MEMORANDUM

To: Campus Planning Committee (CPC)

From: Christine Taylor Thompson, Planning Associate  
University Planning

Subject: **Record of the October 26, 2006 CPC Meeting**

Attending: Carole Daly (Chair), Dietrich Belitz Patti Hachten, Stan Jones, Dennis Munroe,  
Randall McGowan, Chris Ramey

Staff: Christine Thompson (University Planning)

**1. Campus Planning Committee Orientation**

Background: Carole Daly, chair, provided a quick overview of the responsibilities of the committee and the subcommittees as described in the mailing.

No new members were present, so staff did not show the campus planning slide presentation.

Staff proposed that subcommittee membership stay the same due to very little change in the overall committee membership. However, if a member has a particular desire to change subcommittees this year she will be happy to accommodate this request. Once student representatives are appointed, they will join the subcommittees.

Staff reviewed the CPC 2006-7 work plan as described in the handout.

Staff reviewed how campus planning documents relate to the *Campus Plan* as described in the handout.

Discussion: A member expressed concern that more projects are falling under the category of privately controlled construction projects (identified as "C" projects in the *Campus Plan* Construction Project Planning Process Flow Chart, p. 14). If this is an indication of how future projects will be handled, how will *Campus Plan* policies be implemented? Staff noted that the *Campus Plan* requires these projects to go through an intentional step to determine what planning process will be followed and which *Campus Plan* policies apply. This step allows for greater potential to follow the planning process and address *Campus Plan* policies when compared to the prior plan, which did not require this step. Ultimately, the president is the decision maker for all projects.

A member added that the CPC is now a part of the senate structure. The intent is to provide more direct faculty involvement if a concern arises. Staff indicated that the University Senate president is notified about CPC meetings and a Senate

representative sits on the CPC.

A member noted that the increase in private funding has increased a sense of building ownership by individual departments. As a result, general-pool classrooms are diminishing.

Staff reminded committee members to send her an email if they wish to change subcommittees.

Action: No formal action was required. The committee comments will be taken into consideration as the project moves forward.

Please contact this office if you have questions.

## Summary of Recent and Upcoming Major Construction Projects

University Planning Office

October 2006

### Campus Planning Committee (CPC) review completed

*Schematic Design Completed /Construction Underway (or about to begin):*

Living-Learning Center (expected completion fall 2006)  
University Health and Counseling Center (expected completion fall 2006)  
Integrative Science Complex, Phase 1 - Lokey Laboratories ONAMI (expected completion 2007)  
Frohn Mayer Music Building Additions & Alterations (expected completion 2008)  
Miller Theater Expansion (expected completion spring 2008)

Likely to be reviewed by the CPC 2006-07

*Authorized/Funded/Planning or Schematic Design Underway:*

#### **College of Education Additions & Alterations (anticipated completion date fall 2008):**

This \$48.1 million project will replace temporary facilities, some of which have been in place for more than 30 years. It will add about 100,000 gsf of new construction and renovate about 17,000 gsf. The building project will allow the college to consolidate programs and departments that are currently fragmented due to insufficient space. The new, more sustainable facilities will include new classrooms, clinical teaching space, an instructional design resource center, distance learning and broadcast studios, and other specialized teaching space including math/science teaching methods rooms.

**Hayward Field Improvements (anticipated completion winter 2008):** This project will enable the university to host the 2008 United States Olympic Track and Field Team trials (June 27 - July 6, 2008) and will be completed in phases by winter 2008. It will provide improved facilities and infrastructure needed to host the meet -- its competitors, coaches and officials, the media covering the meet, and the spectators. The Olympic trials will bring national attention and prestige to the university, the state, and the region.

**Heritage Landscape Plan (anticipated completion fall 2006):** The University of Oregon has received a \$190,000 Getty Foundation Campus Heritage Grant to develop a campus heritage landscape plan, which will consist of a comprehensive cultural resource survey, planning guidelines for preserving open spaces, and preservation plans for primary open spaces and building sites. This project will complement prior studies and a recent campus plan update

**Oregon State Museum of Anthropology (OSMA) Curation Facility:** This project will expand the curation facilities to provide secure and climate-controlled storage for archaeological and natural history specimens from around the world. The current facilities are full and numerous collections are temporarily housed in sub-standard buildings scattered around campus.

**Transportation Plan Update:** This project will update the university's 1976 Transportation Plan. This was identified as a future work item when the *Campus Plan* was update in 2005.

**University Village Development Plan:** The project will study development options for the off-campus ODOT and Romania Lands.

*Authorized/Not Funded*

**Alumni Center Project:** This project will build a new freestanding building to accommodate the Alumni, Development and Foundation offices.

**Lillis Business Complex Phase 3 - Gilbert/Peterson renovation:** This renovation project will upgrade Gilbert and Peterson Halls. It will provide safer, seismically upgraded buildings with renovated classrooms for use in the general university classroom pool. No exterior work is planned; therefore CPC review is not required.

**Prioritized/Not Authorized/Not Funded**

Condon Hall Addition and Alterations  
Integrative Science Complex, Phase 2

**Possible Future Projects**

*Identified as Possible Future Projects/Not Prioritized*

AAA Expansion and Alterations  
Allen Hall Addition/Energy Efficient Alterations  
Computing Center Addition and Alterations  
EMU Expansion and Alterations  
Military Science Facility  
PLC Expansion and Alterations  
Psychology Facility  
Science Library Expansion and Alterations  
Student Recreation Center Expansion  
Student Tennis Center Addition
