      2. Citizens will be provided information as needed to be involved in planning decision-making.
      3. Notification of planning activities will be made by a variety of means to make residents aware of upcoming decisions which may affect them.

   B. Recommendations

      1. Informational material be prepared for distribution to schools, civic groups and other organizations, and individual citizens to explain the plan and planning procedure.
2. That plan summaries be distributed to all residents.

II. Goal (Land Use Planning): To establish a land use planning process and policy framework as a basis for all decisions and actions related to use of land and to insure an adequate factual base for such decisions and actions.

A. Policies

1. Land use decisions will take into account inventories of land uses, land resources and the availability of public schools, transportation, water supply, sewage and solid waste disposal.

2. Changes or revisions in the land use plan will be made after citizen involvement; coordination with affected local, state and federal agencies; and after sufficient public hearing to identify problems, issues and solutions to the resolution of conflicts.

3. As a condition for making changes or revisions in this land use plan, it will be determined that community attitudes and, or, physical, social, economic or environmental changes have occurred in the City or related areas since the plan was adopted and that a public need supports the change or revision, or that the plan as written and adopted is incorrect or in error.

4. This land use plan will be implemented by zoning and subdivisions ordinances and other ordinances as necessary to carry out such plan.

5. A public meeting may be held annually to consider whether plan revisions are warranted, and that citizens may petition for plan review and revision at more frequent intervals. However, the plan will be reviewed and revised as necessary every two years.

B. Recommendations

1. Findings made in the course of land use planning decisions should be related to specific planning policies or background information and that such findings be documented.

2. An official copy of the plan will be kept on file by the City Recorder and a second copy be available for review.

III. Goal (Agricultural Lands): To preserve and maintain agricultural lands.

A. Findings: This goal does not apply to lands inside the incorporated boundary of the City.

B. Urbanizable land: See "Urbanization Goal".

IV. Goal (Forest Lands): To conserve forest lands for forest uses.

A. Findings: The goal does not apply to either incorporated lands or urbanizable lands since neither lands are inventoried as forest lands.
V. Goal (Open Spaces, Scenic and Historic Areas, and Natural Resources): To preserve open space and protect natural and scenic resources.

A. Policies

1. Fort Lloyd Monument area will be protected.
2. Other significant historical sites and structures will be recognized and protected.

B. Recommendations: The City should aid in the preservation and maintenance of the museum.

VI. Goal (Air, Water and Land Resource Quality): To maintain and improve the quality of the air, water and land resources.

A. Policies

1. Future growth and development will comply with local, state and federal air, water and land quality regulations.
2. Living conditions in the City will be protected by locating heavy industry outside the City.
3. Uses with objectionable noise, smoke, odor, visual and other objectional characteristics may be prohibited from locating in areas where such conditions are incompatible with adjacent uses.

VII. Goal (Areas Subject To Natural Disasters and Hazards): To protect life and property from natural disasters and hazards.

A. Policies

1. New developments of land will not increase flood hazards nor restrict or divert flood waters into areas not previously subject to flooding, and flood plains will be regulated to meet requirements of the National Flood Insurance Program when flood elevation data becomes available.
2. Existing irrigation ditches will be maintained so as to minimize flood danger.

B. Recommendations

1. New land development should meet adequate levels of fire safety requirements.
2. High groundwater areas should be mapped and development limitations recognized.

VIII. Goal (Recreational Needs): To satisfy the recreational needs of the citizens of the state and visitors.

IX. Goal (Economy of the State): To diversify and improve the economy of the state.

A. Policy: A moderate, orderly population growth will be encouraged within the limits of city facilities and services
and availability of land.

B. Recommendations: The City should consider low density development requirements on the periphery of its boundaries in order to provide buffer areas between urban and agricultural uses.

X. Goal (Housing): To provide for the housing needs of citizens of the state.

A. Policies

1. Housing will be encouraged in locations which accommodate existing urban development and make efficient use of the required facilities and services.
2. Buildable lands will be made available for housing developments consistent with the carrying capacity of public facilities and services.

XI. Goal (Public Facilities and Services): To plan and develop a timely, orderly and efficient arrangement of public facilities and services to serve as a framework for urban development.

A. Policies

1. All future growth and development will be based upon a consideration of the limitations of city facilities and services.
2. City facilities will be used for reasonably full development of urban land before the development of lands in the urban growth boundary.
3. The City will work with the County and other units of local, State, and Federal government in establishing and implementing a solid waste removal program that addresses the needs of the people in the area and meets state requirements.

XII. Goal (Transportation): To provide and encourage a safe, convenient and economic transportation system.

A. Policies

1. Oregon Highway 86 will be the major access route to the City.
2. Mass transit connections to the City of Baker will be encouraged as economic practicality dictates.

B. Recommendations: Local airport facilities should be protected from incompatible encroachment that may affect their use.

XIII. Goal (Energy): To conserve energy.

A. Policy: All available energy conservation measures will be used in the orderly planned growth of the community.

XIV. Goal (Urbanization): To provide for an orderly and efficient transition from rural to urban use.
A. Findings: The ownership patterns of land and the extent of construction thereupon have made lands within the urban growth boundary of the City irreversibly committed to a use other than farm use.

B. Policies

1. Conversion of urbanizable land from rural land will be based on a consideration of:
   a. Orderly, economic provisions for public facilities and services;
   b. Availability of sufficient land for the various uses to insure choices in the market place;
   c. Statewide land use goals; and
   d. Encouragement of development within urban areas before conversion of urbanizable areas.
2. Use and development of urbanizable land will be planned to accommodate the overall street pattern of the City.

PART 3

2. On the municipal fire protection system capability;
3. On the municipal solid waste disposal facilities;
4. On the traffic flow patterns of the City; and

II. A. Commercial Residential zone (CR): The purpose of the CR zone shall be to provide for the allocation and regulation of lands primarily for the customary and ordinary sales and services establishments that are reasonably compatible with high density single and two family dwellings.
