LAND USE GOALS; POLICIES; RECOMMENDATIONS

I. Citizen Involvement

A. Goal: To provide an opportunity for citizens to be involved in all planning issues and to involve them in all planning decisions.

B. Policies:

1. That maps, charts and other planning data will be available for citizen review and consideration in making planning decisions.

2. That citizens will be encouraged to attend public planning meetings and assist in determining problem solutions and in making other City planning decisions.

3. That notification of planning activities will be made by a variety of means to make residents aware of upcoming decisions which may affect them.

C. Recommendation:

1. That Plan summaries be distributed to all residents after adoption.
II. Land Use Planning Process

A. Goal: To adopt a land use plan and implementation ordinances needed to provide factual bases for planning decisions.

B. Policies:

1. That development will be encouraged providing it does not unduly diminish agriculture of the area.
2. That private investments will be protected from incompatible development which might likely diminish their value or unduly increase their taxes.
3. That public investments for services and facilities will be protected from development which might likely exhaust or exceed their capacity and require additional capital improvements, unless such development pays the cost for the service demands that it is creating.
4. That as a condition of making plan changes, it will be determined that community attitudes and/or physical, social, economic, or environmental changes have occurred in the area or related areas since plan adoption and that a public need supports the change, or that the original plan was incorrect.
5. That planning decisions will be coordinated with other local, State or Federal agencies having an interest in such decisions.
6. That minor plan changes such as corrections or boundary adjustments and realignments will be made by the governing body at a public hearing.
7. That a public meeting will be held every 2 years to consider whether plan revisions are warranted, and that the public may petition for plan review and revision at more frequent intervals.

C. Recommendations:

1. That findings made in the course of land use planning decisions be related to specific planning policies or background information and that such finding be documented.
2. That an official copy of the plan be kept on file by the Recorder and a second copy be available for review.

III. Agriculture Land Preservation

A. Goal: To preserve and maintain productive agricultural lands.

B. Policies: Although it is recognized that the City is not bound to Goal III, since the Urban Growth Boundary is basically the same as the city limits, it was desired that the following policies be recorded and applied as guidelines to any agricultural land being converted to urban uses.

1. That agricultural lands will be developed only if less productive alternative sites are unavailable and needed levels of access and services exist or can be planned to accommodate such development.
2. That conversion of agricultural land to residential or other uses will be approved only after the following have been determined:
   a. There is a need consistent with related plan objectives and policies.
   b. The resulting uses will not likely create undue interference with accepted farming practices in the area.
   c. Such agriculture land is anticipated to be needed primarily for residential and possibly industrial uses, but before it is developed, all affected citizens would have the opportunity to express their opinions on the matter.
3. That development in these areas would be required to take place in an orderly fashion.

IV. Forest Lands
   A. Goal: To conserve forest lands for forest uses.
      This goal does not apply since there is no commercial timber within the City limits.

V. Open Space, Scenic and Historic Areas and Natural Resources
   A. Goal: To conserve open space and protect natural, cultural, historical and scenic resources.
   B. Policy: That the significance of historical sites and structures will be recognized and protected.
   C. Recommendation: That zoning ordinance provisions be established to insure continuation of the town character and visual attractiveness.

VI. Air, Water and Land Resource Quality
   A. Goal: To preserve or improve the quality of our land, air, and water.
   B. Policy: That all future growth will comply with local, State and Federal air, water and land quality laws.

VII. Areas Subject to Natural Hazards and Disasters
   A. Goal: To protect life and property from natural disasters and hazards.
   B. Policies:
      1. That existing irrigation ditches will be maintained so as to minimize danger.
      2. That new development will not increase flood hazards nor restrict or divert floodwaters into areas not previously subject to flooding.
   C. Recommendations:
      1. That all new development meet desired levels of fire safety requirements.
2. That high groundwater areas be mapped and development limitations recognized.

VIII. Recreation Needs
A. Goal: To satisfy the recreation needs of the community.
B. Policies:
   1. That surrounding area recreation facilities will be encouraged and promoted.
   2. That future development will provide adequate open space to maintain the character of the community.
   3. That private park and recreation improvements will be encouraged.

IX. Economic Development
A. Goal: To aid in the economy of the City.
B. Policies:
   1. That a moderate, orderly population growth will be encouraged within the limits of water and sewerage systems and other utility capacities and availability of land.
