

Land Use Plan Conformance and NEPA Adequacy

U.S. Department of the Interior, Bureau of Land Management
Prineville District, 3050 NE Third Street, Prineville, Oregon

Proposed Action Title: 19-20 Allotment, #4083, Grazing Lease

National Environmental Policy Act (NEPA) Register No. OR-054-06-110

Location of the Proposed Action: 19-20 Allotment is located 3 air miles northeast of Monument, Oregon.

Purpose of and Need for Action: The grazing permit for this allotment will expire in FY07. The purpose of and need for his action is to re-authorize grazing use for another 10-year period.

Description of the Proposed Action: Renew a grazing permit for the permittee in the above listed allotments for a term of ten years. Except for the term shown on the permit, all terms and conditions on the permit will remain the same, including allocated AUM's and season of use.

Plan Conformance:

The above project has been reviewed and found to be in conformance with one or more of the following BLM plans: These documents are available for review at the Prineville District BLM office.

John Day Resource Management Plan (RMP) & Environmental Impact Statement, Record of Decision August, 1985.

The proposed action is in conformance with the applicable LUP because it is specifically provided for in the LUP decision referenced in the *NEPA Adequacy Criteria* section of this document.

Applicable NEPA document and related documents:

The following NEPA documents and related documents address the proposed action:
John Day Resource Management Plan (RMP) & Environmental Impact Statement (EIS), and Record of Decision August, 1985.

NEPA Adequacy Criteria

- 1. Is the current proposed action substantially the same action (or is a part of that action) as previously analyzed? Is the current proposed action located at a site specifically analyzed in an existing document/*

Livestock grazing in the 19-20 Allotment is specifically addressed in the RMP/EIS/ROD referenced above. The 19-20 Allotment is addressed on page 30 of the RMP/EIS/ROD referenced above. The grazing preference authorized in the 160 acre

allotment is 26 AUM's. No portion of the allotment was proposed for livestock exclusion.

The grazing season authorized in the John Day RMP/EIS/ROD is from April 1 until November 30. Since 1997, the authorized grazing season in the 19-20 Allotment has been from April 15 until May 31. The authorized grazing season will continue to be from April 15 until May 31.

2. *Is the range of alternatives analyzed in the existing NEPA document appropriate with respect to the current proposed action, given current environmental concerns, interests, and resource values?*

Alternatives in the planning document (page 7 to page 10 of the Record of Decision) ranged from emphasize commodity production to no action. 19-20 Allotment is classified as a "C" (Custodial) allotment. The grazing preference will be 26 AUM's for the 19-20 Allotment and appears appropriate given the current issues.

3. *Is the existing analysis valid in the light of any new information or circumstances?*

New information which would enter into the analysis includes the Standards for Rangeland Health & Guidelines for Grazing Management (43 CFR 4180) available for review at the Prineville District BLM. The BLM is required to assess all public land grazing allotments for compliance with the Standards & Guidelines. The allotment assessment for this allotment is scheduled to be completed by 2008. Until the completion of the evaluation for this allotment, the new term lease will contain stipulations that will provide for modifications of the grazing of the public lands, if needed, on completion of the evaluation.

4. *Do the methodology and analytical approach used in the existing NEPA documents(s) continue to be appropriate for the current proposed action?*

The John Day RMP/EIS addressed impacts of continued grazing and provided objectives and recommendations to facilitate maintenance of existing ecological condition trends (pages 14-18 and 29-35 of ROD). The approach is still considered vital.

5. *Are the direct and indirect impacts of the current proposed action substantially unchanged from those analyzed in the Draft John Day RMP/EIS)? Does the existing NEPA document analyze site-specific impacts related to the current proposed action?*

Impacts resulting from grazing are essentially unchanged from those analyzed in the Draft John Day RMP/EIS. The Draft John Day RMP/EIS(pages 62-65, 72-73) stated grazing management will beneficially impact soils and water resources, plant diversity, riparian vegetation, wildlife upland habitat, and fish habitat. Under the preferred alternative grazing will have no significant effect on vegetation types and

improve ecological condition. Under the preferred alternative there will be a low impact to cultural resources by grazing.

