvements within 181st Avenue from Sandy to Glisan. It will coordinate with the projects listed in the Transportation CIP #515100, 516600, 521200, 521300

Justification: Attract new development to the urban renewal area and improve safety.

Type of Project: Construction of facilities and utilities for growth

Partners: City of Gresham Transportation Division, future development

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	1,200,000
Resources Total		1,200,000
Expenses	Design/Const Admin	105,263
	Construction	947,369
	Admin (14%)	147,368
Expenses Total		1,200,000

**UNFUNDED PROJECT
Urban Renewal**

UR1050: Burnside Road Boulevard Phase II

Description: This project will construct boulevard improvements from Stark to 197th in the Rockwood Town Center. Boulevard improvements may include undergrounding of utilities, wide sidewalks, pedestrian-oriented street lighting, street trees, bike lanes, and on-street parking, among other enhancements.

Justification: Improve the public infrastructure to increase neighborhood safety and attract private investment.

Type of Project: Construction of facilities and utilities for growth.

Partners: Additional Funding for Construction will be sought.

Estimated Dollars:

Funds	Description	Total
Resources	Urban Renewal	3,000,000
Resources Total		3,000,000
Expenses	Construction	2,631,579
	Admin (14%)	368,421
Expenses Total		3,000,000

Carryover Projects

Budgets for the Capital Improvement Program (CIP) projects are based on construction schedules put in place the previous fall. By spring, it is sometimes necessary to adjust the schedule for projects if they have been delayed by weather or other factors. Projects within the CIP that have not been completed by March are included in a listing of carryovers to be rebudgeted for the following fiscal year. This ensures that appropriations are available during the busy summer construction period. The appropriations are adjusted again in late summer, once the year-end accounting is complete, to eliminate unnecessary carryovers.

Listings of the requested CIP projects to be carried over to the 2011/12 fiscal year are included in the following tables. The total amount requested is \$33,696,773. Totals by fund are as follows:

Wastewater Collection & Treatment Plant	\$13,880,953
Water	\$3,847,710
Transportation	\$3,212,478
Footpaths & Bikeways	\$1,081,742
Parks, Trails & Open Space	\$2,025,105
Stormwater	\$3,119,627
Urban Renewal	\$6,529,158
Total	\$33,696,773
