NOTICE OF THE FIELD MANAGERS PROPOSED DECISION

INTRODUCTION
This document addresses the issuance or renewal of your grazing lease. A proposed decision is required by the Code of Federal Regulations (CFR) 4100 to be served on any affected applicant, permittee or lessee who is affected by the proposed actions, terms, conditions, or modifications relating to issuance of a grazing permit/lease.

BACKGROUND
The current grazing lease for the Foster Allotment, #00037 will expire on 2.28.09 and you, the lessee, for this allotment have requested a renewal. An Interdisciplinary team completed a Land Use Plan Conformance and Determination of NEPA Adequacy (DNA) document (#OR-054-08-177) for this proposed renewal. A copy of the DNA has been mailed out to you, and more are available upon request.

PROPOSED DECISION
Therefore, it is my proposed decision to issue you a grazing lease, authorization #3605017, for livestock grazing on the allotment listed below. Your grazing lease shall be for a period of ten years (2009-2019) and will reflect the following:

<table>
<thead>
<tr>
<th>Allotment Name and Number</th>
<th>Livestock Number</th>
<th>Kind</th>
<th>Grazing Period Begin</th>
<th>Grazing Period End</th>
<th>% PL</th>
<th>Type Use</th>
<th>AUM's</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foster Allotment #00037</td>
<td>2</td>
<td>C</td>
<td>04/15</td>
<td>8/01</td>
<td>100</td>
<td>Active</td>
<td>7</td>
</tr>
</tbody>
</table>

Due to computer calculation rounding, the above aums may not correspond with your actual grazing preference. Your actual grazing preference is shown below.

Total animal unit months (aums) are 7 of which 7 are Active and 0 are Suspended.
Other terms and conditions of the permit/lease would be as follows:

- Lessees/permittees are required to submit actual use grazing records within 15 days of completion of the years grazing use.

- Salting of livestock within one-quarter mile of water is prohibited. Supplemental feeding of livestock on public lands is prohibited without prior authorization from the BLM.

- Lessees/permittees are required to maintain all range improvements for which they have maintenance responsibilities.

- The Fish and Wildlife Service and the National Marine Fisheries Service are evaluating species and have found some for listing that are present within the Central Oregon Resource Area Boundary. If these listed species as well as any future listed threatened and endangered species are found on Federal Lands located within this allotment boundary, this lease is subject to future modification to achieve compliance with the listing.

- Lessees/permittees are to provide reasonable access across private and leased lands to the BLM for the orderly management and protection of the public lands as allowed in 43 CFR 4130.3-2 (H).

- The BLM is in the process of implementing the standards for rangeland health and guidelines for grazing management. This lease/permit is subject to future modification as necessary to achieve compliance with the standards and guidelines (43 CFR 4180).

**RATIONALE**

Based on the review of DNA # OR-054-08-177, I determined that this renewal meets the criteria for a Determination of NEPA Adequacy (DNA) and that no additional environmental analysis is required. Furthermore, the renewal conforms to the applicable land use plan and that the NEPA documentation fully covered the proposed action and constitutes BLM’s compliance with the requirements of NEPA.