6. *Are the cumulative impacts that would result from the implementation of the current proposed action substantially unchanged from those analyzed in the existing NEPA document(s)?*

The RMP does not specifically address cumulative impacts of grazing but does address long term impacts of the action with the assumption that the grazing activity would continue (impact analysis is on page 63 of Draft RMP/EIS). AUM's throughout the John Day areas will change from 25,323 to 25,734 over time. Recommendations and objectives in the document reflect the impacts and expected improvements that will continue with the ongoing grazing. The proposed action is substantially unchanged from those analyzed impacts.

7. *Are the public involvement and interagency review associated with the existing NEPA document(s)?*

Many of the individuals/organizations on our current "interested publics" list are the same as those on the mailing list for the RMP/EIS referenced above. A copy of this DNA worksheet will be mailed to a representative of the Oregon Department of Fish and Wildlife, and to other individuals and organizations that have expressed an interest in this or similar actions.

Interdisciplinary Analysis:

The following Prineville District BLM employees reviewed this analysis for accuracy in their area of expertise.

<u>Name</u>	<u>Resource Represented</u>	<u>Initials/Date</u>
Don Zalunardo	Wildlife, Special Status Animals	DRZ 6/14/07
Heidi Mottl	Recreation, Wilderness	Hm 3/25/07
John Morris	Fisheries	JM 5/1/07
John Zancanella	Cultural Resources	JZ 3/26/07
Ron Halvorson	Botany, Special Status Plants	RH 3/29/07
Kenneth Primrose	Range, Livestock Grazing	KT 5/2/07
Larry Thomas	Soils, Hazardous Materials	LT 5/4/2007
Dan Tippy	NEPA Coordinator	DT 5/2/07
Bill Pieratt	Noxious Weeds	BP 5-1-07

Mitigation Measures:

The BLM is in the process of implementing the Standards for Rangeland Health and Guidelines for grazing management. This lease is subject to modification as necessary to achieve compliance with these standards and guidelines (43 CFR 4180).

* One species of Federally Listed, Federal Candidate or Bureau Sensitive wildlife was found when a search of the district sightings database was done. List is attached. DRZ

The following mitigation measures will be implemented as part of the proposed action: A Manual Supplement, entitled "Rangeland Monitoring in Oregon and Washington", was developed and adopted by the BLM as a guidance document. The Prineville District also developed a district-monitoring plan. Both of these documents receive periodic review and revision. These documents provide a framework and minimum standards for choosing the timing and study methods to collect information needed to issue decisions which affect grazing management as well as watershed, wildlife and threatened and endangered species.

Recommendations:

I recommend that the grazing lease for the 19-20 Allotment be renewed.

Prepared By: Michelle Tuttle Date 12-3-07
Title: Rangeland Management Specialist

Plan Conformance/DNA Determination

The proposed action and any specified mitigation measures (s) were determined to meet the criteria for a Determination of NEPA Adequacy (DNA). No additional environmental analysis is required. All cultural, T & E plant, and T & E wildlife specialists have provided clearance for the proposed project.

Reviewed By: Danny L. Spring Date 12/4/07
Environmental Coordinator

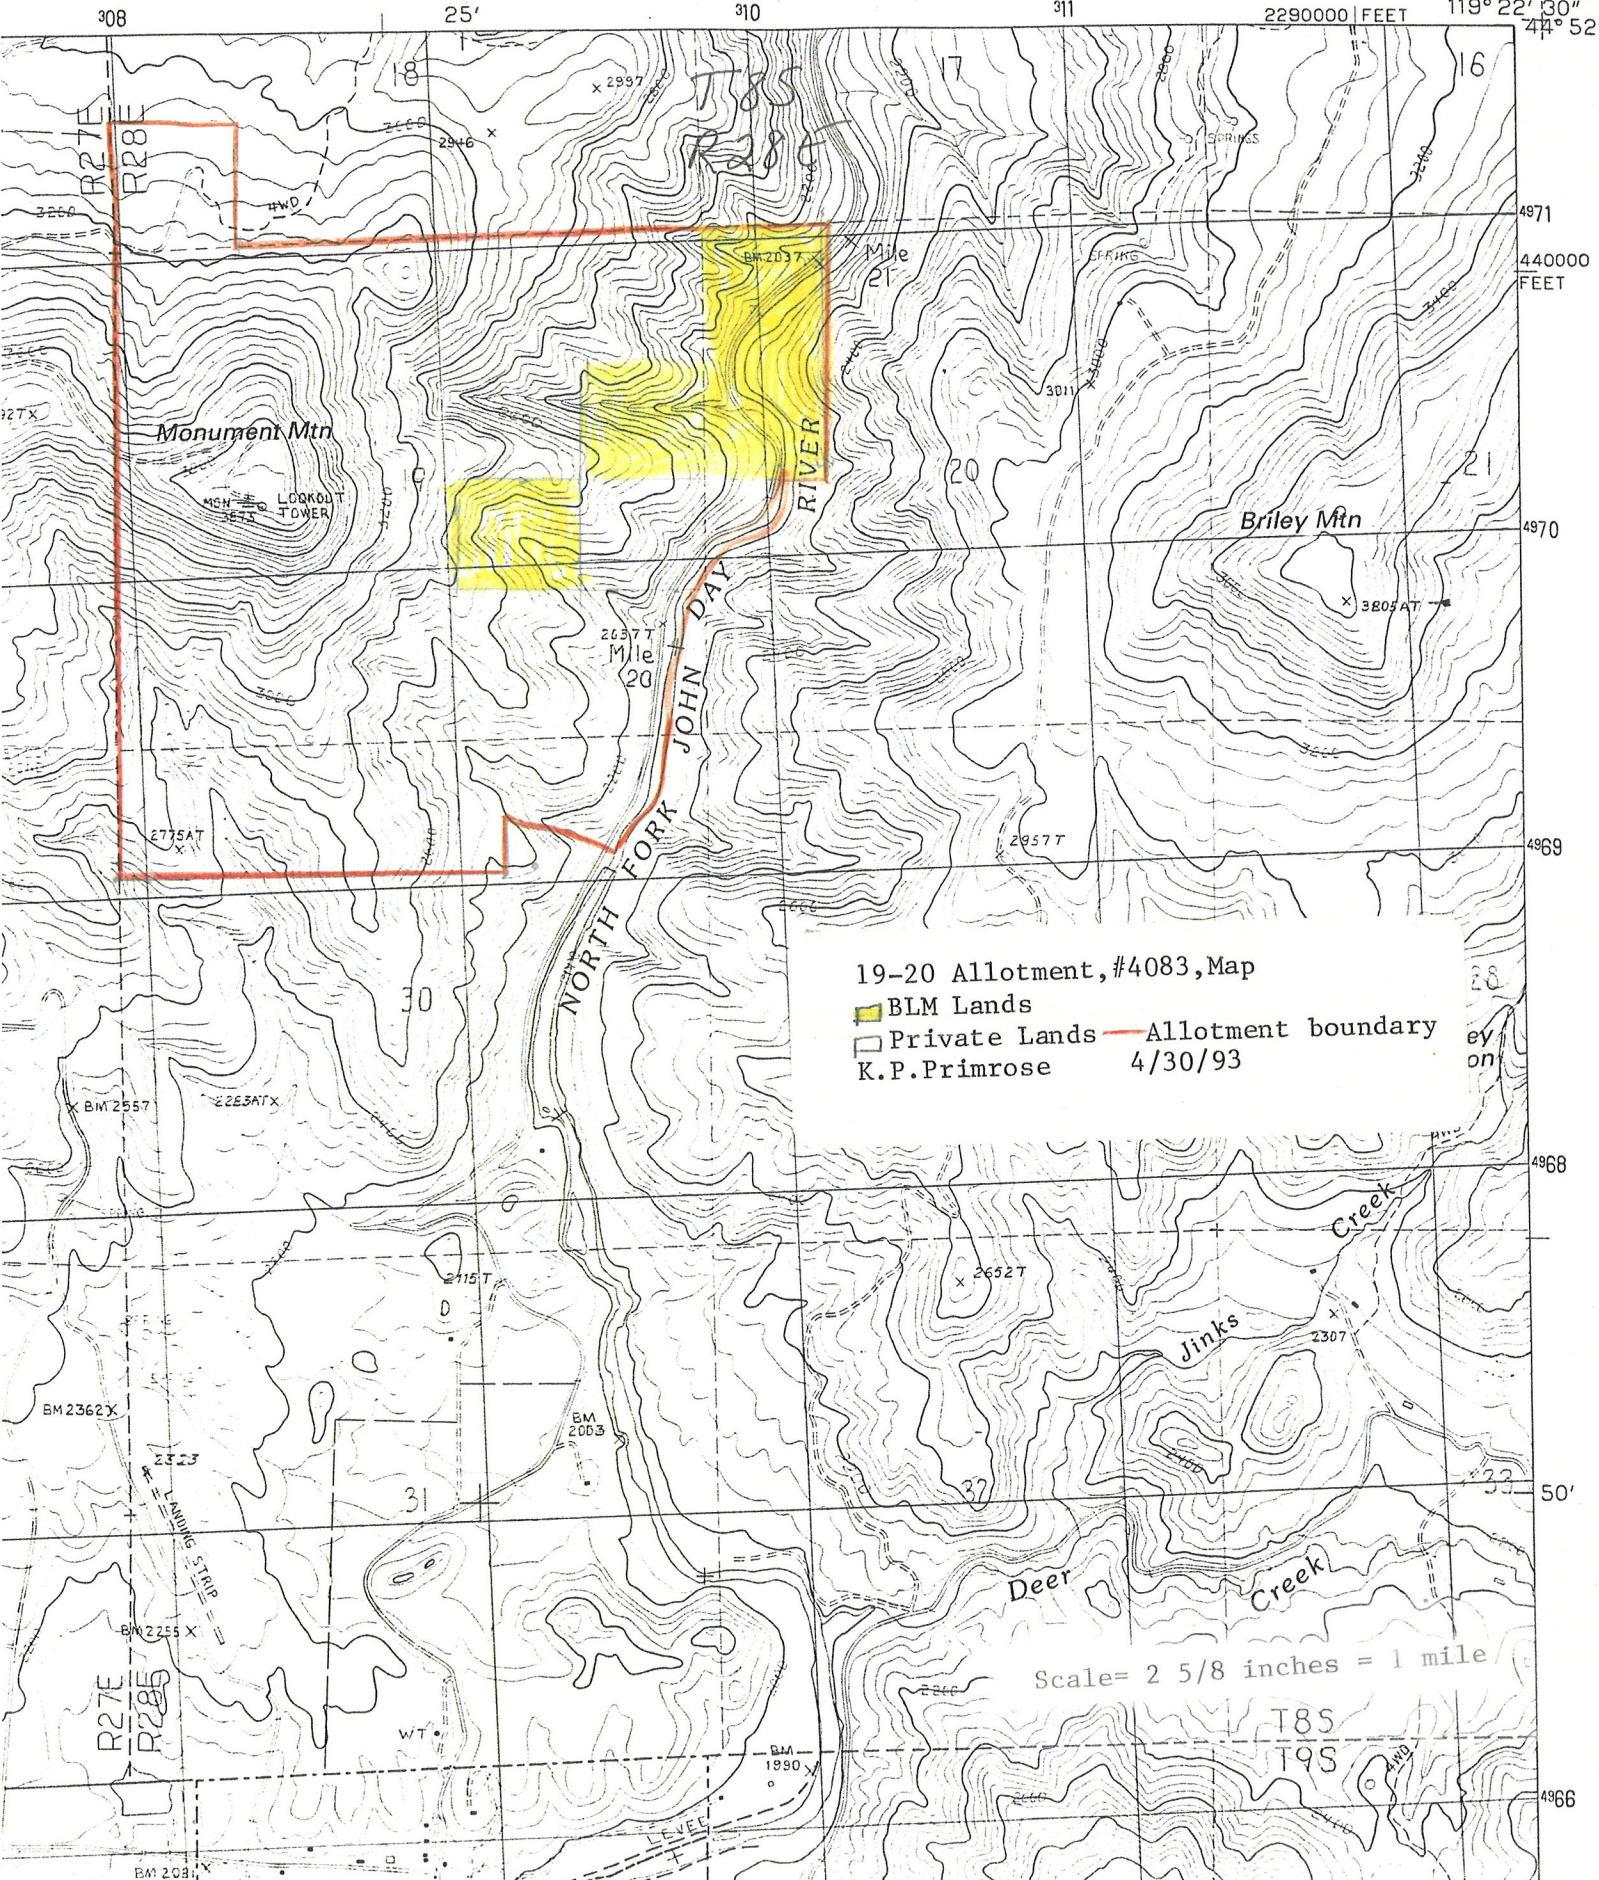

Approval:

Based on the review documented above, I conclude that this proposal conforms to the applicable land use plan and the NEPA documentation fully covers the proposed action and constitutes BLM's compliance with the requirements of NEPA.

Approved By: Danny L. Spring Date 2/8/08
